Or courses to the value of one unit - to be discussed with the academic advisor.
### Programme Regulations

#### Year 3

9  ST302  Stochastic Processes (H) and
   ST304  Time Series and Forecasting (H)
10  ST301  Actuarial Mathematics: Life (H) (formerly ST305) and
   ST306  Actuarial Mathematics: General (H)
11  ST330  Stochastic and Actuarial Methods in Finance
12  Courses to the value of one unit from:
   MA203  Real Analysis
   MA208  Optimisation theory
   MA209  Differential equations
   MA313  Probability of Finance
   MA318  History of Mathematics in Finance and Economics
   ST300  Regression and Generalised Linear Models (H) **
   ST303  Stochastic Simulation (H)
   ST308  Bayesian Inference (H) **
   ST312  Applied Statistics Project (H)

** Either ST300 or ST308 needs to be chosen for exemption of CT6.

### Notes

- § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
- * FM212 could lead to an exemption of CT2 for students who have chosen AC104
- ** Either ST300 or ST308 needs to be chosen for exemption of CT6.

Students can replace 10, 11 or 12 with subjects to the value of one unit approved by their tutor, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

This programme is externally accredited by the Institute and Faculty of Actuaries. Further information is available on the Department of Statistics website lse.ac.uk/statistics/study/prospective/UG-Programmes/exemptions.aspx.

---

### BA in Anthropology and Law

#### Programme Code: UBANLL2

**For all first, second and third year students in 2015-16**

<td>Courses to the value of one unit not already taken to be selected from Anthropology Selection List A, List B or List C.</td>
</tr>
</tbody>
</table>

**Notes**

- No more than one unit taken under papers 8 and 12 may be selected from Anthropology Selection List A.
- LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

### Anthropology Selection List A

- AN205  The Anthropology of Melanesia
- AN216  Cognition and Anthropology: Human Development in Cultural Environments (H) (n/a 15/16)
- AN221  The Anthropology of Christianity (H)
- AN223  The Anthropology of South East Asia (H)
- AN230  The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16)
- AN231  The Anthropology of China (H) (n/a 15/16)
- AN237  The Anthropology of Development (H)
- AN238  Anthropology and Human Rights (H) (n/a 15/16)
- AN240  Investigating the Philippines - New Approaches and Ethnographic Contexts (H) (n/a 15/16)
- AN243  Children and Youth in Contemporary Ethnography (H) (n/a 15/16)
- AN244  Anthropology and Media (H)
- AN245  The Anthropology of Borders and Boundaries (H) (withdrawn 15/16)
- AN246  The Anthropology of Post-Soviet Eurasia (H) (withdrawn 15/16)
- AN250  The Anthropology of South Asia (H) (n/a 15/16)
- AN251  Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (H) (n/a 15/16)
- AN252  Anthropological Approaches to Value (H) (n/a 15/16)
- AN268  Anthropology of Schooling (H) (withdrawn 15/16)
- AN269  The Anthropology of Amazonia (H) (n/a 15/16)
- AN274  Subjectivity and Anthropology (H)
- AN275  The Anthropology of Revolution (H)
- AN298  Research Methods in Social Anthropology (H)

An approved paper taught outside the Department

### Anthropology Selection List B

- AN200  The Anthropology of Kinship, Sex and Gender
- AN227  The Anthropology of Economic Institutions and their Social Transformations (withdrawn 15/16)
- AN256  Economic Anthropology (1): Production and Exchange (H)
- AN357  Economic Anthropology (2): Transformation, Development, and Globalisation (H) (n/a 15/16)

### Anthropology Selection List C

- AN300  Advanced Theory of Social Anthropology
- AN301  The Anthropology of Religion

#### Law Selection List

- LL201  Administrative Law
- LL202  Commercial Contracts
- LL203  Law of Business Associations
- LL204  Advanced Torts
- LL205  Medical Law
- LL207  Civil Liberties and Human Rights
- LL210  Information Technology and the Law
- LL212  Conflict of Laws
- LL221  Family Law
- LL233  Law of Evidence
- LL241  European Legal History
- LL242  International Protection of Human Rights
- LL250  Law and the Environment
- LL251  Intellectual Property Law
- LL253  The Law of Corporate Insolvency
- LL257  Labour Law
- LL259  Legal and Social Changes Since 1750
- LL272  Outlines of Modern Criminology (H)
- LL278  Public International Law
- LL284  Sentencing and Treatment of Offenders (H)
- LL293  Taxation
- LL295  Media Law
- LL300  Competition Law
- LL305  Jurisprudence
### BSc in Business Mathematics and Statistics

BSc in Economic History

Programme Code: UBEH

For second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1  EH101 The Internationalisation of Economic Growth, 1870 to the Present Day

2  Either EC100 Economics A or EC102 Economics B

3  One from:

   HY113 From Empire to Independence: the Extra-European World in the Twentieth Century

   HY116 International History since 1890

4  An approved paper from outside the Department

Year 2

5  EH237 Theories and Evidence in Economic History

6  One from:

   EH204 Money and Finance: From the Middle Ages to Modernity

   EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)

   EH207 The Making of an Economic Superpower: China since 1850

   EH211 Africa and the World Economy, 1500-2000

   EH225 Latin America and the International Economy (n/a 15/16)

   EH238 The Industrial Revolution

   EH240 Business and Economic Performance since 1945: Britain in International Context

7  Another course from papers 6 and 7, or a level 200 or 300 course from outside the Economic History Department

Year 3

9 & 10 Two from:

   EC311 History of Economics: How Theories Change

   EC301 The Origins of the World Economy, 1450-1750 (n/a 15/16)

   EC304 The Economic History of North America: from Colonial Times to the Cold War

   EC306 Monetary and Financial History since 1750 (n/a 15/16)

   EC307 The Economic History of South Asia, 1600-2000

   EC308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

   EC325 Issues of Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

   EC326 Innovation and its Finance in the 19th and 20th Centuries

   EC327 China’s Traditional Economy and its Growth in the Very Long-Term

11  A further paper taught by the Department of Economic History from those listed under papers 7 or 9 & 10

Notes

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1  EC100 Economics A or

2  EC102 Economics B §

3  EH101 The Internationalisation of Economic Growth, 1870 to the Present Day

4  MA100 Mathematical Methods

5  An approved paper taught outside the Departments of Economics and Economic History

Year 2

5  Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II or EC210 Macroeconomic Principles

6  EH237 Theories and Evidence in Economic History

7  One from:

   EH204 Money and Finance: From the Middle Ages to Modernity

   EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)

   EH207 The Making of an Economic Superpower: China since 1850

   EH211 Africa and the World Economy, 1500-2000

   EH225 Latin America and the International Economy (n/a 15/16)

   EH238 The Industrial Revolution

   EH240 Business and Economic Performance since 1945: Britain in International Context

8  An approved paper taught outside the Departments of Economic History and Economics (normally papers available to 2nd and 3rd year students) or a further paper from 7 above

Year 3

9  One from:

   Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II or EC210 Macroeconomic Principles

10  One from:

    EC311 History of Economics: How Theories Change

    EC301 The Origins of the World Economy, 1450-1750 (n/a 15/16)

    EC304 The Economic History of North America: From Colonial Times to the Cold War

    EC306 Monetary and Financial History since 1750 (n/a 15/16)

    EC307 The Economic History of South Asia, 1600-2000

    EC308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

    EC325 Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

    EC326 Innovation and its Finance in the 19th and 20th Centuries

    EC327 China’s Traditional Economy and its Growth in the Very Long-Term

11  Either a further paper from 7 above or a further paper from 10 above

12  EH390 Dissertation in Economic or Social History

Notes

Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

</table>

**Notes**

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

In exceptional circumstances a student may substitute an outside paper for Paper 12. This outside paper should be both of an advanced nature and coherent with the student’s other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student’s choice of papers must also be countersigned by the Departmental Tutor.

- GV308 Leadership in the Political World (H)  
- GV309 Politics of Money and Finance in Comparative Perspective  
- GV311 British Government  
- GV312 Advanced Topics in Government: Executive Politics  
- GV313 Politics of Trade in Comparative Perspective  
- GV314 Empirical Research in Government

### Economics List

- EC301 Advanced Economic Analysis  
- EC302 Political Economy  
- EC303 Economic Analysis of the European Union  
- EC307 Development Economics  
- EC311 History of Economics: How Theories Change  
- EC313 Industrial Economics  
- EC315 International Economics  
- EC321 Monetary Economics  
- EC325 Public Economics

---

8 One from:  
- GV100 Introduction to Political Theory (if not taken in Year 1)  
- GV101 Introduction to Political Science (if not taken in Year 1)  
- An approved course from the Government list A (only if both GV100 and GV101 taken under 3 & 4 above)  
- An approved course taught outside the Departments of Economics and Government (only if both GV100 and GV101 taken under 3 & 4 above)  

### Notes

- § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

LL301 Global Commodities Law (v/a 15/16)

A course taught outside the Law Department, other than those on the exclusion list (only one can be selected over years 2 and 3

Selection List B
LL272 Outlines of Modern Criminology (H)
LL284 Sentencing and Treatment of Offenders (H)
LL298 Half Unit Dissertation on an Approved Legal Topic (H) (cannot be taken in the same year as LL299)

This programme constitutes a qualifying law degree (QLD). QLDS are recognised by the Solicitors Regulation Authority www.sra.org.uk/consumers/consumers.page and the Bar Standards Board www.barstandardsboard.org.uk as meeting the requirements for completing the academic stage of legal education for solicitors or barristers. For further information contact the Law Department lawdepartment@lse.ac.uk.

BSc in Management
Programme Code: UBMG
For all first year students in 2015-16

Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things

Year 1
1 Either AC102 Elements of Financial Accounting (H) or AC103 Elements of Management Accounting and Financial Management (H)*
   MG101 Core Business Disciplines I: Finance and Operations Management (H)
2 EC100 Economics A
2 EC102 Economics B §
3 MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H)
4 MG100 Leadership and Communication in Teams (H) and MG102 Organisational Behaviour (H)

Year 2
5 MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems
6 MG207 Economics for Management
7 MG205 Learning from Quantitative Data
8 Courses to the value of one unit from the options list below.

Year 3
9 MG301 Strategy
10 &11 Courses to the value of two units from the options list below.
12 Courses to the value of one unit from the courses in the options list below not already taken under Papers B, 10 or 11, or any course from the following list:
   AN230 The Anthropology of Industrialisation and Industrial Life (H) (v/a 15/16)
   SO208 Gender and Society
   EC317 Labour Economics
   MA301 Game Theory (H)
   LL232 Law and Institutions of the European Union
   Or (subject to approval by the Departmental Tutor) any other paper which is normally available only to second or third year students taught within the School or at other colleges of the University where practicable (see Outside Options). Conditions under which the Departmental Tutor will approve papers are given in the BSc Management student handbook.

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

* In year one students choose between AC102 and AC103, on financial and management accounting respectively. Students MUST do ONE of these courses in year one; should they wish, they MAY choose to do the other in their second or third year as an option. All students are required to attend the first AC100 lecture to get an overview of the topics to be covered in each course. Students wishing to continue their studies with advanced financial accounting (AC330) in the second or third year should be advised to take AC102 in the first year. Students wishing to continue with advanced management accounting (e.g. AC211, AC310) in the second and third year should be advised to take AC103 in the first year. Should they wish to do both AC102 and AC103 in the course of their degree programme, it is recommended that they opt for the financial accounting unit (AC102) in the first year to ease their way through the management accounting and financial management unit (AC103).
BSc in Management

Programme Code: UBMG

   MG311  Behavioural Decision Science for Management and Policy (H) (third year only)
   MG313  Practical Optimisation Modelling (H) (third year only) (formerly OR301)
   ST201  Statistical Models and Data Analysis (H)
   Managerial Economics and Strategy
   MG206  Firms, Management and Competitive Advantage (H)
   MG228  Managing the Stone-Age Brain (H)
   MG302  Topics in Management Research (H)
   MG303  Foreign Direct Investment and Emerging Markets (H) (Cannot be taken with MG307)
   MG305  Innovation and Technology Management (H)
   MG307  International Context of Management (H) (formerly MN303) (Cannot be taken with MG303)
   Marketing
   MG315  Marketing Action Learning Project (H) (third year only)
   ST307  Aspects of Market Research (H)
   ST327  Market Research: An Integrated Approach
   Organisational Behaviour and Employee Relations
   MG210  Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16)
   MG306  Managing Diversity in Organizations (H) (formerly ID316) (n/a 15/16)
   MG309  International Human Resource Management (H) (n/a 15/16)
   MG312  Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (H)
   Philosophy
   PH225  Business and Organisational Ethics (H)
   Operations list
   Accounting
   AC102  Elements of Financial Accounting (H) (if not taken under paper 1)
   AC103  Elements of Management Accounting and Financial Management (H) (if not taken under paper 1)
   AC211  Managerial Accounting
   AC310  Management Accounting, Financial Management and Organisational Control
   AC330  Financial Accounting, Analysis and Valuation
   Economics and Economic History
   EC210  Macroeconomic Principles

MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (H)

Philosophy
PH225 Business and Organisational Ethics (H)

BSc in Mathematics and Economics
Programme Code: UBMAEC
For all first, second and third year students in 2015-16

Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things

Year 1
1 EC100 Economics A or
EC102 Economics B §
2 MA100 Mathematical Methods
3 ST102 Elementary Statistical Theory
4 MA103 Introduction to Abstract Mathematics

Year 2
5 Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II
6 MA212 Further Mathematical Methods
7 EC210 Macroeconomic Principles or EC221 Principles of Econometrics or FM212 Principles of Finance
8 MA203 Real Analysis (H)

and one of (i) MA208 Optimisation Theory (H) or (ii) MA209 Differential Equations (H) or (iii) MA210 Discrete Mathematics (H) or (iv) MA211 Algebra and Number Theory (H)

Year 3
9 One from:
EC301 Advanced Economic Analysis (if EC210 was taken under paper 7)
EC302 Political Economy
EC309 Econometric Theory (if EC221 was taken under paper 7)
EC310 Behavioural Economics
EC313 Industrial Economics
EC319 Economic Theory and its Applications
EC321 Monetary Economics (if EC210 was taken under paper 7)
EC325 Public Economics
EC333 Problems of Applied Econometrics (if EC221 was taken under paper 7)

10 Courses to the value of one unit from the following, but not more than one MA2**:
MA208 Optimisation Theory (H) (if not taken under 8 above or 12 below)
MA209 Differential Equations (H) (if not taken under 8 above or 12 below)
MA210 Discrete Mathematics (H) (if not taken under 8 above or 12 below)
MA211 Algebra and Number Theory (H)
MA301 Game Theory I (H) (not to be taken with MA300 under 11 below)
MA303 Chaos in Dynamical Systems (H)
MA305 Optimisation in Function Spaces (H)
MA310 Mathematics of Finance and Valuation (H)
MA313 Probability for Finance (H)
MA314 Algorithms in Java (H)
MA315 Algebra and its Applications (H)
MA316 Graph Theory (H)
MA317 Complex Analysis (H)
MA319 Partial Differential Equations (H)

11 IfFM212 was taken as paper 7 then:
Either EC210 Macroeconomic Principles or EC221 Principles of Econometrics
IfEC210 or EC221 was taken under paper 7 then one from:
EC210 Macroeconomic Principles
EC221 Principles of Econometrics
MA300 Game Theory (not to be taken with MA301 under 10 above)
FM212 Principles of Finance
FM320 Quantitative Finance
ST202 Probability, Distribution Theory and Inference
Any paper listed under paper 9 (if not already taken under paper 9)
Another third year paper in Mathematics or Economics (MA3** or EC3**) with the approval of the Departmental Tutor.

12 A further paper to the value of one unit from papers 10 and 11. Note that no more than one MA2** course can be taken in year three. Also including:
MA318 History of Mathematics in Finance and Economics (H)

Any other paper approved by the Departmental Tutor.

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.
BSc in Mathematics with Economics

Programme Code: UBMAWEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 EC100 Economics A or EC102 Economics B §

2 MA100 Mathematical Methods

3 ST102 Elementary Statistical Theory

4 MA103 Introduction to Abstract Mathematics

Year 2

5 Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II

6 MA212 Further Mathematical Methods

7 MA203 Real Analysis (H)

8 Courses to the value of 1.5 units from:

MA208 Optimisation Theory (H)

MA209 Differential Equations (H)

MA210 Discrete Mathematics (H)

MA211 Algebra and Number Theory (H)

ST202 Probability, Distribution Theory and Inference

Year 3

9 EC210 Macroeconomic Principles or EC221 Principles of Econometrics or EC302 Political Economy or EC310 Behavioural Economics or EC313 Industrial Economics or EC319 Economic Theory and its Applications

10 & 11 Courses to the value of two units from the following (no more than one MA2** course and no more than two of the listed ST courses can be taken):

MA208 Optimisation Theory (H) (if not taken under 8)

MA209 Differential Equations (H) (if not taken under 8)

MA210 Discrete Mathematics (H) (if not taken under 8)

MA211 Algebra and Number Theory (H) (if not taken under 8)

MA300 Game Theory

MA301 Game Theory I (H)

MA303 Chaos in Dynamical Systems (H)

MA305 Optimisation in Function Spaces (H)

MA310 Mathematics of Finance and Valuation (H)

MA313 Probability for Finance (H)

MA314 Algorithms in Java (H)

MA315 Algebra and its Applications (H)

MA316 Graph Theory (H)

MA317 Complex Analysis (H)

MA318 History of Mathematics in Finance and Economics (H)

MA319 Partial Differential Equations (H)

ST300 Regression and Generalised Linear Models (H)

ST302 Stochastic Processes (H)

ST304 Time Series and Forecasting (H)

ST308 Bayesian Inference (H)

12 Any other paper approved by the Course Tutor.

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Philosophy and Economics

Programme Code: UBPHEC

For all first year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 EC100 Economics A or

2 and 3 Either MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H) and PH101 Logic

Or MA100 Mathematical Methods and ST102 Elementary Statistical Theory

4 PH103 Reason, Knowledge and Values: An Introduction to Philosophy

Year 2

5 An approved paper from the Philosophy Option List below

6 Either PH104 Formal Methods of Philosophical Argumentation (must be taken if PH101 not taken under paper 3) or an approved paper from the Philosophy Option List below

7 Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II

8 EC210 Macroeconomic Principles

Year 3

9 An approved paper from the Philosophy Option List below

10 Either (a) an approved paper taught outside the Departments of Philosophy and Economics or (b) an approved paper from the Economics Option List or Philosophy Option List below

11 An approved paper from the Economics Option List below

12 PH311 Philosophy of Economics (formerly PH211)

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Philosophy Option List

LL305 Jurisprudence (3rd year only)

LN253 European Literature and Society

PH201 Philosophy of Science

PH203 Philosophy of the Social Sciences

PH213 Scientific Revolutions: Philosophical and Historical Issues

PH214 Philosophy, Morals and Politics

PH217 Set Theory and Further Logic

PH220 Scientific Method and Policy

PH221 Problems in Analytic Philosophy

PH222 Philosophy and Public Policy

PH225 Business and Organisational Ethics (H)

PH227 Genes, Brains and Society (H)

PH228 Emotion, Cognition and Behaviour: Science and Policy (H)

PH229 Global Justice (H) (n/a 15/16)

PH230 Einstein for Everyone: From Time Travel to the Edge of the Universe (H)

PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (H)

PH399 Dissertation in Philosophy (formerly PH299) (third year only)

Economics Option List

Either EC220 Introduction to Econometrics or EC221 Principles of Econometrics

EC102 Economics B §

EC100 Economics A or

EC201 Microeconomic Principles I or EC202 Microeconomic Principles II

Or MA100 Mathematical Methods and ST102 Elementary Statistical Theory

PH103 Reason, Knowledge and Values: An Introduction to Philosophy

Economics Option List

Either EC220 Introduction to Econometrics or EC221 Principles of Econometrics

EC301 Advanced Economic Analysis

EC302 Political Economy

EC303 Economic Policy Analysis

EC307 Development Economics

EC311 History of Economics: How Theories Change

EC313 Industrial Economics

EC315 International Economics

EC317 Labour Economics

EC319 Economic Theory and its Applications

EC321 Monetary Economics

EC325 Public Economics
BSc in Philosophy and Economics

Programme Code: UBPHS3

For all first, second and third year students in 2015-16

Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things

Year 1
1
EC102 Economics B

2 and 3 Either MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H) and PH101 Logic or MA100 Mathematical Methods and ST102 Elementary Statistical Theory

4 PH103 Reason, Knowledge and Values: An Introduction to Philosophy

Year 2
5 An approved paper from the Philosophy Option List below
6 Either PH101 Logic (must be taken if not taken under paper 3) or an approved paper from the Philosophy Option List below
7 Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II
8 EC210 Macroeconomic Principles

Year 3
9 An approved paper from the Philosophy Option List below
10 Either (a) an approved paper taught outside the Departments of Philosophy and Economics or (b) an approved paper from the Economics Option List or Philosophy Option List below
11 An approved paper from the Economics Option List below
12 PH311 Philosophy of Economics (formerly PH211)

Notes
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Philosophy Option List

LL305 Jurisprudence (3rd year only)
LN253 European Literature and Society
PH201 Philosophy of Science
PH203 Philosophy of the Social Sciences
PH213 Scientific Revolutions: Philosophical and Historical Issues
PH214 Philosophy, Morals and Politics
PH217 Set Theory and Further Logic
PH219 Governing Knowledge: Foundational Issues in Science Policy (H) (withdrawn 15/16)
PH220 Scientific Method and Policy
PH221 Problems in Analytic Philosophy
PH222 Philosophy and Public Policy
PH225 Business and Organisational Ethics (H)
PH227 Genes, Brains and Society (H)
PH228 Emotion, Cognition and Behaviour: Science and Policy (H)
PH229 Global Justice (H) (v/a 15/16)
PH230 Einstein for Everyone: From Time Travel to the Edge of the Universe (H)
PH231 Evidence and Policy (H) (withdrawn 15/16)
PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (H)
PH399 Dissertation in Philosophy (formerly PH211)

Economics Option List

Either EC220 Introduction to Econometrics or EC221 Principles of Econometrics

EC301 Advanced Economic Analysis
EC302 Political Economy
EC303 Economic Policy Analysis
EC307 Development Economics
EC311 History of Economics: How Theories Change
EC313 Industrial Economics
EC315 International Economics

EC317 Labour Economics
EC319 Economic Theory and its Applications
EC321 Monetary Economics
EC325 Public Economics
BSc in Philosophy, Politics and Economics

Programme code: UBPHPOLEC

For all students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 Either MA107 Quantitative Methods (Maths) (H)
   and
   ST107 Quantitative Methods (Statistics) (H)
   Or
   MA100 Mathematical Methods
2 Either GV101 Introduction to Political Science
   Or
   GV100 Introduction to Political Theory
3 PH103 Reason, Knowledge and Values: An Introduction to Philosophy (with supplementary five week Philosophy and Argumentative Writing Seminar)
4 EC100 Economics A or
   EC102 Economics B §

Year 2

5 Either EC220 Introduction to Econometrics (if MA107 and ST107 taken under Paper 1)
   Or
   ST102 Elementary Statistical Theory (if MA100 taken under Paper 1)
6 Either GV101 Introduction to Political Science (if not already taken under paper 2)
   Or
   GV100 Introduction to Political Theory (if not already taken under paper 2)
7 PH104 Formal Methods of Philosophical Argumentation
8 Either EC201 Microeconomic Principles I (if MA107 and ST107 taken under paper 1)
   Or
   EC201 Microeconomic Principles I (if MA100 taken under paper 1)
   Or
   EC202 Microeconomic Principles II (if MA100 taken under paper 1)
In addition, students will also take EC240 PPE Interdisciplinary Research Seminar (LT) *

Year 3

9 Courses to the value of one full unit from the Government Option List
10 Courses to the value of one full unit from the Philosophy Option List
11 EC210 Macroeconomic Principles
12 Either Courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List (if MA107 and ST107 taken under paper 1)
   Or
   EC220 Introduction to Econometrics (if MA100 taken under paper 1)
   Or
   EC221 Principles of Econometrics (if MA100 taken under paper 1)
In addition, students will also take EC340 PPE Interdisciplinary Research Seminar (MT & LT) *

Year 4

13 PH341 Philosophy, Politics and Economics: Applications
14 GV342 Philosophy, Politics and Economics: Capstone and Research Project
15 Any 200 or 300 level courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List subject to timetabling constraints
16 Any 200 or 300 level courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List or outside these departments with permission subject to timetabling constraints.

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

* EC240 and EC340 will be assessed in the same manner as LSE100. Marks of F, P, M, DI appear on the transcript but do not affect progression or the final degree classification.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Economics Option List

EC301 Advanced Economic Analysis
EC302 Political Economy
EC303 Economic Analysis of the European Union
EC307 Development Economics
EC311 History of Economics: How Theories Change
EC313 Industrial Economics
EC315 International Economics
EC321 Monetary Economics
EC325 Public Economics

Government Option List

GV225 Public Choice and Politics
GV227 Politics of Economic Policy
GV245 Democracy and Democratisation
GV247 Theories and Problems of Nationalism
GV248 Power and Politics in the Modern World: Comparative Perspectives
GV249 Research Design in Political Science
GV251 Government, Politics and Public Policy in the European Union
GV262 Contemporary Political Theory
GV263 Public Policy Analysis
GV264 Politics and Institutions in Europe
GV302 Key Themes in the History of Political Thought
GV303 From Empire to Globalisation (n/a 15/16)
GV308 Leadership in the Political World (H)
GV309 Politics of Money and Finance in Comparative Perspective (H)

PH311 Philosophy of Economics (formerly PH211)
PH399 Dissertation in Philosophy (formerly PH299)
BSc in Politics and International Relations
Programme code: UBPOLIR
For all students in 2015-16
Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things
Year 1
1 GV101 Introduction to Political Science
2 IR100 Concepts of International Society
3 Either GV101 Introduction to Political Theory
Or HY116 International history since 1890
4 An approved paper taught outside the departments of Government and International Relations
Year 2
5 Either GV101 Introduction to Political Theory (compulsory if not taken in year 1)
Or Any paper from Government list A (if both GV101 and GV101 taken in year 1)
6 GV248 Power and Politics in the Modern World: Comparative Perspectives
7 IR200 International Political Theory
8 Either IR202 Foreign Policy Analysis 1
Or IR203 International Organisations
Year 3
9 Any paper from Government list A
10 Either IR202 Foreign Policy Analysis 1
Or IR203 International Organisations (whichever was not taken in Year 2)
11 Either GV390 Dissertation in Government
Or IR398 Dissertation in International Relations
Or Any course from the Government list B
Or Any paper from the International Relations list
12 Either Any paper from Government list A
Or Any paper from the International Relations list
Or An approved paper taught outside the departments of Government and International Relations
Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A
GV225 Public Choice and Politics
GV227 Politics of Economic Policy
GV245 Democracy and Democratisation
GV247 Theories and Problems of Nationalism
GV249 Research Design in Political Science
GV251 Government, Politics and Public Policy in the European Union
GV262 Contemporary Political Theory
GV263 Public Policy Analysis
GV264 Politics and Institutions in Europe

Government List B
GV302 Key Themes in the History of Political Thought
GV303 From Empire to Globalisation (n/a 15/16)
GV308 Leadership in the Political World (H)
GV309 Politics of Money and Finance in Comparative Perspective (H)
GV311 British Government
GV312 Advanced Topics in Government: Executive Politics
GV313 Politics of Trade in Comparative Perspective (H)
GV314 Empirical Research in Government
GV316 Advanced Issues in Applied Political Theory (H)
GV335 African Political Economy (H)
GV366 Political Economy of the Developing World (n/a 15/16)

International Relations List
IR204 International Political Economy (H)
IR305 Strategic Aspects of International Relations
IR311 Europe’s Institutional Order (n/a 15/16)
IR312 Genocide (H) (n/a 15/16)
IR313 Managing China’s Rise in East Asia (H)
IR314 Southeast Asia: Intra-regional Politics and Security (H)
IR315 The Middle East and International Relations Theory (n/a 15/16)
IR317 American Grand Strategy (H)
IR318 Visual International Politics (H)
IR319 Empire and Conflict in World Politics (H)
IR321 Revolutions and World Politics (H)
IR322 Sovereignty, Rights and Justice: Issues in International Political Theory (H)
IR347 Political Economy of International Labour Migration (H) *
IR354 Governing International Political Economy: Lessons from the Past for the Future (H)
IR355 Economic Diplomacy (H) *
IR367 International Political Economy of the Environment (H) *(n/a 15/16)
IR368 The Political Economy of Trade (H) *
IR369 Politics of Money in the World Economy (H) *

Notes * Prerequisite for this course is IR204 International Political Economy (H)

BSc in Politics and Philosophy
Programme Code: UBPOLPH
For all first, second and third year students in 2015-16
Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things
Year 1
1 PH101 Logic
2 PH103 Reason Knowledge and Values: An Introduction to Philosophy
3 GV100 Introduction to Political Theory
4 GV101 Introduction to Political Science
Year 2
5 Any course from the Government list A
6 Either PH214 Philosophy, Morals and Politics
Or GV262 Contemporary Political Theory
7 Either An approved course from the Government list A
Or An approved course taught outside the Departments of Government and Philosophy
8 Either PH201 Philosophy of Science
Or PH203 Philosophy of the Social Sciences
Or PH213 Scientific Revolutions: Philosophical and Historical Issues
Or PH220 Scientific Method and Policy
Or PH219 Governing Knowledge: Foundational Issues in Science Policy (H)(withdrawn 15/16)
And PH231 Evidence and Policy (H)(withdrawn 15/16)
Year 3
9 Either Any course from the Government list B
Or GV390 Government Dissertation Option
Or PH399 Dissertation in Philosophy (formerly PH299)
10 PH222 Philosophy and Public Policy
11 Either Any course from Government list A
Or An approved course taught outside the Departments of Government and Philosophy if an outside option was not taken as paper 7.
12 Either Any course from Government list A
Or Any course from the Philosophy list
Or An approved course taught outside of the Departments of Government and Philosophy
Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A
GV225 Public Choice and Politics
GV227 Politics of Economic Policy
GV245 Democracy and Democratisation
Programme Codes: UBAN2 (BA) UBANS2 (BSc)

For all first and second year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1
1 AN100 Introduction to Social Anthropology
2 AN101 Ethnography and Theory: Selected Texts
3 AN102 Reading Other Cultures: Anthropological Interpretation of Text and Film
4 An approved paper taught outside the Department

Year 2
5 AN200 The Anthropology of Kinship, Sex and Gender
6 AN226 Political and Legal Anthropology
7 AN256 Economic Anthropology (1): Production and Exchange (H) and AN298 Research Methods in Social Anthropology (H)
8 An approved paper taught outside the Department

Year 3
9 AN300 Advanced Theory of Social Anthropology
10 AN301 The Anthropology of Religion
11 Papers to the value of one unit from Selection List A below*
12 AN357 Economic Anthropology (2): Transformation, Development, and Globalisation (H) (n/a 15/16) and AN398 Special Essay Paper in Social Anthropology (H) (n/a 15/16)
13 AN399 Ethnography as Research Method and Text (withdrawn 15/16)

Notes
* Students must take ethnographic options to the value of at least half a unit under papers 8 and 11. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Anthropology Selection List A

AN205 The Anthropology of Melanesia (H)
AN216 Cognition and Anthropology: Human development in Cultural Environments (H) (n/a 15/16)
AN221 The Anthropology of Christianity (H)
AN222 The Anthropology of South East Asia (H)
AN230 The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16)
AN231 The Anthropology of China (H) (n/a 15/16)
AN237 The Anthropology of Development (H)
AN238 Anthropology and Human Rights (H) (n/a 15/16)
AN240 Investigating the Philippines - New Approaches and Ethnographic Contexts (H) (n/a 15/16)
AN243 Children and Youth in Contemporary Ethnography (H) (n/a 15/16)
AN244 Anthropology and Media (H)
AN245 The Anthropology of Borders and Boundaries (H) (withdrawn 15/16)

**Year 2**

| 5 | SA222  Implementing Social Policy: From Principles to Practice |
| 6 | SA201  Research Methods for Social Policy |
One from the Selection List below

Either a paper from the Selection List below or an approved paper taught outside the Department

Either one from the Selection List below or an approved paper taught outside the Department. No first year Social Policy course can be taken in year 3 by Social Policy students.

Notes: It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (i.e., not prefixed with ‘SA’). For further information please see lse.ac.uk/socialPolicyCourses. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Selection List:

SA101 Sociology and Social Policy*
SA103 Introduction to Global Population Change
SA104 Social Economics and Policy*
SA204 Education Policy (n/a 15/16)
SA221 Poverty, Social Exclusion and Social Change
SA223 Health and Social Care Policy
SA250 Demographic Description and Analysis
SA217 Psychology of Crime and Criminal Justice
SA302 Assessing Social Progress

Notes: If not taken under Paper 3 above. Cannot be taken in year 3.

BSc in Social Policy and Criminology

Programme Code: UBSPCR

For all first year students in 2015-16

Paper Course number and title
See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 SA100 Foundations of Social Policy
2 SA105 Crime and Society
3 One from:
   SA101 Sociology and Social Policy
   SA103 Introduction to Global Population Change
   SA104 Social Economics and Policy
4 An approved paper taught outside the Department

Year 2

5 SA219 Comparative and International Social Policy
6 SA218 Criminological Perspectives
7 SA201 Research Methods for Social Policy
8 Either a paper from the Social Policy Selection List or an approved paper taught outside the Department

Year 3

9 SA349 A Long Essay on an Approved Topic
10 SA309 Crime Control: Ideas and Controversies
11 A paper from the Social Policy Selection List. No first year Social Policy course can be taken in year 3 by Social Policy students.
12 Either a paper from the Social Policy Selection List or an approved paper taught outside the Department

Notes: It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (i.e., not prefixed with ‘SA’). For further information please see lse.ac.uk/socialPolicyCourses.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Selection List:

SA101 Sociology and Social Policy*
SA103 Introduction to Global Population Change
SA104 Social Economics and Policy*
SA204 Education Policy (n/a 15/16)
SA221 Poverty, Social Exclusion and Social Change
SA223 Health and Social Care Policy
SA250 Demographic Description and Analysis
SA217 Psychology of Crime and Criminal Justice
SA302 Assessing Social Progress

Notes: If not taken under Paper 3 above. Cannot be taken in year 3.
BSc in Social Policy and Economics

Programme Code: UBSPEC

For all first year students in 2015-16

Paper  Course number and title
See note LSE100  The LSE Course: Understanding the causes of things

Year 1
1  SA100  Foundations of Social Policy
2  EC100  Economics A or
EC102  Economics B §
3  MA107  Quantitative Methods (Mathematics) (H) and
ST107 Quantitative Methods (Statistics) (H)
4  An approved paper taught outside the Departments of
Social Policy and Economics

Year 2
5  SA219  Comparative and International Social Policy
6  EC201  Microeconomic Principles I
7  Either EC210 Macroeconomic Principles or EC220
Introduction to Econometrics
8  SA201  Research Methods for Social Policy

Year 3
9  SA349  A Long Essay on an Approved Topic
10  EC225  Public Economics
11  Either The paper not taken under No 7 or a paper from
the Social Policy or Economics Selection Lists.
12  Either a paper from the Social Policy or Economics
Selection Lists or an approved paper taught outside the
Departments of Social Policy and Economics.

§ Course allocation dependant on Economics A-level or
equivalent background. See course guides for further
information.

It is not always possible to offer students a place on
each of their preferred courses. This is particularly the
case where courses are offered outside the Department
of Social Policy (ie not prefixed with ‘SA’). For further
information please see lse.ac.uk/socialPolicyCourses.

Notes
LSE100 is taken by all students in the Lent Term of
Year 1 and the Michaelmas Term of Year 2. The course
is compulsory but does not affect the final degree
classification.

GV225 Public Choice and Politics
GV227 Politics of Economic Policy
GV245 Democracy and Democratisation
GV247 Theories and Problems of Nationalism
GV251 Government, Politics and Public Policy in the EU
GV262 Concepts in Political Theory
GV264 Politics and Institutions of Europe
GV266 Public Policy Analysis
GV302 Key Themes in the History of Political Thought

Notes
Students are required to select at least one paper from GV245, GV247, and GV264 and at least one paper from GV225, GV227, GV262 and GV263

An approved paper taught outside the Departments of Government and Social Policy

An approved paper taught outside the Departments of Government and Social Policy

Notes
Students are required to select at least one paper from , GV245, GV247, and GV264 and at least one paper from GV225, GV227, GV262, GV263, and GV302

No first year Social Policy course can be taken in Year 3 by Social Policy students.

It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with ‘SA’). For further information please see lse.ac.uk/SocialPolicyCourses. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.
BSc in Sociology

Programme Code: UBSO2

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1
1 SO102 Statistics in Society
2 SO100 Social Theory
3 SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology
4 Either PS102 Social Psychology or an approved level 1 paper taught outside the Department or another paper taught outside the Department subject to the approval of your personal tutor and the Department Tutor.

Year 2
5 SO221 Researching London: Methods for Social Research
6 SO201 Sociological Analysis
7 An approved year 2 or year 3 Sociology Option
8 Either an approved year 2 or year 3 Sociology Option or an approved paper from outside the Department

Year 3
9 SO302 The Sociological Dissertation
10 An approved year 2 or 3 Sociology Option
11 An approved year 2 or 3 Sociology Option
12 Either an approved year 2 or 3 Sociology Option or an approved year 2 or 3 paper taught outside the Department.

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Sociology Option List

PS203 Societal Psychology: Theory and Applications (n/a 15/16)
SO203 Political Sociology
SO208 Gender and Society
SO210 Crime, Deviance and Control (cannot be taken with SA217, SA218 or SA309)
SO211 Sociology of Health and Medicine
SO212 Work, Management and Globalisation
SO224 The Sociology of Race and Ethnicity
SO230 Digital Technology, Speed and Culture (n/a 15/16)
SO231 Knowledge, Power, and Social Change (H)
SO308 Personal Life, Intimacy and the Family
SO309 Atrocity and Justice (H)

BSc in Statistics with Finance

Programme Code: UBSTWF

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things.

Year 1
1 ST102 Elementary Statistical Theory.
2 MA100 Mathematical Methods
3 EC100 Economics A or EC102 Economics B
4 AC104 Elements of Accounting, Financial Institutions and Financial Management * or MA103 Introduction to Abstract Mathematics
   * Note that AC104 is a pre-requisite for all AC courses at levels 2 and 3.

Year 2
5 MA212 Further Mathematical Methods
6 ST202 Probability, Distribution Theory and Inference
7 Courses to the value of one unit from the list below:
   ST205 Sample Surveys and Experiments (H)
   ST226 Actuarial Investigations - Financial (H)
   ST227 Survival Models (H)
   MA103 Introduction to Abstract Mathematics (if not taken under paper 4)
   MA203 Real Analysis (H)
   MA208 Optimisation Theory (H)
   MA209 Differential Equations (H)
   MA210 Discrete Mathematics (H)
   MA211 Algebra and Number Theory (H)
   FM212 Principles of Finance

Year 3
9 ST300 Regression and Generalised Linear Models (H) and
   ST304 Time Series and Forecasting (H)
10 Courses to the value of one unit from the list below:
   ST301 Actuarial Mathematics: (Life) (H) (formerly ST302)
   ST302 Stochastic Processes (H)
   ST306 Actuarial Mathematics: General (H)
   ST307 Aspects of Market Research (H)
   ST308 Bayesian Inference (H)
   ST312 Applied Statistics Project (H)
   ST327 Market Research: An Integrated Approach
   ST330 Stochastic and Actuarial Methods in Finance
   MA203 Real Analysis (H)
   MA208 Optimisation Theory (H)
   MA209 Differential Equations (H)
   MA210 Discrete Mathematics (H)
   MA211 Algebra and Number Theory (H)
   MA300 Game Theory
   MA301 Game Theory I (H)
   MA303 Chaos in Dynamical Systems (H)
   MA305 Optimisation in Function Spaces (H)
   MA310 Mathematics of Finance and Valuation (H)
   MA313 Probability for Finance (H)
   MA314 Theory of Algorithms (H)
   MA315 Algebra and its Applications (H)
   MA317 Complex Analysis (H)
   MA318 History of Mathematics in Finance and Economics (H)
   MA319 Partial Differential Equations (H)
   MG308 Simulation Modelling and Analysis (H) (formerly OR307)
   MG313 Practical Optimisation Modelling (H) (third year only)
11 FM300 Corporate Finance, Investments and Financial Markets or
   FM320 Quantitative Finance

12 Courses to the value of one unit from paper 10 or the list below:
32 Undergraduate Programme Regulations

FM300 Corporate Finance, Investments and Financial Markets or
FM320 Quantitative Finance
AC104 Elements of Accounting, Financial Institutions and Financial Management
AC211 Managerial Accounting
AC310 Management Accounting, Financial Management and Organisational Control
AC330 Financial Accounting, Analysis and Valuation
AC340 Auditing, Governance and Risk Management
EC202 Microeconomic Principles II
EC210 Macroeconomic Principles
EC221 Principles of Econometrics
LL209 Commercial Law
LL210 Information Technology and the Law
MG203 Organisational Theory and Behaviour (formerly ID200) (n/a 15/16)
MG206 FIRMS, Management and Competitive Advantage (H)
MG211 Operational Research Methods (formerly OR202)
MG307 International Context of Management (H) (formerly MN303)
MG308 Simulation Modelling and Analysis (H) (formerly OR307)
MG314 Principles of Marketing (H) (third year only)
MG315 Marketing Action Learning Project (H) (third year only)
PH201 Philosophy of Science
PH311 Philosophy of Economics (formerly PH211)
SA250 Demographic Description and Analysis
SO212 Work, Management and Globalisation
ST205 Sample Surveys and Experiments (H)
ST226 Actuarial Investigations: Financial (H)
ST227 Survival Models (H)

Notes
§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Outside options
Outside options for first year students
Where the regulations refer to an approved paper taught outside the department, this means that you may take any course in a subject other than the principal subject(s) of your degree, subject to any restrictions listed in the Course Guides. If your degree is for joint honours (e.g., Philosophy and Economics) or is a major/minor combination (e.g., Geography with Economics), a course outside the department means a course taught in any department other than the two named in the title of your degree. The home department of each course is indicated by the letters in its code. Please note that some course combinations are not allowed. Please see the Mutually Exclusive options list below.

The courses available for this purpose in your first year are: (H) means a half-unit course (n/a 15/16) means not available in the 2015/16 academic year * means available with permission
AC100 Elements of Accounting and Finance
AN100 Introduction to Social Anthropology
AN101 Ethnography and Theory: Selected Texts
AN102 Reading Other Cultures: Anthropological Interpretation Of Text and Film
EC100 Economics A (dependant on Economics A-level or equivalent background)
EC102 Economics B (dependant on Economics A-level or equivalent background)
EH101 The Internationalisation of Economic Growth, 1870 to the Present Day
EH102 Pre-industrial Economic History *
GV100 Introduction to Political Theory
GV101 Introduction to Political Science
GV102 Introduction to Geography
GV103 Contemporary Europe
GV120 The Natural Environment
GV121 Environmental Change and Sustainable Development
GV140 Methods in Spatial and Social Analysis
HY113 Empire to Independence: the Extra-European World in the Twentieth Century
HY116 International History since 1890
HY118 Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800
IR100 Concepts of International Society
LL104 Law of Obligations
LL105 Property I
LL106 Public Law (H)
LL108 Criminal Law
LL109 Introduction to the Legal System
LN100 Russian Language and Society 3 (Advanced)
LN101 Russian Language and Society 1 (Beginner)
LN102 Russian Language and Society 2 (Intermediate)
LN104 Mandarin Language and Society 1 (Beginner)
LN110 Intensive German Language and Society 3 (Advanced)
LN120 Spanish Language and Society 3 (Advanced)
LN121 Spanish Language and Society 1 (Beginner)
LN122 Spanish Language and Society 2 (Intermediate)
LN130 French Language and Society 3 (Advanced)
LN131 French Language and Society 1 (Beginner)
LN132 French Language and Society 2 (Intermediate)
LN140 Mandarin Language and Society 3 (Advanced)
LN142 Mandarin Language and Society 2 (Intermediate)
LN200 Russian Language and Society 4 (Proficiency)
LN210 German Language and Society 4 (Proficiency)
LN220 Spanish Language and Society 4 (Proficiency)
LN230 French Language and Society 4 (Proficiency)
LN240 Mandarin Language and Society 4 (Proficiency)
LN250 English Literature and Society
LN251 Comparative Literature and 20th Century Political History
LN252 Contemporary Literature and Global Society
LN253 European Literature and Society
LN270 Society and Language: Linguistics for Social Scientists
LN320 Spanish Language and Society 5 (Mastery)
LN330 French Language and Society 5 (Mastery)
LN340 Mandarin Language and Society 5 (Mastery)
MA100 Mathematical Methods
MA103 Introduction to Abstract Mathematics
MA107 Quantitative Methods (Mathematics) (H) and
ST107 Quantitative Methods (Statistics) (H)
MA110 Basic Quantitative Methods
MG100 Leadership and Communication in Teams (H)
MG102 Organisational Behaviour (H)
MG103 Management, Labour and Work (formerly ID100 Employment Relations)
PH101 Logic
PH103 Reason, Knowledge and Values: An Introduction to Philosophy
PS102 Social Psychology *
SA100 Foundations of Social Policy *
SA101 Sociology and Social Policy
SA103 Introduction to Global Population Change
SA104 Social Economics and Policy *
SA105 Crime and Society
SO100 Social Theory
SO102 Statistics in Society
SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology
ST102 Elementary Statistical Theory
ST107 Quantitative Methods (Statistics)
ST108 Statistical Methods for the Social Sciences
Outside options for second and third year students

Where undergraduate programme regulations refer to an approved paper taught outside the department this will be a paper in a subject other than the principal subject(s) of your degree, subject to timetabling constraints and any restrictions listed in the Course Guides. An outside paper may be selected from the Undergraduate Course Guides, subject to the approval of the candidate’s tutor and to the successful completion of prerequisites where necessary, with the following exceptions:

certain first-year courses are not available to students in the second or third year of their degree;
some courses are not available as an outside option; some papers are mutually exclusive and may therefore not be combined.

The following are courses that are available to second and/or third year students as an outside option where regulations permit.

(n/a 15/16) means not available in the 2015/16 academic year

* means available with permission

AC100 Elements of Accounting and Finance
AC211 Managerial Accounting
AC310 Management Accounting, Financial Management and Organizational Control
AC330 Financial Accounting, Analysis and Valuation *
AN100 Introduction to Social Anthropology
AN101 Ethnography & Theory: Selected Texts
AN102 Reading Other Cultures: Anthropological Interpretation of Text and Film
AN200 The Anthropology of Kinship, Sex and Gender
AN205 The Anthropology of Religion
AN216 Cognition and Anthropology: Human Development in Cultural Environments (H) * (n/a 15/16)
AN221 The Anthropology of Christianity (H)
AN223 The Anthropology of South-East Asia (H)
AN226 Political and Legal Anthropology
AN227 The Anthropology of Economic Institutions and their Social Transformations (withdrawn 15/16)
AN230 The Anthropology of Industrialization and Industrial Life (H) (n/a 15/16)
AN231 The Anthropology of China (H) (n/a 15/16)
AN237 The Anthropology of Development
AN240 Investigating the Philippines: New Approaches and Ethnographic Contexts (n/a 15/16)
AN243 Children and Youth in Contemporary Ethnography (n/a 15/16)
AN244 Anthropology and Media (H) *
AN245 The Anthropology of Borders and Boundaries (H) (withdrawn 15/16)
AN246 The Anthropology of Post-Soviet Eurasia (H) (withdrawn 15/16)
AN250 The Anthropology of South Asia (H) (n/a 15/16)
AN251 Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (H) * (n/a 15/16)
AN252 Anthropological Approaches to Value (H) (n/a 15/16)
AN256 Economic Anthropology (I): Production and Exchange (H) *
AN268 Anthropology of Schooling (H) (withdrawn 15/16)
AN269 The Anthropology of Amazonia (H) (n/a 15/16)
AN274 Subjectivity and Anthropology (H) *
AN275 The Anthropology of Revolution (H)
AN298 Research Methods in Social Anthropology (H) *
EC100 Economics (dependant on Economics A-level or equivalent background)
EC102 Economics B (dependant on Economics A-level or equivalent background)
EC201 Microeconomic Principles I
EC202 Microeconomic Principles II
EC210 Macroeconomic Principles
EC220 Introduction to Econometrics *
EC221 Principles of Econometrics *
EC230 Economics in Public Policy
EC301 Advanced Economic Analysis
EC302 Political Economy
EC303 Economic Policy Analysis *
EC307 Development Economics
EC309 Econometric Theory *
EC310 Behavioural Economics
EC311 History of Economics: How Theories Change *
EC313 Industrial Economics
EC315 International Economics
EC317 Labour Economics
EC319 Mathematical Economics
EC321 Monetary Economics *
EC325 Public Economics
EC333 Problems of Applied Econometrics *
EH101 Internationalization of Economic Growth
EH102 Pre-industrial Economic History *
EH204 Money and Finance: From the Middle Ages to Modernity
EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)
EH207 The Making of an Economic Superpower: China since 1850
EH211 Africa and the World Economy, 1500-2000
EH225 Latin America and the International Economy (n/a 15/16)
EH238 The Industrial Revolution
EH240 Business and Economic Performance since 1945: Britain in International Context
FM212 Principles of Finance
FM300 Corporate Finance, Investments and Financial Markets
FM320 Quantitative Finance
GI200 Gender, Politics and Civil Society
GV100 Introduction to Political Theory
GV101 The Anthropology of Melanesia
GV225 Public Choice and Politics
GV227 The Politics of Economic Policy *
GV245 Democracy and Democratization
GV247 Theories and Problems of Nationalism
GV248 Power and Politics in the Modern World: Comparative Perspectives *
GV249 Research Design in Political Science *
GV251 Government, Politics and Public Policy in the European Union
GV262 Contemporary Political Theory
GV263 Public Policy Analysis
GV264 Politics and Institutions in Europe
GV302 Cultural Environments (H) *
GV305 Sustainability Science and Policy: Problems and Perspectives (withdrawn 15/16)
GV306 Global Public Policy (H) * (n/a 15/16)
GV308 Leadership in the Political World (H) *
GV309 Politics of Money and Finance in Comparative Perspective (H)
GV312 Advanced Topics in Government: Executive Politics *
GV313 Politics of Trade in Comparative Perspective (H)
GV314 Empirical Research in Government *
GV316 Advanced Issues in Applied Political Theory (H) *
GV100 Introduction to Geography
GV103 Contemporary Europe
GV120 The Natural Environment
GV121 Environmental Change and Sustainable Development
GV140 Methods in Spatial and Social Analysis
GV200 Economy, Society and Space
GV201 Urban and Spatial Economic Analysis I
GV202 Introduction to Development in the South
GV205 Political Geographies, Policy and Space
GV220 Environment: Science and Society
GV222 Applied Environmental Economics
GV244 London’s Geographies: An Introduction to Cultural and Historical Geography
GV300 Theories of Regional Development and Change
GV301 Political Geography of Development and the South
GV302 Urban Development: Politics, Policy and Planning
GV303 The Geography of Gender: Global Perspectives

Mutually exclusive options (may not be combined)
The following courses may not be taken together i.e. students can only take one or other of the listed courses (and as programme regulations permit):
(H) means a half-unit course
(n/a 15/16) means not available in the 2015/16 academic year

AC100  Elements of Accounting and Finance  with  AC104  Elements of Accounting, Financial Institutions and Financial Management
EC100  Economics A  with  EC102  Economics B
EC201  Microeconomic Principles I  with  EC202  Microeconomic Principles II
EC220  Introduction to Econometrics  with  EC221  Principles of Econometrics
EC220  Introduction to Econometrics or  with  ST201  Statistical Models and Data Analysis (H) or ST203  Statistics for Management Sciences or ST205  Sample Surveys and Experiments (H)
EC221  Principles for Econometrics  with  GY2A0  Research Techniques (Spatial, Social and Environmental)
GY240  Research Techniques (Spatial, Social and Environmental)  with  LL209  Commercial Law
LL104  Law of Obligations  with  MA110  Basic Quantitative Methods or MA107  Quantitative Methods (Mathematics) or MA207  Further Quantitative Methods (Mathematics)
MA100  Mathematical Methods  with  MA100  Mathematical Methods or MA110  Basic Quantitative Methods or ST102  Elementary Statistical Theory
MA107  Quantitative Methods (Mathematics) (H) and  with  MA100  Mathematical Methods or MA110  Basic Quantitative Methods or MA107  Quantitative Methods (Mathematics) or ST102  Elementary Statistical Theory
ST107  Quantitative Methods (Statistics) (H)  with  MA100  Mathematical Methods or MA110  Basic Quantitative Methods or MA107  Quantitative Methods (Mathematics) or ST102  Elementary Statistical Theory
MA110  Basic Quantitative Methods  with  MA100  Mathematical Methods or MA107  Quantitative Methods (Mathematics)
MA207  Further Quantitative Methods (Mathematics) (H)  with  MA100  Mathematical Methods or MA301  Game Theory I (H)
MA300  Game Theory  with  MG203  Organisational Theory and Behaviour (formerly ID200)
MG102  Organisational Behaviour (H)  with  MG307  International Context of Management (H) (formerly MN303)
MG201  Core Disciplines II: Marketing, Human Resource Management and Information Systems  with  MG314  Principles of Marketing (H)
MG207  Economics for Management  with  EC201  Microeconomic Principles I or EC202  Microeconomic Principles II
MG303  Foreign Direct Investment and Emerging Markets (H)  with  EC201  Microeconomic Principles I or EC202  Microeconomic Principles II
SA218  Criminological Perspectives  with  SO210  Crime, Deviance and Control (n/a 15/16)
ST102  Elementary Statistical Theory  with  ST107  Quantitative Methods (Statistics) (H)
ST201  Statistical Models and Data Analysis (H) or  with  ST203  Statistics for Management Sciences
ST205  Sample Surveys and Experiments (H)  with  ST327  Market Research: An Integrated Approach
ST307  Aspects of Market Research (H)
Undergraduate Course Guides
AC100
Elements of Accounting and Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD 3.30, Dr Elisabetta Bertero STC677, Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is compulsory on the BSc in Accounting and Finance and BSc in Management Sciences. This course is available on the BSc in Business Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Introduction to managerial accounting. The design, use and role of accounting information in the management of organisational activities. Costing and budgeting. The design and use of performance measurement systems.

Introduction to finance: The financial system and flow of funds. Introductory financial formulae. The financial decisions of firms, capital budgeting. The recent global financial turmoil.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of written work per term will be collected during classes for marking and feedback.

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

The first 15 minutes will be reading time.

AC102 Half Unit
Elements of Financial Accounting

This information is for the 2015/16 session.

Teacher responsible: Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is compulsory on the BSc in Management.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of written work per term will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney Financial Accounting for Decision Makers, 7th edn, Financial Times, Prentice Hall, 2013.

Assessment: Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes will be reading time.

AC103 Half Unit
Elements of Management Accounting and Financial Management

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD 3.30, Prof Richard Macve OLD 3.11 and Mrs Chrisoulla Constantinou

Availability: This course is available on the BSc in Management.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; some will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include: Peter Atrill and Eddie McLaney, Management Accounting for Decision Makers, 8th edn, Pearson (2015); Levinson, M The Economist Guide To Financial Markets (6th edition).

Assessment: Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes will be reading time.

AC104
Elements of Accounting, Financial Institutions and Financial Management

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD3.30, Prof Richard Macve OLD3.11, Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is available on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the LT. 1 hour of lectures and 1 hour of classes in the ST.
and reporting, approaches to equity maintenance, etc.

**Management Accounting, Financial Institutions and Financial Management sections:**

Introduction to managerial accounting and financial management. The design, use and role of accounting information in the management and control of organisational activities. Costing and budgeting. Financial institutions and sources of financing. The accounts of insurance companies and pension funds. Financial evaluation of decisions in the shorter and longer terms. The design and use of performance measurement systems. Accounting for environmental impacts.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 21 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

**Formative coursework:** Written answers to numerical problems and discussion questions will be expected weekly; two pieces of work per term will be collected during classes for marking and feedback.

**Assessment:** Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

The first 15 minutes will be reading time.

---

**AC211 Managerial Accounting**

This information is for the 2015/16 session.

**Teacher responsible:** Mr Lukas Löhrlein OLD 3.34, Dr Tommaso Palermo KSW 3.07, Dr David Twardowski 3.08

**Availability:** This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Please seek permission from the Accounting Department tutor. It is also an option for students taking the Diploma in Accounting and Finance.

**Pre-requisites:** Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

**Course content:** The course analyses the roles and applications of management accounting practices and concepts in contemporary organisations and enterprises. Management accounting is extensively involved in the planning, coordination and control of complex organisations and networks of organisations competing on a global scale. The course explores key management accounting concepts and tools, and their economic, strategic, behavioural and organisational underpinnings.

The course is organised in four modules.

**Management Accounting for Decision Making** examines how management accounting information can be used in the context of a variety of short- and long-term decision problems, ranging from costing to pricing, outsourcing and investment appraisal.

**Management Accounting and Strategy** looks at management accounting change and at the emerging role of management accounting in strategy making.

**Management Accounting and Organisational Control** examines intra-organisational planning and control issues, focusing on how managerial action is guided by practices such as budgeting, variance analysis and transfer pricing.

**Performance Measurement** addresses the use of financial and non-financial performance measures in complex organisational and managerial settings, with particular emphasis on their behavioural consequences and the limits of quantification.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hour revision lecture in week 11 of LT.

**Formative coursework:** Students will be required to complete written assignments before each class. Four of these assignments, one per module, will be collected and graded by class teachers. Course work may take the form of an essay, a case analysis or a numerical exercise and may also include in-class presentation and team-based work. All students will be expected to contribute to class discussions. Feedback on performance and progress will be provided during class, on written homework assignments, and during office hours.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**AC310 Management Accounting, Financial Management and Organisational Control**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Alnoor Bhimani OLD 3.08 and others

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Available to students on other undergraduate/Diploma programmes with the permission of the Accounting Departmental Tutor.

**Pre-requisites:** Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

**Course content:** The course addresses contemporary issues in management accounting, financial management, and organisational control. The course consists of four modules, all of which are taught by faculty with specific expertise in the area. The exact composition of the course may vary from year to year, but issues which are typically addressed include financial controls, organisational structures, performance measurement and incentive systems, budgetary control and public-sector and non-profit financial management.

**The Function of management control systems:** The course starts with the study of the quintessential role of management control systems in decentralised organisations, with a focus on the measurement and evaluation of the performances of organisational entities and their managers. Focusing on financial control systems,
this module analyses issues related to financial target setting (as part of organisations’ planning and budgeting processes), performance measurement and evaluation, and the assignment of various forms of organisational rewards, such as bonuses and promotions.

Management accounting, budgets and behaviour: Building on the first module, this module focuses primarily on budgeting issues and on understanding how budgets impact employee behaviours and their decisions and actions. This module also discusses “beyond budgeting” and capital budgeting. This is done through the lens of different organisational theories, including contingency theory.

Accounting in non-governmental organisations: Many of the concepts from the prior two modules are then studied in the context of NGOs, including measuring the performance and effectiveness of NGOs, the use of ‘business-like’ management control and financial management systems (like budgets), the evaluation of programme efficiency and impact, and the accountability to donors and beneficiaries.

Accounting in the new public sector: The final module studies management accounting and financial management in the ‘new public sector’, including performance measurement, cost accounting, cost management and pricing; the roles of accounting controls in the health system reforms in the UK and elsewhere.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. In LT, the module on ‘Accounting in non-governmental organisations’ is taught using a ‘flipped-lecture’ approach, with a series of on-line lectures, and five 2-hour classes. The remainder of teaching in LT will be 10 hours of lectures and 5 hours of classes. Week 6 in both terms will be a reading week.

Formative coursework: Case studies and applications will be used extensively. Students will be expected to present cases and contribute to in-class discussions. Students will also be expected to produce four written assignments, two in each of MT and LT. The written assignment with the highest mark from each term will count towards the final mark for the course.

Indicative reading: Detailed reading lists will be given out at the start of each part of the course. Illustrative references include: Bhimani and Bromwich, Management Accounting: Retrospect and Prospect, Elsevier/CIMA (2009); Bhimani, Contemporary Issues in Management Accounting, OUP (2006); Olson, Guthrie & Humphrey (Eds), Global Warning: Debating International Developments in New Public Financial Management, Cappellan Akademisk Forlag As, Oslo (1998); Merchant & Van der Stede, Management Control Systems: Performance Measurement, Evaluation and Incentives, FT/Prentice Hall (2012).

Assessment: Exam (80%, duration: 3 hours) in the main exam period; the other 20% of the mark will be based on two of the four formative written assignments submitted during the year. The assignment with the highest mark from the two submitted pieces of work in each term (one of two in MT, and one of two in LT) will each count for 10% of the final mark for this course.

AC330
Financial Accounting, Analysis and Valuation.

This information is for the 2015/16 session.

Teacher responsible: Dr Vasiliki Athanasakou OLD 2.20, Dr Stefano Casino OLD 3.32 and Prof Richard Macve OLD 3.11

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available with permission as an outside option on other programmes where regulations permit. This course is not available to General Course students.

The course is available as an outside option, subject to the course leader’s permission, if students have achieved a sufficient standard of performance in the pre-requisite course AC100 Elements of Accounting and Finance or AC102 Elements of Financial Accounting or equivalent

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Financial Accounting (AC102) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course addresses the theory and practice of financial reporting. Accounting practices are examined in the light of historical development, regulatory requirements, theories of income and capital and other approaches to accounting theory and to the use of accounting information in business analysis and valuation.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. There will be a revision class in week 1 of ST.

Formative coursework: Students should prepare weekly written work for class discussion. At least two pieces per term will be collected for marking.

Assessment: Exam (100%, duration: 3 hours and 15 minutes, reading time: 15 minutes) in the main exam period.

AC340
Auditing, Governance and Risk Management

This information is for the 2015/16 session.

Teacher responsible: Dr Nadia Matringe KSW3.05, Dr Liisa Kurunmaki OLD 3.13 and Dr Julia Morley OLD 3.09

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Financial Accounting (AC102) or Elements of Accounting, Financial Institutions and Financial Management (AC104). Elements of Management Accounting and Financial Management (AC103) is recommended to complement AC102, but not required.

Course content: The course provides a critical analysis of auditing practices and their role in organisational governance and risk management. Auditing is demanded by, and provides assurance to, a variety of internal and external stakeholders, including corporate shareholders and regulators. As societal demands for accountability have increased, auditing has become both more important and more regulated itself. Auditing also remains controversial and this course will address contemporary debates.

The course addresses the theoretical basis of auditing, its role as a risk management function, its practical methodologies and its legal, professional and social environment. The course is divided into four modules.

Corporate Financial Audit provides a basic overview and
AN100

Introduction to Social Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Laura Bear OLD 6.09
Katy Gardner OLD 5.07

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a general introduction to Social Anthropology as the comparative study of human societies and cultures. The Michaelmas term will focus on the relationship between culture and nature addressing topics such as: gender, body techniques and the senses; experiences of time; relations between the environment and society; race and nationalism. The Lent term will address institutions and concepts that shape society in various contexts including: love and kinship, space, place and belonging, ethnicity and migration and different forms of inequality and hierarchy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (15%, 2500 words) in the LT.

AN101

Ethnography and Theory: Selected Texts

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13 and Prof David Graeber OLD 6.10

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course discusses important aspects of anthropological and sociological theory in relation to modern ethnographic texts. It ranges from the classical social theory by Marx, Durkheim and Weber to the most recent theoretical advances in the discipline. The course is intended to give students a sound grasp of central theoretical concepts and of their significance for empirical research.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: R Aron, Main Currents in Sociological Thought; A Giddens, Capitalism and Social Theory; R Nisbet, The Sociological Tradition; L Coser & B Rosenberg, Sociological Theory: a Book of Readings; K Morrison, Marx, Durkheim, Weber; R Borofsky (Ed), Assessing Cultural Anthropology; C Geertz, The Interpretation of Cultures; A Kuper, Anthropology and Anthropologists; G Stocking, Observers Observed; E E Evans-Pritchard, Witchcraft oracles and magic among the Azande; V Turner, The Forest of Symbols; W Roseberry, Anthropologies and Histories; R Rosaldo, Culture and Truth. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (15%, 2500 words) in the MT.
Essay (15%, 2500 words) in the LT.
AN102
Reading Other Cultures: Anthropological Interpretation of Text and Film

This information is for the 2015/16 session.

Teacher responsible: Mr James Johnston KGS 1.06
Mary Montgomery
Geoffrey Hughes

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to provide training in the reading and interpretation of visual and textual anthropology for first-year students, and to develop analytic skills. The course introduces students to detailed, holistic study of social and cultural practices within particular geographic and historical contexts, and develops skills in bringing together the various elements of cultural and social life analysed by anthropologists. By the end of each term, successful students will have both a detailed knowledge of three important texts, and also have a rounded view of the three settings studied. They will also have developed the capacity to think critically about ethnographic writing and film-making. In addition, the course aims to enable students to examine in detail the process by which ethnographic texts are produced. The course brings students to a closer understanding of anthropological fieldwork and evidence. Students will usually read three book-length ethnographic accounts (or the equivalent) per term, and will study a film (or pictorial, architectural or other visual material) associated with each text.

Teaching: MT and LT. Three lectures per term plus an introductory lecture; three films/visual material presentations per term/six discussion classes per term/three two-hour seminars per term. This course will make consistent use of electronic resources, especially the ‘public forum’ posted on Moodle. Students are encouraged to avail themselves of this opportunity to constructively interact with the class and the class teachers.

Formative coursework: Students will be required to read the three set texts per term, approximately 1/3 text (two-four chapters) each week, and it will be essential to do this in order to pass this course. The emphasis in classes and seminars will be on developing students’ abilities to read and analyse texts as a whole, and to relate them to the other material offered on the course. Supplementary readings may be provided during the term. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Assessment: Essay (15%, 2500 words) in the MT. Essay (15%, 2500 words) in the LT. Take home exam (70%) in the ST.

AN200
The Anthropology of Kinship, Sex and Gender

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14 and Dr Catherine Allerton OLD 6.13

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as ‘kinship’, ‘marriage’, ‘gender’, ‘sex’, ‘the person’, and the relationship between ‘nature’ and ‘culture’, as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare material for discussion in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (15%, 2500 words) in the MT.
Essay (15%, 2500 words) in the LT.

AN205
Half Unit
The Anthropology of Melanesia

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W. Scott, OLD 6.16

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies. The three ethnographies, which have all been published within the last two years, are Christopher Wright’s The Echo of Things, an account of what photography means to people in the western Solomon Islands; Alice Street’s Biomedicine in an Unstable Place, an
analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's Leviathan at the Gold Mine, a study of the relationship between indigenous landowners and a large international gold mine in their valley in the highlands of New Guinea. These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today. Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state. The readings will be supplemented by ethnographic films.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Formative coursework: Students are expected to prepare discussion material for presentation in classes and are required to write assessment essays.

Assessment: Exam (70%, duration: 2 hours) in the main exam period. Essay (30%, 2500 words) in the MT.

AN216 Half Unit Not available in 2015/16

Cognition and Anthropology: Human Development in Cultural Environments

This information is for the 2015/16 session.

Teacher responsible: Prof Rita Astuti OLD6.11

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The course will examine the contribution that the study of human psychology can make to anthropology. After discussing why anthropologists should pay attention to psychology and why psychologists should pay attention to anthropology, we will examine a range of psychological findings (for example, on infant’s knowledge of the physical and mental world) and their relevance to anthropology.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the MT.
AN223  Half Unit  The Anthropology of Southeast Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14
Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam). The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed refraences, the theoretical debates at hand. Upon successful completion of the course, students will be able to:
1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.
6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Assessment: Take home exam (100%) in the ST.

AN226  Political and Legal Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09
Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The anthropological analysis of political and legal institutions as revealed in relevant theoretical debates and with reference to selected ethnography. The development of political and legal anthropology and their key concepts including forms of authority; forms of knowledge and power; political competition and conflict; colonial transformation of indigenous norms; writing legal ethnography of the 'other'; folk concepts of justice, the theory of legal pluralism; accommodation of religious practices in secular laws of European states.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes.

Assessment: Exam (70%, duration: 3 hours) in the main exam period. Essay (15%, 2500 words) in the MT. Essay (15%, 2500 words) in the ST. Students are required to write an assessment essay of 2000-2500 words in Michaelmas and Lent Term (15% each).

AN230  Half Unit  Not available in 2015/16

The Anthropology of Industrialisation and Industrial Life

This information is for the 2015/16 session.

Teacher responsible: Dr Giza Węszkalny
Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Management and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted
exemption by the course teacher

Course content: This course deals with anthropological perspectives on the industrialisation process, on industrial life, and the transformation of nature involved, in relation to relevant theoretical debates and with reference to selected ethnographies. The aim is to lead students to develop a critical understanding of the dramatic societal changes brought about by industrialisation and, specifically, of how it affected relations between people and nature, for example, through the increasing exploitation as well as processing of natural resources and the production of energy on a large scale. The course will focus in particular on the practices and cosmologies of those people who in their everyday life or their work participate in these alterations, drawing on case studies from Papua New Guinea, Africa, South America. The themes touched on are likely to include the rural-urban and centre-periphery nexus linking neophyte proletarians with peasant villages and the producers of resources in the periphery with their consumers in the metropolitan centres; the ways in which industrialisation produces new social, environmental, and physical vulnerabilities; the contrast between the organised and unorganised sector; the new kinds of relations formed between companies and local communities in the context of corporate social responsibility programmes; local discourses about industrial pollution and environmental degradation; and the politics of ontology that arise where usable and exploitable nature meet. We will also discuss notions such as development, sustainability, the resource curse and peak oil, which point to the problems in the conduct of industrialised and post-industrialised production as we have come to know it. Throughout, students will be introduced to materials and viewpoints from within and outside the discipline, and will be encouraged to compare and evaluate the nature and value of ethnographic evidence and other approaches to these issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2,500 words) in the LT.

AN231 Half Unit
The Anthropology of China

This information is for the 2015/16 session.

Teacher responsible: Prof Stephan Feuchtwang OLD6.12 and Ms Charlotte Bruckermann KG51.06

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The anthropological study of China offers new perspectives on general topics. Topics that will be considered are kinship; relatedness; gender; gift, honour, and trust; the performance of love; ritual and belief; the ambivalence and scales of hospitality; the stranger king; gods and ghosts; civilisation and its others; and the modern state.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher

Indicative reading: Brandtstädtler, Susanne and Santos, Gonçalo (eds.) Chinese Kinship: Contemporary anthropological perspectives; Fong, Vanessa Only Hope: Coming of Age under Chinas One-Child Policy; Feuchtwang, Stephan The Anthropology of Religion, Charisma, and Ghosts; Chinese lessons for adequate theory; Gates, Hill Chinas Motor: A thousand years of petty capitalism; Watson, James; E Rawski (Eds) Death Ritual in Late Imperial and Modern China; Stafford, Charles Separation and Reunion in Modern China; Yan, Yunxiang Private Life under Socialism. Good background reading in history: Spence, Jonathan D. (1990) The Search for Modern China. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2,500 words) in the MT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN237 Half Unit
The Anthropology of Development

This information is for the 2015/16 session.

Teacher responsible: Professor Katy Gardner OLD 5.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course considers a range of contributions made by anthropologists to the analysis of development. It assesses the reconcilability of two divergent perspectives: development anthropology, with its corpus of writings by practitioners working on practical projects, and the ‘anthropology of development’, comprising a series of critiques of development theory and practice by anthropologists. It examines the historical background, showing how development and its discourses were made in the wake of the colonial encounter and exploring the role played by anthropologists in this process. Critiques of both state-planned and market-driven development are considered and weighed against the ethnographic evidence, and anthropological studies of development organisations, institutions and ‘the aid industry’ considered. The anthropology of planning and policy; actor-centred perspectives on development; NGOs and participatory approaches; microcredit and gender; and religion and development, are among the topics explored. Regional ethnographies used include those from various parts of Southern and West Africa, China, Latin America, South and South-East Asia.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher. Towards the end of the term the students will also have the opportunity to answer a quiz on the key concepts covered in the course which will be marked by the course teacher.

Indicative reading: F Cooper and R Packard (Eds), International Development and the Social Sciences (1997); A Escobar,
AN238 Half Unit Not available in 2015/16

Anthropology and Human Rights

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: The tension between respect for ‘local cultures’ and ‘universal rights’ is a pressing concern within human rights activism. For well over two decades, anthropologists have been increasingly involved in these discussions, working to situate their understandings of cultural relativism within a broader framework of social justice. This course explores the contributions of anthropology to the theoretical and practical concerns of human rights work. The term begins by reading a number of key human rights documents and theoretical texts. These readings are followed by selections in anthropology on the concepts of relativism and culture as well as other key frameworks, such as identity and violence. Students will then be asked to relate their understandings of human rights to the historical and cultural dimensions of particular cases, addressing such questions as the nature of humanity, historical conceptions of the individual, colonialism and imperialism, the limits of relativism, and the relationship between human rights in theory and in practice. Case studies focus on Africa and Latin America.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for classes/seminars and are required to write an assessment essay. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted at the course teacher's discretion.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.
Colonialism in Early 20th Century Philippines; Renaldo Clemena Ilteo Pasyon and Revolution; K.F. Wiegele, Investing in Miracles: El Shaddai and the Transformation of Popular Catholicism in the Philippines; Nicole Constable Maid to Order in Hong Kong; Albert Alejo Generating Energies in Mount Apo: Cultural Politics in a Contested Environment; Catherine Ceniza Choy Empire of Care: Nursing and Migration in Filipino American History; Esther C.M. Yau and Kyung Hyun Kim Asia/Pacific Cinema; Caroline S. Hau, Necessary Fictions; Philippine Literature and the Nation. Detailed reading lists are provided at the beginning of the course. 

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2,500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN243 Half Unit Not available in 2015/16

Children and Youth in Contemporary Ethnography

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: For much of its history, and with some notable exceptions, anthropology has paid little serious attention to children. However, recent years have seen a growing interest in both ‘childhood’ as a historical and social construction, and in children’s engagement with their own social worlds. This course aims to introduce students to emerging ethnographic work on children and youth, in order to explore both its theoretical and methodological challenges. Ethnographic studies will cover a wide range of societies and regions, including anthropological work on children and childhood in the US and UK. The course will begin with an investigation of children’s place in anthropology, including early anthropological work on ‘Culture and Personality’ and ‘child socialisation’. The course will then move to consider a variety of topics that have been the focus of recent ethnographic study. These may include: children’s play, childhood identities and kinship, education and schooling, youth cultures and globalization, children’s work, street children and children’s competencies in contexts of crisis, including war.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Weekly lectures and classes in the Lent Term. Film screenings in the Lent Term.

Formative coursework: In addition to preparing discussion material for classes, students will normally write one tutorial essay for the course. Non-Anthropology students taking this course may submit an essay to the tutor responsible.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2,500 words) in the LT.

AN244 Half Unit

Anthropology and Media

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke 6.12

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to anthropological analyses of media, including books and other printed texts, photography, radio, television, film, and the internet. Although ‘the anthropology of media’ is often understood to be a relatively new subfield, there has been a long-standing interest in media technologies within the discipline. There is also an important manner, from an anthropological point of view, in which ‘media technologies’ have to be understood not only as these cultural artefacts (radio, film) but also the more elementary senses they express (hearing, sight, etc). We therefore investigate media both as a broad conceptual category and as specific technologies of communication. The course begins with a historical overview of anthropologists’ investigations of media technologies, broadly construed. We then move on to consider ethnographic case studies of media in context. Examples may include: photography in India, radio in Zambia, television and cassette circulation in Egypt, mobile phones in Jamaica, book groups in England, and ‘indigenous video’ in Brazil and Australia. Throughout the course, these case studies are framed in relation to some of the key theoretical debates that have shaped media studies in anthropology and related disciplines since the 1930s. Some attention is also given to the methodological problems involved in studying media, especially the extent to which it challenges the possibility of conducting fieldwork by participant observation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

1 hour of lectures and 1 hour of classes in the ST.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Exam (30%, 2,500 words) in the LT.

AN250 Half Unit Not available in 2015/16

The Anthropology of South Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD5.09

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other
programmes where regulations permit and to General Course students.

**Pre-requisites:** Students taking this course should have completed an introductory course in social anthropology unless granted exemption by the teachers.

**Course content:** This course will aim to address issues of citizenship, inequality, political participation and democratic governance in rural and urban India. The course will cover both classic and current literature and weekly sessions will be organised thematically. We will start by looking at Indias place in the world as a democracy and emerging economy and the many paradoxes that the country throws up - alongside some of the highest rates of economic growth, India also has one of the lowest performances on development indicators; despite 40% adult illiteracy, India has among the highest voter turnout rates in the world; despite local institutions having the least power compared to state level or the central government, ordinary people feel most invested in local elections; India remains largely rural yet India will hold the largest urban population in the world in less than ten years and so on. In order to understand these paradoxes, it is essential that issues of caste and class be examined in some detail, through the anthropological literature produced on these topics over the past 60 years or so. The changing caste dynamics will be examined through everyday practices of discrimination, violence and endogamy as well as institutional innovations of affirmative action for jobs and education. Class relations have also dramatically changed with land reforms in rural India as well as a substantial middle class has emerged in urban India. Economic reforms introduced since the 1990s have altered modes of retail and consumption in both urban and rural India creating new inequalities and entrenching old ones. In the political arena, these changing practices and dynamics have led to a democratic upsurge from below, leading to a greater participation in the electoral process by members of the lower castes and classes of India. All these issues and more will be addressed in this course through the rich corpus of anthropological literature on the subject alongside examples from Indias vibrant media and popular culture.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST. Film screenings will be scheduled at the start of term. One revision session in ST.

**Formative coursework:** Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their academic advisers. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

**Indicative reading:** Please read at least TWO of the following background readings before the start of the course and certainly by the end of the second week of the course: Sunil Khilnani, The Idea of India; Ramachandra Guha, India After Gandhi; Katherine Boo, Behind The Beautiful Forevers; Amartya Sen, The Argumentative Indian; Corbridge, S. and Harris, J. 2000, Reinvesting India: Liberalization, Hindu Politics and Popular Democracy. London: Polity Press. Fiction: Vikram Seth, A Suitable Boy; Rohinton Mistry, A Fine Balance.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period. Essay (30%, 2500 words) in the MT.

---

**AN252 Half Unit Not available in 2015/16 Anthropological Approaches to Value**

This information is for the 2015/16 session.

**Teacher responsible:** Professor David Graeber OLD.6.10

**Availability:** This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

**Course content:** This course focuses on human learning, thinking and cognitive development, specifically in relation to cultural historical artefacts (such as writing) and social institutions (such as schools). The topics covered include: (1) cultural models and distributed cognition; (2) attachment behaviours and rites of passage; (3) emotions cross-culturally; (4) incest aversion and incest taboos; (5) morality and ethics cross-culturally; (6) numerical cognition and mathematics; (7) human logic and reason cross-culturally; (8) language and literacy; (9) training, schooling and expertise; (10) exchange, reciprocity and economic psychology.

**Teaching:** 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students are expected to prepare discussion material for presentation in classes. Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

**Indicative reading:** Ed Hutchins, Cognition in the wild; Michael Cole, Cultural psychology; A. Wolf ; P. Durham (eds), Inbreeding, incest and the incest taboo; Jack Goody, The domestication of the savage mind; D. Holland; M. Eisenhart, Educated in romance; Unni Wikan, Turbulent hearts; M. Lambek (ed.), Ordinary ethics; Stanislav Dehaene, The number sense.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

---

**AN251 Half Unit Not available in 2015/16 Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Charles Stafford OLD.6.02

**Availability:** This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn’s “values project”, the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we’ll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing new light on familiar problems.

**Teaching:** 15 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students registered for Anthropology degrees may submit formative tutorial essays on the course content and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

AN256  Half Unit  Economic Anthropology (1): Production and Exchange

This information is for the 2015/16 session.

Teacher responsible: Dr Gisela Weszkalnyss OLD 6.08
Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines ‘the economy’ as an object of scholarly analysis and a domain of social action. We start by asking how scholars measured, described, modeled, and predicted its behaviour. What forms do economic institutions take cross-culturally? How were these institutions transformed as a result of their incorporation into a wider capitalist markets, state systems, and development initiatives? For example, we will examine the central place of households within capitalist economies, largely overlooked by mainstream economic analyses, and the role that money can play in both dividing and uniting human societies. The course will familiarise students with fundamental aspects of the field and with core concepts used in economic analysis, such as production, consumption, exchange, property, alienation, scarcity, and value. But we will also try to break open the standard frames of the debate by highlighting, for example, the place of nature in the capitalist expansion, and how economic life is not just life in the ordinary. What progress have anthropologists made in understanding fluctuations, booms and busts? What can ethnography tell us about how people cope with crises, individually and collectively, and what the future may hold? Throughout the course, students will become familiar with the key concepts of economic anthropology with reference to selected ethnography and gain a solid understanding of relevant theoretical debates.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT. Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers. Non-Anthropology students taking this course will submit a formative essay to the course teacher.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

AN269  Half Unit  Not available in 2015/16

The Anthropology of Amazonia

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD 6.14
Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, myth and colonialism; indigenous social movements; sexuality and gender; cosmology and shamanism; trade and inter-ethnic relations; language and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Ten hours of lectures and ten hours of classes in the Lent Term. Film screenings will also be held throughout the term.

Formative coursework: Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.
a range of anthropological, psychological and philosophical approaches to subjectivity and the social and cultural phenomena that shape and condition it, attending both to the particulars of individual lives and settings and to more general, existential dimensions of the human condition. The course will be structured around engagements with three principal paradigms: psychoanalysis; phenomenology; and subjectivation. A key aim of the course will be to understand the strengths and limitations of these approaches for anthropological analysis as well as potential sites of convergence and divergence. Specific topics to be covered include the unconscious, dreams, illness and healing, embodiment, sound, intersubjectivity, interpellation, the feminist subject, and altered states of consciousness.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. Ten hours of lectures and ten hours of classes in MT.

**Formative coursework:** Students will be expected to produce 1 essay in the LT. Students registered for Anthropology degrees will submit a formative essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.

**Indicative reading:**

**Assessment:**
- Take home exam (90%) in December.
- Class participation (10%) in the MT.
- Assessment for this course will comprise a ‘take-home’ exam of up to five questions. Students will be asked to write a 2000-2500 word essay on each of two questions, drawing across the breadth of the course. The take home essay will be worth 90% of the total mark. 10% of marks will be given for general class participation. Those who give full attendance and make some effort to participate in class will be able to achieve first class marks.

---

**AN298  Half Unit**

**Research Methods in Social Anthropology**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Mathijs Pelkmans OLD 5.08

**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The twofold aim of this course is to provide students with deeper insight of the process by which anthropological knowledge is produced, and to develop their skills with regard to the collection, analysis and representation of ethnographic data. We will review the main tools of anthropological research, and discuss the ways in which empirical data are being incorporated in ethnographic texts. The research techniques that will be reviewed include ‘participant observation’, various approaches to asking questions and interviewing, and research with documents and in archives. Students will carry out a small research project in London in which they address a specific research question from different angles, employing the various techniques learned during this course. They will report on their research activities and Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist ‘People’s War’ in Nepal. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for ‘missing the revolution’ on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

**Teaching:** 4 hours of lectures, 4 hours of seminars and 12 hours of seminars in the MT.

Week 1, 4, 7, 10 – one 60 minute lecture followed by a one hour seminar (this is the only part of the course that is shared with MSc course of same name)

Week 2, 3, 5, 6, 8, 9 – one two hour seminar-workshop interspersed with lecturing.

**Formative coursework:** Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.

**Assessment:**
- Take home exam (90%) in December.
- Class participation (10%) in the MT.

Assessment for this course will comprise a ‘take-home’ exam of up to five questions. Students will be asked to write a 2000-2500 word essay on each of two questions, drawing across the breadth of the course.

The take home essay will be worth 90% of the total mark.

10% of marks will be given for general class participation. The take home paper will be given on the first Monday after the last week of the course. Due date: 72 hours later, Thursday morning.

---

**AN275  Half Unit**

**The Anthropology of Revolution**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alpa Shah OLD 6.17A

**Availability:** This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. Optional for BA/BSc Social Anthropology and BA Anthropology and Law. Also available to students on other degree programmes as an outside option, and to General Course students.

**Pre-requisites:** Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology (AN100 Introduction to Social Anthropology).

**Course content:** This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the
write a 4,500 to 5000 word ethnographic essay on the basis of their research findings.

**Teaching:** 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will write a short research proposal which will be formatively assessed.

**Assessment:** Coursework (15%, 1000 words) and coursework (15%, 1000 words) in the LT.

Essay (70%, 5000 words) in the ST.

**AN300 Advanced Theory of Social Anthropology**

This information is for the 2015/16 session.

**Teacher responsible:** Prof David Graeber OLD 6.10, Dr Johannes Steinmuller OLD 5.06A and Dr Harry Walker OLD 5.06B

**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with Anthropology and BSc in Social Anthropology. This course is not available as an outside option. This course is available with permission to General Course students.

**Pre-requisites:** Students should have a substantial background in Social Anthropology.

**Course content:** The aim of this course is to train students to engage critically with classic and contemporary texts in the discipline. It will examine the theoretical implications of particular anthropological approaches by surveying their origins, their strengths and their critique. The course will take the form of an intensive reading group in which six texts (three in each of MT and LT) will be discussed and analysed in depth, along with supplementary reading material where appropriate. Students will be expected to develop their own critical responses to the text, as well as an appreciation of the context in which it was written and its contribution to relevant theoretical discussions and debates.

**Teaching:** 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT.

**Formative coursework:** Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

**Assessment:** Exam (70%, duration: 3 hours) in the main exam period. Essay (15%, 2500 words) in the MT. Essay (15%, 2500 words) in the LT.

---

**AN301 The Anthropology of Religion**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Matthew Engelke OLD 6.12 and Dr Michael Scott OLD 6.16

**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is not available as an outside option. This course is available with permission to General Course students.

**Pre-requisites:** Students should have a substantial background in Social Anthropology.

**Course content:** This course covers selected topics in the anthropology of religion, focusing upon relevant theoretical debates. In the Michaelmas term, the focus will also be on understanding through specific ethnographic and empirical case-studies, the ways in which lived religious practice, and the understanding of religion, get constituted inside and outside ‘Western’ and modern contexts. We will also pay attention to cases in which (as in all post-colonial settings, and in relation to so-called fundamentalisms) ‘Western’ and the ‘non-Western’ definitions are emerging in interplay with each other, including their relation to understandings of modernity and the secular. Some classic topics in the anthropology of religion are also considered, such as ritual, belief, and sacrifice. In the Lent term, we will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of ‘religion’ in relation to ‘science’; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

**Assessment:** Exam (70%, duration: 3 hours) in the main exam period. Essay (15%, 2500 words) in the MT. Essay (15%, 2500 words) in the LT.

---

**AN357 Half Unit Not available in 2015/16 Economic Anthropology (2): Transformation, Development, and Globalisation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Laura Bear

**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes.
where regulations permit and to General Course students.

**Course content:** This course examines ‘the economy’, as an object of social scientific analysis and a domain of human action, focusing on the anthropology of globalisation. Scholars have various ways of analysing the new forms of production, consumption, exchange and circulation that have emerged since the 1980s. Some emphasise post-Fordist methods of flexible production and neo-liberal elite projects. Others focus on trans-state processes of globalisation. For other theorists shifts in state policies such as austerity, decentralised planning, public-private partnerships and the deregulation of financial markets are at the centre of analysis. Others address new forms of consumer society, popular desires for social mobility and transnational migration. Drawing from ethnographies and anthropological theory this course will cast a critical eye over these arguments. It will also revisit classic topics from the perspective of present realities — for example production and intimate economies; formal markets in relation to informalised, violent economies; circulation in relation to financial debt and risk; and consumption and consumer citizenship.

**Teaching:** 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

**Formative coursework:** Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers. Non-Anthropology students taking this course will submit a formative essay to the course teacher.

**Assessment:** Exam (70%, duration: 2 hours). Essay (30%, 2500 words) in the LT.

---

**AN398** Half Unit Not available in 2015/16

**Special Essay Paper in Social Anthropology**

This information is for the 2015/16 session.

**Availability:** This course is compulsory on the BA in Social Anthropology and BA in Social Anthropology. This course is not available as an outside option nor to General Course students.

**Pre-requisites:** Undergraduates taking this course need to have completed the first two years of either the BA/BSc Social Anthropology or the BA Anthropology and Law.

**Course content:** The essay may be based on any topic deemed to be amenable to anthropological analysis, and agreed by the student's academic advisor. Students should ensure that there is an adequate body of relevant literature available for analysis, and that the topic is defined as not unmanageable large. There is no formal coursework. Students will be expected to draw widely on their readings from other anthropology courses.

**Teaching:** 3 hours of lectures in the MT. 3 hours of lectures in the LT.

**Formative coursework:** Students have the opportunity to submit an abstract and a three-page outline of their extended essay to their mentor during Lent Term.

**Assessment:** Essay (50%, 8000 words) in the ST. Project (35%) in the LT. Other (15%) in the MT.

The three elements of assessment are the following: Two “Interim Reports” of 600 – 800 words each during MT (7.5% each). One 4,500-5,000 word “ethnography” or analytical description based on the research project to be submitted in the beginning of LT (35%). One 7,000-8,000 word “extended essay” based on literature research to be submitted in the beginning of ST (50%).

Teacher responsible: Prof Alan Manning 32L 2.36A
Dr L. Rachel Ngai 32L 1.15

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in International Relations, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics with Economics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This is an introductory course in microeconomics and macroeconomics. It may not be taken if Economics B (EC102) has already been taken and passed. No previous knowledge of economics is assumed. The treatment will be non-mathematical, but students are expected to be able to interpret graphs. Entrance on to EC100 and EC102 is dependent on Economics A-level or equivalent background. Students with A-level economics (or equivalent) are not allowed to take EC100.

Course content: This course provides a foundation in micro and macroeconomics, primarily to those without background in the subject. The course aims to provide students with methods of economic analysis that can enable them to think about when markets work well, when they are likely to fail and what policies might improve outcomes. Macroeconomics is the focus of Lent Term, which covers questions such as unemployment, inflation, monetary policy and an introduction to international economic issues. The analytical methods taught are applied to questions of contemporary importance e.g. issues of inequality, climate change, economic growth.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Lecture handouts are distributed at frequent intervals; they contain the outline of the lectures, details of suggested readings and questions for discussion in classes.

Two hours of revision lectures will be held in week 11 of both MT and LT. These classes are usually taught by Graduate Teaching Assistants. They deal mainly with questions arising out of the lectures and questions on the lecture handouts. They are also used to discuss students’ written work.

Formative coursework: Class teachers will normally set and mark four pieces of written work from each student during the course.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC102
Economics B

This information is for the 2015/16 session.

Teacher responsible: Prof Francesco Caselli 32L 1.21 and Prof Gianmarco Ottaviano 32L 2.27A

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in International Relations, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics B (EC102) and Quantitative Methods (Mathematics) (MA107). This is an intermediate course in microeconomic analysis. Students are expected to have completed EC102 Economics B or an equivalent introductory course in economics based on textbooks such as D Begg, S Fischer & R Dornbusch, Economics; P A Samuelson & W Nordhaus, Economics; or R G Lipsey, Positive Economics. Students are also expected to have completed an introductory mathematics course such MA107 Quantitative
Methods (Mathematics) and should revise calculus including partial derivatives and the use of Lagrangians. From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

**Formative coursework:** Students should complete the weekly web-based quizzes before attending classes. In addition, at least five pieces of written work will be required and marked by class teachers.

**Indicative reading:** A reading list will be provided at the start of the course. The main text for the course is Snyder, C. and Nicholson, W. “Microeconomic Theory: Basic Principles and Extensions”. Reference is also made to other texts and to journal articles.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

### EC202

**Microeconomic Principles II**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Frank Cowell 32L3.25A and Prof Alessandro Gavazza 32L4.21

**Availability:** This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Statistics with Finance, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Economics B (EC102) and Quantitative Methods (Mathematics) (MA107).

This is an intermediate course in microeconomic analysis. Students are expected to have completed Economics B or an equivalent introductory course in Economics. Students who have thoroughly mastered mathematics to the level of MA107 should be able to follow the course, but would find it difficult. MA100 would give a better grounding.

From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

**Course content:** The coverage is similar to Microeconomic Principles I. However a greater mathematical facility will be assumed of the student permitting both greater depth and a number of additional topics, such as duality, to be covered. Further details are available on http://darp.lse.ac.uk/Frankweb/courses/ec202/.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

**Formative coursework:** Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required and marked by class teachers.

**Indicative reading:** The text for the course is Cowell, F.A. (2006) Microeconomics: Principles and analysis, Oxford University Press, Oxford. Additional readings to complement the lecture notes on specific topics from other books or articles will be indicated as needed.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

### EC210

**Macroeconomic Principles**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Kevin Sheedy 32L1.09 Dr Liwa Rachel Ngai 32L1.03 Professor Ricardo Reis (room TBC)

**Availability:** This course is compulsory on the BSc in Economics, BSc in Economics with Economic History, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environmental Policy with Economics, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Social Policy and Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Economics B (EC102).

This is an intermediate course in macroeconomic analysis, for BSc degrees in Economics and is also available to other students as permitted by the regulations. Students are expected to have completed Economics B or an equivalent introductory course in Economics. Students are also expected to have completed an introductory mathematics course such as Basic Quantitative Methods.

From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

**Course content:** The course will cover: Economic growth, consumption, investment, unemployment, business cycles, inflation, monetary and fiscal policy, financial markets and international macroeconomics.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

**Formative coursework:** Students are urged to attempt the assigned problems before attending classes. Two pieces of written work per term will be required and marked by class teachers.

**Indicative reading:** The main textbook for the course is O Blanchard and D R Johnson, Macroeconomics, 6th ed., supplemented by other reading selected by the lecturers. A combined package will be available in the Economists’ Bookshop.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

Candidates are required to answer eight out of ten short questions from Section A and three out of six long questions from Sections B and C (with at least one question from each section).
EC220
Introduction to Econometrics

This information is for the 2015/16 session.

**Teacher responsible:** Prof Jörn-Stephen Pischke 32L2.16 (MT), Dr. Taisuke Otsu 32L 4.25 and Dr. Marcia Schaftgans 32L 4.12 (LT)

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Management Sciences, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy and Economics, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. Availability to General Course students is with the permission of the lecturer.

**Pre-requisites:** Students must have completed Elementary Statistical Theory (ST102).

Those who have taken MA107/ST107 should consider taking EC220 only if they have obtained marks of 65 or better on both courses

**Course content:** This course is an introduction to econometrics; it aims to present the theory and practice of empirical research in economics.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software package Stata analysing actual data sets. Students will learn how various tools are used to answer causal “what-if” questions (e.g. whether our estimates will deliver answers to questions like: “What is the effect of monetary policy on output?”). In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

**Teaching:** 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT. Additional help lectures 10 x 1 hour in the LT. Two hours of revision lectures will be held in week 11 of both the MT and LT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

EC221
Principles of Econometrics

This information is for the 2015/16 session.

**Teacher responsible:** Prof Jörg-Stephan Pischke 32L2.16 (MT) and Dr. Marcia Schaftgans 32L 4.12 (LT)

**Availability:** This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Statistics with Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Pre-requisites:** Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

**Course content:** This course is a more advanced introduction to econometrics; it aims to present the theory and practice of empirical research in economics. Compared to EC220, in LT this course puts more emphasis on the underlying statistical theory and relies on the use of matrix algebra.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software package Stata analysing actual data sets. Students will learn how various tools are used to answer causal “what-if” questions (e.g. whether our estimates will deliver answers to questions like: “What is the effect of monetary policy on output?”). In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

Compared to EC220, this course discusses more advanced topics such as methods of moments estimation and maximum likelihood estimation (non-linear) with applications to binary choice and count data models.

**Teaching:** 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT. Additional help lectures 10 x 1 hour in the LT. Two hours of revision lectures will be held in week 11 of both the MT and LT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

EC230
Economics in Public Policy

This information is for the 2015/16 session.

**Teacher responsible:** Prof Peter Sinclair office TBC and Dr Mohan Bijapur 32L 1.31

**Availability:** This course is available on the BSc in Environment and Development, BSc in International Relations and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students normally will have completed Economics A
required and further readings will be available on Moodle.

Assessment: Students will be assessed throughout the course, through essays, presentations and class participation. There will be one summative essay per term and one presentation per term in MT and LT of the third year of the PPE.

Presentation (20%) and essay (70%, 2000 words) in the MT and LT of year 3 (see EC340).

Class participation in EC240 and EC340 (10%). The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

EC301

Advanced Economic Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr L. Rachel Ngai 32L 1.15

Dr Shengxing Zhang 32L 1.16

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Macroeconomic Principles (EC210) and Microeconomic Principles I (EC201). Mathematics to at least the level of Mathematical Methods. Microeconomic Principles II (EC202) is also accepted (in place of EC201).

Course content: This course is divided into two sections introducing recent developments in economic theory. The first section focuses on the relationship between the financial sector and the macroeconomy. It studies frictions in the financial sector to better understand causes of financial crises, business cycle fluctuations and policy remedies. In the second section of the course we focus on economic growth, considering questions like these: Why was GDP per capita in the UK 15 times higher than China in 1960? Why did the factor of 15 decrease to 5 in 2000? To gain an understanding of the “whys” we have to ask deeper questions: what drives economic growth? Why do some economies grow faster and other slower? Thus this part of the course studies the determinants of economic growth through capital accumulation, reallocation of resources from agriculture into manufacturing and services and, technology innovation.

Teaching: 16 hours of lectures and 10 hours of classes in the MT. 16 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will submit, and receive feedback on, two problem sets per term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
EC302
Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Ronny Razin 32L4.01

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

Course content: The course seeks to introduce students to the major theoretical models of Political. Economy and the available empirical evidence. Sample topics to be covered include: Social Choice theory and Preference aggregation; Comparative electoral systems; Political economy of income redistribution; Turnout in elections; Strategic and Sincere voting; Political Parties; Debates and Communication

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: At least four exercises or pieces of written work will be required and assessed by class teachers.

Indicative reading: There is no text book covering all the material in the course. The following books are recommended as supplements to what is covered in the lectures. Analyzing Politics, Rationality, Behavior and Institutions, K.A. Shepsle and M.S. Bonchek. W. W. Norton & Company, New York, London. Liberalism Against Populism, W.H. Riker, Waveland Press, Prospect Heights, Illinois. For additional readings see http://econ.lse.ac.uk/courses/ec302/.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC303
Economic Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Sinclair TBC
Dr Michael Vlassopoulos - Room TBC

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I or II (or equivalent) and Macroeconomic Principles (or equivalent). A knowledge of introductory econometrics at least to the level provided by a course such as EC220 Introduction to Econometrics, or EC221 Principles of Econometrics, is also necessary. Students who do not have all three pre-requisites and General Course students must consult with Dr Bryan or Dr Fischer before selecting it.

Course content: The course will concentrate on selected important economic policy issues and relevant economic tools. It will treat the issues at a level appropriate for students with the knowledge of economics provided by the courses already taken. The specific topics will be of contemporary interest, and will be announced by the start of each year. In any year the topics covered are likely to include some of the following: Globalisation: effects on welfare, development and income distribution. i. Inequality ii. International negotiations and trade policies iv. Global imbalances v. World trade collapse vi. Tax, fiscal policy and unemployment. vii. Monetary policy and exchange rate frameworks viii. Financial integration and currency unions ix. Financial crises and relevant policies x. Endogenous growth, exhaustible resources and relevant policies.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required.

Indicative reading: There is no course textbook. Detailed reading will be provided in the syllabus at the start of the year. Books that provided useful background reading Lent Term 2013/14 included:

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC307
Development Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Gregory Fischer 32L3.09 and Prof Oriana Bandiera 32L3.06

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I or II (or equivalent) and Macroeconomic Principles (or equivalent). A knowledge of introductory econometrics at least to the level provided by a course such as EC220 Introduction to Econometrics, or EC221 Principles of Econometrics, is also necessary. Students who do not have all three pre-requisites and General Course students must consult with Dr Bryan or Dr Fischer before selecting it.

Course content: The course provides an introduction to selected issues in economic development including theory, evidence and policy. It will analyse economic institutions in developing countries focusing around the themes of ‘Markets, Institutions and Welfare’ and ‘Public Policy and Welfare’. Failures in key markets such as those for land, labour, credit and insurance have far reaching implications both for productive efficiency and welfare. The story of economic development is, in many ways, one of how informal, imaginative institutions have evolved to fill the gaps left by these market failures. The course will study how institutions have evolved to cope with missing markets, and how they affect the allocation and the distribution of resources. The course will analyse both the channel through which the institutional environment affects efficiency and welfare and how public policy can be designed to increase welfare and growth. The course has a strong applied focus. Under each section we want to derive testable implications from the theory, subject these to econometric testing, comment on the
robustness of the results obtained and draw out policy conclusions.

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT.
15 hours of lectures and 10 hours of classes in the LT.
Two hours of revision lectures will be held in week 11 of both MT and LT.

**Indicative reading:** Teaching in the course will be done mainly from journal articles drawn from the forefront of theoretical and applied research in development economics. Background texts for the course are A. Banerjee and E. Duflo, *Poor Economics, Public Affairs*, 2011 and D. Ray, *Development Economics*, Princeton UP, 1998.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EC309**

**Econometric Theory**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Tatiana Komarova 32L4.24 and Prof Francisco Hidalgo 32L4.20

**Availability:** This course is compulsory on the MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available on the BSc in Econometrics and Mathematical Economics and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Principles of Econometrics (EC221).

A good knowledge of linear algebra, calculus and statistical theory is essential, and therefore MA100 and ST102 or equivalent is required. Students taking this course who are not in BSc Econometrics and Mathematical Economics or BSc Mathematics and Economics must consult with Dr. Komarova before selecting this course.

**Course content:** Introduction to the asymptotic theory of estimation and inference of economic models; Basics of large sample theory; Estimation of linear regression models (OLS, GMM, GLS); Testing hypotheses and model specifications; Estimation of nonlinear models (MLE, Nonlinear least squares); systems of equations; time series analysis.

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT.
15 hours of lectures and 10 hours of classes in the LT.
Two hours of revision lectures will be held in week 11 of both MT and LT.

**Formative coursework:** Written answers to set problems will be expected on a weekly basis.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EC310**

**Behavioural Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Matthew Levy 32L3.21

**Availability:** This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics with Economic History, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Students taking the course as an outside option are required to meet the pre-requisites as detailed below.

**Pre-requisites:** Ideally, students will have completed EC202 (or equivalent). A highly motivated student who has done well in EC201 -- as a guideline 65 or better -- is welcome on the course, if he or she finds handling economics mathematically comes naturally. Any such student should see Dr Levy before the course starts.

**Course content:** The course exposes students to a number of major topics in Behavioural Economics, and will link theory with empirical applications. The first half of the course will focus on departures from neoclassical preferences, while the latter half will cover departures from rational expectations. The particular topics to be covered include:

- Reference Dependent Preferences and Loss Aversion
- Social Preferences
- Hyperbolic Discounting
- Naïveté and Self-Control
- Projection Bias
- Happiness and Adaptation
- Heuristics and Biases
- Inattention and Shrouding
- Nudging and Framing
- Behavioural Welfare Analysis

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT.
15 hours of lectures and 10 hours of classes in the LT.
Two hours of revision lectures will be held in week 11 of both the MT and LT.

**Formative coursework:** At least four exercises or pieces of written work will be required and assessed by class teachers.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EC311**

**History of Economics: How Theories Change**

This information is for the 2015/16 session.

**Teacher responsible:** To Be Announced

**Availability:** This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course examines the ways in which
ec313

Industrial Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Mark Schankerman 32L4.30

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy and Economics.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Course content:
The aim of the course is to understand the structure, conduct, and performance of firms by studying analytical models of imperfect competition, determinants of industrial structure, entry in strategic settings, government regulation of natural monopolies, and markets with asymmetric information. The main subjects include monopoly, price discrimination, vertical and horizontal restraints, transactions costs and contract design, game theoretic models of firm behaviour, collusive arrangements, product differentiation, and strategic entry deterrence. Economic models will be used to address policy issues and will be illustrated in classes with case studies.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: At least four problem sets will be required and assessed by class teachers.

Indicative reading: A detailed reading list will be provided at the beginning of the course. The primary text is Tirole's The Theory of Industrial Organization. Specific sections will be assigned (others are too advanced for this course). A useful, less technical supplementary text is Church and Ware's Industrial Organization: A Strategic Approach. There will be additional required readings on empirical articles and case studies on competition policy.

ec315

International Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Keyu Jin 32L1.17 and Dr Swati Dhingra 32L2.31

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent.

Course content: International Macroeconomics: This section of the course offers an introduction to international macroeconomic theory and develops the main tools for macroeconomic policy analysis. We start by studying the balance of payments and the causes and consequences of global imbalances, followed by an in-depth study of the determination of exchange rates, money, and prices in open economies. We discuss the costs and benefits of different nominal exchange rate regimes and their sustainability, as well as examine the causes and consequences of debt and default, speculative attacks and financial crises.

International Trade: This section of the course offers an introduction to international trade theory and develops the main tools for trade policy analysis. We start by studying the patterns of trade distinguishing between inter-industry and intra-industry trade flows. We then proceed to an in-depth analysis of the causes and the effects of those flows based on the concepts of absolute and comparative advantage, relative factor abundance and relative factor intensity, increasing returns to scale and imperfect competition. Finally we discuss the gains and losses from trade, their distribution among people and firms, and their implications for the debate on trade liberalization vs. protectionism.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to complete a problem set weekly, and two of these each term will be collected at random for marking and feedback.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

ec317

Labour Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Esteban Aucejo 32L2.30 and Dr Guy Michaels 32L2.10

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Management, BSc in Philosophy and Economics and BSc in Social Policy and Economics.

Pre-requisites: Students should have completed Microeconomic...
Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent, as well as Introduction to Econometrics (EC220) or equivalent.  

Course content: This course is an introduction to the economic analysis of behaviour and institutions in the labour market. Primarily microeconomic models are applied to labour market phenomena, such as labour supply and participation, labour demand by firms, and wage determination under different institutional settings. Students learn how to distinguish alternative theories empirically and how key parameters are obtained from the data. The course explores how the models can be applied to evaluate labour market policies, such as the minimum wage, the welfare reform, or restricting immigration. The goal of the course is to enable students to think independently about labour market issues, drawing on the models and tools developed during the course.  

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.  

Formative coursework: Problems sets in the course involve hands-on statistical analysis of real world data.  

Indicative reading: G Borjas, Labor Economics. Additional reading, drawn from journals, will be suggested during the course.  

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC319  
Economic Theory and its Applications  

This information is for the 2015/16 session.  

Teacher responsible: Dr Andrew Ellis 32L 3.15 and Dr Francesco Nava 32L 3.20  

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Social Policy and Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.  

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent. Fluency in calculus is essential, some knowledge of analysis, linear algebra and set theory. A highly motivated student with a less technical background could do the course, if he or she finds handling economics mathematically comes naturally. Any such student should see Dr Nava before the course starts.  

Course content: This course reviews fundamental concepts in Economic theory and presents some of its most successful applications. The first part of the course consists of an introduction to Auction Theory. It presents standard auction formats and discusses strategic behaviour in such environments. Auctions will be analysed both in private and interdependent value environments. Fundamental topics such as the revenue equivalence theorem, the optimal auction design problem and the linkage principle will be covered in detail. Departures from the standard model will be also considered allowing for heterogeneity among players, risk aversion, and budget constraints. The focus of the course is mainly theoretical, but when possible some evidence supporting the formal models will be discussed with references to relevant work in the field. The second part of the course will revise concepts in non-cooperative game theory and will introduce students to game theoretic models of bargaining, voting, and communication. After setting up the primitives of the game theory framework, different solution concepts will be analysed with an emphasis on different applications. In studying models of bargaining, both axiomatic and non-cooperative approaches will be examined, such as Nash’s axiomatic approach and the Rubinstein-Stahl model.  

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.  

Two hours of revision lectures will be held in week 11 of both the MT and LT  

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required.  

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC321  
Monetary Economics  

This information is for the 2015/16 session.  

Teacher responsible: Dr Kevin Sheedy 32L1.09  
Professor Charlie Bean 32L 1.18  

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.  

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent. Introduction to Econometrics (EC220) or Further Mathematical Methods (MA212) or equivalent are also strongly recommended. Students who have not taken either of these two courses are still welcome provided they can show other evidence of a strong quantitative background.  

Course content: The course provides an introduction to monetary theory, to the effects of monetary variables on the macroeconomic system, the role of the Central Bank and the conduct of monetary policy. Subjects covered include: The nature and function of money. Classical monetary theory, neutrality and inflation. Interest-rate feedback rules. Theories of the demand for money. The banking system, financial intermediation and the determinants of the money supply. The transmission mechanism of monetary policy, including theories of nominal rigidities and the Phillips curve. The term structure of interest rates. The theory and practice of monetary policy and the design of optimal policies. Monetary policy strategies, including inflation targeting. Policymaking in an uncertain environment. The interaction between monetary and fiscal policy and the arguments for Central Bank independence. Financial crises and the role of the central bank as a lender of last resort. The 2007-8 financial crisis. The interest rate zero lower bound and unconventional monetary policy, including quantitative easing and forward guidance.  

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.  

Two hours of revision lectures will be held in week 11 of both MT and LT.  

Formative coursework: Students are required to submit two essays or exercises in the MT and the LT. Feedback is provided on these by the class teacher.  

Indicative reading: The most useful text books are M Lewis & P Mizen, Monetary Economics, and C Walsh, Monetary Theory and Policy 3rd edn. Other useful texts include: C Goodhart, Money, Information and Uncertainty, 2nd edn; D Laidler, The Demand for Money, 3rd edn; A Blinder, Central Banking in Theory and Practice.  

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
**EC325**

**Public Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Camille Landais 32L 2.23

**Availability:** This course is compulsory on the BSc in Social Policy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Econometric History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

**Course content:** The first part of Michaelmas term lectures focuses on the issues of equity, efficiency and the role of the state. We begin by looking at questions of equity and alternative theories of the role of the state. We then look at problems of public choice and political economics, and go on to consider the implications of recent research in behavioural economics for welfare analysis. We conclude the first part by discussing issues of market failure, public goods and externalities, including environmental policy. The second part is devoted to the evaluation problem and empirical methods. The third part studies education policies, and the fourth part is devoted to social insurance programs. The final part is devoted to taxation, behavioural responses and the design of tax policy. We begin by examining the effects of taxes and transfers on labour supply and migration, and then go on to consider incomes and behavioural responses at the top of the income distribution. We look at the implications of taxation for economic efficiency and explore the optimal taxation of commodities and income. The final lecture is devoted to the question of development and public finance.

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Feedback is provided for one class presentation and one essay (1,500 words) each term (Michaelmas and Lent).

**Indicative reading:** The recommended textbook for the course is Jonathan Gruber (2011) Public Finance and Public Policy, 3rd edition, Worth Publishers. Many of the readings will be journal articles.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EC331**

**Quantitative Economics Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Matthew Levy 32L 3.21

**Availability:** This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is not available as an outside option nor to General Course students.

**Pre-requisites:** Students must have completed Principles of Econometrics (EC221) or exceptionally Introduction to Econometrics (EC220).

**Course content:** This course provides an opportunity to learn how to do independent quantitative economic research at an advanced level. Students are expected to pursue research on a question of their own choice under the supervision of a member of staff. They are required to formulate an initial proposal near the start of MT in order to be matched with a supervisor, refining their choice into a manageable research question during that term. Following independent work during MT, a seminar in week 9 will review student progress. In the LT seminars, each student will present a preliminary outline of the results for comments by fellow students and teachers, and later a follow-up presentation on further, more final results and a draft dissertation. Seminars in LT are formally timetabled as classes.

**Teaching:** 2 hours of seminars in the MT. 20 hours of seminars in the LT.

In week 11 of the MT and the LT students will work independently (with supervisory advice).

**Formative coursework:** Students are required to prepare material for their presentations in the seminar, but this is not formally graded. Students are additionally expected to participate in discussion on the presentations of other students’ as this is part of the training of a research economist, but this is also not formally assessed.

**Indicative reading:** As each student chooses an individual research question, there is no common reading list for this course.

**Assessment:** Dissertation (100%, 10,000 words) in the LT. A completed dissertation (up to 10,000 words, not including abstract, footnotes, bibliography and tables) on an approved subject will be required to be submitted by 27 April 2015. There is no written examination. The dissertation carries all the marks.

---

**EC333**

**Problems of Applied Econometrics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Guy Michaels LRB. R438

**Availability:** This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

**Pre-requisites:** Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent, and either Introduction to Econometrics (EC220) or Principles of Econometrics (EC221). Students who have completed EC220 rather than EC221 should refer to Dr Gentry for advice before starting the course regarding additional preparatory work for Lent term course material.

**Course content:** The purpose of this course is to provide a solid grounding in recent developments in applied econometrics. A major feature of the course is the use of both analytical and computer-based (data) exercises for the classes, which will enable students to gain practical experience in analysing a wide variety of econometric problems. The topics covered in the Michaelmas term include analysis of experimental and non-experimental data, identification of average treatment effects and local average treatment effects, weak instrument problems, quantile regressions, and regression discontinuity. The Lent term will focus on topics in the analysis of panel data of both static and dynamic models, including fixed and random effects, measurement error in panel contexts, instrumental variable regression, and generalized method of moments.

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Michaelmas term: 2-3 problem sets, usually to include econometric questions and Stata applications. Feedback to be provided by the class teacher. Lent term: Students hand in weekly problem sets and get individual written feedback from their class teacher on approximately half of them. Students also receive written sample solutions for each problem set.

**Indicative reading:** A detailed reading list will be provided at the beginning of each term of the course. In parts of the Michaelmas we will use sections from the textbook "Mostly Harmless Econometrics" by Angrist and Pischke. There is no single text for the Lent term, but useful books (somewhat more advanced than the lectures) are Hsiao, "The Analysis of Panel Data" and Wooldridge, "Econometrics".

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.
EC340
PPE Interdisciplinary Research Seminar

This information is for the 2015/16 session.
Teacher responsible: Prof Timothy Besley
Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is available as an outside option nor to General Course students. This course is only available to third year students on the BSc in Philosophy, Politics and Economics. The course started at the beginning of Lent Term in year 2 as EC240 and continues as EC340 through to the end of Lent Term in year 3.
Course content: The course will include lectures given by top researchers from inside and outside LSE, including researchers from the public, private and third sector. The lectures will expose the students to research on the frontier in topics such as public economics, political economy and decision making in the public domain. This research and background reading will then be discussed in seminars.
Teaching: 7 hours and 30 minutes of lectures and 5 hours of seminars in the MT. 7 hours and 30 minutes of lectures and 5 hours of seminars in the LT.
The course will run across three terms starting at the beginning of Lent term in year 2 of the PPE and continuing in Michaelmas and Lent term of year 3 of the PPE. Each term will consist of a series of biweekly lectures (5 x 90 mins) and seminars (5 x 60 mins). Lectures will be given by outside speakers on a specific topic, such as inequality, and will allow for the opportunity to interact and ask questions. Depending on the availability of the speaker, there may be the opportunity for further discussion at an informal social event after the lecture. The seminars will discuss the previous lecture as well as examining background reading related to the topic.
Formative coursework: Students will write a 1,000 word formative essay in the LT of year 2 (in EC240) to prepare them for the summative assessment of year 3. In addition, students will discuss present current research possibly in teams. Feedback on these essays and the presentation will help prepare students for the final, summative essay and presentation.
Assessment: Students will be assessed throughout the course, through essays, presentations and class participation. There will be one summative essay per term and one presentation per term in MT and LT of the summative assessment of year 3. In addition, students will discuss present current research possibly in teams. Feedback on these essays and the presentation will help prepare students for the final, summative essay and presentation.

EH102
Pre-industrial Economic History

This information is for the 2015/16 session.
Teacher responsible: Prof Oliver Volkart
Availability: This course is compulsory on the BSc in Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.
Course content: This course surveys long-term processes of growth and development in late medieval and early modern Europe (fourteenth to eighteenth centuries). It focuses on the transition from a hierarchical society of estates or corporate orders to a market society based on legal equality. There are two core questions: First, why did this transition occur in an evolutionary way in England and the Netherlands, whereas it was severely delayed in the rest of Europe? And second, how is it related to the ‘small divergence’ between

EH101
The Internationalisation of Economic Growth, 1870 to the present day

This information is for the 2015/16 session.
Teacher responsible: Dr Christopher Minns SAR.5.12 and Prof Max-Stephan Schulze SAR.6.14
Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available on the BA in History, BSc in Environment and Development, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course examines the inter-relationships between the development of the international economy and the growth of national economies since the late nineteenth century. The course is designed to introduce students not only to a wide variety of topics and issues, but also to the wide variety of approaches used by historians. The course includes analyses of the original leading nation, Britain, and its replacement, the United States, as well as the catch-up of areas such as continental Europe, and the failure to catch-up of earlier well-placed areas such as Latin America. The effects of major events - such as wars and debt crises - are investigated, and we also consider the implications of changing global economic institutions, such as the Gold Standard and IMF, as well as the effects of sometimes rapid changes in product and process technology.
Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
Lectures: There is one lecture course (EH101) with 21 lectures in the MT, LT and ST. A lecture programme will be circulated at the first meeting. This course uses Moodle to provide a web based location for your core LSE course materials. Classes The lectures are accompanied by weekly classes (EH101 A). Classes are given by several different teachers. They do not necessarily deal with the same topics each week but they all cover the same ground.
Formative coursework: Students are expected to write four very short papers during the year and two longer essays.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
the Dutch Republic and England on the one side and most of the Continent on the other, where the North-West enjoyed significantly higher living standards and per capita incomes than other countries even before industrialisation began?
The course thus raises fundamental questions about societies and economies: Was pre-industrial economic growth transitory and regional? Or was it a recurrent, even normal phenomenon, which however could occasionally be reversed? Was Dutch and British success the result of their social and institutional features? Or was it a combination of geographical factors and good fortune? To what degree did early modern governments help or hinder economic development? Did Europe's political fragmentation hold back the continent's development, or did competition between states have beneficial consequences? In conclusion, can we define an optimal combination of social, political, and economic institutions that sustained growth in the past (and thus, perhaps, in the future)?

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT. Students will give presentations on topics that form part of the course content. Students will receive structured feedback on their formative coursework (both on their essay and the presentation).

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.
Essay (30%, 2000 words) in the LT.

---

**EH204**

**Money and Finance: From the Middle Ages to Modernity**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Albrecht Ritschl SAR 6.06 and Prof Oliver Volckart SAR 6.10

**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course provides an overview of the main developments in monetary and financial history from 800 to the present day, taking the students from the simple beginnings of medieval European monetary history to the complex financial arrangements of the modern world. The first part of the course covers the emergence of money and finance from the medieval ages to the early modern period. The second part examines the main developments in the global financial system since the nineteenth century. Historical developments in major European and non-European countries (England, Spain, Italy, France, Germany, USA) will be discussed and compared. The course is designed to introduce students to the main concepts of money and finance (financial development, financial integration, monetary policy, banking crises etc.) and to provide a long run perspective to the current policy debate.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.
1 hour of lectures and 1 hour of classes in the ST.

**Formative coursework:** The students will produce 3 formative essays. The exercise will help them practice academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill both necessary for the dissertation they are expected to write in year 3 and helpful for the exam of this course that will take place in summer term. The class presentation has a formative character, too. Students will practice presenting complex arguments to their peers and answering questions from the audience.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EH205**

**Not available in 2015/16**

**Towns, Society and Economy in England and Europe 1450-1750**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Patrick Wallis C414

**Availability:** This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course examines in outline the social and economic history of European towns between the mid-15th and the mid-18th centuries. Towns and economic development; the urban economy: manufactures, services and domestic and international trade; town-country relations, towns and rural industry; towns and the state; capital cities; urban hierarchies and networks; social structure and social mobility; standards of living; social conflict, crime and criminal repression; population structure; women, family and work; poverty and welfare; medicine and health; religion, education and literacy.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.
1 hour of lectures and 1 hour of classes in the ST.
Weekly lectures and classes (EH205). Classes are designed to discuss at greater depth topics covered in the lectures. Students are expected to prepare discussion papers for each class.

**Formative coursework:** Students are expected to write four essays or equivalent pieces of written work in the course of the year.

**Indicative reading:** Detailed reading lists are distributed at the
EH207
The Making of an Economic Superpower: China since 1850

This information is for the 2015/16 session.

Teacher responsible: Dr Debin Ma SAR 6.12

Availability: This course is available on the BA in History, BSc in Accounting and Finance, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a survey of long-term economic change in China from the mid-nineteenth century to the present. It focuses on China’s long path to becoming a major global economic power at the beginning of the new millennium. The course examines the importance of ideological and institutional change in bringing about economic transformations by surveying major historical turning points such as the opening of China in the mid-nineteenth century, the collapse of the Qing in 1911, the rise of the Communist regime in the 1950s and the adoption of a reform policy since the late 1970s. It examines both the constraints as well as the capacity of a giant traditional economy to respond and regenerate in the face of external challenge from outside since the Opium War of the mid-nineteenth century. The economic analysis of Chinese economic history will examine both macro and micro level questions.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Naughton. B., The Chinese economy, transitions and growth (MIT Press); Rawski. T., Economic growth in prewar China (Univ. of Berkeley Press); Brand, L. and Rawski. T (eds.) China’s great economic transformation (Cambridge University Press); Richardson, P. Economic change in China, c. 1800-1950 (Cambridge University Press); Spence, J.D The search for modern China (New York : W.W. Norton).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH225 Not available in 2015/16
Latin America and the International Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Alejandra Irigoin CMK.C313

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the development trajectory of Latin America and its relation with the international economy from the Early Modern period (c. 1700) to the present. It focuses on the political and economic factors that drove - and that resulted from- the region's engagement with the world attending to the environmental, population and factor endowments, institutions and policies. The causes and outcomes of this ‘engagement’ will be explored in the following broad themes: the determinants of Latin American growth performance, the political economic legacy of European rule and of the formation of modern states and markets; the ambivalent relation with international markets and institutions, the continuous quest for development together with political and macroeconomic instability; the economic aspects of different political experiments and political culture - from authoritarian to democratic regimes and various generations of populism interspersed with military rule and direct democracy- and the short and long run impact on equality, poverty and the prospect for sustained intensive growth.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of lectures and 3 hours of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
EH237
Theories and Evidence in Economic History

This information is for the 2015/16 session.
Teacher responsible: Dr Leigh Gardner SAR S.07
Dr Eric Schneider SAR S.18

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course examines theories and concepts used in economic history, and provides an introduction to the methods used by economic historians to collect evidence and generate inference on relevant historical questions. The course will begin with an examination the development of history as a subject and discipline. Consideration will be given to the assumptions made in economics and their principal applications in economic history. The course will also introduce students to essential methods for the design and execution of a research project. Students will be introduced to the analysis of historical arguments and the critical interpretation of primary and secondary sources. The course will also provide students with the basic quantitative skills required to pursue an independent research project, and to engage critically with current scholarship in economic history.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH240
Business and Economic Performance since 1945: Britain in International Context

This information is for the 2015/16 session.
Teacher responsible: Dr. Peter Cirenza SAR S.06

Availability: This course is available on the BSc in Accounting and Finance; BSc in Economic History; BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course looks at the history of British business and industry, with an emphasis on the post-war period. It examines some of the hypotheses on why the UK economy grew more slowly than other OECD nations with particular reference to the decades after the Second World War. Explanations of relative economic decline are examined in the context of comparisons with other European nations and with the US and Japan. The main attention is on recent decades, including current changes in performance, but the historical roots of Britain’s poor performance are also considered. The focus is on business performance in the public and private sectors, including scale effects, multinationals’ comparative performance, technology, labour management and management quality. Other factors alleged to have contributed to Britain’s poor performance, ranging from ‘culture’ through government policy to education and trade unions, are also discussed.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH238
The Industrial Revolution

This information is for the 2015/16 session.

Teacher responsible: Dr Neil Cummins SAR S.13

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the Industrial Revolution in Britain, the turning point into modern economic growth. The course is designed to introduce students to the key debates around industrialisation. It will consider the causes and timing of British industrialisation, the process of industrialisation, and the economic and social effects of the industrial revolution. The course focuses on the British case, but will also explore why some other countries did not industrialise at that point, and processes of catch-up that followed.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the ST. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
EH301  Not available in 2015/16
The Origins of the World Economy, 1450 - 1750
This information is for the 2015/16 session.
Teacher responsible: Prof Oliver Volckart C215
Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.
Course content: The course examines economic and social development in Western and Eastern Europe and Asia from the late Middle Ages to the mid-18th century. Its purpose is to discuss comparative pathways of long-term economic development and growth in the past. The course surveys issues, theories and historiography: economic development in premodern western Europe, population; agriculture; industry and protoindustry, urbanization; market integration and trade; technology; state structure, policy and political economy; taxation; technology, causes and consequences of west European overseas expansion; the emergence and nature of a 'world economy'. Comparison with east-central Europe, Mong-Ching China, and Tokugawa Japan.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
Formative coursework: Students are expected to write three essays or equivalent pieces of written work. A full list of lectures and seminar papers is distributed at the beginning of the course.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH304
The Economic History of North America: from Colonial Times to the Cold War
This information is for the 2015/16 session.
Teacher responsible: Dr Christopher Minns SAR 5.12
Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.
Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.
Course content: The course surveys major developments in the economic history of North America between 1600 and 2000. Colonial development; the American Revolution; Early North American Industry; Slavery; Westward expansion; the American Civil War; Regional Economic Development; Railroads and growth; International and internal trade; Finance and banking in the 19th century; Migration and labour markets in the 19th Century' World wars and North American Economies; the Great Depression; Post-war economic development and policy.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.
A weekly one-hour student led lecture and one-hour student led seminar.
Formative coursework: A minimum of two essays and a mock examination.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH306  Not available in 2015/16
Monetary and Financial History since 1750
This information is for the 2015/16 session.
Teacher responsible: Dr Olivier Accominotti CMK.C216
Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.
Course content: This course covers international Monetary and Financial History since the mid-18th century. The course is designed to introduce students to the key issues around globalised finance and money. It will look into the rise and eventual demise of the Gold Standard, the emergence and occurrence of financial crises, the globalisation and geography of financial markets, and changes in policy responses and regulation over time.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
20 lectures and 20 classes across the Michaelmas and Lent Terms. A one-hour revision lecture and a one-hour revision class will be held in the Summer Term.
Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH307
The Economic History of South Asia, 1600-2000
This information is for the 2015/16 session.
Teacher responsible: Prof Tirthankar Roy SAR 6.16
Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: South Asia is one of the fastest growing economies of the world. The region is also home to nearly one-third of the world’s poorest people. How did this paradoxical mix between the creation of wealth and persistence of poverty come into being? Does economic history suggest an answer? The course introduces the stylized facts and major debates in the economic history of modern South Asia. It considers the legacies of empires and developmental states, globalizations of the past and the present times, and the role of indigenous institutions and resource endowments. The course begins with a discussion of empires and markets before European colonial rule began, with special reference to maritime trade and craft production, in which the European
East India companies were interested in. For the colonial period, the major theme is the transformation engendered by colonialism and international economic integration. In the sixty years since the end of colonial rule, developmental states tried to overcome the obstacles to growth as the economists interpreted them. The course considers how successful they were in meeting the aim, and why they were limitedly successful.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

**Formative coursework:** Students are expected to write three essays or equivalent pieces of written work.

**Indicative reading:**
1. Dietmar Rothermund, An Economic History of India (1993)

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**EH308**

*Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries*

This information is for the 2015/16 session.

**Teacher responsible:** Prof Juan Roses Vendoiro STC.S483

**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

**Course content:** The course explores how and why the location of economic activities changes across time and space from industrialization up to the present. One goal for this course is to demonstrate the importance of history in the formation of the present-day economic landscape. An equally important goal is to demonstrate the applicability of the study of economic geography to the understanding of historical patterns of development and underdevelopment. The course is not organized chronologically but thematically. Particular attention focuses on four major issues: the development of cities, the creation of national markets, the historical basis for manufacturing agglomeration, and the historical evolution and sources of regional inequality.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

**Formative coursework:** All students are expected to write two essays or equivalent pieces of written work.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

**EH325**

*Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth*

This information is for the 2015/16 session.

**Teacher responsible:** Prof Janet Hunter SAR 5.17

**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

**Course content:** The course combines an examination of selected major themes and historiographical issues in modern Japanese development with a focus on particular empirical aspects of Japanese economic history since the mid-19th century. Topics will include pre-industrial growth and its legacy; economic growth before the Second World War; formal and informal empire; the Pacific War and the Occupation of Japan; trade and interaction with the international economy; consumption and living standards; institutions and organisations.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.
21 weekly seminars (EH325) of two hours each. Students are expected to do prior reading and preparation, to participate in group discussion and to make presentations.

**Formative coursework:** students will be expected to write two essays of no more than 2,500.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 3500 words) in the LT.

**EH326**

*Innovation and its Finance in the 19th and 20th Centuries*

This information is for the 2015/16 session.

**Teacher responsible:** Dr Gerben Bakker SAR 5.09

**Professor Leslie Hannah SAR 5.08**

**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

**Pre-requisites:** Students taking the course as an outside option must have completed at least one other economic history course.

**Course content:** The course explores the relationship between innovation and the financing of its in the nineteenth and twentieth centuries, the impact on economic growth and how policy makers managed (or failed) to encourage innovation investment and technology adoption.
Technological change and organizational innovation are critical determinants of the pace of economic growth. This course looks at the specific ways in which innovation transformed industries around the world in the modern era. The course has a global reach though it will concentrate on countries in Northern Europe and the United States. Particular attention focuses on links between innovation and finance: finance is a fundamental input for almost every type of productive activity. The course will explore issues such as: the relationship between market size and structure and technological progress; how firms developed the capabilities to profit from new technologies; and how policy makers attempted to nurture institutions to stimulate investment and technology adoption. The course will therefore cover themes such as the process of invention, innovation typologies, the history of R&D management, anti-trust policy, corporate governance, organisational change, incentives, intellectual property rights and the regulation of technology and its finance more broadly.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** All students are expected to write three essays or equivalent pieces of written work

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EH327**

**China's Traditional Economy and its Growth in the Very Long-Term**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Kent Deng SAR 6.05

**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

**Course content:** The course explores the main aspects China’s economic growth in the very long term from c.1000 AD to 1800. It begins with a survey of general models/themes in Chinese economic history, followed by particular issues: the formation, expansion and the function of the Chinese empire; Confucian values and state economic policies; property rights; peasantry and peasant economy; proto-industrialisation; commerce and trade; science and technology; demographic fluctuations; living standards; external shocks and foreign influence; internal rebellions and revolutions; reforms and modernisation.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Students are expected to do prior reading and to make presentations on a regular basis.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**FM212**

**Principles of Finance**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Richard Payne

Dr Hongda Zhong

For enquiries related to this course (including requests to take the course) please contact the Lead Teacher, Dr Paula Lopes (p.v.lopes-cocco@lse.ac.uk).

**Availability:** This course is compulsory on the BSc in Economics and Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available on the BSc in Economics with Economics and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Pre-requisites:** Students must have completed: one level 1 Economics course (either EC100 Economics A or EC102 Economics B), one level 1 Mathematics course and one level 1 Statistics course.

**Course content:** The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, sources
of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students are expected to produce written work for classes and to make positive contributions to class discussion.

**Indicative reading:** Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Principles of Corporate Finance by Richard Brealey, Stewart Myers, and Franklin Allen; McGraw-Hill Inc.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**FM300**

**Corporate Finance, Investments and Financial Markets**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Claudia Custodio

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Management Sciences, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Principles of Finance (FM212). Including both portfolio theory and corporate finance (FM212 or equivalent course).

**Course content:** This course is intended for third-year undergraduates and will be a broad-based follow-up to FM212 Principles of Finance. The goal is to broaden, and selectively deepen, students’ understanding of finance, building on their existing knowledge of financial economics. The course will cover a broad range of topics, with both a theoretical and an empirical emphasis. These include topics in corporate finance, investments and performance evaluation and international finance. The course consists of two interchangeable ten-week components, one on investments and international finance, and the other on corporate finance.

The first component provides students with a way of thinking about investment decisions by examining the empirical behaviour of security prices. We first study the empirical evidence of the CAPM and other asset pricing models, and then analyze different tests of market efficiency focusing on event studies and investment anomalies. We also study the main empirical findings in behavioural finance. We then learn how to measure the performance of a portfolio manager and to attribute it to different types of skill. Finally, this section of the course introduces the foundations of international finance and explores issues related to international portfolio management.

The second component of the course examines theory and evidence concerning major corporate financial policy decisions. We focus particularly on the firm’s decision to finance with debt vs. equity, the impact of taxes on such decisions, and the role of dividends. We will begin with the Modigliani and Miller proposition and discuss the firm’s choice to raise capital using debt versus equity and the firm’s choice to pay out earnings using dividends versus repurchases. We will analyze the impact of taxes, financial distress, and asymmetric information on such decisions. We will also cover optimal managerial compensation, take on the role of the policy maker to learn about corporate governance mechanisms and discuss some recent corporate scandals. Finally, we will review empirical evidence from a wide range of international sources to support or refute the theories we discussed.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT.

20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

**Formative coursework:** Students are expected to produce written work for classes and to make positive contributions to class discussions.

**Indicative reading:** Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Bodie, Kane & Marcus, Investments (Irwin) and Grinblatt & Titman, Financial Markets and Corporate Strategy (Irwin, McGraw-Hill).

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**FM320**

**Quantitative Finance**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jon Danielsson and Dr Rohit Rahi

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Pre-requisites:** Students must have completed Principles of Finance (FM212), Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Introduction to Econometrics, Principles of Econometrics or other statistical courses where at least linear regression models are covered are recommended but not required. Students who have not taken Principles of Finance, but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

**Course content:** This course is intended for third-year undergraduates and builds upon FM212 Principles of Finance. The main topics covered are financial risk analysis and financial risk management (first part of the course) and derivatives pricing (second part). As such, this course is complementary to FM300 Corporate Finance, Investments and Financial Markets, with minimal overlap.

The first part of the course provides students with a thorough understanding of market risk from both a practical and technical point of view. We discuss the empirical properties of market prices (fat tails, volatility clusters, etc.), forecasting of prices, concepts of financial risk (volatility, Value-at-Risk, etc.), volatility models (ARCH, GARCH, etc.), and we analyse how interactions and feedback between market players can generate endogenous risk and liquidity crises. Finally, we discuss credit markets and liquidity, with applications to the current situation in financial markets. This part of the course presents methods and models used by banks and other financial institutions in the management of risk and allocation of risk capital, as well as models of financial crises. Students apply the models to real financial data using Matlab, a computer software popular in both industry and academia. No prior knowledge of programming is assumed: students will learn-by-doing in class. Students will at times use data and software for coursework assignments.

The second part of the course focuses on derivatives, with a particular emphasis on equity derivatives (European call and put options, exotic options), futures and forward contracts, and interest rate derivatives (swaps, caps and floors, swaptions). We systematically address three basic questions: how do these products work, i.e. what are their payoffs? How can they be used, for hedging purposes or as part of trading strategies? And above all: how are they priced? The course emphasizes a small number of powerful ideas and concepts: absence of arbitrage, replication, and risk-neutral pricing. These are typically introduced in the context of discrete-time models, but the course also covers some well-known
continuous-time models, starting with a comprehensive treatment of the Black-Scholes model. The level of mathematics is appropriate for third-year students with a solid quantitative background.

Continuous-time stochastic processes and stochastic calculus will be introduced as we go.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 9 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce written work for classes and to make positive contributions to class discussion.

**Indicative reading:** J Danielsson, Financial Risk Forecasting: The Theory and Practice of Forecasting Market Risk will be the required textbook for the first half of the course. For the second half of the course, there is no required textbook, but the following is an excellent reference: J Hull, Options, Futures, and Other Derivatives.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**GI200**

**Gender, Politics and Civil Society**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Mary Evans COL 5.04J

**Availability:** This course is available to all second and third year undergraduates who are permitted to take an outside option as part of their programme. This course is available to General Course students.

**Course content:** Term One

An introduction to the history of the Women’s Library; issues of inclusion and exclusion in the holdings.

The making of the categories of ‘male’ and ‘female’, ‘masculinity’ and ‘femininity’; the ways in which ideas about these identities were formed by moral discourses; the emergence of cults of domesticity and family life.

The campaigns and the circumstances that changed ideas about gender and the making of the gendered citizen. The part that ideas, and ideals, about citizenship and the nation were informed by expectations about gender.

Term Two

The making of the British Empire: the negotiation and the transformation of gender in a globalising world; ‘settling’ the Empire and defining the boundaries of citizenship.

Politicising gender: the ways in which gender difference became a matter of politics and access to power. Fighting for, and against, transformations of gender roles and identities. The British campaign for suffrage and its connections with distinct traditions of social reform.

Representing gender: accounts, visual and written, of women and men; changing views about the body and sexuality. Sexuality and religion, the expression of symbolic power.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 other piece of coursework in the MT.

**Indicative reading:** The following items indicate possible reading for the course:

Sally Alexander Men’s Fears and Women’s Work: Responses to Unemployment in London between the Wars, (Gender and History, 2000)

Lesley Hall Sex, Gender and Social Change in Britain since 1880 (2013)

Jane Lewis The End of Marriage? Individualism and Intimate Relations (2002)

John Tosh A Man’s Place: Masculinity and the Middle Class Home (1999)

Jeffrey Weeks Sex, Politics and Society (2007)

**Assessment:** Dissertation (100%, 10000 words) in the ST.

---

**GV100**

**Introduction to Political Theory**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Chandran Kukathas

**Availability:** This course is compulsory on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BSc in Environment and Development, BSc in Environmental Policy, BSc in International Relations, BSc in Politics and International Relations and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** An introduction to the study of politics and political theory through the thought and texts of some of the most important western political theorists. A study of the ideas of some of the major political theorists from the ancient Greeks to the 20th Century. Topics will include theories of human nature, the origin of government and law, man’s relation to society and the state, the rise, development and comparison of different constitutions (democracy, monarchy, republic etc), the nature of just and unjust government, the relation between the spiritual and the secular in thinkers, classical and modern natural law and natural rights, the basis of political obligation, the idea of social contract and the theory of utility. The thinkers discussed this year will include Plato, Aristotle, Augustine, Aquinas, Machiavelli, Nietzsche, Hobbes, Locke, Rousseau, J S Mill, and Marx.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

**Formative coursework:** Students are required to write two 1500 word essays in the Michaelmas Term and two 1500 word essays in the Lent Term. Specific reading lists referring to modern commentaries and historical contexts will be available on the Moodle page at the beginning of the course.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

Candidates will be expected to answer four questions from a total of fourteen.

**GENERAL COURSE STUDENTS ONLY:**

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20% of the mark) and 5% attendance.

---

**GV101**

**Introduction to Political Science**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ryan Jablonski

**Availability:** This course is compulsory on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BSc in Business Mathematics and Statistics and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course is an introduction to politics in a globalised world, with a focus on how political science tries to understand and explain cross-country and cross-time differences. The course will begin by introducing students to some of the main empirical variations in political behaviour, political institutions, and outcomes across the world, focusing mainly on democratic and partially democratic countries (in both the developed and developing world), and introducing students to some of the basic theoretical ideas and research methods in political science. Each subsequent week will be devoted to a substantive topic, where a more detailed analysis of political behaviour, political institutions, or political outcomes will be presented and various theoretical explanations will be assessed. Most weeks will involve an interactive element. For example, students will be required to ‘adopt a country’, from the range of democratic or partially democratic countries across the world (which cannot be a student’s home country). The aim is for a student to become an expert on the political behaviour, institutions and outcomes in his or her adopted country, particularly to provide material and knowledge for class discussions.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative Assessment:
- Problem set (Week 6 MT)
- Mock exam (Week 11 LT)
- Moodle entries on adopted country task (most/every week/s)

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 2000 words).

GENERAL COURSE STUDENTS ONLY:
The Class Summary Grade for General Course students will be calculated as follows: 75% formative coursework (with each piece of coursework counting for 15%). 25% class participation (including attendance and contribution).

GV225
Public Choice and Politics

This information is for the 2015/16 session.

Teacher responsible: Prof Torun Dewan

Additional teachers: Rafael Hortala-Vallve

Availability: This course is compulsory on the BSc in Government and Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Government, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to Political Science or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: This course is concerned with positive political economy and public choice theory applied to the study of political conflicts, democratic institutions and public policy. The course covers the main tools for the study of public choice (rational decision-making theory, game theory, social choice theory) and a number of both theoretical and applied topics, including the empirical study of institutions. This course will cover the main topics in positive political economy and institutional public choice. These include: the aggregation of preferences; voting paradoxes and cycles; electoral competition and voting behaviour; the problems of and solutions to collective action; welfare state and redistribution; the impact of information and mass media on voting behaviour and public policy; the theory of coalitions, the behaviour of committees and legislatures including agenda-setting and veto-player power; principal-agent problems in politics; models of bureaucracy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will complete at least one formative essay and at least one timed essay in each term to allow practise on problem sets and essay writing under exam conditions.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The exam will have two parts. Part A is a compulsory question. In Part B, candidates will answer two questions from eight posed.

GENERAL COURSE STUDENTS ONLY:
The Class Summary Grade for General Course students will be calculated as follows: 25% formative essay (best mark), 25% timed essay (best mark), 50% class participation (including presentations and attendance).

GV227
The Politics of Economic Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Heims

Availability: This course is compulsory on the BSc in Environmental Policy with Economics. This course is available on the BSc in Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to Political Science or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: The aim of this course is to look at political science explanations of changes in public policy, and to apply that literature to major cases of economic policy (both contemporary and historical). In particular, it aims to examine the extent to which economic policy change is affected by ideas, interests and institutions, and the interaction between international and national factors. The material for the course is drawn mainly from the comparative literature on the politics of markets in industrialised countries.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 6 hours of lectures, 10 hours of classes and 5 hours of workshops in the LT.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT. A revision lecture will run in week 11 of the LT.

Formative coursework: Two formative essays of 1,500 words each. One presentation to be given in class.

Indicative reading: W. Streeck and K Thelen eds, Beyond

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 10% attendance, 10% participation and project presentation, 80% formative coursework.

GV245

Democracy and Democratisation

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Panizza

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is concerned with theories and case studies of democratic transformations. It focuses on several different parts of the world including Eastern Europe, Latin America, South East Asia, China, India, the Middle East and the former Soviet Union. It analyses processes of transition to democracy in historical context and also analyses relations between democracy, democratisation and economic development in a global capitalist economy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:
The Class Summary Grade for General Course students will be calculated as follows: 70% formative coursework, 20% class presentation, 10% class participation (including attendance and contribution).

GV247

Theories and Problems of Nationalism

This information is for the 2015/16 session.

Teacher responsible: Dr Douglas Hutchinson

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in International Relations and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 3 groups. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: Students should have completed a suitable course in Anthropology, Sociology, Political Science, International Relations or History. Government students should have completed GV101 Introduction to Political Science.

Course content: This course considers debates concerning the increasing importance of nationalism and ethnic identity in modern history, their impact on political movements, states and international relations.

There are three principal concerns:
1. Theories of nationalism and ethnicity, including primordialist, ethno-symbolic, modernist and post-modernist approaches. These will be compared and critiqued.
2. The development of various kinds of nations, nation-states and nationalisms from pre-modern Europe to the global present, and a consideration of various concepts (e.g. civic/ethnic, political/cultural, Asian and African forms of nationalism) frequently used to understand as well as evaluate these historical and contemporary phenomena.
3. Nationalism and transnational politics, including problems of state sovereignty, secession and national self-determination; the European union, globalisation and religious fundamentalism.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Two formative essays per term, one of which is a timed-essay set in exam-like conditions.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:
The Class Summary Grade for General Course students will be calculated as follows: 10% class presentation, 10% contribution to class discussions, 75% formative coursework, 5% attendance.
GV248

Power and Politics in the Modern World: Comparative Perspectives

This information is for the 2015/16 session.

Teacher responsible: Dr David Woodruff

Other members of Government Department staff will also teach on the course.

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Other background in political science will be considered as a substitute for GV101 for students outside of Government.

Course content: This course will acquaint students with the contemporary study of comparative politics, focusing on theories susceptible to testing with narrative historical evidence. Students will learn to address the methodological challenges of developing and testing such theories. The course will treat a wide variety of themes, including ethnic and political violence, the political impact of natural resources in developing countries, social movements and revolution, the political economy of distribution, and political ideologies. With respect to each theme, students will receive a grounding in theories of the topic and of samples of application to empirical cases drawn from throughout the developed, developing, and post-Communist world.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 11 hours of lectures and 10 hours of classes in the LT. Lectures will run from week 1-10 in MT and LT. Classes will run from week 2-11 in MT and LT. There will be a revision lecture in week 11 of the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 2 essays in the LT.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (50%, 3000 words).

GV249

Research Design in Political Science

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Leyeer

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce students to the fundamentals of research design in political science. The course will cover a range of topics, starting from the formulation of research topics and research questions, the development of theory and empirically testable hypotheses, the design of data collection activities, and basic qualitative and quantitative data analysis techniques. The course will address a variety of approaches to empirical political science research including experimental and quasi-experimental designs, large-n survey research, small-n case selection, and comparative/historical comparisons. As a result, topics covered in the course will be varied and span all areas of political science including political behaviour, institutions, comparative politics, international relations, and public administration.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST. Lectures will run from week 1-10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to produce 8 problem sets in the MT and LT. Approximately every other week throughout the course, students will complete a short “problem set” that allows them to apply material from the course to concrete political science examples (e.g., identifying design elements of a published research paper; proposing strategies for answering a given research question, etc.).

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (50%, 3000 words).

GV251

Government, Politics and Public Policy in the European Union

This information is for the 2015/16 session.

Teacher responsible: Dr Lukas Obholzer

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is divided into two parts; (i) Government and Politics: the EU as a political system, the Council, the Commission and the Parliament in the policy process, Court of Justice and Judicial politics, public opinion and EP elections, parties and Europe, interest representation; (ii) Public Policy: the policy-making process, policy implementation, the single market, social
and environmental policies, budgetary policies, EMU, migration policies, external relations policies.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in week 6 of the MT and LT for feedback and advice sessions and assessment preparation.

**Formative coursework:** Two essays per term: students’ preparedness for the examinations will depend on this written work and on private reading.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**GENERAL COURSE STUDENTS ONLY:**
The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20%) and 5% attendance.

---

**GV262**

**Contemporary Political Theory**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Kai Spiekermann (MT) & Dr Laura Valentini (LT)

**Availability:** This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is a pre-requisite for students wishing to take either of the third year options in Political Theory.

**Pre-requisites:** Introduction to Political Theory or equivalent.

**Course content:** This course provides an advanced introduction to contemporary political theory. The course is divided into two parts. The first focuses on key political concepts, such as liberty, equality, justice, rights, authority and democracy. The second turns to particularly pressing ethical questions characterizing the political domain. Some of these questions arise within the domestic political arena (e.g., the limits of freedom of speech; the regulation of abortion; respect for minority cultures), others in the international/global one (e.g., global poverty relief; terrorism; global climate change). Although the course will be concept and problem-driven, along the way, students will also be exposed to the views of leading contemporary political theorists, including John Rawls, Robert Nozick, Ronald Dworkin and many others. This course will provide students with a good grounding in the methods and substantive concerns of contemporary political theory as well as familiarity with the works of major thinkers in the field.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

**Formative coursework:** Students will be expected to submit at least two formative essays per term, one of which will be a timed-essay conducted under exam-like conditions.

The course requires ability to organize workload/do readings in advance/prepare for seminars. The course will present students with normative/ethical dilemmas they will need to tackle, and will enhance their analytical skills. As a course in political theory, verbal and written communication will be very much emphasized throughout.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**GENERAL COURSE STUDENTS ONLY:**
The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20%) and 5% attendance.

---

**GV263**

**Public Policy Analysis**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Edward Page

**Additional teachers:** Prof Martin Lodge

**Availability:** This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** GV101 Introduction to Political Science (or equivalent)

**Course content:** A systematic examination of the policy process in the context of developed nations. This course introduces key theories and models in the study of public policy and encourages a critical appreciation of the main trends in contemporary public policy-making. The course looks at the different stages of the ‘policy cycle’ (e.g. agenda-setting, implementation and evaluation), the determinants of public policy (for example, public opinion, political parties, technology) as well as central themes in the study and practice of public policy, such as corruption and risk management.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words).

**GENERAL COURSE STUDENTS ONLY:**
The Class Summary Grade for General Course students will be calculated as follows: 25% attendance, 37.5% formative essay (best essay), 37.5% participation.
GV264
Politics and Institutions in Europe

This information is for the 2015/16 session.

**Teacher responsible:** Dr Vesselin Dimitrov CON 3.06
Prof Michael Bruter, Prof Simon Hix, Dr Eiko Thielemann, Dr Lukas Obholzer

**Availability:** This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Introduction to Political Science (GV101).

**Course content:** The course aims to give students an understanding of the full range of leading topics and areas of debate and research relevant to the analysis of political institutions and politics in Europe. The course focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, immigration and Europeanisation. The course places particular emphasis on the diverse experiences of liberal democracy in different parts of Europe. The course covers not only long-established democracies in Western Europe, but also the relatively new democracies in Central and Eastern Europe. In the Lent Term, the course will study in depth a number of European countries, such as Britain, France, Germany and Italy, analysing the main developments in the country concerned in the last twenty years (elections, parties, governments), and then examining issues of particular interest related to that country. Course topics include: electoral behaviour; parties and party systems; government formation and coalitions; regionalism and federalism; national and European identities; immigration; and the challenge of Europeanisation.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

**Formative coursework:** Students will be expected to produce 2 essays in the MT and 2 essays in the LT.

**Assessment:** Exam (100%), duration: 3 hours in the main exam period.

**GENERAL COURSE STUDENTS ONLY:** The Class Summary Grade for General Course students will be calculated as follows: 15% general contribution to class discussions, 15% presentation(s) and, if applicable, essay outline(s), 60% grading of formative coursework (15% for each of the 4 essays), 10% attendance.

GV302
Key Themes in the History of Political Thought

This information is for the 2015/16 session.

**Teacher responsible:** Dr Lea Yip

**Availability:** This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at two groups. The deadline for receipt of applications is Friday 2 October 2015.

**Pre-requisites:** Students will normally be expected to have taken Introduction to Political Theory or equivalent, in a previous year.

**Course content:** A thematic study of political thought in Ancient, Medieval/Renaissance and Modern periods. This advanced course treats some of the major themes in the history of western European political thought as drawn from the writings of selected political philosophers of the ancient Greek, Roman, Medieval, renaissance, early modern and modern periods. The aim is to demonstrate, and explain, some of the continuities and discontinuities in ethical and political problems and their solutions over time and changing context.

Examples of such themes: different views on the nature of “man” and the consequences for political agency of different perspectives on human reason, will, desire; debates on the origins of law and the purpose of legislation; changing conceptions of justice; different views on government and the state’s relation to the individual; on the sources of public authority and the nature of legitimate sovereignty; on the relation of property ownership to personal identity and to participation in collective governance; the historical and socio-political presuppositions behind the different constitutional regimes: democracy, monarchy, republic etc; on the role of religion in politics; the changing perspectives on the relationship between life in the family and a life of active citizenship; theories of natural law and natural rights; social contract theories; idealist political theory; utilitarianism; nationalism; liberal, conservative and socialist traditions of thought; anarchism and feminism.

The themes, thinkers and primary texts will be selected each year to reflect the current debates in contemporary scholarly literature on them and the research interests of the lecturer.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

There will be a reading week in week 6 of the MT and week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** Two formative essays per term, one of which is a timed-essay set in exam-like conditions.

**Indicative reading:** Primary Sources: A selection of the following (this list should not be taken as exhaustive): Plato, Republic; Aristotle, Politics, Machiavelli, Discourses, Hobbes, Leviathan, Locke, Second Treatise on Civil Government, Rousseau, On The Social Contract, Hume, Political Writings, Kant, Political Writings, Hegel, The Philosophy of Right, Marx, The German Ideology.

**Assessment:** Exam (100%), duration: 3 hours in the main exam period.

Four questions will be answered.

GV303 Not available in 2015/16
From Empire to Globalization
This information is for the 2015/16 session.
Teacher responsible: Dr Jill Stuart
Availability: This course is available on the BSc in Government,
BSc in Government and Economics, BSc in Government and
History, BSc in Philosophy, Politics and Economics, BSc in Politics
and International Relations and BSc in Politics and Philosophy. This
course is available with permission as an outside option to students
on other programmes where regulations permit and to General
Course students.
The course is capped and only available as an outside option to
non-Government students and General Course students when there
is space.
Course content: This course will provide a historical and
comparative account of changing forms of world order in the
modern period. Against the backdrop of the rise and fall of empires,
it will examine the changing nature and form of globalisation and
the rise of new forms of global politics.
The course content will cover the following topics though specific
lecture titles may change from year to year: the contemporary
debate about globalisation; international systems and empires in
world history; changes in the nature of military power and war;
the evolution of global economic governance; the globalisation
of migration and environmental concerns; the role of global
intergovernmental and nongovernmental organisations; global
communications and culture; the nature of US power in the
contemporary global order; and core issues of global ethics,
citizenship and governance.
Teaching: 10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT. 2 hours of
lectures and 2 hours of classes in the ST.
McGrew (Eds), The Global Transformations Reader, 2nd edn, Polity

Assessment: Exam (100%, duration: 3 hours) in the main exam
period.

GV306 Half Unit Not available in 2015/16
Global Public Policy
This information is for the 2015/16 session.
Teacher responsible: Dr Mathias Koenig-Archibugi
The course examines the process and outcomes of policy-making
at the global level. It considers a range of modes of policy-making,
from classic intergovernmental cooperation to novel forms of
governance beyond the state such as transgovernmental networks,
multistakeholder initiatives, and regulation by non-state actors. The
lectures provide an analytical toolbox and cover the following topics:
(1) What is the meaning of “global”, “public”, and “policy”? Does
global public policy really exist? (2) What types of actors participate
in global public policy? (3) Who sets the global policy agenda and
how? (4) What types of governance institutions exist? (5) How

are governance institutions created or chosen, and what are the
implications of their plurality and interplay? (6) What types of global
public policies exist? (7) Who decides the content of global public
policies and how? (8) How are global public policies implemented?
(9) When can global public policy solve global problems? (10) When
does global public policy have democratic legitimacy?
The seminars apply the analytical tools provided in the lectures and
readings to case studies, to be explored through team work. Each
student can choose an area of specialization from a range of global
policy problems. Examples of relevant global policy problems include
the surveillance and eradication of infectious diseases; access to
essential medicines; tobacco control; food safety; labour standards;
child labour and education; deforestation; protection of the ozone
layer; illicit financial flows; internet regulation; arms control; and
other topics that may change from year to year.
Availability: This course is available on the BSc in Government,
BSc in Government and Economics, BSc in Government and History
and BSc in Politics and Philosophy. This course is available with
permission as an outside option to students on other programmes
where regulations permit and to General Course students.
Pre-requisites: N/A

GV308  Half Unit
Leadership in the Political World
This information is for the 2015/16 session.
Teacher responsible: Prof Torun Dewan
Availability: This course is available on the BSc in Government,
BSc in Government and Economics, BSc in Government and History,
BSc in Philosophy, Politics and Economics, BSc in Politics
and International Relations and BSc in Politics and Philosophy. This
course is not available as an outside option nor to General Course
students.
This course is capped at one group. The deadline for receipt of
applications is Friday 2 October 2015.
Pre-requisites: Students must have completed Public Choice and
Politics (GV225).
Course content: Good leadership is central toward having effective
organisations, well functioning institutions, and attaining desirable
policy outcomes. But what is good leadership? What is successful
leadership? Can we distinguish outcomes as causally related to the
actions taken by good and successful leaders? And how important
is a leader's style? The course will look at both theoretical and
empirical frameworks for analysing these questions developing in
particular rational choice accounts of leadership. Different notions
of leadership will be discussed including: (1) Leading by Example;
(2) The Leader as a Focal Point and (3) The Leader as an information
source. These will be illustrated by specific examples.
Teaching: 22 hours of seminars in the LT.
There will be a reading week in week 6 of the LT for private study
and assessment preparation.
Formative coursework: Students will be expected to produce 1
presentation in the LT.
Indicative reading: Ahlquist, JS. and M. Levi. 2011). "Leadership:
What it means, what it does, and what we want to know about it".
Reynal-Querol (2009) "Do Democracies Select More Educated
Leaders?", American Political Science Review, 103,3 Humphreys,
in democratic deliberations: Results from a field experiment in Sao
Tome and Principe. World Politics, Jones, B and Olken, B (2005) "Do
Leaders matter? National Leadership and Growth since World War
2", Quarterly Journal of Economics, 120, 3, 835–864
Schelling, T (1980), The Strategy of Conflict, Chapter 4
Shepsle, K and M. Boncheck (1997), Analyzing Politics, Chapter 14
Assessment: Essay (75%, 5000 words) and in class assessment
(25%).
In preparation for each class, students will read one or two core
texts on political leadership and write a one page piece that
reflecting upon these readings. This will then be used as a basis for
class discussion. This will be marked as follows: completion and
quality of the weekly statements (10%) and in class participation
(10%). Each student will also be asked to produce a brief outline
and 5 min presentation on the final essay (5%)
Indicative reading: R. Heffernan, P Cowley and C Hay Developments in British Politics 9, Palgrave Macmillan
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GV312
Advanced Topics in Government: Executive Politics
This information is for the 2015/16 session.
Teacher responsible: Prof Martin Lodge
Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.
Pre-requisites: GV101 or GV100 or equivalent
Course content: This course offers an advanced consideration of select key themes in the study of executive politics. It focuses on the changing conditions in which politics takes places (demographic change, sovereign debt crisis, environmental change and societal values) and considers how these changes impact on national executives.
Teaching: 20 hours of classes and 2 hours of workshops in the MT. 20 hours of classes and 2 hours of workshops in the LT. The workshops will introduce and provide support for the assessed coursework projects.
Formative coursework: Three formative essays (2500 words) and project proposal for assessed essay component.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Essay (50%, 2500 words).

GV313  Half Unit
Politics of Trade in Comparative Perspective
This information is for the 2015/16 session.
Teacher responsible: Dr Stephanie Rickard
Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available with permission to General Course students. A minimum attendance of 80% of the course is required. This course is capped at two groups. The deadline for receipt of applications from General Course Students is Friday 2 October 2015.
Pre-requisites: A background in political economy would be advantageous.
Course content: The course focuses on the role of institutions, ideas and interests in the process and formulation of trade policy. We examine the causal influences of institutions, ideas and interests in trade, focusing predominantly on developed countries. We draw on theories from economics and political science and analyze these using both historical and contemporary examples, and do so from a comparative perspective, rather than an international relations perspective.
The primary focus of the course is on actual policy outcomes.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Lectures will run from week 1 - 10 of the LT. Seminars will run from week 2-11 of the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Assessment: Essay (100%, 4000 words).

GV314
Empirical Research in Government
This information is for the 2015/16 session.
Teacher responsible: Prof Edward Page
Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.
This course is capped at one group. The deadline for receipt of applications is Friday 2 October 2015.
Course content: The course introduces a variety of techniques and issues in the empirical study of political science and applies them to a practical research project in which students participate throughout the year. The focus of the course will be the practical research project. For 2015/16 the proposed research project will probably explore the question of blame attribution, though this is subject to change. At the theoretical level the course will cover questions relating to the utilization of policy research, forms of research design, sampling, questionnaire construction, coding and converting non-quantitative to quantitative indicators, response rates, eliciting interviewing and research ethics. As the practical research project progresses classes will cover the development of practical skills such as, principles of research report writing and, where appropriate for the project, use of text processing programmes, and SPSS.
Teaching: 20 hours of seminars and 2 hours of workshops in the
MT. 20 hours of seminars and 2 hours of workshops in the LT. 2 hours of seminars in the ST. The workshops will take place in the reading weeks (week 6 of MT and LT) and will consist of additional teaching activities to extend students’ familiarity with the course content.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (25%, 2500 words) and research project (25%).

GV335 Half Unit
African Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Boone CON 6.04

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state and economy in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, and introduce students to theories that aim to identify causes of similarity and difference across and within countries. Students will come away with a better understanding of the possibilities and limits of structured, focused comparisons in comparative politics, and with an introduction to political economy approaches to questions of late development. They will also develop substantive knowledge of the political economy of sub-Saharan Africa and analytic tools to describe and make sense of its diversity.

Teaching: 20 hours of lectures and 16 hours and 30 minutes of seminars in the MT. This course shares lectures with DV435 African Political Economy. Seminar classes are separate for undergraduate students.

Formative coursework: There will be one 1,200 formative assignment (short essay).

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 1500 words). Students will write one summative paper (50%) and take an exam, which will consist of 2 different essay questions (50%).

This information is for the 2015/16 session.

Teacher responsible: Dr Steffen Hertog CON4.01

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday 10 October 2014.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This course aims to introduce students to the broad theoretical traditions in the study of political economies outside of the OECD world, and to provide an analytical overview of a number of concrete social structures that shape the interplay of the political and economic realms in different world regions. It will address puzzles like: Why did some developing countries grow much faster than others after WWII? Are some forms of corruption more compatible with development than others? Which impact do natural resource rents have on politics and development? Under which conditions can countries with a short history of independent statehood build efficient institutions?

GV366 will engage with broad theoretical traditions like modernization theory, dependency theory, and neo-patrimonialism, and with concrete empirical topics like state-business relations, the developmental state, corruption and clientelism, the politics of public enterprise, and the political economy of resource-rich countries.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (50%, 3500 words) in the ST.

GV390

Government Dissertation Option

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Bruter

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course may be taken only in the third year. A BSc Government and History student cannot choose both HY300 and GV390 and a BSc Politics and Philosophy student cannot choose both GV390 and PH399.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by a proposed dissertation advisor and the Departmental Tutor. The topic should be chosen from any area within the field covered by the degree course and supported by a member of the academic staff from the Government Department willing to act as dissertation advisor. Following the dissertation information session organised by the Department in the second year of the students’ curriculum, candidates should approach their tutor during the Lent Term or Summer Term of their second year to discuss the possibility of a proposed dissertation topic.

After having received approval for a topic by a prospective advisor, students must submit a dissertation form detailing final title and synopsis/prospectus to the Departmental Tutor for approval by the
fourth week of the third year.

Teaching: 2 hours of seminars in the MT. 3 hours of seminars in the LT.

Five seminars split between the Michaelmas Term and Lent Term as well as individual supervision. Dissertation advisors can be expected to offer advice on reading and guidance on the organisation of the dissertation; they may also read and comment on a draft outline of up to 1,000 words. Tutors or other teachers are not permitted to read or comment on a final draft of the whole dissertation or any part of it. The number of individual meetings with the students will be strictly limited but should be at least once per term in the student’s third year. It should be stressed that no member of staff is under an obligation to agree to supervise any proposed dissertation.

Assessment: Dissertation (100%, 10000 words).

Footnotes are to be included in the word limit - but not the bibliography. The examiners may determine that the candidate should be called for an oral examination.

---

**GY100**

**Introduction to Geography**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Michael Mason STC510 and Dr Claire Mercer STC122

**Availability:** This course is compulsory on the BA in Geography, BSc in Environment and Development and BSc in Geography with Economics. This course is available on the BSc in Business Mathematics and Statistics and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course provides students with an introduction to Geography at LSE. In Michaelmas Term we will examine human geography’s key concepts, including space, place, scale, landscape, nature, globalization, development, society and city. In the Lent Term the course will move on to introductory sections on environmental geography and economic geography. The environmental section will cover topics such as the anthropocene, nature and culture, and geography and economic geography. The environmental section will cover topics such as the anthropocene, nature and culture, and global and local environmental problems. The economic geography section will introduce students to the changing location of economic activity, inequalities within and between countries, regions and cities, and the rationale, objectives and tools of local and regional development policies in a globalizing world.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 4 essays and 1 presentation in the MT and LT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**GY103**

**Contemporary Europe**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Simona Iammarino STC S410

**Availability:** This course is available on the BA in Geography, BSc in Environment and Development and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course aims at introducing students with little prior knowledge of European issues to some of the most important economic, social, and political challenges the European Union overcame in the past, and currently faces. The course develops a sound understanding of the determinants and the evolution of these challenges and the related public policies. Students will learn about strengths, weaknesses and lessons to be drawn from the most striking example of integration as a result of historical forces and in the context of a globalised world. The course covers issues such as economic integration, competitiveness, cohesion, growth, enlargement, ageing, migration, employment trends, social polarization and the emergence of regionalism and nationalism. Particular stress is laid upon the spatial constitution of these themes, at various levels of geography: supranational, national and subnational (regional) level.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 18 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

The 3 hour-class in the ST is Revision Session for the exam.

**Formative coursework:** Students will be expected to produce a minimum of two class essays during the year and will also be expected to give class papers.

**Indicative reading:** Given the diversity of the subject, there is no one textbook that covers all of the topics. A mix of academic articles and chapters from textbooks is used in the course. Reading lists are provided electronically, and additional web sources will also be indicated during the lectures. Indicative textbooks are the following: A Rodriguez-Pose, The European Union: Economy, Society and Polity, 2000; R Baldwin and C Wyplosz, The Economics of the European Integration, 3rd edition, 2009; S Senior Nello, The European Union. Economics, Policies and History, 2nd edition, 2009; W Molle, European Cohesion Policy, 2007.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

---

**GY120**

**Environmental Change: Past, Present and Future**

This information is for the 2015/16 session.

**Teacher responsible:** Prof David Jones STC S417

**Availability:** This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** Many consider that ‘Climate Change’ is the greatest challenge currently facing human society, mainly because of the ‘Environmental Changes’ that it will cause. But what are ‘Climate Change’ and ‘Environmental Change’? What causes these changes? How much have they changed in the past and how do we know? How much is human activity responsible for the recent changes identified and when did this influence begin? How is the climate going to change in the next century and if water finds its own level, why does sea-level change vary over the Globe?

To answer these questions requires that the course focuses on developing an appreciation of the Planet Earth as the home of human societies. The analysis focuses on the physical nature of the ‘natural’ or biophysical systems and involves consideration of how the solid earth, the gaseous atmosphere, the hydrosphere and the biosphere, were formed, have evolved, interact and have changed over time due to both external (extra-terrestrial) and internal factors, including humans. From this, an appreciation of change and evolution over differing time-scales is developed, which will serve as an essential basis for students when evaluating the contemporary two-way interaction between humans and the environment. The
relevant science will be taught as and when required. The course consists of the following sections:

**A. Introduction to Environmental Change:**
The structure and functioning of the Earth as a set of systems (The Geosystem). The Scientific Method. The systems approach and its applications to environmental studies. Ecosystem concept. Biogeochemical cycles. The nature and causes of Environmental Change and Climate Change; “Change” and “Variability”.

**B. Key Aspects of Environmental Change:**
(iii) The Biosphere: Development and change of Biodiversity over time due to evolution through Natural Selection.

**C. Long-term Geosystem Change. Consideration of relevant aspects of the following:**

**D. Quaternary Environmental Change:** Environmental Change over the last 2.6 million years. The paradigm of Quaternary environmental change, i.e. the “Ice House - Hot House” paradigm. Ice cores, ocean sediment cores, isoce analysis, The Milankovitch Mechanism. Holocene Climate Change (i.e. the last 11,700 years) and debates regarding reconstructions and human influences. The nature and causes of sea-level change. Isostasy. Human impacts on the Ecosphere.

**E. Global Environmental Change:** Contemporary Climate/Environmental Change and the basis of predictions to AD 2100.

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce two essays during the year, one in each term, and give class papers.

**Indicative reading:** Bell, M. and Walker, J.C., Late Quaternary Environmental Change: Physical and Human Perspectives, 2005.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period. Essay (15%, 1500 words) and essay (25%, 2000 words) in the LT.
and analysis of primary data through fieldwork, and methods of interpreting primary and secondary texts. The full week of fieldwork includes day trips to East and South London investigating themes of the impact of industrial restructuring, globalization, regeneration, and social exclusion, during which students are required to apply various methods from the course in their own research.

**Teaching:** 10 hours of lectures and 20 hours of classes in the MT. 10 hours of lectures and 20 hours of classes in the LT.

**Compulsory fieldwork:** one week, London

**Formative coursework:** Students will be expected to read and review research that employs a range of qualitative and quantitative methods. There is also an essay (750 words) in MT. Classes in MT serve as direct preparation for statistical methods to be used in the assessed practical exercise.

**Indicative reading:** A Blunt et al. (Eds), Cultural Geography in Practice, 2003; D Edmon, Statistics in Geography, 1985; R Flowerdew; D Martin (Eds), Methods in Human Geography, 1997; I Hay (Ed), Qualitative Research Methods in Human Geography, 2010; K Hoggart, L Lees; A Davies, Researching Human Geography, 2002.

A number of more specialised texts will be recommended.

**Assessment:** Essay (25%, 1500 words) and project (35%, 3500 words) in the MT. Project (40%, 4000 words) in the LT.

The course summative work comprises an essay of 1500 words (25%); a practical group research exercise based around inferential statistics (35%) and an independent fieldwork project in East London (40%).

---

**GY200**

**Economy, Society and Space**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alan Mace S1CSTa

**Dr Ryan Centner**

**Availability:** This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** From a global perspective this course examines the inter-relatedness of economy and society and the spatiality of social and economic phenomena in contemporary societies. Issues covered include: political economy and theories of uneven development; changing working conditions and patterns of inequality at different spatial scales; gentrification and displacement; and urbanisation in comparative perspective. We will examine relationships between economic and social restructuring; the geographies of privilege, exclusion and marginality; as well as responses through urban regeneration, urban renewal and city planning. At the end of the course students should be able to understand the relationship between the economic, social and spatial realms and communicate and apply these understandings to the contemporary geographies of everyday life.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to prepare written work for weekly classes, and write one formative essay each term related to course readings.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

In the examination students answer three out of nine questions. Details of the style and layout of the essay will be provided at the start of the session.

---

**GY201**

**Urban and Spatial Economic Analysis I**

This information is for the 2015/16 session.

**Teacher responsible:** Prof John Henderson STC.S5006b

**Availability:** This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economics, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Economics B (EC102) is normally required; Economics A (EC100) is essential.

**Course content:** This course provides students with a theoretical and empirical understanding of spatial economic processes and how these influence the behaviour of firms and households and the wider economy.

The course draws primarily on international and urban economics. Topics covered include: causes and consequences of international trade; the winners and losers from globalization; multinational companies; trade, firms, and productivity; offshoring and outsourcing; the function of cities and the urban system; cities as engines of growth; the sources of agglomeration and dispersion; the determinants of urban structure and the role of land markets and land market regulation.

**Teaching:** 18 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to prepare for group discussion of some readings and hand in short essays and problem sets in both terms.

**Indicative reading:** Detailed reading lists will be given out at the beginning of each term. Readings will include journal articles. Some important items include: A O’Sullivan, Urban Economics (8th edn 2012), Irwin/MacGraw-Hill; T A Pugel & P Lindert, International Economics, (14th edn) McGraw Hill, 2009.

**Assessment:** Exam (80%, duration: 3 hours) in the main exam period.

Essay (20%, 2000 words).

---

**GY202**

**Introduction to Global Development**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Claire Mercer S418

**Dr Romola Sanyal**

**Availability:** This course is compulsory on the BSc in Environment and Development. This course is available on the BA in Geography, BSc in Environmental Policy with Economics, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** An introduction to analysing global development, focussing on key development, theories, strategies, problems and trajectories. In Michaelmas Term we cover concepts and ideas of development, colonial development, theories of development including modernization, dependency and post-development, the rise of the neoliberal project, the debt crisis, structural adjustment and PRSPs, participatory development and NGOs. In Lent Term we examine poverty, informality, housing, water, sanitation, gender, conflict and development.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

**Formative coursework:** Students will produce two essays during
the MT and the LT.

**Assessment:** Exam (75%), duration: 3 hours in the main exam period.

**Essay (25%, 2000 words)** in the LT.

Students will be expected to produce two essays during the MT and LT, and also to prepare class presentations.

---

**GY205**  
**Political Geographies, Policy and Space**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Murray Low STC.S512

**Availability:** This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** An introduction to the relevance of a geographical perspective for explanation of contemporary political processes, and of a political perspective for explanation of contemporary geographies, at scales from the local to the global. Topics covered include: states; geopolitics; empires and national states; citizenship rights, migration and national ‘closure’; nationalism, territory and identity; geographies of elections and representation; democratization; globalisation, neo-liberalism and governance.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT.

15 hours of lectures and 5 hours of classes in the LT. 2 hours of lectures in the ST.

**Formative coursework:** Students will be expected to submit one formative essay per term of up to 1,500 words.

**Indicative reading:** Detailed reading lists will be provided to students. Inductive texts include: J Agnew, Making Political Geography, 2002; C Barnett and M Low (eds.) Spaces of Democracy 2004; J Agnew & S Corbridge, Mastering Space, 1995; K Cox, M Low and J Robinson (eds) The Sage Handbook of Political Geography, 2008.

**Assessment:** Exam (75%), duration: 3 hours in the main exam period.

**Essay (25%, 2000 words)** in the LT.

---

**GY220**  
**Environment: Science and Society**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Michael Mason STC.S510 and Prof David Jones STC.417

**Availability:** This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course examines debates concerning the nature, cause, and effects of, and alternative solutions to, the key natural environmental degradation and pollution problems faced by human societies. It highlights the role of science in environmental understanding and governance.

The course consists of three sections, although the specific content, order and relative proportion of teaching may change with staff availability. Part A: Introduction and Themes: this introduces students to social scientific perspectives on scientific knowledge and environmentalism. Part B: Environmental Risk and Science: this section examines the physical science basis of current regional and global environmental risks, including geohazards and global atmospheric pollution. Part C: Science and Environmental Governance: this final section of the course examines how environmental science is incorporated in global environmental governance. The course concludes with an examination of the notion of sustainability science.

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT.

18 hours of lectures and 9 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 3 essays in the MT and LT.

**Assessment:** Exam (75%), duration: 3 hours in the main exam period.

**Essay (25%, 2000 words)** in the LT.

---

**GY222**  
**Applied Environmental Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Susana Mourato STC. S420 and Prof Eric Neumayer STC. S503

**Availability:** This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course is an introduction to economic principles in the analysis of environmental change and natural resource use, and in designing appropriate policy responses. The first part of the course largely covers the concepts and tools of environmental economics, while the second part applies these concepts and tools to specific challenges for real world policy-making. Topics to be covered include: the evaluation of regulatory and market based instruments in controlling pollution; moral suasion and voluntary regulation; economics of natural resource use; economic growth, the environment and sustainable development; cost-benefit analysis and environmental valuation; economics of biodiversity and ecosystem services conservation; trade and the environment; green finance; behavioural and happiness economics and the environment.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT.

15 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce a minimum of two (non-assessed) essays during the year and will also be expected to give class presentations.

**Indicative reading:** Detailed reading lists will be provided to support each course component. For an overview and introduction

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

---

GY240

Research Techniques (Spatial, Social and Environmental)

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low
Additional teacher(s): Dr Ryan Centner

Availability: This course is available on the BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: This course is similar to GY2A0 and shares most teaching arrangements with that course. It does not include the week long field-course associated with GY2A0. This course aims to prepare second year students, who already have some grounding in social science methodology, to undertake individual research projects. It examines the methodologies used in Geographical research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student’s own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers a variety of different approaches to social science methodology including: (i) analysis of quantitative data using linear regression including hypothesis testing, (ii) analysis of quantitative spatial data using geographic information systems (GIS) software, (iii) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including research ethics when conducting fieldwork (vi) techniques for the economic analysis of environmental issues; and (v) techniques for designing, carrying out and presenting an Independent Research Project.

Teaching: 15 hours of lectures, 6 hours of classes and 6 hours of classes in the MT. 10 hours of lectures and 9 hours of classes in the LT.

Formative coursework: In the MT classes, and during the field-course, students are encouraged to submit drafts of the summative assessment for the course with opportunities for support and feedback from staff as they do so. In addition, there is one piece of formative assessment (no more than 1000 words) in each term.

Assessment: Project (50%) and other (15%) in the LT.
Project (35%) in the ST.
(i) Quantitative methods/Geographical Information Systems project (50%)
(ii) Project in environmental and economic analysis (35%)
(iii) Proposal for 3rd Year Independent Research Project (15%)

---

GY244

London’s Geographies: An Introduction to Cultural and Historical Geography

This information is for the 2015/16 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is available on the BA in Geography and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces you to cultural geography, with application to conditions of life, livelihood and urban experience in 19th, 20th and 21st century London. What is it that makes London such a specific kind of urban scene, and how have people sought to represent its specificity: this is the key question of the course. Rather than a comprehensive account of London’s past and present, this course uses the synthetic (social, economic, political and cultural) tools of human geography to understand how and why London is a specific kind of city. London provides an opportunity for thinking about the interplay of culture, society, and space through time. We consider a series of questions about the spatial and social divides of the city and about urban and social transformation. Topics include, but are not limited to; landscape, spectacle, crime & terror, sexuality, migration & racism and labour politics. An important ‘lab’ component involves leaving the classroom to enter the LSE Archives and to walk the streets to interpret London’s cultural geographies. You will be encouraged to access a wide range of sources to build up your interpretation of London, including; novels, film, photographs, music and blogs. You are encouraged to go on walks, to explore aspects of the city you do not already know, and to dig through archival material to find connections between past and present London.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 13 hours and 30 minutes of lectures and 7 hours of classes in the LT.

Formative coursework: Students are expected to write two formative essays and to participate actively in classes led by the Class Teacher.

Assessment: Essay (40%, 3000 words) in the MT. Presentation (10%) and essay (50%, 3750 words) in the LT.

---

GY2A0

Research Techniques (Spatial, Social and Environmental)

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low
Additional teacher(s): Dr Ryan Centner

Availability: This course is compulsory on the BA in Geography.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course is similar to GY240 and shares most teaching arrangements with that course. This course aims to prepare second year students, who already have some grounding in social science methodology, to undertake individual research projects. It examines the methodologies used in geographical research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student’s own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature. The course covers a variety of different approaches to social science methodology including: (i) analysis of quantitative data using linear regression including hypothesis testing, (ii) analysis of quantitative spatial data using geographic information systems (GIS) software, (iii) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including research ethics when conducting fieldwork (vi) application of qualitative research techniques in the field; and (v) techniques for designing, carrying out and presenting an Independent Research Project.

Teaching: 10 hours of lectures, 6 hours of classes and 6 hours of classes in the MT. 9 hours of lectures and 9 hours of classes in the LT. There is a week-long fieldcourse associated with this course, normally overseas, and normally in the final week of the Lent Term. Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

Formative coursework: In the MT classes and during the field course, students work on elements of the summative assessment for the course with opportunities for support and feedback from staff as they do so. In addition, there is one piece of formative assessment (no more than 1000 words) each term.

Indicative reading: Reading lists will be available for each part of the course. Basic texts include: J Bell, Doing your Research Project - Guide for first time researchers in education and social science (2nd edn), 1993; J Burt & G Barber, Elementary Statistics for Geographers, 1996; I Heywood, S Cornelius & S Carver, An Introduction to GIS, 1998; P Kennedy, A Guide to Econometrics, 1985; A MacEachren, Some truth with maps: a primer on symbolization and design, 1994; K G Esteberg, Qualitative methods in social research, 2002; I Hay (Ed), Qualitative research methods in human geography, 2010

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the ST.

**GY301**

The Political Geography of Development and the South

This information is for the 2015/16 session.

Teacher responsible: Prof Gareth Jones S506 and Dr Claire Mercer S418

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: Analysis of theories and methods needed to understand territorial patterns of economic development in Europe, the US and other developed economies. Students will be given the basic toolkit needed to think about such issues as: why industries locate where they do; why there are tendencies toward geographical concentration and dispersion of economic activity; the reasons why economic activity concentrates in cities and metropolitan areas; why it leaves those areas; how existing trends toward globalization are affecting these processes. In addition, the course typically covers a range of policy-relevant topics relating to the economic performance of regions and countries around the world, including: human capital and education, innovation, international trade and quality of institutions.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce class essays during the year and will also be expected to give class presentations.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the ST.
**GY302**

**Urban Development: Politics, Policy and Planning**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Hyun Shin STC. S416 and Dr Murray Low STC. S512

**Availability:** This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course covers theories and processes of urban politics and governance; urban problems and policy responses in developed and developing countries, within an institutional and political framework: Areas of study include:

1. Urban government in the UK and USA. Theories of urban politics. Politics of urban fiscal problems and local economic development policy. Management of urban social issues.
2. Urban policy and practice, e.g. speculative urbanisation, urban redevelopment, mega-event politics, gentrification, the right to the city. Case studies largely drawn from cities in mainland China and newly industrialised economies in East Asia

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

**Formative coursework:** Students should produce two essays during the year.

**Indicative reading:**

- S Fainstein, *The City Builders*, 2001
- R P Appelbaum and J W Henderson, *States and development in the Asia Pacific rim*, 1992
- G Andrusz et al, (Eds), *CITIES after socialism*, 1996
- J Friedmann, *China’s urban transition*, 2005
- Park et al, *Locating neoliberalism in East Asia*, 2012

**Assessment:**

**The Geography of Gender: Global Perspectives**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Sylvia Chant STC. S417a and Dr Martina Klett-Davies

**Ms Jordana Ramalho**

**Availability:** This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** It would be an advantage if students have some grounding in gender and/or development issues from a second year course such as GY200 Economy, Society and Space, or GY202 Introduction to Development in the South.

**Course content:** An analysis of the geography of gender at a global scale covering high income countries, emerging economies and developing nations. The course focuses on the variability of gender roles and relations and their socio-spatial implications in different geographical contexts.

**MT:** Gender in the Global South- ‘Engendering’ the development agenda; Conceptualising and measuring gender inequality; the UNDP gender indices and beyond; Fertility, reproduction and health; Households and families; Employment and and the ‘informalisation’ and ‘feminisation’ of labour; Gender dimensions of national and international migration; Gender and development policy; Girls and GAD; Men and masculinities.

**LT:** Gender in high income and emerging economies: Gender inequality in a global context; Production and reproduction; Gender work and identity; Theorising the changing organisation of work, gender divisions between paid and unpaid work; Global cities: polarisation and feminisation of work; Migrant workers and the global care chain. Changing gender divisions in high income and emerging economies – China; Economic crisis and gender equality; Policies for gender equality.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce one essay per term, and will also be expected to give class papers.

**Indicative reading:**

**Assessment:**

- Essay (25%, 2500 words) in the LT.

**GY305**

**Urban and Spatial Economic Analysis II**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Olmo Silva STC.S506a

**Availability:** This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

**Pre-requisites:** Students should have taken one or more from: EC100, GY201, GY222.

**Course content:** The aim of the course is to develop theoretical and empirical understanding of spatial economic processes in order to study and evaluate a wide range of issues and policies. Particular emphasis will be put on urban and regional economies and business and worker location decisions. More specifically, the first part of the course will study models of the location of economic and innovation activity with a particular emphasis on regional economies. The second part of the course continues to study location, but focuses more on household location decisions, personal mobility and their implications for spatial labour markets and residential neighbourhood.

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

**Formative coursework:** Students will be expected to produce a minimum of two essays during the year.

**Indicative reading:** A detailed reading list will be given out at the beginning of the course. Reading will predominantly include journal articles and policy documents.
GY306
Geographies of Race
This information is for the 2015/16 session.
Teacher responsible: Dr Austin Zeiderman
Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: None
Course content: This course will critically analyse the intimate relationship between race and space in the modern world. Through a range of historical and contemporary examples, it will examine how interconnected forms of racial and spatial difference are produced, reproduced, and transformed. Focusing on the material and cultural formation of radicalised geographies, students will learn to recognise how racially inflected discourses and practices shape the production of space and how geographical location matters to racial classification, identification, and discrimination. The course will be organised around a series of archetypal spaces: for example, the body, the home, the ghetto, the wild, the frontier, the prison, the plantation, the border, the colony, the school, and the street. In each case, students will examine the confluence of race and space as well as their intersection with broader themes processes, such as colonialism, capitalism, urbanisation, globalisation, environmentalism, migration, and incarceration. Since race is often entangled with other forms of difference, students will also learn to interrogate the influence of gender, class, religion, and sexuality on the production of space. Texts from human geography, critical race theory, colonial and postcolonial studies, and related fields in addition to other media, such as film, literature, journalism, and photography, will provide students with conceptual resources to think critically about the ways in which the regulation of global environmental risk is framed and politically contested.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.
Formative coursework: Students will be expected to produce 2 essays in the MT and LT.
Indicative reading: A detailed syllabus will be provided at the beginning of the course, but will include works such as: CLR James, The Black Jacobins, 1989; F Fanon, Wretched of the Earth, 1963; E Said, Orientalism, 1983; K Jackson, Crabgrass Frontier, 1989; A McClintock, Imperial Leather, 1995; TB Hansen, Wages of Violence: Naming and Identity in Postcolonial Bombay, 2001; RW Gilmore, Golden Gulag: Prisons, Surplus, Crisis and Opposition in Globalizing California, 2005; O Yiftachel, Ethnicity: Land and Identity Politics in Israel/Palestine, 2006; KM Clarke and DM Thomas, Globalization and Race, 2006; IN Brown, Dropping Anchor, Setting Sail: Geographies of Race in Black Liverpool, 2005; L Pulido, Black, Brown, Yellow and Left: Radical Activism in Los Angeles, 2006.
Assessment: Exam (75%), duration: 3 hours) in the main exam period.
Essay (25%, 2500 words) in the LT.

GY324
Environmental Governance
This information is for the 2015/16 session.
Teacher responsible: Dr Michael Mason STC.510, Dr Carmen Marchiori KGS.102 and Dr Richard Perkins STC.413
Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course seeks to explore and critically interrogate the evolving patterns and processes of environmental governance. The course begins by introducing different conceptions of environmental governance, highlighting the multiple actors, scales and interactions involved. It then considers the role of the territorial state, focusing on the organisations of national environmental governance, and how public environmental policy is made and implemented. The next part switches focus to the role of corporations in environmental governance, outlining the motives, practices and outcomes of corporate environmentalism. Lent Term provision examines the issues, actors and processes that shape environmental governance at the transnational and global scales. Introductory lectures on the global environmental policy process introduce different scholarly perspectives informing current research (e.g. regime analysis, critical political economy and constructivism): these perspectives will be referred to as subsequent lectures address particular actor groups and issues (e.g. sustainable energy transitions, climate security). Students will be encouraged to think critically about the ways in which the regulation of global environmental risk is framed and politically contested.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.
Formative coursework: Students will be expected to produce a minimum of three 1,500 word formative essays/projects during the year.
Assessment: Exam (75%), duration: 3 hours) in the main exam period.
Essay (25%, 2500 words) in the LT.

GY325
Environment and Development
This information is for the 2015/16 session.
Teacher responsible: Dr Charles Palmer KG52.06
Dr Jennifer Baka
Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: Applied Environmental Economics (GY222) and/or Intermediate Microeconomics (EC201)
Course content: This course explores the complex relationships between development, poverty and the environment. It covers a
range of important natural resource and environmental issues in developing countries, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in political ecology and economics, the course will examine a range of topics, including: the politics of sustainable development; property rights and governance; the food-energy-water nexus; the resource curse; critical resource issues (including forestry, fresh water, and fisheries); biofuels; and urbanization.

By the end of the course, students should be able to:

- Assess key debates related to sustainable development
- Critically evaluate relationships between development, poverty, natural resource use and the environment
- Understand the natural resource linkages between developing and developed countries

**Teaching:**
10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

**Formative coursework:** Students will be expected to produce one 750 word essay plan in the MT and a minimum of one 1,000 word formative essay in the LT.

**Indicative reading:**

**Assessment:**
Exam (50%, duration: 2 hours) in the main exam period. Essay (50%, 4000 words) in the LT.

---

**GY350 Independent Research Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Claire Mercer STC.418

Other teachers responsible: Student’s Academic Adviser in the Department of Geography and Environment

**Availability:** This course is compulsory on the BA in History, BSc in Economic History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** An introductory survey of events outside Europe in the twentieth century, with a particular emphasis on the collapse of the Western colonial empires, the development of relations between the West and the new states within Asia and Africa, revolutionary developments in Latin America, and the rise of non-Western models of political development. The state of the European empires in the first half of the century; the Japanese challenge to the West; the Chinese revolution; Indian independence; the Palestinian issue and the birth of Israel; the decolonization process in Asia and Africa; the Japanese developmental state; the rise of the non-aligned movement; the Cuban revolution and the Central American wars of the 1980s; the development of the Arab and non-Arab Middle East; American and Soviet relations with the Third World; post-independence South Asia; the modernization and underdevelopment debates; post-independence Africa; China under Mao and Deng; the rise of Islamic fundamentalism and the Arab-Israeli peace process.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

‘Students on this course will have a reading week in Week 6, in line with departmental policy’

**Formative coursework:** Students will be asked to write at least three essays and to present a number of brief class reports

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY116
International History since 1890

This information is for the 2015/16 session.

Teacher responsible: Prof David Stevenson 3.11 (SAR)
Availability: This course is compulsory on BSc in International Relations and BSc in International Relations and History. This course is available on the BA in History, BSc in Economic History, BSc in Government and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The history of international relations from the 1890s through the 1990s. The course emphasises the changing character of international politics over the course of the ‘long twentieth century’, and aims to equip students with a comprehensive knowledge of international politics since 1890, to provide the factual grounding and conceptual apparatus necessary to understand the contemporary world, and to gain a sense of how some of the main historiographical debates have developed over the last few decades. Lectures and classes fall into six distinct chronological and analytical phases. The first segment covers the ‘globalization’ of the European balance-of-power system after 1890 through the advent of extra-European great powers: Russia–in–Asia, Japan, and the United States, and the crisis and collapse of the system in the First World War. The second segment covers the failure of both attempts to tame the resulting chaos: Wilson’s new vision of international politics and British and French efforts to reconstitute the 1914 world. The consequences of failure, the successful revolt against world order of four discontented powers, Imperial Japan, Fascist Italy, National Socialist Germany, and the Soviet Union, and the outbreak of the ‘second round of the German War’, close the third phase. The fourth phase opens with the expansion of European war into global war and closes with the birth of a bipolar world dominated by the United States and the USSR. The ensuing era of superpower rivalry forms the fifth segment; themes covered include the origins of the Cold War in both Europe and Asia, decolonisation, European unity, the ‘American war’ in Vietnam, and the rise and fall of superpower détente. The final phase of the course examines the causes and consequences of the collapse of the Soviet empire, the rising power of China; and the patterns of international disorder in the post-Cold War era.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to write three 2,000-word essays during the course of the year, two in MT and one in LT, from topics designated in the course reading list, and in addition to complete a one-hour mock examination in ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture, and will also be found, along with other course materials, in the public folders. The following works offer useful background; students should consider reading one or two of them in advance: W R Keylor, The Twentieth Century World: an International History; C J Bartlett, The Global Conflict, 1880-1970; D Stevenson, The First World War and International Politics; P M H Bell, The Origins of the Second World War in Europe; Akira Iriye, The Origins of the Second World War in Asia and the Pacific; J P Dunbabin, International Relations since 1945 (2 vols).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY118
Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Keenan E391
Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the international history of the early modern period by examining the complex political, religious, military and economic relationships between Europe and the wider world. The period between 1500 and 1800 enables the course to introduce students to a crucial period in international history. In political terms, it covers the rise of major dynastic states, with increasingly centralized institutions and concepts such as absolutism to promote the authority of the monarch, as well as the challenges to that authority and growing interest in political and social reform, culminating in the revolutions examined at the end of the course. Internationally, the period witnessed the gradual consolidation of leading European powers, as reflected in the Treaty of Westphalia (1648), with formerly peripheral states emerging to challenge their position by the early eighteenth century. At the same time, the rise of major Islamic empires in Eurasia and the growing contact between Europe and the wider world provide students with important points of comparison between European and non-European states. The intellectual, religious and cultural developments of this period provide a constant context for these major political events. The course will discuss the influence of key movements, such as the Renaissance, the Scientific Revolution and the Enlightenment, which re-ignited an interest in the Classical past and fostered a culture of rational enquiry into the natural world. Yet religion remained a vital component in the view of contemporaries, whether Christian, Muslim, or Jewish. This world-view was subject to challenges throughout the period, as during the Reformation, and often sought to impose its own orthodoxy, whether through religiously-motivated conflicts or the persecution/conversion of certain groups. The course seeks to familiarize students with some of the most important issues and current debates on these aspects of this period. While its scope is necessarily broad in nature, the course will help students to deal with the dynamics of continuity and change over a long period of time.

Teaching: 10 hours of lectures and 10 hours of classes in the ST.
10 hours of lectures, 10 hours of classes and 1 hour of workshops in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 piece of coursework in the ST.

The formative essay in the Summer Term takes the form of a mock exam answer, which will be graded and given feedback.

Paul Kennedy, The Rise and Fall of the Great Powers: Economic
HY200
The Rights of 'Man': the History of Human Rights Discourse from the Antigone to Amnesty International

This information is for the 2015/16 session.

Teacher responsible: Dr Timothy Hochstrasser Sardinia House 2.14

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit to General Course students.

Course content: Human rights are often assumed to have a precise twentieth-century origin in the 1948 Universal Declaration or in the succeeding decades of increasing activism. However, the history of human rights discourse and its practical impact emerged as only the latest stage of a sequence of intellectual debates and real-life struggles in specific historical settings over political, religious, economic rights, broadly defined. Different cultural milieus have produced a variety of contexts for working out tensions between claims by individuals or minorities for autonomy on the one hand and the rival demands of collective obligation and identity on the other.

This course will seek to explore an (inevitably selective) range of these historical contexts in order to demonstrate the continuity of perennial themes of conflict between the claims of individual actors and corporate institutions, whether states, churches, empires or other institutions, while also showing how and when key changes take place in the recognition of rights of political action, conscience, property ownership, gender identity and workers’ rights etc. The growth of toleration and free speech, the abolition of slavery and torture, and the role of Declarations of Rights will all be examined, but less familiar subjects will also find their place. The contribution of the conceptual legacy and historical inspiration of Greece and Rome will be recognised as will the crucial role of the political thought of the High Middle Ages, and at the other end of the course specific connection will be made to the recent development of human rights organisations.

In each session a contrasted selection of contemporary writings will be studied to recover the intellectual framework of the discussion and the role of the dispositive political, social, and economic circumstances of the debate will also be considered.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

The course will comprise 10 seminars in each term of 2 hrs in duration. There will be a reading week in week 6 of each term. Students will be expected to read essential primary and secondary material for each weekly meeting, to participate fully in seminar discussions and offer presentations. Both participation and presentations will form part of summative assessment.

Formative coursework: There will be one essay of 3,000 words to be submitted in the Michaelmas Term.

Jack N Rakove, Declaring Rights: a brief history with documents (Boston, 1998)
Robin Blackburn, American Crucible: Slavery, Emancipation, and Human Rights (New York, 2011)

**HY206**

The International History of the Cold War, 1945-1989

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Nicholas Ludlow 2.16 SAR

**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The Cold War dominated the second half of the 20th century, but until recently we had only an imperfect sense of what it was all about. Historians wrote about it, of necessity, from within the event they were seeking to describe, so that there was no way to know its outcome. And because only a few Western countries had begun to open their archives, these accounts could only reflect one side of the story. Cold War history, hence, was not normal history: It was both asymmetrical and incomplete. The end of the Cold War and the subsequent partial opening of Soviet, Eastern European, and Chinese archives have revolutionised the field. Everything we thought we knew is up for reconsideration, whether because of the new documents available to us, or as a consequence of being able to reflect on how it all came out in new ways - given that the historical discipline has evolved methodologically as well.

The course will provide an introduction to key topics in the new, international history of the Cold War. The selected topics vary from the study of specific Cold War crises to the exploration of broader themes such as the roles of ideology and technology.

**Course objectives:** (i) To equip students with comprehensive knowledge of the international politics of the Cold War; (ii) To offer a firm basis for more advanced historical work in this area; (iii) To provide some of the factual grounding and conceptual apparatus necessary to understand the contemporary world.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Students are expected to keep up with readings for weekly seminars, and to participate in the class discussions.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Assessment:** Exam (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) in the MT and LT.

Class participation (15%) in the MT and LT.

**HY216**

Four Reichs: Austria, Prussia and the Contest for Germany since 1618

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Christopher Brennan

**Availability:** This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The aim of this course is to demonstrate how Austria (The Habsburg Monarchy, subsequently the Republic of Austria) tackled the German Problem as incorporated in a series of challenges: organising and controlling the Holy Roman Empire; withstanding the rivalries of Louis XIV’s France and Frederick II’s Prussia; resisting the French revolutionary and Napoleonic threat to Germany; organising the German Confederation after 1815; attempting to unify the Habsburg Monarchy and the German Confederation under Austrian leadership after the revolutions of 1848; contesting the leadership of Germany with Bismarck; aligning with Imperial Germany in peace and war between 1879 and 1918; co-existing with Weimar Germany; experiencing Anschluss and war between 1938 and 1945; accepting a different path to independence from Germany between 1945 and 1955; taking a different view of the Nazi past from Germany after 1955; and finally, joining Germany as a full member of the EU.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Under the new academic year structure there will be no ST teaching.

**Formative coursework:** Students will be expected to write one essay in the Michaelmas term and one in the Lent term as well as do at least one class paper over the year. There will be a mock exam in the summer term.

**Indicative reading:** Charles W. Ingrao, The Making of the Habsburg Monarchy, 1618-1815, 2nd. edition, Cambridge, 2000; Hajo Holborn, A History of Modern Germany, 1648-1840, Princeton, 1982; Alan Sked, Metternich and Austria. **HY221**

The History of Russia, 1682-1825

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Janet Hartley

**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years, General Course students and as an outside option where regulations permit and to General Course students.

**Course content:** The course provides an introduction to the history of Russia in all its major aspects from the reign of Peter I to the
accession of Nicholas I. The following topics are studied: Russia in 1682; the impact of the reign of Peter I on the internal development and international position of Russia; the social and political developments of the period 1725-1762; popular revolt during the eighteenth century; the domestic and foreign policies of Catherine II; the impact of the Enlightenment and the French Revolution on Russia; Russia and the Napoleonic Wars; the failure of constitutional and social reform in the first quarter of the nineteenth century; the policies towards non-Russians within the empire; the Decembrist Revolt of 1825. The course is taught chronologically but several main themes are addressed throughout the period. These themes include: tsarist rule as an instrument of both reform and reaction; the relationship between the ruler and the major social groups; the significance of serfdom for Russia’s economic, institutional and legal development; the ‘missing’ middle class; the nature and impact of Western ideas on Russia; the role of the Orthodox Church within the Russian state; the growth of a disaffected elite in Russia; the relationship between Russia and other European powers; the development of Russia as a ‘great power’; the policies towards the non-Russians in the multi-ethnic empire; the growth of a Russian national consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to write three essays, one of which will be done under examination conditions

Indicative reading: A full reading list will be provided at the start of the course. Useful introductory works include: J Hartley, A Social History of the Russian Empire 1650-1825; S Dixon, The Modernization of Russia: 1682-1825; M Raeff, Understanding Imperial Russia: State and Society in the Old Regime; J Billington, The Icon and the Axe: An Interpretive History of Russian Culture; A Kahan, The Plow, the Hammer and the Knout: An Economic History of 18th Century Russia; P Dukes, The Making of Russian Absolutism, 1613-1801; E Kimerling-Wirtschafter, Russia’s Age of Serfdom; D Saunders, Russia in the Age of Reaction and Reform, 1801-1881.

Assessment: Exam (90%, duration: 3 hours) in the main exam period. Presentation (10%).

The Great War 1914-1918

This information is for the 2015/16 session.

Teacher responsible: Professor David Stevenson, Sardinia House 3.11

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. May be taken by 3rd years where regulations permit.

Course content: The international and comparative history of the First World War. The military, diplomatic, political, economic, social, and cultural aspects of the conflict will all receive attention. The origins and outbreak of the war; the military campaigning on the Western, Eastern, Italian, and extra-European Fronts; the war at sea and in the air; the intervention of neutral powers, war aims and attempts to negotiate peace; domestic politics in the belligerents; the war’s economic and social effects; the experience of combat; the Russian Revolution and the road to the Armistice; the impact of the war on the international system and on individual and collective consciousness.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be required to write one essay in the MT and two essays in the LT. They will also be required to do a timed mock exam essay at the end of LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY232
War, Genocide and Nation Building. The History of South-Eastern Europe 1914-1990

This information is for the 2015/16 session.

Teacher responsible: Prof Anita Prazmowska E506

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. May be taken by 3rd years where regulations permit.

Course content: The course aims to explain the history of these regions as expressed and moulded by the peoples and their leaders during a particularly turbulent period in European History. Attention will be paid to two European wars and the Russian Revolution, all of which had a profound impact on these countries' freedom to determine their destiny. The study of the inter-war period will include a debate of the reasons for the collapse of democratic institutions, the emergence of patriotic and anti-Semitic movements, economic failures and responses to German and Italian aggression. The establishment, development and the collapse of Soviet domination of the region after the Second World War will be discussed on the background of ethnic and inter-ethnic conflicts. In addition political, economic and cultural theories, which formed the background to the emergence of the independent states of Eastern and South Eastern Europe, will be considered. The course will develop these themes in the history of Poland, Czechoslovakia, Hungary, Bulgaria, Romania, Yugoslavia, Albania and the Baltic States. Final lectures will concentrate on the transition from Communism to democratic states. The break up of Yugoslavia and the wars in the Balkans will be considered in a separate lecture.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
HY233  Empire and Nation: Britain and India since 1750

This information is for the 2015/16 session.

Teacher responsible: Dr Taylor Sherman E601

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. May be taken by 3rd years where regulations permit.

Course content: This course examines the history of South Asia from the eighteenth century to the present day. Focusing on the imperial relationship between Britain and India, it investigates the ways in which imperial rule shaped South Asian society, studies the nature of anti-colonial nationalisms, and explores the legacies of British rule for the independent states of South Asia. The course will explain how and why the East India Company acquired an empire in India, and will explore the techniques by which the British sought to derive profit, prestige and power from its empire in South Asia. It will ask, to what extent did the British seek to reform India, and what were the consequences - intentional or otherwise - of imperial efforts to understand and change Indian society? The course will examine the ways in which different groups of Indians responded to, benefited from, and resisted colonial rule in India. The economic impact of colonialism will be considered, as the course asks, did British rule drain India of its wealth? In the second term, it will assess the impulses behind the emergence of Indian nationalism, and discuss Gandhi’s philosophy and his political strategies. The course will consider why British India was partitioned in 1947 when India and Pakistan gained independence, and it will investigate the long-term consequences of partition, including the conflict over Kashmir. The course concludes with a discussion of the impact that colonialism has had on the political and economic development of independent India, Pakistan and Bangladesh.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be required to submit two 2,000-word essays from topics designated in the course reading list and to sit a mock exam in the Summer Term. These assignments will not form part of the final assessment, but they are a required component of the course, and students must complete them in order to be admitted to the course examination.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 3000 words).

HY235  Modernity and the State in East Asia: China, Japan and Korea since 1840

This information is for the 2015/16 session.

Teacher responsible: Dr Antony Best E405

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. May be taken by 3rd years where regulations permit.

Course content: The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. It begins by looking at the impact of the arrival of Western imperialism in the mid-nineteenth century and the respective approaches taken by Japan, Korea and China in response to this encroachment. For Japan, it covers the rise of the Meiji state, the beginnings of constitutional government and the development of Japanese imperialism. This naturally is linked with the study of Korea’s failed efforts to maintain its independence; in regard to China it deals with the attempts by the Qing state to introduce reforms and the final collapse of Imperial China. It then deals with the difficulties provoked by modernization and nationalism in the first-half of the twentieth century, taking in the rise and fall of Taisho democracy and the drift towards fascism in Japan and the Guomindang’s revolution and state-building and the birth of the Chinese Communist Party in China. The course then concentrates on the aftermath of the Second World War for East Asia, studying the Chinese Civil War and the emergence of the People’s Republic, the course and legacy of the US occupation of Japan and the formation of the two Koreas. The last part of the course covers the development of the People’s Republic under Mao and Deng, the rise of Japan as an economic superpower and the emergence of South Korea and Taiwan as economic powers.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

‘Students on this course will have a reading week in Week 6, in line with departmental policy’

Formative coursework: Students will be required to submit three 2000 word essays in all and to sit a mock exam.

Indicative reading: A detailed reading list will be issued at the start of the course, but the following survey texts are essential: W. Beasley, The Rise of Modern Japan; P. Duus (Ed), The Cambridge History of Japan: The Twentieth Century; L Eastman (Ed), The Nationalist Era in China, 1927-1949; J L McClain, Japan: A Modern History; R MacFarquhar (Ed), The Politics of China, 1949-1989; A Buzo, The Making of Modern Korea, J Spence, The Search for Modern China.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY238  The Cold War and European Integration, 1947-1992

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Ludlow ES02

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will investigate the evolution
of both the cold war in Europe and the process of European integration, asking what the linkages were between these parallel developments. The Marshall Plan; the birth of NATO; the Schuman Plan; German Reunification and the EEC; the Western European Union; the US and Euratom; the other Community - the EEC; JFK’s Grand Design; De Gaulle’s rival vision; the ‘double crisis’ of 1965-6; Harmel, NATO and the WEU; Ostpolitik and the re-emergence of German foreign policy activism; enlargement, EPC, and Kissinger; Schmidt, Giscard and Carter; Euromissiles and Eurosclerosis; Genscher-Colombo and the revival of political Europe; Europe and the end of the cold war - spectator or actor?; a German Europe or a European Germany?; Paris, Berlin & Maastricht.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be required to submit three essays, the last one of which will be formally assessed. There will also be a mock exam in the Summer Term.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words).

**HY239** Not available in 2015/16

Latin America and the United States since 1898

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Tanya Harmer E602

**Availability:** This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** HY239 is designed to provide students with an introductory overview of the history of the Americas and inter-American relations from 1898 to the present day. Rather than focussing exclusively on U.S. policy towards Latin America, the course explores the international history of Latin America and the United States from a variety of U.S and Latin American perspectives. It also incorporates broader thematic and interpretive questions alongside country specific studies. Among the major themes covered on the course are the concepts of imperialism, neo-colonialism and anti-imperialism, revolution and counter-revolution, nationalism and interventionism, democracy and dictatorship, human rights and repression, development and dependency, the ‘war on drugs’ and migration. More specific topics covered in lectures and class discussions include: the Spanish-American War; Big Stick and Dollar Diplomacy; FDR’s ‘Good Neighbour’ policy; Juan Perón and Populism; the onset of the Cold War and post-war in the Americas; Jacobo Arbenz’ Guatemala; the Cuban Revolution; JFK and the Alliance For Progress; the Brazilian Coup of 1964 and U.S. Intervention in the Dominican Republic, 1965; Cuba’s Latin American policy and Che Guevara’s Bolivian mission; Salvador Allende’s Chile; the ‘Conدور Years’ and Cuban interventionism in Africa; the Panama Canal Treaty and Carter’s opening to Cuba; the Nicaraguan Revolution and Reagan’s Central American interventions; ‘The Lost Decade’ and Debt crisis of the 1980s; the Washington Consensus, the War on Drugs and Hugo Chavez and the Bolivarian Alternative for the Americas (ALBA).

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

**Formative coursework:** Students will be required to do two presentations, to write one 2,000-word essay and one 1,000-1,500-word book review, to contribute to weekly Moodle discussion forums, and to sit a Mock exam in the Summer Term. These assignments will not form part of the final assessment but they are a required component of the course, and students must complete them in order to be admitted to the course examination.

**Indicative reading:** A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture and will also be available on Moodle and in the departmental public folders. However, the following works are useful introductions and core texts for the course: E Williamson, The Penguin History of Latin America, Mark T Gilderhus, The Second Century: U.S.-Latin American Relations since 1889, Robert Holdren and Eric Zolov, Latin America and the United States: A Documentary History, Walter Lafer, Inevitable Revolutions: The United States in Central America, Alan McPherson, Intimate Ties, Bitter Struggles: U.S.-Latin American Relations Since 1945, Lars Schultze, Beneath the United States: A History of U.S. Policy Towards Latin America, Peter H Smith, Talions of the Eagle: Dynamics of U.S.-Latin American Relations, Thomas Skidmore and Peter Smith, Modern Latin America, and Eduardo Galeano, Open Veins of Latin America.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.
C A Bayly, The Birth of the Modern World, 1780 to 1914 (Blackwell 2004); Ronald Hyam, Understanding the British Empire (CUP, 2010); Ronald Hyam, Britain’s Imperial Century, 1815 to 1914 (CUP latest edn); L J Butler, Britain and Empire: Adjusting to a Post-Imperial World (L B Tauris, 2007); Sarah Stockwell (ed) The British Empire: Themes and Perspectives (Blackwell, 2007); Bernard Porter, Absent Minded Imperialists: Empire, Society and Culture in Britain (OUP, 2006) Bill Schwarz, The White Man’s World: Memories of Empire (OUP, 2012); Peter Clarke, Hope and Glory: Britain 1900-2000 (OUP, 2004); M W Doyle, Empires: A Comparative Study (Cornell University Press: 1986); P D Morgan; S Hawkins (ed) The Black Experience and the Empire (OUP, 2004); David Anderson, Histories of the Hanged: Britain’s Dirty War in Kenya and the End of Empire (CUP 2006); Henry Morton Stanley, How I found Livingstone (1872; kindle ebook); Sir F D Lugard, The Dual Mandate in British Tropical Africa (1922); Ashley Jackson & and David Tomkins, Illustrating Empire: A Visual History of British Imperialism (The Bodleian Library, Oxford; 2011); James Belich, The Settler Revolution and the Rise of the Anglophone World (OUP, 2011).

Assessment: Exam (100%, duration: 3 hours) in the main exam period. 100% Exam

HY241 Not available in 2015/16
What is History? Methods and Debates
This information is for the 2015/16 session.
Teacher responsible: Dr Timothy Hochstrasser E407
Dr Elizabeth Shlala, E306
Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: What is history? How and for what purposes do we study the past? What kinds of debates and controversies result from historical study? The purpose of this course is to provide undergraduate students with an introduction to these important issues. We will discuss the history of history from ancient times to the present and how it has changed as an intellectual pursuit over the years. We will think about different types of history – for example, international history, intellectual history, economic history, or the history of religion – and we will discern their different concerns and priorities. We will analyse some of the most important themes in modern historical study: empires and imperialism, revolutions, nationalism. We will outline different ideological frameworks for conducting historical research, for example Marxism, postmodernism, and gender studies. We will debate some of the key philosophical questions surrounding historical research: for example, how historians determine facts, and whether or not historical study can ever be true objective? Finally, we will look at different ways of presenting the past. from traditional history books to museums and TV history. The course is highly recommended for all those students studying history, especially those completing a history-based dissertation.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.
Indicative reading: A full reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, Writing History; D Cannadine (Ed), What is History now?; L Jordanova, History in Practice; R Evans, In Defence of History; J Tosh, The Pursuit of the Past; M Bloch, The Historian’s Craft; R G Collingwood, The Idea of History.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

 HY242 The Soviet Union: Domestic, International and Intellectual History
This information is for the 2015/16 session.
Teacher responsible: Dr Natalia Kibita SAR M.13
Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course will cover the history of the Soviet Union, from its inception as a combination of the Russian Revolution and a Bolshevik dictatorship, through the Stalinist terror and its role as an international centre of the ‘socialist camp’ during the Cold War, to its eventual, peaceful demise in 1991. Many courses on Soviet history deal separately with politics, social history, foreign policy, and intellectual/cultural developments. This course seeks to connect disparate threads into one historical and analytical narrative by focusing on major issues confronting the interpretation of the Soviet Union and its role in the international history of the twentieth century. The following questions will be examined during this course. Was the Soviet Union a continuation or rejection of its Russian heritage? What were the sources of Soviet legitimacy, modernization, and expansionism? What was Stalinism about? Can Soviet history be better understood as a multinational, imperial, or transnational history? How did the outside world affect Soviet domestic evolution? Why did the militarily successful Soviet state that emerged strongly from the Second World War then collapse so suddenly only a few decades later? Finally, the course will examine the legacy of the Soviet Union and the extent to which there is a Soviet ‘path dependency’ for today’s Russia.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. There will be no classes in 6-week ST
Formative coursework: Students will be required to write two 2,000-word essays (one in MT and one in LT) and make two class presentations (one in MT and one in LT).
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
HY243
Islamic Empires, 1400 - 1800
This information is for the 2015/16 session.
Teacher responsible: Dr Gagan D. S. Sood
Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: None.
Course content: Following the Mongol incursions into the Islamic heartlands and India, the Ottoman, Safavid and Mughal empires arose to become among the richest and most powerful regimes known to the early modern world. Supported by an array of provincial and local elites, they were at the height of their powers in the sixteenth and seventeenth centuries, presiding over territories that extended from the Mediterranean to the Bay of Bengal, from Yemen to the Crimea. Their subjects were producers, consumers, importers and exporters of goods critical for global trade; their location accorded them a vital role in the flow of ideas and information; there was a remarkable flowering of the arts in the period; and conversion to the region's dominant religious tradition, Islam, continued apace, forging new frontiers. By the eighteenth century, however, the empires were shadows of their former selves, with power devolved to a variety of successor regimes vying with each other for supremacy. It is this struggle that paved the way for the region's later incorporation into Europe's global empires of modern times, and the emergence of today's Middle East and South Asia.
This course will examine the Ottoman, Safavid and Mughal empires, and the larger world of which they were part, from their origins in the fifteenth and early sixteenth centuries to their 'decline' in the eighteenth century. We will study how temporal authority was expressed symbolically and through governance; the patterns of daily life found in urban and rural settings, and on the frontier; Islam in theory and in reality, and its relationship to the region's other major religious traditions; diplomacy within and without the Islamic world; the new techniques and technologies of warfare; inherited and collective knowledge of other lands, near and far, and the everyday movement of people, goods and news; the signal achievements in the literary, visual and architectural realms; secular changes to the region's societies and economies; early modern millenarianism, fundamentalism and reformism; and the reasons for the eighteenth-century demise of the Ottoman, Safavid and Mughal empires as world powers.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 9 hours of classes in the ST.
Formative coursework: Two 2000-word essays, one in MT and one in LT. Brief oral presentations in class. Short weekly memos/reading responses. One-hour mock exam in ST.

David Morgan, Medieval Persia, 1040-1797 (London, 1988)
John F. Richards, The Mughal Empire (Cambridge, 1993)
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY300
Dissertation
This information is for the 2015/16 session.
Teacher responsible: Dr Gagan D. S. Sood
Availability: This course is compulsory on the BA in History. This course is available on the BSc in Government and History and BSc in International Relations and History. This course is not available as an outside option nor to General Course students.
Course content: A dissertation of not more than 10,000 words on a topic to be approved by the candidate's supervisor. It is designed to allow a detailed and thorough exploration of a topic of interest to the candidate. The topic should fall within the parameters of the degree course. It should include the examination of primary sources, in printed, manuscript and/or digital form.
Teaching: 2 hours of workshops in the MT. 2 hours of workshops in the LT.
Candidates should secure in the course of the LT of their second year the agreement of a member of academic staff in the Department of International History (who need not be their advisor or tutor) to supervise a suitable topic, and then submit a title to the Undergraduate Programme Administrator by Wednesday of Week 9 of the LT. Supervisors can be expected to offer advice on the scholarly literature, guidance on research and writing, and detailed comments on a sample of up to 1,000 words.
Assessment: Dissertation (100%), 10000 words) in the LT.
The dissertation must be submitted to the Departmental Office by the published deadline in Week 11 of the LT in the student’s third year. It should be typewritten. Precise details on length, format, presentation and deadline will be issued by the Department during the LT of the second year of study. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the dissertation is the candidate's own work.

HY311
Limited War During the Cold War Era: The US in Korea (1950-53) and Vietnam (1954-75)
This information is for the 2015/16 session.
Teacher responsible: Prof Steven Casey E311
Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: Based on a variety of primary sources, and a wide range of secondary reading, this course will explore US attitudes and policies towards and during the Korean and Vietnam Wars. The problems of limited war; the origins of the Korean War; Truman and the decision to intervene; Inchon and the decision to cross the 38th parallel; the Chinese intervention and its consequences; the US home front during the Korean War; the Truman-MacArthur Controversy; Korea and US Cold War strategy; NSC-68, NATO, and ‘The Great Debate’; fighting while negotiating, 1951-53; legacies; JFK and Vietnam; LBJ and the decision to escalate; LBJ as Commander in Chief; the war on the ground in Vietnam: ‘search and destroy’ versus ‘hearts and minds’; the Tet Offensive; the media and military at war; the US home front during the Korean
HY315
The European Enlightenment, c.1680-1799

This information is for the 2015/16 session.

**Teacher responsible:** Dr Timothy Hochstrasser

**Availability:** This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The European Enlightenment of the eighteenth century is conventionally taken to be the period in which the disciplines of philosophy, history, economics and anthropology, and other social sciences began to emerge as discrete disciplines independent of state and church control. This course therefore sets out to explore the new ideas generated in these areas as a result of a fresh understanding of man’s place in the physical world. But while the course aims to look at ideas and concepts in themselves it is also concerned with the way that they were applied in political practice and adapted to provide new understanding of social structures, or as contemporaries put it, a ‘Science of Man’. The chronological context of the Enlightenment is taken to be Europe between the reign of Louis XIV and the end of the Directory in France in 1799. Within this broad framework the following large themes provide the subject matter of both lectures and classes in the Michaelmas Term: the impact of the Scientific Revolution upon institutionalised religion; the emergence of a ‘Republic of Letters’; English and French critiques of absolutist monarchy; the creation of a culture of power and the power of culture; the impact of the Enlightenment on the rise of nationalism and the formation of modern Europe. Much of Europe was covered by the Napoleonic Empire and its impact was felt on all of Europe and parts of the non-European world. The course is taught thematically and also by country/geographical area. Themes covered include the impact of the empire on the European international system, as well as on law, constitutionalism, the economy, religion and culture. By studying how Napoleon’s empire was created and destroyed, the course will also focus on the nature of power in this era. An attempt will also be made to place the Napoleonic empire in a global context. The impact of the Napoleonic era on the rise of nationalism will be considered as part of the legacy of this period. The course ends with an assessment of the historiography of both the man – the ‘Napoleonic myth’ – and the period.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

**Assessment:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Week 6 of the first term will be a reading week. Week 6 of the second term will contain a mock exam**

**Formative coursework:** Two conventional essays, one set of goblet answers and one timed essay.

**Indicative reading:** A full reading list will be provided at the start of the course. The following works are recommended: J. Porte, The Enlightenment (2001). Anthologies: I Kramnik (Ed), The Portable Enlightenment Reader (1995); S Eliot & B Stern (Eds), The Culture of Power and the Power of Culture (2002); D Outram, The Enlightenment (1995); T Munck, The Enlightenment (2000); R Porter, The Enlightenment (2001). A full reading list will be provided at the start of the course.
HY320
The Cold War Endgame

This information is for the 2015/16 session.

Teacher responsible: Dr Brier

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based upon a variety of primary sources, this course will explore why and how in the second half of the 1980s the Cold War confrontation between the United States and the Soviet Union transformed itself so suddenly and peacefully into the collapse of (European) communism, German unification and the end of the USSR and her empire. In doing so, we will ask what was the correlation between “high” and “low politics” in these events and processes? Topics will include: the onset of détente and neue Ostpolitik; the impact of Helsinki (1975) and human rights; détente’s death, Euromissiles and the war in Afghanistan; the second Cold War of the early 1980s; pacifism and transatlantic turmoil; the Pope and the Polish crisis of 1980-81; Gorbachev’s new thinking and reforms in the USSR; Reagan and Gorbachev: superpower summity; German unification: domestic and international aspects; Kohl, Mitterrand and the road to the European Union; the eastern European revolutions and the collapse of the Soviet ‘empire’; the Baltic independence struggle, Yeltsin, the coup and Soviet disintegration; explanations and interpretations of the end of the Cold War. The discussion in each seminar will draw on a combination of primary and secondary material.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

20 two-hour seminars, a mock exam, and a revision class.

Formative coursework: Students will be required to present one short class paper as well as undertaking small weekly tasks on Moodle, and to submit two essays a 1500 words and one document answer during MT and LT. There will also be a timed mock exam in ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

HY321
The Struggle for the Persian Gulf, 1945-2003

This information is for the 2015/16 session.

Teacher responsible: Dr Roham Alvandi

Availability: This course is available on the BA in History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. This course is capped at 30 students.

Course content: This course examines the international history of the Persian Gulf as an ongoing struggle among external powers and local actors for regional supremacy. Through the use of documentary primary sources, the course covers the history of this struggle for mastery in the Gulf in three stages. It begins with the decline of the British Empire and the rise of American power in the Gulf after the Second World War, in the face of Arab and Iranian nationalism. It then examines the long era of intense regional competition for primacy between Iran and Iraq, with particular reference to the Cold War and the 1979 Iranian Revolution. Finally, the course turns to the renewed Anglo-American military intervention in the Gulf since 1991 that continues until today.

As a List B paper, the course makes extensive use of primary sources as part of the weekly reading assignments. These will include government documents, public statements, diaries, and memoirs. These primary sources will all be in English and will all be available on Moodle for students to access. Key topics covered in the course include: nationalism in Mosaddeq’s Iran and Qasim’s Iraq; the Arab Cold War and the civil war in Yemen; the Cold War politics of reform in Mohammad Reza Shah’s Iran and King Faisal’s Saudi Arabia; the British withdrawal from the Persian Gulf between 1968 and 1971; Nixon and Kissinger in the Persian Gulf; the secret war between Iran and Iraq in Kurdistan from 1972 to 1975; the rise of OPEC and the 1973/74 energy crisis; the 1979 Iranian Revolution; the Iran-Iraq War of 1980 to 1988; the Persian Gulf War of 1991; the rise and fall of Iranian-American détente under Khatami, Saudi Arabia and the United States before and after 9/11; and the 2003 Anglo-American invasion of Iraq

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.

Formative coursework: Students are required to submit one essay of 2000 words in the MT, one set of gobbet answers during the LT, and one 1-hour timed mock exam in ST.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.

HY322
Nazi Germany and the Second World War – Causes and Course, 1933-1945

This information is for the 2015/16 session.

Teacher responsible: Dr Felix Roemer

Availability: This course is available on the BA in History and BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.

22 two-hour seminars, a mock exam, and a revision class.

Formative coursework: Students are required to submit one essay of 2000 words in the MT, one set of gobbet answers during the LT, and one 1-hour timed mock exam in ST.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.
This course is capped at 30 students.

Course content: The Second World War is the most pivotal event of the 20th century. It was the most global war in history and involved almost every country. Although a huge number of nations fought in Europe, Asia and Africa, Nazi Germany was the central actor in WWII. Germany's radical war aims led to an unparalleled war of annihilation which included the Holocaust and the mass killing of millions of Soviet POWs and civilians. The military success of Hitler's army in 1940/41 was the precondition for Italy's and also Japan's entry into the war. This course will explore the role of Nazi Germany in WWII in an international context. Starting with an analysis of WWII and its legacy to the International system in general and to Germany in particular, the course will investigate how the three revision powers — Germany, Italy and Japan — destroyed the system of International relations founded in Paris 1919/20 and followed their aggressive foreign policy which finally led to WWII. We will then analyse the character of the war in Poland, in Western Europe and in the Soviet Union with an emphasis on the cultures of violence and the perceptions of the war/holocaust by ordinary Germans. New methodological approaches will be discussed which include the history of mentalities whilst we seek to define the specific character of WWII, also by a comparison of the European and Asian theatres of war. The Grand Strategy of the Allies, the role of economies, the controversial debates about Strategic Air War will lead us finally to the end of the Third Reich in 1944/45.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be required to write two conventional essays of 2000 words and one set of gobbet answers during MT and LT, and one timed mock exam in ST.

Indicative reading:

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY323
Travel, Pleasure and Politics: The European Grand Tour, 1670-1825

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Throughout the eighteenth century thousands of young British men and women embarked on extensive journeys to continental Europe – an activity known as the Grand Tour. ‘Travel, Pleasure and Politics: The European Grand Tour 1670-1825’ explores who these people were, where they went, and the reasons for their expeditions. For some, the Tour was the final stage of formal education; to others an opportunity for sexual adventures and pleasure-seeking. The course discusses the practical challenges of eighteenth-century travel, the political, religious, and cultural contexts of the Tour, as well as the key places to visit and the reasons for their popularity. It also considers what the Tourists brought back with them: from physical artefacts for public and private collections, to new ways of seeing and understanding the world. ‘Travel, Pleasure and Politics’ introduces students to the actual writings of the Tourists, showing how they experienced international travel and shaped the modern tourist industry.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT and 2 essays in the MT and LT. Specifically, the course’s formative coursework will consist of two essays (MT and LT), one document analysis (LT). Students will also have an opportunity to sit a mock exam.

Indicative reading:
- Clare Hornsby, ed., The Impact of Italy: the Grand Tour and Beyond (London: The British School at Rome, 2000) DA487.9 J8 I31

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
HY324

**Muslim-Jewish Relations: History and Memory in the Middle East and Europe, 622-1945**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Marc Baer E307

**Availability:** This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

**Course content:** Because of the Israeli-Palestinian conflict, most discussions of Muslim-Jewish relations focus on the period after 1948. Muslims and Jews, however, have engaged with one another for over 1,400 years. Just as at the beginning, when Muhammad first met Jewish Arabs in Medina in 622, Jewish and Muslim relations have spanned the whole range of human interaction. What approaches have historians taken to understand the connected histories of Jews and Muslims in Middle Eastern and European history, from their earliest relations in seventh-century Arabia to mid-twentieth-century Europe? Through attention to historical events and personalities as well to religious texts, language, law, ritual, sacred spaces, intellectual and spiritual movements, art, architecture, and literature we will explore different approaches to the history and memory of Muslim-Jewish relations in the Middle East and Europe, evenly divided between the premodern and the modern period. Students are advised that this is not a history of the Palestinian-Israeli struggle, although its impact on the memory of Muslim-Jewish relations in history will be discussed.

**Teaching:** 20 hours of seminars in the MT, 20 hours of seminars in the LT. 4 hours of seminars in the ST. 20 two-hour seminars in the MT and LT; two revision seminars in the ST. Students will be expected to read essential primary and secondary material for each weekly meeting and to participate in the seminar discussions.

**Formative coursework:** Students will be expected to produce 1 essay in the MT and 1 essay in the LT. Students will be required to produce two primary document analyses during the year.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

A three-hour unseen written examination in the ST. A mock examination paper will be distributed to students so that they can familiarize themselves with the structure of the examination. The final examination will count for 100% of the final course assessment.

HY325

**Retreat from Power: British foreign and defence policy, 1931-68**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Matthew Jones E309

**Availability:** This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The period between the onset of the Manchurian Crisis of 1931 and the decision of the Wilson Government in 1968 to accelerate the withdrawal from East of Suez saw Britain's position in the world transformed under the multiple pressures of economic decline, world war, nationalist opposition to colonial control, and the demands of Cold War confrontation with the Soviet Union and international communism more generally. This course examines how this change occurred by studying several central episodes in British foreign and defence policy. Its focus is predominantly on high-level policymaking in the diplomatic, military and economic realms, but it will all give attention to shifts in popular attitudes, parliamentary debates, the influence of electoral considerations, and the larger-scale transitions taking place in the international system. In common with other Level 3 courses, it will include study and discussion of primary sources throughout. Documents will be drawn from either published collections, including British Documents on Foreign Policy, 1919-1939, and Documents on British Policy Overseas, 1945-, official publications such as Command papers (including such material as international agreements and Defence White Papers), the diaries of key politicians or officials, and copies of documents from The National Archives at Kew. Much use will be made of online sources. Specific topics include the Italian invasion of Ethiopia; the Munich Agreement of 1938 and appeasement; British strategy in the Second World War; Anglo-Soviet relations in the Second World War; the formation of NATO; the Korean War; the Malayan emergency; Suez crisis; the first application to join the EEC; and the withdrawal from East of Suez in the 1960s.

**Teaching:** 20 hours of seminars in the MT, 20 hours of seminars in the LT.

Students will be expected to read essential primary and secondary material for each weekly class, to deliver presentations, and to participate in seminar discussions.

**Formative coursework:** Students will be expected to produce 1 essay in the MT and 1 essay and 1 other piece of coursework in the LT. Formative assessment is by one essay for submission in week 5 of the MT, and one essay for submission in week 5 of the LT (each essay should be a maximum of 2000 words and be drawn from a list supplied at the start of the course). One gobbet exercise will also be conducted in the LT as a form of revision for the final examination.

**Indicative reading:** 1. Paul W. Doerr, British Foreign Policy, 1919-1939 (1998)

Alan Bullock, Ernest Bevin: Foreign Secretary, 1945-1951 (1983)

Anne Deighton (ed), Britain and the First Cold War (1991)

Ronald R. Hyam, Britain's Declining Empire: The Road to Decolonization, 1918-1968 (2007)

Paul Kennedy, Background Influences on British External Policy, 1865-1980 (1981)

R. A. C. Parker, Chamberlain and Appeasement: British Policy and the Coming of the Second World War (1993)

Christopher Thorne, Allies of a Kind: The United States, Britain, and the War Against Japan, 1941-1945 (1978)

John W. Young, Britain and the World in the Twentieth Century (1997)

**Assessment:** Exam (100%, duration: 3 hours).

The summative assessment consists of a three hour examination paper which involves each candidate writing two essays selected from a list of questions, and two comments on a selection of extracts from primary sources.
HY326
Slavery, Capital, and Empire in the British World, 1700-1900

This information is for the 2015/16 session.

Teacher responsible: Dr Padraic Scanlan
Availability: This course is available on the BA in History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Salim, the narrator of V.S. Naipaul's novel A Bend in the River, explains that Europeans, and especially the British, "wanted gold and slaves, like everybody else; but at the same time they wanted statues put up to themselves as people who had done good things for the world. " Salim's caustic observation summarizes the historical puzzle at the heart of this course. From the late sixteenth century until the early nineteenth century, Britain was one of Europe's most prolific slave-traders. British colonies in the West Indies and the colonies that eventually became the United States of America were among the most brutal and fully realized slave societies in world history. And yet, Britain was also the first major European state voluntarily to abolish its slave trade, and the first to resolve to emancipate its slaves.

Using primary and secondary sources, this course explores the interconnected histories of slavery, commerce, and capitalism in the history of Britain and the British world in the eighteenth and nineteenth centuries. The course explores how the British slave trade functioned both as political economy and as a system of everyday oppression, how it intertwined with trade in other commodities and financial products like bonds and insurance, how Britons profited by it, and how enslaved and free people resisted it. The course interrogates the limits of 'British' history in the context of a global system of trade, and investigates the complicated history of the end of slavery and continuities before and after abolition – what did it mean to be 'free' in the British empire?

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Each seminar is structured around analysis of an historical document, and debate about a problem or theme in the historiography. Students are expected to read essential primary and secondary materials for each meeting and to participate in discussion.

Formative coursework: Students will be expected to produce 2 exercises, 1 essay and 1 presentation in the MT and LT.

Students will produce an essay of 1,500 words, and two 250-word analyses of a primary source. Students will also be expected to make a short presentation at the beginning of at least one of the seminars, framing the discussion for their peers.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (30%, 3000 words) in the LT.

Class participation (10%) and other (10%).

Students will be assessed on their participation in the seminar (10%). Assessed coursework also includes a 500-word analysis of a primary source (10%), a 3,000-word essay (30%) on a topic related to the course, determined in consultation with the course teacher, and a two-hour unseen written examination in Summer Term, consisting of an essay and primary-source analysis exercises (50%).

IR100
Concepts of International Society

This information is for the 2015/16 session.

Teacher responsible: Prof Iver Neumann CLM 6.06
Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An examination of the concepts designed to explain the nature of contemporary international relations.

1. The emergence of the discipline and the nature of its subject matter.
2. Key agential concepts in IR: state; empire; international and subnational agents; foreign policy.
3. Key structural concepts in IR: the states system; Euro-centrism, globalisation, post-colonialism; global governance; security.
4. Key institutional concepts in IR: international society; great powers; diplomacy; war; balance of power; international law and human rights.
5. Key sociological concepts in IR: power and sovereignty; intervention; gender; anarchy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of approximately 1,500 words. They will also be required to give at least one class presentation.

Indicative reading: A full course description and guide to reading will be provided: relevant course texts include J Baylis & Smith (Eds), Globalisation and World Politics, 2nd edn, (Oxford UP, 2001); C Brown, Understanding International Relations, 2nd edn (Macmillan, 2001); R Jackson & G Sørensen, Introduction to International Relations (OUP, revised edn., 2003).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Sample papers are included in the full course description.
IR200
International Political Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Jillions CLM 5.08

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course consists of a survey, in two parts, of international relations theory. The first part deals with classical theories, the second with modern. It explores and analyses ways of explaining and understanding international relations. The focus is on debates provoked by classical thinkers such as Grotius, Hobbes, Kant and Marx and modern approaches such as realism and constructivism. Topics covered include war, peace, international law and order, international justice, intervention and non-intervention, sovereignty, diplomacy, revolution and counter-revolution, nationalism and national self-determination.

Teaching: 9 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of a maximum length of 1,500 words each to be set and marked by class teachers. They are also expected to give at least one class presentation.

Indicative reading: A F Lang, Jr., International Political Theory; C Brown, Understanding International Relations; H Bull, The Anarchical Society; E H Carr, The Twenty Years’ Crisis; I Clark, The Hierarchy of States; M Donelan, Elements of International Political Theory; F H Hinsley, Power and the Pursuit of Peace; M Wright, International Relations: The Three Traditions; K Hutchings, International Political Theory; C Brown, T Nardin & N Rengger, International Relations in Political Thought; H Biddel, C Sylvest & P Wilson, Classics of International Relations.

A full course guide and reading list, will be available on Moodle at the beginning of the course. This will set out the structure and content of the course and providing detailed guidance on reading, sample examination questions, suggested essay titles, and topics for class discussion.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The examination paper requires that three questions be answered out of twelve.

IR202
Foreign Policy Analysis 1

This information is for the 2015/16 session.

Teacher responsible: Prof Chris Alden CLM 5.13

Availability: This course is compulsory on the BSc in International Relations and BSc in Politics and International Relations. This course is available on the BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course analyses various theoretical perspectives on foreign policy, and the means of conduct of the main actors in the international system towards each other. It focuses mainly, but not entirely, on states. Foreign Policy Analysis as a sub-discipline of IR, the problem of formulating goals and choosing policy instruments; the role of leadership and psychological elements in policy making; the rational actor model; bureaucratic politics; the impact of history and identity on foreign policy; domestic sources of foreign policy including public opinion, pressure groups and constitutions; the motivations underpinning foreign policy; the role and influence of transnational actors in relation to foreign policy making; foreign policy crises. The discussion classes combine a discussion of these themes with their application to the foreign policies of major powers in the international system. A detailed programme of lectures will be provided at the start of the session.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of classes in the LT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of about 1,500 words each for their class teachers during the course and to make presentations in the discussion classes.

Indicative reading: C Alden and A Aran, Foreign Policy Analysis – New Approaches, Routledge, 2011; C Hill, The Changing Politics of Foreign Policy, Palgrave, 2003; S Smith, A Hadfield and T Dunne
IR204  
**Half Unit**  
**International Political Economy**

This information is for the 2015/16 session.

**Teacher responsible:** Dr. Julia Gray, Room CLM 4.10  
**Availability:** This course is available on the BSc in Economics, BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Students from other degree programmes will be admitted by permission of the Course Coordinator, including BSc Economic History.

**Pre-requisites:** It is strongly recommended that students have completed Economics A (EC100) or The Internationalisation of Economic Growth, 1870 to the present day (EH101).

**Course content:** The course examines the role of power and politics in international economic relations. Besides international structural factors, it emphasises the role of domestic political interests and their influence over foreign economic policies. Major approaches covered include historical views on international political economy, systemic theories of international cooperation, interest groups politics and domestic institutions. The course provides an overview and explanation of the international monetary and trade systems since 1944. It also discusses current debates on regionalism and preferential trade, European monetary integration, the political roots of financial crises, globalisation and the retreat of the state, and environmental protection.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students write one essay of a maximum length of 1,500 words.

**Indicative reading:** Basic references are: D Baldwin, Economic Statecraft; J Frieden & D Lake, International Political Economy; T Oatley, International Political Economy; J Ravenhill, Global Political Economy; S Strange, States and Markets; A Walter & G Sen, Analyzing the Global Political Economy. A detailed reading list will be given at the beginning of the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period. In the examination two questions are chosen from eight.

---

IR203  
**International Organisations**

This information is for the 2015/16 session.

**Teacher responsible:** Mr. Arthur Kilgore  
**Availability:** This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students should have solid foundations in International Relations (including international political theory and international history). Prior or concurrent study of international law, although not a pre-requisite, will be an advantage.

**Course content:** Major theoretical and empirical aspects of the role of international organizations in international politics, including, inter alia, their impact on the practice of international cooperation and conflict, the maintenance of international peace and security, the management of international economic relations, the promotion of international environmental standards, the prosecution of international crimes, and related matters of concern to international society. International organizations to be discussed range from the League of Nations to the United Nations, from the World Bank to the World Trade Organization, from the European Union to the African Union, and from NATO to the International Criminal Court.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students are expected to write three essays of a maximum length of 1,500 words each in addition to at least one presentation (introduction to discussion) given in class. Class teachers will set and mark the essays and provide feedback on student presentations.

**Indicative reading:** Indicative reading [Please note: 10 titles, only one of which is introductory; the 2009-2010 entry contained 8 titles, most of which were introductory]

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.
to class discussions and present papers each week. Students on this course will have a reading week in Week 6 in line with departmental policy.

**Formative coursework:** Students will be required to write three essays (c. 1,500 words each) in the course of the year, in MT and LT.

**Indicative reading:** Daniel Pick, The War Machine; Martin van Creveld, War and Technology; Charles Gray, Post-Modern War; Martin van Creveld, On Future War; John Keegan, A History of Warfare.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**IR306 Not available in 2015/16**

**Sovereignty, Rights and Justice: Issues in International Political Theory**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Christopher Brown CLM 4.08

**Availability:** This course is available on the BSc in Environmental Policy with Economics, BSc in International Relations and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice. Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the rights of peoples; the ethics of war and violence; the politics of humanitarian intervention (with case studies); justice in classical international thought; global social justice. Further details will be provided at the start of the session.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

**Formative coursework:** Students will write four essays, each of a maximum length of 1,500 words, during the course of the year.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**IR308 Not available in 2015/16**

**Systemic Change in the 20th Century: Theories of the Cold War**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Christopher Kent CLM 4.05

**Availability:** This course is available on the BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course examines the nature of the Cold War system, the theories of its origins, causes and consequences, its relationship to systemic change and the reasons for its end. The course will provide a general analytical overview of the nature of and debates on the Cold War system and why it has been confused with all aspects of Soviet-American relations between the end of the Second World War and the collapse of the Soviet Union. The nature and significance of the systemic changes which its onset and sudden end produced will be analysed. And from a regional and systemic perspective the course will attempt to provide explanations of how the Cold War was fought in different time periods and how the goals changed. Emphasis will be given to the changing nature of the relationship between ideology and power politics within the international system and to the differences and links between Cold War and Hot War and their respective requirements. There will be coverage of how domestic aspects of the Cold War, including intelligence, propaganda and culture interacted with regional and international developments, covert operations and psychological warfare. There will be a requirement to study at least one area of the world in more detail and an opportunity briefly to examine the historical characteristics of the Cold War and the international systems which preceded it.

**Teaching:** 10 hours of lectures and 8 hours of classes in the MT. 5 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

**Formative coursework:** Students are expected to write four essays, each of a maximum length of 1,500 words, during the course of the year.

**Indicative reading:** Jonathan Haslam Russia’s Cold War (2011); Melvyn P. Leffler and Odd Arne Westad (eds.) The Cambridge History of the Cold War (2010).

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**IR311 Not available in 2015/16**

**Europe’s Institutional Order**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Karen Smith CLM 4.09

**Availability:** This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Course content:** Examination and explanation of the development of Europe’s institutional order in the post-war era and its evolution since the end of the Cold War. Analysis of the importance of European organisations for both their member states and international relations in general. Theories of international institutions and regional integration. The importance of international organisations for European states. Development and evolution of European organisations including: the Council of Europe, NATO, the European Union, the Organisation of Security and Cooperation in Europe, Comecon, and the Warsaw Treaty Organisation. Enlargement of European regional organisations.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 9 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

**Formative coursework:** Students are expected to write three essays of a maximum length of 1,500 words each to be set and marked by the class teachers.
IR312  Half Unit  Genocide

This information is for the 2015/16 session.

Teacher responsible: Dr Jens Meierhenrich CLM 6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This lecture course provides an introduction to the study of genocide. The course’s disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present - and for critically assessing the promise and limits of responding to collective violence.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students are required to research and write two essays (1,500 words each). In order to ensure a broad acquisition of knowledge, students should diversify the subject matter of their essays. In addressing a given essay topic, students must seek to integrate theory and history and bring empirical evidence to bear on the research question they have chosen. In constructing their answers, students may examine a number of cases, drawing comparisons among them, or may focus on a single case. Essays must be fully - and carefully - referenced using one of the major conventions consistently. Submissions are due in Weeks 4 and Week 8 and must be made in hard copy. Feedback is to be sought from class teachers, who are responsible for marking essays.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 5000 words) in the LT. The 5,000 word essay must be submitted by Sp.m. on Monday, 16 March 2015.

IR313  Half Unit  Managing China’s Rise in East Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Junger Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: The main focus of this class-based half-course on the contemporary international relations of East Asia is the management of China’s rise. The course begins by exploring China’s re-emergence as a major regional power, in part by discussing the economic, political and military dimensions of Chinese power, China’s evolving identity, as well as the major aspects of its declaratory and substantive foreign and security policy. It also examines from different theoretical and political perspectives the implications that China’s rise has been posing for East Asia. As regards the management of China’s growing capabilities, status and ambitions, the course explores what political and security strategies vis-à-vis China have in turn been adopted by the key states that are either resident in or have a significant presence in the wider East Asia, such as the United States, Japan, Russia and India. The course also explores the ways in which China’s rise has impacted on conflicts in the South China Sea and on the Korean peninsula, and the nature of the management of China’s rise by states from continental and maritime Southeast Asia. It moreover examines how regional arrangements and institutional frameworks for dialogue and cooperation led by lesser regional states have served the management of China’s rise. Concepts and theories from International Relations will be drawn upon as appropriate.

Teaching: 20 hours of classes in the MT. 2 hours of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: William A. Callahan, China the Pessimist Nation (Oxford: Oxford University Press, 2010); Bill Emmott, Rivals: How the Power Struggle between China, India and Japan will Shape our Next Decade (London: Allen Lane, 2008); Christopher R. Hughes, Chinese Nationalism in the Global Era (Abingdon: Routledge, 2006); Alastair Iain Johnston and Robert S. Ross, eds,

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR314 Half Unit
Southeast Asia: Intra-regional Politics and Security

This information is for the 2015/16 session.

Teacher responsible: Dr Jurgen Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: This class-based half unit course examines key aspects of the contemporary international relations of Southeast Asia, with the primary focus being on the intramural relations of the member states of the Association of Southeast Asian Nations (ASEAN). In order to contextualise these intramural relations, the course first explores the different domestic political contexts in which Southeast Asian decision-makers operate, the historical backdrop to the region’s major intrastate and interstate conflicts and disputes, the key security issues and challenges affecting the region and individual states, as well as the wider geopolitical context. The course also, secondly, engages in a comparative analysis of the foreign and security policies of the five original member states of ASEAN that will, for instance, take account of the influence of geographical factors, the relevance of ethnic politics and nationalism, political change, leadership ambitions, and the main economic and security interests pursued by governments. Finally the course explains how the respective domestic backdrop and foreign policy outlook of Southeast Asian states have shaped the nature, effectiveness and limits of ASEAN as a vehicle for intramural political-security cooperation. In this context, the course assesses the grouping’s efforts to establish an ASEAN political-security community. The course will conclude by comparing the role played respectively by the ASEAN states and extra-regional powers in managing regional security and order. Concepts and theories drawn from International Relations, and especially Foreign Policy Analysis, will be applied as appropriate.

Teaching: 20 hours of classes in the LT. 2 hours of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR315 Half Unit
The Middle East and International Relations Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Katerina Dalacoura CLM 4.11

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200), or an equivalent course.

Course content: The course applies the theories and conceptual tools of the discipline of International Relations to the study of the Middle East region. It uses the empirical material offered by the history, politics, political economy and international politics of the region to explore these concepts and theories. More specifically, it concentrates on the areas of foreign policy analysis, international political economy, gender, the study of international norms and conflict and peace studies. It explores the applicability of various International Relations theories (for example, realism and neo-realism; neo-liberalism; constructivism; English School; neo-Marxism and structuralism; and post-colonialism) to the study of the region.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Three essays of 1,500 words each.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR317 Half Unit
American Grand Strategy

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Trubowitz CLM 4.05

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course explores American foreign policy at the broadest level of analysis – the level known as grand strategy. The course showcases the main theoretical perspectives that inform the study of grand strategy and applies them to historical and
IR318  Half Unit
Visual International Politics

This information is for the 2015/16 session.

Teacher responsible: Prof William Callahan CLM 5.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: We live in a visual age. Images play an increasingly important role in shaping international political events and our understanding of them. The objective of this course is to examine how visual sources - maps, photographs, film, television, new media - influence international political phenomena, our perception of them, and public responses to them. The course has conceptual, empirical, and practical objectives. At a conceptual level students will acquire knowledge of key theoretical and methodological debates necessary to study visual international politics. At an empirical level, students will gain a better understanding of several concrete instances where images helped to shape international political phenomena, from wars to humanitarian crises, from global social movements to alternative world orders. At a practical level, students will learn how to make a short documentary film.

Teaching: 7 hours of lectures and 18 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 case study and 1 essay in the LT.

IR319  Half Unit
Empire and Conflict in World Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Tarak Barkawi CLM 4.07

Availability: This course is compulsory on the BSc in International Relations and History. This course is available on the BSc in International Relations and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: Many places and peoples in modern world politics have been shaped by relations and histories of imperialism. Across the social sciences and humanities, as in International Relations, there has been an explosion of interest in empire in recent decades. This course explores the violent dimensions of the imperial past and present. It covers histories and social relations of armed conflict in imperial context from “small war” to “counterinsurgency” and the War on Terror; it looks at the ways in which warfare shapes (and is shaped by) the societies, cultures and polities that populate world politics; and it considers some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subalterns and postcolonial studies. The premise of the course is that warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings.

This course aims to familiarise students with scholarship on empire and conflict in International Relations and related disciplines.

This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalization in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such “small wars” have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Franz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and postcolonialism. The course will introduce students to this work and it applications to understanding world politics.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures
1) Introduction: Empire and International Relations
2) Empire/History/Globalization
3) Empire, the Regions, and World Politics
4) Politics/Strategy/War

Assessment: Project (50%) in the LT. Essay (50%), 2500 words) in the ST. The project will be a ten minute documentary film, which will be made by groups of 2 or 3 students.
Undergraduate Class Topics
1) Globalization and History
2) Empire and the Making of Regions
3) War and Politics
4) War and Society
5) Orientalism
6) Revolutionary Guerra War
7) Counterinsurgency
8) Case Study: The Wars in Vietnam
9) Empire and the War on Terror

Formative coursework: Students will be expected to produce 1 essay in the LT.

Week 1 What are revolutions?
Week 2 Key themes in the study of revolutions
Week 3 Revolutions and world politics

Week 4 The Atlantic ‘age of revolutions’
Week 5 Socialist revolutions

Week 6 ‘Third World’ revolutions
Week 7 The ‘last great revolution’?
Week 9 ‘Colour’ revolutions

Part 3 Revolution today
Week 10 The Arab uprisings
Week 11 Rethinking revolution

Teaching: 10 hours of lectures and 15 hours of classes in the LT.

The main aim of the course is to provide an opportunity for students to make informed judgments about how and in what ways revolutions have impacted on core features of modern international order. Additional aims include assessment of the place of revolution in the contemporary world and, more generally, the ability to connect theoretical arguments about revolutions with the substantive experience of revolutions.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will also submit an outline of their assessed essay during Lent Term.

Assessment: Essay (80%, 3000 words) in the ST. Presentation (10%) and coursework (10%) in the LT.

IR321 Half Unit
Revolutions and World Politics

This information is for the 2015/16 session.

Teacher responsible: Dr George Lawson CLM 5.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: Revolutions are often considered to be a ‘side order’ to the ‘main course’ of International Relations. But as this course explores, the lack of attention paid to revolutions is a mistake – revolutions have played a major part in the making of modern international order. From the ‘Atlantic Revolutions’ of the late 18th and early 19th centuries to the ‘colour revolutions’ of the early 21st century, revolutions have been constitutive of notions of sovereignty, order, justice, and more. Revolutions have also been tightly bound up with dynamics of war and peace. This course explores both the theory and practice of revolutions, teasing out their effects and examining the prospects for revolutionary change in the contemporary world.

List of Topics
Part 1 Thinking about revolutions
Week 1 What are revolutions?
Week 2 Key themes in the study of revolutions
Week 3 Revolutions and world politics

Part 2 The experience of revolution
Week 4 The Atlantic ‘age of revolutions’
Week 5 Socialist revolutions

Week 6 Reading week – session on the assessed essay

IR322 Half Unit
Sovereignty, Rights and Justice: Issues in International Political Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Brown

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice.

Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the ethics of war and violence; the politics of humanitarian intervention; the politics of international criminal law and the ICC; global social justice. Further details will be provided at the start of the session.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will write two essays, maximum length of 1,500 words, and introduce class discussions.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
IR347  Half Unit
Political Economy of International Labour Migration

This information is for the 2015/16 session.
Teacher responsible: Dr Covadonga Meseguer 95 ALD 1.13
Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The mobility of workers is one of the pillars of globalisation. However and surprisingly, international political economists have paid less attention to the political causes and consequences of international migration in comparison to that paid to other aspects of globalisation such as trade or finance. In this course, we shall employ a political economy perspective to study the historical evolution of migration policy, the relationship between trade and migration, and the political causes and consequences of migration flows. I shall place special emphasis on the study of the political consequences of migration for sending (rather than receiving) countries. We shall also pay attention to an important capital flow associated to international migration: remittances. Rather than focusing on the economic/developmental consequences of remittances, we shall discuss how remittances impact political outcomes as diverse as democratisation, the survival of dictatorships, political clientelism, corruption, political participation, and political accountability.
Week 1. Overview and Introduction
Week 4. Trade and International Migration in Historical Perspective.
Week 5. The Making of Migration Policy (I): Interests and Institutions.
Week 6. Reading Week
Week 8. Economic Consequences of International Labour Migration for Sending Countries: Remittances.
Teaching: 10 hours of lectures and 10 hours of classes in the MT.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT.
Students are expected to write two essays (1500-2000 words) to be handed in Week 7 and Week 11. The second essay can be written as a mock exam answer.
Students are expected to make one class presentation.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
The paper contains 8 questions, of which two are to be answered.

IR354  Half Unit
Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2015/16 session.
Teacher responsible: Dr James Morrison 95 ALD 1.14
Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: Who governs the global economy? How do they do so? And to what ends do they govern it? This course examines these questions by examining the canonical theories of—and state approaches to—the challenges of global economic governance across the last several centuries. While this course takes history seriously, the primary objective is to use the history to tease out generalisable insights into those challenges we face today. More generally, this course of study will demonstrate the incomparable insights historical thinking offers in addressing contemporary challenges. History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.
Proceeding from the seventeenth century to the present, it examines:
- seminal theorists’ particular treatments of international political economy
- the ongoing, timeless debate between these theorists
- the major shifts in the global economic order
- the interaction between theories and policy in each shift
The course begins with mercantilism and the ‘age of empires’. It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-called ‘English’ political economy and the ‘First Era of Globalisation’ in the 19th Century.
The course then pivots to consider two major challenges to this hegemony of thought and practice. First, it traces the development of socialism from an internal critique through the writings of Marx & Engels to an instantiated alternative system in the early Soviet Union. Second, it considers the German Historical School’s return to mercantilism—and Europe’s concomitant return to imperial rivalry in the early twentieth century.
This brings the course into the interwar period. There, the course considers the battles that raged among liberals in their attempts to resuscitate the classical IPE tradition in the wake of the First World War. It looks at two variants of liberal IPE: progressive and Austrian. This leads to examination of both the ideas and influence of JM Keynes. A selection of Keynes’s writings is coupled with analysis of the interwar collapse of IPE that consumed him—and the world.
The course then transitions into a discussion of the Anglo-American Postwar Order, of which Keynes was a major architect. Finally the course turns to the modern era. It examines the evolution of the global trade and monetary regimes. It examines the perspectives and trajectories of both developed and developing countries. It concludes by examining the tension between the apparent ascent of ‘neoliberalism’ within economic theory alongside critiques from ‘non-economic’ perspectives: environmental, democratic, and otherwise.
Teaching: 10 hours of lectures and 10 hours of classes in the LT.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the LT.

Assessment: Essay (100%, 2000 words) in the LT.

IR355 Half Unit
Economic Diplomacy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13

The course is coordinated by an LSE academic but is supported by an experienced practitioner of economic diplomacy Sir Nicholas Bayne, former UK foreign service and ambassador and Kenneth Heydon (formerly Deputy Director at the OECD in Paris).

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction with each other. It provides students with both academic and practitioner perspectives of economic diplomacy and offers participants an opportunity to understand the challenges faced by negotiators through the simulation of a current multilateral negotiation.

Teaching: 10 hours of lectures, 9 hours of classes and 3 hours of workshops in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the LT.

IR368 Half Unit
The Political Economy of Trade

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: The focus of the course is on explanations of trade policy choices as the result of political and economic factors. The first part of the course covers key models in the economics of international trade, including the New New Trade Theory. The second part of the course addresses political economy theories to explain protectionism and trade liberalisation. Particular attention is devoted to the role of interest groups and domestic political
institutions in trade policy. The third part of the course studies how international regimes (e.g. the WTO and preferential trade agreements) affect trade policy in developed and developing countries. The fourth part of the course focuses on the effect of trade liberalisation in developing economies. This part of the course places emphasis on the relationship between trade, foreign direct investment, and the activities of multinational companies. The last lecture of the course looks at the links between international trade and monetary policy during periods of crises.

**Teaching:** 10 hours of lectures and 15 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy. 10 lectures and 10 seminars in LT. Topics:

1. Macro-economic models: Sector model and factor model
3. Political economy models: The Role of Institutions
4. Political economy models: The Role of Interest Groups
5. From the GATT to the WTO: The multilateral trading system
6. The proliferation of preferential trade agreements: Causes and consequences
7. Trade and development
8. The Politics of FDI in developing countries
9. FDI, inequality, and economic growth in developing countries
10. Trade, exchange rates, and financial crises

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

The final examination lasts 2 hours and students will be asked to answer 2 out of 8 questions.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR398
Dissertation
This information is for the 2015/16 session.

Teacher responsible: Dr Peter Wilson CLM 5.10

Availability: This course is available on the BSc in International Relations and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Course content: Candidates are required to submit a dissertation of up to 10,000 words, excluding bibliography, but including notes and any appendices and tables, by the beginning of May of their final year. The subject of the dissertation can be anything within the syllabus of the undergraduate degree in International Relations at the School. Candidates are required to submit the title of their dissertation for approval by the Course Co-ordinator before the last day of the Michaelmas Term of their third year. They are also required, by the same deadline, to submit to the Course Co-ordinator a brief plan of their proposed study.

Dissertations offer the chance to discover, and deal with, new and interesting material. Students are encouraged to participate in this challenge, which assesses different skills from examinations, and to use the opportunity to enhance their knowledge in an area of particular interest to them. The aim is to develop the ability to make independent judgements and decisions on extracting and analysing the most important and relevant material. The outcome will be the provision of a coherent, sustained, systematically developed, and well supported argument on a topic, predominantly empirical or theoretical, within the field of International Relations. The dissertation may deal entirely with secondary literature. There is no requirement for the use of original material such as unpublished documents, archives, or personal interviews. The final text should contain a full bibliography of utilised sources. Direct quotations from published or unpublished work must be fully referenced. Standard scholarly practice with regard to referencing the ideas of other scholars should be followed. The completed dissertation must be typed with double spacing on one side of the paper and with a wide left-hand margin. The pages must be numbered consecutively and adequately secured. The first page should bear the full title, the candidate’s number (but not name), together with the rubric: ‘BSc International Relations 2015/16. Dissertation submitted in full fulfilment of the requirements of the degree.’ All students must add on the cover page of their dissertation a declaration which is required for all work submitted as part of the formal assessment of degrees other than work produced under examination conditions, to the effect that they have read and understood the School’s rules on plagiarism and assessment offences at http://www.lse.ac.uk/resources/calendar/academicRegulations/RegulationsOnAssessmentOffences-Plagiarism.htm and that the work submitted is their own apart from properly referenced quotations. Further information including detailed information on footnote and referencing style can be found on the IR398 Moodle site.

Teaching: 2 hours of lectures and 1 hour of classes in the MT.
2 hours of lectures and 1 hour of classes in the LT.
There will also be a 1 hour introductory lecture in the Summer Term of the preceding year for all those interested in taking this option. Classes will be held in the groups of three beginning in the middle of Michaelmas Term. In the first class students will present a more advanced report on their progress.

Advice and Assistance
The dissertation is unsupervised and must be entirely the candidate’s own work. In no circumstances are teachers within the School or the wider university community, permitted to read or comment upon a draft of the dissertation or any part thereof. This does not mean, however, that students will be without guidance. The Course Co-ordinator will provide guidance on the nature and process of writing a dissertation in the field of International Relations. He will also provide bibliographical guidance, and will be available for consultation throughout the year to help students address more specific problems as and when they arise. Students are encouraged to approach other teachers within the department for bibliographic and general guidance on topics falling within that teacher’s particular field of expertise. Students will have ample opportunity to discuss aspects of their topic, general and particular, with fellow students and the Course Co-ordinator throughout the year.

Assessment: Dissertation (100%, 10000 words) in the LT.
Examiners of the dissertation look for a variety of skills and qualities such as: conceptual precision, skill in analysis, organisation of material, clarity of exposition, and capacity for logical reasoning. Examiners also attach weight to accuracy in English spelling, grammar, and punctuation. Candidates should ensure that their submitted dissertation does not exceed the word limit. A penalty will be deducted from the given mark for any dissertation that exceeds 10,000 words. The penalty will be a deduction of 5 points for each 500 words above the word limit (i.e. a 5 point reduction from 10,001 words; a further 5 points from 10,501, etc.). Dissertations over 12,000 words will automatically fail. There is no lower word limit, but students should be aware that it is very difficult to produce a sustained argument to the required standard in less than 8,000 words. For further details, please see the IR 398 Moodle site.

The dissertation must be handed in to room CLM 6.11 by 5 pm on Tuesday 3 May 2016.

Penalties for the late submission of course work.
(i) Where a course includes course work as part of its assessment, the LSE requires that all students must be given clear written instructions on what is required and the deadline for its submission;
(ii) if a student believes that s/he has good cause not to meet the deadline (e.g. illness), s/he should first discuss the matter with his/her academic advisor or Course Coordinator and seek a formal extension from the Chair of the Examination Sub-Board. Normally extensions will only be granted where there is a good reason backed by supporting evidence (e.g. medical certificate);
(iii) if a student misses the deadline for submission but believes that s/he has good cause which could not have been alerted in advance s/he should first discuss the matter with his/her academic advisor or the Course Coordinator and seek a formal extension;
(iv) any extension should be confirmed in writing to the student;
(v) if a student fails to submit by the set deadline (or the extended deadline as appropriate) the following penalty will apply:
Five marks out of 100 will be deducted for a Dissertation submitted within 24 hours of the deadline and a further five marks will be deducted for each subsequent 24-hour period (working days only) until the Dissertation is submitted.

LL104
Law of Obligations
This information is for the 2015/16 session.

Teacher responsible: Dr Charlie Webb, NAB6.26

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Introduction to the law of contract, including formation of contracts, express and implied terms, misrepresentation, exclusion clauses, remedies for breach of contract. Introduction to the principles of the law of restitution. Introduction to the law of torts: negligence and other specific torts, causation, defences, remedies for torts.

Teaching: 18 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 4 hours of lectures and 2 hours of classes in the ST.
The lectures will be given by a number of different teachers. The basic work is done through the classes, and the lectures are designed to introduce the topics on the syllabus.

**Formative coursework:** Students will be expected to produce 4 essays in the MT and LT. Assignments will be set, marked and returned by each class teacher.

**Indicative reading:** A general reading list will be issued at the commencement of each term. Students should follow the advice of their class teachers as to the textbooks to be read.

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

**LL108 Half Unit**

**Criminal Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Peter Ramsay

**Availability:** This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course examines the ‘general part’ of criminal law and selected areas of the special part of criminal law in the context of theories of the aims and functions of criminalisation. The course will discuss the limits to criminalization; the conceptual framework of criminal liability (conduct, responsibility, capacity, defences); criminal law’s construction and regulation of interests in property (with particular reference to the offences of theft and fraud); attempts; ‘pre-inchoate’ offences; regulatory offences (with special reference to drugs); homicide; sexual offences; non-fatal violence against the person; secondary participation in crime.

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 3 hours of classes in the ST.

**Formative coursework:** Students will be expected to produce 2 essays in the MT and LT.

This will be set by the teacher in charge of the class. A minimum of two pieces of written work will be required, usually one essay and one problem.

**Indicative reading:** A detailed reading list will be distributed at the start of the course (for the current list, see the public folders). A number of criminal law textbooks are available, and students will be expected to read the relevant parts of the most recent editions of one of these, e.g. Nicola Lacey, Oliver Quick & Celia Wells, Reconstructing Criminal Law; Andrew Ashworth and Jeremy Horder, Principles of Criminal Law; Jonathan Herring, Criminal Law: Text, Cases and Materials; M. Allen, Introduction to Criminal Law. They will also be expected to read all cases and materials marked as primary on the detailed reading lists provided.

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

**LL106 Public Law**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Martin Loughlin NAB 7.12

Additional Teachers: Dr Jo Murkens, Dr Thomas Poole, Professor Conor Gearty

**Availability:** This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course covers: the conceptual framework of public law; central government and the executive; parliament; multi-layered government (the European Union, devolution and local government); judicial review; and civil liberties and human rights.

**Teaching:** 20 hours of lectures and 18 hours of classes in the MT. 20 hours of lectures and 20 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.

**Formative coursework:** Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**LL109 Half Unit**

**Introduction to the Legal System**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Meredith Rossner and Ms Insa Koch

**Availability:** This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** Outline: The course is designed as a foundation course to familiarize law students with the basic characteristics and functioning of legal systems.

The course will include:
1. What is law?
2. Legal pluralism
3. The trial and adjudication
4. The Legal profession
5. Lay participation in justice
6. Reading Law: Statutory interpretation
7. Reading Law: Common law and judicial precedent
8. Reading Law: Persuasive Authority
10. Alternative dispute resolution
11. Access to justice

**Teaching:** 20 hours of lectures and 9 hours of classes in the MT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** This is a Moodle course, with the course
LL201
Administrative Law

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Poole NAB7.19

Additional Teachers: Professor Carol Harlow

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Outline:
Administrative Law is a vital subject throughout the modern world. An understanding of the role which it plays is essential to private practitioners. Commercial lawyers frequently come into contact with regulatory agencies whose special procedures derive from administrative law. Dealings with international agencies (including the European Union) are often governed by administrative law. Public law expertise opens the way to good careers in government service. There is a flourishing Administrative Law Bar, reflected in well-established sets of chambers.

The course aims to reflect the wider dimensions of administrative law, stressing links with public administration, commerce and politics. We emphasise the functions of law in the administrative process and the constitutional role of judicial review. We also aim to show how membership of the European Union and adherence to the European Convention on Human Rights has influenced our system of public law. We look at the way in which changed systems of governance, especially the rapid growth of regulatory agencies, can be reflected in and controlled by traditional rules of administrative law. Public law expertise opens the way to good careers in government service.

Syllabus:

Purposes of the course:

Objectives:
At the end of the course students will:

1. Understand the role of administrative law.
2. Be aware of the impact of administrative law on the regulatory environment.
3. Be able to apply administrative law principles to real-world cases.
4. Be able to critically analyse the role of administrative law in today’s society.

Formative coursework:

Two formative essays per term.

Indicative reading:
The principal textbooks for the course are: Chen-Wishart, Contract Law, 4th edn (OUP 2012); McKendrick, Goode on Commercial Law, 4th edn (Penguin 2010); Beale, Bishop and Furmston, Contract: Cases and Materials, 5th edn (OUP 2007); Sealy and Hooley, Commercial Law: Text, Cases and Materials, 4th edn (OUP 2008).

Assessment:

Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL203
Law of Business Associations

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Micheler NAB7.35

Additional Teachers: Professor David Kershaw and Mr Leslie Kosmin, QC.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.

Assessment:

Exam (100%, duration: 2 hours) in the main exam period.
permit and to General Course students.
Experience suggests that third year students are more successful.

Pre-requisites: It is helpful to have studied or be studying Property II, although this is not a formal pre-requisite.

Course content:
This course examines the nature of the legal vehicles available for the carrying on of entrepreneurial activities, paying particular attention to the analysis of companies. It examines the core features of the company. These are: separate legal personality, limited liability, centralised management, the allocation of control rights, and free transferability of shares. The course analyses how the law implements these features and the policy trade-offs among them. The course discusses the relationship between various groups with an interest in the affairs of the company – shareholders, directors, managers, financiers, trade creditors, employees, consumers and regulators - and the balance of power between them. The course looks beyond purely technical legal issues and encourages a critical examination of the system and proposals for reform.
Registered companies are creatures of statute and close attention to the Companies Acts and related legislation is essential. However, no attempt is made to deal with all, or even most, of the complex technical aspects of the legislation and non-statutory regulation. The course concentrates on the problems and policies underlying the legislation, with some more detailed consideration of selected provisions. The increasing influence of European Directives and Regulations on UK company law is also reflected. Despite the importance of statute, common law and equitable principles have played a major role in the development of company law by the courts. This has relied heavily on principles of agency and the equitable principles relating to fiduciaries. Case analysis is therefore a major element of the course. Excellent case books are available.

This subject covers a wide range of businesses - from the one-person firm (the local greengrocer or plumber) to family companies, to major multinational groups listed on the Stock Exchange. This wide coverage plus the policy emphasis means that this course should appeal to all students with an interest in the economic, social and political aspects of business organisations and not only to those wishing to practise commercial law.

Topics usually covered are:
• Introductory concepts and themes including limited liability and corporate personality.
• Capacity of companies & the powers of individuals acting for companies.
• Shares and share capital.
• Directors: powers, duties and corporate governance issues.
• The role of shareholders in companies: rights, decision-making and governance.

Teaching: 20 hours of lectures and 8 hours of seminars in the MT, 20 hours of lectures and 14 hours of seminars in the LT, 4 hours of seminars in the ST.

Lectures are accompanied by fortnightly two-hour seminars, which follow the lectures closely. Reading lists provided by the lecturer in each topic are used as the basis for seminar work.

Formative coursework:
Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading:
Gower and Davies, Principles of Modern Company Law (9th edn, 2012); David Kershaw, Company Law in Context (2nd edn, 2012); Sealy and Worthington, Cases and Material on Company Law (10th edn, 2012)

Assessment:
Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL204
Advanced Torts
This information is for the 2015/16 session.

Teacher responsible: Miss Helen Reece NAB6.24
Additional Teachers: Dr Emmanuel Voyiakis and Dr Charlie Webb.
Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Law of Obligations (LL104).

Course content:
Our course aims to broaden and deepen your knowledge of tort law in two ways. First, it looks at a range of important torts that are not covered in the Law of Obligations course. Second, it tackles the ‘big’ theoretical questions of tort law. On finishing the course, you will not only have gained a better understanding of the rules and principles that govern specific torts, but you will also be able to engage critically with different views about the overall purpose and the moral and social function of tort law.

Here are some topics we usually cover:
(1) Theories of tort law: what is the aim of tort law and do judges need a theory of it?
(2) Tort law and the ‘compensation culture’
(3) Tort law, moral responsibility and luck
(4) Negligence focus: the position of public authorities; negligent endangerment
(5) Wrongful life and wrongful birth
(6) Interference with the person: assault; battery; harassment; the Wilkinson v Downton tort
(7) Problems of causation: loss of chance
(8) Illegality
(9) Strict liability regimes: vicarious liability; liability for ultra-hazardous activities; liability for defective products; the justification of strict liability.

Teaching:
10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.
1 hour of lectures and 1 hour of classes in the ST.

Indicative reading:
Introductory Texts: John G. Fleming, An Introduction to the Law of Torts (2nd ed., 1985); Carol Harlow, Understanding Tort Law (3rd ed., 2005). General Texts: W V H Rogers, Winfield & Jolowicz on Tort (18th ed., 2010); N J McBride & R Bagshaw, Tort Law (4th ed., 2012); B A Hepple, D Howarth & M H Matthews, Tort: Cases and Materials (6th ed., 2008); S Deakin, A Johnston & B Markesinis, Markesinis and Deakin’s Tort Law (7th ed, 2012); P Cane, Atiyah’s Accidents, Compensation and the Law (7th ed., 2006). Advanced/Specialised Texts: Robert Stevens, Torts and Rights (2007); Jules Coleman, Risks and Wrongs (2002); Guido Calabresi, The Cost of Accidents: A Legal and Economic Analysis (1970); David Owen (ed.), Philosophical Foundations of Tort Law (1997); Harvey Teff, Causing Psychiatric and Emotional Harm: Reshaping the Boundaries of Legal Liability (2008); Nicolette Priaux, the Harm Paradox: Tort Law and the Unwanted Child in an Era of Choice (2007). If all goes according to plan, the degree of depth we will attain in the course and the focused nature of our reading lists for each topic will make textbooks redundant, or at least useful only as a basic introduction to the issues we will be covering. This means that the tort textbook you may have purchased for the LL104 Law of Obligations course will probably be good enough for the latter purpose. Here are some other introductory or general texts that you might like to consult from time to time, just to get a different perspective on things, and some more advanced or specialised books from which we will be setting reading for certain topics.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.
LL205
Medical Law
This information is for the 2015/16 session.
Teacher responsible: Dr Julie Mccandless NAB 6.07
Additional Teachers: Mr Antony Blackburn-Starza, Ms Cressida Auckland
Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.
Course content: Medical law is a rapidly developing and increasingly important subject. The rationing of expensive new drugs, and the future of the NHS have become central political issues. New scientific developments, such as cloning, face transplants, stem cell research and direct-to-consumer genetic testing, are invariably accompanied by demands for their regulation. In this course we examine the legal framework within which health services are provided, and we explore some of the difficult ethical dilemmas that arise when determining the limits of medical innovation.
Subjects include malpractice litigation; consent; capacity; confidentiality; research on human subjects; resource allocation; abortion; surrogacy; assisted conception; ‘designer babies’; embryo and stem cell research; cloning; mental health law; organ transplantation and assisted dying.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL207
Civil Liberties and Human Rights
This information is for the 2015/16 session.
Teacher responsible: Dr Kai Moller NAB 7.01
Additional Teachers: Dr Thomas Poole, Dr Peter Ramsay.
Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
This course is capped at 50.
Course content: The course provides a challenging introduction to human rights law. The first term focuses on the European Convention on Human Rights with an in-depth analysis of the case law on several important rights, including but not limited to freedom of expression, freedom of association, freedom of religion, the right to respect for private and family life. Mental health and human rights. Terrorism, security and states of emergency; ‘social learning’. Anomalous zones.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.
Indicative reading: For European Convention law there exists no textbook which deals with the issues in adequate depth, but interested students may want to take a look at Harris, O’Boyle and Warbrick, Law of the European Convention on Human Rights 3rd edn (OUP, 2014) for an overview. For the more theoretical aspects of the course, see K. Möller’s The Global Model of Constitutional Rights (OUP 2012; paperback edition 2015). For the second term, representative works include Conor Gearty, Civil Liberties (OUP, 2007), Tom Hickman, Public Law after the Human Rights Act (Hart, 2010) and Aileen Kavanagh, Constitutional Review under the UK Human Rights Act (CUP, 2009). Updates
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL209
Commercial and Enterprise Law
This information is for the 2015/16 session.
Teacher responsible: Dr Ewan McGaughey
Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: Commercial and Enterprise Law introduces the basic institutions of the market economy, and the governance of enterprise, in a post-financial crisis world: the law of contract, companies, labour and insolvency. It is the LSE’s oldest course (since 1895, originally named ‘Commercial and Industrial Law’) and probably the first in the world to teach labour law. Over the years it has attracted enquiring students from non-law departments, a number of whom became Nobel laureates. Michelmas term is the law of contract. We examine how agreements become legally binding, the regulation of unfair terms and basic consumer protection laws. We see how a contract may be cancelled when fully informed and true consent is not present, including through misrepresentation or coercion, and examine remedies for breach of contract.
Lent term examines enterprise governance: introducing companies, labour relations and insolvency law. How are company directors...
accountable to shareholders, employees and other stakeholders? Which fiduciary duties and duties of care do directors owe a company? What voice does labour have in corporate governance? Should banks acquire privileges through securitised lending over other creditors? How will a corporate insolvency be administered, and the losses distributed? Finally, how can directors and shareholders be held to account after insolvency? The aim is to understand the operation of the basic institutions in the market segment of the economy.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Core texts:
E McKendrick, Contract Law (11th edn 2015)
A Dignam and J Lowry, Company Law (8th edn 2014)
L Sealy and S Worthington, Cases and Material in Company Law (10th edn 2013).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL210 Information Technology and the Law

This information is for the 2015/16 session.

Teacher responsible: Professor Andrew Murray NAB 7.11
Dr. Orla Lynskey NAB 6.23

Availability: This course is available to LLB and Law and Anthropology students. It is also available as an outside option to students in other departments and to General Course Students. Students from other Universities should contact the course convenor regarding participation in this course.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This survey course, which is divided into six modules, introduces students to a selection of fundamental legal issues in the field of Information Technology (IT) Law. It begins by examining ongoing debates regarding the appropriate theoretical framework applicable to internet regulation and governance, tackling questions such as whether the internet should be controlled and, if so, by whom. It then examines substantive legal topics, such as data protection, cybercrime, intellectual property and online freedom of expression, against this theoretical backdrop. In particular, students are encouraged to consider both how the law has responded to the challenges of information technologies, and the extent to which legal issues have shaped the development of information society policy.

The focus will be initially on English law, although the increasingly global nature of IT law means that there are already strong EU and US legal influences upon the English system, so comparative aspects will be introduced in places, and readings will include materials drawn from, amongst others, US law journals.

At the end of the course, students should be able to assess critically ongoing developments in law relating to information technologies and to evaluate the internal coherence of these developments and their doctrinal and political implications.

Indicative Content:
Michaelmas 2015
• Introduction to Internet Regulation and Governance
• Data Protection and Online Surveillance
• Freedom of Expression Online
Lent 2016
• Cybercrime

• E-Commerce
• Intellectual Property Rights Online

For a more detailed outline, please visit the course Moodle page.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

** Recommended for purchase.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL212 Conflict of Laws

This information is for the 2015/16 session.

Teacher responsible: Dr Jacobus Bomhoff NAB6.09

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: A good knowledge of law is required. The majority of students taking this course tend to be in their third year. That said, many second year students have done very well on this course over the past years.

Course content: Conflict of laws - also know as private international law - is the area of law concerned with cases in which the facts present one or more international elements. The field’s three main questions are (1) jurisdiction (will an English court or a foreign court hear a case?), (2) choice of law (should the court apply its own law or that of a foreign country?), (3) the recognition and enforcement of foreign judgements. During the course, these three questions will frame reflection on a range of topics, including commercial/practical issues (e.g. how can companies structure their cross-border transactions), but also questions of a more political nature (e.g. to what extent should States be able to regulate matters beyond their own borders?) or with a strong social/cultural dimension (e.g. how should foreign cultural understandings of justice be accommodated in domestic law?). Because of the growing role of the European Union in this area, the interaction between English and European approaches to conflict of laws issues will be an important running theme throughout the course.

Syllabus
- Jurisdiction: Brussels I Regulation 2012; English traditional rules; Comparative case studies (US and Canadian law); Choice of court agreements; Anti-suit injunctions.
- Choice of law: Contract and Tort (Rome I and Rome II Regulations); Comparative case studies; Public policy; Foreign illegality; Overriding mandatory rules.
- Foreign judgments: Brussels I Regulation 2012; English traditional rules; Comparative case studies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Students will be provided with a Course Reader, which is posted on Moodle in instalments throughout the year. The following texts may serve as sources of reference throughout the course: Jonathan Hill & Adeline Chong, International Commercial Disputes (Hart Publishing); Trevor Hartley, International Commercial Litigation (CUP); Peter North & James Fawcett, Cheshire & North’s Private International Law (OUP); Adrian Briggs, The Conflict of Laws (OUP). Always make sure you have the
most recent edition.
Resources: www.conflictoflaws.net (Topical references, cases and reviews).
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL221
Family Law
This information is for the 2015/16 session.
Teacher responsible: Miss Helen Reece (MT) NAB 6.24 and Dr Julie McCandless (LT) NAB 6.07
Additional Teacher(s): Ms Sarah Trotter
Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.
Course content: This is an exciting time to study Family Law! Maybe more than ever before, the family is in flux. With marriage rates tumbling, divorce rates escalating and reproductive technologies becoming normalised, record numbers of children are living outside the traditional nuclear family of their biological married mum and dad (the heteronormative family). What’s more, after centuries of exclusion, lesbians and gay men are on the brink of entering into the most sanctioned relationship of all – marriage. Is the traditional family dead, has it changed beyond all recognition, or is the family functioning much as it always has done? How does the law respond to the modern family, and how should the modern family be regulated? If you want to chew over these and a host of other fascinating questions, Family Law is the course for you.
Term 1: Adult Relations: 1. Introductory concepts: (a) Intervention in the family; (b) Discrimination against families, in the context of human rights legislation. 2. Marriage and Civil Partnerships: (a) the distinction; (b) Gender Recognition Act; (c) nullity. 3. Divorce and Dissolution 4. Financial provision: (a) conceptions of equality; (b) the legal framework for discretion. 5. Domestic violence: the legal framework, and the limits of legislation.
Term 2: Child Law: 1. Introductory concepts: (a) children’s welfare; (b) the welfare checklist; (c) legal parenthood; (d) parental responsibility: meaning and allocation. 2. Children and families: (a) legal framework; (b) regulation after relationship breakdown. 3. Children and the state: (a) care and supervision; (b) child abuse. Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
Formative coursework: Students will be expected to produce 2 essays in the MT and LT.
Indicative reading: Students are provided with a detailed syllabus and reading list for class topics. Basic reading for each topic will be drawn from a number of sources including text books, cases and articles. In case students wish to purchase any books the following are suggested:
Assessment: Exam (100%), duration: 3 hours, reading time: 15 minutes) in the main exam period.
Approved statutory materials may be taken into the examination in accordance with School Regulations.

LL232
Law and Institutions of the European Union
This information is for the 2015/16 session.
Teacher responsible: Dr Floris De Witte
Additional Teachers: Dr Veerle Heyvaert, Dr Jan Komarek, Dr Michael Wilkinson.
Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the BSc in Management and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course is an introduction to European Union Law. The course considers a legal and political system which has become the most formidable system of transnational government in modern times. It is also a system that has become, in recent years, a source of continual political conflict: both over the content of its measures and the presence of its involvement in many spheres of activity. Discussions on the democratic nature of the EU, its stance of the protection of fundamental rights, and the relationship between the welfare state and EU law, for example, will all be covered in this course.
This course covers three aspects of EU law. First, it covers the institutional and constitutional structure of the European Union. Second, it looks at the central policies of the European Union, notably the rights to free movement for goods, services, workers, and Union citizens. Third, it looks at some of the most topical policy areas in which EU law plays an increasingly important role: the area of freedom, security and justice (and in particular the European Arrest Warrant), EU social policy, and the euro area crisis. Topics will be taken from:
(1) Evolution of the European Union
(2) Institutions and Law-Making of the European Union
(3) Sovereignty and EU Law
(4) The Authority of EU Law Outside the EU
(5) Subsidiarity and the role of national parliaments
(6) Policing of National Observance of EU Law
(7) Judicial application of Union law within the Member States (e.g. Direct effect, indirect effect, state liability) and relations between the Court of Justice and National Courts
(8) Fundamental Rights
(9) The euro area crisis
(10) Free Movement of Goods
(11) Free Movement of Persons and European Citizenship
(12) Free Movement of Services and Establishment
(13) The Area of Freedom, Security and Justice and the European Arrest Warrant
(14) EU Social Policy and Anti-Discrimination Law
Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 4 hours of lectures and 2 hours of classes in the ST.
Week 6 MT and week 6 LT will be reading weeks. Essays will be set around reading week to allow students to dedicate time to writing skills.
Formative coursework: A minimum of two pieces will have to be submitted: an essay in MT and a mock exam in LT. One additional optional essay will be set in LT.
Indicative reading: The core text for this course is Chalmers et. al., EU Law (3rd edn, CUP 2014). An alternative textbook that is useful to consult is Craig & De Burca, EU Law (6th edn, 2015). In addition, the course uses a broad range of on-line reading material. Students are expected to retrieve these materials on Moodle and print these materials themselves; there is no course pack. Students are not required to purchase a statute book, and the statute book will not be allowed in examination (contrary to the policy in the past years).
LL233

Law of Evidence

This information is for the 2015/16 session.

Teacher responsible: Dr Federico Picinali, NAB 5.10

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: If a person is suspected of committing a crime, how does the prosecution go about proving that they are guilty? Are there any restrictions on the type of evidence that the prosecution can use to prove its case? What protections does the law offer to defendants, to safeguard them against false conviction? These are the central questions in the law of criminal evidence, which looks at the rules governing the use of evidence in criminal trials.

This course concentrates on criminal, rather than civil evidence. The course is taught by seminar, and emphasis is placed on matters of principle and conceptual issues rather than the fine detail of legal rules. The aims of the course are to teach students how to reason about evidence, and to encourage them to reflect critically on the modern law of criminal evidence.

At a more detailed level, we look at issues such as the standard of proof, asking why the standard of proof in criminal trials is beyond reasonable doubt and what reasonable doubt means. We consider how inferences are drawn from evidence, and how basic ideas of probability can give insights on this process. We examine how the police gain confessions from suspects, and how the law regulates the admissibility of confessions. An important theme on the course relates to questions about what makes a trial fair, and here the European Convention on Human Rights is relevant. In this context, we look at whether courts should admit illegally or improperly obtained evidence and ask what the privilege against self-incrimination is and whether it can be justified. Much of the law of evidence involves rules of admissibility, and here we cover hearsay evidence (a topic now with an important human rights angle) and character evidence (can a defendant’s previous convictions be introduced against him at trial?). We also look at expert evidence, concentrating on particular examples such as DNA evidence and fingerprint evidence.

Syllabus: While coverage may vary from year to year, we usually look at the following themes and topics.

- The course has a moodle page which you could look at to get a better idea of the topics and the sort of material we look at.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 20 hours of seminars in the MT. 20 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: There is no set text for the course, but standard texts, eg Ian Dennis, The Law of Evidence (5th edn, 2013) are useful on many topics.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL241

European Legal History

This information is for the 2015/16 session.

Teacher responsible: Dr Umberto-Igor Stramignoni NAB 7.34

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to equip students with an in-depth understanding of the social and cultural history of the Western legal tradition (from its foundations in Ancient Rome to the onset of modernity), in order to engender a solid grasp of the basic assumptions and practises that underpin the legal systems of today's Europe.

The seminars are built around significant traces left by Roman law, the heartland of the Western legal tradition, from its mythical beginning in the 8th century BCE all the way through to the French Revolution and the astonishing story of the birth of the French Civil code in 1804.

In the first part of the course we will study: law and religion in ancient Rome; the space of the law; the emergence of the people’s legislative assemblies in Republican Rome; women, slaves, and foreigners in the eyes of the law; the rise to power of Augustus and his Chancery; the great jurists of the Empire; the challenges of the "new religion", Christianity, for the Roman constitution; the turmoil and decline of Empire; and the rise of the Eastern Emperors and of Byzantium as the "new Rome".

In the second part of the course we will be considering how Roman law, now increasingly referred to by English common lawyers as "Civil Law", transformed itself from the Middle Ages onwards, continuing to play a very central role in the imagination, thought and language of Europe and the world over. We will look at: how Roman law became immensely influential once again (both in Europe and beyond), upon its reappearance in new and different guises, at the end of the Middle Ages; the consequences of the rediscovery of the Justinian Digest and the challenge it represented for the law of the mediaeval-world of the Christian Church; the cultural revolution of the Italian Renaissance; the emergence of legal Humanism and of the "scientific" method; the early Enlightenment; the modern movement for legal codification; the French Revolution; and the birth of the French Civil Code and its lasting influence on contemporary Europe.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: The general textbook for the course is the short yet iconic book by Peter Stein, entitled Roman Law in European History (1999). However, a mixture of visual aids and further readings will be used to complement the textbook, including journal articles and book chapters from other monographs.

Students are encouraged to explore the course Moodle page for more information.

Assessment: Assessment path 1

Exam (100%, duration: 3 hours) in the main exam period.

Assessment path 2

Dissertation (100%, 12000 words) in the ST.

LL242

International Protection of Human Rights

This information is for the 2015/16 session.

Teacher responsible: Dr Chaloka Beyani NAB7.04

Availability: This course is available on the BA in Anthropology and Law, BSc in International Relations and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.
Pre-requisites: Students need to have already taken and done well in a course in Public International Law or in Civil Liberties Law.

Course content: This course aims to provide a comprehensive and analytical account of the application of human rights standards in international law, and the operation of the existing international machinery for the protection of human rights. The course is designed to be both theoretical and practical.

The course deals with important conceptual issues: What are human rights? What is their purpose and status in international law? Are they absolute or relative? Can they be of equal significance to societies at different stages of development? When may they be qualified? What is the relation between economic and social rights as well as civil and political rights? Are rights attributable to groups as well as to individuals? Why are there special categories of protection, e.g. minorities, indigenous peoples, children, women and refugees?

Extensive use is made of relevant case law, of the Civil and Political Covenant, the European Convention, the American Convention, the African Charter, and the International Court of Justice; and particular rights (such as those of persons belonging to minorities, the right to life, the prohibition of torture, the right to a fair trial, family life, and the fundamental freedoms) are studied in considerable detail.

The law of human rights reflects attempts made internationally to articulate basic legal standards for the protection of individuals and groups in their relations with the state, and to use the authority of international law, institutions, and procedures, to secure compliance with such standards. Human rights law is a modern phenomenon; but it has an ancient lineage. Some account of its evolution is given, from natural rights, civil liberties, the history of minorities protection, and the progressive development of human rights in public international law since 1945.

However, the major part of the course relates to post-1945 events concerning the protection of human rights. A section of the course deals with the role and reform of the United Nations to promote and secure the observance, on a universal basis, of international standards of human rights. The development of important legal standards (such as those of non-discrimination) is traced, and the work of various UN bodies in applying human rights is analysed. The International Covenants on Human Rights are closely studied, with equal emphasis on the Committee under the Civil and Political Covenant, and the Committee under the Economic Covenant.

Comparisons are also drawn with regional attempts to promote and protect human rights, with the European system, the Inter-American system and the African system receiving special attention as regards their treaties, their institutions, procedure, and case-law.

By the end of the course students should have a good understanding of the substantive content of contemporary human rights and of the existing and alternative means available for protecting these rights and fundamental freedoms.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

---

LL250
Law and The Environment

This information is for the 2015/16 session.

Teacher responsible: Dr Veerle Heyvaert NA87.06

Availability: This course is available on the BA in Anthropology and Law, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to study and understand how law can be used as a tool to pursue environmental goals and to think critically about law's contribution to local and global environmental protection.

THEMES:
I. General features of environmental law in the UK:
   The introductory sessions examine how we understand 'the value of the environment' as an object of legal protection, and how environmental law evolved through time. We study the notions of 'risk' and 'precaution' as key concepts of environmental regulation, and examine how the relationship between Parliament, the Government and the Environment Agency affects the effectiveness of environmental laws and rules in the UK.

II. Controlling space:
   This section reviews legal strategies for environmental protection through the management of the built environment, parks and nature. It covers planning law, environmental impact assessment, and nature conservation law.

III. Controlling climate change:
   Studies international law and politics of climate change, the UK approach to climate change mitigation and adaptation, and discusses the pros and cons of market-based regulation as a response to the climate change challenge.

IV. Controlling enterprise:
   Section IV looks at how environmental harm can be prevented or limited by regulating particular industries (such as heavily polluting industries and the waste treatment sector), by targeting particular products (such as dangerous chemicals), or by focusing on particular activities (such as international trade). We examine how environmental regulation aims to balance between restricting hazardous activities on the one hand, and fostering free enterprise on the other, and review the court's role in adjusting this balance.

V. Remedying environmental harm:
   The final section examines the role of both case law and regulation in the remediation of environmental harm, paying attention to clean-up of contaminated land, common law and human rights based approaches to compensation, and legal responses to international environmental disasters.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Week 6 MT and week 6 LT will be reading weeks. Essays or equivalent writing assignments will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students are expected to write a formative essay; answer a problem set in writing; and participate in a mock exam.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.
LL251

Intellectual Property Law

This information is for the 2015/16 session.

Teacher responsible: Dr Sivaramjani Thambisetty Ramakrishna NAB 7.29

Additional teacher(s): Prof Robert Pottage NAB 7.21

Availability: This course is available on the BA in Anthropology and Law and LLB in Law. This course is not available as an outside option nor to General Course students.

Course content: Content and Scope: Intellectual Property Law consists in the rules determining when, and subject to what conditions, the activity of producing information (broadly conceived) can generate rights to exclude others from access to information.

Given that information is an increasingly important source of commercial value within the modern economy, particularly for the entertainment and media sectors and science-based industries, it is not surprising that IP law is such a fast-growing field here and abroad. However its apparently relentless growth is the focus of vigorous debate.

Copyright already provides the legal foundation for the well-established film, music, TV and publishing industries, and its continuing expansion is said by some to be crucial given the trend towards media convergence in the 'digital future', and by others to be a threat to free speech and freedom of access to information.

Patents sustain such key sectors as pharmaceuticals, and increasingly now biotechnology, and their availability in this context raise complex ethical and political issues.

Trademarks are central to effective advertising and marketing but at the same time exemplify the tendency of more and more aspects of our cultural landscape to be 'commmodified'; they have attracted support and denigration in equal measure for this reason.

This course will provide students with an introduction to the law relating to patents, trademarks and copyright, and to the factors responsible for the continuing rapid expansion of each of these regimes of rights. We will reflect upon the variety of economic, cultural, political and technological pressures for the reform of Intellectual Property Law, and upon the processes by which these become translated into legal initiatives. And we will evaluate critically the implications for economic activity and social life generally of recognising intellectual property rights.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT. 6 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: The recommended text will be Lionel Bently and Brad Sherman, Intellectual Property Law (4th ed., Oxford University Press 2013), and students will also be required to purchase one of the available edited collections of statutes. For a critical introduction to the field, see Peter Drahos with John Braithwaite, Information Feudalism: Who Owns the Knowledge Economy? (London: Earthscan, 2002); and James Boyle, The Public Domain: Enclosing the Commons of the Mind (Yale University Press, 2008), ebook available free online

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period. Candidates will be required to answer a total of three questions out of nine (one from each of three sections).

LL253

The Law of Corporate Insolvency

This information is for the 2015/16 session.

Availability: This course is available on the BA in Anthropology and Law and LLB in Law. This course is not available as an outside option nor to General Course students.

Course content: The Law of Corporate Insolvency forms an increasingly important legal arena, which is now recognised as meriting study in its own right. The last thirty years has seen great strides in the development of corporate insolvency law in England. We have seen the adoption of an enhanced legislative framework and the development of conceptual aspects and jurisprudence of the subject. As the recession of the early 1990’s eased off there was a period of reflection and assessment of our insolvency law and procedures which resulted in reform of law on the books, although perhaps not of law in action. English lawyers have had to revisit the toolbox during the financial crisis in order to adapt existing legal procedures to meet the needs of new, modern financing structures.

There is now another period of wide spread reflection and debate in Europe and the US, as jurisdictions consider whether the insolvency law and procedures which they have are fit for the twenty-first century.

The course looks at the legal rules affecting distressed and insolvent companies and those concerned with them (for example, creditors, directors and employees) and it assesses the issues and principles underlying a corporate insolvency regime. (Corporate Insolvency Law bears a close relationship to the Law of Business Associations (BA) and students may find that taking BA as well as Corporate Insolvency will give them a broad understanding of major themes relating to corporate activity.)

Outline Syllabus

Corporate borrowing

(a) Outline of corporate borrowing and development and nature of security interests: fixed and floating charges; achieving the same economic effect as security through the use of ownership rights

(b) Types of creditor

The Role and Objectives of Corporate Insolvency Procedures

(a) Introduction: Aims and Objectives

(b) The Legal Identity of the Enterprise, the Significance of Limited Liability and the Problem of Corporate Groups

(c) Insolvency Practitioners/Turnaround Professionals

Averting Liquidation: Rescue

(a) Rescue Procedures I

Causes of corporate failure: the decision to rescue or wind-up.

(b) Rescue Procedures II

Informal Rescues.

(b) Rescue Procedures II

Receiverships – a continuing role?

(c) Security devices for consumer creditors and commercial suppliers

Repercussions of Corporate Insolvency on Individuals

(a) Company Directors

(b) Employees

The European and International Dimension

Insolvency Regulation of EU – the road to a universal bankruptcy system for member states?

International cooperation on insolvency matters and reciprocal assistance between insolvency courts.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 6 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Students will be expected to prepare for participation in weekly seminar discussion.

Indicative reading: Detailed reading lists will be provided during the course. The recommended book is V. Finch, Corporate Insolvency Law: Perspectives and Principles (2nd ed., 2009) (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The examination will be based on the full syllabus. Unmarked, unannotated versions of the relevant legislation may be taken into the examination.
LL257

Labour Law

This information is for the 2015/16 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This subject builds on contract and tort, and to some extent public law and EU law, but introduces the distinctive legal regulation of employment relations, such as the law of dismissal and discrimination law, and the institutional arrangements of industrial relations, including trade unions and collective bargaining. The course looks at these topics in an industrial relations context informed by sociology and economics. Labour law is an important area of legal practice, with employment law disputes representing one of the largest topics of civil litigation.

Syllabus:
Contract of Employment: the duties of employer and employee; the variety of work relations; vulnerable workers and the personal scope of employment law.
Regulation of the Employment Relation: minimum wage, working time.
Human Rights in the Workplace: civil liberties of employees at work.
Membership of Trade Unions, Worker Representation, and Collective Bargaining: freedom of workers to associate with each other and to act in association with each other.
Industrial disputes: strikes and other industrial action; rights and liabilities of individual workers who take industrial action; civil liabilities for organising industrial action – the economic torts, the ‘golden formula’ immunities and loss of immunity – industrial action ballots.
Business restructuring: economic dismissals and redundancy.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Assessment: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Reading lists are supplied for each week’s seminar and links are supplied on Moodle for most readings. For a concise overview of the subject a suggestion is: H. Collins, Employment Law 2nd edn (Oxford University Press, 2010). See also Kahn-Freund’s Labour and the Law (3rd ed. by P. Davies and M. Freedland, 1983) chapter 1.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.
Candidates are permitted to take into the examination an unmarked copy of a collection of statutes.

LL259

Legal and Social Change since 1750

This information is for the 2015/16 session.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines developments in British legal history in the era from 1750 to 1914. Drawing on printed and electronic primary sources, as well as secondary literature, it will explore the changing nature of law in a number of areas. The course begins with an exploration of the nature of eighteenth century criminal justice, and how this was transformed in the nineteenth century. It will then examine the nature of the system of civil justice, and how this was reformed in the era before the Judicature Acts. In the second term, the course will explore topics relating to status, examining the attitude taken by the law to women, workers and slaves. A final set of topics will turn to explore the impact of law on economic change, looking at how the law facilitated the growth of a modern economy.

The course will be taught by a combination of lectures and seminars in the Michaelmas and Lent Terms. Seminars take the form of a short introductory presentation by one or more students followed by class discussion in which all are expected to participate.

Lecture and Seminar Topics

Michaelmas term: The first term is devoted to an examination of the criminal and civil justice systems in the eighteenth and nineteenth centuries. Topics covered in the first term include the prosecution of crime in the era of the ‘Bloody Code’, the nature of the criminal trial before and after the arrival of criminal barristers in the courtroom, the reform of criminal punishments and the rise of the prison and modern policing. In the second half of the term, the course looks at the system of the civil courts, the nature of civil litigation and the reform of the major courts. It looks at topics including the ‘old corrupt’ court of Chancery depicted in Dickens’s Bleak House and its reform into the modern Chancery Division.

Lent term: The second term is devoted to exploring the impact of law on society and the economy. Topics explored include the law relating to married women and the custody of children, the law of slavery, and the law relating to workers and trade unions. The economic topics addressed include the law relating to the environment, the transformation of tort and contract law, and the law relating to business organisation.

Teaching: 20 hours of lectures and 5 hours of classes in the MT. 20 hours of lectures and 5 hours of classes in the LT. 4 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Assessment: Students who choose to be assessed by unseen examination must submit one essay each term. Those submitting a dissertation will produce outlines and drafts that will be used for formative coursework purposes.

Indicative reading: Reading will be suggested during the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Students can choose to be assessed by 100% examination or 100% dissertation.

LL272

Half Unit

Outlines of Modern Criminology

This information is for the 2015/16 session.

Teacher responsible: Dr Meredith Rossner

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some familiarity with sociological or psychological literature would be an advantage, but is not a prerequisite.

Course content: This half unit course is a general introduction to the study of modern criminology. The course is highly selective and every effort is made to hold the reading requirements within reasonable limits. It is suitable for General Course students, and a limited number may be admitted on application.

The main focus is on the classical and contemporary theories developed over the past two hundred years to explain and predict criminal behaviour in society. The propositions, assumptions, empirical validity, and policy implications of these criminological theories, as well as the social context in which they were developed, will be examined. Other significant issues in criminology – such as...
the measurement and extent of crime, the role of demographics (age, race, gender, social class) in the causation of and reaction to crime, and the changing boundaries of criminological research – will also be discussed.

Course content:
1. The history of criminological theory
2. Trends in crime and crime statistics. How official statistics can be interpreted and the role of crime surveys
3. ‘Classical’ criminology, rational choice, and crime prevention theories.
5. Sociological explanations of crime, including macro and micro approaches and recent critical theories
6. Criminal justice policy and ‘law and order’ politics.
7. Discrimination, inequalities, crime and criminal justice
8. Crime and the mass media

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Recommended Readings:
- Crime, Shame, and Reintegration by J. Braithwaite (1989);
- 6th Downes, P
- Criminology, 2nd ed. by T. Newburn (2012)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL275
Property II

This information is for the 2015/16 session.

Teacher responsible: Prof Neil Duxbury NAB 6.10

In 2016 Neil Duxbury will be on research leave in the LT and ST and so there will be a different course convener for those terms.

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an optional course for students on other programmes where regulations permit. This course is available to General Course students.

This course is compulsory on the BA in Anthropology and Law and is available on the LLB in Laws. It is available with permission as an optional course on students on other programmes where regulations permit. This course is available to General Course students.

This course is compulsory on the BA in Anthropology and Law and is available on the LLB in Laws. It is available with permission as an optional course on students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students must have completed Property I (LL105).

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term. The Land Law component of Property II is designed to introduce students to the fundamental principles of the law of real property (i.e., land). The course examines the general principles governing the ownership and occupation of land, including concepts of estates and interests, legal and equitable ownership (trusts of land, including co-ownership and modes of transfer) and title registration. It also considers the law governing specific interests in land (licences, proprietary estoppel, easements, covenants and mortgages).

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including the applications and classifications of resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 4 essays in the MT, LT and ST.

Assessment: Students will be expected to produce four essays (two in the MT, one in the LT and one for the first week of the ST).

Indicative reading: Advice on reading, including textbook recommendations, will be provided and the beginning of the first and second terms. An essay which students might valuably read before the commencement of the course is Peter Birks, ‘Before We Begin: Five Keys to Land Law’, in Land Law: Themes and Perspectives, ed. S. Bright & J. Dewar (OUP, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Students are required to answer questions on both the Land Law and Trusts components of Property II.

LL278
Public International Law

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lang

Additional Teachers: Dr Devika Hovell, Dr Stephen Humphreys and Dr Chris Thomas

Availability: This course is available on the BA in Anthropology and Law, BSc in Environmental Policy with Economics, BSc in International Relations, BSc in International Relations and History and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the concepts, principles, institutions and debates that define public international law today. We begin with an overview of the international legal system, considering how international law is made, how it relates to national legal systems, and what scope exists for pursuing those who violate it. In this connection we examine the work of the International Court of Justice, the International Criminal Court and the various ad hoc international criminal tribunals, along with judgments of national courts invoking international law. We then take up a range of topical issues of global concern, studying the ways in which they affect and are affected by public international law.

The issues to be discussed include: war, trade and investment, and the protection of human rights. We also investigate aspects of the history of international law, its role in relation to the establishment and retreat of European empires, and its contemporary significance and prospects. Overall, our aim is to lay the basis for an informed assessment of the contribution and limits of international law as a force in world affairs.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Assessment: Students are expected to participate actively in weekly classes in addition to writing assignments during the year. All formative coursework is set by class teachers.

Indicative reading: Reading lists will be provided for each topic on Moodle. You are asked to buy M. Evans (ed.), International Law (4th ed., 2014) and Blackstone's International Law Documents. Some other works to which you may wish to refer include: D. Harris, International Law: Cases and Materials; H. Charlesworth and C. Chinkin, The Boundaries of International Law; M. Shaw,
International Law; M. Koskenniemi, From Apology to Utopia; V. Lowe, International Law; and J. Crawford, Brownlie's Principles of Public International Law.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL284  Half Unit

Sentencing and Treatment of Offenders

This information is for the 2015/16 session.

Teacher responsible: Prof Jill Peay NAB6.11

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Scope

In recent years sentencing issues have been matters of considerable debate and conflict amongst the public and politicians alike. The syllabus is liable, therefore, to alter year by year, with a focus on recent issues and cases. The course examines both the climate in which sentencing occurs and the justifications for punishment, and looks at how courts practically carry out their sentencing function in the context of persistent statutory reform. The various custodial and non-custodial measures available are examined and their effectiveness assessed. Finally, responses to specific groups of offenders, such as mentally disordered offenders and offenders who kill, are explored together with an examination of the reality of treatment within confinement.

Content

The context of sentencing and the justifications for punishment Sentencing - theory, practice and possibilities for reform Custody - containment, treatment, mandatory life sentences Community based penalties - their scope and future Sentencing Rioters Mentally disordered offenders and offenders who kill - the penal response to problematic groups.

Teaching: 22 hours of seminars in the MT. 2 hours of seminars in the ST.

Week six is a ‘reading and project’ work week, in part in preparation for student presentations in week 7-10. Week 11 is a review and revision week.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the MT.

Indicative reading: A list will be supplied at the beginning of the term together with key questions to be addressed in class. The recommended text for the course is A. Ashworth (2015) Sentencing and Criminal Justice. (6th edition) Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL293

Taxation

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Blackwell

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 20 students.

Course content: Taxation is a topic that has throughout history pervaded political debate and is encountered in every area of life. Taxation was one of the very first subjects to be taught at LSE. The teaching of tax law as an academic subject started at LSE, where it was introduced by Professor GSA Wheatcroft in 1957. On the LSE Taxation course legal issues are of vital importance, but are placed in their economic and social context. This makes it easier to understand the purpose of the legislation, the reason for the problems encountered and why difficulties remain. So this taxation course suitable for a wide range of students – not just those interested in commercial law. The substantive law element of the course is UK based, but the issues that arise are ones that all jurisdictions have to face.

Students taking this course should be prepared to use a variety of sources ranging from statute and case law to literature on public policy. The precise balance of materials used varies from topic to topic. All the readings set will be accessible and non-mathematical. NO COMPUTATION is required and no knowledge of any discipline other than law is required. The course is open to second and third year law students, and experience suggests that it is equally suitable for both years.

By taking this course you should develop the following skills and attributes (i) working with and analysing legislation; (ii) working with and analysing case law; (iii) research skills; (iv) communication skills; (v) professionalism.

The syllabus is set out below, although there is some variation of topics selected from year to year, depending on the focus of current debate, and in the order of topics. The course starts with an examination of the objectives of a tax system. What is meant by a ‘good’ or ‘fair’ tax? The course examines how employees and the self-employed are taxed and the differences between them, the taxation of business profits, how this is influenced by accounting developments and the ways in which we can tax companies and capital. We also study tax avoidance – how is this distinguished from evasion and is there a distinction between unacceptable tax avoidance and legitimate tax planning? Other issues that are likely to be covered are taxation of corporate finance, the impact of EU membership on direct taxation, international taxation, and constitutional issues relating to the use of ‘discretion’ by the Inland Revenue.

Syllabus Topics

1. General principles of taxation, objectives of a tax system, types of taxation, capital and revenue. Structure and administration; powers of HM Revenue and Customs. Outline of the UK tax system. Taxation of the individual: rates, allowances and treatment of the family, national insurance contributions.
2. Employment income – taxation of salaries, wages and other remuneration of employees and officers.
4. Tax treatment of capital – capital gains tax; other taxes on capital and on income from capital – objectives and effectiveness.
5. International taxation – the tax base, tax residence and domicile, double-tax relief, tax treaties and the consequences of British membership of the EU for UK tax.
6. Corporations – legal forms for carrying on a business, reasons for taxing corporations, corporation tax, integration with taxation of individuals, distributions to shareholders, taxation of groups of related companies.
7 Statutory interpretation and tax avoidance – application and interpretation of tax legislation by the courts; tax evasion and tax avoidance and methods of controlling these activities.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT. 6 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

M. C. Blackwell ‘Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study’ [2013] British Tax Review 154

The principal book for the course is expected to be Lee, Revenue Law Principles and Practice (Bloomsbury Professional, 33rd ed, 2015).

Tiles, Revenue Law (Hart Publishing) will also be referred to. These texts are supplemented by the other readings that will be set. The cases and readings are readily available electronically or in the LSE library. Vouchers are available for students on the course to purchase of published copies of the tax legislation at a substantial
discount. N.B.: most tax law textbooks are revised extensively on an annual basis, so do not buy an old one!

**Assessment:** Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Selected 'Legislation' may be taken into the examination, with non-verbal markings only.

---

**LL295 Media Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Andrew Scott NA6.25

**Availability:** This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course examines the legal and administrative regulation of the press and broadcast media. It focuses on three areas: the regulation of content to protect private interests (such as those in privacy and reputation), the regulation of content in the public interest, and the control of news-gathering practices. The course centres on law and regulation in the UK, as influenced by European law. The course is introduced with an overview of two overarching areas: first, the media landscape and the main social, technological and regulatory influences shaping its development, and secondly, the protection of freedom of expression and freedom of the press in national and international law. It then proceeds to review potential restrictions on these values that are aimed at promoting or preserving specific private and/or public interests. The key private interests included are those in reputation, privacy, confidentiality, and intellectual property. The key public interests included are those in preservation of the integrity of the judicial process, the fairness of political debate, the protection from offensive content, and the protection of consumers. The third part of the course focuses on the regulation of journalists’ news-gathering practices, and covers such themes as harassment, surreptitious methods (the ‘Dark Arts’), cheque-book journalism, protection of sources, and access to state-held information.

**Teaching:** 9 hours of lectures and 14 hours of classes in the MT. 8 hours of lectures, 16 hours of classes and 20 minutes of help sessions in the LT. 20 minutes of help sessions in the ST.

The course is taught through a series of plenary lecture sessions, and group-based problem exercises in seminars that build progressively over the six weeks dedicated to each of the three parts of the course. In addition, a set of policy-focused questions is set out for consideration in seminars. This contact time will be supported by a series of pre-delivered lectures covering each course theme. Students will also receive supervision in respect of a short research paper.

**Formative coursework:** Students will be expected to produce 15 problem sets in the MT and LT. Each week seminar group-work will focus on 2 sets of problem exercises, and 1 set of policy-focused themes. The problem exercises are designed to allow students to build the knowledge necessary to complete the summative problem-based assessment. The policy-focused sessions are intended to introduce students to themes that may be picked up as topics for the summative coursework.

**Assessment:** Coursework (50%), 2000 words) in the MT and LT. Essay (50%, 4000 words) in the ST.

The assessment for the course comprises two elements: x3 group-based coursework problems and x1 individual coursework essay. During the year, students must complete three problem exercises in groups, following extensive preparatory group-based problem exercises in seminars. These group-based problem exercises are released at the beginning of each part of the course, and the answers developed progressively over the subsequent six weeks. Submission of the group-based answers will take place in week 7 MT, week 3 LT and week 10 LT respectively. The best two grades achieved in these three exercises will comprise 50% of the overall grade for each student for the course.

Each student must also complete one 4,000 word research paper on a theme to be agreed with class teachers. The grade achieved for this paper will comprise the remaining 50% of the overall grade for the course. This work is supported through the policy-focused element of each seminar and through short supervision meetings in LT and ST as required.

---

**LL298 Half Unit**

**Half-Unit Dissertation on an approved legal topic**

This information is for the 2015/16 session.

**Availability:** This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

**Course content:** Where either a second or third year LLB student is taking the equivalent of three-and-a-half subjects she/he may make up the final half-subject by writing a 6-8,000 word half-unit dissertation on a legal topic approved by the Law Department.

Students wishing to do a half-unit dissertation should first consult their academic adviser in the preceding summer term to discuss:

- whether a dissertation is a suitable option for the student
- the particular dissertation topic
- who might be an appropriate dissertation supervisor

In light of their discussion with their academic adviser, a student wishing to pursue this option should approach a possible supervisor for their approval. The supervisor of the dissertation must be a permanent or ex-permanent member of staff.

It is not be possible to submit a full-unit dissertation, LL299 and half-unit dissertation, LL298 in the same year. Because this option requires considerable independent study, it is generally not advisable to opt to write a dissertation unless the student has been achieving marks of an upper second class standard in their examinations to date. The dissertation subject must be of a suitable academic character which has not already or will not have been explored in depth in any taught subject taken by the student but is related to subjects taught in the School. It is necessary for a student to have the approval of both a member of staff who is willing to supervise the dissertation and the Chair of the LLB Part I and II Exam Board for the proposed dissertation by 31 October of the year in question. Once they have their supervisor’s approval, students will need to make a formal detailed application to the Chair of Exams for approval; a form for this will be circulated for their approval. The supervisor of the dissertation must be a permanent or ex-permanent member of staff.

To be available to provide some guidance but it is intended that the student should do his/her own research. The dissertation should be submitted not later than the first day of the ST.

**Teaching:** 1 hour of lectures in the MT.

Beyond the one-to-one sessions held with the dissertation supervisor there is no formal teaching. However, there is a one hour session held in the Michaelmas term for all half-unit and full-unit dissertation students to orient them to the requirements of writing a dissertation.

**Indicative reading:** There is no essential reading as such, but there
is a dedicated moodle site for the LLB dissertation options.

**Assessment:** Dissertation (100%, 8000 words) in the ST.

---

**LL299**

**Full- unit Dissertation on an approved legal topic**

This information is for the 2015/16 session.

**Availability:** This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

**Course content:** A second or third year LLB student may write a full-unit dissertation on a legal topic approved by the Law Department. Students wishing to do a full-unit dissertation should first consult their academic adviser in the preceding summer term to discuss:

- whether a dissertation is a suitable option for the student
- the particular dissertation topic
- who might be an appropriate dissertation supervisor

In light of their discussion with their academic adviser, a student wishing to pursue this option should approach a possible supervisor for their approval. The supervisor of the essay must be a permanent or ex-permanent member of staff.

It is not possible to submit a full-unit dissertation, LL299 and half-unit dissertation, LL298 in the same year.

Because this option requires considerable independent study, it is generally not advisable to opt to write a dissertation unless the student has been achieving marks of an upper second class standard in their examinations to date. The dissertation subject must be of a suitable academic character which has not already or will not have been explored in depth in any taught subject taken by the student but is related to subjects taught in the School. It is necessary for a student to have the approval of both a member of staff who is willing to supervise the dissertation and the Chair of the LLB Part I and II Exam Board for the proposed dissertation, by 31 October of the year in question. Once they have their supervisor's approval, students will need to make a formal detailed application to the Chair of Exams for approval, a form for this will be circulated to those writing a dissertation early in the MT.

The dissertation should be word-processed and be accompanied by a bibliography. Footnotes can be placed at the end of the text or at the bottom of the page to which they relate (the latter is preferable). The essay should be 12,000-15,000 words in length (including footnotes and excluding bibliography). The dissertation should be submitted not later than the first day of the ST.

It may be possible to use the dissertation option to do some work in a subject which is not being offered as a taught course in the year in question. Alternatively, students may be able to use it to do some more detailed work on a topic of particular interest to them, providing that this does not overlap with any course that they are taking to an unacceptable extent. It should be stressed that no member of staff is under an obligation to agree to supervise any proposed dissertation. However where a member of staff agrees to act as supervisor, students can expect to see their supervisor to discuss their work on a regular basis in each of the first two terms, with at least three meetings in each term.

**Teaching:** 1 hour of lectures in the MT.

Beyond the one-to-one supervision sessions held with the student's dissertation supervisor there is no formal teaching as such. However, a one hour session will be held in the Michaelmas term for all full-unit and half-unit dissertation students to orient them to the dissertation requirements.

**Indicative reading:** There is no essential reading as such. There is a moodle site dedicated to the LLB half and full-unit dissertations.

**Assessment:** Dissertation (100%, 15000 words) in the ST.

---

**LL300**

**Competition Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Pablo Ibanez Colomo NABS.16

**Availability:** This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

**Course content:** It is widely accepted that competition is the best means to deliver better products at lower prices for consumers. The point of competition rules is to preserve the process of rivalry between firms. This is an area of the law applies to a broad range of corporate strategies. In some cases, competition authorities take action against powerful firms (think of multinationals such as Microsoft, Google, or Intel) that have the ability to influence market conditions and to exclude smaller rivals. In other instances, action is taken to block mergers and acquisitions damaging the competitive process (e.g. a merger creating a monopoly). Finally, authorities intervene frequently against attempts by firms to avoid competing by means of secret price-fixing arrangements (the so-called ‘cartels’).

Competition law has progressively become a major feature of legal systems around the world. It is a discipline with a long tradition in the US and Europe (under the lead of the European Commission). Competition law regimes have now been adopted (and/or actively enforced), inter alia, in jurisdictions like Brazil, China, Hong Kong, India, Malaysia or Singapore. Interestingly, this is a truly cosmopolitan field, in the sense that the relevant provisions are virtually identical in their form and substance around the world and are enforced in very much the same way.

Following an introduction in which competition law is put in its economic and institutional context, this module will address the main substantive and procedural aspects of the discipline.

Topics covered include the following:

- Anticompetitive agreements between firms (including ‘cartels’ and distribution agreements).
- Abusive practices by dominant firms.
- Mergers and acquisitions, including both mergers between competitors and vertical and conglomerate arrangements.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

**Formative coursework:** Students will be expected to produce 2 essays in the MT and LT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**LL301**

**Not available in 2015/16**

**Global Commodities Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stephen Humphreys S.12

The course is convened by Dr Stephen Humphreys.

**Availability:** This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course provides a critical introduction to the legal regulation of global commodities, with a focus on the colonial histories of Asia, Africa and the Americas. Taking some of the world’s most heavily exchanged primary commodities as examples, we will track the development of their production and consumption, from their domestic origins to their circulation in the global sphere today. The histories of the principal commodities – such as coffee, cocoa, rubber, oil – tell the story of today’s global economy in microcosm. Most significantly, their evolving regulation has
provided the base for many central elements of the contemporary international and transnational legal architecture. In exploring this history, we will also touch on cross-cutting issues relating to some or all of the following: human rights, trade law, environmental law, food security, investment arbitration, anti-slavery, labour law and animal welfare law. We will also be looking at theories of consumption and production more generally, to enrich our discussions of these topics.

Michaelsmas term begins with an overview of the global commodity trade and an introduction to terms as well as key legislative instruments, and a look through some basic theoretical and historical texts. This is followed by a series of classes, running through Lent term, situating the regulation of the global economy through the histories of specific commodities, cognizant of the state-formation processes and trans-global networking often entailed in the consolidation of key commodity markets.

A caveat: The course is predominantly historical and theoretical in nature. It deals in the main with events from the colonial period (c.1515-1960) as they relate to the history of international and transnational law. It does not aim to prepare students for life as a commodity trader and does not cover contemporary financial, trade, or company law. While this class is complementary to LL278 (Public International Law), it is not necessary to have studied LL278 to take this class.

Following completion of the course, students can expect to have a broad understanding of the evolution of global commodity trading, with specific knowledge of how those commodities have contributed to and shaped the most important international law challenges of our time. Through individual presentations and research projects students are expected to develop critical perspectives on aspects of the topics covered throughout the year. At the end of the course, students should be able to demonstrate:

- A broad understanding of the historical rise in trade of global commodities, and of the evolution of the early legal regimes, both international and transnational, for their regulation, especially during colonial times.
- An awareness of intersecting legal issues relating to, for example: human rights, trade disputes, law of the sea, laws of war, environmental law, labour, animal welfare and illegal trade.
- An understanding of the impact that historical patterns of production and consumption of commodities around the world have had on contemporary international law structures.
- An appreciation of the critical theory that informs existing scholarly analysis of the trade in global commodities.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT. Students will be expected to submit one 2,000-word essay in MT.

Indicative reading:
- Cheryl Shonhardt-Bail, From the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective (2006)
- Dennis O. Flynn, and Giráldez, Arturo (eds), Metals and Monies in an Emerging Global Economy (1997)
- Martin Lynn, Commerce and Economic Change in East Africa: The Palm Oil Trade in the Nineteenth Century (2002)
- Denys Forrest, Tea for the British: The Social and Economic History of a Famous Trade (1973)

Assessment: Essay (85%, 8000 words) in the LT and ST.
speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

**Teaching:** 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

**Formative coursework:** Students will be required to complete weekly language exercises.

**Assessment:** Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

---

**LN101**

**Russian Language and Society 1 (beginner)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Olga Sobolev TW3 6.01A

**Availability:** Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

**Pre-requisites:** No previous knowledge of Russian is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

**Course content:** Beginners to intermediate study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

**Teaching:** 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral classes; (c) grammar classes; (d) tutorials; and (e) guided study using Language Showroom, IT and web-based materials. Students should note that the timetable will be held extremely flexible to accommodate students from all departments. Please contact the teacher responsible if you would like to follow this language course. Structured activities during the reading week

**Formative coursework:** Students will be required to complete weekly language exercises.

**Assessment:** Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

---

**LN102**

**Russian Language and Society 2 (intermediate)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Olga Sobolev TW3 6.01A

**Availability:** Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

**Pre-requisites:** Completion of the Russian Language and Society 1 (Beginner) course (LN101); or a good pass at GCSE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

**Course content:** A bridge from intermediate to advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

**Teaching:** 50 hours of classes in the MT. 50 hours of classes in the LT. 5 hours of classes in the ST.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

**Formative coursework:** Students will be required to complete weekly language exercises.

**Assessment:** Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

---

**LN104**

**Mandarin Language and Society Level 1 (Beginner)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Hua Xiang tower 3, 601B

**Availability:** Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

**Pre-requisites:** No previous knowledge of Mandarin is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

**Course content:** Beginners to intermediate study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness. In this level, the students are required to read and write up to 750 Chinese characters.

**Teaching:** 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.
LN110
German Language and Society 3 (advanced)
This information is for the 2015/16 session.
Teacher responsible: Dr Peter Skrandies TW3.6.01f
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: An A-level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: Advanced study of the German language within the framework of the social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials.
The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.
Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.
Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the ST.
Continuous assessment (20%) in the MT and LT.

LN120
Spanish Language and Society 3 (advanced)
This information is for the 2015/16 session.
Teacher responsible: Ms Mercedes Coca TW3 6.01 L
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Completion of the Spanish Language and Society 2 (Intermediate) course (LN122); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: Advanced of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.
Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.
Week 11 of MT and LT will provide structured learning activities related to the course.
Six hours per week, which will feature: (a) interactive topical work;
LN122

Spanish Language and Society 2 (intermediate)

This information is for the 2015/16 session.

Teacher responsible: Ms Lourdes Hernandez Martin TW3.6.01.L

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites:
- A good pass at GCSE+ / AS Level or its equivalent is required.
- For undergraduates who have either successfully completed the beginner course (LN121) or can show other evidence of the necessary degree of proficiency.
- Please contact the teacher responsible before registering for this course.
- If you are thinking of taking this course in your 2nd or 3rd year, it is advisable to contact the teacher responsible before the summer vacation.

Course content:
- Intermediate to advanced study of the Spanish language through themes related to Spanish-speaking societies within the framework of social sciences and culture.
- In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials.
- The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural critical awareness.

Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 4 hours of classes in the ST. Weeks 11 of MT and LT will provide structured learning activities related to the course.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Formative coursework:
- Students will be required to complete weekly tasks.

Indicative reading:
- Students will be advised on relevant materials at the beginning of the course.

Assessment:
- Exam (60%, duration: 3 hours) in the main exam period.
- Oral examination (20%) in the ST.
- Continuous assessment (20%) in the MT and LT.

LN131

French Language and Society 1 (beginner)

This information is for the 2015/16 session.

Teacher responsible: Miss Florence Niclot TW3 6.01D

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites:
- No previous knowledge of french is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature:
- Interactive seminars
- Oral Classes
- Workshops
- Tutorials; and
- guided study using IT and Web-based materials including a virtual learning environment supported by Moodle.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading: Students will be given the titles of the books when fully registered.

Assessment:
- Exam (60%, duration: 3 hours) in the main exam period.
- Oral examination (20%) in the LT.
- Continuous assessment (20%) in the MT and LT.

LN130

French Language and Society 3 (advanced)

This information is for the 2015/16 session.

Teacher responsible: Miss Florence Niclot TW3 6.01K and Mr Francois Simon TW3 6.01K

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed French Language and Society 2 (intermediate) (LN132).

Completion of the French Language and Society 2 (intermediate) course (LN132); or a good pass at A Level or its equivalent is required. An interview with the course Co-ordinator prior to registration is compulsory.

Course content: Advanced study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 4 hours of classes in the ST.

Six hours per week, which will feature:
- interactive topical work
- oral practice
- grammar and vocabulary work
- tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading: Students will be given the titles of the books when fully registered.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.
LN132
French Language and Society 2 (intermediate)
This information is for the 2015/16 session.
Teacher responsible: Mr Francois Simon TW3 6.01 K
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Students must have completed French Language and Society 1 (beginner) (LN131).
A good pass at GCSE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: A bridge from intermediate to advanced study of the French language within the framework of social sciences and culture, that underpin French contemporary Society. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.
Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 5 hours of classes in the ST.
Five hours per week, which will feature:
• interactive topic work
• oral clausegrammars
• seminars
• tutorials
• guided study using IT and web-based materials including a virtual learning environment supported by Moodle.
Formative coursework: The students will be required to complete weekly language exercises.
Indicative reading: Students will be given the titles of the books when fully registered.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the LT.
Continuous assessment (20%) in the MT and LT.

LN140
Mandarin Language and Society 3 (Advanced)
This information is for the 2015/16 session.
Teacher responsible: Dr Hua Xiang Tower 3, 601B
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Students must have completed Mandarin Language and Society 2 (Intermediate) (LN142).
A good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: Advanced study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 2500 Chinese characters.
Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.
Four hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.
Structured activities in week 11 of MT and LT.
Formative coursework: The students will be required to complete weekly exercises. This includes grammar activities, writing essays, in class presentation and online communicative materials.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the ST.
Continuous assessment (20%) in the MT and LT.

Mandarin Language and Society 2 (Intermediate)
This information is for the 2015/16 session.
Teacher responsible: Dr Hua Xiang Tower 3, 601B
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Students must have completed Mandarin Language and Society Level 1 (Beginner) (LN104).
This is an intermediate course, and in order to register, completion of Language and Society 1 or GCSE equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: A bridge from intermediate to advanced study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 1500 Chinese characters.
Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 5 hours of classes in the ST.
Five hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.
Structured activities in week 11 of MT and LT.
Formative coursework: The students will be required to complete weekly exercises. This includes grammar activities, writing Chinese characters and online communicative materials.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the ST.
Continuous assessment (20%) in the MT and LT.
LN200

Russian Language and Society 4 (proficiency)

This information is for the 2015/16 session.

Teacher responsible: Dr Olga Sobolev TW3 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Russian Language and Society 3 (Advanced) course (LN110) or an equivalent command of Russian is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to proficiency) study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

Teaching: 30 hours of classes in the MT. 30 hours of classes in the LT. 3 hours of classes in the ST.

Three hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during reading week

Formative coursework: Students will be required to complete weekly language exercises.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LN220

Spanish Language and Society 4 (proficiency)

This information is for the 2015/16 session.

Teacher responsible: Ms Mercedes Coca TW3 6.01 I

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Spanish Language and Society 3 (Advanced) course (LN120) or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to proficiency) study of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness.

Teaching: 10 hours of lectures and 20 hours of classes in the MT. 10 hours of lectures and 20 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST. Week 11 in MT and LT structured activities.

Three hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises

Indicative reading:
- F Matte Bon, Gramatica comunicativa del español, Tomo 1 y Tomo 2, Edelsa, 1998
- P Preston, Las Tres Españas del 36, 1997;
- P Preston, El Holocauasto Español, Debate 2011;
- G García Marquez, Fantasía y creación artística en América Latina y el Caribe 1981;
- N Chomsly, América Latina. de la Colonización a la Globalización, Cátedra, 2003;

The students will be required to complete any relevant materials at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LN210

German Language and Society 4 (proficiency)

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Skrandies

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations. This course is capped at 16 students.

Pre-requisites: Completion of the German Language and Society 3 (advanced) (LN110) or equivalent knowledge and skills are required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to proficiency) study of the German language within the framework of the social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, and the use of authentic multi-media materials. The focus is on accuracy and communication that advance students’ language competence, transferable skills and cultural awareness.

Teaching: 30 hours of classes in the MT. 30 hours of classes in the LT. 1 hour of classes in the ST.

Three hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities will take place in week 11 of the Michaelmas Term and the Lent Term.

Formative coursework: Weekly language exercises

Indicative reading:
- Durrell/Hammer’s German Grammar and Usage 5th Routledge

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.
LN230
French Language and Society 4 (proficiency)
This information is for the 2015/16 session.
Teacher responsible: Mr Francois Simon TW3 6.01K
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Students must have completed French Language and Society 3 (advanced) (LN130).
An interview with FRANCOIS SIMON OR FLORENCE NICLOT prior to registration is compulsory.
Course content:
• Further advanced (up to proficiency) study of French language within the framework of social sciences and culture.
• Dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials.
• The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.
Teaching: 30 hours of classes in the MT. 30 hours of classes in the LT. 3 hours of classes per week, which will feature: (a) Lectures; (b) Oral Classes; (c) Workshops; (d) Tutorials; and (e) Guided study using Language Showroom, IT and web-based material including a virtual learning environment supported by Moodle.
Indicative reading: Students are encouraged to make full use of the resources of French books in the Library as well as reference books. Students are also strongly advised to use the French language resources available on the World Wide Web.
Assessment: Exam (60%), duration: 3 hours) in the main exam period.
Oral examination (20%) in the LT.
Continuous assessment (20%) in the MT and LT.

LN240
Mandarin Language and Society 4 (Proficiency)
This information is for the 2015/16 session.
Teacher responsible: Dr Hua Xiang Tower 3, 601B
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Students must have completed Mandarin Language and Society 3 (Advanced) (LN140).
An interview with the course co-ordinator prior to registration is compulsory.
Course content: Further advanced (up to proficiency) study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 3500 Chinese characters.
Teaching: 30 hours of classes in the MT. 30 hours of classes in the LT. 3 hours of classes per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities in week 11 of MT and LT.
Formative coursework: The students will be required to complete weekly exercises. This includes newspaper reading, research projects and online communicative materials.
Authentic materials from newspaper, web and journals.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the ST.
Continuous assessment (20%) in the MT and LT.

LN250
English Literature and Society
This information is for the 2015/16 session.
Teacher responsible: Dr Angus Wrenn TW3 6.01A
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations. This course is capped at 32 students.
Pre-requisites: An A-level pass or equivalent is recommended but not required (especially for General Course students).
Course content: (a) Study of 20th century British literature (prose, poetry and drama) in its socio-political context; Study of individual authors (in weekly lectures) - these form the basis of the examination assessment (b) Study of major cultural themes running through the century e.g. Literature of War; Imperialism; Feminism; Modernism; Postmodernism; Political writing - these form the basis of the student's extended coursework essay. (c) Several trips to theatre productions during the year; (d) Extensive use of archive recordings of authors, and video; (e) Students encouraged to draw upon background in their main discipline, and to read widely.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.
Two hours per week, featuring: (a) Lectures on a range of authors and themes; (b) Classes including students' presentations; (c) Revision Workshops; (d) Tutorials. Structured activities during the reading week
Formative coursework: Two essays per year; presentations.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%) in the LT.

LN251
Comparative Literature and 20th Century Political History
This information is for the 2015/16 session.
Teacher responsible: Dr Olga Sobolev TW3 6.01A and Dr Angus Wrenn TW3 6.01A
Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.
Pre-requisites: Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course Students).
Course content: Comparative literature of the twentieth century leading up to and including the Cold War. (a) Study of major
authors (prose, poetry and drama, in English translation where relevant) on both sides of the Iron Curtain with a focus on the recurrent cultural themes: Fabianism; Utopia/Dystopia; Socialist Realism/Art with a Social Function; Cold War (b) Use of video-recording related to the texts (c) Several related trips to galleries and theatre productions during the year; (d) Students encouraged to draw upon background in their main discipline, and to read widely.  
**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.  
Two hours per week, featuring (a) Lectures on a range of authors and themes; (b) classes including students’ presentations; (c) revision workshops; (d) tutorials. Structured activities during the reading week.  
**Formative coursework:** Two essays per year, presentations.  
**Indicative reading:** H. G. Wells *The Time Machine*; A. Huxley *Brave New World*, G. B. Shaw *Back to Methusalem*; E. Zamiatyn *We*; G. Orwell *Animal Farm & 1984*; M. Bulgakov *The Heart of a Dog*; W. H. Auden poems; V. Mayakovsky poems; A. Solzhenitsyn *A Day in the Life of Ivan Denisovich*; A. Makine *A Life’s Music*; M. Kundera *The Unbearable Lightness of Being*; Ian Fleming *From Russia with Love*; T. Stoppard *Professional Fool*; B. Chiatun Utz.  
**Assessment:** Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the LT.

**LN252**  
**Global Literature and Society**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Angus Wrenn TW3 6.01A and Dr Olga Sobolev TW3 6.01A  
**Availability:** Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.  
**Pre-requisites:** Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course students).  
**Course content:** (a) Literary treatment of the major philosophical trends of the twentieth century, including the aesthetics of Bergson and Nietzsche, the analytical school of Russell; political philosophy of Isaiah Berlin, the existentialism of Heidegger and Sartre, the paradox of the absurd of Camus, French and East European Phenomenology; Wittgenstein and philosophy of language (b) Related trips to galleries and theatre productions during the year; (c) Use of archive recordings of authors, and video; (d) Students encouraged to draw upon background in their main discipline, and to read widely.  
**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.  
Structured activities during the reading week.  
**Formative coursework:** Two essays per year, presentations.  
**Indicative reading:** Dostoevsky *Crime and Punishment & Notes from the Underground*; Kafka *Metamorphosis & The Trial*; Nabokov *Despair & Lolita*; Celan *Todesfuge* and other poems; St-Exupery *The Little Prince*; Solzhenitsyn *One Day in the Life of Ivan Denisovich*; Camus *L’Etranger* & *The Myth of Sisyphus*; Kundera *The Unbearable Lightness of Being*; Frayn *Copenhagen*; Stoppard *Dogg’s Hamlet Cahoot’s Macbeth*.  
**Assessment:** Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the LT.

**LN270**  
**Society and Language: Linguistics for Social Scientists**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Peter Skrandies TW3 6.01F  
**Availability:** Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.  
**Course content:** The course will introduce students to key (socio)linguistic concepts (semantic and pragmatic meaning, discourse, register, genre, dialect, idiolect, sociolect) employed in the analysis of language use as a social process. Students will explore the reciprocal relationship between language and specific social contexts and structures (class, gender, ethnicity), and study the role that language plays in the creation, maintenance and change of social relations and institutions. Important themes are changing attitudes to language and the prestige afforded to particular languages and language varieties. The use of language for academic purposes will be analysed, as will be situations of language contact, multilingualism and the role of translation in intercultural and international communication. The implications and consequences for less widely used languages of the emergence of English (and other widely spoken languages) as global lingua francas will be
LN320
Spanish Language and Society 5 (mastery)

This information is for the 2015/16 session.

Teacher responsible: Mr Rafael Penas Cruz TW3 6.01 L

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Spanish Language and Society 4 (Proficiency) course (LN220) or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery) study of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST. Week 11 in MT and LT structured activities.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading: The following works are core texts:
- Gabriel Garcia Marquez, Cien Años de Soledad;
- Carmen Laforet, Nada;
- Tomas Eloy Martinez, Santa Evita;
- Luis CERNUDA, “La realidad y el deseo”, Fondo Cultural Económica, Madrid, 1982;
- Poesía; Jaime Gil DE BIEDMA,: Antología poética (2001); Alianza Editorial, SA; Fuguet, Alberto; Sergio Gomez (Eds),
- Presentación del país McOndo, En McOndo, Barcelona: Griñalbo,
- Amores Perros (2000) Filmax DVD;
- Presentación del país McOndo, En McOndo, Barcelona: Griñalbo,
Pre-requisites: Students must have completed Mandarin Language and Society 4 (Proficiency) (LN240).
This is a Mastery course, and in order to register, completion of Language and Society 4 or equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.
Course content: Further advanced (up to the level of mastery) study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 5000 Chinese characters.
Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.
Two hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.
Structured activities in week 11 of MT and LT.
Formative coursework: The students will be required to complete weekly exercises. This includes newspaper reading, research projects and online communicative materials.
Indicative reading: Students are encouraged to make full use of the resources of language gateway at LSE and online magazine subscription. There will be guided authentic materials from newspaper, web and journals.
Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Oral examination (20%) in the ST.
Continuous assessment (20%) in the MT and LT.

LSE100
The LSE Course: Understanding the causes of things
This information is for the 2015/16 session.
Teacher responsible: Prof George Gaskell KSW4.08
The LSE100 lectures are given by lecturers from a range of departments.
Availability: Compulsory course on all undergraduate programmes: students complete term one in Lent Term of their first year and term two in Michaelmas Term of their second year. The course is not available to General Course students or to second-year direct-entry students.
Course content: The course introduces students to the fundamental elements of thinking like a social scientist. Running through all of the social sciences are questions of evidence, explanation and theory. As no complex issue can be fully understood through the lens of a single discipline, LSE100 uses current issues of public concern and social sciences as questions of evidence, explanation and theory. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students’ language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 5000 Chinese characters.
Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 20 hours of lectures and 10 hours of classes in the LT.
Formative coursework: Formatative activities will be completed in class and may include writing assignments or data analysis tasks.
Indicative reading: Readings are module-specific. Class reading packs are provided in hard copy and are all available from the LSE100 Moodle site, along with additional reading and resource recommendations.
Assessment: In both terms, a short essay will be due in Week 5 and a group project will be due in Week 10. Students will also complete brief portfolio exercises each week, to be reviewed in class and assessed at the end of each term. These exercises are designed to support students’ understanding of key theories and critical analysis of arguments or evidence. The essays and group projects are each worth 20% of the student’s final mark and the portfolio exercises are worth 10% per term. Students receive an overall mark for the course of Distinction, Merit, Credit or Fail.

MA100
Mathematical Methods
This information is for the 2015/16 session.
Teacher responsible: Dr Ioannis Kouletsis
Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: This course assumes knowledge of the elementary techniques of mathematics including calculus, as evidenced for example by a good grade in A Level Mathematics.
Course content: This is an introductory level course for those who wish to use mathematics seriously in social science, or in any other context. A range of basic mathematical concepts and methods in calculus of one and several variables and in linear algebra are covered and some applications illustrated. It is an essential pre-requisite for any mathematically oriented economics options and for many further mathematics courses. Topics covered: Matrices, reduced row echelon form, rank. Systems of linear equations, Gaussian elimination. Determinants. Vector spaces, linear independence, basis, dimension. Linear transformations, similarity. Eigenvalues. Diagonalization. Orthogonal diagonalization. Complex numbers. Vectors. Functions of several variables, derivatives, gradients, tangent hyperplanes. Optimisation including Lagrange’s method. Vector-valued functions, derivatives and their manipulation. Inverse functions, local inverses and critical points, use in transformations. Integration, differential and difference equations. Some applications of the above topics.
Teaching: 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 11 hours of classes and 10 hours of workshops in the LT.
Formative coursework: Students will be expected to complete exercises assigned weekly in the lectures. Written answers to specified exercises are submitted to the appropriate class teacher for evaluation. Success in this paper depends on dealing with this written work as it is assigned, in a regular and systematic manner.
Indicative reading: Ken Binmore & Joan Davies, Calculus, Concepts and Methods; Martin Anthony & Michele Harvey, Linear Algebra, Concepts and Methods.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Exam (25%, duration: 1 hour) in the LT week 0.
MA103 Introduction to Abstract Mathematics

This information is for the 2015/16 session.
Teacher responsible: Prof Graham Brightwell
Prof Jan van den Heuvel
Availability: This course is compulsory on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Students should have taken, or be taking concurrently, the course Mathematical Methods (MA100).
Course content: The course is an introduction to the use of formal definitions and proofs in mathematics, and to basic results of elementary set theory, number theory, linear algebra, algebra and analysis. Specific topics covered are as follows: Logic, integers, sets and functions, prime numbers, relations, real and complex numbers, greatest common divisor and modular arithmetic, infimum and supremum, sequences, limits, continuity, groups and vector spaces.
Teaching: 20 hours of lectures, 10 hours of classes and 9 hours of workshops in the MT, 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 1 hour of lectures in the ST.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Indicative reading: Students are expected to have one of the recommended textbooks: N L Biggs, Discrete Mathematics (2nd edn) or P J Eccles, An Introduction to Mathematical Reasoning. Further background reading can be found in R Allenby, Numbers and Proofs; M Liebeck, A Concise Introduction to Pure Mathematics; V Bryant, Yet Another Introduction to Analysis; R Bartle & D Sherbert, Introduction to Real Analysis and H Anton, Elementary Linear Algebra.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA107 Half Unit
Quantitative Methods (Mathematics)

This information is for the 2015/16 session.
Teacher responsible: Dr James Ward
Availability: This course is compulsory on the BSc in Management, BSc in Management Sciences and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.
Pre-requisites: A-level Mathematics (or equivalent). Students with A-level Mathematics (or equivalent) should take MA107 Quantitative Methods (Mathematics) or MA100 Mathematical Methods.
Course content: The course is an introduction to the use of the elementary mathematical tools that are needed to study Economics. Students will be introduced to basic mathematical concepts and manipulations. Examples of applying these techniques to a variety of economical and management problems are given throughout the course. Content - Part A: Arithmetic operations, powers and roots; basic algebra; introduction to linear programming; logarithms and exponential growth; sets, functions and graphs; differentiation of functions of one variable; marginal cost and marginal revenue; maximisation of functions of one variable; difference equations; equilibrium and stability in dynamical models. Content - Part B: Introduction to integration; consumer and producer surplus; matrix algebra; systems of linear equations; functions of several variables; partial differentiation; maximisation and the Lagrange multiplier method.
Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Indicative reading: The course will be mostly taught from the lecturers’ notes. The following books can provide additional material: T Bradley & P Patton, Essential Mathematics for Economics and Business; E T Dowling, Mathematics for Economists (Schaum’s Outline Series); I Jacques, Mathematics for Economics and Business; M Rosser, Basic Mathematics for Economists; M Anthony & N L Biggs, Mathematics for Economics and Finance: Methods and Modelling, CUP, 1996.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA110 Basic Quantitative Methods

This information is for the 2015/16 session.
Teacher responsible: Dr James Ward and Dr Pavel Gapeev
Availability: This course is available on the BSc in Accounting and Finance and BSc in Government and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: GCSE or AS-level Mathematics (or equivalent). Students with A-level Mathematics (or equivalent) should take MA107 Quantitative Methods (Mathematics) or MA100 Mathematical Methods.
Course content: The course is designed to provide students with the elementary mathematical tools that are needed to study Economics. Students will be introduced to basic mathematical concepts and manipulations. Examples of applying these techniques to a variety of economical and management problems are given throughout the course. Content - Part A: Arithmetic operations, powers and roots; basic algebra; introduction to linear programming; logarithms and exponential growth; sets, functions and graphs; differentiation of functions of one variable; marginal cost and marginal revenue; maximisation of functions of one variable; difference equations; equilibrium and stability in dynamical models. Content - Part B: Introduction to integration; consumer and producer surplus; matrix algebra; systems of linear equations; functions of several variables; partial differentiation; maximisation and the Lagrange multiplier method.
Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Indicative reading: The course will be mostly taught from the lecturers’ notes. The following books can provide additional material: T Bradley & P Patton, Essential Mathematics for Economics and Business; E T Dowling, Mathematics for Economists (Schaum’s Outline Series); I Jacques, Mathematics for Economics and Business; M Rosser, Basic Mathematics for Economists; M Anthony & N L Biggs, Mathematics for Economics and Finance: Methods and Modelling, CUP, 1996.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
MA203  Half Unit
Real Analysis
This information is for the 2015/16 session.
Teacher responsible: Dr Elieni Katirtzoglou
Availability: This course is compulsory on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Introduction to Abstract Mathematics (MA103), or some equivalent giving experience with formal proofs, convergence of sequences and continuity of functions.
Course content: This is a course in real analysis for those who have already met the basic concepts of sequences and continuity on the real line. Here we generalize these concepts to Euclidean spaces and to more general normed spaces and metric spaces. These more general spaces are introduced at the start and are emphasized throughout the course.
Topics covered are:
- Metric and normed spaces, open and closed sets, topological properties of sets and equivalent metrics.
- Sequences in metric spaces, compactness, completeness, pointwise and uniform convergence of sequences of functions.
- Infinite series on the real line and in normed spaces.
- Continuity of real valued functions and of functions between metric spaces, uniform continuity and Lipschitz condition.
- Differentiation of real valued functions, the mean value theorem, differentiation of functions between Euclidean spaces (Fréchet derivative) and partial derivatives.
- Riemann integral and the fundamental theorem of calculus.
Teaching: 22 hours of lectures and 10 hours of classes in the MT.
Formative coursework: Written answers to set problems will be provided. The following may prove useful:
- Robert G Bartle & Donald R Sherbert, Introduction to Real Analysis
- W A Sutherland, Introduction to Metric and Topological Spaces
- Tom Apostol, Mathematical Analysis, second edition.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA207  Half Unit
Further Quantitative Methods (Mathematics)
This information is for the 2015/16 session.
Teacher responsible: Dr James Ward
Availability: This course is available on the BSc in Accounting and Finance, BSc in Management and BSc in Management Sciences. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Students should have previously taken MA107 Quantitative Methods (Mathematics). It is not available to students who have taken MA100 Mathematical Methods, or equivalent, nor higher level methods courses.
Course content: This is a second course in quantitative methods, following on directly from Quantitative Methods (Mathematics) (MA107). This course will contain further algebra and calculus. As with the course MA107, the emphasis will be on applications in economics and finance. Topics covered: Matrix methods in portfolio analysis. Linear independence. Rank of a matrix. Eigenvalues and eigenvectors. Diagonalisation. Linear systems of recurrence equations. Markov process. Second-order recurrence equations. Macroeconomic models. Vector geometry. Gradient and directional derivative. Tangent hyperplanes and the optimal bundle. Resource allocation and Pareto efficiency. Orthogonal matrices and quadratic forms. Critical points of quadratic functions. Taylor’s approximation. Optimisation of functions of two or more variables.
Teaching: 20 hours of lectures and 10 hours of classes in the LT.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA208  Half Unit
Optimisation Theory
This information is for the 2015/16 session.
Teacher responsible: Prof Bernhard von Stengel COL 4.12
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) is desirable, and students who have not done MA203 should contact the teacher responsible.
Course content: The course describes various techniques of optimisation, gives a mathematical presentation of the relevant theory, and shows how they can be applied. Introduction and review of relevant mathematical background: Introduction to combinatorial optimisation; shortest paths in directed graphs; algorithms and their running time. Classical results on continuous optimisation: Weierstrass’s Theorem on continuous functions on compact set; optimisation of differentiable functions on open sets; Lagrange’s Theorem on equality constrained optimisation; Kuhn and Tucker’s Theorem on inequality constrained optimisation. Linear programming and duality theory. Finite horizon dynamic programming (time permitting).
Teaching: 22 hours of lectures and 10 hours of classes in the LT.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Indicative reading: Information on important and required texts will be provided at the beginning of the course. Good sources of literature are R K Sundaram, A First Course in Optimisation Theory; N L Biggs, Discrete Mathematics (2nd edition). Additional notes will be handed out throughout the course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA209  Half Unit
Differential Equations
This information is for the 2015/16 session.
Teacher responsible: Dr Eleni Katirtzoglou
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) and/or Further Mathematical Methods (MA212) are highly desirable, and students who have done neither MA203 nor MA212 should contact the lecturer.
Course content: The course concentrates on the theory and
MA210  Half Unit
Discrete Mathematics

This information is for the 2015/16 session.
Teacher responsible: Prof Jan van den Heuvel
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: MA103 Introduction to Abstract Mathematics, or an equivalent course giving a background in rigorous mathematics.
Course content: This is a course covering a number of concepts and techniques of discrete mathematics. Topics covered: Counting; selections; inclusion-exclusion; generating functions; recurrence relations. Graph Theory: basic concepts; walks, paths, tours and cycles; trees and forests; colourings. Coding theory: basic concepts; linear codes.
Teaching: 21 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.
Formative coursework: Written answers to set problems will be expected on a weekly basis.
Indicative reading: Full notes will be handed out throughout the course. A good additional text book is D K Arrowsmith & C M Place, Dynamical Systems - Differential Equations, Maps and Chaotic Behaviour. Other books closely related to R Grimshaw, Nonlinear Ordinary Differential Equations and W A Brock & A G Malliaris, Differential Equations, Stability and Chaos in Dynamic Economics.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA212  Further Mathematical Methods

This information is for the 2015/16 session.
Teacher responsible: Dr Jozef Skokan and Prof Adam Ostoja-Ostaszewski
Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, MSc in Economics (2 Year Programme) and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Students should ideally have taken the course Mathematical Methods (MA100) or equivalent, entailing intermediate-level knowledge of calculus and linear algebra, linear independence, eigenvalues, diagonalisation, and proficiency in techniques of differentiation and integration.
Course content: This course develops ideas first presented in MA100. It is divided into two halves: calculus and linear algebra. The calculus half explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral (permitting application of the Laplace transform to discrete and continuous probability distributions), to a level of detail dependent on time constraints. The linear algebra half covers the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. An application to population dynamics. Singular values, and the singular value decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.
Teaching: 20 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 10 hours of classes in the LT. 1 hour of

Teaching: 22 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

MA300

Game Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Lidbetter and Prof Olivier Gossner

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107). Some knowledge of probability. Knowledge of economics as covered in Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Course content: Concepts and methods of game theory with applications to economics. Part I: same as for Game Theory I (MA301). Part II: Coalitional game theory - central solution concepts with application: the core, Shapley value, stable sets, weighted majority games, market games, stable matching.

Teaching: 22 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture slides will be provided, as well as references to selected papers. Further reading: R Gibbons, A Primer in Game Theory, 1992; A Mas-Colell, M Whinston, J Green: Microeconomic Theory; M Osborne, A Rubinstein: A Course in Game Theory; M Maschler, E Solan, S Zamir: Game Theory.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

MA301

Half Unit

Game Theory I

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Lidbetter

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107). Some knowledge of probability.

Teaching: 22 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

MA303

Half Unit

Chaos in Dynamical Systems

This information is for the 2015/16 session.

Teacher responsible: Dr Robert Simon

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) is a prerequisite. Background in rigorous mathematical methods, such as provided in Introduction to Abstract Mathematics (MA103), is desirable. In particular, some familiarity with proving theorems would be useful.

Course content: Given a function f:X->X, what is the (iterative) behaviour of fn (x)=f(f(...(f(x)) )) (f applied n times). What do ‘orbits’ of f look like - an orbit has the form x, f(x), f(f(x)), ...? Particular emphasis is given to long-term evolution and stability analysis of such systems f:X->X. We explore connections with so-called fractal sets, which are roughly sets that look the same at any degree of magnification, and may have a dimension which is not an integer. We also discuss chaotic maps f, where fn(x) cannot be determined if there is any small uncertainty about x. Topics covered: Iteration of discrete maps. Orbit analysis. Contraction mapping theorem. Quadratic maps. Bifurcations. Definition of chaos. Sarkovskii’s theorem. Fractal sets.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful, R Devaney, A First Course in Chaotic Dynamical Systems; R Devaney, An Introduction to Chaotic Dynamical Systems, E Scheinerman, Invitation to Dynamical Systems. A fun and interesting read might be Gieleck, J., Chaos: Making a New Science.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

MA305

Half Unit

Optimisation in Function Spaces

This information is for the 2015/16 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance.
This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have attended a course in Mathematical Methods, ideally Further Mathematical Methods (MA12).

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. This course develops a geometric approach to those optimisation problems which involve the choice of functions. Applications relevant to Economic Theory are studied. It introduces key methods of continuous time optimisation in a deterministic context, including the Calculus of Variations, Pontryagin’s Principle and Bellman’s Principle. Specific topics include: Introductory examples, Calculus of variations, Euler-Lagrange Equations, Necessary conditions, Maximum Principle, Transversality conditions, Linear time-invariant state equations, Controlability, Dynamical programming, Applications to Economics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT, 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A full set of lecture notes will be provided. D. G. Luenberger, Optimization by Vector Space Methods, Wiley, 1969.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA310  Half Unit
Mathematics of Finance and Valuation

This information is for the 2015/16 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA313 Probability for Finance is required

Course content: Main mathematical ideas in the modelling of asset price evolution and the valuation of contingent claims (e.g., calls, puts); discrete methods will dominate. Introductory treatment of the Black–Scholes continuous-time model. This course introduces a range of mathematical concepts and techniques of modern finance. It considers discrete and continuous time models for the price dynamics of actively traded assets. It develops the basic principles of risk-neutral valuation of contingent claims, such as call and put options. The course contains some elements of stochastic analysis such as Brownian motion, stochastic integration, stochastic change of variable formula, change of probability measures. These analytic tools are used for the pricing of contingent claims in stochastic models of financial markets. Specific topics studied include: one-period and multi-period binomial tree models; the Black and Scholes model; self-financing replicating portfolios; martingales and conditional expectation; Ito calculus; risk-neutral valuation of call and put options in the absence of arbitrage; the Black and Scholes formula; option deltas, gammas, vegas, and other sensitivities.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA313  Half Unit
Probability for Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lewis-Pye

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Experience obtained through other Mathematics and Statistics courses is highly desirable.

Course content: The purposes of this course are (i) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (ii) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Markov chains. Convergence of random variables. Conditional expectation and martingales, in the discrete case.

Teaching: 20 hours of lectures and 10 hours of classes in the MT, 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA314  Half Unit
Algorithms in Java

This information is for the 2015/16 session.

Teacher responsible: Dr Konrad Swanepoel

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103), or an equivalent course giving a background in rigorous mathematics.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: T H Cormen, C E Leiserson & R L Rivest, Introduction to Algorithms, MIT Press 1990 (or 2nd edn, 2001 or
Fundamental concepts, flows, connectivity and matchings, and techniques of graph theory. The topics to be covered are:

**Course content:**
- Rigorous mathematics.

**Pre-requisites:**
- General Course students.

This course is available with permission to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:**
- Students must have passed MA103 Introduction to Abstract Mathematics and, ideally, have taken MA211 Algebra and Number Theory. Students who have not taken MA211 may still take the course with the lecturer’s permission. (A small amount of additional reading on their part will be required.)

**Course content:**
- The aim of the course is to continue the study of abstract algebraic structures and show how these structures can be used to solve concrete problems. There are three strands:
  - Group actions;
  - Rings, polynomials and fields;
  - Applications, including coding and cryptography.

- Group actions; revision of permutation groups; orbits and stabilizers; the orbit-stabilizer theorem; applications to counting problems. Rings, polynomials and fields; revision of rings; quotient rings; polynomial rings and the Euclidean algorithm for polynomials; irreducible polynomials and factorisation of polynomials; fields; fields as quotients of polynomial rings; construction and properties of finite fields. Applications: Designs and orthogonal latin squares; Error-correcting codes, including linear codes, cyclic codes and perfect codes; cryptography.

**Teaching:**
- 22 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:**
- Written answers to set problems will be expected on a weekly basis.

**Indicative reading:**

**Assessment:**
- Exam (100%, duration: 2 hours) in the main exam period.

---

**MA316**  
*Half Unit*  
**Graph Theory**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Julia Boettcher and Dr Thomas Lidbetter  
**Availability:** This course is available on the BSc in Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:**
- MA103 or equivalent course giving a background in rigorous mathematics.

**Course content:**
- This course examines the basic concepts and techniques of graph theory. The topics to be covered are: fundamental concepts, flows, connectivity and matchings, colourings, extremal problems. Optional topics include Ramsey theory, the probabilistic method, spectral graph theory, or matroids.

**Teaching:**
- 22 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:**
- Written answers to set problems will be expected on a weekly basis.

**Indicative reading:**

**Assessment:**
- Exam (100%, duration: 2 hours) in the main exam period.

---

**MA317**  
*Half Unit*  
**Complex Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Amol Sasane  
**Availability:** This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Pre-requisites:**
- Solid grounding in mathematics, especially analysis, in particular MA203 Real Analysis.

**Course content:**
- The course will cover the fundamental concepts and methods in complex analysis. The basic object of study in the course will be a complex differentiable function in a region, and the far-reaching consequences of the notion complex differentiability will be dealt with in the course. The specific topics that will be covered are: the geometry of complex numbers, complex differentiation, Cauchy-Riemann equations, Cauchy’s integral theorem, Cauchy’s integral formula, Taylor series. We continue by covering: Liouville’s Theorem, Maximum Modulus Theorem, Rouche’s Theorem. We also give a brief introduction to Laurent Series and use of the Residue Theorem. The core results will be illustrated with computational examples and applications.

**Teaching:**
- 22 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:**
- Written answers to set problems will be expected on a weekly basis.

**Indicative reading:**

**Assessment:**
- Exam (100%, duration: 2 hours) in the main exam period.

---

**MA318**  
*Half Unit*  
**History of Mathematics in Finance and Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Norman Biggs  
**Availability:** This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

**Course content:**
- This course surveys the development of mathematics from the beginning of history with an emphasis on its applications to finance and economics. Major themes are the development of arithmetic and geometry, the use of algebraic
symbolism, the creation of the calculus, geometry, probability, and game theory. In order to give this course a distinctive flavour, we will illustrate these themes with examples taken from the social sciences, broadly interpreted. For example, the algorithms of arithmetic will be illustrated by their applications in finance, rather than astronomy.

**Teaching:** 20 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students are expected to submit written work on a weekly basis. One of these assignments will be a short essay of 1000-1200 words.

**Indicative reading:** The course is based on source material which will be distributed to students as hard copy. J. Stedall’s ‘History of Mathematics: A Very Short Introduction’ (Oxford 2011) is recommended for background reading.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 1650 words).

The assessed essay is due for submission in the Spring Vacation.

---

**MA319 Half Unit**

**Partial Differential Equations**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Amol Sasane

**Availability:** This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Further Mathematical Methods (MA212) and Introduction to Abstract Mathematics (MA103).

**Course content:** The aim of the course is to study the three main types of partial differential equations: parabolic (diffusion equation), elliptic (Laplace equation), and hyperbolic (wave equation), and the techniques of solving these for various initial and boundary value problems on bounded and unbounded domains, using eigenfunction expansions (separation of variables, and elementary Fourier series), integral transform methods (Fourier and Laplace transforms). Applications and examples, such as the solution technique for Black-Scholes option pricing, will be discussed throughout the course.

**Teaching:** 22 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

**Indicative reading:**

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG101 Half Unit**

**Core Business Disciplines I: Finance and Operations Management**

This information is for the 2015/16 session.

**Teacher responsible:** Dr David Newton and Dr Elisabetta Bertero

**Availability:** This course is compulsory on the BSc in Management.

This course is not available as an outside option nor to General Course students.

**Course content:** This course is the first part of two integrated core courses in management. The aim is to provide students with an understanding of the drivers of organisational performance and with an introduction to finance. Organisational performance will include process flow analysis, inventory management, assembly line balancing; supply chain management; quality management and scheduling. The Finance part will include an introduction to the financial decisions of firms, in particular capital budgeting; the financial decisions of households; the role of the financial system in the economy and the flow of funds; causes and consequences of the recent financial crises.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of classes in the ST.

**Formative coursework:** One formative essay of 2000 words will be set in the Michaelmas Term for the Operations Management part and coursework exercises will be set in the Lent Term for the Finance part.

**Indicative reading:**

Students on this course will have a reading week in Week 6, in line with departmental policy.

---

**MG100 Half Unit**

**Leadership and Communication in Teams**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Tara Reich

**Availability:** This course is compulsory on the BSc in Management.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership and considers how leadership develops. The emphasis will be on application of theory, comparing and contrasting approaches to leadership, and self-reflection. The group essay provides the opportunity for students to not only exercise leadership within their group but also apply the theories to a real-life leadership situation.

The course examines: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; the dynamics between leaders and their followers; transformational and transactional forms of leadership; team leadership and co-leadership; leadership communication; leadership development; the future of leadership.

**Teaching:** 10 hours of lectures and 9 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

The Summer Term teaching will be review sessions. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Formative assessment will be a mock exam during the Lent Term.

**Indicative reading:** This course relies heavily on journal articles and book chapters. A full reading list will be provided at the beginning of the term. Students may wish to consult one of the following:

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) and other (5%) in the LT.

Assessment will be 25% group essay (2000 words), 5% Peer Evaluation of individual contribution to the group essay, and 70% Summer Term exam (2 hours).
MG102  Half Unit
Organisational Behaviour

This information is for the 2015/16 session.
Teacher responsible: Dr Connson Locke
Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students. This course cannot be taken with MG203.

Course content: This course introduces students to social science theories and research related to understanding employee attitudes and behaviour. Each week focuses on a different topic investigating individual, group, and organisational issues. Weekly topics include: personality, motivation, perception and decision making, justice, culture and creativity.

Teaching: 15 hours of lectures and 9 hours of classes in the MT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST. Supplementary essay writing lecture/s to be held during reading week.

Formative coursework: Students will be expected to produce 1 essay of 1,500 words in the MT.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

A supplementary learning activity may take place during reading week, in Week 6.

MG201  Half Unit
Core Disciplines II: Marketing, Human Resource Management and Information Systems

This information is for the 2015/16 session.
Teacher responsible: Dr Will Venters, NAB 3.13
Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Course content: This course is the second of two integrated core units in management, which aim to provide students with an understanding of the drivers of organisational performance. In this course, we cover perspectives and issues in (i) human resource management, (ii) marketing and (iii) information systems. (i) will include job design, job analysis and competency modelling; recruitment and selection methods; socialization, turnover and retention; training and development; performance appraisal and management. (ii) will include customer behaviour; segmentation, targeting and positioning; product management and diffusion; pricing, placement and promotion; and marketing relationships. (iii) will include data, information and knowledge; the evolution of IS management practices; information systems strategy; information systems projects and organisational change; ebusiness; globalisation and IT; information systems outsourcing, and IT infrastructure. The course will be explicitly integrative and a key part of the assessment process will be an integrative group exercise around a case study.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

A supplementary learning activity may take place during reading week, Week 6.

Formative coursework: Three formative assignments will be set, consisting of one mock exam question to be completed at the end of each of the three sections of the course. The purpose of the mock exam is to provide - as realistically as possible - a practice session for the real exam.

MG202
Analytical Methods for Management

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Abell and Dr Nuno Oliveira

Availability: This course is available on the BSc in Management.

This course is not available as an outside option. This course is available to General Course students.

BSc Management students must take either MG202 or MG205 in their second year.

Pre-requisites: ST107 or equivalent is recommended but not required.

Course content: This course will provide students with the knowledge and tools required to perform qualitative and quantitative analysis in support of managerial decision making, and to read and interpret the management research literature.

The course introduces the fundamentals of behavioural research design, and provides an introduction to various methods used to gather data, analyse data, and communicate results. In the course, students will: 1) acquire the knowledge needed to act as critical consumers of a wide range of academic and commercial research, 2) acquire some facility in designing valid research and reporting research results, and 3) be exposed to a range of stock knowledge regarding research design and research methods. A particular focus of the course will be on methods which are used in management research, and which are useful in doing applied research within a management context.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

A supplementary learning activity may take place during reading week, Week 6.

Formative coursework: Students will be provided with regular opportunities to submit formative work, consisting of both quizzes administered in class and short individual or group assignments to be discussed in class. Students will be expected to provide and receive formative peer feedback on all written assignments during class, and designated written formative assignments will be marked and commented on by course instructors.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

Project (25%, 3000 words) in the ST.

Lent Term coursework will be an individual essay; Summer Term coursework will be a group project.

MG203
Not available in 2015/16
Organisational Theory and Behaviour

This information is for the 2015/16 session.

Teacher responsible: To be confirmed

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management Sciences, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG102.

Course content: Individual behaviour including: attitudes, motivation, personality, emotion, work-life balance and stress. Group and inter-group processes including: social networks, cohesion, power, and leadership. Organisational dynamics including: structure, learning, cross-cultural issues, responses to work-life conflict, and change. This course introduces students to social science theories and research regarding individual, group and organisational issues in order to analyse employee behaviour in the context of work organisations.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to submit three pieces of written work throughout the year, in the form of two unassessed essays and one mock examination.

Indicative reading: A complete reading list will be provided at the start of the course. Sample texts include the following: J Child, Organisations; S Dawson, Analysing Organisations; S Robbins & T Judge, Organizational Behaviour; R Steers & L Porter, Motivation and Work Behaviour.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG205
Learning from Quantitative Data

This information is for the 2015/16 session.

Teacher responsible: Dr Jordi Blanes i Vidal (NAB 5.28)

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

BSc Management students must take either MG205 or MG202.

Pre-requisites: Students must have completed Quantitative Methods (Statistics) (ST107).

Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression. The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. The approach is both formal, as the course makes extensive use of econometric theorems and techniques, and solidly grounded in intuition, as it provides numerous examples of tests of real-life relations. Many of these examples will be illustrated using the STATA software package, and the students will be expected to learn the basics of data manipulation and regression running. A solid base of introductory statistics and probability (equivalent to that provided by ST107) and
MG206  Half Unit

Firms, Management and Competitive Advantage

This information is for the 2015/16 session.

Teacher responsible: Mr Nilesh Dattani NABS.02

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed EC100 OR EC102 OR equivalent.

Course content: This is not a course on corporate strategy. It focuses on the evolution of thinking about firms and the activity of management and examines firm advantages through conceptual ideas and empirical knowledge. There will be an emphasis on analysing firms as reservoirs of resources and capabilities and topics to be covered will include distinctive capabilities of firms, organisational design, decision making in firms, organisational routines, managerial leadership and the role of ethics. Particular attention will be given to firms in technology-based industries and the management of innovation and contrasts will be made with public sector management.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Project management. Example topics of study include: questioning relationships, managing risk and organisational learning. The course will focus on issues and challenges raised by business analysis and management. To develop students' practical knowledge and skills and to prepare them for future employment as business analysts / project managers students will participate in group work based on 'real-world' scenarios of business transformation projects. They will be expected.

Formative coursework: Students are expected to produce one piece of written work and to do the weekly class exercises.

Indicative reading: A reading list will be available to students. A variety of types of assignments are given for class discussion including exercises and case studies.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG207  Economics for Management

This information is for the 2015/16 session.

Teacher responsible: Dr Kristof Madarasz NAB 5.30 and Prof Saul Estrin NAB 4.32

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Business Mathematics and Statistics and BSc in Management Sciences. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: EC102 Economics (B) or equivalent is a pre-requisite. This course cannot be combined with Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Course content: The objective of the course is to provide students with insights from economic theory which are relevant to applications in managerial decision making. The emphasis is on applying microeconomics ideas to solve problems. Topics covered include consumer theory, production, applications to the labour market, market structure, monopoly, oligopoly, product differentiation, pricing, game theory, decision analysis, bargaining, auctions, and asymmetric information.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to prepare answers to set problems on a weekly basis. Some of this work will be assessed. Assiduous preparation for the weekly tutorials is essential to achieve a good exam performance.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
MG209 Half Unit

E-business

This information is for the 2015/16 session.

Teacher responsible: Dr Antonio Cordella NAB 3.30

Availability: This course is available on the BSc in Management and BSc in Management Sciences. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course presents an analysis of the management, economics and information systems theories and practices in online business. This is a management information systems course and not a technical course. It is mainly directed at undergraduate students. It focuses on the study of the impact of digital technologies on business strategies and market configurations. Internet-based systems offer new means to operate businesses and to compete in the global marketplace and it is important for future executives and entrepreneurs to understand the economic and managerial implications of these transformations. Students will gain a good understanding of why and how successful companies are taking advantage of e-business, as well as an understanding of the main challenges and risks associated with different e-business models and strategies in a fast changing technological and business environment.

The course is structured into four main sections:
1. Strategic, technological, and economic foundations of e-business
3. E-business: strategic and organisational challenges
4. Implementation of e-business strategies

Teaching: 30 hours of lectures in the LT. 3 hours of lectures in the ST.

Students will be taught in groups of maximum 30 students each. Each group will cover the same content but will be taught separately. Each group will have 1x3 hours lecture per week in the Lent Term.

A 3 hours revision session will be offered in the summer terms.

Students will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment based on previous exam questions. Each student will receive feedback on the approach to the question, the structure of the presentation, and the argumentation they have proposed to discuss the assigned question.

Aim of the formative work is to offer students the opportunity to self-evaluate their understanding of the subject, to test their preparation, to help them better understand what are the criteria of assessment, and to help them to better identify what is need to achieve the desiderated outcomes.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG210 Half Unit Not available in 2015/16

Corporate Social Responsibility and International Labour Standards

This information is for the 2015/16 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the BSc in Management.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Any social science background

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of business strategy. This course critically evaluates CSR from a number of perspectives, drawing on material from a variety of different disciplines. Students analyse the emergence of CSR, its theoretical basis, the business case for the adoption of CSR programmes, as well as the social impacts of such policies. The opening lectures of the course focus on internationalisation and international labour standards, and provide an understanding of how CSR relates to international regulatory institutions such as the International Labour Organisation. Subsequent lectures focus on the different aspects of CSR mentioned above, as well as topics such as comparative CSR. In terms of the impact and design of CSR policies, the course mainly focuses on issues relating to labour standards. As well as traditional academic readings and case studies, students will critically examine publically available material such as corporate policies and reports. Seminars will follow a mixture of formats including group activities and presentations. The course will include one interactive lecture from a CSR professional.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Locke, R. (2013) The Promise and Limits of
MG211
Operational Research Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Giacomo Zambelli NAB 3.07

Availability: This course is compulsory on the BSc in Management Sciences. This course is also available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is also available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to all the main theoretical techniques of Operational Research. MG211.1 Operational Research Techniques. Some methodological aspects of operational research, and some of the main OR techniques, including: Critical Path Analysis, Production, Scheduling, Markov Chains, Queueing Theory, Replacement, Simulation, Stock Control, Dynamic Programming, Decision Theory, Theory of Games. MG211.2 Mathematical Programming. Linear programming: from the most basic introduction to sufficient conditions for optimality; duality; sensitivity of the solution; discovery of the solution to small problems by graphical methods, and proof of optimality by testing the sufficient conditions; solution to larger problems by using a computer package. The transportation programme: properties of solution, connection with graph theory, an algorithm for hand computation. Full lecture notes are provided.

Teaching: 20 hours of lectures and 18 hours of classes in the MT, 10 hours of lectures, 13 hours of classes and 5 hours of computer workshops in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy. Please note that lectures and classes are divided between the two parts of the course (MG211.1 and MG211.2), and that the computer workshops are optional help sessions.

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

---

MG228 Half Unit
Managing the Stone-Age Brain

This information is for the 2015/16 session.

Teacher responsible: Dr Satoshi Kanazawa NAB 5.33

Availability: This course is available on the BSc in Management. This course is also available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce second- and third-year Management students to the new science of evolutionary psychology and explore the biological and evolutionary foundations of human behaviour. In the first few weeks, various critiques of and competing perspectives on evolutionary psychology, with regard especially to the relative importance of biological/evolutionary vs. social/cultural determinants of human behaviour and its sex differences will be discussed and debated. In later weeks, an evolutionary perspective will be applied to various topics in management such as organizational behaviour, occupational choice, productivity, and status hierarchy. The study of business and management is currently dominated by economic perspectives, supplemented by sociological and social psychological perspectives, in American business schools. The course will provide a necessary corrective to the dominance of economics perspectives in the study of business and management by providing biological and evolutionary perspectives and thereby throwing a new light on the old problems (and finding potential solutions for them) in organizations and organizational behaviour. The course will provide evolutionary and biological perspectives on management and organizational behaviour. It will introduce the students to the following topics: Principles of evolution; Principles of evolutionary psychology; Sex differences in preferences, values, cognition, emotions, and behaviour; Physical attractiveness; General intelligence; Evolutionary constraints on human behaviour and their relevance to organizational behaviour.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each student will give a class presentation on the week’s readings and their presentation will be evaluated by the course instructor and the feedback will be given to the student within one week. During the first few years of the course, mock examinations will be given to the students in order to familiarize them with the anticipated exam contents and format.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
MG301
Strategy
This information is for the 2015/16 session.
Teacher responsible: Dr Ricardo Alonso NAB 5.31
Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.
Pre-requisites: Students should have completed Economics B (EC102) or equivalent, Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent, and Economics for Management (MG207) or Microeconomic Principles I (EC201) or equivalent.
Course content: The first half of the course studies strategic situations (competition and rivalry, entry deterrence, standard setting, etc.) and formulates decision models of these situations. While the modelling is based on game theory, students will be taught how players play in real life games according to growing empirical evidence.
The second half of the course studies the way managers interact with the different constituencies inside the firm- workers, board members, and other managers. It presents, again with a heavy emphasis on the evidence, different managerial styles and their impact on firm process, entrepreneurial management styles, organisational change and technology, managerial compensation and governance, and corporate culture.
Beyond the emphasis on the content of the course, the course also aims to be a course where students learn to think critically and analytically. Students will learn to read the primary literature, discuss papers in class, interpret the evidence etc. Students will learn to ask questions such as: What is the evidence? What evidence would convince me of the opposite hypothesis?
Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.
Extra reviews may be held during reading week in Week 6.
Formative coursework: Formative work such as problem sets and mock exam questions will be set.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG302 Half Unit
Topics in Management Research
This information is for the 2015/16 session.
Teacher responsible: Prof Diane Reyniers NAB 5.22
Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: MG207 (formerly MN201, intermediate microeconomics) or equivalent and MG205 (formerly MN203, research methods/econometrics) or equivalent.
Course content: This course addresses various topics in management research which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.
The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation.
The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether successful entrepreneurs tend to have been juvenile delinquents, gender differences in negotiation.
The main objective of the course is to enable students to comprehend and critically assess the literature on selected management topics, to evaluate statements in terms of evidence and to detect false reasoning or logic.
We investigate aspects of Management and what motivates people in organisations. Topics vary each year (based on student feedback) but examples are Entrepreneurship, Racial discrimination, Negotiation, Experiments on Incentives, Placebo effects of price, Leadership, Corporate Culture.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 2 hours of classes in the LT.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Two take-home mock exam papers.
Indicative reading: A paper course pack containing all materials (lecture slides, articles, class sheets) will be available to students taking the course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG303 Half Unit
Foreign Direct Investment and Emerging Markets
This information is for the 2015/16 session.
Teacher responsible: Prof Saul Estrin NAB 4.32
Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
This course cannot be taken with MG307.
Pre-requisites: BSc Management students should be in their 3rd year. Other students should have taken Economics A or Economics B, or equivalent.
Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. There will also be some external speakers from large international firms and from the banking and consulting community to bring contemporary views and arguments to bear.
Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The *new institutional economics* has recently developed as a field to understand the impact of variation in institutions on economies’ performance. This course will focus on how the institutional characteristics of
emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concepts such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economies and working with a large variety of datasets and sources. The course will then turn to key topics. These will include the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets. Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

Assessment: Exam (50%), duration: 2 hours) in the main exam period.

Essay (25%, 1000 words) in the ST.

Project (25%, 2000 words) in the LT.

LT coursework will be a group project.

MG305 Half Unit Innovation and Technology Management

This information is for the 2015/16 session.

Teacher responsible: Dr Jonathan Liebenau NAB 5.14

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive technologies, project escalation, technological disasters. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

Lectures will be shared with MSc students. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies from the course study pack on Moodle. Formative feedback is provided on class participation.

In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

MG306  Half Unit  Not available in 2015/16  
Managing Diversity in Organisations

This information is for the 2015/16 session.
Teacher responsible: Dr Alexandra Beauregard NAB4.14
Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course will be capped at 15 students.
Pre-requisites: None, but some background in either Organisational Behaviour (MG102) or Human Resource Management (MG201) would be useful.
Course content: The primary aim of the course is to develop students’ understanding and critical awareness of issues associated with managing a workforce characterised by diversity in age, gender, race, religion, disability, and sexual orientation. The course endeavours to combine academic rigour with a practical focus on promoting equality, diversity and inclusion in the workplace, enabling students to both develop a critical understanding of relevant theoretical and empirical literature and apply acquired knowledge to specific diversity management scenarios. Seminars will require participation in group exercises designed to enhance students’ appreciation of the wide range of issues associated with categorizing individuals as members of different groups, on whatever basis.

Students will become familiar with the drivers of increased workforce diversity, the psychological and sociological theories underpinning discrimination and exclusion, current employment legislation related to diversity in the UK, and the barriers to equality of opportunity in the workplace for minority groups. Students will examine “best practice” in diversity management programmes and learn to critically assess organisational policies and practices for managing workplace diversity with regard to their ability to enhance organisational performance and avoid costly litigation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST. Lectures will be shared with MSc students, but separate classes will be held for undergraduate students.

Formative coursework: Students are required to submit an essay of 1,800 words

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG307  Half Unit
International Context of Management

This information is for the 2015/16 session.
Teacher responsible: Mr Nilesh Dattani NAB5.02
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG303.

Course content: The course aims to apply social science theory to the analysis of the conduct and management of transnational activities; to critically appraise concepts such as globalisation, regionalisation, national competitiveness, transnationality of firms, etc. in the context of international management structures and processes; to delineate the international political, economic, social and legal structures and environments within which the activity of management takes place. The topics to be covered will include: the nature of the contemporary global political economy; the globalisation of business, finance and trade in goods and services; Global competition; the transnational corporation in the global economy; the tension between globalisation and regionalisation; the international trading order; the international monetary regime; the impact of culture on global business; the changing position of the state in the global economy; the new diplomacy of states and firms.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and do the weekly class exercises.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG308  Half Unit
Simulation Modelling and Analysis

This information is for the 2015/16 session.
Teacher responsible: Dr Alicia Mejia-Salazar
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: Elementary statistical concepts and experience of standard computer software is assumed.

Course content: The aim of the course is to introduce students to the concepts, techniques and applied aspects of the development and analysis of simulation models. The course will cover two main approaches for modelling problems bound by uncertainty (stochastic behaviour): Monte-Carlo Simulation (static problems) and Discrete Event Simulation (dynamic problems). Topics covered will include: types of uncertainty; types of simulation modelling; sampling methods; the simulation process; structuring problems for simulation; running simulation models; analysing simulation outputs; risk analysis using simulated models; testing and validating simulation models; applications of simulation. Excel modelling is an integral part of Monte Carlo simulation and at the end of the course students will have a sound foundation on how to set up different Excel models. Additional tutorial examples will be provided throughout the course, and posted on Moodle to help develop this very important skill.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. An Excel help class may be held during reading week in Week 6.
Formative coursework: Three individual or small-group assignments will be required during the course.

**Assessment:** Project (100%, 2000 words) in the ST.

An individual management report (maximum 2000 words) describing the modelling and results from a simulation study of a realistic decision problem. The problem will be defined by the end of the LT, the project should be completed by the beginning of the ST.

---

**MG309  Half Unit  Not available in 2015/16**

**International Human Resource Management**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Virginia Doellgast

**Availability:** This course is available on the BSc in Management.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** None for students on the BSc Management degree. Students on other degrees and General Course students require permission of the instructor. Background in human resource management, employment relations, or sociology of work is recommended (e.g. ID100, ID205, SO212).

**Course content:** This course examines the human resource management (HRM) strategies of global corporations, with the aim of understanding both the causes of different strategic choices and the consequences of these strategies for diverse stakeholders. In course modules, we will evaluate the strategic choices facing global corporations, including the choice between adopting highly centralized or predominantly decentralized HR policies; HR considerations in the outsourcing and offshoring of work; and the role of HRM in managing international mergers and acquisitions. A central area of concern will be to analyze how institutional and cultural factors affect HRM policies and outcomes across the ‘global supply chains’ of MNCs.

**Teaching:** 2 hours of lectures and 15 hours of classes in the LT. 2 hours of lectures in the ST.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 exercise in the LT.

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words).

---

**MG310  Half Unit**

**Risk and Decision Analysis for Management and Policy**

This information is for the 2015/16 session.

**Teacher responsible:** To be confirmed

**Availability:** This course is available on the BSc in Management.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is complementary to MG311 (Behavioural Decision Science for Management and Policy), which explains how unaided, intuitive decisions by individuals and groups are made, whereas this course explores how deliberation aided by quantitative models can improve the quality of decisions and develop shared understanding among the key players.

**Pre-requisites:** Elementary statistical and mathematical concepts and experience of standard computer software is assumed.

**Course content:** A major characteristic of all decisions in every organisation is that they are taken to achieve objectives, both short-term and long-term. To do this well is a fundamental skill for managers at every level in the organisation. But decisions are often hard to make in the presence of multiple objectives, uncertainty about the future, and differences of opinion among key players. For decisions that require large amounts of resources and commitments, the weight of responsibility felt by the decision maker can be heavy, especially when the consequences require considered judgements about trade-offs between benefits, risks and costs.

In this course students will learn how to use Risk and Decision Analysis as a form of analytics that supports decision making in private, voluntary and public organisations. The course shows how a consistent and realistic mix of data and judgement can help decision makers to better achieve their objectives. Based on sound theory underlying normative, descriptive and prescriptive decision-making research, the course emphasises the practical application of Risk and Decision Analysis for decision-making on any topic in any organisational setting.

The course is designed to enhance the students’ decision capabilities when confronted with strategic or operational choices, when searching for decision opportunities, and when designing strategies and policies. It uses real-world Risk and Decision Analysis applications in organisations, and employs several case-studies (supported by specialised decision software) to build students’ skills in decision modelling and analysis. It covers modelling and supporting decisions involving multiple stakeholders and conflicting objectives (multi-criteria decision analysis, portfolio decision analysis and resource allocation problems) as well as uncertainty (decision trees, influence diagrams, and risk analysis).

The course is suitable for third-year undergraduates, who will attend the same lectures as postgraduate MSc students, but different seminars. Past experience shows that both undergraduates and postgraduates benefit from asking questions and sharing their experiences in the interactive lectures.

**Teaching:** 20 hours of lectures and 9 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Three formative assignments

Feedback on Group Project Plan

**Assessment:**

Group Project (50%) due week 11 of Lent Term

Individual Report (50%) due Week 1 of Summer Term
MG311  Half Unit

Behavioural Decision Science for Management and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Barbara Fasolo NAB 3.15

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: An introductory quantitative course, such as MA107 or ST107 or equivalent.

It is an advantage to have taken an introductory social science course in one of these fields: economics (e.g. EC101 or EC102), management, psychology or sociology.

Course content: This course develops your ability to make decisions or help others make better decisions, with the help of “system 1” – the fast, intuitive and (before this course) automatic way our brain makes decisions, and evaluates others’ decisions. The aim is for you to become a better intuitive decision maker.

In lectures, taught with MSc students, we examine how behavioural decision science came about and review a number of descriptive theories of decision making. We also focus on empirical research on heuristics, biases, decision style and other phenomena which can unconsciously affect decisions. Because behavioural science started in the lab, the course includes a visit to the Behavioural Research Lab, to give you the experience (as researcher and participant) of what is behind the scenes of ‘behavioural science and insights’. In seminars which are uniquely designed for undergraduates you apply this research to personal, managerial or policy decisions.

This is a course for undergraduates with a strong passion for behavioural science and a keen interest in the psychology of decision making and applications for management and policy. Lectures are taught at an advanced level, and experimentally (e.g., in-class experiments). It is suitable for 3rd year undergraduates who are keen to learn alongside master's students in their first term at LSE, from diverse backgrounds and cultures. The course is a natural complement, and preparation for, MG310, which aims at improving the other side of the decision-making brain – the slow and analytic ability to make strategic decisions via modelling and decision analytic techniques.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 1 lecture session (2 hours) will take place in the Behavioural Research Lab. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A 500-word essay plan for one long essay (to include a detailed plan, introduction, one full paragraph and conclusion). 2-3 pages of A4 maximum to be submitted AFTER reading week.

Assessment: Coursework (10%, 500 words) in the MT.

Essay (90%, 3000 words) in the LT.

Assessment will be as follows:

A 500-word report on the lab experience or experiment to be submitted in week 11 of MT (10%).

An essay not more than 3,000 words to be submitted no later than the beginning of week 7 of LT, Monday 22nd February at 12.00pm (90%).

The essay will include two parts. In the first part (no more than 1,000 words), you will be asked to prepare a memorandum to the CEO of an organisation (be it public or private, an NGO, a business corporation or a third sector enterprise) giving a behavioural insight on some decision to make, or situation to improve, or goal to achieve. In the second part of the essay (no more than 2,000 words), you will justify the specific recommendations presented in the memorandum with reference to behavioural and decision science literature and theories. The first part of the essay will count for 50% of your mark while 50% will come from the second part.

MG312  Half Unit

Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts

This information is for the 2015/16 session.

Teacher responsible: Dr Tara Reich and Dr Chia-Huei Wu

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Organisational Behaviour (MG102) or Organisational Theory and Behaviour (MG203)

Course content: Extreme OB seeks to understand atypical forms of organisational phenomena. Alternative forms of organisations and unique individual circumstances have become more commonplace in recent years; however, OB theories—designed to apply to “typical” workplace behaviour and contexts—have not kept pace. The emphasis in this course will be on critically evaluating existing OB theories as they relate to extreme forms of workplace behaviour (e.g., workaholism, pro- and antisocial behaviour) and contexts (e.g., military, hospital, and artist culture). Weekly topics include isolated and high pressure work environments, passion work, virtual and flexible teams, and compliance and proactivity.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 pieces of coursework (1 essay outline and 1 mock exam) in the MT.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Other (30%) in the LT.
MG315  Half Unit
Practical Optimisation Modelling

This information is for the 2015/16 session.

Teacher responsible: Dr Xue Lu
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have a knowledge of Mathematics and Statistics to the level of MA107 (Quantitative Methods - Mathematics) and ST107 (Quantitative Methods - Statistics), or ST102 (Elementary Statistical Theory). OR202 is not a prerequisite but is advisable to be taken previously or in conjunction with the course.

Course content: Mathematical Optimisation is one of the most powerful and widely-used quantitative techniques for making optimal decisions. The course has a pragmatic focus and aims at enabling students to model and solve real-life management problems. An overview is provided on fundamental technique, most importantly linear and integer programming, emphasising modelling and solution concepts and methods (e.g. feasibility, optimality, duality, multiple objectives, using binary variables for modelling, network models). The students will learn to formalise management problems using linear and integer programming models, to implement these models using specialised optimisation software, and to analyse and interpret the results, reflecting on the limitations of the models.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of classes in the MT. 1 hour and 30 minutes of classes in the LT. 8 hours of computer help sessions in the MT. 2 hours of computer help sessions in the LT. Computer help sessions are optional. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will have the opportunity to submit a mock project for marking and feedback before the final assessed project is due. Students will also be given weekly homework exercises.

Assessment: Project (100%) in the LT.
The course is examined entirely on a project to be submitted at the end of LT.

---

MG315  Half Unit
Marketing Action Learning Project

This information is for the 2015/16 session.

Teacher responsible: Dr Haider Ali
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Principles of Marketing (MG314) or Core Disciplines II: Marketing, Human Resource Management and Information Management (MG201) plus 2 x 2 hour additional seminars in week 1.

Course content: This course will build on theoretical concepts taught in MG314 or MG201, by applying these theories and concepts to a real-life situation. Working in groups, students will develop a marketing plan for a new product/ service launch; from ideation through to setting marketing launch budgets, and considering Return on Investment. With support from the course leader, who has herself been involved in business start-ups, and outside commercial guest speakers/ consultants, students will get the opportunity to use knowledge gleaned from many management courses to craft a compelling business plan. Every year some groups decide to pursue their ideas by actually becoming entrepreneurs and launching their products for real. Could you be our next marketing success story?

Teaching: 10 hours of lectures, 4 hours of seminars and 10 hours of classes in the LT.
The two two-hour week 1 seminars are compulsory for students who have previously only taken MG201. Students who have previously taken Principles of Marketing (MG314) do not need to attend these sessions. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 other piece of coursework and 2 other pieces of coursework in the LT.

In addition to the final report, there are three intermediate midterm requirements – Formative assessments.

i) One page memo drafting the scope of the project area
ii) Mid Term Report One – proposing the market segment to be targeted (based on relative attractiveness)
iii) Mid Term Report Two – Research Plan

---

MG314  Half Unit
Principles of Marketing

This information is for the 2015/16 session.

Teacher responsible: Prof Amitav Chakravarti NAB S.13
Availability: This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Principles of marketing will include an introduction to the 3C’s (Customer, Competition, Company), Marketing Strategy - particularly Segmentation, Targeting & Positioning, and the 4Ps – Product, Price, Place, Promotion. Contemporary issues in marketing taught in lecture, will be brought to life by classes dedicated to examining the application of these ideas through the use of case studies looking at marketing problems faced by organisations such as the London Olympics Games Organising Committee, Barack Obama’s use of technology throughout his election campaign, as well as more traditional consumer products companies such as Starbucks and Mountain Dew.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 2 hours of lectures and 1 hour of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Formative assessment will take the form of one group case write up which will be specified at the beginning of the course – this will be presented in class according to a published timetable. There will also be an opportunity to submit a practice exam, completed privately in exam conditions for formative assessment.

London: Palgrave Macmillan

Further references will be provided during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

156 Undergraduate Course Guides
PH101
Logic
This information is for the 2015/16 session.
Teacher responsible: Prof John Worrall LAK3.02
Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: We reason or make deductions all the time - both in intellectual disciplines and in everyday life. For example, a scientist will test a particular theory by reasoning that if that theory were true then some other claim, one that can be checked observationally or experimentally, would have to be true as well - that is, by showing that some observationally testable claim is deducible from the theory. Mathematics is of course concerned with proofs and proofs are deductive inferences. Finally, philosophy is centrally concerned with arguments or deductions. To take one example, many have argued that the presence of evil in the world is incompatible with the existence of an all-powerful, all-knowing, all-merciful god as proposed in, for example, Judaeo-Christian theology. That is, they have claimed that if you assumed that there is such a god, then it would follow, or you could infer that, there would be no evil in the world. But since there is evil, it follows that there can be no such god. More mundanely, we reason, or make inferences, all the time - though we don't always think of it that way.
Deductive Logic is the study of such inferences - it therefore has an enormously broad scope. Different disciplines have different ways of garnering information in the first place (the way that we arrive at a scientific theory is different from the way that we arrive at an axiom in mathematics or a thesis in philosophy), but the way that we reason from that information is the same no matter what the discipline. The main task of logic is to give an explicit characterisation of those inferences that are correct, or as we shall say, VALID (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion really does follow from some premises and when it does not.
The course begins with a simple system called propositional or truth-functional logic, which despite its simplicity captures a great range of important arguments. The system of predicate logic that we study next is, however, still more powerful and provides the logical basis not only for ordinary inferences but also for inferences in the sciences. In both the case of propositional and of predicate logic, the course also covers other notions, such as the consistency of a set of sentences, and the independence of one sentence from a set of assumptions, that are closely related to validity of inference. Finally the course covers some issues in the foundations of logic - to do with truth and sets.
Teaching: 15 hours of lectures and 9 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.
Formative coursework: Formative coursework will take the form of a number of computer based quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the computer based quizzes, students are required to complete them before a specific deadline; these will be discussed in class. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination for this course.
Indicative reading: Detailed course notes are provided and are intended to be sufficient reading for the course. However for those who like to have a book the one whose treatment is closest to that adopted in the lectures is P.Suppes Introduction to Logic (Van Nostrand).
Assessment: Exam (90%, duration: 3 hours) in the main exam period.
Class participation (10%).

PH103
Reason, Knowledge and Values: An Introduction to Philosophy
This information is for the 2015/16 session.
Teacher responsible: Dr Heather Dyke
Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available on the BSc in International Relations and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: In his Letter to Menoeceus, Epicurus (341-271 BC) advises us that the successful study of philosophy will help one to “live like a god among men.” The aims and objectives of this course are more modest. Reason, Knowledge and Values provides an introduction to analytical philosophy by using classic and contemporary texts to study a selection of philosophical problems. It aims to acquaint students with some of the central questions of philosophy and to engage students in critical analysis of classic answers to these questions by authors including Plato, Popper, Hume, Hobbes, Mill, Locke and others. It also aims to develop students’ ability to think about and discuss philosophical issues systematically, critically, and patiently, and to develop their philosophical curiosity and imagination. Students should complete this course with knowledge of the basic types of philosophical argument and of the following questions and some classic answers to them:
• Does morality depend on religion?
• Is the existence of evil compatible with the existence of God?
• What is the relationship between determinism, free will, and moral responsibility?
• What makes us the same person over time, even though we change in many ways?
• Does time flow? Is time travel possible?
• What is knowledge?
• Do we know anything for certain?
• Is there any difference between science and pseudo-science?
• What is the relation between science and philosophy? We will also examine some questions of applied ethics, such as:
  • When, if ever, is censorship permissible?
  • What, if anything, is wrong with drug use in sport?
  • How should we treat the environment? Students should also develop the ability to:
    • Think clearly and thoroughly about philosophical issues.
    • Understand a philosophical text on its own terms: determine the aims the author sets him- or herself, consider the meaning of words, concepts, and expressions particular to the text and the argument; ask questions about the context in which the argument is situated.
    • Critically evaluate arguments: distinguish valid from invalid, sound from unsound, deductive from inductive, plausible from implausible arguments.
• Debate and write about these issues in a philosophical manner.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.
Parallel to this course, we will run a short five week course on ‘Philosophy and Argumentative Writing’ with practical advice to improve your writing style and with writing exercises. Students in the BSc in Philosophy and Economics, the BSc in Philosophy, Logic and Scientific Method, and the BSc in Philosophy, Politics and Economics are required to attend (5 hours of workshops in either MT or LT) and do all assignments. Other students are invited to do so.

Formative coursework: Students will be expected to write one formative essay in MT and two formative essays in LT.

Indicative reading: The readings will be articles and excerpts from books and will be made available via Moodle.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 1500 words) in the ST.

PH104   Not available in 2015/16

Formal Methods of Philosophical Argumentation

This information is for the 2015/16 session.

Teacher responsible: Prof John Worrall LAK 3.02

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is compulsory on the BSc in Philosophy, Politics and Economics (2nd year). It is compulsory on the BSc in Philosophy and Economics for those students who do not take PH101 in their first year. It is available as a more demanding alternative to PH101 the BSc Philosophy and Economics (1st year); BSc in Philosophy, Logic and Scientific Method and the BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students will be advised that it is a more demanding alternative to PH101. Only students with facility in formal reasoning (such as employed in mathematics or statistics) are advised to take this course rather than PH101.

Course content:
1. Deductive Logic. Philosophy is centrally concerned with arguments – for or against the existence of God, for or against the idea that humans possess free will, for or against the idea of an objective and absolute system of morality, etc. The first question to be asked of any argument (or inference) is whether or not it is valid: that is, does its conclusion really follow from the cited premises?

Validity of inference is the central problem of deductive logic. Logic has universal scope: different disciplines have different ways of garnering information (the way that we arrive at a scientific theory is different from the way that we arrive at an axiom in mathematics or a thesis in philosophy), but the way that we reason deductively from that information is the same no matter what the discipline.

The key to answering some other formal questions that often arise in philosophy – such as whether a position (set of assumptions and claims) is consistent (let alone true) – is also provided by deductive logic.

This section of the course covers first a simple system called propositional or truth-functional logic, which despite its simplicity captures a great range of important arguments and provides a formal articulation of the key notions of validity and consistency. The main system covered, however, is (first order) predicate logic, which is powerful enough to capture not only simple inferences but also those involved in philosophy and the sciences.

The final section of this part of the course investigates more systematically how the formal techniques provided by these systems of logic relate to the invariably more informal arguments found in philosophy (and ordinary discourse).

2. Probability. In a valid deductive argument, the conclusion must be true if the premises are. Many inferences that we make, however, conclude only that a certain claim is probable (or more probable than it would otherwise be). For example, we clearly cannot infer from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data), that she will die early from smoking-related illness, but we can infer that it is much more probable that she will than if she did not smoke.

Issues about probabilities play many roles in current philosophical debates: in decision theory, philosophy of economics, philosophy of physics and many other areas. Building on the axiomatic development of probability that students have covered in ST102, this section of the course will cover elements of probability logic together with some foundational issues. For example, it turns out that there are importantly different notions of probabilities, that is, different interpretations of these axioms. In particular, a subjective interpretation which makes probabilities credences or degrees of belief and objective interpretations which see probabilities as properties of physical events (like the probability of a particular radioactive atom decaying in a given time interval). Some interesting difficulties arise with both interpretations.

The subjective interpretation has been developed into a full-blown and general “Bayesian” account of theory confirmation in science, the essentials of which will also be covered.

3. Formal Philosophical Devices. This final section of the course covers some of the formal, technical ideas that are often presupposed in contemporary philosophical work: this may include the notions of sets and infinities; theories of truth; analyticity and aprioricity; possibility and necessity; and conditionals. Many of these notions have been clarified via analyses of various celebrated paradoxes that will also be covered in this section of the course.

Teaching: 15 hours of lectures and 9 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

There are regular structured exercises on Moodle, as there are now for PH101.

Formative coursework: Students will be expected to produce 10 quizzes and 10 exercises in the MT and LT.

Formative coursework will take the form of a number of computer-based quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the computer-based quizzes, students are required to complete them before a specific deadline; these will be discussed in class. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination. For later sections of the course, exercises will include questions requiring brief essay answers.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

http://plato.stanford.edu/entry/probability-interpret
PH201
Philosophy of Science
This information is for the 2015/16 session.
Teacher responsible: Prof Roman Frigg
Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: None.
Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.
The issues we will tackle are the following. Theory and Observation: Hume’s problem of induction and Goodman’s new riddle of induction, Popper’s falsificationism, underdetermination of theory by evidence, the positive instance account, Bayesianism. Theories and laws: the received view of theories, the semantic view of theories, the regularity view of laws, law idealism, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and the no miracles argument, inference to the best explanation, antirealism and the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume’s, Mill’s, Mackie’s accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton’s physics.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.
Formative coursework: Students will be expected to write 2 formative essays per term, submit a few short answer questions before each class/seminar, and participate in class discussion.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
PH213
Scientific Revolutions: Philosophical and Historical Issues
This information is for the 2015/16 session.
Teacher responsible: Prof John Worrall LAK 3.02
Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: No prior systematic knowledge of physical and biological science is presupposed.
Course content: The course examines a number of fundamental issues in philosophy of science, as they arise from instances of important theory-changes (so-called ‘scientific revolutions’) in the history of science. It is therefore by no means a ‘straight’ course in history of science: it looks at historical episodes to test and/or illustrate philosophical theses about science and its development.
1. The Copernican revolution: the switch from the Ptolemaic geocentric view of the world to the Copernican heliocentric one was probably the greatest revolution in human thought ever: What justified the switch? Was Ptolemaic theory definitively refuted by the data? Was Copernican theory simpler? Was the Church’s view that Copernican theory should only be thought of as an instrument for calculating astronomical data purely theologically motivated or does it have some scientific rationale? What role was played in the eventual acceptance of the Copernican view by predictive success? Do we need to invoke social or other non-intellectual factors to explain why this ‘revolution’ occurred?
2. Galileo: Galileo and the telescope: are all observations ‘theory-laden’ and does this mean that there is a subjective element to all theory-choices? Galileo and the argument for his law of free fall: can theories be ‘deduced from the phenomena’?
3. The Newtonian revolution: What was the relationship between Newton’s theory and Kepler’s and Galileo’s laws? What does this tell us about theory-change in general?
4. 19th Century revolutions in Optics: the switches from the corpuscular theory to the wave theory of light and from the wave theory to the electromagnetic theory. What do these cases of theory-change tell us about the twin theses of scientific rationality and scientific realism?
5. The Darwinian Revolution: This revolution certainly ranks alongside the Copernican one in terms of its impact on man’s view of himself. But debates about the scientific credentials of Darwin’s
theory began immediately on the publication of Darwin’s work and continue to this day. Is Darwinian theory unfalsifiable (or even just one big tautology)? Can 'scientific’ creationists explain everything that Darwin can?; What objections were raised by Darwin’s critics to particular aspects of Darwinian theory? Were these valid objections and, in so far as they were, have they been resolved?

**Teaching:** 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

**Formative coursework:** Students will be expected to write two essays per term of 1500 words maximum, and to give class papers.

**Indicative reading:** Background reading: T S Kuhn, The Structure of Scientific Revolutions; Imre Lakatos ‘Falsification and the Methodology of Scientific Research Programmes’ in his The Methodology of Scientific Research Programmes, Philosophical Papers 1; G Holton (revised by S Brush): Theories and Concepts in Physical Science. Recommended reading: The central text for the first part of the course is T S Kuhn, The Copernican Revolution, Harvard University Press; the central text for part 5 is Philip Kitcher: Abusing Science: the case against Creationism. MIT Press. There will be lecture slides on each topic including (i) a list of essential reading and suggestions for further reading and (ii) ‘study questions’ to guide your thought. Aside from the above reading for the section of the course on the Copernican revolution, reading for particular topics will be in the form of articles and selections from books. These will be made available through a combination of handouts, course pack and the Offprint Collection.

**Assessment:** Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

---

**PH214**

**Philosophy, Morals and Politics**

This information is for the 2015/16 session.

**Teacher responsible:** Professor Michael Otsuka LAK.3.03 and Dr Susanne Burri LAK.4.02.

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** Michaelmas Term: Morals (Michael Otsuka weeks 1-5; Susanne Burri weeks 6-10)

In weeks 1-5 of MT, Michael Otsuka will discuss the ethics of harming and saving from harm: (i) Should one save the greater number from harm?; (ii) Can contractualism justify the saving of the greater number when and only when we ought to?; (iii) Should one be solely concerned with how badly off people are, or should one also care about inequality?; (iv) Does it make a moral difference that a person is less well off than she could have been? (a.k.a. ‘the non-identity problem’); (v) Why is it permissible to divert a tram so that it runs over one rather than five, whereas it is impermissible to kill a single individual in order to redistribute his vital organs to save the lives of five? (a.k.a. “the trolley problem”).

In weeks 6-10 of MT, Susanne Burri will cover the following topics: (vi) Kantian moral theory I: the project of the Groundwork and the Formula of Universal Law; (vii) Kantian moral theory II: the Formula of Humanity and proper respect for persons; (viii) Aristotelian virtue ethics I: the human good and the Function Argument; (ix) Aristotelian virtue ethics II: practical deliberation and the Doctrine of the Mean; (x) Why be moral? Why do what is right when moral reasons clash with what is in our rational self-interest?

**Lent Term: Politics (Michael Otsuka all ten weeks)**

Lent Term will be devoted to the topics of justice and legitimacy. We will begin with the following questions: What does justice require? Does it demand the redistribution of income from rich to poor in order to create a more egalitarian society? We’ll discuss the answers to these question that John Rawls and Robert Nozick have provided.

Rawls argues that such taxation is just, since it would be endorsed under fair conditions in which people are deprived of knowledge of whether they happen to be rich or poor, talented or unskilled. Nozick argues that redistributive taxation is unjust because on a par with forced labour. In addition, we will consider answers to the following questions: When is it unjust to constrain the liberties of some in order to prevent harm to others? What sort of equality of opportunity for jobs and university places does justice require? Are people entitled to compensation for historical injustices? What are the just conditions of acquisition of unowned natural resources? In answering the last question, we will also draw on the writings of John Locke, whose related views in his Second Treatise on the legitimacy of government we will also consider, along with the Locke-inspired views of Thomas Jefferson.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be required to participate in class discussions and to write two essays per term.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**PH217**

**Set Theory and Further Logic**

This information is for the 2015/16 session.

**Teacher responsible:** Makinson, David

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

**Pre-requisites:** Students must have completed Logic (PH101).

**Course content:** The aim of the course is to help students of philosophy become familiar with naïve set theory, classical logic, and modal logic. From set theory, the course covers ‘working’ set theory as a tool for use in formal reasoning, and also some ‘conceptual’ set theory of philosophical interest in its treatment of infinite sets, cardinals and ordinals. From classical logic, it deals with propositional and first-order inference from both semantic and axiomatic viewpoints, with also some material on first-order theories including celebrated theorems of Tarski and Godel. The material on modal propositional logic presents the main axiomatic systems and their analysis using relational models. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** In each term, students are required to submit solutions to two problem-sets, and write one essay on a topic selected from a list or proposed by the student and approved by the instructor.

**Indicative reading:** Textbooks: Makinson, David 2012 Sets, Logic and Maths for Computing, 2nd edition. Springer; Cameron, Peter 1999 Sets, Logic and Categories. Springer; Sider, Theodore 2010 Logic for Philosophy. Oxford University Press. Remark: Specific sections of these three texts that are relevant to weekly topics will be indicated on the Moodle page for the course.

Complementary reading: Crossley, John 1972 What is Mathematical Logic? (Dover reprint 1991); Goble, Lou ed 2001 The
PH220
Scientific Method and Policy

This is the information for the 2015/16 session.

Teacher responsible: Dr Katie Steele

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, and BSc in Philosophy and Politics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Policy decisions should be responsive to our best evidence. But what does this mean? How should we negotiate conflicting sources of evidence? And whose responsibility is it to link policy and evidence?

These questions concern the quality, strength and relevance of the available evidence with respect to a given policy question. This is a central issue in the evidence-based policy-and-medicine movement. Are randomised controlled trials really the gold standard? Can evidence be statistically significant without being scientifically or practically significant, and vice versa? What is the role of quantitative versus qualitative evidence in establishing causal claims? How do general causal claims bear on individual cases, and vice versa? Can some evidence be disregarded due to cultural and political biases?

The second topic concerns the roles and responsibilities of scientists, policy-makers and citizens alike in enhancing evidence-based policy making. What does it mean to say that there is a scientific consensus? Does expert knowledge of scientists constitute a threat to democratic processes? What is the Precautionary Principle and does it provide a way forward when there is little evidence available? To what extent should individual rights be compromised to enable scientific research? What issues arise when scientists interpret and measure ethically-loaded concepts like poverty, well-being or bio-diversity? Is science a ‘public good’ and what does this mean for how it should be managed?

Examples referred to in the course are drawn from various areas of science in policy-making, including climate, conservation, international development, poverty, education, and health.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays and 1 presentation in the MT and LT.

Assessment: Exam (67%), duration: 2 hours) in the main exam period.

PH221
Problems of Analytic Philosophy

This is the information for the 2015/16 session.

Teacher responsible: Dr Peter Dennis LAK2.01

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Pre-requisites: PH103 Reason, Knowledge and Values.

Course content: Short description: Some central topics in metaphysics, epistemology, the philosophy of mind and the philosophy of language and language. Topics may vary by year. More detailed description: The rise of analytic philosophy likely be remembered as one of the most significant revolutions in the history of the subject. The introduction of new and powerful methods transformed old problems and uncovered new ones, exercising the minds of some of the greatest philosophers of all time. These include early founders such as Gottlob Frege, G.E. Moore, Bertrand Russell, Ludwig Wittgenstein, and Elizabeth Anscombe, as well as more recent practitioners such as Donald Davidson and Hilary Putnam. So successful has it been that the vast majority of philosophy departments in the English-speaking world today would describe themselves as ‘analytic’.

This course offers a snapshot of some of the deepest and most enduring problems of analytic philosophy, covering its four core areas: philosophy of language, philosophy of mind, epistemology, and metaphysics. By gaining familiarity with classic and contemporary texts in analytic philosophy, students will be encouraged to seek answers to questions such as the following. Language: What is the relationship between language and reality? How do words ‘pick out’ objects in the world? Is meaning ‘in the head’? What is truth? And could you have thoughts if you didn’t already speak a language? • Readings from Gottlob Frege, Bertrand Russell, Hilary Putnam, and Ludwig Wittgenstein.

Mind: What are minds? What is the relationship between minds and brains, and how do mental events cause physical ones? How does consciousness emerge from matter? And do the objects of thought extend beyond the contents of our own minds? • Readings from Donald Davidson, J.J.C Smart, and David Chalmers.

Epistemology: We look at some foundational issues underlying epistemology such as: What is perceptual experience? Is there a ‘gap’ between experience and reality? Can we ever know the contents of another person’s mind? • Readings from A.J. Ayer, John Searle, Paul Snowdon and J.M. Hinton.

Metaphysics: What is time? Is there any real difference between causes and effects, and if so how are they related? What makes you a different person from me, and what (if anything) makes you the same person throughout your life? • Readings from David Lewis, Peter van Inwagen, Elizabeth Anscombe, and Derek Parfit.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Lectures are taught alongside PH501 postgraduate students.

Formative coursework: Students will be expected to participate actively in their classes and to write 3 formative essays, each with a 2000 word limit. None of these may be a draft of the summative assignment.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH222
Philosophy and Public Policy
This information is for the 2015/16 session.
Teacher responsible: Dr Alexander Voorhoeve, Prof Michael Otuka, Dr Katie Steele and Dr Peter Dennis
Availability: This course is compulsory on the BSc in Politics and Philosophy. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as: 1. What is well-being, how is it measured, and how should it be measured? 2. When, if ever, is paternalism justified? 3. What is the role of personal responsibility in determining people’s claims on public resources? 4. When, if ever, is equality in the distribution of goods (such as health, income, or well-being) important? 5. How should we evaluate risks of harm and chances of benefit to people? 6. When is it permissible to harm others in self-defence? 7. What are our rights to freedom of expression? 8. Is torture ever justified? 9. What are the limits on privacy? 10. What moral principles govern our treatment of non-human animals?
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.
Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay and 1 exercise in the LT.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH227 Half Unit
Genes, Brains and Society
This information is for the 2015/16 session.
Teacher responsible: Prof Andrew Buskell
Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Pre-requisites: None.
Course content: This course introduces issues in bioethics, neuroethics, philosophy of biology, and philosophy of psychology. It demonstrates how philosophical tools can help make sense of the complex problems arising at the intersection of human beings’ evolved nature and the social structures humans have erected. The course will challenge conceptions as to what human beings are, and what we, as human beings, might ultimately be responsible for.
Topics covered include:
Human nature: Does the concept of ‘human nature’ have any biological basis? Can we distinguish between those traits that are part of ‘human nature’ and those which are not? What might the evolutionary history of human beings as social agents have to tell us about ‘human nature’?
Disability: How do we determine whether an individual is disabled or not? Does the recognition of an individual as disabled change their moral status? Does society bear some responsibility for the care of disabled individuals, and in what way?
Sex and gender: Are ‘sex’ and ‘gender’ the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are they explained by genes or by culture? And should we reconcile ourselves to these differences, or should we try to eliminate them?
Race: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of ‘race’ have a future, or will human societies soon become racially undifferentiated?
Responsibility and Social Structure: Are problems with racism, sexism, and disability systemic, societal problems? Or, by contrast, are they the result of biased, racist, and sexist individuals? How are we to enact changes to society on these different conceptions of the root cause(s)?
Teaching: 10 hours of lectures and 10 hours of classes in the LT.
Formative coursework: One essay (1,500 words)

PH225 Half Unit
Business and Organisational Ethics
This information is for the 2015/16 session.
Teacher responsible: Dr Susanne Burri
Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This introductory course to business and organisational ethics introduces different approaches to normative theorising, explains how these approaches relate to standard ways of managerial and economic decision-making, and discusses to what extent business professionals should think of themselves as bound by moral requirements. The course is divided into three parts. The first part raises normative questions about the structure in which firms operate, including questions about the proper scope of markets and distributive justice. The second part outlines a framework for incorporating moral principles into the decision-making of business professionals. The third part focuses on firms and corporations as units of moral concern, with a particular focus on their role in international and global affairs. Topics discussed include the significance of international labour standards, how business professionals should respond to practises like bribery and insider trading, and how responsibility is properly distributed between corporate and individual actors.
Teaching: 10 hours of lectures and 10 hours of classes in the LT.
Formative coursework: One essay of 1500 words.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

**Assessment:** Exam (67%, duration: 2 hours) in the main exam period. Essay (33%, 1500 words).

**PH228** Half Unit

**Emotion, Cognition and Behaviour: Science and Policy**

This information is for the 2015/16 session.

**Teacher responsible:** Andrew Buskell.

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course provides an introduction to the (i) philosophical and (ii) scientific foundations of contemporary cognitive science with a particular focus on its (iii) ethical, social and political implications. No background in either philosophy or cognitive science is required.

**Topics covered include:**

- Part I: Kinds of Minds
  - Animals and associations: What kind of cognitive capacities do we share with animals? Which of these capacities, if any, are still operational in human thought? Might human cognition be simpler than we suppose?
  - Thought as computation: What does it mean to say that thought is ‘computational’? What is getting computed, and how? Are there limits to the ‘computer’ analogy?
  - Part II: Modelling Minds
    - ‘Dual-process’ theories of cognition: Do cognitive processes come in ‘fast’ and ‘slow’ varieties? Is the mind partitioned into two systems? Or is the true picture more complicated than this?
    - The boundaries of thought: Are thoughts wholly ‘in the head’? How might they extend beyond it? Where does cognition begin and end?
  - Part III: Implications and Applications
    - Emotion and morality: Is explicit moral reasoning nothing more than the after-the-event rationalization of snap judgements made in the emotional heat of the moment? If so, where does that leave ethics?
    - Implicit bias: Could we be unaware of our own racial and gender biases? Are we responsible for the decisions they influence? And is there anything we can do about them?
    - Happy societies: Should policymakers attempt to increase or improve the happiness of society? What would this mean, and how would we go about enacting such a policy?
    - Cognitive enhancement: What are the prospects for enhancing human cognitive capacity by technological means? What are the ethical limits? Are there any?

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT.

**Formative coursework:** One formative essay and comments on a draft of the assessed essay.

**Assessment:** Exam (67%, duration: 2 hours) in the LT week 0. Essay (33%, 1500 words).

**PH229** Half Unit

**Not available in 2015/16**

**Global Justice**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alice Obrecht

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

**Course content:** This course addresses normative challenges that arise from globalization with a particular focus on the global economy. In doing so it raises foundational questions in moral and political philosophy (e.g., about the grounds and scope of justice), it reflects questions of method (e.g., about how to do empirically informed normative theory able to guide the action of real world actors), and tackles applied public policy issues (e.g., of how to make the international financial system more just). The course is divided into three parts. The first part examines how principles and values traditionally used to morally assess the political and economic institutions of domestic society apply beyond the nation state. The questions discussed include: What are normatively significant differences between the domestic basic structure and the international order? Do conditions of coercion or reciprocal cooperation give rise to obligations of distributive justice? Do individuals possess human rights simply in virtue of being human, or should we think of such rights as arising within particular political practices? The second part focuses on particular aspects of global capitalism and its institutions. Beginning with the problem of global poverty, which raises empirical and normative questions about the nature of both the interactions and obligations between various actors in the global economy, the course explores what moral principles apply to the practice of global trade, the international financial system and the distribution of natural resources. The third part explores different ways of bringing the global economy in line with the normative requirements that apply to it. Particular attention will be given to questions like: What is the promise of international taxation as an instrument for making the global order more just? Under what circumstances, if any, may the victims of global injustices resort to violence and war as a means of bringing about justice? How should policy makers balance the need for short-term improvements with the aspiration of long-term transformation?

**Teaching:** 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** 2 formative essays.

**Assessment:** Exam (67%, duration: 2 hours) in the main exam period. Essay (33%, 2000 words) in the ST.

**PH230** Half Unit

**Einstein for Everyone: From time travel to the edge of the universe**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Bryan Roberts

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit.
permit and to General Course students.

**Pre-requisites:** There are no prerequisites for this course; it is accessible to students of all backgrounds.

**Course content:** Does the universe have an edge? Is time travel possible? What is a black hole, and should we be worried about experiments at the LHC creating them? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein’s theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. The topics of the course will include: 1) Relativity: Slowing clocks, shrinking rods, and the relativity of simultaneity; 2) Spacetime: Thinking in 4-dimensions, faster-than-light travel, and other philosophical issues; 3) Non-Euclidean thinking: Beyond the geometry of Euclid, measuring curvature, gravity as curved spacetime; 4) Cosmology: Our place in the universe, big bang cosmology, time travel; 5) Limits of space and time: Geometry, black holes, singularities.

Students will learn to apply these conceptual tools to the analysis of space, time, and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory. One is often faced with unsubstantiated declarations about the implications of Einstein’s theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves.

Einstein for Everyone requires absolutely no background in physics or maths. Students are only required to learn two equations, which Einstein for Everyone provides.

**Assessment:** Exam (100%, duration: 2 hours) in the LT week 0.

**PH232**  **Half Unit**

**Physics and the City: From Quantum Jumps to Stock Market Crashes**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Bryan Roberts

**Availability:** This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** There are no prerequisites for this course; it is accessible to students of all backgrounds.

**Course content:** One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? What role should analogy play in physical and financial modelling?

The course will proceed at a conceptual level that is suitable for students of all backgrounds. We begin by introducing the concept of atoms and of the random walk, and investigate the role it played in the development of quantum theory and particle physics. We then explore how random walks and other models used in physics are applied in financial models, and analyse some of the philosophical issues underlying this practice.

**Teaching:** 10 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Weekly problem sets and short discussion questions submitted through Moodle and for review in classes.

**Indicative reading:** Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Derman, E. *My Life as a Quant*. Excerpts.
- Norton, John D. *Einstein for Everyone*. Chapters 34-37 on Brownian motion and the origins of quantum theory.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**PH311**

**Philosophy of Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Joseph Mazor CONNAUGHT 3.01 and Dr Alexander Voorhoeve LAK 401

**Availability:** This course is compulsory on the BSc in Philosophy and Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Economics A (EC100).

Intermediate microeconomics and/or public economics recommended but not required for the material in the Michaelmas Term of the course.

Although it is a third-year course, second-year students can take it with permission.

**Course content:** The first term, ‘Welfare Economics’, covers several topics in the analysis of public policy, including efficiency and its critics; optimal taxation and its critics; cost-benefit analysis; public goods; externalities; fair prices; paternalism and behavioural economics; and the ethics of the discount rate.

The second term falls into three parts.

Part A: ‘The Value of Economic Models’ focuses on questions in the philosophy of science, including, ‘Does it matter that economic models have false assumptions?’; and ‘What makes for a good (or bad) model?’

Part B: ‘Markets and Morals’ covers key historical thinkers on the moral advantages and disadvantages of market institutions. We will also cover contemporary debates on the moral limits of markets, focusing especially on the question which goods ought (not) to be for sale.

Part C: ‘New Interdisciplinary Research’ discusses new research that draws on both disciplines.

**Teaching:** 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 2 essays in the MT and 1 essay and 2 presentations in the LT.

PH341 Not available in 2015/16

Philosophy, Politics and Economics: Applications

This information is for the 2015/16 session.

Teacher responsible: Dr Alexander Voorhoeve LAK 401

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students. Available only to fourth-year PPE students.

Pre-requisites: The course will be available only to 4th-year PPE students.

Course content: This course will draw on concepts, theories and findings from Philosophy, Politics and Economics to tackle questions faced by decision-makers in public and private institutions. Each week will focus on a case study. Students will be expected to have had some prior exposure to the issues in previous courses—this course will stand out by being more interdisciplinary, in-depth and practical. Questions covered may include:

1. What measure(s) should governments use as the ‘currency of distributive justice’? We will look at merits and drawbacks of various ‘currencies’ (including subjective satisfaction, the capability approach, the ‘equivalent incomes’ approach, and quality-adjusted life-years) and how they have been used.

2. How should we measure inequality and poverty? We will look at merits and drawbacks of various measures in the light of both (i) the nature of reasons to be concerned with inequality and poverty, and (ii) practical concerns.

3. How, if at all, should governments aid the disadvantaged ‘at home’? We will consider the merits and drawbacks of conditional versus unconditional transfer programmes.

4. Should public services be provided for free ‘in kind’ or should citizens be granted ‘vouchers’ which they can ‘top up’ with their own money?

5. How should priorities be determined in aiding the global poor? We will consider whether efforts should be guided by where they will ‘do the most expected good’ or whether they ought instead to be directed to reforming unjust institutions.

6. What are the moral limits of markets? We will consider what kinds of goods can be traded for money and which goods ought to remain ‘market-inalienable’.

7. How can governments permissibly shape a person’s choices for his own good? We will consider the justifiability of the use of ‘traditional’ paternalistic instruments such as taxes and prohibitions and the use of ‘nudges’.

8. How should one respond to the ‘Democratic Trilemma’, i.e., the conflict between three central demands on good democratic procedures: ‘robustness to pluralism’, ‘majoritarianism’, and ‘collective rationality’? Discussion will centre on the merits and demerits of the various types of democracy that result from giving up each of these demands.

9. When people disagree, what are the conditions under which a consensus can be achieved and how desirable is it to do so? We will consider some of the epistemic and moral reasons for and against reaching a consensus and consider how some public organisations proceed in the face of disagreement.

10. How can and should collective action problems be resolved? We will consider the nature of the obligations to address collective action problems and the ways in which they may be solved.

11. Why limit immigration? We will consider the moral reasons for and against limits on immigration and immigration’s political and economic consequences.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

The lectures will present theories and findings from the three disciplines relevant to the policy issue being studied in that week; they will also give the outline of a real-world case study. Classes will devote some time to clarifying concepts, theories and findings, but will focus especially on the practical policy question posed by the case study. At least three classes will involve team debates, in which students are assigned to teams which must argue for a particular solution to the dilemma posed by the case study. Two of these classes will be formative, and one summative.

Formative coursework: Students will be expected to produce 2 essays and 2 presentations in the MT and LT. Students will write at least two 2,000-word formative essays. At least twice, students will be assigned to a debate team, which must together present a case in class for a particular resolution of a policy dilemma. Feedback on these essays and the presentation will help prepare students for the final, summative essay and final, summative presentation.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (30%, 2000 words) in the ST. Presentation (20%) in the LT.

The grade for the presentation will normally be the same for all members of the presentation team. This is to incentivise working effectively together. Students will have two summative team presentations first before the formative one, so will have time to learn to work together effectively and get guidance from the class teacher where needed. All other marks are individual.

PH399

Dissertation in Philosophy

This information is for the 2015/16 session.

Teacher responsible: Dr Marie Milofsky

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Course content: The dissertation may be on any topic for which a suitable supervisor in the Philosophy department can be found.

Selection of topic

Candidates should have the subject of their dissertation approved
by their supervising member of department.

**Arrangements for supervision**
The dissertation is an opportunity to do extended independent research and writing and to present this work to one's peers. It should reflect the candidate's own views but must develop out of some established part of the philosophical literature. Students should carefully discuss their topic and approach with their supervisor who will also advise on reading and give feedback on written work. Students must have regular meetings with their supervisor, submit written work regularly, and keep a formal record of their work and progress. Students must also present an early version of their argument to fellow students and will be given feedback on the quality of their presentation as well as on the content of their arguments.

**Teaching:** 1 hour of seminars in the MT. 20 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the MT, 2 essays and 1 presentation in the LT, and 1 piece of coursework in the ST.
The formative coursework sets out several steps towards the dissertation: a literature review (due in MT); a first 2,000 words (due in week 1 of LT), a subsequent 3,000 words (which may be in part a revision of the first 2,000 words), due in week 5 of LT, a presentation of the student's arguments in LT, and a full draft of the dissertation, due in week 1 of ST. All written coursework must be submitted by email to both the student's supervisor and the teacher responsible. Students who fail to submit this coursework on time may be barred from submitting the dissertation. Participation in the weekly seminar and the quality of the presentation will determine 10% of the final mark for the course.

**Assessment:** Dissertation (90%, 7,000 words) in the ST.
Class participation (10%).
Dissertations must be submitted by 5pm June 2nd. They should be 5,000-7,000 words, and should be typewritten.

---

**PS203**

**Not available in 2015/16**

**Societal Psychology: Theory and Applications**

This information is for the 2015/16 session.

**Availability:** This course is available on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** This course discusses major areas of application of social psychology to real-world issues. Emphasis is put on the complexities of translating theory into practice and on the theoretical developments which are prompted by research on topical social issues. A recurrent theme is the reciprocal interaction between theory and practice in relation to social issues of theoretical interest and practical importance. The interplay of theory and practice will be examined in relation to selected topics which illustrate the application of social psychology in real world settings, such as: crime and anti-social behaviour; mass media; gender and sexuality; evolution and social relationships; identity and community; prejudice and racism; language and communication; religion and cultural beliefs.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Attendance at all classes and submission of all set coursework is required.

**Formative coursework:** Students are expected to write four essays during the Session, which will be assessed by the class teachers, and to give class presentations. These will not count towards the final examination result.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**The Foundations of Social Policy**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Isabel Shutes OLD 2.46

**Availability:** This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and...
SA101
Sociology and Social Policy

This information is for the 2015/16 session.

Teacher responsible: Professor Lucinda Platt OLD 2.25

Availability: This course is compulsory on the BSc in Social Policy and Sociology. This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to sociological ideas and thinking, and how they link to key illustrative social policy issues. The course is organised around certain major social policy concerns such as: inequalities in health, labour markets, and education; social stratification and social segregation; housing provision and neighbourhood deprivation; ethnic and racial inequalities; families, care and ageing, which are then related to key classical and contemporary theoretical perspectives and concepts that have been used to describe and explain them, such as theories of class and status, social control, gender and the division of labour, socialisation and intergenerational transmission, identity and belonging, urbanisation, globalisation and risk.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: One essay in the Michaelmas term.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 1500 words) in the LT.

SA103
Introduction to Global Population Change

This information is for the 2015/16 session.

Teacher responsible: Dr Tiziana Leone OLD2.56

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Environment and Development, BSc in Environmental Policy, BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is also an option for second and third year students in social policy and outside the department, where the regulations permit.

Pre-requisites: As a general introduction to Population Studies, it assumes no previous knowledge of the subject.

Course content: The course is concerned with inter-relationships between the population characteristics of a society (fertility, mortality and migration) and their economic and social context. Both the causes of population change and their consequences are examined. The approach of the course is comparative across time and space: it covers population issues across the developed and developing world, and examines trends over time in both regions. The course will address key global debates which include: is population growth sustainable; what is the relationship between population size and available resources; what are the social, biological and economic influences on population growth rates, especially the role of famine, disease and war. What role have family planning programmes in decreasing population size; is ageing a threat. A wide range of topics is covered, including the demographic and health transitions; HIV/AIDS; fertility decline; the changing characteristics of the family; global trends in population ageing and their social and economic consequences for the elderly; theories and trends in migration; urbanisation.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to prepare at least one class presentation per term and submit two essays per term.

Indicative reading: Detailed reading lists are provided at the beginning of each term. Key overview texts include: M Livi-Bacci, A Concise History of World Population; H Jones, Population Geography; E A Wrigley, Population and History; W Lutz, The Future Population of the World.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
SA104
Social Economics and Policy
This information is for the 2015/16 session.
Teacher responsible: Dr Kitty Stewart OLD 2.36 and Prof David Piachaud OLD 2.64
Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Places on this course are limited to 45 and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first-come first-served basis to students from outside the department. If you would like to take SA104 as an outside option, please contact the Undergraduate Programme Manager who will be able to advise you on availability (contact details available on the Social Policy web pages).
This course is not available to third year students.
Pre-requisites: No prior knowledge of economics is required.
Course content: This course has two parts. The first part introduces basic economic concepts and principles and discusses their application to different social policy areas. It covers the concepts of supply and demand, externalities and market failure, private insurance and social insurance, and quasi-markets, and looks at the economics of health care, social care, housing, education and the environment. The second part analyses the distribution of household income and the drivers of poverty and inequality, including unemployment, low wages and wage inequality. It covers concepts of human capital and productivity and looks at a range of policy responses, including minimum wage legislation, trade union policy, government economic management, taxation and the social security system.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.
Formative coursework: Four formative essays will be required during the year, and students will be expected to make at least two presentations to the class.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA201
Research Methods for Social Policy
This information is for the 2015/16 session.
Teacher responsible: Prof Eileen Munro OLD 2.46 and Prof Amanda Sheely OLD 1.10
Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Teaching: The course combines two elements: SA201.1 Data Analysis for Social Policy: Dr A Sheely.
Lectures: 10 x SA201.1. Classes: 10 x SA201.1.
Weeks 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 (LT).
SA201.2 Research Methods for Social Policy: Professor E Munro & Dr I Shultz
Lectures: 11 x SA201.2. Fortnightly Classes: 10 x SA201.2.
Weeks 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 (LT); and one revision class (ST).
Formative coursework: For the Research Methods class, students work in small groups on a research project of their choice and then write individual essays on an aspect of this exercise of 2,000-3,000 words. Participation in group work in class and preparation for classes is essential.
For the Data Analysis class, students will use a computer to
of crime and its control in contemporary society. It begins by considering different conceptualisations of crime, and its measurement, before critically examining the multiple ways in which crime patterns are understood by the public, politicians, the media, and criminologists. These understandings are used to explore particular crime types such as white collar crime, drugs, and violent crime. Next the course explores the impact of major social divisions - such as gender, age, ethnicity, class and community - on the social distribution of crime and considers how these patterns influence political responses to controlling crime. Lastly, the course selects key controversies in controlling crime, focusing on criminal justice agencies such as the police and considering sentencing practices of imprisonment and community punishment and restorative justice.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
In Weeks 6 of MT and LT there will be a reading week.
In ST there will be a revision lecture, class and mock examination.
Formative coursework: Two non-assessed essays will be required. Students will be expected to do the reading associated with the classes.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA105
Crime and Society
This information is for the 2015/16 session.
Teacher responsible: Dr Coretta Phillips OLD M2.27
Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course introduces students to the study
analyse data, and will be expected to produce summaries and interpretations of their results. Students are also expected to submit an essay based on a past exam question at the beginning of the Lent term. Completion of a project report (Individual Project) is a condition of examination entry.

Assessment: Exam (50%), duration: 3 hours) in the main exam period.

Project (50%) in the LT.

The Individual Project topic will be given out early in the LT and the project must be handed in to the Undergraduate Administrator in the last week of the LT.

SA204 Not available in 2015/16

Education Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Anne West OLD 1.16

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to General Course students.

Course content: This course provides an introduction to the main issues in educational policy. It draws on interdisciplinary research literature and focuses on contemporary Britain although there is a comparative and international component. The course aims to show how major concepts in social policy can be applied to the study of education, for example, inequality, social justice and distribution of resources. The course focuses on broad issues of educational policy, including the 1944 Education Act, the 1988 Education Reform Act, the 1998 School Standards and Framework Act and the 2010 Academies Act. It also explores specific issues that have implications for equality of opportunity, equity and social justice: social class, ethnicity/race and gender, special educational needs/disability and financing education across different phases of education – early years, schools and higher education.

Teaching: 20 hours of seminars in the MT. 15 hours of seminars in the LT. 3 hours of seminars in the ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA217

Psychology of Crime and Criminal Justice

This information is for the 2015/16 session.

Teacher responsible: Teacher responsible TBC

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This is a recommended course for BSc Social Policy and Criminology.

Course content: The course examines the contribution that psychology has made to our understanding of crime and criminal justice. It explores what psychological theory and research have to tell us about the causes of crime and the ways in which we respond to such behaviour.

Particular attention is paid to the development of individual criminality and criminal careers; drug and alcohol related crime; varieties of criminal behaviour including violence, sexual crime and stalking; mental disorder and crime; victims and victimisation; fear of crime and public attitudes towards punishment; offender profiling and criminal investigation; eye witness testimony and legal decision making; rehabilitation and imprisonment.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. There will be a reading week in the MT and LT. In addition one revision class will take place in the ST.

Formative coursework: One essay per term (MT and LT) will be required.

Assessment: Exam (100%, duration: 3 hours) in the ST.

SA218

Criminological Perspectives

This information is for the 2015/16 session.

Teacher responsible: Dr Coretta Phillips OLD M2.27

Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course critically analyses the key features of a broad range of theories developed to explain patterns of social order in society and to illuminate the nature of the ‘crime problem’. It will additionally consider the theories of punishment from the late eighteenth century to the present day.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST. In Weeks 6 of MT and LT there will be a reading week.

Formative coursework: Three essays will be required. Students will be expected to do the reading associated with the classes and may be asked to give one presentation per term.

Assessment: Exam (100%, duration: 3 hours) in the ST.

SA219

Comparative and International Social Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Timo Fleckenstein OLD1.17

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other
programmes where regulations permit. This course is not available to General Course students. **Pre-requisites:** This course is available to students on other degrees who have completed Foundations of Social Policy (SA100). **Course content:** The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments. The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective. **Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST. **Formative coursework:** Students are expected to submit one piece of non-assessed written work and are expected to read for and prepare contributions to class discussion each week. **Indicative reading:** K Armington & G Bonoli (Eds), The Politics of Post-Industrial Welfare States (2006); F Castles, The Future of the Welfare State (2004); J Clasen, Reforming European Welfare States (2004); B Deacon, Global Social Policy and Governance (2007); I Gough & G Wood (Eds), Insecurity and Welfare Regimes in Asia, Africa and Latin America (2004); L Hantrais, Social Policy in the European Union (2007); J Lewis, Work-Family Balance, Gender and Policy (2009); P Taylor-Gooby (Ed), New Risks, New Welfare (2005). **Assessment:** Exam (100%), duration: 3 hours in the main exam period.

---

**SA221 Poverty, Social Exclusion and Social Change**

This information is for the 2015/16 session.  
**Teacher responsible:** Prof Amanda Sheely  
**Availability:** This course is available on the BSc in Environment and Development, BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.  
**Course content:** The course will examine the definition, measurement and causes of poverty and social exclusion in general and analyse selected aspects drawn from the following: social and demographic change, gender and racial inequality, homelessness and housing deprivation, unemployment, worklessness, social security and poverty, area deprivation, educational inequality, crime and social exclusion.  
**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.  
**Formative coursework:** A minimum of two written essays will be required from students and each student will be asked to make a short presentation for discussion in class at least once each term.  
**Assessment:** Exam (75%), duration: 3 hours in the main exam period. Essay (25%, 1500 words) in the ST.

---

**SA222 Implementing Social Policy: From Principles to Practice**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Steen Mangen (MT and ST); Professor Lucinda Platt (LT)  
**Availability:** This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.  
**Course content:** The course is divided into three parts. The first deals with various approaches to theorising about the state in terms of what each implies for its role in interventions in the area of collective social welfare and the social values on which these are based. Particular attention is played to the interplay between preferences for interventions by the state, the individual and family and the market. The second part deals with issues involved in translating these values and policies into practice - the implementation of social policy. Concepts like need, entitlement, solidarity, merit and redistribution are addressed. The final part examines evidence of the economic and social impact of policies in selected welfare areas.  
**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Plus revision session in the ST.  
**Formative coursework:** Each student will be required to submit an essay to the class teacher at the end of the MT and LT. Students will be required to give individual and group presentations in class.  
**Assessment:** Exam (100%), duration: 3 hours in the main exam period.

---

**SA223 Health and Social Care Policy**

This information is for the 2015/16 session.  
**Teacher responsible:** Prof Martin Knapp COW 4.03  
**Availability:** This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.  
**Course content:** The course covers the foundations of health and social care policy, including a number of key policy issues in the UK, the USA and elsewhere. In the first term, students will be introduced to the main dimensions of and challenges facing health and social care systems today. These include the concepts of need and demand for health and social care; mortality and morbidity trends; financing and payment of providers; health and behaviour; models of reform in the delivery of health and social care; and the US and UK health and social care systems. In the second term, the course will look at a number of specific areas, including mental health policy; choice and personalisation; child protection; pharmaceuticals policy; prevention and public health.
health, health inequalities; performance assessment; evaluation; and health technology assessment.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

**Formative coursework:** One essay of 1000 words (excluding references) and a one hour mock exam.

**Assessment:** Exam (100%; duration: 3 hours) in the main exam period.

### SA250 Demographic Description and Analysis

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Moshi Herman (office TBA)

**Availability:** This course is available on the BSc in Business Mathematics and Statistics, BSc in Environmental Policy, BSc in Management Sciences, BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology, BSc in Social Policy with Government and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Assumes no previous knowledge of the subject. The course is not particularly mathematical or statistical and students with non-mathematical backgrounds should not be at a disadvantage.

**Course content:** This course provides an introduction to the techniques of demographic analysis and the interpretation of demographic data. The main style of presentation is to introduce and discuss techniques of analysis and then examine examples of their use to illustrate demographic concepts and trends. Topics covered include sources of information about demographic data; period and cohort methods of description and analysis; the construction of life tables; measurement of fertility, mortality, nuptiality and migration; the determinants of age structure and the intrinsic growth rate; use of survey data; the interpretation of demographic statistics; population dynamics and population projection.

**Teaching:** 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

**Formative coursework:** Two formative essays (one in MT and one in LT).

### SA302 Assessing Social Progress

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Stephen Jenkins OLD2.29

**Availability:** This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Demonstrated familiarity with research methods to at least the level of SA201 (Research Methods for Social Policy) or equivalent.

**Course content:** The course aims to facilitate student understanding of key issues in assessing social progress. ‘Assessing’ is shorthand for developing a critical understanding of the relevant concepts and their policy relevance, practical issues associated with data collection and monitoring, and the policy implications of different findings. ‘Social progress’ is shorthand for ‘are we getting better off?’. There are many potential benchmarks that could be used for answering this question: comparisons with the past, with other countries, or with some absolute standards (e.g. meeting some basic needs). And at the personal level, one might compare one’s self relative to other people within your ‘society’. There are multiple domains that are relevant too: ranging from conventional summary measures such as income to life satisfaction and happiness, employment, health, housing and education. Much information about ‘social progress’ already incorporated in official statistics (from national and international agencies), and in more specialist academic analysis. But other interpretations of what social progress exist and are not routinely incorporated in existing monitoring exercises, and some say they should be. The course aims to reflect this diversity – to critically analyse both existing approaches and others that have been proposed. The course starts with relatively conventional approaches to assessment including macroeconomic indicators such as GDP and cross-national comparisons, income and work, and then considers newer approaches and related measures. The course also considers progress in several specific life domains. For each of the topics considered, the course addresses a specific question relating to social progress. In providing answers to the question, the course considers, from a critical perspective, relevant analytical approaches, data sources and empirical findings, and also discusses policy implications.

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

**Formative coursework:** Two formative essays (one in MT and one in LT).

Social Progress. Download the report from the link under the ‘European Commission’ heading at http://ec.europa.eu/eurostat/ci/portal/vlayout?p_l_id=118054&p_v_l_s_g_id=0

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA309
Crime Control: Ideas and Controversies

This information is for the 2015/16 session.
Teacher responsible: Dr. Leonidas Cheliotis, OLD M2.22
Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The purpose of the course is to provide students with an understanding of, and critical perspective on, key debates in contemporary crime control policy. The course examines the emergent features of current responses to problems of crime and social order, focusing in particular on issues such as: policing and security; crime prevention and surveillance; youth, crime and control; drugs policy; and punishment. Attention is given to both historical and comparative perspectives, together with analyses of developments in current government policy.

Teaching: Lectures x 19; Classes x 19, MT and LT, plus one revision class (ST).

Formative coursework: One essay per term (MT and LT) will be required.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

SA320
Comparative and International Social Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Timo Fleckenstein OLD1.17
Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is available to students on other degrees who have completed Foundations of Social Policy (SA100) and Implementing Social Policy: From Principles to Practice (SA222).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments.

The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Plus revision session in the ST.

Formative coursework: Students are expected to submit one piece of non-assessed written work and are expected to read for and prepare contributions to class discussion each week.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

SA349
A Long Essay on an Approved Topic

This information is for the 2015/16 session.
Teacher responsible: Departmental Tutor, Department of Social Policy.
Availability: This course is compulsory on the BSc in Social Policy. This course is available on the BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is not available as an outside option nor to General Course students.

Course content: An essay of not more than 8,000 words on a topic to be approved by the candidate's academic advisor. It is designed to allow a detailed and thorough exploration of an area of interest to the student. The essay should be a dissertation on a topic area within the field of the degree programme; it may involve original fieldwork, or the analysis and appraisal of existing literature.

Teaching: 5 hours of lectures in the MT.

Students will have preliminary discussions about the topic of their essay with their academic advisor in the ST of their second year. They will pursue their long essay under the supervision of their new academic advisor during the third year of their studies. There will also be a total of five support sessions taught in weeks 2-6 of the MT.

Formative coursework: Students will agree with their academic advisor and submit to the departmental tutor, a final title for the essay by Friday 4th December 2015 in the third year. Academic advisors can be expected to offer advice on reading, guidance on the construction of the work, and comment on an initial draft, which should be handed in before the end of the LT.

Indicative reading: Students will be expected to draw extensively from the reading they have done throughout their programme of study, to read such specific materials as may be recommended by their academic advisor and, most importantly, to identify for themselves such additional literature as may be required for their studies. Students might in the first instance wish to consult H Dean, ‘Doing projects in social policy’, in P Alcock, et al (Eds) The Student’s Companion to Social Policy, Fourth Edition, Blackwell, 2012.

Assessment: Essay (100%, 8000 words) in the ST.

Students in the third year must submit their essay to the Undergraduate Administrator in the first week of ST. The exact date and time will be notified in the LT. It should be typewritten. Precise details on format and presentation will be issued by the Department at the beginning of the third year of study. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the essay is the candidate’s own work.
SO100
Social Theory
This information is for the 2015/16 session.
Teacher responsible: Prof Chetan Bhatt TW3.8.02A
Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Business Mathematics and Statistics, BSc in International Relations and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course aims to introduce students to sociological theory by examining the work and ideas of six key thinkers in social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also apply their analysis to contemporary social issues.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.
Reading weeks: week 6 MT and week 6 LT.
Formative coursework: Four 2,000 word formative essays (two in MT; two in LT), for feedback from class teachers.
Indicative reading: A detailed reading list will be available at the first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, The Problem of Sociology; Z Bauman, Thinking Sociologically; S Bruce, Sociology: A Very Short Introduction.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
Attendance at all classes and submission of all set coursework is required.

SO102
Statistics in Society
This information is for the 2015/16 session.
Teacher responsible: Dr Jouni Kuha COL 8.02 and Dr Fabien Accominotti STC S206
Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course explores how numbers are deployed in social settings, and how they are used in sociology to construct and challenge our understanding of the social world. The first part of the course (taught by Fabien Accominotti) introduces students to the importance of quantification in modern societies, familiarizes them with the main instruments for the collection of quantitative data, and provides them with an overview of the methods used to treat such data in contemporary sociology. We cover both descriptive and explanatory methods, and we reflect on the vision of the social world implicitly associated with each of the methods we encounter. In the second part (taught by Jouni Kuha) students start learning basic descriptive skills of quantitative data analysis, notably how to download large data sets, how to manipulate variables and carry out descriptive statistical analyses with statistical software Stata, and how to present statistical information in tabular and graphical form.
Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the MT. 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.
Reading weeks: week 6 MT and week 6 LT.
Formative coursework: One 2000 word essay asking students to reflect on the changing use of quantitative data in social scientific research. Two practical exercises demonstrating basic knowledge of data processing and descriptive statistical analysis using statistical software.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.
Essay (50%, 3000 words) in the ST.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO110
Power, Inequality, and Difference: Contemporary Themes in Sociology
This information is for the 2015/16 session.
Teacher responsible: Dr Suki Ali STC S102
Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Social Policy and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The course provides an introduction to different substantive areas of work in contemporary sociology. Students will gain an understanding of leading-edge research within the discipline worldwide. The sociological problems covered in the course can vary from year to year. They normally include: Class, power and inequality; Race, ethnicity and multi-culturalism; Nation states, war and conflict; Money, markets and work; Identity, cosmopolitanism, nationalism and religion; Gender, sexuality and the body; Crime, punishment and deviance; Family and the lifecycle; Health, illness and biomedicine.
Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.
Reading weeks: week 6 (MT) and week 6 (LT)
Formative coursework: Two formative essays in MT, one formative essay in LT.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
examining why similar countries can develop very different social
and economic policies. In addition we will examine some of
the founding writings of Marx, Weber and Tocqueville and critically
assess the use of political concepts. Throughout the course we
will consider some of the main theoretical approaches that are used
in the study of political sociology.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.
4 hours of lectures and 4 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: At least one class presentation and a
termly paper in both MT and LT.

Indicative reading: R Dalton, Citizen Politics, 5th edn; G Esping-
Andersen, The Three Worlds of Welfare Capitalism; E. Gellner,
Nations and Nationalism; A Giddens, Capitalism and Modern Social
Theory; R Inglehart, Culture Shift in Advanced Industrial Society; J
Manza & C Brooks, Social Cleavages and Political Change; F. Piven
and R. Cloward, Poor People's Movements; D. Rueschemeyer et al,
Capitalist Development and Democracy; T Skocpol, States and Social
Revolutions; S Tarrow, Power in Movement.

Assessment: Exam (70%, duration: 3 hours) in the main exam
period.

Essay (30%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets
attached to each, to be handed in to the Administration Office,
S116, no later than 16:30 on the first Thursday of Summer Term.
An additional copy to be uploaded to Moodle no later than 18:00
on the same day.

Attendance at all classes and submission of all set coursework is
required.
clinical trials. The course aims to develop an understanding of key AIDS, disability, reproductive technologies, pharmaceuticals and political economies of health care. Indicative topics explored within experiences; health inequalities within the UK and globally; and the thematic areas of inquiry include: medicine as a social institution; crime, deviance and control.

Course content: This course encourages students to think about and debate some of the major issues in Criminology. We explore the social construction of crime and deviance; the different sources of information about them; key factors that shape patterns, perspectives and experiences of crime and deviance, including social class, gender, ethnicity and the media; and different Criminological theories that have been used to explain crime and deviance. We also explore elements of social control including policing and prisons.

Teaching: 12 hours of lectures and 9 hours of classes in the MT. 13 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Lectures are one hour each, apart from five two-hour lectures in weeks 4 and 6 of MT and weeks 3, 5 and 8 of LT.

Formative coursework: Students are required to complete two formative essays – one in MT and one in LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period. Attendance at all classes and submission of all set coursework is required.

SO210 Not available in 2015/16

Crime, Deviance and Control

This information is for the 2015/16 session.

Teacher responsible: Dr Janet Foster S218a

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course encourages students to think about and debate some of the major issues in Criminology. We explore the social construction of crime and deviance; the different sources of information about them; key factors that shape patterns, perspectives and experiences of crime and deviance, including social class, gender, ethnicity and the media; and different Criminological theories that have been used to explain crime and deviance. We also explore elements of social control including policing and prisons.

Teaching: 12 hours of lectures and 9 hours of classes in the MT. 13 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Lectures are one hour each, apart from five two-hour lectures in weeks 4 and 6 of MT and weeks 3, 5 and 8 of LT.

Formative coursework: Students are required to complete two formative essays – one in MT and one in LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period. Attendance at all classes and submission of all set coursework is required.

SO211 Sociology of Health and Medicine

This information is for the 2015/16 session.

Teacher responsible: Dr Kay Inckle STC S110

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to the sociology of health and illness. It focuses on the social, economic, political, ethical and subjective aspects of health and healing. Key thematic areas of inquiry include: medicine as a social institution; the social, political and cultural parameters that shape illness experiences; health inequalities within the UK and globally; and the political economies of health care. Indicative topics explored within these thematic areas include: chronic illness, mental health, HIV/AIDS, disability, reproductive technologies, pharmaceuticals and clinical trials. The course aims to develop an understanding of key issues in medicine and society that are empirically grounded and theoretically engaged, thereby introducing students to the social bases of health and illness. To achieve this, the course combines traditional learning with additional exercises. Exercises may include conducting an interview with a health professional and visiting the Wellcome Museum.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Students will be expected to produce three essays of 1,000-1,500 words due in Weeks 5, 10 and 15. A mock exam will be held in Week 20.

Assessment: Exam (50%, duration: 3 hours) in the main exam period. Essay (50%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18.00 on the same day.

Attendance at all classes is required. Submission of all set coursework is compulsory.

SO212 Work, Management and Globalization

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick Mcgovern STC S119E

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Social Policy and Sociology, BSc in Sociology and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Coverage of contemporary sociological perspectives on the employment relationship, labour market divisions, change at work, globalization and labour. The employment contract; theoretical perspectives on the employment relationship; control and consent at work; scientific management and McDonaldization; labour market divisions; women in the labour market; discrimination at work; the changing employment relationship; work-life conflict; self-managing teams; management gurus; globalization, transnational corporations and labour; immigrant workers.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One essay and one class paper per term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: K Grint, The Sociology of Work (3rd edn); M Noon & P Blyton The Realities of Work (4th edn); C Tilly & C Tilly, Work under Capitalism; P Dicken Global Shift (4th edn). A more comprehensive bibliography will be available to students taking this course.
Assessment: Exam (70%, duration: 3 hours) in the main exam period. Essay (30%, 2500 words) in the ST. Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all classes and submission of all set coursework is required.

SO221
Researching London: Methods for Social Research

This information is for the 2015/16 session.
Teacher responsible: Dr Sam Friedman STC S216
Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course will provide students with a first understanding of research design issues and a dynamic introduction to research methods through practical exercises in the context of London's social life.
- By the end of the course students will:
  - understand the key role of research design for conducting original empirical social research. In particular, taking into account relevant extant literature, they will develop a research question of their own interest and identify appropriate research method(s) to address it.
  - Have engaged with practical research strategies and methods including the design of questionnaires, conducting structured and semi-structured interviews, ethnographic observation, and documentary and web based sources in the context of London.
  - Have a sense of the urban sociology of London and a first-hand experience of its potential for exploring contemporary social issues.
  - Be able to analyse different kinds of data, using quantitative methods, grounded theory, and visual analysis.
  - Be able to assess the different methodological strategies employed on the basis of measurement concepts such as reliability, validity and generalizability.
  - Understand the ethical issues involved in social research.
  - Have developed a research proposal which will inform and strengthen their dissertation design.
Teaching: 25 hours of workshops in the MT. 25 hours of workshops in the LT.
Reading weeks: week 6 MT and week 6 LT.
Formative coursework: There are two pieces of formative assessment which will be marked and on which you will get feedback in the Michaelmas Term (MT).
Assessment: Essay (20%, 1500 words) and presentation (20%) in the LT.
Research proposal (60%) in the ST.
Two hard copies of each assessment, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessment, a qualitative interview transcript and 1,500 word essay (20%), is due by the first Thursday of Lent Term. The second assessment, a group presentation (15 slides maximum) based on the agreed group survey (20%), will be carried out in Lent Term. Each group presentation will be marked in class by both the course convenor and the group GTAs, who will then discuss and moderate marks after all the group presentations took place. Marks will take into account the work done by each group in the previous six weeks (questionnaire design, survey data collection and data analysis) as well as the clarity of the presentation itself. The third assessment, a 2,000 word research proposal (60%), is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each assessment is due. Attendance at all workshops and submission of all set coursework is required.

SO224
The Sociology of Race and Ethnicity

This information is for the 2015/16 session.
Teacher responsible: Dr Suki Ali STC S102
Dr Nazia Hussein STC S207
Availability: This course is available on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Optional Course for BSc Sociology for 2nd and 3rd years and the Diploma in Sociology.
Course content: The course provides an introduction to theoretical, historical and contemporary debates around race, racism and ethnicity. It firstly explores the main theoretical perspectives which have been used to analyse racial and ethnic relations, in a historical and contemporary framework. It then examines in more detail the areas both theoretical and lived within our contemporary social and political climate where analyses of ‘race’, racism, culture, belonging and identity are urgently needed, focusing primarily on Britain, Europe and the US. Topics include: race and ethnicity in historical perspective; race, class and gender multiculturalism; diaspora and hybridity; whiteness; mixed race; race, disease and contamination; race and the senses; race and popular culture; urban multiculturalism and the street; race, riots and youth culture; community cohesion; Muslim identities; asylum and new migrations; the Far Right and the white working class.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.
Reading weeks: week 6 (MT) and week 6 (LT)
Formative coursework: Reading logs in addition to formative essay.
Assessment: Exam (30%, duration: 2 hours) in the main exam period.
Essay (45%, 2000 words) in the ST.
Other (25%) in the LT.
Two hard copies of each assessment of 2000 words, with
submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessed literature review is due on the first Thursday of Lent term and the second assessed essay is due by the third Thursday of Summer Term. An additional copy of each assessment is to be uploaded to Moodle no later than 18:00 on the same day each essay is due. Attendance at all classes and submission of all set coursework is required.

SO230 Not available in 2015/16
Digital Technology, Speed and Culture
This information is for the 2015/16 session.
Teacher responsible: Prof Judy Wajcman S203
Availability: This course is available on the BSc in Sociology.
This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, speed, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including information and communication technologies, robotics, cyborgs, sex, and weapons.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.
Formative coursework: Students will be expected to prepare one essay per term of 1500 – 2000 words and at least one presentation per term.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (30%, 2000 words) in the ST.
Attendance at all classes and submission of all set coursework is required.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S200, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO231 Half Unit
Knowledge, Power, and Social Change
This information is for the 2015/16 session.
Teacher responsible: Dr Leon Wansleben STC208
Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.
Course content: The aims of the course are threefold: First, the course will provide an introduction to how key sociological theories reflect upon the nature of knowledge in society; it will thereby strongly connect to other theory courses. Second, it will explore knowledge and expertise as critical dimensions in the study of different empirical areas of interest, such as politics, the state, social movements; and media discourse. Third, the course will provide a forum for thinking about the role of our own sociological knowledge outside the university.
By the end of the course, students will be able to question the taken-for-grantedness of authoritative knowledge, understandings of knowledge, and the knowledge claims of experts. Second, students will be able to examine, evaluate, both in written and oral form, theories and debates within the sociology of knowledge.
Thirdly, students will be able to explore knowledge production and dissemination in contemporary society and develop corresponding sociological research projects (case studies) related these issues.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 case study and 1 essay in the MT.
Assessment: Essay (100%, 3000 words) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO302
The Sociological Dissertation
This information is for the 2015/16 session.
Teacher responsible: Prof Francine Tonkiss STC S114 and Dr Claire Moon STC S109
Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.
Course content: The project is to be in the form of an essay on a sociological topic to be approved by the Department of Sociology. The purpose is to allow the student to study in depth an interest of his or her own choosing. Many approaches are possible in the work for the Dissertation, but there are three main variants: original fieldwork, secondary analysis, and literature review.
Selection of topic
The topic must be within the general field of sociology and should fall within the range of competence of a member of the staff, normally a member of the Sociology Department. However, it need not be chosen from those areas of sociology which are at present taught within the Department. Students may follow up a theme suggested to them by their coursework, but the topic must allow
the material and arguments to be developed in greater depth than is possible in the lectures and seminars for the course.

**Arrangements for supervision**
The Dissertation Workshop meets formally during the first and second terms. Students should consult their academic advisors throughout the year in order to self-assess progress and resolve general issues related to their projects. The role of the academic advisor is not to give detailed instruction, but to suggest ways of tackling or limiting a topic, lines of enquiry and preliminary reading; their suggestions are not intended to be seen as exhaustive or definitive. How far the student can use and develop the help that he or she is given is, to a large extent, what the examination of the essay is concerned with. The third year academic advisor should not help with planning or writing the essay in detail, but may read and comment critically on an outline or a draft section if the student submits one.

**Teaching:** 15 hours of seminars in the MT. 15 hours of seminars in the LT.

**Reading weeks:** week 6 MT and week 6 LT.

**Formative coursework:** One coursework submission each term is a course requirement.

**Assessment:** Research project (90%) in the ST.
Presentation (10%) in the MT.

**Assessment Particulars:**
Two hard copies of the 10,000 word dissertation must be submitted to the Sociology Administration Office, Room S116, by 4.30pm on the second Thursday of ST, with a third copy posted to Moodle by 18:00 on the same day. Accidental loss of data or text on a computer will not be accepted as a reason for non-submission.

---

**SO308 Personal Life, Intimacy and the Family**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ursula Henz STC S100B

**Availability:** This course is available on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Course content:** The course provides an overview over the area of family sociology, drawing predominantly on literature about Britain and other Western societies. The course focuses on recent and ongoing transformations of families, family relationships and family life. Throughout the course various theoretical approaches will be considered. Issues related to gender, ethnicity and migration will be cross-cutting themes of the course. Indicative topics are: family structures and family relationships; childhood, adolescence, partnership formation, childlessness, motherhood, fatherhood, divorce, post-divorce families, intergenerational ties, family violence, family and work, family and social inequality.

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

**Reading weeks:** week 6 MT and week 6 LT.

**Formative coursework:** At least one class presentation and two formative essays (1,500 words each).

**Assessment:** Essay (50%, 2500 words) and project (50%, 3500 words) in the ST.

Two hard copies of the assessed essay and the research report, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term and the fourth Wednesday of Summer Term, respectively. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

---

**SO309 Half Unit**

**Atrocity and Justice**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Claire Moon STC S109

**Availability:** This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students. Sociology students will be given priority.

**Pre-requisites:** No specific pre-requisites, but this is open only to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

**Course content:** The course will cover a number of issues relevant to the study of atrocity and justice for atrocity. It looks at the social construction of atrocities, the Genocide Convention, structural approaches to understanding genocide (modernity, democracy and colonial rule), the perpetrators. victims and witnesses of atrocity, the problem of denial of state crimes, historical injustices in Australia, Canada and the US, forensic investigations of atrocity, retributive and restorative approaches to justice for atrocity, truth commissions and war crimes tribunals.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Formative assessment will be as follows:
1. Class presentation: students will conduct one class presentation and will receive detailed feedback which will focus on points for improvement for the assessed components;
2. Practice essay: students will carry out one practice essay during week 6 (reading week) of the LT. They will receive detailed feedback for this in preparation for the summative assessments.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
ST102 Elementary Statistical Theory

This information is for the 2015/16 session.
Teacher responsible: Dr James Abdey COL.7.09
Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Econometric History, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
This course cannot be taken with ST107 Quantitative Methods (Statistics).
Pre-requisites: A-level Mathematics
No previous knowledge of statistics is assumed.
Course content: The course provides a precise and accurate treatment of introductory probability theory, statistical ideas, methods and techniques. Students will also be exposed to the MINITAB statistical package. Topics covered are descriptive statistics, introduction to probability theory, random variables, some common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA), linear regression and other statistical tests.
Teaching: 22 hours of lectures, 9 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 11 hours of classes and 11 hours of workshops in the LT. 2 hours of lectures and 1 hour of classes in the ST.
Students will finish off new material or revise in week 11.
Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.
Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Larsen R. J. and Marx, M. L. (2011) *An Introduction to Mathematical Statistics and Its Applications* (5th edition), Prentice Hall (earlier editions are also fine).
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Exam (25%, duration: 1 hour) in the LT week 0.

ST107 Half Unit

Quantitative Methods (Statistics)

This information is for the 2015/16 session.
Teacher responsible: Dr Nicholas Cron COL.2.04 and Dr Wicher Bergsma COL.6.06
Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
The course is designed for students without a strong background in Mathematics, e.g. without A level Mathematics, and is suitable for students who wish to learn basic statistical methods for analysing social science data. This course cannot be taken with ST102 Elementary Statistical Theory, ST107 Quantitative Methods (Statistics) or ST103 Statistical Models and Data Analysis.
Pre-requisites: A grade B in GCSE Mathematics or equivalent.
No background in statistics is required.
Teaching: 14 hours of lectures, 8 hours of classes and 2 hours of computer workshops in the MT. 20 hours of lectures, 10 hours of classes and 2 hours of computer workshops in the LT. 3 hours of lectures and 3 hours of classes in the ST.
Students will have a two hour computer workshop in week 6.
Indicative reading: Notes will be provided and form the basic reading material. Pointers will be given to further reading.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Continuous assessment (30%) in the MT and LT.
At least a pass mark is required for both assessment components (i.e., the exam and the continuous assessment).

ST201 Half Unit

Statistical Models and Data Analysis

This information is for the 2015/16 session.
Availability: This course is available on the BSc in Accounting and Finance and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.
Also available to students who have studied statistics and mathematics to the level of MA107/ST107 Quantitative Methods.
Not to be taken in conjunction with ST203 Statistics for Management Sciences (Full unit).

Teaching: 20 hours of lectures and 16 hours of computer workshops in the LT. 4 hours of lectures in the ST. Students will be given their assessed project to start on in week 6 which is due in at the end of LT.

Formative coursework: Moodle quizzes and a Quantitative research project.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Coursework (20%) in the LT.

ST202
Probability, Distribution Theory and Inference

This information is for the 2015/16 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.6.10 and Dr Matteo Barigozzi COL.7.11

Availability: This course is compulsory on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students who have not taken these courses should contact Dr Kalogeropoulos or Dr Matteo Barigozzi.

Course content: The course covers the probability, distribution theory and statistical inference needed for third year courses in statistics and econometrics.

Teaching: 20 hours of lectures, 9 hours of seminars and 2 hours of help sessions in the MT. 20 hours of lectures in the ST. 10 hours of lectures in the LT. 2 hours of lectures in the ST. There will be revision classes in week 11.

Indicative reading: S L Lohr, Sampling: Design and Analysis. (2nd Ed. 2010)
F J Fowler, Survey Research Methods (4th Ed. 2009)
S. Albright, WL Winston & CJ Zappe, Managerial Statistics.

DH Hildebrand and RL Ott Statistical Thinking for Managers.

Assessment: Exam (80%, duration: 3 hours) in the main exam period.
Coursework (20%) in the MT and LT.

ST203
Statistics for Management Sciences

This information is for the 2015/16 session.

Teacher responsible: Dr Sara Geneletti Inchauste COL.7.04

Availability: This course is compulsory on the BSc in Business Mathematics and Statistics. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with: ST201 Statistical Models and Data Analysis, or ST205 Sample Surveys and Experiments

Pre-requisites: Students must have completed Quantitative Methods (Statistics) (ST107) and Quantitative Methods (Mathematics) (MA107).

Course content: A second course in statistics encompassing a wide range of practical issues from the design of surveys and data collection to building models and making inferences. Computer packages used throughout.

Teaching: 20 hours of lectures, 9 hours of classes and 2 hours of workshops in the MT. 20 hours of lectures and 16 hours of computer workshops in the LT. 2 hours of lectures in the ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

ST205 Half Unit
Sample Surveys and Experiments

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Skinner COL.7.13

Availability: This course is compulsory on the BSc in Business Mathematics and Statistics. This course is available on the BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

For students who have studied mathematics and statistics to the level of MA107/ST107 Quantitative Methods or SA201 Research Methods for Social Policy. Not to be taken with ST203 Statistics for Management Sciences (full unit).

Course content: Sampling methods for social surveys. Survey design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: 20 hours of lectures, 9 hours of classes and 2 hours of workshops in the MT.
There will be a revision session in week 11.

**Formative coursework:** Weekly exercises and group presentations.

**Indicative reading:** S L Lohr, Sampling: Design and Analysis. (2nd Ed. 2010)
F J Fowler, Survey Research Methods (4th Ed. 2009)

**Assessment:** Exam (80%), duration: 2 hours) in the main exam period.
Coursework (20%) in the MT.

---

**ST211**  **Half Unit**

**Applied Regression**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Sara Geneletti Inchauste COL.7.04

**Availability:** This course is compulsory on the BSc in Business Mathematics and Statistics. This course is not available as an outside option nor to General Course students.

**Course content:** Tabulation, Graphical representation, Regression, Detection of outliers, Model diagnostics, Analysis of Variance.

**Teaching:** 10 hours of lectures and 20 hours of lectures in the LT.
2 hours of lectures in the ST.

Students will be given their assessed project to start on in week 6 which is due in at the beginning of ST.

**Formative coursework:** Weekly moodle quizzes.

**Assessment:** Exam (50%), duration: 2 hours) in the main exam period.

Project (50%) in the ST.

---

**ST226**  **Half Unit**

**Actuarial Investigations: Financial**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Angelos Dassios COL.6.14

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

**Course content:** The application of compound interest techniques to financial transactions. Describing how to use a generalised cash-flow model to describe financial transactions such as a zero coupon bond, a fixed interest security, an index-linked security, cash on deposit, an equity, an interest only loan, a repayment loan, an annuity certain and others. The time value of money using the concepts of compound interest and discounting. Accumulation of payments and present value of future payments. Expressing interest rates or discount rates in terms of different time periods. Real and money interest rates. The calculation of the present value and the accumulated value of a stream of equal or unequal payments using specified rates of interest and the net present value at a real (possibly variable) rate of interest, assuming a constant rate of inflation. Compound interest rate functions; definitions and use. Equations of value with certain and uncertain payments and receipts; conditions for existence of solution. Describe how a loan may be repaid by regular instalments of interest and capital; flat rates and annual effective rates. Calculation of a schedule of repayments under a loan and identification of the interest and capital components of annuity payments where the annuity is used to repay a loan for the case where annuity payments are made once per effective time period or p times per effective time period and identify the capital outstanding at any time. Discounted cash flow techniques and their use in investment project appraisal; internal rate of return, discounted payback period, money-weighted rate of return, time-weighted rate of return, linked internal rate of return. The investment and risk characteristics of fixed-interest Government borrowings, fixed-interest borrowing by other bodies, shares and other equity-type finance derivatives. The analysis of compound interest rate problems; the present value of payments from a fixed interest security where the coupon rate is constant and the security is redeemed in one instalment, upper and lower bounds for the present value of a fixed interest security that is redeemable on a single date within a given range at the option of the borrower, the running yield and the redemption yield from a fixed interest security, the present value or yield from an ordinary share and a property, given simple (but not necessarily constant) assumptions about the growth of dividends and rents, the solution of the equation of value for the real rate of interest implied by the equation in the presence of specified inflationary growth, the present value or real yield from an index-linked bond, the price of (or yield from) a fixed interest security where the investor is subject to deduction of income tax on coupon payments and redemption payments are subject to the deduction of capital gains tax.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.
There will either be a reading week and a take home mock exam in week 6 or a reading week focussing on the relation of the course to real life applications in week 6. Students will decide.

**Formative coursework:** Compulsory written answers to one set of problems. An activity on the relation of the course to real situations or a mock exam will take place in week 6.

**Assessment:** Exam (100%), duration: 3 hours) in the LT week 0.

---

**ST227**  **Half Unit**

**Survival Models**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Erik Baurdoux COL.6.04

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

**Course content:** An introduction to stochastic processes with emphasis on life history analysis and actuarial applications. Principles of modelling, model selection, calibration, and testing; Stochastic processes and their classification into different types by time space, state space, and distributional properties; construction of stochastic processes from finite-dimensional distributions, processes with independent increments, Poisson processes and renewal processes and their applications in general insurance and risk theory, Markov processes, Markov chains and their applications in life insurance and general insurance, extensions to more general intensity-driven processes, counting processes, semi-Markov processes, stationary distributions. Determining transition probabilities and other conditional probabilities and expected values; Integral expressions, Kolmogorov differential equations, numerical solutions, simulation techniques. Survival models - the random life length approach and the Markov chain approach; survival function, conditional survival function, mortality intensity, some commonly used mortality laws. Statistical inference for life history data; Maximum likelihood
estimation for parametric models, non-parametric methods (Kaplan-Meier and Nelson-Aalen), regression models for intensities including the semi-parametric Cox model and partial likelihood estimation; Various forms of censoring; The technique of occurrence-exposure rates and analytic graduation; Impact of the censoring scheme on the distribution of the estimators; Confidence regions and hypothesis testing. 

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. 
3 hours of lectures and 1 hour of seminars in the ST. 

Students on this course will have a reading week in week 6 where they will be given review exercises to work on based on the first 5 weeks of the course. 

**Formative coursework:** Compulsory written answers to two sets of problems. 

**Indicative reading:** S Ross, Stochastic Processes; R Norberg, Risk and Stochastics in Life Insurance; The Institute of Actuaries, Core reading Subject CT4. For full details of the syllabus of CT4, see [http://stats.lse.ac.uk/angelos/guides/2004_CT4.pdf](http://stats.lse.ac.uk/angelos/guides/2004_CT4.pdf).

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period. 

---

**ST300** Half Unit 

**Regression and Generalised Linear Models** 

**This information is for the 2015/16 session.** 

**Teacher responsible:** Dr Wai-Fung Lam COL 6.09 

**Availability:** This course is compulsory on the BSc in Statistics with Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. 

**Pre-requisites:** Students must have completed Elementary Statistical Theory (ST102) and Probability, Distribution Theory and Inference (ST202). 

**Course content:** A solid coverage of the most important parts of the theory and application of regression models, generalised linear models and the analysis of variance. Analysis of variance models; factors, interactions, confounding. Multiple regression and regression diagnostics. Generalised linear models; the exponential family, the linear predictor, link functions, analysis of deviance, parameter estimation, deviance residuals. Model choice, fitting and validation. The use of a statistics package will be an integral part of the course. The computer workshops revise the theory and show how it can be applied to real datasets. 

**Teaching:** 10 hours of lectures and 9 hours of classes in the MT. 
10 hours of lectures and 10 hours of classes in the LT. 

Week 6 reading week in MT will be for revision of taught materials, while week 6 reading week in LT will be for your project completion. 

**Assessment:** Exam (85%, duration: 2 hours) in the main exam period. 

Project (15%) in the LT. 

---

**ST301** Half Unit 

**Actuarial Mathematics (Life)** 

**This information is for the 2015/16 session.** 

**Teacher responsible:** Dr Luciano Campi COL.7.10 

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students. 

**Pre-requisites:** Students must have completed Probability, Distribution Theory and Inference (ST202) and Survival Models (ST227). 

**Course content:** Single life mortality models, assurance and annuity contracts and their actuarial notation, computation of their present values and variances; relations among the present values of the various contracts. 

The equivalence principle: computation of net premiums for the main assurance policies. 

Prospective and retrospective reserves, Thiele’s differential equation as the main tool for the computation of reserves. 

Expenses: gross premium and gross reserves. Selection effect and how it affects mortality tables. 

Multi-life assurance contracts: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts. 

Multi-states mortality models: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts. 

**ST302** Half Unit 

**Stochastic Processes** 

**This information is for the 2015/16 session.** 

**Teacher responsible:** Dr Umut Cetin COL.6.08 

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. 

**Pre-requisites:** Students must have completed Probability, Distribution Theory and Inference (ST202). 

**Course content:** A second course in stochastic processes and applications to insurance. Markov chains (discrete and continuous time), processes with jumps; Brownian motion and diffusions; Martingales; stochastic calculus; applications in insurance and finance. 

Content: Stochastic processes in discrete and continuous time; Markov chains: Markov property, Chapman-Kolmogorov equation, classification of states, stationary distribution, examples of infinite state space; filtrations and conditional expectation; discrete time martingales: martingale property, basic examples, exponential martingales, stopping theorem, applications to random
walks; Poisson processes: counting processes, definition as counting process with independent and stationary increments, compensated Poisson process as martingale, distribution of number of events in a given time interval as well as inter-event times, compound Poisson process, application to ruin problem for the classical risk process via Gerber’s martingale approach; Markov processes: Kolmogorov equations, solution of those in simple cases, stochastic semigroups, birth and death chains, health/sickness models, stationary distribution; Brownian motion: definition and basic properties, martingales related to Brownian motion, reflection principle, Itô integral, Itô’s formula with simple applications, linear stochastic differential equations for geometric Brownian motion and the Ornstein-Uhlenbeck process, first approach to change of measure techniques, application to Black-Scholes model. The items in the course content that also appear in the content of ST227 are covered here at greater depth. However, ST227 is not a pre-requisite for this course.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. 1 hour of seminars in the ST. Week 6 will be a reading week left free for students to revise by themselves.

**Formative coursework:** Compulsory written answers to two sets of problems.

**Indicative reading:** R Durrett, Essentials of Stochastic Processes; T Mikosch, Elementary Stochastic Calculus with Finance in View; Institute of Actuaries core reading notes.

**Assessment:** Exam (100%, duration: 3 hours) in the LT week 0.

---

**ST303 Half Unit Stochastic Simulation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Angelos Dassios COL6.14

**Availability:** This course is available on the BSc in Actuarial Science. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

**Pre-requisites:** Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

While the course ST306 is not a formal pre-requisite some examples from this course will be used. Students that have not taken ST306 might have to do a bit of extra reading to familiarise themselves with them.

**Course content:** An introduction to using R for stochastic simulation as well as methods of simulating random variables, complicated quantities involving several random variables and paths of stochastic processes. Applications will focus on examples from insurance and finance.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT.

- Introduction to R with an emphasis on stochastic simulation.
- Monte-Carlo integration.
- Generating continuous random variables; inverse distribution function method.
- Generating continuous random variables; acceptance rejection method.
- Generating continuous random variables; sums of random variables.
- Generating continuous random variables; other methods. Normal and Inverse Gaussian distributions.
- Generating discrete random variables.
- Generating the paths of stochastic processes; Insurance loss process; Brownian motion; Ornstein-Uhlenbeck process.
- Various applications in insurance and finance.

There will be a Q&A session on practical issues in week 11.

**Formative coursework:** Weekly exercises usually involving computing.

**Indicative reading:**
- Useful reading:
  - Asmussen
  - Glasserman

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

- Project (25%) in the LT.
- Project (25%) in the ST.

---

**ST304 Half Unit Time Series and Forecasting**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Matteo Barigozzi COL.7.11

**Availability:** This course is compulsory on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** 2nd year statistics and probability

**Course content:** The course introduces the student to the statistical analysis of time series data and simple models. What time series analysis can be useful for; autocorrelation; stationarity, trend removal and seasonal adjustment, basic time series models; AR, MA, ARMA; invertibility; spectral analysis; estimation; forecasting; introduction to financial time series and the GARCH models; unit root processes.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6.

**Formative coursework:** Written answers to set problems will be expected on a weekly basis.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**ST306 Half Unit Actuarial Mathematics (General)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Angelos Dassios COL6.14

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

**Course content:** An introduction to actuarial work in non-life insurance. Decision theory concepts: game theory, optimum strategies, decision functions, risk functions, the minimax criterion and the Bayes criterion. Loss distributions with and without limits and risk-sharing arrangements; suitable, moments and moment generating functions, the gamma, exponential, Pareto, generalised Pareto, normal, lognormal, Weibull, Burr and other distributions suitable for modelling individual and aggregate losses; statistical inference. Risk models involving frequency and severity distributions; the basic short-term contracts, moments, moment generating functions and other properties of compound distributions.
Reinsurance treaties; proportional, excess of loss, stop-loss, deriving the distribution, moments, moment generating functions and other properties of the losses to the insurer and reinsurer under all the models above. Ruin theory for continuous and discrete models. Fundamental concepts of Bayesian statistics; Bayes theorem, prior distributions, posterior distributions, conjugate prior distributions, loss functions, Bayesian estimators. Credibility theory; Bayesian models. Experience rating models and applications. Claims reserving: run-off triangles. Monte-Carlo simulation and applications in insurance.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. There will be a reading week and a take home mock exam in week 6.

**Formative coursework:** Compulsory written answers to one set of problems. There will also be a mock exam during week 6.

**Indicative reading:** Notes are given out in the lectures. The Institute of Actuaries, Core reading Subject CT6. For full details of the syllabus of CT6, see: http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

**Assessment:** Exam (100%, duration: 3 hours) in the LT week 0.

---

**ST307 Half Unit**

**Aspects of Market Research**

This information is for the 2015/16 session.

**Teacher responsible:** Dr James Abdey COL.7.09

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Probability and statistics to the level of ST107.

**Course content:** The main ideas and applications of market research techniques. Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, and discriminant analysis.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 1 hour of classes in the ST. Lectures will run in weeks 1-10 and classes in weeks 2-11.

**Formative coursework:** Students are given weekly exercises to work on for discussion in class.

**Indicative reading:** Malhotra, N.K., D.F. Birks and P.A. Wills (2012) Marketing Research: An Applied Research (Fourth edition), Pearson (earlier editions are also fine)

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**ST308 Half Unit**

**Bayesian Inference**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Konstantinos Kalogeropoulos COL.6.10

**Availability:** This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

**Course content:** Statistical decision theory: risk, decision rules, loss and utility functions, Bayesian expected loss, Frequentist risk.

Bayesian Analysis: Bayes theorem, prior and posterior distributions, conjugate models (Normal-Normal, Poisson-Gamma, Beta-Binomial), Bayesian point estimation, credible intervals and hypothesis testing, Bayes factors and model selection. Comparison with Frequentist approaches.

Implementation: Asymptotic approximations (Laplace approximation, Monte Carlo methods, stochastic simulation), Markov Chain Monte Carlo (MCMC) simulation (Gibbs sampler, Metropolis-Hastings algorithm). Computer tools (R, WinBUGS). Illustration via applications in Regression (Linear, ANOVA, Multiple, Generalized Linear Models), Hierarchical Multilevel Models and Time Series.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST. There will be a reading week in week 6.

**Formative coursework:** Optional problem sets and computer exercises.

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

Project (20%) in the ST.

---

**ST312 Half Unit**

**Applied Statistics Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Wicher Bergsma COL.6.06

**Availability:** This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

**Pre-requisites:** Students must have completed Elementary Statistical Theory (ST102).

**Course content:** Students will produce a project involving a critical investigation and collation of statistical data on a topic of their own interest.

**Teaching:** 10 hours of lectures in the MT. 6 hours of lectures in the ST. Students on this course will have a research week in week 6 where they can look up data sources for their assessed project.

**Formative coursework:** Oral presentation at the end of MT.

**Indicative reading:** www.google.com/publicdata
data.worldbank.org

**Assessment:** Project (90%) and presentation (10%) in the ST.

---

**ST327 Half Unit**

**Market Research: An Integrated Approach**

This information is for the 2015/16 session.

**Teacher responsible:** Dr James Abdey COL.7.09 and Mr Karsten Shaw

**Availability:** This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

**Pre-requisites:** Students must have completed one of the following: Elementary Statistical Theory (ST102), Statistics for Management Sciences (ST203), Learning and Quantitative Data (MG205), Analytical Methods for Management (MG202), or
equivalent. Not to be taken with ST307.

**Course content:** The main ideas and applications of market research techniques. ST327.1 Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, discriminant analysis, factor analysis, cluster analysis and conjoint analysis. ST327.2 Case Studies: Students use the information and techniques gained from ST327.1 to carry out a co-operative Market Research Case Study. Individual write up of the Case Study forms part of the assessment.

**Teaching:** 20 hours of lectures and 10 hours of classes in the MT. 6 hours of lectures in the LT. 1 hour of classes in the ST. Lectures will run in weeks 1-10 and classes in weeks 2-11.

**Formative coursework:** Students are given weekly exercises to work on for discussion in class

**Indicative reading:** Malhotra, N.K., D.F. Birks and P.A. Wills (2012) Marketing Research: An Applied Research (Fourth edition), Pearson (earlier editions are also fine)

**Assessment:**
Exam (60%, duration: 2 hours) in the main exam period.
Coursework (25%) in the ST.
Presentation (15%) in the LT.
The assessed Case Study work is split into two parts; a group presentation and an individual piece of coursework.

---

**ST330**

**Stochastic and Actuarial Methods in Finance**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Pauline Barrieu COL 6.03

**Availability:** This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option. This course is available to General Course students.

**Pre-requisites:** Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. Students will work on and submit formative coursework in Week 11 of MT and a revision session will take place in Week 11 of LT.

**Formative coursework:** Written answers to set problems will be expected on a weekly basis. Two sets of hand-in exercises will also be given during the year.

**Indicative reading:** N H Bingham & R Kiesel, Risk Neutral Valuation; A Cerny, Mathematical Techniques in Finance: Tools for Incomplete Markets; J Hull, Options, Futures & Other Derivatives; R Jarrow & S Turnbull, Derivative Securities; D Luenberger, Investment Science; Institute of Actuaries core reading notes, Subject CT8.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.
Diploma Programme Regulations
### Key to Diploma Regulations

(H) means a half-unit course  
(C) means this course is capped  
(n/a 15/16) means not available in the 2015/16 academic year  
(M) means Michaelmas Term  
(L) means Lent Term  
(S) means Summer Term

---

### Diploma in Accounting and Finance

**Programme code:** TDAF

Students must take four courses as shown.

<table>
<thead>
<tr>
<th>Paper</th>
<th>Course number and title</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>FM212 Principles of Finance*</td>
</tr>
</tbody>
</table>
| 2     | AC211 Managerial Accounting or  
|       | AC330 Financial Accounting Analysis and Valuation or  
|       | AC490 Management Accounting, Decisions and Control (H) and  
|       | AC491 Financial Accounting, Reporting and Disclosure (H) |
| 3 & 4 | Courses to the value of two full units from the following:  
|       | AC211 Managerial Accounting or  
|       | AC330 Financial Accounting, Analysis and Valuation (if not already selected under paper 2 above) or  
|       | AC310 Management Accounting, Financial Management and Organisational Control  
|       | AC340 Auditing, Governance and Risk Management  
|       | AC470 Accounting in the Global Economy (H)  
|       | EC201 Microeconomic Principles I  
|       | EC202 Microeconomic Principles II  
|       | EC210 Macroeconomic Principles  
|       | EC313 Industrial Economics  
|       | EC220 Introduction to Econometrics  
|       | MA107 Quantitative Methods (Mathematics) and  
|       | ST107 Quantitative Methods (Statistics)  
|       | LL209 Commercial Law  
|       | MG203 Organisational Theory and Behaviour (formerly ID200) (n/a 15/16)  
|       | EH240 British Business and Economic Performance since 1945: Britain in International Context  
|       | Any other course with the approval of the Programme Director § |

**Notes**  
§ means by special permission only.  
* by special permission of the Course Leaders, students may substitute FM300 Corporate Finance Investments and Financial Markets or FM320 Quantitative Finance.  
This programme is externally accredited by the ACCA. Further information is available on the Department of Accounting website lse.ac.uk/collections/accounting/.
Taught Master’s Programme Regulations
MSc in Accounting and Finance

Programme Code: TMAF

Academic-year programme but may be a full year depending on courses selected. Students must take courses to the value of four units as shown.

Paper | Course number and title
--- | ---
1 | FM430 Corporate Finance and Asset Markets or FM429 Asset Markets A (H) and FM431M Corporate Finance A (H) or FM431L Corporate Finance A (H) or another approved paper*
2 | AC420 Financial Reporting in Capital Markets or AC411 Accounting, Strategy and Control (H) and AC414 Financial Reporting, Capital Markets and Business Combinations (H) or AC414 Financial Reporting, Capital Markets and Business Combinations (H) and AC415 Management Accounting for Decision Making (H) or AC411 Accounting, Strategy and Control (H) and AC415 Management Accounting for Decision Making (H)
3 & 4 | Students should select remaining papers to the value of two full units:
AC411 Accounting, Strategy and Control (H) (if not taken under paper 2)
AC412 Accountability, Organisations and Risk Management (H)
AC415 Management Accounting for Decision Making (H) (if not taken under paper 2)
AC414 Financial Reporting, Capital Markets and Business Combinations (H) (if not taken under paper 2 - cannot be taken with AC420)
AC420 Financial Reporting in Capital Markets (if not taken under paper 2 - cannot be taken with AC414)
AC444 Valuation and Security Analysis (H)
AC470 Accounting in the Global Economy (H)
FM402 Financial Risk Analysis (H)
FM404 Forecasting Financial Time Series (H)**
FM413 Fixed Income Markets (H)
FM421 Applied Corporate Finance (H)
FM440 Corporate Finance Theory (H) (n/a 15/16)
FM441 Derivatives (H)
FM442 Quantitative Methods for Finance and Risk Analysis (H)**
FM445 Portfolio Management (H)
FM447 Global Financial Systems (H)
FM472 International Finance (H)
GY462 Real Estate Finance (H)
LL48K Corporate Crime (H)
LL4BL Financial Crime (H)
MG4D5 Leadership in Organisations: Theory and Practice (H) (formerly ID420)

Any other course *

Students can also take a dissertation in either accounting or finance (students cannot take two dissertations):
AC499 Dissertation
FM499 Dissertation

Notes

Students may elect to have their degree specialisation indicated on their degree certificate. Students who take both AC470 and FM472 as Paper 3 may choose to have MSc Accounting and Finance: International Accounting and Finance on their certificate. Students who take AC411 and AC415 or AC420 as Paper 3 may choose to have MSc Accounting and Finance: Accounting and Financial Management on their certificate. Students taking finance courses to the equivalent of two full units as Papers 3 and 4 may choose to have MSc Accounting and Finance: Finance on their certificate.

* means by special permission only.
** Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.
# MA400 is a prerequisite for this course.
This programme is externally accredited by the ACCA.
Further information is available on the Department of Accounting website lse.ac.uk/collections/accounting/prospectiveStudents/postgraduate/programme/MScAccountingAndFinance.htm.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Accounting, Organisations and Institutions

Programme Code: TMACORIN

Academic-year programme. Students take courses to the value of four units. There is also a pre-sessional course held in the week before MT: AC425 MSc Accounting, Organisations and Institutions: Pre-sessional course.

Paper | Course number and title
--- | ---
1 | AC424 Accounting, Organisations and Institutions
2 | AC490 Management Accounting, Decisions and Control (H) *
AC491 Financial Accounting, Reporting and Disclosure (H) *
3 & 4 | Courses to the value of two units:
AC411 Accounting, Strategy and Control (H)
AC415 Management Accounting for Decision Making (H)
AC414 Financial Reporting, Capital Markets and Business Combinations (H) #
AC420 Financial Reporting in Capital Markets (n/a 15/16)
AC424 Accounting, Organisations and Institutions
AC490 Management Accounting, Decisions and Control (H)
AC491 Financial Accounting, Reporting and Disclosure (H) *

EH463 The Long-Run Analysis of Firms and Industries (H)
EH464 The Historical Context of Business (H)
EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries
EH487 International Economic Institutions since World War I (H)
MG476 Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16)
LL48E Principles of Financial Regulation (H) (n/a 15/16)
LL48F International Financial Regulation (H)
LL48X Corporate Governance - Advanced Topics (H) (n/a 15/16)
SO469 Risk and Governance: A Sociological Approach (H)

Any course with the approval of the Programme Director

Notes

* Students with a substantive and verifiable background in...
accounting must do as Paper 2 either AC420§ or (AC411 and AC414)# or (AC414# and AC415) or (AC411 and AC415).
§ cannot be taken with AC414
# cannot be taken with AC420

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in African Development

Programme Code: TMAFDV

Full-year programme. Students take courses to the value of three full units and a dissertation as shown.

Paper  Course number and title
1  DV418  African Development (H)
    DV435  African Political Economy (H)
2  A choice of:
    DV400  Development: History, Theory and Policy or
    DV431  Development Management or
    A combination of DV442 Key Issues in Development Studies (H) and one of the following:
    DV420  Complex Emergencies (H)
    DV421  Global Health and Development (H)
    DV428  Managing Humanitarianism (H)
3  Courses to the value of one unit not already taken under paper 2 or from the following:
    DV407  Poverty (H)
    DV411  Population and Development: An Analytical Approach (H)
    DV413  Environmental Problems and Development Interventions (H) (n/a 15/16)
    DV415  Global Environmental Governance (H) (n/a 15/16)
    DV423  Global Political Economy of Development (H) (n/a 15/16)
    DV424  International Institutions and Late Development (H)
    DV432  China in Developmental Perspective (H)
    DV433  The Informal Economy and Non-State Governance (H)
    DV434  Human Security (H) (n/a 15/16)
    DV445  Research Themes in International Development (H)
    DV446  Technical Change, Paradigm Shifts and Global Development (H)
    DV447  Public Affairs, International Development and Gendered Violence (H)
    DV453  Humanitarian Consultancy Project (H)
    DV483  Information Technologies and Socio-Economic Development (H)
    DV490  Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (H)
    DV491  Economic Development Policy II: Microeconomic Analysis (H)
    DV492  Economic Development Policy III: Government Policy Analysis (H)
    AN436  The Anthropology of Development (H)
    GI407  Globalisation, Gender and Development
    GI409  Gender, Globalisation and Development: An Introduction (H)
    GI411  Gender, Postcolonialism, Development: Critical Perspectives and New Directions (H) (n/a 15/16)
    GI418  Feminist Economics and Policy: An Introduction (H)
    GI419  Gender and Contemporary Social Movements (H) (n/a 15/16)
    GI420  Globalisation, Gender and Development: Policy and Practice (H)
    GV483  Public Management Theory and Doctrine (H)
    GV4C2  Globalisation, Conflict and Post-Totalitarianism (H)
    GV403  Contemporary Debates in Human Geography (H)
    GV407  Globalization, Regional Development and Policy
    GV408  Local Economic Development and Policy
    GV409  Globalization and Regional Development (H)
    GV410  Economics of Local and Regional Development (H)
    GV421  Gender and Development : Geographical Perspectives (H)
    GV423  Environment and Development
    GV431  Cities, People and Poverty in the South (H) (n/a 15/16)
    GV432  Urban Ethnography (H) (n/a 15/16)
    GV447  The Economics of Regional and Urban Planning (H)
    GV464  Race and Space (H)
    GV467  Global Migration and Development (H)
    GV468  Environment and Development: Sustainability, Technology and Business (H)
    GV469  Environment and Development: Ecosystem Services and the Global South (H)
    IR422  Conflict and Peace Studies (with permission) (n/a 15/16)
    IR461  Islam in International Relations: From Al-Andalus to Afghanistan
    MG402  Public Management: A Strategic Approach (H) (n/a 15/16)
    MG487  Organisational Change (H) (formerly ID431)
    SA492  Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (H)
    SA4E6  Rural Development and Social Studies (with permission) (H) (n/a 15/16)
    SA4F1  Migration: Population Trends and Policies (H)
    SA4H9  Non-Governmental Organisations, Social Policy and Development (H)

Other relevant courses with permission of degree programme and course managers.

MSc in Anthropology and Development

Programme Code: TMANDV

Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at seminars and at non-assessed tutorials is compulsory.

Paper  Course number and title
1  AN436  The Anthropology of Development (H) and either
    AN456  Anthropology of Economy (1): Production and Exchange (H) or
    AN457  Anthropology of Economy: Development (2): Transformation and Globalisation (H)
2  DV400  Development: History, Theory and Policy or
    DV442  Key Issues in Development Studies (H) and
    One half unit in Development (DV4**) from paper 3.
3  One full unit from the following:
    A paper from 1 or 2 above not already taken
    AN402  The Anthropology of Religion
    AN404  Anthropology: Theory and Ethnography
    AN405  The Anthropology of Kinship, Sex and Gender
    AN419  The Anthropology of Christianity (H)
    AN420  The Anthropology of South-East Asia (H)
MSc in Anthropology and Development Management

Programme Code: TMANDVMG

Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at seminars and at non-assessed tutorials is compulsory.

MSc in China in Comparative Perspective

Programme code: TMCIDCP

Full-year programme. Students must take one compulsory course, select optional courses to the value of two units, and write a dissertation, as shown below. Attendance at seminars and at non-assessed tutorials is compulsory.

Students intending to use this degree to convert to a discipline in which they hope to qualify to do a research degree, should choose at least one full unit from the following, subject to approval of the Programme Director and the teacher responsible for the course.

**Notes**
- * This option will not be available to those who have already studied MA300 and MA301, or who have studied this subject as part of an undergraduate degree.
- ** Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.
- *** Students must seek permission from the Department of Finance to take this course. They will be required to complete an online form about their background in mathematics, statistics and economics. The forms will be reviewed and approved or rejected, or a student may be asked to provide more information.

**** Students may not take MA415, MA416 or MA417.

### Paper 1: Course number and title

1. **AN447 China in Comparative Perspective**

2. Courses to the value of one unit from the following:
   - **AN404** Anthropology: Theory and Ethnography
   - **EH482** Pre-Modern Paths of Growth: East and West Compared, 1000-1800
   (Students who do not wish to advance their first degree in one of the disciplines above may take a full unit course from paper 3)

3. Courses to the value of one unit from the following:
   - **AN402** The Anthropology of Religion
   - **AN405** The Anthropology of Kinship, Sex and Gender
   - **AN421** The Anthropology of Industrialization and Industrial Life (H) (n/a 15/16)
   - **AN436** The Anthropology of Development (H)
   - **AN439** Anthropology and Human Rights (H) (n/a 15/16)
   - **AN451** Anthropology of Politics (H)
   - **AN456** Anthropology of Economy (1): Production and

### Paper 2: Course number and title

1. **SO465 City-Making: the Politics of Urban Form (H)**

2. **SO451 Cities by Design (H)**

3. **SO448 City Design: Research Studio**

4. **AN498 Dissertation - MSc China in Comparative Perspective**

### Notes
- * means subject to space

---

MSc in City Design and Social Science

Programme code: TMCIDSS

Full-year programme which can also be taken part-time over three years. Students must take the City Design: Research Studio course, two compulsory half-unit courses, an independent project, and one unit of optional courses.

### Paper 1: Course number and title

1. **SD448 City Design: Research Studio**

2. **SD451 Cities by Design (H)**

3. **SO465 City-Making: the Politics of Urban Form (H)**

4. Courses to the value of one full unit from the following:
   - **GY409 Globalisation and Regional Development (H)**
   - **GY410 Economics of Local and Regional Development (H)**
MSc in Comparative Politics

Programme code: TMCP

Full-year programme. Students must take papers to the value of four full units as shown. All students are required to write a 10,000-word dissertation. Note that some of the courses must be taken together. Part-time students may take up to four courses in their first year. All students, except those opting for No Specialism, must choose one of the following streams: Democracy and Democratization, Nationalism and Ethnic Politics, Comparative Political Economy, Popular Politics, Comparative Political Institutions, Politics of the Developing World, and take a minimum of one full unit from within that stream.

**Notes**

† For students without a first degree in Economics.

* GI407 cannot be taken alongside GI409 or GI420.

‡ Entry to these courses may be restricted.

§ Course designed for those with a minimum of one year’s practical working experience in developing countries; seminars draw extensively on students’ own experience. Entry may be restricted. Interested students should attend lectures and consult the lecturers.
MSc in Development Studies (Research)

Programme code: TMDVRE

Paper Course number and title
1 DV400 Development: History, Theory and Policy
3 Courses to the value of one full unit taught in the Methodology Institute.
4 Courses to the value of one full unit from the options listed under paper 3-4 on MSc Development Studies Promotion to the second year (i.e. admission onto the doctoral programme at the Department of International Development) is subject to the following conditions:
An overall average mark of 65 in MSc Development Studies (Research), to include at least a mark of 65 for DV410;
Availability of appropriate supervision;
A research proposal that is evaluated as coherent by the Doctoral Programme Committee.

MSc in Econometrics and Mathematical Economics

Programme code: TMEM

Academic-year programme. Students must take courses to the value of four full units as shown. Students are also required to attend the September Course EC400

Paper Course number and title
1 EC484 Econometric Analysis
2 EC487 Advanced Microeconomics
3 One course selected from the following:
   EC475 Quantitative Economics
   EC476 Contracts and Organisations
   EC485 Topics in Advanced Econometrics
4 MSc EME Option List - courses to the value of one unit from the following papers:
   EC413 Macroeconomics
   ST409 Stochastic Processes (H)
   ST411 Generalized Linear Modelling and Survival Analysis (H)
   ST418 Non-linear Dynamics and the Analysis of Real Time Series (H)
   ST421 Developments in Statistical Methods (H)
   ST422 Time Series (H)
Or other courses in Statistics, Mathematics or Finance may be selected with the approval of the Programme Director to the total value of one unit.
Or a course from the Paper 4 list of options on the MSc in Econometrics
Or a further paper listed under Paper 3 on MSc Econometrics and Mathematical Economics

Notes
* Only available if EC411 is chosen as Paper 2
† Students must obtain the permission of the relevant course proprietor.

MSc in Economic History

Programme code: TMEH

Full-year programme. Students must take compulsory courses to the value of 1.5 units, and either optional courses to the value of two units and a half-unit dissertation, or optional courses to the value of 1.5 units and a full unit dissertation.

Paper Course number and title
1 EH401 Historical Analysis of Economic Change (H)
2 EH482 Pre-modern Paths of Growth: East and West compared, c1000-1800
3 EH483 The Development and Integration of the World Economy in the 19th and 20th centuries

Either
EH498 Dissertation: MSc Economic History (H) and courses to the value of two full units from the following

Or
EH499 Dissertation: MSc Economic History and courses to the value of 1.5 units from the following:
EH402 Research Design and Quantitative Methods in...
MSc in Economic History (Research)

Programme code: TMEHRE

Full-year, five unit programme. Students must take two compulsory half-unit courses, optional courses to the value of two units and a dissertation (which counts as two units) as shown.

MSc in Economics (Two Year Programme)

Programme code: TMECT

Students without a strong background in economics are required to take the MSc programme over two years. The first year of the programme is governed by the ‘Regulations for Diplomas’; students who successfully complete the examinations at the end of the first year will be awarded a Diploma in Economics. In order to progress to the second year, which is governed by the ‘Regulations for Taught Masters Degrees’, students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 55% in courses EC201, EC210, EC220, and MA100, while the progression threshold is 55% in courses EC202, EC221, MA212 and other advanced MAXXX options. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in that attempt.

Paper Course number and title
Year 1
1 EC201 Microeconomic Principles I or EC202 Microeconomic Principles II
2 EC210 Macroeconomic Principles
3 MA100 Mathematical Methods or MA212 Further Mathematical Methods
4 EC220 Introduction to Econometrics or EC221 Principles of Econometrics

Notes: Candidates may be allowed to substitute one other course for one of the above papers with the permission of the Programme Director.

Year 2
Students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title
1 EC413 Macroeconomics
2 EC411 Microeconomics or EC487 Advanced Microeconomics †
3 EC402 Econometrics
4 One of the following courses:
   EC421 International Economics
   EC423 Labour Economics
   EC424 Monetary Economics
   EC426 Public Economics
   EC427 Economics of Industry

Notes: † Students must obtain the permission of the course proprietor.

* For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Economics and Management

Programme code: TMECMN

A ten-month programme. Students take three core courses, two half-unit options and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title
1 MG411 Firms and Markets
2 EC486 Econometric Methods
3 FM431M Corporate Finance A (H)
4 & 5 Two half unit Options from the following list:
   MG412 Globalization and Strategy (H)
   MG421 Foreign Direct Investment and Emerging Markets (H)
   MG422 Thinking Strategically (H)
   MG452 Behavioural Economics for Management (H)
   MG4A8 Strategy for the Information Economy (H) (formerly MN430)
   MG489 The World Trading System (H) (formerly MN429)
   FM421 Applied Corporate Finance (H)
   FM440 Corporate Finance Theory (H) (n/a 15/16)
   AC490 Management Accounting, Decisions and Control* (H)
Or a MSc level course which is offered in the School, subject to approval of the academic adviser and course leader.

6 MG417 Extended Essay (H)
   * Subject to approval by the Programme Director and course teacher.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Economics and Philosophy

Programme code: TMECPH

Full-year programme. Students take courses to the value of four units and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title
1 & 2 Two of the following:
   EC402 Econometrics
   EC411 Microeconomics
   EC413 Macroeconomics
3 & 4 Courses to the value of two full units from the following:
   EH428 History of Economics: Making Political Economy into a Social Science (H) (n/a 15/16)
   EH429 History of Economics: Ideas, Policy and Performance (H) (n/a 15/16)

    - GY467 Global Migration and Development (H)
    - A course from another Masters programme taught at LSE which is complementary with the other courses chosen, is suitably timetabled and has the approval of the teacher concerned and the Programme Director.
  - 4 HY499 Dissertation
  - * means subject to space.

**Notes** Students can also take HY449 Long-term History: The Patterns of the Past and the Shape of Things to Come, a non-assessed course taken in addition to the required four full-units as detailed above.

**MSc in Environmental Economics and Climate Change**

**Programme code:** TMENECCC

Full-year programme. Students must take three compulsory courses, one full unit of options, and a dissertation as shown.

- **Paper**
  - **Course number and title**
    - 1 GY426 Environmental and Resource Economics
    - 2 GY427 Climate Change: Science, Economics and Policy (H)
    - 3 GY428 Applied Quantitative Methods (H)
    - 4 Courses to the value of one full unit from*:
      - DV491 Economic Development Policy II: Microeconomic
MSc in Environment and Development

Programme code: TTMENDV

Full-year programme. Students must take courses to the value of four full units.

**Paper**  **Course number and title**

1  GY420 Environmental Regulation: Implementing Policy

2  GY423 Environment and Development or GY468 Environment and Development: Sustainability, Technology and Business (H)

3  Courses to the value of 1.5 units if taking GY468, or 1 unit if taking GY423 (under paper 2 above): DV415 Global Environmental Governance (H) (n/a 15/16)

   EU421 Policy-Making in the European Union (H)

   GY427 Climate Change: Science, Economics and Policy (H)

   GY446 Planning for Sustainable Cities (H)

   GY455 Economic Appraisal and Valuation (H)

   IR467 International Political Economy of the Environment (H) (n/a 15/16)

   LL4A6 Climate Change and International Law (H)

   LL4BV Transnational Environmental Law (H)

   SO425 Regulation, Risk and Economic Life

   SO469 Risk and Governance: A Sociological Approach (H)

4  GY499 Dissertation

Notes

* Students wishing to take courses in the Economics Department (‘EC’ prefix) are required to complete to the required standard the EC400 pre-sessional course.

---

MSc in EU Politics

Programme code: TMEUPOL

Students must take courses to the value of three units and a dissertation as shown. Additionally, all students must take EU465 Research Methods and Design in EU Politics, and if their timetable allows, EU450 European Union: Contemporary Issues, in preparation for the dissertation.

**Paper**  **Course number and title**

Part I: Foundation

1  Students must choose two out of the following three courses:

   EU421 Policy-Making in the European Union (H) (cannot be taken with IR431)

   EU435 History and Theory of European Integration (H)

   IR416 The EU in the World

Part II: Optional courses

2 & 3 Any courses which in combination with the foundation courses bring the total list of courses to the value of three units. If students wish their optional courses to result in a degree specialism, their chosen optional courses must come to a total value of at least one full unit from that specialism. Only one specialism is permitted. Courses from the heading ‘Methods’ cannot result in a specialism.

MSc in Finance (full-time)

Programme code: TMFFFT

TMFFTW (Work Placement Pathway)

Academic-year (10 month) programme (TMFFFT). Students must take two compulsory courses and optional courses to the value of two full units as shown. All students must submit a dissertation in one of the optional half unit courses and take an examination in the other half unit courses. Admitted students are required to attend a pre-sessional course at the start of the programme in September. The dissertation must be submitted by the 3rd week of June. Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Paper Course number and title
1 FM422 Corporate Finance
2 FM423 Asset Markets
3 & 4 Students should select 4 half unit courses to the value of 2 full units. Students must select at least three courses from the dedicated list of options marked (*):
   FM405 Fixed Income Securities and Credit Markets (H) (Dissertation code FM4US)*
   FM406 Topics in Portfolio Management (H) (Dissertation code FM4T6)*
   FM407 Mergers, Buysouts and Corporate Restructurings (H) (Dissertation code FM4U7)*
   FM408 Financial Engineering (H) (Dissertation code FM4TB)*
   FM409 Risk Management in Financial Markets (H) (Dissertation code FM4UG)*
   FM414 Corporate Finance and Financial Policy (H) (Dissertation code FM4T4)*
   FM440 Corporate Finance Theory (H) (Dissertation code FM4T3) (n/a 15/16)
   FM457 Applied Computational Finance**
   FM472 International Finance (H) (Dissertation code FM4T9)

In exceptional cases it may be possible to take an unlisted optional course with the approval of the Programme Director.

Work Placement Pathway

Paper Course number and title
5 FM411 Finance Work Placement and Assessment ***

Notes
Students are required to write a 6,000 word dissertation (replacing the exam) in one of the half unit courses. Students will be required to attend teaching for the course which they choose to write their dissertation on.
+ With the approval of the course leader.
*** This course is not for credit and can be taken in addition to courses to the value of two full units selected from Paper 3 & 4.
*** This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

Paper Course number and title
1 FM422 Corporate Finance
2 FM423 Asset Markets
3 FM410 Private Equity (H)
4 Three of the following half unit courses (students must select at least two courses from the list of dedicated options marked (*). Students on the Work Placement Pathway must also select FM411 Finance Work Placement and Assessment:
   FM404 Forecasting Financial Time Series (H) +
   FM405 Fixed Income Securities and Credit Markets (H)*
   FM406 Topics in Portfolio Management (H) *
   FM407 Mergers, Buyouts and Corporate Restructurings (H)*
   FM408 Financial Engineering (H)*
   FM409 Risk Management in Financial Markets (H)*
   FM414 Corporate Investment and Financial Policy (H)*
   FM440 Corporate Finance Theory (H) (n/a 15/16)
   FM457 Applied Computational Finance **
   FM472 International Finance (H)

In exceptional circumstances it may be possible to take an unlisted optional course with the approval of the programme Director.

Work Placement Pathway

Paper Course number and title
5 FM411 Finance Work Placement and Assessment ***

Notes
Students are required to write a 6,000 word dissertation in FM410 and must sit examinations in all other courses.
+ with the approval of the course leader.
** This course is not for credit and can be taken in addition to courses to the value of three half units selected from Paper 4.
*** This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Financial Mathematics
Programme code: TMFIMA

Academic year programme (10 months). Students must take five compulsory half-unit courses and optional courses to the value of one-and-a-half units as shown.

There is also a two-week compulsory pre-sessional course MA400 September Introductory Course relating to MA415 and MA417.

Paper Course number and title
1 MA415 Mathematics of the Black and Scholes Theory (H)
2 MA416 The Foundations of Interest Rate and Credit Risk Theory (H)
3 ST409 Stochastic Processes (H)
4 FM413 Fixed Income Markets (H)
5 MA417 Computational Methods in Finance (H)
6 One of the following:
   MA402 Game Theory I (H)
   MA411 Probability and Measure (H)
   MA414 Stochastic Analysis (H)
   MA418 Preferences, Optimal Portfolio Choice, and Equilibrium (H) (n/a 15/16)
   MA420 Quantifying Risk Modelling and Alternative Markets (H)
   ST439 Stochastics for Derivatives Modelling (H)
   ST440 Recent Developments in Finance and Insurance (H)
   ST441 Introduction to Markov Processes and Their Applications (H)

7 & 8 The equivalent of one unit from the following:
   FM402 Financial Risk Analysis (H)
   FM404 Forecasting Financial Time Series (H)
   FM441 Derivatives (H) (n/a 15/16)
   FM442 Quantitative Methods for Finance and Risk Analysis (H)
   FM445 Portfolio Management (H)
   FM472 International Finance (H)
   FM492 Principles of Finance
   ST422 Time Series (H)
   ST426 Applied Stochastic Processes (H)
   ST427 Insurance Mathematics (H)
   ST429 Probabilistic Methods in Risk Management and Insurance (H)

Further half unit(s) from those courses listed under paper 6 above.

Further half unit(s) from the MA4** level courses or any other appropriate MSc course, subject to the approval of the Programme Director and Teacher Responsible for the course.

Students can also take MA422 Research Topics in Financial Mathematics, a non-assessed course taken in addition to the required five compulsory half-unit courses and optional courses to the value of one-and-a-half units detailed above.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.
**MSc in Gender (Research)**

**Programme code**: TMGERE

Full-year programme. Students take two units of compulsory courses, options to the value of one full unit and a dissertation as shown.

**Notes**

**These courses cannot be combined with EH422** Students can also take HY449 Long-term History: The Patterns of the Past and the Shape of Things to Come, a non-assessed course taken in addition to the required four full-units as detailed above.

**MSc in Global Politics**

**Programme Code:** TMGLPO2

The MSc includes a core course, ‘The Politics of Globalization’ (paper 1) which all students must take. It draws on specialist knowledge from across the LSE’s Politics staff to offer a comprehensive introduction to the changing structure of the global order, and the contemporary challenges of global politics. The rest of the MSc allows considerable choice of options whilst seeking to blend a global focus with more detailed thematic or regional knowledge. Students can also choose the Global Civil Society stream, in which case they must take a second core course, Global Civil Society, and additional options as detailed below. All students must write a 10,000 word dissertation.

**PLEASE NOTE:** Due to staff sabbaticals and research leave, the School cannot guarantee that all the courses listed below will be available.

   - GY448 Social and Political Aspects of Regional and Urban Planning (H)
   - GY449 Urban Futures (H)
   - GY459 Urban Theory and Policy in the Global South (H)
   - GY464 Race and Space (H)
   - GY467 Global Migration and Development (H)
   - GY479 Urban Revolutions (H)
   - GY480 Remaking China: Geographical Aspects of Development and Disparity (H)
   - GY489 Theorising Policy and Practice (H) †

   or Another coherent combination of GY and non-GY courses to the value of one and a half units as approved by the Programme Manager.

**Part III**

4. GY499 Dissertation

**Notes**

1. GI407 cannot be taken alongside GI409 or GI420

---

MSc in Human Resources and Organisations

Full-year programme. Students must take compulsory and optional courses to the value of three units and a full unit dissertation as shown below. The number of compulsory and optional units will vary depending on the specialism taken.

All students take the following compulsory courses:

**Paper**

**Course number and title**

1. MG480 Management of Human Resources: Strategies
2. MG475 Organisational Theory (H)
3. MG476 Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16)
4. MG477 Reward System: Key Models and Practices (H)
5. MG478 Globalisation and Human Resource Management (H)
6. MG493 Developing Professional Research and Employability Skills

Students take the following courses according to their chosen specialism:

**Specialism 1 - Organisational Behaviour**

**Programme Code:** TMHRORG1

**Paper**

**Course number and title**

1. MG421 Foreign Direct Investment and Emerging Markets (H)
2. MG428 Knowledge Processes in Organisations (H)
3. MG467 Negotiation Analysis (H) or
4. MG473 Theorising Policy and Practice (H) †
5. MG475 Organisational Theory (H) or
6. MG476 Leadership in Organisations: Theory and Practice (H)

**Specialism 2 - Human Resource Management (CIPD)**

**Programme Code:** TMHRORG2

**Paper**

**Course number and title**

1. MG415 Local Capacity and Economic Development Policy (H)
2. MG421 Foreign Direct Investment and Emerging Markets (H)
3. MG428 Knowledge Processes in Organisations (H)
4. MG473 Theorising Policy and Practice (H) †
5. MG475 Organisational Theory (H) or
6. MG476 Leadership in Organisations: Theory and Practice (H)

**Specialism 3 - International Employment Relations & Human Resource Management**

**Programme Code:** TMHRORG3

**Paper**

**Course number and title**

1. MG421 Foreign Direct Investment and Emerging Markets (H)
2. MG428 Knowledge Processes in Organisations (H)
3. MG473 Theorising Policy and Practice (H) †
4. MG475 Organisational Theory (H) or
5. MG485 Business in the Global Environment (H)

**Options list**

**Paper**

**Course number and title**

1. LL4H8 Employment Law (H)
2. LL4H9 Human Rights in the Workplace (H)
3. MG421 Foreign Direct Investment and Emerging Markets (H)
4. MG428 Knowledge Processes in Organisations (H)
5. MG475 Organisational Theory (H) or
6. MG476 Leadership in Organisations: Theory and Practice (H)

**Specialism 1 only (Organisational Behaviour):**

MG478 Globalisation and Human Resource Management (H)
PS428 Knowledge Processes in Organisations (H)
PS445 Organisational and Social Decision Making (H)
PS462 Theory and Practice of Organisational Development (H)

**Specialism 3 only (International Employment Relations):**

EU425 Interest Representation and Economic Policy-Making in Europe (H)
EU443 European Models of Capitalism (H)

4 LL4E9 Dissertation: MSc Law, Anthropology and Society

Notes

- Candidates with a first degree in law must take at least one of the papers 2 & 3 in anthropology; candidates with a first degree in social science must take at least one paper 2 & 3 in law. Students in this programme will be closely advised by their supervisor in choosing the courses for papers 2 & 3 so as to form a well-designed programme in view of their previous studies and their dissertation topic.

LLM

Programme codes: TMLL2 (Full time) TMLL2EP (Extended part time)

The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority. In order to obtain the degree, students must complete courses (see Course list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research Skills course, which will be assessed by a 10,000 word dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on plagiarism when submitting this dissertation.

Students can complete the LLM course requirements in either one full-year programme, or as a part-time student in two years, or by extended part-time study within a maximum of six years. Courses should be chosen from the list below. Subject to availability and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year.

Extended part-time students must satisfy the same requirements as those applicable to full-time students. Students must take courses to the value of one unit in the first year and successfully complete this. Students who successfully complete four units within a period of six years will satisfy the requirements for the degree.

Students registered before 2013-14

The LLM programme regulations for students entering in or after 2013-14 differ from those in force in previous years. This reflects a move to half unit courses in 2013-14. Students registered before 2013-14 are covered by the regulations which were in operation at the time of their initial registration on the programme. For earlier editions of the regulations please refer to the page for previous academic sessions lse.ac.uk/resources/calendar/PreviousAcademicSessions.htm. This page contains links to reference copies of programme regulations for years 2009-10, 2010-11, 2011-12, 2012-13 and 2013-14. If continuing students have

LLM Seminar Course
LL4A1  LLM Subject Area Specialist Research Seminars

Notes
‡ Not assessed; part of LSE’s extra curricular intellectual development.

This programme, its constituent courses and lectures qualify as Continuing Professional Development (CPD) and are accredited by the Law Society and Bar Council. Further information is available from the Department of Law.

MSc in Local Economic Development

Programme Code: TMLED

Full-year programme. Students must take courses to the value of three full units as shown and a dissertation.

Paper  Course number and title
1  GY404  Topics in Local Economic Development (H)
2  GY407  Globalisation, Regional Development and Policy
or
GY408  Local Economic Development and Policy
3  Courses to the value of 1.5 units from the following list: Students will normally choose a further course from those listed under paper 2 (above) or any of the related half-unit courses (GY409 or GY413 - half units of GY407; GY410 or GY415 - half units of GY408).
Students are not permitted to combine GY409 and GY413 and they are not permitted to combine GY410 and GY415.
EU434  The Political Economy of Southeast Europe (H)
EU439  Political and Fiscal Integration and Disintegration in EU Member States (H)
GI418  Feminist Economics and Policy: An Introduction (H)
GY400  The Economics of Urbanisation (H)
GY420  Environmental Regulation: Implementing Policy
GY428  Applied Quantitative Methods (H)
GY431  Cities, People and Poverty in the South (H) (n/a 15/16)
GY438  Cities and Social Change in East Asia (H) (n/a 15/16)
GY447  The Economics of Regional and Urban Planning (H)
GY449  Urban Futures (H)
GY459  Urban Theory and Policy in the Global South (H)
GY460  Techniques of Spatial Economic Analysis (H)
GY465  Concepts in Environmental Regulation (H)
GY475  Issues in Environmental Governance (H)
GY480  Remaking China: Geographical aspects of Development and Disparity (H)
MY452M or MY452L Applied Regression Analysis (H)
A relevant course from another programme as approved by the Programme Director
4  GY499  Dissertation

MSc in Management

Programme code: TMMNT

These regulations apply to students entering in the 2015-16 academic year.

A two-year programme. Students take courses to the value of 8 units.
The second year includes a dissertation. Students complete the course MG488 MIM Capstone Course - Management in Action (H)
over both years, part A (unassessed) in year 1 and part B (assessed) in year two.

All students are required to attend MG4A1 MSc Management pre-

essional: Skills Preparation for the MiM.

Year 1

Core Courses

Paper Course number and title

1 MG431 Managerial Economics (H)
MG461 Quantitative Analysis in Management (H) *
2 MG434 Organisational Behaviour (H)
MG462 Qualitative Analysis in Management (H)
3 MG458 Foundations of Management I (H)
MG459 Foundations of Management II (H)
Students also take the compulsory unassessed part of MG488:
MG488A MIM Capstone Course - Management in Action

Optional Courses

4 Students take courses up to the value of one full unit from the Elective Courses listed below.
It is not compulsory for students to take a full unit of optional courses under paper 4 in the first year. Instead, students can elect to take a half or full unit of optional courses in year two, in addition to their second year optional courses taken under papers 7 and 8. +

Notes *Students who have already taken statistics at university level covering these topics, can choose a half unit course from the following:
MG4C1 Techniques of Operational Research (H) (formerly OR401)
MY452M or MY452L Applied Regression Analysis (H) MY455 Multivariate Analysis and Measurement (H)
Or another appropriate quantitative course from elsewhere in the School, subject to the course proprietor and programme director’s approval.

Year 2

Core Courses

5 MG430 Strategy, Organisation and Innovation (H)
MG420 Dissertation (H)
6 MG488B MIM Capstone Course - Management in Action (H)

Optional Courses

7 & 8 Courses to the value of 2.5 full units from the Elective Courses listed below.

Notes + Students who have not taken courses under paper 4 or have taken a half unit under paper 4 in their first year, will also need to take either a further full unit of courses or a half unit course in addition to papers 7 and 8.

Elective Courses

Students must take a total of 3.5 units of elective courses across years one and two (chosen under papers 4, 7 and 8).
AC411 Accounting, Strategy and Control (H)
AC412 Accountability, Organisations and Risk Management (H)
AC414 Financial Reporting, Capital Markets and Business Combinations (H)

Notes

Or another MSc-level course which is offered in the School, subject to approval of the course proprietor.

++ Finance I is a pre-requisite to Finance II.

† Access is by permission of the course proprietor.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSC MANAGEMENT To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and MG462). If a student fails one compulsory course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the compulsory courses to the same value. If a student fails more than one of these compulsory courses they will not be allowed to progress to year two. If students fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

See the programme regulations for MSc Management (CEMS MIM) stream

MSc in Management

Programme code: TMMNT

These regulations apply to students entering in the 2014-15 academic year.

A two-year programme. Students take courses to the value of 8.5 units.

The second year includes a dissertation and students complete the course MG488 MIM Capstone Course - Management in Action (H). All students are required to attend MG4A1 MSc Management professional: Skills Preparation for the MIM.

Paper Course number and title

Year 1

1 MG431 Managerial Economics (H)
   MG461 Quantitative Analysis in Management (H) *
   MG434 Organisational Behaviour (H)
   MG462 Qualitative Analysis in Management (H)
   MG458 Foundations of Management I (H)
   MG459 Foundations of Management II (H)

2 Students take courses up to the value of one full unit from the list below**
   DV423 Global Political Economy and Development (H)
   (n/a 15/16)
   DV424 International Institutions and Late Development (H)
   EU435 History and Theory of European Integration (H)
   EU455 Concepts in Political Economy (H)
   MC408 Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
   MG481 Corporate Strategy (H) (formerly MN431)
   Alternatively students can take a second year optional course with permission from the course proprietor.

Or FM473 Finance I (H) with permission of the course proprietor ++

Or another MSc-level course which is offered in the School, subject to approval of the course proprietor.

Notes

*Students who have already taken statistics at university level covering these topics, can choose a half unit course from the following:

MG4C1 Techniques of Operational Research (H) (formerly OR401)
MY452M or MY452L Applied Regression Analysis (H)
MY455 Multivariate Analysis and Measurement (H)
Or another appropriate quantitative course from elsewhere in the School, subject to the course proprietor and programme director's approval.

** It is not compulsory for students to take a full unit of optional courses under paper 4 in the first year. Instead, students can elect to take an additional full or half unit of optional courses from papers 6, 7 and 8 in year two.

Year 2+

5 MG430 Strategy, Organisation and Innovation (H)
   MG420 Dissertation (H)

6 Courses to the value of one full unit from the following:
   AC490 Financial Reporting and Management:
   Management Accounting, Strategy and Control (H)
   AC491 Financial Reporting and Management: Financial Reporting (H)
   FM421 Applied Corporate Finance (H)
   FM431M Corporate Finance A (H) or
   FM431L Corporate Finance A (H)
   FM473 Finance I (H) (if not already taken in year one)
   MG401 Operations Management (H)
   MG402 Public Management: A Strategic Approach (H)
   (n/a 15/16)
   MG403 Pricing Strategy (H)
   MG404 Behavioural Fundamentals for Marketing and Management (H) (n/a 15/16)
   MG405 Behavioural Decision Science (H)
   MG409 Auctions and Game Theory (H) (formerly OR409)
   MG418 Open Innovation (H)
   MG421 Foreign Direct Investment and Emerging Markets (H)
   MG422 Thinking Strategically (H)
   MG423 Leading Entrepreneurial Organisations in Global Markets (H)
   MG425 Global Business Management (H)
   MG436 Firms, Markets and Crises (H)
   MG437 Business Model Innovation at the ‘Base of the Pyramid’ (H)
   MG438 Business Model Innovation at the ‘Base of the Pyramid’ (full unit)
   MG450 Social Network Analysis and Strategies (H)
   MG452 Behavioural Economics for Management (H)
   MG460 Handling Disruption: Humanitarian Emergencies Management and Development (H)
   MG472 Global Strategy, Management and Information Systems (H) (formerly IS472)
   MG477 Reward System: Key Models and Practices (H)
   (formerly ID437)
   MG481 Innovating Organisational Information Technology (H) (formerly IS471)
   MG482 Innovation and Technology Management (H)
   MG482 Personnel Economics (H) (formerly MN432)
   MG483 International Marketing: A Strategic Approach (H) (formerly MN413)
   MG4D3 The Dark Side of the Organisation (H) (formerly ID423) (n/a 15/16)
   MG4D5 Leadership in Organisations: Theory and Practice (H) (formerly ID420)
   PH425 Business and Organisational Ethics (H)
   ST429 Probabilistic Methods in Risk Management and Insurance (H)

7 Courses to the value of one unit from the following or any course under paper 4 not already taken:
   AC411 Accounting, Strategy and Control (H)
   AC412 Accountability, Organisations and Risk
MSc in Management (CEMS MiM)

Programme code: TMMNTCEMS

These regulations apply to students entering in the 2015-16 academic year.

A two-year programme. Students are also awarded the CEMS Masters in Management (MIM) degree, subject to successful completion of the CEMS MIM requirements.

Students take courses to the value of 8 units which includes: two units at a partner CEMS Institution (MG410); CEMS compulsory MG463 CEMS Global Management Practice (H); a dissertation; and the course MG488 MiM Capstone Course - Management in Action (H) taught over both years, part A (unassessed) in year 1 and part B (assessed) in year two.

All students are required to attend MG4A1 MiM Management pre-sessional: Skills Preparation for the MiM.

PH425 Business and Organisational Ethics (H)
ST429 Probabilistic Methods in Risk Management and Insurance (H)

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT

To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and
MG462). If a candidate fails one core course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the core courses to the same value. If a candidate fails more than one of these compulsory courses they will not be allowed to progress to year two. If candidates fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.

Please note that under regulation 6.2 of the classification scheme, If a candidate has met the requirements for the award of a degree having re-sat failed courses, s/he can only be recommended for the award of a Pass degree unless, in the judgement of the examiners, the initial failure(s) was at least in part a direct result of medical and/or extenuating circumstances. See also the programme regulations for MSc Management.

### MSc in Management (MiM Exchange)

**Programme code:** TMMNTMIM

**These regulations apply to students entering in the 2015-16 academic year.**

A two-year programme. Students take courses to the value of 8 units. The second year includes a dissertation. Students complete the course MG488 MiM Capstone Course - Management in Action (H) over both years, part A (unassessed) in year 1 and part B (assessed) in year two.

All students are required to attend MG4A1 MSc Management pre-professional. Skills Preparation for the MiM.

   ST429 Probabilistic Methods in Risk Management and Insurance (H)

Or another MSc-level course which is offered in the School, subject to approval of the course proprietor.

++ Finance I is a pre-requisite to Finance II.
†G4040T cannot be taken alongside GI409 or GI420
‡ Access is by permission of the course proprietor.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSC MANAGEMENT To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and MG462). If a student fails one compulsory course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the compulsory courses to the same value. If a student fails more than one of these compulsory courses they will not be allowed to progress to year two. If students fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

MSc in Management of Information Systems and Digital Innovation

Programme Code: TMMISDI

(Formerly MSc Management, Information Systems and Innovation)

Full-year programme which is available on a part-time basis. Students must take three half unit compulsory courses, three half unit optional courses and a dissertation. Students are also required to attend an unassessed skills course (MG496).

Part-time students are required to take taught courses in the Michaelmas and Lent Terms of their two years and the work load will be split equally across both years (three half units per year). The dissertation will be completed in the Summer Term of the second year.

Paper  Course number and title
MSc in Management Science

Programme code: TMMSOR (Operational Research)

Full-year programme with two disciplinary streams. Students are required to take compulsory and optional courses to the value of four full units as shown.

All courses are half-units except MG4C7 (formerly OR440) and MG4C9 (formerly OR499).

MSc in Media and Communications (Data and Society)

Programme code: TMMECDSS

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

1 MC408
Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
MC430 Data in Communication and Society (H)
MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H)

2 Options outside the Department of Media and Communications are subject to availability and other departments' regulations. Students following the Data and Society stream will be expected to take at least 0.5 unit from the following courses up to a maximum of 1.5 units:

GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H)
LL4S1 Cyberlaw (H)
LL4S4 Digital Rights, Privacy and Security (H)
MC401 Mediated Resistance and Citizens (H)
MC402 The Audience in Media and Communications (H)
MC409 Media, Technology and Everyday Life (H)
MC413 Information, Communication and Knowledge Systems (H)
MC416 Representation in the Age of Globalisation (H)
MC422 Critical Studies in Media and Journalism (H)
MC424 Media and Communication Governance (H)
MC425 Interpersonal Mediated Communication (H)
MC427 Digital Media Futures (H)
MG486 Social Computing, Data and Information Services (H) (formerly IS418)
MG487 Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
MG503 Interpretations of Information (H) (formerly IS581)

3 Additional options can be selected from the following courses up to a combined maximum of 1.5 units for papers 2 and 3:

GI403 Gender and Media Representation (H)
MC403 Contemporary Issues in Media and Communications Policy (H)
MC407 International Media and The Global South (H)
MC420 Identity, Transnationalism and the Media
MC423 Global Media Industries (H)
MC426 Film Theory and World Cinema (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
PS415 The Social Psychology of Economic Life (H)
PS429 The Social Psychology of Communication
PS439 Science, Technology and Resistance (H)
Any other course which is offered in the School at master's level, subject to the consent of the student's teachers and the Department (non MC-prefixed courses)

4 MC499 Dissertation (10,000-12,000 words)*

Notes
* Passing this course is a requirement for passing the programme

5 One of the following half unit courses:

MG486 Social Computing, Data and Information Services (H)** (formerly IS418)
MG492 Data Governance: Privacy, Openness and Transparency (H) (formerly IS489)
MG503 Interpretations of Information (H)** (formerly IS581)
MC401 Mediated Resistance and Citizens (H)
MC402 The Audience in Media and Communications (H)
MC404 Political Communication (H)
MC405 Current Issues in Media and Communications (H)**
MC407 International Media and The Global South (H)
MC413 Information, Communication and Knowledge Systems (H)
MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life)
MC421 Critical Approaches to Media, Communication and Development (H)
MC423 Global Media Industries (H)
MC425 Interpersonal Mediated Communication (H)
MC426 Film Theory and World Cinema (H)
MC427 Digital Media Futures (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
PS415 The Social Psychology of Economic Life (H)
Any other half unit paper which is offered in the School at master's level, subject to the consent of the student's teachers and the Department (non MC-prefixed courses)

6 MC499 Dissertation (10,000-12,000 words)*

Notes
* Passing this course is a requirement for passing the programme

‡ Students can take up to one full unit of courses outside the Media and Communications Department (non MC-prefixed courses)
** If not taken under Paper 4

MSc in Media and Communications (Research)

Programme Code: TMMECRR

Full year programme. Students must take courses to the value of three full units and a dissertation as shown below.

1 MC408
Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life) (H)

2 MC4M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)*
MC402 The Audience in Media and Communications (H)
MC401 Mediated Resistance and Citizens (H)
MC400 Theories and Concepts in Media and Communications (H)
MC403 Methods of Research in Media and Communications Policy (H)
MC404 Contemporary Issues in Media and Communications (H)
MC405 Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
MC406 International Media and The Global South (H)
MC407 Media, Technology and Everyday Life (H)
MC413 Information, Communication and Knowledge Systems (H)
MC416 Representation in the Age of Globalisation (H)
MC420 Identity, Transnationalism and the Media (H)
MC421 Critical Approaches to Media, Communication and Development (H)
MC422 Critical Studies in Media and Journalism (H)
MC423 Global Media Industries (H)
MC424 Media and Communication Governance (H)
MC425 Interpersonal Mediated Communication (H)
MC426 Film Theory and World Cinema (H)
MC427 Digital Media Futures (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
MC429 Humanitarian Communication: vulnerability, discourse and power (H)
MG486 Social Computing, Data and Information Services (H) (formerly IS418)
MG487 Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
MG503 Interpretations of Information (H) (formerly ISS81)
MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
PS415 The Social Psychology of Economic Life (H)
PS429 The Social Psychology of Communication
PS439 Science, Technology and Resistance (H) (n/a 15/16)
SO433 Cultural Theory (H) (n/a 15/16)
SO471 Technology, Power and Culture (H)
Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.
MC499 Dissertation (10,000-12,000 words)*

Notes
*Passing this course is a requirement for passing the programme.

Students can take up to one full unit of courses outside the Media and Communications Department (non MC-prefix courses).

MSc in Media, Communication and Development

Programme Code: TMMECODE

Full year programme. Students must take courses to the value of two full units and a dissertation as shown below.

Paper Course number and title
1 MC421 Critical Approaches to Media, Communication and Development (H)
2 MC408 Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (H)
3 MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H)
4 Three half-unit courses from the following # :
MC401 Mediated Resistance and Citizens (H)
MC402 The Audience in Media and Communications (H)
MC405 Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
MC407 International Media and The Global South (H)
MC409 Media, Technology and Everyday Life (H)
MC413 Information, Communication and Knowledge Systems (H)
MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life) (H)
MC420 Identity, Transnationalism and the Media (H)
MC423 Global Media Industries (H)
MC424 Media and Communication Governance (H)
MC425 Interpersonal Mediated Communication (H)
MC426 Film Theory and World Cinema (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
MC429 Humanitarian Communication: vulnerability, discourse and power (H)
DV423 Global Political Economy of Development (H) (n/a 15/16)
DV424 International Institutions and Late Development (H)
DV483 Information Technologies and Socio-Economic Development (H)
GI425 Women, Peace and Security (H)
GV443 The State and Political Institutions in Latin America (H)
MG479 Information Systems for the Public Sector (H) (formerly IS479)
PS418 Health Communication (H)

Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.

5 MC499 Dissertation: Media and Communications (10,000-12,000 words)*

Notes
*Passing this course is a requirement for passing the programme.

Students can take up to one full unit of courses outside the Media and Communications Department (non MC-prefix courses).

MSc in Organisational and Social Psychology

Programme code: TMOSOPS

Full-year programme. Students must take two compulsory courses, optional courses to the value of 1 unit and a dissertation as shown.

Paper Course number and title
1 PS404 Organisational Social Psychology
2 PS4A5 Methods for Social Psychology Research: Fundamental Qualitative and Fundamental Quantitative Methods
3 Courses to the value of 1 unit from the following:
GI403 Gender and Media Representation (H)
PS409 Political Psychology of Intercultural Relations (H) (n/a 15/16)
PS410 Social Representations (H)
PS411 Current Communication Research (H) (n/a 15/16)
PS415 The Social Psychology of Economic Life (H)
PS418 Health Communication (H)
PS421 Issues in Social Psychology: Group Dynamics (H)
PS428 Knowledge Processes in Organisations (H)
PS438 Corporate Communications (H)
PS439 Science, Technology and Resistance (H) (n/a 15/16)
PS445 Organisational and Social Decision Making (H)
PS446 Issues in Organisational and Social Psychology: Organisational Life (H)
PS451 Cognition and Culture (H)
PS456 Consumer Psychology (H)
MSc in Philosophy and Public Policy

Programme code: TMPHPP

Full-year programme. Students must take two compulsory courses, one unit of optional courses, one compulsory seminar and a dissertation as shown.

<table>
<thead>
<tr>

7 GV499 Dissertation

Notes * courses with restricted access, which require the approval of the course convenor.

MSc in Political Sociology

Programme code: TMPOSO(SO)

Full-year programme. Students must take three courses and a dissertation as shown.

Paper Course number and title
1 SO407 Politics and Society
2 One full unit or two half units from the following:
   EU425 Interest Representation and Economic Policy-Making in Europe (H)
   EU460 European Society and Politics beyond the Nation State (H)
   GV479 Nationalism
   MC408 Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (H)
   SA4M1 Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16)
   SO401 Social Research Methods
   SO424 Approaches to Human Rights
   SO425 Regulation, Risk and Economic Life
   SO426 Classical Social Thought (H)
   SO427 Modern Social Thought (H)
   SO430 Economic Sociology (H) (n/a 15/16)
   SO457 Political Reconciliation (H)
   SO458 Gender and Societies (H)
3 One full unit or two half units either from the list under paper 2 above, or from any of the MSc courses offered in any department or institute at the LSE, so long as they are relevant to the study of political sociology, and subject to the approval of both Programme Director and course teacher.
4 SO494 MSc in Political Sociology Dissertation

MSc in Political Theory

Programme code: TMPOTY

Full-year programme. Students must take 2.5 course units, a compulsory course (0.5 units) and dissertation (1 unit) as shown. Part-time students may take up to four half unit courses in their first year.

Paper Course number and title
1, 2, 3 Courses to the value of 2.5 units but no more than 4 & 5 1.5 units in any one term:
   GV408 Contemporary Disputes about Justice (H)
   GV442 Globalisation and Democracy (H)
   GV476 Twentieth-Century European Liberal Thought (H) (n/a 15/16)
   GV498 Multiculturalism (H) (n/a 15/16)
   GV4A3 Social Choice Theory and Democracy (H)
   GV4B6 Kant's Political Philosophy (H)

<td></td>
</tr>
</tbody>
</table>

Notes *DV441 was withdrawn at the end of 2014/15. It has been replaced by two half units DV448 and DV449 as of 2015/16.

**Passing this course is a requirement for passing the programme.**

MPA Dual Degree

**Programme code:** TMDMPA2 (LSE & Columbia) TMDMPA3 (LSE & Sciences Po) TMDMPA4 (LSE & Hertie) TMDMPA5 (LSE & NUS / Lee Kuan Yew)

**These regulations apply to students entering in or after the 2014-15 academic year.**

**Route 1**

**Year 1 at LSE**

**Before Year 1 -** All students attend the MPA pre-sessional course (EC408) unless exempted.

**During Year 1 -** All students must complete the three Compulsory Courses:

<table>
<thead>
<tr>
<th>Paper</th>
<th>Course number and title</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>EC440 Micro and Macro Economics (for Public Policy)</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>EC455 Quantitative Approaches and Policy Analysis</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>GV478 Political Science and Public Policy</td>
<td></td>
</tr>
</tbody>
</table>

In addition, in Year 1, all students must complete either:

- Courses to the value of one unit from the list of Policy Stream Courses **or**
- Courses to the value of one unit from the MPA options list. The course(s) chosen by the student must have a total credit value of 1.0 unit (therefore, either one course with a credit value of 1.0, or two courses which both have a credit value of 0.5).

**Policy Stream courses:**

- **Public Policy and Management**
- **International Development**
- **European Public and Economic Policy**

**Notes** *DV441 was withdrawn at the end of 2014/15. It has been replaced by two half units DV448 and DV449 as of 2015/16.

**Year 2 at Columbia University, Sciences Po, the Hertie School of Governance or the Lee Kuan Yew School of Public Policy**

On successful completion of the first year of that
programme at LSE, students who have accepted an offer of a dual degree place will transfer to the MPA Dual Degree. See the MPA criteria for progression from year one to year two. Students will follow the second year of the MPA programme at SIPA, Columbia University, the MPA programme at Sciences Po, the MPP programme at Hertie or the MPP programme at Lee Kuan Yew.

Route 2

Year 1 at Columbia University, Sciences Po, the Hertie School of Governance or the Lee Kuan Yew School of Public Policy

Students will follow the first year of the MPA/MIA programme at SIPA, Columbia University, the MPA programme at Sciences Po, the MPP programme at Hertie or the MPP programme at Lee Kuan Yew.

Year 2 at LSE

Students must take courses to the value of four units as set out below:

**Paper** | **Course number and title**
---|---
1 | EC4B3 GV4B3, DV4B3, EU4B3, SA4K3 MPA Capstone Project
2-4 | Plus one of the following: MPA Policy Paper (H) and 2.5 units of optional courses or MPA Dissertation and 2 units of optional courses or 3 units of optional courses

---

**Master of Public Administration (MPA)**

**Programme code:** TMMPA

**Policy stream codes:** TMMPA (European Public and Economic Policy)
TMINDE (International Development)
TMIPEP (Public and Social Policy)
TMPPM (Public Policy and Management)
TMPPSP (Public and Social Policy)

**These regulations apply to students entering in or after the 2014-15 academic year.**

The programme is taught over two academic years (21 months). Some courses have a unit value of 1.0 and some have a unit value of 0.5 (H). To be awarded the degree, students must complete courses to the value of 8 units in total over two years. There are three types of courses:

1. **Compulsory courses**, studied by all students;
2. **Policy Stream courses**, which students will take depending on which Policy Stream (specialism) they choose at the start of Year 2;
3. **Optional courses**.

Note that some courses on one Policy Stream may be optional where a student chooses another Policy Stream.

No interim award is available: students completing courses with a unit value of less than 8.0 receive no award, regardless of performance in the courses that have been successfully completed. Students may not take both the MPA Dissertation and the MPA Policy Paper.

**Before Year 1**

All students attend the MPA pre-sessional course EC408 (unless exempted).

**Year 1**

**Paper** | **Course number and title**
---|---
1 | EC440 Micro and Macro Economics (for Public Policy)
2 | EC455 Quantitative Approaches and Policy Analysis
3 | GV478 Political Science and Public Policy
4 | Plus courses to the value of one unit from the list of Policy Stream courses or from the list of Optional courses. Note: two Policy Stream courses (EC406 and EC454) are not available to students in their first year.

At the start of year 2, all students must select one of the five Policy Streams: (i) Public and Economic Policy; or (ii) Public Policy and Management; or (iii) International Development; or (iv) European Public and Economic Policy; or (v) Public and Social Policy.

**Year 2**

**Paper** | **Course number and title**
---|---
All students must complete the following Compulsory course:

6-8 | Students must take the course(s) required by their chosen Policy Stream detailed below, plus sufficient Optional courses to ensure that they have taken courses to a total unit value of 8 over Year 1 and Year 2.

**Policy Stream courses:**

**Public and Economic Policy** - Students must complete:
EC406 Economic Policy Analysis (not available in year 1)

**Public Policy and Management** - Students must complete, or have completed in Year 1:
MG419 Public Management - Strategy, Innovation and Delivery or GV4E4 Public Budgeting and Financial Management

**International Development** - Students must complete, or have completed in Year 1:
DV441 Development Policy and Management (withdrawn 2015/16) *
DV448 Political Economy of Development I (H) AND DV449 Political Economy of Development II (H) AND EC454 Development Economics (not available in year 1)

**European Public and Economic Policy** - Students must complete, or have completed in Year 1:
EU452 Political Economy of Europe

**Public and Social Policy** - Students must complete, or have completed in Year 1:
SA4X6 Welfare Analysis and Measurement

**Optional courses:**

- EC4V8/ GV4V8/DV4V8/EU4V8/SA4V8 MPA Policy Paper (H) or

**Notes**

Students may not take both the MPA Dissertation and the MPA Policy Paper.

Total unit value 8 = Compulsory courses (4) + Policy Stream courses (1 or 2 depending on the stream) + Optional courses (3 or 2 depending on which Policy Stream is chosen).

* DV441 was withdrawn at the end of 2014/15. It has been replaced by two half units DV448 and DV449 as of 2015/16.

See the Scheme for the award of MPA degrees students entering in or after 2011/12 for MPA programme criteria for progression.

---

**MPA Options List**

Students may also seek approval from their Programme Supervisor and the Course Convenor to enrol on other MSc options. Not all courses may be offered each year and are subject to cancellation, substitution and timetabling constraints.

**Welfare State Policies**

- SA429 Understanding Social (Dis)advantage (H)
- SA431 Social Policy Research
- GI414 Gender and Social Policy: Theory and Practice (H)
- GI415 Gender and European Welfare States (H)
- GI417 Gender, Population and Policy (H)

MG4D5 Leadership in Organisations: Theory and Practice (H) (formerly ID420)
PH425 Business and Organisational Ethics (H)
** Because of the extremely demanding standard of LSE Economics, these options are available only to students with very good first degrees in Economics and with the permission of the Economics Department. Any student wishing to take these courses must be admitted to the September Introductory Course in Mathematics and Statistics (EC400) at the beginning of their first or second year and pass the course examinations. Students taking more than 1 Economics option must take one of EC402, EC411 or EC413.
*** Courses have prerequisites or pre-screening assessment.

MSc in Management Policy and Governance
Programme code: TMPMGNV
Full year programme. Students must take courses to the value of four full units, including the half-unit dissertation.

Paper Course number and title
1 MG414 Managing Change in the Public Sector: Theory and Challenge (formerly Public Management and Governance)
2 MG415 Thinking Like a Policy Analyst (formerly Project Analysis, Evaluation and Implementation)

3, 4 & 5 Courses to the value of 1.5 units from the following:
AC412 Accountability, Organisations and Risk Management (H)
AC490 Management Accounting, Decision and Control (H)
AC491 Financial Accounting, Reporting and Disclosure (H)
EU421 Policy-Making in the European Union (H)
GV4E4 Public Budgeting and Financial Management
LL4AT Regulation: Strategies and Enforcement (H)
LL4AU Regulation: Legal and Political Aspects (H)
LL4BC Policing and Police Powers (H)
LL4BD Policing: Contemporary Issues and Controversies (H)
LL4BX Corporate Governance - Advanced Topics (H) (n/a 15/16)

MG402 Public Management: A Strategic Approach (H) (n/a 15/16)
MG405 Behavioural Decision Science (H)
MG423 Leading Entrepreneurial Organisations in Global Markets
MG425 Global Business Management (H)
MG437 Business Model Innovation at the ‘Base of the Pyramid’ (H)
MG438 Business Model Innovation at the ‘Base of the Pyramid’ (full unit)
MG450 Social Network Analysis and Strategies (H)
MG453 Managing Digital Business (H) (n/a 15/16)

SA4F7 The Economics of European Social Policy (H) (n/a 15/16)
SA4F8 Behavioural Public Policy (H)
SO425 Regulation, Risk, and Economic Life
SO469 Risk and Governance: A Sociological Approach (H)
Or one half unit MSc level course which is offered in the School, subject to approval of the academic advisor, and a second half unit MSc level course (or one full unit MSc level course) subject to the approval of the programme director.

6 MG499 Dissertation (H)

MSc in Public Policy and Administration
Programme code: TMPPPA
Full-year programme. Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Part-time students may take courses up to the value of two full course units in their first year. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered. By choosing particular combinations of core courses, students can choose to have the title of a specialised stream added to the title of their degree:
MSc Public Policy and Administration (Comparative); or
MSc Public Policy and Administration (Public Management).

Paper Course number and title
1 GV4E9 Approaches and Issues in Public Policy and Administration
2 Either
   GV477 Comparative Public Policy Change (H)
   or
   GV483 Public Management Theory and Doctrine (H)
   or
   GV4F4 Policy Advice in Theory and Practice (H)
3 Courses to the value of one unit from the following:
   Public Management:
   AC412 Accountability, Organisations and Risk
Management (H)
DV413 Environmental Problems and Development Interventions (H) (n/a 15/16)
DV415 Global Environmental Governance (H) (n/a 15/16)
GV483 Public Management Theory and Doctrine (H)
GV4A2 Citizens’ Political Behaviour in Europe: Elections Public Opinion and Identities (H) (n/a 15/16)
GV4C8 Game Theory for Political Science (H)
GV4E4 Public Budgeting and Financial Management
LL4AT Regulation: Strategies and Enforcement (H)
LL4AU Regulation: Legal and Political Aspects (H)
MG402 Public Management: A Strategic Approach (H) (n/a 15/16)
PH415 Philosophy and Public Policy (H)
Comparative Public Policy and Administration:
EU421 Policy-Making in the European Union (H)
EU443 European Models of Capitalism (H)
GV403 Network Regulation (H)
GV4A1 States and Markets (H)
GV477 Comparative Public Policy Change (H)
GV4A5 International Migration and Immigration Management (H)
GV4C4 Legislative Politics: US (H) (L) * (n/a 15/16)
GV4C5 Politics of Economic Policy (H) (M)
GV4C6 Legislative Politics: European Parliament (H) *
GV4C8 Game Theory for Political Science (H)
GV4D4 The Politics of Inequality and Redistribution (H)
SA4F8 Behavioural Public Policy (H)
SA4L1 The Governance of Welfare: The Nation State and the European Union (H)
SA4L2 Contemporary Issues in European Social Policy (H) (n/a 15/16)
SA4M1 Poltics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16)
Another course with the permission of the programme convener.

4  Either
MY451M or MY451L Introduction to Quantitative Analysis (H) or
MY452M or MY452L Applied Regression Analysis (H)
GV499 Dissertation

Notes  * Students must not take both GV4C4 and GV4C6.
To qualify for a stream, the following courses must be taken:
Comparative Public Policy and Administration stream GV4E9 Approaches and Issues in Public Policy and Administration
GV477 Comparative Public Policy Change (H) or GV4F4 The Politics of Policy Advice (H)
One half-unit from the Comparative Public Policy and Administration courses under paper 3.
Public Management stream GV4E9 Approaches and Issues in Public Policy and Administration
GV483 Public Management Theory and Doctrine (H)
One half-unit from the Public Management courses under paper 3.

MSc in Quantitative Economic History
Programme code: TMQEH
Students complete and are examined in courses to the value of four full units.

Paper  Course number and title
1  EH401 Historical Analysis of Economic Change (H)
2  EH422 Topics in Quantitative Economic History
3  EC411 Microeconomics or EC413 Macroeconomics
4  EC402 Econometrics
5  EH472 Essay in Quantitative Economic History (H)

Award of the MSc Quantitative Economic History
The award and classification of the MSc degree is consistent with the School’s scheme for the award of a four-unit Taught Master’s Degree. Students are required to achieve a pass mark of 50% in papers 1 (half unit), 2, 3, 4 and 5 (half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in lse.ac.uk/intranet/LEServcies/TQARO/Calendar/SchemeTaughtMasters.pdf (see paragraph 3.2) apply. A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MSc to the MRes Quantitative Economic History
To progress unconditionally from the MSc to the MRes Quantitative Economic History degree programme, students need to obtain at least a Pass overall in the MSc and at least 50% in the (half unit) Essay in Quantitative Economic History (EH472). Candidates who achieved a Pass overall but received a Fail (but not a Bad Fail) in the (half unit) Essay in Quantitative Economic History (EH472) are permitted to progress to the MRes, but will need to re-submit the EH472 essay and pass with at least 50% in order to be eligible for completion of the MRes.

MSc in Real Estate Economics and Finance
Programme code: TMREEF
Full-year programme. Students must take four compulsory papers and one optional half-unit course and a dissertation as shown.

Paper  Course number and title
1  GY458 Real Property Market Practice (H)
2  GY457 Applied Urban and Regional Economics
3  GY462 Real Estate Finance (H)
4  FM429 Asset Markets A (H) or
   FM473 Finance I (H)
5  GY400 The Economics of Urbanisation (H)
6  GY499 Dissertation

Notes  § means by special permission only. FM430 can be chosen instead of Paper 4 and 5
This programme is externally accredited by the RICS and the IPF. Further information is available on the Geography and Environment Department lse.ac.uk/geographyAndEnvironment/Home.aspx website.

MSc in Regional and Urban Planning Studies
Programme code: TMRUP
Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are required to take GY450 Planning Practice and Research.

Paper  Course number and title
1  GY447 The Economics of Regional and Urban Planning (H)
2  GY448 Social and Political Aspects of Regional and Urban Planning (H)
3  GY454 Urban Policy and Planning (H)
4  Courses to the value of one and a half units:
   GI407 Globalisation, Gender and Development †
   GI409 Gender, Globalisation and Development: An Introduction (H) †
   GI420 Globalisation, Gender and Development: Theorising Policy and Practice (H) †
   GY400 The Economics of Urbanisation (H)
   GY403 Contemporary Debates in Human Geography (H)
   GY407 Globalisation, Regional Development and Policy
   GY410 Economics of Local and Regional Development (H)
   GY413 Regional Development and Policy (H)
   GY415 Local Capacity and Economic Development Policy (H)
   GY421 Gender and Development: Geographical
MSc in Regulation

Programme code: TMRECOWO

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

MSc in Social Policy and Development: Non-Governmental Organisations

**Programme code:** TMSPDVNGO

*(Formerly MSc NGOs and Development)*

Full-year programme. Students must take two compulsory courses, optional courses to the value of two full units, non-assessed course SA4C1 and a dissertation as shown.
MSc in Social Research Methods

Programme code: TMSORM

Full-year programme.
Part 1: Social Research Methods. Students must take courses to the value of three full units and a dissertation as shown.
Part 2: Disciplinary streams. Students must take courses to the value of three full units and a dissertation as shown.

Part 1 Social Research Methods

Paper Course number and title
1 SA4J8 Social Policy and Development: Core Concepts (H)
2 SA4H9 Non-Governmental Organisations, Social Policy and Development (H)
3 Courses to the value of two full units from the following:
   DV407 Poverty (H)
   DV420 Complex Emergencies (H)
   DV432 China in Developmental Perspectives (H)
   GI419 Gender and Contemporary Social Movements (H) (n/a 15/16)
   GY438 Cities and Social Change in East Asia (H) (n/a 15/16)
   GY467 Global Migration and Development (H)
   SA447 Foundations of Health Policy (H)
   SA493 Demographic Change and Development (H) (n/a 15/16)
   SA4C2 Basic Education for Social Development (H)
   SA4C6 International Housing and Human Settlements (H)
   SA4C8 Globalisation and Social Policy (H)
   SA4D2 Global Health and Population Change (H)
   SA4D5 Social Rights and Human Welfare (H)
   SA4E6 Rural Development and Social Policy (H) (n/a 15/16)
   SA4F7 The Economics of European Policy (H) (n/a 15/16)
   SA4F8 Behavioural Public Policy (H)
   SA4H7 Urbanisation and Social Policy in the Global South (H)
   SA4I9 States, Social Policy and Development
   SA4K2 Sexuality, Everyday Lives and Social Policy in Developing Countries (H)
   Another course from within the Social Policy Department.
   A course from another programme (with permission).
   Students are also encouraged to audit MY400 Fundamentals of Social Science Research Design (not assessed).
4 SA4C1 Long Essay and the Research Process (not assessed) (option only possible within the constraints of the timetable)
5 SA470 Dissertation- Social Policy and Development:
   Non-Governmental Organisations, to be handed in by 1 September

Notes
It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with ‘SA’). For further information please see lse.ac.uk/socialPolicyCourses. Students outside the degree programme who opt to take either SA4J8 or SA4I9 will be required to take part in a three day residential workshop on applied social planning at Cumberland Lodge in Windsor Great Park, during the Lent term. The cost of this three day workshop is £200.

Part 2 Disciplinary Streams

Sociology
Courses to the value of one full unit from the following:
   MY426 Doing Ethnography (H)
   MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
   SO407 Politics and Society
   SO438 Sociology of Employment I: Social Relations at Work (H) (n/a 15/16)
   SO458 Gender and Societies (H)
   Courses to the value of one unit from the Methodology options list (below)

Social Psychology
Courses to the value of one full unit from the following:
   MC402 The Audience in Media and Communications (H)
   MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
   PS404 Organisational Social Psychology
   PS411 Current Communication Research (H) (n/a 15/16)
   PS415 The Social Psychology of Economic Life (H)
   PS418 Health Communication (H)
   PS421 Issues in Social Psychology: Group Dynamics (H)
   PS439 Science, Technology and Resistance (H) (n/a 15/16)
   PS445 Organisational and Social Decision Making (H)
   PS464 Social Influence (H) (n/a 15/16)
   Courses to the value of one unit from the Methodology options list (below)

Philosophy
Courses to the value of one full unit from the following:
   PH400 Philosophy of Science
   PH405 Philosophy of the Social Sciences
   PH413 Philosophy of Economics
   Courses to the value of one unit from the Methodology options list (below)

Social Policy
SA451 Social Policy Research
Courses to the value of one unit from the Methodology options list (below)

Statistics
Any approved Graduate level courses in Statistics to the value of one unit, for example:
   MY459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
   MY456 Survey Methodology (H)
   MY457 Causal Inference for Observational and Experimental Studies (H)
   ST416 Multilevel Modelling (H)
   ST425 Statistical Inference: Principles, Methods and Computation
   ST442 Longitudinal Data Analysis (H)
   Courses to the value of one unit from the Methodology options list (below)

Decision and Policy Sciences
Any half unit in MSc Decision Sciences, subject to timetabling constraints, and as approved by the course tutor.
Courses to the value of one unit from the Methodology options list (below)

Government
Any Graduate level course(s) in Government, subject to timetabling constraints, and as approved by the course tutor.
Courses to the value of one unit from the Methodology options list (below)

Development Studies
Any Graduate level course(s) in Development Studies, subject to timetabling constraints, and as approved by the
course tutor, to the value of one full unit.
Courses to the value of one unit from the Methodology options list (below)

Management
Any Graduate level course(s) in Management, subject to
timetabling constraints, and as approved by the course
tutor, to the value of one full unit.
Courses to the value of one unit from the Methodology options list (below)

Population
One compulsory half unit:
SA481 Population Analysis: Methods and Models (H)
One half unit from the following:
DV411 Population and Development: an Analytical
Approach (H)
GI415 Gender and European Welfare States (H)
GI417 Gender, Population and Policy (H)
SA485 Planning for Population and Development (H)
SA492 Reproductive Health Programmes: Design,
Implementation and Evaluation (H)
SA493 Demographic Change and Development (H)
(n/a 15/16)
SA401 Social Epidemiology (H)
SA402 Global Health and Population Change (H)

Methodology options list
MY400 Fundamentals of Social Science Research
Design (H)
MY421M or MY421L Qualitative Research Methods (H)
MY426 Doing Ethnography (H)
MY427 Qualitative Research With Non-Traditional Data
(H) (n/a 15/16)
MY428 Qualitative Text Analysis (H) (n/a 15/16)
MY429 Special Topics in Qualitative Research:
Introspection-based Methods in Social Research
(H) (n/a 15/16)
MY451M or MY451L Introduction to Quantitative
Analysis (H)
MY452M or MY452L Applied Regression Analysis (H)
MY454 Applied Statistical Computing using R (H)
MY455 Multivariate Analysis and Measurement (H)
MY456 Survey Methodology (H)
MY457 Causal Inference for Observational and
Experimental Studies (H)
MY459 Special Topics in Quantitative Analysis:
Quantitative Text Analysis (H)
MY560 Workshop in Advanced Quantitative Analysis (H)
Or any other course approved by the tutor *

Notes
* means by special permission only

MSc in Sociology
Programme code: TMSO
Full-year programme. Students must take courses to the value
of three units and write a dissertation as shown.

Paper Course number and title
1 SO401 Social Research Methods
2 & 3 Courses to the value of two full units from the following:
GV479 Nationalism
SO407 Politics and Society
SO424 Approaches to Human Rights
SO425 Regulation, Risk and Economic Life
SO426 Classical Social Thought (H)
SO427 Modern Social Thought (H)
SO430 Economic Sociology (H) (n/a 15/16)
SO433 Cultural Theory (H) (n/a 15/16)
SO438 Sociology of Employment I: Social Relations at
Work (H) (n/a 15/16)
SO451 Cities by Design (H)
SO454 Families in Contemporary Societies: a Life
Course Perspective (H)
SO457 Political Reconciliation (H)
SO458 Gender and Societies (H)
SO463 Contemporary Social Thought
SO468 International Migration and Migrant Integration
(H)
SO469 Risk and Governance: A Sociological Approach
(H)
SO470 The Sociology of Markets (H)
SO471 Technology, Power and Culture (H) (n/a 15/16)
SO473 Crime, Control and the City (H) (n/a 15/16)
SO475 Material Culture and Design (H)
SO477 Urban Social Theory (H) (n/a 15/16)
SO481 Class, Politics and Culture (H)
SO482 Topics in Race, Ethnicity and Postcolonial Studies
(H)
SO483 Social Change Organizations (H)
4 SO499 Dissertation

MSc in Sociology (Contemporary Social Thought)
Programme code: TMSOCST
Full-year programme. Students must take courses to the value
of three units and write a dissertation as shown.

1 SO463 Contemporary Social Thought

2 & 3 Courses to the value of two units from the following:
SO426 Classical Social Thought (H)
SO427 Modern Social Thought (H)
SO433 Cultural Theory (H)
SO471 Technology, Power and Culture (H) (n/a 15/16)
SO475 Material Culture and Design (H)
SO477 Urban Social Theory (H) (n/a 15/16)
SO479 Human Rights and Postcolonial Theory (H)
(n/a 15/16)
SO481 Class, Politics and Culture (H)
Other options from the Department of Sociology and
approved outside options.
4 SO499 Dissertation

MSc in Sociology (Research)
Programme code: TMSORE
This is a full-year programme (one year full-time, two years part-
time). Students will be required to take courses to the value of
three full units and a dissertation as shown.

Paper Course number and title
1 SO401 Social Research Methods
2 MY451 Introduction to Quantitative Analysis (H)
3 MY452 Applied Regression Analysis (H)
4 Sociology option(s) to the value of one unit
5 SO499 Dissertation

MSc in Statistics
Programme code: TMST
Academic-year programme. Students must take courses to the value
of four full units.

Paper Course number and title
1 ST425 Statistical Inference: Principles, Methods and
Computation
2-4 Courses to the value of three full unit from the following:
ST405 Multivariate Methods (H)
ST409 Stochastic Processes (H)
ST411 Generalised Linear Modelling and Survival
Analysis (H)
ST416 Multilevel Modelling (H)
ST418 Non-linear Dynamics and the Analysis of Real
MSc in Statistics (Financial Statistics) (Research)

Programme code: TMSTFSRE

Academic-year programme. Students take three compulsory courses (two units), a dissertation, and optional courses to the value of one unit.

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440, MG441 and MG443 will be eligible to proceed into the second year. FM475 and MG445 are not required for progression.

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. The results of first year courses FM475 and MG445 will initially be provisionally released and subsequently formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results. For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440, MG441 and MG443 will be eligible to proceed into the second year. FM475 and MG445 are not required for progression.
A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:
- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
  - at the discretion of the Chair of the Sub-Board of Examiners; and
  - subject to ratification by the Graduate School Board of Examiners (GSBE).
- has failed all of the first year papers, he/she will not be eligible to proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School’s Scheme for the Award of a Taught Master’s Degree (four units).

The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School’s Scheme for the Award of a Taught Master’s Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475 and MG445 will initially be provisionally released and subsequently formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results.

For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

- SA4G5  Valuation, Behaviour and Policy (H) (n/a 15/16)
- SA4N7  Economics of Health and Wellbeing (H)

Executive LLM

Programme Code: TMLL2EX

1. The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes in the online Calendar apply to the Executive LLM programme except in the event of inconsistency when these regulations for the Executive LLM take priority.

2. In order to obtain the Degree, students must complete eight Executive LLM courses (see list below). Students must complete the requirements as a part-time student over a period of four years, or with the approval of the Programme Director within a period of six years. The minimum period within which the Degree can be completed is three years.

3. Alternative exit points are available to students who are not able to complete the Degree. An LSE Diploma in Legal Studies is available on completion of six courses and a Certificate of Legal Studies on the completion of four courses. There is no minimum period for completion of the alternative exit points of Certificate of Legal Studies or Diploma in Legal Studies.

4. Courses should be chosen from the list below and are subject to availability as not every course will be offered each year. Subject to the availability of teaching staff, it is intended that every course be offered at least once within the four year degree period. No other courses at LSE or elsewhere may be taken as part of the Executive LLM programme.

Intensive Teaching

5. The Executive LLM courses will be taught in short intensive week-long sessions, which will typically be taught in the first half of April, September and December. Each course will provide between 24 and 26 hours of contact teaching time. Teaching will normally run from Monday to Friday. However, in the exceptional event where a course cannot be taught on the set weekdays (e.g. due to last minute teacher illness), teaching may be extended to the Saturday and Sunday morning of that week. Accordingly, students are expected to book trains or flights for the day before teaching commences and should, where possible, book return trains or flights on the Sunday afternoon or evening following the completion of the course.

6. Where there is student demand we may elect also to offer some courses in two intensive weekends. The two weekends will not be more than four weekends apart. Where courses are offered in the intensive weekend format the same course will also be offered in week-long intensive format at least once every four years.

Payment of Fees

7. All Executive LLM offer holders will be required to pay a Registration Fee of £500 within 14 days of receiving their offer of admission. The registration fee is non-refundable. Only on receipt of the registration fee, may students register onto the programme. Registered students are then required to pay a per course tuition fee in advance of their chosen course date, to secure their place.
Students will only be permitted to attend a module if payment is received in time. Fee payment deadlines can be found at: ise.ac.uk/intranet/LSEServices/FinanceDivision/feesAndStudentFinance/Paying%20fees/Executive%20programmes.aspx#llm
8. The registration fee of £500 is non-refundable. If you withdraw from the course before starting a session or are unable to attend a session for which you have registered, all module fees will be credited to a module in a later session. You must inform the Programme Manager if you are unable to attend a module you are registered for. In exceptional circumstances, at the Director’s discretion, the fees paid for that session will be refunded. Changes in fee levels may occur over the course of the programme. The student will remain liable for any difference between the fees chargeable at the later session and the fee credit from the module which the student withdrew from. Module fees are non-refundable, and will not be credited to another session, if you have attended classes but withdraw before the assessment.
9. It is our intent to offer each advertised module at least once during the four year degree period. This may not always be possible due, for example, to teacher illness or resignation. It is possible that a module may need to be cancelled at short notice, such as where the teacher is unavailable or participant numbers are very low. If this happens, students will be given the option of taking another module during the same session or, alternatively, the fees paid towards that module will be held in credit for your next chosen module/session or refunded if preferred. Students will be informed of the withdrawal of a module no later than two weeks prior to the commencement of the module.

### Assessment
10. All Executive LLM courses are assessed by either take-home examination or 8,000 word extended essay.
11. To comply with the Department’s writing requirement at master’s level, all students are required to write one extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate.
12. Extended essays must not exceed the set word limit and must be submitted by a set deadline. Students must provide evidence of original work or a capacity for critical analysis. Students will be required, at the time of submission of their work, to sign a statement on plagiarism. An oral examination may be held if the examiner so determine.
13. The take-home examinations will be set two months after the completion of the intensive teaching. The date of the examination will be provided at the date courses are available for selection. They will be uploaded and submitted electronically.
14. All students are required to write an extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate. The extended essay topic will be set by the course teacher. The student may propose essay topics and ideas to the teacher.
15. All students will be required to be online during the examination period in case there is any need to contact them.
16. Students will be able to re-sit a course examination once. A re-sit examination will be set as soon as possible after the student is notified of the failure. At the Programme Director’s sole discretion in lieu of a re-sit or deferred examination the student may be required to submit an 8,000 word essay. This can only occur when the student has not already completed the maximum of three 8,000 word essays.
17. Any student who fails an exam twice in the same course will not be able to proceed to complete the Executive LLM programme. Students will not be able to proceed to take further courses if at the first sit and the re-sit examination are both bad fails or if the failure is not a bad fail but the student has failed another course following the re-sit. If such a student has already successfully completed 4 courses or 6 courses prior to such a failure, the student will be awarded a Certificate of Legal Studies or Diploma of Legal Studies.

### Registration
18. The maximum period of registration on the programme is six years. Therefore completion of all the degree requirements (or Diploma, Certificate) must be within a six year period.

### Course Completion Rate
19. Students will be expected to take one to two courses per year. Any student who fails to take a course for a two year period will be asked to provide reasons for the failure to complete courses. Any student who following such a request either fails to provide a response to the Programme Director or fails to complete a course in the year following the giving of these reasons, may be deregistered from the programme.

| | SA4X6E  Welfare Analysis and Measurement (H) (n/a 15/16) |
| | 8 | EC409E  Public Policy in Practice Workshop III (EMP) (H) |

Students should attain at least a Pass grade in each of the first year courses GV4G8E, GV478E and EC455E. The Year 1 course GV4G9E will not count towards progression but the grade will count towards the final degree classification. If a single paper is failed, the student may proceed to the second year and resit the failed paper along with the second year papers. The Sub-Board of Examiners may, at its discretion, consider an application to progress to the second year of the degree from a student who has fallen marginally short of this requirement.

</table>

In exceptional cases it may be possible to take an unlisted optional course with the approval of the Programme Director.
Notes  You will be required to write a 6,000 word dissertation (replacing the exam) in one of your half unit courses. You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on. FM404, FM440, FM447 and FM472 are taught during the daytime only. To take these courses students must be able to attend teaching during the day.

Supplementary criteria for progression from the first to the second year of the MSc Finance (part-time)

To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the two compulsory courses: FM422E and FM423E. If a candidate fails (but does not ‘Bad Fail’) one compulsory course, the Board may exceptionally allow progression to the second year. Exceptional progression will be at the sole discretion of the Board. If a candidate fails both of these compulsory courses they will not be allowed to progress to year two. If a candidate has a ‘Bad Fail’ in one or both courses they will not be allowed to progress to year two.

A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.

MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences

Programme code: TMHECSEX
Students take five compulsory half unit courses, options to the value of one and a half units, and a dissertation.

EH466 Labour and Work in Preindustrial Europe (H) (withdrawn 15/16)
EH467 Epidemics: epidemic disease in history, 1348-2000 (H)(n/a 15/16)
EH486 Shipping and Sea Power in Asian Waters, c1600-1860 (H)

Regarding Economic History (EH) courses only: it may be possible to take further options among EH courses with the agreement of the course teacher responsible and the Academic Coordinator of the Double Degree. One of the above may be replaced by a further course from other LSE departments (subject to agreement with tutor and teacher responsible for the course).

5 Compulsory Language Requirement

Students can fulfil the language requirement of the dual Master's degree in three different ways:
1) By taking two years of language training while at Columbia and the London School of Economics.
2) By taking, and passing, two translation exams. (Both translation exams must be taken at Columbia. See sample translation exams on the CU History Department website).
3) By taking, and passing, one translation exam and studying a language for one year, either at Columbia or at the LSE Language Centre.

Notes

Students can also take HY449 Long-term History: The Patterns of the Past and the Shape of Things to Come, a non-assessed course taken in addition to the required four full-units as detailed above.

MSc Global Media and Communications (with Fudan or USC)

Programme code: TMGLMECO (LSE & USC)

Programme code: TMGLMECO2 (LSE & Fudan)

Full-time programme taken over two calendar years. Students must take courses at LSE as shown below and follow either the programme at Fudan or USC in year two.

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown.

Paper

Course number and title

| 1 | MC408 | Theories and Concepts in Media and Communications (Key concepts and interdisciplinary approaches) (H) |
| 2 | MC411 | Media and Globalisation (H) |
| 3 | One of the following courses: |

514x Seminar: Social Movements as Rhetorical Form (4, 2 years, Sp)
515x Seminar in Postmodern Rhetorical Theory (4, 2 years, Fa)
516x Seminar: Feminist Theory and Communication (4, 2 years, Sp)
517x Seminar in Rhetorical Theory and Culture (4, Sp)
518x American Public Address (4, Sp, odd years)
519x Seminar: Cultural Studies in Communication (4, 2 years, Fa)
520 Social Roles of Communication Media (4, Fa/Sp)
521x Seminar in Argumentation (4, 2 years, Sp)
522x Seminar in Kenneth Burke's Dramatistic Theory (4)
524x Seminar in Small Group Process (4, Sp, even years)
528 Web Designs for Organizations (4, Fa/Sp)
530 Social Dynamics of Communication Technologies (4, Sp/Sm)
In addition to coursework offered at the Annenberg
646 Negotiating Boundaries in Environmental Research (2)
637 Current Readings in Organizational Communication
635 Virtual Groups and Organizations (4, Fa/Sp)
640 Communication and Organizational Change (4, Fa)
645 Communication Networks (4, 2 years, Sp)
646 Negotiating Boundaries in Environmental Research (2)
647x Seminar on the Network Society (4, Fa)
699 Special Topics (variable special one-time course offerings)
531 Communication and the International Economy (4, Fa)
532 Development of American Media Industry (4, Fa)
533 Emerging Communication Technologies (4, Fa/Sp)
534 The Culture of New Technologies (4, Fa/Sp)
535 Virtual Groups and Organizations (4, Fa/Sp)
540 Uses of Communication Research (4, Fa/Sp)
541 Integrated Communication Strategies (4, Sp)
542 Business Strategies of Communication and Entertainment Firms (4, Sp)
543 Managing Communication in the Entertainment Industry (4, Fa)
544 The Arts and New Media (4, Fa)
545 Communication and Global Competition (4, Sp)
546 Seminar in Diffusion Theory and Research (4, 2 years, Sp)
547 Distribution of Recordings: Media, Retail and Online Channels (4, Sp)
548 Issues in Children’s Media (4, Sp)
553 Political Economy of Global Telecommunications and Information (4, Sp)
557 Communication Policy in the Global Marketplace (4, Fa)
558 The International Entertainment Marketplace (4, Fa)
559 Globalization, Communication and Society (4, Fa)
560 Communications Policy (4, Fa/Sm)
562x Cognitive Approaches to Communication (4, 2 years, Fa)
565 Communication Law and Broadcasting (4, Fa/Sp)
566 Communication Law and New Technologies (4, Sp)
567 Internet Policy, Practice and Regulation (4, Fa/Sp)
570 Economics of the Communication Industries (4, Fa)
571 Communications Technologies (4, Fa/Sp)
572 Telephone, Data, and Video Telecommunication Systems (4, Sp)
573 Evaluating Communication Needs (4, Sp)
574 Tele-Media: A Strategic and Critical Analysis (4, Fa/Sp)
575 Advocacy and Social Change in Entertainment and the Media (4, Fa)
576 Communication Strategies for Conflict Management (4, Sm)
578 Media and Politics (4, Fa/Sp)
581 Media in Social Services: Design and Evaluation of Campaigns (4, Fa)
582 International Communication: National Development (4, Sm)
583 Global Entertainment Education Programs (4, Sp)
584 Seminar: Interpreting Popular Culture (4, Fa)
585x Organizational Communication (4, 2 years, Sp)
587 Audience Analysis (4, Fa)
605 Advanced Macro Theories of Communication 1 (4, 2 years, Sp)
610 Studies in Rhetorical Theory (4, max 8, Fa/Sp/Sm)
618 Mass Media Effects (4, Fa)
620 Studies in Communication Theory (2-4, max 8, Fa/Sp)
625 Theory Construction in Communication (4, Sm)
629 Global Culture (4, Fa)
630 Communication Technology and Social Change (4, Sp)
631x Minds and Media (4, Sp)
635 Economics of Information (4, Sp)
636 Interpretive and Cultural Approaches in Organizational Communication (4, 2 years, Fa)
637 Current Readings in Organizational Communication (4, 2 years, Sp)
638 Global, International and Intercultural Communication in Organizations (4, 2 years, Fa)
640 Communication and Organizational Change (4, Fa)
645 Communication Networks (4, 2 years, Sp)
646 Negotiating Boundaries in Environmental Research (2)
647x Seminar on the Network Society (4, Fa)
699 Special Topics (variable special one-time course offerings)
In addition to coursework offered at the Annenberg School of Communication, students may take up to a maximum of 4 units of graduate-level coursework

from other schools or departments at the University of Southern California towards their remaining 20 unit requirement, subject to the consent of the candidate’s USC adviser.

Notes
* Courses are subject to availability and the permission of the course lecturer.
* Passing this course is a requirement for passing the programme.
+ Only available to students if they did not take it under Paper 2
(Fa) means Fall semester
(Sp) means Spring semester
(Sm) means Summer semester

MA Global Studies: A European Perspective
Two-year programme. Students attend LSE for either their first or second year and also attend, for a year, one of the following participating institutions: Leipzig, Roskilde, Vienna, or Wroclaw. Students follow the MSc Global History programme at the LSE.

MSc Global History

Programme code: TMGLHY2

Full-year programme. Students must take compulsory courses to the value of 2.5 units, a dissertation and optional courses. Students taking year one of the programme at LSE will need to complete EH479 (6,000 word dissertation) and take one unit of options; students taking year two at LSE will complete EH480 (10,000 word dissertation) and 0.5 units of options.

Paper Course number and title
1 EH481 Economic Change in Global History: Approaches and Analysis (H)
2 & 3 Two of the following:
EH482 Pre-modern Paths of Growth: East and West compared, c1000-1800
EH483 The Development and Integration of the World Economy in the 19th and 20th centuries
HY423 Empire, Colonialism and Globalization
4 Either
EH479 Dissertation: Global History (H) and courses to the value of one full unit from the following (if not already taken under paper 2)
EH480 Dissertation: MSc Global History and courses to the value of 0.5 units from the following (if not already taken under paper 2):
EH402 Research Design and Quantitative Methods in Economic History (H)
EH404 India and the World Economy (H)
EH410 International Migration, 1500-2000: from slavery to asylum (H)
EH409 Chinese Economy in Transition: 1850-1950 (H)
EH412 Research Topics in Economic History A (H) (withdrawn 15/16)
EH413 African Economic Development in Historical Perspective (H)
EH419 Research Topics in Economic History B (H) (withdrawn 15/16)
EH422 Topics in Quantitative Economic History
EH423 Japan and Korea as Developing Economics (H)
EH424 The British Economy in Global Perspective, 1000-2000 (H) (n/a 15/16)
EH426 Quantitative Topics in Economic History I: Cross-section and Panel Data (H)**
EH427 Quantitative Topics in Economic History II: Time Series and Economic Dynamics (H)**
EH428 History of Economics: Making Political Economy into a Social Science (H) (n/a 15/16)
EH429 History of Economics: Ideas, Policy and Performativity (H) (n/a 15/16)

** LSE-PKU Double Degree in Public Administration and Government **

** Programme code: TMAPAGV **

Two-year programme. Students take the first year at Peking University, and the second year at LSE as follows:

Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered.

This programme is externally accredited by the RICS. Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).
Taught Master’s Course Guides
AC411  Half Unit
Accounting, Strategy and Control
This information is for the 2015/16 session.
Teacher responsible: Prof Wim Van der Stede OLD 2.18
Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor if they have sufficient background knowledge.

Course content: This course provides an advanced overview of key theoretical and practical developments in the area of organisational control, which is an essential function of management to ensure that the organisation’s objectives and strategies are carried out effectively. Good management control increases the probability of organisational success. Specifically, the course discusses what it means to have an organisation be in control, what alternatives managers have for ensuring good control, and how managers should choose from among various control system alternatives. Then we will focus on each of the elements of financial control systems, which provide the dominant form of control in the vast majority of decentralised organisations. These elements include financial target setting, performance measurement and evaluation and the assignment of various forms of organisational rewards, such as bonuses and promotions. The latter part of the course extends these key notions of management control from the intra-organisational level to the inter-organisational level, highlighting some of the difficulties involved in organisational control of new, fluid, inter-organisational settings and configurations, such as joint-ventures and various types of alliances, often involving global alliance partners.

The course will cover the following topics:
- Strategy and the design of planning and control systems
- Management control systems and organisational architecture
- Decision rights and results accountability in decentralised organisations
- Incentive compensation systems
- Performance measurement and evaluation
- Management control in inter-organisational relationships
- Corporate governance.

As a final note, the discipline of management accounting is often partitioned into (1) management control systems and (2) cost and management accounting systems, where the latter is the key focus of another course, AC415. AC411 can, but is not required to, be taken with AC415. Students can take AC411 or AC415, or both.

Teaching: 30 hours of seminars in the MT.

AC412  Half Unit
Accountability, Organisations and Risk Management
This information is for the 2015/16 session.
Teacher responsible: Prof Mike Power KSW 3.12 and Dr Tommaso Palermo KSW 3.07
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Social Policy, MPhil/PhD in Accounting, MSc in Accounting and Finance, MSc in Economy, Risk and Society, MSc in Law and Accounting, MSc in Management, MSc in Management and Regulation of Risk, MSc in Management, Organisations and Governance, MSc in Public Management and Governance, MSc in Public Policy and Administration and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor.

Course content: This is an advanced course focusing on the organisational and institutional settings within which risk is managed.

The first five lectures deal with key issues in organisational responses to risk and uncertainty, including the impact of disasters and accidents and the growing formalisation and standardisation of risk management practice. The second five lectures explore the intersections of risk and corporate governance, by focusing on the risks that arise at top management and board of directors level, including lack of external oversight, executive pay issues, board interlocks, and strategic irreversibility. The overall purpose of the course is to provide students with a critical appreciation of the management of risk as an organisational and social process. The course is necessarily cross-disciplinary, drawing on scholarship within accounting, organisational sociology and regulation studies.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures in the ST. In week 6 there will be a reading and feedback week, including a writing workshop.

Assessment:
- 20% in class tests in December.
- 40% by essay and individual report (15%) in January.
- 40% for the project (15%) in January.

Formative coursework: Students are required to complete two essays during term-time (totaling 15% of the mark for the course), a group project, due in January (15%), and a final exam (70%).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

### AC414  Half Unit

**Financial Reporting, Capital Markets and Business Combinations**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Vasiliki Athanasakou Old 2.20 and Prof Ane Miren Tamayo Old 5.05

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor if they have sufficient academic background knowledge. This course cannot be taken in conjunction with AC420 Financial Reporting in Capital Markets. The course is capped to one section of around 55 students; i.e., 55 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority

**Pre-requisites:** Knowledge of financial accounting at undergraduate level is presumed.

**Course content:** A number of financial reporting issues and topics are covered. It is likely that they include but are not restricted to the following: accounting for value creation with special emphasis on cash flows and revenues, business combinations, corporate disclosure, capital markets efficiency, and corporate governance. Most topics are covered from an International Financial Reporting Standards (IFRS) and/or United States Generally Accepted Accounting Principles (US GAAP) perspective.

**Teaching:** 30 hours of seminars in the MT. Teaching is delivered in a 3-hour session each week. Each session is conducted in groups of about 55 students, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

**Formative coursework:** The lecturers set exercises, essays or case studies for class discussion each week. Many of these involve reading key papers and other writings in the financial accounting literature and illustrating their effects numerically. Two pieces of work, based on these assignments, are collected for formative assessment.

**Indicative reading:** Detailed reading lists are handed out at the start of the course, and will be largely based on papers in academic journals. Relevant books covering specific parts of the course are:

**Assessment:** Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes is reading time.

### AC415  Half Unit

**Management Accounting for Decision Making**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Bjorn Jorgensen Old 2.17

**Availability:** This course is available on the MPhil/PhD in Accounting, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be taken concurrently with AC490 Management Accounting, Decisions and Control.

**Course content:** This course is focused on management accounting, which is a key function in organisations that involves developing and using financial and non-financial information to support decision making, not only in a technical sense, but bearing in mind that the way in which management accounting systems are designed and implemented often determines whether employees will be motivated to act in ways that are congruent with the objectives of the organisation.

The discipline of management accounting is often partitioned into (1) cost and management accounting systems and (2) management control systems, where the latter is the key focus of another course, AC411. AC415 can, but is not required to, be taken with AC411. Students can take AC411 or AC415, or both.

Returning to AC415, while financial accounting requires that product cost information be accumulated in particular ways for external reporting, the focus in AC415 is on cost and other accounting and non-accounting information systems that aid managerial decision making. This includes the study of management accounting systems in widespread use today as well as an analysis of the problems associated with these systems in today's business environment (such as their tendency to provide distorted product cost information), as well as approaches to mitigate these problems (e.g., activity-based costing; use of non-financial information).

With the above brief overview in mind, this course analyses key concepts which form the discipline of management accounting:

- Product costing and pricing
- Activity-based costing/management (ABC/ABM)
- Profitability and variance analysis
- Transfer pricing including tax considerations for international transactions
- Performance measurement and incentive compensation systems
- ROI, EVA, and other performance metrics

**Teaching:** 33 hours of seminars in the LT.

That is, AC415 is delivered in two sessions of 1.5 hours each week. Each session is conducted in groups of circa 55 students and is almost exclusively taught by way of the case method of instruction. Case studies permit the exploration of management accounting issues in a broad range of settings. The case method of instruction, however, requires good advance preparation by the students, and every person should be ready to contribute to the case discussion when called upon. Students should expect to be “cold called” and not count on being able to hide behind classmates who volunteer to participate.

**Formative coursework:** Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases.

**Indicative reading:** A detailed reading list is laid out for each session on the syllabus.

Reference textbook: Horngen, Sundem, Burgstahler, and
Schattzberg, Introduction to Management Accounting, 16e (Prentice Hall, 2014).

**Assessment:** Exam (75%, duration: 2 hours) in ST
Case Assignment (10%) during LT
Project (15%) during LT

Thus, students are required to complete two assignments during term time (totalling 25% of the mark for the course) and a final exam (75%).

AC420  
**Financial Reporting in Capital Markets**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Vasiliki Athanasakou OLD 2.20, Dr Pascal Frantz OLD 3.07, Prof Peter Pope OLD 5.04 and Prof Ane Miren Tamayo OLD 5.05

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions and MSc in Law and Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted if they have knowledge of financial accounting acquired at undergraduate level, and only with the agreement, in writing, of the MSc (Accounting) Course Tutor. This course cannot be taken in conjunction with **AC414 Financial Reporting, Capital Markets and Business Combinations**.

The course is capped to three sections of around 55 students; ie, 165 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

**Course content:** Corporate financial statements are a key source of information about the economic activities of a firm. This course is intended to enhance the student’s ability to relate economic events to financial statements and disclosures. It also seeks to aid in developing a coordinated set of concepts and principles to serve as a framework for analysing a wide variety of financial reporting issues. The goal is to enable students to understand the mapping between underlying economic events and the information in financial statements, and how this mapping affects inferences about the economic activities and position of the firm. The course also explores the regulatory environment and political climate, and how these link with the introduction of new standards and their underlying theories. Students are encouraged to relate economic events to diverse practices in financial statements, and to think critically of ongoing controversies and debates.

The course objectives are achieved through teaching a variety of financial reporting issues and topics including the following: standard setting with respect to the conceptual frameworks; accounting for business combinations; accounting for value creation; capital markets efficiency; corporate disclosure; and corporate governance. Most topics are covered from an International Financial Reporting Standards and/or United States Generally Accepted Accounting Principles perspective. The course also covers a number of theoretical perspectives such as deductive approaches, based on the notion of financial accounting as the measurement of economic income and value (including applications to current accounting controversies); economic approaches, regarding corporate financial reporting as an information system, including signalling and disclosure, and studying the demand for and supply of accounting information in a market setting and its stock market impact; and regulatory approaches, examining the nature of and case for and against the regulation of corporate financial reporting. Illustrations are provided on how these theories are used in standard setting and in valuation. Detailed choice of subjects will be determined by those lecturing on the course and many vary to some extent from year to year. Knowledge of basic accounting is assumed.

**Teaching:** 30 hours of seminars in the MT and 33 hours of seminars in LT. Teaching is delivered in a 3-hour session each week. Each session is conducted in groups of about 55 students, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

**Formative coursework:** Lecturers set assignments, essays or case studies for class discussion each week. Many of these involve reading key papers and other writings in the financial accounting literature and illustrating their effects numerically. Four pieces of work, based on these assignments, are collected for formative assessment.

**Assessment:** Exam (100%, duration: 3 hours and 15 minutes) in the main exam period. The first 15 minutes is reading time.

AC424  
**Accounting, Organisations and Institutions**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Matthew Hall OLD 2.11A

**Availability:** This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not available to other students except in special circumstances and with the written permission of the Course Director.

**Pre-requisites:** There are no specific pre-requisites and the course does not require a background in accounting. Pre-sessional training in the form of various intensive sessions prior to the start of term will be offered for those who need a brief ‘technical’ preparation for the Programme.

**Course content:** The object of the course is to provide students with an advanced understanding of the changing role and position of accounting practices in organisations, both public and private, and societies more generally. Students will be exposed to advanced thinking about how accounting practices are much more than a collection of routine techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents will be addressed.

The course will emphasise the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each lecture will provide the necessary technical foundations.

Indicative topics, listed along the lines of “Foundations” and “Risk Management, Accountability, and Corporate Governance” include: Foundations-Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of “Entity”; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Accountability, Incentives and Performance; Accounting for Sustainability; Organisational Failure. Risk Management, Accountability and Corporate Governance-Disasters, Accidents and Errors; Organisations and the Management of Uncertainty; The Risk Management Process; Mapping and
AC425

MSc Accounting, Organisations and Institutions: Pre-sessional course

This information is for the 2015/16 session.

Teacher responsible: Dr Matthew Hall OLD 2.11A

Availability: This course is available on the MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is normally only available to MSc Accounting, Organisations and Institutions students. The purpose of the two pre-sessions is to acquaint students without any prior, or little, background in accounting to two core areas within accounting: Financial Accounting and Management Accounting. Students with some prior background in accounting may find the sessions to be useful as a "refresher".

Course content: Session 1: Introduction to Financial Accounting and Auditing Session 2: Introduction to Management Accounting

Teaching: The two sessions are held over two days in September before the start of MT.

Formative coursework: Study materials for the pre-sessional will be made available by means of selected handouts

Assessment: There is no assessment.

AC444 Half Unit

Valuation and Security Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Pascal Frantz OLD 3.07 and Mr Jose Carabias Palmero OLD 2.13

Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted to the course if they have a reasonable knowledge of financial accounting or finance acquired at undergraduate or equivalent level, and only with the agreement, in writing, of the MSc (Accounting) Course Tutor.

Pre-requisites: It is advantageous for students to have knowledge of financial accounting and finance (asset pricing).

Course content: The aim of this course is to introduce students to security analysis and valuation from both theoretical and empirical perspectives. Students are furthermore provided with an opportunity to apply their skills by valuing, in small groups, from the point of view of a "sell-side analyst", a firm's equity of their choice using technologies based on the present values of free cash flows and economic value added. The course should appeal to students interested in investment analysis and fund management.

The course is presented in three parts. The first part, financial analysis, focuses on past and present performance evaluation, which is used by financial analysts to generate expectations about future performance (prospective analysis). The second part, security valuation, focuses on the determination of intrinsic security prices, which, in efficient markets, reflect prospective performance. The third part, returns to fundamental and technical analysis, provides empirical evidence on returns to trading strategies based on either financial analysis or past stock returns.

Teaching: 20 hours of lectures, 9 hours of seminars and 3 hours of workshops in the LT.

Students will present their corporate valuation projects during the LT workshops.

There will be a reading week in week 6 of LT.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Project (30%) in the lent term.

AC470 Half Unit

Accounting in the Global Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Andrea Mennicken OLD 3.12

Availability: This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Development Management, MSc in International Political Economy, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Management and Strategy, MSc in Regulation and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped to one section of around 55 students; ie, 55 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Pre-requisites: There are no specific pre-requisites and the course does not require a background in accounting.

Course content: This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. This course critically
examines dynamics of accounting regulation, including international standard-setting and consequences for financial statement users, business entities and wider local and global stakeholders.

Topics include:
- Political, institutional and economic influences in changing national and international financial reporting frameworks. The political economy of accounting standard-setting. The work of the International Accounting Standards Board (IASB), the European Union, national accounting bodies, and their political and economic environments.
- The effects of national financial reporting requirements and International Financial Reporting Standards (IFRS) on business entities and economic development, particularly developing and emerging economies (including the BRIC countries: Brazil, Russia, India, China). The enforcement of financial reporting requirements through auditors, securities regulators, the World Bank and others.
- Specific technical challenges (for example, impairment tests, derivatives and other financial instruments, fair value accounting and intangible assets).

The course explores issues from different theoretical perspectives through comparative empirical analysis.

**Teaching:** 30 hours of seminars in the MT. (Note: Week 1 of MT is reserved for an intensive pre-session course for MSc Accounting and Finance students; therefore, main courses, including AC470, start in Week 2 of MT; hence, teaching is for 10 weeks from weeks 2-11.) A 2-hour essay workshop and also a revision session in week 11 of MT.

It is intended to run a small number of additional sessions with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

**Formative coursework:** Students are required to write an assessed essay of 3,500-4,000 words, to be submitted after the Christmas break. The word limit excludes the bibliography. This written work forms 40% of the overall assessment. A workshop will be held in preparation for the essay assignment. Individual feedback will be given on essay outlines. Further readings, exercises and case studies are set for class discussion each week.

**Indicative reading:** Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include policy briefings, regulatory documents, green and white papers, World Bank reports (ROSC).

Relevant books:
- Camfferman and Zeff, Aiming for Global Accounting Standards, 2001-2011 (Oxford University Press, 2015);
- Botzem, The Politics of Accounting Regulation (Edward Elgar, 2012);
- Chapman, Cooper & Miller, Accounting, Organizations and Institutions (Oxford University Press, 2009);
- Djelic & Quack, Transnational Communities: Shaping Global Economic Governance (Cambridge University Press, 2010);
- Bowden & Seabrooke, Global Standards of Market Civilization (Routledge, 2006);
- Doupnik, International Accounting (McGraw-Hill, 2014);
- Nobes & Parker, Comparative International Accounting (Prentice Hall, 2012);
- Walter, Governing Finance: East Asia’s Adoption of International Standards (Cornell University Press, 2008).

**Assessment:** Exam (60%), duration: 1 hour and 30 minutes) in the main exam period.

Essay (40%, 3,500-4,000 words) in LT.

The 4,000 words exclude the bibliography.

---

**AC471** Half Unit

**Accounting in the Global Economy (MSc Management [IMEX route] only)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Andrea Mennicken

**Availability:** This course is available on the MSc in International Management. This course is not available as an outside option.

**Pre-requisites:** There are no specific pre-requisites and the course does not require a background in accounting.

**Course content:** This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. This course critically examines dynamics of accounting regulation, including international standard-setting and consequences for financial statement users, business entities and wider local and global stakeholders.

Topics include:
- Political, institutional and economic influences in changing national and international financial reporting frameworks. The political economy of accounting standard-setting. The work of the International Accounting Standards Board (IASB), the European Union, national accounting bodies, and their political and economic environments.
- The effects of national financial reporting requirements and International Financial Reporting Standards (IFRS) on business entities and economic development, particularly developing and emerging economies (including the BRIC countries: Brazil, Russia, India, China). The enforcement of financial reporting requirements through auditors, securities regulators, the World Bank and others.
- Specific technical challenges (for example, impairment tests, derivatives and other financial instruments, fair value accounting and intangible assets).

The course explores issues from different theoretical perspectives through comparative empirical analysis.

**Teaching:** 18 hours of lectures and 8 hours of seminars in the MT. A 2-hour essay workshop in week 11 of MT. 2 hours of lectures in the ST.

It is intended to run a small number of additional lectures with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

**Formative coursework:** Students are required to write a 7,500-8,000 word assessed long essay (word limit includes bibliography), to be submitted after the Christmas break. This written work forms 100% of the assessment. Individual feedback will be given on long essay outlines and chapters. Further, a workshop will be held in preparation for the essay assignment. Essay relevant readings, exercises and case studies are set for class discussion each week.

**Indicative reading:** Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include policy briefings, regulatory documents, green and white papers, World Bank reports (ROSC).

Relevant books:
- Camfferman and Zeff, Aiming for Global Accounting Standards, 2001-2011 (Oxford University Press, 2015);
- Botzem, The Politics of Accounting Regulation (Edward Elgar, 2012);
- Chapman, Cooper & Miller, Accounting, Organizations and Institutions (Oxford University Press, 2009);

- Doupnik, International Accounting (McGraw-Hill, 2014);
- Nobes & Parker, Comparative International Accounting (Prentice Hall, 2012);
- Walter, Governing Finance: East Asia’s Adoption of International Standards (Cornell University Press, 2008).

**Assessment:** Essay (100%, 7,500-8,000 words) in LT.

The 8,000 words include the bibliography.
AC490  Half Unit
Management Accounting, Decisions and Control

This information is for the 2015/16 session.
Teacher responsible: Prof Alnoor Bhimani OLD 3.08
Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Economics and Management, MSc in Law and Accounting, MSc in Management, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Public Management and Governance and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. This introductory course may also be taken by MSc students who have not previously studied accounting subjects. Students in the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC491. This course cannot be taken concurrently with AC415 Management Accounting for Decision Making. The course is capped at 115 students.
Course content: Enterprises must today tackle markets that are affected by global economic and social forces and the extensive advances in internet-based technologies. They must seek success in the face of intense competition including the ever more sophisticated corporate strategies of their competitors. At the same time, the interface between business decisions and management accounting is regarded as becoming more complex and a more significant determinant of high corporate performance. This course provides students with an introduction to issues of accounting information and cost management, management decision making and performance measurement. It discusses also the interface between management accounting and technology, corporate strategy, e-business and marketing.
The course will cover:
- established managerial accounting concepts such as cost-volume-profit relationships, overhead cost allocations, activity based costing, the balanced scorecard, target cost management and quality costing;
- the implications for accounting of flexible organisational technologies such as just-in-time systems, enterprise resource planning, computer integrated system and collaborative manufacturing;
- operational, marketing and corporate strategy issues including cost management, e-business and internet-based business models;
- organisational arrangements such as functional and multidivisional firms as well as strategic alliances, joint ventures and virtual enterprises;
- comparative international management accounting systems;
- accounting controls and organisational designs including responsibility centres, financial performance measurements, variance analysis, and incentives;
- strategic accounting tools and practices.
The course will provide participants with:
- an understanding of strategic, market and technological links to management accounting and control practices;
- the ability to apply cutting edge management accounting techniques within competitive business environments;
- a knowledge of interrelationships between behavioural, organisational and cultural issues and management accounting systems.
Teaching: 20 hours of lectures and 9 hours of seminars in the LT. There will be a reading week in week 6 of LT. A 2-hour revision lecture will be held in ST or extra office hours will be held.
Formative coursework: Students are expected to produce several pieces of written work, including accounting exercises, analyses of case studies, and essays. At least two pieces of written work will be collected for feedback during the course. Students are also required to participate actively in a variety of discussions and debates as part of the class activities.
Indicative reading: A detailed reading list will be given out at the start of the course. Illustrative references include: Bhimani A, Strategic Finance, Strategy Press, 2013; Bhimani A and Bromwich M, Management Accounting: Retrospect and Prospect, Elsevier/ CIMA, 2010.
Assessment: Exam (100%, duration: 2 hours and 15 minutes) in the main exam period.
The first 15 minutes will be reading time.

AC491  Half Unit
Financial Accounting, Reporting and Disclosure

This information is for the 2015/16 session.
Teacher responsible: Mr Marcus Witzky OLD 3.34 and Prof Bjorn Jorgensen OLD 2.17
Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Law and Accounting, MSc in Management, MSc in Management Science (Operational Research) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit. The course may also be taken by MSc students who have not previously studied accounting subjects to a significant extent. Students on the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC490. This course cannot be taken in conjunction with AC414 Financial Reporting, Capital Markets and Business Combinations or AC420 Financial Reporting in Capital Markets.
The course is capped at 115 students.
Course content: This course provides students with an introduction to financial accounting, and highlights aspects of reporting that are important to users of financial information. The course covers the preparation of key financial statements and the frameworks of accounting regulation. The course will also cover accounting issues related to depreciation, goodwill, intangible assets, equity, debt, leases, deferred taxes, and consolidation. Students will be introduced to financial statement analysis and research on the use of accounting information in financial markets.
Teaching: 20 hours of lectures and 8 hours of seminars in the MT. There will be a reading week in week 6 of MT. 2 hours of lectures in ST.
Formative coursework: Students are expected to produce several pieces of written work, including accounting exercises and essays.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
Students answer four questions (one compulsory question; two from four questions; and one out of two essay questions).

AC499  Dissertation

This information is for the 2015/16 session.
Teacher responsible: Prof Ane Miren Tamayo OLD 5.05
Availability: This course is available on the MSc in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will normally elect to take this as an option in paper 3
or 4. Permission to select the long essay option must be obtained from the Programme Director by the end of the third week of MT. Students wishing to select this option must first identify and secure agreement from a member of faculty who is willing to provide supervision for the dissertation. Approval for this option will not be granted if such an agreement is not obtained from an academic staff member.

Course content: The dissertation usually consists of an empirical investigation of a selected problem. Occasionally, the dissertation may consist of a survey and critical evaluation of the relevant literature. The dissertation must identify relevant issues, sustain reasoned argument, and draw supportable conclusions. It must be arranged in an organised manner and include a full bibliography.

Teaching: There is no teaching associated with the dissertation, but students who select this option are encouraged to attend the dissertation workshop sessions organised by the Teaching and Learning Centre.

Arrangements for supervision
Students writing a dissertation will be supervised by a member of faculty who will not necessarily be their academic supervisor. Students are responsible for identifying an appropriate member of staff to supervise their dissertation essay, and for ensuring the member of staff agrees to provide supervision. As a general rule, supervisors of dissertations will not comment on the work after a discussion of the first draft.

Assessment: Dissertation (100%, 10,000 words) in the ST.

Two typed copies of the dissertation must be submitted to the MSc Programme Manager, due by 31 May. The dissertation should be double-spaced, on A4 paper, with a maximum world limit of 10,000 words, not including Appendices. Mark penalties will apply if the word limit is exceeded.

AN402
The Anthropology of Religion

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12 and Dr Michael Scott OLD 6.16

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Social Anthropology (Learning and Social Theory), and MSc in Social Anthropology (Learning and Cultural Anthropology); the course focuses mainly on the study of the social sciences as a distinct branch of knowledge, and of key concepts within that paradigm (for instance, ‘kinship’ or ‘religion’) functionalism/structural functionalism; methodological individualism; conflict and the critique of functionalism; class consciousness and ideology, ethnic group and social stratification; and ‘elective affinities’ between cultural predispositions and economic action. The significance of these foundational concepts for an understanding of current anthropology and key stages in its development is also a focus of the course. The second term covers topics which may include structuralism; Sahlin, Orterm and practice theory; theories of culture and interpretive anthropology; postmodernism and ethnographic critique. The precise emphasis and distribution of topics may vary from year to year.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

**AN404 Anthropology: Theory and Ethnography**

This information is for the 2015/16 session.

Teacher responsible: Prof Adam Kuper OLD 6.02 and Prof Deborah James OLD 6.06

Availability: This course is compulsory on the MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective and MSc in Law, Anthropology and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main aim of this course is to examine the relationship between theory and ethnography in modern social and cultural anthropology; the course focuses mainly on the development of anthropology before circa 1970 (with an emphasis on the British School) during the MT, and after that date during the LT. The course starts with the influence on social anthropology of classic social theorists Durkheim, Marx, and Weber. It covers topics such as the origin of the concept of the social sciences as a distinct branch of knowledge, and of key concepts within that paradigm (for instance, ‘kinship’ or ‘religion’) functionalism/structural functionalism; methodological individualism; conflict and the critique of functionalism; class consciousness and ideology, ethnic group and social stratification; and ‘elective affinities’ between cultural predispositions and economic action. The significance of these foundational concepts for an understanding of current anthropology and key stages in its development is also a focus of the course. The second term covers topics which may include structuralism; Sahlin, Ortner and practice theory; theories of culture and interpretive anthropology; postmodernism and ethnographic critique. The precise emphasis and distribution of topics may vary from year to year.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 1 hour of workshops in the ST.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to work on formative essays with the student’s academic tutor, as per normal departmental arrangements.

Indicative reading: A. Callinicos 2007 Social Theory; a historical introduction; A Kuper, 2005, The Reinvention of Primitive Society;
The Anthropology of Kinship, Sex and Gender

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14 and Dr Catherine Allerton OLD 6.13

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Gender, MSc in Law, Anthropology and Society, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to study these topics and to establish a methodological base for further study. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary feminist theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to prepare material for discussion in the seminars. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students, this course, a formative essay may be submitted to the course teacher.

Assessment: Take home exam (100%) in the ST.
MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam).

The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed reframes, the theoretical debates at hand. Upon successful completion of the course, students will be able to:

1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.
6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Film screenings** will also take place throughout the Lent Term.

**Formative coursework:** Students are expected to prepare material for discussion in the seminars. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

**Indicative reading:** Useful histories of Southeast Asia / Southeast Asian anthropology

Ethnographies:

Detailed reading lists are provided at the beginning of the course.

**Assessment:** Take home exam (100%) in the ST.

---

**AN421**

**Half Unit**

**Not available in 2015/16**

**The Anthropology of Industrialisation and Industrial Life**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Jonathan Parry AS05

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course deals with anthropological perspectives on the industrialization process, on industrial life and industrial work, examined in relation to relevant theoretical debates and with reference to selected ethnographies. The themes touched on are likely to include the way in which local understandings of modern machine production are laid down on the template of pre-existing cultural assumptions and cosmological ideas; the rural-urban nexus linking neophyte proletarians with peasant villages; the extent to which traditional forms of social structure and inequality are reproduced in the modern factory; the modern factory as an ethnic ‘melting-pot’ and as an agent of the ‘secularization’ and ‘disenchantment of the world’; shop-floor organization, cultural and organizational factors affecting the intensity of labour, and the extent to which factory production requires new concepts of time and new kinds of work discipline; the social organization of the industrial neighbourhood; gender relations in factory and neighbourhood; the extent to which industrial workers in ‘the Third World’ represent an ‘aristocracy of labour’, the contrast between workers in the organised sector and the unorganised sector, and the conditions under which the industrial workforce emerges as a class ‘for itself’; trade-union activism; resistance to and collusion with management; local discourses about industrial pollution and environmental degradation.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

1 hour of lectures and 2 hours of seminars in the ST.

**Formative coursework:** Students are expected to prepare discussion material for presentation in the seminars. Indicative reading.

Detailed reading lists are provided at the beginning of the course.

**Assessment:** Exam (100%), duration: 2 hours) in the main exam period.
AN424  Half Unit  
**The Anthropology of Melanesia**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Michael W Scott, OLD 6.16  
**Availability:** This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies. The three ethnographies, which have all been published within the last two years, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's *Leviathan at the Gold Mine*, a study of the relationship between indigenous landowners and a large international gold mine in their valley in the highlands of New Guinea. These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state. The readings will be supplemented by ethnographic films.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.  
**Formative coursework:** Students are expected to prepare discussion material for presentation in seminars.

**Assessment:** Exam (100%), duration: 2 hours) in the main exam period.

AN437  Not available in 2015/16  
**Anthropology of Learning and Cognition**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Rita Astuti OLD 6.11 and Prof Charles Stafford OLD 6.02  
**Availability:** This course is compulsory on the MSc in Social Anthropology (Learning and Cognition). This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course will start by examining the contribution that the study of human psychology can make to anthropology. After discussing why anthropologists should pay attention to psychology and why psychologists should pay attention to anthropology, we will examine a range of psychological findings (for example, on infants' knowledge of the physical and mental world) and their relevance to anthropology. Throughout, the course will focus on the relationship between mechanisms of cultural transmission, both informal and institutional, and what anthropologists have called 'culture' and 'society'. We will look at the way universal human capabilities develop and are used during different stages of life to create unique cultural understandings. Topics covered include 'innateness', 'theory of mind', informal and formal education, emotions, expertise, and the nature of different types of beliefs. We will consider how these of economic growth or modernisation) the course shows how anthropological insights have been used to change practices from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state, participation and farmer first approaches; gender and development; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.  
**Formative coursework:** Students are expected to prepare discussion material for presentation in the seminars.

**Assessment:** Exam (100%), duration: 2 hours) in the main exam period.

AN436  Half Unit  
**The Anthropology of Development**

This information is for the 2015/16 session.

**Teacher responsible:** Professor Katy Gardner OLD 5.07  
**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Health, Community and Development, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course explores how anthropologists have evaluated, criticised and contributed to development. Focussing on both 'Big D' development (schemes of improvement or projects) and 'little d' development (change which occurs as the result of economic growth or modernisation) the course shows how anthropological insights have been used to change practices from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state, participation and farmer first approaches; gender and development; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.
10 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

**Indicative reading:** M Cole, Cultural Psychology; D Holland and N Quinn, Cultural Models in Language and Thought; E Hutchins, Cognition in the Wild; J Lave, Cognition in Practice; M Bloch, How We Think They Think; D Sperber, Explaining Culture; P Boyer, Religion explained; R Astuti, G Solomon and S Carey, Constraints on Conceptual Development; M Tomasello, The Cultural Origins of Human Cognition.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**AN439**  
**Half Unit**  
**Not available in 2015/16**  
**Anthropology and Human Rights**

*This information is for the 2015/16 session.*

**Teacher responsible:** Prof Matthew Engelke OLD 6.12  
**Availability:** This course is available on the MSc in Anthropology and Development Management, MSc in Anthropology and Development in China in Comparative Perspective, MSc in Human Rights, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The tension between respect for ‘local cultures’ and ‘universal rights’ is a pressing concern within human rights activism. For well over two decades, anthropologists have been increasingly involved in these discussions, working to situate their understandings of cultural relativism within a broader framework of social justice. This course explores the contributions of anthropology to the theoretical and practical concerns of human rights work. The term begins by reading a number of key human rights documents and theoretical texts. These readings are followed by selections in anthropology on the concepts of relativism and culture as well as other key frameworks, such as identity and violence. Students will then be asked to relate their understandings of human rights to the historical and cultural dimensions of particular cases, addressing such questions as the nature of humanity, historical conceptions of the individual, colonialism and imperialism, the limits of relativism, and the relationship between human rights in theory and in practice. Case studies focus on Africa and Latin America.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 20 hours of seminars in the LT.

**Formative coursework:** Students are required to write and present a paper in the LT.

**Assessment:** Students’ progress is monitored throughout the course by the teachers responsible. The work undertaken for this course is expected to feed directly into the preparation of your Research Proposal (AN443): The formal examination of the Proposal constitutes the assessment of the course.

**AN442**  
**Supervised Reading Course and Fieldwork Preparation**

*This information is for the 2015/16 session.*

**Teacher responsible:** Members of staff of the Anthropology Department (students’ supervisors).

**Availability:** This course is compulsory on the MPhil/ PhD in Anthropology, MRes/PhD in Anthropology and MSc in Social Anthropology (Research). This course is not available as an outside option.

**Course content:** The programme of supervised reading aims to give students a detailed understanding of the regional ethnographic literature relevant to their proposed research project, as well as preparing their detailed research proposal prior to embarking on fieldwork and other forms of empirical research.

**Course content:** The course aims to give you a thorough understanding of what is involved in carrying out ethnographic fieldwork, and what kinds of knowledge it can and cannot generate. It focuses both on the classic fieldwork methods used by anthropologists in the first half of the 20th century, and on more recent methodological developments and techniques that correspond to transformations in the nature of the social. It examines the realities of turning research ideas into realistic plans, in the context of your chosen area of fieldwork. The first half of the course deals with general ethnographic methods. These include participant observation; field notes and the organization of data; visual methods; ethics and anthropological ‘codes of ethics’; interviews; written ethnography, ethnographic knowledge, and problems of representation; critical approaches to existing ethnographic texts; place, multi-sited ethnography, the local and the global; research into family, kinship and the genealogical method; archives and how to use documentary material; fieldwork methodology and the research proposal. In the second half of the course, students present drafts of their projects and think through associated methodological and ethical issues.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

**Formative coursework:** Students are required to write and present a paper in the LT.

**Assessment:** Students’ progress is monitored throughout the course by the teachers responsible. The work undertaken for this course is expected to feed directly into the preparation of your Research Proposal (AN443): The formal examination of the Proposal constitutes the assessment of the course.
relevant to their research objectives. The programme also aims to aid students in the practical organization of their field research (eg organizing language training, obtaining research permits and academic affiliations) through their supervisors’ personal guidance. The programme of supervised reading will be specific to each student. It will be agreed with his/her supervisors at the beginning of the academic year and it will be closely reviewed during the course of the academic year.

**Teaching:** Students should expect to meet with at least one of their supervisors at 2-3 weekly intervals during term time, and to submit essays relevant to the preparation of their Research Proposal (AN443).

**Formative coursework:** Students will be required to write essays for their supervisors throughout the academic year.

**Assessment:** Other (100%).

Students’ progress will be monitored by their supervisors through verbal discussion of the submitted written work. The work they undertake for this course is expected to feed directly into the preparation of the Research Proposal (AN443) and will be formally examined through it.

---

**AN443**

**Research Proposal**

This information is for the 2015/16 session.

**Teacher responsible:** Members of staff of the Anthropology Department

**Availability:** This course is compulsory on the MRes/PhD in Anthropology and MSc in Social Anthropology (Research). This course is not available as an outside option.

**Course content:** All students must prepare a formal Research Proposal of 8,000-10,000 words (excluding references) for submission to the Department on or before the deadline in June/August. The proposal is written under the guidance of their supervisors (as set out in AN442), and will normally draw on material studied as part of AN471 Qualitative and Quantitative Methods for Anthropologists and AN472 Evidence and Arguments in Anthropology and Other Social Sciences. It will be expected to demonstrate knowledge of the regional ethnography, and theoretical and methodological literatures, relevant to the proposed research.

**Assessment:** Research proposal (100%).

---

**AN444**

**Half Unit** Not available in 2015/16

**Investigating the Philippines - New Approaches and Ethnographic Contexts**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Fenella Cannell OLD6.07

**Availability:** This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to MPhil Anthropology students where recommended by their supervisors, normally as part of the pre-fieldwork preparation year. This course may be taken as an outside option by master’s students from other departments, as the regulations permit. It may also be taken by MPhil students from other departments as the regulations permit and with the agreement of the lecturer.

**Pre-requisites:** Graduates taking this course will normally have taken or be taking a foundational course in anthropology. However, topics may be of interest to those in several disciplines. Exemptions may therefore be sought from the lecturer, e.g. for students external to the department, who wish to explore what anthropology can bring to bear on their own fields.

**Course content:** This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of ‘native ethnographers’ by Filipino scholars resident both in the Philippines themselves and in the US.

The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year); Migration, ‘mail-order’ brides, and the Philippine diaspora; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and “antisimo”; Tourism, symbolic economies and the impact of international capitalism.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students may be required to prepare discussion material for seminars.

**Indicative reading:** Detailed reading lists are provided at the beginning of the course, these are a selection: Michell Rosaldo, Knowledge and Passion; Vicente Rafael, Contracting Colonialism; Fenella Cannell, Power and Intimacy in the Christian Philippines; Sally-Ann Ness, Where Asia Smiles; Heather L Claussen, Unconventional Sisterhood; M F Manalansan, yes”> Global Divas: Filipino Gay Men in the Diaspora; Vicente Rafael, White Love and Other Events in Filipino History; Nicole Constable, Maid to order in Hong Kong; Albert Alejo, Generating Energies in Mount Apo.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

Two-hour examination in ST (100%) for MSc students. MPhil/PhD students may be asked to complete an essay on a topic from the course, as advised by their supervisors.

---

**AN447**

**China in Comparative Perspective**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Johannes Steinmuller OLD 5.06 A and Prof Stephan Feuchtwang SHF 3.01

**Availability:** This course is compulsory on the MSc in China in Comparative Perspective. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places are limited and priority is given to MSc China in Comparative Perspective students.

**Course content:** The main object of the course is to help students develop ways of putting the politics, economy and social life of China into a framework in which they can compare and juxtapose it with other major examples. Students will bring whatever theoretical approaches they have already learned and are continuing to learn in the disciplines they bring to the course. They will be expected to demonstrate and explain how they are using them as well as

**Teaching:** 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 6 hours of lectures and 4 hours of seminars in the ST.

**Formative coursework:** Those who have registered for this degree (but not those who take this as a unit in another degree) will attend tutorials in groups of three to five every two weeks, starting in week 2. For these tutorials, students will write four essays, two in Michaelmas Term and two in Lent Term. These essays will not be assessed for the degree.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**AN449 Half Unit Not available in 2015/16 Ethnography in Relation to Other Research Methods**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Rita Astuti OLD6.11 and Prof Charles Stafford OLD6.02

**Availability:** This course is compulsory on the MPhil/PhD in Anthropology and MSc in Social Anthropology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course considers research practices across a range of social and natural sciences in order to explore methodological issues which are specifically relevant to ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different fields. In each section of the course, case-studies taken from different disciplines will be considered in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; philosophy; medical science and epidemiology; history; sociology; economics.

**Teaching:** 20 hours of seminars in the MT.

**Formative coursework:** Weekly presentations in seminars from weeks 2-4, for which indicative grades will be given.

**Assessment:** Presentation (20%), presentation (20%), presentation (20%) and essay (40%, 2500 words) in the MT.

Students make three presentations in seminars (each presentation is worth 20% - 60% in total); an essay of 2,500 words (40%).

**AN451 Half Unit Anthropology of Politics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Mukulika Banerjee OLD 5.09

**Availability:** This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Development Studies, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course focuses on the notion of power and its cross-cultural application. Using Marxist, Weberian, and Foucauldian approaches it explores how power travels through different socio-cultural contexts, paying attention to issues such as domination and resistance, patron-client relations, the mafia, revolution and violence. A recurring theme throughout the course concerns the state. How should the state be studied anthropologically? Processes of state formation and disintegration, nationalism in its various guises, and state-society relations will be reviewed in order to understand how European, post-colonial, and post-socialist societies are governed.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Students will undertake collaborative discussion duties during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**AN455 Half Unit Not available in 2015/16 Statistics and Causal Analysis for Social Anthropologists**

This information is for the 2015/16 session.

**Teacher responsible:** Radu Umbres

**Availability:** This course is available on the MSc in Social Anthropology (Research). This course is not available as an outside
Course content: This course aims to provide anthropology students to understand some basic principles of statistical analysis and sampling methods, to apply them appropriately in their own research, to read critically anthropological texts in which these methods are applied or referred to. Particular attention will be paid to the connections between statistical analysis and causal explanation, and the complementary use of quantitative and qualitative methods. Specific statistical tests will be taught, but most emphasis will be placed on understanding the reasoning behind them. Practical work will be based on a range of anthropological data sets with different substantive and technical features, and will include discussion of possible applications to students’ own research plans, including the practicalities of data gathering, and hands-on training in the use of Excel and SPSS. Week 1: - Designing field studies and sampling schemes. Week 2: - Designing questionnaires. Week 3: - Processing data; creating spreadsheets, tables and graphs, descriptive statistics. Week 4: - Probabilities and hypothesis testing. Week 5: - Correlation and regression. Week 6: - Reading week, no class. Week 7: - Multiple regression. Week 8: - Uni-variate measures of group difference, Mann-Whitney U-test, Kruskal-Wallis. Week 9: - Contingency tables and odds ratios. Week 10: - Logistic regression. Week 11: - Final Exam

Teaching: 20 hours of lectures and 20 hours of seminars in the LT. 2 hours of lectures and 2 hours of seminars in the ST. Introductory session MT. Weekly lectures LT, weekly seminars LT.

Note that teaching takes place within UCL term times, which may be slightly different from LSE’s.

Assessment: Continuous assessment (50%) and in class assessment (50%) in the LT. There will be a practical assignment given each week, which will be due by the next class meeting. Practical assignments (50%) can be worked on during the practical session, and TA assistance will be available during this practical. Answers to each practical will be made available on the Moodle page after each submission deadline (no late submissions accepted). There will be a final examination (50%) during the last class meeting in the form of a series of practical exercises done and submitted in class.

AN457 Half Unit
Anthropology of Economy (2): Development, Transformation and Globalisation

This information is for the 2015/16 session.

Teacher responsible: Dr Laura Bear OLD 6.09

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines ‘the economy’ as an object of scholarly analysis and a domain of social action. We start by asking how scholars measured, described, modeled, and predicted its behaviour. What forms do economic institutions take across-culturally? How were these institutions transformed as a result of their incorporation into a wider capitalist markets, state systems, and development initiatives? For example, we will examine the central place of households within capitalist economies, largely overlooked by mainstream economic analyses, and the role that money can play in both dividing and uniting human societies. The course will familiarise students with fundamental aspects of the field and with core concepts used in economic analysis, such as production, consumption, exchange, property, alienation, scarcity, and value. But we will also try to break open the standard frames of the debate by highlighting, for example, the place of nature in the capitalist expansion, and how economic life is not just life in the ordinary. What progress have anthropologists made in understanding fluctuations, booms and busts? What can ethnography tell us about how people cope with crises, individually and collectively, and what the future may hold? Throughout the course, students will become familiar with the key concepts of economic anthropology with reference to selected ethnography and gain a solid understanding of relevant theoretical debates.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will do presentations during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

Assessment: Exam (100%): duration: 2 hours) in the main exam period.

AN456 Half Unit
Anthropology of Economy (1): Production and Exchange

This information is for the 2015/16 session.

Teacher responsible: Dr Gisa Weszkalnys OLD 6.08

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course addresses topics in the anthropology of globalisation. Scholars in a wide range of disciplines have sought to understand the new forms of production, consumption, exchange and financial circulation that have emerged since the
1890s. Some emphasise post-Fordist methods of flexible production and neo-liberal elite projects. Others focus on trans-state processes of globalisation. For other theorists shifts in state policies such as austerity, decentralised planning, public-private partnerships and the deregulation of financial markets are at the centre of analysis. Others address new forms of consumer society, popular desires for social mobility and transnational migration. Drawing from ethnographies and anthropological theory this course equips students to evaluate these arguments. Importantly it also revisits classic topics in economic anthropology from the perspective of present realities — for example production and intimate economies; formal markets in relation to informalised, violent economies; circulation in relation to financial debt and risk; and consumption and consumer citizenship. 

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will do presentations during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**AN459 Half Unit Anthropology and Media**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Matthew Engelke OLD 6.12

**Availability:** This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course introduces students to anthropological analyses of media, including books and other printed texts, photography, radio, television, film, and the internet. Although ‘the anthropology of media’ is often understood to be a relatively new subfield, there has been a long-standing interest in media technologies within the discipline. There is also an important manner, from an anthropological point of view, in which ‘media technologies’ have to be understood not only as these cultural artefacts (radio, film) but also the more elementary senses they express (hearing, sight, etc). We therefore investigate media both as a broad conceptual category and as specific technologies of communication. The course begins with a historical overview of anthropologists’ investigations of media technologies, broadly construed. We then move on to consider ethnographic case studies of media in context. Examples may include: photography in India, radio in Zambia, television and cassette circulation in Egypt, mobile phones in Jamaica, book groups in England, and ‘indigenous video’ in Brazil and Australia. Throughout the course the case studies are framed in relation to some of the key theoretical debates that have shaped media studies in anthropology and related disciplines since the 1930s. Some attention is also given to the methodological problems involved in studying media, especially the extent to which it challenges the possibility of conducting fieldwork by participant observation.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

**Formative coursework:** Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course
to their personal tutors. For non-Anthropology students taking this course, a formative essay will be submitted to the course teacher.

**Indicative reading:** Domestication of the Savage Mind (J Goody); Imagined Communities (B Anderson); The Work of Art in the Age of Mechanical Reproduction’ (W Benjamin); Media Worlds (F Ginsburg, L Abu-Lughod, and B Larkin); Understanding Media (M McLuhan); Understanding Media (D Boyer); ‘Anthropology and the Mass Media’ (D Spulinks); ‘Anthropology and its contributions to studies of Mass Media’ (S Dickey); Media Rituals (N Coudery); A Voice: And Nothing More (M Dolar); The Presence of the Word (W Ong).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**AN466 Understanding Religion in the Contemporary World**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Fenella Cannell OLD 6.07 and Prof Matthew Engelke OLD 6.12

**Availability:** This course is compulsory on the MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course will consider the distinctive definition and understanding of ‘religion’ within the social sciences, asking the key question: ‘what is the object of “religion” for the social sciences?’ The course will introduce students to the classical social science sources on religion (including, but not limited to, Durkheim, Weber and Maxo) and the particular problematic which their views on religion imply. There will be discussion of the different traditions of social scientific thinking about religion which flow from these foundational thinkers into current debates. Secondly, the course will focus on a range of empirical and ethnographic case studies, which illustrate some of the diversity of religious practice around the world, and some of the consequences which may flow from adopting particular definitions of what ‘religion’ is. One underlying theme in the course, will be the need to pay attention to ways in which the category and the domain of religion are redefined, or claimed to be redefined, in modernity, in relation to other domains of life including politics, kinship and economy. The focus will be on understanding through specific ethnographic and empirical materials, the ways in which lived religious practice, and the understanding of religion, may differ radically inside and outside ‘Western’ and modern contexts. We will also pay attention to cases in which (as in all post-colonial settings, and in relation to so-called fundamentalisms) ‘Western’ and the ‘non-Western’ definitions are emerging in interplay with each other. The first term considers key themes and theoretical topics in the anthropology of religion literature in the light of these framings. The second term will include sustained case-studies drawing on current research within the LSE, and comparative thematic discussions. Students have the opportunity to work with their lecturers through lines of analysis and reasoning developed from the lecturers’ primary research, and to see at first hand how professional anthropologists move towards their conclusions. The second term therefore encourages students to begin to think like research anthropologists themselves, while also consolidating key theoretical and ethnographic bodies of knowledge. There will be a focus on contemporary issues in the study of religion including the organization of religion in a range of different societies, its relationship to broad social change including the rise of modernity/capitalism, global political-economy, and its codification in institutions such as the family, law, gender and the state.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 20 hours of seminars in the LT. 1 hour of lectures in the ST.

**In LT the format is one two-hour interactive seminar per week.**

**Formative coursework:** Formative coursework will include 1) discussions and presentations during the dedicated seminar and 2) the writing of non-coursework essays which will be discussed in small-group tutorials within the anthropology department as described above.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.
AN469 Half Unit Not available in 2015/16
The Anthropology of Amazonia
This information is for the 2015/16 session.
Teacher responsible: Dr Harry Walker OLD6.14
Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, myth and colonialism; indigenous social movements; sexuality and gender; cosmology and shamanism; trade and inter-ethnic relations; language and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Ten hours of lectures and ten hours of seminars in the Lent Term. Film screenings will also be held throughout the term.
Formative coursework: Students registered for Anthropology degrees will have the opportunity to prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting formative essays to the course teacher.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN470 Half Unit
Anthropology of Religion: Current Themes and Theories
This information is for the 2015/16 session.
Teacher responsible: Dr Michael W. Scott OLD 6.16
Availability: This course is available on the MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course will explore phenomena and questions classically framed as the anthropology of religion. We will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of ‘religion’ in relation to ‘science’; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.
Formative coursework: Discussions and presentations during seminars.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN471 Qualitative and Quantitative Methods for Anthropologists
This information is for the 2015/16 session.
Teacher responsible: Dr Mathijs Pelkmans OLD 5.08
Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.
Course content: The twofold aim of this course is to provide students with insights into the process by which anthropological knowledge is produced, and to train them in the collection and analysis of qualitative and quantitative data. In doing so it offers students a methodological framework for conceptualising and designing their own PhD research projects. The course discusses the nature of ethnographic data and evidence, its implications for research, and ways of incorporating empirical data in ethnographic texts. Special attention is paid to statistical analysis and sampling methods as a means to strengthen and enhance qualitative insights.
Teaching: 40 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.
Assessment: Essay (25%, 3000 words) and research project (75%) in the MT.

AN472 Evidence and Arguments in Anthropology and Other Social Sciences
This information is for the 2015/16 session.
Teacher responsible: Dr Harry Walker OLD 5.068 and Prof Matthew Engelke OLD 6.12
Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.
Course content: This seminar course considers research
practices across a range of social and natural sciences in order to explore methodological issues which are specifically relevant to ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different social science fields. In the first half of the course, case-studies taken from different disciplines will be considered in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; philosophy; history; quantitative sociology; economics. In the second half of the course, students will present their own draft research proposals to other both in written and oral form, focusing on (1) the questions they hope to explore in their dissertations; (2) the kinds of evidence they will need in order to adequately explore these questions; (3) the methods they will adopt in order to collect this evidence.

Teaching: 40 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Assessment: Essay (25%, 2500 words), presentation (50%) and class participation (25%) in the LT.

AN473 Half Unit Not available in 2015/16 Anthropological Approaches to Value
This information is for the 2015/16 session.
Teacher responsible: Prof David Graeber OLD6.10
Availability: This course is available on the MPhil/PhD in Accounting, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.
Course content: In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn’s “values project”, the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we’ll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing new light on familiar problems.
Teaching: 15 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students registered for Anthropology degrees may submit formativetutorial essays on the course content and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN474 Half Unit Subjectivity and Anthropology
This information is for the 2015/16 session.
Teacher responsible: Dr Harry Walker OLD 5.06B
Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.
Course content: This course will explore the nature and formation of the self and of subjective experience. It will draw together a range of anthropological, psychological and philosophical approaches to subjectivity and the social and cultural phenomena that shape and condition it, attending both to the particulars of individual lives and settings and to more general, existential dimensions of the human condition. The course will be structured around engagements with three principal paradigms: psychoanalysis; phenomenology; and subjectivation. A key aim of the course will be to understand the strengths and limitations of these approaches for anthropological analysis as well as potential sites of convergence and divergence. Specific topics to be covered include the unconscious, dreams, illness and healing, embodiment, sound, intersubjectivity, interpellation, the feminist subject, and altered states of consciousness.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. Ten hours of lectures and ten hours of classes in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.
Assessment: Take home exam (90%) in the ST. Class participation (10%) in the MT.

AN475 Half Unit The Anthropology of Revolution
This information is for the 2015/16 session.
Teacher responsible: Dr Alpa Shah OLD 6.17A
Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available as an outside option to students on other programmes where regulations permit.
Optional for MSc students in Anthropology. Also available to
students on other degree programmes as an outside option.

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist ‘People’s War’ in Nepal. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for ‘missing the revolution’ on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 4 hours of lectures, 4 hours of seminars and 12 hours of seminars in the MT.

Type MT sessions
Week 1, 4, 7, 10 – one 60 minute lecture followed by a one hour seminar (this is the only part of the course which is shared with UG students)
Week 2, 3, 5, 6, 8, 9 – one two hour seminar-workshop interspersed with lecturing.

Formative coursework: Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers. Non-Anthropology students taking this course will submit a formative essay to the course teacher.

Assessment: Take home exam (90%) in December.

Class participation (10%) in the MT.

Assessment for this course will comprise a ‘take-home’ exam of up to five questions. Students will be asked to write a 2000-2500 word essay on each of two questions, drawing across the breadth of the course.

The take home essay will be worth 90% of the total mark. 10% of marks will be given for general class participation.

AN497
Dissertation: Religion in the Contemporary World

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07
Availability: This course is compulsory on the MSc in Religion in the Contemporary World. This course is not available as an outside option.

Pre-requisites: As for the Programme.

Course content: The dissertation will address a topic in the social sciences of Religion in the Contemporary World. This will normally be a library-based dissertation, but may be supplemented by minor original research elements in consultation with the academic adviser. The topic should make central use of concepts in the study of religion in the social sciences drawn from approved courses on the programme, particularly from the core course, and should demonstrate a good understanding of those concepts and their implications. The dissertation may draw on empirical topics suggested by the taught core and option courses of this programme, but must demonstrate an element of originality in analysis, content or both. The dissertation will normally contain an inter-disciplinary element which may be in the combination of material, the combination of critical, analytical or theoretical concepts, or both. Guidance on standards of presentation etc will be given in the MSc handbook, and will conform to the current standard laid down for the dissertations in MSc social anthropology.

Teaching: A small group tutorial in both MT and LT. A dissertation workshop in ST.

Formative coursework: Small group tutorials, individual mentoring, discussion of abstracts: please see Programme Proposal. Presentations and class discussions in all programme courses will also contribute towards the formative preparation for the dissertation.

Assessment: Dissertation (100%, 10000 words) in August.

The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies and an electronic copy, with the 5-digit examination number on the front, must be submitted to the Departmental Office in late August.

AN498
Dissertation- MSc China in Comparative Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Johannes Steinmuller OLD.5.06A
Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant social science literature and empirical material from China and elsewhere. It should elaborate a theoretical framework to compare Chinese and non-Chinese data. The topic should have been discussed with and approved by the academic adviser. Note that the dissertation must be based on published sources rather than primary research undertaken by the student.

Teaching: Students attend a one-hour dissertation workshop at the end of Lent Term. After deciding on a topic during the Lent term, in consultation with their academic advisers (and other members of staff where appropriate), students submit a one-page abstract in the first week of the Summer term. Each student attends a one-on-one dissertation tutorial with his/her academic adviser in the ST. During these, abstracts will be evaluated and commented upon. Students continue to consult their academic advisers during the Summer Term.

Assessment: Dissertation (100%, 10000 words).

The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies must be submitted to the Departmental Office and one electronic copy has to be uploaded to the LSE Moodle system in late August.

AN499
Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W. Scott OLD 6.16
Availability: This course is compulsory on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant theoretical literature and the ethnography of one or more contexts. It should attempt to consolidate a theme
introduced during the course, developing a sustained research focus on one specific issue in anthropology, using existing ethnographic literature as appropriate. Note that the dissertation must be based on published sources rather than fieldwork undertaken by the student. For the MSc Social Anthropology, the problem should be framed with reference to literature from within the discipline of anthropology (drawn from mainstream journals or ethnographic texts). For the MSc Anthropology and Development and the MSc Anthropology and Development Management, the topic should span the fields of both Social Anthropology and Development Studies - it may cover, but need not be restricted to, the area of overlap, i.e. the anthropology of development as narrowly defined. For the MSc Social Anthropology (Learning and Cognition), the dissertation should draw not only on specifically anthropological literatures and engage with anthropological themes, but also make judicious use of non-anthropological literature from cognitive science, and therefore from related disciplines such as psychology and/or philosophy.

Teaching: 3 hours of workshops in the ST.
After deciding on a topic during the Lent term, in consultation with their tutors (and other members of staff where appropriate), students submit a one-page abstract in the first week of the Summer term. Abstracts are circulated and students attend an AN499 workshop followed by a series of specific workshops for each of the four programmes. During these, abstracts will be evaluated and commented upon. Students continue to consult their tutors during the Summer term.

Assessment: Dissertation (100%), 10,000 words in August.
The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies and an electronic copy, with the 5-digit examination number on the front, must be submitted to the Departmental Office in late August.

DV400 Development: History, Theory and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Rajesh Venugopal CON.8.09 and Dr Kathleen Meagher CON.7.11

Availability: This course is compulsory on the MSc in Development Studies. This course is available on the MSc in African Development, MSc in Anthropology and Development, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Economic Policy of Late Development, MSc in Population and Development and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic, political and social theory and their bearing on the policy and practice of development.
During Michaelmas Term the course critically discusses concepts of ‘development’ and the historical evolution of paradigms of development thinking and policy. Through an examination of comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies and path dependencies and the political economy of growth, poverty and freedom. During Lent Term the course draws on recent research and policy documents to discuss current cutting edge policy issues and challenges in the developing world usually including: the determinant of state resilience and fragility and international responses, demographic change, social policy and poverty; international trade; industrial policy; agriculture and agrarian reform; foreign investment; development aid; governance and democratisation; security and development and environmental sustainability.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.
There will be a two hour revision session in late LT or early ST.

Formative coursework: One 2,000 word essay with written feedback submitted in Michaelmas Term and at least two seminar presentations on literature (one in Michaelmas and one in Lent).

Indicative reading: The following are recommended basic readings for the course:
A Sen, Development as Freedom (Anchor, 1999)
HJ Chang, Kicking Away the Ladder: Development Strategy in Historical Perspective (Athenium, 2002)
W Easterly, The Tyranny of Experts: Economists, Dictators and the Forgotten Rights of the Poor (Basic Books, 2013)
M. Jerven, Poor Numbers: How we are misled about African development statistics and what to do about it (Cornell, 2013)

Assessment: Exam (80%, duration: 3 hours) in the main exam period.
Essay (20%, 2000 words) in the LT.

DV407 Half Unit Poverty

This information is for the 2015/16 session.

Teacher responsible: Dr Elliott Green CON.8.07 and Dr Mahvish Shami CON.8.12

Availability: This course is available on the MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Course content: The course is an interdisciplinary analysis of poverty, where the focus is on poverty both as a dependent variable (what causes poverty) and an independent variable (what poverty causes). The course will draw from a variety of disciplines but will pay special attention to the political economy of poverty; however, no prior mathematical or statistical qualification is required. The topics to be covered begin with an examination into the definition and measurement of poverty. We focus as well on the relationship between poverty and inequality, education, gender and human development, with special attention to the relationship between poverty, violence, and democracy. We also examine the origins of modern famines and whether democratization contributes to poverty reduction. We close with further thoughts on poverty reduction and the Millennium Development Goals.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Indicative reading: The course has two required purchase books, namely Amartya Sen, Development as Freedom (Oxford University Press, 1999) and Abhijit V. Banerjee and Esther Dufo, Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty (PublicAffairs/Penguin, 2011). Other texts that will be useful include Sabina Alkire, Valuing Freedoms: Sen’s Capability Approach and Poverty Reduction (Oxford University Press, 2005); Anirudh Krishna, ed. Poverty, Participation and Democracy: A Global Perspective (Cambridge University Press, 2008) and Amartya Sen, Poverty and
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Essay (30%, 2000 words) in the ST.

DV410

This information is for the 2015/16 session.
Teacher responsible: Prof Duncan Green CON.8.03
Availability: This course is compulsory on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research) and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.
Course content: The course combines a dissertation with supporting lectures on research methods and the use of research in development practice. Students will initially submit a dissertation title with a 150-250 word abstract in the first half of Lent Term. They then go on to write a more detailed research proposal towards the dissertation on a topic within Development Studies / Management / IDHE / African Development. This will be conducted under the supervision of a member of the International Development staff, through individual tutorials. The student research proposals will form the basis for discussion and debate in dissertation workshops. The research proposal will identify a key question for investigation, the theoretical and methodological framework to be employed in the work and a justification for why the topic is theoretically and empirically important, with reference to the literature. A tentative outline and preliminary bibliography will be included.
The course lectures aim to equip students to critically use research by learning how to evaluate and critique the quality of research; understanding and appreciating a range of research methodologies, exploring what constitutes analytical rigour and the choice of particular methodologies for particular problems and contexts. Lectures will discuss how different methodologies are used in practice, for example to inform policy and practice, or as the basis for advocacy by NGOs and others. Faculty and guest lecturers will also introduce a range of new/cutting edge areas in research, including launches of relevant new books and hot topics such as the results agenda, theories of change, the data revolution, or complexity and systems thinking.
Teaching: 40 hours of lectures in the MT. 20 hours of lectures in the LT. Dissertation workshops / surgeries in MT, LT and ST.
Students will attend individual tutorial sessions with either Academic Advisers or other members of International Development staff, as relevant to the topic, during Michaelmas Term and Lent Term to identify a research topic and to design research proposals. The proposal must be approved by the assigned Academic Adviser. Dissertation preparation will also be addressed in the context of the DV410 lectures. Proposals will be evaluated, commented upon and approved by staff. Students will present their research proposals during dissertation workshops/surgeries in all three terms.
Assessment: Dissertation (100%, 10000 words) in the ST. Students will submit a research proposal of not more than 2,000 words at the start of ST. This will be evaluated, commented upon and must be approved before proceeding to write the dissertation. Students will submit a dissertation of not more than 10,000 words by midday on the last Thursday in August.
Students will also take tests, which are run electronically. These will be made available in MT. All students are expected to pass these tests. They can be attempted many times. However, they do not count towards the final mark. They are intended to assist in dissertation preparation.
Students additionally have the option to take an additional half unit that is assessed by a research essay (DV445). Details of the DV445 assessment are explained in the DV445 course guide.

DV411
Population and Development: an Analytical Approach

This information is for the 2015/16 session.
Teacher responsible: Prof Tim Dyson, CON.8.04
Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Health, Population and Society, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Social Research Methods, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
Please note that in case of over-subscription to this course priority will be given to students undertaking the MSc in Population and Development and students from the Department of International Development and its joint degrees (where their regulations permit).
Course content: Using the demographic transition framework, the course examines different analytic approaches to the main interrelationships between population change and socio-economic development. It draws on a variety of theoretical and historical experiences to address and explore these interconnections. It aims to provide balance between theoretical understanding, knowledge of empirical evidence and basic causal processes, and implications for policy.
The course begins by providing an overview of the worlds current demographic situation at both the global and the regional levels. It then addresses Malthusian and anti-Malthusian perspectives on the basic relationships linking population growth and economic growth. These contrasting perspectives are considered in the context of both historical and contemporary experience. The course then proceeds to assess demographic transition theories and their relationships to theories and processes of economic development, urbanisation and socio-structural change. Urban growth, migration, and urbanization receive special attention. The implications of population change for issues of employment, savings and investment are considered, as are issues relating to energy, food production and security, carbon emissions and climate change. Contemporary neo-Malthusian arguments, with their environmental components are also considered, as are issues relating to women’s empowerment, democratization and population aging. Further details will be provided at the start of the session.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.
Formative coursework: Students will be given the opportunity to undertake a ‘mock examination’ essay. This will be graded and accompanied by written feedback within two weeks of its submission.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

DV413 Half Unit Not available in 2015/16
Environmental Problems and Development Interventions

This information is for the 2015/16 session.

Teacher responsible: Dr Andreas Scheba

Availability: This course is available on the MPA in International Development, MSc in Accounting, Organisations and Institutions, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Population and Development, MSc in Public Policy and Administration and MSc in Regulation.

This course is available with permission as an outside option to students on other programmes where regulations permit. Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

This course is capped at 60 students.

Pre-requisites: There will be a ninety minute revision session in late LT or early ST.

Course content: This course is for MSc students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about ‘environment and development’ from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas.

To begin with, the course considers the nature of environmental problems within a ‘development’ context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in development contexts, adaptation to population growth and resource scarcity; gender and environment; and vulnerability to ‘natural’ hazards. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global environmental policy).

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1 essay in the ST.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words) in the LT.

---

DV415 Half Unit Not available in 2015/16
Global Environmental Governance

This information is for the 2015/16 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MPA in International Development, MSc in Accounting, Organisations and Institutions, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Public Policy and Administration and MSc in Regulation.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

This course is capped at 45 students.

Course content: This course is for any MSc student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about ‘global’ environmental problems and to review the contributions of debates about ‘governance’ to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. Some of these arguments are based on debates within International Relations, but this course also considers literatures from other forms of environmental politics that consider the formulation, deliberation, and implementation at the sub-state level, and beyond the scope of formal treaties. Indeed, some of the most difficult political problems arise when trying to implement global policy at the sub-state scale, such as the clash between local forest users in developing countries and international actors implementing ‘global’ climate and biodiversity policies.

To make the course focused, it will consider the three main topics of anthropocentric climate change, biodiversity, and the global regulation of forests. In addition, these topics will be analysed from the perspective of the role of states and inter-state agreements; business actors and non-governmental organisations (NGOs); the regulation of trade; and the evolution of financial assistance, including from the World Bank.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1
DV418   Half Unit
African Development

This information is for the 2015/16 session.

Teacher responsible: Prof Thandika Mkandawire CON. H802

Availability: This course is compulsory on the MSc in African Development. This course is available on the MPA in International Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

Formative coursework: The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social social protection, cash transfers, Millennium Development Goals, horizontal inequality and conflict.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Assessment: 20% essay in the LT.

Indicative reading: There is no single textbook for this course, but we recommend the following as a basic reading list:

- Humphreys D. Logjam: Deforestation and the Crisis of Global Governance, Earthscan, 2009

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words) in the ST.

DV420   Half Unit
Complex Emergencies

This information is for the 2015/16 session.

Teacher responsible: Prof David Keen CON. H715

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Management, MSc in Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc...
in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in Population and Development, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

**Course content:** The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

**Formative coursework:** Students will have the opportunity to receive feedback on formative work, in the form of a practice assessed essay.

**Indicative reading:** A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, Complex Emergencies (Polity, 2008). Other texts of interest include David Keen, Useful Enemies: When Waging Wars is More Important than Winning Them (Yale University Press, 2012); Statthys Kalvayas, The Logic of Violence in Civil War (Cambridge University Press, 2006); David Keen, Conflict and Collusion in Sierra Leone (James Currey, 2005); David Keen, Endless War? Hidden Functions of the ‘War on Terror’ (Pluto, 2006); Michael Mann, The Dark Side of Democracy: Explaining Ethnic Cleansing (Cambridge University Press, 2005); Amartya Sen, Poverty and Famines (Oxford University Press, 1981); Frances Stewart and Valpy FitzGerald (eds.), War and Underdevelopment, Volumes 1 and 2 (Oxford University Press, 2001); and Jeremy Weinstein, Inside Violence: The Politics of Insurgent Violence (Cambridge University Press, 2007); Tim Allen, Trial Justice: The International Criminal Court and the Lord’s Resistance Army (Zed Press, 2006), Chris Dolan, Social Torture: The Case of Northern Uganda, 1986-2006 (Berghahn, 2009); Zoe Marriage, Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict (Hurst and Co., 2006); Christopher Cramer, Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries (Hurst and Co., 2006); Mats Berdal and David Malone, Greed and Grievance: Economic Agendas in Civil Wars (Lyne Riener, 2000); Hugo Slim, Killing Civilians: Method, Madness and Morality in War (Hurst and Co., 2008).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**DV423** **Half Unit**  Not available in 2015/16

**Global Political Economy of Development**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robert Wade CON. H707

**Availability:** This course is available on the MPA in International Development, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Global Health, MSc in Global Politics, MSc in Health, Community and Development, MSc in Health, Population and Society, MSc in International Development and Humanitarian Emergencies, MSc in Population and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit). The instructors reserve the right to limit enrolment on the course. At the instructors’ discretion, enrolment may be denied to any student on the basis of a pre-quiz. The course is capped at 75 students.

**Course content:** The course examines the political economy of ‘North-South’ relations, focusing on how changes in international organizations and the international policy framework affect developing countries’ economic trajectories and national-level strategies for interaction with the global economy. It covers the performance of the world economy as a whole; international systems of production, trade, and finance; the rules or regimes which govern interaction between economies, states and firms (regimes such as Bretton Woods, and the Post Bretton Woods dollar standard); and several international organizations (such as the World Bank and IMF). Along the way it analyses the major financial/economic crises of 1997-99 and 2007-continuing. In contrast to much writing in International Political Economy, it looks at these things from the perspective of the low and middle-income countries (in the spirit of the Swahili proverb, "Until lions have their own historians tales of hunting will always glorify the hunters"), and...
does not take for granted that the G7 states provide a generally benign (“win-win”) environment for development in the rest of the world.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

**Formative coursework:** Students have the option of writing one essay of 2,000 words.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**DV424 Half Unit**

**International Institutions and Late Development**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Kenneth Shadlen CON.7.08

**Availability:** This course is available on the MPA in International Development, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in Management, MSc in Management (CEMS MIM), MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is not available as an outside option. Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

**Course content:** This course examines the politics of the international economy. We analyze the overarching rules and regulations that structure the international economy, and thereby provide context for development policy, and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in international regimes and organizations, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesizes a variety of explanations of the role that international organizations play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt and finance, public and private. We analyze the politics of debt relief for the poorest and most heavily-indebted countries, where most of the debt is owed to public creditors; and we analyze the politics of debt restructuring for middle-income countries where significant shares of the debt is owed to private/commercial creditors. The course then turns to the politics of international trade, investment, and intellectual property. This cluster of five sessions is organized around a dialogue between multilateral and regional frameworks for integration into the global economy. For this section of the course the World Trade Organization (WTO) serves as our principal point of reference. We examine the emergence of the WTO, both in terms of the substance of the Uruguay Round agreements and as an inter-governmental organization with its own set of procedures for agenda-setting, rule-making, and dispute-settlement. We then examine emerging arrangements for global governance in the areas of foreign investment and intellectual property. Finally, we focus explicitly on the resurgence of new, North-South, bilateral and regional trade agreements, focusing on the implications of such agreements for development and the factors that contribute to their proliferation. In concluding the course we assess alternatives for reforming global multilateral economic organizations, e.g. the World Bank, International Monetary Fund, and WTO. Then, taking a step back and reviewing the term’s material from a “birds-eye view,” we analyze contrasting trajectories of change in two development regimes, one regarding “industrial transformation” and mobility in the international division of labour, and another regarding “humanitarianism” and poverty reduction.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST. There will be a two hour revision session in late LT or early ST.

**Formative coursework:** Students have an opportunity to submit written work for formative assessment. Details of the exercise will be announced early in the term.

**Indicative reading:** A detailed reading list is presented at the beginning of term.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period.

**Essay (40%, 4000 words)** in the ST.

---

**DV428 Half Unit**

**Managing Humanitarianism**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stuart Gordon

**Availability:** This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development, MSc in Human Rights, MSc in International Migration and Public Policy, MSc in Political Economy of Late Development, MSc in Population and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development’s MSc Development Management, MSc Development Studies, MSc Development Studies (Research), MSc African Development and then its joint degrees (where their regulations permit).

**Course content:** The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, physicians, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention. How humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. Why humanitarian organisations and governments respond to some crises and not to others. It also considers the critique of humanitarian assistance and the ways in which the UN and NGO communities have responded and sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST. The course will be taught in the Michaelmas Term and will consist of 10 lectures of 90 minutes. Five to six voice of experience lectures of up to two hours (from 1800 on Mondays or Thursdays depending on speaker availability), and ten seminars of one-and-a-half hours (various days and times). There will be a two hour revision session in
late LT or early ST.

**Formative coursework:** Students will receive feedback on seminar group presentations and have the option to write a practice essay under take-home exam conditions, not exceeding 2,000 words. Essay topics will relate to seminar discussions and lecture material covered to date. Students will receive an indicative grade and written feedback before the end of the term.

**Assessment:** Take home exam (100%) in the ST.

The paper will be released via the course Moodle site. Please note that as this is a three-day take-home examination, extensions for disabilities will apply in exceptional circumstances. Students who cannot commit to be available for the exam period may NOT register for this course.

---

**DV429  Half Unit  Not available in 2015/16**

**Global Civil Society**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Mary Kaldor

**Availability:** This course is compulsory on the MSc in Global Politics (Global Civil Society). This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health, Community and Development, MSc in Human Rights and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Civil society has come to be considered as an essential element of contemporary global politics, taken either as a normative concept linked to the idea of democracy or as a descriptive concept that refers to the activism of NGOs, social movements, and global advocacy networks. This course provides students with the conceptual and empirical background that allows them to critically engage with the complex debate over global civil society and to assess the potential and the challenges of civil society activism in the context of our increasingly globalising world.

The first part of the course covers the historical evolution of the concept of civil society and the relevance of different interpretation of civil society to our global age. It will include Enlightenment thinkers such as Hobbes, Locke or Adam Ferguson, the Marxist and Hegelian tradition, ideas drawn from classical Islam, and contemporary ways of understanding the concept especially in the Central European revolutions of 1989 and the Middle Eastern revolutions of 2011. The second part of the course is more practical and covers the characteristics, repertoires and impacts of key global civil society actors, such as NGOs, social movements, nationalist groups, religious movements and global advocacy networks; the relevance of the media and Internet activism; as well as the role of global civil society on key issues such as the economic crisis, the War on Terror and democracy.

Our readings cover key texts on civil society and globalisation, NGOs, social movements, nationalist and religious movements and advocacy networks.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

**Formative coursework:** One non-assessed essay (not more than 1,200 words) during term and at least one presentation.

**Indicative reading:** A detailed reading list will be presented at the beginning of the term. A basic introductory text is: Kaldor, Mary (2003) Global Civil Society: An Answer to War Cambridge: Polity Press.

**Assessment:** Exam (40%, duration: 2 hours) in the main exam period.

Essay (60%, 5000 words) in the ST.

The course will be assessed by one 3-5,000-word-essay (60%) due on the first day of Summer Term. The assessed essay can be an extension of the non-assessed one. A two-hour unseen examination in Summer Term (40%).

---

**DV431  Development Management**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Jean-Paul Faquett CON.8.06, Dr Mayling Birney CON.8.14 and Prof Edwin Brett CON.8.12

**Availability:** This course is compulsory on the MSc in Anthropology and Development Management and MSc in Development Management. This course is available on the MSc in African Development and MSc in Political Science and Political Economy. This course is not available as an outside option.

**Course content:** Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidarity agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into four parts: (1) Analytical Assumptions, (2) Government and Governance, (3) Private Sector, and (4) Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

**Teaching:** 20 hours of lectures, 15 hours of seminars and 4 hours of workshops in the MT. 16 hours of lectures, 12 hours of seminars and 3 hours of workshops in the LT. 3 hours and 30 minutes of lectures in the ST.

There will be an introductory 4 hour workshop on Wednesday afternoon of week 1, 18 two-hour lectures and 18 one-and-a-half hour seminars over the Michaelmas & Lent Terms. There are also special evening sessions specifically on practical and professional aspects of the consultancy projects, and a development policy debate. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise. Students will also take part in and be assessed on the Development Management Project, a live consultancy exercise for real development agencies in consultation with International Development staff. Workshops will be organised to assist student
groups to formulate their proposals and negotiate their projects with their commissioning agencies. There will be a three and a half hour revision session in late LT or early ST.

**Formative coursework:** In the Michaelmas Term students are expected to produce one short essay on a topic agreed with an individual tutor.

**Assessment:** Exam (60%), duration: 3 hours) in the main exam period.

Project (40%) in the ST.

Students are required to pass the final exam in the main exam period in order to pass the course. A fail in the exam cannot be condoned by a pass in other elements of assessment.

**DV432**  
Half Unit  
China in Developmental Perspective

This information is for the 2015/16 session.

**Teacher responsible:** Prof Jude Howell CON. 8.11

**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China’s developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China’s role in the so-called Third World, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China’s recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform, the attempts to reform the Party-state and to manage social tensions.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

In addition, one introductory seminar session in LT and one essay preparation session in LT.

There will be a ninety minute revision session in late LT or early ST.

**Formative coursework:** Students have the opportunity to receive feedback on a formative essay of 1,500 words.

**Assessment:** Exam (70%), duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the ST.

**DV433**  
Half Unit  
The Informal Economy and Development

This information is for the 2015/16 session.

**Teacher responsible:** Dr Kathleen Meagher CON.711

**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Contrary to standard development thinking, the informal economy has expanded rather than contracted in the face of liberalisation and globalisation, and now creates more jobs than the formal economy in most developing countries. Accounting for more than 50% of non-agricultural employment across much of the developing world, the informal economy is attracting growing policy attention. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, social exclusion, and governance. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social policy or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries is shaping processes of growth and governance in the global south. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course
include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social policy, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Essay (30%, 3000 words) in the ST.

DV434 Half Unit Not available in 2015/16

Human Security

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Kaldor

Availability: This course is available on the MSc in African Development, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies (Research), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies and MSc in International Migration and Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit. No more than 5 students, per academic year, can be accepted from programmes other than the listed programmes. Capped at 30 students, first come, first served in order of priority.

Course content: This inter-disciplinary course will introduce students to the concept of human security. Human security refers to the security of individuals and communities as opposed to the security of the state. It combines physical security and material security; freedom from fear and freedom from want. The course will introduce students to the debates about the concept and its relevance in the contemporary era. It will combine political, military, legal and economic approaches to human security implementation. The course will cover topics including: intellectual foundations and debates over the concept of human security; new and old wars; persistent conflict; just war thinking and whether it can be applied to human security; international humanitarian law and human rights law; humanitarian intervention and the Responsibility to Protect; international capabilities for human security; counterinsurgency, stabilisation, and statebuilding; transitional justice.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to undertake class essays as well as class presentations. Students will receive feedback on both.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

DV435 Half Unit

African Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is compulsory on the MSc in African Development. This course is available on the MPA in International Development, MSc in Development Management, MSc in Development Studies and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state, national economy, development in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and sub-national trajectories and in the political-economic character of different African countries, drawing attention to causes of similarity and difference across and within countries. Students will come away with a better understanding of the economic and social underpinnings of order and conflict in African states.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Optional formative essay due in November.

This course is not available as an outside option.

MSc in International Development and Humanitarian Emergencies. Development Studies, MSc in Development Studies (Research) and MSc in Urbanisation and Development. This course is not available as an outside option.

Teacher responsible: [Name]

Availability: This course is available on the MSc in African Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: This course provides an overview of the key issues and debates in international development. It features lectures from leading LSE experts on subjects such as climate change, conflict, poverty, the financial crisis, demography and democratisation, among other topics.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. There will also be visiting speaker lectures each Friday in the Michaelmas Term (10 x 2 hours). There will be a ninety minute revision session in late LT or early ST. Formative coursework: Students will give at least one class presentation.

Assessment: Exam (75%, duration: 2 hours) in the main exam period. Essay (25%, 2000 words) in the LT.

DV446 Half Unit

Technical Change, Paradigm Shifts and Global Development

This course is only available to students taking DV410 and is therefore not available as an option for students from other departments. It builds on the weekly lectures/seminars given as a component of DV410.

Course content: This course offers ID students the opportunity to work as a research assistant with an ID professor, and prepare a research paper under her or his supervision. Students will produce a 5,000 word research paper supported by individual tutorials with an allocated member of staff. The DV445 essay must be a clearly distinct piece of work from the DV410 dissertation. However, the DV445 essay can be related to the dissertation topic if it constitutes a discrete piece of work.

Teaching: 40 hours of lectures in the MT. 20 hours of lectures in the LT. Teaching in lectures and workshops is the same as for DV410.

Individual tutorials with the supervising member of staff.

Formative coursework: The formative assessment will be a 3,000 word draft of the final assignment for discussion with the relevant member of staff.

 Assessment: Essay (100%, 5000 words) in the ST.

DV442 Half Unit

Key Issues in Development Studies

This information is for the 2015/16 session.

Teacher responsible: Dr Elliott Green and other ID staff

Availability: This course is compulsory on the MSc in African Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Political Economy of Late Development, MSc in Population and Development and MSc in Urbanisation and Development. This course is not available as an outside option.

Course content: This course provides an overview of the key issues and debates in international development. It features lectures from leading LSE experts on subjects such as climate change, conflict, poverty, the financial crisis, demography and democratisation, among other topics.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. There will also be visiting speaker lectures each Friday in the Michaelmas Term (10 x 2 hours). There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will give at least one class presentation.

Assessment: Exam (75%, duration: 2 hours) in the main exam period. Essay (25%, 2000 words) in the LT.

DV445 Half Unit

Research Themes in International Development

This information is for the 2015/16 session.

Teacher responsible: Prof Duncan Green CON.8.03

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research) and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

This course is available on the MSc in African Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Development Management and MSc in Development Studies. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This is an interdisciplinary course aimed at understanding how technical change modifies the windows of opportunity for growth and development, as well as how technology and institutions influence each other. The course will be structured in three parts. Part One: Theory of Technical Change and Paradigm Shifts will provide a set of tools for analysing technology from a social science perspective, connecting neo-Schumpeterian theories of technology and innovation with theories of development. Part Two: Technical Change and Development Opportunities will use that framework to explain why development opportunities are a moving target and why what may have been impossible in a particular period can become possible in another.

DV447 Half Unit
Public Affairs, International Development and Gendered Violence
This information is for the 2015/16 session.
Teacher responsible: Dr Rochelle Burgess
Availability: This course is available on the MPA in International
Development, MSc in African Development, MSc in Development
Studies and MSc in International Development and Humanitarian
Emergencies. This course is available with permission as an outside
option to students on other programmes where regulations permit.
Pre-requisites: Previous study of the social sciences or humanities
is preferred.
Course content: The framework for this course will see economic,
social and private aspects of development and public policy as
reference points to examine silences, biases and analyses of
sex and violence against women. We will consider the sexually
informed constructions of women’s place in the home and in
the public sphere, how development and public policy make
assumptions about control over women’s bodies, and the ways
in which such are challenged or reinforced. We will look at war
and conflict, humanitarian work and times of ‘peace’. We will
examine assumptions and judgements about (hetero)-sexuality,
sexual control (by the self and by others) and how these have been
drawn on by policy-makers and other actors, both in the public
and domestic spheres. There will be discussions about the labour
market and workplace, education, the household, family, marriage,
reproduction and father/motherhood and health. Violence – both
physical and sexual – will be given attention. We will also explore
issues relating to identity, religion and culture and power in relation
to the grounding of concepts and expectations that infuse not only
private life but also the thinking of policy-makers.
Teaching: 15 hours of lectures and 15 hours of classes in the LT.
There will be a ninety minute revision session in late LT or early ST.
Formative coursework: Students will be expected to write a short
paper of 800-1000 words on the topic on which they will lead a
class.
Preventing and responding to gender-based violence in middle and
low-income countries a global review and analysis, World Bank
Engels, F. (1884) The Origin of the family, private property, and the
state.

Assessment: Exam (80%, duration: 2 hours) in the main exam
period.
Essay (20%, 2000 words) in the LT.

DV448 Half Unit
Political Economy of Development I
This information is for the 2015/16 session.
Teacher responsible: Dr Lloyd Gruber
Availability: This course is compulsory on the MPA in International
Development. This course is available on the MPA Dual Degree
(LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA
Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public
Policy and Management, MPA in Public and Economic Policy, MPA
in Public and Social Policy and MSc in Development Studies. This
course is available with permission as an outside option to students
on other programmes where regulations permit.

Course content: This half-unit MT course explores why governments and organisations pursue the development policies they do. Whichever experts get together to debate development policy, attention usually focuses on what the relevant actors should be doing: Which policies should the leaders of developing countries be adopting (or discarding) to stimulate growth and reduce poverty? What kinds of strategies should policymakers in the industrialised world be implementing to help poorer countries develop? Much of the time, however, the people who hold positions of power in developing countries do not do what outsiders say they should. Sometimes they choose – and even institutionalize – protectionist, redistributive, and “statist” policies frowned upon by outside analysts, who find them misguided and self-defeating. Students who take this course can expect to acquire a deeper understanding of the forces that can bias political and organisational actors toward development policies whose long-run effects are socially, politically, or economically suboptimal. Students will also be given opportunities to apply these conceptual insights to concrete cases of development management and mis-management. In sum, the course is designed for students who want more experience putting collective action, institutional, and other cutting-edge political economy theories to use in solving current development problems at different levels of government – global, national, and local – and across different sectors of the economy – public, private, and non-profit.

Teaching: 22 hours of lectures and 15 hours of seminars in the MT. Formative coursework: Students will be expected to produce one practice memo and one practice presentation. A “formative” Development Policy Application (DPA) question will be assigned in the first weeks of the course, and students will be encouraged, although not required, to submit individually-authored policy memos by the beginning of week 3. These memos will be handed back – with comments – shortly thereafter (by the end of week 4 at the very latest). In addition, practice DPA presentations will be held (and, where possible, videoed) during special sessions arranged in week 3. The members of each DPA group will be given feedback on substance as well as presentational style during their week 3 seminars. Students will be encouraged to attend office hours to receive more individualized feedback.

Assessment: Essays (15%), presentation (15%) and take home exam (70%) in the MT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. A specific – and current – issue of major importance to developing countries will be introduced in the first week of this exercise. Each student will then be asked to prepare an individually-authored essay (policy memo) on the topic. This memo will be worth 15% of the overall course mark.

In the second part of the exercise, students will be randomly assigned into small groups and begin preparing a jointly-delivered oral presentation outlining and defending their group’s preferred policy. These presentations – which will count for an additional 15% of the overall course mark – will take place the following week. An individually-authored essay (or set of essays) totalling a maximum of 4,000 words will be assigned at the end of the course.

The essay question(s) will ask students to think creatively about the ideas and arguments presented to that point in the course, but will not require any outside research. This component of the assessment will count for 70% of the course mark.

**DV449** Half Unit

**Political Economy of Development II**

This information is for the 2015/16 session.

Teacher responsible: Dr Tasha Fairfield CON.6.02

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MSc in Development Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Building upon the theoretical material and applications introduced in the MT course Political Economy of Development I, this course emphasizes politics on the ground in developing countries. Who gets the policies they want, why, when, and how? Throughout, we will pay close attention to actors, interests, institutions, and power. Understanding the politics of policymaking is critical for development specialists and policy practitioners. Policies recommended by technical experts are not always politically feasible, and progress may require implementing second-best solutions. Moreover, approaches that work in one case may not work in another. Drawing on real-world examples from a range of policy domains including taxation and social spending, we will discuss strategies for enacting pro-development reforms that might otherwise be politically infeasible. The course will also introduce students to key issues in conceptualization and measurement by examining indices and indicators of governance and democracy that are widely used by development practitioners. Upon completing the course, students can expect to (1) be able to critically engage with the key debates in international development, (2) be able to identify political constraints that may impede implementation of pro-development policies, (3) apply collective action, institutional, and other political economy theories to explain ‘real world’ cases of development policy successes and failures, and (4) design strategies that can help make pro-development policies more politically feasible in a given country context.

Teaching: 22 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will receive feedback on formative written assignments and formative presentations in seminars during the first weeks of the term that will prepare them for the assessed DPA at the end of the term. The two-hour revision session in LT will prepare students for the assessed exam.

Course content:

This is a single term course consisting of 10 x 3 hours workshops for up to 30 Masters students. The course will introduce students to approaches to money from sociology, anthropology, development studies, geography, political economy and cultural theory. The course extends an ongoing dialogue between the course organizers, an anthropologist and a sociologist, and will draw on major theoretical approaches and historical studies to examine how money operates – its social organization and governance, its production in global and local financial networks. As a measure and symbol of economic inequality, money is both a problem for development and potentially a major part of its solution. Students will therefore investigate how new and alternative forms may help us to rethink and re-organize money and mount a sustained challenge to prevailing economic systems. The lecture-seminars will cover the following topics:

Week One: Capital in the global distribution of wealth
Overview of course: the organization of money and global capitalism; the world’s monetary institutions; global, regional, national and local politics of money; world money, national currencies and the future of money.

Week Two: What is money and what do people do with it?
The social functions and meanings of money; special vs. general purpose monies; spheres of exchange; personal vs. impersonal money; earmarking; money and scales of value.

Week Three: The origins of money
Competing theories of the origins of money, barter vs. tribute; money and gift exchange; Simmel’s theory of money, the state, theory of money.

Week Four: Money as credit/debt
The social, institutional and cultural connections between money, credit and debt; banks and the production of money; money and credit.
the ‘debt problem’, money as public debt.

**Week Five:** The rise and fall of national currencies
The geography and geopolitics of money; history and future of state currency; states, central banks and monetary governance; gold and international money; Breton Woods and its aftermath; world money.

**Week Six:** The history and ethnography of finance
The concept of financialization; history of finance and the growth of managed money; finance, securitization and new forms of money (CDOs, derivatives etc.).

**Week Seven:** Community and complementary currencies
History of monetary reform, ‘monetary utopianism’ and alternative currencies; theory and history of LETS, Time Banks, labour money, microcredit, etc.

**Week Eight:** Digital commerce, e-money and mobile money
The digitalization of money; virtual money; history of digital currency; mobile money (M-Pesa); the Bitcoin phenomenon.

**Week Nine:** The Euro
Globalization and the future of world money; history of European monetary integration and the present crisis; the rationale for currency union and the prospects for other regional unions.

**Week Ten:** Money in the making of world society
General review. Is a human economy possible? Is money a central means to such an economy or its antithesis?

**Teaching:** 30 hours of lectures in the MT.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Dodds, N (1994) The Sociology of Money (Polity)
Zelizer, V (1994) The Social Meaning of Money

**Assessment:** Essay (100%, 5000 words) in January.

---

**DV453 Half Unit**

**Humanitarian Consultancy Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Rachel Ilbreck

**Availability:** This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in African Development. This course is not available as an outside option.

**Course content:** This unit is a core course for the MSc IDHE. Students work on a consultancy report in Michaelmas Term and Lent Terms.

Students will gain practical experience of dealing with current policy issues and best practice in the fields of humanitarian assistance or international development by working on a live consultancy team project for a real client and an historical case study of a major humanitarian emergency. The consultancies are based around an experiential learning format. Students also receive guidance through a series of three workshops in the Michaelmas Term and a supervision process.

Students will be allocated to consultancy teams comprising between three and five people. Students are able to express preferences for particular clients but may not be allocated to one of these. Past project sponsors have included the UK Department of International Development (DFID), the IRC, MSF, the Disasters and Emergency Committee (DEC), Christian Aid, the UK Stabilisation Unit and NATO.

The consultancy project begins in Michaelmas Term with client reports due at the end of Lent Term. The client report and final presentation form part of the assessment.

Consultancy Skills Workshops - There will be a series of three skills-oriented lecture and group work sessions (each lasting three hours). Students will also be expected to attend a one-day workshop covering logframes, monitoring and evaluation and other relevant practitioner skills in Michaelmas Term (usually held on the Saturday between weeks 4 and 5).

Academic Component - The individual essay will require students to critically review selected academic literature relevant to their consultancy project.

**Teaching:** 9 hours of lectures and 6 hours of workshops in the MT.

**Formative coursework:** Students will contribute to the Group inception, interim and final reports/presentations and will be given feedback and indicative grades for each of these. At the end of Michaelmas Term there is a progress board for each consultancy group.

**Assessment:** Project (75%, 6000 words) and presentation (5%) in the LT.

Essay (20%, 1500 words) in the MT.

Individual 1500 word essay (critical review): (20%) in week 1 of Lent Term

Consultancy group project report (6000-10000 words depending on the client’s terms of reference and student group size) (75%), submitted at the end of Lent Term

Consultancy group presentation to clients: (5%) at the end of Lent Term

Final client presentations are at the end of the Lent Term and are scheduled by the students in consultation with academic staff AND the clients. Students should be aware that presentations to clients MAY have to take place during the first week of Easter Vacation. They will be informed as soon as possible, but should not make any travel plans until presentation dates are confirmed.

---

**DV483 Half Unit**

**Information Technologies and Socio-Economic Development**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Shirin Madon CON.B.13

**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management of Information Systems and Digital Innovation and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This interdisciplinary course is about understanding the role played by Information and Communication Technology (ICT) towards achieving developmental goals. We begin by juxtaposing dominant theoretical assumptions about ICT and socio-economic change with different conceptualisations of development. Using this as a critical frame of reference, during the rest of the course we focus on a variety of current topics including global software outsourcing, e-commerce/ m-commerce, ICT and smallholder agriculture, ICT and education, e-government and telecentres, health informatics, ICT and collective action, ICT and humanitarianism.

DV490  Half Unit
Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development

This information is for the 2015/16 session.
Teacher responsible: Dr Diana Weinhold
Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.
A take home quiz will be used to determine entry. Entry onto the course might be limited at the discretion of the instructor.
Course content: This course explores the foundations of applied macroeconomic policy analysis by combining a rigorous introduction to advanced quantitative methods with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, with a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing. Topics including growth theory, institutions and history, economic geography, globalization, balance of payments and financial crises, environmental policy and international finance. Classes in the first half of term will focus on building analytical skills to read, interpret, and critique econometric approaches to causal identification commonly used in the academic development literature. The emphasis will be on developing rigorous intuition rather than technical details; we focus on teaching students from a broad range of backgrounds to understand and critically consume high-level applied research in a sophisticated manner. The seminars in the second half of term give students an opportunity to repeatedly practice and improve their skills by working through problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development. While some background in economics and statistics is helpful, the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.
IMPORTANT: For students without strong skills in economics and statistics DV490 constitutes the foundational prerequisite for DV491 and DV492 in the Lent term. Thus students wishing to most fully develop their skills in analytical policy analysis should plan to take this course in conjunction with either DV491 and/or DV492 or both. Our experience is that the majority of students benefit most from a full academic year of repeated practice and exposure to the techniques covered to develop their intuition and ability. Furthermore, DV491 and DV492 will cover additional empirical approaches more commonly employed in micro- and public economics, as well as providing an introduction to statistical programming in STATA (coordinated so that students taking both need not face repetition). Teaching: 20 hours of lectures and 15 hours of seminars in the MT. There will be a two hour revision session in late LT or early ST. Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, Development Economics (1998) which will serve as the course text, W Easterly, The Quest for Growth; Assessment: Exam (70%, duration: 2 hours) in the main exam period. In class assessment (30%) in the MT.

DV491  Half Unit
Economic Development Policy II: Microeconomic Analysis

This information is for the 2015/16 session.
Teacher responsible: Dr Sandra Sequeira
Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.
Entry onto the course might be limited at the discretion of the instructor.
Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future.
The course is structured around four main themes:
(i) Human Development: including discussions on health policy, education policy and intra-household dynamics
(ii) Institutions and Markets: including discussions on labor markets, state capacity for public service delivery and private sector development
(iii) Social Networks, Economic History and Cultural Economics: including discussions on the importance of culture, historical developments, social dynamics and migratory movements on development
(iv) Behavioral Economics and Development Policy Design: including discussions on the importance of psychology in explaining economic behavior and how it can inform better development policy design
Through in class discussions, lectures and coursework, students will develop analytical and quantitative skills for the study and practice of international development policy. These skills will enable students to interpret and critique both conceptual arguments and the empirical evidence used in the development economics literature and discourse.
Coursework will include a combination of class discussions with guest lecturers engaged in international development, problem sets, presentations and computer-lab based sessions for students to...
explore programming and statistical skills. Students are strongly encouraged to take DV492, as a highly complementary course that will also apply the empirical methods taught in DV490 to topics in government policy such as redistribution, taxation, and social insurance.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

**Assessment:** Exam (70%), duration: 2 hours) in the main exam period. In class assessment (30%) in the LT.

**DV492 Half Unit Economic Development Policy III: Government Policy Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Joana Naritomi CON.6.12

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in International Development, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to MSc and MPA students from throughout the LSE subject to space constraints; specifically we reserve the right to limit enrolment of students from outside the Department of International Development. Entry onto the course might be limited at the discretion of the instructor.

**Pre-requisites:** ‘DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development’ or equivalent.

**Course content:** This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics.

Coursework will include a combination of class discussions, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills. Students are strongly encouraged to take DV491, as a highly complementary course that will also apply the empirical methods taught in DV490 to topics in Human Development, Institutions and Markets, Social Networks, Economic History and Cultural Economics, and Behavioural Economics and Development Policy Design.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

**Formative coursework:** Students will be expected to produce 3 exercises and 1 other piece of coursework in the LT.

**Indicative reading:**
The project work is conducted in teams, and the assessment is based on a group presentation and a submission of the project report. Assessment: (70%, duration: 2 hours) in the main exam period.

Coursework (30%) in the LT.

The course assessment will be based on a final exam (70%) and problem sets (30%).

### DV483

**MPA Capstone Project**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

**Course content:** Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.

**Teaching:** 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.

Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.

**Formative coursework:** Feedback will be provided on presentations of work-in-progress during MT and LT.

**Assessment:** Project (100%, 15000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group’s work to be submitted individually and separately from the report.

### DV484

**MPA Dissertation**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

**Course content:** The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor; who will provide advice and guidance on this piece of work.

**Assessment:** Dissertation (90%, 10000 words) in the ST.

Other (10%) in the MT.
1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

EC400
Introductory Course in Mathematics and Statistics

This information is for the 2015/16 session.

Teacher responsible: Dr Margaret Bray 32L.4.27, Dr Francesco Nava 32L.3.20, Dr Marcia Schafgans 32L.4.12 and Dr Shengxing Zhang 32L.1.16

Availability: This course is compulsory on the MRes in Economics (Track 1), MRes in Economics (Track 2), MRes/PhD in Finance (Route 1), MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Econometrics and Mathematical Economics (Research), MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics (Research), MSc in Economics and Management, MSc in Economics and Philosophy and MSc in Finance and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this pre-sessional course is to provide students with the essential mathematical, statistical, economic and econometric background for the core Economics courses of these programmes. The course starts with mathematics revision sessions and progresses to sections covering mathematics for microeconomics, mathematics for macroeconomics, and probability and statistical inferences. MSc Finance and Economics students do not take mathematics for macroeconomics. MSc Management and Economics students attend lectures on literacy in accounting instead of the mathematics for macroeconomics.

Teaching: Approximately 25 hours lectures and 36 hours classes during September.

Indicative reading: Students will be advised of recommended readings in the Summer.

Assessment: Students will be required to complete a set of self-testing exercises during the course. At the end of the course, students on MSc Management and Economics and MSc Finance and Economics are examined on two mathematics modules (revision mathematics and mathematics for microeconomics) and probability and statistical inferences. All other students are examined on mathematics modules (revision mathematics, mathematics for microeconomics and mathematics for macroeconomics), and probability and statistical inferences. Students wishing to continue studying Economics MSc-level courses must achieve an overall grade of 50% in EC400 with no one subject exam less than 40%. Students wishing to study MRes-level courses must achieve an overall grade of 70% with no one subject exam less than 60%.

Application for EC400 must be made to the Department of Economics by the end of June.

EC402
Econometrics

This information is for the 2015/16 session.

Teacher responsible: Dr Vassilis Hajivassiliou 32L.4.23, Prof Danny Ouat TW1 10.01A and Prof Mark Schankerman 32L.4.30

Availability: This course is compulsory on the MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Quantitative Economic History. This course is available on the MPA in European
Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPhil/PhD in Accounting and MSc in Economics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400). Students should have completed an undergraduate degree or equivalent in Economics and EC400 (Introductory course in Mathematics and Statistics).

**Course content:** The course aims to present and illustrate the techniques of empirical investigation in economics.
1. Regression models with fixed regressors (simple and multiple).
2. Least squares and other estimation methods. Goodness of fit and hypothesis testing.
3. Regression models with stochastic regressors.
4. Asymptotic Theory and its application to the regression model.
5. The partitioned regression model, multicollinearity, misspecification, omitted and added variables, measurement errors.
7. Exogeneity, Endogeneity, and Instrumental Variables.
8. Serial Correlation.
9. Vector Autoregression.
10. Unit roots and cointegration.
11. Panel data and static models: fixed and random effect estimators, specification tests, measurement error.

**Teaching:** 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

**Formative coursework:** Two marked assignments per term. Exercises are provided each week and are discussed in classes. In order to have any chance of completing the course successfully, these exercises must be attempted. Special test exercises will be set at three points during the year. These will be carefully marked and the results made available.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**EC408**

**Introduction to Quantitative Methods for the MPA Programme**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Gregory Fischer

**Availability:** This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option. Also available to other MPhil/PhD students with the agreement of the course tutor.

**Course content:** An introduction to basic mathematical and statistical concepts for use in MPA courses in economics and quantitative approaches. The course covers the following topics: Statistics: Discrete and continuous random variables, jointly distributed random variables, the Normal distribution, sampling and the Central Limit Theorem, properties of estimators, introduction to hypothesis testing. Mathematics: Linear functions, quadratic, logarithmic and exponential functions, the derivative of a function and rules of differentiation, unconstrained optimization with one variable, functions of several variables and their differentiation, constrained optimization with several variables, constrained optimization.

**Teaching:** The course runs over 8 days, during the two weeks prior to the start of the Michaelmas Term. In total, students will attend ten lectures and six classes during the two weeks of the course.

**Indicative reading:** Notes covering the course material will be made available at the beginning of the course. Two widely used introductory statistics books that can be used as background reading for the statistics part are Newbold, Carlson and Thorne Statistics for Business and Economics (6th edition) and Wonnacott and Wonnacott Introductory Statistics for Business and Economics (4th edition). However, there are also many other introductory statistics textbooks that cover the same material. Two widely used introductory mathematics books that can be used as background reading for the mathematics part are Ian Jacques Mathematic for Economics and Business (5th edition) and Wisniewski’s Introductory Mathematical Methods in Economics (2nd edition). Also in this case there are a large number of excellent alternative textbooks that cover the same material. Those who want a more advanced treatment of the same material can use Simon and Blume’s Mathematics for Economists, but this treatment is more formal than what we require for this course. We do not recommend buying a new textbook for this course, if you already own a textbook that covers similar material.

**Assessment:** Exam (100%, duration: 1 hour) as part of modular teaching.

The course will be assessed with a one hour test at the end of week two. The test result does not count towards the MPA final degree, but will be used in advising students on suitable option course choices.
EC410  Half Unit
Public Economics for Public Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Johannes Spinnewijn 32L.3.24 and Prof Henrik Kleven 32L.3.16

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have taken EC440 Macro and Microeconomics (for Public Policy) or an equivalent course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

The UK Treasury website (http://www.hm-treasury.gov.uk) provides a range of documents on economic policies and the public finances, including the annual publication, Financial Statement and Budget Report (the ‘Red Book’), published each year on Budget Day. For comparative international fiscal data, information and analysis, useful sources include the International Monetary Fund, IMF (http://www.imf.org/), the World Bank (http://www.worldbank.org/) and the Organisation for Economic Cooperation and Development, OECD (http://www.oecd.org).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC411  Microeconomics

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Nava 32L. 3.20 and Prof Martin Pesendorfer 32L. 4.19

Availability: This course is compulsory on the MSc in Finance and Economics. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics and Philosophy, MSc in Environmental Economics and Climate Change and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems.

The first part of the course focuses on classical theories of market behaviour and strategic interaction. We begin by presenting foundations to utility maximization, by analysing the optimisation problems of price-taking consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. We then introduce models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields will be discussed in lectures. The second part of the course focuses on models of imperfect competition and information economics. We begin with an analysis of models of monopoly, oligopoly, product differentiation, and public goods. Then, we study markets with imperfect and incomplete information including search, adverse selection, auctions, signalling, screening, and moral hazard. Special emphasis will be given to economic applications.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term. There will be mock examinations at the start of LT.

Indicative reading: The course will draw on a variety of texts, the main ones being: - J G Riley, Essential Microeconomics, Cambridge; - J R Green, A Mas-Colell & M D Whinston, Microeconomic Theory, Oxford. More detailed readings will be given at the beginning of the course and some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC413  Macroeconomics

This information is for the 2015/16 session.

Teacher responsible: Prof Wouter Den Haan 32L 1.08A and Prof Alwyn Young 32L 2.20

Availability: This course is compulsory on the MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and Philosophy, MSc in Finance and Economics and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to give a wide-ranging overview of modern macroeconomics. 

Economic growth (Michaelmas)
The Michaelmas term of EC413 is an introduction to the techniques needed to critically read and evaluate academic research in economic growth. Topics are facts about growth, the Solow growth model (theory and empirics), the Neoclassical Growth model (growth with dynamic optimization), and endogenous technical change.

Business Cycles (Lent)
The Lent term of EC413 focuses on the main characteristics of business cycle fluctuations with a special emphasis on what happened during the financial crisis and different macroeconomic models to study business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term. Exercises are discussed in each class. There will be a one-and-a-half-hour mock examination at the start of LT.

Indicative reading: Primary reading will be journal articles and a couple chapters from Daron Acemoglu, Introduction to Modern Economic Growth. A full list will be available at the start of each term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

EC423
Labour Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Esteban Aucejo 32L. 2.30

Prof Jörn-Steffen Pischke 32L.2.16

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: An advanced course in labour economics issues, including theory, evidence and policy. The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, and to provide them with the tools for developing independent research interests. The course has a strong applied focus. For each major topic covered we will derive testable implications, provide insights into the research methodology, discuss the advantages and limitations of existing empirical work, and draw policy conclusions.

Topics include: labour supply, labour demand, market power of firms and workers, wage determination, unemployment, minimum wage, compensating differentials, returns to schooling, discrimination, role of non-cognitive skills in the labour market, and immigration.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the reading is from journal articles. A detailed reading list is available on Moodle.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

---

EC424
Monetary Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Keyu Jin 32L.1.17 and Prof Ricardo Reis (room TBC)

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The course aims to develop the student’s ability to undertake research in monetary economics by studying a number of current issues both theoretical and applied. In the MT, we study open economy models with nominal rigidity to examine...
the impact of monetary and fiscal policies and their transmission across countries. We then study the prerogation of international financial shocks, as well as liquidity traps, forward guidance, and quantitative easing. The third part of the term focuses on basics of asset pricing theory in general equilibrium and models of the yield curve. In the LT, we discuss and answer five questions: (i) How can central banks control inflation? (ii) How can we measure agents’ inflation expectations? (iii) Can central banks become insolvent and how can they help during a fiscal crisis? (iv) How does monetary policy affect unemployment and real activity? (v) Why is central bank transparency important and how can policymakers use communication to steer the economy?

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Two marked assignments per term.

**Indicative reading:** A reading list will be handed out by the lecturers at the beginning of their sessions.

**Assessment:** Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

---

**EC426**

**Public Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Frank Cowell 32L.2.25A, Prof Henrik Kleven 32L.3.16 and Dr Johannes Spiekennejik 32L.3.24

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and Master of Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400).

**Course content:** A graduate course in (i) the principles of public economics and (ii) selected topics in public economics. Principles of public economics Welfare analysis; concepts of fairness, equity and efficiency; social welfare. Policy design: social insurance, income taxation. Taxation; household and firm behaviour. Public goods, externalities and environmental policy. Behavioural public economics, including implications for welfare analysis and savings policy. Selected topics in public economics such as behavioural responses to taxation; empirical strategies in public economics; poverty, inequality and optimal low-income support; compliance problems; inheritance and wealth taxation; global public finance and fiscal governance; political economics.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Attention is also drawn to Issues in Taxation Seminar (Dr Leape and Dr Ian Roxan) LL900: eight Monthly, Sessional.

**Formative coursework:** Two marked assignments per term.

**Indicative reading:** A reading list will be supplied at the beginning of the course.

**Assessment:** Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

---

**EC427**

**The Economics of Industry**

This information is for the 2015/16 session.

**Teacher responsible:** Prof John Sutton 32L.4.32 and Dr Pasquale Schiraldi 32L.4.22

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400).

**Course content:** A graduate course in Industrial Organization, which aims to provide students with a working knowledge of current theoretical and empirical methods for industry studies. Applications of these methods are considered in industry case studies.

**Topics include:** Pre-requisites in Game Theory, An introduction to current developments in Oligopoly Theory. A formal analysis of conduct in concentrated industries (cartel stability, limit pricing, predatory pricing, etc), Demand estimation in homogenous and differentiated product industries, Production function estimation, Empirical techniques for oligopoly models and auction markets, Identification of conduct, Economies of Scale, R&D, Advertising, Vertical restraints. The topics will be discussed with detailed applications for selected industries and considering competition policy questions.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Two marked assignments per term.

**Indicative reading:** Two books which provide a basic framework are J Tirole, Theory of Industrial Organization, MIT Press, 1989 and J Sutton, Technology and Market Structure, MIT Press, 1998. A full reading list will be supplied at the beginning of the course.

**Assessment:** Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

---

**EC428**

**Development and Growth**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robin Burgess 32L.3.03B and Prof Maitreesh Ghatak 32L.3.08A

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400).

**Course content:** This course will cover a number of topics at forefront of development economics. These include current methodological debates; the allocation of capital and labour across firms, space and sectors; structural change during the development process; finance; psychology and development; governance and accountability; conflict and civil war; motivation of civil servants; taxation and development; firms and markets; trade; infrastructure; energy and the environment; and climate change.
EC440 Micro and Macro Economics (for Public Policy)

This information is for the 2015/16 session.
Teacher responsible: Dr Ethan Ilzetzki 32L 1.10
Availability: This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: An introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The first term (MT) covers microeconomics and the second term (LT) covers macroeconomics.
LT: Macroeconomics: Understanding Macroeconomic Data; Long-run Economic Growth; Business cycles; Aggregate Demand; Money, Inflation and Monetary Policy; Stabilization Policy; Fiscal Policy and Government Debt; the Labour Market and Unemployment; Exchange Rates and International Economic Policy; the Financial System and the Macroeconomy.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will complete weekly problem sets. Some of these will be marked to to provide indicative assessment.
Indicative reading: A full reading list will be distributed at the beginning of the course.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Continuous assessment (30%) in the MT and LT.

EC441 Microeconomics for MRes students

This information is for the 2015/16 session.
Teacher responsible: Prof Michele Piccione 32L 4.07 and Prof Balazs Szentes 32L 4.05
Availability: This course is compulsory on the MPhil/PhD in Finance, MRes in Economics (Track 1), MRes in Economics (Track 2), MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.
Prerequisites: A good undergraduate knowledge of economic theory and calculus is required.
Course content: The aim of the course is to:
- introduce the basic analytical tools that are necessary to conduct research in any field in economics.
- give the students a full understanding of the classic Microeconomic Theory and of the modern developments of Microeconomic Theory.
- enable students to address a microeconomic problem by structuring it as a mathematical model and enhance the understanding of economic issues though the use of mathematical tools.
Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, economics of information, agency theory, contracts, topics in mechanism design.
Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.
Formative coursework: Exercises are set for each class. In addition, there will be mock examinations in Lent term week 0 and in Summer term week 1.
Indicative reading: The main text is Mas-Collel, Whinston & Green, Microeconomic Theory, OUP. Other sources include: D Fudenberg & J Tirole, Game Theory, MIT Press; D M Kreps, A Course in Microeconomic Theory, Harvester Wheatsheaf; H R Varian, Microeconomic Analysis (3rd edn), Norton; M J Osborne & A Rubinstein, A Course in Game Theory, MIT Press; G A Jehle & P J Reny, Advanced Microeconomic Theory, Longman.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC442 Macroeconomics for MRes students

This information is for the 2015/16 session.
Teacher responsible: Dr Ethan Ilzetzki 32L 1.10, Prof Per Krusell 32L 1.18 and Dr Shengxing Zhang 32L 1.16
Availability: This course is compulsory on the MRes in Economics (Track 1), MRes in Economics (Track 2) and MRes/PhD in Finance (Route 1). This course is available on the MRes/PhD in Finance (Route 2). This course is not available as an outside option.
Course content: The course will cover topics in advanced macroeconomics with emphasis on fundamentals and applications to recent theoretical advances:
- Economic growth: Neoclassical Growth Model, Optimizing Behaviour in dynamic models under certainty, Endogenous Technological Change, Imitation and Convergence, Growth and Development Accounting, Appropriate Technology.
- Search and Matching: The Matching Model, Efficiency Wages, Growth and Unemployment.
- Monetary Economics: models with credit frictions, sticky prices, search.
Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.
Formative coursework: Exercises are set for each class. In addition, there will mock examinations in Lent term week 0 and in
**EC443 Econometrics for MRes students**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Vassilis Hajivassiliou 32L.4.23, Dr Tatiana Komarova 32L.4.24 and Dr Marcia Schafgans 32L.4.12

**Availability:** This course is compulsory on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

**Pre-requisites:** Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

**Course content:** The first part [Inference, Classical- and Generalized Linear Regression] begins with methods of estimation and optimality, followed by an introduction to asymptotic theory. It proceeds with statistical inference and the theory of classical testing (Wald, Likelihood Ratio, and Lagrange Multiplier). It then discusses the classical linear regression model and commences the discussion of violation of the classical assumptions by discussing the Generalized Linear Regression Model (heteroskedasticity and autocorrelation). The second part [Generalized Regression Methods] provides a further discussion of violations of the classical assumptions including measurement error, omitted variables, simultaneity, missing data; non-linear regression models and instrumental variables. It proceeds to the Generalized Method of Moments and efficient estimation methods under conditional moment restrictions. It also covers the topics of quantile regression and bootstrapping.

The third part [Time-series, Panel-data, and Microeconometric Methods] begins with a discussion of Time-Series topics, including single equation theory for non-stationary variables; serially correlated errors with lagged dependent variables; unit roots; simultaneous equations for non-stationary variables; co-integration; and ARCH and GARCH models. It proceeds to Panel data methods such as fixed and random effects estimators and their extensions for applying to dynamic models and non-linear panel data models. The next major topic presents models with Limited Dependent Variables. The final part [Specialized Econometric Methods] discusses simulation-based inference, nonlinear panel data, and duration models. Finally, it covers the topics of program evaluation, nonparametric, kernel estimation, and differences in differences.

**Teaching:** 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

**Formative coursework:** Exercises are set for each class. In addition, there will be mock examinations in Lent term week 0 and in

**Assessment:**

**Assessment path 1**
- Exam (50%, duration: 3 hours) in the main exam period.

**Assessment path 2**
- Exam (100%, duration: 3 hours) in the main exam period.

**Indicative reading:** Lecture notes will be made available through the departmental website and in course packs for each part of the course. Please note there is no set book for this course.

**Recommended books:**

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**EC453 Political Economy**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stephene Wolton CON 5.08

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400).

**Course content:** An advanced treatment of Political Economy, covering theory, evidence and current issues. The course material will expand students’ capacity to think about policy relevant issues at the intersection between economics and political science, and will cover democratic and autocratic politics. Topics include political economy and public finance; constitutional rules; politics as information aggregation; politics as a principal-agent problem; public economy and public finance; constitutional rules and policy outcomes; bureaucracy; media; special interest group politics; legislatures; political parties; direct democracy; rebellion and terrorism; democratization; international conflicts.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 11 hours of seminars in the LT.

**Formative coursework:** At least two written assignments for handing in per term (assignment will include some work with data sets provided by the instructor).

**Indicative reading:** Most of the reading is from journal articles; lists will be supplied at the start of each term. Two books supply the basic framework: T Besley, Principled Agents? Selection and Incentives in Politics, Oxford University Press, 2005 and T Persson & G Tabellini, Political Economics: Explaining Political Outcomes, MIT Press, 2000.

**Assessment:**

**Assessment path 1**
- Exam (50%, duration: 3 hours) in the main exam period.
- Essay (50%) in the ST.

**Assessment path 2**
- Exam (100%, duration: 3 hours) in the main exam period.
- Students taking MSc Economics or MSc Econometrics and Mathematical Economics will be required to submit an extended essay at the beginning of the ST; for such students, the written examination and the extended essay will each count for half of the marks.
EC454  
Development Economics

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robin Burgess 32L.3.03 and Prof Oriana Bandiera 32L.3.02

**Availability:** This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

**Course content:** An introductory graduate course providing the necessary development economics skills for high level public policy making. The focus is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students to complete weekly exercises based on course readings with one of these exercises being marked in a given term.

**Indicative reading:** A reading list will be distributed at the start of the course.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

EC455  
Quantitative Approaches and Policy Analysis

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jeremiah Dittmar and Dr Gregory Fischer

**Availability:** This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS) and MPA Dual Degree (LSE and Sciences Po). This course is not available as an outside option.

**Pre-requisites:** The course has no formal pre-requisites. A familiarity with basic statistical concepts and basic calculus are very useful. These topics are reviewed during the pre-sessional course of the MPA programme (EC408). Students not participating in the pre-sessional course need to provide evidence of comparable prior knowledge.

**Course content:** The course introduces students to the quantitative evaluation of public policies with the help of regression based evaluation methods, cost-benefit analysis and computable general equilibrium modelling. The first six weeks of the course introduce students to basic multiple regression analysis including hypothesis testing, modelling of non-linear relationships, and dummy variables. From week 7 of MT the course covers a number of regression based evaluation methods to assess the casual effectiveness of policy interventions. These include the use of randomized experiments, natural or quasi-experiments, panel data, difference-in-differences estimation, instrumental variables, matching and regression discontinuity designs. The final part of the course provides an overview over cost-benefit and cost-effectiveness analysis and an introduction to the use of computable equilibrium models to assess policy interventions.

**Teaching:** 20 hours of lectures and 11 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

**Indicative reading:** Particularly useful textbooks are Josh Angrist and Steve Pischke, 'Mastering Metrics'; James Stock & Mark Watson, 'Introduction to Econometrics'; and Jeffrey Wooldridge, 'Introducory Econometrics'. The material in the textbooks will be complemented with recent research papers and chapters from other books. A full reading list will be distributed at the beginning of the course.

**Assessment:** Exam (60%, duration: 3 hours) in the main exam period.

Coursework (30%) in the MT and LT.

Presentation (10%) in the LT.

---

EC465  
Economic Growth, Development, and Capitalism in Historical Perspective

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jeremiah Dittmar 32L.2.22 and Dr Neil Cummins S487

**Availability:** This course is available on the MSc in Economic History, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have completed Introductory Course in Mathematics and Statistics (EC400). Students should have completed courses in intermediate level microeconomics, macroeconomics, and econometrics.

**Course content:** This course will provide a rigorous introduction to the analysis of long run economic growth and development. The focus is on acquiring the necessary empirical skills to engage in advanced analysis of economic evidence, and to develop an understanding of how historical evidence can shape and inform economic theory. Topics at the forefront of economics and economic history will be covered. These include political economy, technological change, economic growth, education, demography, the economics of law and property rights, gender, culture, and the distribution of income. The emphasis will be on combining theory and data to evaluate fundamental ideas in economics concerning the determinants of well-being and the dynamics of market economies.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 presentation and 1 exercise in the MT and LT.

The formative coursework will consist of a combination of student presentations, written exercises, data analysis, and problems.

**Indicative reading:** Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course. However, the following references may serve as an introduction to material included in the syllabus: Nunn, "The Importance of History for Economic Development" (2009); Robinson and Acemoglu, "Why Nations Fail" (2012); Acemoglu, "Introduction to Modern Economic Growth" (Princeton, 2009); Hall and Jones, "The New Kaldor Facts: Ideas, Institutions, Population, and Human Capital" (2010); Mokyr, "Lever of Riches" (1988); Piketty (2013) "Capital in the Twenty-First Century".

**Assessment:** Exam (60%, duration: 3 hours, reading time: 10 minutes) in the main exam period.

Essay (40%, 5000 words) in the ST.

The summative assessment consists of an exam that reviews and synthesises all course materials and an essay. The essay will be a critical analytic essay providing an opportunity for original empirical research.
EC475
Quantitative Economics
This information is for the 2015/16 session.

Teacher responsible: Prof Mark Schankerman 32L.4.30
Dr David Baqiae

Availability: This course is available on the MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are expected to take EC400 in September and achieve the requisite standard.

A knowledge of econometric theory and applied econometrics corresponding to Principles of Econometrics or Methods of Economic Investigation. Students must be prepared to read journal articles with a difficult mathematical and statistical content.

Course content: The course will focus on going through modern quantitative papers which demonstrate the application of econometric techniques to modelling the behaviour of individual economic agents (households and firms) and economies. The first part of this course will explore topics in applied macroeconomics, with emphasis on the intersection of empirical analysis and theory. It will cover different quantitative approaches for assessing macroeconomic models and theories. The topics covered will include models of consumption, investment, technological change, monetary policy, fiscal policy, and financial frictions. The thematic focus will be on understanding business cycles. The second half of the course will focus on papers in the empirical literature on productivity, innovation and intellectual property rights, illustrating the challenges of identification in both structural and reduced form models. The lectures will cover a wide range of topics in applied microeconometrics with a view to illustrating the interplay between models, data and methods.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: Articles in economic journals will be assigned at the start of Michaelmas and Lent terms. The course will also draw on methodological topics covered in Wooldridge, Econometric Analysis of Cross Section and Panel Data (2nd edition, 2010), and Angrist and Pischke, Mostly Harmless Econometrics (2009).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC476
Contracts and Organisations
This information is for the 2015/16 session.

Teacher responsible: Prof Gilat Levy 32L.4.31
Prof John Hardman-Moore 32L.4.14
Prof Philippe Aghion

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The course will cover topics from : contract theory, incomplete contracts, the economics of moral hazard and adverse selection in strategic settings, dynamic theory of incentive contracts (efficiency of long-run relationships, short-term versus long-term contracts and renegotiation, static mechanism design and self-selection contracts (revelation principle for Bayesian-Nash and dominant strategy equilibria, static screening contracts) with applications to non-linear pricing, optimal auctions and regulation, and the theory of mechanism design with multiple agents (multiple agents screening and common agency).

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Assessment: A three-hour written examination in the ST.

Non-EME students will be assessed as follows: A three-hour written examination in the ST (50%) and a 6000-word extended essay due at the beginning of the ST (50%).

EC484
Econometric Analysis
This information is for the 2015/16 session.

Teacher responsible: Dr Taisuke Otsu 32L. 4.25 and Professor Peter Robinson 32L. 4.13

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available on the MRes in Economics (Track 1), MRes in Economics (Track 2), MSc in Applicable Mathematics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: This course gives an advanced treatment of the theory of estimation and inference for econometric models. Part (a) Matrix background; asymptotic statistical theory: modes of convergence, asymptotic unbiasedness, uniform integrability, stochastic orders of magnitude, convergence in distribution, central limit theorems, applications to linear regression, consistency and asymptotic normality of implicitly defined extremum estimators . Part (b) Non-linear in variables systems: maximum likelihood and asymptotic normality of implicitly defined extremum estimators .

Exam (100%, duration: 3 hours) in the main exam period.

No one book covers the entire syllabus; a list of references will be provided at the start of the course, and lecture notes and relevant articles will be circulated.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
EC485
Further Topics in Econometrics

This information is for the 2015/16 session.

Teacher responsible: Professor Javier Hidalgo 32L 4.20
Availability: This course is available on the MPhil/PhD in Accounting, MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).
Course content: The aim of the course is to introduce the student to topics at the frontier of econometric research of importance both at a theoretical and empirical level. The course consists of four series of ten lectures on specialised topics in econometrics. These lectures change from year to year. Presently they include: long memory time series; non-parametric and semi-parametric estimation; dependence in economics: an overview; panel data models.
Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.
Formative coursework: Two marked assignments per term
Indicative reading: No one book covers the entire syllabus; lists of references will be provided and lecture notes circulated.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC486
Econometric Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Pasquale Schiraldi 32L 4.22
Mr Alessandro Gavazza, 32L 4.21
Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.
Course content: This course aims to present the theory and practice of empirical research in economics. Beyond the theory, the course will put a substantial amount of effort in having the students work with Stata and other econometric software in analyzing actual data sets, reproducing and criticising results in previous work and learning the actual practice of econometrics as undertaken by the best applied economists, both in general (in MT) and specifically within the IO field (in the LT).
Teaching: 20 hours of lectures and 8 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures and 2 hours of seminars in the ST.
Formative coursework: Students are required to complete answers to problem sets on a week by week basis.
Indicative reading: MT: James H. Stock and Mark W. Watson, Introduction to Econometrics; reading lists of chapters and journal articles will be supplied at the start of each term.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC487
Advanced Microeconomics

This information is for the 2015/16 session.

Teacher responsible: Dr Erik Eyster 32L 4.29 and Prof Leonardo Felli 32L 4.02
Availability: This course is compulsory on the MSc in Finance and Economics (Research). This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.
Students on MSc Economics will need additional approval of lecturers.
Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).
Course content: The aim of this course is to: (i) introduce and develop the analytical tools of graduate level Microeconomics with a special emphasis on mathematical models; (ii) provide the students with a firm grounding in classical Microeconomic Theory as well as its modern development.
Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, oligopoly, economics of information, topics in mechanism design, topics in behavioural economics.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Problem sets will be discussed in class and two marked assignments will be given in MT and LT. There will also be mock examinations at the start of LT.
Indicative reading: The main texts are A Rubinstein Lecture Notes in Economic Theory, Princeton University Press and Mas-Colell, Whinston & Green, Microeconomic Theory, OUP. Other sources include: D M Kreps, Microeconomic Foundations I: Choice and Competitive Markets, Princeton University Press; Fudenberg and Tirole, Game Theory, MIT Press.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC4B3
MPA Capstone Project

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.
Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support
effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.

**Formative coursework:** Feedback will be provided on presentations of work-in-progress during MT and LT.

**Assessment:** Project (100%, 15000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group’s work to be submitted individually and separately from the report.

EC4B4

**MPA Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

**Course content:** The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

**Assessment:** Dissertation (90%, 10000 words) in the ST.

Other (10%) in the MT.

1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.
2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

EC4V8 Half Unit

**MPA Policy Paper**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Dissertation.

**Course content:** The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours
and 30 minutes of seminars in the LT. These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

Assessment: Other (100%) in the ST.
6,000 word policy paper

EH402 Half Unit
Research Design and Quantitative Methods in Economic History

This information is for the 2015/16 session.

Teacher responsible: Dr David Chilosi SAR 607

Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Quantitative Economic History. This course is not available as an outside option.

Course content: This course is concerned with how economic historians have used quantitative methods and with how researchers design and structure a research project. In terms of quantitative methods the emphasis is on the applied and practical rather than the theoretical and will range from the use of simple summary descriptive statistics to multiple regression. The course will start with a consideration of broad issues in research design, this might include, for example, models, narrative and case studies. The rest of the course will then be concerned with quantitative issues, the problems of analysing and interpreting quantitative historical evidence. It will consider topics such as sampling and statistical distributions, correlation, simple and multiple regression, specification problems, hypothesis testing, logit and probit analysis, non-parametric tests, and modern time series analysis though the course may vary slightly from year to year.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH401 Half Unit
Historical Analysis of Economic Change

This information is for the 2015/16 session.

Teacher responsible: Dr Debin Ma SAR 612

Availability: This course is compulsory on the MSc in Economic History, MSc in Economic History (Research) and MSc in Quantitative Economic History. This course is not available as an outside option.

Course content: The course provides basic awareness of central themes and key methodological and theoretical issues in economic history; introduces students to important analytic tools used by economic historians, with an emphasis on their practical application in economic history research; and examines major ways in which economic historians collect, analyse and interpret evidence. The training is expected to inform dissertation work. The course covers two main areas. 1) Theory and Research: this section introduces theoretical approaches to major issues in economic history, and considers the practical application in historical analysis of concepts from economics (primarily) and related disciplines. The specific topics evolve but an illustrative list includes: processes of economic growth; economic development; culture and economic behaviour; the rational-choice institutionalist paradigm; imperfect information and incentive structures; modern macro-economic ideas (especially on money and finance); welfare outcomes. 2) Historical Methodology: this section introduces methodological issues in combining social science frameworks with historical materials. It considers problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing and interpreting evidence.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: Students are required to make one class presentation and also to submit one paper on an additional topic during the term.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH404 Half Unit
India and the World Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in
EH408 Half Unit
International Migration, 1500-2000: from slavery to asylum

This information is for the 2015/16 session.
Teacher responsible: Dr Christopher Minns SAR 512
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: From the eighteenth century, the South Asia region played an important part in international transactions in goods, people, and money. The world economy, in turn, shaped potentials for economic growth in the region. The aim of the course is to impart an understanding of the global factors that shaped economic change in the South Asia region in the 18th through the early-20th century. It will also deal with the principal ways in which South Asia contributed to economic change in the rest of the world. The political context of globalization, especially imperialism and colonial policies, will be considered. The course will be divided into a set of topics, which together cover a large ground, but a selection from which will be discussed in the class. Lectures and seminars will centre on the readings assigned to each topic.

Topics to be covered: Introductory: India and the world economy in the eighteenth and nineteenth centuries - how each shaped the other; textiles in eighteenth century India: scale - organization - impact on global consumption and innovation - trade and territorial politics; nineteenth century market integration: de-industrialization and the artisans; nineteenth century market integration: Agricultural exports, land rights, and the peasantry - Trade and famines; Government finance in colonial setting: The drain controversy - public debt; overseas migration in the nineteenth century: Who went where, how many, and why - private gains and losses - social effects: slavery and indenture, women, nature of work and skill formation - labour and non-labour migrants compared; foreign capital and industrialization; balance of payments and the monetary system; overview: Globalization and economic growth.

Teaching: 2-hour meetings weekly, with a flexible combination of lectures and seminars.

Formative coursework: Students will be required to write one paper during the course and to make class presentations.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH409 Half Unit
Chinese Economy in Transition: 1850-1950

This information is for the 2015/16 session.
Teacher responsible: Dr Debin Ma SAR 612
Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Course content: This course provides a broad but selective survey of over 100 years of economic change in China leading towards the rise of the new Communist regime in 1950. With emphasis on the importance of ideological and institutional changes, the course gives in-depth coverage of some major debates and case studies on historical turning points such as the opening of China in mid-19th century, the collapse of Qing in 1911, economic transformation during China's Republican period. The course showcases the critical relevance of a long-term perspective on understanding both the constraints and capacity of Chinese economy to respond to past and future challenges and offers unique historical perspectives on the origin of Chinese modernization as well as the grand economic transformation during the past three decades.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
EH413  Half Unit
African Economic Development in Historical Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Leigh Gardner SAR S07
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Africa’s economic development challenges cannot be understood without looking back to the history of the continent. This course provides an introduction to the economic history of sub-Saharan Africa since the beginning of the Atlantic era. It begins by comparing levels of economic development in Africa c. 1500 to that of other world regions. It then examines how major shifts in the international economy, from the industrial revolution to the recent financial crisis, influenced patterns of economic development on the continent. Focusing on the longue durée, the course addresses issues which are remain current in studies of African development, including:

- The role of globalization and trade and promoting or undermining development
- Environmental challenges to expanding production
- The structure of state institutions and their impact on growth
- The impact of economic change on social structures

Close attention will be paid to the ways in which economic development is measured and assessed in different periods with the available data. Readings will include historical documents from the periods in question. The inclusion of primary sources on the reading list will allow students to build research skills while engaging with key questions about the historical origins of Africa’s relative poverty.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.
2-hour meetings weekly, with a flexible combination of lectures and seminars.

Formative coursework: Students are required to make one class presentation and submit one paper during the term.

Indicative reading: Readings for this course reflect current trends in research on African economic history and development. The main text is Emmanuel Akyeampong et al (eds), Africa’s Development in Historical Perspective (Cambridge, 2014). Other such readings will include recent contributions in journals such as the Economic History Review special issue on African economic history (November 2014).

We will supplement this with country- or region-specific studies such as Hopkins, Economic History of West Africa (1973) and Feinstein, Conquest, Discrimination and Development: An Economic History of South Africa (Cambridge, 2005).

Assessment: Exam (100%), duration: 2 hours) in the LT week 0.

EH414  Half Unit
Theories, Paths and Patterns of Late Development

This information is for the 2015/16 session.

Teacher responsible: Dr Debin Ma SAR 612
Availability: This course is compulsory on the MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course provides basic awareness of central themes and key methodological and theoretical issues in economic history, introduces students to important analytic tools used by economic historians, with an emphasis on their practical application in economic history research, and examines major ways in which economic historians collect, analyse and interpret evidence. The training is expected to inform dissertation work. The course covers two main areas. 1) Theory and Research: this section introduces theoretical approaches to major issues in economic history, and considers the practical application in historical analysis of concepts from economics (primarily) and related disciplines. The specific topics evolve but an illustrative list includes: processes of economic growth; economic development; culture and economic behaviour; the rational-choice institutionalist paradigm; imperfect information and incentive structures; modern macro-economic ideas (especially on money and finance); welfare outcomes. 2) Historical Methodology: this section introduces methodological issues in combining social science frameworks with historical materials. It considers problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing and interpreting evidence. The classes to follow the lecture will focus on how economic history as a discipline that helps explain the distinct growth trajectories of ‘late-developing’ countries, inform modern approaches to development policy and practice, and current controversies about obstacles to development.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Two-hour lecture (that is joint with EH401) and a weekly one hour seminar in MT.

Formative coursework: Students will produce one written paper (3,000 words) and are expected to collaborate in joint presentations.

Assessment: Exam (100%), duration: 2 hours) in the LT week 0.

EH422  Topics in Quantitative Economic History

This information is for the 2015/16 session.

Teacher responsible: Prof Juan Roses Vendoreño SAR 515
Availability: This course is compulsory on the MSc in Quantitative Economic History. This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is particularly appropriate for those students who are considering following a quantitative economic history PhD thesis in the future.
**EH424  Half Unit  Not available in 2015/16**

**The British Economy in Global Perspective, 1000-2000**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Stephen Broadberry SAR 511

**Availability:** This course is available on the MA Global Studies: A European Perspective, MRs in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course aims to provide an overview of the growth and development of the British economy over the second millennium within an international comparative perspective. The material covered will draw on my research covering three main areas: (1) the long run growth of the British economy covering the medieval and early modern periods as well as the modern period, drawing upon a new set of historical national accounts, and placing British experience within an international comparative context. (2) Britain’s place in the Great Divergence of productivity and living standards between Europe and Asia, focusing in particular on comparisons between Britain and India, but also drawing on the cases of China and Japan (3) Britain’s productivity performance since the mid-nineteenth century in comparison with the United States, Germany and other countries, examining sectoral as well as aggregate performance.

1. Overview: Britain in the Global Economy, 1000-2000
2. English Economic Growth, 1270-1700: A Historical National Accounting Approach
3. British Economic Growth, 1700-1870
4. Britain and the Great Divergence: Wages and Prices
5. Britain and the Great Divergence: Cotton Textiles
7. How did the United States and Germany overtake Britain?
8. Manufacturing and the Productivity Race
9. Services and the Productivity Race
10. Britain and Asia since 1870

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT. Two-hour meetings weekly in LT, with a flexible combination of lectures and seminars.

**Formative coursework:** Two pieces of written work are to be submitted for the course. The first is a short 1500 word essay, as detailed in an accompanying document. The second is a mock examination, written over the Easter vacation.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**EH423  Half Unit  Not available in 2015/16**

**Japan and Korea as Developing Economies**

This is information is for the 2015/16 session.

**Teacher responsible:** Prof Janet Hunter SAR 517

**Availability:** This course is available on the MA Global Studies: A European Perspective, MRs in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course will focus on selected issues of economic development that are of importance in contemporary debates and theories, and see how these issues were played out in Japan and Korea from the late 19th century to the latter half of the 20th century. The main themes discussed will be: natural endowments and climatic impact; changes in the agricultural sector; the growth of market production; issues of state policy; economic institutions; colonialism and imperialism; integration into the international economy; income levels and consumption; gender and development; culture and economy.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 2 hours of seminars in the ST.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
EH426  Half Unit  Quantitative Topics in Economic History I: Cross-section and panel data

This information is for the 2015/16 session.

Teacher responsible: Prof Juan Roses Vendoiro SAR 515

Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Course content: The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through practical exercises and critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, limited dependent variables, sample selection corrections, and panel data analysis. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

Teaching: 20 hours of seminars in the MT.

Formative coursework: An individual presentation and a reading report.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH427  Half Unit  Quantitative topics in economic history II: time series and economic dynamics

This information is for the 2015/16 session.

Teacher responsible: Prof Albrecht Ritschl SAR 606

Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is not available as an outside option.

Pre-requisites: Students enrolled for this course are expected to have completed EH426 or the equivalent of undergraduate courses in econometrics and intermediate economic theory.

Course content: The course will provide an overview of quantitative approaches in economic history using primarily dynamic panel and time series. The course will examine the use of quantitative techniques through practical exercises and critical discussion of their application in recent literature. Techniques discussed will include the GMM estimator, discrete choice and hazard models, analysis of unit roots in panels and time-series and vector autoregressions. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative or methodological issues.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Two presentations during the term; fortnightly quantitative exercises.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH428  Half Unit  History of Economics: Making Political Economy into a Social Science

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Morgan SAR 609

Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course aim is to understand how the nature of economics changed from the verbally argued accounts of political economy and moral philosophy in the 18th century to become a technical social science by the end of the 20th century. The course will explore the long-term changes over two hundred years in how economists came to know things about the economy by examining the history of their notion of the laws of economics, their analytical practices, and the evidence they used. Primary texts, chosen from a variety of European and American authors, will provide material for the study of these changes. Secondary literature will provide theoretical resources from history and philosophy of science to help analyse, understand and assess these changes in the nature of economics as a science.

Teaching: 20 hours of seminars in the MT.

20 hours over MT, mainly 2hour seminars, with an occasional lecture within that time slot. (Those students without previous study in the history of economics may wish to attend the lectures for EC311).

Formative coursework: Students will be expected to produce two pieces of written work (around 2000 words each) during the term.

Indicative reading: The main domain of the course material is explained in “Economics” in T.M.Porter and D.Ross The Cambridge History of Science, Vol 7, The Modern Social Sciences, pp 275-305 (Cambridge University Press). Henry Spiegel’s The Growth of Economic Thought (various editions, Duke University Press) provides a general background text for the history of economics. Full reading lists will be given out at the beginning of the course.

Assessment: Essay (100%, 3000 words) in the LT.

EH429  Half Unit  History of Economics: Ideas, Policy and Performativity

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Morgan SAR 609

Availability: This course is available on the MA Global Studies: A European Perspective, MPhil/PhD in Accounting, MSc in Economic History, MSc in Economic History (Research), MSc in Economics and Philosophy, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit. Students can take this course independently of EH428.
Course content: The course aim is to understand how economics has been used to change the world. The course will bring together the long tradition of analysis of economics as a policy science with more recent ideas about the performativity of economics. It will draw on the literatures of economic history, history of economics and sociology of accounting and finance to explore the aims and methods used in economics to influence the economy. The focus of study will be on particular episodes from 20th century history in which economics features as a technical art (e.g. the transition from colonial to independent economies; the Soviet and Cuban revolutions; and the reconstruction of depressed and damaged economies).

Teaching: 20 hours of seminars in the LT. 20 hours over LT, mainly 2-hour seminars with an occasional lecture within that time slot. (Those students without previous study in the history of economics may wish also attend the lectures for EC311.

Formative coursework: Students will be expected to produce two pieces of written work during the term.

Indicative reading: Reading lists will be given out at the beginning of the course. Henry Spiegel’s The Growth of Economic Thought (various editions, Duke University Press) provides a general background text.

Assessment: Essay (100%, 3000 words) in the ST.

EH446 Not available in 2015/16
Economic Development of East and Southeast Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Kent Deng SAR 605

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no pre-requisites: knowledge of Asian history of the relevant period and region would be an advantage.

Course content: The course deals with conditions and paths of economic development in East Asia (excluding Japan) and Southeast Asia in the past centuries. The first part of the course looks at the debate on Asian economic history, endowments available, and institutions technology and economies that evolved independently in Asia to support a large population with reasonable standards of living. The second part of the course examines reasons for the lack of indigenous modern growth in Asia, conditions and timing of miracle growth of the Asian Tigers, ASEAN and Mainland China after World War Two, and impact of such growth of the world economy.

Topics covered include: traditional economic patterns in the region by the 17th century; the impact of the early European maritime traders; the impact of the later Europeans traders backed by industrialisation; attempts and success of the Western colonisation; resistance to the change from the core area in East Asian Mainland. Reforms and modernisation in Asia; Asia and globalisation.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

20 seminars of two-hours each in the MT and LT. Written essays are circulated in advance.

Formative coursework: Two essays (3,000 words each) are expected during the course. The first is due at the end of the 9th week (in the MT) and the second, the 17th week (in the LT).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH447 Half Unit
Great Depressions in Economic History

This information is for the 2015/16 session.

Teacher responsible: Prof Albrecht Ritschl SAR 606

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of economics at the level of second-year undergraduate macroeconomics is recommended.

The aim of this course is to:
(i) introduce students to the history of the Great Depression of the 1930s, with comparisons to other deep recessions in economic history;
(ii) provide students with a basic knowledge of the main theoretical interpretations and their relative merits
(iii) give students a preview of the analytical techniques used in interpreting the historical evidence.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST. 10 x two-hour seminars in MT.

Formative coursework: Reading assignments will be discussed in class and one 3,000 word marked assignment will be set in the MT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH451 Half Unit Not available in 2015/16
Latin American Development: Political Economy of Growth

This information is for the 2015/16 session.

Teacher responsible: Prof Colin Lewis

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in History of International Relations, MSc in International and World History (LSE & Columbia), MSc in Political Economy of
Late Development and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines the principal phases of growth in Latin America since 1900, exploring economic structures, social outcomes and the political arrangements associated with distinct ‘development projects’. The first part of the course considers debates about endowments, institutions and the role of the state, and principal theories, including early twentieth-century liberalism, structuralism and dependency, neo-liberal ideas associated with the Washington Consensus and distinct radical approaches of the early twenty-first century. The remainder of the course is organised chronologically, focusing on phases of commodity export-led growth, ‘populist’ import-substituting industrialisation, ‘authoritarian modernisation’, democratisation and stabilisation, and responses to current challenges of globalisation and international boom and crisis.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of seminars in the ST.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**EH463**  
**Half Unit**  
The Long-Run Analysis of Firms and Industries  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Gerben Bakker SAR 509  
**Availability:** This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** There are no prerequisites, but some knowledge and an interest in business and finance are advantageous.

**Course content:** This course comparatively explores the history of strategies, business organisations and industries since the nineteenth century. Different approaches to analyse this evolution are discussed, as well as the history of thinking about management and organisational structure and how this affected history itself. Introductory lecture(s) set the scene, discuss key concepts and various economic approaches to analyse the evolution of organisations. Subsequently the course looks at the origins of legal forms of organisation - such as the corporation, the private limited liability company and the cooperative - at the development of organisational structures, at the history of thinking about them, and at evolution of industries.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. The class meets for two-hours each week, in the Michaelmas Term. Introductory lecture(s) are followed by student-led seminars.

**Formative coursework:** Students are expected to produce one essay during the term and to sit a short mock examination paper at the end of term.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH464 Half Unit
The Historical Context of Business
This information is for the 2015/16 session.
Teacher responsible: Prof Lars Boerner SAR 505
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no pre-requisites, but an interest in business and economic development are advantageous.

Course content: This course explores the evolution and variation of the conditions under which business has operated in different parts of the world. It concentrates on but is not exclusively concerned with the nineteenth and twentieth centuries. It is not an "MBA" course, in that it does not look at the specific decisions of specific firms, but rather looks at the environments in which industries have operated in different periods and places in history.

Teaching: 2 hours of lectures, 8 hours of lectures and 8 hours of seminars in the LT.

Formative coursework: Students are expected to produce one essay during the term and to sit a mock examination paper over the Christmas vacation.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH467 Half Unit Not available in 2015/16
Epidemics: Epidemic Disease in History, 1348-2000
This information is for the 2015/16 session.

Teacher responsible: Dr Patrick Wallis
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course analyses the impact of epidemic disease on human societies and economies from the Black Death to the present. It examines arguments and evidence about epidemics’ relationship to economic, social, demographic and political change - such as the role of the black death in initiating economic growth in Europe, of epidemics in allowing the conquest of the Americas, and cholera in leading to social tensions and even revolution in 19th century Europe. It will also explore the development and implementation of medical, political and social responses to epidemics. Epidemics are crises that test the capacity of societies to manage disaster and that divide communities along lines of wealth, race and blame. We will explore the characteristics of social responses to disease, the development of local and state capacities to manage crises, and the patterns of resistance that this elicited from those affected. Case studies will focus on epidemics in Europe, Central America, and Asia, but reference may also be made to the experience of other regions, in order to achieve a more global picture.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Formative coursework: Two written papers of 2,500 words during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH472 Half Unit
Essay in Quantitative Economic History
This information is for the 2015/16 session.

Teacher responsible: Prof Max-Stephan Schulze SAR 614
Availability: This course is compulsory on the MSc in Quantitative Economic History. This course is not available as an outside option.

Course content: The topic of the Essay is chosen by the students in close consultation with their supervisors. The purpose of the essay is to introduce students to the practice of historical research through the completion of a small, self-contained project that involves the use of quantitative methods in the analysis of historical change. It builds on competencies acquired in the core economic history and economics courses of the MSc. It must demonstrate the ability to formulate and motivate a research question, reflect adequate knowledge of the relevant literature in economic history and economics, make effective use of appropriate quantitative methods, and show critical capacity in the interpretation of the evidence and findings. Selection of title:
The title must be approved by the student’s supervisor. An agreed provisional title and an outline of the Essay must be submitted by week 3 of Lent Term.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors. There will be four Essay sessions in Michaelmas Term for all students on the programme and meetings with supervisors during the course of the year.

Formative coursework: Students must submit a one page summary and draft work for comment by week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Assessment: Essay (100%, 6000 words).

The essay should be no longer than 6,000 words, excluding tables, references and bibliography. Submission on a date to be specified. Marks will be deducted for late submission or excessive length. The Essay counts for a half-unit in the four-unit MSc programme. The relevant marking criteria are set out in the Notes for Students.
EH473
Research Paper in Quantitative Economic History
This information is for the 2015/16 session.
Teacher responsible: Prof Max-Stephan Schultze SAR 614
Availability: This course is compulsory on the MRes in Quantitative Economic History. This course is not available as an outside option.
Course content: The Research Paper builds on the research training provided through the core courses of the MSc Quantitative Economic History and the MRes Quantitative Economic History, augmented by the optional economic history courses taken by students during the MRes. The topic of the Research Paper is chosen by the students in close consultation with their MRes supervisors who, normally, will be their prospective PhD supervisors. The Research Paper will present the results of an original enquiry into a clearly defined historical problem and use appropriate methods of quantitative analysis. It must demonstrate the ability to employ relevant concepts from economics and/or the wider social sciences effectively, an understanding of and critical engagement with the relevant economic history literature, an appreciation of the nature of historical explanation and analysis, and the ability to identify, collect and critically examine relevant quantitative information. Apart from it being an integral core component of the MRes programme, the Research Paper also serves as a first step towards the production of one of the three publishable papers envisaged for the students’ prospective paper-based PhD thesis. Selection of title: The title must be approved by the student’s supervisor. An agreed provisional title and an outline of the Research Paper must be submitted by week 3 of Lent Term.
Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their supervisors. There will be four Research Paper sessions in Lent Term for all students on the MRes and meetings with supervisors during the course of the year. Students are expected to submit a one page summary and a substantial draft for comment by week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date. This draft work forms the basis of the paper which students have to present at the MRes Quantitative Economic History workshop held in the last week of the Summer Term.
Formative coursework: Students must submit a one page summary and a substantial draft for comment by week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.
Assessment: Research project (100%). The Research Paper should be no longer than 10,000 words, excluding tables, references and bibliography. Submission on a date to be specified. Marks will be deducted for late submission or excessive length. The Research Paper counts for one full unit in the four-unit MRes programme. The relevant marking criteria are set out in the Notes for Students.
The Research Prospectus is expected (1) to set out the research questions and motivation of the three publishable papers students intend to produce in their prospective PhD thesis, (2) to demonstrate the thematic connections between the three papers, (3) to outline the conceptual theoretical frameworks and empirical approaches to be used, (4) to identify the main (data) sources to be exploited, and (5) to delineate the relevant historical and historiographical contexts of the thesis. Insights from the student’s ongoing work on the Research Paper (EH473), as a first step towards the production of one of the three papers, are expected to inform the Research Prospectus.
Teaching: Students are expected to work on the Research Prospectus throughout the year and in close consultation with their supervisors who, normally, will be their prospective PhD supervisors.
Assessment: The Research Prospectus is not formally assessed. However, it needs to be approved by the departmental Prospectus Review Board prior to progression to the PhD programme. Submission to the departmental Prospectus Review Board on a date in Summer Term to be confirmed.

EH476
The Economic History of War
This information is for the 2015/16 session.
Teacher responsible: Prof Max-Stephan Schultze SAR 614 and Mr Dudley Baines SAR 608
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research) and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students enrolled on this course are expected to have completed the equivalent of undergraduate survey courses on European history. Knowledge of introductory undergraduate level economics is a distinct advantage.
Course content: This course explores the economic history of war(s) from the late Middle Ages to the 20th century within a comparative framework. Key themes examined include: long-term preparation for war - from bullionism to autarchy; state formation and deformation; organising warfare - from Renaissance condottiere to security firms; resource mobilisation - finance, material inputs, human capital; resource allocation - production and consumption; human and economic consequences of war; post-war reconstructions. The historical cases studied include the Hundred Years War, the Thirty Years War, the European wars of the 18th century, the Napoleonic Wars, the American Civil War, the First and Second World Wars.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST. There are no lectures on this course. Teaching will consist of 20 seminars of two-hours each in Lent and LT; one revision session in ST. There will be pre-circulated papers for the seminars.
Formative coursework: Three 2,000 word essays and one class presentation

EH474
Research Prospectus
This information is for the 2015/16 session.
Teacher responsible: Prof Max-Stephan Schultze SAR 614
Availability: This course is compulsory on the MRes in Quantitative Economic History. This course is not available as an outside option.
Course content: The Research Prospectus is a detailed, c. 5,000 words long outline ‘map’ of the prospective PhD thesis. It serves to demonstrate the feasibility of the thesis and, in conjunction with the results achieved in the examinable components of the MRes programme (including the Research Paper), as an indicator of the student’s readiness for further graduate work in economic history at PhD level. The Prospectus is non-examinable but subject to approval by a departmental board prior to progression into the PhD programme.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH479 Half Unit
Dissertation in Global History

This information is for the 2015/16 session.
Teacher responsible: Prof Tirthankar Roy SAR 616
Availability: This course is available on the MA Global Studies: A European Perspective and MSc in Global History. This course is not available as an outside option.
Course content: The subject of the dissertation should relate broadly to any of the global history taught courses taken by the student. It should be a critical survey of a well-defined problem in the literature. It must demonstrate adequate knowledge of appropriate literature in Global History and an ability to handle problems of evidence and explanation. The title must be approved by the student’s supervisor. A provisional title should be agreed by mid-LT.
Arrangements for supervision: EH479 gives essential training for the dissertation. Starting in the first term, students will receive advice on the choice of topic and how to tackle it, both from the Department and, individually, from their tutor and from the teacher of the most relevant taught course. There will be meetings during the course of the year. The student must submit a one page summary and draft work for comment by Week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.
Teaching: 8 hours of lectures in the MT.
Assessment: Dissertation (100%, 6000 words) post-summer term. The dissertation should be no longer than 10,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

EH481 Half Unit
Economic Change in Global History: Approaches and Analysis

This information is for the 2015/16 session.
Teacher responsible: Dr Debin Ma SAR 612
Availability: This course is compulsory on the MA Global Studies: A European Perspective and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The project of global history; comparison and connection; tools for global economic history: ideas from economic history, rational-choice economics and political economy, and from Marxism and ‘world systems’ theory; the industrial revolution as a conjuncture in global history; empires and globalization; meaning and evolution of the ‘world economy’; states and state systems; culture and economic change; the natural environment and global history; the post-modern challenge to metanarrative; strategies for writing global history. The course will introduce central themes and analytical tools in global history, focussing on the history of material progress and stasis, and considering the comparisons and connections between the histories of different regions of the world.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce two written papers during the course.
Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH482
Pre-Modern Paths of Growth: East and West Compared, c1000-1800/1900

This information is for the 2015/16 session.
Teacher responsible: Dr Kent Deng SAR 605 and Prof Lars Boerner SAR 505
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in China in Comparative Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation and MSc in Global History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course surveys long-term processes of growth and development in pre-modern Europe, China and Japan. The course raises fundamental questions about the nature of pre-industrial societies and economies. First, it asks if stagnation and poverty were normal conditions in pre-industrial societies and growth an aberration. What kind of growth and development did ‘Malthusian’ societies experience? Second, it addresses debates over European industrialisation. Why was Britain first? Was British success from the late 18th century the result of unique social, institutional, or cultural features? Was it the outcome of a centuries-long, cumulative process of change, that relied as much on inputs from the rest of Europe as much as specifically domestic features? Or was it the result of a ‘fortunate conjunction’? Third, it makes an in-depth comparison of three major geo-economic regions (Europe, China and Japan) over seven centuries. It discusses recent research that suggests that parts of pre-modern Asia were as developed (in terms of living standards, agricultural productivity, commerce) as the more advanced regions of modern Europe, and asks if there were more than one ‘premodern paths of growth’. In the MT we focus on Europe; during the LT, on China and Japan. The approach throughout is thematic. Themes include: agriculture, population, urbanisation, technology, urban and rural industry, economic effects of legal, political and constitutional structure; political economy and taxation; warfare; trade and market integration, causes and effects of European expansion.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

2-hour meetings weekly, with a flexible combination of lectures and seminars in MT and LT.

Formative coursework: All students are expected to write four essays: one by the end of the fifth week of the MT, one by the end of the ninth week of the MT, one by end of the fifth week of the LT, and one by the end of the ninth week of the LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH483

The Development and Integration of the World Economy in the 19th and 20th Centuries

This information is for the 2015/16 session.

Teacher responsible: Dr Neil Cummins SAR 513 and Dr Peter Cirenza SAR 506

Availability: This course is compulsory on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Global History and MSc in Global Politics. This course is available on the MRes in Quantitative Economic History, MSc in Accounting, Organisations and Institutions, MSc in Empires, Colonialism and Globalisation, MSc in Global Politics and MSc in Global Politics (Global Civil Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to provide an overview of the development and integration of the world economy since the First Industrial Revolution. Global economic history over this period can be divided into four phases, around which the lectures will be based:

1. The birth of the modern world, 1780-1870
2. Globalisation, 1870-1914
3. Globalisation Backlash, 1914-195-
4. Globalisation since 1950

Particular themes covered include:

1. Catching-up, forging ahead and falling behind: analysis of reasons for success and failure in economic growth in different eras
2. The role of factor and trade flows in the development process
3. Demographic transitions and their links to economic factors
4. The international monetary system and financial crises
5. The wider role of institutions and institutional change

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Formative coursework: Three pieces of written work are to be submitted for the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH486

Half Unit

Shipping and Sea Power in Asian Waters, c 1600-1860

This information is for the 2015/16 session.

Teacher responsible: Dr Kent Deng SAR 605

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the development of shipping, sea power and maritime-related industries in East and Southeast Asia, c1600-1860.

Topics include: Introduction to theories and models. Sailing conditions and sea routes in Asian waters. Strategic importance of Asian waters in the global sense. Development of shipping technology. Emergence of naval capacity. Function and pattern of long-distance trade; formation of regional markets and networks; linkages to the home economy. Migration. Investments and returns.
Role of governments. Impact of modern capitalism. Regional hegemony. The context of the process and impact of globalisation in Asia.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST. Taught during the LT. 10 weekly one hour lecture followed by one hour seminar in which student papers will be presented and discussed.

Formative coursework: Students will be expected to produce two essays of up to 2,000 words during the course, one due at the end of the 4th week and the other at the end of the 9th week (see below).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH487 Half Unit
International Economic Institutions since World War I

This information is for the 2015/16 session.

Teacher responsible: Professor Nicholas Crafts, SAR 608
Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course analyses the evolution since World War II of the roles of international institutions designed to manage world trade and the international monetary system paying particular attention to the IMF, the World Bank, the GATT and WTO. The analysis of the post-war world is set against the background of the trade wars and breakdown of the Gold Standard in the inter-war period prior to the establishment of these institutions.

The approach is chronological with attention being given both to efficiency and equity aspects of the institutional arrangements. Inter-war developments are examined in terms of the absence of co-operation and a hegemonic power with an emphasis on the costs of the Great Depression and the results in terms of the reversal of earlier globalization trends. The Bretton Woods era of a new financial and trading architecture is discussed in terms of an evaluation of the success of the new institutions against the background of their initial job descriptions and of the much better world economic performance in the period. The changing rationales for the IMF and the World Bank and challenges to the GATT in the difficult economic environment of the 1970s and 1980s are examined. The debates of the time and implications for the continuation of the post-war return to globalization are both considered. Finally, the questions of the likelihood and Content of further liberalization of trade and capital flows under WTO and IMF auspices are discussed in the context of an Assessment of what is genuinely new about late 20th compared with late 19th century globalization.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Taught during the LT. 2-hour meetings weekly, with a flexible combination of lectures and seminars in which student papers will be presented and discussed.

Formative coursework: Students will be expected to produce two written papers during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EH491 Half Unit
Dissertation in the Political Economy of Late Development

This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 616
Availability: This course is compulsory on the MSc in Political Economy of Late Development. This course is not available as an outside option.

Course content: The dissertation must present the results of an enquiry into a carefully defined problem in the field, whether by a critical survey of existing literature, or by the use of primary evidence. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in Economic History and Development Studies, and an ability to handle problems of evidence and explanation.

Supervision: EH414 Theories, Paths and Patterns of Late Development gives essential training for the dissertation. Starting in the first term, students will receive advice on the choice of topic and how to tackle it, both in the form of a document from the Economic History Department and individual advice from their respective supervisors. There will be meetings during the course of the year. The student must submit a draft by the last Monday of that term. The draft will form the basis of a paper which the student must present to a dissertation workshop held later that week. Verbal feedback will be provided by teachers and fellow students. The student will also receive detailed written comments on this draft.

Teaching: 6 hours of lectures in the MT. 2 hours of lectures in the LT.

Assessment: Dissertation (100%, 10000 words) post-summer term. The dissertation should not exceed 10,000 words, excluding tables, references, and bibliography. The title must be approved in advance by the student’s supervisor. The dissertation will not be returned to the student, who should therefore make a copy before submission.

EH496-7
Dissertation- MSc Economic History (Research)

This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 616
Availability: This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

Course content: The dissertation must draw upon the research
training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Students expecting to continue on the MPhil/PhD programme within the Department may write their MSc dissertation on a different topic from that on which they plan to research at MPhil/PhD level.

Selection of title: The subject and title of the dissertation must be approved by the student's tutor.

Teaching: 8 hours of lectures in the MT. 2 hours of lectures in the LT. Arrangements for supervision: Starting in the first term, students will receive advice on how to choose a topic, and how to tackle it, both from the Department and, individually, from their tutor and from the teacher of any relevant taught course. There will be meetings during the course of the year. The student must submit a draft of the dissertation by the last Monday of the ST. This draft will form the basis of the paper which the student must present to a dissertation workshop held later that week, at which verbal feedback will be provided to teachers and fellow students. A nominated member of staff will also offer written comments on this draft providing it is submitted by the designated time.

Formative coursework: The student must submit a draft of the dissertation by the last Monday of the ST. This draft will form the basis of the paper which the student must present to a dissertation workshop held later that week, at which verbal feedback will be provided to teachers and fellow students. A nominated member of staff will also offer written comments on this draft providing it is submitted by the designated time.

Assessment: Dissertation (100%, 15,000 words) post-summer term. The final dissertation, is equivalent to two full modules, and will be awarded two separate percentage marks. The first of these marks will be based on the formulation of the dissertation topic, its historical and historiographical context (including critical literature survey), its creativity and originality, and overall presentation. The second mark will relate to the student’s research design and discussion of methods, their collection and evaluation of primary and secondary sources, and the quality of analysis of evidence and interpretation. The dissertation should not exceed 15,000 words, excluding tables, references and bibliography. Presentation must be in accordance with appropriate academic conventions as laid down in the MSc Handbook. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

Teaching: 8 hours of lectures in the MT. EH401 gives essential training for the dissertation. Starting in the first term, students will receive advice on the choice of topic and how to tackle it, both from the Department (in the form of a document) and, individually, from their tutor and from the teacher of the most relevant taught course. There will be meetings during the course of the year. The student must submit a one page summary and draft work for comment by Week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Formative coursework: Students must submit a one page summary and draft work for comment by Week 9 of the Summer Term. Supervisors will not normally provide comments on drafts submitted after that date.

Assessment: Dissertation (100%, 6,000 words) post-summer term. The dissertation should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

EH499
Dissertation: MSc Economic History
This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the MSc in Economic History. This course is not available as an outside option.

Course content: The dissertation should be an empirical study using primary source material to write on a topic of economic history. The topic should relate broadly to one of the economic history courses taken.

Selection of title

The title must be approved by the student's tutor.

Teaching: 8 hours of lectures in the MT. 8 hours of lectures in the ST. EH401 gives essential training for the dissertation. Starting in the first term, students will receive advice on the choice of topic and how to tackle it, both from the Department (in the form of a document), and, individually, from their tutor and from the teacher of the most relevant taught course. There will be meetings during the course of the year. Students must submit a draft for comment by Week 9 of the Summer Term.

Formative coursework: Students must submit a draft for comment by Week 9 of the Summer Term.

Assessment: Dissertation (100%, 6,000 words) post-summer term. The dissertation should not exceed 6,000 words, excluding tables, references and bibliography. The title must be approved in advance by the student’s supervisor. Marks will be deducted for late submission. The dissertation will not be returned to the student, who should therefore make a copy before submission.

EU409
Basic Economic Concepts for European Political Economy
This information is for the 2015/16 session.

Teacher responsible: Dr Vassilis Monastiriotis COW 2.05

Availability: This course is available on the MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option. Students from other programmes within the European Institute can also follow the course. This course is for students with little economic background.

Course content: This is a Moodle-based course offering a series of instructional videos / recorded lectures (and related reading material / study guides) on some basic economics concepts and theory that are relevant to discussions concerning the political economy of
Europe that students will come across in their other courses during their MSc degree. The course is not assessed and there is no formal instruction. Students are encouraged to work in teams and to develop discussions on Moodle which will be partially moderated by the Course Convenor. The material is designed so as to be accessible to all students. Some knowledge of economics but students with some basic economics knowledge will also benefit from it. Example topics include: current account and budget deficits (“twin deficits”), inflation and unemployment (“Phillips Curve”), trade liberalisation and tariffs (“gains from trade”), competitiveness and unit labour costs (“internal devaluation”), and others.

**Teaching:** This is a Moodle-based course with no formal teaching. Students can arrange one-to-one sessions with the Course Convenor during Feedback Sessions/Office Hours. Depending on student demand, a limited number of ‘EU409 Surgeries’ can be arranged.

**Assessment:** There is no examination for this course.

---

**EU410**

**Interdisciplinary Research Methods and Design**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Waltraud Schelkle COW 1.06

**Availability:** This course is compulsory on the MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** This series of workshops and lectures offers an introduction to research methods and design for all students taking masters degrees in the European Institute. Themes discussed include: methods in the social sciences and in the humanities; common problems of research design; advice on writing coursework essays and dissertations; advice on critical reading and interpretation of texts; the logic of case-studies; comparative research and an introduction to quantitative methods and data sources. Each session will consist of short lecture elements followed by group work in which students with their different backgrounds help each other to solve specific problems of research design.

**Teaching:** 6 hours of lectures and 3 hours of workshops in the MT. 6 hours of lectures and 3 hours of workshops in the LT. A total of 6 hours of lectures in both MT and LT. One three-hour workshop in week 6 of MT and LT.

**Assessment:** There is no examination for this course.

---

**EU420**

**Half Unit**

**European Law and Government**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jan Komarek COW 1.04

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Social Policy (European and Comparative Social Policy) and Master of Laws. This course is not available as an outside option.

This is a capped course (30 students). Students are required to obtain permission from the teaching department to take this course. Students on the Master of Laws programme cannot take this course if they are also taking LL4BG or LL4BH.

**Pre-requisites:** A solid knowledge of the role and functions of EU institutions is required.

**Course content:** Law seems to function as a programming language: only specialists know how to “speak” it. This is true especially for the EU, which is often accused of using law to obscure the policy choices made from the citizens that are affected by such choices. At the same time, law is so systemically engrained in the EU’s set-up that it is increasingly difficult to understand what the EU is and does, let alone criticise it or suggest alternatives, without a grasp of the role of law in the integration process. This course’s objective is to connect the legal and political science perspective on governance in the EU, and provide those with none, or a very limited, background in law with the tools to better understand the state of the Union.

The course provides an overview of how the EU is governed and – at the same time – of how it governs its citizens. You will come out of it with a detailed understanding of how the EU institutions work, how EU law is adopted at the European level, and how the EU interacts with governments on the national level. It challenges you to critically think about the interaction between law and politics; and the interaction between the EU and its Member States. The course both covers the institutional perspective, highlighting the role of the different institutions in the Union, and also focuses on those substantive issues that are currently topical in the EU – such as fundamental rights or the euro-crisis.

At no other time in the development of the EU has the interaction between law and government so fundamentally affected the direction of the integration process. The coming years will very probably see fundamental changes to the Union’s structure; which are informed as much by political dynamics as by legal mechanisms. This course prepares you to fully understand those changes – and allows you to analyse critically both their normative content and institutional structure.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One un assessed essay (2,000 words).

**Indicative reading:** C Bickerton, European Integration: From Nation-States to Member States (Oxford University Press 2012); G de Burca and J Weiler (eds), The Worlds of European Constitutionalism (Cambridge University Press 2012); S Hix and M Mazzucato (eds), Constitutionalism (Palgrave 2011); P Lindseth, Power and Legitimacy: Reconciling Europe and the Nation-State (Oxford University Press 2010).

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

---

**EU421**

**Half Unit**

**Policy-Making in the European Union**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Sara Hobolt COW 1.02

**Availability:** This course is compulsory on the MSc in EU Politics and MSc in EU Politics (LSE and Sciences Po). This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Social Policy (European and Comparative Social Policy) and Master of Laws. This course is not available as an outside option.

This is a capped course (30 students). Students are required to obtain permission from the teaching department to take this course. Students on the Master of Laws programme cannot take this course if they are also taking LL4BG or LL4BH.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.
Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Management and Governance, MSc in Public Policy and Administration, MSc in Public Policy and Administration (Research), and MSc in Social Policy (European and Comparative Social Policy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A solid knowledge of the role and functions of EU institutions is required.

Course content: This course offers the theoretically informed study of the EU policy-making across a selection of key issue areas. The principal aim of the course is to provide a detailed knowledge of how national and EU institutions interact in European policy making. To achieve this, the course is divided into two parts. The first introduces principal theories of policy making along three core policy dimensions: agenda setting, decision making and policy implementation. In the second part the conceptual insights gained will be used to analyse a number of substantive policy areas. These will typically include: the single market, cohesion policies, immigration and asylum policies, Common Agricultural Policy, Economic and Monetary Union, Justice and Home Affairs and EU foreign policy.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EU424  Half Unit

The Idea of Europe

This information is for the 2015/16 session.

Teacher responsible: Prof Maurice Fraser COW 2.12

Availability: This course is compulsory on the MSc in European Studies: Ideas, Ideologies and Identities and MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po). This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Europe has never been indifferent to its own meaning and significance. In this course we explore some key ideas in the developing movement of a distinctively European self-understanding and identity. The course will introduce and critically explore the classic idea of Europe as not just a specific geographical region or regional economic power but as the ‘spiritual leader’ of a global mission, a ‘vanguard’ for human civilisation. Students will examine the themes and texts which have informed this ‘Eurocentric’ perspective and consider the reasons why the universal reach of ‘European values’ has become so contested. Among other topics, students will examine the origins of Europe in Ancient Greece and Christendom; the idea of the territorial and historical ends of Europe; the distinction between ‘civilisation’ and ‘barbarism’; the emergence of European rationalism; the idea of ‘The West’; the idea of ‘The Other’ in the formation of a European identity; and the development of the idea of universal human rights. All these ideas will be assessed for their role in the development of the ‘European Project’ since World War 2.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.

There are two mock exam sessions in the Lent Term. The first session is the exam itself, the second session is to provide feedback.

Formative coursework: Two 2,500 word unassessed essays

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EU425   Half Unit

Interest Representation and Economic Policy- Making in Europe

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Coulter COW 1.07

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The focus of this course is on the representation of interests in Europe, and their role in Economic policy-making. Students will analyse the main theoretical issues and selected empirical questions on how interests are differently organised across countries and at the EU level, on the interplay between interest representation and electoral politics, and on the policy outcome after interest intermediation. The objective is to understand the dynamics of economic policy-making in comparative perspective, with an emphasis on the globalisation period.

Teaching: 20 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One presentation per student and one 1,500 word essay.

EU426 Half Unit Not available in 2015/16 The West: Identity and Interests

This information is for the 2015/16 session. Teacher responsible: Prof Maurice Fraser COW 1.10 Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in History of International Relations, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This is a capped course (30 students). Students are required to obtain permission from the teaching department to take this course. Course content: This course is in two halves: the first will explore the idea of The West, culturally and philosophically; the second will explore the architecture, policies and governance of the contemporary transatlantic relationship. The course will begin by examining The West’s central role as a descriptive and normative concept across intellectual disciplines. It will locate its many definitions in their respective cultural and geographical contexts and will examine the claims for an unique and irreducible content which can account for The West’s enduring significance in changing geopolitical contexts, notably since the end of the Cold War. The course will consider The West as a foundational idea in the humanities - specifically the emergence of a self-consciousness through the liberal arts and the Western Canon of literature and philosophy; the concept of ‘high culture’; the idea of a university; and the importance of criticism, innovation and self-consciousness. The West’s position within the grand civilisational narratives will be analysed, including those of decline (Spengler, Toynbee, Freud), triumph or resolution (Bell, Fukuyama), conflict (Huntington), and universal mission (liberal interventionism, neo-conservatism, soft power). The course will describe and critically evaluate the claims of anti-western ideologies such as pan-Islamism, pan-Asianism, ‘Negritude’, Russian eurasianism and Eastern Orthodoxy, along with the political expression which these have taken, including in the Non-Aligned Movement. It will also examine the continuing coherence of The West as a normative community in light of contemporary claims of radical incompatibility of European and American value systems. The second half of the course will assess the coherence of The West as a geopolitical actor in the post-War period, in the context of centrifugal forces such as the opposition to communism, the establishment of collective security through the Atlantic Alliance and growing economic interdependence; and centrifugal forces such as strategic or tactical divergences (Suez, Vietnam, Balkans, Iraq), economic tensions (industrial and agricultural subsidies, GMOs, hormones, climate change), and attitudes to international norms and multilateral institutions. Finally, the course will review the institutional architecture of the transatlantic relationship in light of the contemporary debates about collective security (future of NATO, burden-sharing, co-ordination in the UN); the US-EU institutional framework; commercial dialogue (TABD, EABC); and economic co-ordination (G20, G8, reform of IFIs). It will conclude by assessing the various proposals for a new ‘Transatlantic Bargain’.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two essays of 1,750-2,000 words; one seminar presentation.

Indicative reading: The Decline of the West, Oswald Spengler; The Western Canon, Harold Bloom; What is Liberal Education? Leo Strauss; The Rise of The West, W.H. McNeill; The Closing of the American Mind, Allan Bloom; The Tyranny of Guilt, Pascal Bruckner; Occidentalism, I. Buruma and A. Margalit; The Clash of Civilisations and the Remaking of World Order, Samuel Huntington; The Narcissism of Minor Differences: how America and Europe are alike, Peter Baldwin; The End of the West? Crisis and Change in the Atlantic Order , J. Anderson et al (eds.). The European Union and the United States, Steven McGuirre and Michael Smith.

EU427 European Public and Economic Policy

This information is for the 2015/16 session. Teacher responsible: Dr Marco Simoni COW 1.10 Availability: This course is available on the MPA in European Public and Economic Policy. This course is not available as an outside option.

This is a capped course (15 students). Students are required to obtain permission from the teaching department to take this course. Course content: This course offers the theoretically informed study of European Public and Economic Policy-Making. It covers concepts and theories on political and economic integration in Europe, as well as key empirical issues. It draws from two broad domains: European politics and governance, and European political economy, which are combined in a full unit course in order to achieve a comprehensive understanding of economic policy and public policy in Europe. As such, it will include classes on the politics and governance of the EU institutions, and the developments in the interaction between national governments and the EU level. This will include insights into the creation and functioning of the EU institutions, their competences, and key policy domains, such as the single market, EMU, justice and home affairs, and others. The politics component of this course is complemented by a thorough examination of key developments of European economic integration, and their interaction with national models of capitalism and welfare state. The course is organised in weekly lectures and seminars. Students will be challenged to combine different theories and approaches in order to tackle issues of particular relevance for the academic and policy debate in contemporary Europe, broadly understood. This will be carried out in class discussions, weekly exercises, essay questions and teamwork on case studies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Three 1,500 word essays (two in MT, one at the end of LT) and one group essay in LT.

EU431 Half Unit Not available in 2015/16

European Integration from a Global Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Mareike Kleine COW 1.01

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics (Global Civil Society), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Advanced knowledge of European institutions and theories of international cooperation and Comparative Politics.

Course content: Distances on a world scale are shrinking through the emergence and thickening of networks of connection - a process commonly referred to as globalization. The process is far from complete with some regions like Europe being highly integrated and other regions lagging behind. Partial but increasing globalization produces discord and requires effective governance beyond the nation-state, that is, processes and institutions, that guide and constrain the collective activities of groups. How does governance work? How can we design effective institutions? How do we ensure that these institutions remain legitimate? Is the European Union at the vanguard of globalization and a model that other regions or the world, as a whole, will come to adopt? Can Europe, in turn, learn from alternative forms of governance on the regional or global scale? The course engages recent positive and normative scholarship in European Studies, International Relations, Comparative Politics, and Political Theory on governance in and beyond Europe. Putting European integration in this global and comparative perspective promises to illuminate current public and scholarly debates about the depth, the geographic scale, the legitimacy and the future of European integration. We study these questions by posing four issues: the nature of globalization; institutions and processes; actors and scope; and democracy and distribution. For each of them, European integration will serve as the principal case study to be discussed in light of developments in the rest of the world.

Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: 1) A research proposal (due in week 5) of not more than 1,000 words for the long essay. The proposal is worked out in close cooperation with the seminar teacher. 2) Seven short memos based on the assigned reading. This memo should not be more than one page of bullet points.

Assessment: One 4,000-5,000 word research paper to be submitted by the end of the LT (90%)

One critical comment of no more than 500 words on the assigned readings (10%)
EU432  Half Unit  Not available in 2015/16  

The Philosophy of Europe  

This information is for the 2015/16 session.  

Teacher responsible: Prof Simon Glendinning COW 1.07  
Availability: This course is available on the MSc in EU Politics, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.  

Course content: In this course we will read and discuss texts that draw the history of Europe into relation with philosophy. In its most classical form the assertion of this relation belongs to an understanding of Europe's history as inseparable from the project of a life predicated on reason. Europe, insofar as its cultural identity is caught up with the Greek ideal of scientific rationality, is not simply the place where philosophy was first elaborated and developed. On the contrary, Europe first arises as a place only in and through the elaboration and development of philosophy. Of course, philosophy is, historically speaking, a European phenomenon - although one which concerns above all the question, in principle open to anyone, of what it is to be a human being as such. Equally, however, Europe is itself a philosophical phenomenon - its identity inseparable from the idea of a project that concerns rational animality as such, and hence humanity as a whole.  
The idea that Europe has a world-wide significance in virtue of its relation to philosophical thought is strikingly expressed in Kant's prediction of "a great political body of the future" emerging in Europe, a kind of league of nations, that will probably "legislate" - that is, at least serve as a guiding example - for all humanity. Indeed, the global "cosmopolitan existence" posited by Kant as the final end of world history is not just a philosopher's idea of humanity's collective political destiny: the very idea of a global human community is essentially philosophical. On this view, the (particular) history of the peoples of "our continent" has a relation to the (universal) destiny - the liberation or emancipation - of humanity world-wide. This is not because of the hegemonic political and economic ambitions of imperialist Europeans, but the world-wide movement of a cosmopolitan and humanist culture. Starting with Kant's classic essay on "Idea for a Universal History with a Cosmopolitan Purpose" we will turn to the way in which Europe is understood and elaborated within the post-Kantian tradition: in Hegel, Marx, Husserl, Valéry, Berlin, Fukuyama, Derrida, and Habermas.  

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.  

Each seminar will be based around the discussion of a short essay or text which everyone in the class will be expected to have read. The texts will typically be available either online or as a photocopy. Students on this course will have a reading week in Week 6, in line with departmental policy.  

Formative coursework: One essay of 2,000 words.  
Indicative reading: Immanuel Kant 'Idea of Universal History with a Cosmopolitan Purpose', in Political Writings; Edmund Husserl 'The Vienna Lecture', in The Crisis of European Sciences and Transcendental Phenomenology; Paul Valéry 'Notes on the Greatness and Decline of Europe', in History and Politics; Jacques Derrida, 'Of the Humanities and the Philosophical Discipline. The right to philosophy from the cosmopolitical point of view (the example of an international institution)' (online).  

Assessment: Exam (75%), duration: 2 hours) in the main exam period.  

Essay (25%, 2500 words) in the MT.  

EU434  Half Unit  

The Political Economy of Southeast Europe  

This information is for the 2015/16 session.  

Teacher responsible: Dr Vassilis Monastiriotis COW 2.05  
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Local Economic Development, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.  

Pre-requisites: A basic understanding of economics is desirable but not necessary.  

Course content: The course examines the processes of transition, regional cooperation and European association in the SEE region and draws on theories of regionalism, economic integration and transition to assess the extent and prospects of regional cooperation and political-economic development in Southeast Europe. It explores the economic structures and political constraints of the region; the coordination of policies at the European and regional levels and the role of the EU in fostering regional cooperation and transition; developments in macro-economic performance with emphasis on trade, investment and growth; the main labour market and social-policy problems and the emerging agenda of structural reforms; the impact of the crisis and the political and economic challenges lying ahead for the countries in the region and for the region as a whole. Attention is paid to Greece as the historical EU partner in SE Europe and, more recently, as a source of instability in the region. The course relates the above issues to the question of policy harmonisation and Europeanisation of the region, in relation to the current and future waves of enlargement of the EU.  

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.  

Students on this course will have a reading week in Week 6, in line with departmental policy.  

Formative coursework: One 1,500 word essay, a group presentation, various weekly in-class activities (briefing notes, multiple choice quizzes etc) and a mock-exam paper.  

Assessment: Exam (100%, duration: 2 hours) in the main exam period.  

EU435  Half Unit  

History and Theory of European Integration  

This information is for the 2015/16 session.  

Teacher responsible: Dr Mareike Kleine COW 1.01  
Availability: This course is compulsory on the MSc in EU Politics and MSc in EU Politics (LSE and Sciences Po). This course is available on the MSc in European Studies (Research), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research),
MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is an introduction to the causes and nature of European integration. The topic is presented from a historical, social scientific and normative perspective. We critically examine various theories of, and current debates about European integration by studying the process of integration, its effect on EU member states and third actors, and its constitutional character. The course is designed accordingly. The first part of the course analyses different stages in the integration process, asking why and how member states surrendered more and more power to European institutions. The second part discusses a number of big questions that this transfer of power raises. For example, what are the consequences of the single market and currency on the national economy and welfare state? What are the consequences of the EU’s political and judicial system for national politics? What is the source and nature of the EU’s power in world politics? We conclude by reflecting on the debate about its democratic deficit and the future of European integration. At the end of this course you will have gained an overview of the history of European integration, integration theories and their intellectual history, the political system of the European Union, and current public and scholarly debates about European Union politics.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two 2,000-word essays are set and marked by the seminar teacher.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EU439 Half Unit
Political and Fiscal Integration and Disintegration in EU Member States

This information is for the 2015/16 session.

Teacher responsible: Dr Joan Costa-Font OLD 2.37

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Local Economic Development, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy, MSc in Social Policy (European and Comparative Social Policy) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: With the expansion of processes of economic integration in the European Union the traditional economic role of the state requires redefinition. Monolithic states progressively become more flexible structures to respond to constituents' demands. This is especially the case of those policy areas that are highly relevant for European citizens such as language, culture and welfare. This course attempts to use the theory of public choice, fiscal federalism and social economics to describe these phenomena and its detailed effects on the institutional structure of European Union member states and the European Union as a whole. Given the European Union institutional structure is moving towards some form of federalism, the course discusses how theories of political and fiscal federalism can help to understand these phenomena. Furthermore, the constitutional design of the European Union brings up a large set of theoretical questions on the institutional design to be addressed from the perspective of constitutional political economy. The course covers the political economy of both fiscal and political decentralisation process with a European perspective. Particularly, it examines political and fiscal incentives that reflect on inter-jurisdictional competition between different levels of
government. Finally, it addresses the effects of economic, social and political heterogeneity in the organisation of European Union member states and well as in the European Union itself.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Two essays of up to 1,500 words each.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**EU440 Half Unit**

**Greece and South Eastern Europe: Government, Economy and Foreign Policy**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Spyridon Economides COW 2.07

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management, MSc in Management (CEMS MIM), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Public Policy and Administration (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the MSc in Global Politics who wish to take this course must seek approval from the teachers responsible. Students are required to obtain permission from the teaching department to take this course.

**Course content:** The course consists of two parts. In the first part we will discuss the basic arguments and methodological considerations of the Varieties of Capitalism literature and conduct a comparative analysis of the core issue areas in the political economy of contemporary capitalism: how capital, labour and product markets are structured. The second part will build on these thematic treatments to discuss the structure of and dynamics of the main Western, Southern and Central European models of capitalism.

**Teaching:** 1 hour of lectures and 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Assessment:** Essay (100%, 5000 words) in the LT.

---

**EU443 Half Unit**

**European Models of Capitalism**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Abigail Innes COW 2.10

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in China in Comparative Perspective, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management, MSc in Management (CEMS MIM), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Public Policy and Administration (Research). **EU446 Half Unit**

**The Political Economy of European Monetary Integration**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Paul De Grauwe COW 1.03

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management, MSc in Management (CEMS MIM), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science and
Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic understanding of economic concepts is essential which is why the auditing of the EU409 Moodle course is highly recommended.

Course content: The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 as a source of evidence to assess both the performance of EMU and the theories about monetary integration. We consider the political and economic rationale for the establishment of EMU. We study the theory of optimal currency areas and its relevance today. Indicative questions addressed in this course include: how and why did the EU develop the EMU project?; did economic theories prepare us for the Euro area crisis of 2010-12?; what are the challenges for member states in adjusting to the discipline of the ‘Euro-zone’?; how does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks?; is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design? How can these design failures be corrected? What is the role of the ECB in this process? Is a fiscal union necessary to make a monetary union sustainable in the long run?

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 3 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 1,500-word essay and one group essay of up to 3,000 words.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EU447     Half Unit

Democracy, Ideology and the European State

This information is for the 2015/16 session.

Teacher responsible: Dr Jonathan White COW 1.09

Availability: This course is available on the MSc in European Studies (Research), MSc in European Studies: Ideas, Identities and Institutions, MSc in European Studies: Ideas, Identities and Institutions (LSE and Sciences Po), MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course investigates various ways in which the State's authority to act - its legitimacy, in brief - has been undermined or rejected. The module aims to provide students with a deep analytical understanding of the changing role of the State in European society. There will be three parts: A) Theorising the state and collective self-rule and the liberal-democratic compromise; ideology, public opinion and the idea of democracy), B) Democracy in post-War Europe (parties and the structuring of political conflict; the emergence and crisis of the Welfare State; 1968, 1989 and the rediscovery of 'civil society'); and C) Contemporary European trends (ideological convergence and the politics of risk and security; political participation and populism in western and post-Communist Europe; the challenge of transnational integration: ‘governance’, ‘output legitimacy’ and the diffusion of State power). The course will conclude with an overview on possible trajectories to come, under the heading ‘post-ideological, post-democratic and post-statist? - Europe today and beyond.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two essays.

EU450
Europe: Contemporary Issues
This information is for the 2015/16 session.
Teacher responsible: Prof Maurice Fraser COW 2.12
Availability: This course is compulsory on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.
Course content: This is a ten-week programme of guest lectures from top policymakers in the European institutions and the British government, along with analysts and commentators from think tanks, academia, embassies, the media and the private sector. The course helps ensure that European Institute students are able to assess the significance of the latest European developments, and put questions directly to opinion formers and decision makers.
Teaching: 5 hours of lectures and 5 hours of workshops in the MT. 5 hours of lectures in the LT.
Assessment: There is no examination for this course.

EU453 Half Unit
The Political Economy of European Welfare States
This information is for the 2015/16 session.
Teacher responsible: Dr Waltraud Schelkle COW 1.06
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Social Policy, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in Social Policy (European and Comparative Social Policy). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states. The lectures establish the theoretical context, summarise the findings of quantitative comparative case studies and discuss European experience in the context of broader international experience. The seminars will further develop these concepts and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory...
and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? What are the proper boundaries of EU social policy? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 3 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One individual formative essay of 1,500 words and one group formative essay (3-4 students) of 3,000 words.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

EU455 Half Unit
Concepts in Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Abel Bojar COW 1.10

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy. MPA in Public and Social Policy, MPhil/PhD in European Studies, MSc in Management, MSc in Management (CEMIM), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of the course is to engage students with relevant concepts in political economy and their main applications in European studies. The course will anchor the degree in historical and current debates about the nature of political economy, the role of institutions and the pros and cons of different methodological approaches taken by political economists. The aim of the lectures is to outline key political economy concepts and their theoretical background while the seminars explore the uses and limits of the respective concepts through the systematic analysis of relevant research papers.

This course is particularly recommended for students who wish to pursue a research path in political economy.

Among the topics covered are: The nature and scope of political economy; Rational choice and positive political economy; Constructivism and normative political economy; Institutions: Path-dependence, institutional choice, institutional change; Veto players and joint-decision traps.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One presentation per student. Two formative essays, each of 1,500 words. One of these essays will consist of the analysis of a research paper.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

EU457 Half Unit
Ethnic Diversity and International Society

This information is for the 2015/16 session.

Teacher responsible: Dr Jennifer Jackson Preece COW 2.06

Availability: This course is available on the MSc in Comparative Politics (Nationalism and Ethnicity), MSc in Conflict Studies, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics and MSc in Human Rights. This course is available with permission as an outside option to students on other programmes where regulations permit.
This is a capped course (30 students). Students are required to obtain permission from the teaching department to take this course.

Course content: This course will consider problems and practices of ethnic diversity in a world of nation-states including the rights of minorities and migrants, self-determination, ethnic cleansing and genocide, humanitarian intervention, and the role of the media in (de)constructing narratives of difference. In analysing these issues, particular attention will be paid to processes of securitization, desecuritization and security management.

Teaching: 20 hours of seminars in the MT. 3 hours of seminars in the LT.

Students on this course will have a reading week in Week 6 MT but in LT there will be seminars scheduled.

Formative coursework: Essay proposal (500 words) (Due Week 4 MT) Draft essay (2000 words) (Due Week 10 MT)

A more detailed reading list is available from Dr Jackson-Preece.

Assessment: Essay (80%, 5000 words) in the ST.

Research proposal (20%) in the LT.
This research proposal will take the form of a poster presentation session in LT reading week 6.

EU458 Half Unit
Identity, Community and the 'Problem of Minorities'

This information is for the 2015/16 session.

Teacher responsible: Dr Jennifer Jackson Preece COW 2.06

Availability: This course is compulsory on the MSc in European Studies: Ideas, Ideologies and Identities and MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po). This course is available on the MSc in Conflict Studies, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Human Rights and MSc in International Migration and Public Policy. This course is not available as an outside option.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is compulsory on the MSc in Comparative Politics (Nationalism and Ethnicity), MSc in Conflict Studies, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics and MSc in Human Rights. This course is available with permission as an outside option to students on other programmes where regulations permit.

This is a capped course (20 students). Students are required to obtain permission from the teaching department to take this course.

Course content: This course is concerned with the politics of membership and belonging in contemporary states. The securitization of minorities and migrants has coincided with a growing rejection of multiculturalism in favour of new discourses that place a greater emphasis on social cohesion predicated upon a shared nation-state identity. This course will examine the ways in which different constructions of membership and belonging underscore contested narratives on diversity and the competing policy responses this has engendered. Europe will be a major focus of the course. Nevertheless, students with interests and expertise outside of Europe should feel free to include this wider perspective in their seminar discussions and assignments.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

A more detailed reading list is available from Dr Jackson-Preece. **Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**EU460 Half Unit**
European Society and Politics beyond the Nation State

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jonathan White COW 1.09

**Availability:** This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course has three main sections. Part A explores how transnational integration weakens the overlap typically assumed of modern politics between socio-cultural identities, economic practices, and state boundaries, and examines the conceptual challenges this raises. Part B considers the kinds of social tie a transnational society might rely on, including material interest, cultural affinity, and shared political values and conflicts, and considers the political implications of these different dimensions. Part C of the course examines the empirical sociology of transnational Europe, including changing public attitudes, patterns of mobility, structures of media discourse and communication, and political mobilisation and contention. The course links historical and contemporary perspectives on state formation with contemporary debates on the EU and the emergence of a European society.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy. **Formative coursework:** One 2,500 word unassessed essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**EU463 Half Unit**
European Human Rights Law

This information is for the 2015/16 session.

**Teacher responsible:** Dr Kai Moller NAB 7.01

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities and MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po). This course is not available as an outside option.

This is a capped course (15 students). Students are required to obtain permission from the teaching department to take this course. **Pre-requisites:** No prior knowledge of law in general or human rights law in particular is required.

**Course content:** The European Convention on Human Rights is an international treaty which was drafted shortly after the end of WW II and came into force in 1953. One of its remarkable features is that individuals who think that their human rights have been violated can take their case to the European Court of Human Rights in Strasbourg, which has the final authority on the interpretation of the Convention. In the past half century, the Strasbourg court has developed a comprehensive jurisprudence on human rights and has become one of the most important and most highly respected human rights courts in the world. This course will offer an introduction to the law of the Convention, in particular by studying and critically analysing the case law on certain important rights. In the final sessions we will take a more abstract perspective and study cutting-edge scholarship on the theory of European human rights law.

**Topics include:** An introduction to the European Convention. Positive and negative obligations in Europe and the U.S. Proportionality and the margin of appreciation. Freedom from torture and inhuman or degrading treatment or punishment and the issue of deportation and extradition. The right to private life and the protection of morals. The right to freedom of religion and the issues of religious dress and religious symbols. The right to freedom of expression, especially: blasphemous speech, obscene speech and hate speech. The right to freedom of association and ‘militant democracy’. Theories of European human rights law.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy. **Formative coursework:** One 2,000 word essay.

**Indicative reading:** There is no formal textbook, but interested students may find the following book helpful: Harris, O’Boyle and Warbrick, Law of the European Convention on Human Rights, 3rd ed, OUP 2015.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**EU464 Half Unit**
International Migration: EU Policies and Politics

This information is for the 2015/16 session.

**Teacher responsible:** Marco Scipioni

**Availability:** This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This is a capped course (30 students). Students are required to obtain permission from the teaching department to take this course. **Pre-requisites:** A good knowledge of EU institutions and policy-making is required.

**Course content:** This course examines the management of ‘unwanted migration’ to Europe. In particular, it deals with the European Union’s governance of migratory flows of migrants such as asylum seekers and irregular migrants whose immigration states often seek to prevent or discourage. As the willingness of sovereign
states to advance global governance in this area remains very low and unilateral national policy-responses are increasingly seen as limited in their effectiveness, interest in regional governance has grown. The European Union is without any doubt the front-runner in developing such regional initiatives. The course provides an in-depth treatment of the origins, evolution and major policy issues within this policy field which has been the fastest growing EU policy area since the 1990s. The course will normally focus on the following three policy areas: (1) the emerging EU asylum and refugee determination system; (2) external border control (FRONTEX), detention and deportation; and (3) responsibility allocation (the ‘Dublin system’), burden-sharing and solidarity. Those taking the course will learn how to systematically examine the origins and impact of EU policy instruments and judgments by the European Courts. After completion, students will be able to answer questions such as: Why have Member States intensified cooperating on asylum and immigration issues? What is the relationship between international human rights law and EU law? Given the influence of the EU’s supranational institutions, do the Member States still effectively control policies on asylum and immigration? Has EU policy-making will lead to a convergence of “lowest common denominator” policies? For their assessment, students will have the opportunity to conduct a case-study analysis, allowing them to apply the analytical skills developed in this course by analysing a specific EU policy of their choice.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Indicative coursework: An essay of 1,500 words and an outline for the assessed research project (case study).

Assessment: Project (100%, 5000 words) in the LT. The Project takes the form of a research project (policy case study).

EU465 Research Methods and Design in EU Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Mareike Kleine COW 1.01

Availability: This course is compulsory on the MSc in EU Politics and MSc in EU Politics (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The purpose of this course is to acquaint students with general academic skills, to prepare them for the development of a research design and to introduce a range of research methods.

Teaching: 4 hours of lectures in the MT. 4 hours of lectures in the LT.

The course runs in weeks 1, 3, 5 and 7 of MT and LT.

Assessment: This course is not assessed.

EU473 Half Unit Not available in 2015/16

Informal Governance

This information is for the 2015/16 session.

Teacher responsible: Dr Mareike Kleine COW 1.01

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics and MSc in Global Politics (Global Civil Society). This course is available as an outside option to students on other programmes where regulations permit. This is a capped course (15 students). Students are required to obtain permission from the teaching department to take this course.

Pre-requisites: Students should have some background knowledge about the European Union’s institutions.

Course content: Informality might be the rule rather than the exception in politics. Behind the scenes and alongside official procedures seems to be where many important decisions are being made. In other words, it codified rules are often incomplete, if not entirely misleading, proxies for the game that states and bureaucrats really play. On close inspection, some treaty provisions turn out to be empty shells that have no bearing on actual state behaviour. Even if the rules are effective, most of the interesting political action takes place in the shadow of these rules. At the same time, states often follow commonly known customs that are never put into writing. However, many scholars ignore actual decision-making practices, even or especially if these do not quite conform to the formal rules, or consider them as negligible or as statistical noise that defines any systematic description and explanation. As a result, we know little about why decision makers sometimes stick to formal rules and at other times seek a way around them. Where and why do these practices of informal governance exist? Why are they more prevalent in some institutional settings and issue areas than in others? Is informal governance a good or a bad thing? This course is about informal governance: the concept, its empirical manifestation, its explanation, and its normative implication. After a review of the burgeoning literature of the concept and theory of informal governance in international relations, comparative politics, and EU studies, we take a closer look at the political system of the EU and other international organizations to examine whether and why governments and bureaucrats sometimes follow, and at other times collectively depart from the formal rules. The final weeks discuss how the concept of informal governance sheds new light on debates about transparency and the democratic deficit in European and global governance.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce one draft and one final research design by week 8 of the LT.

EU474 Half Unit Not available in 2015/16 Contested Ideas in EU Law and Government

This information is for the 2015/16 session.

Teacher responsible: Dr Jan Komarek COW 1.04

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), and MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: When politicians or public intellectuals discuss European integration, they often use terms that have a certain meaning in EU law. Very rarely, however, they would be conscious of this, which contributes to many misunderstandings. The course will examine selected foundational concepts of EU law and government and show how different perspectives (those of constitutional and political theory, but also political economy and political science) inform their meaning – in law and beyond it. The topics covered will include state, sovereignty, federalism, democracy, fundamental rights, the rule of law, citizenship, market, common currency, justice, solidarity and equality.

The primary entry point will be law and the foundational provisions of the EU treaties, which contain many contested ideas to be covered by the course. It can therefore attract students in the European Institute’s MSc programme interested in learning more about EU law in its political and social context. The range of materials we use includes scholarly literature, public interventions, EU legislation and the case law of European courts. Students will therefore get acquainted with the whole variety of sources used in work in different fields and professions related to Europe.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Teaching: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 projects and 2 other pieces of coursework in the LT.

Assessment: Exam (60%), duration: 2 hours) in the main exam period.

Essay (40%, 3000 words) in the LT.

EU475 Half Unit Muslims in Europe

This information is for the 2015/16 session.

Teacher responsible: Dr Esra Ozyurek Baer COW 2.08

Availability: This course is available on the MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in History of International Relations, MSc in Religion in the Contemporary World and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Muslims are a well established minority in Europe, constituting approximately 5% of the European population. This course embraces an anthropological approach focuses on diverse experiences of Muslims in different West European countries, such as the UK, Germany, France where they came as migrants, and in East European countries, such as Bulgaria and Bosnia, where they are indigenous populations. We will especially focus on how Muslim life is heavily shaped by questions fundamental to European politics such as secularism, citizenship, racism, and gender relations. The last section of the class will be devoted to transnational connections Muslim communities in Europe have with Muslim communities outside Europe.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Teaching: Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Exam (60%), duration: 2 hours) in the main exam period.

Essay (40%, 3000 words) in the LT.

EU476 Half Unit Turkey and Europe

This information is for the 2015/16 session.

Teacher responsible: Dr Esra Ozyurek Baer COW 2.08

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in History of International Relations, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Ottoman Empire and modern Turkey have been an integral part of European power dynamics since the early modern period. This course aims to introduce the foundations of Modern Turkey and major social, political, and historical dynamics that shape her relationship to Europe. These include questions of secularism and religion; religious and ethnic minorities; role of the state; human rights; democracy; legal reforms; and Turkish immigrants in Europe. The course will end with a focus on the
recent Gezi protests to have a deeper understanding of the most recent social and political reconfigurations in Turkey. Students will be required to follow media reports on Turkey and be prepared to discuss them. Each student will make a presentation about the background of an issue that is covered lately in the media and turn in a 10-page paper about this issue discussing it historically and how it unfolded throughout the year.

Teaching: 20 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Exam (60%, duration: 2 hours). Essay (40%, 3000 words) in the MT.

---

**EU477 Half Unit**

**Labour Markets and the Political Economy of Employment in Europe**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Vassilis Monastiriotis COW.2.05

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A solid background in economics and knowledge of some basic calculus is required. Attendance of EU409 ‘Basic Economic Concepts for Political Economy’ is highly recommended irrespective of background.

**Course content:** The course offers an analytical treatment of key labour market issues, from unemployment and wage determination to skill formation and labour market regulation, within the context of processes of integration and governance in Europe. To do so, it combines a Labour Economics perspective on imperfect labour markets with a Political Economy perspective on EU institutions and policies. In the lectures, we address analytically policy-making questions on topics such as minimum wages, unions and collective bargaining, unemployment benefits, employment protection legislation, regulation of working hours, migration, and others. These topics are then linked in the seminars to the European policy-making context, and the challenges that this raises for labour market regulation and performance at the national and European levels. Examples of this include: EMU, optimum currency area theory, wage flexibility and internal devaluation; structural unemployment, labour market reforms, the European Employment Strategy and flexicurity; skills shortages, activation policies, European education policy and labour mobility; and others.

**Teaching:** 10 hours of lectures, 15 hours of seminars and 2 hours of workshops in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

The course will have 10 1-hour lectures and 1.5-hour seminars in weeks 1-5 and 7-11. In week 6 students will make poster presentations on a preliminary draft of their group essay.

**Formative coursework:** Students will be expected to produce 6 problem sets and 2 presentations in the LT and 1 project in the Week 6.

**Indicative reading:**

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

Project (50%, 4000 words) in the Week 11.

Summative assessment comprises a group project (50% of the final mark; approx. 4,000 words, excluding tables and appendices), due on Week 11 of the term, and a two-hour exam in June (50% of the final mark, comprising one essay question and five short-answer questions).

---

**EU498 Dissertation**

**This information is for the 2015/16 session.**

**Teacher responsible:** All teachers of taught courses within the European Institute.

**Availability:** This course is compulsory on the MSc in EU Politics and MSc in EU Politics (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** MSc EU Politics and the LSE-Sciences Po Double Degree in European Studies (EU Politics) students are required to write a 10,000-word dissertation on a topic within the field of European politics. Those seeking further guidance on topic selection should approach their Academic Advisor in the first instance. The dissertation need not be an account of original research- in some cases it will rely exclusively on secondary sources- but it should be the product of work done independently by the student. In preparation for the dissertation, students must submit Dissertation Topic Proposal and Approval Forms and a 2,000 word essay. Failure to submit these documents will result in the student not being able to submit the Dissertation. Following the submission of the Dissertation Topic Approval Form, a student will receive notification in writing from the EI’s Programmes and Events Office as to whether it has been finally approved or not- a student cannot progress to the submission of the dissertation without such approval. Students are strongly advised to attend the EU465 Research Methods and Design in EU Politics on how to conduct research and write a dissertation.
Detailed information on timing, deadlines and presentation can be found in the European Institute Handbook for Master’s Degree Students.

**Teaching:** Lectures are scheduled as part of EU465 Research Methods and Design in EU Politics with four hours of lectures in the Michaelmas Term and four hours of lectures in the Lent Term.

**Formative coursework:** A 2,000 word essay (prospectus) is to be submitted at the start of the Summer Term.

**Assessment:** Dissertation (100%, 10,000 words) post-summer term.

---

**EU499**

**Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** All teachers of taught courses within the European Institute.

**Availability:** This course is compulsory on the MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

**Course content:** Students are required to write a 10,000-word dissertation on a topic within the field of their chosen programme. Those seeking further guidance on topic selection should approach their Academic Advisor in the first instance. The dissertation need not be an account of original research in some cases it will rely exclusively on secondary sources, but it should be the product of work done independently by the student. In preparation for the dissertation, students must submit Dissertation Topic Proposal and Approval Forms and a 2,000 word essay. Failure to submit either document will result in the student not being able to submit the dissertation. Following the submission of the Dissertation Topic Approval Form, a student will receive notification in writing from the EI’s Programmes and Events Office as to whether it has been finally approved or not - a student cannot progress to the submission of the dissertation without such approval. Students are strongly advised to attend the EU410 Interdisciplinary Research Methods and Design lectures on how to conduct research and write a dissertation. Detailed information on timing, deadlines and presentation can be found in the European Institute Handbook for Master’s Degree Students.

**Teaching:** Lectures are scheduled as part of EU410 Interdisciplinary Research Methods and Design with five lectures in Michaelmas Term and five lectures in Lent Term (weeks 2, 4, 6, 8 and 10).

**Formative coursework:** A 2,000 word essay (prospectus) is to be submitted at the start of the Summer Term.

**Assessment:** Dissertation (100%, 10,000 words) post-summer term.

---

**EU483**

**MPA Capstone Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

**Course content:** Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.

**Teaching:** 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.

**Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT.** These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.

**Formative coursework:** Feedback will be provided on presentations of work-in-progress during MT and LT.

**Assessment:** Project (100%, 15,000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances. The group mark has three components:

1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group’s work to be submitted individually and separately from the report.

---

**EU484**

**MPA Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

**Course content:** The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be...
Concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilize qualitative and/or quantitative data and draw on primary and/or secondary research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

**Assessment:** Dissertation (90%, 10000 words) in the ST. Other (10%) in the MT.

1. A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

2. The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

---

**EU4V8** Half Unit

**MPA Policy Paper**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA dissertation.

**Course content:** The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

**Formative coursework:** A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

**Assessment:** Other (100%) in the ST.

6,000 word policy paper

**FM402** Half Unit

**Financial Risk Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Yves Nosbusch

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Management and Regulation of Risk, MSc in Risk and Finance, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

**Pre-requisites:** The course assumes a basic knowledge of finance theory, statistics and mathematics (calculus, linear algebra).

**Course content:** This course aims to provide an overview of the main theoretical concepts underlying the analysis of financial risk and to show how these concepts can be implemented in practice in
FM403  Management and Regulation of Risk
This information is for the 2015/16 session.

Teacher responsible: Prof. Kathy Yuan
Availability: This course is compulsory on the MSc in Risk and Finance. This course is not available as an outside option.
Course content: This course is designed to expose students to the breadth of risk management thinking and approaches across different areas. Section A. Risk and Regulation: Introduction and Overview. Sets out the problem of risk management and regulation. It formulates a general conceptual framework that can be used in devising solutions to risk either as a management problem or as a regulatory problem, or both. Section B. Financial Market and Bank Regulation: Discusses the role of regulation in the financial sector, bank competition and moral hazard; distinguishes prudential regulation of banks and the regulation of insurance and pensions; the tools of microprudential regulation; the challenges of assessment of systemic risk and macroprudential regulation. Section C. Financial Risk Analysis: Examines issues in financial risk including risk and regulation in the insurance markets, tools of financial risk management, including diversification, hedging and capital provisions; risk measurement for financial instruments (market risk, value at risk); credit risk, ratings and credit derivatives; operational and business risk. Section D: Strategy, Control and Risk in Organisations: Provides a strategic management perspective on risk analysis and management, including an examination of strategic visioning. Also considers: issues of enforced self-regulation as a method of risk management with reference to occupational health and safety regulation; risk management and decision making in organisations; enterprise-wide risk management and auditing. Section E: Risk Analysis and the Psychology of Risk Bearing: Explores the meaning of risk as perceived by different agents; methods of dealing with risky situations; analysis of risk taking by groups, behavioural analysis of financial risk taking. Section F: Specific areas of risk analysis: 1) Legal analysis of risk, conditions when legal risk exists and how it can be mitigated, legal tools to influence conduct; 2) Environmental risk; what is special about environmental risks, global warming and its consequences, regulatory responses to climate change risks; 3) Counter-party risks in the OTC markets. Potential triggers for market failure.
Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

FM404  Half Unit
Forecasting Financial time Series
This information is for the 2015/16 session.

Teacher responsible: Dr Christian Julliard
Availability: This course is compulsory on the MPhil/PhD in Finance. This course is available on the MSc in Accounting and Finance, MSc in Finance and Economics, MSc in Finance and Economics (Research), MSc in Finance and Private Equity, MSc in Financial Mathematics, MSc in Risk and Finance, MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Quantitative Methods for Finance and Risk Analysis (FM442). The first half of FM437 Financial Econometrics, or alternatively FM442 Quantitative Methods for Finance and Risk Analysis, is a required prerequisite. Students who can demonstrate comparable background may be granted an exemption from this requirement.
Course content: This course will examine the techniques involved with forecasting key variables in finance, and how to incorporate model uncertainty into financial forecasts. Students will learn both the theory and the practice of forecasting in finance. The following topics will be covered: introduction to time series analysis; Maximum Likelihood Estimation (MLE) with time series data, and MLE based model selection; Bayesian inference, posterior probabilities, and Bayesian Model Averaging; Markov chain Monte Carlo methods; present value regressions, vector autoregressions, causality, and cointegration; asset pricing and the Generalized Method of Moments (GMM); frequentist and Bayesian information theoretic alternatives to GMM.
Additional information can be found on Christian Julliard’s teaching page and on On Moodle (for current students)
Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of computer workshops in the LT.
Formative coursework: Regular problem sets.
Indicative reading: Lecture notes will be provided, and some journal articles may also be used.
Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.
FM405  Half Unit
Fixed Income Securities and Credit Markets
This information is for the 2015/16 session.
Teacher responsible: Dr Peter Kondor
Availability: This course is available on the MSc in Finance (full-time) and MSc in Finance and Private Equity. This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Interest rate modelling and derivatives
• Credit risk
• Credit derivatives and risk management
This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.
By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as Government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.
Teaching: 30 hours of lectures in the LT.
Assessment: Exam (80%, duration: 2 hours) in the main exam period. Coursework (20%) in the LT.

FM406  Half Unit
Topics in Portfolio Management
This information is for the 2015/16 session.
Teacher responsible: Dr Michela Verardo
Availability: This course is available on the MSc in Finance (full-time) and MSc in Finance and Private Equity. This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Implementing investment strategies and assessing their profitability
• Managing portfolios: trading costs, liquidity risk, FX risk
• Mutual funds and hedge funds
This course covers a wide range of topics in equity portfolio management, with a strong focus on empirical applications. The first part of the course introduces students to the implementation of several investment strategies, such as value, momentum, post-earnings-announcement-drift, betting-against-beta, carry trades; it also delves into the mechanics of the Black-Litterman model of portfolio optimization. The second part of the course explores some issues related to portfolio management, such as trading costs, liquidity risk, and currency hedging. The last part of the course analyses investment strategies of mutual funds and hedge funds, with particular emphasis on style analysis, selectivity, and timing skills. The course is based on recent empirical studies and on applied exercises using financial data.
Teaching: 30 hours of lectures in the LT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are Modern portfolio theory and investment analysis, by E. J. Elton, M. J.Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.
Assessment: Exam (70%, duration: 2 hours) in the main exam period. Project (30%) in the LT.

FM407  Half Unit
Mergers, Buyouts and Corporate Restructurings
This information is for the 2015/16 session.
Teacher responsible: Dr Vicente Cuñat
Availability: This course is available on the MSc in Finance (full-time), MSc in Finance and Economics, MSc in Finance and Economics (Research) and MSc in Finance and Private Equity. This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Financial Valuation of Firms and Corporate Transactions
• Mergers, Acquisitions and Leveraged Buyouts
• Distress, Bankruptcy and Corporate Restructuring
This course covers advanced topics in Corporate Finance and Valuation and introduces students to valuation techniques for both securities and projects. The first part of the course introduces students to several advanced valuation techniques applied to firms and projects. The second part of the course focuses on particular deals that involve firm valuation, in particular, mergers, divestitures, partial-divestitures (e.g. equity care outs) and leveraged buyouts. The last part of the course provides with a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies and practitioner talks.
Teaching: 30 hours of lectures in the LT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.
Assessment: Exam (70%, duration: 2 hours) in the main exam period. Project (30%) in the LT.

FM408  Half Unit
Financial Engineering
This information is for the 2015/16 session.
Teacher responsible: Dr Jean-Pierre Zigrand
Availability: This course is available on the MSc in Finance (full-time), MSc in Finance and Economics, MSc in Finance and Economics (Research) and MSc in Finance and Private Equity. This
course is not available as an outside option.

**Pre-requisites:** Students will be expected to show some familiarity with calculus and statistics.

**Course content:** Provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products. This syllabus lists and describes the topics covered in this course. In a nutshell, the course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in Excel, VBA or Matlab.

**Teaching:** 30 hours of lectures in the LT.

**Indicative reading:** Based on a set of extensive lecture notes. No one book covers the material of the entire course. Books recommended include The Volatility Surface: A Practitioner’s Guide by Jim Gatheral, Option Pricing Models and Volatility by Maurice Rouah and Gregory Vainberg, Derivatives Markets, 2nd edition* by Robert McDonald, Options, Futures and Other Derivatives by John Hull, Principles of Financial Engineering by Sahil Nethci as well as Keith Cuthbertson and Dirk Nitzsche’s Financial Engineering

**Assessment:** Exam (80%), duration: 2 hours) in the main exam period.

**Project (20%)** in the LT.

---

**FM410**  
**Half Unit**  
**Private Equity**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ulf Axelson  
**Availability:** This course is compulsory on the MSc in Finance and Private Equity. This course is not available as an outside option.

**Course content:**

- Evaluating and executing Private Equity Deals  
- Business Plans, Venture Capital, and Entrepreneurial Finance  
- Private Equity as an asset class and the private equity landscape Provides a thorough grounding in the theory and recent developments in the field of private equity. Starting by examining how private equity funds are raised and structured the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. It explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken

This course takes a rigorous theoretical examination of private equity, however also employs some case study teaching and is taught in conjunction with a range of practitioners in the field.

**Teaching:** 30 hours of lectures and 30 hours of seminars in the LT.

**Formative coursework:** Each week there will typically be a formative case study assignments (similar to summative cases). Students will also be given formative feedback on their class participation.

**Assessment:** Dissertation (60%, 6000 words) in the ST. Coursework (20%) and class participation (20%) in the LT.
Pre-requisites: The Finance Work Placement and Assessment is only available to students who are registered on the Work Placement Pathway for the following programmes: MSc in Finance (full-time), MSc in Finance and Private Equity, MSc in Finance and Economics or MSc in Finance and Economics (Research). Students must complete the work placement and assessment in addition to four full units of courses, as described in the programme regulations.

Course content: There are no classes for this course. Students instead undertake a work placement during which they will be employed by an external company or institution. However, the work placement should be relevant to the topics studied during the student's academic modules, and be likely to build on and enhance topics studied during the year. Academic modules studied during the programme should also have a direct bearing on the role that a student will undertake on their placement. Students must hold a formal offer in writing of an appropriate work placement before approval will be granted to join the work placement pathway, and the aspects outlined above will be considered by the Department before approval to undertake a placement is granted. The student will be an employee of the relevant company or institution for the duration of the placement; they will be expected to undertake tasks as appropriate and all management of the placement will be undertaken by the employing institution or company. The course will be assessed by an essay which students are required to submit to the Department of Finance at the end of the placement.

Teaching: There will be no direct teaching for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students’ learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

Assessment: Essay (100%, 2000 words) post-summer term. The assessment of the work placement will be on the basis of submission of a written piece of work following completion of the work placement. Students will be required to submit their work to the Department following completion of the placement. The essay will be required to be in the region of 2,000 words in which the student should describe:
- How the work placement built on or shed further light on the topics covered during the programme’s academic modules, and/or how the elements of theory learned were applied in practice;
- How topics covered in the academic modules were relevant to the student’s role on the work placement;
- Whether the academic and pastoral aspects of the programme prepared students for their experiences in the workplace;
- What the student feels they have learned from the placement.

The essay will be required to be in the region of 2,000 words in which the student should describe:
- How the work placement built on or shed further light on the topics covered during the programme’s academic modules, and/or how the elements of theory learned were applied in practice;
- How topics covered in the academic modules were relevant to the student’s role on the work placement;
- Whether the academic and pastoral aspects of the programme prepared students for their experiences in the workplace;
- What the student feels they have learned from the placement.

The essay will be marked on a Pass/Fail basis. Students enrolled on the work placement pathway must satisfactorily complete the work placement and assessment in order to be eligible for graduation from the work placement pathway.

Pre-requisites: Students taking this course are expected to be familiar with the theory of asset evaluation at the level of FM430 Corporate Finance and Asset Markets and the theory and practice of derivative pricing at the level of FM441 Derivatives.

Course content: This advanced course is designed for students seeking an understanding of fixed income valuation and hedging methods, and a basic familiarity with the major markets and instruments.

Provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management. By the end of the course, the students will be familiar with a variety of topics, including (i) the basic concepts of fixed-income instruments, such as yield, duration, convexity; (ii) the basic techniques to analyze and hedge fixed income products, such as “curve fitting”, “bootstrapping”, duration-based hedging and asset-liability management; (iii) the forces, or “factors”, driving the variation in the entire spectrum of interest rates at different maturities; (iv) the main evaluation tools, which can be applied to evaluate a wide range of products (trees, no arbitrage trees, calibration and some continuous time models); (v) the main fixed income products such as government bonds, corporate bonds (convertible, callable, puttable), and their evaluation; (vi) plain vanilla interest derivatives (caps, floors and collars, swaps, swaptions, etc.) and their evaluation; (vii) mortgage backed securities and credit risk transfers; (viii) the analysis of the “destabilizing” effects related to the use of certain derivatives written on fixed income instruments.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies, and a reading pack containing chapters from the following books:

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

FM413  Half Unit
Fixed Income Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Andrea Tamoni

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Accounting and Finance, MSc in Finance and Economics, MSc in Finance and Economics (Research), MSc in Management and Regulation of Risk, MSc in Risk and Finance, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content:
- Supporting the firm’s strategy with Long-term and short-term financial management
- Real options and strategic investment decisions

---

FM414  Half Unit
Corporate Investment and Financial Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Pedro Chauffaille Saffi

Availability: This course is available on the MSc in Finance (full-time) and MSc in Finance and Private Equity. This course is not available as an outside option.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content:
- Supporting the firm’s strategy with Long-term and short-term financial management
- Real options and strategic investment decisions
FM421  Half Unit  
Applied Corporate Finance

This information is for the 2015/16 session.

Teacher responsible: Prof Ashwin Agrawal

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Accounting and Finance, MSc in Economics and Management, MSc in Finance and Economics, MSc in Finance and Economics (Research), MSc in Management, MSc in Management (CEMS MIM), MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: This is an advanced applied course and a thorough understanding of the major theoretical issues and concepts is required. Students must meet one of the following pre-requisites to take this course: 1. have taken FM431 Corporate Finance A in Michaelmas term. 2. have taken the equivalent of FM212 Principles of Finance in their undergraduate degree.

Course content: Provides a thorough grounding in recent developments in applied corporate finance. The course involves a study of the applied corporate finance literature and case studies. It will examine valuation techniques, capital structure and payout policy, raising capital, going public, financial risk management by firms, corporate governance, takeovers and insolvency.

Teaching: 30 hours of seminars in the LT.

This course is taught in three separate streams.

Indicative coursework: Class papers and case based research are required.

Assessment: Exam (70%), duration: 2 hours) in the main exam period.

Workshop (30%) in the LT.

FM422  Corporate Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Amil Dasgupta

Dr Dirk Jenter

Availability: This course is compulsory on the MSc in Finance (full-time) and MSc in Finance and Private Equity. This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:
-  Financing
-  Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course investigates how companies should finance their activities by issuing securities (debt, equity, and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine “optimal” capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course covers project valuation, by discounting risky future cash flows accounting for differences in capital structure, and establishes how companies should select the set of investable assets. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation and financing concepts in the form of major corporate decisions such as mergers and acquisitions and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 60 hours of lectures in the MT.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The recommended textbooks for this course are Berk and DeMarzo, Corporate Finance and Higgins, Analysis for Financial Management. Other recommended readings from relevant journal articles will be included in a study pack.

Assessment: Exam (80%, duration: 3 hours) in the main exam period.

In class assessment (20%) in the MT.

FM423  Asset Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Konstantinos Zachariadis and Dr Igor Makarov

Availability: This course is compulsory on the MSc in Finance (full-time) and MSc in Finance and Private Equity. This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:
-  Investments and Securities Valuation
-  Portfolio choice and performance evaluation
-  Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with
portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks’ cash flows with the present value formula. Alternative pricing models such as the APT and multifactor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 60 hours of lectures in the MT.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Assessment: Exam (80%), duration: 3 hours) in the main exam period.

In class assessment (10%) and in class assessment (10%) in the MT.

---

**FM429 Half Unit**

**Asset Markets A**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Dong Lou

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics (Research), MSc in International Management, MSc in Management and Regulation of Risk, MSc in Management and Strategy, MSc in Real Estate Economics and Finance, MSc in Risk and Finance, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

**Course content:** Aims to equip students with the fundamental concepts and tools underlying modern finance, both in the asset markets and the corporate finance side. Provides a foundation for subsequent courses offered by the Department. In the Michaelmas Term, the course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models. In the Lent Term, the course covers corporate finance. This part starts with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: dividend policy, decision to go public, mergers and acquisitions and possibly (time permitting) some specific topics in corporate finance: dividend policy, decision to go public, mergers and acquisitions and possibly (time permitting) corporate governance issues.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. 20 hours of lectures and 9 hours of seminars in the LT.

**Formative coursework:** Weekly problem sets covered in classes.

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

Please note this examination is the full unit version of the exams taken on FM429 Asset Markets A (H) and FM431 Corporate Finance A (H).

---

**FM430 Corporate Finance and Asset Markets**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Dong Lou and Dr Daniel Paravisini Maggi

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Law and Accounting, MSc in Management and Regulation of Risk and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised. This course cannot be combined with FM429 Asset Markets A, FM431 Corporate Finance A or FM474 Finance II.

**Course content:** Aims to equip students with the fundamental concepts and tools underlying modern finance, both in the asset markets and the corporate finance side. Provides a foundation for subsequent courses offered by the Department. In the Michaelmas Term, the course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models. In the Lent Term, the course covers corporate finance. This part starts with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: dividend policy, decision to go public, mergers and acquisitions and possibly (time permitting) corporate governance issues.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** Weekly problem sets covered in classes.

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

Please note this examination is the full unit version of the exams taken on FM429 Asset Markets A (H) and FM431 Corporate Finance A (H).

---

**FM431L Half Unit**

**Corporate Finance A**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Daniel Paravisini Maggi

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Law and Accounting, MSc in Management and Regulation of Risk and MSc in Risk and Finance. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised. This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Finance II.

**Course content:** The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to
FM430 Full-Unit Exam Paper in Summer Term.

Please note this exam is the half unit version of the examination main exam period.

Assessment:

- Formative coursework: At least two pieces of formative work will be assessed over the duration of the course. Students will be set will be set weekly problem set assignments, of which a minimum of two will be submitted and marked as formative assessment.
- Indicative reading: J. Berk and P. DeMarzo, Corporate Finance, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.
- Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the main exam period.

Please note this is the half unit version of the examination main exam period.

**FM431M Half Unit Corporate Finance A**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Juanita Gonzalez-Uribe

**Availability:** This course is compulsory on the MSc in Economics and Management. This course is available on the MSc in Accounting and Finance, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics (Research), MSc in International Management, MSc in Management; MSc in Management (CEMS MIM), MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised. This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM474 Financial Economics

**Course content:** The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants.

A final part of the course covers some specific topics in corporate finance: dividend policy, decision to go public, mergers and acquisitions and possibly (time permitting) corporate governance issues.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT.

**Formative coursework:** At least two pieces of formative work will be assessed over the duration of the course. Students will be set weekly problem set assignments, from which a minimum of two will be submitted and marked as formative assessment.

**Indicative reading:** J. Berk and P. DeMarzo, Corporate Finance, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

**Assessment:** Exam (100%, duration: 1 hour and 30 minutes) in the main exam period.

Please note this is the half unit version of the examination taken on FM430 Corporate Finance and Asset Markets. Any student who takes both FM429 and FM431 will be re-registered to sit the FM430 full-unit exam paper in Summer Term.

**FM436 Financial Economics**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Ian Martin and Dr Igor Makarov

Dr Martin Oehmke

**Availability:** This course is compulsory on the MRes/PhD in Finance (Route 1), MSc in Finance and Economics and MSc in Finance and Economics (Research). This course is available on the MPhil/PhD in Accounting. This course is not available as an outside option.

**Pre-requisites:** Mathematical background at the level of the September Courses in Mathematics and FM458 Financial Economics Preparatory Course is assumed.

**Course content:** Financial Economics provides students with an in-depth introduction to the theories of asset pricing and corporate finance. The course analyses investors’ behaviour, market equilibrium, the pricing of securities, the valuation of real assets, and capital structure choice. Topics in asset pricing will encompass portfolio choice, complete and incomplete markets, mean-variance portfolio theory and equilibrium asset pricing, pricing with no arbitrage, Black-Scholes and other contingent claims pricing models, and the behaviour of financial markets during crises. Topics in corporate finance will encompass valuation methods and financing decisions in the presence of taxation, agency frictions, and asymmetric information.

**Teaching:** 40 hours of lectures and 20 hours of seminars in the MT.

**Formative coursework:** Problem sets, covered in classes.

**Indicative reading:** Will be based on: Teaching notes and journal articles, as well as J. H. Cochrane, Asset Pricing, Revised Edition, Princeton University Press.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**FM437 Financial Econometrics**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Christian Julliard, Dr Daniel Paravisini Maggi and Dr Vassilis Hajivassiliou

**Availability:** This course is compulsory on the MSc in Finance and Economics. This course is available on the MPhil/PhD in Accounting. This course is not available as an outside option.

**Pre-requisites:** Mathematical background to the level of the course taught in September in the Economics Department (EC400) is assumed.

**Course content:** The techniques of empirical investigation in economics and finance. Students are introduced to recent empirical findings based on asset pricing and corporate finance models. The course includes a selection of the following topics: multivariate regression; maximum likelihood and methods of moments estimation; hypothesis testing; omitted variables and misspecification; asymptotic theory; measurement error and instrumental variables; time-series modelling; predictability of asset returns; event study analysis; econometric tests of the CAPM and multifactor models; volatility modelling; generalised method of moments estimation.

**Teaching:** 22 hours of lectures and 10 hours of seminars in the MT. 27 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Exercises are provided each week and they are discussed in class.

**Indicative reading:** A complete reading list is available at the beginning of session. Will be based on Greene, Econometric

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**FM438 Half Unit Not available in 2015/16 Advanced Asset Pricing**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jean-Pierre Zigrand OLD 4.22

**Availability:** This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Research). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Financial Economics (FM436).

**Course content:** Advanced Asset Markets is the continuation of the asset pricing component of FM436, Financial Economics. It allows students to further explore pricing in continuous time by applying the pricing and hedging methods of FM436 to more advanced products and to more complex environments. This course is ideal for the students who would like to apply the tools of continuous time finance learned in FM436 to the pricing and hedging of advanced real-life derivatives and structured products both in complete and in incomplete markets. The following topics will be covered: i. No-Arbitrage Pricing in complete and incomplete markets; ii. Local volatility modelling, including an excursion into local time; iii. Exotic derivatives and Structured Products; iv. Single- and multifactor term structure modelling; v. Equilibrium pricing in complete and incomplete markets; and vi. Endogenous risk modelling with applications to trading and derivatives pricing.

**Teaching:** 20 hours of lectures, 10 hours of classes and 6 hours of workshops in the LT.

**Indicative reading:** A complete set of lecture notes will be distributed at the start of term. There is no textbook covering the entire material, though Bjork, ("Arbitrage Theory in Continuous Time" (Third Edition, 2009)) is a good read and a couple of chapters in Gatheral ("Modelling the Volatility Surface: A Practitioner’s Perspective" (2007)) are optional and cover some of the key volatility modelling component of the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**FM441 Half Unit Derivatives**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Rohit Rahi

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** This is an advanced course. Students will be expected to show some familiarity with statistics, calculus and random processes.

**Course content:** The course provides a thorough grounding in the theory of derivatives pricing and hedging. Particular emphasis is placed on pricing within a multi-period, mostly continuous-time, framework. A special feature of the course is its coverage of the modern theory of no-arbitrage pricing using PDE and martingale methods. These methods are applied to the pricing of vanilla and exotic options, forwards, futures and interest rate derivatives. The uses of derivatives in hedging and risk-management are discussed as well.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Weekly problem sets in classes (10).

**Indicative reading:** Teaching notes will be distributed. No one book covers the entire course, but the following is an excellent reference: John C Hull, Options, Futures and Other Derivatives.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

Students answer three out of four questions.

---

**FM442 Half Unit Quantitative Methods for Finance and Risk Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Philippe Mueller

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Finance and Economics, MSc in Finance and Economics (Research), MSc in Financial Mathematics, MSc in Management and Regulation of Risk, MSc in Risk and Finance and MSc in Risk and Stochastics. This course is not available as an outside option.

**Pre-requisites:** A background in statistics and mathematics is required. No prior programming experience is necessary but students without programming experience are highly encouraged to concurrently take FM457 Computational Tools in Finance.

**Course content:** This is a graduate level course on the quantitative and statistical tools that are important in applied finance. It studies financial markets and market risk from a quantitative point of view, focusing on understanding the relationship between risk and return and on models for managing financial risks. The course brings together three essential fields: finance, statistics and computer programming. Students will be exposed to the application of these tools and the key properties of financial data through a set of computer-based classes and exercises. The following key topics will be covered: review of statistics and introduction to time series economics; modeling of financial returns; introduction to the analysis of financial data using MATLAB; volatility models including GARCH type models and the concept of implied volatility; risk measures and coherence; Value-at-Risk and Expected Shortfall; introduction to simulation-based methods and application to option pricing and risk management.

Implementing the models and tools in MATLAB is an essential part of the course and, consequently, all classes are computer-based. With regards to empirical work the students will learn how to deal with very practical problems such as locating financial data and processing the data to be able to analyze it in the first place. Through the computer-based exercises the students explore the data bases available at the LSE and they will become comfortable working with real data. Throughout the term the students will build their own toolbox of routines that can also be used outside the course.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Problem sets to be solved using MATLAB. In addition, students will have the opportunity to present the results of a problem set to the class.

**Indicative reading:** The core text for this course is: Jon Danielsson, Financial Risk Forecasting, John Wiley & Sons, 2011. Extra readings will be assigned for selected topics.

**Assessment:** Exam (75%, duration: 1 hour and 30 minutes) in the main exam period.

Project (20%, 2000 words) and presentation (5%) in the MT.
**FM457**  Half Unit  

**Applied Computational Finance**  

*This information is for the 2015/16 session.*  

**Teacher responsible:** Mr Lorenz Bretscher  

**Availability:**  
FM457A is intended for students taking FM442 Quantitative Methods for Finance and Risk Analysis and FM404 Forecasting Financial Time Series. There may be limited availability to other students not taking these courses, however, priority will be given to those who are registered for FM404 and FM442.  
FM457B is available to students on the MSc Finance (Full-time), MSc Finance and Private Equity, MSc Finance and Economics and MSc Risk and Finance programmes.  

**Course content:**  
This course is an introduction to computational methods in finance; the course mainly focuses on Matlab but then introduces other programming languages. We will begin with an introduction to basic Matlab. We will then learn how to simulate individual securities, with a special focus on the predictability and fat tails features of volatility. Simultaneously we will examine the data to test how well our models approximate the real world. Next we will move onto modeling portfolios of multiple securities and test the CAPM and the Fama-French three factor model; we will also test for long term predictability in asset prices. Finally we will use numerical techniques to price options and to construct a yield curve.  

**Teaching:** FM457A: 7 hours of seminars in the MT.  
FM457B: Students can take the course either in the MT or LT. 10 hours of seminars in the MT. 10 hours of seminars in the LT.  

**Indicative reading:** Teaching notes will be distributed.

**Assessment:** This is an additional, non-assessed computer course to supplement MSc level courses in the Department of Finance.

---

**FM445**  Half Unit  

**Portfolio Management**  

*This information is for the 2015/16 session.*  

**Teacher responsible:** Prof Kathy Yuan  

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Finance and Economics, MSc in Finance and Economics (Research), MSc in Financial Mathematics and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.  

**Course content:** This course aims to cover the main topics in equity portfolio management. Some of the topics covered in the course include: Portfolio optimization techniques; Multi-factor models and their applications; Trading strategies; International portfolio management and currency hedging; Trading costs; Portfolio performance measurement and attribution; Style analysis; Mutual funds; Hedge funds. The course is based on a number of empirical applications and case studies, so that students can gain a better understanding of implementation issues related to managing an equity portfolio.  

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.  

**Formative coursework:** Regular classworks will be completed, handed in and marked as part of formative assessment for this course.  

**Indicative reading:** A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are Modern portfolio theory and investment analysis, by E. J. Elton, M. J.Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press; Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin.  

**Assessment:** Exam (80%), duration: 2 hours) in the main exam period.  
Coursework (20%).  
The 20% coursework comprises five homework assignments and one project.

---

**FM458**  

**Financial Economics Preparatory Course**  

*This information is for the 2015/16 session.*  

**Teacher responsible:** Seyed Syedian  

**Availability:** This course is compulsory on the MSc in Finance and Economics and MSc in Finance and Economics (Research). This course is not available as an outside option.  

**Course content:** The aim of this course is to supplement the Economics pre-sessional course and provide students with the essential quantitative methods for the core Finance course FM4436. The course will introduce foundational material essential to the study of both asset pricing in continuous time and corporate finance theory.  

**Teaching:** 30 hours of lectures in the MT.  

**Indicative reading:** Mikosch, Elementary Stochastic Calculus (1998), World Scientific; Shreve, Stochastic Calculus for Finance I, II  

**Assessment:** No formal assessment. Students will sit a mock exam based upon the material to aid learning.

---

**FM473**  Half Unit  

**Finance I**  

*This information is for the 2015/16 session.*  

**Teacher responsible:** Dr Georgy Chabakauri  
Dr Angeliki Andrikogiannopoulou  

**Availability:** This course is available on the MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management of Information Systems and Digital Innovation, MSc in Real Estate Economics and Finance and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.  

This course is not open to students in the MSc Accounting and Finance and in the MSc Finance and Economics.  

**Pre-requisites:** Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g. the ability to solve linear systems of two equations and two unknowns.  

**Course content:** New Present Value: The goals of the firm. Interaction of firms and capital markets. Asset valuation with known cash flows. Bond valuation: Term structure of interest rates. Forward rates and loans. Duration. Stock valuation: The Gordon growth model and variants. The functioning of equity markets. Risk and return: What is risk? The portfolio frontier. Capital Asset Pricing Model (CAPM) What is the price of risk? The capital markets model. Alternatives to CAPM. Market efficiency Valuation of risk cash flows. Capital budgeting. A first course in financial analysis for students with a basic knowledge of management. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments.  

**Teaching:** 30 hours of lectures in the MT. 30 hours of lectures in the LT. 3 hours of lectures in the ST.  
Ten three-hour lecture and seminar sessions. This course is taught twice, in both Michaelmas and Lent Term. Students must either register for FM473 A which is taught in Michaelmas Term, or FM473
FM474  Half Unit

Finance II

This information is for the 2015/16 session.

Teacher responsible: Dr Moqi Xu
Availability: This course is available on the MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is not open to students on the MSc Accounting and Finance or the MSc Finance and Economics.
Pre-requisites: Students must have completed Finance I (FM473). This course cannot be combined with FM430 Corporate Finance and Asset Markets or FM431 Corporate Finance A.
Course content: Capital structure. Financial options. Real options. Dividend policy and capital structure irrelevance. Signalling with dividends and capital structure. Going public. This is a second course in financial analysis for students with a knowledge of the topics covered in Finance I. The course starts with the determination of the cost of capital for a firm in an efficient market. It then introduces the principles of financial options and shows how puts and calls can be priced. These tools are applied to the valuation of real options, that is, real investments where payoffs are affected by the options available to the firm in how the projects will be operated. After seeing the equivalence between the liabilities of the levered firm and financial options, the problem of capital structure and financial policy are further studied. The course closes with more advanced topics including convertible bonds and the decision of the firm to list its shares on a stock exchange.
Teaching: 30 hours of lectures in the LT.
Formative coursework: Weekly problem sets.
Indicative reading: Brealey, Myers and Allen, Principles of Corporate Finance.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

FM481

Financial Econometrics for Research Students

This information is for the 2015/16 session.

Teacher responsible: Dr Andrea Tamoni and Dr Christian Julliard Professor Raffaella Giacomini
Availability: This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.
Course content: Students produce a research paper, between 6,000 and 8,000 words, related to the student’s designated major field, to be submitted at the beginning of the summer term.
Teaching: There are no direct teaching hours.
Formative coursework: Feedback on progress will be provided by the student’s PhD Supervisor.
Assessment: Research project (100%) in the ST.
A research paper of 6-8,000 words in length (100%).

FM482

Research paper in Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Christian Julliard
Availability: This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.
Course content: Students produce a research paper, between 6,000 and 8,000 words, related to the student’s designated major field, to be submitted at the beginning of the summer term.
Teaching: There are no direct teaching hours.
Formative coursework: Feedback on progress will be provided by the student’s PhD Supervisor.
Assessment: Research project (100%) in the ST.
A research paper of 6-8,000 words in length (100%).

FM492

Principles of Finance

This information is for the 2015/16 session.

Teacher responsible: Prof Richard Payne
Dr Hongda Zhong
For enquiries related to this course (including requests to take the course) please contact the Lead Teacher, Dr Paula Lopes (p.v.lopes-cocco@lse.ac.uk).
Availability: This course is available on the MPA in European Public
and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Regulation. This course is not available as an outside option.

**Pre-requisites:** Students must have completed: one Economics course, one Maths course and one Statistics course at an undergraduate level.

**Course content:** This course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, sources of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

**Teaching:** 20 hours of lectures and 20 hours of seminars in the MT. 20 hours of lectures and 20 hours of seminars in the LT. 2 hours of lectures and 6 hours of seminars in the ST.

**Formative coursework:** Students are expected to produce written work for classes and to make positive contributions to class discussion.

**Indicative reading:** Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Principles of Corporate Finance by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**FM499**

**Dissertation**

This information is for the 2015/16 session.

**Availability:** This course is available on the MSc in Accounting and Finance. This course is not available as an outside option.

Only for students on the MSc Accounting and Finance programme, who elect to take this as an option in paper 3 or 4 and who wish to write a dissertation on a Finance topic. Permission to select the long essay option must be obtained from the MSc Accounting and Finance Programme Director by the end of the third week of MT.

Students wishing to select this option must identify and secure agreement from a member of staff from the Department of Finance who is willing to provide supervision for the dissertation.

**Course content:** The dissertation may focus on analysing the relevant literature and other source material on a particular topic and writing a critical survey or commentary, indicating clearly the main problems and their nature, or investigating and reporting on a selected problem, either by some small-scale empirical research, or by using information derived from secondary sources. The dissertation must identify relevant issues, sustain reasoned argument, and draw supportable conclusions. It must be arranged in an organised manner and include a full bibliography.

**Teaching:** There is no teaching associated with the dissertation, but students who select this option are encouraged to attend the dissertation workshop sessions organised by the Teaching and Learning Centre.

**Assessment:** Dissertation (100%, 10000 words) in the ST. The dissertation outline must be approved in the LT by the supervisor. The submission deadline is Monday 6 June 2016.

Please note that MSc Finance and Economics (Research) students can submit a dissertation of 6,000-10,000 words.

GI402  Half Unit
Gender, Knowledge and Research Practice
This information is for the 2015/16 session.
Availability: This course is compulsory on the MPhil/PhD in Gender Studies, MSc in Gender and MSc in Gender (Research). This course is available on the MSc in Culture and Society, MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture and MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course introduces students to the central issues at stake in designing and carrying out gender research at graduate and postgraduate level and beyond. The course maps the history of debates about gender and feminist research, and asks what difference it makes to take gender as the subject or object of research. Of particular concern are the ethical and political issues arising from doing gender research with respect to representing others and seeking to influence and engage with broader social contexts. Students will be introduced to debates about subjectivity and objectivity, the relationship between researcher and researched, and asked to evaluate the usefulness of particular methods and approaches. The course is interdisciplinary, introducing students to a range of perspectives on knowledge production and research practice. The course offers critiques of existing knowledge practices, and highlights the specific challenges to ‘mainstream knowledge’ that come from gendered and feminist perspectives. It explores how knowledge is produced and offers critical assessments of the dominant debates in gendered research practice, asking how we ensure that we conduct research ethically. Finally, the course focuses on the methodological challenges arising within interdisciplinary research. Through a discussion on methodological questions, it provides an opportunity to reflect on and synthesize a range of research design issues addressed on the course through producing and collectively evaluating student designed research proposals.
Teaching: The course is taught in weekly three-four hour blocks in MT. The first two/three hours of each block will be a lecture and discussion session based on weekly assigned readings, followed by an hour-long ‘workshop’ session in which outside speakers will address dilemmas in epistemological or methodological dimensions of their research.
Formative coursework: Research Proposal (1500 words) in the MT.
Indicative reading:
• Nina Lykke (2005) “Transformative Methodologies in Feminist Studies”, special issue of European Journal of Women’s Studies 12. 3;
Assessment: Essay (50%, 2500 words) and research project (50%) in the LT.
The research project is 3000 words.

GI403  Half Unit
Gender and Media Representation
This information is for the 2015/16 session.
Teacher responsible: Dr Sadie Wearing, COL.5.01H
Availability: This course is compulsory on the MSc in Gender, Media and Culture. This course is available on the MSc in Culture and Society, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender, Policy and Inequalities, MSc in Media and Communications, MSc in Media and Communications...
Gi407 Globalisation, Gender and Development

This information is for the 2015/16 session.

Teacher responsible: Prof Naila Kabeer COL.5.04C and Prof Diane Perrons COL.S.01B and other GI faculty

Availability: This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the MPhil/PhD Human Geography and Urban Studies, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender, Policy and Inequalities, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Geography and Urban Studies (Research), MSc in Human Rights, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. This course cannot be taken alongside Gi409 Gender, Globalisation and Development: An Introduction, or Gi420 Globalisation, Gender and Development: Theorising Policy and Practice.

Course content: This course will provide students with a thorough knowledge of two key inter-connected and intersecting literatures: gender and development and gender and globalisation. The first part of the course provides students with an introduction to these fields of study; considers contemporary theories of gender, development and globalisation alongside critical engagements and understandings of development. A particular focus is on how globalisation is associated with widening social, spatial, gender and racial inequalities, illustrated by case studies of global integration and uneven development, changing working patterns and gender divisions, and the association between rapid economic change and continuing social divisions. The second half of the course deals with theories relating to policy, politics and power in the field of gender and international development. These are explored in greater detail through case studies of feminist struggles over recognition, redistribution and representation as they play out in relation to various policy issues, including gender-based violence, the care economy, gender mainstreaming, social protection, land rights, gender quotas and collective action. Emphasis is placed on understanding the politics of framing within the policy domain, the tactics and strategies deployed by feminist scholars, advocates and activists in their struggles for interpretive power and the interactions between global institutions and local movements in shaping policy outcomes.

Teaching: Lectures in the MT will be 90 minutes, followed by 60 minute seminars. Lectures in the LT will be 60 minutes, followed by 60 minute seminars.

Formative coursework: Essay (1500 words) in the MT.

Indicative reading:

- Marchand, M & Parpart,J (Ed) (1995) Feminism/Postmodernism/Development;
- Ong,A (1999), Flexible Citizenship, Duke University Press;

In addition a range of institutional reports will be referred to during class in Week 5 of the MT.

Assessment: Essay (100%, 4000 words) in the LT.

Assessment: Essay (100%, 4000 words) in the LT.

GI410  Half Unit
Screening the Present: contemporary cinema and cultural critique

This information is for the 2015/16 session.

Teacher responsible: Dr Sadie Wearing, COL.5.01H

Availability: This course is available on the MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Media and Communications and MSc in Media and Communications (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students need to have an awareness of and interest in contemporary cultural theory.

Course content: The aims of the course are to offer students the opportunity to critically explore contemporary international cinema as a site for the interrogation of contested contemporary social and political processes such as migration, globalisation and conflict. The course links cinematic representations to the preoccupations of contemporary cultural theory in relation to themes such as, colonial/postcolonial memory, neo liberalism and cultural dislocations, ethics and subjectivity, gendered migration and gendered violence. The course introduces students to a range of international film and will develop the critical tools for the analysis of both mainstream and marginal (or marginalised) cultural productions. It explores a range of critical and theoretical writing on film considering questions such as cinema as oppositional practice, the emergence of transnational cinema, questions of representation, global spectatorship and ‘witnessing’ and the affective dimensions of cinema. Indicative films are: Unknown Pleasures (dir. Jia Zhang-Ke), Persepolis (dir. Marjane Satrapi), Black Skin White Mask (dir. Isaac Julien), Waltz with Bashir (dir. Ari Folman), Cache (dir. Michael Haneke), The Road to Guantanamo (dir. Michael Winterbernttom).

Teaching: 10 hours of lectures, 10 hours of seminars and 20 hours of classes in the LT.

Formative coursework: Essay (1500 words) including an element of film analysis in the LT.

Indicative reading:
- Marks, L. (2000), The Skin of the Film: intercultural cinema, embodiment and the senses.

Assessment: Essay (100%, 4000 words) in the ST.
GI411 **Half Unit**  Not available in 2015/16

**Gender, Postcoloniality, Development: Critical Perspectives and New Directions**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Sumi Madhok COL 5.04A

**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** While there are no specific requirements, it is preferred that students have a background in social science or the humanities.

**Course content:** The aim of this course is to introduce students to the growing body of scholarship that critically interrogates contemporary gender relations at various postcolonial sites. It provides an opportunity for students to encounter and engage with canonical works within postcolonial theory alongside those of gender, feminist and critical theory in order to examine the historical and contemporary policy and practices in relation to gender. As such, the course combines a study of the historical/textual/cultural/political and philosophical in relation to and alongside the political-economic in order to explore questions of development, subalternity, Orientalism, neoliberalism, globalisation, human rights, humanitarianism, representation, agency and globalisation. Finally, the course also points to new directions in contemporary theoretical thinking that have arisen in the wake of and in response to postcolonial scholarship for e.g. writings on Empire and Multitude, Cosmopolitics/Cosmopolitanism, Ethics and Transnationalism with a view to explore how these might open up new ways of conceptually capturing and imagining our present.

**Teaching:** 30 hours of combination lecture/seminar sessions in the LT.

**Formative coursework:** Essay (1500 words) to be presented in a workshop.

**Indicative reading:**
- Grewal, Inderpal and Caren Kaplan ( 1994) Scattered Hegemonies

**Assessment:** Essay (100%, 4000 words) in the ST.

GI413 **Half Unit**

**Gender and Militarisation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Marsha Henry COL 5.01M

**Availability:** This course is available on the MSc in Conflict Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course will provide students with an overview of militarisation and its gendered basis and effects. Students will be introduced to social critiques of militarisation; the concept of militarised masculinities; different gendered experiences of conflict, violence and war; ‘diversity’ issues within a variety of national militaries; representations of gender and terror; peacekeeping; and the politics of peace and anti-militarisation activities.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Essay (1500 words) in the MT and Blog post (250 words) in the MT.

**Assessment:** Project (100%, 4000 words) in the LT. This will be combination essay and diary.

GI414 **Half Unit**

**Gender and Social Policy: Theory and Practice**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Wendy Sigle COL 5.01I

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Gender, Policy and Inequalities, MSc in Population and Development, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit. Students on the MSc in Gender Policy and Inequalities degree must take either GI414 OR GI417.

**Course content:** This course aims to equip students with the knowledge and theoretical tools that will allow them to critically engage with social policy issues and debates. It begins with an overview of theoretical explanations for the structure and evolution of social policies in a wide range of settings. Feminist perspectives on welfare are explored, while notions of justice, citizenship and inequality are applied as analytic tools to critically examine real world social policy issues such as micro-credit, conditional cash transfers (CCT), and the parental leave policies. The use of gender as a category of analysis is examined and attention is paid to the potentially modifying effects of categories such as race and class. Policy-making and political institutions are analysed, in part, to illustrate how assumptions (or aspirations) about gender roles and the form, function and responsibilities of the family are reflected...
in the framing, design, and evaluation of policies. The course also explores the gendered impact of economic on labour market opportunities and inequalities in access to economic resources.

Teaching: 30 hours of workshops in the MT. 3 hours of workshops in the ST.

Formative coursework: Group work: students will be asked to produce one handout outlining their response to an essay question and to present and explain the response to the class in the MT. Independent work: students will be asked to produce an essay (1500 words) in the MT. The essay should be uploaded to Moodle and include a self assessment coversheet.

Assessment: Essay (50%, 2500 words) in the LT.
Project (50%, 3000 words) in the ST.
The project will be in the form of a take home exam.

GI415 Half Unit
Gender and European Welfare States

This information is for the 2015/16 session.

Teacher responsible: Dr Ania Plomien, COL.S.04F
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MSc in Gender, Policy and Inequalities, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Political Economy Research), MSc in Social Policy (Social Policy and Planning) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course analyses the different ways in which gender is incorporated into national welfare states and the impact this has on particular, national structures of gender inequalities. The course covers the theory and methodology of comparative studies and their applicability to the analysis of gender, especially how well existing typologies of welfare states fare when gender is the focus of analysis, and the role of the European Union in the development of gendered policies and outcomes in EU countries. A number of key patterns of inequality and policy areas will be studied, including: the organisation of caring services; family policy; provisions for lone parents; the labour market and labour market policies; the practices and roles of men, especially regarding fatherhood; and fertility and aging. In looking at these areas students will be encouraged to contrast approaches of different welfare systems and consider the particularism of national approaches.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Essay (2000 words) due in the LT.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

GI417 Half Unit
Gender, Population, and Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Wendy Sigle COLS.011
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health, Community and Development, MSc in Health, Population and Society, MSc in Inequalities and Social Science, MSc in Population and Development, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Students on the MSc in Gender Policy and Inequalities degree must take either GI414 OR GI417

Course content: Although population change cannot be described, understood, or responded to without taking into account the wider — and profoundly gendered — social, political and economic context, gender theory has had relatively limited impact on the development and direction of demographic research. This course explores the implications both theoretically and practically. Examining the complex inter-relationship between population issues and policy, students will develop an appreciation of the potential contribution and impact that a feminist and gendered perspective has to offer. It will also explore the ways that feminists can use demographic tools and research to redress social and gender injustices.

Teaching: 30 hours of workshops in the MT. 3 hours of workshops in the ST.

Formative coursework: Students will be asked to produce 1-2 rapporteur reports or peer reviews summarising and reflecting on the learning outcomes in the workshop. These should be uploaded to Moodle within a week of the session. In addition, students are asked to produce a 1,500 word essay which should include a self-assessment form attached as a coversheet. The deadline for this essay is the first week of LT.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.
GI418  Half Unit

Feminist Economics and Policy:
An Introduction

This information is for the 2015/16 session.

Teacher responsible: Dr Ania Plomien, Prof Diane Perrons and Prof Naila Kabeer.

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Local Economic Development, MSc in Social Policy and Development and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is run by the Gender Institute – an interdisciplinary institute. One of the key objectives is to bring a multi-perspective approach to understanding of economic processes. As economic processes have a profound influence on social life, gender relations and gender equality, this course seeks to expose students interested in gender to the work of Feminist Economists. An undergraduate level course in economics would be an advantage.

Course content: Recent decades have seen the emergence of gender equality as a key policy concern and Feminist Economics as a sub discipline. The purpose of the course is to consider the provenance and key tenets of Feminist Economics and how these ideas have been used to provide analytical understandings of gender issues with respect to economic processes and policies operating at macro and micro levels. At the macro level the course will analyse the implications of contemporary economic and financial governance from a gender perspective. At the micro level the course will engage with the economic foundations and analyses of gender inequality within employment and within the household focusing on wage and productivity differences and the gender division between ‘productive’ and ‘reproductive’ work. Attention to gender as economically significant marker of identity will be paid in the context of, intersectionality with other lines of difference, including race, social class, sexuality and migrant status. Individual well-being is also influenced by the level of development and transnational economic relations. Accordingly, the course aims to bridge the macro-micro divide by drawing together the gendered critique of existing biases in economic thinking and provide an analytical foundation for alternative approaches to policies that aim to contribute towards securing sustainable development and gender-equitable well-being.

Teaching: 15 hours of lectures, 15 hours of seminars and 6 hours of workshops in the LT. 2 hours of workshops in the ST. The lectures and seminars will be integrated.

Formative coursework: Essay (2000 words) in the LT.

Indicative reading:

Assessment: Essay (80%, 4000 words) in the ST. Presentation (20%) in the LT.

GI419  Half Unit  Not available in 2015/16

Gender and Contemporary Social Movements

This information is for the 2015/16 session.

Teacher responsible: Dr Kalpana Wilson, COL.5.04E

Availability: This course is available on the MSc in African Development, MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The period from the 1990s onwards, which has seen the rapid acceleration of globalization and the consolidation of neoliberal policies and practices, has also been marked by a wide variety of social movements directly engaging with and challenging these processes. These movements have been characterized by new collectivities, new forms of organizing, and multiple visions of social, economic and political transformation. Exploring experiences and perspectives emerging from social movements, cutting across divisions between the ‘global North’ and ‘global South,’ this interdisciplinary course brings a transnational gender perspective to bear on these movements, the contexts in which they are located and the debates and contradictions they have generated.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: 1500 word writing exercise and a seminar presentation

Indicative reading:
- Motta, S., C.Flesher Fominaya, C. Eschle, L.Cox (2011)‘Feminism, women’s movements and women in movement’ Editorial in Interface: a journal for and about social movements, 3 (2): 1 - 32

Assessment: Essay (100%, 4000 words) in the LT.

GI420  Half Unit

Globalisation, Gender and Development:
Theorising Policy and Practice

This information is for the 2015/16 session.

Teacher responsible: Prof Naila Kabeer COL.5.04C

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender, Media and Culture, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Human Geography and Urban Studies (Research), MSc in Human Rights, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken alongside GI407 Globalisation, Gender
and Development.

Course content: This course will provide students with a thorough knowledge of theoretical and policy debates in the field of gender and development at local, national and international levels in an era of rapid globalisation. The course is organised as a number of themed blocks. The first deals with theories relating to policy, politics and power in the field of gender and international development. This is followed by three separate blocks, each organised around the feminist struggles over recognition, redistribution and representation as they play out in relation to various policy issues, including gender-based violence, the care economy, gender mainstreaming, social protection, land rights, gender quotas and collective action. Emphasis is placed on understanding the politics of framing within the policy domain, the tactics and strategies deployed by feminist scholars, advocates and activists in the struggle for interpretive power and the interactions between global institutions and local movements in shaping policy outcomes. Empirical illustrations are provided through a series of policy case studies and readings of ethnographies which explore in detail the processes of accommodation, negotiation, subversion and confrontation through which feminist actors have sought to exercise voice and influence.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: One essay of 1500 words to be handed in midway through the LT.

Indicative reading:

Assessment:
- Essay (70%, 5000 words) in the ST.

GI421 Half Unit

Sexuality, Gender and Culture

This information is for the 2015/16 session.

Teacher responsible: Prof Clare Hemmings COL5.01C

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development and MSc in Human Rights. This course is available as an outside option to students on other programmes where regulations permit.

Course content: ‘Sexuality, Gender and Culture’, introduces students to historical and theoretical components of the field, and explores case studies of the development of sexual cultures, identities and social movements from the late 19th century to the present. The course provides theoretical foundations in this area through a case-study based approach. Indicative topics include: colonialism and sexuality, sexualisation of culture; abortion and migration; transgender studies and disability; queer theory and social movements. The course is interdisciplinary and demands a high level of student participation, but does not require a background in the field. It is also available as a first half of a full unit ‘Sexuality, Gender and Globalisation’.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. Seminars come before lectures

Formative coursework: One 2500 word critical analysis to be submitted at the beginning of week 8 (MT); submission of draft abstract for conference presentation by the beginning of week 6 (LT).

Assessment: Essay (70%, 5000 words) in the ST.

Presentation (30%) in the LT.

The presentation, which will be given at a student conference, includes the submission of a 300-500-word abstract.

GI422

Sexuality, Gender and Globalisation

This information is for the 2015/16 session.

Teacher responsible: Prof Clare Hemmings COL5.01C

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development and MSc in Human Rights. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Sexuality, Gender and Globalisation, takes a case-study approach to questions of sexuality, gender and culture (in the first term) and a broad range of sexual formations in relation to nation and globalization (in the second). The full unit considers a variety of ways in which sexuality is central to the social sciences in today's globalised world. Theoretical approaches will be woven through the course via case study material so as not to provide a false opposition between example and approach. The course will allow a more thorough grounding in this area than the half unit, and will include a high element of student participation and group work. It is interdisciplinary but does not have a pre-requisite.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: One 2500 word critical analysis to be submitted at the beginning of week 8 (MT); submission of draft abstract for conference presentation by the beginning of week 6 (LT).

Assessment: Essay (70%, 5000 words) in the ST.

Presentation (30%) in the LT.

The presentation, which will be given at a student conference, includes the submission of a 300-500-word abstract.
GI423  Half Unit
Globalisation and Sexuality
This information is for the 2015/16 session.
Teacher responsible: Prof Clare Hemmings COL.5.01C
Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Human Rights. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students wanting to take GI423 but who are not part of a listed degree programme should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI423 is an interdisciplinary course with a high theory content, and it is important that students come to the course with appropriate skills.

Course content: ‘Globalisation and Sexuality’ explores the importance of sexuality for global politics and society. Starting from the assumption that ‘sexuality matters’ in today’s globalised world, the course considers histories, theories and contexts within which the role of sexuality is pivotal. Since sexual identities, rights and health are central to citizenship and to how nations and states relate to one another contemporarily, this course combines theory and case study to think through how as well as why sexuality has become so important. Students will be introduced to theories of sexual citizenship, homonationalism and homophobia, affectivity, sexuality and labour, sexual rights and pleasures, and use these to explore topics such as sex tourism, lesbian and gay asylum, abortion, sexual violence and sexual cultures globally. The course is interdisciplinary and takes a transnational approach to sexuality and globalisation. It has a high theory content and seminars are oriented around student discussions of readings in various ways. Students will join existing students taking the full unit GI422 for lectures, but will have separate seminars.

Teaching: 15 hours of lectures and 20 hours of classes in the LT. 15 hours of lectures preceded by seminars (1 hour each week). Limited numbers to 3 seminars.

Formative coursework: An abstract of the student essay (300 words) submitted on Friday of week 5, with written feedback; a detailed outline (up to 2000 words) of the essay to be submitted by Monday of week 9, with feedback in person through tutorial before the end of term.

Assessment: Essay (100%, 4000 words) in the ST. Final essay due Monday week 1 of summer term.

GI424  Half Unit
Gender Theories in the Modern World: An Interdisciplinary Approach
This information is for the 2015/16 session.
Teacher responsible: Dr Leticia Sabsay and Dr Sadie Wearing
Availability: This course is compulsory on the MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture and MSc in Gender, Policy and Inequalities. This course is available on the MSc in Development Studies. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course aims to enable students to: become familiar with the fullest range of gender theories with particular attention to the intersections of gender, sexuality and race; develop a critical appreciation of these different theories of gender; use gender theories to inform their appreciation of existing work in their own disciplines and in an interdisciplinary context; use the analysis of gender relations as a basis for case study evaluation and research. It is a half unit course which runs for 16 weeks. It begins with a review of the formative influences on the development of gender theory, including the sex/gender distinction, race and intersectionality, economics and production/reproduction, theories of difference and the implications for analysis of a variety of sites including political representation, psychoanalysis and its impact on considering aspects of the social. The second term extends these foundations by providing further grounding in questions of structure and agency, sexualities, masculinities and rights. The course considers the impact of gender analysis on key areas of social science investigation, and develops these with particular attention to location, ethics and the importance of global or transnational dimensions. Our expectation is that this course provides a thorough grounding for work across all other courses and for the dissertation module.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 7 hours and 30 minutes of lectures and 7 hours and 30 minutes of seminars in the LT.

The course is taught in 15 x one-and-a-half hour sessions, plus 15 x one-and-a-half-hour seminars. It is divided into blocks of related lectures and linked seminars.

Formative coursework: Timed exam to be written during the first term.

Assessment: Take home exam (100%) in the LT.

GI425  Half Unit
Women, Peace and Security
This information is for the 2015/16 session.
Teacher responsible: Dr Marsha Henry GI and Prof Christine Chinkin WPS
Availability: This course is available on the MSc in Conflict Studies, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in International
Relations and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. 

**Course content:** The course provides a critical examination of peace and security issues affecting women in a global world. In particular, the course is influenced by the focus of the UN Women Peace and Security (WPS) agenda from UNSCR 1325, 2000 onwards, which aims to prevent sexual and gender-based violence in conflict and post-conflict settings, through making visible the experiences of women who have often been obscured from political focus and denied legal or other redress. Consequently, the agenda sets out to increase the participation of women within both the processes of peace and reconstruction and in the security sector more generally. This course will examine these issues from a gender and feminist lens. 

The topics include: 
1) The Context of Women, Peace and Security; 
2) Definitions and Scope: Gender-Based and Sexual Violence in Conflict; (against whom? Where does it get committed? What forms of violence are sexual? The difference between sexual violence and gender-based violence; causes and in particular continuum of violence from ‘peacetime’ to conflict). 
3) The History Of WPS Laws And Policies: From 1325 To The Prevention Of Sexual Violence Initiative (PSVI); Issues raised by WPS resolutions: gender balance and gender mainstreaming; participation (agency); protection, training and vetting military, institutional reforms; accountability. 
4) Academic and Practitioner Critiques and Responses to WPS Agenda; 
5) Impunity for GBV and SGBV in Conflict: Social and Legal Issues; 
6) Accountability; (obstacles to accountability; state and individual responsibility; relevant violations of international law; appropriate legal and non-legal fora; reparations and sanctions). 
7) International Intervention: Exacerbation or Dissolution; (issues of prevention, peacebuilding and representation). 
8) Protection and Enforcement; Engendering Institutional Change: training and security sector reform at state and international levels; 
9) Practical Case Studies (Guest Lecture) 
10) Humanitarianism: Role of Civil Society and Philanthropy (Guest Lecture) 

**Teaching:** 15 hours of lectures and 10 hours of seminars in the LT. Students will have a reading week in Week 6 in line with departmental policy. 

**Formative coursework:** Students will be expected to produce 1 essay in the LT. 

**Indicative reading:** Readings will be assigned from academic publications and primary materials, for instance, UN documents relating to the adoption of the WPS Security Council resolutions and SC debates on the subject; reports of expert bodies such as the Secretary-General’s Special Representative on Sexual Violence in Conflict; jurisprudence from the International Criminal Courts. 

**Assessment:** Essay (100%, 4000 words) in the ST. Summative assessment to be submitted in the first week of ST.
State and the Market, OUP (2004), R Baldwin, M Cave and M Lodge, Understanding Regulation, OUP (2nd ed 2011); D Helm & T Jenkinson, Competition in Regulated Industries, OUP (1998); M Thacher, Internationalisation and Economic Institutions, OUP (2009).

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period. Essay (25%) in the ST.

Consists of two parts: (i) a two-hour unseen written examination in the ST accounting for 75% of the marks; (ii) a single essay for assessment to be submitted by the end of the first week of the ST.

---

**GV408  Half Unit  
Contemporary Disputes about Justice**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Katrin Flikschuh CON6.08

**Availabilty:** This course is available on the MSc in Human Rights and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.

**Pre-requisites:** None, though some previous exposure to normative political theory may be an advantage.

**Course content:** The course offers a critical analysis of some of the debates about distributive justice following the publication of John Rawls’ A Theory of Justice in 1971. The first part of the course focuses on Rawlsian and post-Rawlsian methods of normative justifications in relation to (distributive) justice in general and on the problematic extension of Rawls’ domestic theory of justice to the global domain. Particular attention will be paid to the way in which liberal advocates of global justice introduce and deal with issues of scope methodologically and substantively. The second part of the course considers non-Western perspectives on and relating to global normative thinking, focusing in particular on modern African philosophical thought. We shall consider the philosophical distance between Western liberal and modern African thinking on issues concerning society and the state, human rights, the global economic context, and specific institutional challenges faced by post-colonial societies. We shall ask whether there are or can be genuine points of contact between Western and modern African political thinking.

**Teaching:** 20 hours of seminars in the MT.

There will be a reading week in week 6 of the MT for private study and formative/summative assessment preparation.

**Formative coursework:** All students are expected to submit one non-assessed essay of up to 2500 words, which will be marked and commented on but does not count towards formal assessment of this course.

**Assessment:** Essay (100%, 5000 words).

---

**GV427  Half Unit  
Democracy in East and South Asia**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Chun Lin CON3.10

**Availability:** This course is available on the MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction. You will be expected to provide a rationale setting out your motivations for selecting this course via the LSE for You system.

**Course content:** The course is concerned with recent political development in South and East Asia in their historical and international contexts (Southeast Asia is covered by other courses). We are in particular interested in exploring how and why the idea of democracy has evolved and contested in various forms, patterns and political movements in the region, catalyzing further social and institutional changes and, in some cases, regime transformation. We look at how democracy as a dynamic political project has interacted with forces of market, nationalism, modernization and globalization, with class, gender, ethnic, religious, and spatial identities, and with diverse local and cultural traditions. We examine conflicts, crises and uncertainties in political ideologies and policy processes relevant to the competing interpretations and alternative conceptions of democracy. Comparatively tracing contemporary developments in the region, we learn how democracy in theory and practice is informed by discursive struggle, contentious politics, social movements and newer information technology; and why democracy must be studied historically and critically. At the end of the course, students are expected to be familiar with contemporary politics in South and East Asia, competent in discussing at least two country cases with detailed historical-empirical knowledge, and adapted to writing with a measure of disciplinary fluency in social sciences.

**Teaching:** 27 hours and 30 minutes of seminars in the LT.

This course will be taught in Lent Term, constituting 10 weeks of 2.5 hour seminars and one reading week (week 6 of the LT) for essay preparation and learning support activities.

**Formative coursework:** One seminar presentation and one 1,500-word essay.

**Assessment:** Essay (100%, 4000 words).

---

**GV432  Half Unit  
Government and Politics in China**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Chun Lin CON3.10

**Availability:** This course is available on the MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction. You will be expected to provide a rationale setting out your motivations for selecting this course via the LSE for You system.
Course content: Historical and international conditions and domestic contradictions of economic, social and political transformations in the People’s Republic of China; their rival explanations and interpretations. Often in comparison with other postcommunist transitions, other Asian states and other developing countries, discussions of China will cover its historical and international contexts, geopolitics and political demography, central and local state power, central-local relations, and semi-federalism; bureaucracy as tradition and as invention; political economy and market transition and broader liberalisation and global integration; social structure and organisation, and class, ethnic, and gender relations; ideology, culture and cultural politics, issues concerning democracy and legitimacy; nationalism, “one country, two systems”, and the Taiwan question; and China’s military, foreign relations, and changing global position.

Teaching: 27 hours and 30 minutes of seminars in the MT. This course is offered in MT, constituting 10 weeks of 2.5 hour seminars and one reading week (week 6 of the MT) for essay and learning support activities.

Formative coursework: Students are required to give at least one seminar presentation, and to write one 1,500 word essay.

Indicative reading: M Meisner, The Deng Xiaoping Era (1996); B Womack, Contemporary Chinese Politics in Historical Perspective (1999); C Bramall, Chinese Economic Development (2008); D Shambaugh, China’s Communist Party (2008); C K Lee, Against the Law (2007); S Heilman & E Perry (eds), Mao’s Invisible Hand (2011); M Leonard (ed), China 3.0 (2012); V Goossaert and D Palmer, eds. The Religious Question in Modern China (2011)

Assessment: Essay (100%, 4000 words).

GV439 Half Unit
Government and Politics in Central and Eastern Europe

This information is for the 2015/16 session.

Teacher responsible: Dr Vesselin Dimitrov CON 3.06
Availability: This course is available on the MSc in Comparative Politics, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides an analytical assessment of the transition from communism to liberal democracy in Central and Eastern Europe and integration with the European Union, including the Eurozone. It offers an in-depth analysis of institutions, party systems, government and public administration, nationalism, and EU integration, including the Eurozone. Topics covered include: The Communist system. Constitution-making and the development of democratic party systems. Reform of executive institutions and public administration. (Mis)management of ethnic conflict: the case of Yugoslavia. Integration with the European Union, including the Eurozone.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT. 2 hours of seminars in the ST. There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: Students are required to produce two essays.

Indicative reading: V Dimitrov, K H Goetz and H Wollmann, Governing after Communism: Institutions and Policymaking; A Przeworski, Democracy and the Market; H Grabbe, The EU’s Transformative Power: Europeanization through Conditionality in Central and Eastern Europe, J Elster et al, Institutional Design in Post-Communist Societies; R Taras (Ed), Postcommunist Presidents; R Crampton, Eastern Europe in the Twentieth Century, 2nd edn; G Schofflin, Politics in Eastern Europe; S White, J Batt & P Lewis (Eds), Developments in Central and East European Politics 3.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GV441 Half Unit
States and Markets

This information is for the 2015/16 session.

Teacher responsible: Dr David Woodruff CON 3.17
Availability: This course is available on the MSc in Comparative Politics, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit. Priority for MSc Comparative Politics students.

This course is capped at 3 groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction. Applications to take the course do not need to include a statements regarding motivation and background, as decisions will be made on mechanical grounds explained at the first lecture.

Course content: To introduce politics students to basic economic theorising; to discuss the nature of markets; review contemporary discussions regarding the role of the state in the economy; provide a comparison of the relationship of states and markets in different political settings and historical contexts. Topics: The state and the institutional foundations of markets; states and markets in the Great Depression; domestic and international monetary institutions; varieties of capitalism and change in varieties of capitalism; economics and politics of market bubbles; politics and policy in the financial crisis of 2007-2009; the Eurozone crisis.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: All students are expected to submit one non-assessed essay.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

GV442 Half Unit
Globalisation and Democracy

This information is for the 2015/16 session.

Teacher responsible: Dr Sarah Goff CON 4.11
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Comparative Politics, MSc in Empires, Colonialism and Globalisation, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in Management, MSc in Management (CEMS MIM) and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups - access to the course guaranteed for MSc Global Politics and MSc Global Politics Civil Society. The deadline for receipt of applications is Friday, 2 October 2015. In your application on LSE4U, please state your MSc programme and...
(briefly) your reason for taking the course.

Course content: The contemporary debate about globalization raises profound questions about the changing nature and form of politics today. This course examines two dimensions of the debate: the impact of various forms of globalization on democratic and democratizing states, and the prospects for the democratization of global politics.

The course covers the following topics: 1) how democracy can be understood as a concept, and what makes democracy valuable; 2) how democracy within states, both in affluent and developing countries, is affected by various dimensions of globalization, notably international trade and financial flows, migration, and international institutions; and 3) whether and how global politics can be made more democratic, including an examination of the roles played by international organizations, transnational civil society, and novel governance initiatives.

Teaching: 20 hours of seminars in the MT. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: Students will produce one 2,000 word essay.

Assessment: Essay (100%, 5000 words).

GV443 Half Unit
The State and Political Institutions in Latin America

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Panizza CON 5.12

Availability: This course is available on the MSc in Comparative Politics, MSc in Global Politics and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

For MSc Comparative Politics, MSc Global Politics, MSc Media, Communication and Development and MPA Programme (all streams) and other graduate students may follow the course with permission from the course convenor.

Course content: This is a course on contemporary Latin American politics. Its aim is to study the principal institutions and forms of organization influencing politics in the region since transition to democracy in the 1980s. Although due attention is given to country differences, the course approaches the study of politics in the region thematically rather than on a country by country basis.

At the end the course students should have a good understanding of the working of the region’s formal and informal political institutions, including the state, accountability and the rule of law, presidentialism, populism, political parties, civil society and popular movements, human rights, crime and the "unrule of law" and the condition of democracy in the region. Focus on plurality of theories and frameworks of analysis with the aim of developing skills for independent analysis of the advances and setbacks of democracy in the region.

Teaching: 11 hours of lectures and 16 hours and 30 minutes of seminars in the MT.

Lectures will run from week 1 - 10 in MT. There will be a revision lecture in week 11 of MT. 1 organization seminar on week 1, 10 seminars on weeks 2 -11 of the MT.

Formative coursework: All students are expected to submit one non-assessed essay.

Assessment: Exam (75%, duration: 2 hours) in the LT week 0. Essay (25%, 3000 words).

GV444 Half Unit
Democracy and Development in Latin America

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Panizza CON 5.12

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Comparative Politics, MSc in Global Politics and MSc in Global Politics (Global Civil Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

Other postgraduate students may follow the course with permission.

Course content: The course studies the relations between democracy and economic reform in contemporary Latin America. It starts mid-point through the period under study, in 1994, when there was a strong consensus about the mutually reinforcing benefits of liberal democracy, free market economics and hemispheric trade integration. It then traces back the origins of this consensus to the 1980s and discusses how it was generated by looking at the role of ideas, interests and institutions in processes of economic change. The second part of the course looks at the backlash against free market economics (also known as neoliberalism) and the rise of the left in the early 21st century as an alternative to neoliberalism. The final three sessions look at the social and economic transformation of the region in the 21st century, including the impact of the commodity boom, the rise of a new middle class and the increasing importance of economic relations from China and other Asian countries.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in week 6 of the LT for dissertation preparation and advice.

Formative coursework: All students are expected to submit two non-assessed essays and make at least one seminar presentation.

GV450  Half Unit  European Politics: Comparative Analysis
This information is for the 2015/16 session.
Teacher responsible: Dr Vesselin Dimitrov CON 3.06
Prof Michael Bruter, Prof Simon Hix, Dr Lukas Obholzer, Dr Eiko Thielemann
Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po) and MSc in European Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course is intended to provide students with a systematic introduction to central conceptual and theoretical debates in the comparative analysis of politics and government in Europe. The core syllabus focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as European identity, immigration, Central banks, and Europeanisation. The course takes a thematic approach and places particular emphasis on the diverse experiences of liberal democracy in individual European countries.
The main themes addressed include: European models of government; elections and electoral behaviour; party systems and representation; executive-legislative relations; courts and central banks; European identity; immigration; European integration and domestic institutional change.
Teaching: 10 hours of lectures and 18 hours of seminars in the MT. There will be a reading week in week 6 of the MT for private study and assessment preparation.
Formative coursework: All students are expected to submit one formative essay and make one seminar presentation.
Assessment: Essay (100%, 3000 words).

GV465  Half Unit  War, Peace and Politics of National Self-Determination
This information is for the 2015/16 session.
Teacher responsible: Prof Sumanta Bose CON-407
Availability: This course is available on the MSc in Comparative Politics, MSc in Empires, Colonialism and Globalisation, MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Human Rights. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority consideration will be given to students taking the MSc Comparative Politics and the MSc Global Politics. Students on other programmes (including MSc Human Rights, MSc Empires, Colonialism, Globalisation, MSc International Relations and MA/MSc History of International Relations) are welcome to apply and will be admitted subject to availability of space. Students on all programmes are required to obtain permission from the teaching department to take this course.
This course is capped at 4 groups, and admission cannot be guaranteed. ALL interested students must apply online via LSEForYou (LFY) as per the stipulated procedure and by the deadline which is Wednesday 30th September 2015. Students should write a brief, one-paragraph rationale for wishing to take the course in the application.
Course content: This course examines some of the most intractable and violent disputes over sovereignty and national self-determination in the world today, and inquires into the prospects of moving from war to peace through accommodation and compromise. The conflicts studied are drawn from the Middle East (Israel and Palestine), South Asia (Kashmir, Sri Lanka), the Balkans (former Yugoslavia and within it, Bosnia-Herzegovina and Kosovo) and the EU area (Northern Ireland, Cyprus). Students are exposed to the specific histories and contexts of these cases but are also encouraged to think comparatively across countries and regions. The course materials are online on Moodle, the LSE’s electronic teaching and learning system.
Are disputes arising from conflicting claims to national self-determination inherently of a zero-sum nature, or can they be
resolved? If the latter, how? What factors drive conflict at the local level? Which sorts of institutional arrangements might be able to anchor peace settlements? Can we draw useful comparative lessons from the experience of peace processes that have sought or seek to craft solutions to this type of conflict in diverse parts of the contemporary world? What roles can international actors—influential and/or interested foreign states, regional alliances of states, multilateral institutions—play in such processes and their outcomes?

Teaching: 15 hours of lectures and 9 hours of seminars in the MT. Ten lectures and nine seminars in the MT. The first lecture is a set-up and introductory session and lasts two hours. The other nine lectures are 1.5 hours each. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: Students will be required to prepare and make one seminar presentation and write one unassessed essay of 1,500 words.

Assessment: Research project (100%).

GV476  Half Unit  Not available in 2015/16

Twentieth Century European Liberal Thought

This information is for the 2015/16 session.

Teacher responsible: Prof Chandran Kukathas

Availability: This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po) and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will be capped at one class with a maximum number of 15 students.

Course content: The course will critically examine the ideas of a selection of twentieth century European Liberal Thinkers including Isaiah Berlin, Karl Popper, F.A. Hayek and Michael Oakeshott.

Teaching: 20 hours of seminars in the LT.

Formative coursework: One 1500 word essay.

Assessment: Essay (100%, 5000 words).

GV477  Half Unit  Comparative Public Policy Change

Comparative Public Policy Change

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Heims

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for receipt of applications will be between Friday 24 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.

Pre-requisites: Students should normally be taking GV4E9 Approaches and Issues in Public Policy and Administration or already have a good knowledge of comparative public policy. Waiving of these requirements will be at the discretion of the course teacher.
Course content: The course examines explanations of policy change using cross-national comparison. The course will focus on cases in key policy domains (chosen according to the literature available and interest for wider analytical questions, as well as the expertise available), but in the examination and assessed essay, any set of (2) countries can be used as examples. Key topics include: theoretical approaches to comparison and policy change; neo-liberalism; privatisation; regulatory reform; varieties of capitalism; the changing size and role of the state.

Teaching: 3 hours of lectures and 22 hours of seminars in the LT.

Formative coursework: Students will write one unassessed essay during the term.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words).

GV478
Political Science and Public Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Rafael Hortalá-Valve CON4.16

Availability: This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In this course we develop tools to analyse important political phenomena including elections, legislative bargaining, lobbying, bureaucracy, civil conflict, and international relations. We focus on game theory as a way of understanding strategic interactions among political actors. Students will learn basic game theoretical concepts and apply them to a variety of political contexts; these tools should be useful both for explaining existing political outcomes and for designing interventions to achieve desired future outcomes.

Teaching: 22 hours of lectures and 15 hours of seminars in the MT. 22 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will complete formative problem sets during the course.

Indicative reading: Analysing Politics by Shepsle and Bonchek (W.W. Norton, 1997) provides an excellent starting point and can be used as the main reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Essay (20%, 2000 words).

Other (20%) in the MT and LT.

The 20% ‘other’ assessment is four application exercises carried out in groups.
GV481   Half Unit
Political Science and Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Valentino Larcinese

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available as an outside option to students on other programmes where regulations permit. Open to all MSc students in the Department of Government.

Course content: This course examines public policy formation, political processes and political institutions. The emphasis is on introducing some key formal models to simplify and analyze broad classes of situations. Students are not only expected to be familiar with these models but also to be able to use them to solve problems of a technical nature. The course will also emphasize rigorous empirical testing of formal models. We will focus on collective action, voting, elections, interest groups, legislative organization, political agency and bureaucracies.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of seminars in the ST.

Formative coursework: Two problem sets. Two additional optional problem sets can also be submitted.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

GV482   Half Unit
Political Science and Political Economy: Advanced Topics

This information is for the 2015/16 session.

Teacher responsible: Dr Valentino Larcinese

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should either have attended GV481 or be able to show a sufficiently strong background in political economy and in statistics in order to take this course.

Course content: This course presents cutting-edge research material on some specific topics. The topics vary each year and, in the past, have included identification and causality in empirical research, mass media and voting behaviour, the design of electoral systems, text analysis, the repeal of corn laws, deliberation and political processes and political institutions. The emphasis is on introducing some key formal models to simplify and analyze broad classes of situations. Students are not only expected to be familiar with these models but also to be able to use them to solve problems of a technical nature. The course will also emphasize rigorous empirical testing of formal models. We will focus on collective action, voting, elections, interest groups, legislative organization, political agency and bureaucracies.

Teaching: 22 hours of seminars in the LT. 2 hours of seminars in the MT.

Formative coursework: Students are expected to give at least one presentation and to submit a piece of formative work (problem set/ essay)

Indicative reading: Mostly journal articles. The reading list varies each year.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words).

---

GV483   Half Unit
Public Management Theory and Doctrine

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Management and Strategy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulations. This course is available with permission as an outside option to students on other programmes where regulations permit. Other postgraduates require permission of teachers responsible.

Course content: The course offers an intensive introduction into key areas of public management with reference to both developed and lesser developed world contexts. Topics include administrative doctrine, implementation, organizational change and inertia, capacity building, performance-management, leadership, institution creation, transparency and risk management. Public management is treated as an interdisciplinary field of study, with a particular emphasis on the administrative practices and change as well as the critical analysis of practical arguments about Public Management.

Teaching: 10 hours of lectures, 15 hours of seminars and 2 hours of help sessions in the MT.

Formative coursework: Students are expected to complete two formative essays.

Assessment: Essay (100%, 3000 words).

Students are required to answer one question from a selection of three. Week 11 in MT will be used for individual advice sessions.

---

GV488   Half Unit
Law and Politics of Regulation

This information is for the 2015/16 session.

Teacher responsible: Prof Gordon Baldwin NAB 7.08, Prof Julia Black NAB 7.09, Prof Martin Lodge CON 3.08 and Dr Eva Heims

Availability: This course is compulsory on the MSc in Regulation. This course is not available as an outside option.

This course is capped at one group. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.

Course content: The course aims to give students an essential grounding in theories of regulation encountered in the legal, political science and law and economics literatures. It examines competing explanations of the origins, development and reform of regulation; the styles and processes of regulation; issues surrounding enforcement; the inter-organisational and international aspects of regulation; and questions of evaluation and accountability. Some specific cases will be explored through the medium of an additional practitioner seminar series, which will be led by experienced practitioners invited on a one-off basis. The course focuses on the following key themes: contrasting perspectives on regulation, differences in regulatory styles, dynamics and processes, regulatory standard-setting, regulatory enforcement, evaluating regulation.

Teaching: 22 hours of seminars and 8 hours of seminars in the MT. 22 hours of seminars and 10 hours of seminars in the MT. 2 hours of seminars in the ST.

The course is taught: (a) by 22, two-hour sessions in variable format (some lecture-discussions, student-paper led discussions, debates, preparation for the dissertation) comprising the academic core,
GV498  Half Unit  Not available in 2015/16

Multiculturalism

This information is for the 2015/16 session.

Teacher responsible: Dr Leigh Jenco CON4.13

Availability: This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in International Migration and Public Policy and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This seminar explores the political and epistemological issues of multiculturalism, broadly understood, in contemporary political theory. After deciding on a tentative definition for “culture,” we will explore how and why the concept has become so integral to normative theories of contemporary political life. In particular, we will focus on how increasing recognition of plurality within liberal democratic regimes has led to new theories of both culture and community. Along the way, we will consider normative questions such as: Should we encourage “global citizenship,” or should we celebrate the local and the national? If cultures are dynamic and hybrid entities, how can they be identified and protected politically? Are there significant and legitimate differences between “the West” and “the rest”—and if so, how must our interpretive approach change as we include voices from culturally diverse groups into already-established political communities?

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students are invited to write one 2000 word formative essay, due no later than week 10.

Indicative reading: Will Kymlicka, Multicultural Citizenship, Brian Barry, Culture and Equality, Chandran Kukathas, The Liberal Archipelago, Iris Young, Justice and the Politics of Difference, Homi Bhabha, The Location of Culture.

Assessment: Essay (100%, 5000 words) in the ST.

GV499  Dissertation

This information is for the 2015/16 session.

Availability: This course is compulsory on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics, MSc in Political Science and Political Economy, MSc in Political Theory, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is not available as an outside option.

Course content: A 10,000 word dissertation is required to be submitted as part of the assessment for each Government MSc programme. The dissertation is due by 5pm on 25 August and is compulsory.

Assessment: Dissertation (100%, 10,000 words) in August.

GV4A2  Half Unit  Not available in 2015/16

Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Bruter CON406

Availability: This course is available on the MRes Political Science, MSc in EU Politics, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Media and Communications (Data and Society), MSc in Political Science and Political Economy, MSc in Politics and Communication, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for receipt of applications is Monday, 20 October 2014. Note that students from Masters or Doctoral programmes not listed above may still take the course subject to approval by the course convenor.

Pre-requisites: In order to be accepted on the course, all students must submit a research project idea by Monday, 20 October 2014. The document should be around 2 pages in length and should at least do two things: first, indicating a course-related research topic and a specific research question and explain what makes it interesting, and second suggesting the methodology the student intends to use to answer this question empirically. If you include references to others’ work (which would be a good thing to do), please also include a mini-bibliography.

Course content: This course intends to familiarise students with the study of electoral psychology and political behaviour in Europe in a broad sense. The three main objects of study in political science are institutions, policies, and citizens, and the study of political behaviour and political psychology is the field that centres on the third. A very important part of political behaviour is electoral participation and vote choice. We will explore general models of voting behaviour, electoral psychology, and participation, as well as specific aspects such as extremist politics. We will look closely at public opinion, how it is formed and how it can be studied. In the final part of the course, special consideration is given to political identities and how they are related to political behaviour.

Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Assessment: Project (100%, 5000 words) in the ST. One empirical research project on a topic relevant to the course and approved by the course co-ordinator with a word limit of 5,000 words (100%).
GV4A3  Half Unit
Social Choice Theory and Democracy
This information is for the 2015/16 session.
Teacher responsible: Dr Joseph Mazor
Availability: This course is available on the MSc in Applicable
Mathematics, MSc in Political Science and Political Economy and
MSc in Political Theory. This course is available as an outside option
to students on other programmes where regulations permit.
Pre-requisites: No prior knowledge of political theory, social choice
theory, or of any specific mathematical discipline is required.
Course content: This course provides an introduction to the
current debates in democratic theory. The course also introduces
students to key social choice theorems, such as Arrow’s Impossibility
Theorem. Responses to these theorems from the normative
democratic theory literature are explored. The course covers central
debates in contemporary democratic theory, including deliberative
versus aggregative democracy, the plausibility of epistemic
justifications for democracy, the problems of democratic citizenship,
and the threat of tyranny of the majority. While all students are
required to understand the key social choice theorems introduced in
the course, the focus will be on the implications of these theorems
for normative democratic theory rather than their mathematical
details.
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the
ST.
There will be a reading week in week 6 of the LT for private study
and assessment preparation.
Formative coursework: Students will be expected to write a
formative essay. Feedback will be given on this essay, but it does
not count towards final assessment. Students will also have the
option to submit an outline for the assessed essay for comments.
The outline itself will not be assessed.
Choice Theory and Constitutional Democracy”, Chapter 7; Cohen,
and Disagreement; Christian List (2006), “The Discursive Dilemma
Assessment: Exam (67%, duration: 2 hours) in the main exam
period.
Essay (33%, 2500 words).

GV4A4
The Politics of Globalization
This information is for the 2015/16 session.
Teacher responsible: Dr Mathias Koenig-Archibugi
Availability: This course is compulsory on the MSc in Global
Politics. This course is available with permission as an outside option
to students on other programmes where regulations permit.
Students on the MSc Global Politics are guaranteed access.
Course content: This is the core course of the MSc Global Politics.
It examines the nature, the causes and the political consequences
of globalization in a variety of domains, including security, culture,
the economy, and the environment. The course aims at enabling
students to assess the extent of continuity and transformation in key
areas of global politics.
The course content will cover the following topics though specific
lecture titles may change from year to year: the contemporary
debate about globalisation; changes in the nature of military
power and war; the evolution of global economic governance; the
globalization of migration and environmental concerns; the role
of global intergovernmental and nongovernmental organizations;
the nature of US power in the contemporary global order; and core
issues of global ethics, citizenship and governance.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
10 hours of lectures and 15 hours of seminars in the LT. 1 hour and
30 minutes of seminars in the ST.
3 additional lectures and 3 seminars in the LT on writing a global
politics dissertation.
There will be a reading week in week 6 of the MT and LT for private
study and assessment preparation.
Formative coursework: All students are expected to produce two
written essays plus two short presentations on topics assigned to
them.
Indicative reading: Held, D. and McGrew, A. Globalization/Anti-
Globalization, second edition, Cambridge, Polity 2007; P. Hirst, G.
Thompson and S. Bromley, Globalization in Question. 3rd edition,

A reading list with further readings will be provided at the
beginning of the teaching term.
Assessment: Exam (50%, duration: 2 hours) in the main exam
period.
Essay (50%, 4000 words).

GV4A5  Half Unit
International Migration and
Immigration Management
This information is for the 2015/16 session.
Teacher responsible: Dr Eiko Thiellemann CON3 14
Availability: This course is compulsory on the MSc in International
Migration and Public Policy. This course is available on the MSc in
Comparative Politics, MSc in EU Politics, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Political Economy of Europe and MSc in Public Policy and Administration. This course is available within the Department or MSc programme) obtain permission from the teacher responsible via the ‘LSE For You’ capped course management system. This course is capped at 2 groups. The deadline for receipt of applications is Friday, 2 October 2015.
Course content: This course offers a theoretically informed account
of the challenges posed by international migration and resulting
policy responses. The focus is on the comparative analysis of
immigration control policies in OECD countries.
The course is structured in three parts. The first introduces a
number of theoretical models that seek to explain the dynamics of
international migration, migration control and migrant integration,
addressing questions such as: Why do people migrate? Why do
states accept migration? The second, comparative part deals with
national public policy responses to the issue of asylum & refugees,
‘illegal’ migration & human trafficking (and) immigration. The final part focuses on the analysis of multilateral policy initiatives on migration management at the global, regional and bi-lateral level.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the LT. There will be a reading week in week 6 of the MT for advice and feedback sessions.

**Formative coursework:** All students are expected to submit two non-assessed essays.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GV4A8**  Half Unit

**Nationalist Conflict, Political Violence and Terrorism**

This information is for the 2015/16 session.

**Teacher responsible:** Prof James Hughes CON5.05

**Availability:** This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students from other programmes may gain access subject to space. Preference is given in the first instance to Conflict Studies students, and then, if there is space, to Global Politics students. This course is capped at three groups and requires students (regardless of Department or MSc programme) to apply via the department's capped course process. The deadline for receipt of applications will be between Wednesday 1 and Monday 12 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.

**Course content:** How can we distinguish legitimate resistance and political violence from terrorism? What is the relationship between war and terror? What distinguishes a combatant from non-combatant? Do counterinsurgency methods based on force and war undermine legitimacy? How can we distinguish cooption, policies of criminalization, and the balance between security and liberty? Secondly, it explores the key issues and debates through a number of case studies that analyse political violence and terrorism in democracies and non-democracies, including the insurgency and counterinsurgency in Northern Ireland and Iraq, and the new transnational challenges posed by Al Qaeda and ISIS. Throughout the course comparisons will be made and lessons drawn from the performance of different regime types (colonial, democratic, transitional democratic, and authoritarian) in managing political violence. This is a Moodle course.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the LT. There will be a reading week in week 6 of the MT for private study and assessment preparation.

**Formative coursework:** One essay of 2,500 words. Students will also contribute to a group presentation.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GV4B3**  Half Unit

**MPA Capstone Project**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

**Course content:** Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.

**Teaching:** 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT. Each Capstone seminar is 1.5 hours and consists of four main sessions: (1) introduction and orientation; (2) case study of the organization with a focus on the research goal of the Capstone project; (3) discussion of the research goal and development of the theory of change; and (4) presentation of the work done so far and review of the research goal and development of the theory of change. The course is taught by the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other

---
members of staff may also advise as required.

**Formative coursework:** Feedback will be provided on presentations of work-in-progress during MT and LT.

**Assessment:** Project (100%, 15,000 words) in the LT. The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.

2) 50% of the overall mark is given by two academic readers upon submission of the project report; and

3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group’s work to be submitted individually and separately from the report.

---

**GV4B4**

**MPA Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Babken Babajanian SAR.G.03

**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

**Course content:** The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or qualitative research.

**Teaching:** 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

**Assessment:** Dissertation (90%, 10,000 words) in the ST. Other (10%) in the MT.

1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, and implications which will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

---

**GV4B6**

**Half Unit**

**Kant’s Political Philosophy**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Katrin Flikschuh CONG.08

**Availability:** This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po) and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Optional for MSc Political Theory, MSc European Studies: Ideas and Identities and LSE-Sciences Po Double Degree in European Studies; open to others as an outside option on request.

**Pre-requisites:** None, though an appetite for abstract philosophical thought will be an advantage (however, no previous experience is required)

**Course content:** An introduction to and critical appraisal of Immanuel Kant’s political philosophy. Despite the enormous influence which Kant’s moral philosophy has exerted on debates in contemporary liberal thinking, his political philosophy has until recently been largely ignored. This is beginning to change: Kant’s political philosophy is beginning to be studied in its own right. Such study shows that his political thinking diverges in many of its central aspects from contemporary liberal thinking: the impact of Kant’s thought upon the latter must, therefore, be re-assessed. Through close reading and analysis of the primary texts, this course introduces students to Kant’s distinctive approach to political thinking. Core texts will include selected passages from the Doctrine of Right (Part 1 of the Metaphysics of Morals); Kant’s celebrated essay, ‘On Perpetual Peace’; and his less well known, but no less
important essay ‘On the Common Saying: “This may be true in theory, but does it work in Practice”’. The analytic and substantive focus will be on three interrelated themes: Kant’s idea of freedom as an idea of reason; his account and justification of individual property rights and related conception of state authority; and his cosmopolitan liberal conception of justice. Although the analytic and philosophical focus will be on Kant’s own political thinking, we shall compare and contrast Kant’s position with contemporary Kantian liberalism wherever appropriate.

**Teaching:** 20 hours of seminars in the LT.

Additional one-to-one advice sessions on assessed essay writing in ST.

There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** Students are expected to come well prepared and take an active role in seminar discussion. Students are expected to write one formative essay (of up to 2500 words). These will be marked and commented, but do not count towards formal assessment for this course.

**Indicative reading:**

**Assessment:** Essay (100%, 5000 words).

---

**GV4B7** Half Unit

**The Liberal Idea of Freedom**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Laura Valentini

**Availability:** This course is available on the MSc in Human Rights and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.

**Pre-requisites:** Basic familiarity with concepts and methods in normative political theory.

**Course content:** The concept of freedom is often invoked in political life. Many policies and broader political agendas are justified in its name. In fact, an entire political ideology, ‘liberalism’ (arguably the dominant one in the Western world) appears to be built around the idea of freedom. But what, exactly, does freedom mean? Is freedom best understood in terms of absence of interference or in terms of non-domination? Is one made unfree only when one’s rights are violated? Does poverty constitute a constraint on freedom? And could citizens of an authoritarian regime be described as free?

In the first part of the course, we will address these questions by analysing different conceptions of freedom, including negative freedom, positive freedom, republican freedom and freedom understood in terms of capabilities. In doing so, we will explore the work of prominent contemporary political thinkers such as Isaiah Berlin, Charles Taylor, Philip Pettit, Robert Nozick and Amartya Sen. In the second and third part of the course, we will turn to substantive debates surrounding: (i) the value of freedom and how this relates to other liberal values (e.g., equality, security) and (ii) specific liberal freedoms (e.g., freedom of conscience, freedom of speech, freedom of association, freedom of movement etc.). We will address questions such as: Why is freedom valuable? Are there good reasons to curtail freedom for the sake of equality or security? What types of speech may be legitimately outlawed by the state? What justifies freedom of movement, and what constraints might be permisibly placed on it? Might membership in certain associations be denied to those who belong to particular groups (e.g., women on ‘freedom of association’ grounds)?

The overall aim of the course is to allow students to critically assess the quality and strength of different theorists’ conceptions of freedom and to deploy those conceptions in the analysis and justification of the particular freedoms defended by the liberal state.

**Teaching:** 20 hours of seminars in the LT.

Two-hour sessions in the LT are comprised of a 90-minute class discussion and a 20-minute lecture.

There will be a reading week in week 6 of the LT for advice and feedback.

**Formative coursework:** All students are expected to submit one formative (non-assessed) essay.

**Indicative reading:**

**Assessment:** Essay (100%, 4000 words).

The extended essay will be based on a topic examined in the course.

---

**GV4B8** Half Unit

**Contemporary Civil Wars: Comparative Case Studies**

This information is for the 2015/16 session.

**Teacher responsible:** Dr William Kissane CON5.06

**Availability:** This course is available on the MSc in Comparative Politics and MSc in Conflict Studies. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines social science explanations of the origins, intractability and outcomes of civil wars. It does this through the comparative analysis of various cases. These cases may vary from year to year. Particular stress is on: The Concept of Civil War. Patterns of civil war since 1945. Large N approaches. Decolonisation, Democratisation, and State-Building as causes of civil war. The emergence of security dilemmas. Theories of conflict resolution, reconstruction and the settlement of civil wars.

**Teaching:** 15 hours of lectures and 10 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in week 6 of the LT for private study and assessment preparation.

**Formative coursework:** All students are expected to submit two non-assessed essays.

**Indicative reading:**
- P Collier and N Sambanis (eds) Understanding Civil War: Evidence and Analysis (The World Bank); C Cramer, Civil War is not a Stupid Thing (Hurst and Co); K Holsti, War the State and the State of War (Cambridge University Press), R Paris, At War’s End (Cambridge University Press).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GV4B9** Half Unit

**The Second Europe**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Vesselin Dimitrov CON 3.06

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in EU Politics, MSc in EU...
Politics (LSE and Sciences Po), MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities and MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course explores the problems of delayed modernisation, problematic democratisation, conflictual nation-building and geopolitical insecurity in the European semi-periphery, including countries such as Russia, Poland, Spain, Italy, Austria-Hungary, and Sweden. It analyses the socio-economic structures, political issues and problems shared by the European semi-periphery from the first wave of liberal globalisation and the emergence of mass politics in the late 19th century to European integration in the early 21st century. It analyses the strategies adopted by political elites and social classes in the face of modernisation, imperial decline, nationalism, and war.

Course topics include: The emergence of core and semi-periphery in Europe; Problems of modernisation; Ruling elites and structures of power; State nationalism, sub-state nationalism and problems of nation-state building; Religion: the socio-political power of the church; Political parties and ideologies; Fascism and varieties of right-wing authoritarianism in the 1920s and 1930s; Communism; Empire and EU integration; War and its effects, including the First and Second World Wars.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students are required to submit one formative essay of 2,000 words.

Assessment: Exam (75%, duration: 2 hours) in the main exam period. Essay (25%, 2500 words).

GV4C2 Half Unit
Globalization, Conflict and Post-Totalitarianism

This information is for the 2015/16 session.

Teacher responsible: Dr Elisa Randazzo, Prof Mary Kaldor 5OL2.06 and Dr Vesna Dzelilovic 5OL1.06

Availability: This course is available on the MSc in African Development, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit. The students of MSc in Conflict Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), and MSc in Comparative Politics have priority access to the course in the listed order. This course has limited availability (is capped), and requires that students (regardless of Department or MSc programme) obtain permission from the teacher responsible. It is capped at 2 groups. The deadline for receipt of applications is Friday 2 October 2015.

Course content: The course offers a theoretically informed account of the challenges faced by post-totalitarian transition countries emerging out of totalitarian regimes in the era of globalisation, and examines them empirically in reference to examples from the Balkans, the Caucasus and the Middle East. The regions chosen are those which have experienced particular difficulties in effecting a peaceful process of transition to democracy, market economy and integration in a multilateral system. The course will start with an introduction to theories of globalisation and the reasons why the legacy of totalitarianism is different from the legacy of classic authoritarian states. The course is structured around three issue areas: political ideologies and state breakdown, transition economy and organised crime; post-totalitarian society. It looks at nationalism linked to global diasporas and fundamentalist networks, new wars in the context of international intervention, and international protectorates. Transition economy includes both an introduction to transition strategies (privatisation, liberalisation and macro-economic stabilisation) as well as the perverse effects of illegal economic networks and organised crime stemming both from the totalitarian past and the impact of globalisation. The last block of questions investigates post-totalitarian societies from the perspective of transition justice, (un)civil societies and new minorities. While analysing these issues accompanied with relevant regional illustrations particular attention is made to grasp unique aspects of post-totalitarianism triggered by the simultaneity of transition and globalisation.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. There will be a reading week in week 6 of the LT in which activities will focus on preparing for the assessed essay.

Formative coursework: All students are expected to produce one written essay, plus one short presentation on topics assigned to them.

Assessment: Essay (100%, 5000 words) in the ST.

GV4C4 Half Unit Not available in 2015/16
Legislative Politics: US

This information is for the 2015/16 session.

Teacher responsible: Prof Cheryl Schonhardt-Bailey CON6.05

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Comparative Politics, MSc in
GV4C5  Half Unit
Politics of Economic Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Cheryl Schonhardt-Bailey CON6.05
Availability: This course is available on the MPA in European Public
and Economic Policy, MPA in International Development, MPA in
Public Policy and Management, MPA in Public and Economic Policy,
MPA in Public and Social Policy, MSc in Political Science and
Political Economy, MSc in Public Administration and Government
(LSE and Peking University) and MSc in Public Policy and Administration.
This course is available with permission as an outside option to students on
other programmes where regulations permit.

It is capped at 2 groups, and is approved by process of application.
The deadline for receipt of applications will be between Friday 24
September and Friday 9 October 2015, depending on the course.
The exact deadline for applications will be confirmed at your
programme induction

Course content: This course provides an advanced policy-oriented
analysis of the politics of economic policymaking in advanced
industrialized countries and selected developing countries drawing
on both contemporary, historical and comparative introduction into
the politics of economic policy. It applies explicitly the frameworks
of interests-based, ideational and institutional approaches to the
study of economic policies. It seeks to explore both the independent
and interactive effects of interests, ideas and institutions on
economic policies. These policies include macroeconomic
policy areas such as EMU, financial stability and financial crises,
independent central banking, as well as trade policy (contemporary
and classic case studies), and agricultural policy. Thus, the course
examines some of the economic policies of the European Union,
other advanced industrialized countries and developing countries.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Early weeks present the theoretical frameworks of interests, ideas
and institutions, as applied to the politics of economic policymaking
more generally. The remaining weeks focus on specific economic
policies, including independent central banking, EMU financial
stability and financial crises, trade, agricultural policy. Three of
the course lectures will be given jointly with the undergraduate course,
Politics of Money and Finance in Comparative Perspective (GV309).
There will be a reading week in week 6 of the MT for private study
and assessment preparation.

Formative coursework: Students will be required to submit one
formative essay in week 6.

Indicative reading: R. H. Davidson, et al, Congress and Its
Members (CQ Press, 2008); Charles Stewart, Analyzing Congress, W
W Norton, 2001; D R Mayhew, Congress, The Electoral Connection,
Yale University Press, 1974; D R Mayhew, America's Congress:

in the US House of Representatives, Cambridge University Press, 2005;
G. Mucciaroni & P. Quick, Deliberative Choices: Debating Public
Policy in Congress (University of Chicago Press, 2006).

Assessment: Essay (90%, 5000 words) and in class assessment
(10%).

GV4C6  Half Unit
Legislative Politics: European Parliament

This information is for the 2015/16 session.

Teacher responsible: Dr Lukas Obholzer.
Availability: This course is available on the MPA in European Public
and Economic Policy, MPA in International Development, MPA in
Public Policy and Management, MPA in Public and Economic Policy,
MPA in Public and Social Policy, MSc in Comparative Politics, MSc in
EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Political
Science and Political Economy, MSc in Public Administration and
Government (LSE and Peking University) and MSc in Public Policy
and Administration. This course is available with permission as an
outside option to students on other programmes where regulations
permit.

This course is capped at two groups. The deadline for receipt of
applications will likely be between Friday 25 September and Friday
9 October 2015, depending on the course. The exact deadline for
applications will be confirmed at your programme induction. Please
provide a rationale setting out your motivations for taking this
course via the LSE for You system.

This course cannot be taken with GV4C4 Legislative Politics: US.

Course content: The course provides a theoretical and empirical
analysis of legislative politics in the European Union, focusing on
political behaviour and organization in the European Parliament,
and the role of the European Parliament in the EU’s legislative
procedures.

At a theoretical level, the course will introduce the student to
general theories of legislative behaviour and organization - such as
the role of interests and ideology in legislative politics, how
legislative parties and committees work, the use of NOMINATE to ‘map’ legislative voting behaviour, and how agenda-setting and veto-power rules shape policy outcomes. At an empirical level, the course will focus on the operation of the EU legislative process, behaviour and political organisation inside the European Parliament, and how the interaction between the EP, the Council and the Commission shapes EU policy outcomes.

**Teaching:** 15 hours of lectures and 12 hours of seminars in the LT. There will be a reading week in week 6 of the LT for assessment preparation and a two hour revision seminar in week 11.

**Formative coursework:** Students will be required to write one non-assessed short essay plus a 4,000 word assessed long-essay. The long essay should be an ‘analytic’ narrative of a piece of EU legislation. The lecture and seminar during the reading week will be dedicated to explaining the essay project.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period. Essay (50%, 4000 words).

---

**GV4C8 Half Unit
Game Theory for Political Science**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Torun Dewan CON 6.07

**Availability:** This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Political Science and Political Economy students will be granted priority access as this is a compulsory course on this programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

**Course content:** Introduction to game theory for graduate students of political science

4. Applications to Political Science.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT.

1 hour of seminars in the ST.

In addition students will sit a two hour mock exam in week 11 of MT.

**Formative coursework:** Weekly problem sets to be completed and discussed in class.

**Indicative reading:** The core text for the course is M J Osborne, An Introduction to Game Theory, Oxford University Press 2004

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GV4C9 Half Unit
Democratization and its Discontents in Southeast Asia**

This information is for the 2015/16 session.

**Teacher responsible:** Prof John Sidel CON 4.02

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is compulsory on the MSc in Political Science and Political Economy. This course is available with permission as a compulsory course on this programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

This course is compulsory on the MSc in Politics, MSc in Development Management, MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group. The deadline for receipt of applications is Friday 2 October 2015.

**Course content:** This course focuses on the variegated patterns of democratization observed in Southeast Asia over the past few decades. Special attention is paid to the three democracies in the region (Indonesia, the Philippines, and Thailand), to the endurance of authoritarianism and the prospects for democracy in Burma, and to ‘creeping pluralism’ and ‘creeping constitutionalism’ in Vietnam. The course examines important trends and developments accompanying democratization in the region - in government-business relations, in local politics, in civil society, in religious practices, in inter-communal relations, and in the organization and use of violence in politics. Throughout the course, the countries examined are treated as cases suitable for analysis and comparison in the light of the broader Comparative Politics and Global Politics literatures on democratization and its discontents.

The course begins by situating democratization in Southeast Asia against a comparative historical and sociological backdrop, paying
close attention to the variegated patterns of class, state, and religious formation in the region. The course compares patterns of democratization in the Philippines, Thailand, and Indonesia, while examining the constraints on democratization elsewhere in Southeast Asia. Lectures, readings, and seminar discussions then turn to key trends accompanying democratization in Southeast Asia. The trends examined include campaigns against ‘corruption’ and in support of ‘the rule of law’ and ‘good governance’; social movements and struggles for popular empowerment; the democratization of religious practices and institutions; religious violence, and separatist mobilization. These trends are treated through comparative analysis of different cases within Southeast Asia and in the light of relevant theoretical literatures drawn from Comparative Politics and Global Politics.

**Teaching:** 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour of lectures in the ST.
If more than 12 students take the course, there will be two separate seminar groups.

There will be a reading week in week 6 of the MT for complementary structured learning activities.

**Formative coursework:** One non-assessed, 1,000 word essay.

**Assessment:** Exam (50%, duration: 2 hours) in the LT week 0.
Essay (50%, 3000 words).

---

**GV4D3** Half Unit

**Local Power in an Era of Globalization, Democratization, and Decentralization**

This information is for the 2015/16 session.

**Teacher responsible:** Prof John Sidel CON4.02

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Studies, MSc in Global Politics, and MSc in Global Civil Society. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has limited availability (is capped), and requires that students (regardless of Department or MSc programme) obtain permission from the teacher responsible. It is capped at 2 groups. The deadline for receipt of applications is Wednesday, 30 September 2015.

**Course content:** Over the course of the past two decades, the inter-related processes of marketization, democratization, and decentralization are said to have generated new social forces and political freedoms in localities around the world. Market reforms and village elections in China, the end of Communist Party rule in Russia and Eastern Europe, and trends of (re)democratization in Asia, Africa, and Latin America have all offered new opportunities for local people to effect change in local politics around the world.

Yet academic, journalistic, and policy accounts have highlighted the rise and resilience of ‘local despotics’ – ‘authoritarian enclaves,’ ‘bosses,’ ‘caciques,’ ‘chiefs,’ ‘clans,’ ‘local strongmen,’ ‘mafias,’ ‘warlords’ – in the midst of this reworking of market, electoral, and administrative circuitries. This course focuses on this phenomenon of what scholars have come to call ‘subnational authoritarianism’, competing explanations for its emergence and entrenchment, the diversity of its manifestations, and various challenges mounted against its perpetuation. The goals of the course are twofold. First, the course offers a critical examination of competing accounts of and explanations for the phenomenon of ‘subnational authoritarianism’ in the developing world. Second, the course helps students think more carefully, critically, and creatively about local politics more broadly, and to do so with an eye towards the comparative analysis of local power structures rooted in local economies and societies. The course begins with an examination of an emerging new political-science literature on ‘subnational authoritarianism’ and a more established body of scholarship on clientelism and machine politics. The course then turns to case studies in diverse settings, ranging from southern Italy to China, India, Indonesia, Nigeria, and Russia, and extending to cases of ‘warlordism’ in contexts such as contemporary Afghanistan, Iraq, and Somalia. The readings allow students to examine and evaluate competing explanations for the rise and entrenchment of local bosses, chiefs, clans, and mafia, diverging descriptions of their modes of domination, and alternative accounts of their disappearance, evolution, or transformation in the face of economic, social, and political change. Successive weeks also explore the links between constellations in local politics on the one hand, and patterns of economic development, ethnic conflict, and religious mobilization on the other. The final weeks of the course shift attention to the efforts to challenge entrenched local power structures and to create “countervailing power” through popular mobilization, political participation, and social empowerment in localities in diverse settings across the world.

**Teaching:** 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour of lectures in the ST.
There will be a reading week in week 6 of the LT for complementary structured learning activities.

**Formative coursework:** One non-assessed, 1,000 word essay.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.
Essay (50%, 3000 words).
GV4D4  Half Unit  
**The Politics of Inequality and Redistribution**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Jonathan Hopkin CONS.18  
**Availability:** This course is available on the MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Inequalities and Social Science, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.  
This course is capped at three groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.  
**Course content:** This course provides an overview of contemporary redistributive politics in the rich democracies. The objective is to explain why the distribution of wealth, income and opportunities differs so much between democratic countries with similar levels of economic development. The course draws largely on literature from the field of comparative politics, although perspectives from other disciplines - such as economics and social policy - are brought in as appropriate. The focus is on tracing the interactions between political institutions such as political parties and elections, labour market institutions, and the redistributive institutions of the welfare state. This approach is used to examine the growth of the public sector in the twentieth century, the differences between Social Democratic and Christian Democratic welfare states, the impact of wage bargaining institutions, the redistributive implications of age, gender and territorial location, and redistribution through corruption and rent-seeking. By tracing interactions between constitutional arrangements, electoral politics, and the institutions of the welfare system and the labour market, explanations can be provided for the striking differences in social cohesion and human development amongst the world’s rich democracies.  
**Teaching:** 15 hours of lectures and 16 hours and 30 minutes of seminars in the MT. 1 hour of lectures and 1 hour of seminars in the LT.  
Lecture will run weeks 1-10. Seminars will run weeks 1-11.  
**Formative coursework:** All students are expected to submit one non-assessed essay.  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.  

---  

GV4D5  Half Unit  
**Organisations, Power and Leadership**  
This information is for the 2015/16 session.  
**Teacher responsible:** Professor Patrick Dunleavy (CON.5.19)  
**Availability:** This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.  
**Course content:** Modern governance involves leaders in the public sector (and also in firms, NGOs, aid agencies etc.) in balancing the exercise of power with the development of organisational culture and institutions, and the management of coalitions and delegations of power to sub-leaders. Power involves both resources and coalitional power and it is complex because it means both overcoming resistance in conflicts of interest and helping organisations and collectivities to achieve actors’ common goals. Similarly, leaders must fit with, sustain and develop existing organisational and institutional strengths, and also often seeking to reform their processes or change their direction of development. Finally, leaders as generalists need to work effectively with delegates who possess far more information and expertise on specialist matters. This half-unit course explores these areas of tension and negotiation of leadership by analysing one policy-making case study per week, in tandem with relevant theory and analysis papers.  
Each session includes an introductory lecture/talk, plus student-led discussions of that week’s practical case and key analytic readings.  
**Teaching:** 20 hours of seminars in the MT.  
There will be ten combined lecture/seminar sessions, each lasting two hours, during the MT.  
**Formative coursework:** Students are encouraged to complete formative versions of the case analyses (due in December) and of the final essay (due in January) and to discuss them with Professor Dunleavy during MT.  
**Indicative reading:** A full reading list will be distributed at the beginning of the course.  
**Assessment:** Essay (65%, 4000 words) in the LT.  
Other (35%) in the MT.  
A Case Analysis of no more than 2,000 words will count for the “other” 35% of the assessment for this course.

GV4D7  Half Unit  
**Not available in 2015/16**  
**Dilemmas of Equality**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Sarah Goff CON 4.11  
**Availability:** This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Inequalities and Social Science and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 2 groups. The deadline for receipt of applications is Friday, 9 October 2015.  
Please be aware that this is a capped course and the application deadline is in MT. The course is in LT. If you are interested in taking the course, please make an application stating your MSc programme and (briefly) explaining the reason for your interest.  
**Course content:** The course starts with the general question of why (or if) equality matters. It then introduces some of the major debates in the contemporary egalitarian literature: equality of what; equality of opportunity versus equality of outcome; luck egalitarianism versus relational equality. In the final section, it focuses on more specific issues and dilemmas. The topics addressed this year are gender and the division of labour; discrimination and policies that aim to combat it; and the question of who bears responsibility for addressing group-based and global inequalities.  
**Teaching:** 20 hours of seminars in the LT.  
There will be a reading week in week 6 of the LT for private study and assessment preparation.  
**Formative coursework:** Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

GV4E1 Half Unit
Comparative Democratization in a Global Age

This information is for the 2015/16 session.
Teacher responsible: Dr. Bill Kissane
Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics and MSc in Global Politics (Global Civil Society). This course is available as an outside option to students on other programmes where regulations permit.
Course content: To introduce students to the fundamental political science debates about the phenomenon of democratization, to explore the explanatory strength of key paradigms, and to compare distinct modes of democratization. Specific topics are: Definitions of democratization and democratic consolidation; capitalist development and democratization, civil society, elite transitions and international interventions, post-communist transitions, post-civil war democracy, democratic revolutions, constitutional moments and hybrid regimes.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST. There will be a reading week in week 6 of the MT for private study and assessment preparation.
Formative coursework: All students are expected to submit two non-assessed essays.
Indicative reading: D Potter et al, Democratization, J. Grugel, Democratization, Rueschmeyer, Stephens and Stephens, Capitalist Development and Democracy, J Linz and A S Stepan, Problems of Democratic Transition and Consolidation
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GV4E2 Half Unit
Capitalism and Democracy

This information is for the 2015/16 session.
Teacher responsible: Dr David Woodruff
Availability: This course is available on the MSc in Comparative Politics and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit. Available as an outside option and for students on other programmes with the teacher’s consent.
Course content: Compatibility and incompatibility of capitalism and democracy; Constitutional restraints on economic policymaking in central banking and property rights; Democracy and economic inequality; World context and the compatibility of democracy and capitalism; Democracy and economic crisis. This course examines the uneasy interaction between the two dominant concepts underpinning political and economic institutions in advanced industrial societies. It addresses in particular questions about the relationship of capitalism to democracy, both conceptually and empirically. We consider whether democracy undermines or supports capitalism, focusing on policies relating to central banking, redistribution, and property rights. We also examine how capitalism may undermine or sustain democracy and whether contemporary international circumstances heighten the tension between democracy and capitalism.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST. There will be a reading week in week 6 of the LT for dissertation support and preparation.
Formative coursework: All students are expected to submit one non-assessed essay
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GV4E3 Half Unit
Democratization, Conflict and Statebuilding

This information is for the 2015/16 session.
Teacher responsible: Prof James Hughes CON5.0S
Availability: This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is a recommended paper 2 option for the MSc Conflict Studies. Preference is given in the first instance to Conflict Studies students, and then, if there is space, to Global Politics students. This course is capped at two groups and requires that students (regardless of Department or MSc programme) apply via the department’s capped course process. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.
Course content: This course provides a theoretically informed assessment and critique of the debates on the relationship between democratization, violent conflict and state-building. It seeks to explain why some state-building projects have succeeded while others failed or are failing. Case studies will be drawn from post-communist Europe and Eurasia, principally focusing on the Western Balkans, North and South Caucasus, and Central Asia, including Afghanistan. Themes considered include: state collapse of the USSR and Yugoslavia, theories and forms of state-building, democratization, nationalism and nation-state building, internal armed conflicts; conceptualising ‘failed state'; nationalist mobilisation and the ‘nationalising’ state; ‘ethnic democracies’; authoritarian state-building; secession and national and ethnic conflict management; the political economy of armed conflicts; democracy promotion, international conditionality and intervention, in particular by the EU and U.S. ; the politics and security challenges posed by ‘frozen conflicts’. As an LSE Moodle course, most of the weekly essential readings are available online.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. Please note that in the 2015-16 session this course will be taught in an intensified manner over 6 weeks instead of 11 weeks.
There will be a reading week in week 6 of the LT for private study, assessment preparation and other support activities.
Formative coursework: Students are expected to submit one essay outline (1000 words) in preparation for the assessed essay, and prepare one group seminar presentation.

Assessment: Essay (100%, 5000 words).

GV4E4
Public Budgeting and Financial Management

This information is for the 2015/16 session.

Teacher responsible: Dr Joachim Wehner CON4.10
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines contemporary issues in public budgeting and financial management, and how they interface with public management drawing on comparative experience in OECD countries and elsewhere.

Topics include: theories of budgeting; timing horizons in budgeting; legal frameworks; fiscal rules; top-down budgeting; legislative budgeting; fiscal decentralisation; performance budgeting; budget transparency; budget reform; special issues in developing countries; accounting and auditing in the public sector; parliamentary scrutiny of audit findings.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Assessment: Essay (100%, 5000 words) in the ST.

The research essay will be on a topic of your choice. Having said that the topic will be discussed between each of you and myself and I must approve the topic. The research paper should ideally examine a research question using relevant concepts and theories, and must have an empirical dimension that is relevant to the themes of the course. ‘Empirical’ is understood in the broadest sense: your material could be a case study set in an appropriate theoretical framework, it could examine a theme with comparative case studies, it could be quantitative or qualitative. Whatever is deemed appropriate to the research question at hand. Bear in mind though that broad surveys are generally not a good idea. After all 5000 words is about half the standard size of a journal article. Much

GV4E8
Half Unit Not available in 2015/16
Conflict and Institutional Design in Divided Societies

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Mitchell CONS.14
Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Political Science and Political Economy. This course is not available as an outside option. Priority will be given to students on the MSc in Conflict Studies. This course is capped at 2 groups. The deadline for applications is MTh, 20 October 2014.

Course content: The internal resolution of serious ethnic and national conflicts almost invariably involves some form of power sharing and/or power division (autonomy and federation). While power sharing is often invoked in normative and comparative accounts of conflict resolution, it is less frequently systematically examined. Conflict and Institutional Design (CID) is a comparative analysis of the making, maintenance and too often breaking of power sharing agreements. When and how are peace agreements negotiated? What type of power-sharing and federal designs are available? Under what conditions is power sharing likely to help contain conflict, and when does it fail? The course will pay particular attention to what happens after a power-sharing agreement is reached. We will examine the ‘content’ of peace agreements, spoiler attempts to undermine the peace, and the increasing use of ‘transitional justice’ mechanisms. The institutional focus will include analysis of electoral system design for divided societies, the dynamics of electoral and party competition within ethnic segmentation and consociational governance (power-sharing executives, legislatures and federations). While not neglecting theory and concepts, whenever possible the course will examine the quantitative and qualitative evidence on the successes and failures of power sharing.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Two briefing papers on pre-selected key concepts/cases.

Assessment: Essay (100%, 5000 words) in the ST.
more advice about the essay will be given as the course progresses both collectively and in individual meetings with each of you. One of the aims in asking participants to write a paper is to help you to think about research questions and appropriate research design. Thus we are aiming at more than a traditional essay (which largely summarizes what significant others have said), and to begin to make the transition towards ‘postgraduate research’ in which you help develop new insights and/or new empirical knowledge. This should also help you when approaching the planning and writing of your MSc dissertation. Since you will be working on something that really interests you I hope that this will be an enjoyable experience. Of course it will also be challenging; but there will be an understanding that there is only so much you can do in the limited time available. As such you will not be asked to write any un-assessed essays. Instead, during the term, you will be asked to work on your research essay, which I will read, and discuss with you. This should give you a chance to revise your paper and to achieve a better plan by the end of the term. Here is how the work will be organised: 1. By the end of week 7 – (e-mail directly to me), you should hand in the first part of your research essay, which should consist of a provisional title, brief statement of research topic and ‘state of the art’ (very short literature review), possible research question, and proposed method. This should be 2-3 pages since the aim is to advise on the appropriateness and viability of your proposed research essay. 2. Your final research essay will be due by 27 April 12pm (first day of the summer term). Note: for the final paper please return directly to the main Government office and get a receipt proving submission AND send me an electronic copy). Please note that all papers that count towards grades are electronically scanned with up to date plagiarism software. In addition to revisions to the two parts above you will now discuss your findings, and draw some conclusions. The 5000 word limit will be enforced, and is about 15-18 pages of A4 double spaced. The number of words used must be clearly stated on the cover page (the total includes main text, footnotes / endnotes and tables (but not appendices).

GV4E9
Approaches and Issues in Public Policy and Administration

This information is for the 2015/16 session.

Teacher responsible: Prof Edward Page CON3.05
Availability: This course is compulsory on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is designed to introduce MSc students to major issues in understanding public administration and policy. Students will be divided into two classes and each class will be taught for the whole 24 weeks by the same tutors. 20 of the lectures will reflect the topics to be covered in the classes which remain the focus of the course and some of the lectures may be given by other colleagues teaching on the MSc degree as well as by outside speakers. Additional Visiting Professor lectures will be arranged for the Lent term. The core of the course will consist of 20 classes (+3 revision) that will deal with key themes in Public Policy and Public Administration. Compulsory for students on MSc Public Policy and Administration and the LSE-PKU Double Degree in Public Administration and Government.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST. There will be a reading week in week 6 of the MT and the LT for private study and assessment preparation.

Formative coursework: Three formative essays, two in the Michaelmas Term and one in the Lent Term and a mock examination.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 3000 words).

GV4F2 Half Unit
Popular Politics in the Middle East

This information is for the 2015/16 session.

Teacher responsible: Dr John Chalcraft CON5.16
Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course explores the role of popular politics in the making of the modern Middle East. The primary focus is on the Arab world but reference is also made to Iran, Israel and Turkey. We study the origins, course and consequences of popular protest, social and political movements, uprisings and revolutions in the region. Our cases are drawn from the early twentieth century to the present. Common topics include the first intifada in the Occupied Palestinian Territories (1987-1991), the Iranian revolution of 1979, everyday modes of resistance, labour movements, Islamic activism in Egypt, and the Arab uprisings of 2011. We aim at a contextualised and historical understanding of particular episodes of contention, while pursuing key themes and debates. We aim to evaluate the role of both ideal and material interests in driving transgressive collective action, as well as the effectiveness of wide variety of strategies, tactics, modes of organisation, and repertoires of contention. We further seek to assess the extent to which a focus on agency, subjectivity, politics and contingency can modify understandings of protest rooted in structuralist and materialist historical sociology. Finally, we aim to study how far relational theories of contentious politics can modify rationalist and objectivist approaches rooted in social movements theory.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.
There will be a reading week in week 6 of the LT for assessment preparation.

Formative coursework: In order to develop essay skills and obtain feedback outside of formal assessment, students will complete a 2,000 word formative essay on which they will receive feedback as to overall standard, argument, evidence, structure and style.

Students will choose one essay from a list of titles. To prepare for the 5,000 word essay, students will submit for approval a proposed title and a two-page handout summarising the question or puzzle that their essay will address. A seminar will also be held as a workshop to assist students prior to the final submission of their 5,000 word essay.

GV4F4  Half Unit  
Policy Advice in Theory and Practice  
This information is for the 2015/16 session.  
Teacher responsible: Dr Eva Heims  
Availability: This course is available on the MSc in International Migration and Public Policy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 2 groups. The deadline for receipt of applications will likely be between Friday 25 September and Friday 9 October 2015, depending on the course. The exact deadline for applications will be confirmed at your programme induction.  
Course content: Many masters graduates in public policy and administration go on to work in organizations that produce or consume policy advice. With this in mind, this course will look at how policy advice is produced and used. It has three objectives: to introduce students to a range of theoretical and empirical scholarship on the issues involved in producing and using policy advice; to develop the practical policy analysis, advice and communication skills required of policy advisors; and to expose students to practitioners who produce and use policy advice. Students will develop their policy analysis and communication skills by working through real-world cases during the seminars and in the formative and assessed coursework.  
Teaching: 8 hours of lectures and 16 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST. In addition there will be between three and five guest speaker sessions.  
Formative coursework: One formative essay (policy memo and analysis) (2,000 words) designed to help students in developing their project work and either a mock examination or a second policy memo and analysis (2,000 words).  
Assessment: Exam (50%, duration: 2 hours) in the main exam period. Project (50%, 3000 words).  

GV4F7  Half Unit  
The Political Theory of Jürgen Habermas  
This information is for the 2015/16 session.  
Teacher responsible: Professor Peter Niesen  
Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 1 group. The deadline for receipt of applications on LSE for You will be between Friday 24 September and Friday 9 October 2015, depending on the course. The exact deadline for applications, and further details on how to make an application, will be confirmed at your programme induction.  
Pre-requisites: An advanced undergraduate course in the History of Political Thought or Political Philosophy, or following consultation with the course teacher.  
Course content: A philosophical and thematic introduction to and critical assessment of the political theory of Jürgen Habermas. Jürgen Habermas is commonly ranked alongside John Rawls as one of two paradigms of how to do contemporary political philosophy. Like Rawls, Habermas articulates a systematic philosophical theory of the liberal-democratic constitutional state that seeks to reconcile the values of liberty, equality and democracy. Unlike Rawls, Habermas has based this approach on a distinctive philosophy of language, a general moral philosophy, and a foundational social theory. The focus of the course is on Habermas's political theory set out in Between Facts and Norms and subsequently developed to fit problems of international politics and international law. The course is divided into three parts. The first part investigates Habermas’s moral philosophy and speech act theory, and how they are developed into an account of democratic law-making in Facts and Norms. The first part will be centrally concerned with Habermas’ claim to use a single distinctive method, rational reconstruction, for the various areas of knowledge. The second part assesses the several attempts Habermas has made at an international or cosmopolitan transformation of his account of democratic legitimacy, focussing on his works on the constitutionalisation of international law and of the European Union. The third part looks at Habermas as an active and influential intellectual, starting with his most recent interventions on the fate of the EU in the
financial crisis, but also looking at two earlier high-profile domestic and international controversies, the “Historikerstreit” (historians’ struggle) over the public role of historiography and the NATO bombings in the Kosovo crisis. Again, one central concern is the methodological question as to whether his interventions “apply” theoretical insights to political conflicts.

**Teaching:** 20 hours of seminars in the LT. There will be a reading week in week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** Students will be expected to submit two formative essays of no more than 2000 words.

**Assessment:** Essay (100%, 5000 words).

---

**GV4F9 Half Unit
Institutions in the Global Economy**

*This information is for the 2015/16 session.*

**Teacher responsible:** Dr Stephanie Rickard CON6.11

**Availability:** This course is available on the MSc in Comparative Politics and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course is organised around several important theoretical and empirical questions regarding the functioning of the global economy and the role of political institutions. Why do states delegate certain economic tasks and responsibilities to international institutions rather than acting unilaterally or cooperating directly? To what extent do states continue to control international organizations once authority has been delegated? To what extent do international institutions constrain national governments and their economic policies, such as trade, monetary and fiscal policy? To what extent do domestic institutions shape countries’ foreign economic policies? When and under what circumstances do national governments comply with the decisions of international organizations? These questions are examined in the context of a variety of different institutions that play a role in the global economy including, for example, the World Trade Organization and the International Monetary Fund as well as domestic political institutions, such as electoral systems.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6 of the LT for private study and assessment preparation.

**Assessment:** Essay (100%, 4000 words) in the ST.

Assessment: Exam (100%), duration: 2 hours in the main exam period.

**GV4G1**  
**Half Unit**  
**Applied Quantitative Methods for Political Science**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Valentino Larcinese

**Availability:** This course is available to the MRes Political Science and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A good knowledge of statistics and of the generalized linear model at the level of MI452.

**Course content:** This course provides an introduction to current empirical research in political science with a focus on methods for causal inference. The lectures will present the techniques and illustrate their applications by making extensive use of the most up-to-date empirical literature. The seminars (tutorials) will be conducted in a computer room and will provide an opportunity to learn how to apply the methods with the statistical software Stata.

**After reviewing the rationale for simple OLS estimation, particularly focusing on the conditions for a causal interpretation of the coefficients, the course will cover matching estimators, instrumental variables, panel data, differences-in-differences, regression discontinuity, quantile regression. Students will be stimulated to think in experimental terms and the main theme will be how to replicate or get close to the experimental ideal of natural sciences by using non-experimental observational data.**

**Teaching:** 20 hours of lectures in the LT.

**Formative coursework:** There will be two pieces of formative work to be submitted collectively to the lecturer in the form of short essays. Students will be divided into groups of 4-5 people (groups change each time). Each group will receive a dataset and will be asked to use some specific methods to answer an assigned question.

**Indicative reading:** Most readings will be journal articles. The main references for the methods will be:

Thad Dunning: Natural experiments in the social sciences, Cambridge University Press 2012

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**GV4G3**  
**Foundations of Political Theory (MRes)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Kai Spiekermann CON 5.17, Dr Joseph Mazor and Prof Katrin Flikschuh CON 6.08

**Availability:** This course is compulsory on the MRes Political Science. This course is not available as an outside option. Only available for first year MRes/PhD Political Science students in stream Political Theory. Not available as an outside option.

**Course content:** This course provides a systematic introduction to the philosophical and methodological foundations of political theory. It aims to give students a comprehensive conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields, and will prepare doctoral students for choosing and reflecting on their methodological approach. Examples of topics covered are: the basics of philosophical reasoning and argumentation; the aims and justifications of political theory; different approaches to the history of political thought and the analysis of political texts; comparative political theory and postmodern theory.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. 20 hours of seminars in the LT.

Lectures and seminar in the MT concurrent with the MSc in Political Theory Foundation of Political Theory Course. LT seminars for MRes/PhD Political Theory students only with assigned readings of research relevant journal articles / book chapters. Individual students will take responsibility for introducing the material; there will be collective analysis and discussion. The course readings will be set to reflect each incoming year’s particular research interests.

There will be a reading week in week 6 of the MT and week 6 of the LT for private study and formative/summative assessment preparation.

**Formative coursework:** Two 2,000 word formative essays.

**Assessment:** Essay (50%, 3000 words) and essay (50%, 3000 words).

**GV4G4**  
**Half Unit**  
**Comparative Conflict Analysis**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Bill Kissane CON5.06  
Dr.des. Livia Schubiger  
Dr Frederick Laker

**Availability:** This course is compulsory on the MSc in Conflict Studies. This course is not available as an outside option. Compulsory core course for and entry restricted to MSc Conflict Studies students only. It is capped at 3 groups. The deadline for receipt of applications is Friday, 2 October 2015.

**Course content:** What is intra-state conflict? How should we investigate and measure political violence? What causes national and ethnic conflict and other forms of political violence and why does it take particular forms? What are the most effective means of conflict resolution? This course will introduce students to the core theoretical debates on intra-state conflict and political violence by analysing the major research in the field, both quantitative and qualitative. The course is structured around three categories of analysis and explanation: causation, dynamics and outcomes. Central themes include: the role of violence in state formation, development and collapse; theories of legitimacy, contentious politics and control regimes; the causes, dynamics and consequences of civil war; the interaction of group identities, interests and political violence; macro- and micro-analyses of conflict; and top-down and bottom-up methods for ending violent conflict, including intervention, the role of civil society, and institutional designs.

The course offers students the opportunity to engage with the main methodological approaches to the study of conflict, including critical case studies, process tracing, small n and large n research, which will enhance their skills for the dissertation.
In the weekly lectures and seminars the themes will be explored through a mix of theory-based readings and works which provide in-depth case studies.

**Teaching:** 16 hours and 30 minutes of lectures and 16 hours and 30 minutes of seminars in the MT.

**In week 11 of MT the lectures and seminars will focus on revision.**

**Formative coursework:** Students are required to complete one formative essay of 2,000 words.

**Assessment:** Exam (100%, duration: 2 hours) in the LT week 0.

---

**GV4G6**

**Half Unit** Not available in 2015/16

**Nationalism and Global Politics**

This information is for the 2015/16 session.

**Teacher responsible:** Prof John Breuilly CON3.04

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Global Politics and MSc in Global Politics (Global Civil Society). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course offers an advanced, inter-disciplinary introduction to the history of politics and the Middle East in the LT. 15 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.

There will be a reading week in week 6 of the MT and week 6 of the LT for assessment preparation.

**Formative coursework:** One 2,500 word essay to be submitted at the end of the Michaelmas Term. One mock exam essay to be completed during the Lent Term.

**Indicative reading:** Michael Gilsenan, Lords of the Lebanon Marches (California, 1996); Isam al-Khafaji, Tormented Births (B Tauris, 2004); Rashid Khalidi, Palestinian Identity (Columbia, 1998); Zachary Lockman, Contending Visions of the Modern Middle East (CUP, 2004); Giacomo Luciani, The Arab State (Routledge, 1990); Timothy Mitchell, Rule of Experts (California, 2002); Owen, Roger. State, Power and Politics in the Making of the Modern Middle East (Routledge, 2004); Parvin Paidar, Women and the political process in twentieth-century Iran (CUP, 1995); Edward Said, Orientalism (Penguin, 1978); Ted Swedenburg, Memories of Revolt (Arkansas, 2003); Robert Vitalis, America’s Kingdom (Stanford, 2007).

**Assessment:** Exam (80%, duration: 3 hours) in the main exam period.

Essay (20%, 3000 words).

---

**GV4G5**

**The History and Politics of the Modern Middle East**

This information is for the 2015/16 session.

**Teacher responsible:** Dr John Chalcraft CONS.16

**Availability:** This course is available on the MSc in Comparative Politics, MSc in Conflict Studies and MSc in Global Politics. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course offers an advanced, inter-disciplinary introduction to the history and politics of the Middle East and North Africa from the nineteenth century to the present. The course adopts a chronological and thematic approach to a series of key topics and debates in the history of the region, including colonial rule, nationalism, popular protest, Israel/Palestine, gender, social change, armed struggle, neoliberalism, migration, rentier states, new religious politics, bread riots, the new imperialism, and the Arab uprisings of 2011-12. The cases are drawn from a wide range of countries in the region. Students will address concrete topics and problems in relevant historical contexts in the light of important social science debates. We draw in inter-disciplinary fashion on anthropotomy, politics, economic history, geography, sociology and international relations. The course material will avoid and challenge clichés associated with (1) culturally essentialist and exceptionalist (neo)Orientalism, (2) Eurocentric, materialist and teleological Modernism, and (3) wholly relativist or discursively determinist Postcolonialism. We will pay particular attention to the rise and fall of political regimes, the dynamics of consent and dissent, as well as to role of trans-national, trans-regional and global forms.

**Teaching:** 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.

Each student will write two short (1500-2000 words) formative essays and give one seminar presentation.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

GV4G7 Half Unit Marx and Marxism
This information is for the 2015/16 session.
Teacher responsible: Dr Lea Ypi CON 3.19
Availability: This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po) and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course is an advanced level course providing the opportunity to read canonical texts in the history of Marxism and engage with the more recent normative literature related to these texts. The course will cover key issues in the study of Marxism such as the materialist conception of history, the idea of class and class struggle, the role of the state, the analysis of exploitation, the defence of revolution, the role of the party, the analysis of imperialism. It will introduce to the thought of an author that is often referred to in a range of literatures and will provide the opportunity to read original texts and engage with scholarly controversies (both historical and normative) generated by these texts. The course will cover key issues in the study of Marxism such as the materialist conception of history, the idea of class and class struggle, the role of the state, the analysis of exploitation, the defence of revolution, the role of the party, the analysis of imperialism. It will introduce to the thought of an author that is often referred to in a range of literatures and will provide the opportunity to read original texts and engage with scholarly controversies (both historical and normative) generated by these texts.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: One formative essay of around 2,500 words.

Assessment: Essay (100%, 4000 words).

GV4H2 Half Unit Not available in 2015/16
Contemporary India: The World’s Largest Democracy in the Early 21st Century
This information is for the 2015/16 session.
Teacher responsible: Prof Sumantra Bose
Availability: This course is available on the MSc in Comparative Politics and MSc in Global Politics. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students taking the MSc Comparative Politics and the MSc Global Politics. Students on other Master’s programmes, in all Departments of the School, are welcome to apply to take the course and will be considered subject to availability of space. This course is capped at 30 students (two seminar groups). The deadline for applying online via LSEforYou (LFY) to take the course is Friday 10 October 2014.

Course content: This course is an advanced introduction to the politics and international relations of contemporary India, the world’s most populous and diverse democracy and one of the “rising powers” of the 21st century. After the first week’s introductory and overview session, the next six weeks cover in depth the evolution of India’s democracy since the 1950s. The emphasis is on political changes and transitions since the 1990s. Key topics include the transitions from a polity dominated by a single party to a highly plural and competitive polity defined by the rise of “regional” parties in many of the 29 states of the Indian Union, and from a relatively centralized to a federal polity. Two current challenges with deep roots in the past are also surveyed: the Maoist insurgency in some parts of India and the chronic discontent in the Kashmir Valley. The final three weeks look at India’s role in the international politics of the early 21st century. The focus is on India’s three most important (and interconnected) external relationships: with China, the United States, and Pakistan.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.
Indicative reading: Sumantra Bose, Transforming India: Challenges to the World’s Largest Democracy (2013); Jean Dreze and Amartya Sen, An Uncertain Glory (2013); Ramachandra Guha, India after Gandhi (2007); Atul Kohli (ed.), The Success of India’s Democracy (2001); Christophe Jaffrelot, India’s Silent Revolution (2003);
GV4H3  Half Unit
Feminist Political Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Anne Phillips Con 5.07
Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups. The deadline for receipt of applications is Friday, 2 October 2015.

Course content: This course covers some of the central debates in contemporary feminist political theory, with a particular emphasis on the legacy and usefulness of liberalism. The course focuses on debates and differences within feminist political theory, rather than justifications for, or defences of, feminist political theory. Among the problems raised are conceptions of the individual and individual autonomy; the relative invisibility of gender issues in mainstream literature on justice and equality; the tendency to conceive of equality in sex-blind terms; the tendency to presume a universally applicable set of norms. We consider the theoretical debates in relation to a number of contemporary political issues. Topics likely to be addressed include: feminism and contract, individualism and autonomy, identity politics, equality and the politics of difference, surrogacy, multiculturalism, and universalism.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be required to submit a short essay of roughly 1,500 words. Students will be given a list of questions to choose from, and should choose a topic other than the one they choose for their final assessment.

Indicative reading: Most of the material is in the form of articles, and a detailed list will be handed out at the beginning of the course. The following is only an indicative list: J Squires, Gender in Political Theory; C Pateman The Sexual Contract; I M Young, Justice and the Politics of Difference; W Brown, States of Injury; A Phillips Multiculturalism without Culture; C MacKenzie and N Stoljar (eds) Relational Autonomy.

Assessment: Essay (100%, 4000 words).

GV4H4  Half Unit
Foundations of Political Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann and Dr Joseph Mazor
Availability: This course is compulsory on the MSc in Political Theory. This course is not available as an outside option.

Course content: This course provides a systematic introduction to the philosophical and methodological foundations of political theory. It aims to give students a conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields. Examples of topics covered are: the basics of philosophical reasoning and argumentation; the aims and justifications of political theory; different approaches to the history of political thought and the analysis of political texts; comparative political theory and postmodern theory.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in January.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GV4H5  Half Unit
The Political Philosophy of Environmental Change

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann CON.517
Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Philosophy and Public Policy, MSc in Political Theory and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: No formal requirements, but an interest in the formal analysis of political, philosophical and economic questions and a willingness to study contributions from various disciplines, including the natural sciences, is expected.

Course content: This course analyses political and philosophical questions arising in the context of environmental change. The approach will be interdisciplinary. While the focus is on normative-philosophical issues, we will also make use of positive-analytical and empirical literature. Among the topics discussed will be climate change, overpopulation, food and water scarcity, deforestation, desertification and the loss of biodiversity. Some of the questions to be discussed are: How should we balance the interests of current and future generations? How does climate change affect our obligations towards the global poor? How do we make policy decisions if the effects are uncertain but potentially severe? Are we individually or collectively responsible for causing climate change, and what follows from this? How do we relate to the environment and what precisely is valuable about preserving it?

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Indicative reading: Nicholas Stern (2009) A Blueprint for a Safer Planet, London (Bodley Head)
Intergovernmental Panel on Climate Change (2007 / 2013) Fourth and Fifth Assessment Report, Available at www.ipcc.ch
GV4H6  Half Unit  Not available in 2015/16

Behavioural and Experimental Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Rafael Hortala-Valve

Availability: This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: It is required that students have some familiarity with formal models (game theory) and basic statistical concepts.

Course content: In this course we will introduce behavioural concepts and use them at explaining decisions of politicians, candidates for political office, voters, lobbyists, and other actors in the political and policymaking arena. The focus of the course will be academic but we will also visit the recent development by public policy practitioners—both the UK and the US have behavioural insights teams working closely with the executive branch. We will analyse different political phenomena that do not perfectly fit our rational choice models. We will cover issues such as turnout in large elections, populist policies, framing of public policies to influence public policies, attribution of blame to politicians, opt-in/opt-out policies and paternalism in policy recommendations, etc. By introducing insights from psychology to our classical political economy models we will study the effects of social, cognitive, and emotional factors on political decisions. Parallel to this formal analysis we will also introduce experimental methods.

Teaching: 22 hours of seminars in the LT. 4 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 9 problem sets in the LT. Every week some students will have to present the week readings. Also every week students will have to solve a short problem set.

Druckman, J, D Green, J Kuklinski, and A Lupia (2011), Cambridge handbook of Experimental Political Science, Cambridge University Press
Morton, R and K Williams (2010), Experimental Political Science and the study of causality: from nature to the lab, Cambridge University Press

GV4H7  Half Unit  Not available in 2015/16

Subnational Politics in Comparative Perspective

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies and MSc in Empires, Colonialism and Globalisation. This course is available as an outside option to students on other programmes where regulations permit.

Course content:
I. How do territorial institutions vary across countries? (2 weeks)
   • institutional heterogeneity across space and scale: (empires, nation states, federations, nodes, networks, indirect rule, states within states, and decentralisation);
   • space and the challenge/risks of territorial integration;
   • scale and principal-agent dynamics, direct and indirect channels of access to the central state, competitive vs. complementary (functionally differentiated) links;
   • detecting and describing differences; testing theories re: institutional effects.
II. What explains cross-national variation in the territorial structure of the state? (2 weeks)
   • state ambition theories (elite voluntarism/ideological theories);
   • endogenous state-formation theories (social conflict and social equilibrium theories);
   • factor prices, markets, technology, and transactions costs: endowment and geography;
   • historical legacies via path dependence or institutional stickiness (as per HI theory);
   • cultural or social cohesion theories.
III. Are there consequences of variation in territorial structure of the state for political order, economic development, policy implementation, and prospects for democracy? If so, what are they? (6 weeks)
   • Territorial institutions and national citizenship;
   • differentiated citizenship regimes; electoral regimes and the structure of representation;
   • Decentralisation: subnational authoritarianism or local democracy;
   • Building national economies: uneven development, regionalised regulatory regimes, property rules, taxation and redistribution, labour markets, urban bias;
   • Spatially uneven character of state institutions: implications for policy interventions;
   • Territorial dimensions of state failure: Why do some states fall apart?;
   • Fragmentation (dissolution), secession and warlordism, displacement, abandonment of territory

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay, 2 presentations and 2 other pieces of coursework in the LT.

Karen Barkey, Empire of Difference: The Ottomans in Comparative Perspective (CUP 2008)
Michael Hecter, Containing Nationalism (Oxford 2000)

GV4H9  Half Unit

Armed Groups: Violence, Governance, and Mobilization

This information is for the 2015/16 session.

Teacher responsible: Dr. Livia Schubiger

Availability: This course is available on the MSc in Conflict Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

GV4H9 is a recommended option for the MSc Conflict Studies.

Other students will be admitted subject to space, with preference given to Government Department students. The course is capped at three groups. The deadline for applications is Thursday October 1, 2015 at 5:30pm.

Course content: This course introduces students to the social-scientific analysis of violence, governance, and mobilization in intra-state armed conflict and civil wars. The primary focus lies on how armed groups interact with the civilian population and how they mobilize followers, how and why armed groups’ internal institutions and strategic violence vary across conflicts, and what the consequences of these patterns and arrangements are. The course engages with a variety of theoretical and empirical approaches that will familiarize students not only with cutting-edge research on these issues, but also their relation to ‘big debates’ in conflict research and comparative politics. Students are introduced, in particular, to the following core themes:

- Recruitment and Mobilization in Armed Conflict: The course assesses the insights and limitations of existing research in uncovering the incentives of groups and communities to engage in violent collective action, the choices of ordinary citizens to join insurgent or counterinsurgent armed groups, as well as the strategies of armed group leaders to enlarge their constituencies.

- Order and Governance in Civil War: Students are introduced to a novel research agenda that has started to explore how social and political order is established in times of civil war, when and how armed groups aspire to govern the daily lives of civilians, and why some armed groups manage to establish and maintain high levels of internal cohesion and control while others do not.

- Causes and Consequences of Wartime Violence against Civilians: The course critically reviews theories and recent empirical studies that have set out to explain the puzzling variation in violence against civilians across conflicts, armed groups, and over time, as well as the consequences of civilian victimization for subsequent conflict dynamics and post-conflict recovery.

Empirically, the course engages with both quantitative and qualitative data from a wide variety of ongoing, recent, and historical cases from civil wars around the globe, including the conflicts in Colombia, El Salvador, Northern Ireland, Peru, Sierra Leone, and Syria, among others.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Lent term: 10 x 1 hour lectures, 10 x 1.5 hour seminars (2 groups). There will be a reading week in week 6.

Formative coursework:

- 1 essay: The essay (2000 words) proposes an original argument related to one of the course subjects.
- 1 mock exam (formative, 1 hour).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GV4J3  Half Unit

Public Opinion, Political Psychology and Citizenship

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Leeper

Availability: This course is available on the MSc in Comparative Politics and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should have a familiarity with basic statistical concepts (e.g., means, proportions, linear regression).

Course content: The purpose of this course is to explore issues related to public opinion, including what opinions are and how they are formed, what factors do and do not influence opinion development and change, how opinions drive citizens’ political thinking and behaviour, and what implications these psychological processes have for the role of public opinions in democratic government. Students will leave the course with a thorough theoretical understanding of political opinions, their origins, and their possible effects through exposure to philosophical perspectives, contemporary case studies, and a broad set of empirical research. The course will challenge assumptions about what democracy is and how it works, explore what it means to be a good citizen in a contemporary democracy, and provide students with insight into how democratic governments can and should respond to the public’s views. The focus will be on how citizens form political opinions, think and reason about policy debates, and act on their opinions, especially outside of elections, across a broad array of country contexts.

Teaching: 20 hours of seminars in the LT. There will be a reading week in LT 6 for one-to-one meetings and/or peer feedback sessions related to the summative assessments.

Formative coursework:

1 “Short Essay”: Each week, 1-2 students will serve as discussion leaders for the seminar portion of the course. In preparation for this, they will write a short (2-3 page; max 1500 words) reflection paper that synthesizes course readings for that week and raises questions unanswered by the texts. Reflection papers will be shared with classmates via Moodle with the expectation that fellow students provide peer feedback during the seminar. Students will also receive written feedback from the instructor. These papers will help students to formulate and consider potential research topics for their final paper.

3 problem sets: Three times in the term, students will receive a short “problem set” that will require basic statistical analyses (cross-tabulation, correlations, etc.) building on methods of analysis discussed in lecture and using public opinion data provided by the instructor. The problem sets will be reviewed during subsequent lectures.

Assessment: Essay (100%, 5000 words).

GV4V8 Half Unit

MPA Policy Paper

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Comparative Politics, MSc in EU Politics, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students are required to obtain permission from the teaching department to take this course.

Course content: This course offers the theoretically and empirically informed study of citizen representation in the European Union.

Coursework: This course consists of seminars in the MT. 2 hours of seminars in the LT.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

Formatative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change this topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

GY400 Half Unit
The Economics of Urbanisation

This information is for the 2015/16 session.

Teacher responsible: Prof John Henderson Stc 506b

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Real Estate Economics and Finance, MSc in Regional And Urban Planning Studies and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No specific course requirements. At a minimum, students should have an analytical 1 unit course in principles of economics (or equivalent) and a basic statistics or econometrics course. However, it is desirable that students have more advanced training in economics and econometrics.

Course content: This MSc course will offer students the opportunity to learn some of the conceptual foundations and empirical regularities involved in studying why countries urbanise, the nature of structural and spatial transformation involved in the urbanisation process and the development of systems of cities. Complementing this will be a study of the internal spatial transformation of cities, the evolution of the location of production activities, the formation and role of slums, and the evolution of land market regulations and property right assignments. Critical to understanding these processes will be learning about the role of regulation and political processes, as well as policy initiatives, in shaping outcomes. The course will also examine the current process of urbanisation in Asia and Africa in the various special contexts of different regions and countries, drawing from lessons of the past as experienced in Latin America and parts of the developed world.

Teaching: 20 hours of lectures and 20 hours of seminars in the LT. The first two weeks of seminars will involve a review of basic statistical methods to help prepare students for class and lecture material.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Presentation (20%) in the LT.

GY403 Half Unit
Contemporary Debates in Human Geography

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low STC SS12

Availability: This course is compulsory on the MSc in Human Geography and Urban Studies (Research). This course is available on the MPhil/PhD Human Geography and Urban Studies, MPhil/PhD in Geography, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in International Migration and Public Policy, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Compulsory for MPhil/PhD Human Geography and Urban students without MSc Human Geography and Urban Studies.

Course content: This is a reading seminar course, organised around key works pertinent to cities, development and human geography. While by no means comprehensive, the syllabus provides in the first week of the course will detail some key debates in geography, urban studies and development studies, which we explore in some detail over the term. The readings will reflect a range of approaches to the disciplines of human geography, urban studies and development studies, in order to convey the dynamic interplay between these three areas of scholarship. Discussions with colleagues in these areas of research, alongside readings of foundational texts, will be aimed at exploring how theory and evidence connect in critical geographical research.

Teaching: 10 hours of lectures in the MT. 10 hours of lectures in the LT.
10 x two-hour directed reading lecture/seminars meeting in MT and LT. Students (including those auditing the course) are expected to read, circulate critical comments, and participate actively in discussion.

Formative coursework: A 2,500 word essay

Indicative reading: Readings focused on in this course will vary from session to session. A detailed syllabus will be provided at the beginning of the course, but would include works such as T Cresswell (2013) Geographic Thought; D Gregory et al, The Dictionary of Human Geography (5th edn), 2009; D Harvey, Social Justice and the City, 2009; D Harvey, The Enigma of Capital, 2010; N Smith, Uneven Development, 2008; D Massey, Space, Place and Gender, 1994; E Soja, Seeking Spatial Justice, 2010; R Peet and M Watts, Liberation Ecologies, 2004; J Ferguson, The Antipolitics Machine, 1994; T Mitchell, Rule of Experts, 2002; A Roy, Poverty Capital, 2010; and D Gregory and Allan Pred, Violent Geographies, 2006.

Assessment: Essay (100%, 5000 words) in the ST.

GY404 Half Unit
Topics in Local Economic Development

This information is for the 2015/16 session.

Availability: This course is compulsory on the MSc in Local Economic Development. This course is available on the MPhil/PhD in Geography and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A good background is required in one of the fields of economic geography, economics, management or regional and
Local Economic Development and Policy

This course deals with the analysis of theoretical and institutional issues, empirical evidence, development pre-requisites and economic development policies in the context of actions to stimulate the economic development of local and regional economies. The course is split in two parts. Both are concerned with the analysis of local economic development theories and policies. The first part of the course (GY408.1) is focused on the macro and meso-level determinants of regional and local economic development and on the design and implementation of the corresponding ‘top-down’ policies. The second part of the course (GY408.2) is concerned with ‘bottom-up’ approaches and focuses on locally initiated and managed processes which may involve a much wider range of actors in shaping and implementing local economic development initiatives.

Term A: This section of the course is generally focused on the macro and meso-level determinants of regional and local economic development and on the capacity of ‘top-down’ policies to exert an influence on these drivers, promoting growth and social and territorial cohesion. The course starts by examining the existing disparities in regional economic performance in a number of industrial, emerging and developing countries, illustrating the scope and justification for government intervention in this area. The course then considers how different theories and approaches to local and regional economic development identify different macro and meso determinants of economic performance and, consequently, suggest differentiated sets of ‘top-down’ development policies. With these analytical tools in place, the EU regional policy is used as a case study to discuss the benefits of a ‘balanced’ approach to allocation of public resources in the context of regional economic development.
the analysis, design and implementation of regional development policies, overcoming the limitations of the one-sided approaches presented in the first part of the course. In this context, special attention will also be devoted to the cases of the United States, China and India in a comparative perspective.

Term B: The second part of the course is aimed at understanding the micro foundations of local economic development, that is the determinants and effects of the behaviour, strategies and choices of key economic actors: local firms, both small and large, multinational enterprises, universities and other education and research organisations, government bodies, industry associations, NGOs, local communities, etc. The study of theoretical approaches, empirical evidence and implications of the behaviour of such actors, and their interactions, will help building up the complete analytical framework to interpret the genesis of local economic and innovation systems, their dynamics and evolution over time and the policy options available particularly from a bottom-up and integrated perspective. The lectures and workshops make use of an extended array of empirical examples and case studies across regions and industries, both in advanced and emerging economies, and consider the transferability of lessons and insights across space and time.

Teaching: 20 hours of lectures and 27 hours of seminars in the MT. 18 hours of lectures and 18 hours of workshops in the LT. 2 hours of lectures and 2 hours of workshops in the ST.

Term A: In the MT seminar teaching is based on a combination of seminars and debates.

Term B: In the LT the lectures (two-hour) will be followed by workshops (2-hour), in which students will work on case study/ projects/presentations in small groups of 4-5 people. The ST sessions concern only the second part of the course in the Lent Term (GY408). GY415) and consist of Revision and Q&A sessions.

Indicative reading: Both terms’ reading lists are mainly based on journal articles available in electronic format. Some of the readings will be chapters from the following books/publications: OECD, Competitive Cities in the Global Economy, 2006; R Capello, Regional Economics, Routledge, 2007; A Pike, A Rodriguez-Pose & J Tomaney, Local and Regional Development, 2006; R Crescenzi & A Rodriguez-Pose, Innovation and Regional Growth in the European Union, Springer, 2011; Lundvall, B-A., Joseph, KJ., Chaminade, C. and Vang, J. (Eds) Handbook of Innovation Systems and Developing Countries, Edward Elgar, 2009; S Iammarino & P McCann, Multinationals and Economic Geography: Location, Technology and Innovation, Edward Elgar 2013.

Reading lists are provided electronically on Moodle.

Assessment: Exam (75%), duration: 3 hours) in the main exam period.

Essay (25%), 2500 words).

GY410 Half Unit
Economics of Local and Regional Development

This information is for the 2015/16 session.

Teacher responsible: Dr Riccardo Crescenzi

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in City Design and Social Science, MSc in Development Management, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Why do some regions and territories perform systematically better than others in terms of economic development and wealth? What are the key drivers of local and regional economic performance? How can local and regional economic development policies boost economic activity and improve socio-economic conditions in disadvantaged areas? Globalisation and technological change have challenged the ‘traditional’ answers to these questions and call for new analytical and policy tools. This course provides students with an in-depth understanding of the macro and meso-level determinants of regional and local economic development and of the policies influencing these drivers. After examining the existing disparities in regional economic performance between and within a number of advanced, emerging and developing countries, the course illustrates the scope and justification for government intervention in this area. Various theories and approaches to local and regional economic development, leading to different policy prescriptions, are analysed in order to identify different macro and meso determinants of economic performance (from innovation and human capital to knowledge spillovers and global networks). In particular, the course dwells on the regional policy of the European Union (EU) - one of the most important large-scale regional policy experiences - in order to discuss the pros and cons of existing policy tools and illustrate the benefits of a ‘balanced’ approach to the analysis, design, management and implementation of regional and local economic development policies in a globalising world. In this context, special attention will also be devoted to the cases of the United States, China and India in a comparative perspective.

Teaching: 20 hours of lectures and 27 hours of seminars in the MT. Seminar teaching consist of a combination of seminars and debates.

Indicative reading: H W Armstrong & J Taylor, Regional Economics

A number of more specialized texts will be recommended at the beginning of the course.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

**GY413 Half Unit Regional Development and Policy**

This information is for the 2015/16 session.

Teacher responsible: Prof Andres Rodriguez-Pose STC S4.07

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is available on the MSc in Environment and Development, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A good background is required in one of the fields of management, economics, economic geography, regional and urban studies.

Course content: This course deals with the management and institutions of local and regional economic development. It dwells on the socio-economic implications of the emergence of local and regional governments and institutions as key actors in the design and implementation of economic development strategies across the world. In particular, the first section of the course analyses the consequences for economic efficiency and equality of the gradual but relentless shift of development responsibilities from the national and the supranational to the local and regional scale, linked of political and fiscal decentralisation. The second section of the course focuses, from a theoretical and empirical perspective, on the strategies being implemented by subnational governments across the world in order to cope and redress development problems. Strategies based on the building of infrastructure, the attraction of foreign direct investment, the support to local production and the promotion of local human resources are analysed in different institutional and governance contexts. The course draws on examples from Europe, the US, Latin America, and Asia.

Teaching: 20 hours of lectures and 20 hours of seminars in the LT.

A number of more specialised texts will be recommended at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

**GY415 Half Unit Local Capacity and Economic Development Policy**

This information is for the 2015/16 session.

Teacher responsible: Prof Simona lammarino STC S410

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is freely available to all MSc students in the Department of Geography & Environment. The course is available subject to availability for all other MSc students.

Course content: This course is aimed at understanding the micro foundations of local economic development, that is the determinants and effects of the behaviour, strategies and choices of key economic actors: local firms, both small and large, multinational enterprises, universities and other education and research organisations, government bodies, NGOs, local communities, etc. The study of different theoretical approaches, empirical evidence and implications of the behaviour of such actors, and their interactions and linkages, will help building up the analytical framework to interpret the genesis of local economic systems, their dynamics and evolution over time and the policy options available, particularly, but not exclusively, from a bottom-up perspective.

We will make use of an extended array of empirical examples and case studies – and the transferability of their lessons across space and time – across regions and industries, both in advanced and emerging economies. The course is particularly concerned with ‘bottom-up’ approaches and focuses on locally initiated and managed processes which may involve a wide range of actors in shaping and implementing local economic development initiatives.

Teaching: 18 hours of lectures and 18 hours of workshops in the LT. 2 hours of lectures and 2 hours of workshops in the ST.

The 2-hour Lecture and Workshop in the ST will be centred on Revision and Q&A for the exam.

Formative coursework: One optional Mock exam to be submitted normally by week 6 in the Lent Term, as it will be announced. Feedback and indicative classification will be provided at the end of the Lent Term.

Indicative reading: The course is mainly based on academic articles and papers. Some chapters will also be used from books such as: A. Pike, A. Rodríguez-Pose & J. Tomaney, Local and Regional Development, 2006; B-A. Lundvall, KJ Joseph, C. Chaminade & J. Yang (eds.), Handbook of Innovation Systems and Developing Countries, 2009; R Boschma and R Martin The Handbook of Evolutionary Economic Geography, 2010; J Cantwell & E Amann (eds.), Innovative Firms in Emerging Market Countries, 2012; S lammarino & P McCann Multinationals and Economic Geography. Location, Technology and Innovation, 2013; R Cresceni and M Percoco (eds), Geography, Institutions and Regional Economic Performance, 2013.

In general, all readings are electronically available from the LSE Library unless otherwise indicated.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

**GY420 Environmental Regulation: Implementing Policy**

This information is for the 2015/16 session.

Teacher responsible: Dr Richard Perkins STC S413, Dr Carmen Marchiori KG5 K102, Dr Michael Mason STC S510 and Dr Jennifer Baka STC 305
Availability: This course is compulsory on the MSc in Environmental Policy and Regulation. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Regulation and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental Governance.

Course content: This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation and governance. In MT, the course considers the rationale for public policy intervention, and the factors that shape the influence of different interest groups over government policy making. It proceeds to examine the nature, design and performance of different policy instruments, together with the various influences governing policy implementation processes. In LT, the course highlights key themes in environmental regulation informed by the concept of multi-level governance. This concept suggests new alignments and forms of regulation within and across state borders: the themes chosen to explore this concept include collective action, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice).

Teaching: 15 hours of lectures and 9 hours of seminars in the MT. 10 hours of lectures and 9 hours of seminars in the LT.

Formative coursework: Students are expected to prepare one formative essay in MT. In the LT students are required to give one presentation on an agreed topic. This will be graded with feedback.

Assessment: Exam (75%), duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

---

GY423 Environment and Development

This information is for the 2015/16 session.

Teacher responsible: Dr Benjamin Groom KGS. K203, Dr Charles Palmer KGS. K206, Dr Richard Perkins STC. S413 and Prof Eric Neumayer

Dr Emanuele Campiglio

Availability: This course is compulsory on the MSc in Environment and Development. This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies and MSc in Environmental Policy and Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students who have not completed a course in first year undergraduate level Economics might find it useful to audit EC100 Economics A

Course content: ‘Environment and Development’ explores the complex relationship between environment and development using the concepts and tools used in applied economic analysis: ecological, development, environmental, and institutional. Focusing on a number of selected topics and issues of contemporary policy relevance, this relationship is examined in the MT at a more macro scale before moving to a micro-scale investigation of key ecosystem services and cross-cutting themes in LT.
MT: Environment-economy linkages and the concept of sustainable economic development; The ‘source’-side: Resource availability for sustained economic growth; The ‘sink’-side: Economic growth and the environment; Trade, investment and the environment; Measuring progress towards sustainability; Technological lock-in, innovation and system transformation; Corporate social responsibility: Drivers, strategy and outcomes.

LT: Environment-poverty trap and the role of population growth; Institutions and natural resource management; Biodiversity and development; Agriculture and food security; Water management and development; The energy transition and low-carbon development; Biofuels: food, fuel, and the environment; Tropical deforestation and dealing with market failure; Urban environment and development; Policy design and evaluation for environment and development

**Teaching:** 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the LT.

(5,000 word extended essay (25%) for students of MSc Environment and Development not writing a dissertation).

---

### GY426

**Environmental and Resource Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Benjamin Groom

**Additional teacher(s):** Dr G Atkinson; S Mourato; C Palmer.

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Environmental and resource economics is at the forefront of the response to local, national and global environmental problems. As such, it has become an essential part of the thinking and actions of national and regional governments, as well as international agencies and organizations. This course seeks to develop a rigorous treatment of the theory of environmental and natural resource economics, and to show how formal economic thinking can assist real world policymaking in areas such as climate change, ecosystem & biodiversity conservation and water resource management.

The course consists of four components which cluster together the principal areas of interest and research in environmental and natural resource economics. These are: (i) foundations of environmental and resource economics; (ii) economics of pollution control; (iii) economics of renewable and non-renewable resources; and (iv) the study of international environmental problems and agreements.

**Teaching:** 15 hours of lectures and 9 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will complete one written assignment of 2,500 words in Michaelmas Term, on which they will receive written feedback.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 3000 words).

---

### GY427

**Half Unit**

**Climate Change: Science, Economics and Policy**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Simon Dietz

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available on the MSc in Environment and Development and MSc in Environmental Policy and Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is an interdisciplinary analysis of the issue of climate change. It will begin with an overview of the science of climate change, which will be accessible to students training in the social sciences. It will go on to consider the economic, political and social implications of climate change, drawing on economic analysis, as well as insights from other disciplines such as human geography and political science.

**Teaching:** 22 hours of lectures and 7 hours and 30 minutes of seminars in the MT.

**Formative coursework:** Students will write one essay (unassessed), on which they will receive written feedback. The essay serves as a mock exam, there is no word limit, but students should time themselves to write it in 50 minutes.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

### GY428

**Half Unit**

**Applied Quantitative Methods**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Benjamin Groom (KGS 2.03) and Dr Dominik Hangartner (COL 8.03)

If at all possible, Dr Groom, would prefer to be called Dr Ben Groom.

**Availability:** This course is compulsory on the MSc in Environmental Economics and Climate Change. This course is available on the MSc in Local Economic Development and MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course will provide an introduction to quantitative methods in use in modern environmental and resource economics. Emphasis will be placed on the practical use of empirical tools. This applied focus will be complemented by the investigation of assumptions and proofs that can improve the understanding of empirical results. Students will apply the methods taught using statistical/econometric software and data documenting some topical public policy questions. These applications will take place in ten seminars of one hour each. During the seminars the students will
GY431 Half Unit Not available in 2015/16

Cities, People and Poverty in the South

This information is for the 2015/16 session.

Teacher responsible: Prof Sylvia Chant

Availability: This course is available on the MSc in African Development, MSc in City Design and Social Science, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health, Community and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Population and Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Experience and/or knowledge of development and/or urbanisation in the South would be a distinct advantage

Course content: The course examines the patterns, processes and implications of urbanisation in developing societies, with particular reference to the survival and well-being of low-income groups, and the variability of urban life and poverty in different geographical contexts. The conceptual and empirical focus of the course revolves around strategies adopted at individual household and community levels to ensure sustainable livelihoods, and the interrelations of grassroots processes with policy interventions on the part of governments, international development agencies and NGOs. Specific themes include: trends in urban development in the 20th and 21st centuries; population and rural-urban migration; shelter and housing; land and tenure; urban services; the conceptualisation and measurement of poverty; the ‘urbanisation’ of poverty; the ‘feminisation of poverty’; poverty reduction strategies; employment and informality in urban labour markets; urban livelihood strategies and economic restructuring; households and gender; women-headed households; health and healthcare; participatory urban governance, civil society, and UN-Habitat agendas past, present and future.

Teaching: 20 hours of seminars in the LT and 10 hours in the MT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GY432 Half Unit

Urban Ethnography

This information is for the 2015/16 session.

Teacher responsible: Prof Gareth Jones SS06

Availability: This course is available on the MSc in African Development, MSc in City Design and Social Science, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course considers the role of ethnography to how we understand cities. We will look in detail at different types of ethnography and compare with other means of representing the city, through the novel and film, starting with Rem Koolhaas on Lagos. Specific themes will cover the urban flâneur and ethnographer, street ethnography, culture of poverty and marginality, time and waiting, bodies and sex; infrastructure and mobility, gates and the middle class; drugs, the gang and violence, and slums. The course will consider the role of ethnography in developing world cities in particular but also draw from studies of developed world. The course offers an opportunity to reflect on urban places in a way which does not reduce them to arenas for technical, policy-driven planning, and so as to consider the urban experience more broadly. The course will raise issues of methodology.

Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Assessment: Essay (100%, 5000 words) in the ST.

GY438 Half Unit Not available in 2015/16 Cities and Social Change in East Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Hyun Shin S601F

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in City Design and Social Science, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Real Estate Economics and Finance, MSc in Regional And Urban Planning Studies, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course encourages students to develop their critical knowledge and comparatively understand how urban space is transformed in different social, economic and political settings, and what social implications are made upon the powerless and poor. In order to examine the process of social and spatial transformation in times of compressed urbanisation, the course will draw on various examples of urban policy and practice from cities across Asia, with emphasis on newly industrialised economies in East and Southeast Asia as well as on mainland China. Focusing on urban questions in particular, the course comprises of lectures and seminars on the following themes: speculative urbanisation; the role of the state; urban growth politics; land politics and real estate; mega-projects; gentrification; displacement; the right to the city and urban struggles; financialisation. Students will also have opportunities to view and discuss various sources of audiovisual materials and documentaries related to these themes.

Course Facebook page: http://goo.gl/k7a22

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: One formative essay (1500 words) on which individual feedbacks will be provided.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 3000 words).

GY439 Half Unit Cities, Politics and Citizenship

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low S512

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Health, Community and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Perspectives on contemporary urban politics. The course will equip students interested in urban change and development to understand and critically assess the variety of ways in which urban politics and policies are imagined and discussed in universities as well as in the world of policy. It will also develop their understandings of key debates and themes in contemporary urban political life.

Topics covered will include: imagining urban politics; theories of urban politics; ‘globalisation’ and urban political life; urban governance; civil society and urban social movements; urban dimensions of citizenship and migration; policing, violence and urban politics; urban politics and ‘neoliberalism.’

Teaching: 20 hours of lectures in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

GY441 Half Unit The Politics of Housing

This information is for the 2015/16 session.

Teacher responsible: Dr Romola Sanyal

Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Real Estate Economics and Finance, MSc in Regional And Urban Planning Studies, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the politics
of housing from a transnational and comparative perspective. The course will link the empirical analyses on housing to theoretical discussions on class, community, gender, ethnicity and design. It will analyse housing issues ranging from informality, homelessness and gated communities to housing tenure, architectural design and housing as a humanitarian tool. This is an interdisciplinary course, drawing upon debates in fields such as Architecture, Urban Planning, Geography, Sociology, Anthropology and Development Studies. The course will help students develop a broad knowledge of the politics of housing in different countries and how they intersect with issues such as urban development, housing finance and public policy. It will also encourage students to think about housing issues relationally and globally.

Themes
Some of the themes covered in this course include: Traditional Housing, Community and Housing Design, Gender and Housing, Race and Ethnicity and Housing, Homelessness, Housing and Emergencies etc.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

1 1500 word essay and 4 one page reading responses

Assessment: Essay (80%, 5000 words) in the ST.

Presentation (20%) in the LT.

---

**GY447** Half Unit

**The Economics of Regional and Urban Planning**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Gabriel Ahlfeldt

**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should normally have completed an introductory course in economics. Students without this background may wish to attend the micro-economic section of EC100 Economics A together with the GY447.A classes.

**Course content:** To provide an economic framework in which to analyse the structure of economic activity within the urban and regional context; the impact of this structure on urban form; the role of government at the local level and local economic policy applications. The course aims to provide an economic framework in which to analyse the structure of economic activity within the urban and regional context; the impact of this structure on urban form; the role of government at the local level and local economic policy applications.

**Topics include:** The determinants of industrial, commercial and residential location. The interaction between activities within a spatial context. The economics of land markets and of the development process. The determinants of rents and densities. Economic models of urban structure. Sources of market failure in the urban economy. The rationale of government intervention. Techniques of intervention in the urban and environmental context. The role of the public sector: pricing, allocation, production and investment decisions. Urban and regional economic policy issues.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. 2 hours of lectures in the ST.

There will also be 10 classes in the MT mainly for those without a previous economic background.

**Indicative reading:**

1) A O’Sullivan Urban Economics;
2) D DiPasquale & W C Wheaton, Urban Economics and Real Estate Markets;
3) J F McDonald, Fundamentals of Urban Economics;
4) R W Vickerman, Urban Economics;
5) H Armstrong & J Taylor, Regional Economic Policy and its Analysis;
6) M Fujita, Urban Economic Theory;
7) J Stiglitz, Economics of the Public Sector;
8) M Common, Environmental and Resource Economics;
9) H Dunkerley (Ed), Urban Land Policy: Issues and Opportunities;
10) Pindyck & RubinfeldMicroeconomics, Suslow & Hamilton Study Guide.

More detailed readings will be provided during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GY446** Half Unit

**Planning for Sustainable Cities**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Nancy Holman STC315b

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** A critical examination of the issues involved in planning for sustainable development at the urban level together with a review of policies and practice; the course focus largely on the problems facing developed countries. The course comprises ten lectures on the following themes; sustainability, sustainable development at the urban level, sustainability indicators, environmental assessment, environmental limits, carrying capacity and ecological footprints, the debate on sustainable urban form, Local Agenda 21, public participation, environmental governance.

**Teaching:** 15 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

**Formative coursework:** Students are expected to prepare a seminar paper and presentation.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
GY448 **Half Unit**

Social and Political Aspects of Regional and Urban Planning

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alan Mace STC315a and Dr Romola Sanyal 509

Dr Romola Sanyal

**Availability:** This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MSc in City Design and Social Science, MSc in Human Geography and Urban Studies (Research), MSc in Public Administration and Government (LSE and Peking University) and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course will explore the impact of key social and political processes on the activity of urban and regional planning. These processes will be explored at the international, national, and local scale by looking at the impacts of both globalisation and neo-liberalism on the planning of cities and regions. The main focus is on the relationship between planning as a function of governance, urban politics and the market. Key concepts covered in the course include: claims for and against urban planning; and the politics of planning - including community politics and the effect of institutional structures on the nature and form of the planning system. These concepts are supported by an introduction to the development of planning practice (primarily in the UK) and a review of key strands of planning theory.

**Teaching:** 15 hours of lectures and 8 hours of seminars in the MT.

**Formative coursework:** Students will submit a 1,500 word essay. In addition students will prepare and present a topic in the seminar classes either singly or as part of a small group.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 3000 words) in the MT.

---

GY449 **Half Unit**

Urban Futures

This information is for the 2015/16 session.

**Teacher responsible:** Dr Austin Zeiderman

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 34 students. Students must apply through Graduate Course Choice on LSE for You. Students should provide a short written explanation of why they are interested in taking the course.

**Course content:** By now we are accustomed to hearing that, for the first time in history, the majority of the world’s population lives in cities. We may also be aware that more than one billion people now live in the urban slums and shantytowns of the global South, and that this is where the majority of world population growth will take place. But what sort of futures are being imagined for the cities of the twenty-first century? In response to this question, GY449 Urban Futures will critically analyse how the future of cities, and the cities of the future, have been thought about and acted upon in different times and places. Students will learn to adopt a geographical and historical approach to urban futures by exploring how ways of envisioning the future of cities differ across time and space. Treating the future as a social, cultural, and political reality with a profound influence on the present, the course will examine how urban areas are planned, built, governed, and inhabited in anticipation of the city yet to come. Each week will be organised around a particular model for the future of the city: the ideal city, the dystopian city, the modernist city, the (post)colonial city, the capitalist city, the (post)socialist city, the organic city, the global city, and the secure city. These models will be examined through concrete case examples and will enable the discussion of broader theoretical perspectives in urban studies, with a specific focus on the critical analysis of urban futures. Though grounded in urban geography, this course will draw upon texts and other materials from anthropology, sociology, history, cultural studies, literature, film, philosophy, social theory, architecture, art, and city planning. Its primary objective is to equip students with sophisticated, critical ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Students will be expected to produce 1 presentation in the MT.

The formative presentation will be an opportunity for students to begin preparing for their assessed essay and to receive feedback from their peers and from the course leader. Each student will be asked to make a brief presentation, which should include a proposed essay topic, a list of potential sources, and a preliminary outline.

**Indicative reading:** A detailed syllabus will be provided at the beginning of the course, but will include works such as:

- Raymond Williams, The Country and the City (1973)
- Thomas More, Utopia (1516)
- David Harvey, Spaces of Hope (2000)
- Mike Davis, Planet of Slums (2006)
- James Ferguson, Expectations of Modernity: Myths and Meanings of Urban Life on the Zambian Copperbelt (1999)
- Svetlana Boym, The Future of Nostalgia (2001)
- Timothy Mitchell, Colonising Egypt (1991)
- Jane M. Jacobs, Edge of Empire: Postcolonialism and the City (1996)
- Friedrich Engels, The Condition of the Working Class in England (1845)
- Walter Benjamin, “Paris: Capital of the Nineteenth Century” (1935)
- Georg Simmel, “The Metropolis and Mental Life” (1903)
- David Harvey, The Condition of Postmodernity: An Enquiry into the Origins of Cultural Change (1990)
- Ebenezer Howard, “The Town-Country Magnet” (1898/1902)
- Jane Jacobs, The Death and Life of Great American Cities (1961)

**Assessment:** Exam (100%, 5000 words) in the LT.

The assessed essay will be a critical and creative exercise in the analysis of urban futures. Students will be given a choice: 1)
Identify and research one vision of the urban future that exists in the present; or 2) Take a particular city and research the ways its future has been envisioned in the past, and how it is currently being envisioned in the present. Essays must contain no more than 5,000 words of text although they may also include images, as well as any other media that pertains to the argument.

GY450
Planning Practice and Research
This information is for the 2015/16 session.
Teacher responsible: Dr Nancy Holman STC315b and Dr Alan Mace STC315a
Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MPhil/PhD in Regional and Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The aim of this course is to provide students with an understanding of the current planning issues faced by practitioners and their policy responses. This will begin with an introduction to the planning context of London and an overview of the British planning system. This will be followed by weekly sessions with invited speakers involved in planning practice and research. They will be engaged in relevant current research or be practicing planners or policy-makers from central or local government, research agencies or consultancy. The content will consist of a series of guided walks, lectures and seminars covering issues of current concern and debate within urban and regional policy and planning.
Teaching: 15 hours of lectures in the LT. 15 hours of lectures in the LT.
There will normally be 25 hours of lectures and seminars, mainly from visiting speakers, plus three study trips. These will take place throughout the year.
Assessment
Assessment: There is no Assessment in this course but the content will be relevant to the assessed courses in the MSc Regional and Urban Planning Studies Programme.

GY452 Half Unit
Urban Research Methods
This information is for the 2015/16 session.
Teacher responsible: Dr Hyun Shin S601F
Additional teacher(s): Professor Gareth Jones; Dr Neil Lee; Dr Romola Sanyal; Dr Austin Zeiderman; Dr Claire Mercer
Availability: This course is compulsory on the MSc in Urbanisation and Development. This course is not available as an outside option to students on other programmes where regulations permit.
Course content: The course aims to introduce students to the key methods that are frequently mobilised to carry out research on urbanising societies around the world. The course is designed to help students think more systematically about methodological considerations in order to execute a successful dissertation research. Below is a list of themes to be covered in the course:
• Designing an urban research project and ethics
• Comparative (case) studies
• Working with archives
• Interviews and focus groups
• Conducting ethnography
• Quantitative data and questionnaires
• Analysis and write-up
Teaching: 8 hours of lectures, 12 hours of seminars and 5 hours of workshops in the LT.
Assessment: Essay (60%, 2500 words) and research proposal (20%) in the LT.
Presentation (20%) in the LT.

GY454 Half Unit
Urban Policy and Planning
This information is for the 2015/16 session.
Teacher responsible: Dr Alan Mace SS09 and Dr Nancy Holman SS14
Dr Ryan Centner
Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course provides a synthesised approach to the analysis of urban policy-making and plan formulation. It will explore the way in which economic, political and social forces interact to effect policy approaches in different spatial settings. We will cover urban regeneration policy and community development as they relate to neighbourhood planning. The aim is also to gain an understanding of the causes of similarity and difference in policy approaches. Students will undertake a group research project based on a London neighbourhood including an assessment of local planning policy.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Urban Task Force, Urban Renaissance;DETR, Our Towns and Cities: The future; R Atkinson ; G Moon, Urban Policy in Britain; P Hall ; C Ward; Sociable Cities; E Blakely ; M Snyder, Fortress America;D Judd ; S Fainstein, The Tourist City; J Mannigian, Fantasy City;T Hall ; P Hubbard, The Entrepreneurial City.
Assessment: Essay (100%, 5000 words).
A 5,000 word essay linked to the London neighbourhood planning project.

GY455 Half Unit
Economic Appraisal and Valuation
This information is for the 2015/16 session.
Teacher responsible: Prof Giles Atkinson STC302 and Prof Susana Mourato S420
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development,
Applied Urban and Regional Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Christian Hilber STC.S418A

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. It is available by arrangement with the teacher responsible as an option to other students on other programmes who have an appropriate academic background and an interest in real estate markets.

Course content: An examination of how real property markets operate in practice and of the analytical techniques and data available for analysts and practitioners. Specific areas of study include: the availability and structure of data sets in the context of property: problems of: price measurement; user/investment categories; professional methods of valuation (appraisal) and possible impact on price formation: creating and manipulating datasets; measuring property performance; analysis to guide portfolio selection; anticipating and evaluating investment opportunities. Specific sector case studies: industrial, retail, commercial, and residential: investment portfolio choice and management. Briefing on course project/essay. Defining research objectives and methodology in practice.

Teaching: 20 hours of lectures, 4 hours of seminars and 8 hours of workshops in the MT. 8 hours of workshops and 20 minutes of help sessions in the LT.

The majority of the lectures in the Michaelmas term are provided by senior practitioners in real estate research and analysis. The seminars/workshop sessions are organised by Dr Ahlfeldt to prepare students for their projects. Time will be allocated for students to have up to 20 minute one-on-one meetings with either Professor Cheshire or Dr Ahlfeldt during the Lent Term to discuss their projects. In addition there will be voluntary statistical/econometric workshops and support available in both the Michaelmas and Lent terms.

Indicative reading: There is no course text. CSO guides to Government Statistics; publications from Investment Property Databank and other research departments and organisations in the real property markets; Journal of Property Research, Estates Gazette.

Assessment: Essay (100%, 3000 words).

A 3,000 word project or essay identifying a research problem in real estate markets on a specific issue (e.g., ‘The Impact of the 2008 Financial Crisis on Office Rents in Hong Kong’, ‘Impact of Incomes on House Prices in the UK’, ‘Which Side of Beijing-Tianjin...’
GY459  Half Unit
Urban Theory and Policy in the Global South
This information is for the 2015/16 session.
Teacher responsible: Prof Gareth Jones S506, Dr Ryan Centner S601 and Prof Sylvia Chant S515
Availability: This course is compulsory on the MSc in Urbanisation and Development. This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: None.
Course content: This course aims to provide a grounding in key debates in urban studies and policy with reference to the Global South. It highlights the interconnections between evolving urban ideas and research and policy. Topics include The City and Urban Bias; the State and ‘Public’ Policy; Social Life of Cities; Gender and Poverty, Inequality, Slums and Elite spaces; Governance and Participation; Rights to the City; violence and conflict cities. Dedicated lectures will draw from staff research, with particular emphasis on Argentina, Brazil, Mexico, India, The Gambia, South Africa.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: One essay of 1,500 words (formative).
Indicative reading: A comprehensive reading list mostly focussing on articles will be provided. Useful books include: Beall, J. and S. Fox, Cities and Development, (2009); S Chant, Gender, Cities and the Millennium Development Goals in the Global South, 2007; D Chavez & B Goldfrank, The Left in the City: Participatory Local Governments in Latin America (2004); K Datta & G A Jones (Eds), Housing and Finance in Developing Countries, Routledge (1999); M Davis, Planet of Slums (2006); A Durand-Lasserve & L Royston, Housing and Finance in Developing Countries, Routledge (1999); None.
Course content: This course aims to provide students with a grounding in key debates in urban studies and policy with reference to the Global South. It highlights the interconnections between evolving urban ideas and research and policy. Topics include The City and Urban Bias; the State and ‘Public’ Policy; Social Life of Cities; Gender and Poverty, Inequality, Slums and Elite spaces; Governance and Participation; Rights to the City; violence and conflict cities. Dedicated lectures will draw from staff research, with particular emphasis on Argentina, Brazil, Mexico, India, The Gambia, South Africa.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: One essay of 1,500 words (formative).
Assessment: Exam (75%), duration: 2 hours) in the main exam period.
Essay (25%, 2500 words) in the LT.

GY460  Half Unit
Techniques of Spatial Economic Analysis
This information is for the 2015/16 session.
Teacher responsible: Prof Steve Gibbons S511
Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Real Estate Economics and Finance and MSc in Regional And Urban Planning Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have a good understanding of statistics and applied micro-econometrics at an undergraduate level or, for example, have studied a course such as Applied Quantitative Methods (GY428) in Michaelmas term. It is advisable to look at the first two key readings listed below before signing up for this course. Students who are comfortable working with computers, data and already have basic familiarity with STATA or other statistics/econometrics software will get the most out of this course.
Course content: The aim of the course is to develop the technical tools necessary to understand and analyse spatial economic and social phenomena and to apply quantitative techniques to analyse economic and social problems, processes and policies at the urban and regional scale. The course also provides a hands-on introduction to using Geographical Information Systems and other spatial computer applications for research purposes, but you should not expect to get a full training in GIS from this course.
Topics typically include: Spatial representation, spatial data and Geographical Information Systems; spatial weights, aggregation and smoothing methods; spatial econometric models and neighbourhood effects; answering causal questions in the spatial context; spatial interaction and discrete choice models; spatial cluster and point pattern analysis; inequality, competition and diversity.
Teaching: 20 hours of lectures and 20 hours of seminars in the LT. 30 hours of teaching in LT comprising computer classes, lectures, and seminars for discussion of papers. The majority of sessions will take place in a computer classroom and these sessions combine lecture and practical material. Formative feedback will be available on submitted answers to seminar exercises and a past exam paper.
Formative coursework: Throughout the term, students are given the opportunity to provide answers to problem sets, written answers to class exercises and computer workshop tasks, and past examination questions, on which feedback will be given.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Project (50%, 2500 words) in the ST.
An unseen examination of two hours (50%) and a project of not more than 2,500 words to be handed in at a specified date in the ST (50%).

GY462  Half Unit
Real Estate Finance
This information is for the 2015/16 session.
Teacher responsible: Dr Olmo Silva SS06A
Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MSc in Accounting and Finance, MSc in Management and Regulation of Risk, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course aims to provide students with concepts and techniques for analysing financial decisions in real estate development and investment.

Topics include: basic real estate investment analysis and financial leverage; real options approach applied to real estate; real estate investment performance and portfolio considerations; fixed and flexible rate mortgage loans and mortgage payment issues; debt securitisation (secondary mortgage market & mortgage backed securities); tax transparent real estate investment vehicles (REITs); and international real estate (time permitting).

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. External interventions by real estate practitioners will be scheduled when feasible.

Formative coursework: Students will be expected to complete in-class exercises and up to two take-home case-studies.

A more detailed reading list will be handed out at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

**GY465  Half Unit**

**Concepts in Environmental Regulation**

This information is for the 2015/16 session.

Teacher responsible: Dr Richard Perkins STC, S413 and Dr Jennifer Baka KG51.05

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Local Economic Development, MSc in Management and Regulation of Risk, MSc in Regional And Urban Planning Studies, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides critical insights into the nature, dynamics and practice of environmental regulation. It considers the rationale for policy intervention and the influence of different interest groups on environmental policy making. The course proceeds to examine the characteristics, design and performance of different policy instruments, together with the various influences governing policy implementation processes.

Teaching: 15 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students are expected to prepare one formative essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

**GY464  Half Unit**

**Race and Space**

This information is for the 2015/16 session.

Teacher responsible: Dr Romola Sanyal

Availability: This course is available on the MPhil/PhD Human Geography and Urban Studies, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This postgraduate course considers the relationship between race and space linking critical race, colonial and postcolonial studies and critical human geography. The question of race cannot be meaningfully delinked from other identity politics such as gender, class, caste and religion, hence, this course studies these in tandem with each other. We consider a series of events at the interface of racial and spatial control, through themes such as colonialism, immigration, forms of apartheid, segregation and varieties of ‘ghettos’ and the political economy of incarceration. The course uses social theory to develop a situated, comparative analysis of racial geographies in the contemporary world. It will also draw on recent work in colonial, postcolonial and critical race studies. The central questions of the course are: How have racial geographies been made, reproduced, and transformed in connected ways, and what critical tools are necessary for the linked work of anti-racism and spatial justice?

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: A 2,500 word essay and 4 one page reading responses.

Assessment: Essay (100%, 5000 words).

---

**GY467  Half Unit**

**Global Migration and Development**

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Mercer STC, 418

Availability: This course is available on the MSc in African Development, MSc in Anthropology and Development, MSc in Development Management, MSc in Development Studies, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in Regional And Urban Planning Studies, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the relationship between migration, diaspora and development with a particular focus on migrants’ and diasporas’ contributions to development in the Global South. The course encourages students to develop a critical understanding of the role of different diasporas in political, social and economic development. This is achieved through (i) a critical consideration of theoretical debates in geography, sociology, anthropology and development studies on diaspora, migration and development, (ii) an engagement with contemporary migration and development policies, (iii) an examination of diasporas’ developmental work including economic and social remittances, and political activities. The final part of the course examines these debates in the context of the African diaspora.
Issues in Environmental Governance

This information is for the 2015/16 session.

**Teacher responsible:** Dr Richard Perkins S413, Dr Michael Mason S510 and Dr Carmen Marchiori KGS102

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Management and Regulation of Risk, MSc in Regulation, MSc in Risk and Finance and MSc in Urban Policy (LSE and Sciences Po).

This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be taken with GY465 Concepts in Environmental Regulation.

**Course content:** This Lent Term course is designed to highlight key themes impacting on environmental regulation across different scales of governance. While the emphasis is on global and transnational policy processes, attention is also paid to the implications of these processes at regional and local scales. The organising framework of ‘multi-level governance’ suggests new alignments and forms of regulation which require us to consider environmental decision-making within and beyond the territorial authority of a single state. The indicative themes chosen explore distinctive challenges for multi-level governance - collective action, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice). These themes, which will be explored in student-led seminars, run...
explicitly or implicitly through many environmental policy debates.

**Teaching:** 10 hours of lectures and 9 hours of seminars in the LT.

**Formative coursework:** All students are required to make one presentation on an agreed topic: this will be graded with feedback for individual students.

**Indicative reading:** While there is no one single text that covers all aspects of the course, students are advised to consult the following:

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**GY479   Half Unit**

**Urban Revolutions**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ryan Cengetner

**Availability:** This course is available on the MSc in City Design and Social Science, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Social Policy and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course uses the concept of “urban revolutions” as an organizing principle to introduce students to key theories and debates related to societies undergoing rapid urban change. Course lectures examine “urban revolution” in three senses. The first pertains to Henri Lefebvre’s use of the term to signify the “complete urbanization of society” – a historical process by which social life, even outside of cities, becomes urbanized. This means addressing the relationship between the country and the city, the idea of the urban in historical perspective, and the relationship between urban life in the global North and South. The second treatment of “urban revolution” considers the city as a site for radical political change and social experimentation. This means studying cities as spaces of movement, resistance, and innovation, with an emphasis on urban experiments in the South. Thirdly, urban revolution is analysed in terms of the explosion of theorizations about the nature of the urban, how to study it, and how to make a difference in “the urban,” both intellectually and materially, within a global economy. Through these three overlapping lenses – history, politics, and theory – the course aims to equip students with a conceptual and empirical foundation for analyzing city transformations and globalized urbanization, with particular attention to emerging urbanisms in the global South. Topics covered may include the following: industrialization and immigration; processes of urbanization, ghettoization, and gentrification; global cities; the colonial and postcolonial city; the right to the city; urban uprisings; urban informality; urban violence; the geopolitics of urban theory.

**Teaching:** 10 hours of lectures, 10 hours of seminars and 10 hours of seminars in the MT.

**Formative coursework:** Students will be expected to produce 1 essay in the LT. A short essay of 2000 words (maximum). There are two different options for this: either exploring the applicability of one week’s readings to an empirical case outside the course reading, or an in-depth conceptual exploration of connections or discrepancies between particular readings from two different weeks in the course.

**Assessment:** Essay (100%, 5000 words) in the ST. This essay of 5000 words (maximum) will be based on a small set of options for questions provided by the instructor. These will allow wide enough scope for students with different academic backgrounds and thematic or geographical interests to be accommodated, while still hewing to the organizing topics of the course.

**GY480   Half Unit**

**Remaking China: Geographical aspects of Development and Disparity**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Hyun Shin S601F

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Real Estate Economics and Finance, MSc in Regional And Urban Planning Studies, MSc in Social Policy and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The recent decades have seen China emerging as one of the most important global economic and political players. The course aims to offer opportunities to gain comprehensive and yet critical insights into China’s development in urban, regional and global dimensions by reflecting upon the significance of China’s role in the world economy as well as the challenges emerging within China. Tentative topics are as follows: China’s rise in the global capitalism; Uneven development and regional disparities; Governing China and the role of the state; Speculative urbanisation; Mega-city regions; Gender and China; Factory of the World and work inequalities; Migration, hukou and local citizenship; Public participation and rights activism.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 essay in the LT. One formative essay (1,500 words) on which individual feedbacks will be provided

Workplace. Duke Univ. Press
Assessment: Essay (100%, 4000 words) in the ST.

GY499
Dissertation
This information is for the 2015/16 session.
Teacher responsible: Prof Susana Mourato S420, Prof Sylvia Chant
STC417a and Dr Gabriel Ahlfeldt
Programme Director of relevant Msc programme.
Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Real Estate Economics and Finance, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available on the MSc in Environment and Development. This course is not available as an outside option.
Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.
Teaching: Teaching comprises a set of lectures and workshops which vary according to the particular Master's programme being undertaken:
- MSc Environment & Development; MSc Environmental Policy & MSc Environmental Economics & Climate Change: 1 general two-hour lecture in MT on dissertation guidance; 1 x 3-hour workshops in MT for each of the environment programmes (choosing a topic and managing research); 1 x 3-hour joint methods workshop in LT.
- MSc Real Estate Economics & Finance: 1 x 2-hour Lecture in MT on dissertation guidance. MSc Local Economic Development: 1 x 2-hour Lecture in MT on dissertation guidance. MSc Urbanisation & Development: 1 x 2-hour Workshop in MT on dissertation preparation. MSc Regional & Urban Planning Studies: see course GY450, ‘Planning Practice and Research’.
Assessment: Dissertation (100%, 10000 words) post-summer term.

HY400
Crisis Decision-Making in War and Peace 1914-2003
This information is for the 2015/16 session.
Teacher responsible: Dr Roham Alvandi SAR.M.12
Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University). This course is available on the MSc in History of International Relations, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: The course is intended for students with or without a detailed knowledge of the international relations of the twentieth century. Students without a detailed knowledge are advised to undertake preliminary background reading.
Course content: The history of international relations from the First World War to the Iraq War. Particular stress is placed upon key turning points and on crisis decision-making. Topics examined in this course include German decision-making in 1914; peacemaking, 1919; the Ruhr occupation crisis; Manchuria, Abyssinia and the crises of collective security; the Munich agreement; the Nazi-Soviet Pact and the outbreak of war in 1939; Hitler’s decision to invade the Soviet Union; the outbreak of the Pacific War; the decision to drop the atomic bomb; the creation of the state of Israel, 1948-49; the Berlin Blockade; the outbreak and escalation of the Korean War; the Suez Crisis; the Cuban Missile Crisis; the US and Vietnam, 1961-65; the Arab-Israeli Wars of 1967 and 1973; German reunification and the collapse of the Soviet bloc; the origins of the Gulf War, 1990-91; the road to the 2003 Iraq War.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
The course will be taught in 20 weekly seminars of two hours’ duration. Students will be expected to read widely in documentary and other primary sources, and to participate actively in the seminars, which will address the historiographical debates raised in the secondary literature on the topics covered.
Formative coursework: Students will write four essays. Three of the essays will be up to 3,000 words in length and draw upon primary sources. The fourth will be a shorter timed essay produced in class.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
There will be one three-hour written examination in the ST. Questions on the earlier and the later topics are in separate sections of the examination paper. Candidates are expected to answer three questions, with at least one taken from each section of the paper.

HY411
European Integration in the Twentieth Century
This information is for the 2015/16 session.
Teacher responsible: Dr Nicholas Ludlow SAR.2.16
Availability: This course is available on the MSc in Comparative Politics, MSc in EU Politics, MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: A prior knowledge of 20th century European history will be an advantage. Students unfamiliar with the subject should do some preliminary reading. A reading knowledge of French and/or German will be useful but in no sense essential.
Course content: The antecedents and development of Western European integration from the First World War to the 1990s. European integration before 1914; German and Allied projects during the First World War; inter-war developments and the Briand Plan; the Nazi New ‘Order’; Resistance and Allied planning during the Second World War; the impact of the Marshall Plan; Federalism and Christian Democracy; the Schuman Plan and the Coal and Steel Community; the European Defence Community project; the Treaties of Rome; the Common Agricultural Policy; the integration policies of the Six and Britain; de Gaulle and the Communities; enlargement; monetary integration; developments in the 1970s and 1980s; Maastricht.
Teaching: 5 hours of lectures and 15 hours of seminars in the MT. 5 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Three essays will be required in the course of the year. The essay in the LT will be an assessed piece of work counting towards the final assessment. In addition there will be a mock exam.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%) in the LT.

HY423 Empire, Colonialism and Globalisation

This information is for the 2015/16 session.

Teacher responsible: Dr Gagan D. S. Sood

Availability: This course is compulsory on the MSc in Empires, Colonialism and Globalisation. This course is available on the MA Global Studies: A European Perspective, MSc in Global History, MSc in International Affairs (LSE and Peking University) and MSc in International and World History (LSE & Columbia). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the history of empires since the fifteenth century, and their legacy for our world today. It analyses specific imperial formations, with prominence given to the Ottoman, Mughal, Qing, Spanish, Portuguese, French, British and American empires. It explores conceptual and methodological debates concerning the nature and significance of given empires, and the dynamics of their rise and fall. The course also explores the extent to which the imperial past has helped to shape the processes of globalisation in early modern, modern and contemporary times. A number of major themes are addressed, including: financial and industrial capitalism; cross-cultural encounters; the role of the periphery and local actors; climate, diseases and the environment; imperial ideologies; the great divergence; colonial science and technology; the relationship between colonial and metropolitan societies; race, ethnicity and gender; post-colonialism. The course is structured so as to encourage general and comparative discussions rooted in specific case studies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
HY424
The Napoleonic Empire: The Making of Modern Europe

This information is for the 2015/16 session.
Teacher responsible: Dr Paul Keenan E391
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations and MSc in International and World History (LSE & Columbia). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was dominated by the Napoleonic Empire and its impact was felt across the continent and in parts of the non-European world. Through an analysis of both those areas directly incorporated into the Napoleonic empire and of those that lay beyond it, this course will examine the extent of the direct and indirect influence of this era on the development of what we understand by a modern European society and a modern state system. The course analyses how this empire was created, as well as the states and societies that it forged. The varied and sometimes contradictory elements of this era will be analysed - from the impact of the growth of speculation, nationalism and the codification of laws to the beginnings of Romanticism, manifestations of early nationalism and monarchical reaction after 1815. The course will also assess the significance of both the reality and the ‘myth’ of empire, in the assessment of contemporary observers and also in the later nineteenth and twentieth centuries. The course will cover the following topics: the origins of the Empire; changes in armies and warfare; analysis of the changing nature of the Napoleonic Empire from the core to the periphery; the impact of the Empire on countries that remained beyond it; Europe’s relationship with the non-European world during this period; the diplomacy of war and the ‘system’ that emerged after 1815; the impact of the Napoleonic era on the modernisation of society, the economy, law and the state; early manifestations of nationalism in the Italian and German lands, Spain and Russia; reaction against the Napoleonic ‘system’ after 1815. The course will also assess the significance of both the reality and the ‘myth’ of Napoleon and his empire, for contemporary commentators and also in the later nineteenth and twentieth centuries.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.
Formative coursework: Students will be required to write three essays. They will also be required to answer a mock examination question.
Indicative reading: A detailed Reading List will be issued at the beginning of the course. Useful introductory works include: G. Ellis, Napoleon; G. Ellis, The Napoleonic Empire; M. Broers, Europe under Napoleon 1799-1815; S. J. Woolf, Napoleon’s Integration of Europe; P. O’Dwyer (ed), Napoleon and Europe; C. Esdaile, The French Wars 1792-1815; O. Connelly, Napoleon’s Satellite Kingdoms; P. Geyl, Napoleon, For and Against.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY429
Anglo-American Relations from World War to Cold War

This information is for the 2015/16 session.
Teacher responsible: Dr Aurélie Basha i Novosejt SAR M.13
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course analyses the changing nature of the Anglo-American “special” relationship from its creation against the backdrop of the Second World War in Europe through to the end of the Cold War. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956.
The topics covered include: Anglo-American relations in historical perspective; the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American “Occupation” of Britain during the Second World War; the emergence of the Cold War in Europe, 1945-49; the Cold War in Asia, 1945-54; the Palestine question; the Suez Crisis, 1956; nuclear relations and the Skybolt Crisis; Kennedy, Macmillan and the Cuban Missile Crisis; Anglo-American relations and European integration, decolonisation and Anglo-American relations since 1945; the impact of the Vietnam War; the Cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; Thatcher, Reagan and the Cold War in the 1980s; the Falklands War; the significance of personal relations at the top; retrospective and prospects for Anglo-American relations.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
The course will be taught by means of 20 seminars of two hours duration during the MT and LT. ST to be determined.
Formative coursework: Three pieces of written work must be submitted by students taking this course. These consist of two essays of up to 3,000 words in length and one timed class essay.
Indicative reading: For an introduction to Anglo-American relations, students should consult the following texts: D Reynolds & D Dimbleby, An Ocean Apart: the Relationship between Britain and America in the Twentieth Century (1988); J Dumbrell, ‘A Special Relationship’: Anglo-American Relations from the Cold War to Iraq (2006); C Bartlett, The Special Relationship: A Political History of Anglo-American Relations Since 1945 (1992; W R Louis & H Bull (Eds), The Special Relationship: Anglo-American Relations since 1945 (1984); D C Watt, Succeeding John Bull: America in Britain’s Place, 1900-75 (1984). A detailed reading list will be issued at the start of the course.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY432
From Cold Warriors to Peacemakers: The End of the Cold War Era, 1979-1999

This information is for the 2015/16 session.
Teacher responsible: Dr Robert Brier
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Western (European) diplomacy in the 1980s to the mid-1990s examining tensions, rivalries and linkages not merely between the western and communist blocs, but also within them, as well as studying the events reflecting the shift from the Cold War to the post-Cold War world. The aim is to address from a historical perspective the diplomacy of the end of the East-West conflict, German reunification, the Yugoslavian wars, European integration, and NATO enlargement. The domestic political bases of, and the political relations between, the leading figures (Gorbachev, Yeltsin, Reagan, Bush, Thatcher, Major, Mitterrand, Delors and Kohl) will be covered as well as the diplomacy of the period. Major topics will include Thatcherism; Reaganomics; Gorbachev’s new thinking; the
reunification of Germany; the collapse of the Soviet Union and its wider empire; the Gulf War and Yugoslavian Wars; America and her Western European partners; the Single European Act, the Maastricht Treaty and the Euro; the security arrangements of Russia and NATO after the fall of communism.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Short class papers, engagement in role play, a number of discussions on Moodle, and two 3,000 word essays during the year. There will be a one-hour timed essay (Mock Exam).

Indicative reading: A full bibliography will be provided at the first meeting of the class and is available on Moodle. Key books include: Margaret Thatcher, The Downing Street Years; EHH Green, Thatcher; Julius W Friend, The Long Presidency, France in the Mitterrand Years; Martin McCauley, Gorbachev; Hannes Adomat, Imperial Oversretch; Saki Dockrill, The End of the Cold War Era; George Bush & Brent Scowcroft, A World Transformed; Philip Zelikow & Condoleezza Rice, Germany Unified and Europe Transformed; Misha Glenny, The Balkans 1804-1999; Sean Kay, NATO and the Future of European Security; Kristina Spohr Readman, Germany and the Baltic Problem: The Development of a New Ostpolitik, 1989-2000.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY435
Political Islam: From Ibn Taymiyya to ISIS
This information is for the 2015/16 session.

Teacher responsible: Dr Kirsten Schulze M14 Sardinia House

Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia), MSc in Religion in the Contemporary World and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course has six objectives: i. To examine the evolution of political Islam as a set of ideas. ii. To compare and contrast different models of Islamic State. iii. To explore the strategies used by Islamist movements to Islamise a state as well as state strategies to prevent this. iv. To explore the phenomena of transnational Islamism and international jihadism. v. To analyse and evaluate the relationship between Islam and the West. vi. To familiarise the student with some of the primary sources (in translation) and the historiographical controversies. This course looks at the evolution of Islamist philosophy and movements, focusing on ideas as well as intellectual, religious and political leaders. The key areas covered are: Islamist thinkers - Ibn Taymiyya, Wahab, Afgani, Abu, Rida, al-Banna, Qutb, Mouadidi, Khomeini, Turab, Faraj, Azzam and Zawahiri; Models of Islamic State - Iran, Pakistan, Afghanistan, Malaysia and Sudan; Islamist Movements – the Muslim Brotherhood, Islamic Jihad, Hizb’allah, Hamas, the Islamic Salvation Front, Darul Islam, and the Moro Islamic Liberation Front; transnational Islam and international jihadism: the Afghan jihad, Jama’at Islamiyya, al-Qaeda, and the Syrian jihad.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: None

Assessment: Essay (10%, 3000 words) in the MT.

Essay (15%, 3000 words) in the LT.

Essay (25%, 3000 words) in the ST.

Presentation (15%), class participation (15%) and online assessment (20%) in the MT and LT.
Race, Violence and Colonial Rule in Africa

This information is for the 2015/16 session.

Teacher responsible: Dr Joanna Lewis SAR3.03

Availability: This course is available on the MSc in Conflict Studies, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the nature of colonial rule in Africa and its impact. It is focused upon the violence inherent in this encounter, its different forms and origins. It is essentially a political history but includes cultural, social and economic aspects. The primary focus is upon the British empire in Africa. Topics covered include Victorian racism; the ‘Scramble for Africa; white settler culture; the origins of apartheid South Africa; the development of the colonial state, indirect rule; the rise of nationalism in West Africa; the Mau Mau uprising in Kenya; the Congo crisis and the assassination of Lumumba; the rise and fall of ‘white’ Rhodesia; the wars of liberation in Mozambique; the end of the apartheid state; the genocide in Rwanda; the civil war in Sierra Leone; Mugabe and Zimbabwe; and Somalian warlordism.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Each student is required to write two essays (3,000 words each) and one mock exam.

Assessment: Exam (80%, duration: 3 hours) in the main exam period.

In class assessment (20%).

The Emergence of Modern Iran: State, Society and Diplomacy

This information is for the 2015/16 session.

Teacher responsible: Dr Roham Alvandi E310

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note that students taking this course cannot take GV4E7 Islamic Republic of Iran: Society, Politics, the Greater Middle East (H).

Course content: This course examines the emergence of modern Iran against the backdrop of Iran’s political, social and diplomatic history in the nineteenth and twentieth centuries. It covers three inter-related topics: the history of the modern Iranian state; the interaction between state and society in modern Iran; and Iran’s diplomatic history. The course is divided into three sections. The first section examines the emergence of modern Iran from the remnants of the Persian Empire under the Qajars, with a particular focus on reform, revolution and Iran’s encounter with European imperialism. The second section deals with the Pahlavi era and the attempts by both Pahlavi monarchs to strengthen the Iranian state while confronting social resistance at home and asserting Iran’s power abroad. The third section deals with the origins of the Iranian revolution of 1978/79 and the transformation of the Iranian state under the Islamic Republic. Here we consider how war and peace shaped the domestic politics and foreign policy of revolutionary Iran, and why this period was marked by such a particular development of war cultures remains a crucial question and one that has international relevance: this was a global, not merely a European, phenomenon. This course will examine how states and societies mobilized for war by juxtaposing different conflict situations and examining how they interlinked during this period. It will focus in particular on the role and practices of combatants in armed conflict, looking at continuities and breaks in patterns of combat violence. Among the topics it will cover are: The 1899-1902 South African War, the Herero and Nama Genocides, the Balkan Wars 1912-13, the First World War, The Irish War of Independence and Civil War, The Greco-Turkish War 1919-23, International law relating to war 1890-1945, the Polish-Soviet War, the Russian Civil War, the Italian invasion of Abyssinia, the Spanish Civil War, the Sino-Japanese War, the Second World War and the development of forced labour during wartime, with particular discussion of both the Holocaust and the Soviet Gulag system.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Two essays of 3,000 words in length and a mock exam.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words).
with a particular focus on US-Iran relations and the rise and fall of the
reform movement.

**Teaching:** 22 hours of seminars in the MT. 22 hours of seminars in
the LT.

**Formative coursework:** Students are required to submit one 3,000
word essay in the Michaelmas Term. There will also be a mock exam
(a one-hour timed essay) in the first of the two revision classes in the
Summer Term

**Indicative reading:** Alvandi, Roham, Nixon, Kissinger, and the
Shah: The United States and Iran in the Cold War (New York: Oxford
in Modern Iran (Cambridge: Cambridge University Press, 2012).
Aworthy, Michael, Revolutionary Iran: A History of the Islamic
Republic (London: Allen Lane, 2013). Katouzian, Homa, The
Persians: ancient, mediaeval and modern Iran (New Haven: Yale
University Press, 2009). Keddie, Nikki R., Modern Iran: roots and
results of revolution, New Edition (New Haven and London: Yale
University Press, 2006).

**Assessment:** Exam (75%, duration: 3 hours) in the main exam
period.

**Essay (25%, 3000 words) in the LT.**

**Islam, State and Rebellion in the
Indonesian Archipelago**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Kirsten Schulze M14 Sardinia House

**Availability:** This course is available on the MSc in Empires,
Colonialism and Globalisation, MSc in History of International
Relations, MSc in International Affairs (LSE and Peking University),
MSc in International and World History (LSE & Columbia) and MSc
in Theory and History of International Relations. This course is
available as an outside option to students on other programmes
where regulations permit.

**Course content:** This course looks at the Indonesian archipelago
from the early modern/colonial period to the present day. It will
focus on the dynamics of state and rebellion and centre and
periphery relations as well as the dynamics of ‘empire’ looking both
at external and internal imperialism/colonisation. The seminars will
cover: the European scramble for the Spice Islands and indigenous
rebellions; the establishment of the colonial state by the Dutch and
local resistance in Moluccas, Java and Aceh; anti-colonialism, Islam
and the development of Indonesian nationalism; the Japanese
occupation during the Second World War and Indo-Japanese
cooperation against the Dutch; the Indonesian war of independence
and the establishment of the Republic under Sukarno; regional
rebellions against Sukarno’s state: the Darul Islam uprisings,
the Republic of South Maluku uprising and the PRR/Perpemsta rebellions;
the PKI ‘attempted takeover’ and the rise of power of Suharto;
Suharto’s New Order state and expansion into Dutch New Guinea
and Portuguese Timor; regional rebellions in East Timor; Aceh; and
Iran Jaya; the fall of Suharto and the reformasi governments under
B.J. Habibie, Abdurrahman Wahid, Megawati Sukarnoputri and Susilo
Bambang Yudhoyono and inter-communal, separatist, and Islamist
challenges to the state.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in
the LT.

**Formative coursework:** There is no formative coursework.

**Indicative reading:** MC Riklefs, A history of modern Indonesia
since c1200 The Defining Years of the Dutch East Indies 1942-
1949: survivors’ accounts of Japanese invasion and enslavement
of Europeans and the revolution that created free Indonesia

**HY444**

**The Cold War in Latin America**

This information is for the 2015/16 session.

**Teacher responsible:** TBC

**Availability:** This course is available on the MSc in Empires,
Colonialism and Globalisation, MSc in History of International
Relations, MSc in International Affairs (LSE and Peking University),
MSc in International and World History (LSE & Columbia) and MSc
in Theory and History of International Relations. This course is
available as an outside option to students on other programmes
where regulations permit.

**Course content:** This seminar is designed to introduce students
to new historical approaches to the Cold War in Latin America. It
responds to new research and debates that have arisen in recent
years regarding the meaning of the Cold War in a Latin American
context, its origins, who its protagonists were, the extent to which
the superpowers were involved, and its significance at a local,
regional, and global level. It also places particular emphasis on the
role of ideas and ideological struggles; the intersection between
these ideas and the challenges of modernity and economic
development; the causes of revolutionary and counter-revolutionary
upheaval; the manifestations of violence and its effects; and
the cultural Cold War. Students will be especially encouraged to
explore the intra-regional and transnational dynamics of the Cold
War in Latin America. They will study how events in one part of
Latin America (for example, the overthrow of Jacobo Arbenz in
Guatemala, the Cuban Revolution, the Brazilian and Chilean coups
of 1964 and the Central American crisis in the 1980s) impacted
upon people and events in other areas of region. However, the
seminar will also devote three weeks to looking at Latin America’s
experience of the Cold War from a global comparative perspective
and exploring its experience in contrast to other parts of the
Third World. Although the seminar will mostly involve intensive
reading and discussion of secondary sources, students will also be
couraged to reflect on new online archival material, published
writings of principial thinkers and oral histories as a means of
understanding related key concepts and ideas.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in
the LT. 4 hours of seminars in the ST.

**Formative coursework:** Students are required to write one 3,000
word formative essay in the Michaelmas Term and one formative
discussion post at the beginning of the year.

**Indicative reading:** Gilbert Joseph and Daniela Spenser (eds.),
In From the Cold: Latin America’s New Encounter with the Cold
War (Durham/London: Duke University Press, 2007); Greg Grandin
and Gilbert Joseph (eds.), A Century of Revolution: Insurgent and
Counterinsurgent Violence During Latin America’s Long Cold War
(Durham/London: Duke University Press, 2011); Michael Löwy (ed.),

HY448
Living with the Bomb: An International History of Nuclear Weapons and the Arms Race from the Second World War to the end of the Cold War

This information is for the 2015/16 session.
Teacher responsible: Prof Matthew Jones E309
Availability: This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course takes as a prime focus the nuclear policies pursued by some of the major powers in the international system from the initial use of nuclear weapons against Japan in 1945 until the collapse of the Soviet Union in 1991. It introduces and explores three main themes: how the advent of nuclear weapons came to influence national strategies and crisis behaviour; why the development of nuclear weapons and their delivery systems fuelled an arms race that became one of the defining features of the Cold War; and how major powers have attempted to curb the testing of such weapons, the numbers contained in their arsenals, and their spread, through measures of arms control and non-proliferation. After examining the controversy over the atomic bombing of Japan in 1945, including the moral and ethical questions raised by nuclear use, the course includes consideration of some of the most important events and debates in post-war nuclear history – the course is not designed or intended to be a potted history of the Cold War, but rather looks at the influence and role of nuclear weapons (and the strategic thinking that accompanied their development). The impact of international public opinion is also covered – especially the nuclear test ban movement – and attention given to the Chinese, British and French national nuclear programmes, as well as those of the Soviet Union and United States. The last portion of the course offers close analysis of the international negotiations over arms control and non-proliferation that have featured since the late 1960s. Throughout the course students will engage with contemporary writings and study primary source documents which will accompany each topic.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Students will be expected to read essential primary and secondary material for each weekly class, to deliver presentations, and to participate in seminar discussions. A week 6 feedback session in both terms (during reading week) will allow feedback to be offered on formative essay work and to discuss topics and research materials for summative essays.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Two 5,000 word essays. The first will be submitted in week 1 of the Lent Term; the second in week 11 of the Lent Term. Essay titles will be drawn from an approved list supplied at the start of the course, or by agreement with the course tutor.

HY449
Long-term History: The Patterns of the Past and the Shape of Things to Come

This information is for the 2015/16 session.
Teacher responsible: Professor Ian Morris
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A prior knowledge of world history over the last 15,000 years will be an advantage. Students unfamiliar with the subject should do some preliminary reading.

Course content: This course explores the big patterns that have played out across the last 15,000 years and investigates whether these give us any sense of where things might go next. The key areas covered are: broad theoretical and methodological issues; the global balance of power; violence; inequality; and a general discussion of the past as a guide to the future.

Teaching: 3 hours of lectures, 4 hours of seminars and 9 hours of workshops in the MT. 3 hours of lectures, 4 hours of seminars and 9 hours of workshops in the LT.

The course is taught over four non-consecutive weeks, with two weeks in MT and two weeks in LT. Each of the four weeks will include one 90-minute public lecture, two two-hour seminars, amounting to 5.5 hours per week. In addition, one full-day workshop of nine hours will be held each term. This course will therefore have 20 hours of teaching in MT and 20 hours in LT.

Formative coursework: This course will include one formative essay of 6000 words.

Ian Morris, The Measure of Civilization: How Social Development
Decides the Fate of Nations (2013)
Ian Morris, Why the West Rules... For Now: The Patterns of History and What They Reveal About the Future (2010)
Assessment: This course is non-assessed.

HY458
LSE-Columbia University Double Degree Dissertation
This information is for the 2015/16 session.
Teacher responsible: Dr Roham Alvandi SAR.M.12
Availability: This course is compulsory on the MSc in International and World History (LSE & Columbia). This course is not available as an outside option.
Pre-requisites: During their first year at Columbia University, students will identify a topic for the dissertation and will submit a detailed dissertation proposal form to their LSE supervisor. They will also have undertaken substantial research over the course of the summer, have written a Dissertation Research Report before arriving at LSE and be in a position to talk in a detailed and fluent manner with regards to their dissertation. These and the completion of other formal requirements for year one of the Double Degree will be needed before students can proceed to the second year of the programme at LSE.
Course content: The individual dissertation will be supervised and assessed at LSE in accordance with the Department’s MSc regulations. It will be in the form of a thesis of no more than 15,000 words. The dissertation workshop will complement this by offering three sessions on methodological topics, and 7 sessions in which the students will each present updates on their research over the summer (MT) and a 3,000 word extract from their dissertations for group discussion, evaluation and analysis (LT).
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Formative coursework: Students will be requested to submit a Dissertation Research Report at the beginning of the academic year and a dissertation chapter outline in week 8 of the MT.
Indicative reading: A reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, Writing History; D Cannadine (Ed), What is History now?; L Jordanova, History in Practice; R Evans, In Defence of History; J Tosh, The Pursuit of the Past; M Bloch, The Historian’s Craft; R G Collingwood, The Idea of History.
Assessment: Dissertation (100%, 15000 words) in the ST.

---

HY459
The Ottoman Empire and its Legacy, 1299-1950
This information is for the 2015/16 session.
Teacher responsible: Prof Marc Baer E 307
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The Ottoman Empire (1299-1923) was one of the longest lasting and most territorially extensive of all empires in history. Yet today few know about its nature, whether in Turkey or abroad. Who were the Ottomans? How did they run their empire? How did they manage diversity? How did their understanding and practice of Islam change over time? What was the secret of their success, and what ultimately caused the empire’s fall? How do the Ottomans compare to other contemporary empires? What is the Ottoman legacy, especially in Turkey and Greece? What is the significance of the Ottoman Empire for world history?

In order to answer these questions we will study the following topics: three pillars of Ottoman inheritance: Byzantium, Islam, Mongols; the origins and rise of the Ottoman Empire; the conquest of Constantinople and its significance for world history; Ottoman state institutions in the “classic age,” gendering Ottoman History; the Ottomans and the Renaissance; the Ottomans and the Age of Exploration; the Ottoman-Safavid-Habsburg struggle for supremacy; Ottoman Jews: model minority?; sixteenth- and seventeenth-century transformations; pietism, conversion, and interreligious relations; reform and repression, 1839-1908; Orientalism and the Ottomans; the Young Turks and the revolution of 1908; World War I and the Armenian genocide; Atatürk: the “Father” of Modern Turkey and the new Turkish Republic; Ottoman legacies: Christians and Jews in Greece and Turkey; the legacy of the Ottoman Empire in comparative perspective, and the Ottoman past in Turkish historical fiction.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Students are required to post weekly response readings.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

HY460
Ideeologies and Political Thought in Germany in the Era of Extremes (1914-1990)
This information is for the 2015/16 session.
Teacher responsible: Professor Lutz Raphael, SAR.3.15.
Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: This course has no formal pre-requisites; knowledge of relevant languages other than English is useful but not essential. Students with reading knowledge of German should nevertheless consult Professor Raphael at an early date for additional readings in their areas of interest in the course.
Course content: Starting from the First World War academics and intellectuals strongly marked the particularities of German intellectual traditions and political thought in contrast to “western” ideas of democracy and liberalism. At the same time, the critical distance towards western “civilisation” encouraged an intellectual culture open to analyse the ambiguities of modernity, the crisis of historism and liberalism during the interwar period. During the Weimar Republic the intellectual debates were strongly intermingled with the political confrontation between left and right. National socialist dictatorship and exile contributed to give these intellectual trends and debates an even larger echo at the European and even global level (e.g. anti-historicism, existentialism, neo-liberalism or new racism). After 1945, Defeat of Nazism, the collapse of German imperialism and the discovery of the Holocaust lead towards a fundamental reorientation of German political and social ideas under the impact of the Cold War Ideologies of East and...
West. It opened a long period of Westernisation (as a practice of intensified exchange of social and political ideas between Western Europe, Britain and the USA) embedding (West) German intellectual trends in the mainstream of western intellectual history.

The course focuses on those aspects of German intellectual production that informed the development of social and political ideas and on those authors having a major importance for the orientation of public discussions in Germany. The course will combine the study of primary sources (in English translation) and secondary literature on these themes at the intersection of intellectual and political history of 20th century Germany.

Course Objectives: (i) To introduce students to a variety of methods and interpretative perspectives of German History, Intellectual History and History of Political and social Thought and to the wide range of pertinent primary and secondary sources; (ii) To provide advanced knowledge of German Intellectual History in the 20th century (iii) To provide comprehensive understanding of the methods of Intellectual History and the History of Political Ideas (iv) To offer a firm basis for more advanced historical work, including independent research, in this and other areas.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

The course looks at the origins and the political, strategic, economic and cultural consequences of the arrival of Western imperialism in East Asia. Subjects covered by the course include the clash between the Westernphilian and Sinocentric international orders; the opium wars; the fall of the Tokugawa shogunate; the Japanese, Korean and Chinese responses to the arrival of the West; the history of Western imperialism in China and the rise of Chinese nationalism; the rise of Japanese imperialism; the Russo-Japanese War and its consequences; pan-Asianism, race and immigration; the Chinese revolution of 1911-12; the rise of intra-Asian trade; the effect of Wilsonian and communist internationalism; Japan’s move towards aggressive expansion in the 1930s; the ‘Greater East Asia’ War of 1941-45.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

The course focuses on those aspects of German intellectual production that informed the development of social and political ideas and on those authors having a major importance for the orientation of public discussions in Germany. The course will combine the study of primary sources (in English translation) and secondary literature on these themes at the intersection of intellectual and political history of 20th century Germany.

Course Objectives: (i) To introduce students to a variety of methods and interpretative perspectives of German History, Intellectual History and History of Political and social Thought and to the wide range of pertinent primary and secondary sources; (ii) To provide advanced knowledge of German Intellectual History in the 20th century (iii) To provide comprehensive understanding of the methods of Intellectual History and the History of Political Ideas (iv) To offer a firm basis for more advanced historical work, including independent research, in this and other areas.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Twenty weekly seminar meetings in Michaelmas and Lent terms. Students are expected to keep up with readings for the weekly meetings and to participate in the seminar discussions. Students are required to produce two essays during the year.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Essay (50%, 5000 words) in the LT. Essay (50%, 5000 words) in the ST.

HY461

East Asia in the Age of Imperialism, 1839-1945

This information is for the 2015/16 session.

Teacher responsible: Dr Antony Best E405

Availability: This course is available on the MSc in Comparative Politics, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no formal pre-requisites for this course, but some knowledge of the international history of East Asia would be useful.

Course content: The course looks at the origins and the political, strategic, economic and cultural consequences of the arrival of Western imperialism in East Asia. Subjects covered by the course include the clash between the Westernphilian and Sinocentric international orders; the opium wars; the fall of the Tokugawa shogunate; the Japanese, Korean and Chinese responses to the arrival of the West; the history of Western imperialism in China and the rise of Chinese nationalism; the rise of Japanese imperialism;

There are lectures (joint with HY206) covering the following topics: The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany; The Iron Curtain; The Marshall Plan and the Foundation of NATO; The United States and Japan, 1945-1965; The Outbreak of the Korean War; The Sino-Soviet Alliance; The 1956 Hungarian Revolution; Technologies, Weapons, and the Arms Race; The Cuban Revolution and the 1962 Missile Crisis; Culture and Mindsets.

**Teaching:** 10 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT.

Twenty-two-hour seminar and twenty-one-hour survey lectures. The twofold emphasis of the seminars is on working with primary sources and working with the historiography, in particular the recent ‘New Cold War History’, in order to understand how historians have interpreted (and re-interpreted) the origins of the Cold War in light of their access to new sources. The lectures are joint with HY206.

**Formative coursework:** Students are required to make brief historiographical notes for each seminar starting from week 2, two oral presentations and one piece of formative essay during the year (the second essay is assessed, see below). The formative essay in the Michaelmas Term.

**Indicative reading:** M.P. Leffler/O.A. Westad (eds), The Cambridge History of the Cold War; J.M. Hahnmüller/O.A. Westad (eds), The Cold War: A History in Documents and Eyewitness Accounts; J.L. Gaddis, The Cold War: A New History; V.M. Zubok, A Failed Empire.

**Assessment:** Exam (75%, duration: 3 hours) in the main exam period. Essay (25%) in the LT.

---

**HY465**

The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict

This information is for the 2015/16 session.

**Teacher responsible:** Dr Svetozar Rajak T1, 9.01c

**Availability:** This course is available on the MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the history of the Balkans in the second half of the Twentieth century and on the threshold of the Twenty First century. It is not, however, designed to provide a simple historical overview of the region during this period. The course aims to integrate broader themes and interpretations of the Cold War and its legacy, and of deeper civilizational undercurrents of the second half of the Twentieth Century, with the study of the region and its only federation, Yugoslavia. To do so, it will invoke three main themes that will also facilitate insight into the interaction between the global, regional, and country specific. Firstly, the course will explore the regional and inter-bloc dynamics within the structured Cold War system by looking at the impact the Cold War had on the region and, in turn, at the influence the Balkans, in particular the Greek Civil War and Yugoslavia’s conflict with the USSR exercised on the institutionalization and the dynamics of the Cold War during its nascent decade. Secondly, the course will look into the unique role Yugoslavia played in the creation of the alternatives and challenges to the bipolar structure and rigidity of the Cold War world, namely the Non-aligned Movement, and the ideological heresy, the so-called “Yugoslav road to Socialism” that created a schism within one of the ideological poles of the Cold War, the Soviet Communism. Thirdly, the course will offer insight into the dramatic impact the end of the Cold War on the developments in the region, in particular on the collapse of the Yugoslav federation; at the same time, it will assess the role that the disintegration of Yugoslavia and the subsequent wars of secession had on the creation of the concepts that became the building blocks of the post-Cold War international system, namely nation-building, humanitarian intervention, international community, conflict-resolution, limited sovereignty, decreasing role of the UN, American hegemony, etc.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

**Formative coursework:** Students are required to write one 3,000 word essay in the Michaelmas term. There will also be a mock exam (a one-hour exam) in the first of the two revision classes in the summer term.

Todorova Maria, Imagining the Balkans, Oxford University Press, 1997

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period. Essay (25%, 3000 words) in the LT.

Class participation (15%) and presentation (10%) in the MT and LT.

---

**HY469**

Maps, History and Power: The Spaces and Cultures of the Past

This information is for the 2015/16 session.

**Teacher responsible:** Dr Paul Stock S2 2.15

**Availability:** This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** How did past societies and cultures understand the world around them? How did those societies use maps to represent physical, social and imaginative spaces? Do maps merely reflect particular mentalities and social practices, or do they actively shape the experience and perception of the world? Maps, History and Power address these and other questions by exploring mapping practices and spatial thought in several European and non-European contexts from the medieval to the modern periods. The course explores how past societies have used maps to serve a number of practical and ideological purposes: to express
Hy499 Dissertation

This information is for the 2015/16 session.

Teacher responsible: Prof Alan Sked SAR 3.16

Availability: This course is compulsory on the MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations and MSc in Theory and History of International Relations. This course is not available as an outside option.

Course content: The HY499 dissertation is an exercise in using primary sources to write on a precise topic in International History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

Teaching: 4 one-hour sessions in MT.

Hy499 teaching is provided through HY499 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY499 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students’ responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then get the supervisor to sign the HY499 Dissertation Proposal Form before the deadline on 12.00 noon of Wednesday 13 January 2016 at the latest. It is the students’ responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words.

Assessment: Dissertation (100%, 10000 words) in September. Dissertations must not exceed 10,000 words (100% of course mark), including text and footnotes but excluding the cover page, the list of contents, the list of abbreviations, the bibliography and appendices. A Fail cannot be compensated, and a degree cannot be awarded unless HY499 has been passed. Two bound copies and one electronic copy must be submitted by 12.00 noon on Wednesday 7 September 2016 to SAR 1.03E in the Departmental Office.

HY498 Dissertation: LSE-PKU Double Degree in MSc International Affairs

This information is for the 2015/16 session.

Teacher responsible: Prof Alan Sked SAR 3.16

Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University). This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary source material to write on a precise topic in the history of international affairs. Although candidates may engage with relevant theories and concepts, the dissertation should be largely devoted to utilising such theories and concepts in the analysis of one or more specific historical events and should be based largely upon primary sources. Candidates should aim to include an element of originality in the conceptualising of the thesis or the treatment of evidence. The subject must fall within the syllabus of the degree and must be supervised by a member of staff in the Department of International History.

Teaching: 4 one-hour sessions in MT.

HY498 teaching is provided through HY498/499 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Michaelmas Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students’ personal advisers. Students are then required to complete the HY498 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students’ responsibility to locate a supervisor. They should meet with the potential supervisor in late Michaelmas term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then get the supervisor to sign the HY498 Dissertation Proposal Form before the deadline on 12.00 noon of Wednesday 13 January 2016 at the latest. It is the students’ responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Summer Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words.

Assessment: Dissertation (100%, 10000 words) in September. Dissertations must not exceed 10,000 words (100% of course mark), including text and footnotes but excluding the cover page, the list of contents, the list of abbreviations, the bibliography and appendices. Two bound copies and one electronic copy must be submitted by 12.00 noon on Wednesday 7 September 2016 to SAR 1.03E in the Departmental Office.
IR410
International Politics

This information is for the 2015/16 session.
Teacher responsible: Dr Peter Wilson CLM 5.10
Availability: This course is compulsory on the MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course has 5 objectives: (i) to enquire into the nature of international politics and the role of general theory in advancing our understanding of it; (ii) to introduce the main contributions to the general theory of international politics; (iii) to provide students with a range of concepts, ideas, and perspectives to enable them to widen and deepen their understanding of international politics; (iv) to encourage critical, independent, thought; (v) to ascertain the extent to which progress has been made in our understanding of international politics, and more tentatively to what degree international politics itself can be deemed intrinsically or latently progressive. The primary pedagogical device of the course is a close reading of 13 seminal IR texts. Students are encouraged to investigate the epistemological assumptions underlying these texts, the methods of analysis they employ, their importance in the canon of IR, and their value for thinking about international politics today.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 7 hours of lectures and 15 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students deliver seminar papers and write three 2,000-word essays for their seminar teachers on topics notified at the beginning of the session.

Assessment: Exam (100%), duration: 3 hours) in the main exam period.

The paper contains about 12 questions, of which three are to be answered.

IR411
Foreign Policy Analysis III

This information is for the 2015/16 session.

Teacher responsible: Prof. Toby Dodge CLM 6.10
Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking the MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University) may be able to take this course if there is space but on previous years experience this is unlikely.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Students need not have studied Foreign policy Analysis before, but some familiarity with theories of international relations and modern international history is essential.

Course content: The ways in which states formulate decisions and strategies for dealing with other members of the international community. Critical examination of theoretical perspectives on foreign policy, involving the analysis of the foreign policy behaviour of a broad range of states through selective use of case studies. Development of the discipline of Foreign Policy Analysis; the interplay between domestic and external forces; the organisation, psychology and politics of decision-making; the impact of leadership upon foreign policy; the impact of public opinion and state type upon foreign policy; the foreign policies of the major and middle powers as well as small/weak states; conventional and critical theories of FPA; ethical foreign policy; foreign aid. Seminars discuss and expand on these topics, covering also questions of choice, rationality and identity and the significance of history and culture in foreign policy, as well as methodological issues, as appropriate. Students are expected to combine an interest in theoretical and comparative aspects of the subject with a solid knowledge of the main foreign policy issues and events of the contemporary era and the twentieth and twenty-first centuries. A detailed programme of lectures will be provided at the start of the session. Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalRelations/view/IR411-FPA.htm

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: All students who attend the seminar will be expected to write three 2,000 word essays for their seminar leader. Each student will also be expected to present at least one seminar topic.

Indicative reading: The following books are a necessary but not sufficient reading requirement. They provide access to most of the main themes of the course as well as to a considerable amount of empirical material: Chris Alden and Amon Aran, Foreign Policy Analysis: New Approaches: Understanding the diplomacy of war, profit and justice, Routledge, 2011; Valerie M. Hudson, Foreign Policy Analysis: Classic and Contemporary Theory, Rowman and Littlefield, 2007: Graham Allison and Philip Zelikour, Essence of Decision, 2nd ed, Longman, 1999; Christopher Hill, The Changing Politics of Foreign Policy, Palgrave, 2003; Yuen Foong Khong, Analogies at War: Korea, Munich, Dien Bien Phu and the Vietnam Decisions of 1965, Princeton University Press, 1992; Steve Smith, Amelia Hadfield and Timothy Dunne (Eds), Foreign Policy: Theories, Actors, Cases, Oxford University Press, 2012; A more detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%), duration: 3 hours) in the main exam period.

IR412
International Institutions

This information is for the 2015/16 session.

Teacher responsible: Dr Mathias Koenig-Archibugi CON 4.08
Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Global Politics, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc
in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The first part of the course introduces the main theoretical approaches that provide alternative explanations for key questions about international institutions: their creation, institutional design, decision-making processes and their impact on state behaviour and domestic politics. The second part analyses these key questions with regard to specific international institutions, including the League of Nations, the United Nations, the European Union, the North Atlantic Treaty Organisation, the World Trade Organisation, the International Monetary Fund and the World Bank, as well as the areas of human rights, environmental protection, and health policy.

Teaching: 8 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 9 hours of lectures and 12 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each seminar participant is required to give at least one presentation on one of the seminar topics and write two 2,000 (max) word essays from the list of sample exam questions appended to the reading list.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 4000 words) in the MT.

IR416
The EU in the World

This information is for the 2015/16 session.

Teacher responsible: Dr Federica Bidchi CLM 4.13

Availability: This course is compulsory on the MSc in EU Politics and MSc in EU Politics (LSE and Sciences Po). This course is available on the MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students, except those registered on the MSc in EU Politics are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Some basic knowledge of International Relations as an academic discipline is desirable, together with some acquaintance with the general evolution of world politics over the last one hundred years.

Course content: The development of the external activities of the European Communities since 1957, including the development of European Political Cooperation and the Common Foreign and Security Policy. The relationship between the member states and these external activities, in particular the impact of the evolution of EU institutions and policies on national foreign policies. The external relations of the European Community, including external trade and development policy. Relations between the EU and non-EU states and regions. Watch a short introductory video on this course: www.lse.ac.uk/internationalRelations/video/IR416-EUW-video.aspx

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 7 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Three 2,000-word essays during the course, to be marked by seminar leaders. These do not count towards the final mark.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR415
Strategic Aspects of International Relations

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Coker CLM 5.09

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A working knowledge of international history since 1815 and of traditional theories of international politics is desirable.

Course content: This is not a conventional Strategic Studies course. It is about the cultural context of military conflict between states and within them. The place of war in international relations, and the social, political, and economic consequences of the use of force. The greater part of the course is concerned with force in international relations since 1945. The Western Way of War; Non Western Ways of Warfare; Technology and War. Clausewitz and the Western Way of Warfare; war and genocide; war in the developing world; terrorism and crime; NATO and its future; Globalisation and Security; the ‘end of war’ thesis.

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 5 hours of lectures and 10 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

The majority of seminar topics will be on strategic aspects of postwar international relations and examination papers will reflect this. Students on this course will have a reading week in week 6 in line with departmental policy.

Formative coursework: Three 2,000-word essays will be set and marked by the seminar teacher.

Indicative reading: The following short list comprises some of the most important and some of the best currently available books. An asterisk indicates publication in paperback edition. R Aron, Peace and War; C M Clausewitz, On War (Ed by M Howard & P Paret); J L Gaddis, Strategies of Containment; M E Howard, War and the Liberal Conscience; F M Osanka, Modern Guerrilla Warfare; C Coker, War and the Twentieth Century; J Keegan, A History of Warfare; C Coker, War and the Iliberal Conscience.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
IR418
International Politics: Asia & the Pacific
This information is for the 2015/16 session.
Teacher responsible: Dr Jurgen Haacke CLM 7.09 and Prof Christopher Hughes CLM 5.07
Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The international political experience of major powers and post-colonial states in a region beset by recurrent conflict and external intervention during the Cold War and subject to a novel multilateralism in its wake. The inter-linkages between the global, regional and local; the interests and role of the US; foreign and security policies of the major regional powers in relation to East Asia-Pacific; the impact of the legacy of colonialism and external intervention; the sources of bilateral and intra-regional conflict; the problem of regional order with reference to East and South-East Asia; the emergence and development of regional institutions.
Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 16 hours of seminars in the LT.
2 hours of revision in ST. Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be expected to write three 2,000-word essays by dates stipulated by the teachers responsible.
Indicative reading: (A full reading guide will be made available to interested students.)
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR419
International Relations of the Middle East
This information is for the 2015/16 session.
Teacher responsible: Prof Fawaz Gerges CLM 4.06
Availability: This course is available on the MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is intended primarily for students on programmes run by the Department of International Relations (IR). Students on the MSc in Comparative Politics and MSc in Global Politics may take the course, but this is subject to students demonstrating that they have a grasp of International Relations theory, or have made efforts to cover this ground before starting the course.
All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed; students external to the IR department must clearly outline the extent to which they are familiar with IR theory/ efforts they will make to familiarise themselves with this area before the course begins.
Pre-requisites: A knowledge of the international political system, of the major issues in its contemporary development, and at least a basic understanding of core International Relations theory, is required. Background in IR and/or political science and/or history is a prerequisite.
Course content: The course is intended to provide an analysis of the regional politics of the Middle East since 1918, and of their interaction with problems of international security, global resources and great power/super power/hyperpower politics. Topics covered include: The emergence of the states system in the Middle East during the inter-war period; The interplay of domestic politics, regional conflicts and international rivalries; The Cold War and post-Cold War significance of the Middle East in global politics; The importance of oil and other economic factors and interests; Conflict in the Gulf and the Arab-Israeli conflict; The foreign policies of major Middle Eastern states and the Lebanese civil war; The role of ideologies and social movements: Arab nationalism, militarism, political Islam and global jihadism; State and non-state actors; Democracy and human rights issues, and the Arab uprisings; International relations theory and its significance for the study of Middle East politics.
Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 18 hours of seminars in the LT. 2 hours of lectures in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Seminar attendees will be expected to submit three 2,500-word essays, based on past examination papers, to be marked by their seminar teacher, and to give presentations in both the MT and LT. Students will be also expected to attend the regular public lectures held at the Middle East Centre.
In addition they are recommended to consult::; R Hinnebusch & A Ehteshami (Eds), The Foreign Policies of Middle East States; B Korany & A Dessouki (Eds), The Foreign Policies of Arab States. A detailed reading list will be available on Moodle once course admissions have been confirmed.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
There is one three-hour examination in the ST.
IR422 Conflict and Peace Studies

This information is for the 2015/16 session.

Teacher responsible: Mr Mark Hoffman OLD 2.02

Availability: This course is available on the MSc in African Development, MSc in Conflict Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights, MSc in International Affairs (LSE and Peking University), MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option.

Course content: This course is intended for those interested in theoretical and practical approaches to the question of peace, the problems of conflict and violence, and responses to them particularly in the form of liberal peacebuilding and statebuilding. The course is divided into three unequal but interconnected parts. The first part examines ideas and debates about the causes, contexts, dynamics and characterisations of conflict. The second explores and problematises the nature and meanings of peace and peacebuilding. This leads into the third section which is concerned with a critical engagement with the range of international responses to conflict associated with the discourses and practices of liberal peacebuilding and statebuilding. The seminars explore the nexus between theory and practice. Although the course and its readings are mainly theoretical and conceptual rather than empirical, students are encouraged to apply the ideas to actual cases, past and present. Watch a short introductory video on this course: www2.lse.ac.uk/internationalrelations/video/IR422-CPS-video.aspx

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures and 4 hours and 30 minutes of seminars in the ST.

Formative coursework: Two 2,500-word essays, marked by the seminar teacher. One two-page outline of assessed essay.

Indicative reading: A detailed reading guide will be provided at the first meeting. Useful survey texts are: Oliver Ramsbotham, Hugh Miall and Tom Woodhouse, Contemporary Conflict Resolution: The Prevention, Management and Transformation of Deadly Conflicts, 3rd ed (Polity, 2011); Chester Crocker, Fen Osler Hampson and Pamela Aall (eds), Leashing the Dogs of War (USIP, 2007); David Keen, Complex Emergencies (Polity, 2007); Karen Ballantine and Jake Sherman (eds), The Political Economy of Armed Conflict: Beyond Greed and Grievance (Lynne Rienner, 2004); Oliver Richmond, The Transformation of Peace (Palgrave, 2006); Chester Crocker, Fen Osler Hampson and Pamela Aall (eds), Herding Cats: Multiparty Mediation in a Complex World (USIP, 1999); Peter Wallensteen, Understanding Conflict Resolution, 2nd ed (London: Sage, 2007).

Assessment: Exam (60%, duration: 2 hours). Essay (40%, 4000 words) in the LT.

IR433 Half Unit The International Politics of EU Enlargement

This information is for the 2015/16 session.

Teacher responsible: Dr Nicola Chelotti CLM 5.06 (MT and LT), CLM 5.08 (ST)

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You. Admission is not guaranteed.

Course content: This course examines EU enlargement from the point of view of International Relations. The principal aim is to understand the interplay between enlargement, EU (foreign) policy and wider geopolitics. With this in mind enlargement is considered both as an act of European foreign policy and as a phenomenon impacting on the (foreign) policies of other states and actors. The course begins with a discussion of the theoretical issues of the international dimension of EU enlargement, including: size; diversity; pace of change; reach; external reactions; and the widening v. deepening dilemma within the EU. It moves on to a broadly chronological discussion of the various phases of enlargement from 1973 to the present, examining the inputs from key Member States as well as from the EU institutions, and analysing the extent to which strategic policy-making characterised each round. In the last part of the course the attention switches to more thematic concerns: the role of the self-excluded states (Norway, Switzerland, Iceland); security, NATO and the post-Cold War European order; the geopolitical issue of Europe’s final border; and the view from outsiders, such as the United States, Russia, Turkey and Morocco.

Watch a short introductory video on this course: www.lse.ac.uk/internationalrelations/video/IR433-EUPM-video.aspx

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Seminar presentations are allocated at the first meeting of the seminar. Two 2,000-word essays are set and marked by the seminar teacher.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR431 Half Unit Not available in 2015/16 European Union Policy Making in a Global-Context

This information is for the 2015/16 session.

Teacher responsible: Dr Nicola Chelotti CLM 5.06 (MT) and CLM 5.08 (ST) and Dr Ulrich Sedelmeier CLM 5.06

Availability: This course is available on the MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Social Policy (European and Comparative Social Policy) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You. Admission is not guaranteed.

Course content: The course places the development of EU policy-making in its international context. It examines the impact of the external environment on the evolution of common policies and the external impact of EU policies. Topics covered include: the single market; social policy; finance and Economic and Monetary Union; trade policy; foreign and security policy; environmental policy; police cooperation and counter-terrorism; immigration and asylum policy; enlargement and neighbourhood policy.

Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalrelations/video/IR431-EUPM-video.aspx
IR434  Half Unit

European Defence and Security

This information is for the 2015/16 session.

Teacher responsible: Dr Spyridon Economides COW 2.07

Availability: This course is available on the MSc in EU Politics, MSc in European Studies: Ideas, Ideologies and Identities, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE4You. Admission is not guaranteed.

Course content: This course examines the role of defence and security issues in European integration. It traces the evolution and nature of decision-making with respect to European defence initiatives, and examines the structures and institutions of EU defence and security. It also seeks to understand the relationship between foreign policy and security/defence policy in the EU especially in the context of transatlantic relations, the relationship with NATO and the EU’s wider international profile. The course is divided into two parts. Part one provides a theoretical overview of the role of defence and security issues in European integration. It addresses the question of defence and European identity, the relationship between European defence and the national objectives of Member-States, the link between collective defence and collective security as well as the role of defence in the EU’s evolution as a civilian actor in international relations. It also looks at the historical evolution of the plans, structures and institutions of European defence and security. It places this evolution in the context of the early post-Second World War era, the Cold War and German rapprochement and the issues of extended deterrence, burden-sharing within NATO and the emergence of a European pillar to Western defence. Part two examines the more contemporary developments in European defence and security and concentrates on the relationship with European Political Cooperation/Common Foreign and Security Policy, moves to institutionalise defence and provisions for crisis management and conflict prevention. Included in the second part are examinations of the EU’s recent ESDF mission and the implications of this on the EU’s role in the world.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6. In line with departmental policy.

IR436  Half Unit

Theories of International Relations

This information is for the 2015/16 session.

Teacher responsible: Dr Jonathan Agensky CLM 4.08

Availability: This course is compulsory on the MSc in International Relations (Research) and MSc in International Relations Theory. This course is not available as an outside option.

Course content: This course examines the ways that different theories conceive, analyse and explain the character of international relations. The purpose of the course is to provide a thorough interrogation of these theories, exploring debates both within and between them. Theoretical approaches to be considered include: classical and neo-realism; liberal institutionalism and neo-liberalism; Marxism; constructivism; English School theory; critical theory; post-structuralism; and feminism. The course also interrogates issues relating to the philosophy of science and philosophy of history.

Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalrelations/video/IR436-IRT-video.aspx

Teaching: 13 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. 4 hours of seminars in the ST.

The course is taught through a combination of lectures and seminars. 23 one-hour lectures, twice weekly during weeks 1-3 of MT and weekly thereafter, and 20 two-hour weekly seminars also from week 1 of MT. In line with IR departmental policy, students on this course will have a reading week in Week 6 of both MT and LT.

Formative coursework: Students are required to submit formative coursework and to deliver at least one formal seminar presentation. All students are expected to prepare for and participate in seminar discussions.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 4000 words) in the ST.
permission as an outside option to students on other programmes where regulations permit.

Course content: The aims of the course are to provide intellectual challenge to academically able students by engaging with difficult and demanding material concerning diplomacy; to provide a basis for further study of diplomacy; and to promote a framework to assist concerned citizens to think about issues which will be of increasing importance in the 21st century. The objectives of the course are to promote a critical engagement with a wide range of literature, and to display this engagement via the development of a succinct writing style and the ability to present complex arguments orally.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two 2,000-word essays, one of which will form the basis of a presentation, and one simulated speech-writing session.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR445
China and the World

This information is for the 2015/16 session.

Teacher responsible: Prof William Callahan CLM 5.07

Availability: This course is available on the MSc in Development Studies, MSc in Development Studies (Research), MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: This course will provide students with an historical overview of the development of Chinese foreign and security policy, the theoretical concepts used for analysing the making of Chinese foreign policy, and an up-to-date survey of China's evolving relations around the world. The first five weeks will be dedicated to providing a long historical perspective, and use a number of case studies to show how basic factors used in foreign policy analysis shape policy outcomes, including economic factors, the role of perception, geopolitical influences, bureaucratic politics, nationalism, and socialisation into the international system. The remainder of the course will involve analysing case studies on China's relations with the United States, Japan and Korea, Southeast Asia, South Asia, Russia and Central Asia, Australasia and the Pacific Islands, the EU, Africa, Latin America, the Middle East. Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalrelations/video/IR445-CFSP-video.aspx

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 10 hours of the seminars in the LT will be with guest speakers. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete three 2,000 word essays during the course and will make two presentations to the seminar. It is permissible for the presentations to be on the same topics as the essays.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR447 Half Unit
Political Economy of International Labour Migration

This information is for the 2015/16 session.

Teacher responsible: Dr Covadonga Meseguer, 95 ALD 1.13

Availability: This course is available on the MSc in Development Studies, MSc in Development Studies (Research), MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

9 July 14 (AMF) Paper Nos updated to reflect changes to MSc in International Relations and MSc in International Political Economy programmes and their variants.

Pre-requisites: No pre-requisites

Course content: The mobility of workers is one of the pillars of globalization. However and surprisingly, international political economists have paid less attention to the political causes and consequences of international migration in comparison to that paid to other aspects of globalization such as trade or finance. In this course, we shall employ a political economy perspective to study the historical evolution of migration policy, the relationship between trade and migration, and the political causes and consequences of migration flows. I shall place special emphasis on the study of the political consequences of migration for sending (rather than receiving) countries. We shall also pay attention to an important capital flow associated to international migration: remittances. Rather than focusing on the economic/developmental consequences of remittances, we shall discuss how remittances impact political outcomes as diverse as democratization, the survival of
dictatorships, political clientelism, corruption, political participation, and political accountability.

Course Outline

Week 1. Overview and Introduction.
Week 5. The Making of Migration Policy (I): Interests and Institutions.
Week 6. Reading Week.
Week 8. Economic Consequences of International Migration for Sending Countries: Remittances.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to write two essays (2000 words).

Students are expected to make one class presentation.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

The paper contains 8 questions, of which two are to be answered.

IR449 Half Unit
Conflict and Peacebuilding

This information is for the 2015/16 session.

Teacher responsible: Dr David Rampton

Availability: This course is available on the MSc in Conflict Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A basic background knowledge of the subject would be an advantage.

Course content: This course is intended for those interested in theoretical and practical approaches to the question of peace, the problems of conflict and violence, and responses to them particularly in the form of liberal peacebuilding and statebuilding. The course is divided into three unequal but interconnected parts. The first part examines ideas and debates about the causes, contexts, dynamics and characterisations of conflict. The second explores and problematises the nature and meanings of peace and peacebuilding. This leads into the third section which is concerned with a critical engagement with the range of international responses to conflict associated with the discourses and practices of liberal peacebuilding and statebuilding.

IR448 Half Unit
American Grand Strategy

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Trubowitz CLM 4.05

Availability: This course is available on the MSc in International Relations, MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course will explore American foreign policy at the broadest level of analysis - the level known as grand strategy. The course will showcase the main theoretical perspectives that inform the study of US grand strategy and apply them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the US experience for theorizing about power politics and the implications of alternative theories for thinking critically about American behavior. Students will gain an appreciation of the debates and controversies that animate the study of US foreign policy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT. Students in this class will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two short essays.

One in class presentation.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.
IR450
International Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13

Availability: This course is compulsory on the MSc in International Political Economy and MSc in International Political Economy (Research). This course is available on the MSc in International Political Economy (LSE and Sciences Po). This course is not available as an outside option.

Course content: An advanced introduction to concepts and contending approaches in international political economy, and an overview of the evolution of international economic relations since the late nineteenth century.

This course is the core course for MSc International Political Economy. It aims to introduce students to various approaches to the study of international political economy (IPE), and to apply theories to important historical and contemporary empirical issues. The first part of the course introduces students to the main theoretical concepts in and methodological approaches to political economy, emphasising the overlap between international and comparative approaches. After surveying the main schools of thought in the subject, it examines more recent theoretical developments, including the comparative and domestic approaches that have become increasingly prominent in the literature. The second and third parts of the course address the political and economic history of the international political economy. The issues covered in this part include particular events such as the 1930s economic depression, the issue of economic development, the construction and evolution of international economic regimes and institutions, and contemporary issues related to 'globalisation'. Previous background in international relations, international economics, comparative politics and history is helpful but is not a requirement. Students with no previous background in the subject should read Walter and Sen, Analyzing the Global Political Economy (2009), Oatley, International Political Economy and Ravenhill, Global Political Economy by the end of the first term.

Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalRelations/video/IR450-IPE-video.aspx

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

There will be a lecture course (IR450.1) on International Political Economy commencing in week one of the MT, with an examination preparation and expectations lecture in week 2 of ST. Students will be assigned to International Political Economy seminar groups (IR450.1A) which accompany the lecture series; each seminar group will be run by a teacher involved in the MSc IPE programme. A supplementary series of 14 lectures on Introduction to Some Concepts in Economics will also be given as part of IR450.1, explaining the law of comparative costs, purchasing power parity, the quantity theory of money, the balance of payments and other concepts currently used in the literature. This supplementary lecture series is primarily intended for those with little or no background in international economics and is not examinable.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Three 2,000-word essays will be set and marked by the seminar teacher.

Indicative reading: It is advisable to begin reading before the lectures start, and the following general texts are recommended. A more complete source-list is provided in the course outline. Oatley, International Political Economy (2012); Ravenhill, Global Political Economy (2011); Walter and Sen, Analyzing the Global Political Economy (2009); J Frieden & D Lake (eds), International Political Economy (2009); J Frieden, Global Capitalism (2006); Robert Gilpin, Global Political Economy (2001); Susan Strange, States and Markets.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Students will be asked to answer three out of 12 questions.

IR452 Half Unit
Empire and Conflict in World Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Tarak Barkawi CLM 4.07

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in International Relations Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Many places and peoples in modern world politics have been shaped by relations and histories of imperialism. Across the social sciences and humanities, and as in International Relations, there has been an explosion of interest in empire in recent decades. This course explores the violent dimensions of the imperial past and present. It covers histories and social relations of armed conflict in imperial context from “small war” to “counterinsurgency” and the War on Terror; it looks at the ways in which warfare shapes (and is shaped by) the societies, cultures and polities that populate world politics; and it considers some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subalterns and postcolonial studies. The premise of the course is that warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings.

This course aims to familiarise students with scholarship on empire and conflict in International Relations and related disciplines. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalization in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such “small wars” have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and postcolonialism. The course will introduce students to this work and it applications to understanding world politics.

Lectures
1) Introduction: Empire and International Relations
2) Empire/History/Globalization
3) Empire, the Regions, and World Politics
4) Polities/Strategy/War
5) War and Society in Global Perspective
6) Orientalism and ‘Small war’
7) Revolutionary Guerrilla War
8) Counterinsurgency
9) Conflict and Development
10) The War on Terror in North’sSouth Perspective

MSc Seminars

The seminars will develop students’ abilities to read, digest, and
6. International rules for MNCs (trade, investment, tax)
5. MNC-state bargaining over foreign investment
2. Economic theories of foreign direct investment
1. The evolution of MNCs

10 lectures and 10 seminars on the following topics:
- development, environmental protection and human rights.
- global business plays in selected global policy areas: economic institutions. The final part of the course considers the role that business, paying attention in particular to International Relations and economic theories that seek to explain the rise of global business as an actor in international relations. It reviews the political and economic theories that seek to explain the rise of global business, paying attention in particular to International Relations and International Political Economy theories (realism, liberalism, Marxism), but also covering the main economic explanations of MNCs. Therefore, the course examines the interaction between global business and states in international relations. This involves the study of corporate power and how to conceptualise it in IPE, the study of state-firm bargaining over investment decisions, and the regulation of global business by states and international governance institutions. The final part of the course considers the role that global business plays in selected global policy areas: economic development, environmental protection and human rights.

Teaching: 10 hours of lectures and 18 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays in the MT.

Assessment: Essay (100%, 5000 words) in the LT.

IR453 Half Unit  Not available in 2015/16

Global Business in International Relations

This information is for the 2015/16 session.

Teacher responsible: Dr Robert Falkner CLM5.05

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the role of global business as an actor in international relations. It reviews the political and economic theories that seek to explain the rise of global business, paying attention in particular to International Relations and International Political Economy theories (realism, liberalism, Marxism), but also covering the main economic explanations of MNCs. Therefore, the course examines the interaction between global business and states in international relations. This involves the study of corporate power and how to conceptualise it in IPE, the study of state-firm bargaining over investment decisions, and the regulation of global business by states and international governance institutions. The final part of the course considers the role that global business plays in selected global policy areas: economic development, environmental protection and human rights.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 lectures and 10 seminars on the following topics:
- the evolution of MNCs
- Economic theories of foreign direct investment
- Globalisation and the rise of emerging market MNCs
- The political economy of MNC power (realism, liberalism, Marxism)
- MNC-state bargaining over foreign investment
- International rules for MNCs (trade, investment, tax)
- MNCs and private governance
- MNCs and economic development
- MNCs and environmental protection
- MNCs and human rights

Formative coursework: Students will be expected to produce 2 essays in the MT.

Assessment: Exam (100%, duration: 2 hours).

A 2-hour final examination. Students will be asked to answer 2 out of 8 questions.

IR454 Half Unit  Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2015/16 session.

Teacher responsible: Dr James Morrison 95 ALD 1.14

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.

Proceeding from the seventeenth century to the present, it examines:
- seminal theorists' particular treatments of international political economy
- the ongoing, timeless debate between these theorists
- the major shifts in the global economic order
- the interaction between theories and policy in each shift
- the course begins with mercantilism and the 'age of empires.' It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-called 'English' political economy and the 'First Era of Globalisation' in the 19th Century.

This brings the course into the interwar period. There, the course considers the battles that raged among liberals in their attempts to resuscitate the classical IPE tradition in the wake of the First World
IR460 Comparative Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Lauren Phillips Clm 4.12

Availability: This course is available on the MSc in Global Politics, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Management, MSc in Management (CEMS MIM) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The comparative study of democratic institutions and economic policy choice. This course will investigate how theories emphasising distributional interests and domestic institutions can explain economic policy choices. Particular emphasis will be placed on giving students an understanding of the use of quantitative methods in political economy research. A third main objective will be to show how similar theories of political economy can be applied to both OECD and developing country cases. There will be no formal pre-requisite for the course, it would be preferable for students to have already completed an introductory sequence in microeconomics and macroeconomics. Students without a previous background in quantitative methods can attend lectures from MI451 and MI452. Watch a short introductory video on this course: http://www2.lse.ac.uk/internationalRelations/video/IR460-CPE-video.aspx

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 7 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be required to submit three 2,000-word essays over the course of MT and LT.

Indicative reading: "The bulk of this course will be taught using journal articles. In addition, students will find it useful to consult several overview texts in political economy. Allan Drazen, Political Economy in Macroeconomics and Adam Przeworski, Susan Stokes & Bernard Manin, Democracy, Accountability, and Representation are good references."

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR455 Half Unit
Economic Diplomacy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock Clm 613

The course is coordinated by an LSE academic but is supported by an experienced practitioner of economic diplomacy Sir Nicholas Bayne, former UK foreign service and ambassador and Kenneth Heydon (formerly Deputy Director at the OECD in Paris). Other full time staff currently teaching the course include Dr James Morrison.

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy. MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations Theory, MSc in Management and MSc in Management (CEMS MIM).

This course is available with permission as an outside option to students on other programmes where regulations permit.

All students will be required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for you. Admission to the course is not guaranteed. The course is primarily for students on the IPE Masters and LSE-Sciences-po Double Degree masters. If spaces are available it will also be open to students on other related masters programmes.

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction with each other. It provides students with both academic and practitioner perspectives of economic diplomacy and offers participants an opportunity to understand the challenges faced by negotiators through the simulation of a current multilateral negotiation.

Teaching: 10 hours of lectures, 13 hours and 30 minutes of seminars and 3 hours of workshops in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the LT.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the LT.
MSc in Global Politics (Global Civil Society), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection LSE for You. Admission is not guaranteed.

Course content: The course focuses on the role of Islam in world politics, posing two inter-related questions: First, how can we explain the varying nature and strength of Islam as a discursive and mobilizational force in international relations? Second, how should we understand the impact of changes in international relations on the institutions, authority structures, and identities associated with Islam? In this course, the approach to these questions is comparative. The course begins with an examination of the distinctive transnational structures of Islam as compared with another major world religion: Christianity. The emergence and trajectory of Islam as a force in international relations since the late 19th century are examined across successive periods in world history. The course covers the rise of transnational Islamist networks from the late Ottoman era through the tumultuous years of mass mobilisation in the interwar era, demobilisation with the formation of new nation-states in the early Cold War era, and the revival of Islam in world politics by the 1970s with the Iranian Revolution and developments elsewhere in the Muslim world. But most of the course covers the contemporary post-Cold War era, examining the varying role of Islam in diverse regional settings - Asia, Africa, the Middle East, and Europe - and in the contexts of globalization and democratization, mass migration, separatist struggles and regional conflicts. Close attention is paid to the role of Saudi Arabia and Iran in the global politics of Islam, to Sunni-Shi'i conflicts, and to the question of Israel and Palestine. The course also focuses important cases like Al Qa’ida and the Taliban in Afghanistan and Pakistan, as well as Chechnya, Iraq, and Somalia, as well as important trends in Western Europe, including the UK.

Teaching: 10 hours of lectures and 12 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.

Professor Sidel will be solely responsible for the lectures and the seminars. Students will be divided into seminar discussion groups at the beginning of the course. During reading week Week 6 there will be no formal teaching, but film viewings instead.

Formative coursework: Students are expected to submit three essays of 2-3,000 words in length over the course of the year for evaluation and comment by Professor Sidel. Whilst these essays will not be included in the formal assessment, they will help students to focus their energies on specific topics of particular interest to them and to receive feedback and guidance from Professor Sidel.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR463 Half Unit Not available in 2015/16
The International Political Theory of Humanitarian Intervention

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Brown CLM 4.08

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Politics, MSc in Human Rights, MSc in International Migration and Public Policy, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory, MSc in Political Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will involve both theoretical explorations of the nature and pre-history of ‘humanitarianism’ and empirical examples of claimed ‘humanitarian interventions’ (such as Bosnia, Kosovo and East Timor) along with cases where it is claimed interventions should have taken place (such as Rwanda 1994) and others where humanitarianism has been combined with geo-strategic motivations. Notions of ‘global social justice’ as a response to the root causes of humanitarian disasters will be explored, along with the future of humanitarianism in the light of the changing global strategic architecture.
IR465  The International Politics of Culture and Religion

This information is for the 2015/16 session.

Teacher responsible: Dr Katerina Dalacoura CLM 6.11

Availability: This course is available on the MSc in Human Rights, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Background in International Relations or a related discipline.

Course content: Approaches to understanding the role of culture and religion in the discipline of IR. Culture and religion in IR theory; their influence on the practice of international relations. Case study: Islam.

The course will be divided into two parts. In the first part, the contribution of a number of international relations theories to our understanding of culture and religion will be explored. The focus here will be on the English School and constructivism; critical theory, post-modernism and post-colonialism; cosmopolitanism, liberalism and communitarianism. The second part of the course will examine the role that cultural and religious issues play in the practice of international relations and in particular their influence on international norms, gender, foreign policy, conflict, negotiation and war.

Teaching: 9 hours of lectures and 30 minutes of seminars in the MT. 6 hours of lectures and 9 hours of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

Course commences Week 1 of MT. Sixteen lectures, (9 in MT, 6 in LT and 1 revision lecture in Week 1 of ST); sixteen one-and-a-half hour seminars (9 in MT, 6 in LT and one revision seminar in week 1 of ST).

Formative coursework: Students will be expected to write three 2,000 word essays by dates stipulated by their seminar leader.

Assessment: Exam (100%), duration: 3 hours) in the main exam period.

IR466  Half Unit

Genocide

This information is for the 2015/16 session.

Teacher responsible: Dr Jens Meierhenrich CLM 6.07

Availability: This course is available on the MSc in Conflict Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available with permission as an outside option to
students on other programmes where regulations permit. The course is available as an outside option. All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Course content:** This seminar course provides an introduction to the study of genocide. The course’s disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present-and for critically assessing the promise and limits of responding to collective violence.

**Teaching:** 20 hours of seminars in the LT.

**Formative coursework:** One x 2,000 word essay.

**Indicative reading:**

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**International Political Economy of the Environment**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Robert Falkner CLMS.05

**Availability:** This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations, MSc in International Relations (Research) and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Course content:** An introduction to concepts and issues in the study of international environmental politics, with special emphasis on the political economy of environmental protection; Environmentalism and the greening of international society; ecological perspectives on international political economy; domestic sources of environmental diplomacy; environmental leadership in international negotiations; international environmental regimes and their effectiveness; the role of nonstate actors (business, NGOs, scientists); corporate environmentalism; private environmental governance; trade and environment; international environmental aid; greening foreign direct investment; climate change; ozone layer depletion; biosafety regulation; deforestation.

**Teaching:** 10 hours of lectures, 15 hours of seminars and 15 hours of seminars in the LT.  
10 lectures and 10 seminars in LT.

**Topics:**
1. Introduction: The rise of global environmentalism in international politics
2. States and foreign environmental policy
3. Nonstate actors (NGOs and business) in global environmental politics
4. International environmental regimes and regime effectiveness
5. International trade and global environmental protection
6. Global finance, aid and sustainable development
7. Multinational corporations and private environmental governance
8. Climate change: international negotiations and multi-level governance
9. Biosafety: science and the politics of precaution
10. Deforestation: non-regimes and private governance

**Formative coursework:** Students will be expected to produce 2 essays in the LT.

**Indicative reading:**

**Assessment:** Exam (100%, duration: 2 hours).

The final examination lasts 2 hours and students will be asked to answer 2 out of 8 questions.
IR468  Half Unit
The Political Economy of Trade
This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The focus of the course is on explanations of trade policy choices as the result of political and economic factors. The first part of the course covers key models in the economics of international trade, including the New New Trade Theory. The second part of the course addresses political economy theories to explain protectionism and trade liberalisation. Particular attention is devoted to the role of interest groups and domestic political institutions in trade policy. The third part of the course studies how international regimes (e.g. the WTO and preferential trade agreements) affect trade policy in developed and developing countries. The fourth part of the course focuses on the effect of trade liberalisation in developing economies. This part of the course places emphasis on the relationship between trade, foreign direct investment, and the activities of multinational companies. The last lecture of the course looks at the links between international trade and monetary policy during periods of crises.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 10 lectures and 10 seminars in LT. Topics:
1. Macro-economic models: Sector model and factor model
3. Political economy models: The Role of Institutions
4. Political economy models: The Role of Interest Groups
5. From the GATT to the WTO: The multilateral trading system
6. The proliferation of preferential trade agreements: Causes and consequences
7. Trade and development
8. The Politics of FDI in developing countries
9. FDI, inequality, and economic growth in developing countries
10. Trade, exchange rates, and financial crises

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period. The final examination lasts 2 hours and students will be asked to answer 2 out of 8 questions.

IR469  Half Unit
Politics of Money in the World Economy
This information is for the 2015/16 session.

Teacher responsible: Prof Jeffrey Chwieroth CLM 5.11
Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Management, MSc in Management (CEMS MIM) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered
include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasizes that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. One lecture course (IR469.1) and one seminar course (IR469.2). Lectures begin in the first week of MT. Seminars begin in the first week of the MT. A series of 10 additional lectures (held in MT) are given as part of IR469.1, ‘Introducing Concepts in Monetary Theory and International Monetary Economics’. Students intending to take the course are expected to attend these lectures unless they already have a strong background in monetary economics. An ‘Examination Techniques and Preparation’ lecture will be held in week 2 of ST as part of the IR450 lecture series. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT. Students are expected to make presentations on topics of their choice and to write one 2,000-word essays, to be marked by the seminar teacher.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period. There is a two-hour formal examination in the ST based on the lecture course and work covered in the seminars. The paper contains about 10 questions, of which three are to be answered.

---

**IR481 Half Unit**

**Europe, the US and Arab-Israeli Relations**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Federica Bicchi CLM. 4.13

**Availability:** This course is available on the MSc in EU Politics, MSc in Global Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in International Relations Theory and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

**Pre-requisites:** A knowledge of post-1945 world history of the European Union governance system and of Middle East politics is required.

**Course content:** The course focuses on the foreign policy of the EU and of EU member states towards Arab-Israeli relations (with a special emphasis on Palestinian-Israeli relations), in comparison with the US foreign policy. The main focus will be on the European perspective, but it would be impossible to analyse this subject without taking into account the US position and, to some extent, Transatlantic relations. After an overview of Palestine during the British mandate, the course will cover the period from 1948 to nowadays with a particular emphasis on contemporary issues. The British mandate on Palestine. The partition of Israel and the birth of Israel. Early support for Israel. The Suez crisis. The evolution of European and US policy towards Israel. The birth of the “special relationship” between the US and Israel. The 1973 war, the energy crisis and the Euro-Arab Dialogue. The Venice Declaration. The US and European contribution to the Arab-Israeli peace process in the 1990s. The Euro-Mediterranean Partnership and the European Neighborhood Policy. Western democracy promotion and trade. Western aid to the Palestinians. The legalisation of relations with Israel. The collapse of the peace process and attempts at reviving it.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One 2,000-word essay during the course and one presentation (or alternatively two 2000-word essays), to be marked by seminar teachers. These do not count towards the final mark.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period. The normal length of the examination paper is eight questions, of which candidates are invited to answer any two.

IR499

Course content: Refer to Assessment below.
Teaching: 1 hour of lectures in the MT.
Additional dissertation advice sessions will be arranged by MSc
Programme Directors during the Lent Term. Details will vary by
Programme and students will be notified by email early in the
Lent Term.
Assessment: Dissertation (100%, 10000 words) in the LT.
MSc IR, MSc IR (Research), MSc IPE, and MSc IPE (Research) and
MSc IRT students are required to write a 10,000-word Dissertation on a topic within the field of IR/PE/IRT approved by the student’s
academic adviser. The Dissertation need not be an account of
original research and may rely on secondary sources but it should
be the product of work done independently and unaided by the the
student, except for the initial phase. The Dissertation is supervised in the sense that candidates receive as much help and advice as
they need to get their projects up and running. It is not supervised, in line with general School practice, in the sense of receiving
written and/or oral feedback on the actual text of the Dissertation.
Detailed advice on the nature of the academic adviser’s role, timing, deadlines and presentation will be given to students towards the end of MT.

Media and Communications Regulation

This information is for the 2015/16 session.
Teacher responsible: Dr Andrew Scott NAB6.25
Availability: This course is available on the MSc in Law and
Accounting, MSc in Media and Communications, MSc in Media
and Communications (Media and Communications Governance),
MSc in Media and Communications (Research), MSc in Public
Administration and Government (LSE and Peking University), MSc
in Public Policy and Administration, MSc in Regulation, Master of
Laws and Master of Laws (extended part-time study). This course is
available with permission as an outside option to students on other
programmes where regulations permit.
Course content: This course provides a comparative and
generic introduction to key issues in the regulation of media
and communications, focusing on economic and structural,
communal, and content regulation of print media, broadcasting,
telecommunications and internet, and including problems relating
to convergence of media and communications. The course considers the range of regulatory options open to meet regulatory objectives. Topics include regulating to protect reputation and privacy;
advertising regulation; rights creation and management; cultural
protection vs free trade in media services; regulating for impartiality
and diversity (public service broadcasting); licensing, spectrum
allocation and media ownership regulation; public value and
state aid controls; competition law and industry specific structural
regulation.
Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the
ST.
Formative coursework: All students will submit one 1,500 word
essay. Students will also be required to submit an essay plan and
annotated bibliography for the assessed essay.
Indicative reading: Gibbons, Regulating the Media (2nd edn,
Sweet & Maxwell, 1998); Feinstein and Varney, Media Regulation,
Public Interest and the Law (2nd edn, 2006); Goldberg, Prosser
& Verhulst (Eds), Regulating the Changing Media: a Comparative

Dissertation

This information is for the 2015/16 session.
Teacher responsible: Dr Stephen Woolcock CLM 6.13, Dr George
Lawson CLM.5.12 and Dr Jurgen Haacke
Availability: This course is compulsory on the MSc in International
Political Economy, MSc in International Political Economy (LSE and
Sciences Po), MSc in International Political Economy (Research), MSc
in International Relations, MSc in International Relations (LSE and
Sciences Po), MSc in International Relations (Research) and MSc in
International Relations Theory. This course is not available as an
outside option.
LL440  Corporate Accountability: Topics in Legal and Accounting Regulation

This information is for the 2015/16 session.

Teacher responsible: Dr Julia Morley

Availability: This course is compulsory on the MSc in Law and Accounting. This course is not available as an outside option.

Course content: The purpose of this course is to acquaint students with the central issues faced by law and accounting in relation to problems of corporate accountability and regulation. It is interdisciplinary in focus, and provides students with new perspectives and leads to in-depth study by way of a Long Essay.

Topics may include: regulatory institutions and techniques, statutes, markets, financial reporting, the interrelated functions and the rights and duties of directors and auditors; corporate law and stakeholders; shareholders, creditors, employees and the ‘public interest’; models of the corporate form, corporate groups Stakeholder reporting and environmental audit; audit committees, internal controls, the audit process and auditor liability; form, substance and the ‘true and fair view’ in financial reporting; accounting standards and company law; capital maintenance; executive remuneration; accounting standards and tax law; accounting for, and regulating, networks, SMEs and micro companies; regulating the professions; overview of functions of accountants and lawyers in corporate governance and the relation between them. Other issues in accounting and the law may be substituted/added.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT. Two meetings with each individual student’s Long Essay Supervisor.

Formative coursework: All students will be expected to contribute to class discussion. Feedback on performance and progress will be provided during class, on two written homework assignments, in two formal meetings with individual student’s Long Essay Supervisor, and during office hours

Indicative reading: No one book covers the entire syllabus.

Detailed reading lists will be provided during the course and will include articles from law, accounting, economics and sociology journals and books. Students will also be provided with relevant examples of practitioner reports, policy papers, and referred to relevant websites.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 10000 words) in August.

Law and Accounting Prize

The international law firm Herbert Smith Freehills sponsors a prize for the best examination performance on the MSc Law and Accounting. The prize is awarded at the Herbert Smith Freehills reception in November each year.

LL468  Half Unit

European Human Rights Law

This information is for the 2015/16 session.

Teacher responsible: Prof Conor Gearty SAR.G.04

Teaching Fellow: Dr Patrick O’Brien

Availability: This course is available on the MSc in Conflict Studies, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: This course will provide an overview of the origin, development and current standing of the European Convention on Human Rights and Fundamental Freedoms. Its primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also be referred to where appropriate. The course will analyse the Convention from the perspective of selected rights within it, but will also engage with the subject thematically, subjecting such concepts as the ‘margin of appreciation’ and proportionality to close scrutiny. The goal of the course is to give students a good critical understanding of the Convention, the case-law of the Strasbourg court and the Convention’s place within the constitutional and political structure of ‘Greater Europe’. This course complements UK Human Rights Law (LL469) but is entirely self-standing and can easily be taken without that course.

Teaching: 15 hours of lectures and 5 hours of classes in the MT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST.

There will be a Reading Week in week 6 of MT.

Formative coursework: One 2,000 word essay

The course will involve textbook reading but will primarily entail analysis of case-law read for the lecture and discussed in class.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

This subject is examined by one two-hour paper, composed of at least five questions of which two must be attempted. There will be a fifteen minute reading time during which the exam paper may be written on.

LL469  Half Unit

UK Human Rights Law

This information is for the 2015/16 session.

Teacher responsible: Prof Conor Gearty SAR.G.04

Dr Patrick O’Brien (LSE Fellow)

Availability: This course is available on the MSc in Conflict Studies, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: This course will be made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. The course will identify the principles that underpin the Act and explain its proper place in English law. It will also explore the wider
LL475  Half Unit
Terrorism and the Rule of Law

This information is for the 2015/16 session.

Teacher responsible: Prof Conor Gearty SAR G.04
Dr Patrick O’Brien (Teaching Fellow)

Availability: This course is available on the MSc in Conflict Studies, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available across all courses and potentially suitable for all but is particularly designed for LLM, MSc Conflict Studies, MSc Human Rights students.

This course is capped at 75 students.

Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of ‘terrorism’ from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September ‘war on terror’. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism.

Teaching: 15 hours of lectures and 5 hours of classes in the LT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST.

Formative coursework: One 2,000 word essay.

Indicative reading: There is no set text though reliance is made on the work of authors such as Richard English, Adrian Guelke, Lawrence Freedman, Igor Primoratz, Paul Wilkinson and the course teacher Conor Gearty. Students will receive a detailed Reading list for each topic, which will include legal cases from time to time. A recommended text will be Gearty, Liberty and Security (Polity Press, February 2013).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

This subject is examined by one two-hour paper, composed of at least five questions of which two must be attempted. There will be a fifteen minute reading time during which the exam paper may be written on.

LL490  LLM Self-standing full unit Dissertation

This information is for the 2015/16 session.

Availability: This course is available to students registered in or before the 2012/13 academic session on the Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

Course content: A self-standing dissertation for students whose dissertation topic does not fall under a related taught course. Permission must be obtained by a suitable course supervisor and the LLM Programme Director.

Assessment: Dissertation (100%, 15000 words).

15,000 word dissertation on a topic to be agreed with the LLM Programme Director and course supervisor. The dissertation option is to be chosen in only one full unit module, with its outline approved in the LT by the course supervisor. Deadline for submission is end of August.

LL497  Half Unit
Half Unit Self Standing Elective Essay

This information is for the 2015/16 session.

Availability: This course is available to students registered in or before the 2012/13 academic session on the Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

Course content: A self-standing elective essay for students whose elective essay does not fall under a related taught course. Permission must be obtained by a suitable course supervisor and the LLM Programme Director.

Assessment: Essay (100%, 8000 words) in the ST.

8,000 word elective essay on a topic to be agreed with the LLM Programme Director and course supervisor. The elective essay option is to be chosen in only one half unit module, with its outline approved in the LT by the course supervisor. Deadline for submission is end of August.

LL499  Dissertation: MSc Regulation

This information is for the 2015/16 session.

Availability: This course is compulsory on the MSc in Regulation. This course is not available as an outside option.

Course content: Refer to assessment below.

Assessment: Dissertation (100%, 10000 words).

The dissertation is due by the 1st September.

LL4A1  LLM Subject Area Specialist Research Seminars

This information is for the 2015/16 session.

Teacher responsible: Various.
Contact Ms Mandy Tinnams, NAB 6.08

Availability: This course is available on the LLM in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: A series of ad hoc one-hour seminars running during MT and LT. The programme changes annually, with sessions given by distinguished visiting academics, practitioners and other...
exposure to LLM students to a wider range of material than is possible in many of the taught courses, and to explore and challenge some of the issues and themes that are currently controversial. Most sessions will run as seminars rather than public lectures, with students expected to interact with the seminar speaker and with each other. **Teaching:** Weekly or fortnightly one-hour sessions during the MT and LT.

**Assessment:** Not assessed, although many sessions will be directly or indirectly related to material considered in other assessable LLM courses.

**LL4A5**  
**Half Unit**  
**Not available in 2015/16**  
**Investment Funds Law in Europe**

This is information is for the 2015/16 session.

**Teacher responsible:** Mrs Vivien Prais NAB6.02

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** This course examines the law and regulations governing collective investment funds in the UK and selected European jurisdictions (e.g. Germany, Italy, Sweden, Ireland and Luxembourg) and also relevant EU regulation. It will include a study both of investment funds law of the countries selected and a comparative assessment of the development and current features of the collective investment fund industry in the European context. Topics covered include: historical development of investment funds law in the UK and the respective European countries selected, with particular emphasis on the investment vehicle; a comparison of types of funds developed with emphasis on recent changes and innovation; the regulation of the establishment and marketing of collective investment funds, including UCITS, REITS and ETFs; taxation of investment funds; the effect of EC law, particularly the UCITS Directive of 2009 and Alternative Investment Fund Managers Directive (AIFMD) of 2013.

**Teaching:** 20 hours of seminars in the MT. 4 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4A6**  
**Half Unit**  
**Climate Change and International Law**

This is information is for the 2015/16 session.

**Teacher responsible:** Dr Stephen Humphreys NABS.12

**Availability:** This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential.

**Course content:** This half-unit course examines the law relating to when it is permissible to use force (jus ad bellum). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition. It looks in detail at the right of self-defence, humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression. The use of force by or with the authorization of the United Nations is also considered.
LL4A9  Half Unit
Law in War
This information is for the 2015/16 session.
Teacher responsible: Dr Stephen Humphreys NABS.12
Availability: This course is available on the MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Pre-requisites: Some prior knowledge of international law is useful but not essential.
Course content: This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict (LOAC) or international humanitarian law)—as distinct from the law on the resort to force (jus ad bellum), which is covered in a separate course (LL4A8). The course will take a critical and historical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war (‘Hague’ law), the ‘protected’ groups hors de combat (‘Geneva’ law), and the distinction between international and non-international armed conflict, the course will cover ‘lawfare’ more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in historical, actual and ongoing conflicts, including recent wars in Iraq and Afghanistan, the ‘war on terror’, and the Israeli Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.
Teaching: 24 hours of seminars in the MT. 2 hours of seminars in the ST.
There will be a reading week in week 6.
Formative coursework: Students have the option of submitting a 2,000 word essay on a topic to be assigned during Lent Term.
Other useful books include: Roberts and Guelff, Documents on the Laws of War (Oxford UP, 2000); Michael Walzer, Just and Unjust Wars (Basic books, 4th ed., 2006); David Kennedy, Of Law and War (Princeton UP, 2006); Geoffrey Best, War and Law Since 1945 (Oxford UP, 1997). Detailed readings for each seminar will be made available on Moodle.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AB  Half Unit
Law and Administrative Procedures in the EU
This information is for the 2015/16 session.
Teacher responsible: Professor Carol Harlow
Professor Richard Rawlings
Availability: This course is available on the MSc in Public Management and Governance, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Pre-requisites: A knowledge of the structure of European Institutions is desirable. It is not essential to have studied either EU law or administrative law. Guidance and introductory reading is provided for those who are new to these subjects.

LL4AA  Half Unit
Global Copyright Policy: Contemporary Issues
This information is for the 2015/16 session.
Teacher responsible: Anne Barron NAB6.05
Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Competition, Innovation, and Trade Law; Corporate and/or Commercial Law; Information Technology, Media and Communications Law; Intellectual Property Law.
Pre-requisites: Students must take Principles of Copyright Law (LL4AN6) in parallel with this course unless exempted by the course convenor.
Course content: The aim of this course is to equip students with the skills to reflect critically on global copyright policy today. ‘Global copyright policy’ in turn is interpreted broadly here to include not only the purposes and strategies underlying the formal treaties and trade arrangements that shape national copyright laws, but also those motivating the many alternative (and radically alternative) agendas for copyright’s future that are currently under consideration around the world. Discussion in seminars will be theoretically informed but organised around particular topics of contemporary concern.
Teaching: 22 hours of seminars in the MT.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: One 2,000 word essay.
Indicative reading: There is no set text. Readings will be assigned week-by-week and most will be available electronically via the Moodle site that accompanies this course. Students will be expected to read a wide range of material drawn from a number of disciplines. The following sources are indicative: Peter Baldwin, The Copyright Wars: Three Centuries of Trans-Atlantic Battle (Princeton UP, 2014); Yochai Benkler, The Wealth of Networks (Yale UP 2006); Ronald Bettig, Copyrighting Culture (Westview Press, 1996); James Boyle, The Public Domain (Yale UP, 2008); Julie E. Cohen, Configuring the Networked Self: Law, Code, and the Play of Everyday Practice (Yale UP, 2012); Laurence Helfer and Graeme Austin, Human Rights and Intellectual Property: Mapping the Global Interface (Cambridge University Press, 2011); Tarleton Gillespie, Wired Shut: Copyright and the Shape of Digital Culture (MIT Press 2008); David Hesmondhalgh, The Cultural Industries 3rd ed. (Sage 2012); Adrian Johns, Piracy: The Intellectual Property Wars from Gutenberg to Gates (University of Chicago Press 2011); Jessica Litman, Digital Copyright (Prometheus, 2006); Neil W. Netanel, Copyright’s Paradox (OUP 2008); Aram Sinnreich, The Piracy Crusade: How the Music Industry’s War on Sharing Destroys Markets and Erodes Civil Liberties (U Mass Press, 2014); Peter K. Yu (ed.), Intellectual Property and Information Wealth: Issues and Practices in the Digital Age (Praeger, 2007) (Vol. 1).
Assessment: Essay (100%, 8000 words) in the ST.

Course content: The objective of our course is to reflect on issues that are of interest and concern to administrative lawyers within the framework of a particular policy, the EU. We shall watch the development of an appropriate administrative law for the EU - a challenging task! Central to modern administrative law systems and to EU administration are directive principles of good governance, sponsored by the Organisation for Economic Co-operation and Development (OECD) through its SIGMA programme sponsored by the European Commission. These values are central to the Commission White Paper on European Governance (2000) and are now incorporated in the Lisbon Treaty and European Charter of Fundamental Rights (ECFR), which creates a right to good administration. The course deals with EU administration in the sense of administration by the European Commission and agencies, shared administration with Member States acting on behalf of the EU and in the increasing number of administrative ‘networks’ with which the EU cooperates. It aims to identify and evaluate the principles and values of administrative law and their application to EU administrative procedures.

Objectives:
• To instil knowledge of public administration outside the state and more particularly in the EU
• To promote knowledge of modern administrative law and its problems
• To encourage group learning
• To promote spoken facility
• To familiarise students with comparative administrative law materials and teach research methods

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST. 20 hours of seminars in the MT. 2 hours of seminars in the ST. Please note that this course will be taught in Weeks 2-11. This is a joint UCL/LSE course, open to students of each. It is separately examined according to the examination regulations of each institution. It is taught at the Institute of Advanced Legal Studies in Russell Square.

Formative coursework: Students are expected to submit a 2,000 word essay during the course, to be returned with detailed comments. Note that student participation and group cooperation is very important in this course and opportunities will be provided for student presentations with feedback.

Indicative reading: where appropriateThe recommended text is C Harlow and R Rawlings, Process and Procedure in the EU (Oxford: Hart Publishing, 2013) is made available electronically. Two excellent reference books, P. Craig, EU Administrative Law (Oxford: OUP) 2nd edn, 2012 and H. Hofman, G Rowe and A Turk, EU Administrative Law and Policy (Oxford: OUP, 2011) are available in LSE, UCL and IALS libraries. There is also much legal periodical literature in: the Common Market Law Review, European Law Review European Law Journal, European Public Law and European Review of Public Law (ERPL) and many political science journals: Journal of European Public Policy, Journal of Common Market Studies and West European Politics. All these journals are available in the IALS and college libraries and online. There are also useful on line journals, notably the German Law Journal and Italian Journal of Public Law and sets of papers, such as the Jean Monnet working papers (see weblinks). Many additional materials are easily accessible through the websites of the EU. References to these are given throughout the course and a general list of weblinks and blogs is provided.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AC  Half Unit

Legal Accountability and Redress of Grievance in the EU

This information is for the 2015/16 session.

Teacher responsible: Professor Carol Harlow and Professor Richard Rawlings

Availability: This course is available on the MSc in Public Management and Governance, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is open to students with and without a law degree. Students of public administration are welcome. A knowledge of the structure of European institutions is desirable. Specialisms: EU law and Public Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The objective of our course is to reflect on issues that arise for lawyers from the exponential growth of transnational systems of administration, which are not necessarily amenable to the traditional machinery for administration. We focus on the rapid judicialisation of public administration but focus on a particular supra-national polity, the EU. GSSC 12/34 15 May 2013 Objectives:
• To instil understanding of public administration outside the state and more particularly in the EU
• To promote understanding of problems for modern administrative law in the context of globalisation
• To study inter-court relationships in the context of the EU
• To study other forms of dispute resolution, especially the European Ombudsman and European Network of Ombudsmen
• To encourage group learning
• To promote spoken expertise
• To familiarise students with comparative administrative law materials and teach research methods

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students are expected to submit a 2,000 word essay during the course, to be returned with detailed comments. Note that student participation and group cooperation is very important in this course and opportunities will be provided for student presentations.

There is also much legal periodical literature: the Common Market Law Review, European Law Review European Law Journal, European Public Law and European Review of Public Law (ERPL) and many political science journals: Journal of European Public Policy, Journal of Common Market Studies and West European Politics. All these journals are available in the IALS and college libraries and online. There are also useful on line journals, notably the German Law Journal and Italian Journal of Public Law and sets of papers, such as the Jean Monnet working papers (see weblinks). Relevant writings by the teachers include: C Harlow, Accountability in the European Union (Oxford: Oxford University Press) 2002; ‘Accountability as a Value for Global Governance and Global Administrative Law’ in G Anthony et al (eds), Values in Global Administrative Law: Essays in Honour of Spyridon Flogaitis and Gerard Timsit (Hart Publishing,
LL4AD  Half Unit
Rethinking International Law: International Law and Contemporary Problems I

This information is for the 2015/16 session.

Teacher responsible: Prof Gerry Simpson

Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the International Relations specialism. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: There are no prerequisites.

Course content: This course is designed for students who have already had some exposure to public international law and wish to deepen their understanding of the international legal dimensions of contemporary problems such as war, terrorism and counter-terrorism; governance; territory and statehood; humanity; and collective memory. Course readings will encompass both legal literature and writing by scholars from other disciplines, such as geography, anthropology, philosophy, and literary studies. The idea, then, is to acquire some sort of historically-situated understanding of the grammars of international law, the projects to which international lawyers commit, and the choices made and not made by international lawyers in the context of the institutional and everyday life of international law.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Readings likely to be set include: M. Koskenniemi’s From Apology to Utopia: The Structure of International Legal Argument, (1989) and (2007, which contains an indispensable epilogue) and his The Gentle Civiliser of Nations (2002); Philip Allott, Eunomia (1997); David Kennedy’s Of Law and War, “Spring Break” and “The Move to Institutions”; Tony Angihe’s Sovereignty; Chris Reus-Smith’s The Moral Theory of the State; Carl Schmitt’s The Nomos of the Earth; James Crawford’s Making of International Law; and Anne Orford’s edited volume International Law and its Others, each contain some excellent work.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Students are expected to have done the set reading and be willing to participate in seminar discussion.

LL4AE  Half Unit  Not available in 2015/16
Rethinking International Law II: International Legal Thought

This information is for the 2015/16 session.

Teacher responsible: Prof Susan Marks NAB7.14

Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the Public International Law specialism. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: Students must have completed Rethinking International Law: International Law and Contemporary Problems I (LL4AD).

Course content: This course builds on Rethinking International Law I: International Law and Contemporary Problems, exploring debates about the historical development, contemporary character and future prospects of international law, and about the diversity of approaches to its study. Among the questions we are likely to consider are: what is at stake in the controversy over whether international law is ‘really law’? What is the relation between the history of international legal thought and the history of such other global phenomena as colonialism and capitalism? What theoretical reference-points are used by international legal scholars today, and what are the implications of these for analysis, policy and action?

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students are expected to have done the set reading and be willing to participate in seminar discussion.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AF  Half Unit
Principles of Global Competition Law

This information is for the 2015/16 session.

Teacher responsible: Dr Niamh Dunne

Availability: This course is available on the MSc in Regulation, Law and Masters of Law and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This module provides an overview of the major features of competition law regimes. This is a discipline that has gone through a remarkable process of expansion in the past two decades. Competition law is actively enforced in a growing number of jurisdictions. Instead of focusing on a particular regime, the module puts an emphasis on the fundamental debates underlying
the adoption and evolution of this field. Examples drawn from the US and EU law will be generally used by way of illustration, but references to other regimes will be made where relevant. The topics addressed include the following:
• Competition Law and Economics
• Cartel agreements
• Vertical restraints
• Unilateral conduct: predatory pricing
• Unilateral conduct: tying and bundling
• Unilateral conduct: refusal to deal
• Merger control: horizontal mergers
• Merger control: vertical and conglomerate mergers
• Institutions and enforcement

Teaching: 20 hours of seminars and 4 hours of classes in the MT. 2 hours of seminars in the ST. There will be a Reading Week in week 6 of the MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AH Half Unit
Corporate Governance

This information is for the 2015/16 session.

Teacher responsible: Dr Carsten Gerner Beuerle NAB 5.08

Availability: This course is available on the MSc in Law and Accounting, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students (or two groups of 30 students each, i.e. 60 students depending on demand). LLM Specialisms This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; Corporate and Securities Law; International Business Law.

Pre-requisites: Students should either have studied company law at undergraduate level or take LL4CF UK Corporate Law concurrently.

Course content: This course will examine topical issues of corporate governance on a comparative basis. It does not intend to present a comprehensive overview of the corporate governance system of any particular jurisdiction, nor does it constitute a self-contained introduction to corporate law. Rather, we will identify corporate governance conflicts created by the use of the corporate form, notably agency problems between shareholders, the management, and other corporate actors, and discuss solutions to these conflicts developed by different jurisdictions and legal traditions. We will draw on, and compare, three of the most important legal traditions of the world: common law (focusing in particular on the law of Delaware), the German legal tradition, and the French legal tradition.

We will assess the comparative effectiveness of the solutions found in the jurisdictions analysed. We will generally engage in a qualitative evaluation of the advantages and disadvantages of the different regulatory strategies, but also refer to quantitative studies in the literature that examine the correlation between regulatory approaches and financial variables such as the cost of capital of a business. In addition, we will attempt to identify general trends and trajectories in corporate law and explain instances of divergence or convergence of the legal strategies that we observe.

Topics include:
• Comparative and empirical methods in corporate law
• The economic structure of the corporation in comparative perspective
• Corporate governance models
• Allocation of decision rights within the corporation
• The managerial agency problem I: directors’ duties and proper purpose of the exercise of managerial power
• The managerial agency problem II: duty of care and the business judgement rule
• The managerial agency problem III: related-party transactions and corporate opportunities
• Enforcement of duties; derivative action
• Determinants of corporate law, trajectories and trends; legal origins

The course can be taken either as a self-standing module or as a foundational module for Corporate Governance B, which will address more specific issues of corporate governance, such as regulation by means of corporate governance codes, executive remuneration, minority shareholder protection, and shareholder activism.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

20 hours of seminars in the MT. 2 hours of seminars in the ST.
There will be a reading week in week 6. Summer term is a review and revision session.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** Indicative reading

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4AJ  Half Unit**

**Insolvency Law: Principles, Rescue and Reconstruction Processes**

This information is for the 2015/16 session.

**Teacher responsible:** Ms Sarah Paterson

**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Course content:** This course focuses primarily on registered companies and is concerned with the rescue of financially distressed companies and businesses. The formal legal procedures available for rescuing companies and businesses in financial distress are analysed as are informal approaches to corporate failure.

**Topics include:** Introduction: Aims and Objectives. The administration of insolvency processes: insolvency practitioners, the Insolvency Service and turnaround professionals. Corporate Rescue Procedures: informal rescues. Corporate Rescue Procedures: formal procedures. Business rescues - comparative approaches: USA, Chapter 11.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

A variable format: some lecture-discussions, some student-paper-led discussions, some debates and guest speakers where appropriate.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** A full Reading List will be distributed during the course. The recommended text is V. Finch, Corporate Insolvency Law: Perspectives and Principles (Cambridge University Press, 2009) (2nd edition).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**Teacher responsible:** Prof Trevor Hartley NAB 7.23  
Dr Jacco Bomhoff NAB 6.09  
**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Knowledge of conflict of laws (private international law) would be useful but is not essential. Good general understanding of commercial law is essential.

**Course content:** This course is concerned with the regulation of international business and the protection of human rights and the environment through the international application of national tort law and company law. The following topics will be studied from the point of view of European Union law, English (common and statute) law, Commonwealth law and US law: 1) Theories of choice of law in Europe and the US; 2) Proof and application of foreign law; 3) Choice of law regarding company-law matters; 4) Choice of law regarding non-contractual liability (especially in tort), including some or all of the following: a) Personal injury and wrongful death; b) Product liability; c) Environmental damage; d) Intellectual property; e) Unfair competition and restriction of competition; f) Unjust enrichment, negotiorum gestio and other forms of non-contractual liability; g) Maritime torts; and h) industrial action; 5) The problem of extraterritoriality with special reference to American antitrust law and EU competition law; and 6) transnational human-rights litigation.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in Week Six of MT

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
Pre-requisites: Knowledge of conflict of laws (private international law) would be useful but is not essential. Good general understanding of commercial law is essential.

Course content: The following topics will be studied from the point of view of European Union law, English (common and statute) law, Canadian law and US law: 1) Principles and theories of choice of law; 2) Proof and application of foreign law; 3) Contracts: applicable law; 4) The international reach of legislation for the regulation of business and the protection of consumers and employees; 5) The private international law aspects of boycotts and embargoes; 6) Exchange controls; 7) Currency problems in international contracts; 8) The international aspects of property transactions; 9) The recognition of foreign expropriations and other governmental acts affecting property (including financial assets).

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AQ  Half Unit
Constitutional Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Loughlin NAB 7.12

Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Human Rights Law, Legal Theory, Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The course addresses the following topics: constitutions, constitutional order, constitutional foundation; constitutionalism; constitutional exception; constitutional rights; constitutional democracy; constitutional adjudication; constitutional recognition; and cosmopolitan constitutionalism.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Much of the reading for the course consists of readings available online and the course is delivered through Moodle. A background text is Martin Loughlin, The Idea of Public Law (OUP, 2003).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AR  Half Unit
International Criminal Law 1: Core Crimes and Concepts

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Humphreys NAB5.12

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Criminology and Criminal Justice, Public International Law, Human Rights Law. This course is capped at 30 students.

Course content: This course, the first of two available options on international criminal law, will examine the rationale for the introduction of criminal procedures and institutions at international level, and the degree to which the field is achieving – and is capable of achieving – its stated objectives. It will cover the conceptual and practical problems associated with the turn to legalised retribution and the criminalisation of political activities, with a view to assessing the field’s trajectory and progress.

Topics include:
• Introduction
• Objectives and obstacles
• Versailles
• Nuremberg
• Universal jurisdiction
• War Crimes
• Crimes against humanity
• Genocide
• Aggression
• Private responsibility for international crimes

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AS  Half Unit
International Criminal Law 2: Prosecution and Practice

This information is for the 2015/16 session.

Teacher responsible: Dr Devika Hovell NAB 6.32

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Criminology and Criminal Justice, Public International Law, Human Rights Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines the practice and procedure of international criminal law. Rather than examining the history and core crimes, the course focuses on the fora for prosecution of international crimes and the practice, procedure and politics of
international prosecutions. In terms of the forum for prosecution, we examine the ad hoc international criminal tribunals for Rwanda and the former Yugoslavia and hybrid tribunals such as the Special Tribunal for Lebanon, the Extraordinary Chambers in the Courts of Cambodia and the Special Court for Sierra Leone. We then consider the opportunities for prosecution of international crimes in domestic courts, looking in particular at the principle of universal jurisdiction. Finally, we turn to the International Criminal Court. We consider the foundation of authority of international criminal tribunals, the relationship between the various international criminal tribunals and controversial questions about jurisdiction in current cases. In terms of practice and procedure, we examine the modes, limits, exclusion and enforcement of individual criminal responsibility. We will look at questions, theory and case law surrounding modes of liability, immunities, defences and state cooperation.

Finally, we will consider future challenges for the prosecution of international crimes. The course will respond to current controversial issues in international criminal law, such as Palestine’s accession to the Rome Statute, the selectivity of international criminal prosecutions, the relationship between domestic legal systems such as Libya and the ICC and the implications of these issues for the legitimacy of the international criminal law project.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4AU Half Unit**

**Regulation: Legal and Political Aspects**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Gordon Baldwin NAB7.08

**Availability:** This course is available on the MSc in Law and Accounting, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Management and Governance, MSc in Public Policy and Administration, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation; Corporate and/or Commercial Law; Criminology and Criminal Justice; Information Technology, Media and Communications Law; Intellectual Property Law; Legal Theory; and Public Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** The course aims to give students an essential grounding in theories of regulation as these relate to the evaluation of regulatory regimes and the challenges of accounting for regulatory practice. Different ways of understanding regulatory developments will be discussed as will the set of challenges that arise when regulation is carried out by numbers of regulators at different levels of government. Topics dealt with will include:

- What is Good Regulation?
- Accountability & Regulation
- Regulation and Cost Benefit Analysis
- The Better Regulation Movement
- Self-Regulation
- Rules, Standards and Principles
- Regulatory Competition
- Regulatory Networks
- Lenses for Viewing Regulation
- The Future of Regulation

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

---

**LL4AT Half Unit**

**Regulation: Strategies and Enforcement**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Gordon Baldwin NAB7.08

**Availability:** This course is available on the MSc in Law and Accounting, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Management and Governance, MSc in Public Policy and Administration, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available for students of the MSc Regulation programme.

This course will respond to current controversial issues in international criminal law, such as Palestine’s accession to the Rome Statute, the selectivity of international criminal prosecutions, the relationship between domestic legal systems such as Libya and the ICC and the implications of these issues for the legitimacy of the international criminal law project.

**Teacher:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---
**LL4AV  Half Unit**

**Global Trade Governance: Contemporary Issues**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Andrew Lang NAB 6.19  
**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. LLM Specialisms. Students must apply through Graduate Course Choice on LSEforYou. This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade Law, Public International Law, International Business Law.  
**Pre-requisites:** Students must have completed Foundations of International Economic Law (LL4B1).  
**Course content:** The aim of this course is to allow students with a particular interest in global economic governance to explore a greater diversity of topics than is possible in one term only. At one level, this involves covering a greater range of WTO agreements, including this TBT Agreement, Subsidies Agreement, SPS Agreement, the GATS, TRIPs and others. In addition, however, there is a much greater emphasis in this course (as compared to the Core Principles course) on using issues of contemporary trade governance to explore broader questions concerning the modalities of contemporary economic governance at the global level. Core themes of concern will include: international legal pluralism; the role of knowledge practices and the aesthetics of expertise in international economic governance, international economic law ‘after the crisis’, the emergence of new ‘developmentalism’ and its prospects, and spaces and modalities of contestation in contemporary global economic governance. Class Schedule (Indicative Only) 1. The WTO and global food governance: the SPS Agreement and the Agreement on Agriculture 2. Contemporary issues in subsidies regulation 3. Trade remedies and contingent protection 4. The TBT Agreement 5. Advanced issues in WTO dispute settlement 6. The new regionalism: TTIP and TPP 7. The new developmentalism 8. The WTO and the global financial crisis.  
**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.  
**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.  
**Indicative reading:** Detailed reading lists and class outlines for each week are available through the Moodle page for this course. You are expected to come to class having read the Essential Reading for that week, all of which is readily available either in electronic form, or in hard-copy in the library. The items listed under Further Reading will assist those of you who wish to research more deeply into a particular topic, either in the context of exam preparation or the writing of a dissertation. There are two textbooks for this course, and you may purchase either. One is Trebilcock and Howse, The Regulation of International Trade, 4th ed., (Routledge, 2013). The other is Van den Bossche, The Law and Policy of the World Trade Organization: Texts, Cases and Materials, 3rd ed., (Cambridge University Press, 2013). You must also purchase a copy of The Legal Texts: The Results of the Uruguay Round of Multilateral Trade Negotiations, (Cambridge University Press). This contains most of the basic documents required for the course. An unmarked version of this text will be the only text allowed into the examinations. Students should ensure that they refrain from marking the text. You may find it helpful to own or have ready access to a copy of Lester and Mercurio, World Trade Law: Text, Materials and Commentary (2nd ed, 2012).  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4AW  Half Unit**

**Foundations of International Human Rights Law**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Margot Salomon TV2 11.01F  
**Availability:** This course is available on the MSc in Development Studies, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Public International Law, Human Rights Law. This course is capped at 60 students.  
**Pre-requisites:** None but a pre-requisite for LL4AX when available.  
**Course content:** The course provides an introduction to historical developments and institutional structures that have given shape to the international human rights legal regime. Part 1 of this course considers a range of foundational and enduring debates around the role of international human rights as a force for emancipatory change and popular empowerment. With a particular focus on the post-1945 institutional order, Part 2 maps the terrain that established the human rights regime at the international level and that continues to inform the contributions and limits of human rights protection and promotion. Topics vary from year to year and may include:  
- Universal and Divergent  
- Legal Sources and Normative Frameworks  
- Historical Antecedents  
- Global Regime  
- Human Rights Enforcement UN Reform  
- Regional Human Rights Regimes.  
**Teaching:** 20 hours of lectures in the MT. 2 hours of lectures in the ST.  
10 weekly two-hour lectures in the Michaelmas term, with a reading week in week 6, based on a format of lecture-discussions with the possibility of guest speakers where appropriate and depending on numbers, corresponding fortnightly one-hour classes.  
**Formative coursework:** One 2,000 word essay.  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
LL4AX  Half Unit  Not available in 2015/16

Selected Topics in International Human Rights Law

This information is for the 2015/16 session.

Teacher responsible: Prof Susan Marks NAB 7.14, Dr Margot Salomon TW2 11.01F and Prof Christine Chinkin NAB 6.15

Availability: This course is available on the MSc in Development Studies, MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law, Human Rights Law

Pre-requisites: Students must have completed Foundations of International Human Rights Law (LL4AW).

Course content: Building on the foundations provided in LL4AW, this course explores the international protection of human rights through a range of contemporary topics. The course examines legal and institutional efforts to confront deprivation, indignity and violence, along with the rights of particular groups, such as refugees and indigenous peoples. Recurring questions will be: in what ways do international human rights help to alleviate global problems involving suffering and in what ways do they instead serve to sustain the conditions for those problems’ occurrence? How might we understand the contribution of human rights to addressing current ills, and what are their particular limitations? Through the study of key concepts, norms, processes and debates, students will be encouraged to develop an informed and critical assessment of the significance of human rights as a force for emancipatory change. Topics may include:

- Human Rights and Counter-terrorism
- The Prohibition on Torture in Question
- Economic, Social and Cultural Rights
- Violence Against Women
- Human Rights and Armed Conflict
- The Human Rights of Refugees and Internally Displaced Persons
- Identity and Non-Discrimination
- Indigenous Peoples and Rights to Land and Natural Resources

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Teaching based on a format of lecture-discussions with the possibility of guest speakers where appropriate and depending on numbers, corresponding fortnightly one-hour classes.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AY  Half Unit

International Tax Systems

This information is for the 2015/16 session.

Teacher responsible: Mr Eduardo Baistrocchi NAB 7.33

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: International Business Law, Taxation.

Course content: This course examines how taxation applies to transactions in the international context, and considers tax law that operates at the international and supra-national levels. The focus is on rules that operate at an international or supra-national level, though we will look at some domestic rules that are important to international taxation and how that can be found in a number of important tax systems. The course will look at a series of international transactions, starting with the very basic example of an export and import of goods and culminating with the treatment of some complex and artificial structures. The features of tax systems will be studied through these transactions, particularly those features found in double tax conventions and in the law of the European Union. In the first part of the course this will be supplemented by introductions to some key foundation concepts that are needed in the study of international taxation. Throughout the course examples will be drawn from the tax systems of a range of countries.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

This will be based on a format of lecture-discussions with the possibility of guest speakers where appropriate and depending on numbers. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are asked to submit one 2,000 word essay.

Indicative reading: Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4AZ  Half Unit  Not available in 2015/16

International Tax Systems: Advanced Problems

This information is for the 2015/16 session.

Teacher responsible: Ian Roxan, Room NAB 7.33. Eduardo Baistrocchi is on sabbatical leave Lent Term 2015

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: International Business Law, Taxation.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students should have at least a basic knowledge of a tax system of a country (not necessarily the UK) or be studying LLAZ1 Business Taxation.

Course content: The course will look at a series of international transactions, focusing on the treatment of some complex and artificial structures. They include base erosion, profit shifting and the resolution of transfer pricing disputes. Throughout the course examples will be drawn from the tax systems of a range of countries from the OECD and non-OECD worlds.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This is based on a format of lecture-discussions with the possibility of guest speakers where appropriate and depending on numbers, corresponding fortnightly one-hour classes.

Formative coursework: Students are asked to submit one 2,000 word essay.

Indicative reading: Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

LL4B1  Half Unit

Foundations of International Economic Law

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lang NAB6.19

Availability: This course is available on the MSc in Development Studies, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: The aim of the course is to study in detail those aspects of public international law which are concerned with international economic relations. We will concentrate on the core principles, norms and policies of international trade governed by the World Trade Organization. The course topics may include:

- Historical background of the international economic order
- Theoretical approaches to international political economy
- WTO decision-making and dispute settlement
- GATT/WTO basic principles: MFN, national treatment, tariffs, quotas and exceptions
- Selected additional topics chosen from amongst: Trade in Services; Trade-Related Intellectual Property Rights; Technical Barriers to Trade; Sanitary and Phytosanitary Measures; Subsidies and Countermefasures; Anti-Dumping; Relationship between the WTO and regional integration; Trade and public health / environment / human rights / development.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

---

LL4BA  Half Unit

International Law and the Movement of Persons within States

This information is for the 2015/16 session.

Teacher responsible: Dr Louise Arimatsu

Availability: This course is available on the MSc in Human Rights, MSc in International Migration and Public Policy, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Public International Law and Human Rights Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the movement of persons within States and protection of internally displaced persons are situated. The course explores the overlap between International Human Rights Law, International Humanitarian Law and Humanitarian Assistance with respect to internally displaced persons. It covers: the definition of internally displaced persons; individual criminal responsibility for forcible displacement before ad hoc Tribunals with criminal jurisdiction and the International Criminal Court; standards applicable in international law to the protection of internally displaced persons, the regime of humanitarian assistance to displaced persons; and finally the institutional protection of internally displaced persons by the United Nations Special Rapporteur on the Human Rights of Internally Displaced Persons, the United Nations High Commissioner for Human Rights, and the United Nations High Commissioner for Human Refugees.

Topics include:

- Regulation of movement within States in International Law
- Territorialism, movement, and displacement
- Internally displaced persons and the role of the UN Special Rapporteur on the Human Rights of Internally Displaced Persons
- Protection of Internally Displaced Persons in International Human Rights Law
- Protection of Internally Displaced Persons in International Humanitarian Law
- The Regime of Climate Change induced Displacement
- Individual Criminal Responsibility for Forcible Displacement
- Institutional Protection and Humanitarian Assistance
- Internally Displaced Persons in Post-Conflict Situations
- Remedies and ‘durable’ solutions for Internally Displaced Persons

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This will be based on a seminar format with structured discussions, debates, and presentations by students and guest speakers where appropriate.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
**LL4BB  Half Unit**

**International Law and the Movement of Persons Between States**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Louise Arimatsu

**Availability:** This course is available on the MSc in Human Rights, MSc in International Migration and Public Policy, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the protection of asylum seekers, refugees and refugee women, and migrants are situated. The course explores the overlap between International Refugee Law, International Human Rights Law, International Criminal Law, the phenomenon of Migration, including Human Trafficking in the context of refugees, legal and illegal migrants. It covers: the definition of refugees, legal and illegal migrants, including trafficking in human beings; the concepts of 'well-founded fear' of persecution and group eligibility to refugee protection; procedures for determining refugee status on an individual and group basis; Africa, Asia, Australia, the European Union, North America, and Latin America; temporary protection; the process of exclusion from refugee protection; the role, in refugee law and human rights, of the principle of non-refoulement in refugee protection; the cessation of refugee status, voluntary repatriation, and safe return; standards applicable in international law to the protection of refugees, migrants, and evolving standards against human trafficking; the regulation of migration in regional economic and political unions, namely the European Union, East African Community, the Union of West African States, the Caribbean Community and the Southern African Development Community; and finally the institutional protection of refugees, and migrants by the United Nations High Commissioner for Refugees and the, the International Organisation for Migration.

**Topics include:**
- International Law and the Movement of Persons Between States
- Definition of Refugees
- The Right to Seek and Obtain Asylum and Determination of Refugee Status
- Exclusion from Refugee Protection
- Protection of asylum seekers and refugees from Refoulement
- Standards of Protection and cessation of refugee status
- Definition of Migrants
- Protection of Migrants in International Human Rights Law
- Regional Integration and Migration
- Trafficking in Human Beings and Human Smuggling

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

This is based on a seminar format with structured discussions, debates, and presentations by students and guest speakers where appropriate.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4BC  Half Unit**

**Policing and Police Powers**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robert Reiner NA7.23

**Availability:** This course is available on the MSc in Criminal Justice Policy, MSc in Public Management and Governance, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The police are a central part of the criminal justice system and of the State’s formal machinery for maintaining order and enforcing law. It is difficult to underestimate their importance in the process of criminal law enforcement and social policy more generally. Nonetheless the police are only one aspect of the more general institutions and processes of policing. There is a burgeoning research, policy-oriented and theoretical literature analysing the nature and functions of policing. Policing and police powers are central focal points for debate in the politics of criminal justice, as well as one of the fastest-growing areas in academic research and publishing within criminology. This course will review the extensive research literature. It is a recommended but not compulsory pre-requisite for course LL4BD which examines contemporary issues and policy developments in policing.

1. The nature and functions of ‘policing’. What is the role of the police in the State and legal system? The pluralisation of policing, and the relationship between the police and other aspects of policing.
2. The historical development of policing. Theoretical debates about the explanation and interpretation of changes in policing in modern times.
3. Police work and the impact of police organisations. Particular stress will be laid on issues of police discretion, culture, discrimination, and the measurement and enhancement of ‘effectiveness’.
4. The characteristics and dynamics of police organisations. Particular attention will be paid to questions of management, personnel issues, and ‘canteen culture’ ie informal organisation
5. Specialist aspects of policing organisations, notably criminal investigation, and the control of public order, will be examined.
6. The relationship between State and ‘private’ forms of policing.
7. The legal powers of the police. Police powers and the controls over their exercise will be analysed, with particular reference to The Police and Criminal Evidence Act 1984 and its impact.
8. Police accountability and control. Who guards the guardians? The complaints system and the debates about police governance will be discussed.
9. The role of police organisation in the formulation of law and criminal justice policy. The politics of police representative associations, and their role as pressure groups for legal and policy change.
10. Policing and the Mass Media. The representation of the police and policing in the mass media will be analysed, and its implications assessed.

**Teaching:** 20 hours of seminars in the MT. 4 hours of seminars in the ST.

There will be a Reading Week in week 6. There will be two revision sessions in the Summer Term.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
LL4BD  Half Unit  Policing: Contemporary Issues and Controversies

This information is for the 2015/16 session.

Teacher responsible: Prof Robert Reiner NAB 7.23
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Public Management and Governance, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following specialisms: Criminology and Criminal Justice, Public Law, Legal Theory.

Course content: The police are a central part of the criminal justice system and of the State’s formal machinery for maintaining order and enforcing law. LL4BC offered a survey of the research literature on the functioning and governance of policing organisations. This course builds on that by analysing and discussing contemporary controversies, issues and policy developments. The list of topics will include: 1) Specialist forms of policing such as: homicide investigations, rape investigations, public order, drugs policing, transnational policing, private policing 2) Diversity and policing: especially gender, ethnicity, sexuality. 3) Policing and social justice: discriminatory use of police powers such as stop-and-search. 4) Innovations in policing tactics: such as community, zero-tolerance, problem-oriented, intelligence-led policing. 5) Developments in police governance e.g. Police and Crime Commissioners, the Independent Police Complaints Commission. 6) Alternative policing models, such as restorative justice, and the possible futures of policing.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be two revision sessions in the Summer Term.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BF  Half Unit  International Financial Regulation

This information is for the 2015/16 session.

Teacher responsible: Dr Philipp Pach NAB 7.05
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Regulation, MSc in Risk and Finance, Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation, Corporate and Securities Law and International Business Law.

Course content: This course focuses on the micro- and macro-prudential regulation of financial institutions and the financial system. It examines the prudential regulation of banks, bank resolution schemes, the regulation of shadow banking and other regulatory attempts to ensure financial stability. The focus will be on the regulation of national and international aspects of financial institutions and the financial system, rather than on private law and transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required.

The syllabus includes the following topics:
• Dynamics of financial crises
• Economic theories of financial markets
• Sociological theories of financial markets
• Shifting rationales of regulation
• Dynamics of regulation at the global, EU and national level (focusing on the UK)
• Regulation inside firms including the corporate governance of financial institution
• Strategies of supervision and enforcement.

Teaching: 20 hours of seminars in the MT.

There will be 10 two-hour seminars in up to 3 parallel groups (each with a maximum of 30 students) and one revision seminar.

A number of guest lecturers may also be invited to give lectures on their specialist areas.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students electronically where possible. In addition, the students will be invited to do independent reading. Good general introductions are A. Turner et al, The Future of Finance: The LSE Report (2011) and D. Tarullo, Banking on Basel (2008) and E. Avgouleas, Governance of Global Financial Markets (2012).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BE  Half Unit  Principles of Financial Regulation

This information is for the 2015/16 session.

Teacher responsible: Prof Julia Black NAB 7.09
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Regulation, MSc in Risk and Finance, Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

This course is capped at 90 students. This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation, Corporate and Securities Law and International Business Law.

Course content: This course examines the principles of financial regulation and the dynamics of the regulatory structures at the international, EU and UK level. The aim is to develop a critical understanding of the changing conceptual framework for financial regulation, and an awareness of its practical operation. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required.

The syllabus may include the following topics:
• The Rational of International, EU and UK Regulatory Structures
• Core concepts of Financial Regulation, pre- and post-Crisis
• Financial Stability – Policy Issues, Principles and Global Standard
LL4BG  Half Unit  Rethinking EU Law

This information is for the 2015/16 session.

**Teacher responsible:** Dr Michael Wilkinson NAB 6.28

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study) course. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

For the LLM (Specialisms: European Law, Legal Theory, Public Law, Human Rights Law)

**Course content:** The course examines the philosophical and theoretical underpinnings of the EU and European Union law: it explores issues such as the nature and evolution of the EU and its legal order, its relationship to international law, its democratic and constitutional credentials, the place of fundamental rights and their relationship to market freedoms and the idea of a European economic constitution, which underlies the law of the Internal Market. It offers students a deeper understanding of the structures and systems that inform EU law but also an opportunity to think about how European integration informs our ideas of law and the modern state.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Assessment:** Essay (100%) in the LT.

LL4BH  Half Unit  Contemporary Issues of European Union Law

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jan Komarek COW 1.04

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study) course. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

For the LLM (Specialisms: European Law, Public Law, Human Rights Law)

**Pre-requisites:** Basic knowledge (at an undergraduate level) of EU law is required.

**Course content:** Each year we select topics to be covered in the course in order to make it truly “contemporary” issues of EU law.

We will therefore focus on questions that are raised in debates amongst not only legal academics and EU law practitioners, but also and in the general public, which is increasingly aware of the EU’s role in the “experience of government” in Europe. In 2015-16 we will discuss for example the role of the EU in enforcing its values against its own Member States (should the EU somewhat intervene in Hungary and if so, how?), whether it is a good idea for the EU to accede to the European Convention and what to make of the ECJ’s opinion that rejected the draft agreement to that effect, or what are the implications of the Euro-crisis for the structure of the EU (is a looser Union a solution, with Greece or the UK having a different arrangement from the core of the EU, each for their own reasons?) We will also deal with topics that are perennial and yet “contemporary”: the legitimacy of the ECJ – also in the light of the recent battle between the President of the ECJ and the Tribunal over the Tribunal’s reform this year, legal reasoning in the EU (where observers of the ECJ seem to be never satisfied) or the relationship between the ECJ and national constitutional courts (where the German Constitutional Court is only one of the important actors). The nature of the EU will be also discussed (does it still make sense to think about it in terms of international or constitutional law, as the old controversy suggests, or is there another paradigm available)? Finally, we will take up some issues of EU substantive law – these will be selected later, depending on availability of guests to the course.

**Teaching:** 20 hours of seminars in the MT.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Indicative reading:** JHH Weiler (ed), The Worlds of European Constitutionalism (CUP 2012), P Lindseth, Power and Legitimacy: Reconciling Europe and the Nation-State (OUP 2010); F Scharpf, Governing in Europe (OUP 1999); A Stone Sweet, The Judicial Construction of Europe (OUP 2004); K and K Tuori, The Eurozone Crisis (CUP 2014)

**Assessment:** Exam (100%), duration: 2 hours, reading time: 15 minutes in the LT week 0.

LL4BK  Half Unit  Corporate Crime

This information is for the 2015/16 session.

**Teacher responsible:** Mr Jonathan Fisher

**Availability:** This course is available on the MSc in Accounting and Finance, MSc in Criminal Justice Policy, MSc in Law and Accounting, MSc in Regulation, MSc in Risk and Finance, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation Corporate and/or Commercial Law, Corporate and Securities Law, Criminology and Criminal Justice Law, Corporate and Securities Law, Criminal Justice International Business Law.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on crime committed within the commercial and business environment. The law is responding to the challenges presented by corporate crime; as the primary vehicle for commercial activity, unacceptable corporate practices are increasingly made the object of criminal sanction and causes of action in civil law. The course considers the principles of corporate criminal liability and the consequences of conviction for a corporation. The exercise of prosecutorial discretion in corporate crime cases, with a consideration of options such as deferred prosecution agreements, is examined in the context of multi-agency and cross-border investigations. The course proceeds to address the enormous challenges in the international fight against corruption. As well as exploring the nature, extent and consequences of corruption, the course examines international responses and their implementation into domestic law. In addition, the course considers other significant areas of potential corporate criminality involving accounting misstatements, cartels and tax offences. The multiple tensions triggered by internal investigations into corporate criminality are also explored in the context of a director’s duties to preserve the company’s assets in a manner consistent with disclosure obligations owed to its stakeholders and the financial markets. The increasing emphasis placed by the law on a company’s obligation to prevent the occurrence of corporate crime is also examined. The course concludes with an exploration of the various ways in which a corporation can be abused by fraudulent trading and trading whilst insolvent, and as well as by organised criminals to conceal the proceeds of their criminal activity. There is no overlap between this course and the course on Financial Crime in the Lent (second) Term.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

The first half of the session is lecture format, the second half seminar format. Students have an opportunity to work with other students in the presentation of seminars. Week 6 is a reading week. There is one revision session in the summer term.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course; however, all the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read: Wells: Corporations and Criminal Responsibility, 2nd edition, 2001, Oxford University Press; Gobert & Punch: Rethinking Corporate Crime, 2003, Butterworth LexisNexis; Green: Lying, Cheating and Stealing: A Moral Theory of White Collar Crime, 2005, Oxford University Press.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BL Half Unit
Financial Crime

This information is for the 2015/16 session.

Teacher responsible: Mr Jonathan Fisher

Availability: This course is available on the MSc in Accounting and Finance, MSc in Criminal Justice Policy, MSc in Law and Accounting, MSc in Regulation, MSc in Risk and Finance, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Banking Law and Financial Regulation Corporate and/or Commercial Law Corporate and Securities Law, Criminology and Criminal Justice International Business Law.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on financial crime committed within the commercial and business environment and explores current perspectives in the detection, investigation and prosecution of these cases in the wake of the global financial crisis. The introductory session explores the taxonomy of financial crime, examining the nature and extent of financial crime, its social and economic impact and the perceived ambivalence to the prosecution of financial crime offenders. The course explores a definition of fraud through a consideration of notions of dishonesty and deception, examining the role of consent and the interaction between the criminal law and civil law notions of property and trust. Cybercrime is the most prevalent way in which fraud is committed today. In addition to exploring its nature and scale, the course considers how the criminal law is deployed to combat cybercrime. The engagement between financial crime and the global financial crisis is a critically important topic and the course examines offences such as insider dealing and misleading the financial markets. In addition, the course explores the potential criminality of other practices such as manipulating the financial markets, short selling and reckless risk taking. International initiatives to promote asset confiscation and penalise money laundering have featured heavily in the fight against financial crime. The course examines the tensions which arise when these initiatives are implemented into domestic law.

Finally, the course explores the difficulties encountered by the enforcement authorities when investigating financial crime cases and the potential incompatibility between the exercise of compulsory interrogation powers and privacy issues. The course considers how the criminal law is deployed to combat cybercrime. There is no overlap between this course and the course on Corporate Crime in the Michaelmas (first) Term. Corporate Crime is not a pre-requisite for this course.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

The first half of the session is lecture format, the second half seminar format. Students have an opportunity to work with other students in the presentation of seminars. Week 6 is a reading week. There is one revision session in the summer term.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BM Half Unit Not available in 2015/16
The Legal Protection of Inventions

This information is for the 2015/16 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Information Technology, Media and Communications Law, Intellectual Property Law, Corporate and Commercial Law, International Business Law, and Competition, Innovation and Trade Law.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course provides an advanced and comprehensive introduction to the legal protection of invention through patents. Legally defined inventions are everywhere - in the velcro used to fasten a gym bag, in the tap or touch of a smartphone, in the food we eat, the medicines we take, the clothes we wear and in the buildings we live in. There are yet more inventions in the innovation pipeline and some that live only in our fertile technical imagination. Patent rights over such inventions increasingly intersect with diverse values such as competitive innovation, income equality, universal healthcare, regulation of risky technologies and the autonomy to pursue scientific prospects. In this course we will study the basics of patent prosecution as well as the theoretical and actual relationship between patents and innovation, both in law and in economics. Students will address central patentability criteria as well as patent eligibility for inventions that incorporate software, biotechnology or morally controversial technologies. These topics often call for a comparative approach based on UK, EU and US patent law. The aims of this course are to gain in-depth knowledge of patent law doctrine, familiarity with widely different contexts of innovation and a sound critical approach to the general principles of the legal protection of inventions. Students do not need a scientific background and will be supported in learning the relevant technical aspects.

Topics covered include: Novelty, inventive step, person skilled in the art, industrial applicability, sufficiency of disclosure, computer implemented inventions and business methods, biotechnology, exclusions (such as animal varieties, diagnostic methods, on grounds of morality) and the fundamentals of claim construction.

This course is a pre-requisite for LL4BN and students are encouraged to consider taking both courses.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

This is a Michaelmas term course, and consists of 10 weekly two-hour seminars in variable format including lecture-discussions and student-led seminars. There will be a Reading Week in week 6 of MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Weekly reading will include core chapters from books, cases and articles from law reviews.

Bentley and Sherman Intellectual Property Law Oxford University Press 2014
Fysh et al The Modern Law of Patents Lexis Nexis Butterworths
Justine Pila The Requirement for an Invention in Patent Law (OUP 2010)

Assessment: Essay (100%, 8000 words) in the LT.

LL4BN Half Unit Not available in 2015/16

Innovation, Technology and Patent Law

This information is for the 2015/16 session.

Teacher responsible: Prof Robert Pottage NAB 7.21

Availability: This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students must have completed The Legal Protection of Inventions (LL4BM).

Course content: This course will build on the comprehensive and advanced introduction to patent law provided in LL4BM to address sophisticated issues of law and public policy through multiple perspectives. Thematic focus in seminars may include institutional theory, understanding of technology cycles, competition policy, international powers of norm-setting and trade related coercion, the reasonableness and confusion surrounding the demands of the global pharmaceutical industry, the utilitarian balance between patent rights and the freedom to conduct research, the meaning of efficiency in patent law and bioethics. Some of the case studies that will be covered include infringement and the freedom to repair, plant variety rights, synthetic biology, TRIPS and access to patented medicines, the research use exception, patent offices, patent litigation and the need for a unitary patent court, competition law and policies in the technology and pharmaceutical sector.

This course complements several areas of national and international law and policy.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This is a Lent term course, and consists of 10 weekly two-hour seminars in variable format including lecture-discussions, student-led seminars and guest lecturers where appropriate. Students are expected to participate in class discussions and critically explore further implications of the reading covered each week.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Weekly readings will include book chapters, law review articles, reports and studies as well as cases. Robert Merges Justifying Intellectual Property Law HUP 2011
James Boyle The Public Domain: Enclosing the Commons of the Mind Yale University Press 2008 (free access online)
Boldrin and Levin Against Intellectual Monopoly CUP 2010.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BP Half Unit Not available in 2015/16

Current Issues in Intellectual and Cultural Property Law

This information is for the 2015/16 session.

Teacher responsible: Prof Robert Pottage NAB 7.21

Availability: This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

This course will be relevant to the following LLM specialisms: Intellectual Property Law; Legal Theory and Competition, Innovation and Trade Law.

Course content: This course takes a broadly historical, theoretical and contextual approach to the study of intellectual and cultural property law. It focuses on a set of topical questions that illuminate paradigms, institutional models and social and economic formations that cut across the diversity of intellectual and cultural property regimes; questions about the nature of property in intangible things, about the implications of the transnational expansion of intellectual property forms and institutions, about the role of comparative analysis in the study of intellectual property, or about how regimes forged in the era of industrialization have adapted to new modes of production and distribution. These expansive questions are not
This course will focus on specific case studies of institutions, transactional forms and social effects. Many of these studies are chosen for their topicality, so the contents of the course will evolve from year to year, but seminar topics might include: the emergence of new regimes of open source biotechnology, the evolution of different non-conventional trade marks such as scents, textures and shapes; the effects of regime-shifting between different international frameworks for the regulation of questions of intellectual property; the bases of emerging markets in cultural property and heritage; the re-emergence of old tensions between droit d’auteur and copyright in the context of open source licensing or human rights negotiations; the nature of ‘negative spaces’ (the fashion industry, magicians, manga and stand up comedy) within the otherwise pervasive order of intellectual property; the nature of the link between legal incentives and technological innovation; the usefulness of economic models in understanding the proprietary value of patents. The object of the course is to introduce key themes in critical debates about intellectual property, and to offer a set of conceptual resources that might be drawn upon in more specialized LLM courses in intellectual property.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4BQ**  
Half Unit  
Not available in 2015/16

**Trade Mark Law**

**This information is for the 2015/16 session.**

**Teacher responsible:** Alain Pottage  
**Availability:** This course is available on the MSc in Law and Accounting, MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law; Information Technology, Media and Communications Law

**Pre-requisites:** None, but is a pre-requisite for LL4BR

**Course content:** Trade marks are the most widespread (and widely litigated) species of intellectual property. This foundation course examines issues arising out of the registered protection of trade marks in the UK and EU, against the backdrop of international and comparative developments. The subject matter of trade mark protection has expanded to include sounds, scents, shapes, movements and pure colours. Similarly, the scope of protection has extended to protect not just the origin indication function but also guarantees of quality and brand image. Marks are simultaneously perceived as valuable assets for their proprietors, key components in competitive markets and effective shorthand for enabling expressive or critical agendas. Along with in depth analysis of legislation and case law, we reconsider the rationale of trade mark protection from various interdisciplinary vantage points such as economics, marketing, sociology, history and linguistics. Topics covered include: an introduction to national, regional and international trade mark registration systems; the background of unfair competition law; registration requirements; absolute grounds and relative grounds of refusal of registration; the scope of trade mark rights; the tests for infringement - confusion and dilution; exceptions and defences.

**Teaching:** 22 hours of seminars in the MT. There will be a Reading Week in week 6 of MT.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** Core Textbook - L Bently and B Sherman Intellectual Property 4th ed (OUP, Oxford 2014). Students will be expected to read widely in designated journals and books. All of the recommended cases and journal articles are available in electronic form and additional materials will be made available on the Moodle website which supports this course. A detailed reading list will be provided for the course, but the following are indicative: Available in the Library: L Bently, J Davis, J Ginsburg (eds) Trade Marks & Brands: An Interdisciplinary Critique (CUP, Cambridge 2008); A Arvidsson, Brands. Meaning and Value in Media Culture (Routledge, London 2006); C Lury, Brands. The Logos of the Global Economy (Routledge, London 2004); G Dinwoodie & M Janis (eds) Trade Mark Law and Theory: A Handbook of Contemporary Research (Edward Elgar, Cheltenham 2008); S Maniatis & D Botis, Trade Marks in Europe: A Practical Jurisprudence 2nd ed (Sweet & Maxwell, London 2010).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4BR**  
Half Unit  
Trademarks, Brands and Branding: Contemporary Issues

**This information is for the 2015/16 session.**

**Teacher responsible:** Anne Barron

**Availability:** This course is available on the MSc in Law and Accounting, MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade Law, Corporate and/or Commercial Law; Information Technology, Media and Communications Law; Intellectual Property Law.

**Pre-requisites:** None

**Course content:** This course situates the key concepts of trademark law in relation to analyses of brands and branding offered by leading contemporary social scientists. The focus is on the law of registered trademarks, with UK law treated as exemplifying the process of harmonisation currently affecting all EU Member States’ trademark regimes. Topics to be covered include: histories of brands, branding and trademarks; criteria for registering trademarks; the scope and content of the right of the trademark proprietor; and restrictions on the right of the trademark proprietor. Throughout, emphasis is placed on the law’s role in underpinning marketing processes that now structure everyday life in ever more intense and intimate ways, and consideration is given to the links between these processes and wider changes in economy and society such as globalisation, financialisation and informationisation.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Indicative reading:** There is no set text: readings will be assigned on a weekly basis. The core reading will include legislative texts and leading cases, but also journal articles and book chapters, and these will range across a number of disciplines including media and communication studies, cultural studies, economic sociology, business studies and anthropology. The following list is indicative: Melissa Aronczyk and Devon Powers, Blowing Up the Brand: Critical Perspectives on Promotional Culture (Peter Lang, 2010); Adam Arvidsson, Brands: Meaning and Value in Media Culture (Routledge, 2006); Lionel Bently and Brad Sherman Intellectual Property Law 4th ed. (OUP, Oxford 2014); Ruth Clifford, Brands and Branding 2nd ed. (Economist Books, 2009); Tobias Cohen Jehoram et al. European Trademark Law (Kluwer, 2010); Rosemary Coombe, The Cultural Life of Intellectual Properties (Duke UP, 1998); Paul du Gay and Michael Pryke, Cultural Economy: Cultural Analysis and Commercial Life (Sage, 2002); Jonathan Gabay, Brand Psychology: Consumer

Assessment: Essay (100%, 8000 words) in the ST.

LL4BT Half Unit
Cultural Property and Heritage Law

This information is for the 2015/16 session.

Teacher responsible: Miss Anne Bundle

Availability: This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: 20 hours of seminars and 2 hours of seminars in the MT. 2 hours of seminars in the ST.

Week 6 in the MT is a Reading Week.

Formative coursework: One 2000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BU Half Unit
Art and Antiquities Law

This information is for the 2015/16 session.

Teacher responsible: Miss Anne Bundle

Availability: This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of antiquities and works of art, and the problems that arise in regulating markets in art, antiquities and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art and antiquities trades. Against this legislative backdrop, the course examines important cases in disputes regarding looting and provenance of antiquities, and questions of commodification and sale of cultural artefacts and antiquities, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). ‘Art Law’ is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. ‘Antiquity Law’ is an engagement with the problems of the market(s) in antiquities and the legal and ethical burdens on the participants in this trade. We will look at the practices and constraints that arise in the context of both private purchasers/dealers and museums acquiring antiquities. We will focus on the case that the government of Italy brought against Marion True, the erstwhile Curator of Antiquities at the Getty Museum, and we will consider how that ground-breaking prosecution changed some of the practices in this area, as well as added to the toolbox for nations seeking repatriation of cultural objects. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: 20 hours of seminars and 2 hours of seminars in the LT. 2 hours of seminars in the ST.

Week 6 in the LT is a Reading Week.

Formative coursework: One 2000 word essay.

LL4BV  Half Unit
Transnational Environmental Law
This information is for the 2015/16 session.
Teacher responsible: Dr Veerle Heyvaert NAB706
Availability: This course is available on the MSc in Environmental Policy and Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course will be relevant to the following specialisms: European Law, Public International Law, Public Law.
Course content: The course instructs students on key issues in environmental law and governance beyond the state. Through the study of recent developments in international environmental law, regional law (including EU law) and private environmental regulation, the course investigates how new transnational environmental laws are made, what the role is of science in environmental decision-making and dispute resolution, how transnational environmental law is implemented and enforced, and whether transnational corporations can be held accountable for environmental damage. The questions are illustrated through case studies relating to, among others, climate change, biodiversity protection and product risk control and oil spill litigation.
Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the LT.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BW  Half Unit
Law and Political Thought
This information is for the 2015/16 session.
Teacher responsible: Professor Thomas Poole
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

This course will be relevant to the following LLM specialisms: Human Rights Law, Legal Theory and Public Law
Pre-requisites: None.
Course content: This course examines the relationship between law and political theory. It does so through the study of classic texts of political thought: typically Rousseau, Social Contract, Tocqueville, Democracy in America; Burke, Reflections on the Revolution in France; de Maistre, Considerations on France. In this way, the course deals with major topics of theoretical and juridical interest, such as the rule of law, liberalism and republicanism, cultural pluralism, theories of authority and legitimacy, revolution and the state, nationalism and cosmopolitanism.
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
There will be a reading week in week 6.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: The reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle.
Assessment: Essay (100%, 8000 words) in the LT.

LL4BX  Half Unit    Not available in 2015/16
Corporate Governance - Advanced Topics
This information is for the 2015/16 session.
Teacher responsible: Dr Eva Micheler NAB735
Availability: This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Public Management and Governance, MSc in Risk and Finance, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped at 60 students. Students must apply through Graduate Course Choice on LSE for You.

This course will be relevant to the following specialism: Corporate and/or Commercial Law.
Course content: This course will focus on the corporate governance of companies. The course will be taught largely on a comparative basis, focussing on English and German law. We will also cover the relevant EU materials. The following topics will be discussed: 1- Corporate governance codes, their role as regulatory tools, their enforcement 2- Board structure (one tier boards/two tier boards/board committees) 3- Board remuneration 4- Auditors as external trustees 5- Stakeholders 6- Extended reporting and employee interests 7- Shareholder activism/stewardship 8- Concentrated ownership structures and minority shareholder interests 9- The market for corporate control 10- convergence/path dependency/legal origins
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: Students are asked to submit one 2,000 word essays.
Indicative reading: Reading will be prescribed for each seminar. Preliminary reading can be found in P Davies, Introduction to Company Law (ch 5-9, 2002); R Kraakman et al, The Anatomy of Corporate Law (2d ed 2009); A Cahn and D C Donald, Comparative Company Law: Text and Cases on the Laws Governing Corporations in Germany, the UK and the USA (2010); B Cheffins, Company Law: Theory, Structure and Operation (Parts I and III, 1997); M Roe, Political Determinants of Corporate Governance (2003); K Hopt et al, (Eds), Comparative Corporate Governance (1998); J Parkinson, Corporate Power and Responsibility (1993).
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
LL4BY  Half Unit  Not available in 2015/16
An Introduction to the International Human Rights of Women

This information is for the 2015/16 session.

Teacher responsible: Prof Christine Chinkin

Availability: This course is available on the MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Human Rights; Public International Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course provides an introduction to the concept of women’s human rights and the international legal protections of such rights. It is located within the framework of international law and feminist legal theories. The international legal instruments for the guarantee of women’s civil and political and economic and social rights will be examined for students to acquire knowledge and understanding of the basic texts and the international monitoring mechanisms. Detailed attention will be accorded to the United Nations Convention on the Elimination of All Forms of Discrimination against Women, 1979 and the work of the Committee on Elimination of Discrimination against Women.

Topics include:
- Introductory: the United Nations Gender Architecture
- Sex and gender; feminist theories of equality and difference
- International instruments for the guarantee of women’s rights
- Convention on the Elimination of All Forms of Discrimination against Women, 1979: History, Substance and Reservations
- Economic, Social and Cultural Rights
- Universality and Cultural Relativism
- Beyond the Convention on the Elimination of All Forms of Discrimination against Women: Global Conferences; Regional Protections
- Combating Violence against Women (I)
- Combating Violence against Women (II)

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Student participation will be expected. Students are also encouraged to draw upon and share relevant experiences.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Karen Knop (ed.), Gender and Human Rights (OUP, 2004)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4BZ  Half Unit  Not available in 2015/16
International Human Rights of Women: Advanced Issues

This information is for the 2015/16 session.

Teacher responsible: Prof Christine Chinkin NAB 6.15 and Miss Jane Gordon

Availability: This course is available on the MSc in Human Rights and Master of Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Human Rights; Public International Law.

This course is capped at 30 students.

Pre-requisites: All students must have taken the course An Introduction to the International Human Rights of Women, which is a pre-requisite for this course.

Course content: The course builds upon the concepts and ideas introduced in An Introduction to the International Human Rights of Women. It explores some particular areas where women’s human rights have been contested and where more advanced legal frameworks have been developed.

Topics include:
- Economic, social and cultural rights revisited
- The right to education
- The right to health and reproductive rights
- Combating trafficking in women and girls
- Peace processes and women’s rights post-conflict
- Political participation
- The rights of the girl child
- Non-state actors and women’s human rights

Critiques and Strategies for Change

Teaching: 20 hours of seminars in the LT.

Student participation will be expected. Students are also encouraged to draw upon and share relevant experiences.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Karen Knop (ed.), Gender and Human Rights (OUP, 2004)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4C2  Half Unit
World Poverty and Human Rights

This information is for the 2015/16 session.

Teacher responsible: Dr Margot Salomon TW3, 8th floor

Availability: This course is available on the MSc in Development Studies, MSc in Global Politics, MSc in Human Rights, MSc in Inequalities and Social Science, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You. **Pre-requisites:** Some knowledge of public international law is required.

**Course content:** This course examines world poverty and inequality from the perspective of international law aimed at the protection of human rights. Drawing on rights and obligations, the course considers the duties of states and other actors and the ways in which they may be implicated in the deprivation which has 2.7 billion people concentrated in the South, and many in the North, unable to exercise their minimum essential levels of human rights. While the approach to the course is largely normative and conceptual, it will explore its findings in relation to international players and institutions that impact positively or negatively on human rights today, as well as examine the application of legal standards and developments to some areas of outstanding concern. Topics to be covered may include:

- Poverty as a human rights issue
- Human rights, economics and development
- The right to development and claims against the public international order
- The scope and content of the obligation of international cooperation
- The work of the UN Committee on Economic, Social and Cultural Rights
- Human rights and the World Bank, IMF, international trade, investment, and finance
- Interrogating the Millennium Development Goals and the Sustainable Development Goals.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

In 2015-16 this course will have two seminars every two weeks, instead of one seminar per week. Please see timetables for further details.

**Formative coursework:** Students will receive feedback on work completed during the course.

**Indicative reading:**
- G. Abi-Saab, 'The Legal Formulation of the Right to Development', in R J Dupuy (ed), The Right to Development at the International Level, Hague Academy of International Law (1980);
- M. E. Salomon, A. Tostensen and W. Vandenhole (eds), Casting theNet Wider: Human Rights, Development and New Duty-Bearers (2007);
- M. E. Salomon, Global Responsibility for Human Rights: World Poverty and the Development of International Law (2007);
- R. Danino, ‘The Legal Aspects of the World Bank’s Work on Human Rights’ in P. Alston and M. Robinson (eds), Human Rights and Development (2005);
- Maastricht Principles on Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights (2011). A detailed reading list will be issued at the first seminar.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4C6  Half Unit**

**Advanced Issues of International Commercial Arbitration**

This information is for the 2015/16 session.

**Teacher responsible:** Mr Manuel Penades-Fons

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Students must have completed Fundamentals of International Commercial Arbitration (LL4C5).

Or a course on arbitration in previous studies or solid practical experience in the field.

**Course content:** This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is based on student presentations and intense discussions of these problems in order to raise the sensitivity for the issues at stake. The course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the law applicable to arbitration agreements; the scope of the competence-competence principle; the role of internationally mandatory rules of law arbitration & insolvency, arbitration and fraud and corruption; or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of new developments.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6

---

**LL4C5  Half Unit**

**Fundamentals of International Commercial Arbitration**

This information is for the 2015/16 session.

**Teacher responsible:** Mr Manuel Penades-Fons

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students.

**Course content:** This course offers the fundamentals of international commercial arbitration, the most important dispute settlement mechanism for international commercial transactions, The course provides a complete introduction to the functioning of arbitration in theory and in practice. London being one of the main centres of arbitration in the world, this course focuses mainly on English arbitration law which is put into a comparative perspective and contrasted especially with the UNCITRAL Model Law on International Commercial Arbitration and French law. Special attention is given to the different types of rules that may have to be taken into consideration in an international arbitration. This course prepares for LL4C6 Advances Issues of International Commercial Arbitration and provides for some of the procedural basics for LL4E7 Investment Treaty Law.

**Teaching:** 20 hours of lectures and 5 hours of classes in the MT.

2 hours of lectures in the ST.

Reading week in week 6

**Formative coursework:** One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

**Indicative reading:**
- M. Moses, The Principles and Practice of International Commercial Arbitration (2nd edn, CUP 2012);
- G. Born, International Arbitration: Law and Practice (Kluwer 2012);
- N. Blackaby & C. Partasides, Redfern and Hunter on International Commercial Arbitration (5th edn, OUP 2009); J.-F. Poudret & S. Besson, Comparative Law of International Commercial Arbitration (Sweet & Maxwell 2007);

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
LL4CA  Half Unit
Law and Social Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Umberto-Igor Stramignoni NAB 7.34

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Law, Anthropology and Society, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. LLM Specialisms This course will be relevant to the following LLM specialisms: Legal Theory

Course content: Social theory is rapidly evolving into a key cross-disciplinary field of inquiry exploring both philosophical analyses and social science descriptions about, in one important case, the place of law in modern societies.

The focus of such an inquiry in this course is on the interplay of law and space. The latter is at the heart of some of today’s hottest debates, such as globalisation, the politics of place, our engagement with nature, and the city and its complexities. However, how does the law understand the link between itself and the space in which it operates? Does it understand it in the same way as do architects, urban planners, geographers, governments, policy makers, advocacy groups, or economists, for example, when speaking of the natural or the built environment, such as mountains, rivers, roads, airports, prisons, courtrooms, or immigration detention centres? Moreover, do we understand space in the same way? What if bodily habits, traits of character, idioms, and abiding habits of thought, have a role in shaping our individual and collective sense of space? What would it mean to frame talk about space in terms of “dwelling”, for example, or “embodiment”, or “emplacement”, and so on? Could it be that the very attempt of making sense of law’s place in society, is problematically caught up with a specific cultural heritage no longer able to unpack the full complexity of the topos of law or, alternatively, of the materiality within? Put it simply, is space always and everywhere the same place, as Copernicus, Galileo, Newton, Bacon and Descartes once thought, or is it something potentially so different as to call for a new thinking about it and, from there, about the place of law in society?

In this course, we will survey several perspectives on the elusive spatiality of modernity, debating the extent to which we can continue to treat space as the impassive repository of human affairs portrayed by tradition. Could it be that, if law is everywhere in space, on an altogether different level space is – paradoxical though it might sound at first – everywhere in law?

Teaching: 22 hours of seminars in the LT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4CB  Half Unit
Modern Legal History: Private Law and the Economy 1750-1950

This information is for the 2015/16 session.

Teacher responsible: Prof. Michael Lobban

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Law, Anthropology and Society, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

LLM Specialisms This course will be relevant to the following LLM specialisms: Legal Theory

Course content: This course will examine how the common law aided or hindered economic growth in the era between 1750 and 1950, by focusing in particular on the development of doctrines of private law. The course will concentrate on a number of themes and topics. It will begin with a discussion of the nature of the common law, and the modes of common law reasoning, to establish what kind of legal system economic actors were dealing with. It will then look at the developing law of contract, to explore how far the ideology of “freedom of contract” assisted growth. It will further explore the law relating to civil wrongs (including the law relating to compensation for accidents and pollution) and unjust enrichment (particularly in the context of business failures). It will also explore some specific topics, including the law relating to corporate enterprise, bankruptcy and insurance.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
LL4CC  Half Unit
Commercial Remedies

This information is for the 2015/16 session.
Teacher responsible: Dr Solene Rowan NAB 7.26 and Dr Charles Webb NAB 6.26
Dr Charlie Webb

Availability: This course is available on the Master of Laws. This course is not available as an outside option.

Specialisms: Corporate and/or Commercial Law; International Business Law

Pre-requisites: Undergraduate contract and tort law

Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant’s interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties’ secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?

Teaching: 20 hours of seminars in the LT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)

Campbell, Halson, Harris, Remedies in Tort and Contract (2nd edn CUP 2002)
Andrews, Clarke, Tettenborn and Virgo, Contractual Duties: Performance, Breach, Termination and Remedies (Sweet & Maxwell 2012)
Chitty on Contracts (31st edn Sweet & Maxwell 2012)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4CD  Half Unit
European Company Law

This information is for the 2015/16 session.
Teacher responsible: Dr Carsten Gerner Beuerle NAB 5.08 and Mr Edmund-Philipp Schuster NAB 6.30

Availability: This course is available on the MSc in Law and Accounting, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou. This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; Corporate and Securities Law; European Law.

Pre-requisites: There are no formal prerequisites, but some understanding of European law and EU law-making is of advantage.

Course content: This course will examine the EU harmonization programme for companies. It will analyse the framework of primary EU law within which companies and national legislators must operate (the Treaty provisions on the right of establishment and the free movement of capital), as well as secondary measures of EU law regulating companies and relevant soft law initiatives. The course will also deal with the most important European forms of company, notably the SE (Societas Europaea or European Company) and investigate the implications that corporate mobility within the EU has for regulating companies at the national level.

Topics include:
- EU company law harmonization programme
- 1st Company Law Directive: formation and disclosure
- Right of establishment: primary and secondary establishment, transfer of seat, jurisprudence of the European Court of Justice (in particular: Centros, Überseering, SEVIC, Cartesio, VALE)
- Free movement of capital: golden shares jurisprudence of the European Court of Justice, BAA, KPN/TPG, VW; proportionality principle in the EU
- 2nd Directive and capital structure: minimum capital; payment for shares; publicity; distributions; stock repurchase; increases in capital and capital reductions; serious loss of capital; case law interpreting the 2nd Directive; reform initiatives (e.g., SLIM Working Group)
- Corporate governance regulation in the EU: abandoned 5th Directive; Recommendation on the role of non-executive or supervisory directors of listed companies; remuneration policies; Shareholder Rights Directive
- European Company Law Forms: European company (SE) and European private company
- State of European company law harmonisation; potential for regulatory competition and regulatory arbitrage

Teaching: 20 hours of lectures in the MT.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

LL4CE  Half Unit
Security and Criminal Law

This information is for the 2015/16 session.
Teacher responsible: Dr Peter Ramsay NAB 6.27

Availability: This course is available on the MSc in Criminal Justice Policy, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Undergraduate study of criminal law (or equivalent).

Course content: This is a course in advanced criminal law theory. The central concern of contemporary criminal justice policy is public...
The course examines leading texts in Anglo-American criminal law theory in order to investigate the interests that are protected by the structure of the criminal law. Seminars cover: the concept of security; the concept of criminal law; state punishment; the presumption of innocence; actus reus; criminal responsibility; criminal defences; public welfare offences; prencheate offences; security and human rights.

The reading materials for this course are primarily philosophical and theoretical. The course contrasts the different perspectives of moral and political theories of criminal justice and criminal law, and investigates what they tell us about the scope and limits of criminal law as a security system. The course therefore provides an introduction to normative criminal law theory in the common law world. At the same time, this introduction adopts an innovative approach to that theory by situating it in the context of the contemporary policy pressures on criminal law. Each seminar consists of a student presentation on a key question, class discussion and a teacher presentation. There is a reading week in Week 6.

Teaching: 20 hours of seminars in the MT. There will be a Reading Week in week 6 of MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4CF Half Unit Not available in 2015/16

UK Corporate Law

This information is for the 2015/16 session.

Teacher responsible: Prof. David Kershaw

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

This course is capped at 30 students (or two groups of 30 students each, i.e. 60 students depending on demand). This course will be relevant to the following LLM specialties: Corporate and Securities Law; Corporate and/or Commercial Law.

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation, and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director’s duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in Foss v Harbottle; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006.

Teaching: 20 hours of seminars in the MT.

Formative coursework: One 2,000 word essay.

Indicative reading: Core Texts: David Kershaw, Company Law in Context (2nd ed, OUP 2012); Paul Davies, Gower and Davies’ The Principles of Modern Company Law (9th eds, Sweet & Maxwell, 2012). For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4CG Half Unit

Understanding Issues in Tax Law and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Ian Roxan NAB 7.25 and Mr Eduardo Baistrocchi NAB7.33

Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is required for the following LLM specialism: Taxation. NB: The monthly Taxation Seminars are available to all with an interest in taxation including LLM and MSc students. Students wishing to attend the Taxation Seminars are very welcome. For more information, see the Law Department or LSE Financial Markets Group web pages.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students will be expected to be taking other tax courses or to have a good background in taxation.

Course content: This course considers the key principles of tax policy (including the development and interpretation of tax law), and the methodology of developing and applying these principles, in the context of a range of current issues in taxation and tax policy, and often with an interdisciplinarian approach. It will use the monthly Taxation Seminars during the Michaelmas Term to provide students with direct exposure to current debates in taxation. The monthly seminars bring together a wide variety of participants, including lawyers, economists, accountants and government officials. Those attending the seminars are encouraged to participate, and the seminars provide a forum for topical discussion on taxation.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.
LL4CH  Half Unit
Current Issues in Tax Law and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Ian Roxan NAB 7.25

This course will look at important current issues in taxation and tax policy, often with an interdisciplinary approach. Students will be expected to bring to the discussion of these issues a good background knowledge of taxation, as well as the type of skills learned in LL4CG. It will use the monthly Taxation Seminars during the Lent Term to provide students with direct exposure to current debates in taxation. The monthly seminars bring together a wide variety of participants, including lawyers, economists, accountants and government officials. Those attending the meetings are encouraged to participate, and the meetings provide a forum for topical discussion on taxation. The topics for the seminars are chosen each year from subjects of current interest. Seminars in this course outside of the monthly series will provide students with background for the monthly seminars and will provide the opportunity to explore in depth other topical issues in taxation and tax policy.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

10 weekly two-hour seminars in the Lent Term in a variable format, including seminar-discussions and monthly Taxation Seminars attended by a range of tax professionals.

Formative coursework: Students are expected to submit one 2,000-word formative essay or an equivalent assignment.

Indicative reading: There is no fixed list, selections being made from year to year on the basis of topicality. Detailed reading lists will be provided during the course via Moodle. Recommended preliminary reading: James & Nobes, Economics of Taxation, or another introductory tax policy book.

Assessment: Essay (100%, 8,000 words).

LL4CJ  Half Unit
Comparative Corporate Taxation

This information is for the 2015/16 session.

Teacher responsible: Dr Ian Roxan NAB 7.25

This course will introduce the national tax systems being studied and provide an in-depth look at a key advanced topic central to corporate taxation, such as the treatment of shares, the treatment of groups of companies, or the taxation of corporate finance.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

10 weekly two-hour seminars in the Michaelmas Term, including seminars led by national tax experts.

Formative coursework: There will be a reading week in Week 6 of the MT.

Indicative reading: Students are expected to submit one 2,000-word formative essay or an equivalent assignment during the course.

Course content: The course examines the principles governing the taxation of corporate and other business transactions. The course will take a comparative approach in examining the business tax systems of the United Kingdom and other countries. The main tax system studied will be that of the United Kingdom (primarily corporation tax together with income tax and capital gains tax), but the tax system of the United States will also be examined and typically that of Germany or another country as well. This course will introduce the national tax systems being studied and provide an in-depth look at a key advanced topic central to corporate taxation, such as the treatment of shares, the treatment of groups of companies, or the taxation of corporate finance.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
Corporate and/or Commercial Law; International Business Law; Taxation.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Pre-requisites: Students must have completed Comparative Corporate Taxation (LL4CJ).
Students should be familiar with the UK tax system, or have working knowledge of another system of business taxation. Otherwise, students will be expected to have taken LL421 Business Taxation beforehand.
Course content: The course examines the principles governing the taxation of corporate and other business transactions. The course will take a comparative approach in examining the business tax systems of the United Kingdom and other countries. The main tax system studied will be that of the United Kingdom (primarily corporation tax together with income tax and capital gains tax), but the tax system of the United States will also be examined and typically that of Germany or another country as well. Continuing on from the topics studied in LL4CJ, this course will look in-depth a number of key advanced topics that are central to corporate taxation, such as the treatment of shares, the taxation of corporate finance, the treatment of groups of companies, and the taxation of corporate reorganisations (broadly defined).
Teaching: 20 hours of seminars in the LT. 4 hours of seminars in the ST.
10 weekly two-hour seminars in the Lent Term, including seminars led by national tax experts.
Formative coursework: Students are expected to submit one 2,000-word formative essay or equivalent assignment during the course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
Students will be assessed by a two-hour written examination in May/June. Candidates will be permitted to take into the examination room unannotated copies of approved statutory materials.

LL4CM Half Unit
Law in the Economy
This information is for the 2015/16 session.
Teacher responsible: Dr Andrew Lang NAB6.19
Availability: This course is available on the MSc in Law and Accounting, MSc in Law, Anthropology and Society, MSc in Regulation and Master of Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Legal regimes of market regulation are based on particular ideas about the nature of ‘markets’: what markets are, how they arise, what forms they take, and what dynamics they exhibit. As our ideas about the nature of markets have evolved over the course of the last two centuries, the way we govern the market through law has evolved with them. In the period since the global financial crisis of 2007, we are currently living through another period of ideational change, as mainstream ways of thinking about markets have been discredit and policy-makers look explicitly for new and better ways of understanding how markets work and what they are.
The aim of this course is to enable students to engage with this intellectual moment, by introducing them in a systematic way to the major competing traditions of thought about the nature of markets, with particular attention to the question of the relationship between markets and law, and the proper purposes to which law should be deployed in economic life. In what sense are markets ‘spontaneous’ social forms, and to what extent do they rely on the prior creation of complex legal and other institutions? Are economic actors naturally ‘rational’ or do they have to be taught to be rational, and if so how? What is the role of social networks and social norms in shaping the dynamics of markets, and what can that teach us about the proper forms of law in the market?
Students will be introduced to a wide variety of economic schools of thought from the early 20th century onwards, including mainstream neoclassical economics, behavioural economics, institutional economics, new institutional economics, as well as varieties of economic sociology and economic anthropology. We will consider the reception of these schools of thought within legal scholarship, from the legal realists, to law and economics. The focus will be on economy explanations and critiques of punishment. After an introduction discussing the different approaches to punishment, three seminars will discuss the classical philosophical justifications of punishment and a fourth the contemporary critiques of those classical approaches. Seminars 6 and 7 will discuss punishment from the perspective of sociology and political economy. Seminar 8 will consider comparative approaches to punishment. Seminars 9 and 10 will look at two key aspect of the sociology of punishment, punishment as a cultural phenomenon and punishment as an exercise of power and authority.
Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.
There will be a Reading Week in week 6 of MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Indicative reading:
- J Simon and R Sparks (eds), The Sage Handbook of Punishment and Society (Sage 2013)
- D Garland, Punishment and Modern Society: A Study in Social Theory (Oxford University Press 1990)
Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

LL4CL Half Unit
Explaining Punishment: Philosophy, Political Economy, Sociology
This information is for the 2015/16 session.
Teacher responsible: Dr Peter Ramsay NAB 6.27
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Law, Anthropology and Society, MSc in Social Policy (Research) and Master of Laws - Criminology and Criminal Justice. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course aims to provide students with a comprehensive overview of the theories that explain the practice of punishment, a practice that defines the criminal law. It will do this by introducing students to philosophical, sociological, political economy and comparative approaches to punishment. It will involve the discussion of all the major philosophical justifications and critiques of state punishment, and sociological and political
canonical texts from across the spectrum, drawing from writers such as Hayek, Polanyi, Friedman, North, Bourdieu, Foucault, Hale, Veblen, Knight, Callon and many others. The course will therefore involve close engagement with core theoretical texts, but care will be taken to ground the discussion of such texts with illustrations taken from contemporary spheres of regulation. These are likely to change from year to year.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

Polanyi, The Great Transformation (1944)

Hale, The Road to Serfdom (1944)

North, Institutions, Institutional Change and Economic Performance (1990)

Cooter and Ulen, Law and Economics (latest edition)

Callon (ed), The Laws of Markets (Blackwell, 1998)

Thaler and Sunstein, Nudge: Improving Decisions About Health, Wealth, and Happiness (Yale, 2008)

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the main exam period.

---

**LL4E6 Half Unit**

**International Dispute Resolution: Courts and Tribunals**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Devika Hovell NAB6.32 and Dr Andrew Lang NAB6.19

**Availability:** This course is available on the MSc in Human Rights, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Pre-requisites:** Some prior knowledge of international law is useful but not essential.

**Course content:** The course introduces students to the practice and theory of international legal dispute resolution before courts and tribunals. The former Prosecutor of the Yugoslav Tribunal, Richard Goldstone, resolved that: ‘it seems to me that if you don’t have international tribunals, you might as well not have international law’. Given the proliferation of courts and tribunals applying and enforcing international law, certain scholars have argued we are witnessing the emergence of an ‘international judicial system’ (Martinez). In addition to seminars on the theory of international dispute resolution, the course incorporates the opportunity to witness the emergence of an ‘international judicial system’ (Martinez). In addition to seminars on the theory of international dispute resolution, the course incorporates the opportunity to hone their advocacy skills through participation in (optional) ‘mini-moots’ on controversial cases.

The theoretical dimension of the course involves three main elements:

1. First, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.

2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyze and contrast the institutional design and jurisdiction of these courts and tribunals.

3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation), (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

**Teaching:** 20 hours of lectures in the MT. 2 hours of lectures in the ST.

There will be a reading week in Week 6 of Michaelmas term.

**Formative coursework:** Students are invited to submit one 2,000 word essay.

**Indicative reading:** A detailed reading list will be provided.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

**LL4E7**  
**Half Unit**  
**Investment Treaty Law**

This information is for the 2015/16 session.

**Teacher responsible:** Mr Christopher Thomas NAB 7.18

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration. The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has four components: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards - such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law - that may apply to the investor-state relationships; and (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts.

**Teaching:** 22 hours of seminars in the LT. 22 hours of seminars in the ST.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4E8**  
**Law in Society: A Joint Course in Law and Anthropology**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robert Pottage NAB 7.21

**Availability:** This course is compulsory on the MSc in Law, Anthropology and Society. This course is available on the MSc in Human Rights, MSc in Regulation and Master of Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course offers a foundation in those elements of anthropological and social theory essential to an understanding of law in society. This course draws on anthropological themes and texts to develop an innovative perspective on contemporary legal norms and institutions. It aims to document legal institutions and practices as concrete ethnographic phenomena, focusing on the techniques of writing and documentation, the legal production of persons and things, and the legal framing of institutions. It combines abstract social theory with concrete ethnographic method in the study of ritual, kinship, property and communicative technologies in formal law.

The course may include the following topics: Law, anthropology, and the production of the social: an introduction to the links between legal and anthropological scholarship, exploring juridical concepts of power, agency and social personality and anthropology’s models of society; Legal and political ritual: selected theoretical analyses of modern legal ritual examined against the background of anthropological debates concerning the general nature of ritual; The communication of power in writing: the representation and construction of social institutions in administration; Legal time and evidence: ethnographic analysis of narrative, evidence and proof in different legal cultures; Persons and things: legal forms of personification and objectification in systems of ownership and inheritance, with particular attention to the law governing reproductive resources; Legal collectivities, the modern corporation and its others: ethnographies of the social and legal construction of collective agency; The uses of anthropology in law and politics: the role of anthropology in contemporary contests over indigenous title, cultural property, common property resources, and alternative dispute resolution.

**Teaching:** 20 hours of seminars in the MT. 22 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of MT.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**LL4E9**  
**Dissertation: MSc Law, Anthropology and Society**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robert Pottage NAB 7.21

**Availability:** This course is compulsory on the MSc in Law, Anthropology and Society. This course is not available as an outside option.

**Course content:** Topics to be determined in consultation with programme teachers.

**Teaching:** 20 hours of seminars in the LT.

Dissertation meetings with programme teachers.

**Assessment:** Dissertation (100%, 10000 words) post-summer term.
LL4F1  Half Unit
Secured Financing in Commercial Transactions
This information is for the 2015/16 session.
Teacher responsible: Prof Michael Bridge NAB6.21
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Course content: An examination of the proprietary and security aspects of commercial transactions. This course considers the significance of property and the special protection the law affords to proprietary interests (mainly in movable property). It examines various types of commercial transactions involving the transfer of property, the use of property, the taking of security and certain quasi-security transactions having a similar effect to security. It explores the different types of security and other transactions that may be available in the context of various types of asset, as well as priority issues when there are conflicting interests. The course will also consider proposals for reforming the law and alternative approaches that might be taken. The course is based upon the principles of English law but reference may also be made to other systems of law and to international initiatives sponsored by Unidroit and UNCITRAL.
Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.
There will be a reading week in week 6.
Formative coursework: One 2,000 word essay.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
One two-hour open book examination paper.

LL4F2  Half Unit
The Law and Practice of International Finance
This information is for the 2015/16 session.
Teacher responsible: Dr Joanne Braithwaite NAB7.28
Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: LL4F2 examines the legal issues which arise in international financial markets based in London. It is a good fit with LL4H4 (Financial Law), though this is not a pre-requisite. This course looks at various types of financial transactions and structures which are widely used in the financial markets, such as derivatives and syndicated loans. We make reference to certain sets of trade association drafted terms throughout the course. With an emphasis on private law, the course considers the relevant legal, commercial and regulatory background and the risks and protections available to participants in the global financial markets. The course is based upon an analysis of the relevant issues under English law with some reference to other systems for comparative purposes and it ties in well with the LLM evening seminars in financial and corporate law.
The course will be underpinned by discussion of the legal principles involved in international finance, but the case studies referenced will be topical. In this sense, the content of the course will be adapted to the fast moving developments affecting international markets in capital and in risk (for example, in recent sessions the course has examined the legal basis of prime brokerage relationships, the related Lehman Brothers litigation and the ongoing regulatory reform of the OTC derivatives markets, including the new requirement of mandatory CCP clearing, triggered by the G20 statement in 2009).
Teaching: 22 hours of lectures and 5 hours of seminars in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be asked to submit one essay, which may be completed in exam conditions.
Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the main exam period.
Assessment is by closed book written examination (100%) which students sit in the summer term.

LL4F3  Half Unit
Mergers, Acquisitions and Restructurings in Europe
This information is for the 2015/16 session.
Teacher responsible: Mr Edmund-Philipp Schuster NAB6.30
Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.
Course content: In this course, we will explore the regulation of mergers, acquisitions and restructurings in Europe. The course will examine the available legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on cross-border transactions. Areas covered will include corporate mobility in Europe, domestic and cross-border mergers, de-mergers, spin-offs, public takeovers, and the European Company, and how it is used for business restructuring and reorganisation. Particular attention will be paid to the interaction between the relevant legal concepts and the economic and financial environment firms operate in.
Content overview
- The market for corporate control, corporate ownership structures and transaction structures for takeovers and restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers in Europe
- Employee participation and its relevance for corporate transactions
- Restructuring and the European Company (SE)
- Introduction to taxation of corporate transactions (non-examinable)
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: One 1500 word essay, due in Week 7 of LT.
LL4F4  Half Unit
Takeover Regulation in the UK and the US

This information is for the 2015/16 session.

Teacher responsible: Prof. David Kershaw
Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course will look at the regulation of the market for corporate control and corporate restructurings in the United Kingdom and the United States. The course will look at the regulation of the bid process and at takeover defence regulation in the UK and the US. The course will also look at the development of the private equity industry and at typical fund and transaction structures used in private equity deals. Lent Term Introduction to the market for corporate control Takeover process regulation The extra-territorial effects of US process regulation Takeover defence regulation Private equity and management buyouts: fund structures; deal structures; value strategies Regulating conflicts of interest in going private transactions Financial assistance regulation Effectiveness of the market for corporate control

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST. There will be a Reading Week in week 6 of MT

Formative coursework: 1,500 word essay.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

LL4F6  Half Unit  Not available in 2015/16
International Dispute Resolution: Non-Adjudicatory

This information is for the 2015/16 session.

Teacher responsible: Prof Christine Chinkin NAB6.15
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: International Dispute Resolution: Non-Adjudicatory Processes is concerned with the way in which

auto-complete text: conflicts or potential conflicts, both between states and with other participants in the international arena, can be peacefully managed and resolved. The course considers the options available for the peaceful settlement of international disputes. It will examine the general obligation under international law to settle disputes peacefully, focussing particularly (but not exclusively) on non-adjudicatory means of international dispute settlement, such as negotiation, inquiry, mediation and conciliation. Using controversial case studies (including those relating to peace processes), the course will examine the respective advantages and disadvantages of these various mechanisms, the interplay between them, and the factors that influence their effectiveness. It will also explore some of the theoretical issues that underpin international dispute resolution.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to complete one 1,500 word essay during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4F9  Half Unit
Legal Research and Writing Skills

This information is for the 2015/16 session.

Teacher responsible: Dr Joanne Braithwaite NAB7.28
Availability: This course is compulsory on the Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.

Course content: This half unit course on Legal Research and Writing has a taught component focusing on research and writing skills and a 10,000 word stand-alone dissertation, to be written in a substantive law area of the student’s choice. The two components will be carefully integrated. Over the course of this half unit, students should gain a better understanding of:

• The nature of research in general; the distinctive features (if any) of legal research and the range of questions and research methodologies to be found within legal scholarship
• Doing legal research, including research design, resource identification and searching for relevant materials; legal referencing and citation skills.
• Writing skills, relating to both the process of writing, as well as the end product; presenting findings to different audiences etc.

Topics for the lectures will be: (1) Choosing your dissertation topic; (2) Research methods; (3) Writing skills; (4) Library skills.

The two tutorials will have a 4-on-1 format and will focus on: (1) Preparing your research proposal; (2) Writing skills.

Teaching: 8 hours of lectures and 1 hour of classes in the LT. 1 hour of classes in the ST.

Teaching will consist of: (a) Four 120 minute lectures in LT; (b) One 60 minute tutorial in LT and one 60 minute tutorial in ST; (c) One 120 minute library workshop. The course also runs a series of Evening Workshops on topics such as ‘Plagiarism’ and ‘Dealing With Writers-Block’.

Formative coursework: Students will be invited to submit one page of writing for the tutorial on ‘Writing skills’.

Watkins & Burton, Research Methods in Law (Routledge, 2013)

Assessment: Dissertation (100%, 10000 words) post-summer term.

LL4G6 Half Unit
International Commodity Sales

This information is for the 2015/16 session.

Teacher responsible: Prof Michael Bridge NAB6.21

Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course is concerned with the international sale of goods where English law is the applicable law by virtue of well-established standard form contracts used extensively in the trade, such as GAFTA 100 (a CIF contract form). English law plays a dominant part in the international sale of commodities, especially in the case of dry commodities (wheat, soya etc) produced in North America and transported to a northern European destination. It is usually the case that such contracts have no physical connection with England. There is a rich case law dealing with sales on FOB, CIF and similar terms and there are interesting comparisons to be drawn between forward physical sales and futures sales. Interesting questions are also posed by the intersection of various allied contracts concluded to give effect to the international venture, notably, sale, letters of credit, insurance and carriage (or charter parties). Extensive consideration is given to the UCP600 Customs and Practice on Documentary Credits 2007.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT.

Formative coursework: One 2,000 word essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4G8 Half Unit Not available in 2015/16
Law of Corporate Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Micheler NAB7.35

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 90 students.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, reform and moving to a solvency test, property rights in shares and financial assistance. The course will focus on English law, but will also look at other legal systems in particular at German law.

Teaching: 20 hours of lectures and 5 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will have the opportunity to write a formative essay for each of the classes. All students are strongly encouraged to write at least one essay.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4H2 Half Unit
Media Law: Regulating Publication

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the legal and administrative regulation of mass media publication (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the ‘public interest’); the main social, technological and regulatory influences that shape media
publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representatives, the avoidance of offence (obscenity and religion), and national security.

**Teaching:** 20 hours of seminars in the MT. There will be a reading week in week 6. 10 weekly two-hour seminars in MT. The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

**Formative coursework:** Students must submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 1,500 word essay.

**Assessment:** Essay (100%, 8000 words).

---

**LL4H3 Half Unit**

**Media Law: Regulating Newsgathering**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Andrew Scott NAB6.25

**Availability:** This course is available on the MSc in Media and Communications, MSc in Media and Communications Governance, MSc in Media and Communications (Research), Master of Laws and Master of Laws (extended part-time study). This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the ‘public interest’); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or in national and international law). The course then examines a number of newsgathering practices that are either facilitated or prohibited by law and/or other forms of regulation. These include the protection of sources and journalistic materials; ‘cheque-book journalism’ (including payments to witnesses and to criminals); access to information held by the state (freedom of information); access to courts and legal documents; media-police interaction; harassment and media intrusion, and the regulation of surreptitious newsgathering practices (hacking, taping and subterfuge).

**Teaching:** 20 hours of seminars in the LT. The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

**Formative coursework:** Students must submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 1,500 word formative essay.

**Indicative reading:** Millar and Scott, Newsgathering: Law, Regulation and the Public Interest (OUP, 2015 forthcoming); Robertson and Nicol, Media Law (Sweet & Maxwell, 5th ed 2007); Warby, Moreham and Christie (eds), Tugendhat and Christie: The Law of Privacy and the Media, (2nd ed, OUP, 2011), Nicol, Millar and Sharland, Media Law and Human Rights (OUP, 2009), Burden, News of the World?: Fake Sheikhs and Royal Trappings (Eye Books, 2008), Davies, Flat Earth News (Chatto & Windus, 2008); de Burgh, Investigative Journalism ( Routledge, 2nd ed, 2008).

**Assessment:** Essay (100%, 8000 words) in the ST.

---

**LL4H4 Half Unit**

**International Financial Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Philipp Paech NAB7.05

**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 90 on a ‘first come first served’ basis.

**Course content:** The traditional financial market sectors of insurance, commercial banking, derivatives, capital markets and asset management are converging in practice, but their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture. It highlights certain anomalies in differing legal treatment of the respective sectors, and considers key trends. The course provides an overview of the substantive law aspects (UK, EU and international) of international financial and business transactions. The focus is mainly on broad principles and policy issues rather than a detailed examination of statute, case law and drafting. However, where appropriate, legal concepts and market practice will be explained by reference to case law and other legal sources. The course is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- **Introduction:**
  - Logic and players of the financial market
  - Overview of types of financial transactions
  - Reasoning and sources of financial law and regulation
  - The types of risk and the role of financial law
  - European and global legal and regulatory architecture

- **Raising capital:** taking risk through funded positions
  - The nature of banks, deposit taking, loans, syndicated loans
  - Issuance of debt securities, eurobonds and equity
  - Investment funds
  - Cross-comparison of funded positions, common patterns and differences

- **Mitigating financial risk:** simple financial positions
  - Guarantee and insurance
  - Derivatives and credit default swaps
  - Structured finance, securitisation
  - Cross-comparison and the risk of recharacterisation

- **Mitigating financial risk through net and asset-backed positions**
  - Set-off and netting
  - Security interests, quasi-security and financial collateral
  - Insolvency policy and preferential treatment of financial firms

- **Cross-jurisdictional analysis**
  - Private international law analysis in financial law
  - Example 1: intermediated securities and cross-border collateral
  - Example 2: cross-jurisdictional netting
  - Common patterns and difficulties

**Teaching:** 20 hours of lectures and 5 hours of seminars in the MT. 2 hours of lectures in the ST. The course will comprise a two hour weekly lecture in MT and small group follow-up seminars in weeks 2, 4, 7, 9 and 11. There will be a
**LL4H8 Half Unit**

**Employment Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Astrid Sanders

**Availability:** This course is available on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Inequalities and Social Science, MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. Business reorganisation and economic dismissals. Freedom of association and the right to strike. Privacy inside and outside of the workplace. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

**Teaching:** 20 hours of seminars in the MT. There will be a reading week in Week 6.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Indicative reading:** Detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

Candidates are allowed to take an unannotated copy of a collection of statutory materials into the examination.

**LL4H9 Half Unit**

**Human Rights in the Workplace**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Astrid Sanders

**Availability:** This course is available on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Rights, MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** The sources and application of human rights in the workplace, including international and European laws and conventions. Civil liberties of employees. Social and economic rights of workers. Protection from discrimination in the labour market and employment. As well as detailed examination of legal materials, the approach involves discussion of theories of human rights and comparisons between legal systems.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay and one presentation.

**Indicative reading:** A detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle.

**Assessment:** Essay (100%, 8000 words) in the ST.
LL4J1  Half Unit  Critical Perspectives on Legal Theory

This information is for the 2015/16 session.

Teacher responsible: Anne Barron NAB6.05
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Legal Theory.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students must have completed LL4H7 (Foundations of Legal Theory) unless exempted from this requirement by the course convenor.

Course content: The aim of this course is to consider aspects of the phenomenon of law that have arguably been insulated from critical scrutiny by traditional jurisprudence. The questions structuring the seminars will accordingly include the following: What are the material conditions for law’s existence as a legitimate structure of authoritative norms? What are the connections between law and other modalities of power that are not encoded in the form of sovereignty? Are the forms of subjectivity and mutual recognition institutionalized by the legal order always linked with progressive social change, or can they also be complicit with processes of domination and exploitation? Most fundamentally: Is law actually necessary for individual and collective self-determination? These questions are approached from a variety of critical perspectives, including Marxist, post-Marxist and poststructuralist perspectives.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

LL4K5  Half Unit  Not available in 2015/16

International Commercial Contracts - General Principles

This information is for the 2015/16 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09 and Prof Michael Bridge NAB6.21
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Firm knowledge in contract law and/or international sale of goods from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations,
interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and, where appropriate, the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both classes and examination, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4K6  Half Unit  Not available in 2015/16 International Uniform Sales Law**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Michael Bridge NAB6.21

**Availability:** This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

**Course content:** The course concerns sales conducted on the basis of the United Nations Convention on the International Sale of Goods 1980 (CISG). Nearly eighty countries accounting together for two-thirds of the world’s export trade, have so far adopted the CISG, which has generated an enormous primary and secondary literature, a great part of which is available on the internet. It has been incorporated as domestic law in Israel and Norway and has also very largely informed the Chinese Contract Law of 1999. The CISG is a most important piece of legislation in the continuing development of international contract law. It has been influential in the development of European sales law (the Directive on the Sale of Consumer Goods and Associated Guarantees) and of the Common Frame of Reference. The experience of the CISG brings out all of the issues arising from attempts to create uniform, transnational private law. Attention will also be given to the Unidroit Principles of International Commercial Contracts (2nd ed 2004) so far as they may be used to supplement the CISG. (This course complements LL4G6 International Commodity Sales).

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4K7  Half Unit  Mental Health Law: The Criminal Context**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Jill Peay NAB6.11

**Availability:** This course is available on the MSc in Criminal Justice Policy, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students.

**Course content:** This course aims to integrate a practical and theoretical understanding of mental health law, as it relates to mentally disordered offenders. It is not intended to provide a comprehensive understanding of the detail of the relevant law in England and Wales, but rather aims at broader conceptual understanding of the problem areas that are likely to bedevil law relating to mentally disordered offenders across many jurisdictions. The course makes reference to both the Mental Health Act 1983 and the Criminal Justice Act 2003.

**Teaching:** 22 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6. Summer term is a review and revision session.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

Two-hour unseen examination in ST (100%).

---

**LL4K8  Half Unit  Law of Corporate Finance: Securities Regulation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Niamh Moloney NAB6.08

**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 75 students.

**Course content:** The course examines the legal issues arising out of the operation of the capital markets as intermediaries between investors and issuers; it focuses on the regulation of capital-raising through the markets. The topics covered include: disclosure theory; the role of trading markets in finance-raising and their regulation; prospectus disclosure; ongoing disclosure; market abuse; and the internationalization of capital-raising and harmonization. The course will focus primarily on English law. Course coverage may vary slightly from year to year.

**Teaching:** 20 hours of lectures and 5 hours of seminars in the LT. 2 hours of lectures in the ST.

Teaching on this course takes the form of weekly two-hour lectures.
in weeks 1-5 and 7-11. A revision lecture will take place in week 1 ST. Week 6 is a reading week. 5 classes/seminars (of one-hour duration) will also take place as scheduled in the LL4K8 timetable.

**Formative coursework:** Students are asked to submit one 2,000 word essay in LT.

**Indicative reading:** Reading lists will be provided in advance for each session. Sample texts include: Ferran and Ho, Principles of Corporate Finance Law, 2 ed 2014; Payne and Gullifer, Corporate Finance Law, 2011. Preliminary reading

Ferran and Ho, Principles of Corporate Finance Law, 2 ed 2014, Chapters 1 and 13.

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the main exam period.

---

**LL4K9**  **Half Unit**  
**European Capital Markets Law**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Niamh Moloney NAB6.08

**Availability:** This course is available on the MSc in Law and Accounting, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Course content:** The course examines the EU’s regulation of the capital markets. It considers the harmonized regulatory regime which applies to capital market actors across the Member States and which supports the integrated market. The topics which may be covered include: the rationale for integration and the role of law and the evolution of the integration project, including the impact of the financial crisis; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market; market access and the passport for investment services; the liberalization of order execution and the regulation of trading markets; the UCITS mutual funds regime; retail investor protection; the prospectus and disclosure regime; the regulation of gatekeepers; and the institutional structure supporting regulation and supervision, including the role of the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

**Teaching:** 20 hours of seminars in the MT. The teaching for this course takes the form of 10 X 2 hour seminars held weekly across MT in weeks 1-5 and weeks 7-11. In week 6, the teaching will take the form of a mandatory in-class formative assessment. An additional one hour revision session will be held in week 11. More detail will be available on the LL4K9 timetable.

**Formative coursework:** A mandatory in-class formative assessment (in the form of a timed exam question) will be held in week 6.

**Indicative reading:** Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, EU Securities and Financial Markets Regulation, 3rd edition (2014); Mugge (ed), Europe and the Governance of Global Finance (2014); Schammo, EU Prospectus Law (2011); Ferran, Building an EU Securities Market (2004).

**Preliminary reading**

**Assessment:** Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

---

**LL4L1**  **Half Unit**  
**The Theory and Practice of Dispute Resolution**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Linda Mulcahy NAB 7.15

**Availability:** This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Legal Theory. This course is capped at 60 students. Students must apply through Graduate Course Choice on LSE for You.

**Pre-requisites:** None, but The Theory and Practice of Dispute Resolution is a pre-requisite for Advanced Mediation

**Course content:** This course focuses on the dynamics of disputes and distinctions between the principle methods of dispute resolution. Students on this course will be asked to look at a variety of theories of dispute resolution which draw on insights offered by law, sociology, anthropology, psychology and economics. Topics include 1. What prompts and fuels disputes? 2. Typologies of third party roles in disputes 3. The trial, arbitration and theories of adjudication 4. Negotiation and bargaining in the shadow of the law 5. International civil justice reforms and their impact on the litigation process 6. Histories of informalism and ADR movements 7. Mediation 8. Dispute resolution hybrids e.g., early neutral evaluation and med-arb

The course is designed to complement the option on Commercial Arbitration and Advanced Negotiation and Mediation.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**LL4L5**  **Half Unit**  
**Socio-legal Theory and Practice**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Meredith Rossner NAB 6.33

**Availability:** This course is compulsory on the MPhil/PhD in Law (Socio-Legal Theory). This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

Proposed +4 ESRC PhD students registered in the law department (and in other departments with permission).

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

**Course content:** This course will explore the interface between social theory, methodology and socio-legal practice. After an initial engagement with literature on the history, scope and nature of doctrinal, realist, critical and socio-legal approaches to law, the course will focus on seminal empirical studies of law and legal phenomena. In particular students will be asked to identify how
specific theoretical frameworks for research have influenced choice of methodology, methods and the subsequent interpretation of data. Empirical studies exploring central legal concepts such as rights, regulation, access to justice, judgment, neutrality, due process and equality will be selected for in-depth analysis. An important feature of the course is that authors of leading socio-legal research outputs will be invited to lead ‘master classes’ in order to discuss the intellectual origins of their work and how this impacted on design and implementation.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be asked to prepare a poster presentation outlining the theoretical framework, methodological choices, ethical implications and practical obstacles for a research project they would like to undertake. The ‘ideas map’ they present will be used as a plan for the formal summative assessment. Each student will present their poster to the class before week seven of the term and will receive detailed feedback on their presentation by the end of the same term. This will give students the time to reflect on the comments made before writing up their ideas in their course dissertation. A fuller version of the presentation will later be submitted as the coursework component of the course. This is an unusual form of assessment for law students but is used extensively in other disciplines. Students will be directed to websites which provide guidance in preparing a poster presentation and will also be given the opportunity to study examples of posters collected by the course convenor.

**Assessment:** Essay (100%, 8000 words) in the ST.

The essay will take the form of a research proposal (100%).

---

**LL4L7**  Half Unit  Not available in 2015/16

**Advanced Mediation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Linda Mulcahy NAB7.15

**Availability:** This course is available on the MSc in Law, Anthropology and Society, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Legal Theory. This course is capped at 60 students. Students must apply through Graduate Course Choice on LSE for You.

**Pre-requisites:** Students wishing to take Advanced Mediation must have taken The Theory and Practice of Dispute Resolution.

**Course content:** This course examines the various models of mediation and the contexts in which each is used. It also considers contemporary debates about power in mediation. Practicing mediators will be invited to a number of the classes in order to facilitate discussion of the interface between theory and practice. Topics include 1. Distinguishing between different models of mediation e.g., facilitative, evaluative, narrative/transformational and transactional 2. The cultural context of mediation 3. Gender and mediation 4. Power and mediation 5. The lawyers role in mediation 6. Case studies of the use of mediation in particular fields may include commercial, family, personal injury international and community mediation. 7. The shift towards compulsory mediation. The course is designed to complement the options on Commercial Arbitration and Advanced Negotiation and Mediation and The Theory and Practice of dispute resolution.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Seminars will take the form of a mini lecture followed by in-depth discussion of the reading. In addition students will undertake a series of role play exercises and analyses of filmed mediations in which they are asked to explore the interface between theory and practice.

**Formative coursework:** One 2,000 word essay.

**Assessment:** Essay (100%, 8000 words) in the ST.

---

**LL4N6**  Half Unit

**Principles of Copyright Law**

This information is for the 2015/16 session.

**Teacher responsible:** Anne Barron NAB6.05

**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside
Cyberlaw

This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets). It begins by providing a theoretical framework for the regulation of the Internet, examining questions such as whether the internet is capable of regulation, whether such regulation should be neutral and who should assume the task of regulating the online environment. Students taking the course will be expected to develop knowledge and understanding of the different values and interests brought to bear in the regulation of information technologies and communities. Armed with this theoretical background, students will be asked to consider how these values are reflected in the regulatory design of the online environment. This examination will be conducted by considering a number of case studies relating to online privacy, defamation, criminal activity and market power. The course concludes by examining the topical and politically charged question of whether Internet Service Providers should be allowed to vary service conditions by types of content.

E-Commerce Law

This course critically analyses the regulation of the conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the problems of more mature e-commerce businesses including agreements. From here the course will develop to examine the special classes on internet auctions and social networks will jurisdiction, payment systems and rules on marketing and privacy. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including arranging hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the problems of more mature e-commerce businesses including jurisdiction, payment systems and rules on marketing and privacy. Special classes on internet auctions and social networks will complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

Digital Rights, Privacy and Security

This course critically analyses the regulation of the conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the special classes on internet auctions and social networks will jurisdiction, payment systems and rules on marketing and privacy. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including arranging hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the problems of more mature e-commerce businesses including jurisdiction, payment systems and rules on marketing and privacy. Special classes on internet auctions and social networks will complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Assessment: Essay (100%, 8000 words) in the ST.

LL4S4 Half Unit

Digital Rights, Privacy and Security

This information is for the 2015/16 session.

Teacher responsible: Dr Orla Lynskey NAB6.23

Availability: This course is available on the MSc in Media and Communications (Data and Society), MSc in Regulation, Master of Laws and Master of Laws (extended part-time study).

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Assessment: Essay (100%, 8000 words) in the ST.

LL4S2 Half Unit

E-Commerce Law

This information is for the 2015/16 session.

Teacher responsible: Prof Andrew Murray NAB7.11

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Assessment: Essay (100%, 8000 words).
available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.

Course content: While the development of the information society brings about significant economic and societal benefits, by treating the personal data of individuals as a valuable trading commodity it also raises fundamental rights concerns. In response to these concerns the EU has recognised a “right to data protection” in the EU Charter of Fundamental Rights and is currently remodelling the legal framework applicable to personal data processing in the EU. Moreover, other key global actors including the OECD and the US are currently discussing amendments to their legal regimes in this field. Nevertheless, there is little consensus, even within the EU, regarding whether, and how, personal data processing should be regulated in the information society. Indeed, some argue that given the exponential increases in the amount of personal data processed globally any attempts to regulate personal data processing are outdated, and even quaint.

This course will critically evaluate the current and proposed legal frameworks applicable to personal data processing. Students will be introduced to techniques and technologies for monitoring and gathering personal data in the information society and the legal framework applicable to this personal data collection in a number of jurisdictions, including the EU and US. In order to bring key issues to life, a number of case studies will be considered, for instance the application of data protection rules to online behavioural advertising, user-generated content on social networking sites and to state surveillance.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST. There will be a Reading Week in week 6 of MT.

Formative coursework: All students are expected to contribute to a series of class exercises and to submit one piece of formative work for assessment.

Kuner: Transborder Data Flows and Data Privacy Law (OUP, 2013)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

This is an open-book exam.

LL4S5  Half Unit

Piracy, Content and Ownership in the Information Society

This information is for the 2015/16 session.

Teacher responsible: Prof Andrew Murray NAB.7.11

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: One of the most contentious and complex areas of online activity is the conflict between content providers and consumers. Providers spend considerable amounts on developing and delivering a variety of content, including entertainment content, branded content and business content. Consumers often erroneously, feel “information ought to be free” and take content without payment, an activity known as piracy. This is an embedded schism in internet society and this course will examine key flashpoints including: proprietary vs. open software; file sharing and aggregation; trade mark disputes including ADR for domain name disputes; software patents and the database right. At the end of the class students should have a valuable insight to, and understanding of, the legal foundations of these disputes and the attempts of regulators to broker a resolution. This class will take a critical approach to both the problem and the proposed legal/regulatory solutions.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to contribute to a series of class and online exercises, and to submit to one one-hour mock exam.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL4Z1  Half Unit

Business Taxation

This information is for the 2015/16 session.

Teacher responsible: Dr Ian Roxan NAB.7.25 and Mr Eduardo Baistrocchi NAB.7.33

Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: The course is suitable both for those who have not studied taxation before and for those who have. It is strongly recommended for those studying LL4CI Comparative Corporate Taxation or LLACK Taxation of Corporate Transactions who have not studied taxation previously.

Course content: This course looks at how businesses are taxed in the UK. The course focuses on the key elements of the taxation of the income of businesses, including:

- taxation of trading income
- corporation tax, the nature of taxes on companies and the taxation of dividends
- capital allowances - relief for depreciation
- capital gains taxation
- partnership taxation
- tax relief for losses

The course is suitable for students who are interested in taking one course in taxation, including students who have not studied taxation before. It will be a good background course on UK business taxation for students taking LL4CI Comparative Corporate Taxation or LLACK Taxation of Corporate Transactions who do not previously have a sufficient background in UK taxation.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in Week 6 of the MT.

Formative coursework: One 2,000 word essay.

Indicative reading: Indicative reading: Tiley and Loutzenhiser, Revenue Law; Lee, Revenue Law Principles and Practice; Salters, Lee and Snape, Revenue Law: Text and Materials. Legislation: Tolley’s Yellow Tax Handbook, or CCH The Red Book. Current editions need to be used. Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Relevant legislation may be taken into the examination room (Tolley’s Yellow Tax Handbook or CCH The Red Book) if un-annotated.
**LL4Z2  Half Unit**  
**Principles of Taxation**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Ian Roxan NAB7.25  
**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.  
**Pre-requisites:** The course is suitable both for students who have not studied taxation before and for those who have. It is recommended for students who have not studied taxation previously, as well as for those who are studying any of the other tax courses offered at LLM/MSc level.  
**Course content:** This course looks at how tax systems work and the principles that lie behind tax systems. Topics covered include the reasons for taxation and the main types of tax, how income is taxed, how the tax administration operates, the interpretation of tax legislation and tax avoidance. The course uses examples from the tax systems of the UK and other countries to illustrate the issues discussed. The course is suitable for those who have not studied taxation before, as well as for those with a background in tax who are interested in studying the principles of taxation in greater depth.  
**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.  
**Formative coursework:** One 2,000 word essay.  
**Indicative reading:** Appropriate readings from journal articles and from books including: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law; Messere et al., Tax Policy: Theory and Practice in OECD Countries; Tanzi and Zee, Tax Policy for Developing Countries; Ault and Arnold, Comparative Income Taxation: A Structural Analysis; Thuronyi, Comparative Tax Law; James and Nobes, The Economics of Taxation; Mirilees et al., Tax by Design. Further materials include: Morse and Williams, Davies Principles of Tax Law; Kay and King, The British Tax System; Thuronyi, Tax Law Design and Drafting. Detailed reading lists will be provided during the course via Moodle. Recommended preliminary reading: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law (Oxford University Press, 2011).  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**LL4Z3  Half Unit**  
**Consumption Taxes**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Ian Roxan NAB7.25  
**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.  
**Course content:** The course is suitable for students who are interested in taking one course in taxation, including students who have little previous background in taxation, as well as for tax specialists. It can usefully be combined with LL4Z2 Principles of Taxation, and it provides a suitable background course for LL4Z4 Value Added Tax in the EU. In the sixty years of the existence of value added taxes, they have spread to all corners of the globe to become one of the most important sources of government revenue. They are also an increasingly important consideration for businesses and their advisors.  
This course will discuss the nature of value added taxes, whether called VAT, GST or another name. VATs will be compared with other methods of taxing consumption, including other sales taxes and progressive expenditure taxes. The course will also look at the distinction between taxing consumption and income and the redistributive effects of taxing consumption. The course examines the main features and problems raised by VATs and GSTs, including defining the taxpayers and the amount subject to tax, international transactions and VATs in federal jurisdictions, and problematic issues such as input tax credits. Examples will be drawn from the European Union VAT and from taxes in a broad variety of other countries.  
**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.  
**There will be a reading week in Week 6 of the MT.**  
**Formative coursework:** One 2,000 word essay.  
**Indicative reading:** Schenk et al., Value Added Tax: A Comparative Approach (Cambridge Univ. Press, 2015); Ebrill et al., The Modern VAT (IMF, 2001); Bird and Gendron, The VAT in Developing and Transitional Countries (Cambridge Univ. Press, 2007); Alan A. Tait, Value Added Tax: International Practice and Problems; Mirilees et al., Tax by Design; McClure, The Value Added Tax: Key to Deficit Reduction?; Ogley, Principles of Value Added Tax: A European Perspective; James and Nobes, The Economics of Taxation; Tanzi and Zee, Tax Policy for Developing Countries.  
**Detailed reading lists will be provided during course via Moodle. Recommended preliminary reading:** Ebrill et al., The Modern VAT (International Monetary Fund, 2001), or Alan A. Tait, Value Added Tax: International Practice and Problems (IMF, 1988).  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**LL4Z4  Half Unit**  
**Value Added Tax in the EU**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Ian Roxan NAB7.25  
**Availability:** This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.  
**Pre-requisites:** This course is suitable for students who are taking LL4Z3 Consumption Taxes, or who already have some experience of EU direct or indirect taxation or of a VAT or GST system.  
**Course content:** The focus of the course will be on the European Union VAT, but it is also suitable for students interested in the EU VAT as an important example of a VAT or GST system. The course will look at the EU legislation and jurisprudence, and will consider particularly at how VAT operates in the United Kingdom. The course will begin with an introduction to key concepts of VAT, including supplies of goods and services, taxable persons and transactions, and consideration for supplies. The course will then examine in more detail a range of the most important aspects of VAT, including topics such as the deductibility of input tax and the treatment of exemptions, the taxation of international transactions and transactions between member states, VAT and financial services.  
**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.  
**Formative coursework:** One 2,000 word essay.  
**Indicative reading:** Terra and Wattel, European Tax Law; Ogley, Principles of Value Added Tax: A European Perspective; Farmer & Lyal, EC Tax Law; Roxan, ‘VAT Supplies of Services: A Definition in Search of a Meaning’. Students will be expected to acquire either the Tolley’s Orange Tax Handbook, or The Green Book (CCH) for the current year. Students will be provided with detailed outlines and reading lists for the course via Moodle. Recommended preliminary reading Terra and Wattel, European Tax Law (Kluwer); or Ogley, Principles of Value Added Tax: A European Perspective (Interfisc Publishing, 1998); or Farmer & Lyal, EC Tax Law (Oxford).  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
LL425  Half Unit  
EU State Aid Law

This information is for the 2015/16 session.
Teacher responsible: Dr Pablo Ibanez Colomo NAB5.16
Availability: This course is available on the MSc in EU Politics, MSc in Regulation, Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be relevant to the following LLM specialisms: Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Course content: Member States of the EU are not free to award subsidies to companies or to support them in a comparable way (by, inter alia, granting them loans at favourable rates or by providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the principle whereby State aid is incompatible with the EU internal market (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part is devoted to (i) the notion of State aid within the meaning of Article 107(1) TFEU (that is, the range of measures that are subject to ex ante control by the European Commission) and (ii) the conditions under which such measures may be declared to be in the interest of the EU as a whole. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
There will be a reading week in week 6.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL426  Half Unit  
Comparative Constitutional Law: Institutions

This information is for the 2015/16 session.
Teacher responsible: Dr Jo Murrell NAB7.31
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Course content: This course examines the central issues in comparative constitutional law across a range of jurisdictions and from a variety of perspectives. The course opens with an introduction on the purpose of comparative constitutional law. The first substantive part discusses various approaches to the study of CCL as well as the migration of constitutional ideas (and related notions of constitutional borrowing, transplants etc). The second part of Term 1 deals with key constitutional concepts (constitution; rule of law; presidentialism, parliamentarism) which are discussed from a historical and comparative perspective. The point of these sessions is not to compare for the sake of comparing, but to equip you (the researcher) with the conceptual tools to do insightful, critical, and original comparative work of your own. The third part challenges the assumptions of liberal constitutionalism by examining constitutions in divided societies as well as authoritarian constitutionalism. The overall aim of the course is to develop students’ understanding and use of many general theoretical explanations surrounding debates in CCL, and to develop students’ critical/analytical approach to many of the questions facing judges and scholars in the next decade.
Teaching: 22 hours of seminars in the MT.
Formative coursework: One 2,000 word essay.
Indicative reading: There is not set book for this course. All materials will be made available in advance on Moodle.
Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the LT week 0.

LL427  Half Unit  
Comparative Constitutional Law: Rights

This information is for the 2015/16 session.
Teacher responsible: Dr Kai Moller NAB7.01
Availability: This course is available on the Master of Laws and Master of Laws (extended part-time study). This course is not available as an outside option.
This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.
Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; euthanasia and physician-assisted suicide; gay sex and sodomy; religion in the public sphere; affirmative action; hate speech and denial of the holocaust; obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
There will be a reading week in week 6.
Formative coursework: One 2,000 word essay.
Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, Comparative Constitutional Law, 3rd edition, 2014.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL429  Half Unit  
Not available in 2015/16
Banking Law

This information is for the 2015/16 session.
Teacher responsible: Dr Joanne Braithwaite NAB7.28
Availability: This course is available on the MSc in Law and Accounting, Master of Laws and Master of Laws (extended part-
time study). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEForYou.

**Course content:** This course focuses on the private law of banking as it relates to the core banking activities not covered elsewhere on the LLM (ie, on courses about the financing activities of banks and the regulation of banking activities). In particular, we look at the deposit-taking relationship, and the legal issues surrounding bank payment services. The course aims to be both domestic and international in perspective, though the emphasis will be on English law.

**Topics include:** 1. The deposit-taking relationship; 2. Money, transfers of money and payment; 3. Bank payment methods: funds transfers; 4. Third party claims and liabilities of banks as payment service providers; and 5. Bank payment services in international trade.

**Teaching:** 20 hours of seminars in the MT. 2 hours of seminars in the ST.

This course will not be running in MT of the 2015-16 academic year.

**Formative coursework:** Students will be asked to submit one essay, which may be written in exam conditions.

**Indicative reading:** For introductory purposes, students are referred to Ellinger, Lomnicka and Hare, Ellinger’s Modern Banking Law (5th ed, 2011), Cranston, Principles of Banking Law (2002). Full reading lists will be distributed during the course.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MA400**

**September Introductory Course (Financial Mathematics)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Tugkan Batu and Dr Christoph Czichowsky

**Availability:** This course is compulsory on the MSc in Financial Mathematics and MSc in Risk and Stochastics. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The purpose of this course is to review some key concepts of finance and probability and to discuss a range of mathematical definitions and techniques that set the agenda for the Financial Mathematics MSc as a whole. Also, this course will incorporate an introduction to programming with C++. This course is composed of two components: The first component is concerned with the common mathematical background that is assumed by the MSc Financial Mathematics and addresses some aspects of the mathematical theory that is central to the foundations of the programme: a review of sets and set operations, functions and inverse functions is first developed; probability spaces, random variables, distributions, expectations and moment generating functions are then discussed; special emphasis is placed on the binomial, the normal and the log-normal distributions; the concepts of conditional probability and conditional expectation as random variables are introduced using intuitive arguments and simple examples; stochastic processes, martingales, the standard Brownian motion and the Poisson process are introduced; Itō’s formula and Girsanov’s theorem are discussed on a formal basis. The second component is an introduction to programming with languages such as C++.

**Teaching:** 40 lectures and classes over two weeks during September, prior to the start of the academic year, and 3 support lectures in MT. There will be an informal examination (this is for the maths component only).

**Formative coursework:** Exercises are assigned and form the basis of class discussion.

**Indicative reading:** Lecture notes will be provided for the mathematics component of this module. For the programming elements of the pre-sessional, we will use Derek Capper, Introducing C++ for Scientists, Engineers and Mathematicians, Springer 2001.

**Assessment:** This course does not form part of the degree award.

---

**MA402**  **Half Unit**

**Game Theory I**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Thomas Lidbetter

**Availability:** This course is available on the MSc in Applicable Mathematics (Financial Mathematics), MSc in Financial Mathematics, and MSc in Risk Management Science (Decision Sciences). This course is available as an outside option to students on other programmes where regulations permit.

It is not available to students who have taken Game Theory (MA300) or Game Theory I (MA301).

**Pre-requisites:** Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors) and probability theory (expected value, conditional probability, independence of random events).

**Teaching:** 22 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** Weekly exercises are set and marked.

**Indicative reading:** Lecture notes will be provided. Supplementary reading: K Binmore, Playing for Real: Game Theory CUP, 2007; E Mendelson, Introducing Game Theory and Its Applications, CRC 2004.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MA407**  **Half Unit**

**Algorithms and Computation**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Julia Boettcher

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is compulsory for students on the MSc Applicable Mathematics who are not taking MA421 Advanced Algorithms; it is optional for students on the MSc Applicable Mathematics who take the advanced course.

**Pre-requisites:** Good general knowledge of mathematics, including familiarity with abstract concepts. A willingness to cope with technical details of computer usage, and with a rapid introduction to programming.

**Teaching:** 20 hours of lectures, 20 hours of seminars, 9 hours of workshops and 9 hours of help sessions in the MT. 2 hours of lectures in the ST.

**Formative coursework:** Weekly exercises are set and marked.
Many of these will require implementation of programming exercises in Java.

**Indicative reading:** T H Cormen, C E Leiserson, R L Rivest and C Stein, Introduction to Algorithms; R Sedgewick, K Wayne, Introduction to programming in Java; D Flanagan, Java in a Nutshell.

**Assessment:** Exam (75%), duration: 2 hours and 30 minutes in the main exam period.

Project (25%) in the MT.

---

**MA408  Half Unit**

**Discrete Mathematics and Graph Theory**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Peter Allen

**Availability:** This course is available on the MSc in Applicable Mathematics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

**Course content:** This course provides an introduction to discrete mathematics, particularly graph theory. Emphasis will be placed on the algorithmic aspects of the area.

Topics to be covered include: Brief Introduction to discrete mathematics and graph theoretic terminology; Ramsey’s Theorem; matchings and Hall’s Theorem; graph search algorithms; stable marriages and the Gale-Shapley Theorem; network flows and the Ford-Fulkerson Theorem; connectivity and Menger’s Theorems; graph colouring and Brooks’ Theorem; an introduction to the probabilistic method; spectral graph theory and random walks.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.

**Formative coursework:** Students will be expected to produce 10 exercises in the LT.

Weekly exercises are set and marked.

Several of these texts are available online. More information, plus additional notes, will be provided during the course.

**Assessment:** Exam (75%), duration: 2 hours) in the main exam period.

Coursework (25%) in the LT.

---

**MA409  Half Unit**

**Continuous Time Optimisation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Adam Ostoj-Ostaszewski

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Risk and Stochastics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students will need adequate background in linear algebra (facility with diagonalization of matrices for the purposes of solving simultaneous first-order differential equations is key here; knowledge of the relation between the range of a matrix transformation and the kernel of its transpose would be helpful), and in advanced calculus (manipulation of Riemann integrals such as ‘differentiation under the integral’ and the associated Leibniz Rule). Students unsure whether their background is appropriate should seek advice from the lecturer before starting the course.

**Course content:** This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. It introduces key methods of continuous time optimisation in a deterministic context, and later under uncertainty.

Calculus of variations and the Euler-Lagrange Equations.

**Teaching:** 22 hours of lectures and 10 hours of seminars in the LT. 2 hours of seminars in the ST.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MA410  Half Unit**

**Information Communication and Cryptography**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Andrew Lewis-Pye

**Availability:** This course is available on the MSc in Applicable Mathematics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

**Course content:** This course provides an introduction, for students with a mathematical background, to the applications of mathematics in information theory, coding theory, cryptography, and related areas. The course will cover mathematical aspects of the following topics: Noiseless coding, the Kraft-McMillan criterion, optimal coding, entropy, Shannon’s first theorem; Noisy channels, capacity, system entropy; Error-correcting codes, decoding rules, bounds, construction and properties of linear and cyclic codes; Structure of natural languages, redundancy, the frequency table, making and breaking cryptosystems, historic examples; Public-key cryptography, complexity issues, the RSA system, authentication schemes, the ElGamal system, elliptic curve cryptography.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the MT. 1 hour of seminars in the LT. 2 hours of lectures in the ST.

**Assessment:** Exam (90%, duration: 2 hours) in the main exam period.

Coursework (10%) in the MT.
MA411  Half Unit
Probability and Measure
This information is for the 2015/16 session.
Teacher responsible: Dr Albina Danilova
Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Risk and Stochastics. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Some background in real analysis is essential.
Course content: The purposes of this course are (a) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (b) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Convergence of random variables. Conditional expectation. The Radon-Nikodym Theorem. Martingales. Stochastic processes. Brownian motion. The Itô integral.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of seminars in the LT.
Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales, M Caplinski & E Kopp, Measure, Integral and Probability; J Jacob & P Protter, Probability Essentials.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA412  Half Unit
Functional Analysis and its Applications
This information is for the 2015/16 session.
Teacher responsible: Dr Robert Simon
Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students should have taken a course in finite dimensional linear algebra which includes diagonalisation and inner products. General knowledge of real analysis and calculus would be helpful.
Course content: This course aims at familiarizing the student with the basic concepts, principles and methods of functional analysis and its applications. The topics covered are: normed and Banach spaces, continuous linear transformations, inner product and Hilbert spaces, compact operators, applications to differential equations, numerical analysis, optimization, and approximation theory with illustrative examples.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of seminars in the ST.
Assessment: Exam (90%, duration: 2 hours) in the main exam period.
Coursework (10%) in the ST.

MA413  Half Unit
Games of Incomplete Information
This information is for the 2015/16 session.
Teacher responsible: Dr Robert Simon COL 4.07
Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students should have taken a course in game theory or be familiar with the related mathematics of topology and functional analysis. Some degree of mathematical maturity is expected.
Course content: The techniques and results of game theory are increasingly important to economic analysis. This course focuses on the problems of information incompleteness and information asymmetry. This is a relatively new but rapidly expanding area of game theory with connections to several areas of economic theory, for example conflict resolution, auctions, principal-agent problems, and the logic of knowledge. The course is divided into three parts, I Basic Results, II Repeated Games, III Bayesian Games. For the first part we cover the Min-max Theorem and Nash’s Theorem of Equilibrium Existence, Extensive Form and Discounted Games. For the second part we cover Zero-sum Games with Vector Payoffs, The Value of the Zero-sum Repeated Game of Incomplete Information on One Side, Non-Zero-Sum Games with Incomplete Information on One Side. For the third part we cover Common Knowledge, Zero-Sum Bayesian Games, Locally Finite Games, Non-Zero-Sum Bayesian Games, Ergodic Theory and Ergodic Games.
Teaching: 22 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.
Formative coursework: Weekly exercises are set and marked.
Indicative reading: A full set of lecture notes will be provided. Useful accompanying texts are Robert J. Aumann and Michael B. Maschler, Repeated Games with Incomplete Information, MIT Press, 1995; L. Breiman, Probability; K. Border, Fixed Point Theorems with Applications to Economics and Game Theory; R. Myerson, Game Theory, Analysis of Conflict, Harvard University Press; D. Fudenberg & J Tirole, Game Theory, MIT Press.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA414  Half Unit
Stochastic Analysis
This information is for the 2015/16 session.
Teacher responsible: Dr Arne Lokka
Availability: This course is available on the MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Management and Regulation of Risk. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: ST409 or MA411.
Course content: This course is concerned with a rigorous introduction to the area of stochastic analysis with emphasis on Itô calculus. The course begins necessary preliminaries, followed by a construction of the standard Brownian motion and a study of its properties. Subsequently, Lévy’s characterisation of Brownian motion, martingale representation theorems and Girsanov’s theorem are established. The course then expands on a study of stochastic differential equations.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
Indicative reading: Full lecture notes will be provided. The following may prove useful: I Karatzas and S E Shreve, Brownian Motion and Stochastic Calculus, Springer; B Øksendal, Stochastic Differential Equations: An Introduction with Applications, Springer; D Revuz and M Yor, Continuous Martingales and Brownian Motion, Springer; L C G Rogers and D Williams, Diffusions, Markov Processes, and Martingales, Cambridge.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
MA415 Half Unit
The Mathematics of the Black and Scholes Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Christoph Czichowsky and Dr Arne Lokka
Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Management and Regulation of Risk, MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics) (MA400).

Course content: This course is concerned with a mathematical development of the risk-neutral valuation theory. In the context of the binomial tree model for a risky asset, the course introduces the concepts of replication and martingale probability measures. The mathematics of the Black & Scholes methodology follow; in particular, the expression of European contingent claims as expectations with respect to the risk-neutral probability measure of the corresponding discounted payoffs, pricing formulae for European put and call options, and the Black & Scholes PDE are derived. A class of exotic options is then considered. In particular, pricing formulas for lookback and barrier options are derived using PDE techniques as well as the reflection property of the standard Brownian motion. The course also introduces a model for foreign exchange markets and various foreign exchange options.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA416 Half Unit
The Foundations of Interest Rate and Credit Risk Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Arne Lokka
Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed The Mathematics of the Black and Scholes Theory (MA415).

Course content: This course is concerned with the mathematical foundations of interest rate and credit risk theory. The course starts with a development of the multi-dimensional Black & Scholes theory with stochastic market data. This is then used to show how discount bond dynamics modelling can be approached by (a) the modelling of the short-rate process and the market price of risk, which underlies the family of short-rate models, or (b) the modelling of the market price of risk and the discount bond volatility structure, which gives rise to the Heath-Jarrow-Morton (HJM) framework. The course then expands on the theory of interest rate market models and credit risk.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA417 Half Unit
Computational Methods in Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Luitgard Veraart and Dr Tugkan Batu
Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics) (MA400).

Course content: The purpose of this course is to (a) develop the students' computational skills, and (b) introduce a range of numerical techniques of importance to financial engineering. The course starts with the implementation of binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues follow. Numerical solutions to stochastic differential equations and their implementation are considered. The course then addresses finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: 8 hours of lectures and 12 hours of computer workshops in the MT. 20 hours of lectures, 4 hours of seminars and 10 hours of computer workshops in the LT.

Formative coursework: Weekly exercises and practicals are set and form the basis of the seminars.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Project (50%) in the ST.

MA418 Half Unit Not available in 2015/16
Preferences, Optimal Portfolio Choice, and Equilibrium

This information is for the 2015/16 session.

Teacher responsible: Dr Albina Danilova
Availability: This course is available on the MSc in Applicable Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed either Stochastic Processes (ST409) or Probability and Measure (MA411) or The Mathematics of the Black and Scholes Theory (MA415).

Course content: This course is concerned with the theory of optimal investment and consumption. The course starts with the derivation of utility functions from the axioms of an agent’s preferences. Utility functions are then used as a measure of...
portfolio performance in a financial market. Optimal investment and consumption strategies are obtained for various utility functions in both complete and some types of incomplete markets. Equilibrium and asset price formation are considered in the context of complete and informationally incomplete markets.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 4 hours of lectures and 2 hours of seminars in the ST.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA419  Half Unit
Search Games

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Lidbetter

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Management Science (Operational Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In Search Theory, a mobile Searcher tries to minimise the time T taken to find something, which we call the Hider, in a known search space Q. The Hider may be stationary or mobile. In the zero sum game context (first half of the course), the Hider does not want to be found, or at least wants to maximise T. In the second half of the course we consider the Rendezvous Search Problem, in which the Hider also wants to minimise T. In both contexts the search space Q will often be taken as a finite network. In Search Theory, a unit-speed Searcher wishes to minimise the time T required to find (meet) a lost object or agent hidden in a known search region Q. This course concentrates on cases where the lost object is an agent who has motives of his own. The course content will be based on both Search Games (zero-sum games where a T-minimising Searcher seeks a T-maximising Hider) and Rendezvous Games (common-interest games where two lost searchers want to minimise T).

The first part of the course will consider Search Games. We begin with the case where the Hider is immobile - he picks his position in Q at the start of the game. We solve this game for the case where Q is a tree or a 'weakly Eulerian' network, assuming the Searcher starts in a location known to the Hider; then we remove this restriction. We then study Search Games where the Hider is mobile, the so-called 'Princess and Monster' games of R. Isaacs. Several special games are then studied, for example the case of an unknown search region (maze), and games in which the Searcher has to find several hidden objects.

The second part of the course studies the Rendezvous Search Problem. We begin with the player-asymmetric form of the problem, where the two Searchers may meet before the game to decide what strategy each will adopt. We then consider the player-symmetric form, where the Searchers are constrained to follow a common mixed strategy. Finally, we consider the incomplete information problem where a Searcher seeks an agent who might be a Hider (T-maximiser) or another Searcher (T-minimiser).

Teaching: 22 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: An assignment is set each week and marked by the lecturer with feedback. Problem areas will be discussed in class.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA420  Half Unit
Quantifying Risk and Modelling Alternative Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Pavel Gapeev

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: This course is concerned with various issues arising in the context of investment risk specification as well as with the mathematical theory of so-called alternative markets, such as commodity and energy markets. In particular, the course considers the structural credit risk models and the quantification of risk by means of copulas and risk measures. Also, the course expands on the modeling of alternative markets and addresses the problem of valuation of investments in real assets.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Two sets of written homework will be marked with feedback provided.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA421  Half Unit
Advanced Algorithms

This information is for the 2015/16 session.

Teacher responsible: Dr Tugkan Batu

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course to provide a basic knowledge in analysis of algorithms: running time and correctness of an algorithm, basic knowledge in computer programming, preferably, in Java language, and should have experience with proofs and proof techniques used in pure mathematics.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked.
Some of these will require implementation of programming exercises in Java.

Indicative reading: T H Cormen, C E Leiserson, R L Rivest, and C Stein, Introduction to Algorithms; V Vazirani, Approximation Algorithms; R Motwani and P Raghavan, Randomized Algorithms.

Assessment: Exam (75%, duration: 2 hours and 30 minutes) in the main exam period.

Coursework (25%) in the ST.

MA422
Research Topics in Financial Mathematics

This information is for the 2015/16 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is available on the MSc in Financial Mathematics and MSc in Risk and Stochastics. This course is available as an outside option to students on other programmes where regulations permit.

PhD students in the departments of Mathematics and Statistics along with other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of financial mathematics, stochastic analysis and stochastic control theory.

Teaching: 6 hours of seminars in the MT. 6 hours of seminars in the LT. 6 x 1 hour talks by researchers in the MT and LT.

Additional seminars will be scheduled throughout the year. Please see the Timetables website for further information.

Formative coursework: This course is not assessed.

Assessment:
This is a non-assessed course.

MA498
Dissertation in Mathematics

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Allen

Availability: This course is compulsory on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Dissertation in Mathematics is an individual, substantial project as an introduction to mathematical research methods. The student will investigate and study an area of mathematical research or application of advanced mathematical techniques, and to write a report on their findings. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: 10 hours of seminars and 3 hours of seminars in the MT. 9 hours of seminars in the LT. 3 hours of seminars in the LT.

The seminars include a mixture of lecture time, presentations and discussion. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with student supervisors.

Several seminars will include presentations by members of the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance throughout the LT, ST, and over the summer.

Formative coursework: Students will be expected to produce an initial report (in LT) and an interim report (in ST) for which feedback will be provided.

Indicative reading: Detailed suggestions for reading will be provided by the supervisor.

Assessment: Dissertation (100%) in the LT and ST.

Assessment is based entirely on the Dissertation, three hard copies and one electronic copy of which must be submitted by 1st September 2016. (The report may include some software relating to the project.) Detailed information about the required format for this submission will be provided during the Seminars.

MC401 Half Unit
Mediated Resistance and Citizens

This information is for the 2015/16 session.

Teacher responsible: Dr Bart Cammaerts STC. S213

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to examine the various ways in which citizens, activists and social movements use, appropriate and consume media and technologies to resist, but also how resistance is represented and mediated, by citizens themselves, by the mainstream media and through movement media. The course will address several aspects of the intricate relationship between media and communication, resistance and activism. The course is organised around the core-concept of the ‘mediation opportunity structure’ referring to the opportunities for agency through media and communication, as well as the structural constraints preventing agency and stifling dissent. Both ICTs and more traditional media are considered and a dialectical perspective on power and the relationship between agency and structure is adopted with a particular emphasis on strategies of resistance. The different lectures will focus on various aspects of the mediation opportunity structure - mainstream-media representation, self-mediation, counter-hegemony, networked opportunities - using examples from various regions in the world. Some case-studies will be situated at a local level of analysis, others at a national, while again others might relate to regional contexts or even transnational levels of governance.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading:
- Martín-Barbero, Jesús (1993) Communication, Culture and...
MC402  Half Unit

The Audience in Media and Communications

This information is for the 2015/16 session.

Teacher responsible: Prof Sonia Livingstone STC.105

Availability: This course is available on the MSc in Culture and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. While we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines a variety of social, cultural and psychological issues as they relate to the audiences for television and new media. It analyses people’s everyday engagement with media, beginning with the history of audiences and audience research, then examining audiences for a variety of genres, before addressing transformations in audiences and audience research with the advent of new media, especially hybrid, globalised, cross-media genres and user-generated content. The course frames its critical investigation of empirical audience studies in relation to theories of active audiences, interpretative communities, encoding-decoding and fandom, among others. Students will be encouraged to read widely, to forge links with other aspects of media, communications and cultural studies, and to debate the nature and future of audiences in a changing media landscape.

Teaching: 11 hours of lectures and 9 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the ST.

MC403  Half Unit

Contemporary Issues in Media and Communications Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Damian Tambini TW1.8.01e

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be particularly beneficial to students with some background knowledge of media policy, regulation and governance. Participants are advised to discuss with the course teachers if they have not taken course MC424 or equivalent, or if they do not have relevant professional experience.

Preparation for the course could include:

- Seeking additional reading in discussion with course teachers, or
- Auditing MC424 course materials and lectures from Moodle.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. While we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines live issues in broadcasting, press and telecommunications policy with a focus on current debates and an innovative format that permits longer seminar discussions, practical exercises in policy engagement and guest speakers who are active in media policy. The aim will be to develop a practical approach to current debates at the same time referring to the longer term normative and theoretical background to intervention in this sector. After the first session, discussion will focus on a current issue each week, and the reading contains items relating to that issue. There may be changes to the order of the sessions depending on availability of high profile guest speakers, and supplementary readings may be advised during seminars or by email.

Students will be encouraged to debate current policy issues including those the regulators and the government are currently consulting on, and develop a critical understanding of policy intervention, the policy process and strategy.

Teaching: Lectures and seminars totalling 30 hours will be held on a weekly basis throughout Lent Term. Lectures and seminars will vary in length, with a combined total of three hours per week, to accommodate group work and various guest speakers. Seminars may be given by different teachers. They will not necessarily deal with the same topics each week, but they all cover the same ground.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading: A reading list will be provided for each topic. General works relevant to the course include:

Journals such as Media Culture and Society, New Media and Society, and the OECD, OfCOM, and BBC websites, and the website of the Leveson Inquiry.

The course blog for this course is the blog of the LSE Media Policy Project. Students are encouraged to comment and potentially to author for this blog, which is edited by the course teachers. See also the Country Reports and Issue Reports of the Open Society Foundation Mapping Digital Media Project; available at: http://www.soros.org/about/programs/media-program

Assessment: Essay (100%, 3500 words) in the ST.
MC404  Half Unit
Political Communication

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Anstead STC. S111
Availability: This course is compulsory on the MSc in Politics and Communications. This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC) and MSc in Media and Communications (Media and Communications Governance). This course is not available as an outside option.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: The aim of the course is to examine the relationship between the media and political processes. It offers a critical review of key aspects of contemporary theory and research in political communications. It examines a range of interconnected issues concerning the politics/media relationship: media and political influence; political marketing; branding and news management; political reporting; media and public knowledge; the ‘crisis’ of current civic communications and public diplomacy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the LT.

MC405  Half Unit
Current issues in Media and Communications: Policies for ICTs, Society and Development

This information is for the 2015/16 session.

Teacher responsible: Ms Claire Milne
Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on other programmes in the Media and Communications department. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course challenges students to raise questions

MC408 Half Unit
Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches)

This information is for the 2015/16 session.

Teacher responsible: Dr Shani Orgad STC. S110

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available on the MSc in Culture and Society, MSc in Gender, Media and Culture, MSc in Management, MSc in Management (CEMS MIM), MSc in Media and Communications (Data and Society) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course addresses key theoretical and conceptual issues in the study of media and communications, within a broadly interdisciplinary social science perspective. It grounds the analysis of media and communications phenomena within broader sociological and political theories of social order and social change, thereby revealing the shifting significance of the media environment for relations among the state, market and public space in a globalising knowledge society.

The course is divided into two main sections. The first examines key concepts underpinning the analysis of media and communications phenomena in order to understand processes of power and mediation in contemporary societies. The second explores selected critical perspectives which have proved influential in the field of media and communications. As a team taught course that combines weekly lectures and seminars, its purpose is to expose students to a range of research-led debates at an advanced level, and to enable students to develop their understanding and critical appraisal of the relation between media and power at the levels of institutions, culture and social processes.

The course also includes an invited speaker series (‘Media Agenda Talks’) which addresses the interface between academic issues taught on the Media and Communications programmes and professional issues facing the media and communications industry. Speakers will normally include a mix of journalists and executives working for UK and global media companies in London. The purpose of the seminar is to provide an opportunity for students to relate the topics and themes addressed within their academic studies to the debates and concerns currently facing practitioners.

Teaching: 10 hours of lectures and 30 minutes of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

13 hours and 30 minutes of Polis Media Agenda Talks in MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

MC409  Half Unit
Media, Technology and Everyday Life
This information is for the 2015/16 session.
Teacher responsible: Dr Leslie Haddon STC.S104
Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to explore how information and communication technologies are experienced in everyday life. This includes examining how ICTs are socially shaped, through looking at current theoretical frameworks as well as historical and contemporary examples. The course covers such matters as the domestication of ICTs, their place in social networks and their implications for time and space. Finally, a range of potential social consequences are considered, from the specific implications for parent-child relationships to broader questions about the extent to which these technologies are changing social life.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, prepare a mediography, and submit one essay of 1,500 words.

MC411  Half Unit
Media and Globalization
This information is for the 2015/16 session.
Teacher responsible: Prof Terhi Rantanen STC. S106
Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan) and MSc in Global Media and Communications (LSE and USC). This course is not available as an outside option.

Course content: The aim of this course is to explore and demonstrate the role of the media and communications in the processes of globalisation by introducing the relevant literature, by examining various theories of globalisation and by identifying their relevance in understanding the media. Topics taught include: Globalisation theories, Media imperialism, Global generations, Global media events, Global media production, Global representations, Global consumption, Alternative globalisation theories.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 6 hours of panel discussion in the MT.
Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, prepare a mediography, and submit one essay of 1,500 words.

MC413  Half Unit
Information, Communication and Knowledge Systems
This information is for the 2015/16 session.
Teacher responsible: Dr Paolo Dini
Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and
Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: The aim of this course is to examine how innovation influences the development of digital technologies and the information, communication and knowledge systems they support. The focus is on the social, political and economic implications of changes in the digitally mediated environment in the information society. Digital technologies are developed, used, and sometimes resisted within a complex socio-technical system. Students are encouraged to critically appraise the way this system is influencing people’s lives in ways that are both empowering and disempowering. Policy choices with respect to governing the Internet and social media are discussed in relation to the values that inform different perspectives.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the ST.

### MC417 Half Unit Democracy and the Media

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Bart Cammaerts STC. S213

**Availability:** This course is compulsory on the MSc in Politics and Communication. This course is not available as an outside option.

**Course content:** This course examines the links between the media and democracy in theory and practice. The range of issues examined include: theories of democracy and the obligations of media; issues of press freedom and the limits to free speech; media and elections; media and public policy; the Internet and political participation; reporting in the digital age; media in an international context and the relationship between the media and social movements.

This course discusses the role assumed by the media in both long-established democratic societies and in new and emerging democracies.

**Teaching:** 5 hours of lectures, 5 hours of seminars and 15 hours of workshops in the MT.

The workshops refer to 5 student-led classes of 3 hours of in the MT centred around student presentations.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

**Indicative reading:**
MC419  Half Unit
Modern Campaigning Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Anstead STC. S111

Availability: This course is available on the MSc in Politics and Communication. This course is not available as an outside option.

Course content: Modern campaigning politics. The practice of modern political campaigns based primarily on US and UK politics and elections since 1987. The focus is practical politics. The course is taught by a series of invited guest lecturers who are experts in the field of political campaigning for political parties and NGOs. It will connect with theory taught in the MSc programme’s core courses concerning media influence, elections and voting behaviour and public opinion. It will enable students to see how theory is relevant and applied to the practice of modern political campaigns in the context of the changing nature of modern global politics, the politics of disengagement and identity. It will examine core and general concepts in campaigning including political strategy and how it is developed; ‘political message’, and the shaping of public opinion; and election campaigning and how successful campaigns are planned and implemented. The course will link campaign-relevant theory and practice through recent case histories of illustrative campaigns/political projects.

Teaching: 20 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the ST.

MC420  Half Unit
Identity, Transnationalism and the Media

This information is for the 2015/16 session.

Teacher responsible: Dr Myria Georgiou STC. S119a

Availability: This course is available on the MSc in Culture and Society, MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number
of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines the relation between identity and the media in the context of diaspora and transnationalism. The course explores meanings of identity at present times, especially as these are formed through experiences of mediated and physical transnational mobility. As migration and symbolic mobility, especially through the media, inform each other it becomes almost impossible to understand identity outside the context of mediation. The course is organised in three main thematic units. The first unit provides the conceptual entry point to the course. The second unit focuses on the modes of transnational communication: television, cinema and the internet. The third unit focuses on the spaces of transnational communication: the city, the nation and the transnational space. Each unit and lecture contributes to the understanding of identity in a world that is increasingly interconnected and networked.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the ST.

MC422 Half Unit
Critical Studies in Media and Journalism

This information is for the 2015/16 session.

Teacher responsible: Prof Charles Beckett K101

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications Governance, MSc in Media and Communications (Research) and MSc in Media and Communication Technology Applications. As obvious means of alleviating poverty and fostering democracy as well as human rights in low-income countries. It offers alternative theorisations of the contested way in which developments in these areas become embedded in the cultural and social fabric, especially where poverty and unequal power relations influence the capacities of individuals to make changes in their lives.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework:
All students are expected to complete advance reading, participate in moodle forums, prepare seminar presentations, organise and attend film/documentary viewings and submit one essay of 1,500 words.

Assessment: Exam (100%, duration: 2 hours) in the main exam period. This is a seen examination, made available to students up to seven days prior to the sitting.
Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

**Course content:** The news media is vital not just for the dissemination information but as a forum for debate. Journalism thus shapes our individual and community lives. It frames ideological disputes and is a site of contestation. But journalism and the news itself is changing because of technological, social, economic and political forces. This course led by a media professor with 20 years of experience as a journalist, takes an ethical perspective on media change. It asks what impact journalism has, what kind of journalism do we want, and how will journalism reconstruct itself according to competing national, cultural, or political contexts. On completion of this course, students should be able to: understand the role of global journalism in society today; critically discuss different theoretical conceptions of journalism as practiced in a wide variety of social and political contexts; compare and contrast the role of journalism in contexts ranging from mainstream to alternative media outlets; evaluate the normative and empirical connections between media journalism, the production of news and ethical considerations; critically assess contemporary debates about the changing nature of journalism and its implications for cultural understanding and democracy.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the LT.

---

**MC423 Half Unit**

**Global Media Industries**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Bingchun Meng STC, S108

**Availability:** This course is available on the MSc in Culture and Society, MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is not available as an outside option.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course. Priority access is given to those taking MSc Global Media and Communications (with Fudan or USC).

**Course content:** This course aims to present a critical view of theories, research and practices of media industries in the context of globalization. The central theme of the course is how media industries have been transformed by the recent political economic, cultural and technological changes on a global scale and how such transformation impact the content circulating across media platforms. Topics of interest include: new ways of organizing media production and distribution; digital media as a potential source of both resistance and control; media industries and creative cities; media policy and regulation at the global level. We will not only discuss key issues of media industries such as convergence, commodification, creative labour etc., but will also utilize different approaches such as political economy, cultural studies and ethnography to analyze cases of media production.

**Course objectives:**
- Understand different approaches to the study of media industries
- Examine the transformation of media industries in the context of globalization
- Critically analyse the relationship between institutional arrangements of media industries and the content being produced and disseminated
- Critically evaluate global regulatory attempts to establish a new communication order and the dynamics of alternative media

Topics are structured as follows:
- Media production and distribution in a globalised era
- The many lives of media commodities
- Creative labour in media industries
- Convergence: Top-down and bottom-up
- Policy and regulation
- Political economy of film industry
- The neoliberal theatre of Reality TV
- Media industries and creative cities
- Ethnography of news production
- Summary and reflection

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

**Indicative reading:**

**Assessment:** Essay (90%, 3000 words) in the ST.

Presentation (10%) in the LT.

---

**MC424 Half Unit**

**Media and Communication Governance**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Damian Tambini TW1.8.01e

**Availability:** This course is compulsory on the MSc in Media and Communications (Media and Communications Governance). This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of
students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Should the internet be governed? How should law and policy on the press and the media be reformed in the light of technological change? This course lays the foundation to enable students to approach these and related questions in an informed, authoritative way. Communication governance includes all attempts by public bodies to fund, licence or otherwise regulate or govern communication services or the providers of those services, usually for an alleged public benefit. The process of governance includes public policy debate and discussion and the processes of self-regulation and legal regulation. The term 'governance' refers to the norms, rules and resources together with their theoretical underpinnings that inform the production and consumption of media and communication services. The course covers the key concepts required to gain an understanding of the processes through which public authorities, corporations and the public are involved in setting rules, building institutions and providing public resources for the provision of media and communication services. This course begins from the assumption that media and communication can only be fully understood if their governance and its implications for citizens and consumers as well as producers, is understood. Illustrations are drawn from UK, European and international developments, thereby presenting a multi-levelled analytical approach to governance issues in the field. The first half of the course maps key elements of communication governance including key concepts and institutions. The second half of the course examines contemporary issues and debates in communication governance.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Exam (100%; duration: 2 hours) in the main exam period.

MC425 Half Unit

Interpersonal Mediated Communication

This information is for the 2015/16 session.

Teacher responsible: Dr Ellen Helsper STC.119c

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Students are asked to write a short personal statement on LSE for You indicating why they want to take this course. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Communication media have been blamed for a breakdown of social relationships and have simultaneously been hailed as powerful social tools that can connect people from all walks of life. This course addresses the ways in which interpersonal relationships and communication are influenced by mediation. The first half of the course addresses the history of media in interpersonal communication as well as general interpersonal communication and relationship theories. The second half looks in more detail at how the interaction between media and interpersonal communication has been studied in relation to the cross-cutting themes of privacy/trust, isolation/socialisation and multi-modality. The aim of this course is to provide students with a critical understanding of communication within small groups and dyadic relationships. The course examines the influence of media on three key fields of interpersonal interaction which are identified as personal, social and professional communication. The examination of these key areas is framed by theories of social norms, media richness, social capital and supplementary/substitution. The central concepts of the course (ie. privacy/trust, isolation/socialisation and multi-modality) reflected upon in these theories, are discussed from the perspective of different disciplinary and methodological paradigms. Application of theory to practitioner and policy examples will give students the tools to understand what the practical implications are of the ways in which these different paradigms suggest that interpersonal communication processes vary depending on the type of platform this communication takes place on as well as the type of relationship that is under investigation. As a result of the course the students will be able to evaluate the weaknesses and strengths of the theories that aim to explain apparently contradictory observations about the practice of interpersonal mediated communication.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%; 3000 words) in the ST.
MC426 Half Unit
Film Theory and World Cinema
This information is for the 2015/16 session.
Teacher responsible: Dr Shakuntala Banaji STC. S103
Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
In order to accommodate academic staff research leave and Sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.
Course content: This course is designed to enable a consistent, informed and plausible reading of popular film representations, discourses and cultures of consumption in specific geopolitical contexts. Introducing theories from the humanities and the social sciences, lectures offer alternative approaches to theorising sexuality, gender, race, class, religion, national identity, childhood, history and politics in popular commercial films and their interpretation by audiences. The impact of unequal power relations - on how representations are reproduced, spectatorship is theorised and censorship policies are formulated - will be demonstrated and analysed. While the course offers a particular focus on Bollywood, Hindi commercial cinema, as an example of World cinema, it refers more widely to examples from other National Cinemas such as those of China, Korea, Australia, Spain and Iran. A key learning method is the extensive interrogation of audiovisual materials. To this end, there will be five film screenings alongside the lectures and seminars. Additionally, films referred to on the course will be made available through the library or can be downloaded and watched from popular film sites on the internet.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 5 three-hour film screenings in the MT.
Formative coursework: All students are expected to complete advance reading, participate in muddle forums, present in seminar discussions, attend 5 film screenings and submit one essay of 1,500 words.
Assessment: Essay (100%, 3000 words).

MC427 Half Unit
Digital Media Futures
This information is for the 2015/16 session.
Teacher responsible: Dr Alison Powell STC. S119b
Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is available as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and Sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whist we do our best to accommodate all requests, we cannot guarantee you a place on this course.
Course content: This course provides an historical, theoretical and methodological basis through which to assess the social and cultural transformations related to digital media infrastructures and related social practices. It focuses on the materiality and affordances of new media, as well as on the social transformations that have co-evolved, including open source media production practices and peer to peer organizing practices. It critiques and questions the assumptions about the transformation of social and cultural life but also attempts to help students develop conceptual strategies beyond critique. A central focus of the course will be the claims made about the implication for collaborative work and culture of the qualities of digital data, considered through topics including but not limited to: peer to peer and open source cultural movements, the political economy and ecology of digital media, the politics of algorithms, remembering and forgetting, as well as the shift towards ‘data as media’ and its implications for media publics and media power. Students will be invited to consider the broader contexts of all of these media futures, including those related to policy and governance.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will complete a 1,500 word formative essay based on a case study. They will also receive formative feedback on class participation and on participation in creating a shared, online ‘Encyclopedia of Media Futures’ modelled on Wikipedia.
Assessment: Essay (100%, 3000 words) in the ST.

MC428 Half Unit
Media Culture and Neoliberalism in the Global South
This information is for the 2015/16 session.
Teacher responsible: Dr Wendy Willems S119D
Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social
**MC429 Half Unit  
Humanitarian Communication: vulnerability, discourse and power**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Lilie Chouliaraki S102

**Availability:** This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Media and Communications (Research), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Data and Society), MSc in Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course offers a comparative perspective on changing national media cultures in the global South in the context of the neoliberal turn. The course not only considers neoliberalism as a crucial factor that has brought media industries such as private broadcasting stations and mobile phone companies into existence but also examines the extent to which these new forms of media have played a role in reproducing neoliberalism as a process. The course aims to offer an understanding of how shifting economic policy regimes have impacted on the way in which people engage with media and how media engage with people in the global South. The first part of the course introduces the key concepts of ‘media culture’, ‘neoliberalism’ and ‘global South’ which will be deployed throughout the course. The second part of the course discusses how key processes of social change in the global South are linked to changing media cultures, including the commodification of national imaginaries, informality, crime and the rising middle class, religion and the prosperity gospel, self-help media and the neoliberal subject, and mobility and social relations. The course examines these themes through a series of empirically-grounded, mostly ethnographic case studies that include sport in Chile, popular video in Nigeria, reality television in India, crime and media in South Africa and India, Pentecostal media in Ghana, mobile phones in China and the Philippines, and therapeutic television in South Africa.

The course encourages students to critically evaluate the extent to which the three key concepts in the course are helpful in gaining an understanding of changing media cultures in the global South.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will complete a formative 1,500 word essay based on a case study, usually submitted in LT6.

**Indicative reading:**

**Assessment:** Essay (100%, 3000 words) in the ST.

---

**MC430 Half Unit  
Data in Communication and Society**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alison Powell S119B

**Availability:** This course is compulsory on the MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to students on MSc programmes in Law, Sociology and Information Systems, with permission from their academic advisor and the course convenor.

**Course content:** This course investigates the significance of data in communications, social and cultural life. It introduces core theoretical perspectives on data, and outlines research approaches that take account of the contemporary influence of data within communication and society. The course begins with the social history of data, providing a strong baseline from which to analyse the contemporary position of data. The course will provide students with conceptual tools that will help unpack the logic of data,
and train them to critically analyse phenomena such as big data, algorithmic regulation and augmented civic space. Its focus on contemporary issues allows an investigation of the politics and culture of data production, and the use of data as evidence in a range of fields including politics, advocacy and audience research. Some of the questions addressed through the course include: Who owns data? Who makes data? Who makes sense of data? Is data public or private? How do different actors get access to data? How is data protected and regulated? These and other questions reflect the course's focus on developing a critical account of how data is implicated in the structures that shape social life. Within these structures increasingly organised by algorithmic computation, how do people enact agency? How does culture both rely upon and push back against data-based communication?

**Teaching:** 10 hours of lectures and 10 hours of classes in the MT.

The provision outline of lecture topics for 2015-2016 is the following:

**Week 1:** Introduction: the Social History of Data
**Block 1:** Core Theories
**Week 2:** Social theory
Week 3: Information theory/STI
Week 4: Actor-networks, materialism and the posthuman
**Block 2:** Approaches and applications
Week 5: Philosophy and Sociology of data
Week 6: Political economy of data
Week 7: Big Data vs Social analytics
**Block 3:** Contemporary issues
Week 8: Surveillance/sousveillance/dataveillance
Week 9: Data and cultural representation (the state of the selfie)
**Week 10:** Data augmented spaces

**Formative coursework:** Students will be expected to produce 1 presentation (group project, student-led session) in the MT and either 1 essay or 1 project in the MT.

There are two options for written formative coursework on this course.

Students can choose:
- EITHER a 3000 word essay
- OR a 3000 word case analysis and recommendation. This comprises:

**Theoretical and normative contextualization**

Case study analysis and recommendation: Students choose a current data-related product, service or use case, providing an analysis of how data are theoretically constructed, valued, managed and conceived within the project, using relevant theoretical material. The case study must identify an area of ethics, governance or social justice that this product, service or use case could improve, and provide a concrete set of recommendations, grounded in the existing theoretical, historical and empirical literature. This analysis and recommendation will be accompanied by a critical reflection that highlights the theoretical and normative aspects of the case, your analysis and your recommendation. This section should be grounded in the relevant theoretical material.

---

**MC499**

**Dissertation: Media and Communications**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alison Powell S119b

**Availability:** This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is not available as an outside option.

**Course content:** The aim of this dissertation is for students to pursue an independent piece of research within the field of media and communications following the guidelines provided in the MSc Dissertation Guide and the instructions by the School's staff members. The dissertation is usually a combination of theoretical enquiry and original empirical enquiry concerning an issue in the field of media and communications. On rare occasions it is based on a theoretical interrogation. Students are encouraged to select a topic that reflects the content of their MSc programme. In all cases, students must obtain the approval of their supervisors before embarking on any research. The dissertation must be word-processed. It should be not less than 10,000 words and not more than 12,000 words in length。

**Teaching:**

MC499.1: Compulsory Teaching and Supervision

**MC499.1A**

(i) **Dissertation symposiums:** a two-hour symposium will be held towards the end of LT for all students and another will be held in ST.

**MC499.1B**

(ii) **Group Supervision Sessions:** each supervisor holds three two-hour group supervision sessions for their supervisees: (i) early in LT, after supervisors have been allocated; (ii) towards the end of LT; (iii) week 5 or 6 of ST.

(iii) **Individual Supervision Sessions:** ad hoc sessions for each student and their supervisor that can be organised during term-time during feedback and consultation hours.

**MC499.2: MCLabs – Optional Sessions**

**MC499.2A**

(i) **Lectures:**

Two x 2-hour lectures in LT3 and LT5, on dissertation preparation skills (literature reviews, ethics).

**MC499.2B**

(ii) **Workshops led by Graduate Teaching Assistants:**

Three x 1.5-hour workshops in MT2, MT5 and MT9.

Three x 1.5-hour workshops in LT2, LT5 and LT9.

Places in these workshops are limited, students must attend all sessions in order to keep their place.

Students are required to submit Ethics Checklists and Dissertation Plans to their supervisor in LT and ST.

**Indicative reading:** There are no formal reading lists, but students are encouraged to consult handbooks on how to write dissertations. In addition, students are advised to consult dissertations submitted...
in previous years for style and formatting purposes and to make sure that they are not replicating previous work.

**Assessment:** Dissertation (100%, 12,000 words). Two hard copies of the dissertation must be submitted in August. Students are also required to upload their dissertation file(s) to Moodle by the same deadline.

---

**MC4M1**  Half Unit  
**Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ellen Helsper (STC.S119c) - Michaelmas, Lent and Summer Term

**Availability:** This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available on the MSc in Gender, Media and Culture and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers.

The course has three components:

i. **Principles of Research in Media and Communications:** a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. **Principles of Social Research:** a series of five-three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the LT. Students are required to participate in two of the workshops.

iii. **Quantitative Analysis:** Students have to take the following course offered by the Methodology Department: MY451M Introduction to Quantitative Analysis. Please note that this statistics course is compulsory and automatically included when you register for the standard MC4M1 course. (Students may be permitted to substitute a more advanced Quantitative Analysis course offered by the Methodology Department in place of MY451, with the approval of the MC4M1 course convenor and subject to timetabling constraints.)

**Teaching:**

i. **Principles of Research in Media and Communications:** Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. **Principles of Social Research:** Workshop (three hours) x 2 LT (each comprised of two separate 1.5 hour sessions).

iii. **Quantitative Analysis MY451:** Lecture (two hours) x 9 MT; Computer class (one hour) x 9 MT.

iv. Methodology pilot drop in clinic: Workshop (two hours) x 1 ST.

**Formative coursework:**

i. **Principles of Research in Media and Communications:** All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in week 10 of MT.

ii. **Principles of Social Research:** All students are expected to complete advance readings and submit workshop assignments.

iii. **Quantitative Analysis:** Most statistics courses require weekly assignments.

---

**Indicative reading:**

**Assessment:**

1. Coursework: One written assignment of not more than 3,000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in ST Week 2 (80%).
2. A two-hour examination in the ST relating to Quantitative Analysis (MY451M) (20%).

Students have to complete both assessments (written assignment and statistics exam) on this course.

---

**MC4M2**  
**Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ellen Helsper (STC.S119c) - Michaelmas, Lent and Summer Term

**Availability:** This course is compulsory on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:**

i. **Principles of Research in Media and Communications:** a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.
ii. Principles of Social Research: A series of ten three-hour workshops (5 comprised of two x 1.5 hour sessions and 5 comprised of one x 3 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

iii. Quantitative Analysis: Students have to take two statistics courses offered by the Methodology Department: MY451M: Introduction to Quantitative Analysis; MY452L: Applied Regression Analysis. Please note that these courses are compulsory and automatically included when you register for the standard MC4M2 course. (Students may be permitted to substitute a more advanced course offered by the Methodology Department in place of MY451M and/or MY452L, with the approval of the MC4M2 course convenor and subject to timetabling constraints.)

Teaching: i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 10 LT.

iii. Quantitative Analysis: MY451M: Lecture (two hours) x 9 MT; Computer class (one hour) x 9 MT; MY452L: Lecture (two hours) x 9 LT; Computer class (one hour) x 9 LT.

iv. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in week 10 of MT.

ii. Principles of Social Research Workshops: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

Assessment:

1. Coursework: One written assignment of not more than 5,000 words to be submitted in ST Week 2 (66%).

2. Two two-hour examinations in ST relating to Quantitative Analysis MY451M and MY452L (see Methodology Department course guides) (34%).

MG401 Half Unit
Operations Management

This information is for the 2015/16 session.

Teacher responsible: Prof Richard Steinberg NAB3.08

Availability: This course is available on the MSc in Management, MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management of Information Systems and Digital Innovation and MSc in Management, Organisations and Governance. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped. Students on the waiting list will be selected based on their suitability for the course based on their academic background.

Teaching: 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: This course includes a pre-assignment that is due at the first lecture of term. The pre-assignment will be posted to Moodle on the last day of Michaelmas term 2015.

Students will also have six assignments throughout the term covering the material in the course, and will be expected to work as a group on each assignment. The problems comprising each assignment will be discussed in the classes, and each student will be individually responsible for answering all the problems for each assignment.

Indicative reading:

(1) Case: ‘National cranberry cooperative (abridged)’

(2) Case: ‘Toshiba: Ome works’

(4) Article: ‘Controlling variation in health care: a consultation from Walter Shewhart’

(5) Article: ‘Monitoring patients using control charts: systematic review’

Assessment: Exam (100%), duration: 2 hours in the main exam period.

MG402 Half Unit Not available in 2015/16
Public Management: A Strategic Approach

This information is for the 2015/16 session.

Teacher responsible: Professor Roger Levy

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Development Management, MSc in Management, MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management of Information Systems and Digital Innovation, MSc in Management, Organisations and Governance, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Management and Governance and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course develops the perspectives, knowledge,
MG403  Half Unit
Pricing Strategy

This information is for the 2015/16 session.

Teacher responsible: Prof Om Narasimhan NABS.06
Availability: This course is available on the MSc in Management, MSc in Management and Strategy and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics and opportunities for achieving price customisation. Our focus shifts from setting the overall price level to making customer-specific or segment-specific pricing decisions. Topics include price promotions, reference prices, price customisation and bundling.

Teaching: 30 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 case study and 1 other piece of coursework in the LT. 1 Case Analysis (to be done in pairs) 1 Practice Exam (to be done individually)

Assessment: Exam (60%, duration: 3 hours) in the main exam period. Project (30%, 2500 words) in the LT. Class participation (10%).

MG404  Half Unit
Behavioural Fundamentals for Marketing and Management

This information is for the 2015/16 session.

Teacher responsible: Dr Heather Kapppes NAB5.04
Availability: This course is available on the MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management and Strategy and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: For many companies, non-profit organisations, and political figures, success relies on understanding the “consumers.” What is it that they really want, and why? What information will they attend to, and what will they ignore? How do they make decisions, why do they sometimes make bad ones, and how can we help them make better ones? It can be tempting to answer these questions intuitively, based on your own experiences as a consumer. However, intuitions about human psychology are often wrong.

The aim of this course is to enable students to identify the major theories of consumer behaviour, and to apply these theories to understand behaviour at all stages of the consumer experience. Topics include:

- Chronic and temporary sources of customer needs, desires, and motivations
- How customers search for information, acquire, and process information
- How customers allocate attention and how to attract it
- Customer decision-making processes, and the heuristics and biases that play a role
- The formation of attitudes and intentions, and processes for persuasively changing them
- Social influences on intentions and behaviour, including unconscious determinants
- Why intentions are or are not translated into behaviour, and what strategies can be used to narrow the intention-behaviour gap.

Teaching: 30 hours of lectures in the LT. 3 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Formative feedback will be provided on a short (1000 words) draft of the essay. In preparation for the oral presentation, you may request formative feedback on a draft of your slides and/or a presentation outline; this feedback may be provided in writing or face-to-face depending on your preference.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (40%, 2000 words) and presentation (10%) in the LT.

MG405  Half Unit
Behavioural Decision Science

This information is for the 2015/16 session.

Teacher responsible: Dr Barbara Fasolo NAB 3.15
Availability: This course is available on the MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available as an outside option to
students on other programmes where regulations permit. This course is available as an outside option to students on all Management and LSE post-graduate programmes where regulations permit, and is complementary to other behavioural courses offered at LSE particularly MG455. This course will be capped to 40 students.

**Pre-requisites:** It is an advantage to have had an introductory quantitative course in Mathematics or Statistics. It is an advantage to have had an introductory social science course, in one of these fields: economics, management, psychology or sociology.

**Course content:** This course introduces students to the fascinating field of behavioural science from a decision making perspective. This course develops your ability to understand the world from a “behavioural” lens, and predict and influence positive behaviour change and choice architecture. The aim is for you to become a mindful “choice architect”.

The course is run in seminars, designed for aspiring behavioural insight experts. We will explore a selection of current research topics relevant to “nudging”, debiasing and choice architecture. You will read pre-assigned scientific articles before the seminar, and in the seminar work as a group on strengths, limitations and implications of these concepts across a number of domains. Topics will include: Choice Architecture and Behavioural Change; Heuristics and Biases, Adaptive Decision Making, Debiasing. Because behavioural science started in the lab, the course includes a visit to the Behavioural Research Lab, to give you the experience (as researcher and participant) of what is behind the scenes of ‘behavioural science and insights’. This is a course for students with a strong passion for behavioural science and a keen interest in the psychology of decision making and behaviour change. The course is also a natural complements to MG455, which provides the foundation of behavioural decision making theories.

**Teaching:** 18 hours of seminars and 2 hours of seminars in the MT. Students will have 1 seminar session in the Behavioural Research Lab. A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Students will be expected to produce 1 essay in the MT. A 500-word plan for the individual summative assessment (introduction to problem and to intervention chosen, with a brief outline of proposed literature to justify the intervention) due at the beginning of Reading Week (W6).

**Assessment:** Essay (90%, 3000 words) in the LT. Coursework (10%, 500 words) in the MT. The course is examined as follows: 1 x 500 word lab report due in week 11 of MT. This report will detail your application of the BRL before launching it to the field test (the best idea will be funded). (10%) 1 x Two-section essay due in week 1 of LT: the first part (1,000 words) describes a de-biasing or nudging intervention in response to a problem you choose to apply behavioural insight to; the second part (2,000 words) is a critical assessment of the literature justifying this intervention (as opposed to other interventions) as well as a discussion of the limitations of the recommendation proposed. The first part of the essay will count for 25% of your mark while 75% will come from the second part. (90%)

---

**MG408  Half Unit Combinatorial Optimisation (formerly OR408)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Katerina Papadaki NAB 3.14

**Availability:** This course is available on the MSc in Applicable Mathematics and MSc in Management Science (Operational Research). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Some familiarity with graph theory and some knowledge of programming could be desirable.

**Course content:** The course is intended as an introduction to discrete and combinatorial techniques for solving optimisation problems, mainly involving graphs and networks, as described under the headings of the lecture course below. MG4C6.1 “Foundations of Mathematical Programming”, is an introduction to the mathematical foundations of mathematical programming. MG408 “Combinatorial Optimisation” covers the topics: minimum spanning trees with a brief introduction to matroids, shortest path algorithms, maximum flow algorithms, minimum cost flow problems and matching problems and a choice of two other topics such as NP-completeness or approximation algorithms.

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures in the ST. MG4C6.1 - four LT; MG4C6.1A two x 1.5 LT. MG408 - sixteen LT; MG408A eight x 1.5 LT and one revision session.

A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Lecture notes will be supplied for most topics otherwise reading from books will be indicated. Weekly exercises will be given that will be solved and discussed during the seminars.

**Indicative reading:** Most of the lectures will be based on topics from: Network Flows, Ahuja, Magnanti and Orlin. Also topics on NP-completeness and approximation algorithms if covered will be covered from the book: The Design of Approximation Algorithms, by David P. Williamson and David B. Shmoys.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**MG409  Half Unit Auctions and Game Theory (formerly OR409)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Richard Steinberg NAB 3.08

**Availability:** This course is available on the MSc in Applicable Mathematics, MSc in Management, MSc in Management (CEMS MIM), MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research) and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit. This course is capped. Students on the waiting list will be selected based on their academic background.

**Pre-requisites:** Students should have a course equivalent to LSE course Quantitative Methods (Mathematics) (MA107), which covers techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), and the solution of differential equations, with emphasis on their application to economic problems.

**Course content:** The course provides an introduction to auctions and game theory. Topics covered are: non-cooperative game theory; cooperative game theory; social choice; auctions; and combinatorial auctions.

**Teaching:** 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

A reading week will take place during Week 6. There will be no teaching during this week.
MG411 Firms and Markets

This information is for the 2015/16 session.

Teacher responsible: Prof John Sutton

Availability: This course is compulsory on the MSc in Management and Economics. This course is available on the MPhil/PhD in Management. This course is not available as an outside option.

Course content: A graduate course in microeconomic analysis, geared towards those parts of the subject that are of primary importance in the Management area. The first section focuses on competition between firms, using standard game theoretic models. This leads to a general treatment of market competition by reference to the concept of firms’ capabilities. The next section traces the basis of firms’ capabilities to the set of elements of know-how possessed by the individuals comprising the firm, and by the mode of internal organization of those individuals. The analysis draws on the several strands in the modern literature on the theory of the firm. The final section of the course deals with the link between strategy and structure, and with the formulation of strategies in environments characterized by complexity and uncertainty.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT. 20 hours of lectures and 20 hours of seminars in the LT. A weekly seminar devoted to problem sets. A weekly seminar devoted to case studies.

Indicative reading: Milgrom and Roberts, Economics, Organization and Management; Sutton, Sunk Costs and Market Structure

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG414 Managing Change in the Public Sector: Theory and Challenge

This information is for the 2015/16 session.

Teacher responsible: Dr Simon Bastow

The course is team taught, with contributions from the Department of Accounting.

Availability: This course is compulsory on the MSc in Public Management and Governance. This course is available on the MPhil/PhD in Employment Relations & Organ Behaviour and MPhil/PhD in Management. This course is not available as an outside option.

Course content: This course is organised into three parts covering the Michaelmas and Lent Terms, as follows:

1. Developing the knowledge, methods, and skills to design and implement improvements in public sector services and programmes, with emphasis on the challenges for public managers, (MT weeks 1 to 11)
2. Using systematically developed accounting information outcomes for purposes of managerial control and governance, (LT weeks 1 to 5)
3. Using case-based materials to analyse strategic management process and outcome (LT weeks 6 to 10).

The main corresponding disciplinary perspectives are management, accounting, and strategic management.

Parts 1 and 3 develop conceptual and applied empirical understanding of challenges facing public managers in their strategies and efforts to change public organizations, their processes and outcomes, for the better. We focus on a variety of aspects of this challenge, including:

• Organizational goals and mission, programme management, delivery, and performance;
• Organizational design, structure and culture; and
• Planned organisational and programme change over time.

The frameworks offer knowledge and methods for explaining the outcomes of organisational activity, programme implementation, and change initiatives. In addition to explaining outcomes, these frameworks are used to develop approaches and skills whose engagement favours the design and realisation of improvements in public programmes and organisations.

The Lent Term module examines the evolution and use of systematically developed information about the behaviour of programmes and organisations for monitoring, decision-making, and governance purposes. The module explores financial management and organisational control concepts through recent developments in accounting literature and offers an introduction to methods, tools and techniques aimed at enhancing performance, managerial oversight and accountability in the public sector.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week during Week 6, in line with departmental policy.
Formative coursework: Michaëlmas Term: Individual presentations in seminars.
Lent Term: One formative essay and 2 class assignments.

Assessment: Essay (25%, 2500 words) and project (25%) in the LT. Essay (40%, 5000 words) in the ST. Presentation (10%) in the MT and LT.

A Group Project will consist of one individual essay and a group presentation. There will also be a individual essay on Governance (40% 5000 words) in the ST and individual presentations in MT and LT.

MG416  Half Unit
Project

This information is for the 2015/16 session.
Teacher responsible: Various (depending on project title chosen)
Availability: This course is compulsory on the MSc in Management, Organisations and Governance. This course is not available as an outside option.
Course content: Students will undertake a research project related to one or more of the compulsory courses (MG426 Organisations in the Economy and Society, MG427 Innovation in Organisations (H) and MG428 Enterprise Development (H) taken as part of the programme.
Teaching: Students will be allocated a supervisor, based on the project chosen, who will provide supervision of this piece of work.
Assessment: Project (100%, 6000 words) post-summer term. Project report of no more than 6,000 words to be submitted by Wednesday 31st August 2015. Failing the dissertation cannot be condoned.

MG417  Half Unit
Extended Essay

This information is for the 2015/16 session.
Teacher responsible: Various (depending on title chosen).
Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.
MG418   Half Unit
Open Innovation

This information is for the 2015/16 session.
Teacher responsible: Prof Harry Barkema NAB4.24
Availability: This course is available on the MSc in Management, MSc in Management of Information Systems and Digital Innovation and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content:
Week 1: The broader context: Open Innovation as part of Business Model Innovation
Week 2: The broader context II: Open Innovation as part of Business Model Innovation
Week 3: Open Innovation: Tools, Theory and Practice
Week 4: Open Innovation: Networked Innovation
Week 5: Implementing Business Model Innovation including Open Innovation
Week 6: Workshop on methodology and design
Week 7: Workshop on methodology and design
Week 8: Workshop on methodology and design
Week 9: Dress rehearsal (presentations)
Week 10: Final presentation
Innovation - in products, processes, and business models - is one of the most important topics for companies today and will likely be even more important in the future. This course focuses on an important trend: Open Innovation, i.e., strategies to tap new product ideas, technologies, and so on, from outside the company. For instance, using technology acquisitions, alliances, client-supplier relationships, crowd sourcing, open corporate campus, innovation ecosystems. The first part of this course reviews the recent literature. The second part focuses on group projects where students apply their insights to a "live" case in a real company. Each group analyzes their case, and makes recommendations for an improved Open innovation strategy. The group’s analyses and recommendations are presented on the last day of the course.
Teaching: 30 hours of lectures in the LT.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will synthesize, critically analyze and present their views in class on relevant literature fields such as technology acquisitions, alliances, client-supplier relationships, crowd sourcing, open corporate campus, innovation ecosystems. Feedback will be provided in seminars ahead of the submission of their assessed project.
Student teams will work closely with Innovation Partners to conduct research and apply theoretical concepts in the field.

MG419   Half Unit
Public Management - Strategy, Innovation and Delivery

This information is for the 2015/16 session.
Teacher responsible: Dr Alberto Asquer
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.
Course content: The course develops the practical knowledge and analytical skill to make sense of field problems faced by public managers, and to design and implement strategic and effective practical action in the public sector. In Michaelmas Term, the course focuses on making sense of the fuzzy problem-messes faced by public managers, and introduces students to the graphical and theoretical tools used to represent and reverse engineer the dynamic social systems involved. In Lent Term, the course focuses on the strategic design, evaluation and implementation of various organisational activities, such as policy interventions, managerial control systems, and strategic planning. Overall, the course provides a foundation for further coursework about management in the public sector as well as the ability to engage constructively and critically in the development of public management practice.
Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT.
Formative coursework: Students will be expected to produce two essays - one in MT and one in LT.
Assessment: Essay (30%, 3000 words) and presentation (15%) in the LT. Essay (40%, 4000 words) in the ST. Presentation (15%) in the MT.
MG420  Half Unit
Dissertation
This information is for the 2015/16 session.
Teacher responsible: Dr Brittany Jones NAB 4.04
In addition, all students will be allocated an individual dissertation supervisor in year two.
Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.
Students on other Department of Management postgraduate programmes are welcome to attend the preparation sessions.
Course content: Dissertations are based on a research question which students are required to agree with their assigned dissertation supervisor in year two. Students opting for MiM specialisations may consider how they may relate their research questions and dissertations to the area of specialisation they undertake in year two. (This does not apply to MiM students on either the CEMS MIM or MiM Exchange tracks.)
Research questions may be investigated by:
(a) Framing the question via a literature review and examining the problem in more detail through a small scale empirical research project, using either primary or secondary data sources; OR
(b) Carrying out an extended literature review to provide a rigorous analysis of existing research investigating the problem.
Teaching: 1 hour and 30 minutes of lectures in the MT, 6 hours of lectures in the LT.
Students are required to attend a course of five lectures during MT and LT.
Students on this course will have reading weeks in Week 6 of MT and Week 6 of LT, in line with departmental policy
Formative coursework: Students are required to write a short research proposal (maximum of 1,000 words), to be submitted as set out in the policies of their degree programme, with their proposed research question.
Other readings will be provided during lectures in MT and by dissertation supervisors.
Assessment: Dissertation (100%, 6,000 words) post-summer term.

MG421  Half Unit
Foreign Direct Investment and Emerging Markets
This information is for the 2015/16 session.
Teacher responsible: Prof Saul Estrin NAB4.32 and Dr Christine Cote
Availability: This course is available on the MSc in Economics and Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: An undergraduate or graduate course in micro-economics. Pre-requisites to be assessed by teacher responsible.
Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. There will also be some external speakers from large international firms and from the banking and consulting community to bring contemporary views and arguments to bear.
Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused on developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies’ performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, and how and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of data sets and sources. The course will then turn to key topics. These will include the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets. Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Essay (20%, 1,000 words) in the ST.
Project (20%, 2,000 words) and class participation (10%) in the LT.

MG422  Half Unit
Thinking Strategically
This information is for the 2015/16 session.
Teacher responsible: Prof Ignacio Palacios-Huerta NAB5.24
Availability: This course is available on the MSc in Economics and Management, MSc in Management and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: A knowledge of basic algebra is necessary to take this course.
Course content: This course is concerned with strategic thinking. The course is an interaction of game theory, economics and business strategic management. The focus is the study of situations in which two or more decision-makers (e.g., individuals, firms, political parties, etc.) interact in a strategic manner. Understanding strategic situations that involve conflict and/or cooperation has proven critical in many areas of economics, business, political science, sports, and other areas. The emphasis is to provide the fundamental thinking of good strategic making in these situations,
MG423 Half Unit
Leading Entrepreneurial Organisations in Global Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Fei Qin NAB4.31

Availability: This course is available on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management, MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the entrepreneurial management in the context of globalisation. It discusses theories and current research on the creation and development of entrepreneurial organisations. It introduces useful conceptual models and analytical tools for devising entrepreneurial strategies. Important aspects of entrepreneurship, such as the characteristics of entrepreneurial leaders, the dynamics of venture capital industry, networks and innovation, and business model design, will also be reviewed in the course. The classes will use readings or cases to explore these matters in depth.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Class presentations and one business plan project which forms part of the summative group project.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Project (25%, 4000 words) in the LT.

---

MG425 Half Unit
Global Business Management

This information is for the 2015/16 session.

Teacher responsible: Prof Leslie Willcocks NAB3.23 and Dr Susan Scott NAB3.12

Availability: This course is available on the MSc in Management, MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is not available as an outside option.

Course content: This course studies the varieties of management practices across regions, and how business management can be conducted internationally. Our teaching approach is, within dynamic global, regional and national contexts, to emphasise the interrelationship between international strategy and global operations. Having identified distinctive global business management strategies, and market entry approaches, we explore how these are enabled through organizational structures and information infrastructures, and implemented through marketing, human resource, R&D, and sourcing operational sub-strategies.

The course provides an examination of how emerging trends in strategy and operations are entangled with current processes of globalization (including technological capabilities) and what these conditions of possibility mean going forward. The course focuses on: Perspectives on Globalization; Political Economic, Cultural and Legal Environments and Differences; Strategy in Global Context; Organization Foundations; Technological Architecture; Entry Strategy and Strategic Alliances; Global Sourcing and Logistics Strategy; International Management Challenges; Technology, R and D and Innovation; Global Information Systems and Digital Business Management; Managing Across Boundaries; Corporate Social Responsibility and Business Ethics; Regional Business Strategies and International Trade; Regional Strategies and International Trade; Global Digital Business.

Teaching: 15 hours of lectures, 13 hours and 30 minutes of seminars and 3 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: In classes students will be making presentations of course readings or cases in small teams of two or three as practice for the assessed group presentations, and they will receive feedback on these class presentations.

MG426 Organisations in the Economy and Society

This information is for the 2015/16 session.

Teacher responsible: Prof David Marsden and Dr Jonathan Liebenau

Availability: This course is compulsory on the MSc in Management, Organisations and Governance. This course is available on the MPhil/PhD in Management and MPhil/PhD in Management. This course is not available as an outside option.

Course content: This core course will introduce students to the economic and social context in which managers and their organisations operate. Managers have a special role within organisations by virtue of their ability to structure the way the organisation is designed and work is organised, to position their organisations in a changing economic and social landscape, and to develop organisational capabilities to profit from new opportunities. Our teaching encourages students to address questions such as:

- Why do firms exist and what are the boundaries of the firm?
- Why does exchange sometimes occur through markets and sometimes through firms?
- Do markets emerge or are they created by firms?
- What role do networks play in markets and organisations?
- Does ownership matter?
- What is meant by ‘corporate governance’ and why is it important?
- Is the global economy converging to one form of capitalism, or does capitalism come in many forms?

The course draws on theory and evidence from a range of social sciences, including economics, economic sociology and organisational theory. It makes particular use of historical and international evidence. Lectures and classes are arranged under seven headings:

- Exchange
- Firms
- Industry structure
- Networks
- How the firm can shape its external environment
- Governance
- Varieties of capitalism

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 3 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to make oral presentations in class, and be expected to write one non-assessed essay during the MT.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the ST.

Essay (25%, 2000 words) in the LT.

MG427 Half Unit Innovation in Organisations

This information is for the 2015/16 session.

Teacher responsible: Dr Lourdes Sosa

Availability: This course is compulsory on the MSc in Management, Organisations and Governance. This course is not available as an outside option.

Course content: This half-unit course will develop students’ abilities to understand the effect of innovation on the competitive process of firms. Innovation is therefore seen as a tool (and their competitors can use to push the competitive process in their favour). At the end of the course students will be able to design their own innovation initiatives as well as evaluate the innovation initiatives of other organisations to decide on appropriate competitive responses. The course advances from cross-sectional (short-term) analysis to a longitudinal (long-term) perspective. Topics include strategic, disruptive and architectural innovation, competence destruction, dynamic capabilities, ambidexterity in organisations, among others.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 2000 words).

MG428 Half Unit Enterprise Development

This information is for the 2015/16 session.

Teacher responsible: Dr Lourdes Sosa

Dr Linda Hickman

Dr Yally Avrahampour

Availability: This course is compulsory on the MSc in Management, Organisations and Governance. This course is not available as an outside option.

Course content: This course will address management problems and internal/external issues that must be resolved in order for startup organisations to succeed. Through application, the students will be able to critically assess management practices and disciplines and evaluate their potential and limitations in developing organisations. To put theory into practice students will progress from an introduction to general principles into creating an enterprise through an iterative process. The course structure will thus offer students a method of problem solving through an action-
MG430 Half Unit

Strategy, Organisation and Innovation

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Thomas 5.27

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

Course content: This course applies tools from microeconomics, industrial organisation and organisational economics to the analysis of strategy. The emphasis is on the application of these concepts to business situations, and as such the course relies heavily on the analysis of case studies. The course is divided into three parts. The first part focuses on the external context of strategy. It first reviews basic tools for understanding industry economics and the determinants of industry-wide profitability, focusing on positional aspects. It then introduces basic game theory to analyse competitive interactions when the number of players is small and the industry profitability is largely determined by these players’ interactions. This tool is used to analyse issues such as bargaining power, price competition and entry and exit decisions. The second part studies technology and market power (Demand and supply and equilibrium: the determinants of consumers’ and firms’ market responses and the nature of non-strategic interaction). The third part of the course focuses on the internal context of strategy and organisation, and discusses issues such as the scope of the corporation, outsourcing, and the role of corporate headquarters in adding value and capturing synergies. The course is heavily based on case discussions. For each class meeting, study questions will be assigned concerning a case study. We will discuss these questions and the material in the case during the class discussions. Students will need to prepare for class discussions by reading the assigned case and analysing it in view of the assignment questions. Required cases and supplementary readings will be available on Moodle. The textbook, together with the lectures, contains the concepts necessary to answer the questions.

Teaching: 20 hours of lectures and 12 hours of seminars in the LT.

Students on this course will have a reading week in Week 6 of MT.

Assessment: Exam (90%, duration: 2 hours) in the main exam period.

MG431 Half Unit

Managerial Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Jordi Blanes i Vidal

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

Course content: A graduate-level introduction to the foundations of managerial economics. Topics include:
1. Economics as a theory of organisation.
2. Economic Agents: Rationality and the co-ordination powers of the market (Demand and supply and equilibrium: the determinants of consumers’ and firms’ market responses and the nature of non-strategic interaction).
3. Strategic interaction and dynamic competition.
4. Information and efficiency.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy.

Formative coursework: A problem set will be assigned and is due two weeks later. It will be marked for feedback purposes only.

Reading lists will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG434 Half Unit

Organisational Behaviour

This information is for the 2015/16 session.

Teacher responsible: Dr Uta Bindl NAB 4.01 and Dr Emma Soane NAB 4.02

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. It does this by reviewing psychological theories as they apply to organisations, demonstrating the contribution of a psychological perspective to understanding human behaviour at work, and critically evaluating the empirical evidence. The course will strike a balance between theory and practice by applying the theories to practical problems in organisations.
MG436 Half Unit

Firms, Markets and Crises

This information is for the 2015/16 session.

**Teacher responsible:** Dr Daniel Beunza NAB4.08

**Availability:** This course is available on the MSc in Management and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Any social science background

**Course content:** This course focuses on the financial sector and financial markets. It discusses current research in the social sciences on how this sector has emerged and operates, and sheds some light on the recent financial crisis. A constant theme is that academic research helps us explain major phenomena in current business and organizational life. In each lecture and class, faculty will discuss a major aspect of or issue in the financial sector internationally, and show how relevant research can help us understand it. The classes will use readings or cases to explore these matters in depth.

**Teaching:** 30 hours of lectures in the LT. 1 hour and 30 minutes of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

---

MG437 Half Unit

Business Model Innovation at the Base of the Pyramid (H)

This information is for the 2015/16 session.

**Teacher responsible:** Professor Harry Barkema NAB4.24

**Availability:** This course is available on the MSc in Management, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students are required to submit a 500-word statement detailing their motivation to take MG437, and a CV detailing their education or experience related to topics in poverty. Often the student will have worked in these countries with NGOs, social enterprises or charities; or studied courses related to development poverty or organizational models. The statement and CV should be submitted via the application system on LSE for You.

**Course content:** This course is about organisations serving social goals, in particular for the 4 billion people living in (extreme) poverty. It's about designing, implementing, managing and scaling innovative social enterprises, NGOs, government organisations – and ecosystems of them – addressing social issues such as job creation, income, health, education, and the intended and unintended transformations these organisations imply for clients, families, and communities.

We will discuss what poverty is and what its causes are, and then how social enterprises and other social businesses, NGOs, and government programs influence these causes, and why, and under which conditions. Insights from novel research are presented on how organisations interact with their social environment, and why, combining insights from management (incl. organisational behaviour, social networks and leadership), development and anthropology.

Half of the course consists of theory-based critical discussions, often of innovative examples of social enterprises or NGOs and their social impact, in class and within our Facebook community, which includes hundreds of alumni of this course. In the other half of the course student groups carry out a consulting project with one of our ecosystem partners, ranging from innovative start-ups (social enterprises or NGOs) to global companies such as IBM. Many students also design their own innovative social enterprise, NGO or charity, and have gone on to compete in – and win -- global competitions, and/or start up in Africa, South Asia, and South America.

**Teaching:** 18 hours of lectures and 12 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One 800-word essay. Students choose one example of an innovative social enterprise, NGO government program or charity. Use theory underlying and developed in this course, and gathered by yourself, to analyse the strengths and weaknesses of the model in relation to intended or unintended social implications.

**Indicative reading:** Morduch, J., 1999, The Microfinance Promise, Journal of Economic Literature, 37, (4), 1569-1614 (Jstor)

MG438
Business Model Innovation at the Base of the Pyramid

This information is for the 2015/16 session.
Teacher responsible: Professor Harry Barkema NAB4.24
Availability: This course is available on the MSc in Management, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are required to submit a 500-word statement explaining their motivation to take MG438, and a CV detailing their education or experience related to countries in poverty. Often the student will have worked in these countries with NGOs, social enterprises or charities; or studied courses related to development poverty or organizational models.

Course content: This course is about organisations serving social goals, in particular for the 4 billion people living in (extreme) poverty. It's about designing, implementing, managing and scaling innovative social enterprises, NGOs, government organisations – and ecosystems of them – addressing social issues such as job creation, income, health, education, and the intended and unintended transformations these organisations imply for clients, families, and communities.

We will discuss what poverty is and what its causes are, and then how social enterprises and other social businesses, NGOs, and government programs influence these causes, and why, and under which conditions. Insights from novel research are presented on how organisations interact with their social environment, and why, combining insights from management (incl. organisational behaviour, social networks and leadership), development and anthropology.

Half of the course consists of theory-based critical discussions, of innovative examples of social enterprises or NGOs and their social impact, in class and within our Facebook community, which includes hundreds of alumni of this course. In the other half of the course student groups do an in-depth research-based consulting project with one of our ecosystem partners, ranging from innovative start-ups (social enterprises or NGOs) to global companies such as IBM. Students go over for local data gathering. Many students also design their own innovative social enterprise, NGO or charity, and have gone on to compete in – and win – global competitions, and/ or start up in Africa, South Asia, and South America.

The 10 unit course leads to in-depth understanding through 10 class sessions, with additional training in relevant methodology for the fieldwork (data gathering and analysis) to build skills for evidence-based management consulting projects. This course has all the (5) lectures of MG437 but also lectures with new research outcomes on organisations and social transformations. Students complete an in-depth, research-based consulting project, while actually going over to the local social enterprise, NGO for fieldwork or to work with the local organisation for 7-10 days during the Christmas or Spring break.

Teaching: 30 hours of lectures in the MT. 24 hours of seminars in the LT. 6 hours of lectures in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One 1,200 word essay. Students choose one example of an innovative social enterprise, NGO government program or charity. Use theory underlying and developed in this course, and gathered by yourself, to analyse the strengths and weaknesses of the model in relation to intended or unintended social implications.

Assessment: Essay (45%, 2000 words), project (45%, 5000 words) and class participation (10%).

MG450
Half Unit
Social Network Analysis and Strategies

This information is for the 2015/16 session.
Teacher responsible: Dr Daniela Lup NAB3.28
Availability: This course is available on the MSc in Economy, Risk and Society, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main objective of this course is to introduce students to current research in the area of social network analysis and improve their understanding of how an effective network structure looks like. The course focuses on both theoretical and substantive themes within social network analysis. Substantive topics focus on everyday managerial situations and consulting projects such as: managing information and knowledge; managing one’s career; managing a team; selecting a business partner; using virtual networks; social media.

In addition, the course aims to familiarise students with methodological issues connected with social network analysis (SNA). To this end, the students will learn to work with UCINET, a software designed for SNA. During the classes, the students will solve concrete managerial and consulting problems using SNA. Examples include (but are not limited to): understanding the social network of a manager, proposing a strategy for implementing organisational change; understanding the power and fallacies of online networks; visualising power networks in specific industries; marketing applications.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write a 500 word comment
MG452 Half Unit
Behavioural Economics for Management

This information is for the 2015/16 session.

Teacher responsible: Dr Kristof Madarasz NAB5.36

Availability: This course is available on the MSc in Economics and Management, MSc in Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Graduate level Microeconomics, Game Theory or Managerial Economics, Graduate level Econometrics or Quantitative Analysis is required.

Course content: The course covers formal (mathematical) models of behavioural economics and discusses both experimental and field evidence that motivate and test various aspects of these models. This course is a post-graduate introduction to behavioural economics and strategy. The topics to be discussed are

2. Procrastination, Self Control and Choice over Time.
4. Processing Information and Mistakes in Cognition
5. Naivite and Heuristics in Strategic Thinking
6. Happiness and Welfare

Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG453 Half Unit Not available in 2015/16
Managing Digital Business

This information is for the 2015/16 session.

Teacher responsible: Dr Tony Cornford NAB3.29

Availability: This course is available on the MSc in International Management, MSc in Management, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course draws from the field of information systems to study underlying theories of digital business, strategies for using digital technologies and the moves towards new business models.

Topics covered include: the nature of digital business as a technology-enabled business model concept; digital business in the context of the global economy; technology, data infrastructures and platforms; developing a digital strategy; sourcing digital technologies and services; digital government and digital governance; the business logics of open and free; security, transparency, privacy and risk in digital business.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 3 hours of workshops in the LT.

Formative coursework: A 1,000 word literature review coursework provides guidance and feedback for the summative essay. In seminars students present on cases studies and research articles, lead group discussions, and receive feedback on presentation and substantive content.

Indicative reading:

Course content:

The course will provide you with insights into the foundations for leadership, how leadership skills can be developed, and you can create optimum environments for effective leadership and performance. Sessions will be interactive and participative. There will also be group exercises within the sessions to encourage debate and reflection upon how to put these concepts into practice.

Teaching: Six 4 hour sessions spread out over the three LSE modules.

The course will run between the following dates:

- 24 August - 5 September 2015
- 14-19 December 2015
- 4-16 April 2016

Formative coursework: There is an optional assignment that will provide an opportunity to reflect upon the leadership style and skills assessments covered in modules 1 and 2. This 1000-word assignment will discuss personal leadership style and skills, and will
MG455  Half Unit  
**Behavioural Decision Science for Management and Policy**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Barbara Fasolo  
**Availability:** This course is compulsory on the MSc in Management Science (Decision Sciences). This course is available on the MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management Science (Operational Research) and MSc in Risk and Finance. This course is available as an outside option to students on other programmes where regulations permit.  
**Pre-requisites:** An introductory mathematical course in Mathematics or Statistics.  
It is an advantage to have had an introductory social science course, in one of these fields: economics, management, psychology or sociology.  
**Course content:** This course develops your ability to make decisions or help others make better decisions, with the help of ‘system 1’ – the fast, intuitive and (before this course) automatic way our brain makes decisions, and evaluates others’ decisions. The aim is for you to become a better intuitive decision maker.  
In lectures, designed for aspiring decision scientists, we examine how behavioural decision science came about and review a number of descriptive theories of decision making. We also focus on empirical research on heuristics, biases, decision style and other phenomena which can unconsciously affect decisions. Because behavioural science started in the lab, the course includes a visit to the Behavioural Research Lab, to give you the experience (as researcher and participant) of what is behind the scenes of ‘behavioural science and insights’.  
In seminars which are uniquely designed for Master’s students you apply this research to personal, managerial or policy decisions.  
This is a course for students with a strong passion for behavioural science and a keen interest in the psychology of decision making and applications for management and policy. Lectures are taught at an advanced level, and experientially (e.g., in-class experiments) and expect interaction and exchange between advanced 3rd Year LSE Undergraduates and Master’s students who are in their first term at LSE, from diverse backgrounds and cultures. The course is also a natural complement, and preparation for, MG456, which aims at improving the other side of the decision-making brain – the slow and analytic ability to make strategic decisions via modelling and decision analytic techniques.  
**Teaching:** 18 hours of lectures, 9 hours of seminars and 2 hours of workshops in the MT.  
Students will have a 2 hour session in the Behavioural Research Lab. A reading week will take place in W6. There will be no teaching during this week.  
**Formative coursework:** Students will be expected to produce 1 essay in the MT.  
A 500-word essay plan for one long essay (to include a detailed plan, introduction, one full paragraph and conclusion). 2-3 pages of A4 maximum to be submitted at the beginning of reading week MT (week 6).  
**Assessment:** Essay (90%, 3000 words) in the LT.  
Coursework (10%, 500 words) in the MT.  
An essay of no more than 3,000 words to be submitted in week 7 of LT (90%)  
A 500-word report on the lab experience or experiment to be submitted in Week 11 of MT (10%)  
The essay will include two parts. In the first part (no more than 1,000 words), you will be asked to prepare a memorandum to the CEO of an organisation (be it public or private, an NGO, a business corporation or a third sector enterprise) giving a behavioural insight on some decision to make, or situation to improve, or goal to achieve. In the second part of the essay (no more than 2,000 words), you will justify the specific recommendations presented in the memorandum with reference to behavioural and decision science literature and theories. The first part of the essay will count for 25% of your mark while 75% will come from the second part.  

MG456  Half Unit  
**Risk and Decision Analysis for Management and Policy**  
This information is for the 2015/16 session.  
**Availability:** This course is compulsory on the MSc in Management Science (Decision Sciences). This course is available on the MSc in Management Science (Operational Research). This course is available as an outside option to students on other programmes where regulations permit.  
This course is complementary to any behavioural course offered at LSE.  
**Pre-requisites:** Elementary statistical and mathematical concepts and experience of standard computer software is assumed.  
**Course content:** A major characteristic of all decisions in every organisation is that they are taken to achieve objectives, both short-term and long-term. To do this well is a fundamental skill for managers at every level in the organisation. But decisions are often hard to make in the presence of multiple objectives, uncertainty about the future, and differences of opinion among key players. For decisions that require large amounts of resources and commitments, the weight of responsibility relied by the decision maker can be heavy, especially when the consequences require considered judgement about trade-offs between benefits, risks and costs.  
In this course students will learn how to use Risk and Decision Analysis as a form of analytics that supports decision making in private, voluntary and public organisations. The course shows how a consistent and realistic mix of data and judgement can help decision makers to better achieve their objectives. Based on sound theory underlying normative, descriptive and prescriptive decision-making research, the course emphasises the practical application of Risk and Decision Analysis for decision-making on any topic in any organisational setting.  
The course is designed to enhance the students’ decision capabilities when confronted with strategic or operational choices, when searching for decision opportunities, and when designing strategies and policies. It uses real-world Risk and Decision Analysis applications in organisations, and employs several case-studies (supported by specialised decision software) to build students’ skills in decision modelling and analysis. It covers modelling and supporting decisions involving multiple stakeholders and conflicting objectives (multi-criteria decision analysis, portfolio decision analysis and resource allocation problems) as well as uncertainty (decision trees, influence diagrams, and risk analysis).  
The course is suitable for third-year undergraduates and postgraduate MSc students, who will attend the same lectures but
different seminars. Past experience shows that both undergraduates and postgraduates benefit from asking questions and sharing their experiences in the interactive lectures.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Students will be expected to produce 3 exercises in the LT.

Feedback on Group Project Plan

**Assessment:** Project (50%) in the LT. Essay (50%) in the ST.

**Group Project (50%)** due week 11 of Lent Term 

**Individual Report (50%)** due Week 1 of Summer Term

---

**MG457 Foundations of Management 2 (modular)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Yally Avrahampour NAB 5.05

**Availability:** This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2015-2017 cohort.

**Course content:** This course is concerned with examining the relationship between governance and control in organizations. A strong emphasis is placed on the techniques used in assigning values to input into and outcomes of organizational processes. Amongst other issues, we will examine how firms’ financial condition is represented to external parties, how values are assigned to determine the magnitude of costs and how performance is measured. Each session will be concerned with investigating real life debates relating to the representation of issues relating to governance and the exercise of control. In common with Foundations 1, we will utilize the different disciplines informing management, that is, primarily economics, psychology and sociology to investigate the debate relating to the use of these techniques and to place these techniques in their historical and organizational context. Through this combination of technical, theoretical and historical perspectives we will systematically examine the complex relationship between governance and control in organizations. Each session will include a lecture introducing the topic and a case providing participants the opportunity to apply concepts relating to the topic.

**Teaching:** Eight sessions composed of lecture and case discussion spread out equally over two LSE modules.

- 24 August - 5 September 2015
- 14-19 December 2015

**Formative coursework:** These sessions will not be formally assessed, but support the integrated assessments.

**Indicative reading:** Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting

**Assessment:** This course will not be assessed.

---

**MG458 Half Unit Foundations of Management I**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Brittany Jones NAB 4.04

**Availability:** This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

**Course content:** This course is designed to equip students with a holistic understanding of the evolution of management theory and organisational forms and practices since the emergence of modern industrial organisations in the 19th century. Students will be provided with an overview of the development of management as a practice and as a subject of study, and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Within each field we will cover origins, disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate. Weekly topics cover:

1. Course Introduction and the Origins of Management
2. Management and the Firm
3. Taylorism, Motivation, and Performance
4. The Rise and Decline of Labour
5. The Rise of Human Resources Management
6. Decision Making
7. Understanding Organisational Structures
8. The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
10. Managed by Markets

**Teaching:** 15 hours of lectures, 15 hours of seminars and 15 hours of classes in the MT. 3 hours of lectures and 2 hours of classes in the ST.

Lectures will cover theoretical materials and concepts. Case discussions (classes) will apply content covered in lectures to a business situation.

Seminars will cover the assigned readings in more depth and develop critical thinking and writing skills for postgraduate study. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

A full reading list will be provided at the beginning of the course.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 1500 words) in the LT.
In class assessment (25%) in the MT.

---

**MG459 Half Unit Foundations of Management 2**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Yally Avrahampour NAB 4.37

**Availability:** This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

**Course content:** The aims of this course are to provide a basic
grounding in the management literatures covering disciplines relating to financial control, marketing and management science. Students will be provided with an overview of each discipline with the aim that they acquire a basic working knowledge of each. The course will cover origins and disciplinary boundaries, the foundations of these fields in the social science disciplines, core concepts, practical applications and current state of play and debate. Weekly topics include:

1: Making Business Decisions that Commit Capital
2: Representing a Firm’s Financial Condition: 1
3: Valuing and Managing Costs
4: Balanced Performance Measurement
5: Measuring Shareholder Value
6: READING WEEK
7: Representing a Firm’s Financial Condition: 2
8: Marketing 1
9: Marketing 2
10: Marketing 3
11: Origins of Management Science

Teaching: 20 hours of lectures and 30 hours of seminars in the LT.
3 hours of lectures in the ST.

Weeks 1-11: LT: 1 two hour lecture and 1 three hour case discussion, weekly. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Exam (75%, duration: 2 hours, reading time: 15 minutes) in the main exam period.
Essay (25%, 1500 words) in the ST.

MG460 Half Unit
Handling Disruption: Humanitarian Emergencies Management and Development

This information is for the 2015/16 session.

Teacher responsible: Prof Chrisanthi Avgouropoulou NAB 3.22 and Dr Shirin Madon NAB 3.31

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management, MSc in Management (CEMS MIM), MSc in Management of Information Systems and Digital Innovation, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course content is anchored on two observations: first, disasters and humanitarian emergencies are most frequent and most challenging and have the most devastating and long lasting socio-economic effects in poor counties with weak physical and institutional infrastructures. Therefore the course studies the management of emergency interventions in the broader context of socio-economic development. Second, information and communication technology (ICT) continues to open new possibilities for the mitigation, preparedness and response to disasters, but its effective use requires change in the collaboration of humanitarian organisations and affected communities. In this course we will examine critically the potential opened by ICT innovation for the handling of disruptions in the broader context of socio-economic development.

More specifically, the course will cover the following thematic areas: a) The challenge of humanitarian emergencies and our capacity to address it: the link of episodic emergencies and long term development; the potential of ICT to address problems and enable development; ICT innovation and the development of organisational capabilities for effective emergency action and socio-economic development.
b) Managing emergencies: emergency logistics and supply chains; ICT innovations in humanitarian emergencies and information systems infrastructures to address mitigation, preparedness and response. Case studies and readings will examine emerging topics such as crowdsourcing and geographic and geodetic intelligence.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

The formative essay is intended to help students explore available literature on the topic of their summative essay and give them feedback on how to proceed.

Assessment: Project (30%, 3000 words), essay (60%, 3000 words) and class participation (10%) in the LT.

MG461 Half Unit
Quantitative Analysis in Management

This information is for the 2015/16 session.

Teacher responsible: Prof Gregory Sorkin NAB 3.19

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is available on the MPhil/PhD in Employment Relations & Organisational Behaviour and MPhil/PhD in Management. This course is not available as an outside option.

Course content: Mathematical modelling and optimisation, particularly linear programming and sensitivity analysis. Introduction to probability including conditional probability, Bayes’ theorem, and essential distributions such as the normal and Poisson distributions. Monte Carlo simulation and Discrete Event Simulation. Decision Analysis, including probabilistic and probability-free approaches, using monetary value or utility. Analysis of Variance, simple and multiple linear regression, including ideas of confounding and statistical control, the use of dummy variables, interactions and non-linear effects of explanatory variables, collinearity, diagnostics and model development. Introduction to logistic regression modelling.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of class participation (10%) in the LT.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy.

Formative coursework: Weekly homework and quizzes with periodic formative feedback by Class Teachers. 250-word data analysis project.

Indicative reading: Anderson, D.R., Sweeney, Williams, and

Assessment: Exam (85%, duration: 2 hours) in the main exam period. Project (15%, 500 words) in the MT. The project is a 500-word data analysis project.

MG462  Half Unit

Qualitative Analysis in Management

This information is for the 2015/16 session.

Teacher responsible: Prof Jannis Kallinikos NAB 3.24

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MIM). This course is available on the MPhil/PhD in Employment Relations & Org Behaviour and MPhil/PhD in Management. This course is not available as an outside option.

The course is designed for MIM students who are likely to have little or no previous experience of qualitative methodologies.

Course content: This course provides MIM students with a critical understanding of qualitative management research and problem solving, with an emphasis on methods and techniques which will be useful and relevant to them in their future careers. A range of methods will be used and critically appraised, including case study research, ethnography, narrative analysis, and internet-based methods. The course will cover: research design; data collection; data handling techniques; methods of analysis; constructing a contribution; and authoring a research report. These are methods, skills and techniques which are used both formally and informally in academia, consultancy and the workplace.

Teaching: 15 hours of lectures and 9 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

Formative coursework: 500 word research proposal in LT. Classes are based around the critical analysis and practical application of methods and techniques introduced in the lectures and further explored through the readings. Formative feedback is provided during seminars.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the main exam period. Project (50%, 3500 words) in the LT.

MG463  Half Unit

CEMS Global Management Practice

This information is for the 2015/16 session.

Teacher responsible: Dr Hyun-Jung Lee NAB 4.04

Availability: This course is compulsory on the CEMS MIM. This course is not available as an outside option.

As a compulsory course for the CEMS MIM : Master’s in International Management this course is available only to, and compulsory for, those students on the CEMS MIM programme.

Pre-requisites: It is assumed that the students have already taken introductory Organisational Behaviour or Global Business courses. The 2nd year Master’s in Management students are offered these prerequisites during their 1st year.

Course content: This course aims to answer the question "How internationally operating companies such as multinational companies (MNCs) build efficient and effective organisations in order to realise the company's international objectives?" The focus of the course is on cooperation and management in an international context. Topics include the contemporary MNC people management issues taken from the fields of cross-cultural management, international human resource management, and international organisational behaviour.

Teaching: 30 hours of lectures in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Essay (40%, 2000 words), project (40%) and class participation (20%) in the LT.

MG464  Half Unit

CEMS Global Business Principles

This information is for the 2015/16 session.

Teacher responsible: Prof Paul Willman NAB 4.18 and Dr Brittany Jones NAB 4.04

Availability: This course is compulsory on the CEMS Exchange. This course is not available as an outside option.

This course is compulsory for, and only available to, visiting CEMS students.

Course content: The course examines how firms shape their international strategies, examining the processes, planning techniques and tools for strategic analysis, strategy formulation and implementation in a global setting. It examines the challenges and opportunities in the global environment. It focuses on cross-border competition and the interaction between globalization and corporate social responsibility. It looks at how companies differ across countries and how we can extend our understanding of defining and assessing the quality of a firm’s international competitive strategy in different institutional contexts.

Teaching: 30 hours of lectures in the MT. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Assessment: Essay (40%, 2000 words), project (50%) and class participation (10%) in the MT.

For the group project the total mark (50%) will be comprised of 40% from group mark, with an additional 10% from peer review scores of individual contribution.
**MG472  Half Unit**

**Global Strategy, Management and Information Systems (formerly IS472)**

This is the 2015/16 session.

**Teacher responsible:** Prof Leslie Willcocks NAB3.23 and Dr Stephen Smithson NAB3.31

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A basic understanding of business strategy and management and a basic knowledge of information and communication technologies. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations. A short study pack of selected readings will be provided for students who require this background understanding.

**Course content:** The main focus of this course is to examine contemporary global strategies and management practices of corporations and government agencies across the world. In the context of Ghemawat calls ‘semi-globalization’ we examine how to analyse corporate and business strategies, competitiveness, and how organizations set up and manage structures, processes, human resources, and technologies to deliver on their objectives. Following through on this theme and context the course focuses more specifically on the social, managerial and political issues involved in the introduction and operation of information and communications technologies in organisations. The course analyses critically the opportunities and risks attached to the development and utilisation of information and communications technologies in contemporary organisations. The aim is to educate and inform future managers about strategy, management and information systems in the context of increasing globalization, and to establish the key choices and practices impacting on organizational and individual performance. Case studies are used to demonstrate the key issues.

Topics covered include: Global strategic management; corporate and business level strategies; industry competition; competing through resources and capabilities; value creation; management functions, IS strategy and sourcing; IS projects, risk management and organisational change; role and governance of the IS function; IT-enabled business process (re)design; infrastructure; business and IS evaluation.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST. A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Classes are based around reading and discussing selected journal articles from the course study pack. Formative feedback is provided on class participation. A mock examination, with questions from IS470, IS471 and IS472 is held in January.

**Indicative reading:** M. Peng (2011) Global Strategic Management. South Western, New York

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**MG473  Half Unit**

**Negotiation Analysis (formerly ID433)**

This is the 2015/16 session.

**Teacher responsible:** Prof John Kelly

**Availability:** This course is available on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management and Strategy, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Also available as an option to students on the MPhil/PhD in Management: Employment Relations and Organisational Behaviour.

**Course content:** This course adopts an interdisciplinary perspective to analyse negotiations, covering ideas and approaches psychology, employment relations and economics. These approaches highlight the importance of power, tactics, strategy, information and trust in shaping the structure and outcomes of negotiations. The first part of the course covers twokey facets of bargaining, distributive and integrative bargaining, sometimes called pie-slicing and pie-expanding approaches. The second part examines the impact of culture, the value of game theory, the psychology of judgement and decision-making and the sociological concepts of frame and framing.

**Teaching:** 10 hours of lectures and 20 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students, individually or in groups, will be asked to make presentations and participate in negotiation exercises.

**Indicative reading:** The main text, covering most of the material in the course is: Leigh Thompson. The Mind and Heart of the Negotiator, 6th edn, Pearson, 2014. The following are also useful: Roger Fisher and William Ury, Getting to Yes: Negotiating Agreement Without Giving In, Penguin Books, 1981; Max Bazerman & Margaret Neale, Negotiating Rationally, Free Press 1992; and G.Richard Shell, Bargaining for Advantage, 2nd edn, Penguin, 2006. Students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

**Assessment:** Exam (90%, duration: 2 hours) in the main exam period.

Class participation (10%).

Students on the MSc in Management (CEMS MIM) programme will be assessed by a formal two-hour examination (90%) and class participation (10%) at the end of Michaelmas term.

---

**MG474  Half Unit**

**Not available in 2015/16**

**Managing Diversity in Organisations**

This is the 2015/16 session.

**Teacher responsible:** Dr Tanya Beauregard NAB4.14

**Availability:** This course is available on the MPhil/PhD in Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The primary aim of the course is to develop students’ understanding and critical awareness of issues associated with managing a workforce characterised by diversity in age, gender, race, religion, disability, and sexual orientation. The course endeavours to combine academic rigour with a practical focus.
on promoting equality, diversity and inclusion in the workplace, enabling students to both develop a critical understanding of relevant theoretical and empirical literature and apply acquired knowledge to specific diversity management scenarios. Seminars will require participation in group exercises designed to enhance students’ appreciation of the wide range of issues associated with categorizing individuals as members of different groups, on whatever basis.

Students will become familiar with the drivers of increased workforce diversity, the psychological and sociological theories underlying discrimination and exclusion in organisations, current employment legislation related to diversity in the UK, and the barriers to equality of opportunity in the workplace for minority groups. The emphasis of the course will be on demographic diversity in the context of work organisations, in order to avoid overlap with existing offerings from other departments. Students will examine "best practice" in diversity management programmes and learn to critically assess organisational policies and practices for managing workplace diversity with regard to their ability to enhance organisational performance and avoid costly litigation.

**Teaching:** 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

**Formative coursework:** Students are required to submit a two-page essay outline.

**Indicative reading:** A full reading list will be provided at the beginning of the course. Key texts include: Kirton, G., & Greene, A-M. (2010). The dynamics of managing diversity: A critical approach (3rd ed.). London: Elsevier.

**Assessment:** Essay (30%, 1800 words) and class participation (10%).

1. Take home exam (60%) in the ST.

---

**MG475  Half Unit  Organisational Theory (formerly ID435)**

*This information is for the 2015/16 session.*

**Teacher responsible:** Dr Daniel Beunza NAB 4.27

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit. Also available as an option to students on the MPhil/PhD in Management: Employment Relations and Organisational Behaviour.

**Pre-requisites:** Any social science background.

**Course content:** Corporate Social Responsibility (CSR) is becoming an expected element of business strategy. This course critically evaluates CSR from a number of perspectives, drawing on material from a variety of different disciplines. Students analyse the emergence of CSR, its theoretical basis, the business case for the adoption of CSR programmes, as well as the social impacts of such policies. The opening lectures of the course focus on globalisation and international labour standards, and provide an understanding of how CSR relates to international regulatory institutions such as the International Labour Organisation. Subsequent lectures focus on the different aspects of CSR mentioned above, as well as topics such as comparative CSR. In terms of the impact and design of CSR policies, the course mainly focuses on issues relating to labour standards, but supplementary material on sustainability is also included. As well as traditional academic readings and case studies, students will critically examine publically available material such as corporate policies and reports. Seminars will follow a mixture of formats including group activities and presentations. The course will include one lecture from a CSR professional.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

**Formative coursework:** One 2,000 word essay in LT.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period. Essay (35%, 2000 words) and class participation (5%).

---

**MG476  Half Unit  Corporate Social Responsibility and International Labour Standards**

*This information is for the 2015/16 session.*

**Teacher responsible:** Prof Sarah Ashwin NAB 4.19

**Availability:** This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Human Rights and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Any social science background.

**Course content:** Corporate Social Responsibility (CSR) is becoming an expected element of business strategy. This course critically evaluates CSR from a number of perspectives, drawing on material from a variety of different disciplines. Students analyse the emergence of CSR, its theoretical basis, the business case for the adoption of CSR programmes, as well as the social impacts of such policies. **Teaching:** 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

**Formative coursework:** One 2,000 word essay in LT.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period. Essay (35%, 2000 words) and class participation (5%).
where regulations permit.

**Course content:** The course will provide an analysis of the types of reward systems commonly used in private and public sector organisations, drawing on economic, psychological and sociological principles, covering all-employee reward, senior executive reward, fixed pay, short-term incentives, long-term incentives, benefits and pensions.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be required to prepare a 1,500 word briefing note in advance of the case study session (week 8) and will receive feedback on their understanding of the issues.

**Indicative reading:** Course text books:

General reading

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period.

*Essay (25%, 2000 words).*

Class participation (10%) in the LT.

**MG479 Half Unit**

**Information Systems for the Public Sector: Digital Government and Service Innovation (formerly IS479)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Antonio Cordella NAB3.30

**Availability:** This course is available on the MSc in Human Resources and Organisations and the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Also available as an option to students on the MPhil/PhD in Information Systems for the Public Sector: Employment Relations and Organisational Behaviour.

**Course content:** This course examines the human resource management (HRM) and employment relations (ER) strategies of global corporations, with the aim of understanding both the causes of different strategic choices and the consequences of these strategies for diverse stakeholders. It takes the perspective that HRM/ER strategies are influenced by a range of variables, including internal business strategy and resources, as well as external factors such as national legislation, business systems and culture, and regional and global institutions.

In the course modules, we will:

- Analyze how international mergers and acquisitions.
- Analyze how government and corporate strategy affect compensation strategies and employee participation policies – as well as the implications of these policies for economic inequality and employee well-being.
- Analyze the factors shaping different patterns of migration and discrimination.
- Evaluate how regional institutions such as the European Union and multilateral institutions such as the ILO affect the HRM/ER strategies and policies of global firms.
- Examine how consumer pressure, coupled with corporate social responsibility programs, encourage global firms to extend their HRM/ER policies to their supply chain.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One 2,000 word essay during Lent Term and one class presentation.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

---

**MG478 Half Unit**

**Globalisation and Human Resource Management (formerly ID438)**

This information is for the 2015/16 session.

**Teacher responsible:** TBA

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Also available as an option to students on the MPhil/PhD in Information Systems for the Public Sector: Employment Relations and Organisational Behaviour.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Indicative reading:

MG480 Half Unit
Management of Human Resources: Strategies and Policy (formerly ID410)
This information is for the 2015/16 session.
Teacher responsible: Dr Jonathan Booth NAB4.20
Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.
Course content: The course examines central issues pertinent to the theory and practice of Human Resource Management (HRM). It introduces students to a range of theoretical perspectives which underpin the ways in which organisations manage the employment relationship through the deployment of HRM strategy and policy. From a practice perspective, it reviews challenges involved in the design, implementation and evaluation of both overall HRM strategy and specific practice areas. In this respect we review HR policy and practice in the areas of recruitment and selection, training and development, job redesign, engagement, retention and attribution, employee relations, conflict and voice, pay and rewards, performance management and appraisal, and strategic HRM.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Assessment: Exam (60%, duration: 2 hours) in the main exam period.
Essay (40%, 1500 words) in the LT.

MG481 Half Unit
Innovating Organisational Information Technology (formerly IS471)
This information is for the 2015/16 session.
Teacher responsible: Dr William Venters NAB3.13
Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the MSc in Management, MSc in Management (CEMS MIM), MSc in Management Science (Decision Sciences) and MSc in
Management Science (Operational Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic knowledge of computing, including hardware and software. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations. A short study pack of selected readings will be provided for students who require this background understanding.

Course content: The course provides students with a practical and theoretical insight into the processes and practices of developing contemporary Information Systems. The course reflects the diversity of contemporary information systems contexts; discussing how we should manage the development of complex Internet enabled systems and services. The course focuses on new technologies and practices including cloud and grid computing, open-source development, software as a service, web2.0 mashups, mobile and ubiquitous information technology, technology to support knowledge work, innovating customer relationship management, mediating mutual adjustment and mass-scale mediated communities. The changing architectures of information systems towards an Internet based cloud are key themes of the course. Attention is however also given to the development of traditional ERP and information management systems which remain important in enterprises. Particular attention is given to problem structuring and problem design issues within such complex settings using Soft Systems Methodology and the Unified Modeling Language as a toolkit. Agile methods form a core part of the teaching, with Extreme Programming, Rapid Application Development and Internet-speed development contrasted with development formalism such as the Rational Unified Model and Capability Maturity Models. To ensure that students gain practical experience we include a two-week intensive “bootcamp” group project in which outside consultants present a “real-world” case study of systems development and the groups undertake to rapidly analyse and design a proposal for a technical solution. This allows students to support their theoretical understanding with a strong practical experience of the pressures and difficulties of systems development today. The “bootcamp” group project provides a realistic experience of developing systems within a consulting role, and is supported by classes and question and answer session and online discussion. Students gain an understanding of the benefits and difficulties of working within a small team under pressure.

Teaching: 20 hours of lectures, 5 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST. A reading week will take place in Week 6. There will be no teaching during this week.

Formative coursework: Students discuss articles, practice systems development techniques, and critically evaluate their success. Formative feedback is provided on class participation. There is also a mock exam in January shared with IS470 and IS472.

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Project (50%) in the MT. A two-hour unseen examination taken in the ST (50%). The team ‘boot camp’ project in the MT (50%).

MG482 Half Unit Innovation and Technology Management

This information is for the 2015/16 session.

Teacher responsible: Dr Jonathan Liebenau NABS.14 and Mr Dimitris Boucas

Availability: This course is available on the MSc in Management, MSc in Management of Information Systems and Digital Innovation and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems.

Topics include: technology and entrepreneurship, strategy, R&D management, patents and intellectual property, disruptive technologies, project escalation, technological disasters. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 20 hours of lectures and 16 hours and 30 minutes of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies available on or through the course Moodle site. Formative feedback is provided on class participation. In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Assessment: Essay (80%, 5000 words) in the LT. Presentation (20%) in the MT.
This information is for the 2015/16 session.

Teacher responsible: Dr Anthony Cornford NAB3.29 and Dr Elzbieta Klecun-Taylor NAB3.37

Availability: This course is available on the MSc in Health, Population and Society, MSc in International Health Policy and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: None, but a basic understanding of sourcing principles and of management in organisations is useful. A short study pack of selected readings will be provided for students who require this background understanding.

Course content: The course focuses on global sourcing strategies and practices of corporations and government agencies. It examines these in Europe, Americas and Asia Pacific in the context of increasing globalization of organizational intent, capabilities and sources of service supply. The course provides an understanding of how international business is pursued, convergence and differences across organizations and countries, business strategies and ‘fit’ with IT governance and sourcing approaches, and how sourcing of business and IT services is managed, focusing especially on outsourcing and offshoring decisions and implementation.

Teaching: 20 hours of lectures and 9 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles and teaching cases from the course study pack. Formative feedback is provided on weekly class preparation and participation. There is a mock examination.

Indicative reading:

Assessment: Exam (100%, duration: 3 hours) in the main exam period.
MG486  Half Unit
Social Computing, Data and Information Services (formerly IS418)

This information is for the 2015/16 session.

Teacher responsible: Prof Jannis Kallinikos NAB3.24 and Miss Cristina Alaimo

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Management of Information Systems and Digital Innovation, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is about the direction the development of the Web is currently taking via the growing use of social technologies. The course examines in detail the anatomy of social networking sites or social medial platforms and the forms by which they organize online participation. Social networking sites or media platforms are commonly seen as sites in which social relationships are built and developed. But they are also complex information infrastructures in which social communication and interaction are captured and recorded in forms that allow data about individuals and groups to be aggregated and commercialized. Commercialization occurs through a series of recommendation and personalization strategies that detect trends on the Web and construct affinities between individuals and groups. Understanding therefore the commercialization of online participation requires the in-depth analysis of the operations by means of which social media platforms procure, standardize and organize data and information. It also makes necessary to understand social media platforms as complex information infrastructures in which component technologies, standards and data practices interact with social and market forms to produce particular outcomes.

Teaching: 20 hours of lectures and 9 hours of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course study pack. Written formative feedback is provided on weekly class preparation and participation.

Indicative reading:
MG487 Half Unit

Innovation and Information Systems: Concepts and Perspectives (formerly IS470)

This information is for the 2015/16 session.

Teacher responsible: Prof Chrisanthi Avgerou NAB3.22

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course explores the theoretical foundations for the study of organizational and social innovation and the paradigms for innovation and organisational systems in such change. It integrates concepts and perspectives of innovation from a range of disciplines. In completing this course students should be able to draw critically from existing theories in order to address issues of technology-based innovation, organisational change and information systems management.

The lectures cover literature related to three broad themes: innovation and organisational change; information technology and organisational change; and information technology innovation and socio-economic change. For each of these themes we identify and discuss relevant theoretical concepts and perspectives. The discussion of theories is structured in terms of technical/managerial and socially embedded approaches.

In addition we provide five formative sessions on essay preparation.

Teaching: 10 hours of lectures, 18 hours of seminars and 5 hours of classes in the MT. 1 hour of lectures in the ST.

A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course study pack. Formative feedback is provided on class participation.

In addition, students will complete a formative essay of 2000 words on which feedback will be provided.

A mock examination, with questions from MG472, MG481 and MG487 is held in January.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 3000 words) in the MT.

MG488A MiM Capstone Course - Management in Action

This information is for the 2015/16 session.

Teacher responsible: Dr Emma Soane NAB4.02 and Dr Rebecca Newton

Availability: This course is compulsory on the MSc in Management and MSc in Management (CEMS MiM). This course is not available as an outside option.

Course content: The MiM Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the MSc Management’s first and second years. The MG488A programme follows comprises ten Capstone lectures. Capstone lectures run fortnightly in MT and LT, and will include sessions led by guest speakers from a range of organisations. Lectures will cover a range of topics including leadership, strategy and entrepreneurship. All lectures will contribute to the overall goal of a deeper understanding of how to apply theory to practice.

The remaining five sessions per term comprise optional one to one meetings with a member of the Capstone team from the Department of Management to discuss issues relating to Capstone lectures. In addition to attending sessions, in the first year, each student is assigned to a group of approximately 5 students. Each group will produce a blog on one of the Capstone lecture topics. A schedule for the group blogs will be made available at the start of the first year. Each group will receive feedback on their assignment. There will also be one 30-minute session for each blog group to discuss the development of their blog with a member of the Capstone team.

In the second year, students will attend session(s) that will introduce the term’s business projects. Students are also encouraged to attend at least one business project presentation by another team.

Second year students apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start term of students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors (“self-sponsored projects”) or of
developing a viable business plan for an entrepreneurial idea ("entrepreneurial business projects"), although these options must be agreed in advance with the faculty member responsible for business projects to ensure their suitability.

**Teaching:** 7 hours and 30 minutes of lectures and 7 hours and 30 minutes of help sessions in the MT. 7 hours and 30 minutes of lectures and 7 hours and 30 minutes of help sessions in the LT. MiM Capstone Lectures run once a fortnight throughout the Michaelmas and Lent Terms. First year students are expected to attend all sessions. Second year students may choose to attend relevant sessions.

Students on this course will have a reading week in Week 6 of MT and week 6 of LT, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

Students will produce an individual essay which considers the links between theory and practice. Essays will be submitted in LT of the first year.

**Indicative reading:** Recommended readings will be provided for each Capstone lecture.

**Assessment:** Essay (25%, 2000 words) in the LT. Project (65%) in the MT and LT.

Class participation (10%) in the MT and LT.

Attendance at Capstone lectures - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2 students will write an academic essay on one of the Capstone lecture topics, and must consider application of management theory and practice. Students will submit their essays in LT of the second year.

Group Business Project - 65% of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Of the 65% assessed on the Business project, 5% will comprise an individual mark based on a confidential intra-group peer evaluation exercise. Presentations for students working on their business projects in LT take place during LT. Presentations for students working on their business projects in the LT take place in the first two weeks of ST.

---

**MG488B Half Unit**

**MiM Capstone Course - Management in Action**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Emma Soane NAB4.02 and Dr Rebecca Newton.

**Availability:** This course is compulsory for the MiM in Management and MSc in Management (CEMS MIM). This course is not available as an outside option.

**Pre-requisites:** Students must have completed MiM Capstone Course - Management in Action (MG488A).

**Course content:** MiM Capstone Course aims to build connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the MSc Management's first and second years and forms the programme's capstone course.

First year students are prepared for MG488 by attending bespoke sessions led by the LSE Careers team during the programme pre-sessional course. The MG488 programme that follows will run five guest-speaker led sessions for each of MT and LT. The remaining five sessions per term will comprise one to one meetings with a Careers Consultant or a member of the Capstone team from the Department of Management.

Sessions will cover a range of topics, each of which will contribute to the overall goals of a successful business project, and enhanced employability. Guest speakers will include MSc Management alumni and representatives from organisations that offer business projects. Additional guest speaker and one to one sessions can be added to the curriculum if there is sufficient demand. There will also be two sessions about business projects in each of MT and LT specifically for second year students.

Second year students apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start term of students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors (“self-sponsored projects”) or of developing a viable business plan for an entrepreneurial idea (“entrepreneurial business projects”), although these options must be agreed in advance with the faculty member responsible for business projects to ensure their suitability.

**Teaching:** 7 hours and 30 minutes of lectures and 7 hours and 30 minutes of help sessions in the MT. 7 hours and 30 minutes of lectures and 7 hours and 30 minutes of help sessions in the LT. MiM Capstone Course Lectures run once a fortnight throughout the Michaelmas and Lent Terms of both the first and second years.

Students on this course will have a reading week in Week 6 of MT and Week 6 of LT, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the MT or LT.

Students will have the option of carrying out formative assignments to help them prepare for their individual summative assignments. Students working on business projects in MT will submit their formative course work in MT. Students working on their business projects in LT will submit their formative course work in LT.

**Indicative reading:** Recommended readings will be provided for each Capstone lecture.

**Assessment:** Project (60%).

Essay (20%, 1000 words) in the MT and LT.

Other (20%) in the MT and LT.

Attendance at Management Practice Seminars - 20% of total course marks. Students are required to attend at least 12 sessions over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities and group work in order to receive attendance credit. One to one appointments with LSE Careers Consultants do not count towards session attendance.

Individual Summative Assignment – 20% of the total course marks. In year 2 students will be given the choice of writing: (a) a reflective note and action plan based on their personal development programme; (b) a reflective note specifically addressing what they have learnt from the business project, or; (c) an academic essay on a topic which addresses the relationship between management theory and practice. Students working on their business projects in MT of year 2 submit their individual summative assignments in LT. Students working on their business projects in LT submit their individual summative assignments in ST.

Group Business Project - 60% of total course marks. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Of the 60% assessed on the Business project, 10% (i.e. 10/60) will comprise an individual mark based on a confidential intra-group peer evaluation exercise. Presentations for students working on their business projects in MT take place during LT. Presentations for students working on their business projects in the LT take place in the first two weeks of ST.
MG492  Half Unit  
Data Governance: Privacy, Openness and Transparency (formerly IS489)  

This information is for the 2015/16 session.

Teacher responsible: Dr Edgar Whitley NAB3.32  
Availability: This course is available on the MSc in Management of Information Systems and Digital Innovation, MSc in Media and Communications (Data and Society) and MSc in Public Management and Governance. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides a detailed consideration of the key elements of the concept of informational privacy, the open data movement and transparency. These topics lie at the intersection of diverse contemporary issues including, public sector reform, human rights, digital ecosystems and social networking, and the global and national regulation of business. The course content is international in focus, and reviews contemporary issues arising from new technologies, new policies of governments, new practices and business models in the private sector. Topics include personal privacy and identity systems; motivations for information sharing and transparency and its potential for driving beneficial change; transformations in the management of government information and processing practices; the technological and regulatory challenges faced by public sector and business; the protection of sensitive personal data including medical and financial information; data-mining in the context of national security and anti-terrorism policies; communications surveillance policies; behavioural studies of privacy attitudes and the evolution of trust and consent in online environments. The course enables students to develop their understanding of the challenges presented by new informational regimes, their regulatory development and emerging governance structures.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place during Week 6. There will be no teaching during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course study pack. Formative feedback is provided on class participation. In addition, students will complete a formative essay plan on which feedback will be provided.

Assessment: Coursework (20%, 800 words) and essay (70%, 5000 words).

Class participation (10%) in the LT.
10% class participation.
20% 800 word “blog” article that summarises the key argument of the research essay.
70% 5000 word research essay on an approved topic.

MG493  
Developing Professional Research and Employability Skills (formerly ID493)  

This information is for the 2015/16 session.

Teacher responsible: Ms Carolyn Lewis  
Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour).

This course is not available as an outside option.

Course content: This course introduces students to the key professional competencies necessary in human resource management such as team-building and communication skills. Students are exposed to practical human resource management systems and issues through interactive sessions and guest speakers. Students are also introduced to the dissertation, research methods, and Links programme. Part of the assessment includes a group project which students will work on throughout MT and LT.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT.

Each 3-hour session will include a combination of lecture and seminar activities (e.g. small group discussions). Students are expected to prepare for and participate fully in each session.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write a board report in MT and give an interim presentation of their group project in LT.

Assessment: Dissertation (85%) and project (15%).

MG494  
Term Abroad - MSc in International Management  

This information is for the 2015/16 session.

Availability: This course is compulsory on the MSc in International Management. This course is not available as an outside option.

Pre-requisites: The term abroad is for MSc in International Management students only.

Course content: The term abroad is for students on the MSc in International Management programme only. The term abroad is a compulsory component for students on this degree; students spend one term at one of our exchange partner schools in the US or China. These students are not at the LSE during the Lent term.

Students participate and take courses from the second year of the exchange Business Schools MBA programme. The number of courses taken during the exchange varies depending on the School overseas which will verify the minimum and maximum number of courses you are expected to take to fulfil the term abroad requirements.

Teaching: Students will receive teaching at one of the exchange partner schools in the US or China.

Assessment: Students will be assessed according to the local arrangements for each course taken during the term abroad. The term abroad is worth one unit of the MSc International Management degree.
MG495

**Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jorn Rothe NABS.01

**Availability:** This course is compulsory on the MSc in International Management. This course is not available as an outside option.

**Course content:** The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a supervisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

**Teaching:** Dissertation supervisors are allocated early in the Lent Term and are available for consultation until the end of July. Details about the process of writing the dissertation will be provided in Michaelmas Term.

**Assessment:** Dissertation (100%, 10000 words).

---

MG496

**Study Skills and Research Methods**

(formerly IS490)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stephen Smithson NAB3.31 and Dr Elzbieta Klecun-Taylor NABS.37

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

**Course content:** This course provides students with both a broader context for the study of information systems as well as the essential skills relevant to the MISDI programme. Various views of the changing nature and environment of information technology. Research and study skills, team working and other practical skills. Guidance for the dissertation. Seminars by various visiting speakers from academia and industry who discuss a wide range of issues relevant to contemporary information systems.

**Teaching:** 20 hours of lectures in the MT. 20 hours of lectures in the LT.

**Indicative reading:**

**Assessment:** The course is not formally assessed.

---

MG497

**Half Unit Dissertation**

MSc Management and Strategy

(formerly MN497)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jorn Rothe NABS.01

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

**Course content:** The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a supervisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

**Teaching:** There will be two introductory meetings, the first will set out the requirements for the dissertation, the process, caution of plagiarism, etc. The second meeting will allow students to approach staff with preliminary ideas, mainly with a view to set up subsequent one-to-one meetings.

**Assessment:** Students will receive feedback on a preliminary proposal (to be submitted by the end of Michaelmas Term) and will be allocated a dissertation supervisor, under whose guidance they will complete a detailed project proposal by the end of Lent Term. Students work on their dissertation over the summer, with supervision available until the end of the Summer Term.

**Assessment:** Dissertation (100%, 6000 words) post-summer term.

---

MG499

**Half Unit Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Gwyn Bevan

**Availability:** This course is compulsory on the MSc in Public Management and Governance. This course is not available as an outside option.

**Course content:** The dissertation requires students to undertake a supervised writing project relevant to the degree. The purpose is of the project is to allow students to demonstrate their ability to contribute to research knowledge in the field or to apply the skills of formal study to a practical problem.

**Teaching:** 2 hours of lectures in the MT.

**Availability:**

- MT: One session that will explain the objectives and requirements of the dissertation and outline possible topics.
- LT: Students are required to choose a topic by the start of Lent term when there will be lectures on methods and individual supervision.
- ST: Individual supervision which ceases at the end of the summer term.

**Formative coursework:** Each student will be required present an outline of the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students at the end of the Summer Term.

**Assessment:** Dissertation (100%, 6000 words) post-summer term.

---

MG4A1

**MSc Management pre-sessional:**

Skills Preparation for the MiM

This information is for the 2015/16 session.

**Teacher responsible:** Dr Brittany Jones NAB 4.04, Dr Nuno Barros-De-Oliveira NAB 3.20 and Prof Alexander Pepper NAB 4.30

**Availability:** This course is compulsory on the MSc in Management and MSc in Management (CEMS MiM). This course is not available as an outside option.

**Course content:** The course is divided into four separate subjects: Basics of Accounting, Statistics, and Quantitative and Writing Skills for Postgraduates. The Statistics course is for all students and covers basic probability and statistics, hypothesis testing; analysis of variance; association, correlation and regression. The Basics of Accounting sessions will equip students with the basic skills to read a set of accounts, and to understand the issues covered in the financial press. It is intended that this will help students to adapt more quickly to the demands of case study preparation and for courses where accounting basics are helpful. Students in the final portion of the course can opt for one of two options: Quantitative Skills, or Writing Skills for Postgraduates. The Quantitative portion of the course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Natural Logarithm, Comparative Statics Analysis.
The Writing Skills sessions are intended to help students who have backgrounds outside the social sciences and humanities make the transition to postgraduate work. Topics covered will include identifying and making an argument and the fundamentals of essay writing.

**Teaching:** 30 hours of lectures in the three weeks prior to the Michaelmas Term. There will also be some workshops and tutorial sessions for the statistics portion of the course, to support students preparing practical exercises.

**Assessment:** No formal assessment. Students will sit a mock exam at the end of the statistics course based upon the material to aid learning.

MG4A2 Half Unit
Operational Research and Decision Science in Practice (formerly OR432)

**This information is for the 2015/16 session.**

**Teacher responsible:** Mr Keith Rapley NAB 3.38, Prof Lawrence Phillips NAB 3.38 and Prof Jonathan Rosenhead NAB 3.38

**Availability:** This course is available on the MSc in Management Science (Decision Sciences) and MSc in Management Science (Operational Research). This course is not available as an outside option.

**Course content:** This course focuses on the key skills needed to be an effective practitioner in Operational Research (OR) and Decision Sciences (DS), and the structured approaches available for formulating (as opposed to solving) problems of complexity, uncertainty and conflict. It is designed to complement the technical methods introduced in the operational research and decision science compulsory courses with both facilitation and process skills, and methods for handling ‘wicked’ problems. Students will acquire an appreciation of the different conditions under which OR & DS applications take place in practice, and the skills and methods that are needed to make effective interventions in the decision making of organisations. The history and development of OR & DS, as well as its current practice, will be examined to identify key issues affecting the practice of OR & DS and the role of the OR and DS consultant. Students will identify different kinds of organisation in which OR & DS make important contributions. The structure of these organisations will be studied together with organisational behaviours. The nature of decision making at both the strategic and operational levels will be examined. Students will be provided with an opportunity to explore their own work preferences enabling them to understand how they can best contribute to a work group so it becomes a high-performing team. Students will be introduced to the range of participative problem structuring methods appropriate to problem situations with multiple stakeholders facing uncertainty and conflicting objectives. These methods are aimed at developing a shared view of the problem among the clients, and a joint commitment to action. Students will have opportunities to develop their skills in problem structuring, and to identify the contributions that they can make when working in teams as well as individually.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

**Formative coursework:** There will be opportunities in MT to provide answers to test examination questions.

**Indicative reading:** Rational Analysis for a Problematic World Revisited. Rosenhead & Mingers, Wiley, 2001

**Process Consultation Revisited:** Building the Helping Relationship. Schein, Reading, MA: Addison-Wesley, 1999

**Additional reading matter will be issued for specific sessions.**

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2500 words) in the ST.

MG4A3 Half Unit
Incentives and Governance in Organisations (formerly MN404)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Catherine Thomas NAB5.27

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in International Management, MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit.

Note this course may be capped if student numbers become too high.

**Pre-requisites:** A knowledge of Mathematics and Economics.

**Course content:** The course uses economic theory to gain insight into issues related to internal organisation and management of firms. The course will draw on various disciplines including management science, industrial organisation and microeconomics.

The course deals with three main topics: (i) the provision of incentives in organisations, (ii) the use of information in markets and firms, and (iii) the theory of financial decisions. A major theme concerns the question of how to provide incentives efficiently in organisations. Other important themes include efficiency, coordination, incompleteness of contracts and the use of the market versus internal exchange. A section of the course deals with financial theory. The implications of asymmetric information are examined. Corporate governance is discussed in a principal-agent framework.

**Teaching:** 20 hours of lectures and 8 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

MG4A4 Half Unit
Empirical Research Strategy for Managerial Economics (formerly MN434)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Yona Rubinstein NAB5.31

**Availability:** This course is available on the MSc in International Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course addresses the link between a research question, the nature of the available data, the appropriate statistical and econometric methods and the interpretation of the empirical findings.
Using datasets from current research in managerial economics, the course will explain how conceptual ideas are transformed into an empirical research project, and how this project is then implemented.

Topics will include:
1. The statistical modelling of research questions;
   (formulation, reduced forms and structural parameters of interest)
2. Identification in controlled experiments;
3. Identification strategies in observational data:
   a. cross section: instrumental variables, regression discontinuity design;
   b. panel data: fixed and random effects models, differences-in-differences
   c. sample selection: structural models and non-parametric approach

Teaching: 20 hours of lectures in the LT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: One formative essay (review of an empirical paper, 1000 words), one problem set, mock exam.

Indicative reading: Books:
Assessment: Exam (60%, duration: 2 hours) in the main exam period.
Essay (40%, 1000 words).

MG4A6 Half Unit

The Analysis of Strategy B (formerly MN416)

This information is for the 2015/16 session.

Teacher responsible: Dr Jorn Rothe NAB5.01

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed The Analysis of Strategy A (MN415).

Course content: In this course we continue, deepen and extend the analysis of strategy. The success of a firm depends on the decisions it makes, and these decisions have to take the behaviour of competitors into account who themselves try to make optimal decisions. Thus the firm faces a problem of strategic interaction, and game theory takes this interaction consistently into account. This course aims at a strategic understanding of these situations and the decisions firms face. We will study general principles of strategic thinking, the application of these principles to specific problems and general conclusions we can draw in these situations. This part of the course focuses on the strategic aspects of competing against other firms within the same industry. We start by analysing market structure and various dimensions of competition - pricing, capacity choices, research and development and advertising. We will then discuss different aspects of strategic commitment and the commitment aspects of pricing, investment and financing decisions. We then focus on the dynamic aspect of pricing rivalry, in particular collusion and price wars. We will analyse the role of incomplete and changing information in decision-making and the evaluation of ‘real options’. We will finally discuss the incentives for innovation and market entry and exit decisions. Our approach will be critical throughout, emphasising both the power and the limits of a game-theoretic approach. We will use simple models to clarify the logic of strategic reasoning, and case studies to emphasise the relationship between the analysis of strategy and managerial decision making.

Teaching: 20 hours of lectures and 8 hours of seminars in the LT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4A5 Half Unit

The Analysis of Strategy A (formerly MN415)

This information is for the 2015/16 session.

Teacher responsible: Prof Diane Reynolds

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the MSc in International Management. This course is not available as an outside option.

Course content: The objective of the two courses (A and B) is to provide students with a critical appreciation of what it takes to be a strategist - in the real world, both within and between firms. The critical aspect of being a strategist is to anticipate and prepare in advance for the possible reactions of other players (e.g. competitors). These two courses will help students to understand how managers in the real world ought to read situations from a strategic angle. In particular, strategy is viewed from the perspective of economics. Besides applications, attention will also be given to conceptual underpinnings.

The course is an amalgam of game theory, economics, and strategic management. After some preliminary material on measuring corporate performance, students will be introduced to ideas of behaviour in strategic situations. A powerful tool to study these situations is game theory, where the emphasis is on outplaying a competitor who is trying to outplay you. Some three lectures and two seminars will be devoted to developing the basic concepts of game theory including Nash and sub-game-perfect Nash equilibrium. The second part of the course will focus on applying these ideas to issues in competitive industries. The third part of the course aims at a strategic understanding of these situations and the competitive advantage. These issues will be deepened further in the accompanying seminars.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
MG4A7  Half Unit  Not available in 2015/16  Solving Unsolvable Problems: NP-completeness and how to cope with it
This information is for the 2015/16 session.
Teacher responsible: Prof Gregory Sorkin NAB 3.19  Availability: This course is available on the MSc in Management Science (Decision Sciences) and MSc in Management Science (Operational Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: A level of mathematical sophistication, including comfort with proofs and familiarity with limits, permutations, factorials, binomial coefficients, and rudimentary probability including expectations and independence. If in doubt, please consult the instructor or attend the first lecture.
Course content: Many problems, from the “Travelling Salesman Problem” to train scheduling, are easy to state but hard to solve, in a mathematically well-defined sense. In practical operations research, though, one must solve such problems, and the issues involved are mathematically interesting. The course will introduce the underlying computational concepts (polynomial-time computation and NP-completeness); introduce canonical problem models including graph problems and formula satisfiability; and explore various ways of addressing these problems, including heuristics, randomized and approximation algorithms, average-case analysis, and relatively efficient exponential-time algorithms.
Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST.
Fomin and Kratsch, Exact Exponential Algorithms
Mitzenmacher and Upfal, Probability and Computing: Randomized Algorithms and Probabilistic Analysis
Assessment: Exam (85%), duration: 2 hours and 30 minutes) in the main exam period.
Coursework (15%) in the LT.

MG4A8  Half Unit  Strategy for the Information Economy (formerly MN430)
This information is for the 2015/16 session.
Teacher responsible: Dr Jorn Rothe  Availability: This course is available on the MSc in Economics and Management, MSc in International Management, MSc in Management, MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Basic knowledge of economics.
Course content: The internet has created many new market opportunities. Web-based technology allows for new kinds of market interactions and products. Understanding the design and functioning of these new markets is central for business strategy and success. This course develops the relevant economic principles and applies them to the formulation of strategies for the provision of information goods and the design of online market platforms. The first part of the course is concerned with strategic aspects of the provision of information goods (such as music, software, product reviews, search results). Topics include the pricing of information goods, versioning, rights management, network effects, lock-ins and the discussion of e-commerce institutions and business models. The second part of the course covers the use and design of online-market transaction mechanisms for business-to-consumer and business-to-business e-commerce. Topics include principles of market engineering, design of standard (online-auction markets and multi-unit auction markets, reputation and collusion in online markets and matching markets. The course provides a theoretical background and relates theory to various examples and case-studies (such as the design of Google’s ad-auctions and eBay’s feedback mechanism).
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.
Students on this course will have a reading week in Week 6, in line with Departmental policy.
Formative coursework: Two exercise sets with a mixture of qualitative and quantitative questions. These will be marked and students will receive written feedback on them.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4A9  Half Unit  Foundations of Business and Management for Human Resources (formerly ID439)
This information is for the 2015/16 session.
Teacher responsible: Dr Juan Lopez-Cotarelo NAB4.09  Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management). This course is available on the MPhil/ PhD in Management. This course is not available as an outside option.
Course content: A basic grounding in the key management disciplines for students specialising in Human Resource Management. The aim of the course is for students to acquire a general understanding of the business and managerial context in which human resource management takes place.
Course contents include management theory, theory of the firm, business strategy, accounting and finance. Successful students will become intelligent discussion partners on these subjects and critical readers of financial information and the financial press.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 3 hours of lectures and 3 hours of seminars in the ST.
Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: One formative essay of 1000 words: study of a current business topic through the financial press.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 1500 words) in the LT.
Summative essay: study of a current business topic through the financial press.
MG4B1 Half Unit
Corporate Strategy (formerly MN431)

This information is for the 2015/16 session.

Teacher responsible: Mr Jordi Blanes I Vidal NAB5.27
Availability: This course is available on the IMEX Exchange, MSc in International Management, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need to have some understanding of microeconomics and knowledge of basic statistical methods would be an advantage

Course content: This course is an introduction to the strategic management of modern diversified firms. It studies how the firm's portfolio of products and its internal organisation can be designed to maximise corporate performance.

The course addresses the following questions facing modern managers: what products and activities should the firm focus on? Which tasks should be subcontracted and which should be carried out inside the firm? How should the firm be organised internally in order to coordinate and motivate employees, managers and other stakeholders? How should the firm's scope and internal organisation adapt to changes in the environment?

Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to undertake the analysis of three Corporate Strategy problems which will be marked and handed back with feedback.

Assessment: Exam (90%, duration: 2 hours) in the main exam period.

Class participation (10%).

MG4B2 Half Unit Not available in 2015/16
Personnel Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Yona Rubinstein NAB5.31
Availability: This course is available on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in International Management, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need to have some understanding of microeconomics and knowledge of basic statistical methods would be an advantage

Course content: Personnel economics applies economic principles to human resources management issues such as recruitment, compensation, promotions, performance evaluation, selection, and training. The course provides a rigorous theoretical framework and the statistical tools needed to analyse human resources policies under varying institutional and competitive environments. It highlights the importance of information and incentives in the modern economy. Issues covered include should pay vary across jobs to induce optimal effort from employees? Why do firms use workers within firms? How are pay and promotions structured across the modern economy. Issues covered include should pay vary across jobs to induce optimal effort from employees? Why do firms use workers within firms? How are pay and promotions structured across

Teaching: 30 hours of seminars in the LT. 3 hours of seminars in the ST.

Formative coursework: Students will be required to undertake the analysis of two human resource management problems which will be marked and handed back with feedback.

Or

Articles

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4B3 Half Unit
International Marketing: A Strategic Approach (formerly MN413)

This information is for the 2015/16 session.

Teacher responsible: Prof Amitav Chakravarti NAB5.13
Availability: This course is available on the MSc in International Management, MSc in Management, MSc in Management (CEMS MIM), MSc in Management and Strategy, MSc in Management, Organisations and Governance, MSc in Media and Communications and MSc in Media and Communications (Media and Communications Governance). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and
tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of a simulated case study to develop participant’s skills at analysing and making sense of complex real world business situations.

**Teaching:** 30 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Philip Kotler and Gary Armstrong (2001), Principles of Marketing (9th edition), Prentice Hall

Further references will be provided at the commencement of the course.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 2500 words) in December.

The examination will be an open book exam.

---

**MG4B4**  
Half Unit  
Not available in 2015/16

**Advanced Topics in Operational Research**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Laszlo Vegh NAB3.05

**Availability:** This course is available on the MSC in Management Science (Decision Sciences) and MSC in Management Science (Operational Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** An examination of the new trends in Operational Research. The topics selected differ year to year; the topic for 2014/15 will be Data Mining. Information is available on Moodle or from the Management Science Group administration office.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

**Formative coursework:** Details will be provided at the start of the course.

**Indicative reading:** Detailed suggestions for reading will be given before the start of the course.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

Project (50%) in the ST.

---

**MG4B5**  
Half Unit  
Business in the Global Environment  (formerly MN425)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Veronica Rappopoort-Redondo NAB5.29

**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in International Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given in the following order: MSc International Management, IMEX exchange students (home and visiting); other students from the Department of Management and International Relations; all other LSE students

**Course content:** The course looks at the process of globalisation at three levels: industries, firms and nations. Its goal is to develop a solid understanding of the external, economy-wide factors that affect the performance and management of firms in today’s global economy. Topics include the changing structure of industries; the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and differences between countries in their institutions and policies.

**Teaching:** 30 hours of lectures in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Case and problem set assignments.

**Indicative reading:** Useful books for background reading are Robert Feenstra and Alan Taylor, International Economics, Worth Publishers, 2012; Giorgio Barba Navarette & Anthony J Venables, Multinational Firms in the World Economy, Princeton, 2004; and Andrew Abel, Ben Bernanke and Dean Croushour, Macroeconomics, Addison-Wesley Longman Publishing, 2011. Detailed reading lists will be provided for each of the ten lectures.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG4B6**  
Half Unit  
Design and Management of Organisations  (formerly MN426)

This information is for the 2015/16 session.

**Teacher responsible:** Dr Yona Rubinstein

**Availability:** This course is compulsory on the MSc in Management and Strategy. This course is available on the MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** In this course we investigate aspects of management and the internal organisation of the firm. We start by discussing management decision making in the light of general heuristics and biases exhibited by individuals and groups and ask how organisations might help to mitigate negative consequences arising from these predispositions. We also shed light on the management of teams and non-monetary aspects of motivation. Other topics include formal and informal structures of organisations, leadership, power, authority, delegation, entrepreneurship, innovation, promotions and careers. We conclude by looking at two intangible assets of organisations: corporate culture and corporate social responsibility. Students are introduced to a set of frameworks which will enable them to critically evaluate contemporary management approaches. The organising principle of much of the content of the course has its origins in economic theory and empirical behavioural observations which are applied to issues and ideas relevant to management. Additionally we draw upon findings form psychology and sociology. The course complements MN404 (Incentives and Governance in Organisations) but can be taken as a stand-alone course. Whereas MN404 focuses on incentive contracts, principal-agent models and topics in finance, this course focuses more on aspects of informal structure.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line
with Departmental policy.

**Formative coursework:** Students will be expected to produce 1 problem sets in the LT.

How Pixar Fosters Collective Creativity, HBS case R0809D-PDF-ENG.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG487  Half Unit**

**Organisational Change (formerly ID431)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Hayley German

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPhil in Employment Relations & Organisational Behaviour, MSc in African Development, MSc in Development Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management of Information Systems and Digital Innovation, MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course adopts a psychological framework to explore the content, process and outcomes of organisational change. The aim of the course is to provide students with different psychological theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organizational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analyzing and diagnosing change; the role of the change agent, leading change from the top, bottom up change specific interventions; strategies of change, ethical decision making; a justice perspective on organisational change; understanding recipients reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions.

**Teaching:** 21 hours of lectures and 9 hours of seminars in the LT.

2 hours of lectures and 1 hour and 30 minutes of seminars in the ST. The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their syndicate group throughout the year. The course is demanding of students and depends partly upon commitment and willingness to participate fully. The course is taught in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** The course relies heavily on journal articles (for example, Academy of Management Journal, Journal of Applied Psychology, Journal of Organizational Behaviour, and Journal of Applied Behavioural Science) and the use of case studies. The following book is also useful Oreg, S., Michel, A., & By, T. B., (Eds.) (2013), The psychology of organizational change: Viewing change from the employee’s perspective, Cambridge University Press.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG488  Half Unit**

**Evolutionary Psychology and Management (formerly MN428)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Satoshi Kanazawa NAB5.33

**Availability:** This course is available on the MSc in International Management and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** Principles of evolutionary psychology. The nature and limitations of the human brain as an evolved and adapted organ. Evolutionary origins of cognitive biases, and their effects on organisational behaviour. Sex differences in organisational behaviour. The importance of physical attractiveness and general intelligence in organisational behaviour. “Discrimination” in labour market. Evolutionary psychological perspectives on cooperation, reciprocity, altruism, hierarchy, and leadership in modern corporations. Evolutionary origins of organisationally relevant emotions such as envy, spite, and positional bias. This course introduces the evolutionary psychological perspective on business and management. The emerging science of evolutionary psychology sheds entirely new light on, and offers different solutions to, old problems of management, such as glass ceiling, occupational sex segregation, sexual harassment and suboptimal decision making, and points to new potential problems.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** One class presentation and one essay based on the class presentation.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG489  Half Unit**

**The World Trading System (formerly MN429)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Verónica Rappoport-Redondo NAB5.29

**Availability:** This course is available on the MSc in Economics and Management, MSc in International Management, MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Basic Knowledge of Mathematics and Economics

**Course content:** The course studies a key component of the “globalization” process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international
MG4C1  Half Unit  

Techniques of Operational Research (formerly OR401)  

This information is for the 2015/16 session.  
Teacher responsible: Dr Katerina Papadaki NAB 3.14  
Additional teacher(s): Mr Emmanouil Aperinios  

Availability: This course is compulsory on the MSc in Management Science (Operational Research). This course is available on the MSc in Applicable Mathematics, MSc in Management, MSc in Management (CEMS MIM), MSc in Management Science (Decision Sciences) and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.  

Course content: An introduction to a range of Operational Research techniques. The particular techniques taught may vary slightly from year to year. Topics normally covered are: inventory models, queuing theory, replacement, critical path analysis, dynamic programming, markov chains, and game theory.  

Teaching: 14 hours of lectures and 14 hours of seminars in the LT. 4 hours of lectures in the ST.  
A reading week will take place in W6. There will be no teaching during this week.  
Assessment: Exam (100%, duration: 2 hours) in the main exam period.  

MG4C2  Half Unit  

Organisational Behaviour (formerly ID430)  

This information is for the 2015/16 session.  
Teacher responsible: Dr Tara Reich NAB4.15  
Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPH/PhD in Management, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management Science (Decision Sciences), MSc in Management Science (Operational Research), MSc in Management, Organisations and Governance and MSc in Public Management and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.  

This course is available in the Michaelmas Term only.  
Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we aim to demonstrate the contribution of a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence. Key topics include: personality and individual differences, work motivation, decision-making, rewards systems, psychological contracts, organisational justice, organisational citizenship and retaliatory behaviour, leadership, groups and group processes, design of work, and organisational culture.  

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.  
The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.  
Students on this course will have a reading week in Week 6, in line with departmental policy.  
Formative coursework: Students will be expected to produce 1 essay in the MT.  
Assessment: Exam (100%, duration: 2 hours) in the main exam period.  

MG4C3  Half Unit  

Information Technology and Service Innovation (formerly IS480)  

This information is for the 2015/16 session.  
Teacher responsible: Dr Aleksi Aaltonen  
Availability: This course is available on the MSc in Management of Information Systems and Digital Innovation and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.  
This course will use controlled access and space will be limited to 60 students.  
Course content: The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary information technology (IT). The course relates the diversity of contemporary IT developments to organisational innovation and emphasises the increased complexity of this challenge with ubiquitous and pervasive technologies affording intimate everyday experiences relying on digitisation and convergence of device functionality, data, content, systems, services and infrastructures. This complexity, which has emerged within the past couple of decades both offer possibilities for innovation, but
also significant risks. Mobile and ubiquitous IT will feature as an
illustrative example of IT innovation throughout. Throughout the
course small groups of students will describe an existing complex
real-life set of services and suggest design improvements, sensitised
by theoretical elements from the course. Subsequently, each
individual group member will write a reflective essay based on the
group discussions. Topics addressed will be: Digital infrastructure
innovation; Digital platform strategies; Designing technology
affordance diversity; Understanding technology performances;
Individual interaction intimacy; Amplified teams; The technological
organisation; Global crowd innovation with IT; Global technology
innovation tussles; Business innovation with information
technology. The weekly seminars will consist of presentations and
discussions offering students opportunity to critically reflect on
theoretical and pragmatic issues related to the subject matter of
the course, such as; the IT artifact and ecosystem, the role of IT in
business innovation, understanding the paradoxes of technology
performances, intimate technology experiences, IT mediated team-
worked, the IT-enabled organisation, innovating global IT mediated
crowds, innovation as organisational tussles, and the role of IT-based
innovation for business development.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
A reading week will take place in W6. There will be no teaching
during this week.

Formative coursework: Classes are based around reading and
discussing selected journal articles from the course study pack.
Formative feedback is provided on class participation.

Planet Internet. Studentlitteratur; Ciborra, C. (2002): The Labyrinths
Work. Palgrave Macmillan; Garud, R., Kumaraswamy, A., &
Bantam; Gratton, L. (2011): The Shift: The Future of Work is
Mobility and Technology in the Workplace. Routledge; Kallinikos,
The Psychology of Everyday Things. USA: Basic Books.; Norman,
Reconfigurations. Cambridge University Press.; Van De Ven, A. H.,
Johns Hopkins University Press; Zittrain, J. (2008): The Future of
the Internet. Allen Lane; Zuboff, S. (1987): In the Age of the Smart
Economy. Penguin.

Assessment: Project (50%) and coursework (50% , 2500 words).
This consists of a group project (50%) and a 2500 word individual
report (50%).
on other programmes where regulations permit.

**Pre-requisites:** Students must have sufficient knowledge of linear algebra (linear independence, determinants, matrix inversion and manipulation) and of basic multivariable calculus (derivatives and gradients). Previous experience of computers is not required.

**Course content:** To cover the use of mathematical programming models in practice, and an introduction to the theory and computational methods, as described under the headings of the lecture courses below.

**MG4C6.1 Foundations of Mathematical Programming:** An introduction to linear programming and to the theory of duality.

**MG4C6.2 Mathematical Programming:** Introduction to theory and the solution of linear and nonlinear programming problems: basic solutions and the simplex method, convex programming and KKT conditions, integer linear programming methods (branch and bound and cutting planes).

**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

**Indicative reading:** V Chvatal, Linear Programming; G Dantzig & M Thapa, Linear Programming 1 and 2

M Padberg, Linear Optimization and Extensions

M Bazaraa, J Jarvis & H Sherali, Linear Programming and Network Flows

J Nocedal & S Wright, Numerical Optimization

S Wright, Primal Dual Interior Point Methods

Nemhauser & Wolsey, Integer and Combinatorial Optimization

A Schrijver, Theory of Linear and Integer Programming

J More & S Wright, Optimization Software Guide

H P Williams, Model Building and Mathematical Programming

H P Williams, Model Solving in Mathematical Programming.

**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

---

**MG4C7 Applied Management Science (formerly OR440)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr David Newton

**Availability:** This course is available on the MSc in Management Science (Decision Sciences) and MSc in Management Science (Operational Research). This course is not available as an outside option.

Cannot be taken with MG4C9 - Management Science Dissertation.

**Course content:** The student will carry out and report upon a substantial practical piece of Management Science. The project will either be found by the course leader or may be suggested by the student, with the approval of his/her teachers.

**Teaching:** 8 hours of lectures in the MT. 1 hour of lectures and 3 hours of seminars in the LT.

A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Each student will be assigned an internal project supervisor who will monitor his/her progress on a continuing basis and give tutorial advice as required.

**Indicative reading:** Detailed suggestions for reading will be provided in the course of supervision.

**Assessment:** Project (100%).

Assessment is based entirely on the project report. The student is expected to work on this full-time from early June to end of August. Two paper copies and one electronic copy must be submitted on a specified date in late August/early September. The page limit for the report is 40 pages, excluding appendices.

A degree cannot be awarded unless MG4C7 Applied Management Science or MG4C9 Management Science Dissertation have been passed.

---

**MG4C8 Half Unit**

**Model Building in Mathematical Programming (formerly OR428)**

**This information is for the 2015/16 session.**

**Availability:** This course is compulsory on the MSc in Management Science (Operational Research). This course is available on the MSc in Applicable Mathematics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students must have a knowledge of Mathematics and Statistics to the level of MA107 (Quantitative Methods - Mathematics) and ST102 (Elementary Statistical Theory).

**Course content:** Mathematical Programming is one of the most powerful and widely-used quantitative techniques for making optimal decisions. The course has a pragmatic focus and aims at enabling students to model and solve real-life management problems. In providing an overview of the most relevant techniques of the field, it teaches a range of approaches to building Mathematical Programming models and shows how to solve them and analyse their solutions. Content includes: An introduction to the theory of linear programming. The modelling life cycle and modelling environments. Formulation of management problems using linear and network models; solution of such problems with a special-purpose programming language; interpretation of the solutions; limitations of such models. Formulation and solution of non-linear models including some or all of binary, integer, convex and stochastic programming models.

**Teaching:** 20 hours of lectures and 18 hours of seminars in the MT. 2 hours of seminars in the LT.

8 hours of computer help sessions in the MT. 2 hours of computer help sessions in the LT. Computer help sessions are optional.

A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Students will have the opportunity to submit a mock project for marking and feedback before the final assessed project is due. Students will also be given weekly homework exercises.

**Indicative reading:** Central to the course is: H P Williams, Model Building in Mathematical Programming. Wiley. A good introduction to Mathematical Programming provide the relevant chapters of: F S Hillier and G J Liebermann: Introduction to Operations Research, McGraw-Hill. A more theoretical treatment can be found in: D Bertsimas and J N Tsitsiklis: Introduction to Linear Optimization, Athena Scientific. Further suggestions for reading are given during the course.

**Assessment:** Project (100%) in the LT.

The course is examined entirely on a project to be submitted at the end of LT.

---

**MG4C9 Dissertation: MSc Management Science (formerly OR499)**

**This information is for the 2015/16 session.**

**Teacher responsible:** All members of the Management Science Group are involved in dissertation support.

**Availability:** This course is available on the MSc in Management Science (Decision Sciences) and MSc in Management Science (Operational Research). This course is not available as an outside option.

Cannot be taken with OR440 Applied Management Science.

**Course content:** The aim of the dissertation is for students to pursue an independent piece of research within the field of management science. The dissertation is a qualitative or quantitative investigation in the field. It may be either a theoretical or empirical piece of research. Students must obtain the approval of their advisor before embarking on any research.

**Teaching:** Advisors will normally be allocated according to student
dissertation proposals, and it is the student’s responsibility to find a suitable dissertation adviser who will advise the student, help provide information and bibliography and identify likely problems with the proposed research. Students may expect to see their supervisors in both individual and group sessions, but should note that supervision is not available after the end of ST. Dissertation guidelines will be issued to students during MT.

**Formative coursework:** Students are required to submit Dissertation Plans to their supervisor in LT and ST.

**Assessment:** Dissertation (100%, 10000 words) post-summer term. Two paper copies of the dissertation must be submitted on a specified date in late August/early September. An electronic version of the dissertation must also be submitted. The word limit for the dissertation is 10,000 words. The dissertation is critical to assessment.

---

**MG4D1  Half Unit  Not available in 2015/16**

**International and Comparative Human Resource Management (formerly ID411)**

This information is for the 2015/16 session.

**Teacher responsible:** TBC

**Availability:** This course is available on the MPhil/PhD in Management, MSc in Human Resources and Organisations (Human Resource Management/CPID), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management, MSc in Management (CEMS MIM) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course deals with the policies that organisations adopt to deal with a range of human resource issues, and develops an international and comparative perspective. The course considers managerial human resource policies in their institutional, social and market contexts in advanced industrial countries. As an integrating perspective, the lectures analyse how different employment systems shape organisations’ HR strategies and policies. The course looks at problems of human resource management, showing how these are affected by firm size, industry, location, and the global economy. The course includes consideration of the main actors in human resource management and cross-cultural management, rewards, equal opportunities, employment flexibility, participation, and employer collective action all within the context of different types of employment systems.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours of lectures and 3 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Indicative reading:** Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course. Some useful texts include: D W Marsden, A Theory of Employment Systems: microfoundations of societal diversity, Oxford University Press, 1999; Bringing, migration, knowledge management, rewards, equal opportunities, employment flexibility, participation, and employer collective action all within the context of different types of employment systems.

**MG4D2  Half Unit**

**International Employment Relations (formerly ID432)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Dominic Donnelly NAB4.07 and Prof Carola Frege NAB5.20

**Dr Chunyun Li**

**Availability:** This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit. Also available as an option to students on the MPhil/PhD in Management: Employment Relations and Organisational Behaviour.

**Pre-requisites:** A general knowledge of the social sciences is required.

**Course content:** The course aims to provide an introduction to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. It will introduce the employment relationship, the key concepts surrounding it, and the theories required to understand it. The strategies and policies of the main actors will be explored through cross-national comparative analysis. The course will also introduce the main ‘models’ of employment relations: the Anglo-Saxon, Japanese and European Social Models, as well as models of employment relations in the transitional economies.

The aim of the classes will be to provide an introduction to the comparative analysis of employment relations, and to ensure that students have both the conceptual and empirical grounding they need to take the options offered in international comparative human resource management and cross-cultural management.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students and depends for its success partly upon their commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

**Formative coursework:** Students have to complete a class presentation.

**Assessment:** Essay (40%, 2500 words) in the MT. Essay (50%, 2500 words) in the LT.

Class participation (10%).

---

**MG4D3  Half Unit  Not available in 2015/16**

**The Dark Side of the Organisation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jonathan Booth NAB4.20

**Availability:** This course is available on the MPhil/PhD in Management, MSc in Human Resources and Organisations.
(Human Resource Management/CEIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Introductory OB course required. ID430, MG434, ID200, or equivalent course in another institution. Students will be required to write a paragraph about their motivation for taking this course.

**Course content:** In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g., substance abuse, violent/aggressive, discriminatory, and retaliatory behaviours, and unethical behaviours/corporate corruption). In organisational behaviour courses, topics covered often explore how behaviours promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all behaviours and outcomes occurring in the workplace are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences. In addition to an organisational behaviour approach to the dark side, we will also explore industry relations perspective.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**MG4D4** Half Unit

**Cross Cultural Management (formerly ID419)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Hyun-Jung Lee NAB4.12

**Availability:** This course is available on the MSc in Human Resources and Organisations (Human Resource Management/CEIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Some background in psychology and organisational behaviour, and/or international business is useful, but not required.

**Course content:** The ability to communicate cross culturally and understand diverse perspectives is a necessity in order to achieve a competitive advantage in global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as advantages in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions.

Topics include i) understanding my own and others' cultural conditioning, ii) cultural diversity in teams, iii) international assignments and global career development, iv) managing cross-border alliances, v) leading global organisation with responsibility.

**Formative coursework:** Students will be expected to produce 1 essay in the LT.

**Indicative reading:** The following reading list contains some of the main volumes and some easily accessible introductory volumes. Most of the course reading is taken from journals. A full reading list will be issued at the start of the course. B. Gerhke and M-T. Claes (eds.), (2014), Global leadership practices: A cross cultural management perspective, Palgrave Macmillan; R. Steers et al. (2013), Management across cultures, Cambridge University Press; D. Thomas (2008), Cross cultural management, Sage.

**Assessment:** Exam (70%; duration: 2 hours) in the main exam period. Project (30%).
Organisations (Organisational Behaviour), MSc in Management, MSc in Management (CEMS MIM) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership and considers how leadership develops. The emphasis will be on application of theory, comparing and contrasting ideas approaches to leadership, and self-reflection.

The course examines topics such as: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; leadership development; transformational and transactional forms of leadership; and issues of gender and culture.

**Teaching:** 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Each two-hour session will include a combination of lecture and seminar work. Students are expected to prepare for, and contribute to each session. Seminar work will include case analyses, and small group discussions. Students on this course will have a reading week in Week 6, in line with departmental policy

**Formative coursework:** Students will complete a formative assessment based on previous exam questions. The details will be discussed in week 1. The assignment deadline will be in week 6.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**MG4D9**

**Dissertation: MSc MISDI (formerly IS499)**

This information is for the 2015/16 session.

**Teacher responsible:** All members involved with MSc MISDI are involved in dissertation support.

**Availability:** This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

**Course content:** The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or qualitative investigation in the field. It may be either a theoretical or empirical piece of research. Students must obtain the approval of their advisor before embarking on any research. The course IS490 Study Skills and Research Methods provides background material on undertaking dissertation work.

**Arrangements for supervision:** Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.

**Referencing:** Details on Group requirements for referencing and paraphrasing and the presentation of the dissertation are given during the IS490 Study Skills and Research Methods course. Students with any queries on this area should contact their dissertation advisor or the MSc Tutor.

---

**Formative coursework:** Students will be expected to produce 1 presentation in the ST.

Students are expected to attend their allocated dissertation presentation session. They will present their research question, conceptual framework and research design. They will receive feedback on the day from their supervisor and fellow peers. The presentations take place after the examination period (mid/late June).

**Assessment:** Dissertation (100%, 10000 words) post-summer term. Three paper copies of the dissertation must be handed in on a specified date in late August/early September. An electronic version of the dissertation must also be submitted. Penalties will be applied to any late submission. The word limit for the dissertation is 10,000 words. The dissertation is critical to assessment on the programme.

---

**MG4E1**

**Half Unit**

**Algorithmic Techniques for Data Mining**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Laszlo Vegh NAB 3.05

**Availability:** This course is available on the MSc in Management Science (Decision Sciences) and MSc in Management Science (Operational Research). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students are not permitted to take this course alongside ST443 Machine Learning and Data Mining. Students must have basic knowledge of Mathematics and Statistics, in particular, familiarity with hypothesis testing, linear and logistic regression.

**Course content:** Data Mining is an interdisciplinary field developed over the last three decades. Vast quantities of data are available today in marketing, other areas of business including demand forecasting, and various fields of science and technology. The main goal of data mining is to extract previously unknown, useful information from such massive scale data. The aim of the course is to equip the students with a theoretically founded and practically applicable knowledge of data mining. The theoretical foundations of the field come from statistics, computer science and artificial intelligence.

The course introduces fundamental methods and algorithms for basic data analytics problems. These methods include algorithms for tree construction and for rule generation, instance-based learning, regression methods, support vector machines, nearest-neighbour methods, Bayesian networks, website ranking, principal component analysis, association rule mining, and distance based and density based clustering.

The methods are illustrated on practical problems arising from various fields. The course also gives an introduction to the usage of the data mining software package Weka.

**Teaching:** 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST. A reading week will take place in W6. There will be no teaching during this week.

**Formative coursework:** Students will be expected to produce 1 project in the LT and 1 problem set in the ST.

A mock exam and a mock project will be given. The mock project will be similar to the group project, but with the dataset provided.

**Assessment:** Exam (45%, duration: 2 hours) in the main exam period.

Project (45%) in the ST.

Coursework (10%) in the LT.
MY400  Half Unit
Fundamentals of Social Science Research Design

This information is for the 2015/16 session.

Teacher responsible: Dr Benjamin Lauderdale Coll.8.10
Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Research students please see MY500.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design considerations and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across qualitative and quantitative research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their dissertations.

Teaching: 20 hours of lectures and 7 hours of seminars in the MT.

Week 6 is a Reading Week during which students work independently on their first assignment.

Assessment: Research proposal (30%) and class participation (10%) in the MT.

Other (60%) in the ST.

Research Proposal (1000 words), submitted in week 9 MT (30%).

Provisional Research Design (5000 words), submitted in Week 1 ST (60%).

MY421  Half Unit
Qualitative Research Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Flora Cornish COL8.09 and Dr Jennifer Tarr COL8.06
Availability: This course is compulsory on the MPhil/PhD in Social Psychology, MSc in Health, Community and Development and MSc in Social Research Methods. This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course presents the fundamentals of qualitative research methods. It prepares students to design, carry out, report, read and evaluate qualitative research projects. Students learn how to collect data using methods including interviewing, focus groups, participant observation, and documentary and historical work. The challenges and opportunities of new media including visual images and Internet research are discussed. We then cover analysis, using thematic, content, discourse, and semiotic analysis. Issues of research design, quality indicators, epistemology and ethics are addressed. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice.

Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods. A workbook details the seminar activities - and provides the guidance and basis for the formative and summative assignments.

Teaching: 15 hours of lectures and 10 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 10 hours and 30 minutes of seminars in the LT.

The course runs twice per year: in MT (MY421M) and again in LT (MY421L). The content of the course is exactly the same in each term. Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment. The practical work is structured by a workbook, and is the focus of the seminars. It also forms the basis of the summative assessment.

Assessment: Project (100%), 3000 words in the ST.

The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods used.

MY426  Half Unit
Doing Ethnography

This information is for the 2015/16 session.

Teacher responsible: Dr Elena Gonzalez-Polledo COL.7.07 and Dr Flora Cornish COL.8.09
Availability: This course is available on the MSc in Development Studies (Research), MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Social Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A postgraduate qualitative research methods course, such as MY421, as pre- or co-requisite. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students’ experience of fieldwork. Fieldwork is a key component of the course, with data collection at a local public institution (interesting sites are chosen each year, e.g. the Occupy encampment at St Paul’s, protests around London), followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students’ sensitivity and rigour as ethnographic researchers.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words).

Field-notes should record rich details of observations (the data), researcher reflections, and brief interpretations of the significance of
these observations. Written feedback will be provided.

**Assessment:** Essay (100%, 4000 words) in the LT.

---

**MY427** Half Unit Not available in 2015/16

**Qualitative Research with Non-Traditional Data**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jennifer Tarr COL8.06

**Availability:** This course is available on the MSc in Culture and Society, MSc in Gender (Research), MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is also available to PhD students, please see MY527.

**Pre-requisites:** Introductory course on qualitative methods (e.g. MY421 or MC4M1) as pre-requisite or co-requisite.

**Course content:** Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. Recently qualitative researchers have become interested in ways of capturing and documenting other kinds of data and other dimensions of social life. This course will examine methods for collecting and analysing data which are not primarily textual or linguistic, and how these can be integrated into qualitative research. Lectures will cover key topics such as time and memory; space, place and mobile methods; digital research and online environments; and using visual, audio and other sensory data. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final small research project on a topic of the students’ choosing to be submitted at the beginning of summer term. The course aims to understand how qualitative methods can be applied to non-traditional data and how to address traditional methodological concerns such as rigour and representativeness. The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment.

**Formative coursework:** Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.

**Assessment:** Project (100%, 4000 words) in the ST. One 4000-4500 word research project related to the course material, on a topic selected by the student (100%).

**MY428** Half Unit Not available in 2015/16

**Qualitative Text Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Aude Bicquelet COL 8.08

**Availability:** This course is available on the MPhil/PhD in Media and Communications, MSc in Organisational and Social Psychology, MSc in Social Research Methods and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit. The course is also available to PhD students, please see MY528.

**Pre-requisites:** Students must have completed Fundamentals of Social Science Research Design (MY400). A postgraduate qualitative research methods course, such as MY421, as pre- or co-requisite. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent

**Course content:** This course covers issues, methods, and applications of qualitative approaches for the analysis of textual data. It introduces techniques and procedures available to researchers to identify and extract information from texts for social scientific purposes. Topics discussed draw on a wide range of analytic traditions such as thematic analysis, content analysis, dialogical analysis and dictionary-based approaches. The aim of this course is to equip participants with the right skills to work within these traditions and select appropriate qualitative methods for analysing textual data according to 1) Research Design 2) Type of data under consideration.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.

**Formative coursework:** A project proposal (c. 1000 words).

**Assessment:** Students write a proposal for the project that will comprise their summative assessment.

**Assessment:** Essay (100%, 4000 words) in the LT.

---

**MY429** Half Unit Not available in 2015/16

**Special Topics in Qualitative Research: Introspection-based Methods in Social Research**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Martin Bauer Col.8.04

**Availability:** This course is available on the MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** The course will assume good knowledge of qualitative research methods as covered in MY421.

**Course content:** Course Description

Introspection comprises methods of empirically recording one’s own subjective experience; the currently on-going, or perhaps very recently past, mental or emotional states and processes through methods of trained and technically supported self-observation. Historically, introspection is part of a quest of human self-knowledge and self-improvement. And a person’s stream of consciousness is of interest in the social sciences, for example as reports of happiness or life satisfaction. Introspection has been difficult to verify, thus deemed not ‘objective’ and unscientific. The stream of consciousness (William James) was of interest mainly to
literary elaboration. However, introspection-based methods survived and have re-emerged, not least because 1st person experience remains an indispensable source of evidence on an actor's states and processes that constrain and give meaning to human action. Not least recent advance in neurosciences accentuates the need for experience-focussed 1st person methods. Modern introspection-based methods are 'objectifications' of 1st person situated experiences in controlled settings that support episodic retention. Modern introspection-based methods create conditions which make immediate, pre-meditated experience less 'biased' and more accurate to record. This comprises techniques such as narrative and episodic interviewing, free-association techniques, survey-based reconstruction and attitudes, critical incident techniques, loud-thinking protocols, experience sampling and self-tracking methods, ecological momentary assessment, self-frontonatation interviewing, and 1st person situated video methods, and auto-ethnography and the 'quantified self'. Many new techniques are mobile and adaptable to capture the fluid nature of mental and emotional states and processes. Miniature mobile devices for sound and video recording promise to overcome the bottlenecks that have hitherto plagued intensive and continuous introspection-based methods.

**Learning Outcomes: Students on this course will**
1) appreciate the long past, and the short history of introspection-based methods;
2) be familiar with a range of techniques of collecting introspective data;
3) know the problems of introspection-based methods and how different methods try to overcome them;
4) gain practical skills with modern introspection-based methods.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** One piece of assessed coursework (max. 1,500 words).

**Indicative reading:** A complete reading list will be provided at the beginning of the course.

Some key references
- Locke, EA (2009) It’s time we brought introspection out of the closet, Perspectives on Psychological Science, 4, 1, 24-25.
- Nisbet RE and Wilson TDC (1977) Telling more than we can know: verbal reports on mental processes, Psychological Review, 84, 3, 231-258.

**Assessment:** Coursework (100%, 3,000 words) in the ST.

One 3,000 word written report (100%) on ONE from a choice of SEVERAL Take-home exercises. To be submitted at the beginning of the Summer term.

---

**MY451 Half Unit**

**Introduction to Quantitative Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha Col.8.02 and Dr Benjamin Lauderdale Col.8.10

**Availability:** This course is compulsory on the MSc in Sociology (Research). This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in EU Politics, MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in International Migration and Public Policy, MSc in Public Policy and Administration, MSc in Social Anthropology (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is also available to research students as MY551.

**Course content:** An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bi-variate data analysis and have an appreciation of multiple linear regression. The computer classes give 'hands-on' training in the application of statistical techniques to real social science research problems using the SPSS computer package (no prior knowledge of SPSS is necessary).

**Teaching:** 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST.

There will be no lectures or computer classes in Week 6 of the term. This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY451M which is taught in Michaelmas Term, or MY451L which is taught in Lent Term.

**Formative coursework:** Exercises from the weekly computer classes can be submitted for feedback.

**Indicative reading:** A course pack will be available for download online and can be purchased as a hard copy. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY451 and MY452.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

A two-hour open book unseen examination in ST.

---

**MY452 Half Unit**

**Applied Regression Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Benjamin Lauderdale Col.8.10 and Dr Dominik Hangartner Col.8.03

**Availability:** This course is compulsory on the MPhil/PhD in Social Psychology, MSc in Political Science and Political Economy and MSc in Sociology (Research). This course is available on the MRes Political Science, MRes/PhD Political Science (Qualitative stream B), MRes/PhD Political Science (Quantitative stream A), MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Gender (Research), MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Local Economic Development, MSc in Management, MSc in Management (CEMS MIM), MSc in Public Policy and Administration, MSc in Social Anthropology (Research), MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes
where regulations permit.

**Pre-requisites:** Students must have completed CP-MY451. Students are required to have completed MY451 or an equivalent level statistics course.

**Course content:** The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression. Class exercises and homework will be carried out using the Stata or SPSS package, according to the student’s choice.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the MT. 20 hours of lectures and 10 hours of computer workshops in the LT. This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY452M which is taught in Michaelmas Term, or MY452L which is taught in Lent Term. There will be no lectures or computer classes in Week 6 of term.

**Formative coursework:** Exercises from the weekly computer classes can be submitted for feedback.

**Indicative reading:** A Agresti & B Finlay, Statistical Methods for the Social Sciences. A course pack will be available for download online and can be purchased as a hard copy. Additional reading will be recommended.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

A two-hour open book unseen examination in ST.

**MY454  Half Unit**

**Applied Statistical Computing using R**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Benjamin Lauderdale COL.8.10

**Availability:** This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. The course is also available to research students, as MY554.

**Pre-requisites:** Students must have taken Applied Regression Analysis (MY452) or an equivalent intermediate regression course.

**Course content:** This course will cover basic statistical programming for social science research as well as several associated data analysis methods. Programming topics include basic programming, data structures, optimisation, and simulation. Applied statistical topics include nonparametric density estimation and regression, additive models, cross-validation, the bootstrap, and permutation/randomisation inference. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT. 2 hours of lectures in the ST.

**Formative coursework:** Students will be expected to produce 5 problem sets in the LT. Each problem set is associated with a computer classes, and may be submitted for marking and feedback.

**Indicative reading:** Keele, L. Semiparametric Regression for the Social Sciences
Matloff, N. The Art of R Programming
Shalizi, CR. Advanced Data Analysis from an Elementary Point of View

**Assessment:** Exam (50%, duration: 2 hours, reading time: 5 minutes) in the main exam period.

Coursework (50%) in the ST.

**MY455  Half Unit**

**Multivariate Analysis and Measurement**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha Col.8.02

**Availability:** This course is compulsory on the MPhil/PhD in Social Psychology. This course is available on the MSc in Management, MSc in Management (CEMS MIM), MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is also available to research students as MY555.

**Pre-requisites:** The course will assume a knowledge of standard linear regression models, to the level covered in MY452 (Applied Regression Analysis).

**Course content:** An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.

**Teaching:** 20 hours of lectures and 8 hours of computer workshops in the LT.

**Formative coursework:** Exercises from the computer classes can be submitted for marking.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

**MY456  Half Unit**

**Survey Methodology**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha COL8.02 and Prof Jonathan Jackson COL8.05

**Availability:** This course is compulsory on the MPhil/PhD in Social Psychology. This course is available on the MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Knowledge of basic descriptive and inferential statistics, to the level of MY452 or equivalent. MY456 can also be taken in parallel with MY452L. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.

**Course content:** This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys. Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and non-sampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; non-response error and imputation for item non-response; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. There will be no lectures or computer classes in Week 6 of term.

**Formative coursework:** Exercises from the some of the seminars
and computer classes are submitted for feedback

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Project (50%, 2500 words).

The project is a report of approximately 20 to 30 pages, including tables and figures, or approximately 2,500 words, reporting the data analysis of a given research question and data set.

**MY457** Half Unit

**Causal Inference for Observational and Experimental Studies**

This information is for the 2015/16 session.

Teacher responsible: Dr Dominik Hangartner COL8.03

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MPhil/PhD in Accounting, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Applied Regression Analysis (MY552) and Fundamentals of Social Science Research Design (MY400).

Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY552 (MI452) or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400 (MI453) or equivalent.

Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer packages (Stata or R) are used for computation.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for feedback.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

**MY459** Half Unit

**Special Topics in Quantitative Analysis: Quantitative Text Analysis**

This information is for the 2015/16 session.

Teacher responsible: Prof Kenneth Benoit Col.8.11

Availability: This course is available on the MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY559.

Pre-requisites: Students must have completed Applied Regression Analysis (MY452).

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Assessment: Project (40%, 3000 words) and coursework (60%, 2000 words) in the ST.

**MY465** Half Unit

**Intermediate Quantitative Analysis**

This information is for the 2015/16 session.

Teacher responsible: Dr Jouni Kuha COL8.02

Availability: This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451). Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. It covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling
is also included. The computer classes give hands-on training in the application of these statistical techniques. Class exercises and homework are carried out using the Stata or SPSS package, according to the student’s choice.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6. Online quizzes will be provided on Moodle to aid revision during the reading week.

**Formative coursework:** Students will be expected to produce 9 exercises in the MT.

**Assessment:** Exam (100%, duration: 2 hours). This is an open-book unseen examination.

---

**MY499**

**Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha COL8.02 and Dr Jennifer Tarr COL8.06

Dissertation supervisors.

**Availability:** This course is compulsory on the MSc in Social Research Methods. This course is not available as an outside option.

**Course content:** Students are required to write a 10,000 word dissertation on a topic within the field covered by their specialist subject and agreed with their supervisor.

**Teaching:** A series of around 4 dissertation seminars during MT and LT. The seminars cover methodological issues such as the literature review, sources of secondary quantitative data, topic guides for interviews, and sources of textual material. Students will be required to write a report where they apply the tools considered in the seminars to a topic of their choice.

**Formative coursework:** Each student will be required to give a short presentation outlining the subject of their dissertation and the proposed argument of the dissertation in a session organised for all students during ST.

**Assessment:** Dissertation (100%, 10,000 words) post-summer term. The 10,000 word dissertation must be submitted via Moodle by Friday August 12th 2016

---

**MY4M1**

**Foundations of Social Research 1**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha (MY451), Dr Ben Lauderdale (MY400, MY452)

Dr Flora Cornish (MY421)

**Availability:** This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research), MSc in International Relations (Research) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This programme is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components: 1. MY452

**Assessment:** Exam (100%, duration: 2 hours). This is an open-book unseen examination.

---

**PH400**

**Philosophy of Science**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Roman Frigg

**Availability:** This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Social Research Methods. This course is not available as an outside option.

**Pre-requisites:** No pre-requisites.

**Course content:** Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

The issues we will tackle are the following. Theory and Observation: Hume’s problem of induction and Goodman’s new riddle of induction, Popper’s falsificationism, underdetermination of theory by evidence, the positive instance account, Bayesianism. Theories and
laws: the received view of theories, the semantic view of theories, the regularity view of laws, law idealism, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and the no miracles argument, inference to the best explanation, antirealism and the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume’s, Mill’s, Mackie’s accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton’s physics.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to write two essays (two in MT and two in LT), submit a few short answers before each seminar, and participate in discussion in seminars.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH404
Scientific Revolutions: Philosophical and Historical Issues

This information is for the 2015/16 session.

Teacher responsible: Prof John Worrall

Availability: This course is available on the MSc in Economics and Philosophy, MSc in European Studies: Ideas, Ideologies and Identities, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Pre-requisites: None

Course content: The course examines a number of fundamental issues in philosophy of science, as they arise from instances of important theory-changes (so-called ‘scientific revolutions’) in the history of science. It is therefore by no means a ‘straight’ course in history of science: it looks at historical episodes to test and/or illustrate philosophical theses about science and its development.

1. The Copernican revolution: the switch from the Ptolemaic geocentric view of the world to the Copernican heliocentric one was probably the greatest revolution in human thought ever: What justified the switch? Was Ptolemaic theory definitively refuted by the data? Was Copernican theory simpler? Was the Church’s view that Copernican theory should only be thought of as an instrument for calculating astronomical data purely theologically motivated or does it have some scientific rationale? What role was played in the eventual acceptance of the Copernican view by predictive success?
Do we need to invoke social or other non-intellectual factors to explain why this ‘revolution’ occurred?

2. Galileo: Galileo and the telescope: are all observations ‘theory-laden’ and does this mean that there is a subjective element to all theory-choices? Galileo and the argument for his law of free fall: can theories be ‘deduced from the phenomena’?

3. The Newtonian revolution: What was the relationship between Newton’s theory and Kepler’s and Galileo’s laws? What does this tell us about theory-change in general?

4. The chemical revolution: What were Priestley and Lavoisier’s experiments, and what exactly lead scientists to supplant phlogiston by oxygen? What does this tell us about theory change in general?

5. The Darwinian revolution: This revolution certainly ranks alongside the Copernican one in terms of its impact on man’s view of herself. But debates about the scientific credentials of Darwin’s theory began immediately on the publication of Darwin’s work and continue to this day. Is Darwinian theory unfalsifiable (or even just one big tautology)? Can ‘scientific’ creationists explain everything that Darwin can?; What objections were raised by Darwin’s critics to particular aspects of Darwinian theory? Were these valid objections and, in so far as they were, have they now been resolved?

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Formative coursework: 2 x 1500 word essays per term.

Indicative reading: Background reading: T S Kuhn, The Structure of Scientific Revolutions; I Lakatos ‘Falsification and the Methodology of Scientific Research Programmes’ in his The Methodology of Scientific Research Programmes, Philosophical Papers 1; G Holton (revised by S Brush): Theories and Concepts in Physical Science; P Duhem The Aim and Structure of Physical Theory; P Kitcher Abusing Science: The Case against Creationism, K R Popper, Conjectures and Refutations; P Feyerabend Against Method. Recommended reading: The central text for the first part of the course is T S Kuhn, The Copernican Revolution, Harvard University Press. The central text on the Darwinian revolution will be P Kitcher, Abusing Science, the Case Against Creationism. MIT Press.

There will be lecture slides on each topic including (i) a list of essential reading and suggestions for further reading and (ii) ‘study questions’ to guide your thought. Aside from the above reading for the section of the course on the Copernican revolution and the Darwinian revolution, reading for particular topics will be in the form of articles and selections from books. These will be made available electronically on Moodle.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH405
Philosophy of the Social Sciences

This information is for the 2015/16 session.

Teacher responsible: Prof Jason Alexander LAK. TS01b

Availability: This course is available on the MSc in Economics and Philosophy, MSc in European Studies: Ideas, Ideologies and Identities, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Philosophical issues concerning the nature of social scientific theory and its applications. Topics to be covered will include some or all of the following: the explanation and interpretation of action, naturalist and hermeneutic social theory; the nature of ‘social facts’; reductionism and methodological individualism; functional and structural explanations; rationality and relativism; the role of values in social science; social norms; the construction of social reality; methods of evolutionary explanation in the social sciences; philosophical and methodological critiques of evolutionary psychology. In additional, philosophical problems of particular social sciences such as anthropology, sociology, and economics will also be addressed.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to write two essays per term and may be asked to give seminar presentations.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful background readings are:
The Philosophy of Social Science Reader (Francesco Guala and Daniel Steel, eds); D Little, Varieties of Social Explanation; A Rosenberg, Philosophy of Social Science; M Hollis, The Philosophy of Social Science; B Skyrms, Evolution of the Social Contract. A useful anthology is M Martin & L McIntyre (Eds), Readings in the Philosophy of Social Science.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the LT.

PH413
Philosophy of Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Joseph Mazor CONNAUGHT 3.01 and Dr Alexander Voorhoeve LAK 401

Availability: This course is available on the MRes in Economics (Track 1), MSc in Economics and Philosophy, MSc in European Studies: Ideas, Ideologies and Identities, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Economics A (EC100).
Intermediate microeconomics and/or public economics recommended (but not required) for the material in the Michaelmas term of the course.

Course content: The first term, ‘Welfare Economics’, covers several topics in the analysis of public policy, including efficiency and its critics; optimal taxation and its critics; cost-benefit analysis; public goods; externalities; fair prices; paternalism and behavioural economics. The second term has three parts.

Part A, ‘The Value of Economic Models’ focuses on questions in the philosophy of science, including, ‘Does it matter that economic models have false assumptions?’; and ‘What makes for a good (or bad) model?’

Part B, ‘Markets and Morals’, covers key historical thinkers (including Hume and Marx) on the moral advantages and disadvantages of market institutions. It also covers contemporary debates on the moral limits of markets, focusing especially on the question which goods ought (not) to be for sale.

Part C: ‘New Research’ focuses on new interdisciplinary research.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT, 1 essay and 1 presentation in the LT and 1 presentation in the ST.

Assessment: Exam (65%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH415
Philosophy and Public Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Alexander Voorhoeve LAK.401

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is available on the MSc in Economics and Philosophy and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as: 1. What is well-being, how is it measured, and how should it be measured? 2. When, if ever, is paternalism justified? 3. What is the role of personal responsibility in determining people’s claims on public resources? 4. What are the moral limits of markets? 5. When, if ever, is equality in the distribution of goods (such as health, income, or well-being) important? 6. How should we evaluate risks of harm and chances of benefit to people? 7. What are our rights to freedom of expression? 8. What are our rights against being harmed and to harm others in war? 9. Do we have a right to privacy? 10. What are our moral obligations to animals?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT and 1 essay and 1 exercise in the LT.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH416
Philosophy, Morals and Politics

This information is for the 2015/16 session.

Teacher responsible: Professor Michael Otsuka LAK.3.03 and Dr Susanne Burri LAK.4.02.

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of the Social Sciences and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Michaelmas Term: Morals (Michael Otsuka weeks 1-5; Susanne Burri weeks 6-10)

In weeks 1-5 of MT, Michael Otsuka will discuss the ethics of harming and saving from harm: (i) Should one save the greater number from harm?; (ii) Can contractualism justify the saving of the greater number when and only when we ought to?; (iii) Should one be solely concerned with how badly off people are, or should one also care about inequality?; (iv) Does it make a moral difference that a person is less well off than she could have been? (a.k.a. ‘the non-identity problem’); (v) Why is it permissible to divert a tram so that it runs over one rather than five, whereas it is impermissible to kill a single individual in order to redistribute his vital organs to save the lives of five? (a.k.a. ‘the trolley problem’).

In weeks 6-10 of MT, Susanne Burri will cover the following topics: (vi) Kantian moral theory I: the project of the Groundwork and the
PH419
Set Theory and Further Logic
This information is for the 2015/16 session.
Teacher responsible: Prof David Makinson LAK3.06
Availability: This course is available on the MPhil/PhD in Philosophy of the Social Sciences, MSc in Economics and Philosophy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Introductory level logic.
Course content: The aim of the course is to help students of philosophy become familiar with naive set theory, classical logic, and modal logic. From set theory, the course covers both ‘working’ set theory as a tool for use in formal reasoning, and some ‘conceptual’ set theory of philosophical interest in its treatment of infinite sets, cardinals and ordinals. From classical logic, the course deals with propositional and first-order inference from both semantic and axiomatic viewpoints, with also some material on first-order theories including celebrated theorems of Tarski and Gödel. The material on propositional modal logic presents the main axiomatic systems and their analysis using relational models. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one, 1,500 word essay on a topic from a list or proposed by the student and approved by the instructor.
Indicative reading: Textbooks: Makinson, David 2012 Sets, Logic and Maths for Computing, 2nd edition. Springer; Cameron, Peter 1999 Sets, Logic and Categories. Springer; Sider, Theodore 2010 Logic for Philosophy. Oxford University Press. Remark: Specific sections of these three textbooks that are relevant to the weekly topics will be indicated on the Moodle page for the course.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH421
Dissertation Seminar - Philosophy and Public Policy
This information is for the 2015/16 session.
Teacher responsible: Dr Susanne Burri
Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is not available as an outside option.
Course content: Aim: This course is intended to develop the ability to write a structured philosophical essay and serves to prepare students in the MSc Philosophy and Public Policy for dissertation writing.
Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.
The course starts with a five hour module on argumentative writing in philosophy (weeks 1-5). This is followed by three hours on researching philosophy journals, referencing, and the art of writing a dissertation (weeks 6, 8, and 10). During the last six weeks, students will do presentations of their prospective thesis work (two hours per week). In the remaining weeks, students will (i) take on training sessions across the School that will benefit their careers, and (ii) talk one-on-one to the course leader about their thesis research (1 hour).
**PH422**  
**Dissertation Seminar - Philosophy of Social Science**  
This information is for the 2015/16 session.  
**Teacher responsible:** Prof Jason Alexander  
**Availability:** This course is compulsory on the MSc in Philosophy of the Social Sciences. This course is not available as an outside option.  
**Course content:** The course is intended to develop the ability to make philosophical arguments and to write structured philosophical essays. It will serve to prepare students for research and writing their dissertation. In Lent term, seminars will cover topics that are chosen by MSc students for their theses. In Michaelmas term, the early meetings will discuss the structure and content of an MSc dissertation in Philosophy, the grading rubric used for marking dissertations. The remainder of Michaelmas term will cover some core topics in the philosophy of social science, such as: methodological issues such as the use of mathematical models in the social sciences, methodological individualism and its rivals, collective intentionality and the autonomy of the social sciences.  
**Teaching:** 10 hours of seminars in the MT, 20 hours of seminars in the LT.  
**Formative coursework:** A number of assignments whose completion will aid the writing of the dissertation will be set over the course of MT and LT.  
**Assessment:** This course is not assessed.

**PH423**  
**Scientific Method and Policy**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Katie Steele  
**Availability:** This course is compulsory on the MPhil/PhD in Philosophy of the Social Sciences. This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit. The course is also open to all LSE MSc and research students.  
**Course content:** Policy decisions should be responsive to our best evidence. But what does this mean? How should we negotiate conflicting sources of evidence? And whose responsibility is it to link policy and evidence?  
These questions reflect the two main topics of the course. The first topic concerns the quality, strength and relevance of the available evidence with respect to a given policy question. This is a central issue in the 'evidence-based' policy-and-medicine movement. Are randomised controlled trials really the gold standard? Can evidence be statistically significant without being scientifically or practically significant, and vice versa? What is the role of quantitative versus qualitative evidence in establishing causal claims? How do general causal laws bear on individual cases, and vice versa? Can some evidence be disregarded due to cultural and political biases?  
The second topic concerns the roles and responsibilities of scientists, policy-makers and citizens alike in enhancing evidence-based policy making. What does it mean to say that there is a scientific consensus? Does expert knowledge of scientists constitute a threat to democratic processes? What is the 'precautionary principle' and does it provide a way forward when there is little evidence available? To what extent should individual rights be compromised to enable scientific research? What issues arise when scientists interpret and measure ethically-loaded concepts like poverty, wellbeing or bio-diversity? Is science a 'public good' and what does this mean for how it should be managed?  
Examples referred to in the course are drawn from various areas of science in policy-making, including climate, conservation, international development, poverty, education, and health.  
**Teaching:** 10 hours of lectures and 15 hours of seminars in the MT.  
**Formative coursework:** Students will be expected to produce 3 essays and 1 presentation in the MT and LT.  
**Assessment:** A detailed reading list will be provided at the beginning of the course. Useful background readings are:  
**Assessment:** Exam (67%, duration: 2 hours) in the main exam period.  
Essay (33%, 2000 words) in the ST.

**PH425**  
**Half Unit**  
**Business and Organisational Ethics**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Susanne Burri  
**Availability:** This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Economics and Philosophy, MSc in Management, MSc in Management of Risk and Finance, MSc in Management and Regulation of Risk, MSc in Management of Information Systems and Digital Innovation, MSc in Management, Organisations and Governance, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences, MSc in Public Management and Governance and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.  
**Course content:** This introductory course to business and organisational ethics introduces different approaches to normative theorising, explains how these approaches relate to standard ways of managerial and economic decision-making, and discusses to what extent business professionals should think of themselves as bound by moral requirements. The course is divided into three parts. The first part raises normative questions about the structure in which firms operate, including questions about the proper scope of markets and distributive justice. The second part outlines a framework for incorporating moral principles into the decision-making of business professionals. The third part focuses on firms and corporations as units of moral concern, with a particular focus on their role in international and global affairs. Topics discussed include the significance of international labour standards, how business professionals should respond to practices like bribery and insider trading, and how responsibility is properly distributed between corporate and individual actors.  
**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT.  
**Formative coursework:** One essay of 2000 words.  

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH427 Half Unit
Genes, Brains and Society

This information is for the 2015/16 session.

Teacher responsible: Andrew Buskell.

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None.

Course content: This course introduces issues in bioethics, neuroethics, philosophy of biology, and philosophy of psychology. It demonstrates how philosophical tools can help make sense of the complex problems arising at the intersection of human beings’ evolved nature and the social structures humans have erected. The course will challenge conceptions as to what human beings are, and what we, as human beings, might ultimately be responsible for.

Topics covered include:

- Human nature: Does the concept of ‘human nature’ have any biological basis? Can we distinguish between those traits that are part of ‘human nature’ and those which are not? What might the evolutionary history of human beings as social agents have to tell us about ‘human nature’?

- Disability: How do we determine whether an individual is disabled or not? Does the recognition of an individual as disabled change their moral status? Does society bear some responsibility for the care of disabled individuals, and in what way?

- Sex and gender: Are ‘sex’ and ‘gender’ the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are they explained by genes or by culture? And should we reconcile ourselves to these differences, or should we try to eliminate them?

- Race: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of ‘race’ have a future, or will human societies soon become racially undifferentiated?

- Responsibility and Social Structure: Are problems with racism, sexism, and disability systemic, societal problems? Or, by contrast, are they the result of biased, racist, and sexist individuals? How are we to react to changes in society on these different conceptions of the root cause(s)?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: One Essay (2000 words)

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words).

PH428 Half Unit
Emotion, Cognition and Behaviour: Science and Policy

This information is for the 2015/16 session.

Teacher responsible: Andrew Buskell

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to the (i) philosophical and (ii) scientific foundations of contemporary cognitive science with a particular focus on its (iii) ethical, social and political implications. No background in either philosophy or cognitive science is required.

Topics covered include:

Part I: Kinds of Minds

- Animals and associations: What kind of cognitive capacities do we share with animals? Which of these capacities, if any, are still operational in human thought? Might human cognition be simpler than we suppose?

- Thought as computation: What does it mean to say that thought is ‘computational’? What is getting computed, and how? Are there limits to the ‘computer’ analogy?

Part II: Modelling Minds

- ‘Dual-process’ theories of cognition: Do cognitive processes come in ‘fast’ and ‘slow’ varieties? Is the mind partitioned into two systems? Or is the true picture more complicated than this?

- The boundaries of thought: Are thoughts wholly ‘in the head’? How might they extend beyond it? Where does cognition begin and end?

Part III: Implications and Applications

- Emotion and morality: Is explicit moral reasoning nothing more than the after-the-event rationalization of snap judgements made in the emotional heat of the moment? If so, where does that leave ethics?

- Implicit bias: Could we be unaware of our own racial and gender biases? Are we responsible for the decisions they influence? And is there anything we can do about them?

- Happy societies: Should policymakers attempt to increase or improve the happiness of society? What might this mean, and how would we go about enacting such a policy?

- Cognitive enhancement: What are the prospects for enhancing human cognitive capacity by technological means? What are the ethical limits? Are there any?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: One 2,000 word formative essay and comments on a draft of the assessed essay.

Assessment: Exam (67%, duration: 2 hours) in the LT week 0.

Essay (33%, 2000 words).

PH429 Half Unit

Global Justice

This information is for the 2015/16 session.

Teacher responsible: Dr Alice Obrecht

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course addresses normative challenges that arise from globalization with a particular focus on the global economy. In doing so it raises foundational questions in moral and
political philosophy (e.g., about the grounds and scope of justice), it reflects questions of method (e.g., about how to do empirically informed normative theory able to guide the action of real world actors), and tackles applied public policy issues (e.g., of how to make the international financial system more just). The course is divided into three parts. The first part examines how principles and values traditionally used to morally assess the political and economic institutions of domestic society apply beyond the nation state. The questions discussed include: What are normatively significant differences between the domestic basic structure and the international order? Do conditions of coercion or reciprocal cooperation give rise to obligations of distributive justice? Do individuals possess human rights simply in virtue of being human, or should we think of such rights as arising within particular political practices? The second part focuses on particular aspects of global capitalism and its institutions. Beginning with the problem of global poverty, which raises empirical and normative questions about the nature of both the interactions and obligations between various actors in the global economy, the course explores what moral principles apply to the practice of global trade, the international financial system and the distribution of natural resources. The third part explores different ways of bringing the global economy in line with the normative requirements that apply to it. Particular attention will be given to questions like: What is the promise of international taxation as an instrument for making the global order more just? Under what circumstances, if any, may the victims of global injustices resort to violence and war as a means of bringing about justice? How should policy makers balance the need for short-term improvements with the aspiration of long-term transformation? Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Formative coursework: 1 formative essay (2000 words). Indicative reading: Dobos, Ned, Christian Barry, and Thomas Pogge (eds.), Global Financial Crisis: The Ethical Issues, Palgrave Macmillan, 2011; James, Aaron. Fairness in Practice: A Social Contract for a Global Economy. Oxford University Press, 2012; Risse, Mathias. On Global Justice. Princeton University Press, 2012; Ronzoni, Miriam. “The Global Order: A Case of Background Injustice? A Practice-Dependent Account.” Philosophy & Public Affairs 37, no. 3 (2009): 229-256; Sangiovanni, Andrea. “The Irrelevance of Coercion, Imposition, and Framing to Distributive Justice.” Philosophy & Public Affairs 40, no. 2 (2012): 79-110. Assessment: Exam (67%, duration: 2 hours) in the week of Essay (33%, 1500 words) in the Week 11.

PH431 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2015/16 session.

Teacher responsible: Dr Bryan Roberts LAK 5.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving about randomly. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance. Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? What role should analogy play in physical and financial modelling?

The course will proceed at a conceptual level that is suitable for students of all backgrounds. We begin by introducing the concept of atoms and of the random walk, and investigate the role it played in the development of quantum theory and particle physics. We then explore how random walks and other models used in physics are applied in financial models, and analyse some of the philosophical issues underlying this practice.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: One essay outline. Weekly problem sets and short discussion questions submitted through Moodle and for review in classes.
Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include Norton, John D. Einstein for Everyone (chapters 34-37), Derman, E. My Life as a Quant (excerpts), Weatherall, James O. The Physics of Wallstreet. (excerpts), Mirowski, Phillip. More Heat than Light (excerpts).
Assessment: Exam (67%), duration: 2 hours) in the main exam period.
Essay (33%, 1500 words) in the Week 11.

PH445
Dissertation Seminar - Philosophy of Science
This information is for the 2015/16 session.
Teacher responsible: Prof Richard Bradley, and Prof Miklos Redei
Availability: This course is available as an outside option to students on other programmes of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.
Course content: The course is intended to develop the ability to construct sharp analytic philosophical arguments and to write structured philosophical essays. It will help students to choose the topic of their dissertation, help with how to go about researching the topic and how to write the dissertation (by presentation and criticism of preliminary drafts). The course starts with reviewing the structure and content of an MSc dissertation in Philosophy, the requirements of, and grading scheme used for marking dissertations. This is followed by presentations by students on topics intended as possible topics of their dissertations. The presentations will be extensively discussed in the seminar by fellow students and in subsequent private meetings with the seminar leader. In the Lent Term each student will read two former MSc dissertations with topics close to the interest of the student, and each student will report in the seminar on the merits and weaknesses of the selected works, trying to understand why the chosen dissertations received the marks they did. In the final part of the seminar students will again give presentations on the progress of their research.
Teaching: 10 hours of seminars in the MT. 15 hours of seminars in the LT.
Formative coursework: A number of assignments - at least one per term - whose completion will aid the research into and writing of the dissertation will be set.
Assessment: The course is not assessed.

PH456
Rationality and Choice
This information is for the 2015/16 session.
Teacher responsible: Prof Richard Bradley
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course examines the theory of rationality and rational decision making. It is in two parts (i) Probability and Decision: Probabilistic thinking, different interpretations of probability, decision making under risk, ignorance and uncertainty, the measurement of belief and desire, paradoxes of expected utility theory. (ii) Game Theory and Social Choice: Solution concepts for games, backward induction and hypothetical reasoning, bargaining theory, Arrow's Theorem, the Gibbard-Satterthwaite theorem, interpersonal comparability and Utilitarianism.
Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will submit a piece of written work each term and/or complete a number of exercises.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH499
Dissertation
This information is for the 2015/16 session.
Teacher responsible: Prof Jason Alexander, Dr Susanne Burri, Prof Richard Bradley and Prof Miklos Redei
Availability: This course is compulsory on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.
Course content: Students are required to write a 10,000-word dissertation (7,000 for MSc Economics and Philosophy) on a topic within the field covered by their course of study and approved by the Department of Philosophy, Logic and Scientific Method.
Assessment: Dissertation (100%, 10000 words) in the LT. The course is assessed 100% by Dissertation. Dissertations must be submitted on a specified date in September in the academic year registered. (Part-time students are required to submit their dissertations in the September of their second year of part-time registration). All details are given in the Departmental course booklet.

PS400
Contemporary Social and Cultural Psychology
This information is for the 2015/16 session.
Teacher responsible: Prof Sandra Jovchelovitch QU.3.25
Availability: This course is compulsory on the MSc in Social and Cultural Psychology. This course is available on the MPhil/PhD in Social Psychology. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Selected topics in cultural and modern social psychology. The relationship between mind, society and culture; the relationship between the individual and society; social and cultural psychology in historical perspective; epistemological issues in social and cultural psychology; self; society and social identities; consciousness; language and communication; attribution theory; psychoanalytic approaches to culture and society, social representations, beliefs and attitudes; the relations between culture and psychology; cognition and culture, applied aspects of social and cultural psychology.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Students’ taking PS400 will also be required to attend PS443 lectures, 10 x 120 mins (MT), and 9 x 60 mins discussion groups.
Formative coursework: Students will be expected to produce 1 essay in the MT.

**Assessment:** Exam (30%, duration: 1 hour and 30 minutes) in the LT week 0. Essay (70%, 5000 words) in the MT.

---

### PS404 Organisational Social Psychology

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Tom Reader QUE.3.10 and Dr Lucia Garcia QUE.3.23

**Availability:** This course is compulsory on the MSc in Organisational and Social Psychology. This course is available on the MPhil/PhD in Social Psychology and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course addresses both the social psychology of organisations and social psychological processes within organisations. It also provides multidisciplinary coverage of the organisational contexts in which social psychologists may work in a variety of professional domains. A basic familiarity with social psychological methods is assumed, but their application within organisational processes and contexts will be examined in detail within the course. Issues and techniques in organisational analysis, decision-making and change management are covered with emphasis on their social psychological aspects.

Lectures/seminars in the MT: These will cover key social psychological concepts and theories and their application to the understanding of organisations and the implementation of change processes. The specific topics covered include: 1) Introduction: critique of the tradition and logic underlying organisational psychology; history and frameworks in organisational analysis; “Scientific” management; Taylorism and Fordism; the Human Relations movement and the Socio-Technical approach; 2) Frameworks for analysis: for example, the cultural image of organisations; culture and identity in organisations; power, knowledge and organising; 3) People organising: for example, motivation; work groups and teams; decision-making; leadership, networking and collaborative work; 4) Implications for practice: for example, managing organisational change. Professional Seminar Series in the MT: These will centre on discussion of practical and research applications in domains where organisational social psychological investigation and analysis may play a leading role. Each topic will be presented by an external expert working practically in the domain.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the MT. Students taking PS404 will also be required to attend PS443A lectures 10 x 120 minutes (MT) and seminars/discussion groups 9 x 60 minutes (MT).

**Assessment:** Exam (30%, duration: 1 hour and 30 minutes) in the LT week 0. Essay (70%, 5000 words) in the MT.

---

### PS409 Political Psychology of Intercultural Relations

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Caroline Howarth STC.384

**Availability:** This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students from all departments may attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible

**Course content:** The course demonstrates the importance of a Political Psychological perspective for the understanding of intercultural relations in general, with a particular focus on multiculturalism, politicised identities, ideologies of nationalism, racialised poverty, institutionalised discrimination and intercultural dialogue. The central issues we shall examine across an array of contexts are: what is the connection between politics and psychology within everyday encounters; what is the relevance of politics in intercultural relations and for systems of everyday knowledge about belonging, nationhood and cultural communities; what are the psychological consequences of exclusion, discrimination and inequality; what are the psychological processes involved in systems of social and political change? Theories of social representations, identity, discourse, contact, acculturation, community resilience and reconciliation will be covered. Lecturers aim to achieve a balance between theoretical and applied issues, in the interests of critically investigating the ways in which conceptual tools can enhance our own understanding of intercultural relations and systems of inequality, and also contribute to broader social and political debates. We aim to establish an account of intercultural relations that connects the political (the ideological, the structural, the discursive) and the psychological (identity, representation and agency). We apply this critical political psychological account of production and consequences of cultural difference to the contexts of politics, community, education and everyday life in general, and examine the possibilities for productive intercultural contact, dialogue and engagement.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** A written assignment (maximum 1000 words). This will consist of an outline and short section of the summative assignment.

**PS410 Half Unit Social Representations**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Sandra Jovchelovitch QUE.3.25

**Availability:** This course is available on the MSc in Culture and Society, MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** To acquaint students with the theory of social representations and its multiple fields of application emphasising how it contributes to the understanding of the production, transformation and contestation of knowledge systems in the contemporary world.

This course provides students with extensive knowledge of the theory of social representations. This is a theory of both social knowledge (highlighting the construction, negotiation and contestation of different knowledge systems) and social change (highlighting the interplay between social and community identities and relations of power). The course covers 4 parts. 1: The theory of social representations and its history, covering the theory’s ancestors (Durkheim, Weber, Piaget, Vygotsky, Lévy-Bruhl and Freud) and recent developments. 2: Classical studies in social representations - their methodology and findings, including representations of madness, psychoanalysis, health and illness, the environment and nature. 3: Fields of application, covering health, community, education, multiculturalism, and racism. 4: Criticisms and points of development, including critiques of the theory, the relationship between theory and method and the critical development of the theory.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** An essay plan of not more than 500 words is required.

**Assessment:** Coursework (100%, 3000 words) in the ST.

**PS411 Half Unit Not available in 2015/16 Current Communication Research**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Martin Bauer COL.B04

**Availability:** This course is available on the MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology or communications component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.

**Course content:** The course content is changes every year. It can either be a full thematic course or a collection of current research topics, and will involve contributions of staff members from the Institute of Social Psychology and of visiting academics to the institute. The idea is ‘research-led teaching’ and to offer an opportunity to bring front-line communication research into the class room.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Indicative reading:** Indicative readings will be made available during MT

**Assessment:** Essay (100%, 3000 words) in the ST.

**PS415 Half Unit The Social Psychology of Economic Life**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Frederic Basso, QU.3.14

**Availability:** This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Organisational and Social Psychology, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology or media component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.

**Course content:** The course takes the position that social psychology is the key to understanding real-world economic life by taking in account cognitive, affective and social processes. Cognitive side of economic life (decision-making, bounded rationality, biases, heuristics, framing, mental accounts, animal spirits, emotions, irrationality, metaphors, stories). Social-psychological side of economic life (mind-reading, experimental economics, gift giving, dramaturgy, social roles, face, emotional labour/dissonance, social norms, nudging). Symbolic dimensions of economic life (disenchantment of the economic world, post-modern hyper realities, social exclusion, prosocial behaviour, poverty, stigma, resistance to persuasion (inertia, scepticism, reactance), resistance to consumption (avoidance, minimisation, boycott/active rebellion).

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are of general use; S E G Lea, R M Tarpy & P Webley, The Individual in the Economy, Cambridge University Press, 1987; A Lewis, P Webley & A Furnham, The New Economic Mind: The social psychology of economic behaviour, Harvester, 1995.

Assessment: Essay (100%, 3000 words) in the ST.

PS418 Half Unit
Health Communication

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Campbell QUE.3.08

Availability: This course is available on the MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health, Community and Development, MSc in Media, Communication and Development, MSc in Organisational and Social Psychology, MSc in Population and Development, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The application of social psychology to the challenges of health communication in its social context. Communicating about health and well-being (physical, mental and social), viewing the individual (i) as a bio-psycho-social system, (ii) located within workplaces/communities/local and global cultures/unequal power hierarchies, (iii) often in rapidly changing social settings. Theoretical debates about determinants of health-related behaviours, the nature of health communication, and the processes through which communication impacts on health. Contributions of socioloy, anthropology and media studies to social psychological understandings of health and communication. Implications of these debates for health promotion campaigns and policies (information-based campaigns, social development approaches, public health policy). Doctor-patient relations. Patient care in hospital settings. Mental ill-health and psychotherapy. Patient movements. Mediated health communication (advertising, citizen journalism, blogging). The internet and health. Communication for social development. Community participation, dialogue and alliances. Communication via visual images. Gender, empowerment and social change. Local and global health advocacy. International social movements and networks.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Assessment: Essay (100%, 3000 words) in the LT.

PS421 Half Unit
Issues in Social Psychology: Group Dynamics

This information is for the 2015/16 session.

Teacher responsible: Dr Ilka Gleibs QUE.3.21

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology component may attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible.

Course content: PS421 teaches on theory and research from the field of social and organisational psychology. We will cover past and present theories of group dynamics by introducing concepts used by psychologists to understand and improve group behaviour. It applies group dynamics theories to explain real-life examples and experiences. Students will be encouraged to take a critical perspective, and to consider how the principles taught in the course can be applied to a variety of social or organisational scenarios. The course will cover following topics:a) Introduction to group dynamics; b) Kurt Lewin on group dynamics; c) Unconscious in the group (Bion, Foulkes, Freud, etc.) I and II; d) Shared mental models and team cognition; e) Leadership in groups; f) Groups and identity; g) New working environments and virtual identities; h) Intergroup Behaviour in group: project teams and partnership; i) Group dynamics today.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Assessment: Essay (100%, 3000 words) in the ST.

PS428 Half Unit
Knowledge Processes in Organizations

This information is for the 2015/16 session.

Teacher responsible: Dr Lucia Garcia-Lorenzo QUE.3.23

Availability: This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Other students on degrees without a psychology or management component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible for the course.

Course content: The course focuses on how people work together in a number of contexts, from project teams within particular organisations to inter-organisational networks and alliances from the perspective of organisational knowledge. It offers students a theoretical and practical understanding about how organisations construct, disseminate and share knowledge in those settings. The focus is both theoretical and practical. Students will be expected to engage with both current theoretical debates and emerging practical issues in organisational life.

The course will cover topics such as: Organisations in the knowledge economy, knowledge-intensive companies, organisational learning, communities of practice, storytelling as knowledge transmission, teams and project organisations, virtual spaces, networks, alliances and partnerships, collaborative work, innovation and knowledge creation, implications for research and practice.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Students will be expected to make extended use of the course intranet - for on-line discussions and group presentations.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are of general use; Castells, M. (1996) The Rise of the Network Society. Oxford: Blackwell; Czarniawska, B. (1998)

Assessment: Essay (100%, 3000 words) in the ST.

PS429

The Social Psychology of Communication

This information is for the 2015/16 session.

Teacher responsible: Dr Bradley Franks QUE.3.03

Availability: This course is compulsory on the MSc in Social and Public Communication. This course is available on the MPhil/PhD in Social Psychology, MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines core theories towards a social psychology of communication. Issues raised will refer to verbal and non-verbal, face-to-face, rumours and mass mediated, as well as private and public, communal and strategic forms of communication. The second half of the course will provide an overview of applied communication research in various professional areas of public communication. Theories of communication covered in the course include evolutionary theory, classical rhetoric, diffusion research, pragmatics and relevance theory, semiotics and system theory and the theory of communicative action. Issues will be raised as to the critical analysis and the design of communicative action. Issues will be raised as to the critical analysis and the design of communication efforts in professional fields such as business corporations, NGOs, scientific professional bodies, health promotion, governments and political parties, police campaigns, and international organisations.

Teaching: 30 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the MT.

Students taking PS429 will also be required to attend PS443A lectures and discussion groups (PS443A lecture 10 x 120 mins (MT) and 9 x 60 mins discussion groups).

Formative coursework: Students’ will complete one formative assignment in the MT.

Indicative reading: No one book covers the entire syllabus; students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Exam (30%, duration: 1 hour and 30 minutes) in the LT week 0.

Essay (70%, 5000 words) in the MT.

PS438 Half Unit

Corporate Communications

This information is for the 2015/16 session.

Teacher responsible: Dr Ben Shenoy, QUE.3.13.

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from other programmes may access this course subject to availability.

Course content: The different activities encompassed by the concept of corporate communication affect each one of us in various guises: as employees, customers, citizens, investors or, more generally, as observers of today’s world. It is therefore essential to develop a critical understanding of the different practices associated with corporate communication. Future practitioners also need this critical perspective so as to understand better the challenges involved in the development and implementation of corporate communication programmes.

The objectives of the course are two-fold: 1) to provide an introduction to corporate communication, here understood as a set of activities undertaken by organisations in order to establish favourable corporate images and reputations with all of an organisation’s stakeholder groups; and 2) to underline how a better understanding of key social psychological concepts can contribute to the overall management and effectiveness of organisations and corporate communication.

Teaching: 15 hours of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

PS439  Half Unit  Not available in 2015/16
Science, Technology and Resistance
This information is for the 2015/16 session.
Teacher responsible: Prof Martin Bauer COLB.04
Availability: This course is available on the MSc in Culture and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Organisational and Social Psychology, MSc in Regulation, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: In this course we will analyse functionally how resistance, expressed in public opinion as the interplay of mass media, public perceptions and activism, impact on technological trajectories. New technology is neither good nor bad, nor is it neutral. It is a negotiated project, a growing web of engineers, lawyers, regulators, users etc, in a dynamic configuration of ideas, materials, affiliations and dissent. The discussions explore issues leading toward a social psychology of objectification. Specific content will include: Public opinion and representations of science and technology make and brake technological projects such as nuclear power, information technology, genetic engineering and nanotechnology. While being partially supportive, public opinion often resists: why and to what effect? This is modelled in analogy to 'acute pain' (Bauer, 1991, 1997). We will explore conceptions of 'resistance' in psychotherapy, attitude research, rural studies, risk analysis and communication, media perfect studies, group dynamics, public understanding of science, and studies of social influence. Students are expected to appreciate theory driven empirical research.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Assessment: Essay (100%, 3000 words) in the ST.

PS443  Half Unit  Not available in 2015/16
Societal Psychology
This information is for the 2015/16 session.
Teacher responsible: Prof Catherine Campbell QUE.3.08
Availability: This course is compulsory on the MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.
This course is a compulsory component of courses: PS400 Contemporary Social and Cultural Psychology; PS404 Organisational and Social Psychology; and PS429 The Social Psychology of Communication.
Course content: What is the relevance of Societal Psychology for social science? How is it useful for the study of organisations, intercultural relations, health, community development and communication? Each week we tackle key debates for the social sciences through an examination of central theories in Societal Psychology. For example we ask: How is human consciousness possible? Is intergroup conflict inevitable? Are there cultural differences in how we think? Do we practice what we preach? Can a minority change the opinions of a majority? Do certain organisations produce good leaders? Would designing social spaces differently change social behaviour? These questions are addressed though the introduction of the main theories of Societal Psychology, theories on consciousness, social identity, intergroup relations, attitudes and behaviour, social representations, social influence, language, leadership and social design. The course is aimed at MSc students with little or no background in Societal Psychology but will also include advanced material and critiques for students who want to study topics in-depth.
Teaching: 20 hours of lectures and 9 hours of seminars in the MT. 20 hours of lectures and 9 hours of seminars/discussion groups in the MT.
Formative coursework: Students will be expected to produce 1 case study in the MT.
Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the LT week 0. The summative assessment for this course is taken in conjunction with the coursework essay for the courses PS400, PS404 and PS429. The coursework essay for these courses is weighted at 70% of the summative total with the PS443 component the remaining 30%.

PS443A  Societal Psychology
This information is for the 2015/16 session.
Teacher responsible: Prof Catherine Campbell QUE.3.08
Availability: This course is compulsory on the MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.
This course is a compulsory component of courses: PS400 Contemporary Social and Cultural Psychology; PS404 Organisational and Social Psychology; and PS429 The Social Psychology of
Communication.

Course content: What is the relevance of Societal Psychology for social science? How is it useful for the study of organisations, intercultural relations, health, community development and communication? Each week we tackle key debates for the social sciences through an examination of central theories in Societal Psychology. For example we ask: How is human consciousness possible? Is intergroup conflict inevitable? Are there cultural differences in how we think? Do we practice what we preach? Can a minority change the opinions of a majority? Do certain organisations produce good leaders? Would designing social spaces differently change social behaviour? These questions are addressed through the introduction of the main theories of Societal Psychology, theories on consciousness, social identity, intergroup relations, attitudes and behaviour, social representations, social influence, language, leadership and social design. The course is aimed at MSc students with little or no background in Societal Psychology but will also include advanced material and critiques for students who want to study topics in-depth.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 case study in the MT.

Assessment: Exam (100%, duration: 1 hour and 30 minutes) in the LT week 0.

The summative assessment for this course is taken in conjunction with the coursework essay for the courses PS400, PS404 and PS429. The coursework essay for these courses is weighted at 70% of the summative total with the PS443 component the remaining 30%.

PS445 Half Unit

Organisational and Social Decision Making

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Reader QUE.3.10

Availability: This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management Science (Decision Sciences), MSc in Organisational and Social Psychology, MSc in Public Management and Governance, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on degrees without a psychology component may only attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible. This course is capped at 25 students.

Course content: In recent years, much has been made of the demise of the traditional work organisation and with it, traditional organisational life. In popular rhetoric, globalisation, the rise of the knowledge economy, ICT and the credit crunch have all trumpeted the dawn of a very different world. The reality of the situation would seem to be far more complex.

PS446 Half Unit

Issues in Organisational and Social Psychology: Organizational Life

This information is for the 2015/16 session.

Teacher responsible: Mr Barry Rogers, QUE 3.15

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on degrees without a psychology component may only attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible. This course is capped at 25 students.
So how do we understand and explain this complexity? This basic question has prompted huge soul searching within the social sciences as comfortable assumptions about the analysis of our world have been shown wanting. For many the current behavioural ‘turn’ throughout many of our disciplines act as an alternative lens for making sense of our reality - this has as its core the tools and approaches of social psychology.

The aim of the course is to give a social psychological perspective on the elements of continuity and change surrounding contemporary organisational life. It will focus in particular on the blurring of boundaries within our key organisational relationships: with employees, customers, clients, and stakeholders. Its primary objective is to facilitate students in developing a critical and reflective understanding of these emerging processes.

The course is informed throughout by a dual mandate. A rigorous approach to theory will be developed within the context of contemporary organisational issues, and current topics of debate. This essential relationship between theory and practice is a central feature of the course - outside speakers and practitioners are used throughout to supplement the learning for each topic and various forms of social media are employed to connect with an extended community of practice.

The course will address emerging organisational questions such as:
- Perspectives: how do we make sense of the complexity of organisational life?
- Why do we work? How do different generations engage with work?
- The rise of the BlackBerry: have we moved from the workplace to the 24/7 workspace?
- Organisational time: is work life-balance a pipe dream?
- After multiculturalism where now for organisational equality, diversity and inclusion?
- Corporate Social Responsibility: how do organisations relate to wider stakeholders?
- Customer, client or ‘partner’? Co-creation as the dynamic for growth.
- Beyond the ‘ivory tower’: how do we relate organisational theory to practice?

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** One formative piece of coursework to be submitted in the LT.

**Indicative reading:** Detailed references and class topics are distributed in the first lecture of the series. The following represents some key readings from the course:

**Assessment:** Essay (100%, 3000 words) in the LT.

---

**PS451**  Half Unit

**Cognition and Culture**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Bradley Franks QUE.3.03

**Availability:** This course is available on the MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Religion in the Contemporary World, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course examines recent directions in research relating to the relationships between mind and culture.

Specific content will include a variety of theoretical issues, for example: relationships between social facts and psychological facts; naturalistic and non-naturalistic concepts of culture; symbolic culture; cultural relativity and universals; evolutionary and developmental constraints on the relations between mind and culture; communication, cultural transmission and change. These issues will be discussed with reference to specific domains of investigation, such as: emotions, representations of religion, race and natural kinds; pragmatics and communication; and social divisions of labour in meaning and representation, including deference and expertise.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Will consist of a formative essay plan.

**Assessment:** Essay (100%, 3000 words) in the LT.

---

**PS456** Half Unit

**Consumer Psychology**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Serge Lahlou QUE.3.26, Dr Benjamin Voyer QUE.3.15, Dr Claudine Provencer KSW.5.04 and Dr Frederic Basso QUE.3.14

**Availability:** This course is available on the MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** Homo economicus (economic theories of consumption, state of the art); Homo sociologicus (sociology of consumption, state of the art); Homo emptor (traditional marketing-related theories such as attitudes, attitude change, persuasion, dissonance, anchoring, state of the art); Evolutionary psychology of consumers and citizens (competition and cooperation); Community and consumption (social identity theory, fads and fashion, alternative consumption patterns and boycott as resistance); Traditional socio-psychological theories of behavioural change.
(Lewin on change and action research; Kiesler, Joule and Beauvais on psychology of commitment); New theories of behavioural change and sustainable consumption (Lahlou’s installation theory; social representations); Alternative approaches to consumer psychology (community engagement, consumer culture theory); The future of globalization (globalisation, sustainability).

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Essay plan submitted in the LT.

**Assessment:** Essay (100%, 3000 words) in the LT.

---

**PS458** Half Unit

**Creativity and Innovation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Alex Gillespie QU.3.05

**Availability:** This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit. This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication.

**Pre-requisites:** An undergraduate degree in a social science related discipline or equivalent.

**Course content:** This course examines creativity and innovation from a social psychological standpoint. The first part of the course will examine creativity, focusing on the social conditions which lead to new ideas. The second part of the course will examine the way in which new ideas and technologies are instituted and resisted. The final part of the course will focus on imagination, the future, and utopias. Guiding questions will be: How do new ideas and technologies come about? What social contexts are conducive to creativity and innovation? Can the resistance to innovation lead to innovation? What is the human imagination? Why do humans enjoy play, games and fiction? What leads to insightful problem solving? And, how do we know if something new is creative, productive or useful? Should researchers be describing the world as it is, or imagining how it could be?

The course will cover the social conditions (i.e., face-to-face or online, one-to-one or group, autocratic or democratic, specialisation or integration, etc.) conducive to creativity and innovation, including the social conditions for socialisation creative individuals and the social and institutional factors which enable productive novelty to be recognised and instituted. Specific topics will include: theories of creativity, play & imagination, insight and problem solving, identifying good ideas, cultural evolution, the resistance to innovation, user innovation, utopias and how people imagine the future.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Assessment:** Essay (100%, 3000 words) in the LT.

---

**PS460** Half Unit

**Inter-cultural Relations and Racism**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Caroline Howarth STC.3.65

**Availability:** This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course demonstrates the importance of a Social Psychological perspective for research into inter-cultural relations and racism, with a particular focus on national and community identities, acculturation, multiculturalism, political change and collaboration across difference. Lecturers aim to achieve a balance between theoretical and applied issues, in the interests of critically investigating the way in which conceptual tools can enhance our understanding of the concrete social world.

We use a range of psychological theories: acculturation, contact, social identity, social representations, intersectionality, orientalism and conscientization. We explore the social and ideological production of cultural difference, exclusion and prejudice in ways that both highlight the role of history and politics in the social psychology of intercultural relations and also reveal the possibilities for agency, resistance, collaboration and transformation in contexts of (constructed) difference. Hence we establish an account of intercultural relations that connects the social (the ideological, the contextual, the structural, the cultural) and the psychological (subjectivity, agency, identity and representation). We apply this critical social psychological account of production and consequences of cultural difference to the contexts of politics, community, education and everyday life in general.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Indicative reading:** Ali, S. (2003) Mixed-Race, Post-Race: Gender,

Assessment: Essay (100%, 3000 words) in the ST.

---

**PS461 Not available in 2015/16**

**Health, Community and Development**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Catherine Campbell STC 303 and Dr Janevieve Mannell STC 367

**Availability:** This course is compulsory on the MSc in Health, Community and Development. This course is available on the MPhil/PhD in Social Psychology. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course examines the psycho-social determinants of community health and social development, in the context of health inequalities and social marginalisation in the global North and South. In particular it explores the role of participation, partnerships and collective action in facilitating health, well-being, the management of illness (including prevention, service access, care and treatment) and health-enabling social change. Attention is given to promoting behaviours that facilitate both physical and mental health and well-being more generally, viewing health as a phenomenon that spans the individual, community and social levels of analysis.

The challenges of facilitating health, and health-enhancing collective action, are explored with reference to social identities, social representations and local knowledge, dialogue, empowerment, critical thinking, gender, social capital and social change. All this material is contextualised within wider debates about the global nature of public health, mainstream vs. alternative development policy, the respective roles of local and global social movements, and the potential for participation to alleviate the negative health impacts of social inequalities. Particular attention is given to the links between health and inequalities related to poverty, gender and sexuality, ethnicity, age (children and the elderly) and disability. The over-riding ethos of the course is an interest in the links between theory and practice. Attention is given to providing students with actionable conceptual tools for the challenges of designing and evaluating community-focused programmes in the fields of public health, health promotion and health-supporting social transformation.

**Teaching:** 20 hours of lectures and 5 hours of seminars in the MT.

**Formative coursework:** A mini-essay submitted in MT.

**Assessment:** Exam (50%, duration: 3 hours) in the main exam period. Essay (50%, 5000 words) in the MT.

---

**PS462 Half Unit**

**Theory and Practice of Organisational Development**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Caryn Solomon QU3.15

**Availability:** This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

**Course content:** The organisation is a social system that is complex, dynamic and ever changing. This course attempts to explore the management of organisational change and development in a practical way. It does this by recognising that there are research-based methodologies for ensuring that the potential inherent in change is harnessed, and that the capacity and potential of the organisation, in the pursuit of a broad range of organisational objectives, are enabled. While it is informed by a number of key theoretical frameworks, Organisation Development comes into its own in application. The aim of the course, therefore, is two fold: first to explore the body of core theory underpinning the practice; second, to examine the practice of Organisation Development as a ‘process’ (not a ‘product’ or a ‘programme’) which fundamentally influences and is influenced by the specific organisational context within which it takes place. Drawing on key theoretical frameworks and the approaches of major practitioners, the course also examines a range of current, best practice socio-psychological interventions.
Students will be actively encouraged to relate key theoretical perspectives to organisational challenges covering a range of contemporary issues and contexts.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Assessment:** Essay (75%, 3000 words) and presentation (25%) in the ST.

---

**PS464 Half Unit Not available in 2015/16 Social Influence**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Martin Bauer B804

This is taught jointly with Dr Gordon Sammut, Lecturer at University of Malta, and Visiting Fellow to the Department of Social Psychology.

**Availability:** This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

**Course content:** This course explores the many modes and modalities of social influence which social psychology has studied and developed concepts for. Modalities of social influence cover processes by which social groups and actors influence private and public opinion, attitudes, social stereotypes, institute norms and ways of life, and achieve recognition and social change.

We will discuss the social psychological traditions of social influence analysis (such as rhetoric, crowd behaviour, public opinion, leadership, norm formation, majority and minority influence, resistance, obedience, persuasion, attitudes, mass media effects; inter-subjectivity and inter-objectivity). This discussion will unfold under three parallel perspectives: a) the theoretical and empirical grounding of models, b) the socio-historical context of developments; many social influence models came about in the context of Total War Propaganda of WWII and Cold War mobilisation efforts, and c) in the mirror of current developments which often deploy new language without necessarily treading new ground. The course will discuss contemporary ideas of social influence with reference to canonical paradigms in order to assess scientific progress of what often seems ‘old wine in new bottles’. The course builds a theoretical integration of modalities of social influence in the ‘cycle of normativity and common sense’ including processes of normalisation, assimilation and accommodation of social diversity (Sammut & Bauer, 2011). The moral ambiguity of social influence treads a fine line between promoting wellbeing and social recognition, and manipulating beliefs, opinion and attitudes.

This raises ethical issues involved in the study and exercise of social influence in the context of modern public spheres.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.

Teaching arrangement: the course will be taught as a combination of weekly lecture and discussion seminar. Participants are expected to prepare at least one seminar discussion.

**Formative coursework:** Students will be expected to produce 1 essay and 1 presentation in the LT.

Participants will contribute to the reading seminars with a presentation, and they will be able to present an essay plan for formative feedback before the end of term.

**Indicative reading:** Some key references:

- Billig M
- Habermas J
- Paicheler
- Pratkanis
- Sloane T ed Encyclopedia OUP
- Sammut DW eds Communication Palgrave pp87-106.

Each session will have its own particular readings, separated in essential texts and additional readings. This will be revised on an annual basis.

**Assessment:** Essay (100%, 3000 words) in April.

---

**PS497 Dissertation**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Frederic Basso QUE.3.14

**Availability:** This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

**Course content:** The dissertation is an empirical investigation, carried out by the student, under the supervision of a member of staff. Research topics and methodologies vary considerably, but they must relate to the student's MSc Programme. All dissertation topics will need to be approved by a supervisor who is a faculty member of the Department of Social Psychology. By the end of the Michaelmas Term students will be introduced to the Dissertation module and members of staff will outline the research areas in which they would be keen to supervise projects. In the first instance students should approach the member of staff whom they would like to be supervised by. Students then submit a Dissertation Plan, outlining their project, and the supervisor who they have discussed the project with. Students are then allocated to supervisors. The supervisor will advise the student, help provide information and bibliography, and provide feedback on the research.

**Teaching:** 16 hours across LT and ST consisting of group supervision, workshops and related research activities.

**Formative coursework:** Students will receive formative feedback from their supervisor on the following coursework (1,000 words): 1) A Dissertation Plan 2) A Dissertation Progress Report

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

---

**PS4A5 Methods for Social Psychology Research: Fundamental Qualitative and Fundamental Quantitative Methods**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Bradley Franks QUE.3.03

**Availability:** This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an
SA407  Half Unit
Financing Health Care

This information is for the 2015/16 session.

**Teacher responsible:** Prof Elias Mossialos COW.4.08

**Availability:** This course is compulsory on the MSc Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available on the MSc in Health, Population and Society, MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally. By the end of the course students will have:

- a grasp of the economic, political and philosophical concepts relevant to any discussion of health financing policy;
- a good understanding of how financing arrangements affect the achievement of key health financing policy goals such as financial protection, equity in financing and equity of access to health care, incentives for efficiency and quality in the organization and delivery of health services, administrative efficiency, transparency and accountability;
- the skills to critically assess current health financing arrangements and options for reform;
- an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; deciding what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

**Teaching:** 15 hours of lectures and 10 hours of seminars in the MT. In addition there will be a two-hour revision session in the MT and a two-hour revision session in the ST.

**Formative coursework:** Students will sit a one-hour progress test in the last seminar of term. This will involve writing an essay under exam conditions. Their seminar leader will mark the essay and provide a mark and written feedback by the beginning of the Lent Term.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
SA408  Half Unit
Health Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Alistair Mcguire COW.4.05

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc Health Policy, Planning and Financing, MSc in Health, Population and Society, MSc in Internal Health Policy and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course develops basic economic concepts as they are applied to the health sector, and provides for specialisation in health economics. Nature of health care as an economic commodity. How markets and insurance markets work, and how they can fail for health care and health care insurance. The economics of paying providers and different approaches taken by governments in different countries. Incentive mechanisms and Diagnostic Related Group payment schemes and yardstick competition. Labour markets in health care. Economic evaluation as a regulatory tool.

Teaching: 10 hours of lectures and 18 hours of seminars in the MT.

Optional Evening classes in Michaelmas Term Weeks 1-4 Revision session in the ST.

Formative coursework: In-class progress test in the MT.

Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, The Economics of Health and Health Care (3rd edn), Prentice Hall, 2001. Supplementary reading list: This is given at the beginning of the course and includes references to specialised texts and articles on each subject covered within the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA409  Half Unit
Social Security Policies

This information is for the 2015/16 session.

Teacher responsible: Dr Kitty Stewart OLD2.36

Availability: This course is available on the MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course analyses the purposes, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course – childhood, parenthood, old age – and from risk factors that will end up affecting only some – unemployment, sickness and disability. The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. The focus is largely on industrialised countries, but the course also touches on issues arising in delivering social protection in other parts of the world.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 2 hours of seminars in the ST.

Formative coursework: Seminar members will be expected to make one presentation to the seminar group and submit one written paper during the course of the term. Students will also be expected to come to seminars each week prepared to present on and debate the week’s key readings.

Assessment: Exam (75%, duration: 2 hours) in the main exam period. Essay (25%, 1500 words) in the LT.

SA427  Half Unit
Pharmaceutical Economics and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Panagiotis Kanavos COW.3.08

Availability: This course is available on the MSc Health Policy, Planning and Financing, MSc in Health, Population and Society, MSc in Internal Health Policy, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have an understanding of basic Health Economics principles.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly.

- To provide students with an understanding of basic features of pharmaceutical markets, how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments’ approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. Plus scheduled revision session.

Formative coursework: A formative essay under exam conditions (1 question in 1 hour) will be a requirement and is to be submitted immediately after the revision session.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

This is the same course as SA4G3 Pharmaceutical Economics and Policy (modular) but it has different teaching arrangements.
SA429  Half Unit  Understanding Social (Dis)advantage
This information is for the 2015/16 session.
Teacher responsible: Prof Hartley Dean OLD2.30
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Social Policy, MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in Health, Population and Society, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is currently capped at 45 places. Offers of places will be made on the basis of applicants’ statements. Initial priority for places is given to students on Social Policy MSc programmes. Students from departments other than the Department of Social Policy may be accepted onto a waiting list. Places remaining available three days before the start of the course will not be held back for late applicants from Social Policy programmes but offered to students from the waiting list.
Course content: This course focuses on the emergence of a range of concepts key to social policy relating to selective cumulative advantage and disadvantage in society, including concepts that supersede or complement classic concepts of poverty, such as social exclusion, capability deprivation, social immobility, social/cultural capital deficiency. It examines the uses of such concepts in both developing and industrialised countries. Topics addressed on the course may include - changes in inequality and their causes; the theoretical and empirical issues provoked by the ‘underclass’ debate; family change and disadvantage; long term unemployment and welfare-to-work; area segregation, housing and ‘welfare ghettos’; ethnic division; disability; employment; education; crime; social exclusion and citizenship.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: Students have the option of submitting a formative essay.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA451 Social Policy Research
This information is for the 2015/16 session.
Teacher responsible: Dr Tania Burchardt 32LIF3.34
Availability: This course is compulsory on the MSc in Social Policy (Research) and MSc in Social Research Methods. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Social Policy and Planning). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at 45 students. All students for whom the course is compulsory will be allocated a space. Any remaining places (of which there are usually several) will be allocated on the basis of the statements provided by students in their course choice form. This will be done on the Monday following the opening of the course choice system and every two days thereafter, until the course is full.
Course content: The course equips students to critically assess the ways in which a wide range of research approaches are used in the study of social policy questions. This includes: an overview of the varied traditions and approaches to social policy research; Historical methods; Participatory research; Researching organisations; In depth interviews (especially with service users and clients); Evaluation of policy reform; Social experiments and pilots; Geographical methods; Social surveys and the analysis of large datasets; Longitudinal and life history analysis; Micro-simulation techniques; Systematic reviews and meta-analysis; and Comparative research. The relationship between research and policymaking is a theme that runs throughout the course.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures, 13 hours and 30 minutes of seminars and 15 minutes of help sessions in the LT. Revision lecture and 15 minute help session in the summer term.
The lectures will be given by a member of staff or external expert in that particular method or topic and are followed by a seminar examining research exemplifying the approach and the issues raised. The help sessions are short one-to-one tutorial sessions with the seminar leader to discuss feedback on essays.
Formative coursework: Students will make at least one seminar presentation per term. In addition to written essays based on two seminar presentations, students will write at least two essays of no
SA465
Criminal Justice Policy - Long Essay
This information is for the 2015/16 session.
Teacher responsible: Dr Coretta Phillips OLDM2.27
Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.
Course content: The objective is to write an original dissertation on an approved topic in the field. The selection of the topic is a matter primarily for the student, though the approval of the supervisor is needed for topic registration.
Teaching: The designated supervisor should discuss the selection of the topic and its title with the student, advise about preliminary reading, methods and broad analytical approach; and comment on the draft version. At their discretion, supervisors may give additional advice and comments.
Assessment: Dissertation (100%, 10000 words) in September. The completed dissertation, must be submitted to the course convenor by the end of that term. The advisor will provide regular supervision and feedback.
Arrangements for Supervision
An appropriate supervisor will be appointed to advise each candidate and comment on the first draft of the dissertation.

SA466
European and Comparative Social Policy - Long Essay
This information is for the 2015/16 session.
Teacher responsible: Dr Stephen Mangen OLD 2.62
Availability: This course is compulsory on the MSc in Social Policy (European and Comparative Social Policy). This course is not available as an outside option.
Course content: The purpose is to allow students to study a topic in depth by researching the literature and analysing a subject. Often these essays involve original perspectives or empirical research.
Teaching: An appropriate supervisor will be appointed to advise each candidate and comment on draft elements of the dissertation.
Selection of Topic
The dissertation should conform to one of the following formats:
- A study of a single EU state (or region, city etc) and one or more policy areas focusing on the impact of EU level social policy. This state should not be the student’s own country. Within this format the focus may also be at the sub-national level (regions, cities etc).
- A comparative study of two or more states (or their subnational levels) focusing on one or more policy areas. The sample may include non-EU countries as well as the student’s own country.
- A study of an element of EU-level social policy or EU processes of social policy making.

SA470
Dissertation - Social Policy and Development: Non-Governmental Organisations
This information is for the 2015/16 session.
Teacher responsible: Dr Armine Ishkanian OLD2.42, Dr Timothy Hildebrandt, Prof Anthony Hall, Dr Sunil Kumar, Prof David Lewis and Dr Muzafferettin Seckinelgin
Availability: This course is compulsory on the MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.
Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to social policy and development from a civil society-centred perspective.
Teaching: 10 hours and 30 minutes of lectures in the MT. The advisor will provide regular supervision and feedback.
Formative coursework: The area of study is defined by the student, in consultation with their academic adviser. An outline proposal is developed on SA470 in Moodle and discussed with their adviser early in the Lent Term. Guidance is provided in dissertation writing and research skills.
Assessment: Dissertation (100%, 10000 words) in September. Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography. The dissertation must be submitted to the Course Administrator on or before 1 September (or if this falls on a weekend, the first weekday after 1 September).

SA471
Social Policy and Planning - Long Essay
This information is for the 2015/16 session.
Teacher responsible: Prof David Piachaud OLD2.64
Availability: This course is compulsory on the MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is not available as an outside option.
Course content: The purpose is to allow students to study a topic in depth researching the literature and analysing a subject: often these dissertations involve original perspectives or research and some have been subsequently published.
Teaching: The general subject area of the dissertation should be approved by the tutor by the middle of the second term and the title should be submitted to the course convenor by the end of that term.
Arrangements for Supervision
An appropriate tutor will be appointed to advise each candidate and comment on the first draft of the dissertation.
Assessment: Dissertation (100%, 10000 words) in September. The completed dissertation, must be submitted to the course administrator on or before 1 September (or if this falls on a weekend, the first weekday after 1 September) in the year of the examination. It must not exceed 10,000 words.

more than 2,000 words for the course.
Indicative reading: P Alcock et al (Eds) (2012), The Student's Companion to Social Policy, 4th edn; C Hakim (2000), Research Design: Strategies and choices in the design of social policy, 2nd edn; A Bryman (2012), Social Research Methods, 4th edn. Additional references will be supplied at the start of the course and in lectures.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.
### SA472  Half Unit  
**Dissertation - Social Policy and Development**  
This information is for the 2015/16 session.  
**Teacher responsible:** Prof Anthony Hall OLD2.28, Prof David Lewis OLD2.25, Dr Muzafferettin Seckinelgin OLD2.97, Dr Armine Ishkanian OLD2.42 and Dr Timothy Hildebrandt OLD2.25  
**Availability:** This course is compulsory on the MSc in Social Policy and Development. This course is not available as an outside option.  
**Course content:** The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to social policy and development from a government-centred perspective.  
**Selection of Topic**  
The area of study is defined by the student, in consultation with their academic adviser. An outline proposal is developed on SA472 in Moodle and discussed with their adviser early in the Lent Term. Guidance is provided in dissertation writing and research skills.  
**Arrangements for Supervision**  
The adviser will provide regular supervision and feedback.  
**Teaching:** 10 hours and 30 minutes of lectures in the MT.  
**Assessment:** Dissertation (100%), 10,000 words in September. Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography. The dissertation must be submitted to the Course Administrator on or before 1 September (or if this falls on a weekend, the first weekday after 1 September).  
**Pre-requisites:** Some familiarity with personal computers is required, but a high degree of technical proficiency is not required.  
**Course content:** The course is practical in nature and overviews key methods used for planning in population and development. Key questions which will be answered in this course are: what is the future of the world population; What are the family planning needs of couples in low income countries; what will be the number of newly HIV infected in the next 15 years; what is a sustainable population growth. Relevance will be given to methods used for assessing the implications of high levels of mortality in developing countries with specific reference to the HIV/AIDS pandemic, as well as the assessment of high fertility levels due to low uptakes of family planning methods. The approach is practical and complements the more theoretical population courses giving additional skills such as an understanding of key international projections and estimates. Students will undertake a number of computer-based assignments (using either Excel or Spectrum) which will follow the topics highlighted during the lectures. The course covers concepts used for population analysis; the role of population projections in the population planning and development process; the basis of projections made by international agencies such as the UN Population Division; the formulation of projection assumptions and methods of making projections; methods for projecting and assessing the impact of HIV/AIDS and the use of software such as AIM (AIDS Impact Model). The course will also give an overview of projections for particular sub-groups such as households, families, urban, sub-national and labour force ones and of the implications of uncertainty for the planning process. Emphasis will be given to the learning of analytical skills which include data and information searching on the internet as well as presentation of the information.  
**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT.  
**Formative coursework:** Students are expected to submit a formative essay before the end of term.  
**Indicative reading:** Relevant documents will be provided at the start of the course, mainly in the form of electronic documents. Suggested reading are Lutz “The future population of the world,” Cohen “How many people can the earth support”  
**Assessment:** Coursework (50%) in the MT.  
Coursework (50%) in the LT.  
**Assessment:** Will be by two coursework assignments, each of a maximum of 10 A4 pages, which will involve the formulation, execution and writing up of a project concerned with a model for population planning, which has been agreed with the course teacher.  

### SA481  Half Unit  
**Population Analysis: Methods and Models**  
This information is for the 2015/16 session.  
**Teacher responsible:** Dr Moshie Herman  
**Availability:** This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Development Studies, MSc in Health, Population and Society, MSc in Population and Development, MSc in Statistics and MSc in Demography (Research). This course is available as an outside option to students on other programmes where regulations permit.  
**Pre-requisites:** Students should have basic numeracy, but the course does not require advanced mathematical knowledge. Some practical sessions will involve use of the spreadsheet Excel.  
**Course content:** This course provides an introduction to the key concepts and methods required for population analysis. The course will explain the dynamics of population change and enable students to learn basic methods for measuring population structure and the determinants of population size and change (fertility, mortality and migration). The course will also provide an introduction to population projections and describe and evaluate how demographic data are collected and used. Emphasis is placed on the understanding and interpretation of demographic data, as well as methods of population analysis.  
**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT.  
3 hours of lectures in the ST.  
**Formative coursework:** Students will be expected to complete exercises, write one essay and complete one multiple choice questionnaire during the term.  
**Indicative reading:** Demography: Measuring and Modeling Population Processes by S H Preston, P Heuveline and M Guillot, 2001. This will be used as a reference text in the course. Students may also find it helpful to consult some of the other standard, and slightly less advanced texts available including: Demographic Methods and Concepts by D Rowland, 2003; or, alternatively Methods and Models in Demography by C Newell, 1988 or Demographic Techniques by A H Pollard, F Yusuf & G N Pollard, 1990.  
**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.
Course content: The nature of social policy and policy making: key approaches and issues. The goals of social policy in relation to policy formation and the policymaking process. Issues including: the political economy of social policy; social justice and social policy; human needs; the mixed economy of welfare; the governance of social policy; gender and social policy; poverty, inequality and social exclusion; globalisation and the future of social policy.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: One 1500 word essay due in MT.

Indicative reading: Some introductory texts are:
- H Dean, Social Policy, 2nd edition, Polity, 2012;
- M Daly, Welfare, Polity, 2011;

A full bibliography will be handed out with the programme of seminar topics at the start of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA492 Half Unit
Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation

This information is for the 2015/16 session.

Teacher responsible: Dr Ernestina Coast OLM2.24

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Health, MSc in Health, Population and Society, MSc in Population and Development, and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course is deals with the effectiveness of sexual and reproductive health programmes, especially those that deliver services. The key issues addressed are the design of programmes, their effective implementation, and their evaluation, addressing questions such as:

What role can the mass media play in communicating reproductive health messages?

What special sexual and reproductive needs do adolescents have?

Should violence against women be considered a reproductive health issue?

How appropriate is social marketing as a means of increasing contraceptive use?

What are the main causes of maternal death?

The course covers a wide range of topics, including: the organisation of programmes; issues of strategic management; personnel training; logistics and commodity supply; the tools of management and evaluation, including management information systems; information, education and communication, including the role of the mass media; innovative approaches to reproductive health education, including an examination of the role of formal education and curriculum content; violence against women as a reproductive health issue; meeting the reproductive health needs of “special” groups, including adolescents and refugees; the use of social marketing; issues of quality in service delivery; techniques for evaluating programme effectiveness.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

SA499 Dissertation: Population and Development

This information is for the 2015/16 session.

Teacher responsible: MSc Convenor and academic advisor.

Availability: This course is compulsory on the MSc in Population and Development. This course is not available as an outside option.

Course content: The purpose is to allow students to explore a particular research topic in depth.

Arrangements for Supervision

An appropriate academic advisor will be appointed to advise each student. Students are given a class on research and dissertation writing in addition to attending SA4C1.

Selection of Topic

The topic of the dissertation is selected in consultation with the student’s academic advisor.

Teaching: 3 hours of seminars in the MT. 2 hours of seminars in the LT.
SA4A6
Dissertation: MSc International Health Policy and MSc International Health Policy (Health Economics)
This information is for the 2015/16 session.
Teacher responsible: Dr Panagiots Kanavos COW.3.08
Availability: This course is compulsory on the MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is not available as an outside option.
Course content: This is meant to be a seminar aiming to prepare students for the dissertation, which is a compulsory component of the degree.
Students of this programme undertake a summer placement during which they will be writing up their dissertation. The purpose of the dissertation is to allow students to explore a particular topic or a relevant policy issue in some depth. The dissertation may take the form of an empirical research conducted on a topic or issue of relevance to health/social policy; or may be a literature-based providing an analysis of a specific research question relevant to health/social policy.
Teaching: 4 hours of lectures in the LT. 2 hours of lectures in the ST. The course comprising a total of 3 2-hour lectures/seminars/coaching sessions (2 2-hour sessions in the LT term and 1 2-hour session in the ST) will require participation from the entire class in order to discuss issues pertaining to the dissertation (topic selection, structure, methods, result reporting, ethics approval, linkages with the summer placements among others) and the student summer placement process. The course will serve as a means to assist students with the preparation and finalisation of their dissertation proposals. In this context, students will also receive feedback and assistance from their supervisors, with whom they will need to meet on at least three occasions.
Formative coursework: Students will receive feedback and comments on a 1,000 word summary/outline of the proposed research proposal from their supervisors.
Assessment: Dissertation (100%, 10000 words) post-summer term.

SA4B5 Half Unit
International Planning and Children’s Rights
This information is for the 2015/16 session.
Teacher responsible: Prof Eileen Munro OLD2.46 and Dr Armine Ishkanian OLD2.42
Availability: This course is available on the MSc in Health, Community and Development and MSc in Human Rights. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This is an interdisciplinary course which explores the links between child rights and child poverty at all levels of development in rich and poor countries. The social and economic as well as the civil and political rights of children, as defined in recent international laws, charters and conventions, are examined in relation to the conditions, especially poverty and multiple deprivation, experienced by many children. Human rights theories as a basis for international and social policies will be a focus of attention. There has to be universal planning and not only specific proposals to deal with serious violations of rights. Issues of child labour, the violations of war, cultural discrimination against girl children and the right to a minimally adequate family income will be discussed in relation to the roles played by international agencies, Trans National Corporations, governments and NGOs.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4B3 MSc Health, Population and Society Dissertation
This information is for the 2015/16 session.
Availability: This course is compulsory on the MSc in Health, Population and Society. This course is not available as an outside option.
Course content: The purpose is to allow students to explore a particular research topic on issues related to health and population in depth.
Selection of topic
The topic of the dissertation is selected in consultation with the student’s personal supervisor.
Supervision
An appropriate dissertation tutor will be appointed to advise each student as the work proceeds. In addition, students are given a class on research and dissertation writing, and another on data sources and uses. Students are expected to make a non-assessed presentation of their proposed dissertation topics in LT.
Teaching: 3 hours of seminars in the MT. 2 hours of seminars in the LT.
Assessment: Dissertation (100%) post-summer term.
The completed dissertation must be submitted on or before 1 September (or if this falls on a weekend, the first weekday after 1 September).
SA4B8  Half Unit  
Ethnicity, Race and Social Policy  

This information is for the 2015/16 session.  
Teacher responsible: Dr Coretta Phillips OLD2.27  
Availability: This course is available on the MSc in Gender, Policy and Inequalities, MSc in International Migration and Public Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available with permission as an outside option to students on other programmes where regulations permit. This course will be capped at 15 students, with preference given first to students on MSc programmes in the Department of Social Policy, then from MSc International Migration and Public Policy and MSc Gender, Policy and Inequalities. If spaces are still available, students from other MSc programmes, where regulations permit, will be selected on a first come first served basis. Places for this course will be allocated on a ballot basis.  
Course content: Understanding Key Concepts; Disciplinary Frameworks; Migration and Citizenship, Theorising Multiculturalism; Ethnic Settlement and Housing Inequalities; Education; Employment, Poverty and Underclass; Criminalisation and Incarceration; Discrimination and the Role of the State I: Positive and Affirmative Action; Discrimination and the Role of the State II: Legislative Frameworks, Diversity, and Service Delivery.  
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 2 hours and 30 minutes of lectures in the ST. In Week 6 there will be a reading week.  
Assessment: Essay (100%, 4000 words) in January.  
The summative essay will be due in on the first Monday of LT.  

SA4B9  Half Unit  
Education Policy, Reform and Financing  

This information is for the 2015/16 session.  
Teacher responsible: Dr Sonia Exley OLD2.65  
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit.  
Course content: The course considers education policy, reforms and financing across developed countries. It uses concepts and tools from a range of academic fields - economics, politics, social policy, philosophy and sociology - to scrutinise education, with a particular focus on equity, social justice and the distribution of resources. Issues to be addressed include: the aims of education; the impact of social characteristics on educational outcomes (e.g. class, ‘race’/ethnicity and gender) and related policy reforms; accountability and market-oriented reforms in education; privatisation and the changing role of the state; power and the global politics of educational policy making; early years education; school-based education; and tertiary education.  
Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST. Plus revision seminar(s).  
Indicative reading: Specialist lists for each topic will be provided. The following introductory books are recommended:  
Assessment: Exam (75%, duration: 2 hours) in the main exam period.  
Essay (25%, 2000 words) in the ST.  

SA4C1  Long Essay and the Research Process  

This information is for the 2015/16 session.  
Teacher responsible: Prof Eileen Munro OLD2.46  
Availability: This course is compulsory on the MSc in Criminal Justice Policy, MSc in Population and Development, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option. For all MSc Social Policy programmes involving a dissertation or long essay. Exemptions at the discretion of the course tutor. Lecture notes will be available electronically via Social Policy public folders (for part-time students).  
Course content: The course aims to provide an understanding of issues associated with the research process in the context of MSc Social Policy long essays. It includes an examination of philosophical issues underpinning research methods in social policy, the place of different research methods (qualitative and quantitative) in social policy and the process of writing a long essay.  
Teaching: 2 hours of lectures in the MT. 3 hours of lectures in the LT.  
Assessment: Non-examinable. It is expected that the student’s dissertation will be informed by the course and appropriate discussion of methodological issues will be incorporated in all dissertations.  

SA4C2  Half Unit  
Basic Education for Social Development  

This information is for the 2015/16 session.  
Teacher responsible: Prof Anthony Hall OLD2.28  
Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health, Community and Development, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and
Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 30 students

**Pre-requisites:** Work experience in a developing country is highly desirable but not essential.

**Course content:** The course is designed to examine the role of basic education in developing countries as it relates to social development and social policy. Content of the course includes: the history of education and current problems in developing countries, links between basic education and socio-economic development, primary schooling, decentralization policies, non-formal and vocational education, adult literacy, popular education for grassroots development, environmental education, ICT, and foreign aid in supporting basic education.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT.

**Formative coursework:** In addition to seminar presentations and the assessed essay, students are required to write an unassessed (formative) essay for the course.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words) in the ST.

Students are required to choose a topic of their own interest for the essay.

---

**SA4C4**  Half Unit

**Cost-Effectiveness Analysis in Health Care**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Caroline Rudisill, COW 3.05

**Availability:** This course is available on the MSc Health Policy, Planning and Financing, MSc in Global Health, MSc in Health, Population and Society, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

**Formative coursework:** A piece of formative coursework will be set and feedback provided to students.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words) in the ST.

This is the same course as SA4G4 Statistical Methods in Health Care Economic Evaluation (modular) but it has different teaching and assessment arrangements.

---

**SA4C3**  Half Unit

**Statistical Methods in Health Care Economic Evaluation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr. Maria Raikou, OLD.2.24

**Availability:** This course is available on the MSc Health Policy, Planning and Financing, MSc in Health, Population and Society, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** There is no pre-requisite, although it is envisaged to be complementary to SA4C4.

**Course content:** This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector. Introduction to random variables and probability distribution, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, parametric and non-parametric approaches for missing data, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Presentation of results, acceptability curves. This is the same course as SA4G4 Statistical Methods in Health Care Economic Evaluation (modular) but it has different teaching and assessment arrangements.

**Teaching:** 20 hours of lectures and 16 hours of computer workshops in the LT. 1 hour of lectures in the ST.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words) in the ST.

This is the same course as SA4G4 Statistical Methods in Health Care Economic Evaluation (modular) but it has different teaching and assessment arrangements.
SA4C6 Half Unit
International Housing and Human Settlements; Conflicts and Communities

This information is for the 2015/16 session.
Teacher responsible: Prof Anne Power OLD2.21
Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development, MSc in Social Policy and Development. Non-Governmental Organisations and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course is an introduction to the global housing challenges of a fast urbanising world in the context of rapidly growing cities worldwide. There are 5 key themes: the push and pull factors in urban growth; the key actors in housing provision; slums and self-help; the environmental impact of low income settlements; the problems of poverty and exclusion in low income and informal settlements. The course includes 10 lectures in LT and one in ST. The main topics of the lectures are: housing needs and demand; contrasting patterns of housing development; owner occupation, renting and self-help; government intervention and finance; planning and renewal; international agencies, aid and NGOs; bottom-up shelter models and community-led initiatives; social exclusion and urban pressures; basic services and public infrastructure; participation and women’s roles in low income settlements; environment of cities; urban and housing design; theories and practice in upgrading urban settlements. Case studies are used to illustrate arguments, policies and practical responses.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST. Additional activity: occasional informal discussion sessions are organised at students’ request.

Formative coursework: Students will be expected to participate actively in seminars and to complete one formative essay using case studies to illustrate their arguments.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4C8 Half Unit
Globalisation and Social Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Muzafferettin Seckinelgin OLD2.57
Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Health, MSc in Health, Community and Development, MSc in Human Rights, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What do the, the Catholic Church, Bill and Melissa Gates, UNICEF and the World Bank have in common? They are in one way or another involved in social policy that goes beyond the nation state. Policy could be seen as the exercise of political power and this political power has often been concentrated within the nation state. Far from the traditional study of policy this includes the effect of globalization on a variety of actors in social policy. This course examines how globalization has changed the way we perceive areas such as health, education, social care and other areas that concern social citizenship. The course examines the international policy environment, particularly intergovernmental organisations; bilateral and multilateral aid agencies and non-governmental organizations (NGOs), which influence the social policy environment in developing countries. The impact of the intergovernmental policy process on policy outcomes is examined. The same goes for religious groups, social movements and corporations that all play a role in global social policy. The main goal of the course is not only to open up the understanding of social policy and globalization but also to show the complexity of goals and actors of social policy. It is expected that the students will devote considerable time to reading and preparing for the seminars.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. Revision session(s) will be scheduled in the ST.

Formative coursework: Students will write a long essay.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%) in the ST.

SA4C9 Half Unit
Social Policy - Organisation and Innovation

This information is for the 2015/16 session.
Teacher responsible: Prof Eileen Munro OLD2.46
Availability: This course is compulsory on the MSc in Social Policy (Social Policy and Planning). This course is available on the MSc in China in Comparative Perspective, MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in Health, Population and Society, MSc in Public Management and Governance, MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course examines the organisation of social policy, structures, processes and delivery, and recent developments in social policy in industrialised countries. The course examines how policy debates affect policy implementation, with a particular focus on innovation, identifying the social forces influencing the relevant policy changes, and examining the practical consequences for service provision in industrialised countries. Changes in the organisational structure and management approach, in the nature of social control, and in the social and economic context are examined.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

SA4D1 Half Unit
Social Epidemiology
This information is for the 2015/16 session.
Teacher responsible: Dr Isaac Sasson OLD 1.11
Availability: This course is compulsory on the MSc in Health, Population and Society. This course is available on the MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course brings together the main issues in health, population and societal changes in developed countries, including the role of social and biological factors in determining health and mortality. Course content includes the relationship between health and societal changes: family changes and their implications for population health; social support and health, health of older people and coping with ageing in the 21st century. Prospects for health and mortality in decades to come. Definition and use of measurements of health; self-reported, ‘objective’ measures and health service use indicators. Trends in inequalities in health and the explanations for these. Key issues in public health in developed countries especially in the light of expected demographic changes. Policy responses to health, population and societal changes.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.
Formative coursework: One mock exam and one 1,500 word formative essay.
Indicative reading: A detailed reading list will be provided at the beginning of the course.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4D2 Half Unit
Global Health and Population Change
This information is for the 2015/16 session.
Teacher responsible: Dr Arjan Gjonca OLD.M2.25
Availability: This course is compulsory on the MSc in Health, Population and Society. This course is available on the MSc in China in Comparative Perspective, MSc in Global Health, MSc in Health, Community and Development, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Population and Development, MSc in Social Policy and Development, MSc in Policy and Development: Non-Governmental Organisations and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course aims at looking at the relationship of population change and global health. It follows a multidisciplinary approach by integrating demography, public health and epidemiology. A strong component of the course is the policies required to cope with these challenges for global health coming from population changes worldwide. The course does not only take a theoretical approach, but it is also evidence based. This relationship between population change and health will be analysed in its dynamic. Another important aspect of the course is that it will focus on what will happen in the future of global health as a result of anticipated population changes.
Some of the main topics covered are: Some of the main topics addressed in this course are the relationship between epidemiological transition and population change; the relationship between poverty, health and population change; the course of HIV/AIDS epidemic and demographic dynamics; health inequalities and urbanisation; nutrition and health, ageing and its effects on the burden of different chronic diseases. It also covers basic techniques and measurement of health, mortality and morbidity.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
Indicative reading: A detailed reading list will be provided at the beginning of the course.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4D3 Half Unit
Valuing Health
This information is for the 2015/16 session.
Teacher responsible: Dr Adam Oliver COW/3.06
Availability: This course is available on the MSc Health Policy, Planning and Financing, MSc in Health, Population and Society, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.
The course is of value to those wishing to work as health policy analysts or economists/behavioural economists after graduation, be that in academia, government, industry, or management and practice.
Course content: This course offers a thorough understanding of how economists tend to value health and explores some of the problems inherent in these valuations. As such, the course offers teaching in many aspects of behavioural economics, with specific health-related application.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.
Formative coursework: Students will be given a progress test at the end of MT–this will be a 50 minute test in which they answer one essay question from a choice of three. This is perfect practice for what the students might expect in the final exam.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Essay (50%, 2500 words) in the LT.

SA4D4 Half Unit
Measuring Health System Performance
This information is for the 2015/16 session.
Teacher responsible: Miss Diana Quirmbach OLD2.59
Availability: This course is compulsory on the MSc in International Health Policy. This course is available on the MSc Health Policy, Planning and Financing, MSc in Global Health, MSc in Health,
Population and Society, MSc in International Health Policy (Health Economics), MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:
- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

**Teaching:** 15 hours of lectures and 24 hours of seminars in the LT. 2 hours of lectures in the ST.

**Assessment:** Exam (50%, duration: 2 hours) in the main exam period.

**Formative coursework:** Students have the option of submitting a formative essay.

**SA4D6  Half Unit**

**Health Systems and Policies in Developing Countries**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Mrigesh Bhatia OLD2.34

**Availability:** This course is available on the MSc Health Policy, Planning and Financing, MSc in Global Health, MSc in Health, Community and Development, MSc in Health, Population and Society, MSc in Health Policy (Health Economics) and MSc in Population and Development. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The course focuses on health system reforms. It aims to identify key health systems and policy issues in developing country context and understand why health sector reforms have become an important issue in the developing countries. It will examine the assumptions upon which health system reforms are based and the evidence to support these assumptions. After an introductory lecture on the history of the development of health systems and policies of the member nations of the World Health Organisation, the content of the course is divided into three components. These are financing health care, delivery of health care and stewardship. Because Primary Health Care is once again at the centre of the World Health Report (2003), these sections will focus on equity, participation and intersectoral collaboration. With respect to financing, the emphasis will be on options for financing health care in developing countries, examining the potential role of user charges, social health insurance and community financing schemes. Delivery will focus on social franchising, decentralisation and the role of the private/public mix. Under stewardship, the course will explore issues around human resources for health and capacity building. The course concludes with a session on the future of Health Sector Reforms in developing countries.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 1500 words) in the LT.
**Formative coursework:** An essay of not more than 2,000 words.  
**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.  
Essay (25%, 2000 words) in the ST.

---

**SA4E9**  
**Half Unit**  
**Advanced Health Economics**  
**This information is for the 2015/16 session.**  
**Teacher responsible:** Prof Alistair McGuire COW.4.05  
**Availability:** This course is available on the MSc Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.  
**Pre-requisites:** Students must have completed Health Economics (SA408).  
**Alternative introductory economics courses are acceptable.**  
**Course content:** The course will cover: international comparisons of health care expenditure, individual health-seeking behaviour, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), and equity in health care.  
Students may find material from the half unit SA4LS Applied Health Econometrics, which will run in weeks 1 to 6 of LT (with lectures also in week 11), to be beneficial to studying this course. See the SA4LS course guide for further detail. In particular, a knowledge of basic econometrics is assumed when taking SA4E9 which will be provided by SA4LS.  
**Teaching:** 15 hours of lectures and 20 hours of seminars in the LT.  
2 hours of lectures in the ST.  
**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.  
Essay (25%, 2500 words) in the ST.

**Not available in 2015/16**  
**Rural Development and Social Policy**  
**This information is for the 2015/16 session.**  
**Teacher responsible:** Prof David Lewis OLD2.25  
**Availability:** This course is available on the MSc in African Development, MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.  
**Pre-requisites:** Knowledge of rural areas and relevant work experience is desirable but not essential.  
**Course content:** Theories of rural development, history of rural development policy, changing rural livelihoods, land and agrarian reform, agricultural research and extension, the roles of private and non-governmental actors, natural resource management, food security, climate change and rural-urban linkages.  
**Teaching:** 15 hours of lectures and 12 hours of seminars in the MT.  
2 hours of lectures in the ST.  
**Assessment:** Exam (75%, duration: 2 hours) in the main exam period.  
Essay (25%, 2500 words).  
Students are required to write an assessed essay of 2,500 words (25%). A two-hour written examination in the ST (75%).

---

**SA4F1**  
**Half Unit**  
**Migration: Population Trends and Policies**  
**This information is for the 2015/16 session.**  
**Teacher responsible:** Dr Moshi Herman  
**Availability:** This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health, Population and Society and MSc in Population and Development. This course is available as an outside option to students on other programmes where regulations permit.  
**Pre-requisites:** Students should have basic numeracy, but the course does not require advanced mathematical knowledge. It assumes no previous knowledge of the subject.  
**Course content:** The course deals with the inter-relationships between migration and its economic and social context. The causes of migration and its consequences are examined at national and international levels together with their policy implications. The approach of the course is comparative, both across time and between more developed and less developed societies.  
A wide range of topics is covered, including: sources and types of demographic data; techniques for the measurement of migration; main migration flows; macro- and microeconomic theories of migration; forced migration and migrants; demographic consequences of migration; and, international and national migration policies.  
**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT.  
**Formative coursework:** Students are expected to participate actively in seminars.
Indicative reading: Readings are mainly in the form of on-line articles. Key overview texts include: The age of migration (Castles & Miller); Migration theory: talking across disciplines (Brettell & Hollifield); Worlds in motion: understanding international migration at the end of the millennium (Massey); The migration reader: exploring politics and policies, 2006 (Anthony & Lahav); International handbook on the economics of migration (Constant & Zimmermann); Global migration and the world economy (Hattam & Williamson); Dialogues on migration policy (Giugni & Passy); Migration, immigration and social policy (Jones-Finer); Migration and development: opportunities and challenges for policymakers (Farrant); Rural-urban migration in developing countries (Lall).

Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Coursework (25%) in the ST.
Coursework assignment maximum of 5 A4 pages.

SA4F3 Half Unit
US Health Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Adam Oliver COW 3.06
Availability: This course is available on the MSc in Health, Population and Society, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. The course is of value to those wishing to work as health policy analysts or health advocates after graduation, be that in academia, government, industry, or management and practice.
Course content: The course offers an understanding of the major issues in the United States health care policy debate, which is important given that the US health care system is the largest in the world, and that many of its policy innovations are exported abroad. The course is interdisciplinary in nature, covering historical, political, discursive economics and philosophical considerations, among others.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be given a progress test at the end of LT -- this will be a 50 minute test in which they answer one essay question from a choice of three. This is perfect practice for what the students might expect in the final exam.
Indicative reading: “The health care mess: how we got into it and what it will take to get out”, by Julius Richard and Rashi Fein (Harvard University Press, 2005); “The Politics of Medicare”, Second Edition, by Theodore Marmor (Aldine de Gruyter, 2000); “The system: the American way of politics at the breaking point”, by Haynes Johnson and David Broder (Little Brown, 1997); “The system: the American way of politics at the breaking point”, by Haynes Johnson and David Broder (Little Brown, 1997); “The system: the American way of politics at the breaking point”, by Haynes Johnson and David Broder (Little Brown, 1997); “The system: the American way of politics at the breaking point”, by Haynes Johnson and David Broder (Little Brown, 1997).
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Essay (50%, 2500 words) in the LT.
The essay will be due for submission in Week 11 of LT.

SA4F8 Half Unit
Behavioural Public Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Adam Oliver COW 3.06
Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc Health Policy, Planning and Financing, MSc in Environmental Economics and Climate Change, MSc in Health, Population and Society, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Political Science and Political Economy, MSc in Public Management and Governance, MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The aim of the course is to explore ways of changing behaviour to achieve the aims of public policy. One half of the course will be concerned with the behaviour of professionals who work in public services. How can doctors, teachers and social workers be motivated to provide the best possible care for their patients, pupils or clients? Should we rely upon professionalism and the public service ethos? Should we set up targets and league

SA4F7 Half Unit Not available in 2015/16
The Economics of European Social Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Joan Costa-Font COW 316
Availability: This course is available on the MSc in EU Politics, MSc in European Social Policy, MSc in European Studies (Research), MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Science and Political Economy, MSc in Public Management and Governance, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development.
Coursework assignment maximum of 5 A4 pages.
SA4F9  Half Unit
Housing, Neighbourhoods and Communities

This information is for the 2015/16 session.

Teacher responsible: Prof Anne Power OLM2.21

Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course introduces MSc students to the links between housing, neighbourhoods and social policy, in urban areas of developed countries. It analyses how existing urban areas came to be developed and run. It explores housing systems in the UK, across Europe and North America, including home ownership, private renting and social renting, the role of government, housing providers and communities. In particular, the gap between neighbourhoods, the problems of housing costs and affordability, homelessness, and social exclusion. The course covers the management and maintenance of housing and neighbourhood services in cities, the impact of housing on social problems, on community relations, and on the environment. Case studies are used to examine how people relate to their neighbourhoods and to each other, particularly in low income, urban areas. How new communities are being developed, how existing areas can be adapted and how housing needs can be met are the big challenges this course addresses, using live case studies to illustrate the main themes.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. In addition there is one lecture/seminar in the ST. There are also supervised site/project visits. The course provides many case study examples for students to draw on.

Formative coursework: Students participate actively in seminars, present their case studies and complete two formative essays drawing on case study evidence.

Students are invited to join site visits which illustrate key housing themes.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

SA4G8  Half Unit
The Third Sector

This information is for the 2015/16 session.

Teacher responsible: Prof David Lewis OLM2.40

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and MSc in Social Policy and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at a maximum of 30 places.

Course content: The ‘third sector’ is conceived as including all non-state and non-market organisations - such as non-governmental organisations, voluntary organisations, and community groups - and their activities. The course provides a concise introduction to theory and evidence on the nature, past and present roles and potential capacity of third sector organisations in shaping social policy in developed and developing countries. It aims to answer the key questions: what is the ‘third sector’; what roles does it or should it play in meeting welfare needs?; how are third sector organisations involved in shaping social policy; how are changes in funding and in the provision of services affecting organisations? What are the limits to the roles of third sector organisations? Are the answers affected by country, institutions, policy, period, areas of activity? The course covers theoretical arguments and models of the ideal and actual roles of third sector organisations, and the historical development of the sector in different contexts. It assesses boundaries and relationships between the third sector, the state and the market, and its relationship with different social groups, service users and communities. It describes and explains the size and the role the sector takes in different periods, countries and areas of activity, and evaluates its impact. It considers the independence, interdependence, accountability and probity of third sector organisations. The course draws on examples from a range of areas of activity (such as education, employment, international development, social care), and areas of activity with particular groups (such as migrants and refugees, women, children and older people), as well as a range of countries.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to participate actively in seminars and to complete one piece of written formative coursework.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**SA4G9**

**Dissertation for MSc Health Policy, Planning and Financing**

This information is for the 2015/16 session.

**Teacher responsible:** Currently Dr M Bhatia (LSE) and Dr N Spicer (LSHTM) as Programme Directors though the Programme Directorship sometimes varies from year to year.

**Availability:** This course is compulsory on the MSc Health Policy, Planning and Financing. This course is available as an outside option to students on other programmes where regulations permit.

**Course content:** The aim of the course is to provide a foundation to students on dissertation-writing as well as to address queries students may have in relation to their dissertation topic, the methodology used, the likelihood of ethical approval, and data acquisition, among others.

The dissertation could be on any topic in the field of health policy, planning and/or financing. The main body of the dissertation should include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

**Teaching:** Teaching comprises two 2-hour seminars, one in the LT and one in the ST.

Students would find it of interest to attend the lectures of SA4C1 on SA4C1 Long Essay and the Research Process - 2 hours in the MT and 3 hours in the LT.

Finally, there is individual supervision for students on the dissertation.

**Formative coursework:** Students will be required to write a summary of the proposed dissertation, outlining the title, background to the topic, methods to be employed, and likely expected results. A list of literature sources will be appended to this summary.

**Assessment:** Dissertation (100%, 10,000 words) post-summer term. Dissertation due on 1st September.

---

**SA4H**

**London School of Hygiene & Tropical Medicine - Units**

This information is for the 2015/16 session.

**Availability:** Restricted to MSc Health Policy, Planning and Financing, MSc International Health Policy and MSc International Health Policy (Health Economics) students. This course is not available as an outside option.

**Course content:** London School of Hygiene and Tropical Medicine Linear Modules (MT)

- Health Services
- Health Policy, Process & Power
- Basic Epidemiology: EPH & PHP*

**Issues in Public Health**

Students taking Linear Modules at the London School of Hygiene and Tropical Medicine (LSHTM) are required to sit for this examination. Students taking just one linear module will be assessed by a one-and-a-half hour written examination in the ST. Students taking two linear modules will be assessed by a three-hour written examination in the ST. A maximum of two LSHTM linear modules may normally be taken subject to academic approval, although in exceptional circumstances three may be taken subject to academic approval.

**London School of Hygiene & Tropical Medicine Study Modules (LT and ST)**

For a detailed list of modules available and codes students are advised to refer to their LSHTM MSc handbook. HPPF students can take a maximum of two LSHTM study modules at the London School of Hygiene and Tropical Medicine subject to academic approval. These are mostly assessed by assignments and there are usually no examinations.

---

**SA4H7**

**Half Unit Urbanisation and Social Policy in the Global South**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Sunil Kumar STC 4.64

**Availability:** This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Population and Development, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.

For postgraduate students interested in urban social policy in developing and transitional countries. The course is also open to students on other MSc Programmes dependent on spaces being available. Some knowledge and experience of urban issues is desirable. In applying for a place on this course, students will have to upload a statement on LFY explaining why they want to enrol.

**Course content:** The course examines the social, economic and political challenges in urban areas in developing and transitional countries from various conceptual perspectives, and the policies and planning practices aimed at addressing them. Some of the themes explored in the course are: theoretical perspectives on the city; urbanisation and social change; migration; the rural-urban interface; urban poverty and livelihoods; labour markets and housing; urban social movements; urban basic services; and urban management and governance.

**Teaching:** Lectures: 11 x 2-hours. Seminars: 10 x 1.5 hours (MT).

**Formative coursework:** All students are expected to read widely, and take part in a range of activities in the seminar sessions. Students are required to contribute to the seminars on a weekly basis by undertaking an un-assessed activity called My-City. All written work should be related to urban issues in either developing or transitional countries.

**Indicative reading:** A detailed reading list will be provided for each lecture and seminar. The following is an introductory list of books: Beall, J and S Fox (2009), Cities and Development, Routledge; Pieterse, E.A. (2008), City Futures: Confronting the Crisis of Urban Development, Zed Books; Staples, J. (Ed) (2007), Livelihoods at the Margins: Surviving the City. Left Coast Press; Westendorff, D. and D Eade (Ed) (2002), Development and Cities, OXFAM; ; J Gugler (Ed) (1997), Cities in the Developing World: Issues, Theory and Policy, Oxford University Press; Mitlin, D and D. Satterthwaite (2012),

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 3000 words) in the LT.

All written work should be related to urban issues in either developing or transitional countries.

---

**SA4H9 Half Unit**

**Non-Governmental Organisations, Social Policy and Development**

_This information is for the 2015/16 session._

**Teacher responsible:** Dr Armine Ishkanian OLD2.42, Dr Timothy Hildebrandt, Prof David Lewis and Dr Muzafferettin Seckinelgin

**Availability:** This course is compulsory on the MSc in Social Policy and Development: Non-Governmental Organisations. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Human Rights, MSc in Social Policy (Research) and MSc in Social Policy and Development. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** Students will preferably have some experience of work within NGOs and/or relevant government departments or donor agencies working with NGOs.

**Course content:** The course focuses on the specialised field of non-governmental organisations (NGOs) within the field of social policy and development, and considers theoretical and policy issues. Main topics include the history and theory of NGOs; the changing policy contexts in which NGOs operate; NGO service delivery and advocacy roles in policy; challenges of NGO accountability; NGO organisational growth and change; conceptual debates around civil society, social capital, social movements and globalisation; and NGO relationships with other institutional actors including government, donors and private sector.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT.

**Formative coursework:** Students will produce and receive feedback on one critical review essay of 1500 words. Weekly student led seminars will also help to train students in writing an essay plan that responds critically and effectively to a question.

**Assessment:** Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 3000 words) in the ST.

---

**SA4J3 Half Unit**

**Dissertation in Global Health**

_This information is for the 2015/16 session._

**Teacher responsible:** Prof Elias Mossialos

**Availability:** This course is compulsory on the MSc in Global Health. This course is not available as an outside option.

**Course content:** The dissertation could be on any topic in the field of global health and policy. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Students will have the opportunity to attend Information Literacy sessions provided by the Social Policy Librarian.

**Teaching:** 2 hours of workshops in the LT.

Dissertation workshop in LT (two-hours) and three one-hour sessions of individual supervision (one-hour per term).

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

Students will submit a dissertation proposal to their supervisors by the end of LT. This will be subject to peer review and course teachers will provide feedback by the end of May.

**Assessment:** Dissertation (100%, 10000 words) in September.

---

**SA4J8 Half Unit**

**Social Policy and Development: Core Concepts**

_This information is for the 2015/16 session._

**Teacher responsible:** Prof Anthony Hall OLD2.28, Prof David Lewis OLD2.25, Dr Armine Ishkanian OLD2.42 and Dr Timothy Hildebrandt OLD2.55

**Availability:** This course is compulsory on the MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students are expected to have a background in the social sciences and some practical work experience in developing countries. Students will be required to take part in a three-day residential workshop on applied social planning at Cumberland Lodge in Windsor Great Park during the Lent Term. The cost is included in MSc SPD & NGOs student fees. The cost of this three-day workshop for students taking the course as an option is £200.

Course content: The course is designed to give students a knowledge of social policy and development issues, and those choosing to specialise on non-governmental organisations. Main topics will include: Comparative social policy in north and south; social development and human development; conceptualizing the state, market and civil society as policy actors; citizenship and rights; comparative approaches to the understanding of poverty, wellbeing and exclusion; welfare regime theory; concepts of sustainable livelihoods; global institutions and the international aid system; conceptualizing the policy process.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. An unassessed study and research skills for social policy and development is also provided. This comprises five additional one hour sessions in MT. It includes an introduction to ‘Conceptualising the Research Process’, a self-learning web-based course, a review of research methods, use of evidence, ethics in research, basic study skills and dissertation guidance.

Formative coursework: All students will write and receive feedback on a formative essay (1500 words). Also, the student-led weekly seminars will require all students to make at least one joint seminar presentation on a question, a process designed to students plan an exam answer based on their reading.

Assessment: Essay (100%, 3500 words) in the LT.

SA4K1 Half Unit

Global Health Policy: Institutions, Actors and Politics

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos

Availability: This course is compulsory on the MSc in Global Health. This course is not available as an outside option.

Course content: Globalization has not only impacted on the nature of public health but the policy responses to these challenges. This module critically examines the transnational institutions and actors involved in public health policy and the interplay between them. The governance of global health issues has traditionally been carried out by various United Nations agencies (namely, the World Health Organisation), but given the transboundary nature of many global health issues (e.g., AIDS, SARS, a diverse range of actors, including the private sector, civil society organizations and national governments, are now integrally involved. The funding of global health programmes and policies, for example, has shifted from primarily bi/multilateral donors to include private and public sectors and philanthropists. Alongside these changes ‘Global Health Initiatives’ (e.g. GFATM: Global Fund to fight AIDS, Tuberculosis and Malaria) have been developed and implemented to unify these diverse actors and funding streams. The module will use a number of case studies to examine the
organisation and role of global health institutions, the challenges and opportunities presented by these governance arrangements, and their (intended and unintended) impacts on global health policy and practice. In doing so, the module will draw on contributions from a range of social sciences including sociology, political science and health services research.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the LT.
3 hours of help sessions in the ST.
Ten one hour lectures and five two hour seminars, plus a three-hour revision seminar in the ST.

**Formative coursework:** One 2,000 word essay examining one of the approaches to framing global health (i.e. a security issue, a development issue, a feminist issue, etc.)

**Indicative reading:** Balabanova et al. (2010) What can global health institutions do to strengthen health systems in low-income countries. Health Research Policy and Systems; 8:22.

**Assessment:**

- **Exam:** (100%, duration: 2 hours) in the main exam period.

---

**SA4K2**  Half Unit

**Sexuality, Everyday Lives and Social Policy in Developing Countries**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Timothy Hildebrandt QLD2.55

**Availability:** This course is available on the MSc in Health, Community and Development, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 15 students.

**Pre-requisites:** None

**Course content:** This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

**Teaching:** 10 hours of lectures and 15 hours of seminars in the LT.
1 hour and 30 minutes of lectures in the ST.

**Formative coursework:** Students will be expected to submit a formative essay (2,000 words), which is to be handed in by the end of week eight of Lent Term.

**Assessment:**

- **Essay:** (100%, 3000 words) in the LT.

---

**SA4K3**  MPA Capstone Project

This information is for the 2015/16 session.

**Teacher responsible:** Dr Bakken Babajanian SAR.G.03

**Availability:** This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

**Course content:** Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.

**Teaching:** 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.

**Formative coursework:** Feedback will be provided on presentations of work-in-progress during MT and LT.

SA4K4

MPA Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

Indicative reading:

Assessment: Dissertation (90%, 10000 words) in the ST. Other (10%) in the MT.

1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

SA4L1

Half Unit

The Governance of Welfare: The Nation State and the European Union

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Mangen OLD 2.62

Availability: This course is compulsory on the MSc in Social Policy (European and Comparative Social Policy). This course is available on the MSc in China in Comparative Perspective, MSc in EU Politics, MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes before regulations permit.

Course content: The initial lecture introduces the principal methods and analytic models of comparative social policy. This is followed by a review of the development of modern welfare states in Western Europe from the last quarter of the 19th century, when many of the key institutional features of European welfare were being created. Then a series of lectures provides analysis of contemporary welfare models as they have evolved in major EU member states since the end of the Second World War: Sweden (representing social democracy) France and Germany (representing two variants of ‘conservative corporatism’ as Esping-Andersen in the Three Worlds of Welfare Capitalism termed them), Italy and Spain (as representatives of the Mediterranean ‘middle way’) and welfare states of Transitional Economies in the new EU members. Discussion of the social policy competence of the European Union completes the teaching in the last three sessions.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be required to submit one formative essay of 1500 words by the end of week 6 of the Michaelmas Term.

Indicative reading:
SA4L2  Half Unit  Not available in 2015/16

Contemporary Issues in European Social Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Mager

Availability: This course is available on the MSc in Social Policy and Planning, MSc in International Health Policy, MSc in Climate Change, MSc in Social Policy and Planning. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines a range of critical social problems shared by EU member states and the role of the EU in resolving them within the framework of deepening European integration. Issues are addressed from the perspective of growing EU-level involvement in policy elaboration. Demographic, ethnic and gender issues feature prominently. Specific policy areas relate to the integration of social security and labour markets; interventions targeting social exclusion; the funding, organisation and challenges of providing pensions and health care; urban policy-making; and the relative role of migration and education and training policies in the regeneration of European labour markets. The course ends with an assessment of globalisation and the threats and opportunities that arise for the European Social Model.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be required to submit one formative essay of 1500 words by the end of week 6 of the Lent Term.

Indicative reading:

SA4L4  Half Unit  Not available in 2015/16

Behaviour, Happiness and Public Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Paul Dolan

Availability: This course is available on the MPA in Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Environmental Economics and Climate Change, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning).

Course content: The course aims to introduce students to the main concepts and tools of the growing fields of behavioural science and the science of happiness. The course brings these fields together with a clear focus on social policy. To achieve this aim, the course is based around twenty lectures covering: 1) what is wellbeing?; 2) what is behavioural science?; 3) choices under risk and uncertainty; 4) intertemporal decisions; 5) social preferences; 6) distributional preferences; 7) the role of emotions in decision making; 8) compensating behaviours; 9) dual-process models of behaviour and the role of the unconscious mind; 10) dual processing into policy; 11) wellbeing in economics; 12) research on happiness; 13) the determinants of life satisfaction; 14) moment-to-moment assessments of happiness as an alternative; 15) the role of eudemonic accounts of subjective wellbeing (meaning, purpose, etc.); 16) why we are often not very good at predicting our happiness; 17) valuing non-market goods (health, environment, etc.) using preferences; 18) valuing non-market goods using happiness; 19) evidence-based policy; 20) Making better decisions – bringing behaviour and happiness together.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There are ten topics, and the seminars allow for in-depth discussion and analysis of the issues raised in the lectures Formative coursework.

Formative coursework: Two presentations, one in MT and one in LT.

Indicative reading:

Assessment: Exam (50%, duration: 2 hours) in the main exam period. Essay (25%, 2000 words) in the LT. Essay (25%, 2000 words) in the MT.

SA4L5  Half Unit  Not available in 2015/16

Applied Health Econometrics

This information is for the 2015/16 session.

Teacher responsible: Dr Grace Lordan

Availability: This course is available on the MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science and the science of happiness. The course brings these fields together with a clear focus on social policy. To achieve this aim, the course is based around twenty lectures covering: 1) what is wellbeing?; 2) what is behavioural science?; 3) choices under risk and uncertainty; 4) intertemporal decisions; 5) social preferences; 6) distributional preferences; 7) the role of emotions in decision making; 8) compensating behaviours; 9) dual-process models of behaviour and the role of the unconscious mind; 10) dual processing into policy; 11) wellbeing in economics; 12) research on happiness; 13) the determinants of life satisfaction; 14) moment-to-moment assessments of happiness as an alternative; 15) the role of eudemonic accounts of subjective wellbeing (meaning, purpose, etc.); 16) why we are often not very good at predicting our happiness; 17) valuing non-market goods (health, environment, etc.) using preferences; 18) valuing non-market goods using happiness; 19) evidence-based policy; 20) Making better decisions – bringing behaviour and happiness together.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

SA4L6  Half Unit  Not available in 2015/16

Illegal Drugs and Their Control: Theory, Policy and Practice

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Shiner OLD2.49

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Regulation, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Laws. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some familiarity with criminology or sociology is preferable but not essential.

Course content: This multi-disciplinary course draws on sociology, psychology, criminology and law to examine the place and meaning of illegal drug use in late modern societies and associated policy responses. It begins by considering drug use and subcultural formations; the 'normalisation' of drug use; drug tourism; the role of addiction; and the organisation of drug markets. It then goes onto consider the making of drugs policy; drugs, policing and the law; treatment and harm reduction; drugs as a development and human rights issue; decriminalisation and alternatives to prohibition.

Teaching: 10 x 1.5 hours of lectures and 10 x 1.5 hours of seminars in the LT.

Formative coursework: Students will be expected to submit a formative essay (2,000 words), which is to be handed in by the end of week eight of LT.

Assessment: Essay (100%, 3000 words) in the ST.

to be handed in during the first week of the ST.
Economic Analysis for Health Policy

This is a Half Unit course for the 2015/16 session.

**Teacher responsible:** Prof Elias Mossialos COW.4.08

**Availability:** This course is compulsory on the MSc in Global Health. This course is not available as an outside option.

**Course content:** The course will serve as an introduction to major developments in the economics of health and health care. It will provide medical practitioners with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the changing nature of health care supply and delivery and the interactions between patients and health care systems. It will review major changes in the financing and delivery of health care and both domestic and international efforts to control health care costs and improve efficiency.

By the end of this course, students will:

- understand complex interactions between health care delivery, insurance markets, governments, business organizations, and then health of populations;
- be comfortable applying economic reasoning and models to analyse health care policies and markets;
- be familiar with the seminal and most recent literature and evidence in the health economics and health policy fields;
- obtain a deep understanding of a particular health policy problem through independent research;
- be familiar with the ongoing debates around the role of prices, markets, competition and the state in the financing and delivery of health care.

**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 3 hours of help sessions in the ST.

Ten one hour lectures and five two hour seminars, plus a three-hour revision seminar in the ST.

**Formative coursework:** 5 Response papers to each set of readings in preparation for each seminar

**Indicative reading:**
- Cutler D. Your Money or Your Life, Oxford University Press, 2005.

**Assessment:** Exam (75%; duration: 2 hours) in the main exam period.

Essay (25%, 3000 words) in the MT.
SA4N4  Half Unit
Financing Health Care: Comparative Perspectives

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos COW.4.08
Availability: This course is compulsory on the MSc in Global Health. This course is not available as an outside option.
Course content: This course aims to introduce students to a comparative approach to analysing the development of health care financing, both in theory and in practice, with an emphasis on critical assessment of current and future policy options and issues. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in both developed and low and middle income countries. By the end of this course, students will have:
• a grasp of the economic, political and philosophical concepts relevant to any discussion of health financing policy;
• a good understanding of how financing arrangements affect the achievement of key health financing policy goals such as financial protection, equity in financing and equity of access to health care, incentives for efficiency and quality in the organisation and delivery of health services, administrative efficiency, transparency and accountability;
• the skills to critically assess current health financing arrangements and options for reform;
• an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 3 hours of help sessions in the ST.
Ten one hour lectures and five two hour seminars, plus a three-hour revision seminar in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT.
One non-assessed essay (2,000 words) in week 6.
Assessment: Exam (75%), duration: 2 hours in the main exam period.
Essay (25%, 3000 words) in the MT.

SA4N5  Half Unit
Global Ageing

This information is for the 2015/16 session.

Teacher responsible: Prof Emily Grundy OLD.1.11
Availability: This course is compulsory on the MSc in Global Health. This course is available on the MSc in Population and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
A core course for students taking MSc Global Health and available to other students taking relevant MSc programmes, particularly Health, Population and Society and Health and Population Development.
Course content: Population ageing is now a near global phenomenon and is perceived as presenting major challenges not only in regions with an already high representation of older people but also in low and middle income countries set to ‘grow old before they grow rich’. This course will consider the process and implications of ageing at both the population and the individual level and policy responses.
The course will be structured into five sections. The first will focus on demographic change and the causes and the course of population ageing in various world regions. This element will include explanation and discussion of population dynamics (how populations age) and inter-related social and economic changes associated with demographic transition (why populations age) and their implications for both older and younger generations.
The second section will focus on the process of ageing at the individual level including an overview of recent biological, social and psychological theories of ageing.
In the third section the emphasis will be on trends and differentials in the health of older populations. This will include discussion of the epidemiological transition; measures of health and disability and current debates about the future health status of the older population in different settings and prospects for further changes in longevity.
The fourth section will consider different models of health and social care provision in older populations and policy responses to population ageing at the international, national and regional level. The final section will be an integrative one in which these themes are drawn together with examples focused on particular countries or regions. This will be linked with student presentations of posters.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 2 hours of help sessions in the ST.
Ten one hour lectures and five two hour seminars, plus one two hour help session in Summer Term.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Students will be asked to work in groups (of 4-5) to produce and present posters on ageing in a specific country which relate to the main themes of the course and so consider demographic, social, economic, health and health care, and policy dimensions. Students will also be required to produce an individual 1,000 word essay on the poster theme for which they took primary responsibility
Assessment: Exam (75%), duration: 2 hours in the main exam period.
Essay (25%, 3000 words) in the LT.
SA4N6  Half Unit
Principles of Modern Epidemiology

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos COW.4.08

Availability: This course is available on the MSc in Global Health. This course is available with permission as an outside option to students on other programmes where regulations permit.

An optional course for students taking MSc Global Health and available to other students taking relevant MSc programmes, particularly Health, Population and Society and Health and Population Development

Course content: The course provides students with an understanding of key epidemiological concepts, including: (a) tools for descriptive epidemiology (incidence, prevalence and survival); (b) measures of association (relative and absolute measures); (c) effect modification, interaction and mediation; and (d) confounding, information bias and selection bias. The course introduces the concepts of population health and the Global Burden of Disease, including estimation of the Population Attributable Fraction (PAF) and the Population Impact Fraction (PIF). It also introduces students to the principals of causal inference and mediation in epidemiology, based on the counterfactual approach and causal diagrams (Directed Acyclical Graphs). The course introduces students to key fundamentals of epidemiologic data analysis, including regression modelling, bias analysis and stratified analysis.

Teaching is structured in the form of lectures and seminars. Lectures introduce students to key epidemiological concepts and methods. This is complemented by seminars whereby published papers in epidemiology are discussed. Students are expected to read in advance on a specific application of the concepts and methods discussed during the lecture. An article will be assigned to each student in advance of each class, and students will be expected to prepare a short critical review of the article and lead the discussion in class based on an accompanying set of questions on the design and validity of the studies discussed. Students will first address and discuss the questions for each article in small groups. This will be followed by a plenary session whereby articles and related questions are discussed in the whole group.

Summative assessment is based on an examination to assess student's understanding of epidemiological concepts and their ability to interpret epidemiological data. Summative assessment includes also a research proposal in which students are expected to apply the basic principles of epidemiology in the context of a well-defined research question. By the end of the course, students will deliver a 3,000-word research project paper.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 3 hours of help sessions in the ST.

Ten one-hour lectures and five two-hour seminars, plus a three-hour revision seminar in the ST.

Formative coursework: Students will be expected to produce 1 project in the LT.

One non-assessed project paper (2,000 words) in week 5. Students are expected to deliver a first research plan of their proposed project. The proposed plan should address a specific epidemiological question of relevance to Global Health. The research project will follow a structure: First, it will identify an epidemiological research question to be addressed, including a justification of the relevance of this question to global health. Second, students will shortly summarize key literature, and identify gaps in knowledge. Students will then propose a concrete epidemiological study design to address the research question. Finally, they will outline an approach to address the proposed question, including the epidemiological methods they will use to address that question. They will discuss the threads to internal validity and causal inference in their approach. Students will receive feedback on this paper, which will serve as basis for the development of the final proposed project paper.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Project (25%, 3000 words) in the LT.

An assessed research project paper of 3,000 words (25%) to be submitted at the end of the LT and a two-hour written examination in the ST (75%).

SA4V8  Half Unit
MPA Policy Paper

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Dissertation.

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.
Anthropometric measures, the Human Development Index and subjective measures of welfare for individuals and societies. The perspective to consider a range of non-monetary, multidimensional, of trends within countries, cross-national differences, and global countries including middle- and low-income nations. The topics focus on monetary measures of economic wellbeing notably official statistics (as produced by national or international agencies) as providing illustrations. The aims are to provide an understanding of societies, examining concepts, measurement and data, as well as analysis and measurement of the welfare of individuals and related indices of development, and measures of happiness and life satisfaction.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 16 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2000 words) in the LT.

SO401 Social Research Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Fabien Accomitotti STC S206, Dr Kay Inckle STC S110 and Dr Patrick Mcgovern STC S119E

Availability: This course is compulsory on the MSc in Sociology and MSc in Sociology (Research). This course is available on the MSc in Economy, Risk and Society and MSc in Political Sociology. This course is not available as an outside option.

Course content: The course introduces students to the theory and practice of research methods in sociology, comprising both qualitative and quantitative methods. The first ten sessions (in the Michaelmas Term) cover quantitative methods and the design of quantitative social research. As the course does not cover hands-on quantitative data analysis, students are encouraged to take MY451 and MY452 to complement it. The ten seminars in the Lent address issues of research design, data collection and analysis in relation to qualitative research methods. Separate syllabi detailing course objectives, course style, readings, teaching arrangements and student assessment and for each of the two terms will be distributed at the beginning of each sequence.

Teaching: The course is taught by a mixture of lectures, seminars and workshops. It normally provides two hours of teaching each week in MT, with 3 hour workshops in the LT and three revision seminars in ST.

Formative coursework: Students must participate in group presentations and undertake several pieces of compulsory practical work during the year.

SO407
Politics and Society
This information is for the 2015/16 session.

Teacher responsible: Dr Robin Archer STC S105 and Dr Michael McQuarrie STC S107

Availability: This course is compulsory on the MSc in Political Sociology. This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Social Research Methods, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to explore some of the great debates about the relationship between politics and society. It will examine the interaction between political institutions, economic interests and cultural ideas, especially in societies that are both democratic and capitalist. The course will explore some of the classic empirical and historical controversies that have animated political sociologists. Each week, we will discuss questions like: What gave rise to states and nations? Why are some social movements more successful than others? How does social change shape parties and elections? Do repressive states give rise to radicalism? Why are welfare states more developed in some countries than others? Why is there no Labor Party in the United States? Under what conditions does democracy develop? What explains the growth of populism? And has neo-liberalism become hegemonic? The course will also look at the canonical writings of some authors like Marx, Weber and Tocqueville, as well as critically explore the use of some political concepts. In addition, it will enable you to build up your knowledge of a number of countries and to assess the strengths and weaknesses of some of the main theories and approaches that have dominated the study of political sociology. These include functionalist, rational choice, and institutionalist theories, as well as historical and comparative approaches.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Reading weeks: week 6 MT and week 6 LT. Seminars: Papers will be presented by participants and, on occasion, by guest speakers. In addition to the weekly seminar, there will be a number of additional seminars specifically concerned with research strategies in political sociology. If possible, students should attend the lecture course SO203 Political Sociology when available.

Formative coursework: Members of the seminar will be required to present a number of papers during the course of the seminar. There will also be a termly essay in MT and LT.

SO424
Approaches to Human Rights
This information is for the 2015/16 session.

Teacher responsible: Dr Margot Salomon TW3.8.02D and Prof Chetan Bhatt TW3.8.02A

Availability: This course is compulsory on the MSc in Human Rights. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights who wish to take this as an option. Priority is given to postgraduate students in the Sociology Department and those registered on the LLM. The course is also available as an outside option for other MSc degrees where regulations and numbers permit. Students from other programmes who wish to apply for a place on SO424 must complete the online application form on LSEforYou stating reasons for wishing to take the course.

Course content: This is a multi-disciplinary course that provides students with a rigorous and focused engagement with different disciplinary perspectives on the subject of human rights including philosophy, sociology and law. It provides students with contending interpretations of human rights as an idea and practice from the different standpoints that the disciplines present (including debates from within and between the disciplines), and investigates the particular knowledge claims and modes of reasoning that the respective disciplines engage. The course applies the insights of disciplinary frameworks of understanding to key human rights issues such as universality, the right to life, free speech, humanitarian intervention, war, genocide, human rights activism, globalization, and states of emergency.

Teaching: 10 hours of lectures and 18 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. 1 hour of lectures and 2 hours of seminars in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Active participation in the workshops is expected and students may be asked to make a presentation to their group.

Indicative reading: Indicative reading: No one book covers the entire syllabus and students are expected to read widely from more general texts on human rights, to more specific texts outlining the debates on human rights from a particular disciplinary perspective. Introductory reading: Relevant books that provide an introduction and overview of the key areas include: Jack Donnelly, Universal Human Rights in Theory and Practice; Michael Freeman, Human Rights; Philip Alston and Ryan Goodman, International Human Rights (2013). Philosophy: P. Jones, Rights, (1994); A. Swift, Facts and Variables. New York: Palgrave MacMillan

Assessment: Exam (25%, duration: 2 hours) in the main exam period.

Coursework (25%) in the MT.

Presentation (10%) in the LT.

Research project (40%) in the ST.

The Michaelmas Term session is assessed by two methods: (a) one piece of coursework (25%) and (b) a two-hour written examination in the ST (25%). The Lent Term session is assessed by a qualitative research project (10% presentation; 40% project write-up).

Two hard copies of each assessment, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The Michaelmas Term coursework consists of two 1000-word memos; these are due on the Wednesday of week 9 and the Wednesday of week 11, respectively. The Lent Term project is due on the fourth Tuesday of Summer Term. An additional copy of each assessment is to be uploaded to Moodle no later than 18:00 on the same day each is due.

Attendance at all seminars and submission of all set coursework is required.

Indicative reading: B. Anderson, Imagined Communities; R. Archer, Why is There No Labour Party in the United States?, M. McQuarrie et al, Democratizing Inequalities; P Evans et al, Bringing the State Back In; S M Lipset, ‘The Social Requisites of Democracy Revisited’, American Sociological Review, vol 59; S Lukes, Power: A Radical View; D McAdam, Comparative Perspectives on Social Movements; M Mann, The Sources of Social Power; M Olson, The Logic of Collective Action; T Skocpol, Protecting Soldiers and Mothers; C. Tilly, Coercion,Capital and European States; L. Weiss, The Myth of the Powerless State.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (30%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all seminars and submission of all set coursework is required.
SO425
Regulation, Risk and Economic Life
This information is for the 2015/16 session.
Teacher responsible: Prof Bridget Hutter STC S217 and Prof Nigel Dodd STC S106
Availability: This course is compulsory on the MSc in Economy, Risk and Society. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPhil/PhD in Accounting, MSc in Culture and Society, MSc in Environmental Policy and Regulation, MSc in Management and Regulation of Risk, MSc in Political Sociology, MSc in Public Management and Governance, MSc in Regulation, MSc in Risk and Finance, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course introduces students to sociological perspectives on economic life and risk regulation in advanced industrial societies. Topics include economic sociology, state risk regulation including regulatory variations, enforcement and business responses, economic and civil society sources of regulation, organizational risk management, science, experts and risk regulation, globalization, and trends in risk regulation. The course will draw upon a broad international literature on social and economic regulation and case studies from the environmental, financial and public health domains.
Teaching: 25 hours of seminars in the MT. 25 hours of seminars in the LT. 5 hours of seminars in the ST.
Reading weeks: week 6 MT and week 6 LT.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Project (30%, 3000 words) in the ST.
Two hard copies of the assessed project, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars and submission of all set coursework is required.

SO426
Half Unit
Classical Social Thought
This information is for the 2015/16 session.
Teacher responsible: Prof Nigel Dodd STC S106
Availability: This course is available on the MSc in Culture and Society, MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: A review of classical social theory. The origins and development of classical sociological theory; exploring the work of Marx, Weber, Simmel and Durkheim through a close reading and interpretation of primary texts. It is not assumed that students have a basic grounding in classical social theory, although it is expected that students who register for this course will be prepared to develop their understanding through primary readings, and not rely on textbooks.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. Reading week: week 6 (MT)
Indicative reading: Relevant books that provide an overview include: A Callinicos, Social Theory; N Dodd, Social Theory and Modernity; A Giddens, Capitalism and Modern Social Theory; G Ritzer, Sociological Theory. The reading list for each seminar will be divided up into essential and additional reading. Students will be asked to read between 50 and 100 pages of primary text per week. The following is a sample list of readings: Marx, K: The Communist Manifesto & Capital (sections of vols 1 & 3); Weber, M: The Protestant Ethic and the Spirit of Capitalism & 'Science as a Vocation'; Simmel, G: The Philosophy of Money (various sections) & various essays such as 'The Metropolis and Mental Life', 'The Stranger', etc.; Durkheim, E: The Division of Labour in Society & The Elementary Forms of the Religious Life (various sections from each).
Assessment: Essay (100%, 5000 words) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all seminars and submission of all set coursework is required.

SO427
Half Unit
Modern Social Thought
This information is for the 2015/16 session.
Teacher responsible: Prof Nigel Dodd STC S106
Availability: This course is available on the MSc in European Studies: Ideas, Ideologies and Identities, MSc in European Studies: Ideas, Ideologies and Identities (LSE and Sciences Po), MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: Contemporary social theory. An introduction to the historical background, context and output of Walter Benjamin, Theodor Adorno, Michel Foucault, and Jean Baudrillard, and a close reading and study of some of their most significant texts.
Teaching: 20 hours of seminars in the LT.
Reading week: week 6 (LT)
Formative coursework: One formative essay in LT
Indicative reading: The following is merely a sample list of some of the texts to be covered: Benjamin, W: 'Theses on the philosophy of history' & The Arcades Project (Section N); Adorno, T: 'Theses against Occultism' & Negative Dialectics (various sections); Foucault, M: The History of Madness & The Order of Things (various sections); Baudrillard, J: Symbolic Exchange and Death (mainly chapter 5) & The Spirit of Terrorism. A number of secondary readings will be recommended, but students will be strongly discouraged from relying on these.
Assessment: Essay (100%, 5000 words) in the ST. Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO430  Half Unit  Not available in 2015/16
Economic Sociology
This information is for the 2015/16 session.
Teacher responsible: Teacher TBC
Availability: This course is available on the MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course offers a general introduction to the theoretical foundations of economic sociology, providing an opportunity to understand how sociologists engage with the study of complex socioeconomic issues.
Topics covered in the course include: critical approaches to economy and society; economic rationality; the sociology of economics; social capital; new economic sociology; economic conventions; changing forms of production and work; new economies; economic identities and divisions; markets and values.
Teaching: 10 hours of lectures and 20 hours of seminars in the MT.
Formative coursework: A project overview due in week 7 of LT. Individual feedback sessions in office hours provided to check student project development.
Indicative reading: Recommended general texts: M Granovetter & R Swedberg (Eds), The Sociology of Economic Life; D Slater & F Tonkiss, Market Society: Markets and Modern Social Theory; N Smelser & R Swedberg (Eds), The Handbook of Economic Sociology; P Edwards & J Wajcman, The Politics of Working Life; V Nee & R Swedberg (Eds), The Economic Sociology of Capitalism. A detailed reading list will be provided at the beginning of the course.
Assessment: Project (100%, 4000 words) in the ST.
Two hard copies of the assessed project, with submission sheets attached to each, to be handed in to the Administration Office, S200, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all workshop sessions and submission of all set coursework is required.

SO434  Cultural Theory and Cultural Forms
This information is for the 2015/16 session.
Teacher responsible: Dr Fabien Accominotti STC S206 and Dr Sam Friedman STS S216
Availability: This course is compulsory on the MSc in Culture and Society. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The Sociology of Culture is the core course for the MSc Culture and Society. The aim is to introduce you to a wide range of approaches, debates and issues that loom large in the study of cultural behaviour. By the end of this course you should feel you have a reasonable map of different aspects and approaches to researching cultural processes; and you should feel able to formulate your own research questions and strategies within the diverse traditions of the sociology of culture.
The course’s primary focus is on the consumption and the production of culture, but the class also explores larger sociological notions (e.g. high vs. popular culture; subcultures) and approaches (e.g. field theoretical vs. interactionist approaches to cultural production), as well as social mechanisms that are transposable to other, non-cultural settings (e.g. mechanisms explaining superstar phenomena). Throughout we use a mix of empirical case studies and sociological theory. We want to encourage you to connect research and analysis – to keep asking whether a particular theory is good for making sense of things, and conversely, what concepts can be developed from particular things in the world.
The first term of the class (the Michaelmas Term) concentrates on the sociological explanation of cultural consumption. It surveys classic theories as well as recent debates dealing with the reception of culture. It then broadens the scope to explore how cultural consumption relates to social stratification. In the Lent Term, we first introduce major theoretical paradigms in the sociology of cultural production, and examine sociological accounts of artistic creativity. We then use cultural fields as laboratory-like settings to delineate mechanisms that can also be at work in other social domains, but are especially prevalent in cultural worlds. We thus unpack processes of social valuation, the relationship between talent and success, as well a number of social mechanisms at play in artistic labour markets and in the culture industries. We conclude with a brief sequence on contemporary issues in the production of culture.
Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT.
Reading weeks: week 6 (MT) and week 6 (LT)
Formative coursework: All students are expected to submit one piece of non-assessed written work per term and prepare seminar presentations.

Term 2

Assessment: Essay (50%, 5000 words) in the LT.

Essay (50%, 5000 words) in the ST.

Two hard copies of each assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first essay is due by the second Thursday of Lent Term and the second essay is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each essay is due.

Attendance at all seminars and submission of all set coursework is required.

SO438 Half Unit Not available in 2015/16

Sociology of Employment I: Social Relations at Work

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick McGovern STC S119E

Availability: This course is available on the MSc in Economy, Risk and Society, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Social Research Methods and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: social science degree

Course content: The employment contract; theoretical perspectives on the employment relationship; control and consent at work; scientific management and McDonaldization; informality, work groups and emotional labour; labour market divisions; women in the labour market; occupational segregation; the ‘gender gap’ in pay; discrimination at work.

Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 2 hours of seminars in the LT. 2 hours of lectures and 6 hours of seminars in the ST.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: K Grint, The Sociology of Work (3rd edn); C Tilly & C Tilly, Work Under Capitalism; C Hakim, Key Issues in Women’s Work (2nd edn). A more comprehensive bibliography will be available to students taking this course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the LT.

Attendance at all seminars and submission of all set coursework is required.

SO444 Half Unit

Qualitative Methods for Cultural Research

This information is for the 2015/16 session.

Teacher responsible: Dr Tina Basi STC S308

Availability: This course is available on the MSc in Culture and Society. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Aims and philosophy of qualitative research; contrasts with quantitative research; research strategy and research design; in-depth interviewing; relationship between substantive problems and methodological approaches; ethnographic enquiry; analysis of “classic” and contemporary studies.

Teaching: 20 hours of lectures in the LT.

Reading week: week 6

Indicative reading: U Flick, An Introduction to Qualitative Research (2nd edn), Sage, 2002; M Quinn Patton, Qualitative Research & Evaluation Methods (3rd edn), Quinn, 2002; M Bauer & G Gaskell, Qualitative Researching with Text, Image and Sound: A practical handbook for social research, 2000; M Burawoy, Ethnography Unbound: Power and Resistance in the Modern, 1991; R Burgess, In the Field, 1984; R Burgess, Field Research: a Sourcebook and Field Manual, 1982; M Hammersley & P Atkinson, Ethnography: Principles in Practice, 1995; D Silverman, Interpreting Qualitative Data: Methods for the Analysis of Talk, Text and Interaction, (new
The City Design Research Studio is the central unit of the MSc programme, linking the critical issues raised in the core and optional lecture courses with the practical analysis of issues of city design and development, and proposals for urban intervention. This course promotes a practical understanding of the city as a social and built environment. It will provide students with an appreciation of the complexities of urban design and development processes and with interdisciplinary tools for addressing specific urban challenges. The course addresses design as a mode of research and practice that shapes urban environments, responds to urban problems, and connects visual, social and material forms in the city. It aims to integrate the physical, economic, social and political aspects of urban contexts, and develops ways to analyse these visually, textually and verbally.

**Teaching:** The Studio course runs for one full day each teaching week in MT and LT through lectures, workshops and regular small-group tutorials; additional specialist seminars and workshops are scheduled throughout the Studio course. Studio groups are expected to work together during the scheduled Studio hours, and prepare collectively for regular workshops and tutorials. In MT, the Studio course focuses on methods and approaches of social and spatial research and analysis. In LT, Studio groups work intensively on a detailed analysis of a specific urban context, and develop a practical proposal for intervention in that site.

**Formative coursework:** Group presentations for faculty and guest critics. 1 x research presentation and site analysis.

**Assessment:** The assessment consists of one Studio portfolio (50%) and an individual tutor assessment (50%).
SO454  Half Unit
Families and Inequalities

This information is for the 2015/16 session.

Teacher responsible: Dr Ursula Honz STC S100B

Availability: This course is available on the MSc in Inequalities and Social Science, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-colonial development, the Third World, and the United States. Topics include transitional justice as a field of practice and a field of knowledge; historical injustice - apologies and reparations; state crimes; retributive and restorative justice; perpetration; theology and therapy in reconciliation; memory and atrocity. The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and the political subjects of reconciliation discourse. It is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy among others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Assessment: Essay (1,500 words) in the LT.

SO458  Half Unit
Gender and Societies

This information is for the 2015/16 session.

Teacher responsible: Dr Suki Ali STC S102

Availability: This course is available on the MSc in Gender, Policy and Inequalities, MSc in Political Sociology, MSc in Social Research Methods, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course introduces theoretical debates and contemporary issues in the sociological study of gender. Topics include femininities/masculinities; sexualities; nation and family; work; education; violence; transnational feminism; politics, representation. NB topics may change slightly from year to year.

Teaching: 30 hours of seminars in the MT.

Reading week: week 6

Assessment: Essay (100%, 5000 words) in the LT.

SO457  Half Unit
Political Reconciliation

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the MSc in Human Rights, MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped.

Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-communist Europe, Australia and the US. Topics include transitional justice as a field of practice and a field of knowledge; historical injustice - apologies and reparations; state crimes; retributive and restorative justice; perpetration; theology and therapy in reconciliation; memory and atrocity. The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and the political subjects of reconciliation discourse. It is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy among others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
SO463 Contemporary Social Thought
This information is for the 2015/16 session.
Teacher responsible: Prof Nigel Dodd STC S106
Availability: This course is compulsory on the MSc in Sociology (Contemporary Social Thought). This course is available on the MSc in Culture and Society, MSc in Economy, Risk and Society, MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course critically explores cutting edge issues and themes in contemporary social thought. Guest lecturers include Ulrich Beck, Craig Calhoun and other globally renowned social theorists.
This course deals with themes such as transformations in time and space, social and cultural capital, new technologies, methods and society, cosmopolitanism and post-cosmopolitanism. Topics covered include time, space, speed and technology; money and the economy; the re-emergence of social class divisions; technofeminism/cyberfeminism; cultural capital; cosmopolitanism, and human rights.
Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT.
Reading weeks: week 6 (MT) and week 6 (LT).
Formative coursework: One formative essay (1,500 words) and one book review (750-1,000 words).
Assessment: Exam (70%, duration: 3 hours) in the main exam period. Essay (30%, 3000 words) in the ST.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars and submission of all set coursework is required.

SO465 Half Unit
City-Making: the Politics of Urban Form
This information is for the 2015/16 session.
Teacher responsible: Mr Philipp Rode TW2 8.01K and Dr Savvas Verdis TW2.8.01.D
Availability: This course is compulsory on the MSc in City Design and Social Science. This course is available on the MSc in Regional And Urban Planning Studies, MSc in Sociology (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This case study-led course provides a critical understanding of major urban development initiatives and practices in international city contexts. It will introduce students to the following knowledge and skills:
• general understanding of political theories underlying urban development models
• ability to situate major urban development initiatives within different development cultures and socio-economic policy agendas
• understanding the role of public, private and third party actors and formal and informal urban development processes
• perspectives on decision making at the strategic, pre-design stage for urban development initiatives and ability to relate urban policy to spatial outcomes, operating at different scales
• knowledge of key evaluation approaches and analytic frameworks used in the analysis of proposed and existing urban developments
• understanding of how urban development objectives, phases and processes can be integrated and how policy making, economic development, urban planning, city design, architecture, and engineering are related.
The course content is based on contemporary projects and urban trends examined in the context of cities throughout the world. These range from policies such as congestion charging (London) and Progressive City Development (Medellin) to urban development trends such as extreme urbanism in Mumbai and privatist planning (Canary Wharf, London and Santa Fe, Mexico City). Such projects will be examined through critical frameworks that include utilitarianism, cost benefit analysis, social and environmental justice, citizenship theory and the capabilities approach. The course will focus on negotiation, politics, financing, appraisals and decision-making for cities by inviting practitioners, experts and policy makers to join individual sessions for presentations and debate. Seminars and assessed project work for the course will be based on the analysis of Development Strategies and City Design briefs.
Further information on the course can be found on: www.citymaking.com
Teaching: 10 hours of lectures and 20 hours of seminars in the LT.
Reading week: week 6.
Formative coursework: 1 x contribution to student debate OR 1 x critical statement following a guest lecture AND submission of a 1,000 word position statement.
SO468 Half Unit
International Migration and Migrant Integration

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick McGovern STC S119E
Availability: This course is compulsory on the MSc in International Migration and Public Policy. This course is available on the MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Coverage of contemporary sociological perspectives on migrant integration including theories of international migration, immigration policy, labour market incorporation; welfare and social rights; assimilation and social integration; multiculturalism; religion and ethnicity; and the second generation.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.
Reading week: week 6.

Formative coursework: All students are expected to write two non-assessed pieces of work during the term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are:
S. Castles and M. J. Miller (2013) The Age of Migration (5th edn);

Assessment: Exam (100%, duration: 2 hours) in the main exam period.
Exam will be held during the Summer Term exam session.

SO470 Half Unit
The Sociology of Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Leon Wansleben STC S208
Availability: This course is available on the MSc in Economy, Risk and Society, MSc in Political Sociology, MSc in Sociology (Economic Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course offers an introduction to the sociology of markets; theoretical issues, such as market structure, valuation, and the role of the state will be covered; students will also get the chance to study particular markets themselves.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Reading week: week 6.

Formative coursework: A 1500 word essay is required.

Assessment: Essay (100%, 5000 words) in the ST.
Assessment will consist of an essay analysis of two case studies along with the submission of a portfolio (100%). Two hard copies of the assessed essay, with submission sheets attached to each, at the second Thursday of Summer Term.
An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all workshop sessions and submission of all set coursework is required.

SO471 Half Unit Not available in 2015/16
Technology, Power and Culture

This information is for the 2015/16 session.

Teacher responsible: Prof Judy Wajcman STC S203
Availability: This course is available on the MSc in Culture and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society); MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the...
constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including the environment, the internet, robotics, sex, and weapons.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Morozov, E. (2013) To Save Everything, Click Here: Technology, Solutionism and the Urge to Fix Problems That Don’t Exist (Allen Lane)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SO473 Half Unit Not available in 2015/16

Crime, Control and the City

This information is for the 2015/16 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies, MSc in Sociology and MSc in Sociology (Research).

Course content: This half unit course examines crime and disorder in city landscapes, the relationship between crime, space and place, and the complex mix of informal and formal social controls that influence different types and levels of crime. Drawing on a range of comparative literature from different cities, and using a mixture of classic and contemporary texts, we examine the importance of informal social control in maintaining social order in cities, the role of policing, and what happens when formal and informal social controls fail using the recent riots, gangs and homicide as examples. We also explore the principles of crime prevention - both physical and social - and use public housing as a case study to critically examine the relationship between crime and design.

Teaching: 20 hours of seminars in the LT.

Reading week: week 6.

Assessment: Essay (100%, 5000 words) in the ST.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Friday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO475 Half Unit

Material Culture and Design

This information is for the 2015/16 session.

Teacher responsible: Dr Donald Slater

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy, Risk and Society, MSc in Media and Communications (Data and Society), MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on designed entities in everyday life, looking at the ways in which materials are configured into things, practices, spaces and forms, and at the assemblage of objects across production, design, consumption and use. Though aiming to produce expertise in specifically social science research, the course will bring together literatures and debates that cross the social sciences, humanities and science/technology, drawing particularly on actor-network theory, material culture studies, sociology of consumption, practice theory, urban and architectural studies, cultural theory and design studies. There will also be a strong emphasis on methodology: what tools are available to social scientists to investigate the emergent properties and impacts of designed objects. Case studies will be central to the teaching, developing theoretical and methodological strategies through a (changing) set of empirical cases that are likely to include: digital objects (software, games); media objects; lights and lighting; fashion; domestic interiors.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Reading week: week 6.

Formative coursework: One 2,500 essay applying a theoretical approach to a specific case study.

Assessment: Essay (100%, 5000 words) in the ST.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Friday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
SO476
Researching Migration: research questions and research methods

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick McGovern STC S119E and Dr Marco Scipioni CON 3.14
Availability: This course is compulsory on the MSc in International Migration and Public Policy. This course is not available as an outside option.
Course content: Having introduced the students to a range of possible research strategies, the students will be asked to prepare informal seminar presentations on their proposed research in the MT and LT. In addition, they will submit a one hundred word topic summary towards the end of the MT and a 400 word research proposal before the end of the LT. They will also prepare and deliver a formal presentation on their research for a workshop early in the ST. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to revise their research plans. A final proposal will be submitted after the ST workshop.
Teaching: Lectures 3 x 1 hour (3); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 12 hours
Formative coursework: Students will be expected to produce 3 presentations in the MT, LT and ST.
Assessment: This course is not assessed.

SO477
Half Unit Not available in 2015/16
Urban Social Theory

This information is for the 2015/16 session.

Teacher responsible: Dr David Madden
Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course is a comprehensive introduction to urban social theory. The class will focus on major concepts, paradigms, texts and thinkers in order to critically assess different ways of theorising the urban. It will analyse various forms of urban theory including political economy, human ecology, phenomenology, feminism, postmodernism and postcolonialism, which are used as lenses through which to understand a variety of topics, such as socio-spatial restructuring, urban utopianism, industrial transformation, neoliberalization, technocracy, infrastructural politics, multiculuture, cosmopolitanism, the right to the city and planetary urbanisation.
Teaching: 20 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Assessment: Essay (100%, 5000 words) in January.

SO478
Social Scientific Analysis of Inequalities

This information is for the 2015/16 session.

Teacher responsible: Prof Michael Savage STC S210
Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.
Course content: The course will consider how the issue of inequality is examined in each of the main contributing disciplines (Economics, Geography, Media and Communications, Social Anthropology, Social Policy, Sociology). Drawing on contrasting perspectives from different disciplines, topics to be covered would include patterns and trends in economic inequalities; approaches to quantitative measurement of inequality; wider aspects of inequalities and the capabilities approach; inequalities and gender, ethnicity and age; social and intergenerational mobility; geographical and neighbourhoood polarisation; health inequalities; media representation of inequalities; ethical and philosophical approaches; policy and the impact of government.
Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.
Assessment: Exam (50%, duration: 3 hours) in the main exam period. Essay (25%, 3000 words) in the LT. Essay (25%, 3000 words) in the ST.

SO480  Half Unit  Not available in 2015/16

Urban Inequalities

This information is for the 2015/16 session.

Teacher responsible: Prof Francine Tonkiss STC S114

Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LS and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course offers a critical introduction to key issues and processes in the study of contemporary urban inequalities. Recent urban analysis has highlighted the growing share of the global population that now lives in cities; this course puts that growth in the context of another major urban trend: deepening patterns of inequality in many cities across the world. It examines the continuing role of ‘older’ bases of urban inequality - access to land and property, gender inequality, ethnic and racial discrimination, legal exclusion and informality - as well as significant emerging patterns, including extreme concentrations of wealth at the top, middle-class stagnation, privatisation and spatial secession, immigration and insecurity. It also examines the complex of ways in which urban inequality is experienced, not only in terms of income or property, but also in consumption inequalities, inequities in access to housing, transport, urban services and legal protections, spatial disparities and environmental risks and injustices. The course considers the range of social, economic, environmental and political factors that shape, and also might help to address, urban inequality in these different contexts.

In sum, the course will:
- provide a critical introduction to current and emerging patterns of urban inequality
- consider the production of urban inequalities through social, economic, political and spatial processes
- explore common themes and critical differences across developed and developing cities
- address key debates in a range of urban disciplines, and situate these in specific urban contexts and examples

Key themes
- Urban growth and the growth of inequality
- Wealth, income and inequality
- Spatial injustice: segregation and access
- Environment and inequities
- Informality and insecurity
- Social inequality in the city: gender, race and exclusion
- Governing inequality

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

1 x 2000-word essay

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

Two hard copies of the project to be submitted to the Cities Programme administration office, no later than 4.30pm on the first Wednesday of ST; a third copy uploaded to Moodle.

SO481  Half Unit

Class, Politics and Culture

This information is for the 2015/16 session.

Teacher responsible: Dr Daniel Laurison STC S211

Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is not available as an outside option.

Course content: The course will begin by introducing traditional theories of social class and stratification before going on to examine the history and political significance of class in Britain, and how this compares with other countries throughout the world.

It will then look at the place of class in a contemporary political context, critically examining the claim made by some ‘postmodern’
writers, and prominent politicians, that class boundaries have been irrevocably eroded. The course will then move on to look at the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people’s cultural taste, with the privileged using their preferences for ‘highbrow’ culture as a means of expressing their superiority over the working classes, who tend to prefer more ‘lowbrow’ culture. We interrogate how these arguments relate today, where the lines between high and low culture are increasingly blurred, where strong cross-cultural differences persist between Europe and the U.S, and where new taste distinctions exist even in traditionally lowbrow art forms, such as comedy and pop music. We then take a more detailed look at class-based boundaries in taste and lifestyle. In particular, we focus on the way in which the middle classes demonise sections of the working class based on what they consider to be ‘pathological’ consumption choices – focusing in particular on the ‘Chav’ phenomenon in Britain. We go on to explore both the meaning and consequences of such overt class prejudice, both in Britain but also using research from the U.S, the Netherlands and other international contexts. Finally, the module will ask to what extent class boundaries are malleable? How easy is it for people to escape their backgrounds and move upward or downward in social space? This final section of the course thus looks at contemporary patterns of social mobility, examining the social benefits and challenges that mobility implies, increasing closure within global elites, and the rise of the middle classes in developing countries like China, Brazil and South Africa.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Reading week: week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Essay (100%, 5000 words) in the LT. Attendance at all seminars and submission of all set coursework is required. Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO482  Half Unit
Topics in Race, Ethnicity and Postcolonial Studies

This information is for the 2015/16 session.

Teacher responsible: Dr Suki Ali STC S102
Availability: This course is compulsory on the MSc in Sociology (Research). This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course offers students a broad exposure to issues in the theory of race, racism and ethnicity as well as an opportunity to consider a range of contemporary instances in which the social and political problems arising from these factors of division have been manifested. It will offer a preliminary genealogy of race thinking connecting historical and theoretical work with new scholarly debates over multi-culture, diversity, genomics, postcolonialism, and human rights.

Teaching: 20 hours of seminars in the MT.

Reading week: week 6. Seminar length may be extended to three hours each depending on student numbers.

Formative coursework: Students have the option of writing a 3,000 word paper in preparation for the assessed essay.

Assessment: Essay (100%, 5000 words) in the LT.
creates a set of dilemmas that must be managed and dealt with for efforts to be successful. The course will focus on social movement organisations, NGOs, associations, cooperatives, communes, and the dilemmas that these organisations confront in attempting to realise their goal of a better society. The course will also familiarise students with the theoretical and analytical tools sociologists use to understand social change organisations.

**Teaching:** 20 hours of seminars in the LT. The class format will be a combination of lectures, guest Q&A with leaders of social change organisations, and seminar discussion. Week 6 is a reading week.

**Formative coursework:** Formative coursework will consist of preparing and leading discussions, in-class analytical writing, and assignments meant to advance student work on the final essay.

**Indicative reading:**
- Katherine Chen, *Enabling Creative Chaos*
- Nina Elisoph, *Making Volunteers*
- James Ferguson, *The Anti-Politics Machine*
- Timothy Mitchell, *The Rule of Experts*
- David Graeber, *The Democracy Project*
- Frances Fox Piven and Richard Cloward, *Poor People's Movements*
- Charles Perrow, *A Society of Organizations*
- Elisabeth Clemens and Mary Bernstein, *The Multi-Institutional Perspective*
- V.I. Lenin, *What is to be done?*
- Joreen, *The Tyranny of Structurelessness*

**Assessment:**
- **Essay (100%, 4000 words)** in the ST.
- For their assessment students will complete an essay that does not exceed 4000 words in length. The essay will either be a review essay of the sociological literature on a topic related to social change organisations or an analysis of a social change organisation using the tools learned in the class.
- Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

---

SO493

**MSc in Culture and Society Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Mr Fabien Accominotti STC206

**Availability:** This course is compulsory on the MSc in Culture and Society. This course is not available as an outside option.

**Course content:** This workshop will guide students through the process of conducting an independent dissertation project in the MSc Culture & Society.

**Teaching:**
- 1 hour and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

**Indicative reading:** This is a workshop and has no specific reading list.

**Assessment:**
- **Dissertation (100%, 10000 words)** in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on the 18th of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

---

SO494

**MSc in Political Sociology Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Robin Archer STC S105 and Dr Michael McQuarrie STC S107

**Availability:** This course is compulsory on the MSc in Political Sociology. This course is not available as an outside option.

These seminars are for students on the MSc Political Sociology only.

**Course content:** These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have four seminars that aim to get students thinking at a meta-level about research in political sociology. The seminars can, of course, only address a small selection of approaches. Examples might include rational choice and institutionalist theories, or comparative and case study methods. But please note that the MSc in Political Sociology takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make a formal presentation once during the term.

**Teaching:**
- 6 hours of seminars in the MT. 15 hours of workshops in the LT.
- 4 x 1.5 hours seminars in MT. 10 x 1.5 hours workshops in LT.

**Formative coursework:** Students will be expected to produce 1 presentation in the LT.

**Students will:**
- (1) assess the strengths and weakness of selected theories and methods;
- (2) formulate a clearly specified research question and set out the rationale for researching this question and a proposed approach; and
- (3) give a presentation which develops one or two of the main arguments they anticipate will be important to their project.

**Indicative reading:**

**Assessment:**
- **Dissertation (100%, 10000 words)** post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on the 18th of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.
must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.

**Teaching:** 2 hours of seminars in the MT. 4 hours of seminars in the LT.

There will be one Introductory lecture in MT for all MSc Economy, Risk and Society students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an interdisciplinary programme. The Introductory session will also cover fieldwork and research ethics. This will be followed by 2 seminars in which students are broken down into smaller groups, in which they present and discuss possible research questions and strategies, along with preparing dissertation proposal and timeline.

**Formative coursework:** Students are required to submit two pieces of work; one topic proposal during MT, and a formal abstract at end of LT.

**Indicative reading:**
- Clive Seale, The Quality of Qualitative Research (London: Sage, 1999)
- Howard Becker, Writing for Social Scientists (Chicago: University of Chicago, 1986)

**Assessment:** Dissertation (100%, 10000 words) post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on the 18th of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

**SO497**

**MSc in Inequalities and Social Science Dissertation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Michael Savage STC.S210

**Availability:** This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option. These seminars are for students on the MSc in Inequalities and Social Science only.

**Course content:** These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have four seminars that aim to get students thinking at a meta-level about research on inequalities and what might make for a good topic, including issues of theory, measurement and methods. Please note that the MSc in Inequalities and Social Science takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make a formal presentation once during the term.

**Teaching:** 6 hours of seminars in the MT. 15 hours of seminars in the LT.

**Indicative reading:**
- Erik O. Wright. (2005) Approaches to Class Analysis, Cambridge UP
- Les Back and John Solomos (2000), Theories of Race and Racism: A Reader, Routledge
Assessment: Dissertation (100%, 10000 words) post-summer term. Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16.00 on the 18th of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO499  
MSc in Sociology Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the MSc in International Migration and Public Policy, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research).

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Tutor.

Teaching: Dissertation Preparation

The candidate should confirm a working title and prepare a brief abstract for their intended dissertation (up to one A4 page, double-spaced, including your name not your candidate number), which should be reviewed with their Academic Advisor no later than the Monday, week 8 of Lent Term. Along with the title and abstract the candidate and Academic Advisor should review and complete the Research Ethics Review Checklist by this same time. These abstracts are the basis for an MSc dissertation Workshop that is organised for each programme. Attendance at this workshop is optional but students are, of course, encouraged to attend.

Dissertation Particulars

The dissertation must be a report of a research project, whether it comprises primary empirical material, secondary empirical material or theoretical/exegetical work on a body of social thought: i.e. there must be an identifiable and clear research question governing the research project; there must be critical reflection on the methods used (including their limits and the reasons why they warrant the kinds of claims made); and substantive analysis of empirical or analytical material. Even where the topic is substantively a literature or policy-review exercise, candidates are expected to offer original reasoned argument and interpretation and to show evidence of a competence in research methods. Guidance on topic selection and methods will normally be provided by the candidate’s tutor. The dissertation is primarily a reflection of the candidate’s own work and so feedback will not be given on draft versions of the dissertation. The dissertation should reflect the candidate’s own views.

Assessment: Dissertation (100%, 10000 words) post-summer term. Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16.00 on the 18th of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

ST405  Half Unit
Multivariate Methods

This information is for the 2015/16 session.

Teacher responsible: Prof Irini Moustaki

Availability: This course is available on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Probability, Distribution Theory and Inference (ST202).

Course content: An introduction to the theory and application of modern multivariate methods used in the Social Sciences: Multivariate normal distribution, principal components analysis, factor analysis, latent variable models, and structural equations models.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the computer workshops.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST409  Half Unit
Stochastic Processes

This information is for the 2015/16 session.

Teacher responsible: Dr Umut Cetin COL 6.08

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Risk and Stochastics. This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Management and Regulation of Risk, MSc in Risk and Finance, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212).

Good undergraduate knowledge of distribution theory

Course content: A broad introduction to stochastic processes for postgraduates with an emphasis on financial and actuarial applications. The course examines Martingales, Poisson Processes, Brownian motion, stochastic differential equations and diffusion processes. Applications in Finance. Actuarial applications.

Teaching: 20 hours of lectures, 10 hours of seminars and 10 hours of workshops in the MT.

Week 6 will be used as a reading week.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.
ST411  Half Unit
Generalised Linear Modelling and Survival Analysis

This information is for the 2015/16 session.
Teacher responsible: Prof Fiona Steele COL.7.08
Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Mathematics to the level of Mathematical Methods (MA100) and probability to the level of Probability, Distribution Theory and Inference (ST202). Some knowledge of linear regression.
Course content: An introduction to the theory and application of generalised linear models for the analysis of continuous, categorical, count and survival data.
Topics include: linear regression, analysis of variance (ANOVA), logistic regression for binary data, models for ordered and unordered (nominal) responses, log-linear models for count data and contingency tables, and models for survival (duration) data. The Stata software package will be used in computer workshops.
Teaching: 20 hours of lectures and 15 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned weekly and returned to students with comments/feedback during the computer sessions.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST418  Half Unit
Non-Linear Dynamics and the Analysis of Real Time Series

This information is for the 2015/16 session.
Teacher responsible: Prof Leonard Smith TW1 11.01A
Availability: This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Time Series (ST422).
Course content: An introduction to the analysis of actual time series observations of real-world processes. The course casts both modern nonlinear methods and more traditional linear methods in a geometric approach. It introduces the properties of nonlinear mathematical models, covers chaos and the dynamics of uncertainty, and demonstrates the fundamental limitations in applied analysis which arise from model inadequacy. Fundamental aspects of predictability are addressed. Decision support under uncertainty is considered, with examples of economic impacts of forecasting, including weather and climate. The student will leave with a toolkit for the analysis and modelling of real data, with insights into how to evaluate which methods to employ (linear/non-linear, deterministic/stochastic) in a given problem, how to interpret the results in context, and how to avoid over interpreting nice theorems in practical circumstances. Concrete applications in economics (price time series, electricity demand, energy futures) and environment (weather, climate) as well as analytically tractable illustration from mathematics are considered.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST.
Week 6 will be used as a reading week.
Assessment: Exam (70%, duration: 2 hours) in the main exam period. Project (30%) in the ST.

ST416  Half Unit
Multilevel Modelling

This information is for the 2015/16 session.
Teacher responsible: Prof Irini Moustaki
Availability: This course is available on the MSc in Inequalities and Social Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.
Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g. individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g. Stata).
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the lab sessions.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST421  Half Unit
Developments in Statistical Methods

This information is for the 2015/16 session.
Teacher responsible: Dr Wicher Bergsma COL 6.06
Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is not available as an outside option.
Pre-requisites: Students must have statistical knowledge up to the level of the course ST425: Statistical Inference: Principles, Methods and Computation. It is also useful to take ST411: Regression, Diagnostics and Generalised Linear Modelling in parallel to this course.

Course content: Our aim is to teach students important statistical methodologies that reflect the exciting development of the subject over the last twenty years, which include empirical likelihood, MCMC, bootstrap, local likelihood and local fitting, model assessment and selection methods, boosting, support vector machines. These are computationally intensive techniques that are particularly powerful in analysing large-scale data sets with complex structure. A selection from the following topics will be covered: robustness of likelihood approaches: distance between working model and “truth”, maximum likelihood under wrong models, quasi-MLE, model selection with AIC, robust estimation. Empirical likelihood: empirical likelihood of mean. Bayesian methods and Markov chain Monte Carlo (MCMC) basic Bayes, Gibbs sampler, Metropolis-Hastings algorithm. Elements of statistical learning: global fitting versus local fitting, linear methods for regression, splines, kernel methods and local likelihood. Model assessment and selection: bias-variance trade-off, effective number of parameters, BIC, cross-validation. Further topics: additive models, varying-coefficient linear models, boosting, neural network, support vector machines. The course will be continuously updated to reflect important new developments in statistics.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Week 6 will be used as a reading week.

Formative coursework: Formative assessment consists of weekly exercises.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

**ST425 Statistical Inference: Principles, Methods and Computation**

This information is for the 2015/16 session.

Teacher responsible: Prof Qiwei Yao COL 7.16

Availability: This course is compulsory on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available on the MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will provide a comprehensive coverage on some fundamental aspects of probability and statistics methods and principles. It also covers linear regression analysis. Data illustration using statistical package R constitutes an integral part throughout the course, therefore provides the hands-on experience in simulation and data analysis.

Teaching: 40 hours of lectures, 10 hours of seminars and 10 hours of computer workshops in the MT.

Week 11 will be used as a revision week.

Formative coursework: Students will complete weekly assessed problem sheets. They will also complete R practice following instructions from the weekly computing workshop.

V. Venables et. al., An Introduction to R (http://cran.r-project.org/doc/manuals/R-intro.pdf)

Assessment: Exam (85%, duration: 3 hours) in the LT week 0. Project (15%) in the MT.

**ST426 Applied Stochastic Processes**

This information is for the 2015/16 session.

Teacher responsible: Dr Erik Baurdoux COL 6.04

Availability: This course is available on the MSc in Financial Mathematics, MSc in Risk and Stochastics, MSc in Statistics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Good undergraduate knowledge of statistics and probability.

Course content: A broad introduction to statistical time series analysis for postgraduates: what time series analysis can be useful for; autocorrelation; stationarity; causality; basic time series models: AR, MA, ARMA; ARCH and GARCH models for financial time series; trend removal and seasonal adjustment; invertibility; spectral analysis; estimation; forecasting. We will also discuss nonstationarity and multivariate time series.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Exercises will be given out to do at home during Week 6.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.
ST427  Half Unit
Insurance Mathematics

This information is for the 2015/16 session.
Teaching: This course is compulsory on the MSc in Risk and Stochastics. This course is available on the MSc in Financial Mathematics and MSc in Statistics (Financial Statistics). This course is not available as an outside option.
Course content: A self-contained comprehensive introduction to life and non-life insurance mathematics. For the life insurance, mortality laws are analysed from probabilistic and statistical point of view. Actuarial analysis of basic insurance products: pure endowment, life insurance/assurance, and annuity. Prospective/retrospective reserves of these products. Extension to general multistate system is studied via Markov chains Pricing embedded interest and mortality guarantees is introduced. For the non-life insurance, axiomatic approach to ordering of risks is presented, optimal forms of insurance from the insured's and from the insurer's point of view are analysed, and Pareto-optimal risk exchanges are introduced. Standard schemes of reinsurance are introduced and analysed. Ruin probability of an insurance company and capital requirement are studied. Heavy tail distributions and the extreme value theory are introduced. Case studies on current developments in life and non-life insurance industry are also presented.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. An informal ‘open book’ mid-term practice examination will take place in Week 6.
Formative coursework: 5 to 6 problem sets will be assigned.
Indicative reading: R Norberg, Risk and Stochastics in Life Insurance (Lecture notes)
R Norberg, Non-Life Insurance Mathematics (Lecture notes)
T Mikosch, Non-Life Insurance Mathematics.
Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

ST429  Half Unit
Probabilistic Methods in Risk Management and Insurance

This information is for the 2015/16 session.
Teaching: This course is compulsory on the MSc in Financial Mathematics, MSc in Management, MSc in Management (CEMS MIM), MSc in Management, Organisations and Governance, MSc in Risk and Stochastics and MSc in Statistics (Financial Statistics). This course is available as an outside option to students on other programmes where regulations permit.
Course content: A self-contained introduction to probabilistic and statistical methods in risk management. This course starts with risk factors models and loss distributions, which are illustrated via examples in stocks, derivatives, and bonds portfolios. Axioms of coherent risk measures are introduced. Value at risk and other risk measures are introduced and their relation with coherent risk measures is discussed. Multivariate factor models are introduced and analysed: covariance and correlation estimations, multivariate normal distributions and their testing, normal mixture distributions and their fitting to data. The theory of copulas is introduced; meta distributions, tail dependence, fitting copulas to data. Some limitations of copulas are also discussed. The extreme value theory is introduced: generalized extreme value distribution, threshold exceedances and generalized Pareto distribution, modelling and measures of tail risk. Applications to insurance with large loss are also discussed. Students will be exposed to financial data via sets of computer-based classes and exercises.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. An informal ‘open book’ mid-term practice examination will take place in Week 6.
Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned. A set of coding exercises which are similar to examples in computer lab sessions will be assigned.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Project (25%, 2000 words).

ST433  Half Unit
Computational Methods in Finance and Insurance

This information is for the 2015/16 session.
Teaching: This course is compulsory on the MSc in Risk and Stochastics. This course is available on the MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Financial Mathematics, MSc in Management and Regulation of Risk, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics) (MA400).
Course content: The objective of this course is to (a) develop the students’ computational skills, (b) introduce a range of numerical techniques of importance in actuarial and financial engineering, and (c) develop the ability of the students to apply the theory from the taught courses to practical problems, work out solutions including numerical work, and to present the results in a written report. Binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Finite difference schemes for the solution of ordinary and partial differential equations arising in insurance and finance. Numerical solutions to stochastic differential equations and their implementation. The course ends with an introduction to guidelines for writing a scholarly report/thesis.
Teaching: 10 hours of lectures in the MT. 20 hours of lectures and 10 hours of workshops in the LT. Week 6 will be used as a reading week.
Formative coursework: Weekly exercises and practicals are set and form the basis of the classes.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Project (50%) in the ST.

ST435  Half Unit
Advanced Probability Theory

This information is for the 2015/16 session.
Teaching: This course is compulsory on the MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is offered as a regular examinable half-unit as well as a service to students and academic staff.
Pre-requisites: Analysis and algebra at the level of a BSc in pure or
applied mathematics and basic statistics and probability theory with stochastic processes. Knowledge of measure theory is not required as the course gives a self-contained introduction to this branch of analysis.

Course content: The course covers core topics in measure theoretic probability and modern stochastic calculus, thus laying a rigorous foundation for studies in statistics, actuarial science, financial mathematics, economics, and other areas where uncertainty is essential and needs to be described with advanced probability models. Emphasis is on probability theory as such rather than on special models occurring in its applications. Brief review of basic probability concepts in a measure theoretic setting: probability spaces, random variables, expected value, conditional probability and expectation, independence, Borel-Cantelli lemmas Construction of probability spaces with emphasis on stochastic processes. Operator methods in probability: generating functions, moment generating functions, Laplace transforms, and characteristic functions. Notions of convergence: convergence in probability and weak laws of large numbers, convergence of probability measures and central limit theorems. If time permits and depending on the interest of the students topics from stochastic calculus might be covered as well.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be used as a reading/revision week.

Formative coursework: Exercises are set weekly and solutions are discussed in the lectures. There will be one set of compulsory written coursework in the MT which will be marked.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

ST436  Half Unit
Financial Statistics

This is information for the 2015/16 session.

Teacher responsible: Prof Piotr Fryzlewicz COL 6.01

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Risk and Stochastics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Statistical Inference: Principles, Methods and Computation (ST425).

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the “R” environment is an essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, predicting equity indices (case study), Markovitz portfolio theory and the Capital Asset Pricing Model, machine learning in financial forecasting, Value at Risk, simple trading strategies. The course ends with an extended case study involving making predictions of market movements in a virtual trading environment.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 11 will be spent working on the extended case study.

Formative coursework: Weekly marked problem sheets, with solutions discussed in class. Two marked case studies.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST439  Half Unit
Stochastics for Derivatives Modelling

This is information for the 2015/16 session.

Teacher responsible: Dr Beatrice Acciaio COL 6.02

Availability: This course is compulsory on the MSc in Risk and Stochastics. This course is available on the MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Valuation and hedging of derivative securities: general principles of mathematical finance; asset price models; static vs dynamic option pricing; connection with PDEs; exotic options; volatility derivatives; mean-variance hedging.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. During week 6 students will carry out group work, solving problems that will have been set in an earlier class.

Formative coursework: Weekly homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer.

Indicative reading: Steven Shreve, Stochastic Calculus for Finance II: Continuous-Time Models, Springer.

Selected papers from scientific journals. Thorsten Rheinlander and Jenny Sexton, Hedging Derivatives, World Scientific.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST440  Half Unit
Recent Developments in Finance and Insurance

This is information for the 2015/16 session.

Teacher responsible: Dr Beatrice Acciaio COL 6.02

Availability: This course is compulsory on the MSc in Risk and Stochastics. This course is available on the MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Recent developments in the theory of stochastic processes and applications in finance and insurance and their interface. A variety of topics will be chosen, from robust evaluation; optimal hedging; evaluation via utility criteria; optimal risk sharing; minimal capital requirement according to the Basel Accords and the Solvency Directives.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. During week 6, students will be required to give group presentations using material which will have been provided in week 1 or 2. They will also discuss in groups solutions to problems that will have been set in class.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned as well as a mock exam.

ST441 Half Unit  Not available in 2015/16
Introduction to Markov Processes and their Applications

This information is for the 2015/16 session.

Teacher responsible: Dr Umut Cetin COL 6.08

Availability: This course is available on the MSc in Financial Mathematics, MSc in Risk and Stochastics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: A weekly set of homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer. Students will also complete one or two sets of formative coursework during the year which will be marked. Feedback will be provided.

Indicative reading: An Introduction to Markov Processes and Their Applications. Lecture Notes by Umut Cetin

I. Karatzas and S. Shreve: Brownian Motion and Stochastic Calculus. Springer
D. Revuz and M. Yor: Continuous Martingales and Brownian Motion. Springer
K.L. Chung and J. Walsh: Markov Processes, Brownian Motion and Time Symmetry. Springer

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Project (20%) in the ST.

ST442 Half Unit
Longitudinal Data Analysis

This information is for the 2015/16 session.

Teacher responsible: Prof Fiona Steele COL 7.08

Availability: This course is available on the MSc in Inequalities and Social Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes.

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes.

Topics include: longitudinal study designs, models for two measures, (random effects) growth curve models, marginal models, dynamic (autoregressive) models, latent class models, and models for multivariate outcomes. The course will have an applied emphasis with fortnightly computer classes using the Stata software.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the computer sessions.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST443 Half Unit
Machine Learning and Data Mining

This information is for the 2015/16 session.

Teacher responsible: Dr Xinghao Qiao

Availability: This course is available on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course will be taught from a statistical perspective and students must have a sound knowledge of statistical methods of regression analysis, as covered for example in ‘Statistical Inference: Principles, Methods and Computation (ST425)’.

Students are not permitted to take this course alongside MG4E1 Algorithmic Techniques for Data Mining.

Course content: Machine learning and data mining are emerging fields between statistics and computer science which focus on the statistical objectives of prediction, classification and clustering and are particularly orientated towards contexts where datasets are large, the so-called world of ‘big data’. This course will start from the classical statistical methodology of linear regression and then build on this framework to provide an introduction to machine learning and data mining methods from a statistical perspective. Thus, machine learning will be conceived of as ‘statistical learning’, following the titles of the books in the essential reading list. The course will aim to cover modern non-linear methods such as generalized additive models, decision trees, boosting, bagging and support vector machines, as well as more advanced linear approaches, such as LASSO, linear discriminant analysis, k-means clustering, nearest neighbours. Methods suitable for time series data, such as the use of state-space models, will also be considered.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

The first part of the course reviews regression methods and covers linear discriminant analysis, variable selection, nearest neighbours, shrinkage and dimension reduction methods. The second part of the course introduces non-linear models and covers polynomial regression, splines, generalized additive models, tree methods, bagging, boosting, support vector machines, k-means, hierarchical clustering and some methods suited to time series.

Week 6 will be used as a reading week and exercises will be given out to students to work through at home.

Formative coursework: Students will be expected to produce 8 problem sets in the LT.

The problem sets will consist of some theory questions and data problems that require the implementation of different methods in class using a computer package.

Bishop, G. Pattern Recognition and Machine Learning. Springer-
ST444  Half Unit
Statistical Computing

This information is for the 2015/16 session.

Teacher responsible: Dr Yining Chen
Availability: This course is available on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: An introduction to the use of numerical linear algebra and optimisation in statistical computation, followed by their applications in parametric statistical methods, including least squares, maximum likelihood, generalized linear modelling, LASSO, etc. We then present selected topics in computational methods in nonparametric statistics, including kernel density estimation and splines. If time permits, more advanced topics such as EM and simulated annealing will also be covered. Throughout the course, students will gain practical experience of implementing these computational methods in a programming language. Learning support will be provided for at least one programming language, such as C++ or Python, but the choice of language supported may vary between years, depending on judged benefits to students, whether in terms of pedagogy or resulting skills.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.

i. Introduction to Tools in Numerical Analysis: linear algebra (Gaussian elimination, Cholesky decomposition, singular value decomposition, QR decomposition, matrix inversion and condition); numerical optimization (golden section, steepest descent, Newton's method, Quasi-Newton methods, stochastic search); convex optimization (coordinate descent, shor's algorithm, etc.)
ii. Applications to Parametric Statistics: linear regression and least squares (using numerical linear algebra); generalized linear models (using numerical optimization); iteratively reweighted least squares and generalized linear models; Lasso (using convex optimization)
iii. Applications to Nonparametric Statistics and beyond: density estimation (kernel density estimation, fast fourier transform, choice of bandwidth); regression function estimation ( spline smoothing, computation of splines using numerical linear algebra, principle component analysis using numerical linear algebra)
iv. Other more advanced topics if time permits: EM algorithm; simulated annealing; bootstrapping; cross validation

Workshops on implementation using programming language, such as C++ or Python, including statements, expressions, data types, control flow statements, functions, strings, lists, input, output, using external modules (libraries).

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Weekly exercises, usually involving programming.

Indicative reading: Computational Statistics by Givens and Hoeting
Statistical computing in C++ and R by Eubank and Kupresanin
Introduction to C++ for Financial Engineers: An Object-Oriented Approach by Duffy
The Art of R Programming: A Tour of Statistical Software Design by Matloff
Think Python: How to Think Like a Computer Scientist by Downey

Assessment: Exam (70%, duration: 1 hour and 50 minutes, reading time: 10 minutes) in the main exam period.
Project (30%) in the MT.
Executive Taught Master’s Course Guides
**EC409E**  Half Unit  
**Public Policy in Practice Workshop III (EMPA)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Daniel Sturm and Dr Joachim Wehner  
**Availability:** This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

**Pre-requisites:** There are no pre-requisites for this course.  
**Course content:** The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

**Teaching:** A three-day modular teaching block.  
**Formative coursework:** One optional mock policy exercise will be provided.

**Indicative reading:** Readings that are specific to each policy area will be distributed at the beginning of the course  
**Assessment:** Essay (100%, 2000 words).  
Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

**EC421E**  Half Unit  
**Global Market Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Professor Andrew Bernard  
**Availability:** This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

**Pre-requisites:** Students must have completed Empirical Methods for Public Policy (EC455E) and Economic Policy Analysis (EC440E).

**Course content:** This course focuses on the economic interdependence between countries in a global economy. The first part of the course examines the structure and geography of world trade and examines popular hypothesis such as the “global village” or “flat earth”. The second part of the course analyses macroeconomic issues such as the magnitude and effects of international capital flows, the debate over fixed versus flexible exchange rates and the economics of a common currency.

**Teaching:** A one-week modular teaching block.  
**Formative coursework:** One mock essay opportunity will be provided.

**Indicative reading:** A full reading list will be distributed at the beginning of the course.  
**Assessment:** Essay (50%, 2000 words) and online assessment (50%).  
Please note that online examinations take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

**EC440E**  Half Unit  
**Economic Policy Analysis**

This information is for the 2015/16 session.  

**Teacher responsible:** Professor Gerard Padró i Miquel and Dr Ethan Ilzetzki  
**Availability:** This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

**Pre-requisites:** There are no pre-requisites for this course.  
**Course content:** The course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The course will cover both key microeconomic policy issues, such as externalities, public goods and principal-agent problems and macroeconomic issues such as unemployment, fiscal and monetary policies, international trade and finance and the determinants of long-run growth.

**Teaching:** A one-week modular teaching block.  
**Formative coursework:** One mock examination will be provided.

**Indicative reading:** A full reading list will be distributed at the beginning of the course.

**Assessment:** Project (50%, 2000 words) and online assessment (50%).

Please note that online examinations take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

**EC454E**  Half Unit  
**Development Economics**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Robin Burgess LRB.R524 and Prof Oriana Bandiera LRB.R526  
**Availability:** This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

**Pre-requisites:** Students must have completed Empirical Methods for Public Policy (EC455E) and Economic Policy Analysis (EC440E).

**Course content:** The main focus of this course is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

**Teaching:** A one-week modular teaching block.  
**Formative coursework:** One mock essay opportunity will be provided.

**Indicative reading:** A reading list will be distributed at the start of the course.

**Assessment:** Essay (50%, 2000 words) and online assessment (50%).

Please note that online examinations take place on the third Friday after module teaching concludes. Essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.
EC455E  Half Unit
Empirical Methods for Public Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Daniel Sturm and Dr Gregory Fischer
Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no formal pre-requisites, but additional advance readings will be distributed. A familiarity with basic statistical concepts and basic calculus is very useful.
Course content: The course introduces students to the quantitative evaluation of public policies. The focus of the course is on practical applications of techniques to test the effectiveness of public policy interventions. The course begins with an overview of the key benefits of randomized experiments in evaluation of public policies. Next the course covers a number of techniques that are widely used in the evaluation of public policies, including difference-in-differences regressions, regression discontinuity approaches, matching and concludes with a brief introduction to cost-benefit analysis.

Teaching: A one-week modular teaching block.
Formative coursework: One mock examination will be provided.
Indicative reading: A full reading list will be distributed at the beginning of the course.
Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online examinations take place on the third Friday after module teaching concludes. The project will consist of a 2000 word data analysis exercise due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

EC4H8E  Half Unit
Executive MPP Capstone Project

This information is for the 2015/16 session.

Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: Students will undertake a group project (in teams usually of 3 to 5 people) relating to a policy problem faced by the civil service. The group will have a period of approximately 3 months to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on presentations of work-in-progress during the project duration.
Assessment: Project (100%, 10000 words).

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.
1) Presentation and submission of the project report to the client organisation. 20% of the marks are assigned by the client organisation.
2) Group project report. The main body of the report may not exceed 10,000 words and will be read by academic markers whose assessment will count for 60% of the final grade. Additionally, each group member must write a personal reflection on their contribution to the group’s work, to be submitted alongside the report. The reflection should be no more than 600 words, and should include details of the student’s contributions to the project. The reflections should not be included in the report submitted to the client.
3) The final 20% of the marks are allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties) and (ii) group working and self-management as a team.

EC4J3E  Half Unit
Public Policy in Practice Workshop III (EMPP)

This information is for the 2015/16 session.

Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPP to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One mock policy exercise will be offered.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.
Assessment: Essay (100%, 3000 words).
Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

EU425E  Half Unit
Interest groups, markets and democracy (modular)

This information is for the 2015/16 session.

Teacher responsible: Steve Coulter
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The focus of this course is on the representation of interests in Europe, and their role in Economic policy-making. Students will analyse the main theoretical issues and selected empirical questions on how interests are differently organised across countries and at the EU level, on the interplay between interest representation and electoral politics, and on the policy outcome after interest intermediation. The objective is to understand the dynamics of economic policy-making in comparative perspective, with an emphasis on the globalisation period.
Teaching: The course will run between 11-15 April 2015.
Formative coursework: One essay.
EU443  Half Unit
European Capitalism(s) and the Global Economy

This information is for the 2015/16 session.
Teacher responsible: Dr Stephen Coulter COW 3.12
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The course consists of two parts. In the first part we will discuss the basic arguments and methodological considerations of the Varieties of Capitalism literature and conduct a comparative analysis of the core issue areas in the political economy of contemporary capitalism: how capital, labour and product markets are structured. The second part will build on these thematic treatments to discuss the structure of and dynamics of the main Western, Southern and Central European models of capitalism.
Teaching: The course will run between 21-25 September 2015.
Formative coursework: One 2,000 word essay
Assessment: Essay (50%).
Take home exam (50%) in the ST.

EU449E  Half Unit
Capitalism and Democracy in Central Europe (modular)

This information is for the 2015/16 session.
Teacher responsible: Dr Claire Gordon KSW 5.04
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The course applies concepts of political economy, economics and political science to its investigation of Central and Eastern Europe’s evolution through post-communist transition to highly open, FDI-dependent emerging markets with ‘European’ expectations of welfare. Placing the region in the comparative context of both the EU15 and comparable emerging markets, the course investigates the ongoing challenges of political and institutional consolidation and the developmental consequences of the liberalization and FDI-led growth model of the 1990s/2000s. The course examines the emerging strengths and persistent weaknesses of these political economies and considers their implications for the region’s emerging varieties of capitalism, relative international competitiveness and political stability.
Teaching: The course will run between 6-10 July 2015.
Formative coursework: One 2,000 word essay.

EU446E  Half Unit
Economic Governance of EMU (modular)

This information is for the 2015/16 session.
Teacher responsible: TBC
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 as a source of evidence to assess both the performance of EMU and the theories about monetary integration. We consider briefly the political and economic rationale for the establishment of EMU and then examine in detail how these rationales played themselves out in practice (e.g. problems of free-riding, political exchange, information asymmetries between policymakers etc). Indicative questions addressed in this course include: how and why did the EU develop the EMU project?; did economic theories prepare us for the Euro area crisis of 2010-11?; what are the challenges for member states in adjusting to the discipline of the ‘Euro-zone’?; what issues arise for the EU in managing relations between member states in the Euro-zone and those outside?; how does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks?; is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design?
Teaching: The course will run between 20-24 June 2016.
Formative coursework: One essay - 2,000 words
Assessment: Essay (50%).
Take home exam (50%) in the ST.

Assessment: Essay (50%).
Take home exam (50%) in the ST.

Assessment: Essay (50%, 2000 words). Take home exam (50%) in the MT.

EU452E  
Key Issues in the Political Economy of Europe (modular)

This information is for the 2015/16 session.

Teacher responsible: Dr Robert Hancke COW 2.09
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: This course forms the core content of the Executive MSc Political Economy of Europe. It tries to understand how the relation between state and economy in both Western Europe and Central and Eastern Europe has evolved over the post-war period. Key debates in this regard include the demise of Keynesianism as fiscal intervention by government and of real existing socialism, as well as the crisis of monetarism. We also examine how the operation of the EU as a whole, the Single Market and the monetary union in particular, interact with the political economy of European states inside and in the neighbourhood of the Community. The course aims to provide students with both an analytical understanding of and a systematic treatment of empirical issues related to the evolution of the European political economy. Topics include: State and economy in European economies; Economic theory and policy in Europe; The political economy of European integration; EU membership as a reform lever in post-communist Europe and in mature Western welfare states; EU enlargement; Monetary union and its crisis; the evolution of the Single Market.
Teaching: 27 hours of seminars in the MT. 27 hours of seminars in the LT.
Formative coursework: One 2,000 word individual essay, one project, plus a trial examination.
Assessment: Essay (50%, 2000 words). Take home exam (50%) in the ST.

EU453E  Half Unit
The Political Economy of Welfare State Reform (modular)

This information is for the 2015/16 session.

Teacher responsible: TBC
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states. The seminars establish the theoretical context, summarise the findings of quantitative comparative case studies and discuss European experience in the context of broader international experience. They then build on these concepts and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? Are the proper boundaries of EU social policy? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements?
Teaching: The Module will run between 12-16 September 2016.
Formative coursework: One formative essay - 2,000 words
Assessment: Essay (50%, 2000 words). Take home exam (50%) in the MT.

EU497E  Half Unit
Dissertation

This information is for the 2015/16 session.
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: Students in the Executive MSc Political Economy of Europe are required to write a dissertation on a topic within the field of their programme. Preparation for the Dissertation will commence with a week-long seminar (9 x 3hours) on aspects of research, writing, etc., followed by at least two research proposal drafts within two-month intervals, including (virtual) office hours, leading to a final dissertation project outline after 6 months (from December to July). The dissertation deadline is the second Monday in September of the second year.
Teaching: The course will run between 4-8 January 2016.
Assessment: Dissertation (100%).

FM405E  Half Unit
Fixed Income Securities and Credit Markets

This information is for the 2015/16 session.
Teacher responsible: Dr Christian Julliard
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Interest rate modelling and derivatives
• Credit risk
• Credit derivatives and risk management
This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management. By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as Government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives
such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-backed securities.

**Teaching:** 30 hours of lectures in the LT.

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

**Formwork (20%) in the LT.**

---

**FM406E  Half Unit**

**Topics in Portfolio Management**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Michela Verardo

**Availability:** This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

**Course content:**

- Implementing investment strategies and assessing their profitability
- Managing portfolios: trading costs, liquidity risk, FX risk
- Mutual funds and hedge funds

This course covers a wide range of topics in equity portfolio management, with a strong focus on empirical applications. The first part of the course introduces students to the implementation of several investment strategies, such as value, momentum, post-earnings-announcement-drift, betting-against-beta, carry trades; it also delves into the mechanics of the Black-Litterman model of portfolio optimization. The second part of the course explores some issues related to portfolio management, such as trading costs, liquidity risk, and currency hedging. The last part of the course analyses investment strategies of mutual funds and hedge funds, with particular emphasis on style analysis, selectivity, and timing skills. The course is based on recent empirical studies and on applied exercises using financial data.

**Teaching:** 30 hours of lectures in the LT.

**Formative coursework:** Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are Modern portfolio theory and investment analysis, by E. J. Elton, M. J.Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

**Coursework (20%) in the LT.**

---

**FM407E  Half Unit**

**Mergers, Buyouts and Corporate Restructurings**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Vicente Cuñat

**Availability:** This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

**Pre-requisites:** Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

**Course content:**

- Financial Valuation of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

This course covers advanced topics in Corporate Finance and Valuation and introduces students to valuation techniques for both securities and projects. The first part of the course introduces students to several advanced valuation techniques applied to firms and projects. The second part of the course focuses on particular deals that involve firm valuation, in particular, mergers, divestitures, partial-divestitures (e.g. equity care outs) and leveraged buyouts. The last part of the course provides with a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies and practitioner talks.

**Teaching:** 30 hours of lectures in the LT.

**Formative coursework:** Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

**Indicative reading:** A case pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

**Assessment:** Exam (70%, duration: 2 hours) in the main exam period.

Project (30%) in the LT.

---

**FM408E  Half Unit**

**Financial Engineering**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Jean-Pierre Zigrand

**Availability:** This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

**Pre-requisites:** Students will be expected to show some familiarity with calculus and statistics.

**Course content:** Provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products. This syllabus lists and describes the topics covered in this course. In a nutshell, the course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in Excel, VBA or Matlab.

**Teaching:** 30 hours of lectures in the MT.

**Assessment:** Exam (80%, duration: 2 hours) in the main exam period.

Project (20%) in the LT.
FM409E  Half Unit
Risk Management in Financial Markets
This information is for the 2015/16 session.
Teacher responsible: Dr Andrea Vedolin and Dr Philippe Mueller
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Hedging in equity and fixed income markets
• Market Risk, Value at Risk and Expected Shortfall
• Endogenous Risk and Limits to Arbitrage
• Credit risk and structured products

The aim of this course is to give an introduction to the analysis and management of risk within financial markets. The objective of the course is to develop a conceptual framework for thinking about financial risk and to show how these concepts are implemented in practice in a variety of contexts. First, the course gives an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, will discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the MT.
Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.
Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, Risk Management and Financial Institutions, Wiley, 2015, 4th edition.
Assessment: Exam (90%, duration: 2 hours) in the main exam period.
Coursework (5%) and presentation (5%) in the MT.

FM422E  Course content:
Corporate Finance
This information is for the 2015/16 session.
Teacher responsible: Dr Amil Dasgupta and Dr Dirk Jenter
Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.
Course content:
• Financing
• Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course investigates how companies should finance their activities by issuing securities (debt, equity, and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine the optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course covers project valuation, by discounting risky future cash flows accounting for differences in capital structure, and establishes how companies should select the set of investable assets. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation and financing concepts in the form of major corporate decisions such as mergers and acquisitions and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: The recommended textbooks for this course are Berk and DeMarzo, Corporate Finance and Higgins, Analysis for Financial Management. Other recommended readings from relevant journal articles will be included in a study pack.
Assessment: Exam (80%, duration: 3 hours) in the main exam period.
In class assessment (20%) in the MT and LT.

FM414E  Half Unit
Corporate Investment and Financial Policy
This information is for the 2015/16 session.
Teacher responsible: Dr Ulf Axelsson
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Supporting the firm’s strategy with Long-term and short-term financial management
• Real options and strategic investment decisions
• Family firms, IPOS, and corporate governance
• Risk management, International valuation, and currency exposure

A case based course aimed at deepening the understanding of how to apply corporate finance concepts in a wide variety of business situations. In particular, we will try to build on concepts in business strategy, valuation techniques, and capital structure theories covered in previous courses, and see how to apply those tools in a systematic and rigorous way when approaching complicated real-life corporate finance problems. Examples of topics include working capital management, capital structure, risk management, real options, initial public offerings, international corporate finance, and family firms. Students will have to read up on cases before class and be prepared to discuss them interactively in class.

Teaching: 30 hours of seminars in the MT.
Formative coursework: 5 formative case study assignments (similar to summative cases).
Indicative reading: Berk and DeMarzo, “Corporate Finance”
-Around 10 case studies
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Coursework (20%) and class participation (10%) in the LT.
FM423E  Asset Markets
This information is for the 2015/16 session.
Teacher responsible: Dr Konstantinos Zachariadis and Prof Ian Martin
Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of microeconomics.
Course content:• Investments and Securities Valuation
• Portfolio choice and performance evaluation
• Derivatives
The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks’ cash flows with the present value formula. Alternative pricing models such as the APT and multifactor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.
Teaching: 60 hours of lectures. MSc Finance (part-time): taught MT, LT and ST (evenings). MSc Finance (full-time): taught MT (daytime).
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Assessment: Exam (80%), homework (10%) in the main exam period.
In class assessment (10%) in the MT.
In class assessment (10%) in the LT.

FM440  Corporate Finance Theory
This information is for the 2015/16 session.
Teacher responsible: Prof David Webb OLD M3.09
Availability: This course is available on the MSc in Accounting and Finance, MSc in Economics and Management, MSc in Finance (full-time), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Research) and MSc in Finance and Private Equity. This course is not available as an outside option.
Pre-requisites: Students must have completed Corporate Finance and Asset Markets (FM430).
This is an advanced course; students will be expected to have a strong background in Micro Economics and be comfortable with mathematical arguments. Coverage of the material in FM430 Corporate Finance and Asset Markets is normally required as a prerequisite for this course.
Course content: Provides a thorough grounding in recent developments in the theory of corporate finance. The course involves an advanced development of theories of corporate financial policy and corporate governance, going public, takeovers and insolvency. The development of these theories involves applying the modern theories of agency, asymmetric information and game theoretic ideas. Applications of the economics of incomplete contracts to the problems of ownership and control and financial decisions will also be developed.
Teaching: 20 hours of lectures, 3 hours of lectures and 9 hours of seminars in the LT, 4 hours of lectures in the ST.
Formative coursework: Written answers to problems will be expected on a weekly basis. There will also be an unassessed assignment.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

FM447  Half Unit  Global Financial Systems
This information is for the 2015/16 session.
Teacher responsible: Dr Jon Danielsson
Availability: This course is available on the MSc in Accounting and Finance, MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students should have a strong background in microeconomics, and be comfortable with formal arguments.
Course content: This course examines the academic and policy debates on the operation of the global financial system. The course will aim to be topical, where the analysis of the issues will be based on economic arguments. The course begins with an overview of important financial crisis and key institutions. Several theories of financial crises are then developed in some detail, and are assessed by reference to historical experience, The course concludes by analysis of the crises from 2007, including the latest policy and regulatory developments as well as the current situation in the European crisis.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: Students are expected to attempt the problem sets and essay questions set in the classes.
Indicative reading: Most material will be provided by the book Global Financial Systems (www.globalfinancialsystems.org), by Jon Danielsson, published by Pearson
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

FM472  Half Unit  International Finance
This information is for the 2015/16 session.
Teacher responsible: Prof Elisabetta Bertero
Availability: This course is available on the MSc in Accounting and Finance, MSc in Finance (part-time), MSc in Finance and Economics (Research), MSc in Finance and Private Equity, MSc in Financial Mathematics and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.
(Permission required from the course leader). Interested graduate students enrolled in any programme not listed above must email
the course leader to ask for permission. The email must include the list of finance and economics courses taken during their previous studies and the motivation for wanting to take the course. Only once this specific information is received by the course leader, the course request on LSE For You will be considered.

**Course content:** This course examines key issues in international finance, focusing on recent developments and incorporating theoretical, empirical, policy and institutional dimensions. The course uses exchange rates as a unifying theme and considers them from four perspectives: theory, policy, global risk and international investors. The course examines models of exchange rate determination and related empirical evidence. It analyses the choice and coordination of exchange rate regimes, including the European Monetary Union. It examines exchange rates as one of the sources of global financial instability. It considers the risk exposure for investors arising from exchange rate volatility and its hedging with currency instruments. The course also explores the links, in each area, to current developments such as the internationalisation of the Chinese Renminbi, the EMU sovereign debt crisis, the recent financial crisis and global imbalances, forex carry trades and the high volatility of short term exchange rates.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Formative coursework:** Students are required to undertake a group research project on a given topic in international finance.

**Indicative reading:** A selection of journal articles; background reading from a textbook such as Keith Pilbeam International Finance (Palgrave, 2013, 4th edition)

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

---

**FM475  Half Unit  Financial Management**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Daniel Ferreira

**Availability:** This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.

The information in this course guide pertains to the 2015-2017 cohort.

**Course content:** The aim of the course is to provide a comprehensive overview of firms’ financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students to address topical issues that modern corporations face. In particular, the course builds on concepts in business strategy, valuation techniques, and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial management, the course focuses on corporate finance and business valuation. Topics such as mergers and acquisitions and initial public offerings will also be covered.

**Teaching:** Taught during module three - 10 interactive lectures of 3 hours each:
1. Introduction to financial management
2. Debt and equity
3. Capital structure – Case discussion
4. Tax shields – Case discussion
5. Valuation - Discounted Cash Flow techniques
6. Capital markets and the pricing of risk
7. Valuation – Practical aspects
8. Sensitivity analysis – Case discussion
9. Mergers and Acquisitions
10. Initial public offerings

**Formative coursework:** Feedback on class participation.

**Indicative reading:** The recommended textbook for this course is Higgins, Analysis for Financial Management, 9th Edition and a pack of business case studies.

**Assessment:** Class participation (15%).
FM4T7  Half Unit
Global Financial Systems - Dissertation
This information is for the 2015/16 session.
Teacher responsible: Dr Jon Danielsson
Availability: This course is available on the MSc in Finance (part-time), MSc in Finance and Economics and MSc in Finance and Economics (Research). This course is not available as an outside option.
Course content: See entry for FM447
Teaching: 20 hours of lectures and 8 hours of seminars in the MT. 2 hours of seminars in the LT.
Assessment: Dissertation (100%, 6000 words) in the ST.
6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student’s supervisor. Deadline is Monday 6 June 2016. Please note that MSc Finance and Economics (Research) students can submit a dissertation of 6,000-10,000 words.

GV478E  Half Unit
Political Science and Public Policy
This information is for the 2015/16 session.
Teacher responsible: Prof Simon Hix CON3.07 and Dr Andrew Eggers
Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.
Course content: This course introduces students to core concepts and problems in politics and policymaking. Among the questions
we address: What determines political preferences and electoral outcomes? How are interests represented? How do political institutions shape policy outcomes? Does democracy work? We focus on tools that students should be able to apply broadly in analysing the political world.

**Teaching:** A one-week modular teaching block.

**Formative coursework:** One mock examination will be provided.

**Indicative reading:** Analyzing Politics: Rationality, Behavior and Institutions by Kenneth Shepsle (W.W. Norton, 2nd edition, 2010) is an excellent starting point and reference for many topics. A full reading list will be distributed at the beginning of the course.

**Assessment:** Essay (50%, 2000 words) and online assessment (50%).

Please note that online examinations take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

---

**GV488E  Half Unit**

**Regulatory Analysis**

**This information is for the 2015/16 session.**

**Teacher responsible:** Prof Martin Lodge CON3.08

**Availability:** This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

**Pre-requisites:** There are no pre-requisites, but recommended advance reading is given below.

**Course content:** The course examines contemporary issues in regulation in OECD countries and elsewhere. The focus is on exploring competing approaches towards regulation in the context of different domains, ranging from utility, environmental to health and safety regulation. Particular attention will be paid to issues such as institutional design, enforcement and compliance, as well as the relationship between politicians, regulators, business and other actors. Topics include institutional design, development and regulation, standard-setting, enforcement, ‘better regulation’, and accountability.

**Teaching:** A one-week modular teaching block.

**Formative coursework:** One mock examination opportunity will be provided.

**Indicative reading:** Managing Regulation by Martin Lodge and Kai Wegrich (Palgrave, 2012) introduces key themes. A different introduction is Understanding Regulation by Robert Baldwin, Martin Cave and Martin Lodge (Oxford University Press, second edition, 2012)

**Assessment:** Essay (50%, 2000 words) and online assessment (50%).

A 2,000 word assessed essay (50%) and online assessment (50%). Please note that online examinations take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

**Public Policy in Practice Workshop I (EMPA)**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Daniel Sturm 32L2.25 and Dr Joachim Wehner CON4.10

**Availability:** This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

**Pre-requisites:** There are no pre-requisites for this course.

**Course content:** The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

**Teaching:** A three-day modular teaching block.

**Formative coursework:** One optional mock policy exercise will be provided.

**Indicative reading:** Readings that are specific to each policy area will be distributed at the beginning of the course.

**Assessment:** Project (100%, 3000 words).

Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

**GV4HBE Half Unit**  
**Executive MPP Capstone Project**  
**This information is for the 2015/16 session.**  
**Teacher responsible:** Dr Joachim Wehner and Dr Daniel Sturm  
**Availability:** This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.  
**Pre-requisites:** There are no pre-requisites for this course.  
**Course content:** Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have a period of approximately 3 months to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.  
**Teaching:** Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project’s development and assistance with client liaison. Other members of staff may also advise as required.  
**Formative coursework:** Feedback will be provided on presentations of work-in-progress during the project duration.  
**Assessment:** Project (100%, 10000 words).  
The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.  
1) Presentation and submission of the project report to the client organisation. 20% of the marks are assigned by the client organisation.  
2) Group project report. The main body of the report may not exceed 10,000 words and will be read by academic markers whose assessment will count for 60% of the final grade. Additionally, each group member must write a personal reflection on their contribution to the group’s work, to be submitted alongside the report. The reflection should be no more than 600 words, and should include specific details of the student’s contributions to the project. The reflections should not be included in the report submitted to the client.  
3) The final 20% of the marks are allocated by the Capstone supervisor on the basis of the group’s performance in terms of (i) scoping and project development (including coping with difficulties) and (ii) group working and self-management as a team.

**IR442**  
**Diplomacy and Challenges**  
**This information is for the 2015/16 session.**  
**Teacher responsible:** Prof Michael Cox COL2.05A  
**Availability:** This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.  
**Pre-requisites:** There are no pre-requisites for this course.  
**Course content:** This course looks at six key aspects of diplomacy: the tools of diplomacy, both old and new; the arts of diplomatic and business negotiation; how different types of crisis have been resolved; in-depth discussions of a major current international problem; the challenges ahead, including flashpoints; preventative action and crisis management.  
**Teaching:** 20 hours of seminars, 6 hours of seminars, 1 hour and 30 minutes of seminars and 7 hours and 30 minutes of seminars in the LT. 2 hours of seminars in the ST.  
**Formative coursework:** One formative essay (2,000 words) with a pre-arranged title. Feedback will involve a meeting with each student to discuss their formative essay. We will aim to ensure that
students are able to:
  • Critically evaluate different kinds of evidence;
  • Assess the strengths and weaknesses of competing explanatory paradigms;
  • Formulate arguments in a coherent and balanced fashion.

Indicative reading:
2. G. R. Berridge, Diplomatic Theory From Machiavelli To Kissinger (Studies in Diplomacy)
3. Henry Kissinger, Diplomacy, 1994
6. Chester Croker, Taming Intractable Conflicts, 2004
8. I. William Zartman & Jeffrey Z. Rubin eds, Power and Negotiation, 2004
10. Michael Alexander, Managing the Cold War, 2005
15. Odell, Negotiating the World Economy, 2001;

Assessment: Project (100%, 3000 words) in the LT.
3.000 word assessed policy paper setting out a detailed strategy to implement a policy.

IR444  Half Unit

Strategy in Action

This information is for the 2015/16 session.

Teacher responsible: Prof Michael Cox COL2.05A

Availability: This course is available on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: In this course we will be examining through lectures, seminars and workshops four major foreign policy decisions, the diplomatic background to each of these and the strategic thinking behind them. We will be asking the students through group exercises to prepare a strategy and policy paper relevant to the day.

Teaching: 8 hours of seminars in the ST.
The course is taught over 48 hours. This includes 3 intense sessions - a weekend of assessing strategic decisions involving drafting and crafting papers, a second weekend of formulating strategic decisions and briefing sessions on methodology. All these will lay the foundations for the dissertation plan.

Formative coursework: Group discussion and formulation of strategy/policy papers.

Assessment: Dissertation (100%, 3000 words) in the LT.
The formulation of a dissertation topic which must be in the form of a 3,000 word dissertation plan (100%). This should include the title, an abstract, a problem statement which should identify the features and theoretical concepts associated with the topic, the aims and objectives (including research questions or hypotheses), a literature review and the methodology. This module is taken in conjunction with IR496 Dissertation: MSc Diplomacy and International Strategy (1.5 units).
**IR496 One and Half Unit**

**Dissertation: MSc International Strategy and Diplomacy (1.5 units)**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Michael Cox COL2.05A

**Availability:** This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

**Course content:** The dissertation will address a topic in the social sciences drawn broadly from the three core courses. This will normally be a library based dissertation. The topic should make central use of concepts in the study of diplomacy and strategy and should demonstrate a good understanding of these concepts and implications. The dissertation will draw on empirical topic areas but should also demonstrate a high degree of conceptual originality. Guidance on standards of presentation will be given in the handbook and conform to the standard laid down for MSc dissertations in the International Relations Department. The subject and title of the dissertation must be approved by the dissertation supervisor.

**Teaching:** Arrangements for supervision. Students will receive advice on how to choose a topic and how to write a dissertation from the dissertation supervisor in two 1.5 hour workshops and two 1.5 hour individual supervision sessions.

**Formative coursework:** To be confirmed.

**Assessment:** Dissertation (100%, 15,000 words) in the LT. A 15,000 word dissertation (100%) to be submitted in September 2015. This course is taken in conjunction with IR444 Strategy in Action (H).

Using the dissertation plan (IR444), the dissertation will include an introduction, theoretical framework, a literature review and methodology followed by chapters, conclusion and bibliography.

---

**LL400E Half Unit**

**European Capital Markets Law**

This information is for the 2015/16 session.

**Teacher responsible:** Professor Niamh Moloney

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** This course considers the harmonized regulatory regime applicable to key capital market actors across the Member States and which supports the integrated market. The topics covered include: the rationale for integration and the role of law, the evolution of the integration project, and the impact of the financial crisis; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market and the role of the Court; market access and the passport for investment services; the Markets in Financial Instruments Directive 2004 (MiFID I) and the 2014 reforms (MiFID II and the Markets in Financial Instruments Regulation) and regulation; the liberalization of order execution and the regulation of trading venues; the ‘UCITS’ mutual funds regime; retail investor protection and conduct regulation; the prospectus and disclosure regime; gatekeepers (credit rating agencies and investment analysts); and the institutional structure for law-making and for supervision, including the European System of Financial Supervision and the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

---

**LL401E Half Unit**

**The Law of Armed Conflict**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stephen Humphreys NAB5.12

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict or international humanitarian law)—as distinct from the law on the resort to force (jus ad bellum), which is a separate course. The course will take a critical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war (‘ Hague’ law), the ‘protected’ groups hors de combat (‘Geneva’ law), and the distinction between international and non-international armed conflict, the course will cover ‘lawfare’ more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in recent conflicts, including the wars in Iraq and Afghanistan, the ‘war on terror’, and the Israeli Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

**Indicative reading:** It is worthwhile acquiring the following books: Yoram Dinstein, The Conduct of Hostilities under the Law of International Armed Conflict (Cambridge UP, 2nd ed., 2010), Roberts and Gueff, Documents on the Laws of War (Oxford UP, 2000); Michael Walzer, Just and Unjust Wars (Basic books, 4th ed. 2006). Other useful books include: David Kennedy, Of Law and War (Princeton UP, 2006); Geoffrey Best, War and Law Since 1945 (Oxford UP, 1997). Detailed readings for each seminar will be made available on Moodle.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).
LL402E  Half Unit
Key Issues in Transnational Environmental Law

This is information is for the 2015/16 session.
Teacher responsible: Dr Veerle Heyvaert NAB7.06
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course focuses on current developments in environmental law beyond the State, which includes both the European and international level. It reviews the main law and policy principles that inspire transnational environmental developments, and identifies opportunities for and obstacles to the effectiveness of transnational environmental law. Then, the course turns the spotlight on the most important environmental challenges of our time and examines the role of transnational law in managing or resolving them. The course is structured as follows: 1. Environmental law in context: economic and alternative approaches to sustainable development. 2. Sources and principles of transnational environmental law. 3. Transnational liability: responding to global catastrophes. 4. Governing environmental risk and the role of the precautionary principle. 5. Controlling toxic substances. 6. Climate change: international law and policy developments. 7. Climate change: transnational carbon reduction regimes. 8. Protecting biodiversity through designation: the EU example. 9. Regulating markets for ecosystem services. 10. Trade and the environment. 11. Revision.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL403E  Half Unit
International Human Rights: Concepts, Law and Practice

This is information is for the 2015/16 session.
Teacher responsible: Dr Margot Salomon
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course has two parts. In part one the origins, development and current standing of the European Convention on Human Rights and Fundamental Freedoms are considered. The primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also
be referred to where appropriate. The course will analyse the
Convention from the perspective of selected rights within it, but will
also engage with the subject thematically, subjecting such concepts
as the ‘margin of appreciation’ and proportionality to close scrutiny.
The goal of this part of the course is to give students a good critical
understanding of the European Convention, the case-law of the Strasbourg
court and the Convention’s place within the constitutional and
political structure of ‘Greater Europe’. The second part of the course
is made up of a detailed study of the UK Human Rights Act. The
 origins and the political background to the Act will be explained,
and the structure of the measure will be fully elaborated, relying on
the text of the Act itself but also on the burgeoning case law that
accompanies the measure. This part of the course will identify
the principles that underpin the UK Act and explain its proper place
in British law. It will also explore the wider constitutional implications
of the measure, looking at its effect on the relationship between
courts and Parliament. Linkages with the broader European
framework discussed in the first part will be made by students
through their reading and through class-engagement.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of
producing a formative exam question of 2000 words to be delivered
one month from the end of the module’s teaching session by email.
Indicative reading: Jacobs and White, The European Convention
on Human Rights 5th edn (OUP, 2010) and/or Harris, O’Boyle and
Warbrick, Law of the European Convention on Human Rights 2nd
edn (Oxford, 2009). Also useful is Mowbray, Cases and Materials on
Kavanagh, Constitutional Review under the UK Human Rights Act
(Cambridge, 2009), Hickman Public Law after the Human Rights Act
(Hart, 2010) and Ghear, Principles of Human Rights Adjudication
(Oxford University Press, 2004).
Assessment: Either a take-home examination or 8,000 word
assessed essay (100%).

LL405E  Half Unit
Dispute Resolution and Advanced Mediation
This information is for the 2015/16 session.
Teacher responsible: Prof Linda Mulcahy NAB7.15
Availability: This course is available on the Executive LLM. This
course is not available as an outside option.
This course will be offered on the Executive LLM during the four
degree year period. The Department of Law will not offer all
Executive LLM courses every year, although some of the more
popular courses may be offered in each year, or more than once
each year. Please note that whilst it is the Department of Law’s
intention to offer all Executive LLM courses, its ability to do so will
depend on the availability of the staff member in question. For more
information please refer to the Department of Law website.
Course content: The principal focus of the course is upon methods
of resolving disputes other than adjudication. The course brings
together theory and observation of practice and is divided into two
parts. In the first section students examine what motivates people
to enter into disputes and the range of outcomes they seek, the history
of the “informal justice” movement and the transformation of
attitudes to dispute resolution in the UK and beyond. The emphasis
in this part of the course is also on looking at the two primary forms
of dispute resolution, negotiation and mediation. In the second part
of the course specialist practitioners work with the class in exploring
the interface between theory and practice and the different
dynamics of disputes and their resolution in specific subject areas
such as commercial law, community disputes, international law
and family law. The course is designed to complement the option on
Commercial Arbitration.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of
producing a formative exam question of 2000 words to be delivered
one month from the end of the module’s teaching session by email.
Indicative reading: Students will also find it useful to access the
following books which provide important context for debate about
the civil litigation system and negotiation tactics:
Practice, London: Sweet and Maxwell. This is written by practitioners
in the field and very simple to read. This book will also help you
when we come to study mediation which is often described as a
form of facilitated negotiation.
Simon Roberts and Michael Palmer’s 2005 (second edition) Dispute
Processes: ADR and the Primary Forms of Dispute Resolution,
Cambridge, Cambridge University Press. This is the most theoretical
book in this list but provides extracts from many of the seminal
works in the field that we will be studying. It adopts a very inter-
disciplinary approach. This is useful as background reading.
Assessment: Either a take-home examination or 8,000 word
assessed essay (100%).
modelling and regulation inside firm
Financial Stability – Policy Issues, Principles and Global Standard
Setters
Prudential Regulation of Banks – The Basel Accords
Deposit Guarantees
Bank Resolution and Insolvency
Teaching: 24-26 hours of contact time (for each half unit)
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.
Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, The Future of Finance: The LSE Report (2010); S Valdez and P. Molyneaux, Introduction to Global Financial Markets (7th edn).
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL407E  Half Unit
Regulation of Financial Markets II
This information is for the 2015/16 session.
Teacher responsible: Dr Philipp Paech NAB7.05
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course is a continuation of LL406E. The syllabus for Part I includes the following topics:
• Review of Fundamentals of Regulation
• Structural Bank Reform
• Regulation of Shadow Banking Activities
• Hedge Funds and other Alternative Investment Funds
• Public Investment Funds (UCITS)
• Credit Rating Agencies
• Securities Regulation (Trading)
• Securities Regulation (Clearing and Settlement)
• Personal Liability of Financial Sector Employees
• Derivatives Clearing
• Long Term Perspectives for International Financial Regulation
Teaching: 24-26 hours of contact time.
This course examines the regulatory structures governing financial markets and financial services. It covers the main principles of international, EU and UK financial regulation with the aim of developing a critical understanding of the conceptual framework for financial regulation. This half unit focuses on financial stability, including macro and micro-prudential regulation, regulation of trading and market infrastructure, and on new and emerging issues in financial regulation.
The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.
The syllabus for Part II includes the following topics:
• What is financial stability?
• Macro-prudential supervision- emerging strategies & techniques
• Micro-prudential supervision & the Basle capital adequacy regime
• Crisis Management & Bank Resolution
• Public safety nets and the problem of moral hazard
• Regulating Credit Rating Agencies
• Regulating Hedge Funds
• Regulating Derivatives and derivative markets
• Regulation of Market Infrastructure
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.
Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, The Future of Finance: The LSE Report (2010); S Valdez and P. Molyneaux, Introduction to Global Financial Markets (7th edn).
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL408E  Half Unit
Comparative Constitutional Law: Institutions
This information is for the 2015/16 session.
Teacher responsible: Dr Jo Murkens NAB7.31
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course examines the central issues in comparative constitutional law across a range of jurisdictions and from a variety of perspectives. The course opens with an introduction on the purpose of comparative constitutional law. The first substantive part discusses various approaches to the study of CCL as well as the migration of constitutional ideas (and related notions of constitutional borrowing, transplants etc). The second part deals with key constitutional concepts (constitution; rule of law; presidentialism, parliamentarism) which are discussed from a historical and comparative perspective. The point of these sessions is not to compare for the sake of comparing, but to equip you (the researcher) with the conceptual tools to do insightful, critical, and original comparative work of your own. The third part looks challenges the assumptions of liberal constitutionalism by examining constitutions in divided societies and authoritarian constitutionalism. The overall aim of the course is to develop students’ understanding and use of many general theoretical explanations surrounding debates in CCL, and to develop students’ critical/analytical approach to many of the questions facing judges and scholars in the next decade.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: There is no set book for this course. All materials will be made available in advance on Moodle.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL409E  Half Unit
Comparative Constitutional Law: Rights

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; euthanasia and physician-assisted suicide; gay sex and sodomy; religion in the public sphere; affirmative action; hate speech and denial of the holocaust; obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, Comparative Constitutional Law, 3rd edition, 2014.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL410E  Half Unit
International Financial Law and Practice I

This information is for the 2015/16 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: As the recent debate on shadow banking shows, the traditional financial market sectors of commercial banking, investment banking, derivatives, capital markets and asset management are nowadays converging. However, their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture of the entire financial market law. To this end, the course largely concentrates on the different activities of risk taking and risk shifting regardless of the type of financial institution involved. The course is also a novelty as it integrates both spheres of rulemaking for the financial markets, notably financial law and some fundamentals of financial regulation. Experience shows that approaching the framework for financial law without at least considering the interdependencies with risk management and capital requirements leaves us with only a fragmented picture. For non-practitioners, the market context of financial law appears sometimes confusing. Therefore, this course will first approach each subject from in a market perspective before coming to the legal framework. This short overview is essential with a view to understanding the permanent interaction between market behaviour and the legislators' and regulators' responses to it. The legal framework will be analysed taking into account international rules and developments as well as European legislation. Since the City of London is one of the globally most important financial markets, England will be used as anchor-jurisdiction in order to develop patterns of global significance that are addressed by legislators and regulators around the world, in particular also looking at the European Union and at international rulemaking. The course also highlights certain anomalies in differing legal treatment of the respective sectors, and considers key trends. It is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- The logic and the players of the financial market. The creation and allocation of risk. The distinction between ‘Law’ and ‘Regulation’.
- The reasoning and sources of financial law and regulation. The role of international law.
- Understanding the financial crisis.
- Security interests and financial collateral.
- Guarantee, indemnity, insurance.
- Trusts.
- Fund structures (public and alternative).
- Structured finance, securitisation and asset-backed securities. The rationale behind it. Risks.
- Syndicated loans.
- Regulatory arbitrage in respect of financial transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

- J. Benjamins, Financial Law, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for

International Financial Law and Practice II

This information is for the 2015/16 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course is available on the Executive LLM. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: This course may only be taken by Executive LLM students that have already completed LL410E.

Course content: This course looks at the various forms of transaction and structures such as derivatives, securitisation, syndicated loans and eurobonds with a view to the relevant commercial and regulatory background and the risks and protections available to participants in these markets. The course is based upon an analysis of the relevant issues under English law with reference to other systems for comparative purposes. It will be topical and its content adapted to the fast moving developments affecting international markets in capital and in risk (for example, the legislative reaction to the recent financial crisis). The course is a continuation of LL410E. Raising capital Debt securities, Eurobonds and syndicated loans Prime brokerage Security and financial collateral, asset backing, asset financing, securities lending and repo Financial engineering Structured finance, securitization Derivatives Practice, types, CDS, market documentation, close-out netting Funds Regulated funds, UCITS, hedge funds, private equity funds Market infrastructure Stock exchange, clearing, intermediated securities, derivatives clearing.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL412E  Half Unit
International Economic Law I

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lang NAB6.19

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to the field of international economic law: its principles, rules, practices, and institutions, and the debates which attend each. The course focuses on the public international law rules and institutions which govern international trade. Students will be given a grounding in the jurisprudence of the WTO, but will also be introduced to interdisciplinary material on the broader political, economic, institutional and normative contexts in which international economic law operates. Key themes will include the question of ‘development’ and developing countries, the role of expertise in global economic governance, and institutional aspects of judicial international dispute settlement. Students will be expected to engage with the principles and practice of international economic law both at the technical level, and at the level of critical reflection.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

This information is for the 2015/16 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is designed to allow intense discussions of these problems in order to raise the sensitivity for the issues at stake and to lead to a research oriented approach. Despite its academic outset, the course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a most significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the role of internationally mandatory rules of law, arbitration & insolvency, the scope of the competence-competence principle; arbitration and fraud and corruption, or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of developments.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL416E  Half Unit
Advanced Issues of International Commercial Arbitration

This information is for the 2015/16 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course is a continuation of LL412E. In International Economic Law II, topics to be covered may include: Services Liberalization under the GATS; Trade-Related Intellectual Property Rights; Legal Regulation of Technical Barriers to Trade; Sanitary and Phytosanitary Measures, and Subsidies. In both courses, we will set aside time to consider topical issues, for example around public international regulation of global finance, regional economic integration, development and developing countries in the trading system, and environmental aspects of international trade.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).
interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both examination and classes, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

**LL418E  Half Unit**

**Comparative Corporate Governance**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Carsten Gerner Beuerle NAB5.08

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** This course will focus on the role of boards of directors in large public companies and groups of companies. It will deal with the legal regulation of agency problems arising between the board and shareholders as a class; between the board/majority shareholders and minority shareholders; and between the board and other stakeholder groups, notably creditors and employees. Although the main focus will be on board and shareholder relationships, the aim of the course is to develop and apply a framework of analysis which illuminates relations between the board and all stakeholder groups. The course will be taught largely on a comparative basis, focusing on English, US, German and French law.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

**Indicative reading:**

- S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (OUP 2009);
- H. Kötz, European Contract Law (OUP 1997);
- K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998);
- H. Beale et al., Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law (2nd edn, OUP 2010);

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL420E  Half Unit**

**International Law and Climate Change**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Stephen Humphreys NAB5.12

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** This course covers the international law dealing with climate change with a view to assessing how risks and uncertainties caused by climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and legal questions raised by climate change cannot be addressed by reference to climate change law (or indeed international environmental law) alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (international economic law, human rights law, state responsibility, international migration law) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative and/or ethical bases
for choosing between actions designed to prevent and/or manage climate change and its consequences, attentive to developmental imperatives and the theoretical concerns raised by the ‘fragmented’ nature of international law

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

**Indicative reading:** Rosemary Rayfuse and Shirley Scott (eds.), Climate Change and International Law, Edward Elgar (2011)

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL423E** Half Unit

**Media Law: Regulating Publication**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Andrew Scott NAB6.25

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** The course examines the legal and administrative regulation of mass media publication (particularly the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the ‘public interest’); the main social, technological and regulatory influences that shape media regulation and practices (hacking, tapping and subterfuge).

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL425E** Half Unit

**Competition Law**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Pablo Ibanez Colomo

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM
courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** The course is a comprehensive study of the main features of competition law. While the focus is on EU competition law, reference will be made to the laws of other jurisdictions (e.g. the United States and the UK) when these offer relevant points for comparison. The first part of the course examines the history and aims of competition law. It considers the role of economic analysis and its limitations in the light of non-economic considerations. The second part is a review of the major substantive fields: restrictive practices; the regulation of monopolies and dominant positions; distribution and cooperation agreements and merger control. The third part addresses the public and private enforcement of competition law.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL426E  Half Unit**

**Theory of Human Rights Law**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Kai Moller NAB7.01

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** The course will provide an introduction to the philosophy of human rights and theoretical issues in human rights law. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. The overarching questions to be examined are to what extent current philosophical theories of human rights can illuminate our understanding of the cases and legal doctrines, and to what extent the cases and doctrines can help improving the theoretical and philosophical understanding of human rights. Topics to be discussed will include: Interest Theories of Human Rights; Ronald Dworkin’s Theory of Rights as Trumps; Balancing and Proportionality; Human Rights and Judicial Review I (The American Perspective); Human Rights and Judicial Review II (The European Perspective); Absolute Rights.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

**Indicative reading:** The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, John Griffin, Matthias Kumm, Jeremy Waldron and Frances Kamm.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**Investment Treaty Law**

**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Jan Kleinheisterkamp NAB7.09

**Availability:** This course is available on the Executive LLM. This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration. The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has four components: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards – such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law – that may apply to the investor-state relationships; and (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national

Takeover regulation in the UK and US

This information is for the 2015/16 session.
Teacher responsible: Prof Robert Kershaw NAB7.16
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: There are no formal pre-requisites for this module.
Course content: In this module, we will explore the regulation of mergers, acquisitions and restructurings in Europe. We will focus on legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on the legal issues arising in cross-border transactions in the EU.
There are a number of reasons for corporations wanting to restructure their operations or to make acquisitions. For instance, firms may want to acquire a strategically valuable firm or asset in order to improve the efficiency (and thus increase the value) of their business operations; they may want to implement a better governance structure, enabling them to manage their undertaking more effectively; or they may want to subject themselves to more favourable legal or tax rules – including choosing among different national corporate laws.
EU law offers a range of legal vehicles for achieving such aims, and it is these vehicles we will explore throughout the term. In particular, we will look at re-incorporations of EU companies based on the relevant Treaty provisions; takeovers of (listed) EU companies; domestic (“statutory”) mergers; de-mergers and spin-offs; cross-border mergers in the EU; and the European Company.
Content overview:
• The market for corporate control, corporate ownership structures and transaction structures for takeovers and restructurings in Europe
• European takeover regulation
• Domestic mergers
• Divisions & spin-offs
• Cross-border mergers
• Employee participation (board-level co-determination) and board structures, and their relevance for corporate transactions
• The European Company (SE)
• Brief introduction to taxation of corporate transactions and tax-related drivers and incentives for intra-group reorganisation and company migration

Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

State and Market in the EU

This information is for the 2015/16 session.

Teacher responsible: Dr Pablo Ibáñez Colomo NAB7.18

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Member States of the EU are not free to award subsidies to their national companies or to support them in a comparable way (by, inter alia, securing favourable supply conditions to the companies, granting loans at favourable rates or providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the control of State aid in the European Union (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part examines (i) the notion of State aid within the meaning of Article 107(1) TFEU and (ii) the conditions under which measures falling under the scope of that provision may be deemed compatible with the internal market. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL435E  Half Unit
Innovation, Technology and Patent Law

This information is for the 2015/16 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course critically examines UK and European patent law from different perspectives including the economic case for incentivising innovation, industry and technology-specific legal doctrine, international economic and political frameworks, institutional features, and national, regional and international pressures to harmonise patent law. Case studies from comparable jurisdictions such as US, India or Latin America will be used where appropriate. The course aims to deliver a sound grounding in legal principles while exploring unprecedented challenges raised by emerging technologies through appropriate case studies.

Topics include
1) The economics of innovation and patenting/ Jurisprudential rationale for patents, legislative overview – international and domestic.
2) Priority, Novelty and Inventiveness
3) Industrial Application, disclosure and Genomic Inventions
4) The rationale for subject matter exclusions (Methods of medical treatment, diagnostic methods, computer programs, business methods, mental acts, discoveries, genetically modified animals, human embryonic stem cells)
5) Claim drafting, purposive construction and the doctrine of equivalents.
6) Direct/indirect infringement – international concerns
7) The research use exception and its application to post-genomics science
8) The TRIPS Agreement and the global pharmaceutical industry
9) The problem of patent enforcement
10) Patent offices and the property parameters of patents
11) Synthetic biology
12) Competition policy in the technology and pharmaceutical sector. This course complements a number of areas of national and international law and policy.

LL434E  Half Unit
Regulation: Strategies, Theories and Implementation

This information is for the 2015/16 session.

Teacher responsible: Prof Gordon Baldwin NAB7.08

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course provides an introduction to key topics in the study of regulation from with a comparative and generic perspective drawn from public administration, socio-legal studies and institutional economics.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module’s teaching session by email.

Indicative reading: Regulation (Cambridge University Press, 2007); Bacon (ed), European Community Law of State and Market in the EU

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).
Students do not need a scientific background and will be supported in learning technical aspects.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL436E**  
**Rethinking EU Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Michael Wilkinson NAB6.28 and Dr Floris De Witte NAB7.24  
**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** EU law is a fast-moving, dynamic area of law. The course will build on core knowledge of EU law and develop a number of key themes in the public law and policy of the EU and its Member States. It will provide a sophisticated understanding of the legal, political and constitutional issues surrounding the central debates in the EU, from its origins to the recent crises. Topics will include: - Law and Politics of European Integration - Fundamental Freedoms - Collective Autonomy and Social Justice - Authority of EU Law - Sovereignty, Identity and Pluralism - Political Economy - Future of the EU. The course will use general theoretical accounts in law and related disciplines in order to situate EU law in its political and social context. It uses the LSE's unique interdisciplinary expertise in European law, constitutional theory, public law, and legal theory for a rich and varied study of the challenges facing the EU and its development.

**Teaching:** 24-26 hours of contact time.

**Formative coursework:** Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

---

**LL438E**  
**Commercial Remedies**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Solene Rowan NAB 7.26 and Dr Charles Webb NAB 6.26  
**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

**Pre-requisites:** Undergraduate contract and tort law

**Course content:** The objective of the course is to provide students with a detailed understanding of remedies in a commercial context.

The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What
is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?  
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?  

Teaching: 24 hours  

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)  

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL439E  Half Unit  
UK Corporate Law  
This information is for the 2015/16 session.  
Teacher responsible: Prof Robert Kershaw NAB7.16  
Availability: This course is available on the Executive LLM. This course is not available as an outside option.  
Course content:  
1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception.  
2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company.  
3. Corporate Actions – considering how the company acts in contract, tort and crime.  
4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings.  
5. Director’s duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company.  
6. Directors’ Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management).  
7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions).  
8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading.  
9. Derivative Actions: the rule in Foss v Harbottle; the new derivative action mechanism; indemnity orders and contingency fees; reflexive loss.  
10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006.  
Teaching: 20 hours of seminars in the MT.  
24 hours (Executive LLM)  
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.  

Indicative reading: Core Texts: David Kershaw, Company Law in Context (2nd ed, OUP 2012) Paul Davies, Gower and Davies’ The Principles of Modern Company Law (9th eds, Sweet & Maxwell, 2012). For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:  
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL440E  Half Unit  
Digital Rights, Privacy and Security  
This information is for the 2015/16 session.  
Teacher responsible: Dr Orla Lynskey (NAB 6.23)  
Availability: This course is available on the Executive LLM. This course is not available as an outside option.  
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.  
Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.  
Course content: While the development of the information society brings about significant economic and societal benefits, by treating the personal data of individuals as a valuable trading commodity it also raises fundamental rights concerns. In response to these concerns the EU has recognised a “right to data protection” in the EU Charter of Fundamental Rights and is currently remodelling the legal framework applicable to personal data processing in the EU. Moreover, other key global actors including the OECD and the US are currently discussing amendments to their legal regimes in this field. Nevertheless, there is little consensus, even within the EU, regarding whether, and how, personal data processing should be regulated in the information society. Indeed, some argue that given the exponential increases in the amount of personal data processed globally any attempts to regulate personal data processing are outdated, and even quaint.  
This course will critically evaluate the current and proposed legal frameworks applicable to personal data processing. Participants will be introduced to techniques and technologies for monitoring and gathering personal data in the information society and the legal framework applicable to this personal data collection in a number of jurisdictions, including the EU and US. In order to bring key issues to life, a number of case studies will be considered, for instance the application of data protection rules to online behavioural advertising, user-generated content on social networking sites and to state surveillance.  
Teaching: 24-26 hours of contact time.  
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.  
**LL441E  Half Unit**  
**Employment Law**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Astrid Sanders NAB7.19  
**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.  
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

**Teaching:** 24-26 hours of contact time.  
**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.  
**Indicative reading:** Detailed syllabus of readings will be available and the materials can all be accessed through Moodle. Hugh Collins, Employment Law, 2nd edn (Oxford University Press, 2010), Chapters 1-9 or Hugh Collins, KD Ewing and Aileen McColgan, Labour Law (CUP, 2012).  
**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL442E  Half Unit**  
**Insolvency Law: Principles, Rescue and Reconstruction Processes**

This information is for the 2015/16 session.

**Teacher responsible:** Ms Sarah Paterson NAB6.06  
**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.  
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law’s intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

**Course content:** This course is concerned with the principles and policies underlying the legal treatment of insolvency and corporate liquidations. The impact of these procedures and approaches on third parties, for example corporate groups, secured and unsecured creditors, directors and employees, is also considered.

**Topics include:** Overview of Liquidation and Bankruptcy; The role of liquidation; Setting aside transactions; The Pari Passu principle and preferential claims; Secured creditors and security devices; the problem of corporate groups; Company directors in troubled times and Employees in distress.

**Teaching:** 24-26 hours of contact time.  
**Formative coursework:** All students are expected to produce one 2,000 word formative essay during the course.  

**Assessment:** Either a take-home examination or 8,000 word assessed essay (100%).

**LL443E  Half Unit**  
**Insolvency Law: Company Liquidation and Stakeholder Interests**

This information is for the 2015/16 session.

**Teacher responsible:** Ms Sarah Paterson NAB6.06  
**Availability:** This course is available on the Executive LLM. This course is not available as an outside option.

Pre-requisites: Executive version of an existing taught masters course (L1AAB).

Course content: This course examines the international law relating to when it is permissible to use force (jus ad bellum). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition. It looks in detail at the right of self-defence, humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression. The use of force by or with the authorization of the United Nations is also considered.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A detailed reading list will be issued in the course pack. See, in particular: Dinstein, War, Aggression and Self-Defence (5th ed, 2011); Gray, International Law and the Use of Force (3rd ed, 2008).

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

MG406E  Half Unit

Behavioural Decision Science

This information is for the 2015/16 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course introduces students to the fascinating field of behavioural “decision” science. We will explore a selection of current research topics relevant to personal and managerial decision making as well as policy-making. For each topic students will get acquainted with key psychological phenomena and principles of behavioural decision science through interactive lectures, and become alert to cognitive biases and learn how to overcome them. Students will read pre-assigned scientific articles and in class discuss lessons learned, limitations and implications of these concepts for the development of decision making competence in their organisation (e.g. via design of policies, training programmes, or tools). Topics will include: Origin of Behavioural Decision Science; the Building Blocks of Behavioural Decision Science: Preferences, Utility and Value; Probability, Uncertainty and Risk; Choice Architecture and Behavioural Change; Heuristics and Biases in Decisions about Money, Health, Consumer Products and People.

Teaching: 17 hours and 30 minutes of lectures and 5 hours of lectures in the MT.

Formative coursework: Students will be expected to produce 1 exercise in the MT.

The formative assessment for this course will consist of a series of essay-like answers to questions posed in the seminars and that will accompany the group work. Short answers (approx. 500 words per day) will be written collectively by you as a team, and feedback on answers will be provided as the exercise unfolds over the course of the week. The feedback will be given at a team level, and will focus on the rigour and use of behavioural science concepts learned in the course.

Assessment: Dissertation (100%), 3000 words) in the MT.

The summative assignment will include two parts. In the first part (no more than 1,000 words), you will be asked to describe and critically evaluate how the decision problem and the intervention came about – using individual reflection and personal knowledge. You can choose the same problem as the team answer or a new problem of your choice.

In the second part of the essay (no more than 2,000 words), you will justify the specific nudging or debiasing intervention, with reference to behavioural literature, and theories. The first part of the essay will count for 25% of your mark while 75% will come from the second part.

MG407E  Half Unit

Goals and Motivation for Individuals and Teams

This information is for the 2015/16 session.

Teacher responsible: Dr Heather Kappes and Prof Amitav Chakravarti

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: For the modern day enterprise, be it private firms seeking to maximize revenues and profits, non-profit organisations seeking to change behaviours and raise money for pro-social causes, or government bodies seeking to implement policy, the role of goals and motivations is critical, both at the individual level and the team level. For each entity it is important to gain a critical understanding of what kinds of goals individuals and teams are attracted to, how these goals are set and pursued, what factors and incentives aid or hinder such goal pursuit and goal achievement, and how teams and individuals react to feedback on their progress towards these goals. This course familiarises students with strategies for promoting success over every phase of goal pursuit, from first consideration, to commitment, to action, and beyond. Students will learn how to categorise goals using empirically-tested frameworks like construal level theory, regulatory focus theory, and mindset theory (learning versus performance goals). They will use these frameworks to identify the problems that plague goal pursuit: problems like failing to get started (e.g., trying to break a habit), getting derailed (e.g., ego depletion), and continuing when it would be better to quit (e.g., sunk costs phenomenon). Students will be introduced to empirical findings on the optimal ways to use tools like specific goal setting, implementation intentions, mental simulations of processes versus outcomes, and self-efficacy in order to boost motivation and aid in successful goal pursuit.

Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

**Assessment:** Essay (100%, 4000 words) in the LT.

---

**MG440 Half Unit**  
Managerial Economics (modular)

This information is for the 2015/16 session.

Teacher responsible: Professor Luis Rayo (University of Utah, David Eccles School of Business)

Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2015-2017 cohort.

Course content: A graduate-level introduction to the foundations of managerial economics and its application to high-level business decisions. Topics include:
1. Economics as a theory of organisation.
2. Demand, supply, and equilibrium: the determinants of consumers' and firms' market responses, the nature of non-strategic interaction, government intervention, international trade
3. Externalities and market failure
4. Strategic interaction: voting, oligopoly, sequential rationality
5. Price discrimination: nonlinear pricing, social economics
6. Choice under uncertainty: attitudes towards risk
7. Information and efficiency: adverse selection
8. Behavioural economics: some examples

Teaching: Scheduled over one module. Eight 4 hour sessions plus two review sessions.

The course will run between the following dates:
- 24 August - 5 September 2015
- 14-19 December 2015
- 24 August - 5 September 2015
- 14-19 December 2015

Assessment:  
- Coursework (20%), class participation (15%) and take home exam (65%).

---

**MG441 Half Unit**  
Foundations of Management (modular)

This information is for the 2015/16 session.

Teacher responsible: Prof Paul Willman

Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2015-2017 cohort.

Course content: A basic grounding in the key management disciplines. Students will be provided with an overview of the development of Management disciplines and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Each field will cover Origins and disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate.

Teaching: Scheduled over 2 modules – 10 sessions of up to 4 hours each.

The course will run between the following dates:
- 24 August - 5 September 2015
- 14-19 December 2015

Lectures:

1. Course Introduction and the Origins of Management
2. Management and Firm
3. Taylorism, Motivation and Performance
4. The Rise and Decline of Labour
5. The Rise of Human Resources Management
6. The Origins of Modern Strategy
7. Understanding Organisational Structures
8. Analysis of Organisations
9. Contemporary Strategic Management: Firms as Bundles of Resources
10. Strategy and Decision Making

Seminar classes:
1. Managers and Managerial Work
2. The Firm and the Manager
3. Taylorism and Toyotism
4. Internal Labour Market and Boundaries of Firms
5. Company Case – proposed: UBS
6. The Analysis of Competitive Forces
7. Understanding Organisational Structures
8. Theories and Strategy
9. The Analysis of Competences
10. Understanding Decision Biases

Formative coursework: 2,000 word essay

Indicative reading:
- Paul Willman: Understanding Management: Social Science Foundations
- Oxford University Press, September 2014.

Assessment: Class participation (15%), other (20%) and take home exam (65%) in the LT.

---

**MG443 Half Unit**  
Organisational Behaviour (modular)

This information is for the 2015/16 session.

Teacher responsible: Dr Connson Locke

Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2015-2017 cohort.

Course content: The course seeks to understand individual attitudes and behaviour in an organizational context. It does this by reviewing psychological theories as they apply to organisations, demonstrating the contribution of a psychological perspective to understanding human behaviour at work, and critically evaluating the empirical evidence. The course attempts to strike a balance between theory and practice by applying the theories to practical problems in organizations.

Topics include motivation and rewards, intrinsic motivation, creativity, organizational justice, group processes, culture, power and persuasion, and leadership presence.

Teaching: Teaching is spread over the first 3 modules. The teaching is highly participative and includes breakout discussions and exercises.

The course will run between the following dates:
- 24 August - 5 September 2015
- 14-19 December 2015
- 4-16 April 2016

Formative coursework: A practice exam will be provided and feedback will be given on this assignment.

Indicative reading: The course relies on journal articles (for example, Journal of Applied Psychology, Journal of Organizational Behaviour). A complete reading list will be provided at the start of the course. There is no required textbook. The following textbook is recommended for students who would like further reading:

Assessment: Essay (20%), take home exam (65%) and class participation (15%).

Class participation - based on group presentations.
MG445  Half Unit
Marketing Strategy (modular)
This information is for the 2015/16 session.
Teacher responsible: Prof Om Narasimhan
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2015-2017 cohort.
Course content: This course is a rigorous examination of the key analytical frameworks, technical tools and concepts that are essential to building an effective marketing strategy. Peter Drucker, the father of business consulting once famously remarked, “Because the purpose of business is to create a customer, the business enterprise has two--and only two--basic functions: marketing and innovation”. In todays highly competitive business environment these words ring even more true: a well-designed marketing strategy can make all the difference between success and failure in the marketplace. While marketing is commonly associated with consumer goods companies (e.g., Unilever) it would be myopic to restrict the relevance of marketing to such instances alone. Marketing, ultimately, is about understanding and shaping behaviour. Accordingly, banks and other financial institutions, as well as governmental, medical, and not-for-profit organisations - from those that design and sell financial products, to those that implement public policy (e.g., those dedicated to reducing drunk driving, increasing literacy, and encouraging safe contraception), all have found that a well-thought out marketing strategy can be a critical arbiter of success even in this “ideas marketplace.”
By using a wide range of quantitative as well as qualitative methods, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop an analytical tool-kit that will be applicable to a wide range of industries and functions.
Teaching: Scheduled over two modules – one of which will take place overseas. Teaching will be spread across 10 sessions of up to 4 hours each.
Formative coursework: Case write up.
Indicative reading: There is no required textbook. Further references will be provided at the commencement of the course.
Assessment: Take home exam (55%), class participation (15%) and other (30%).
Class participation (15%).
Group live case analysis (30%).
Take home exam (55%).

MG446 Half Unit
Strategy, Organisation and Innovation (modular)
This information is for the 2015/16 session.
Teacher responsible: Dr Lourdes Sosa
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2014-2016 cohort.
Course content: The course seeks to understand differences in profitability across (for-profit) firms. To do so we will first review industry-wide as well as firm-specific determinants of short-term profitability. On that foundation we will look at long-term determinants of profitability including dynamic capabilities and innovative ability. The course aims to balance theory and practice by applying theoretical frameworks to practical cases from a wide array of firms from varied countries.
Topics include business models, industry structure, value proposition, strategic resources, inimitability, dynamic capabilities, disruptive innovation, power nodes strategy and scenario planning.
Teaching: Taught over 10 four-hour sessions spread over 2 modules. The teaching is highly participative and includes lectures, breakout discussion and exercises.
The course will run between the following dates:
- 1-5 September 2015
- 5-9 January 2016
Formative coursework: Feedback will be given on one short essay, preparing students for the exam, as well as on in-class exercises.
Assessment: Class participation (10%).
Individual essay (30%).
Take home exam (60%).

MG447 Half Unit
Foreign Direct Investment and Emerging Markets (modular)
This information is for the 2015/16 session.
Teacher responsible: Prof Saul Estrin NAB4.32
Dr Christine Cote
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option. The information in this course guide pertains to the 2014-2016 cohort.
Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, Turkey and Latin American countries such as Brazil and Argentina. The new institutional economics has recently developed as a field to understand the impact of variation in institutions on economic performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will then provide an analysis of economic performance and growth in emerging markets building on the new institutional economies and working with a large variety of datasets and sources. The remainder of the course is devoted to specific topics of MNEs in emerging markets. These include the determinants and impact of FDI, entry mode choices; measures of institutional distance; outsourcing and offshoring; and emerging market multinationals.
Teaching: Scheduled over three modules, 8 sessions of up to 4 hours. One module will take place overseas – with 8 hours of company visits during this module.
The course will run between the following dates:
- 1-5 September 2015
- 2-6 November 2015
- 5-9 January 2016

**Formative coursework:** Students will be expected to produce 1 essay in the MT.

**Assessment:** Take home exam (60%) in the LT. Presentation (30%) in the MT.

Class participation (10%) in the MT and LT.

### MG498 Half Unit

**Dissertation/Capstone Project**

This information is for the 2015/16 session.

**Teacher responsible:** Various

**Availability:** This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.

This information in this course guide pertains to the 2015-2017 cohort.

**Course content:** This course consists of a project which will be undertaken throughout the second year of the degree. Students will choose an academic dissertation or a capstone project. The academic dissertation will explore a question that is grounded in academic theory and literature. The capstone project will explore a business idea or venture. In both projects, students will collect original data relevant to their research question or business idea and must analyse the data, discuss limitations, and draw conclusions.

**Teaching:** Students are required to participate in 20 hours of scheduled seminar sessions from module 3 onwards which will provide guidance and support in developing their dissertation or capstone project. Separate seminars will be conducted to provide support for those who choose the academic dissertation and those who choose the capstone project. Students will be allocated a faculty advisor who will support and guide them. The course will run throughout the year.

**Formative coursework:** Students will be required to agree their dissertation/capstone topic with a faculty advisor and provide a plan which they will receive feedback on.

**Indicative reading:** Relevant reading will be provided by academic advisors.

**Assessment:** Dissertation (100%, 6000 words).

### PH426E Half Unit

**Philosophy and Public Policy**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Luc Bovens and Dr Alexander Voorhoeve

**Availability:** This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

**Course content:** This course yields insight into key moral and political values that are essential for policy-makers. Discussion is focused on cases and is thoroughly interdisciplinary: it draws on both normative philosophical arguments and findings from the social sciences to allow students to make informed and rigorous evaluations of public decisions. Topics may vary, but the following is a representative sample:

- How can philosophy contribute to public policy debates?
- When should we rely on markets to address policy problems?
- What are the philosophical issues surrounding cost-benefit analysis and risk analysis?
- When, if ever, is government paternalism justified?
- What is the role of personal responsibility in determining people’s claims on shared resources in health care and welfare allocations?
- What are our rights to freedom of expression? Is pornography protected by such rights?
- What kind of equality matters in the distribution of goods? How should we deal with disadvantage?
- What is the nature of behavioural mechanisms? How should subjects, social scientists and policy makers approach patterns of agency that are determined by such mechanisms?
- What are the moral problems associated with libertarian paternalism or Nudge? How does this approach compare to other policy mechanisms, such as regulation, taxation and subsidies, and social advertisement, to address and correct internalities?

**Teaching:** 17 hours and 30 minutes of lectures and 5 hours of seminars in the ST.

**Formative coursework:** Students will be expected to produce 1 essay in the ST.

**Assessment:** Essay (100%, 4000 words) in the ST.

### SA4E1 Half Unit

**Health Administration and Management**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Irene Papanicolas COWG.04

**Availability:** This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

**Course content:** This course is intended to provide the student an orientation and overview on managing organizations within health systems. The governance, execution, information management, quality of care, and sustaining human resources will be discussed, including an examination of the uses of accounting and other forms of reporting to manage health services. This is an introductory course appropriate for students with no formal inpatient health care management experience. The course will cover the following topics: principle responsibilities of a health care system and organizations within the system; issues and strategies for enabling health care organizations to be responsive to their environment; concepts for supporting and implementing governance decisions; strategies for performance measurement and information, and analytical activities related to planning, finance, and information needs; characteristics and development of systems to assure quality of clinical services.

**Teaching:** 10 hours of lectures and 10 hours of seminars. The seminars vary in format from a debate (1 x 2 hour seminar) to case study approaches (the remaining 4 seminars).

**Formative coursework:** Mock exam given after teaching session with feedback from seminar leader.

**Indicative reading:** The following are some of the background readings for the course: Julian Le Grand, The Other Invisible Hand; Woodstock: Princeton University Press, 2007, David Hunter,
SA4E2  Half Unit
Resource Allocation and Cost-effectiveness Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Matteo Galizzi COW.G.05
In addition, Professor M Drummond (Professor of Health Economics, University of York) will be teaching on the course.

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim is to give an overview of the theory underlying economic evaluation as applied to the health care sector; to consider the different forms of economic evaluation; to give an understanding of the techniques associated with economic evaluation as applied to health care; to give an understanding of the interpretation of the results gained from economic evaluation; to provide the main practical tools necessary to undertake economic evaluation using computer-based programs. The course will cover the following topics: Conceptual rationales for economic evaluation in the health care sector (Pareto efficiency, Social Welfare, extra-welfarism and decision-making); Introduction to the methods of economic evaluation: cost-effectiveness analysis, cost-utility analysis, and Cost-benefit analysis; Cost data; Incremental cost-effectiveness analysis; Quality Adjusted Life Years gained and other outcome measures; Discounting; Uncertainty and sensitivity analysis; Economic evaluation and clinical trials; Policy decision-making using economic evaluation.

Teaching: 10 hours of lectures and 10 hours of seminars, including computer-based practical workshops.

Formative coursework: Mock exam given after teaching session with feedback from course organiser.

Assessment: Take home exam (100%).

The take-home exam will consist of a critical appraisal of a cost-effectiveness study through 4 specific questions. At the end of June 2015, a cost-effectiveness study will be made available on Moodle. In September 2015, on a date provided in advance, students will be able to log on in the system for 24 hours, and will be given 2 hours from when they log on to answer the 4 questions.

SA4E3  Half Unit
Dissertation in Health Economics, Policy and Management

This information is for the 2015/16 session.

Teacher responsible: Dr Grace Lordan OLDM2.26 and Dr Irene Papanicolas COW.G.04

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research that will contribute to the field of health economics, health policy or health management. The contribution of the work to the chosen field must be made clear. The output will be a piece of work of 5000 words or less that is written in an article format that is suitable for submission to a peer reviewed journal. Students must obtain the approval of their supervisor before embarking on any research.

Arrangements for supervision

Students’ tutors will act as their dissertation supervisor in the first instance. If the specific topic a student wishes to cover for his/her dissertation requires a different supervisor, a MSc programme director can arrange this change. The dissertation supervisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.

Teaching: The dissertation process is supported by three teaching sessions.

Formative coursework: Students will have an opportunity to have one draft of their thesis proposal read by their tutor in December of Year 2. In addition, they will have an opportunity to have a 1000 word outline of their thesis read by their tutor.

Assessment: Dissertation (95%, 5000 words) in September.

Research proposal (5%) in the MT.

5% of the mark will be based on a dissertation proposal due in the December of the second year of study. In this case students will receive 5% if their thesis proposal is deemed a viable and a relevant contribution to the literature by two examiners. If a student does not receive 5%, they will still be marked out of 100, provided they submit their full dissertation by 01 September of their second year. The dissertation paper copies must be handled in to the Department on 01 September of the second year of the MSc programme. An electronic version of the dissertation must be also submitted. Penalties will be applied to any late submission. The world limit for the dissertation is 5,000 words (excluding references and tables) and it must be in a journal article format.

SA4F2  Half Unit
Principles of Evidence-Based Medicine and Clinical Trials

This information is for the 2015/16 session.

Teacher responsible: Dr Grace Lordan OLM2.26

In addition, Professor Allan Hackshaw (Deputy Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: A large amount of medical research is conducted, with variable quality. Also, health claims are frequently reported in the media, and it can be difficult to determine whether it is based on reliable evidence and which is not. It is therefore essential to be able to interpret study results and conclusions appropriately, in order to change clinical practice or develop public health policy. This is achieved by Evidence-Based Medicine. The module will enable students to evaluate risk factors for disease or early death, and methods of disease prevention or treatment.

The module will provide students with practical skills in the following key areas:

- Understanding the different types of research that can be conducted in humans and their strengths and limitations, i.e. observational studies and a focus on clinical trials.
- Familiarity with systematic reviews (i.e. how several studies are combined, and the importance of looking at the evidence as a whole).
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports.
- Examining the efficacy and safety of health care interventions (an important part of a complete health economic evaluation of a clinical trial).

Teaching: 10 interactive seminars/workshops, each 2-3 hours long.

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. However, detailed written answers are provided, so the students can access these if they undertake any of the exercises after the contact week. The tutor is also available for one-to-one email contact with any student.

Assessment: Other (50%) and other (50%) in the LT.

There will be two pieces of coursework based on a clinical trial of an intervention or a risk/causal factor, in the form of:
- a written assignment in the form of a PowerPoint slide deck (about 25 slides) and a statement of 400 words of conclusion, based on a published paper and associated media news article of the paper (50%)
- 4-5 questions specific to a published paper with answers requiring 1-2 paragraphs each (one question involves writing a media news article of 400-500 words) (50%).

SA4G1 Half Unit
Financing Health Care

This information is for the 2015/16 session.
Teacher responsible: Prof Elias Mossialos COW.4.08
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

By the end of the course students will have:
- a grasp of the economic, political and philosophical concepts relevant to any discussion of health financing policy
- a good understanding of how financing arrangements affect the achievement of key health financing policy goals such as financial protection, equity in financing and equity of access to health care, incentives for efficiency and quality in the organization and delivery of health services, administrative efficiency, transparency and accountability
- the skills to critically assess current health financing arrangements and options for reform
- an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: 11 hours of lectures in total and 4 seminars (1.5 hours each).

Formative coursework: Students will sit a one-hour progress test in their own time. This will involve writing an essay under exam conditions. Their seminar leader will mark the essay and provide a mark and written feedback.

Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle. They will be expected to read these prior to the first day of class.

Assessment: Exam (100%), duration: 2 hours) in the main exam period.

This is the same course as SA407 Financing Health Care (H) but it has different teaching arrangements.

SA4G2 Half Unit
Health Economics

This information is for the 2015/16 session.
Teacher responsible: Prof Alistair Mcguire COW4.05
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Teaching: 12 hours of lectures and 10 hours of seminars in the MT.

Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, The Economics of Health and Health Care (3rd edn), Prentice Hall, 2001; B McPake, L Kumararanyake & C Normand, Health Economics - An International Perspective, Routledge, 2002. Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

This is the same course as SA408 Health Economics (H) but it has different teaching and assessment arrangements.

SA4G3 Half Unit
Pharmaceutical Economics and Policy

This information is for the 2015/16 session.
Teacher responsible: Dr Panagiotis Kanavos COW3.08
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of this course it to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly.
- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional
goals of pharmaceutical policies.

- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.

- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments’ approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.

- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.

- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

**Teaching:**
The course will comprise 10 x 1-hour interactive lectures, 1 x 1-hour revision session and 5 x 2-hour interactive seminars, where students will discuss specific case studies.

**Formative coursework:** A 2000 word formative essay, to mirror an exam question, to be written during seminar time.

**Indicative reading:** E Mossialos, M Mrazek & T Walley (eds), Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality, Buckingham, Open University Press (2004);
S O Schweitzer, Pharmaceutical Economics and Policy, Oxford University Press (2006);
W S Comanor, ‘The Political Economy of the Pharmaceutical Industry’, Journal of Economic Literature, XXIV (September): 1178-1217 (1986);
F M Scherer ‘The Pharmaceutical Industry’, Chapter 25, in: A J Culyer & J P Newhouse (eds), Handbook of Health Economics, Vol 1, Amsterdam, Oxford, Elsevier, 2000. Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.

**Assessment:** Exam (100%, duration: 2 hours) in the main exam period.

This is the same course as SA427 Pharmaceutical Economics and Policy (H) but it has different teaching and assessment arrangements.

---

**SA445** Half Unit

**Statistical Methods in Health Care Economic Evaluation**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Paul Dolan, OLD2.38

**Availability:** This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

**Course content:** This course offers an understanding of how to measure health outcomes for policy purposes. We will focus on the ‘effectiveness’ side of cost-effectiveness analysis. We will consider the ways in which economists outside of health value benefits (using revealed and stated preferences) and then focus on how health economists have developed methods specifically designed to value health status. We shall pay particular attention to the measurement and valuation of quality-adjusted life years (QALYs), which are being used by agencies such as the UK’s National Institute for Health and Clinical Excellence (NICE). We will discuss some of the problems with the current methods of calculating QALYs, framed around the latest evidence from the behavioural sciences. It will then consider whether ‘happiness’ measures might provide a better alternative. The course will conclude with a consideration of issues relating to equity and fairness and how we account for preferences that policymakers and the public have regarding ‘who gets what’.

**Teaching:** 2 lectures (2 hours), 4 lectures (1.5 hours) and 5 seminars (2 hours)

**Formative coursework:** In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.

**Assessment:** Essay (100%, 3000 words).
SA4G6  Half Unit
Measuring Health System Performance

This information is for the 2015/16 session.

Teacher responsible: Dr Irene Papanicolas COWG.04
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management and MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant. After taking this course students are expected to:

• understand the principles of performance measurement
• appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
• understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
• identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: 2 lectures (2 hours), 4 lectures (1.5 hours) and 5 seminars (2 hours).

Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Indicative reading:

Students will be given access to essential readings before the course

Outcomes and Management in Cardiovascular Sciences. This course

Indicative reading:
5. Ury W., Getting past No, 1993.
7. Kelly W., We have met the enemy and he is us, 1995.
8. de Caillieres M., On the manner of negotiating with Princes: from sovereigns to CEOs, envys to executives - classic principles of diplomacy and the art of negotiation, 2000.

SA4K7
Health Care Negotiations

This information is for the 2015/16 session.

Teacher responsible: Dr Panagiots Kanavos COW3.08
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Financing Health Care (SA4G1).

Course content: Lectures will cover the following material: The dynamics of health care stakeholders and the shifting balance of power among them; Introduction to the concept of negotiations and principles of game theory (principles of game theory, definition and properties of a Nash equilibrium; static and dynamic games; games with complete and incomplete information); the dilemma of complex, discontinuous, multiparty health care negotiations; the peapulator pricing exercise; the seven elements: defining success in health care negotiations; management as negotiation: frameworks and tools for analysing decision processes; the seven elements: defining success in health care negotiations; value creation and allocation in health care systems; when the people are the problem (partisan perceptions exercise; the three perspectives; the ladder of inference; the elements of relationship management).

Seminars will be interactive drawn based on case studies from specific health care environments (e.g. hospitals, drug coverage decision; health technology assessment; conflict between management and clinical excellence), and use frameworks such as Choice Analysis (a currently unresolved negotiation in which another party has or is expected to reject a proposal), Complex Problem Solving (a currently unresolved and complex situation involving so many parties and issues that the situation is unclear or confusing and our ability to influence the situation is in doubt), Rapport Management (one or more currently unresolved negotiations in which resolution of a troubled personal or corporate relationship with the key person(s) on the other side constitutes one of the major requirements or aspirations for agreement), Decision Rights Analysis (a live, unresolved task of persuasion involving one or more individuals negotiating in their capacity as employees of a large health care provider), and Value Creation (a complex, live, unresolved negotiation where lots of differing interests are implicated by the subject matter and the parties do not share the same interests or have the same priorities).

Teaching: The course will comprise 10 x 1-hour interactive lectures, 1 x 1-hour revision session and 5 x 2-hour interactive seminars, where students will discuss specific case studies.

Formative coursework: Students will be given a case study--reflecting a real-world situation - by the end of lecture 4 and will be asked to come up with a credible strategy/plan, which they will need to write up (2,000 words), submit and present during seminars.

Indicative reading:
5. Ury W., Getting past No, 1993.
7. Kelly W., We have met the enemy and he is us, 1995.
8. de Caillieres M., On the manner of negotiating with Princes: from sovereigns to CEOs, envys to executives - classic principles of diplomacy and the art of negotiation, 2000.

Assessment: A group project, where small groups will be allocated a case study to work on, but individual group members will be responsible for submitting their own 4,000 word project individually (100%).
SA4K8  Half Unit  
Health Care Quality Management  
This information is for the 2015/16 session.  
Teacher responsible: Dr Irene Papanicolas COW.G.04 
This course will be led by Dr. Michael Holland, Associate Medical Director and Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.  
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management and MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.  
Course content: An introduction and overview of quality improvement methodology as used in healthcare settings internationally. The course will cover the following areas:  
1) History of quality management: The course will start with an overview of key theories in quality management such as those described Taylor, Shewhart, Deming and Juran. An overview and critical appraisal of quality assurance systems used in healthcare, such as ISO 9000, Magnet, Baldridge award and different types of healthcare regulation and their role in quality improvement. It will also include a discussion of patient-focused measures of quality such as patient-recorded outcome measures (PROMS).  
2) A critical assessment of the mainstream school of thought of quality as part of the production process - this will include a study of the relationship between supply chain procurement management and quality as well as the requirements for good production models and the critique of evidence-based decision-making in the clinical setting.  
3) Quantitative methods in quality management - This course will examine a number of tools for quality management purposes - both how to do them as well as how they fit into the various schools of thought on quality management. It will cover statistical process control which is a method of statistical analysis of time series data that is used in quality management. This method shows whether there is variability in processes and gives the user an ability to both measure improvements and declines in performance of both processes and outcomes and to understand whether processes are performing within acceptable limits. An overview of the quality improvement methodology known as Design of Experiments will also be given. The role of case mix adjustment in quality assessment will also be discussed.  
4) Process Mapping - Understanding the value and power of mapping processes both at a systems level and at the individual process level. They will also be given an example of a process map from a healthcare environment to work on optimising.  
5) Theories of capacity and flow management and examples of this in both in-patient and outpatient settings will be discussed. This will also include how DRG/HRG payment has a role within organisations of capacity management.  
6) A critical overview of Lean, Six Sigma and Model for Improvement. While these models can be useful in healthcare management, these are not deep philosophies of organisation and many of the things which make healthcare unique (e.g. asymmetry of information, difficulty of measuring quality, patient behaviour and societal preferences for fairness) are sometimes not accounted for in these models.  
Teaching: 5 lectures (5 x 2 hours) and 5 workshops (5 x 2 hours). The 5 workshops will focus on analysing case studies with a view of giving students a practical understanding of approaches to quality management in healthcare settings.  
Formative coursework: A case study will be provided for the students to analyse and write an essay answering questions relating to it. Feedback will be provided on this essay by the seminar leader.  
Assessment: Essay (50%, 2500 words) and essay (50%, 2500 words). Two 2,500 word case study essays (50% each) 

SA4K9  Half Unit  
Advanced Health Economics  
This information is for the 2015/16 session.  
Teacher responsible: Prof Alistair Mcguire COW4.05  
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.  
Course content: The course will cover: international comparisons of health care expenditure, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), equity in health care, health behaviour and an introduction to econometric analysis applied to health care data.  
Teaching: 6 lectures (2 hours each) and 5 seminars (2 hours each).  
Formative coursework: Students will make group presentations on topics covered in lecture. Students may receive feedback on these presentations from their seminar leader after completion. Alternatively, students may write a 2,500 word essay on the topic of their presentation for seminar leader feedback.  
Assessment: Essay (100%, 3000 words).  

SA4M2E  Half Unit  
Behavioural Science and Policy  
This information is for the 2015/16 session.  
Teacher responsible: Prof Paul Dolan OLD.2.38  
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.  
Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science. The course covers the following topics: What is behavioural science?; Choices under risk and uncertainty; Intertemporal decisions; Social preferences; Distributional preferences; The role of emotions in decision making; Compensating behaviours; Dual-process models of behaviour and the role of the unconscious mind; Dual processing into policy.  
Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the MT.  
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.  
Research Methods for Behavioural Science

This is information for the 2015/16 session.

**Teacher responsible:** Dr Matteo Galizzi

**Availability:** This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

**Course content:** The course aims to introduce students to the main methodological concepts and tools in behavioural science. The course will combine rigorous conceptual discussion with practical applications. To achieve this objective, the course covers: Correlation versus causation: how randomization solves the sample selection bias; Randomized controlled experiments in the lab and the field: principles, issues, taxonomy; Experimental design and behavioural econometrics: between/within design, hypothesis tests, statistical analysis of data, structural estimation; Sampling: sample size, sampling methods, ethics, recruitment; When randomization is not possible: natural experiments, quasi-experiments, difference-in-difference, discontinuity regression design, propensity score matching; Measuring risk and time preferences: principles and experimental tests; Measuring rationality in strategic decision-making: principles of game theory; Measuring social preferences: behavioural game theory; Measuring preferences for goods: experimental auctions; Measuring attitudes and non-conscious mind states: constructing psychometric indexes, inducing moods and emotions, priming.

**Teaching:** 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Assessment:** Take home exam (100%) in the LT.

**SA4M5E**

Dissertation in Behavioural Science

This information is for the 2015/16 session.

**Teacher responsible:** Prof Paul Dolan OLD.2.38 and Dr Barbara Fasolo NAB.3.15

**Availability:** This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

**Course content:** The aim of the dissertation is for students to pursue an independent piece of research within the field of behavioural science. The dissertation is a quantitative or qualitative investigation in the field and can be either a theoretical or empirical piece of research. Students must obtain the approval of their supervisor before embarking on any research.

**Teaching:** 9 hours of classes in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

**Indicative reading:** Relevant reading will be provided by supervisors.

**Assessment:** Dissertation (100%, 10000 words) in the MT.
SA4M6E  Half Unit

Economic Analysis for Health Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos COW.4.08
Professor Elias Mossialos and Teacher to be appointed.

Availability: This course is compulsory on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The course will serve as an introduction to major developments in the economics of health and health care. It will provide medical practitioners with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the changing nature of health care supply and delivery and the interactions between patients and health care systems. It will review major changes in the financing and delivery of health care and both domestic and international efforts to control health care costs and improve efficiency.

Topics will include the following:

Lecture 1: Introduction to the role of economics in health and health care
Lecture 2: The Demand for Medical Care, The Role of Moral Hazard in Health Care
Lecture 3: Prices, Insurance and Consumer Behaviour
Lecture 4: The role of the state in providing health care
Lecture 5: Financing Health Care Going Forward: How is the world paying for health care?
Lecture 6: Determinants of Individual and Population Health
Lecture 7: Physician Behaviour and Reimbursement. Supplier Induced Demand
Lecture 8: The Pharmaceutical Industry
Lecture 9: Technological Change, Quality, and Innovation in Health Care
Lecture 10: Equity, Efficiency and Need

Seminar sessions will focus on current policy debates in the area of health and health care drawing on the theory and evidence from the lectures augmented by current readings from both academic and popular sources.

Teaching: 20 hours of seminars in the MT.

Formative coursework: Student presentations to be held on the final day of class, with each student's topic of their presentation to form the basis of their essay.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.

SA4M7E  Half Unit

Quality and Outcomes in Cardiovascular Sciences

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos COW.4.08
Dr. Huseyn Naci

Availability: This course is compulsory on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: Against a backdrop of great technological advances and delivery system innovations, healthcare systems are facing daunting challenges. Over the past half-century, research on cardiovascular diseases has manifested remarkable advances in the prevention and treatment of cardiovascular diseases. Yet, great challenges remain, primarily due to a lack of strong research evidence about how best to provide care and organize services to improve the quality, outcomes, and efficiency in health systems with a focus on cardiovascular diseases. Outcomes research aims to produce such evidence. In addition to briefly reviewing key epidemiological trends in cardiovascular diseases in Europe and globally, this course will introduce concepts about evidence-based medicine, quality of care, and outcomes-based accountability models. In particular, this module will focus on comparative effectiveness research as a framework for health care research and delivery. Comparative effectiveness research encompasses research efforts that aim to encourage healthcare decision-making to be increasingly based on comparative evidence on patient-centred outcomes at both the individual and population levels. In addition, this module teach the basics of study design in outcomes research and allow students to distinguish between strong and weak research design, and understand the methodological quality and risk of bias in different types of studies.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of help sessions in the ST.

Formative coursework: 5 brief response papers to each set of readings in preparation for each seminar.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.

SA4M8E  Half Unit

Economic Evaluation in Health Care

This information is for the 2015/16 session.

Teacher responsible: Prof Elias Mossialos COW.4.08
Elias Mossialos and Teacher to be appointed

Availability: This course is compulsory on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: Health care decision makers are often faced with the challenges of resource allocation. Economic evaluation is used to formalize the process of decision-making on the basis of costs and benefits associated with multiple alternative scenarios or interventions. Decision makers use evidence from economic
evaluation analyses to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health care interventions, as well as define best practices. This course will enable students to understand and apply analytic methods in the economic evaluation of health interventions and provide a strong foundation in the several advanced concepts in economic evaluation, and in particular cost-effectiveness of interventions used in long-term chronic illnesses. The course will provide an overview of the principles and practices of measuring and analyzing costs, and estimating effectiveness in terms of quality-adjusted life years and disability-adjusted life years. Practical topics will include the design and implementation of economic evaluation models and the role of clinical data inputs to inform economic evaluation analyses.

**Teaching:** 5 hours of lectures, 10 hours of seminars and 5 hours of computer workshops in the MT. 1 hour of help sessions in the ST.

**Formative coursework:** 5 brief response papers to each set of readings in preparation for each seminar.

**Assessment:** Exam (25%, duration: 1 hour) in the main exam period. Research project (75%) in the LT.

An assessed project of 5,000 words (75%) and a one-hour written examination (25%).

---

**SA4N1E**  Half Unit

**Systematic Review and Meta-analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Elias Mossialos COW.4.08

**Availability:** A core course available only for students taking MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences

**Course content:** Systematic reviews and meta-analyses of randomized controlled trials are increasingly used to evaluate the relative benefits and harms of healthcare interventions. In situations where direct, head-to-head comparisons of interventions do not exist, researchers also perform indirect comparisons of two or more interventions to address comparative effectiveness questions. This course will teach the principles of qualitative and quantitative meta-analysis, including methods for searching the literature, extracting information, and synthesizing the evidence. Quantitative methods will include traditional pair-wise meta-analysis and advanced Bayesian network meta-analysis that are increasingly common within health technology assessment agencies.

**Teaching:** 20 hours of seminars and 1 hour of help sessions in the ST.

**Formative coursework:** Students will be expected to produce 5 pieces of coursework in the ST.

5 brief response papers to each set of readings in preparation for each seminar.

**Assessment:** Exam (25%, duration: 1 hour) in the main exam period. Research project (75%) in the ST.

An assessed project of 5,000 words (75%) and a one-hour written examination (25%).

SA4N2E  Half Unit
Dissertation in Health Economics, Outcomes, and Management in Cardiovascular Sciences

This information is for the 2015/16 session.
Teacher responsible: Prof Elias Mossialos COW.4.08 Dr. Huseyin Naci and supervisors
Availability: This course is compulsory on the MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: The dissertation could be on any topic in the field of health economics, outcomes research, comparative effectiveness research, policy, and management. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health/clinical policy, economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.
Teaching: 2 hours of lectures in the ST.
In addition to the lectures, students will be given individual support by their allocated supervisor.
Indicative reading: Dunleavy, P. (1986) Studying for a Degree in the Social Sciences, Macmillan. (See Chapter 5: Writing a Dissertation)
Assessment: Dissertation (100%, 5000 words) in the MT.

SA4N7  Half Unit
Economics of Health and Wellbeing

This information is for the 2015/16 session.
Teacher responsible: Dr Grace Lordan M 2.26
Some lectures will be taken by Professor Andrew Clark (http://www.parisschoolsofeconomics.com/clark-andrew/index.html#DEA). Andrew currently has a partial appointment at the LSE in CEP.
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Pre-requisites: To have progressed from year 1 of the MSc in Health Economics, Policy and Management into year two students will have passed SA4E1 Health Administration and Management, SA4E2 Resource Allocation and Cost-effectiveness Analysis, SA4G1 Financing Health Care and SA4G2 Health Economics.
Course content: Overall the lectures will follow the following structure:
1. Lecture 1 Introduction
2. Lecture 2 Measurement
3. Lecture 3: Determinants of wellbeing
4. Lecture 4: Determinants of health with a focus on the income/health gradient
5. Lecture 5: Determinants of unhealthy behaviours (drinking, smoking, drug taking, obesity) with a focus on peer effects

In addition, we will have four seminar sessions that will complement these lectures. The following lectures map to individual seminars: (1 and 2), (3), (4) and (5)
This course is being convened by Dr Grace Lordan and will introduce students to the economics of health and wellbeing. Focus will be on the health or wellbeing production function, and the related economics literature. In particular, the course will cover how health and wellbeing are measured in the literature and factors that determine these outcomes. Attention will be paid to defining what a causal effect is and specifying an appropriate health production function. In this regard the student can expect to become familiar with some basic econometrics. In terms of measurement, we will consider the value of subjective versus objective outcomes. We will discuss the human development index and the Millennium development goals. In addition, the course will review the main determinants of physical health, including inequality. (Un)healthy behaviours will also be covered, including drug taking, obesity and smoking. Some attention will be paid to the role of peer effects in this regard. The course will also cover well-being, income comparisons and the Easterlin Paradox. This component will be taken by Professor Andrew Clark who is an affiliate with the Wellbeing group at the CEP. Overall, students taking this course can expect to gain insight as to the challenges faced by policy makers in altering the health and wellbeing outcomes of a nation. Students will also gain some insight into policies that are likely to be the most fruitful. Students will also become more familiar with a literature that considers individual health and wellbeing. This course will be complementary to the content covered in Advanced Health Economics and Valuing Health and Behaviour. However, there is no overlap and this course can also be taken on its own.
Teaching: 18 hours of lectures and 8 hours of seminars in the ST.
This course will be a combination of lectures- where students learn theory- and seminars- where students apply what they have learned.
Formative coursework: Students will be expected to produce 1 exercise in the ST.
Indicative reading: Main Readings:
Books:
1. The Economics Of Excess (2011) by Harold Winter
Articles:

Optional Readings:

Assessment: Take home exam (100%) in the MT.
The exam will be take home. Formative feedback will be provided on a piece of work similar to this.

SA4X6E  Half Unit  Not available in 2015/16
Welfare Analysis and Measurement

This information is for the 2015/16 session.

Teacher responsible: Prof Stephen Jenkins and Dr Berkay Ozcan
Availability: This course is available on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: Pre-requisites for this course are completion of Empirical Methods for Public Policy and Economic Policy Analysis.

Course content: This course provides the analytical tools to evaluate public policy interventions with respect to both efficiency and equity. The first part of the course provides students with the analytical tools to assess the efficiency of public policy interventions through examples based on a range of topics including health, education, crime, social services and social care. The second part focuses on issues of inequality and poverty. The topics covered include issues such as measurement of inequality and poverty, setting poverty thresholds and equivalence scales, assessment of differences between social groups, empirical modelling of the income distribution.

Teaching: A one-week modular teaching block.

Formative coursework: One essay opportunity will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online examinations usually take place on the third Friday after module teaching concludes. Assessed essays are usually due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.
MRes/PhD Programme Regulations
Methodological Training and Study Skills
The Methodology Institute provides a number of courses for research track PhD programmes. MY4M1 Foundations of Social Research 1 and MY4M2 Foundations of Social Research 2 contain modules in quantitative and qualitative analysis and are required for the ESRC 1+3 scheme. In addition the Institute offers courses in study skills and specialist options in a range of aspects of social research. All PhD students are welcome to attend any courses offered by the Institute, details of which are in the relevant part of the section on Masters degrees.

MRes/PhD in Anthropology
Programme Structure - MRes
Programme code: TMRESAN

<td>All MRes students are required to audit one or two of the department’s main lecture courses (to the value of one unit): AN402 The Anthropology of Religion AN405 The Anthropology of Kinship, Sex and Gender AN437 Anthropology of Learning and Cognition (n/a 15/16) AN451 Anthropology of Politics (H) AN456 Anthropology of Economy (1): Production and Exchange (H) AN457 Anthropology of Economy: Development (2): Transformation and Globalisation (H)</td>
</tr>
</tbody>
</table>

Award of the MRes in Anthropology
The marks for AN471 and AN472 will count respectively as 25% of the total mark for the year. The research proposal, worth 50% of the total mark for the MRes year, will be examined (and the examination includes a viva). In order to pass the MRes and in order to be upgraded to PhD registration and allowed to commence fieldwork, students (a) must earn an average of 60 or more across all units; (b) must earn a minimum mark of 60 on the research proposal.

Progression to the PhD
If the above MRes requirements are met, students will be upgraded to PhD registration and will commence the fieldwork phase of the programme. The mandatory first year progress review of PhD students will be based on written reports about the early phase of fieldwork. The mandatory third year progress review for students in Anthropology is held in the third term (or, exceptionally, in the fourth term) after their return from fieldwork; this entails a viva with both supervisors and one external examiner.

Programme Structure - PhD
Programme code: RPAN2
In the programme regulations below Years one and two are listed as “fieldwork”, with Years three and four being post-fieldwork, although in practice the timing/duration of these stages may vary to some extent between students.

MRes/PhD in Economics
Programme codes: TMRESEC (MRes) RPEC2 (PhD)

For students starting in or after the 2015/16 session
A PhD in Economics consists of two years of coursework, followed by a thesis which is expected to take three years. The coursework requirement involves three PhD-level core courses in microeconomics, macroeconomics and econometrics, three field courses and a supervised research paper.
A place on the MSc Economics or our MSc Econometrics and Mathematical Economics will include a conditional offer of progression to the MRes/PhD in Economics, subject to the attainment of a Distinction grade in the MSc. Those who meet the progression requirement and decide to progress are registered as MRes students and undertake the same two-year MRes course requirement as with all other MRes/PhD students.

First year MRes
All students are required to attend EC400, the September Introductory Course in Mathematics and Statistics, in year one. Students are required to take the following MRes core courses:

<table>
<thead>
<tr>
<th>Paper</th>
<th>Course number and title</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>EC441 Microeconomics for MRes Students</td>
</tr>
<tr>
<td>2</td>
<td>EC442 Macroeconomics for MRes Students</td>
</tr>
<tr>
<td>3</td>
<td>EC443 Econometrics for MRes Students or EC484 Econometric Analysis*</td>
</tr>
</tbody>
</table>

* Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

Second year or higher MRes
Students are required to take:

<table>
<thead>
<tr>
<th>Paper</th>
<th>Course number and title</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>ECS99 Research Paper in Economics (5,000 - 10,000 words in length)</td>
</tr>
<tr>
<td>5 &amp; 6</td>
<td>Two courses from the Field Selection List below</td>
</tr>
</tbody>
</table>

Students are required to attend:
A. ECS01 Work in Progress Seminars
B. The weekly departmental seminar series closest to their major field.

First year PhD Programme
Students who have been upgraded to PhD are required to work on their research and write a PhD thesis. In addition they are required to take:

<table>
<thead>
<tr>
<th>Paper</th>
<th>Course number and title</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>One course from the Field Selection List below</td>
</tr>
</tbody>
</table>
students are also required to attend: 
D. EC501 Work in Progress Seminars, where they present their research.
E. The weekly departmental seminar series closest to their major field.
Students are required to work on their research and to write a PhD thesis.

**Second and subsequent years PhD Programme**

Students are required to work on their research and write a PhD thesis.

Students are required to attend:
H. EC501 Work in Progress Seminars, where they present their research.
I. The weekly departmental seminar series closest to their major field.

**Progression to year 2 of MRes in Economics**

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in papers 1, 2, and 3. With the permission of the MRes Programme Director, students who do not attain this standard may proceed to the second year with up to one resit paper (with the restriction that they can sit a maximum of four exams, including resits and EC599 in year 2).

**Award of the MRes in Economics**

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in papers 1, 2, 3, 4 and in one of the papers 5 or 6. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

**Progression to PhD registration**

For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3, 4, 5 and 6, with at least two of the 60% marks achieved in the MRes core papers 1, 2, and 3.

**Condoning marks:** A mark between 55 - 59% in one of the papers 1, 2 or 3 can be condoned by a mark of +70% in another paper in 1, 2 or 3. A mark between 50 - 59% in one of the papers 1, 2 or 3 can be condoned by a mark of +70% in the EC599 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper at the next available opportunity. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing.

Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on progression to PhD according to the Appeals Regulations for Research Students.

**Progression to year 2 of PhD**

In order to progress to the second year of PhD students are required to pass the PhD qualifying field (paper 7) with a mark of 50% or higher.

**Award of the PhD in Economics**

Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

**Special provisions for students who have completed an MSc degree within the economics department at the LSE**

Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again and will have their MSc mark carried forward.

Students who have completed an MSc degree within the Economics department at the LSE are permitted to take their PhD qualifying field course (paper 5) in the first year of the MRes and might take paper 7 in their Second year.

For students who have taken paper 7 in their Second year the progression and award regulations are adjusted as follows:

**MRes award** - Students are required to achieve a pass mark of 50% in papers 1, 2, 3, 4 and at least one of 5-7. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

**Progression to PhD registration** - For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3, 4, 5, 6 and 7, with at least two of the 60% marks achieved in the MRes core papers 1, 2, and 3.

**Progression to PhD to Year 2 of PhD** - In order to progress to the second year of PhD students are required to pass all the PhD qualifying field (papers 5-7) with a mark of 50% or higher.

**Field Selection List**

Either FM502 Corporate Finance for Research Students or FM503 Asset Pricing for Research Students

**Special provisions for students who have completed an MSc degree within the economics department at the LSE**

Students who have completed an MSc degree within the Economics department at the LSE are permitted to take their PhD qualifying field course (paper 5) in the first year of the MRes and might take paper 7 in their Second year.

For students who have taken paper 7 in their Second year the progression and award regulations are adjusted as follows:

**MRes award** - Students are required to achieve a pass mark of 50% in papers 1, 2, 3, 4 and at least one of 5-7. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

**Progression to PhD registration** - For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3, 4, 5, 6 and 7, with at least two of the 60% marks achieved in the MRes core papers 1, 2, and 3.

**Progression to PhD to Year 2 of PhD** - In order to progress to the second year of PhD students are required to pass all the PhD qualifying field (papers 5-7) with a mark of 50% or higher.

**MRes/PhD in Economics**

**Programme codes:** TMRESEC2RE (MRes Track 1) TMRESEC2RE2 (MRes Track 2) RPEC2 (PhD)

For students starting in academic sessions 2010/11 to 2014/15

The MRes/PhD programme is offered in twin-track formats. Students on both tracks of the programme will have to complete MRes degree courses, a PhD-qualifying course and research training modules prior to submission of the PhD thesis. The different entrance qualifications of Track 1 and 2 students dictate the sequence and duration of the coursework.

Track 1 is aimed at students graduating with a postgraduate degree, or an undergraduate degree and exceptional grades in economics, mathematics, econometrics and other quantitative subjects. Track 2 is for students who have completed a graduate degree in economics from a reputable university institution and who have demonstrated exceptional performance in it. The decision on which track students are registered is a matter of academic judgement of the selectors for the programme. In practice almost all Track 2 entrants come from...
the LSE MSc programmes. The School’s regulations for Taught Masters Degrees apply to Track 1 course components 1 -. 6. and Track 2 course components 1 -. 5., except where the regulations below supersede the School’s degree regulations.

Programme Structure

Track 1

Track 1: (5 MRes Papers + 1 PhD-qualifying paper)

Track 1 students are required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

First year of Track 1

Students are required to take the following MRes core courses:
1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. EC443 Econometrics for MRes Students or EC484 Econometric Analysis*
   * Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

Second year of Track 1

Students are required to take:
4. EC599 Research Paper in Economics (5,000 - 10,000 words in length)
5. One from the Field Selection List below but different from paper 1.
6. One from the Field Selection List but different from paper 2.
7. In addition, students attend:
   A. EC501 Work in Progress Seminars
   B. The weekly departmental seminar series closest to their major field.

Third and further years of Track 1

Students who have not completed paper 6 (PhD qualifying field course) will be required to take:
8. One from the Field Selection List below but different from paper 1.
9. In addition, students attend:
   C. EC501 Work in Progress Seminars, where they present their research
   D. The weekly departmental seminar series closest to their major field
   Students are required to work on their research and to write a PhD thesis.

Progression to year 2 of MRes in Economics

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams (including resits and EC599) in year 2.

Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School’s Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in papers 1, 2, 3, 4 and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve three marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3, 4 and 5. Two marks of 60% or higher are required from the MRes core papers 1, 2, and 3. A mark between 55 - 59% in one of these core papers can be condensed by a mark of +70% in another core paper and/or a mark between 50 - 59% in one of these core papers can be condensed by a mark of +70% in the EC599 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students will also need to pass their PhD-qualifying field course (paper 6), which is taken in the first year of PhD registration, with 50% or higher.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted. Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper in a subsequent year. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing.

Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit. A student can appeal against the Department’s decision on progression to PhD according to the appeal’s procedures against decisions on upgrading to PhD in the School’s Regulations for Research Degrees.

Award of the PhD in Economics

Award of the PhD is contingent on meeting the progression requirements for the PhD, passing the PhD qualifying field with a mark of 50% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Track 2

Track 2: (4 MRes Papers + 1 PhD-qualifying paper) Track 2 students may be required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

First year of Track 2:

Students are required to take:
1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. EC443 Econometrics for MRes Students or EC484 Econometric Analysis*
   * Permission must be obtained to sit EC484: it is intended for students with a strong econometrics background and an interest in pursuing a PhD with econometrics as the primary field.
4. EC599 Research Paper in Economics (5,000 - 10,000 words in length)

Subsequent years of Track 2 (if upgraded to PhD):

Students are required to take:
5. One from the Field Selection List below (PhD qualifying field course).
   Students who are permitted to take a PhD qualifying field in year 1 are waived this additional requirement.
   In addition, students attend:
   C. EC501 Work in Progress Seminars, where they present their research
   D. The weekly departmental seminar series closest to their major field.
   Students are required to work on their research and to write a PhD thesis.
Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School’s Scheme for the Award of a four-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in papers 1, 2, 3 and 4. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve two marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3, and 4. Two marks of 60% or higher are required from the MRes core papers 1, 2, and 3. A mark between 55 - 59% in one of these core papers can be condoned by a mark of +70% in another core paper and/or a mark between 50 - 59% in one of these core papers can be condoned by a mark of +70% in the ECS99 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students will also need to pass their PhD-qualifying field course (paper 5), which is taken in the first year of PhD registration, with 50% or higher.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted. Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper in a subsequent year. Students can retake each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on progression to PhD according to the appeal’s procedures against decisions on upgrading to PhD in the School's Regulations for Research Degrees.

Award of the PhD in Economics

Award of the PhD is contingent on meeting the progression requirements for the PhD, passing the PhD qualifying field with a mark of 50% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Either FM502 Corporate Finance for Research Students or FM503 Asset Pricing for Research Students

PH413 Philosophy of Economics and PH555 Research Seminar in the Philosophy of Economics and Social Sciences ♦

**Track 2 students who have previously taken the EC485 component of this course at Masters level may instead, with the agreement of the MRes Programme Director, take Statistics and/or Mathematics courses to the value of one unit.

♦ PH555: students are required to attend one term of choice and complete the term essay.

MRes/PhD in Finance

Programme codes: TMRESF11 (MRes Route 1)
TMRESF12 (MRes Route 2)
RPFI2 (PhD)

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. Students will take either Route 1 or Route 2 (depending on their previous Masters qualification) as detailed below.

Route 1

Students who have not completed the MSc Finance and Economics (research) at LSE or an equivalent programme elsewhere.

Route 1 students are required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

Year One Training courses:
Compulsory (examined)
1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. FM481 Financial Econometrics for Research Students

Transferable skills courses:
Compulsory (not examined)
A. FM436 Financial Economics
B. Capital Markets Workshop

Optional (not examined)
C. MY592 Workshop in Information Literacy: finding, managing and organising published research and data
D. Any relevant seminars in related areas.

Year Two Training courses:
Compulsory (examined)
4. FM502 Corporate Finance for Research Students
5. FM503 Asset Pricing for Research Students
6. FM482 Research Paper in Finance (6,000 - 8,000 words in length)

Transferable skills courses:
Compulsory (not examined)
A. FM505 PhD Seminar in Finance. Presentation requirements: Students are required to do an FM505 seminar presentation in the second year.
B. Capital Markets Workshop

Optional (not examined)
C. Any relevant seminars in related areas

Year Three (if upgraded to PhD) Training courses:
Compulsory (examined)
7. FM505 PhD Seminar in Finance

Students need to pass paper 7 with a mark of 65% or higher.

Transferable skills courses:
Compulsory (not examined)
A. Capital Markets Workshop

Progression and upgrade requirements

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams in year 2, which must be the two resits, either paper 4 or 5, and paper 6.
Award of the MRes in Finance
The award and classification of the MRes degree is consistent with the School’s Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in 5 of full-unit papers, which must include Paper 6 (Research paper) and four papers from 1, 2, 3, 4, and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration
For PhD registration students are required to achieve marks of 50% or higher in papers 1, 2, and 3, marks of 60% or higher in papers 4 and 5 and a mark of 65% or higher in paper 6. Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted. Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

Route 2
Students who have taken the MSc Finance and Economics (Research) programme at LSE or equivalent from another institution may enter onto Route 2 of the programme (this will have been subject to the approval of the Programme Director).

Year One Training courses:
Compulsory (examined)
1. EC441 Microeconomics for MRes Students
2. FM503 Corporate Finance for Research Students
3. FM504 Asset Pricing for Research Students
4. FM482 Research Paper in Finance (6,000 - 8,000 words in length)

Transferable skills courses:
Compulsory (not examined)
A. FM505 PhD Seminar in Finance
B. Capital Markets Workshop

Year Two (if upgraded to PhD) Training courses:
Compulsory (examined)
5. FM505 PhD Seminar in Finance. Presentation requirements: Students are required to do a seminar presentation in the second year.
6. EC442 Macroeconomics for MRes Students or another full unit course approved by the PhD Director. Students need to pass paper 5 with a mark of 65% or higher and paper 6 with a mark of 50% or higher.

Transferable skills courses:
Compulsory (not examined)
A. Capital Markets Workshop

Award of the MRes in Finance
The award and classification of the MRes degree is consistent with the School’s Scheme for the Award of a four-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in papers 1, 2, 3 and 4. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration
For PhD registration students are required to achieve a mark of 50% of higher in paper 1 and marks of 60% or higher in papers 2 and 3, and a mark of 65% or higher in paper 4. Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted. Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

Award of the PhD in Finance
Award of the PhD is contingent on meeting the progression requirements for the PhD, passing FM505 with a mark of 65% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

MRes/PhD in International Development
Programme codes: TMRESDV (MRes) RPDV2 (PhD)

Year 1
Compulsory courses
1. DV501 Development History, Theory and Policy for Research Students (H)
2. Methodology course choice 1 to the value of one full unit (at the 400 and 500 level) (F)*
3. Methodology or Theory course choice 2 to the value of one full unit (at the 400 and 500 level) (F)*
4. Methodology or Theory course choice 3 to the value of one half unit (at the 400 or 500 level) (H)*
5. DV510 Research Design and Proposal in International Development (F)
6. DV500 Research Seminar in Development Studies (non-examined)

Notes
* Course choices must be approved by the supervisor and Doctoral Programme Director.

Optional Courses
7. EC400 Introductory Course in Mathematics and Statistics (September pre-sessional course as a pre-requisite for 400 and 500 level EC courses for students planning to make use of advanced quantitative methods in their PhD research).

Award of the MRes in International Development
The MRes in International Development will be awarded if all the exams are passed. A ‘Distinction’ grade will be awarded for the MRes if an aggregate of 270 marks (over 4 full units) is achieved with no fails. A ‘Merit’ grade will be awarded for the MRes if an aggregate of 250 marks (over 4 full units) is achieved with no fails. A ‘Pass’ grade will be awarded for the MRes if an aggregate of 200 marks (over 4 full units) is achieved with no fails.
Upgrade to PhD
Upgrade to PhD is dependent upon:
1. Pass of the MRes with an average of 65 in the coursework (except as noted above).
2. Pass of the Research Proposal with a mark equal or greater than 65.
The Research Proposal Committee will offer constructive advice and make one of four decisions:
• Unconditional approval
• Conditional approval
• Revise and resubmit
• Fail
Students who are required to Revise and Resubmit are usually expected the resubmit the proposal within three months. These students will progress to a temporary MPhil status, with the approval of the Chair of the Research Degrees Subcommittee, while they are revising their research proposal. Students who are successful will be upgraded to PhD.
The progress of each student will be reviewed at the end of each subsequent year.

MRes/PhD in Political Science
Programme codes: TMRESPOLSC (MRes)
 RPPOLSCL (PhD)
Students complete and are examined in courses to the value of four full units.
Paper Course number and title
1 Research Design
GV5X1 Research Design in Political Science
2 Methods courses
Students take courses under A, B or C to the value of one unit:
A) Quantitative research topics
MY552M or MY552L Applied Regression Analysis (H)
MY557 Causal Inference for Observational and Experimental Studies (H) or
GV4G1 Applied Quantitative Methods for Political Science (H)
GV513 Qualitative Methods in the Study of Politics (H) (n/a 15/16)
MY551M or MY551L Introduction to Quantitative Analysis (H)
MY521 Qualitative Research Methods (H)
B) Qualitative research topics
GV4G3 Foundations of Political Theory
If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.
C) Political theory research topics
GV4G1 Political Theory: Comparative politics (H)
GV4G2 Political Theory: Political Economy (H)
If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.
3 Field seminars
Courses to the value of 1 unit from the following:
GV517 Comparative Political Economy: New Approaches and Issues in CPE (H)
GV5X2 Research Paper in Comparative Politics (half or full unit)
GV5X3 Research Paper European Politics and Policy (half or full unit)
GV5X4 Research Paper in Global Politics (half or full unit)
GV5X5 Research Paper Political Science and Political Economy (half or full unit)
GV5X6 Research Paper Political Theory (half or full unit)
GV5X7 Research Paper Public Policy and Administration (half or full unit)
Any course from 2, above, not already taken, or any research methods course taught anywhere in the School, with the approval of the Course Convenor and the Doctoral Programme Director.
4 Research Prospectus
GV599 Research Prospectus in Political Science
Second, third, fourth and fifth year
A) Research and write a dissertation
B) Participate in at least one Doctoral Workshop in the
Government Department or elsewhere in the School in each year. e.g. GV501 Doctoral Workshop: Political Theory; GV503

Political Philosophy Research Seminar, GV510 Ethnicity and Nationalism Research Workshop (n/a 15/16), GV514 Political Science and Political Economy Doctoral Workshop, GV515 Researching People, Politics and Organisations (n/a 15/16), GV555 Political Economy and Public Policy Workshop.
C) Second year students have the option of taking EC540 Political Economy. Permission to attend is at the discretion of the course convenor.

Award of the MRes
The award and classification of the MRes is consistent with the School’s Scheme for the Award of a four-unit Taught Masters Degree

Conditions for progression to PhD
1. Award of the MRes with at least a Merit
2. Award of GV599 with at least a Merit

Award of the PhD
The PhD is awarded according the rules of the LSE.

MRes/PhD in Quantitative Economic History
Programme codes: TMRESQEH (MRes)
 RQPEH (PhD)
MRes
Students complete and are examined in courses to the value of four full units.
Paper Course number and title
1 Courses to the value of one full unit from the following:
EH404 India and the World Economy (H)
EH408 International Migration, 1500-2000: from slavery to asylum (H)
EH412 Research Topics in Economic History A (H) (withdrawn 15/16)
EH413 African Economic Development in Historical Perspective (H)
EH419 Research Topics in Economic History B (H) (withdrawn 15/16)
EH423 Japan and Korea as Developing Economies (H) (n/a 15/16)
EH424 The British Economy in Global Perspective, 1000-2000 (H) (n/a 15/16)
EH446 Economic Development of East and Southeast Asia
EH447 Great Depressions in Economic History (H) (n/a 15/16)
EH451 Latin American Development: political economy of growth (H) (n/a 15/16)
EH452 Latin American Development and Economic History (H) (n/a 15/16)
EH463 The Long-Run Analysis of Firms and Industries (H)
EH464 The Historical Context of Business (H)
EH466 Labour and Work in Preindustrial Europe (H) (withdrawn 15/16)
EH467 Epidemics: epidemic disease in history, 1348-2000 (H) (n/a 15/16)
EH476 The Economic History of War
EH482 The Development and Integration of the World Economy in the 19th and 20th Centuries
EH486 Shipping and Sea Power in Asian Waters, c1600-1860 (H)
EH487 International Economic Institutions since World War I (H)
2 EH course(s) to the value of one full unit from Paper 1 above
3 EC411 Macroeconomics or EC413 Macroeconomics *
4 EH473 Research Paper in Quantitative Economic History
5 EH474 Research Prospectus **
* If not already taken under Paper 3 of the MSc Quantitative Economic History.
** Not examined but subject to departmental approval.
Award of the MRes Quantitative Economic History
The award and classification of the MSc degree is consistent with the School’s scheme for the award of a four-unit Taught Master’s Degree. Students are required to achieve a pass mark of 50% in papers 1, 2, 3 and 4 and submit paper 5 (EH474 Research Prospectus, not examined half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in lse.ac.uk/intranet/LESEServices/TQARO/Calendar/SchemeTaughtMasters.pdf (see paragraph 3.2) apply. A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MRes Quantitative Economic History to the PhD
To progress from the MRes to the PhD programme, students need to achieve at least a Merit overall in the MRes and at least 65% in the (full unit) Research Paper in Quantitative Economic History (EH473). In addition, their Research Prospectus (EH474) needs to be approved by the departmental Prospectus Review Committee following a viva. If a student fulfils all other progression requirements but his/her Research Prospectus does not meet the expectations set out in the EH474 course description, the Prospectus Review Committee will grant an extension of up to three months to submit a revised version. If this revised version fails the required standards, the candidate will not be admitted to the PhD programme.

PhD
Non-examined courses
Years 1 - 4
Paper  Course number and title
EH590  Thesis Workshop in Economic History
MPhil/PhD Programme Regulations
MPhil/PhD in Accounting
Programme code: RPAC
For students entering in or after the academic year 2015/16.
The Department of Accounting offers an MPhil/PhD Accounting programme with two tracks. The aim is to ensure the highest quality in the development of research students, in their research skills and to support their progression to the completion and defence of high quality theses in their respective specialisms.

Track 1 is devoted to the study of interrelationships between accounting, organisations and institutions. Research in this track examines how accounting practices are much more than a collection of routine techniques, but are shaped by their institutional contexts, have behavioural consequences and can represent different values. Efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. Research in this track includes a wide variety of accounting topics examined through this lens using primarily qualitative methods, such as studies in management accounting, analyses of accounting systems in the private and public sector, transformations of auditing and risk regulation regimes, historical studies of accounting, as well as broader contributions to social theory.

Track 2 primarily examines accounting and financial reporting issues from an economics perspective. Research in this track covers a wide range of accounting topics including design and choices between alternative accounting methods, the use of accounting numbers for internal reporting, performance measurement, incentive systems, and in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting and performance measurement, and the interactions between financial reporting, legal and economic institutions, and corporate governance. While much research in these areas takes the form of empirical archival analysis, theoretical analysis and field research can also be relevant in some cases.

When making an application, MPhil/PhD students in Accounting will choose to follow either Track 1 or Track 2 as detailed below.

Year One
Training courses
Compulsory (not examined):
AC500  Accounting, Organisations and Society

Compulsory (examined):
AC502  Foundations in Accounting, Organisations and Institutions (H)

Methodology Training: At least one examined methodology course to the value of one half unit including courses offered by the Department of Methodology, either in their first and/or second year of the programme.

Courses to the value of 1.5 course units from the following normally to be taken in the first year (one course may need to be taken in Year Two):
AC411  Accounting, Strategy and Control (H)
AC412  Accountability, Organisations and Risk Management (H)
AC415  Management Accounting for Decision Making (H)
AC420  Financial Reporting in Capital Markets
AC444  Valuation and Security Analysis (H)
AC470  Accounting in the Global Economy (H)
AN473  Anthropological Approaches to Value (H) (n/a 15/16)
EH429  History of Economics: Ideas, Policy and Performativity (H) (n/a 15/16)
EH463  The Long-Run Analysis of Firms and Industries (H)
EH487  International Economic Institutions since World War I (H)
GV478  Political Science and Public Policy
GV481  Political Science and Political Economy (H)
GV488  Law and Politics of Regulation
GV484  Public Budgeting and Financial Management
GV420  Environmental Regulation: Implementing Policy
GY423  Environment and Development
GY455  Economic Appraisal and Valuation (H)
LL440  Corporate Accountability: Topics in Legal and Accounting Regulation
LL4AH  Comparative Company Law (H)
LL4BX  Corporate Governance (H) (n/a 15/16)
SO425  Risk, Regulation and Economic Life
SO430  Economic Sociology (H) (n/a 15/16)

Any other graduate-level course available in the School with permission from the PhD Programme Director.

Transferable skills courses
Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department Relevant seminars in related areas elsewhere in the School Appropriate international workshops and colloquia

Year Two
Training courses
Compulsory (not examined):
AC500  Accounting, Organisations and Society

Compulsory (examined):
Students who have completed less than 2.5 examined graduate-level course units in Year One will take additional courses, so that at the end of Year Two all students have completed at least 2.5 examined graduate-level course units.

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department Relevant seminars in related areas offered elsewhere in the School Appropriate international workshops and colloquia

Year Three
Training courses
Compulsory (not examined):
AC500  Accounting, Organisations and Society
Optional: As needed students may take course(s) or research training session(s) offered by the Department of Methodology. Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department Relevant seminars in related areas offered elsewhere in the School Appropriate international workshops and colloquia

Year One
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology. Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department Relevant seminars in related areas offered elsewhere in the School Appropriate international workshops and colloquia

Track 2
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.
(H) = half-unit course

Year Two
Training courses
Compulsory pre-sessional course (examined):
EC400 Introductory Course in Mathematics and Statistics
Note: This is a pre-sessional course starting in September. All students are normally required to attend EC400, the September Introductory Course in Mathematics and Statistics, before commencing the Track 2 MPhil/PhD Programme in Accounting.

Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
MY457 Causal Inference for Observational and Experimental Studies (H)
Any other graduate-level course available in the School with permission from the PhD Programme Director.

Transferable skills courses
Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
AC500 Accounting, Organisations and Society
Other research workshops and seminars held across the Department Relevant seminars in related areas offered elsewhere in the School Appropriate international workshops and colloquia

Year Three
Training courses
Compulsory (not examined):

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology. Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department Relevant seminars in related areas offered elsewhere in the School Appropriate international workshops and colloquia

Year Four
Training courses
Compulsory (not examined):

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology. Transferable skills courses
Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Progression and upgrade requirements for Tracks 1 and 2:
Progression requirements:
The departmental MPhil/PhD Assessment Review Committee will reach a decision on progress for each student at the end of Years One, Two and Three, and progression from the pre-sessional course (for students on Track 2). All MPhil/PhD Accounting students are normally required to achieve a mark of at least 65% in each of the 2.5 examined graduate-level course units required for progression on both tracks of the programme. The Committee may, in exceptional circumstances, condone a marginal fail if a student has demonstrated strength in other examined courses. Students failing an examined course can, at the discretion of the Committee, and taking into account overall performance, re-sit that course on one occasion only. The Committee may also decide to substitute an alternative assessment to redress any mark deficiencies and has the discretion to set additional requirements for progression where appropriate.

Students are required to make a seminar presentation in each year of their programme. These are formatively assessed. Performance at the seminar presentations will be taken into account by the MPhil/PhD Assessment Review Committee when reaching decisions on progression.

Upgrade:
Students will initially be registered for the MPhil. Upgrade to PhD registration will normally happen at the end of Year Two. In order to progress to PhD registration, students must normally have met the progression requirements above (a mark of at least 65% in each of the required 2.5 examined graduate-level course units), and have made satisfactory progress in their research, which normally is understood to mean a solid draft of one complete chapter, plus a detailed outline for the rest of the dissertation with abstracts for each proposed chapter. Materials submitted for upgrade must include a clear framework for the research and a timetable for completion. Students will be provided with an opportunity to defend their submitted written materials orally. The departmental MPhil/PhD Assessment Review Committee will review the progress of each research student, and recommendations for upgrading to PhD will be made on a case-by-case basis.

Award of the PhD in Accounting:
Award of the PhD is contingent on the completion and defence of an original research thesis, in accordance with LSE regulations.

Teaching Experience
Students in Tracks 1 and 2 are required to gain teaching experience with appropriate training in years two and three, and they are encouraged to take presentation skills and other training offered by the Teaching and Learning Centre.

MPhil/PhD in Accounting
Programme code: RPAC
For students entering in or before the academic year 2014/15.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
AC502 Foundations in Accounting, Organisations and Institutions (H)
Two of the following (to the value of 1.5 course units) normally to be taken in the first year (one course may need to be taken in Year Two): AC410 Management Accounting, Strategy and Organisational Control (withdrawn 15/16)
AC411 Accounting, Strategy and Control (H)
AC412 Accountability, Organisations and Risk Management (H)
AC415 Management Accounting for Decision Making (H)
AC420 Financial Reporting in Capital Markets
AC444 Valuation and Security Analysis (H)
AC470 Accounting in the Global Economy (H)
AN473 Anthropological Approaches to Value (H) (n/a 15/16)
EH429 History of Economics: Ideas, Policy and Performativity (H) (n/a 15/16)
EH463 The Long-Run Analysis of Firms and Industries (H)
EH487 International Economic Institutions since World War I (H)
GV478 Political Science and Public Policy
GV481 Political Science and Political Economy (H)
GV488 Law and Politics of Regulation
GV4E4 Public Budgeting and Financial Management
GY420 Environmental Regulation: Implementing Policy
GY423 Environment and Development
GY455 Economic Appraisal and Valuation (H)
LL440 Corporate Accountability: Topics in Legal and Accounting Regulation
LL4AH Comparative Company Law (H)
LL4BX Corporate Governance (H) (n/a 15/16)
LL4G9 European Monetary and Banking Law (H) (withdrawn 15/16)
SO425 Risk, Regulation and Economic Life
SO430 Economic Sociology (H) (n/a 15/16)
Any other graduate-level course available in the School with permission from the PhD Programme Director.

Optional (examined):
At least one methodology course, including courses offered by the Methodology Institute, either in their first and/or second year of the programme.

Transferable skills courses
Compulsory (not examined):

Optional (not examined):
Relevant seminars in related areas elsewhere in the School
Appropriate international workshops and colloquia

Year Two
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
Students who have completed less than two graduate-level course units in Year One will take additional courses.

Optional (examined): As needed students may take course(s) or research training session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars
Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year Three
Training courses
Compulsory (not examined):
AC500   Accounting, Organisations and Society

Optional (examined):
As needed, students may take course(s) or research training
session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars

Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year Four
Training courses
Compulsory (not examined):
AC500   Accounting, Organisations and Society

Optional (examined):
As needed, students may take course(s) or research training
session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars

Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Progression and upgrade requirements:
To proceed from Year One to Year Two, students must pass all
course examinations normally with high Merit or Distinction marks
Examinations: All MPhil/PhD Accounting students are required to
achieve a pass mark of at least 65% in their examined courses. The
examiners may, in exceptional circumstances, condone a lower pass
mark if there is strength elsewhere. Students failing a paper can, at
the discretion of the departmental Postgraduate Assessment Review
Committee, and taking into account overall performance, re-sit
that paper on one occasion only. The departmental Postgraduate
Assessment Review Committee may also decide to substitute a
make-up assignment, such as a 5,000-word essay, to redress any
mark deficiencies.

Seminar presentations:
Students are required to make a seminar presentation in each year
of their programme.

Upgrade:
Students will initially be registered for the MPhil. In order to progress
to PhD registration, students must have achieved a pass mark of at
least 65% in their taught course exams, and have made satisfactory
progress in their research, which normally is understood to mean a
solid draft of one complete chapter, plus a detailed outline for the
rest of the dissertation with abstracts for each proposed chapter.
The departmental Postgraduate Review and Assessment Committee
will review the progress of each research student, and make
recommendations for upgrading to PhD on a case-by-case basis.

Teaching Experience:
Students are offered the opportunity to gain teaching experience
with appropriate training, and are encouraged to take presentation
skills and other training offered by the Teaching and Learning
Centre.

MPhil/PhD (with Qualifying Examination) in Anthropology

The QE/MPhil/PhD programme is designed for, and only open
to, students who have secured full sponsorship for a research
programme in Social Anthropology but do not fulfil entry
requirements for the LSE's MPhil/PhD. The first year provides training
and Qualifying Examinations equivalent to MSc Social Anthropology.

YEAR 1
Year 1 will be assessed under the LSE's Regulations for Taught
Masters Degrees and Scheme For The Award Of A Taught Masters
Degree. Students will automatically progress to the MPhil/PhD
provided they obtain a Merit or higher in Year 1.
Students must take courses to the value of three full units and a
dissertation as shown.

Paper  Course number and title
1  AN404 Anthropology: Theory and Ethnography
2  One or two of the following to the value of one full unit:
   AN402  The Anthropology of Religion
   AN405  The Anthropology of Kinship, Sex and Gender
   AN451  Anthropology of Politics (H)
   AN456  Anthropology of Economy (1): Production and
          Exchange (H)
   AN457  Anthropology of Economy (2): Development,
          Transformation and Globalisation (H)

   One or two of the following to the value of one full unit:
   A paper from 2 above not already taken
   AN419  The Anthropology of Christianity (H)
   AN420  The Anthropology of South-East Asia (H)
   AN421  The Anthropology of Industrialisation and
          Life (H) (n/v 15/16)
   AN424  The Anthropology of Melanesia (H)
   AN436  The Anthropology of Development (H)
   AN437  Anthropology of Learning and Cognition (n/a
          15/16)
   AN439  Anthropology and Human Rights (H) (n/a 15/16)
   AN444  Investigating the Philippines- New Approaches
          and Ethnographic Contexts (H) (n/a 15/16)
   AN447  China in Comparative Perspective
   AN529  Anthropology of Religion
   AN451  Anthropology of Borders and Boundaries
          (H) (withdrawn 15/16)
   AN463  The Anthropology of Borders and Boundaries
          (H) (withdrawn 15/16)
   AN467  The Anthropology of South Asia (H) (n/a 15/16)
   AN468  The Anthropology of Schooling (H) (withdrawn
          15/16)
   AN469  The Anthropology of Amazonia (H) (n/a 15/16)
   AN499  Dissertation

Successful completion of Year 1 will result in students obtaining the
MSc in Social Anthropology. Students obtaining a Merit or higher
under the LSE's MSc regulations will be eligible to progress to the
MPhil.

YEAR 1 Non examinable components
All QE students will be entitled and encouraged to attend the
Departmental Seminar on Anthropological Research (AN500)
in order to develop their familiarity with current research in the
discipline.

YEAR 2
Subject to obtaining a Merit or higher in Year 1, students
progress to the MPhil which focuses on research preparation and
methodological training.

YEARS 3 to 5
After fieldwork (which normally lasts approximately fifteen to
eighteen months) students begin writing their PhD dissertations
under the close supervision of members of staff. During this period of their studies, they attend weekly thesis-writing seminars (AN503), as well as the departmental Seminars on Anthropological Theory (AN500), and fortnightly seminars on recent developments in anthropology (AN507).

Years two to five of the MPhil/PhD (with Qualifying Examination) in Anthropology are the same as years one to four of the MPhil/PhD in Anthropology and full details can therefore be found here: lse.ac.uk/resources/calendar/programmeRegulations/mPhilPhD/anthropology.htm

**MPhil/PhD in Demography/Population Studies**

**Programme code:** RPDEPS

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

**Year One**

**Training courses**

**Optional (not examined):**

If not already taken previously:
- SA451 Social Policy Research
- MY400 Fundamentals of Social Science Research Design (H)
- MY421L or MY421L Qualitative Research Methods (H)
- MY451M or MY451L Introduction to Quantitative Analysis (H)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

**Transferable skills courses**

**Compulsory (not examined):**

SA550 Research Student Seminar

**Optional (not examined):**

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute

**Year Two**

**Training courses**

**Optional (not examined):**

- MY452M or MY452L Applied Regression Analysis (H)
- MY455 Multivariate Analysis and Measurement (H)

**Transferable skills courses**

**Optional (not examined):**

SA550 Research Student Seminar

**Year Three**

**Transferable skills courses**

**Optional (not examined):**

SA550 Research Student Seminar

**Year Four**

**Transferable skills courses**

**Optional (not examined):**

SA550 Research Student Seminar

**Progression and Upgrade requirements**

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading. Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Research Students’ Programme Director. Each pre-Major Review student is expected to make a presentation on their proposed research to the SA550 seminar prior to the submission of their major review document and to address issues raised by the Research Students’ Programme Director(s).

### MPhil/PhD in Development Studies

**Programme code:** RPDEV

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

**Year One**

**Training courses**

**Compulsory (examined):**

All students will be required to take either a full or two half unit courses in research methods in the School’s Methodology Institute. The precise courses taken will be decided in consultation with the student’s primary supervisor.

**Compulsory (not examined):**

DV500 Research Seminar in Development Studies

Students who have not received their MSc Development Studies from the LSE will be required to attend the lectures for the core course DV400 Development: History, Theory and Policy. All first year students are required to attend a special seminar for research students.

**Optional (not examined):**

Further appropriate graduate level courses in the Department of International Development and agreed with supervisor.

**Optional (not examined):**

MPhil/PhD students will find it advantageous to attend the weekly Visiting lecture Series in Development Studies in Michaelmas Term.

**By Year Four**

Students are expected to have completed their research.

**Progression and Upgrade requirements**

Students will be required to achieve a minimum mark of 65% in the Methodology course. Failure to do so may mean that you are unable to progress onto the PhD programme and will remain at MPhil until you have either completed a further methodology course or achieved an improved grade.

All students will be interviewed during the Michaelmas term of their second year by the Graduate Review Committee. Continued registration for a second year will be conditional on the work presented being of a satisfactory standard and if satisfactory, will be upgraded from MPhil to PhD. By the end of ST of the second year students should have finished all fieldwork (where applicable). By the end of the third year students should be able to complete their dissertation.

### MPhil/PhD in Economic Geography

**Programme code:** RPECGY

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.
Route 1
Students who have completed MSc Local Economic Development or MSc Real Estate Economics and Finance will enter in Year 1 and take the course specified below:

Year One
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Compulsory (examined)
1. Courses to the value of one unit from the following (the course(s) must be different to those taken on the MSc):
   GY404  Topics in Local Economic Development (H)
   GY407  Globalisation, Regional Development and Policy
   GY408  Local Economic Development and Policy
   GY447  The Economics of Regional and Urban Planning (H)
   GY457  Applied Urban and Regional Economics
   EC411  Microeconomics (requires students to take pre-sessional course EC400)
2. One relevant advanced research methods course to the value of one unit:
   GY428  Applied Quantitative Methods (H)
   GY460  Techniques of Spatial Economic Analysis (H)
   MY500  Fundamentals of Social Science Research Design (H)
   MY521  Qualitative Research Methods (H)
   MY526  Doing Ethnography (H)
   MY527  Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   MY556  Survey Methodology (H)
   MY557  Causal Inference for Observational and Experimental Studies (H)
   MY559  Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar
MY592  Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar

Year Four
Training courses
Optional (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)  GY500 Research Project Seminar

Route 2
Students without MSc Local Economic Development or MSc Real Estate Economics and Finance will take the following specified courses:

Year One
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Compulsory (examined)
2. One relevant advanced research methods course to the value of one unit:
   GY428  Applied Quantitative Methods (H)
   GY460  Techniques of Spatial Economic Analysis (H)
   MY500  Fundamentals of Social Science Research Design (H)
   MY521  Qualitative Research Methods (H)
   MY526  Doing Ethnography (H)
   MY527  Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   MY556  Survey Methodology (H)
   MY557  Causal Inference for Observational and Experimental Studies (H)
   MY559  Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar
MY592  Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)  GY500 Research Project Seminar

Year Four
Training courses
Optional (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)  GY500 Research Project Seminar

Progression and Upgrade requirements for both routes
Progression and upgrade requirements:

Students in the MPhil/PhD programme will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year 2 for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and
objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student’s progress. Students are required to submit a formal written update report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferal to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Economic History

Programme code: RPEH

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One

Training courses Compulsory (examined)

EH520 Approaches to Economic and Social History EH401 and EH402 (unless already taken as part of the Master’s degree, and, where appropriate, a pre-sessional statistics course)

Optional (not examined)

Supervisors may require students in their first or subsequent years of study to take other relevant economic history courses, methodological courses provided by the Methodology Institute or the Institute of Historical Research or skills training courses as required for their thesis topic.

Transferable skills courses Compulsory (not examined)

EH590 Thesis Workshop in Economic History

MPhil/PhD in Environmental Economics

Programme code: RPENEC

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1

Students with MSc Environmental Economics and Climate Change will enter Year 1 and take the specified courses below:

Year One

Training courses Compulsory (not examined)

GY502 Staff/Research Students Seminars

Compulsory (examined)

1. EC411 Microeconomics (Note that students must take the pre-sessional course EC400).
2. Relevant advanced research methods course(s) to the value of one unit from the following: EC402 Econometrics MY555 Multivariate Analysis and Measurement (H) MY556 Survey Methodology (H) MY557 Causal Inference for Observational and Experimental Studies (H) MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year Four
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Progression and Upgrade requirements for routes 1 and 2
Once students are in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year 2 for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Importantly, progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshops.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.
MPhil/PhD in Environmental Policy and Development

Programme code: RPENPD

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1

Students who have completed MSc Environmental Policy and Regulation or MSc Environment and Development will enter in Year One and take the courses specified below:

Year One

Training courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. Courses to the value of one unit from the list of options on the relevant MSc degrees.
2. Relevant advanced research methods course(s) to the value of one unit from the following:
   - MY500 Fundamentals of Social Science Research Design (H)
   - MY521 Qualitative Research Methods (H)
   - MY526 Doing Ethnography (H)
   - MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   - MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year Two

Training courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar

Year Three

Training courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar

Year Four

Training Courses

Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses

Optional (not examined)
GY500 Research Project Seminar

Route 2

Students without MSc Environmental Policy and Regulation or MSc Environment and Development will take the following specified courses:

Year One

Training courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. GY420 Environmental Regulation: Implementing Policy, or GY423 Environment and Development.
2. Relevant advanced research methods course(s) to the value of one unit from the following:
   - MY500 Fundamentals of Social Science Research Design
   - MY521 Qualitative Research Methods (H)
   - MY526 Doing Ethnography (H)
   - MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   - MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year Two

Training courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar

Year Three

Transfer courses

Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar

Year Four

Transfer Courses

Optional (not examined)

Progression and Upgrade requirements for both routes

Once students in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year One for students in the +3 programme and Year Two for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and justification for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression is also dependent on students having passed all required examinations.
and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.
All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student’s progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrade committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student’s main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.
In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

**MPhil/PhD in Employment Relations and Organisational Behaviour**

**Programme code:** RPEROB

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed and should discuss this with their supervisor.

**Year One**

**Training courses**

Compulsory (not examined):

- MG501 Employment Relations and Organisational Behaviour Seminar

Optional (not examined/examined):

- Students should discuss their training needs with their supervisor.
- A large number of seminars and courses are offered by the Methodology Institute and elsewhere in the school.

**Year Two**

**Training courses**

Compulsory (not examined):

- MG501 Employment Relations and Organisational Behaviour Seminar (Formerly ID501)

**Year Three**

**Training courses**

Compulsory (not examined):

- MG501 Employment Relations and Organisational Behaviour Seminar (Formerly ID501)

**Year Four**

**Training courses**

Compulsory (not examined):

- MG501 Employment Relations and Organisational Behaviour Seminar (Formerly ID501)

**Progression and upgrade requirements:**

Students are expected to take an active part in the PhD seminar series, usually presenting their work at the seminar once each year. A formal review committee assesses the progress of all MPhil/PhD students on an annual basis. Students will initially be registered for the MPhil. It is the normal expectation that the decision to upgrade a full-time student from MPhil to PhD will be made either at the first formal review or by the end of the second year of registration, and for part-time students, respectively at the end of the second or third reviews.

The materials submitted for the upgrade review may include examples of written work, such as a draft chapter or literature review, an abstract, and an outline. Supervisors will advise their students as to the content and nature of the material required for the upgrade review.

**MPhil/PhD in European Studies**

**Programme code:** RPEU

In addition to progressing with their research, students are expected to take the listed research training and transferable skills courses. Students may take courses in addition to those listed and should discuss this with their supervisor. For a complete list of courses please refer to the 2014/15 Handbook for Research Degree Students.

**Year One**

**Training courses**

Compulsory (not examined):

- EU550 Research Workshop in European Studies
- EU554 Research Methods and Design in European Studies (n/a 15/16)

Optional (examined):

- EU554 Research Methods and Design in European Studies (n/a 15/16)

**Year Two**

**Training courses**

Compulsory (not examined):

- EU550 Research Workshop in European Studies
- Students expected to take relevant course(s) in the Department of Methodology and agreed with their supervisors.

Transferable skills courses

Optional (not examined):

- EU455 Concepts in Political Economy (H)

**Year Three**

**Training courses**

Compulsory (not examined):

- EU550 Research Workshop in European Studies

Transferable skills courses

Optional (not examined):

- If not taken in Year Two:
  - EU555/GV555/IR555 Political Economy and Public Policy Workshop
  - Transferable skills courses
MPhil/PhD Programme Regulations 683

Optional (not examined):
EU455 Concepts in Political Economy (H)

Year Four
Transferable skills courses
Optional (not examined):
EU550 Research Workshop in European Studies

Upgrading to PhD/Targets for Progress

Year One - For a standard thesis: a research proposal (approximately 2,500 words) and abstract of the whole thesis (one page); a sample chapter (approximately 8,000 words); a chapter synopsis, and a timetable for completion. For a thesis as a series of publishable papers: a research proposal (approximately 2,500 words) and an abstract covering the three prospective papers; a full draft of the introduction or a full draft of one of the papers (approximately 8,000 words); and a timetable for completion.

Year Two - For a standard thesis: at least two further substantive chapters (of approximately 5,000-7,000 words each). For a thesis as a series of publishable papers: at least one fully written paper (approximately 10,000 words); and outlines of the other two papers (approximately 2,000 words).

Year Three - For a standard thesis: a full draft of all core chapters and agreed timetable for completion. For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for completion of the thesis.

MPhil/PhD in Finance
Programme codes: RPFI (MPhil/PhD)
RPFI2 (PhD)

For students entering in or after the academic year 2013/14 please refer to the MRes/PhD Finance programme regulations. In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Students will take either Route 1 or Route 2 (depending on their previous Masters qualification) as detailed below.

Route 1
Students from the MSc Accounting and Finance or MSc Management and Regulation of Risk programmes and those from other relevant programmes, either at LSE or elsewhere, will enter in Year 1 and take the courses specified below.

Year One
Training courses
Compulsory (examined)
FM404 Forecasting Financial Time Series (H)
FM437 Financial Econometrics
FM502 Corporate Finance for Research Students
EC441 Microeconomics for MRes Students

Transferable skills courses
Compulsory (not examined)
Capital Markets Workshop
FM505 PhD Seminar in Finance

Optional (not examined)
Any relevant seminars in related areas
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (examined)
FM503 Asset Pricing for Research Students

And one full unit equivalent optional course from:
EC442 Macroeconomics for MRes Students
EC443 Econometrics for MRes Students
EC518 Topics in Advanced Econometrics for Research Students
EC537 Microeconomic Theory for Research Students
EC539 Macroeconomic Theory for Research Students
Or any other course approved by the Programme Director

Transferable skills courses
Compulsory (not examined)
Capital Markets Workshop
FM505 PhD Seminar in Finance

Optional (not examined) Any relevant seminars in related areas

Presentation requirements: Students are required to do a seminar presentation in the second year.

Years Three and Four
Students spend the remainder of their PhD registration period carrying out research and thesis writing. They should also attend the following courses:

Transferable skills courses
Compulsory (not examined)
Capital Markets Workshop
FM505 PhD Seminar in Finance

Optional (not examined) Other seminars closest to student’s field of study

Progression and upgrade requirements
All students are required to achieve a mark of at least 65% in their examined courses, with the exception of EC441 where the required mark is 50%. The examiners may decide under certain conditions to condone a lower mark if there is strength elsewhere. Students failing to satisfy a progression requirement in a paper can, at the examiner’s discretion, taking into account overall performance, re-sit that paper on one occasion only.

Students are initially registered for an MPhil. In order to progress to PhD registration, students must have achieved a mark of at least 65% in the taught course exams, with the exception of EC441 where the required mark is 50%, and have made satisfactory progress in their research. Route 1 students will also be required to submit and defend a thesis proposal to a small Committee. The proposal builds on the 10,000 word essay completed for FM505 and should be submitted at the latest by the beginning of Summer Term of the second year of registration. The thesis proposal defence will be scheduled upon the satisfactory conclusion of all examined courses and completion of the FM505 paper and presentation.

Students are strongly encouraged to participate at an early stage in their research training in appropriate international workshops and colloquia. They are also offered the opportunity to gain teaching experience, with appropriate training, without detracting from their research time.

Route 2
Students who have taken the MSc Finance and Economics or MSc Finance and Economics (Research) programmes at LSE or equivalent from another institution may enter onto Route 2 of the programme (this will have been subject to the approval of the Programme Director).

Year One
Training courses Compulsory (examined):
FM502 Corporate Finance for Research Students
FM503 Asset pricing for Research Students
FM505 PhD Seminar in Finance
Aims and Methods (first year programme)

Compulsory (examined)
Training courses

Year One

Students who have already taken EC441 as part of the MSc Finance and Economics should instead choose one full unit equivalent optional course from:
EC441 Microeconomics for MRes Students
EC442 Macroeconomics for MRes Students
EC443 Econometrics for MRes Students
EC518 Topics in Advanced Econometrics for Research Students
EC537 Microeconomic Theory for Research Students
EC539 Macroeconomic Theory for Research Students

Or any other course approved by the Programme Director

Transferable skills courses

Compulsory (not examined):
Capital Markets Workshop
FM505 PhD Seminar in Finance

Optional (not examined):
Any other seminars closest to your field of study

Presentation requirements:
Students are required to do a seminar presentation in the second year.

Progression and upgrade requirements
All students are required to achieve a mark of at least 65% in their examined courses, with the exception of EC441 where the required mark is 50%. The examiners may decide under certain conditions to condone a lower mark if there is strength elsewhere. Students failing to satisfy a progression requirement in a paper can, at the examiner’s discretion, taking into account overall performance, re-sit that paper on one occasion only.

Students are initially registered for an MPhil. In order to progress to PhD registration, students must have achieved a mark of at least 65% in the taught course exams, with the exception of EC441 where the required mark is 50%, and have made satisfactory progress in their research. Route 2 students will also be required to submit and defend a thesis proposal to a small Committee. The proposal builds on the 10,000 word essay completed for FM505 and should be submitted at the latest by the beginning of Lent Term of the second year of registration. The thesis proposal defence will be scheduled upon the satisfactory conclusion of all examined courses and completion of the FM505 paper and presentation. Students are strongly encouraged to participate at an early stage in their research training in appropriate international workshops and colloquia. They are also offered the opportunity to gain teaching experience, with appropriate training, without detracting from their research time.

MPhil/PhD in Gender

Programme code: RPGE

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One

Training courses

Compulsory (examined)
Aims and Methods (first year programme)

Compulsory (not examined)
GI424 Gender Theories in the Modern World: An Interdisciplinary Approach (H) (lectures only) (formerly GI400)
GI402 Gender, Knowledge and Research Practice (lectures, seminars and workshops)

Optional (not examined)
GI499 Dissertation Methodologies in Interdisciplinary Perspective
Quantitative and/or qualitative training courses provided in the Methodology Institute, as agreed with supervisor.
Audit any course from the Gender Institute menu:
GI403 Gender and Media Representation
GI407 Globalisation, Gender and Development
GI409 Gender, Globalisation and Development: An Introduction
GI410 Screening the Present: contemporary cinema and cultural critique
GI411 Gender, Postcolonialism, Development: Critical Perspectives and New Directions
GI413 Gender and Militarisation
GI499 Dissertation
GV4H3 Feminist Political Theory (H)
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined)
GI500 Doctoral Workshop

Year Two

Training courses

Optional (students should agree with their supervisor whether the courses taken will also be examined)
Quantitative and/or qualitative training courses provided in the Methodology Institute as agreed with supervisor
Audit any course from the Gender Institute menu as above
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined)
GI500 Doctoral Workshop

Year Three

Training courses

Optional (students should agree with their supervisor whether the courses taken will also be examined)
Quantitative and/or qualitative training courses provided in the Methodology Institute and/or Gender Institute, as agreed with supervisor
Audit any course from the Gender Institute menu as above
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined)
GI500 Doctoral Workshop

Year Four

Training courses

Optional (examined/not examined):
Quantitative and/or qualitative training courses provided in the Methodology Institute, as agreed with supervisor
Audit any course from the Gender Institute menu as above
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined)
GI500 Doctoral Workshop

Progression and upgrade requirements
In the first year students will go through their Aims and Methods

Perspectives and New Directions
GI413 Gender and Militarisation
GI499 Dissertation
GV4H3 Feminist Political Theory (H)
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined)
GI500 Doctoral Workshop
examination. This is held in the summer term and materials should be submitted by the end of the second week of summer term. Students submit a draft chapter and a research proposal for consideration by a panel of their supervisor and advisor (and occasional one other person with appropriate expertise). The research proposal follows a specific template and includes research objectives, the methodology and short research rationale. The nature of the chapter should be agreed with the supervisor. Both parts of the assessment focus on the student’s own research and draw on material and debates engaged in GI424 (formerly GI400) and GI402 where relevant. Students must pass Aims and Methods before progressing to their second year. If unsuccessful at first sit, students have the opportunity to retake Aims and Methods once more at the end of September.

Research students make the transition from MPhil to PhD (Upgrading) by the end of the MT of their second year. In order to upgrade, students must have passed their Aims and Methods. For Upgrade students submit a detailed outline for their thesis (including the anticipated division into chapters), two substantive draft chapters (usually a literature review, methodology or introductory chapter, in discussion with supervisor), and a timetable for completion. The Upgrade is examined in a viva and the committee consists of the main and advisory supervisors and one other person who is not familiar with the student's work. Part-time student submissions are calculated pro-rata for both Aims and Methods and Upgrading.

Expectations for successful Aims and Methods and Upgrading:
- Satisfactory completion of materials for submission and appropriate academic presentation of the same
- Completion of compulsory courses, attendance and contribution to Doctoral Workshop
- Development of appropriate LSE courses in discussion with supervisor
- Having successfully Upgraded you will have an annual review with your supervisor and advisor to ensure satisfactory progress.

**MPhil/PhD in Geography**

**Programme code:** RPGY

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

**Year One**

**Training courses**

**Compulsory (not examined)**
- GY502 Staff/Research Students Seminars

**Compulsory (examined)**
- Students without a recognised research training MSc will be required to take:
- Either MY4M1 Foundations of Social Research 1
- or MY4M2 Foundations of Social Research 2, or another relevant course (to be approved by supervisor and the Director of Postgraduate Studies)
- One specialist subject course approved by the supervisor and the Director of the Postgraduate Studies. This can be GI403 Contemporary Debates in Human Geography or another relevant course.

**Optional (examined/not examined)**
- One relevant advanced research methods course and one advanced specialist subject course by agreement with the supervisor.

**Transferable skills courses**

**Compulsory (not examined)**
- GY500 Research Project Seminar
- MY592 Workshop in Information Literacy: finding, managing and organising published research and data

**Year Two**

**Training courses**

**Compulsory (not examined)**
- GY502 Staff/Research Students Seminars

**Transferable skills courses**

**Compulsory (not examined)**
- GY500 Research Project Seminar

**Optional (examined/not examined)**
- Students may attend additional courses, as deemed relevant by their supervisor.

**Year Three**

**Training courses**

**Compulsory (not examined)**
- GY502 Staff/Research Students Seminars

**Optional (examined/not examined)**
- Students may attend additional courses, as deemed relevant by their supervisor.

**Transferable skills courses**

**Compulsory (not examined)**
- GY500 Research Project Seminar

**Year Four**

**Training courses**

**Optional (not examined)**
- GY502 Staff/Research Students Seminars

**Transferable skills courses**

**Optional (not examined)**
- GY500 Research Project Seminar

**Progression and Upgrade requirements**

Students must achieve a pass (50% or over) in all examined elements (which includes the Methodological courses). All students will be subject to an annual review of progress in every year of registration.

At the end of the first year, students must submit a written first year progress report for formal review, encompassing a revised detailed research proposal and a chapter/paper (which can be a literature review). More details about the required materials and review process are outlined in the programme orientation notes. All of the work carried out in the year, plus performance in specified courses, will also be taken into consideration in the annual review. All students will initially register for an MPhil and will be required to pass through an upgrade process to register for the PhD. Upgrade from MPhil to PhD normally takes place in the second year of registration. Students must then submit a written upgrade report for formal examination, encompassing an extensive and detailed research proposal and two chapters/papers (one of which can be a literature review). More details about the required materials and upgrade process are outlined in the programme orientation notes.

Students may be required to complete additional courses, as deemed relevant by their supervisor, in later years of registration. Students are required to be in attendance throughout their period of registration. Absences or fieldwork must be approved by the Director of Graduate Studies in Geography and the Research Degrees Subcommittee, LSE.
MPhil/PhD in Government

Programme code: RPGV

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (not examined)
GV5X1 Research Design in Political Science

Optional (not examined/examined)
Relevant course(s) provided in the Methodology Institute agreed with supervisor.

Year Two
Training courses
Compulsory (not examined)
At least one workshop from the following (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics):
GV501 Doctoral Workshop: Political Theory
GV503 Political Philosophy Research Seminar
GV510 Ethnicity and Nationalism Research Workshop (n/a 15/16)
GV513 Qualitative Methods in the Study of Politics (n/a 15/16)
GV514 Political Science and Political Economy Doctoral Workshop
GV515 Researching People, Politics and Organisations (n/a 15/16)
GV555 Political Economy and Public Policy Workshop

Presentation requirements:
Students are required to present at one of the workshops attended.

Year Three
Training courses
Compulsory (not examined)
At least one workshop from the above (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics).

Year Four
Training courses
Compulsory (not examined)
At least one workshop from the above (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics).

MPhil/PhD in Human Geography and Urban Studies

Programme code: RPHUGY

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1
Students with MSc Human Geography and Urban Studies (Research) will take the following specified courses:

Year One
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Compulsory (examined)
1. Course(s) to the value of one unit from the list of options available on MSc Human Geography and Urban Studies.
2. Relevant advanced qualitative research methods course(s) to the value of one unit from the following:
   MY500  Fundamentals of Social Science Research Design (H)
   MY521  Qualitative Research Methods (H)
   MY526  Doing Ethnography (H)
   MY527  Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   MY529  Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

Students who have completed MSc Human Geography and Urban Studies must take a different course(s) to those that they have already taken.

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar
MY592  Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar

Year Four
Training Courses
Optional (not examined)
GY502  Staff/Research Students Seminars
Transferrable skills courses
Optional (not examined)
GY500  Research Project Seminar

Route 2
Students without MSc Human Geography and Urban Studies will take the following specified courses:

Year One
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Compulsory (examined)
1.  GY403  Contemporary Debates in Human Geography.
2.  Courses to the value of a half unit from the options available on MSc Human Geography and Urban Studies (Research).
3.  Relevant advanced qualitative research methods course(s) to the value of one unit from the following:
MY500  Fundamentals of Social Science Research Design
MY521  Qualitative Research Methods (H)
MY526  Doing Ethnography (H)
MY527  Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
MY529  Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar
MY592  Workshop in Information Literacy: finding, managing and organising published research and data

Year Two
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar

Year Four
Training courses
Compulsory (not examined)
GY502  Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500  Research Project Seminar

Progression and Upgrade requirements for both routes 1 and 2
Once students are in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year 2 for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student's progress.

Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Information Systems

Programme code: RPS

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (examined)
MG502  Foundations of Social Research in Information Systems: Paradigms and Traditions (H) (formerly I5592)
MG503  Interpretations of Information (H) (Formerly I5581)
MG486  Digital Convergence and Information Services (H) (Formerly I5418)

Or

Another half unit Masters Course from MISDI, Department of Management or School, subject to approval from supervisor and Research Chair.

Half unit course from Department of Management or other department, subject to approval from the supervisor and the Research Chair. The option would normally be an advanced level postgraduate course in an area that would contribute to their understanding or approach to the thesis topic.

MY400  Fundamentals of Social Science Research Design (H)
MY521  Qualitative Research Methods (H)
MY552  Applied Regression Analysis (H)
MPhil/PhD in International History

Programme code: RPIH

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (not examined)
HY501   International History Research Student Workshop

Year Two
Training courses

Transferable skills courses

Compulsory (not examined)
MG500   Information Systems PhD Seminar Series and Workshops
(students are expected to attend each term and present at least once a year) (Formerly IS554)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Two
Transferable skills courses

Compulsory (not examined)
MG500   Information Systems PhD Seminar Series and Workshops
(students are expected to attend each term and present at least once a year) (Formerly IS554)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Three
Transferable skills courses

Compulsory (not examined)
MG500   Information Systems PhD Seminar Series and Workshops
(students are expected to attend each term and present at least once a year) (Formerly IS554)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Four
Transferable skills courses

Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops
(students are expected to attend each term and present at least once a year) (Formerly IS554)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Progression and upgrade requirements

Students are expected to make a presentation once per year at MG500 Information Systems PhD Seminar Series and Workshops. Students are also expected to take an active part in the PhD Seminar Series. During the programme students are required to pass an MPhil/PhD upgrade examination. This involves a presentation at the MG500 Seminar series, submission of a research proposal for formal assessment by the faculty, response document to assessor feedback followed by an oral exam in the early Michaelmas term of year two, attended by a panel of faculty members and an external moderator. Students would normally be required to pass all six of their first year courses with Merit in order to be upgraded.

MPhil/PhD in International Relations

Programme code: RPIR

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (not examined)
IR501   Methods in International Relations Research
IR509   International Relations Research Design Seminar

Year Two
Training courses compulsory (not examined)
IR509   International Relations Research Design Seminar (second-year workshops)

Optional (examined/not examined)
The subject workshops offered by the International Relations Department include international relations theory; foreign policy analysis; security, conflict and peace studies; international institutions; political economy and public policy; European international politics; the South and world politics, Asia-Pacific and the Middle East.

Relevant courses provided by the Methodology Institute and agreed with supervisor, including:
MY400   Fundamentals of Social Science Research Design
MY521   Qualitative Research Methods
MY551M or MY551L Introduction to Quantitative Analysis (H)
MY552M or MY552L Applied Regression Analysis (H)
MY555 Multivariate Analysis and Measurement
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
MY599 Methodology Institute Seminar
MY530 Advanced Qualitative Analysis Workshops
MY591 Computer Packages for Qualitative Analysis

Transferable skills courses
MY592 Workshop in Information Literacy: finding, managing and organising published research and data (Year 1)

Progression and upgrade requirements
Early in the Summer Term first- and second-year research students will have their progress reviewed by a Research Panel. They may also be held at the end of the third or subsequent years of registration at the request of a supervisor or student. Supervisors will not attend Research Panels but will provide reports on progress. Panel members may attend student presentations at the Research Design Seminar (IR509). Students are expected for the first Panel to submit an outline of their proposed research and one draft chapter. Students who are deemed not to have made satisfactory progress will either be refused permission to re-register or will be required by the Research Panel to produce written work over the summer as a condition for re-registration. In the event of conditions to re-registration being set, a further Research Panel may be reconvened in the September prior to re-registration.

For the second Panel, which will decide on the question of upgrading from MPhil to PhD, students will be expected to submit two additional draft chapters. The two chapters should be substantially new work, but may include revised material from year one. Students who have not made sufficient progress to be converted from MPhil to PhD registration by the end of their second year will normally have re-registration made conditional on further progress (details to be decided by the Panel) or may, exceptionally, be prohibited from re-registering.

MPhil/PhD in Law
Programme code: RPLL
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory
1. LL500 Doctoral Research Seminar
2. Law Department lunchtime seminar series
3. One other relevant course offered by any department or other unit within the School

Year Two
Training courses
Compulsory (not examined)
1. LLS500 Doctoral Research Seminar
2. LL4L5 Socio-Legal Theory and Practice
3. Law Department lunchtime seminar series
4. One relevant course selected from those offered by the Department for Methodology

Optional (not examined)
Staff Seminar Series and PhD Seminar Series

Year Three
Training courses
Optional (not examined)
Staff Seminar Series and PhD Seminar Series

Year Four
Transferable skills courses
Optional (not examined)
Staff Seminar Series

Progression and upgrade requirements
Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the summer term.

MPhil/PhD in Management
Programme code: RPMG
For students entering in or after the academic year 2012/13.
The Department of Management offers an MPhil/PhD Management programme with five tracks:
MPhil/PhD in Management: Business Economics
MPhil/PhD in Management: Employment Relations and Organisational Behaviour
MPhil/PhD in Management: General Management
MPhil/PhD in Management: Information Systems and Innovation
MPhil/PhD in Management: Management Science
These are offered either within the Department or one of the departments or units within the School, or in conjunction with another School within the University.
its Academic Groups (Employment Relations and Organisational Behaviour, Information Systems and Innovation, Management Science).

H = half unit
F = full unit

**Business Economics Track**

*Programme code:* RPMGBE

**Year One**

**Training courses**

**Compulsory (examined)**

- Full course unit Research Paper
- EC441 Microeconomics for MRes Students
- MG411 Firms and Markets (students who have already taken MG411 should discuss alternatives with the programme director)

1 of the below:

- EC532 International Economics for Research Students
- EC533 Labour Economics for Research Students
- EC536 Economics of Industry for Research Students
- EC537 Microeconomic Theory for Research Students
- FM502 Theories of Finance
- FM503 Empirical Finance

**Transferable skills courses**

**Optional (not examined)**

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

**Year Two**

**Transferable skills courses**

**Optional (not examined)**

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

**Year Three**

**Transferable skills courses**

**Optional (not examined)**

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

**Year Four**

**Transferable skills courses**

**Optional (not examined)**

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

**Employment Relations and Organisational Behaviour Track**

*Programme code:* RPMGER

**Year One**

**Training courses**

**Compulsory (examined)**

- Research Paper (full unit)
- MG501 Employment Relations and Organisational Behaviour Seminar (formerly ID501)

1.5 units from the following:

- MY551 Introduction to Quantitative Analysis (H)
- MY552 Applied Regression Analysis (H)
- Or MG461 Quantitative Analysis in Management (H)
- MG462 Qualitative Analysis in Management (H)
- MY500 Fundamentals of Social Science Research Design (H)
- MY521 Qualitative Research Methods (H) or MG462 Qualitative Analysis in Management (H)

Students may take alternative methods courses if more suitable to their research project or prior background as agreed with their supervisor and programme director. However, it is intended that students should graduate with knowledge of both quantitative and qualitative research methods.

**1.5 units from the following:**

- ID436 Advanced and Emerging Topics in Organisational Behaviour (H) ** (withdrawn 15/16)
- MG414 Managing Change in the Public Sector: Theory and Challenge
- MG415 Thinking Like a Policy Analyst
- MG426 Organisations in the Economy and Society
- MG436 Firms, Markets and Crises (H)
- MG473 Negotiation Analysis (H) (formerly ID433)
- MG474 Managing Diversity in Organisations (H) (formerly ID434)
- MG475 Organisational Theory (H) (formerly ID435)
- MG476 Corporate Social Responsibility and International Labour Standards (H) (formerly ID440)
- MG477 Reward System: Key Models and Practices (H) (formerly ID437)
- MG478 Globalisation and Human Resource Management (H) (formerly ID438)
- MG4D2 International Employment Relations (H) (formerly ID432) (n/a 15/16)
- MG4A9 Foundations of Business and Management for Human Resources (H) (formerly ID439)
- MG4B7 Organisational Behaviour (H) (formerly ID431) (n/a 15/16)
- MG4C4 Human Resource Management and Employment Regulation (H) (formerly ID421) (withdrawn 15/16)
- MG4D1 International and Comparative Human Resource Management (H) (formerly ID411) (n/a 15/16)
- MG4D3 The Dark Side of the Organisation (H) (formerly ID423)
- MG4D4 Cross Cultural Management (H) (formerly ID419)
- MG4D5 Leadership in Organisations: Theory and Practice (H) (formerly ID420)
- ID441 Contemporary issues in HR Management (H) (withdrawn 15/16)

**Recommended for PhDs with a strong OB content**

Students may also take appropriate MSc level courses from within DoM or from another department as agreed with their supervisor and programme director.

**Year Two**

**Training courses**

**Compulsory (not examined):**

- MG501 Employment Relations and Organisational Behaviour Seminar (formerly ID501)

**Year Three**

**Training courses**

**Compulsory (not examined):**

- MG501 Employment Relations and Organisational Behaviour Seminar (formerly ID501)

**Year Four**

**Training courses**

**Compulsory (not examined):**

- MG501 Employment Relations and Organisational Behaviour Seminar (formerly ID501)

**General Management Track**

*Programme code:* RPMGGM

For all students in Years One to Four

**Compulsory (not examined):**

- MG504 General Management PhD research seminar

**Quantitative Approaches (for students with prior statistics background)**

**Year One**

**Training courses**

**Compulsory (examined)**
Full Unit Research Paper
1.5 units from the following:
MY552  Applied Regression Analysis (H)
MG461  Quantitative Analysis in Management (H)
MG462  Qualitative Analysis in Management (H)
1.5 units from the following:
MG414  Public Management and Governance
MG415  Thinking Like a Policy Analyst
MG426  Organisations in the Economy and Society
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Quantitative Approaches (for students with no prior statistics background)

Year One
Training courses
Compulsory (examined)
Full Unit Research Paper
1.5 units from the following:
MY551  Introduction to Quantitative Analysis (H)
MY552  Applied Regression Analysis (H)
Or MG461  Quantitative Analysis in Management (H)
MG462  Qualitative Analysis in Management (H)
1.5 units from the following:
MG414  Public Management and Governance
MG415  Thinking Like a Policy Analyst
MG426  Organisations in the Economy and Society
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Four
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Qualitative Approaches

Year One
Training courses
Compulsory (examined)
Full Unit Research Paper
1.5 units from the following:
MY500  Fundamentals of Social Science Research Design (H)
MY521  Qualitative Research Methods (H) or MG462  Qualitative Analysis in Management (H)
MY551  Introduction to Quantitative Analysis (H) or MG461  Quantitative Analysis in Management (H)
1.5 units from the following:
MG414  Public Management and Governance
MG415  Thinking Like a Policy Analyst
MG426  Organisations in the Economy and Society
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Information Systems and Innovation Track
Programme code: RPMGIS

Year One
Training courses
Compulsory (examined)
Full Unit Research Paper
MG502  Foundations of Social Research in Information Systems: Paradigms and Traditions (H) (formerly IS592)
MG503  Interpretations of Information (H) (formerly IS581)
Half unit course from Department of Management or other department, subject to approval from the supervisor and the
Research Chair. The option would normally be an advanced level postgraduate course in an area that would contribute to their understanding or approach to the thesis topic.

MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY552 Applied Regression Analysis (H)

Transferable skills courses
Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops (formerly IS554) (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Two
Transferable skills courses
Compulsory (not examined) MG500 Information Systems PhD Seminar Series and Workshops (formerly IS554) (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Three
Transferable skills courses
Compulsory (not examined) MG500 Information Systems PhD Seminar Series and Workshops (formerly IS554) (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year Four
Transferable skills courses
Compulsory (not examined) MG500 Information Systems PhD Seminar Series and Workshops (formerly IS554) (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Management Science Track
Programme code: RPMGMS

Year One
Training courses
Compulsory (examined)
Full Unit Research Paper MA408 Discrete Mathematics and Graph Theory (H)
MG408 Combinatorial Optimisation (H) (formerly OR408)
MG409 Mathematical Programming: Theory and Algorithms (H) (formerly OR406)

1.5 units from the following:
MG409 Auctions and Game Theory (H) (formerly OR409)
MG455 Principles of Decision Sciences (H)
MA402 Game Theory I (H)
MA407 Algorithms and Computation (H)
MA409 Continuous-Time Optimisation (H)
MA411 Probability and Measure (H)
MA412 Functional Analysis and its Applications (H)
MA418 Preferences, Optimal Portfolio Choice, and Equilibrium
ST405 Multivariate Methods (H)
ST409 Stochastic Processes (H)
ST411 Generalized Linear Modelling and Survival Analysis (H)

ST418 Non-Linear Dynamics and the Analysis of Real Time Series (H)
ST422 Time Series (H)

Any Department of Management, LSE, University of London, or London Taught Course Centre (LTCC), or National Taught Course Centre in Operational Research (NATCOR) courses that are relevant and at an appropriate level, with the approval of the Programme Director.

Transferable skills courses
Optional (not examined) Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined) Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three
Transferable skills courses
Optional (not examined) Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Four
Transferable skills courses
Optional (not examined) Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Progression and upgrade requirements (all tracks)
Students will normally be required to pass their first year modules with Merit or above in order to progress to the second year. The research paper must be submitted in the autumn of the second year for the upgrade decision. The panel will decide whether to upgrade the student to PhD status by the end of MT, or require them to ‘revise and resubmit’, with continued advice from the supervisor, by the end of March. A final decision would then be made.

MPhil/PhD in Management
Programme code: RPMG

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Students registered for the MPhil/PhD Management (Managerial Economics and Strategy Group) should see the MPhil/PhD Management (MES Group) programme regulations

Students will be registered for one of three tracks of this research programme and are required to take the courses as listed below.

Business Economics Track
Programme code: RPMGEB

Year One
Training courses
Compulsory (examined)
EC441 Microeconomics for MRes Students
MG411 Firms and Markets (students who have already taken MG411 should discuss alternatives with the programme director)
Full course unit Research Paper
Optional (examined)
1 of the below:
EC532 International Economics for Research Students
EC533 Labour Economics for Research Students
EC536 Economics of Industry for Research Students
EC537 Microeconomic Theory for Research Students
FM502 Theories of Finance
FM503 Empirical Finance

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Four
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Progression and upgrade requirements
Students will normally be required to pass their first year modules with merit or above in order to progress to the second year. Upgrade will occur subject to the submission of a quality research proposal 18 months into the programme.

Management Quantitative Track (Stream A, with prior statistics background)

Year One
Training courses
Compulsory (examined)
2.5 units from the following:
MY552 Applied Regression Analysis (H)
MG461 Quantitative Analysis in Management (H)
MG462 Qualitative Analysis in Management (H)
Full Unit Research Paper

Optional (examined) 1.5 units from the following:
MG414 Managing Change in the Public Sector: Theory and Challenge
MG415 Thinking Like a Policy Analyst
MG426 Organisations in the Economy and Society
Management optional course or optional course from another department as agreed with supervisor
Transferable skills courses

Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Four
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.
Progression and upgrade requirements

Students will normally be required to pass their first year modules with merit or above in order to progress to the second year. Upgrade will occur subject to the submission of a quality research proposal 18 months into the programme.

Management Qualitative track

Year One

Training courses

Compulsory (examined)

2.5 units from the following:

- MY400  Fundamentals of Social Science Research Design (H)
- MYS21  Qualitative Research Methods (H) or MG462 Qualitative Analysis in Management (H)
- MY551  Introduction to Quantitative Analysis (H) or MG461 Quantitative Analysis in Management (H)

Full unit Research Paper

Optional (examined)

1.5 units from the following:

- MG414  Public Management and Governance
- MG415  Thinking Like a Policy Analyst
- MG426  Organisations in the Economy and Society

Management optional course or optional course from another department as agreed with supervisor

Transferable skills courses

Optional (not examined)

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Two

Transferable skills courses

Optional (not examined)

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Three

Transferable skills courses

Optional (not examined)

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year Four

Transferable skills courses

Optional (not examined)

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Progression and upgrade requirements

Students will normally be required to pass their first year modules with merit or above in order to progress to the second year. Upgrade will occur subject to the submission of a quality research proposal 18 months into the programme.

MPhil/PhD in Management Science

(formerly MPhil/PhD Operational Research)

Programme code: RPMS

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Training Courses and Seminars There are no prescribed courses for all research students. Your supervisor will discuss with you your experience and background and will advise you or require you to take courses as appropriate. These would normally be taken in your first year of registration as a research student.

Students would be expected to be active participants in the Group’s Research Seminar Series and, where appropriate to their research, with the Mathematical Programming Study Group Seminar Series held in conjunction with the Operational Research Society.

Normally research students are expected, under the guidance of their supervisor, to present their work and findings to the whole Group every summer in a session devoted to that purpose. Students engaged in preparing the final draft of their thesis are exempted from this requirement.

Methodological Training You will work closely with your principal supervisor, who will provide advice and guidance. You will also have the opportunity to take advantage of research methodology courses provided by the Methodology Institute and the academic and professional development programme offered by the Teaching and Learning Centre.

Upgrading to PhD

The review to upgrade to the PhD normally takes place within two years of full time registration. Progress is assessed by the first and/or second supervisor in consultation with the PhD programme director and another expert in the field of the research undertaken by the student. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status.

Targets for Progress

Year One - Successful completion of any taught courses required
Year Two - Upgrade to PhD
Year Three - Completion of research and thesis
Year Four - Completion of research and thesis

MPhil/PhD in Mathematics

Programme code: RPMA

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One

Training courses - Compulsory (not examined)

Courses designed for research students in Mathematics, chosen in consultation with their lead supervisor. Discrete Mathematics and Algorithms and Game Theory students will attend four courses organised by the London Taught Course Centre (www.ltcc.ac.uk), but there are separate arrangements for students in Financial Mathematics, where courses are provided by the London Graduate School in Mathematical Finance (www.londonmathfinance.org.uk). Students also have the option of attending or auditing LSE Taught Masters modules, where appropriate.

Transferable skills courses - Compulsory (not examined)

- MA500  Mathematics Seminar - students required to attend.
- MA501  Research Student Seminar - students to attend and to make presentations.

Optional (not examined)

- MA422  Research Topics in Financial Mathematics

Year Two

Training courses - Optional (not examined)

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses - Compulsory (not examined)

- MA500  Mathematics Seminar
MA501  Research Student Seminar
Optional (not examined)
MA422  Research Topics in Financial Mathematics

Year Three
Training courses - Optional (not examined)
Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance

Transferable skills courses - Compulsory (not examined)
MA500  Mathematics Seminar
MA501  Research Student Seminar
Optional (not examined)
MA422  Research Topics in Financial Mathematics

Year Four
Training courses - Optional (not examined)
Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance

Transferable skills courses - Compulsory (not examined)
MA500  Mathematics Seminar
MA501  Research Student Seminar
Optional (not examined)
MA422  Research Topics in Financial Mathematics

Teaching opportunities
All students are offered the opportunity to teach for the department, subject to a successful interview and language requirements.

Progression and upgrade requirements
Students are initially registered for the MPhil, and will be able to upgrade to PhD registration during their second year, dependent on satisfactory progress. Progress is assessed regularly by the student’s supervisor, in consultation with the Doctoral Programme Director, on the basis of the extent to which the agreed research goals have been achieved. Any upgrade is dependent on the successful completion of a Major Review, the date of which is determined by the Doctoral Programme Director in consultation with the lead supervisor.

MPhil/PhD in Media and Communications

Programme code: RPME
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (examined)
MC408/418 Theories and Concepts in Media and Communications I and II (for students without the appropriate background)
MC5M2  Advanced Methods of Research in Media & Communications (includes MY551 Introduction to Quantitative Analysis and MY552 Applied Regression Analysis). By agreement, the Methodology Institute components (MY551 and/or MY552) can be replaced by other, more advanced, statistics courses or an advanced qualitative course taught at the Methodology Institute. At least one half-unit course of statistics needs to be included.

Optional (examined/not examined)
Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses
Compulsory (not examined)
MC500  Research Seminar for Media, Communications and Culture
Annual Departmental PhD Symposium

Optional (not examined)
CLT04  Digital Literacy
LN988  Thesis Writing course
Modern Foreign Language courses offered by the Language Centre
Other graduate seminars of relevance to research subject

Presentation requirements
At least one presentation annually at MC500 Research Seminar for Media, Communications and Culture

Year Two
Training courses
Optional (examined/not examined)
Either MY530 Advanced Qualitative Analysis Workshops (H) or
MY555  Multivariate Analysis and Measurement (H)
MY559  Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
ST416  Multilevel Modelling (H)
Other graduate courses relevant to research subject and agreed with supervisor

Transferable skills courses
Compulsory (not examined)
MC500  Research Seminar for Media, Communications and Culture
Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Optional (not examined)
Other graduate seminars of relevance to research subject

Year Three
Transferable skills courses
Optional (not examined)
MC500  Research Seminar for Media, Communications and Culture

Year Four
Students are expected to complete their research

Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by 1 June in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with the Methods (MC5M2) and Theories & Concepts (MC408/418) examinations, this paper will form part of the evaluation process, and, together with an oral examination based on the Thesis Proposal, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

MPhil/PhD in New Media, Innovation and Literacy

Programme code: RPMEIL
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.
Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by 1 June in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with the examinations in Methods (MC5M2) and the other two chosen compulsory first year courses from the list above, this paper will form part of the evaluation process, and, together with an oral examination based on the Thesis Proposal, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

MPhil/PhD in Philosophy
Programme code: RPPH
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Year One
Training courses
Compulsory (examined)
PH501 Philosophical Problems Seminar
Students who have never taken a paper in formal logic at degree level must take PH502 Reasoning and Logic (examined). Students who have already taken a formal logic course should choose one further MSc course not already taken as part of an MSc degree. Students can either decide to be examined in this course or instead choose to write two assessed essays, one at the end of each of the first two terms. This with the exception of students who choose PH419 Set Theory and Further Logic, in which case the examination is compulsory.

Either a further MSc course (again one not taken as part of the MSc course) plus one term unit of PhD level seminars. The seminars on offer are PH551 Research Seminar in Philosophy of Natural Sciences, PH555 Research Seminar in the Philosophy of Economics and Social Sciences or PH500 Research Methods in Philosophy. If students choose to take a further MSc course, they can either decide to be examined in this course or instead choose to write two assessed essays, one at the end of each of the first two terms. PHD level seminars are not examined and assessment is solely based on essays.

Or three term units of PhD level seminars with associated coursework. Taking three term units means that students can either take all three terms of one of these seminars or ‘mix and match’ by taking different seminars in different terms. Seminars must be taken with associated coursework work.

Optional (not examined)
Transference skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year Two
Training courses
Optional (examined/not examined)
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined)
Transference skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year Three
Training courses
Optional (not examined)

Year Four
Students are expected to complete their research
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined)
Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year Four
Training courses
Optional (not examined)
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined)
Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Progression and upgrade requirements
Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages; the research plan around 10 pages. Both have to be handed in to the Departmental Office by 1 September. This upgrading will normally take place after the successful completion of year 1 requirements. Once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

MPhil/PhD in Philosophy of the Social Sciences
Programme code: RPPHSS
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Year One
Training courses
Compulsory (examined/not examined)
1. MY551 Introduction to Quantitative Analysis
2. MY552 Applied Regression Analysis
3. MY521 Qualitative Research Methods
4. Either PH419 Set Theory and Further Logic (if students have previous logic training) or PH502 Reasoning and Logic (if no logic training)
5. PH423 Scientific Method and Policy
6. Students also attend a Research Seminar in the Department

Year Two
Training courses
Compulsory (examined)
7. MY555 Multivariate Analysis and Measurement
8. MY500 Fundamentals of Social Science Research Design

Year Three and Four
Completion of the thesis.

Progression and upgrade requirements
Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages; the research plan around 10 pages. Both have to be handed in to the Departmental Office by 1 September. This upgrading will normally take place after the successful completion of year 1 requirements. Once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

MPhil/PhD in Regional and Urban Planning Studies
Programme code: RPRP
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Compulsory (not examined)
GY450 Planning Practice and Research or GYS02 Staff/Research Students Seminar

Compulsory (examined)
1. Courses to the value of one unit from the list of options on the relevant MSc degrees
2. Relevant advanced research method courses to the value of one unit from the following:
   - MY500 Fundamentals of Social Science Research Design (H)
   - MY521 Qualitative Research Methods (H)
   - MY526 Doing Ethnography (H)
   - MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H) (n/a 15/16)
   - MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year Two
Training courses Compulsory (not examined)
GY502 Staff / Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year Three
Training courses
Compulsory (not examined)
GY502 Staff / Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Progression and upgrade requirements
Students on the MPhil/PhD programme will go through a First Year Progress Review taking place in the Summer Term of their first research year. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the
written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review, in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

Research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student’s progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferal to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student’s main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Social Policy

Programme code: RPPS

The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

Year One

Training courses

Optional (not examined)

If not already taken previously:
SA451 Social Policy Research
MY400 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY551M or MY551L Introduction to Quantitative Analysis (H)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses

Compulsory (not examined)

SA550 Research Student Seminar

Optional (not examined)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute

Year Two

Training courses

Optional (not examined)

MY552M or MY552L Applied Regression Analysis (H)
MY555 Multivariate Analysis and Measurement (H)

Transferable skills courses

Optional (not examined)

SA550 Research Student Seminar

Year Three

Transferable skills courses

Optional (not examined)

SA550 Research Student Seminar

Year Four

Transferable skills courses

Optional (not examined)

SA550 Research Student Seminar

Progression and Upgrade requirements

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading. Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Doctoral Programme Director(s).

Each pre-Major Review student is expected to make a presentation on their proposed research to the SA550 seminar prior to the submission of their major review document and to address issues raised by the Doctoral Programme Director(s).

MPhil/PhD in Social Psychology

Programme code: RPPS

The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

Year One

Training courses

Compulsory (students should agree with their supervisor whether the courses taken will also be examined)
MY421M or MY421L Qualitative Research Methods (H)
MY452M or MY452L Applied Regression Analysis (H) or MY455 Multivariate Analysis and Measurement (H)
MY456 Survey Methodology (H)
PS400 Contemporary Social and Cultural Psychology or PS404 Organisational Social Psychology or PS429 The Social Psychology of Communication or PS461 Health, Community and Development.

Half unit optional course.

Transferable skills courses

Compulsory (not examined)

PS950 Current Research in Social Psychology

Optional (examined/not examined)

Students can take further optional courses which they should discuss with their supervisor (students should agree with their supervisor whether the courses taken will also be examined)

Year Two

Training courses

Compulsory (students should agree with their supervisor whether the courses taken will also be examined): Quantitative pathway
MY452M or MY452L Applied Regression Analysis (H) (if MY451 taken in year 1)
Year 3
In this examination results in upgrade from MPhil to PhD status.

Qualitative pathway
MY455 Multivariate Analysis and Measurement (H)

Combined pathway
MY452M or MY452L Applied Regression Analysis (H) (if MY451 taken in year 1)
MY455 Multivariate Analysis and Measurement (H) (if MY452 taken in year 1)
MY456 Survey Methodology (H) (if MY455 taken in year 1)
MY455 Multivariate Analysis and Measurement (H)

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor (students should agree with their supervisor whether the courses taken will also be examined).

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor (students should agree with their supervisor whether the courses taken will also be examined).

Year Three
Training courses
Compulsory (examined/not examined)
Students can take further compulsory courses which they should discuss with their supervisor (students should agree with their supervisor whether the courses taken will also be examined).

Optional (examined/not examined)
Selection of courses taken at more advanced level than those in years 1 and 2

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Year Four
Training courses
Students can take further courses following discussion with their supervisor.

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor

Progression and upgrade requirements
The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student’s supervisor, as well as two other academic colleagues.

Targets for progress
Year 1 - Extended Essay of 6,000 words, submitted on first day of Lent Term.
Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Lent Term. These chapters form the basis of an oral examination by three person thesis committee usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.
Year 3 - Completed first draft by end of three years.

Teaching experience
Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

MPhil/PhD in Social Research Methods
Programme code: RPMI

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year One
Training courses
Optional (students should agree with their supervisor whether the courses taken will also be examined)
A selection of:
MY400 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY551M or MY551L Introduction to Quantitative Analysis (H)
MY552M or MY552L Applied Regression Analysis (H)
MY555 Multivariate Analysis and Measurement (H)
MY556 Survey Methodology (H) MY557 Causal Inference for Observational and Experimental Studies (H)

A typical selection would be to take MY400, MY521, MY552 and MY555 in the first year, but students may be excused from some or all of them if they have previously taken graduate-level courses covering the same material. Students who use quantitative methods in their research, are also encouraged to take MY559 in their first or second year. The courses they take may also include ones from other institutes or departments at LSE, dependent on their needs.

Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year Two
Training courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year Three
Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year Four
Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology

Progression and upgrade requirements
In the Summer Term of their first year, candidates will produce a 10,000 word ‘first year review’ that outlines the aims and methods of their thesis: this means summarising the key literature(s), motivating their specific research questions, and highlighting the planned contributions of their work. A first year review document typically includes a general introduction, a comprehensive literature review (covering relevant empirical and theoretical work), a motivation of the research questions and hypotheses, and an indication of the literature(s) that the candidate is seeking to contribute to (i.e. the gaps in knowledge that will be addressed). Candidates will also give an oral presentation of their proposal at the Department of Methodology PhD day. Written and oral work will be assessed by two academics (not on the supervisory team), normally members of Department of Methodology staff. This work has to reach an acceptable standard to enable them to progress to the second year. It is particularly important that the first year review clearly states the objectives of the doctoral research ands indicate how the empirical work will be carried out. If the panel deems the first year review to be not suitably clear, they can choose not to accept the submitted
document and give the candidate up to a month to clarify. This decision will be taken maximum one week after the Department of Methodology PhD Day. Examples of unclear work might include:

- A first year review that does not state clear research questions;
- A first year review that does not adequately review the specific literatures that the empirical work is contributing to;
- A first year review that does not give enough methodological detail, showing how the design will produce data that allows the candidate to address the theoretical issues at stake in a systematic and rigorous way.

After the first year candidates will spend more time on independent study under the guidance of their supervisor(s). This will involve the collection, organization and analysis of data, and writing up the results. During their second year of registration, they will typically submit three (minimum) draft chapters of their thesis plus a short introduction and a detailed plan for its completion. The three draft chapters will typically include a detailed literature review, specification of research problem(s) and two empirical chapters.

If candidates are pursuing a paper-based thesis, their upgrading documents will typically include a short introduction, a literature review and at least two empirical papers. Whether a traditional or paper-based thesis, the material will be evaluated by an upgrading committee (two academics, not necessarily of the MI or even the LSE) who will recommend transfeerral to PhD registration if their work is judged to be of sufficient quality and quantity.

Throughout the MPhil/PhD and PhD, candidates will attend the Institute’s research seminar and other specialist workshops and seminars related to their interests. The student must present at every Department of Methodology PhD day.

### MPhil/PhD in Sociology

**Programme code:** RPSO

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

#### Year One

**Training courses**

**Compulsory (examined)**

- SOS00 Research Class for 1st year MPhil Students
  - Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

**Optional (examined)**

- MY400 Fundamentals of Social Science Research Design (H)
- MY521 Qualitative Research Methods (H)
- MY551M or MY551L Introduction to Quantitative Analysis (H)
- MY552M or MY552L Applied Regression Analysis (H)

Selection of additional courses, with agreement of supervisor, including:

- Other courses from Sociology Masters programmes
- Specialist research courses: SOS11 Research Seminar in Political Sociology, SOS21 Research Seminar on Cities and Space (n/a 15/16), and SO401 Social Research Methods

**Transferable skills courses**

**Optional (not examined)**

- MY591 Computing Packages for Qualitative Analysis
- MY592 Workshop in Information Literacy: finding, managing and organising published research and data

#### Year Two

**Training courses**

**Optional (not examined)**

- SOS01 Research Students Seminar (this course is strongly recommended)

### Progression and upgrade requirements

In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

By the end of year 2, students are expected to have completed their fieldwork, and to be ready to submit three draft chapters for upgrade. All full-time research students are expected to have made the transition from the MPhil to PhD (upgrading) within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD by the end of their third year, and to submit their thesis within six years.

The decision to upgrade from MPhil to PhD is taken by a panel consisting of two academics from the Department or the School, with the supervisor(s) in attendance and available to be consulted by the panel. For upgrade, students submit three draft chapters of their thesis, plus thesis abstract and outline schedule for completion. This material is then assessed by viva voce and a written report is made by the panel.

Students should aim to have a complete first draft of their thesis in years three to four and allow three to six months for revision and submission.

### MPhil/PhD in Statistics

**Programme code:** RPST

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

#### Year One

**Training courses**

**Optional (not examined)**

- Courses offered by the London Graduate School in Mathematical Finance.
- Courses offered by the London Taught Course Centre.

**Optional (examined)**

- Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

**Transferable skills courses**

**Compulsory (not examined)**

- Annual Research Presentation Event.

**Optional (not examined)**

- Departmental Seminar Series.
- Joint Econometrics and Statistics Workshops with the Department of Economics.
- Risk and Stochastics Seminar/Workshop.
- London Graduate School in Mathematical Finance Seminar Day.
- Poster Presentations.
- The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

**Optional (examined)**

- Courses provided by the Methodology Institute.
Year Two
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

Transferable skills courses
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):
Courses provided by the Methodology Institute.

Year Three
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

Transferable skills courses
Compulsory (not examined)
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):
Courses provided by the Methodology Institute.

Progression and upgrade requirements
Formal assessment is made towards the end of each Summer Term. This assessment is based on statements made by the student and the supervisors in the progress report form. Students are also required to complete a supplementary report of 1-2 pages (A4), providing in more detail an outline of their current research. The review to upgrade to the PhD normally takes place within two years of full time registration. Progress is assessed by the first and/or second supervisor in consultation with the PhD programme director and another expert in the field of the research undertaken by the student. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status. The department's research committee also monitors the progress of PhD students.

Teaching opportunities
The department employs Graduate Teaching Assistants (GTAs) to teach a number of its undergraduate and postgraduate courses. In particular ST102, Elementary Statistical theory, and ST107, Quantitative Methods, are taught to a large number of students across the School and require a significant number of classes. Research students are encouraged to undertake some teaching from year two onwards. First year MPhil/PhD students are normally not permitted to teach, although some marking may be available during the year or for the external degree at the end of the year. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue this.
Research Course Guides
AC500
Accounting, Organisations and Society
This information is for the 2015/16 session.
Teacher responsible: Dr Andrea Menningen OLD 3.12, Prof Peter Miller OLD 3.27 and Prof Michael Power KSW 3.12.
Availability: This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit. In addition CARR staff and students on other programmes may be eligible to take this, with the permission of the Course Director.
Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
There will be a reading week in week 6 of both MT and LT.
Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings. Students are advised to read the following: Hopwood and Miller (Eds.), Accounting as Social and Institutional Practice, Cambridge, 1994.
Assessment: Assessment will be based on written work as agreed with the Course Director.

AC502
Foundations of Accounting, Organizations and Institutions
This information is for the 2015/16 session.
Teacher responsible: Dr Matthew Hall OLD 2.11A.
Availability: This course is compulsory on the MPhil/PhD in Accounting (Track 1). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is also offered for students from other MPhil/PhD programmes, with the approval and written permission of the PhD in Accounting Programme Director.
Course content: The object of the course is to provide students with an advanced understanding of the changing role and position of accounting practices in organisations, both public and private, and societies more generally. Students will be exposed to advanced thinking about how accounting practices are much more than a collection of routine techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents will be addressed.
The course emphasises the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each lecture will provide the necessary technical foundations.
Indicative topics include: Foundations of Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of “Entity”; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Performance, Accountability Incentives; Accounting for Sustainability; Organisational Failure as a Process.
Teaching: 10, 3-hour seminars in weeks 1-10 of MT and a 2-hour essay workshop in week 11 of MT.
Formative coursework: Students will be required to produce two pieces of written work. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentations and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.
Assessment: Essay (100%, 6000 words) in the ST.
MPhil/PhD in Accounting students must pass the course examination, normally with high Merit (at least 65%) or Distinction marks, to proceed to the next year of the programme.

AC501
Empirical Financial Accounting and Capital Markets
This information is for the 2015/16 session.
Teacher responsible: Prof Peter Pope OLD 5.04 and Prof Bjorn Jorgensen OLD 2.17.
Availability: This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.
Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.
Assessment: Second year MPhil/PhD students in Accounting (Track 2) are formally assessed by a take-home exam in the Summer Term. First year MPhil/PhD students in Accounting (Track 2) will not normally be formally assessed but they will receive feedback in the form of formative assessments. In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC550
Quantitative Methods in Accounting and Finance
This information is for the 2015/16 session.
Teacher responsible: Dr Stefano Cascinco OLD 3.32, Dr Pascal Frantz OLD 3.07 and Prof Ane Miren Tamayo OLD 5.05.
Availability: This course is available on the MSc in Accounting and Finance, MSc in Law and Accounting and MSc in Management and Regulation of Risk. This course is not available as an outside option.
Course content: The objective of the course is to provide students with the necessary background required for core accounting and finance courses. The course is organised in three sections:
Section 1 - “Accounting: Disclosure Principles and Practice” provides an overview of fundamental accounting concepts, practices and the main financial statements. This section emphasises users’ perspective rather than preparers’ perspective on financial reporting
(eg, for valuation purposes).
Section 2 - “Game Theory: Application to Capital Markets” introduces the game theoretical tools required to analyse issues in accounting and finance in settings in which economic agents interact strategically.
Section 3 - “Finance: Quantitative Methods” provides the basic quantitative tools needed for technical MSc courses. This section consists of an introduction to Basic Calculus, Probability and Statistics.

Teaching: Teaching takes place over a 9-day period before the start of MT.

Indicative reading: A detailed reading list will be provided at the beginning of the course.

Assessment: This course is not assessed. However, students will be given a number of application exercises to complete on their own or in groups.

AN500 Seminar on Anthropological Research

This information is for the 2015/16 session.
Teacher responsible: Dr Nicholas Long OLD 6.14, Dr Fenella Cannell OLD 6.07 and Prof Deborah James OLD 6.06
Availability: This course is compulsory on the MPhil/PhD in Anthropology and MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: Seminar on Anthropological Research

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.
Assessment: This course is not assessed.

AN501 Field Research Seminar (Anthropology)

This information is for the 2015/16 session.
Teacher responsible: Dr Michael W. Scott, OLD 6.16
Availability: This course is compulsory on the MPhil/PhD in Anthropology. This course is not available as an outside option. This seminar is for MPhil/PhD students preparing their detailed research proposal prior to embarking on fieldwork and other forms of empirical research.

Course content: The course aims to give you a thorough understanding of what is involved in carrying out ethnographic fieldwork, and what kinds of knowledge it can and cannot generate. It focuses both on the classic fieldwork methods used by anthropologists in the first half of the 20th century, and on more recent methodological developments and techniques that correspond to transformations in the nature of the social. It also engages you with the realities of turning research ideas into realistic plans, in the context of your chosen area of fieldwork. The first half of the course deals with general ethnographic methods. These include participant observation; field notes and the organization of data; visual methods; ethics and anthropological 'codes of ethics'; interviews; written ethnography, ethnographic knowledge, and problems of representation; critical approaches to existing ethnographic texts; place, multi-sited ethnography, the local and the global; research into family, kinship and the genealogical method; archives and how to use documentary material; fieldwork methodology and the research proposal. In the second half of the course, students present drafts of their projects and think through associated methodological and ethical issues.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students are required to prepare seminar presentations.

Assessment: Students’ progress is monitored throughout the course by the teachers responsible. The work undertaken for this course is expected to feed directly into the preparation of the Research Proposal (AN443). The formal examination of the Proposal constitutes the assessment of the course.

AN503 Thesis Writing Seminar

This information is for the 2015/16 session.
Teacher responsible: Dr Michael Scott OLD 6.16, Dr Laura Bear OLD 6.09 and Prof David Graeber OLD 6.10
Availability: This course is available on the MPhil/PhD in Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year MPhil/PhD post-fieldwork students.

Course content: Students present draft dissertation chapters in their cohort.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.
Assessment: This course is not assessed.

AN505 Advanced Professional Development in Anthropology

This information is for the 2015/16 session.
Teacher responsible: Prof Charles Stafford OLD6.02
Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course has two main aims. First, it examines key theoretical concepts and approaches in Anthropology at an advanced level that may be relevant to post-fieldwork doctoral candidates. It may focus on widely ranging thematic areas, e.g. recent developments in cognitive anthropology and/ or in material culture studies and/or in anthropological studies of ontology. The aim is to enhance the ability of students to engage with such debates at an advanced level. Second, the course aims to enhance the professional development of doctoral students by providing them with advanced training in writing and presentation skills, and more generally in relation to skills relevant to their career progression.

Teaching: 14 hours of seminars in the MT. 14 hours of seminars in the LT. 12 hours of seminars in the ST.

Assessment: Other (100%) in the MT, LT and ST.
AN507
Theoretical Issues in Anthropology: Precepts and Practice II
This information is for the 2015/16 session.
Teacher responsible: Dr Johannes Steinmüller OLD 5.06A, Dr Mukulika Banerjee OLD 5.09 and Dr Catherine Allerton OLD 6.13
Availability: This course is available on the MPhil/PhD in Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year MPhil/PhD post-fieldwork students.
Course content: The course examines key theoretical concepts and approaches in anthropology. It focuses on a number of areas, including post-structuralist and post-modernist theory; theories of the person and the body; theories of gender; theories of social change; theories of distribution and consumption; theories of religion and ritual; and such theoretical issues as are determined from time to time to be relevant to the course participants.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 10 hours of seminars in the ST. Fortnightly seminars in each of the MT, LT and ST.
Assessment: This course is not assessed.

AN900 Not available in 2015/16
A Programme of Ethnographic Films
This information is for the 2015/16 session.
Teacher responsible: To be announced.
Availability: Open to all
Course content: There will usually be 10 films in each of the MT and LT. Titles will be announced at the beginning of each term.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
Assessment: This course is not assessed.

DV500
Research Seminar in Development Studies
This information is for the 2015/16 session.
Teacher responsible: Dr Diana Weinhold CON7.10 and Prof David Keen CON7.13
Availability: This course is compulsory on the MRes/PhD in Development Studies and MRes/PhD in International Development. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This seminar is designed as a forum for discussing theoretical and methodological issues in Development Studies research. Modules are organized around broad methodological issues (e.g. research design, case studies, causal inference) and presentations of research, with the former featuring heavily in the MT and the latter in the LT and ST. Research presentations at the seminar are made by DESTIN research students and also by staff, with some invited speakers from outside. All research students are expected to attend the seminar while in residence in London. First year students are required to present a draft of their research proposal to the seminar during the LT or ST. Continuing students are invited to make presentations based on a report of their research, draft chapters or even their final draft of the dissertation. In making their presentations students are asked to provide (a) background material about the particular issue at hand, (b) a clear statement of the research questions and/or hypotheses that are being addressed, and (c) discussion of the research methods to be employed. Students should inform their supervisor(s) of the date when they are scheduled to make a presentation.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.
Assessment: This course is not assessed.

DV501 Half Unit
Development History, Theory and Policy for Research Students
This information is for the 2015/16 session.
Teacher responsible: Prof David Keen
Availability: This course is compulsory on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences; contemporary economic and social theory and their bearing on the policy and practice of development. In more detail: concepts of ‘development’ and historical evolution of paradigms of development thinking and policy. Role of states and markets in development/underdevelopment. Colonial legacies and path dependencies. State resilience and fragility. Political economy of growth, poverty and freedom.
Teaching: 20 hours of lectures and 20 hours of seminars in the MT. Students will attend the Michaelmas Term lectures for DV400 and an associated weekly seminar for research students only.
Formative coursework: Students will be expected to produce 2 presentations in the MT.
Indicative coursework: The following are recommended basic readings for the course:
A. Sen, Development as Freedom (Anchor, 1999)
H.J. Chang, Kicking Away the Ladder: Development Strategy in Historical Perspective (Anthem, 2002)
P. Collier The Bottom Billion: Why the Poorest Countries Are Failing and What Can Be Done About It (Oxford, 2007)
S. Chari and S. Corbridge (eds.) The Development Reader (Routledge, 2008)
W. Easterly The White Man’s Burden: Why the West’s Efforts to Aid the Rest Have Done so Much Ill and So Little Good (Oxford, 2006)
M. Jerven, Poor Numbers: How we are misled about African development statistics and what to do about it (Cornell, 2013)
Assessment: Essay (100%, 5000 words) in January.

DV510 Half Unit
Research Design and Proposal in International Development
This information is for the 2015/16 session.
Teacher responsible: Dr Diana Weinhold CON710 and Prof David Keen
Availability: This course is compulsory on the MRes/PhD in International Development. This course is not assessed.
Course content: Students will work with their academic supervisors to structure a doctoral research proposal that has the potential to make a significant contribution to knowledge and that reflects a sophisticated mastery of advanced theoretical and methodological tools from one or more academic disciplines related to international development. They will learn how to identify good research questions that are embedded in the current academic literature, and how to apply recognisable, defensible and academically sophisticated methodologies to address those questions. The doctoral research proposal itself will identify a key...
research question(s) for investigation, a justification well embedded in existing academic literature for why the topic is theoretically and empirically important, and a well-developed theoretical and methodological framework for researching the question(s).

**Teaching:** Students will meet their supervisors three times a term during their first year of study in accordance with the LSE's regulations for Research Degrees. Their proposals will be developed over the course of these meetings.

**Formative coursework:** Students will be expected to produce 3 pieces of coursework in the MT, LT and ST. Students will submit drafts of their proposal to their supervisors and receive feedback.

**Indicative reading:** The reading list for each student will be determined by the research they propose undertaking.

**Assessment:** Other (100%) in the ST.

---

**DV518** Half Unit

**African Development**

This information is for the 2015/16 session.

**Teacher responsible:** Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Thandika Mkandawire CON 8.02

Head of Department, Doctoral Programme Directors, MSc Course Convener and PhD Supervisor

**Availability:** This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

**Course content:** The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification, reforms and state capacity.

Attention will also be paid to social policy with special focus on issues such as social social protection, cash transfers, Millennium Development Goals, horizontal inequality and conflict.

**Teaching:** 15 hours of lectures and 15 hours of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

**Indicative reading:** A detailed weekly reading list will be provided at the first course meeting. The following readings provide an introduction to the course:

- Paul Nugent, Africa Since Independence: A Comparative History, Palgrave Macmillan 2004;

**Assessment:** Essay (100%, 5000 words) in the ST.

1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor.

---

**DV520** Half Unit

**Complex Emergencies**

This information is for the 2015/16 session.

**Teacher responsible:** Prof David Keen CON 7.16 and Dr Diana Weinhold CON 7.10

Head of Department, Doctoral Programme Directors, MSc Course Convener and PhD Supervisor

**Availability:** This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option to students enrolled in the MRes/PhD in International Development only.

**Course content:** The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters.

**Teaching:** 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

**Indicative reading:** A detailed weekly reading list will be provided at the first course meeting. The following texts of interest include David Keen, Useful Enemies: When Waging Wars is More Important than Winning Them (Yale University Press, 2012); Statthi Kalysvas, The Logic of Violence in Civil War (Cambridge University Press, 2006); David Keen, Conflict and Collaboration in Sierra Leone (James Currey, 2005); David Keen, Endless War? Hidden Functions of the ‘War on Terror’ (Pluto, 2006); Michael Mann, The Dark Side of Democracy: Explaining Ethnic Cleansing (Cambridge University Press, 2005); Amartya Sen, Poverty and Famine (Oxford University Press, 1981); Frances Steward and Valpy FitzGerald (eds.), War and Underdevelopment, Volumes 1 and 2 (Oxford University Press, 2001); and Jeremy Weinstein, Inside Violence: The Politics of Insurgent Violence (Cambridge University Press, 2007); Tim Allen, Trial Justice: The International Criminal Court and the Lord’s Resistance Army (Zed Press, 2006), Chris Dolan, Social Torture: The Case of Northern Uganda, 1986-
Dv528 Half Unit
Managing Humanitarianism

This information is for the 2015/16 session.

Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Dr Darron Gordon CON 8.10
Head of Department, Doctoral Programme Directors, MSc Course Convener and PhD Supervisor

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, medics, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention. How does humanitarianism relate to ideas about human rights and justice, or the politics of securitisation? Why do humanitarian organisations and governments respond to some crises and not to others? It also considers the critique of humanitarian assistance and the ways in which the UN and NGO communities have responded and sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Assessment: Essay (100%, 5000 words) in the LT.
1 x 5000 word research paper to be submitted on the first Friday of the Lent Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor.
DVS90  Half Unit
Economic Development Policy I

This information is for the 2015/16 session.

Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Danny Quah
Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course focuses on analytically and empirically rigorous analyses of economic policies for macroeconomic growth in developing countries. We review current theoretical debates and consider how the use of empirical evidence can help to inform our analyses. In particular, increasing data availability has meant that the effectiveness of development policies, in terms of improving welfare, reducing poverty and promoting growth, can now be assessed using a variety of quantitative techniques. By looking at these approaches can be applied to a range of development issues, the course will provide an overview of new thinking on the design of public policy in developing countries. While a strong mathematical or statistical background is not necessary to follow the course, students will be expected to actively learn and engage with regression analysis and other econometric techniques. These skills are developed through the term with mandatory weekly problem sets and occasional in-class quizzes supplementing the lectures and readings. The course consists of one lecture on the interpretation of empirical regression analysis and the role of qualitative methods in policy evaluation, and a further 9 two-hour lectures on theory and policy issues of relevance to developing countries. Topics themselves may vary from year to year but may include determinants of growth; human capital accumulation; globalisation and the political economy of trade policy; the global evolution of income distribution, structural adjustment, and financial crises; economic geography of development; aid; debt relief, and environment and growth. Seminars consist of student-led participatory in-depth analyses of best-practice theory and quantitative empirical research papers which students assess.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

ISBN 9781842779590

Assessment: Essay (100%, 5000 words) in the ST.

1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor

DV545  Half Unit
Research Themes in International Development

This information is for the 2015/16 session.

Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Tim Allen CON 7.12
Head of Department, Doctoral Programme Directors, MSc Course Convenors and student's PhD Supervisor

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled on the MRes/PhD in International Development only.

Course content: The course will be structured around large research topics associated with the work of the International Development department such as Complex Emergencies, Control of Tropical Diseases, Assessments of Global Poverty, Dilemmas of Development in Africa, Governance from Below in Bolivia, and Control of Property Rights. The course consists of one lecture on the interpretation of regression analysis and other econometric techniques. These skills are developed through the term with mandatory weekly problem sets and occasional in-class quizzes supplementing the lectures and readings. The course consists of one lecture on the interpretation of empirical regression analysis and the role of quantitative methods in policy evaluation, and a further 9 two-hour lectures on theory and policy issues of relevance to developing countries. Topics themselves may vary from year to year but may include determinants of growth; human capital accumulation; globalisation and the political economy of trade policy; the global evolution of income distribution, structural adjustment, and financial crises; economic geography of development; aid; debt relief, and environment and growth. Seminars consist of student-led participatory in-depth analyses of best-practice theory and quantitative empirical research papers which students assess.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

ISBN 9781842779590

Assessment: Essay (100%, 5000 words) in the ST.

of the Summer Term. The research paper will be co-marked by the course convenor and the student’s PhD supervisor.

**DV591 Half Unit**

**Economic Development Policy II**

This information is for the 2015/16 session.

**Teacher responsible:** Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Danny Quah  
Head of Department, Doctoral Programme Directors, MSc Course Convener and PhD Supervisor  
**Availability:** This course is available on the MRes/PhD in International Development. This course is not available as an outside option.  
This course is available as an option for students enrolled in the MRes/PhD in International Development only.  
**Course content:** This course focuses on analytically and empirically rigorous analyses of microeconomic economic policies in developing countries. We review current theoretical debates and consider how the use of empirical evidence can help to inform our analyses. In particular, increasing data availability has meant that the effectiveness of development policies, in terms of improving welfare, reducing poverty and promoting growth, can now be analysed using a variety of quantitative techniques. By looking at how these approaches can be applied to a range of development issues, the course will provide an overview of new thinking on the design of public policy in developing countries. Students without a strong background in statistics and economics should take DV590 as a prerequisite as students will be expected to actively engage with regression analysis and other econometric techniques. These skills are further developed through the term with mandatory weekly problem sets and occasional in-class quizzes supplementing the lectures and readings. The course consists of 10 2-hour lectures on microeconomic theory and policy issues of relevance to developing countries. Topics themselves may vary from year to year but may include health and education intra-household resource allocation; credit markets; social networks; and behavioural economics applied to the design of development policies. Seminars consist of student-led participatory in-depth analyses of best-practice theory and quantitative empirical research papers which students assess and critique.  
**Teaching:** 20 hours of lectures and 15 hours of seminars in the LT.  
**Formative coursework:** Students will be expected to produce 1 piece of coursework in the LT.  
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval  
**Indicative reading:** Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, Development Economics (1998) which will serve as the course text, W Easterly, The Quest for Growth;  
**Assessment:** Essay (100%, 5000 words) in the ST.  
1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student’s PhD supervisor.

**EC518**

**Topics in Advanced Econometrics for Research Students**

This information is for the 2015/16 session.  
**Teacher responsible:** Prof Francisco Hidalgo 32L.4.20 Dr Koen Jochmans  
**Availability:** This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.  
**Course content:** See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research.  
**Teaching:** 20 hours of lectures and 10 hours of lectures in the MT.  
20 hours of lectures and 10 hours of lectures in the LT.  
Students are required to attend (i) EC485 Topics in Advanced Econometrics (40 hours), and (ii) EC518 lectures (20 hours).  
**Indicative reading:** See reading list for EC485. Additional readings will be recommended at the start of the course.  
**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.

**EC532**

**International Economics for Research Students**

This information is for the 2015/16 session.  
**Teacher responsible:** Dr Gianluca Benigno 32L.1.12, Dr Swati Dhingra 32L.2.31, Dr Keyu Jin 32L.1.17 and Dr Thomas Sampson 32L.2.34  
**Availability:** This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.  
**Course content:** This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. One term covers international trade and the other term covers international macroeconomics. The course is based around research papers. Topics covered vary from year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade, theories of heterogeneous firms and trade, theories of incomplete contracts and trade, and the political economy of trade policy. A list of representative topics in international macroeconomics includes international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).  
**Teaching:** 30 hours of lectures in the MT. 30 hours of lectures in the LT.  
**Indicative reading:** Readings will be from journal articles; a list will be supplied at the start of term.  
**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.
EC533
Labour Economics for Research Students
This information is for the 2015/16 session.
Teacher responsible: Dr Esteban Aucejo 32L.2.29, Dr Guy Michaels 32L.2.10, Prof Jorn Pischke 32L.2.16 and Dr Yona Rubinstein

Availability: This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for carrying out independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, and discuss the advantages and limitations of existing empirical work and assess policy options.

Topics include:
• Labour supply, household behaviour, and the allocation of time
• Labour demand and monopsony
• Search, matching, labour market frictions, unions, and unemployment
• Wage determination, compensating differentials, race and gender gaps, and wage inequality
• Human capital, returns to schooling, and training
• Contracts and incentives in the labour market

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: One piece of work per term will be required and feedback given by teachers.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC534
Public Economics for Research Students
This information is for the 2015/16 session.
Teacher responsible: Prof Henrik Kleven 32L.3.16, Dr Camille Landais 32L.3.23 and Dr Johannes Spinnewijn 32L.3.24

Availability: This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year, but the following general areas would typically be included:
• Behavioural responses to taxes and transfers
• Optimal taxation
• Dynamic taxation
• Behavioural public economics
• Social insurance
• Federalism
• Privatization and regulation
• Voting
• The role of communication in politics
• Special-interest politics
• Political institutions
• Political accountability

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: One piece of work per term will be required and feedback given by teachers.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of the Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.) and of T Persson and G. Tabellini, Political Economy, MIT Press, 2002.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC535
Development Economics for Research Students
This information is for the 2015/16 session.
Teacher responsible: Dr Gharad Bryan 32L.3.10, Prof Robin Burgess 32L.3.03, Dr Gregory Fischer 32L.3.09, Prof Maitreesh Ghatak 32L.3.08A and Prof Gerard Padro-i-Miquel 32L.3.17

Availability: This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: One piece of work per term will be required and feedback will be given by teachers.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC536
Economics of Industry for Research Students
This information is for the 2015/16 session.
Teacher responsible: Prof Alessandro Gavazza 32L.4.21, Dr Matthew Gentry 32L.4.28, Prof Martin Pesendorfer 32L.4.19 and Dr Pasquale Schiraldi 32L.4.22

Availability: This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: One piece of work per term will be required and feedback given by teachers.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Other (100%) in the MT and LT.

8 take home problem sets (two for each part - four in MT and four in LT). Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.
EC537
Microeconomic Theory for Research Students
This information is for the 2015/16 session.
Teacher responsible: Dr Andrew Ells 32L.3.15, Dr Matthew Levy 32L.3.21 and Prof Balazs Szentes 32L.4.05
Availability: This course is available on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.
Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).
Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory. Topics will include:
• Classic static and dynamic game theory
• Contract theory
• Bounded rationality
• Psychology and economics.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and assessed by teachers.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC599
Research Paper in Economics
This information is for the 2015/16 session.
Teacher responsible: Prof Martin Pesendorfer 32L.4.19
Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.
Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted mid-way through the summer term.
Assessment: Dissertation (100%, 10000 words) in the ST.

EH510
Seminar on Modern Economic History
This information is for the 2015/16 session.
Teacher responsible: Dr Olivier Accominotti SAR 514 and Prof Martin Pesendorfer
Availability: This course is available on the MRes/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development during the modern period.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 10 hours of seminars in the ST.

EC540
Political Economy
This information is for the 2015/16 session.
Teacher responsible: Prof Torun Dewan CON 6.07, Dr Ethan Ilzetzki 32L.1.10, Prof Gilat Levy 32L.4.31 and Prof Torsten Persson
Availability: This course is available on the MRes in Economics (Track 1), MRes in Economics (Track 2) and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.
Course content: The course will provide students with the economic methodology and tools for the analysis of political decision making and its effect on public policy. We will consider how political institutions shape economic policy, e.g., how do institutions such as election, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider how in the absence of institutions, political attitudes, beliefs and norms shape policies. The course will focus on analytical models and their testable implications.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: Students will discuss papers in lectures and will be given the opportunity to solve problem sets.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC599
Research Paper in Economics
This information is for the 2015/16 session.
Teacher responsible: Prof Martin Pesendorfer 32L.4.19
Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.
Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted mid-way through the summer term.
Assessment: Dissertation (100%, 10000 words) in the ST.
History. This course is available as an outside option to students on other programmes where regulations permit.

For research students. Also open to other EH graduate students and attended by LSE and other faculty.

Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development. Presentations in this seminar relate particularly to economic development issues beyond the N American-European area, including aspects of global economic history.

Teaching: 10 hours of lectures in the MT. 10 hours of lectures in the LT. 10 hours of lectures and 3 hours of seminars in the ST.

---

**EH520**

**Approaches to Economic and Social History**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Mary Morgan SAR 609 and Prof Juan Roses Vendoiro SAR 515

**Availability:** This course is compulsory on the MPhil/PhD in Economic History. This course is not available as an outside option. This course is restricted to 1st year MPhil students in the Department of Economic History, for whom attendance is compulsory.

**Course content:** Approaches to Economic and Social History

**Teaching:** 10 hours of seminars in the MT. 10 hours of seminars in the LT.

**Indicative reading:** TBC

**Assessment:** Assessment is by two pieces of written work, each approximately 1,500 words, on nominated topics to be submitted by the end of the Lent Term.

---

**EH590**

**Thesis Workshop in Economic History**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Juan Roses Vendoiro SAR 515

**Availability:** This course is compulsory on the MPhil/PhD in Economic History. This course is not available as an outside option.

**Course content:** Thesis workshop in Economic History

**Teaching:** 15 hours of seminars and 20 hours of seminars in the MT. 15 hours of seminars and 20 hours of seminars in the LT. 15 hours of seminars and 20 hours of seminars in the ST.

**Assessment:** This course is not examined.

---

**EU554**

**Not available in 2015/16**

**Research Methods and Design in European Studies**

This information is for the 2015/16 session.

**Availability:** This course is compulsory on the MPhil/PhD in European Studies. This course is not available as an outside option.

**Course content:** The course provides training in methods and research design tailored to European studies. Students are encouraged to discuss the distinctive problems of their own research in the light of the methodological and design issues raised. The last section of the course is taken up with student presentations and the development of research proposals in the run up to the first year assessment process in May/June.

**Teaching:** Weekly one and-a-half hour seminars during the MT and LT.

**Assessment:** There is no assessment on this course.

---

**EU555**

**Political Economy and Public Policy Workshop**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Mark Thatcher CON 4.17, Dr Mareike Kleine COW 1.01 and Dr Sandy Hager CLM 4.10

**Availability:** This course is available on the MPhil/PhD in European Studies, MPhil/PhD in Government (Joint) and MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This workshop is jointly organised by the European Institute, the Government Department and the International Relations Department for research students of these departments working in the general area of political economy and public policy and who have usually passed their first year. Research students from other departments wishing to attend should contact the teachers responsible. It should be noted that the course has three codes-EU555, GV555 and IR555.

**Course content:** Presentation and intense discussion of thesis chapters and related work. A detailed syllabus is fixed at the start of the year. Seminar presentations by outside speakers may be added.

**Teaching:** Ten one and-a-half hour fortnightly meetings in MT and LT, commencing in week 1 of MT. A mini-conference in the ST, organised by the students themselves.

**Assessment:** There is no examination for this course. Regular attendance and active participation by all students is required. Each attending student has to give at least one presentation.

---

**FM502**

**Corporate Finance for Research Students**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Daniel Paravisini Maggi, Dr Mike Burkart

**Availability:** This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Doctoral students in the Departments of Finance and Economics, and other students with the permission of the PhD Finance Programme Director

**Course content:** The first half of this course focuses on the theory
of corporate finance. The theory half of the course can, in turn, be subdivided into two parts. The first part reviews some of the classical concepts in corporate finance, using tools from game and contract theory to study incentive and information problems at the level of the firm, examining how financial contracts can be designed to mitigate these problems. This part of the course also considers how takeovers and ownership concentration can help to mitigate conflict of interests among insiders and investors in firms. The second part focuses on the theory of financial intermediation. This component reviews the classical theories for the existence of financial intermediaries, focusing on the key inter-linkage between financial intermediation and financial fragility. This component of the course also examines the role of financial intermediaries in engendering financial market imperfections. The second half of the course will consider empirical methods in corporate finance and its applications to capital structure, investments, financial distress, corporate governance, and financial intermediation.

**Teaching:** 30 hours of lectures in the MT. 30 hours of lectures in the LT.

**Assessment:** Exam (75%), duration: 3 hours) in the main exam period.

Project (25%) in the LT.

**FM503**

**Asset Pricing for Research Students**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Georgy Chabakauri and Prof Ian Martin

**Dr Dong Lou**

**Availability:** This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

**Course content:** The course is divided into two parts relating to asset pricing theory empirical asset pricing. The asset pricing theory half of the course will cover static models of frictionless markets, dynamic discrete-time models, dynamic continuous-time models, and models with frictions. The second half of the course is dedicated to empirical evaluation of asset-pricing models. Representative agent models (with power, habit and recursive preferences) and their application to valuation of equities are covered. Next, no-arbitrage term-structure and option-pricing models are discussed. The class concludes with both equilibrium and reduced-form models of currencies.

**Teaching:** 30 hours of lectures in the MT. 30 hours of lectures in the LT.

**Indicative reading:**

- Darrell Duffie Asset Pricing Theory, Princeton University Press

**Assessment:** Exam (90%), duration: 3 hours) in the main exam period.

Project (10%) in the LT.

**FM505**

**PhD Seminar in Finance**

This information is for the 2015/16 session.

**Availability:** This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.

**Course content:** This is a seminar course for PhD students in the early stages of their research to present their work in progress. Outside speakers may also be invited from time to time.

**Teaching:** 10 hours of seminars in the MT. 10 hours of seminars in the LT.

Other meetings to be arranged as necessary.

**Assessment:** Essay (100%, 10000 words) in the LT.

A 10,000 word essay on a topic to be agreed with the student’s supervisor. This essay is to be submitted by the end of the LT of the second year of registration for Route 1 students, and the LT of the second year of registration for Route 2 students.

**GI500**

**Doctoral Workshop: Gender Institute**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Ania Plomien, COL 5.01J

**Availability:** This course is compulsory on the MPhil/PhD in Gender Studies. This course is not available as an outside option.

**Course content:** The aim of this course is to give students experience and practice in presenting chapters or papers related to their current research for critical discussion. The focus of the seminar is on the research process and students are expected to present at least once per year. Some summer term sessions may be used for professional training, such as CV preparation, conference paper preparation, publishing and teaching organisation.

**Teaching:** 15 one-and-a-half hour seminars held fortnightly in the MT, LT and ST. First year students must also audit GI425 Gender Theories in the Modern World (lectures only) and GI402 Gender, Knowledge and Research Practice (full course). All students are expected to participate in courses run by the Department of Methodology or the Gender Institute as advised by their supervisors. Students are also expected to participate in research seminars and public lectures.

**Indicative reading:** PhD chapters and articles suggested by students relevant to their topic.

**Assessment:** First year students will be formally reviewed towards the end of their first year, normally in weeks 4-6 of the ST, by means of submission of written work and a viva. Students are required to submit a draft chapter of 8,000 to 10,000 words (e.g. literature review, theoretical approach, substantive analysis of research themes); a research design outline of 4-5 pages detailing the rationale for the research, the research question and objectives, and the methodological and/or theoretical issues relevant to the research; a chapter outline of the thesis of 2 pages indicating the chapters’ contents; and a timeline for completion of the PhD programme. The work submitted is read and assessed by the main and advisory supervisors, and usually a doctoral convenor. The candidate is evaluated in a viva context. This assessment has to be passed before progress to the second year and upgrade from MPhil to PhD is permitted. If a student is not upgraded he/she is entitled to resubmit work and be re-examined under the same principles governing the first attempt within a further six months for a final decision. Students are reviewed on an annual basis until the thesis is complete. Arrangements for part-time students are made on a pro-rata basis.
GV501
Doctoral Workshop: Political Theory
This information is for the 2015/16 session.
Teacher responsible: Dr Laura Valentinii, Dr Leigh Jenco and Dr Lea Ypi
Availability: Compulsory for second and subsequent year PhD students in the Government Department specialising in political theory. First year students (i.e., MRes/PhD students in political theory) are encouraged to attend.
Course content: An opportunity for students to present chapters or papers related to their current research for critical discussion.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 6 hours of seminars in the ST.
There are typically 5 sessions in MT and 5 sessions in LT, and a variable number of sessions in ST. The precise schedule will be made available at the start of each term.

Indicative reading: This changes each year, depending on the theme chosen.

GV503
Political Philosophy Research Seminar
This information is for the 2015/16 session.
Teacher responsible: Dr Laura Valentinii, Dr Leigh Jenco and Dr Lea Ypi
Availability: Compulsory for second and subsequent year PhD students in the Government Department specialising in political theory. First year students (i.e., MRes/PhD students in political theory) are encouraged to attend. Other interested students are welcome to attend, if numbers permit.
Course content: Guest speakers present papers and initiate discussion at seminars.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 6 hours of seminars in the ST.
Assessment: No assessment

GV510  Not available in 2015/16
Ethnicity and Nationalism Research Workshop
This information is for the 2015/16 session.
Teacher responsible: Dr Douglas Hutchinson and Prof John Breuilly
Availability: This course is available on the MPhil/PhD in Government, MRes Political Science and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
For MRes/PhD students specialising in Ethnicity and Nationalism, who have attended an LSE Undergraduate or Master's course in this or a related field, or equivalent at another University. By permission, Visiting Students and others may also participate.
Course content: Critical analysis of recent theories and research in the fields of Ethnicity and Nationalism.
Teaching: 8 hours of workshops in the MT. 20 hours of workshops in the LT.
Students may also attend the lectures in GV479 Nationalism and participate (subject to space) in the seminars in this course.
Formative coursework: There is no formative assessment. This is a reading course.
Indicative reading: This changes each year, depending on the theme chosen.
Assessment: There is no examination for this course.

GV513  Not available in 2015/16
Qualitative Methods in the Study of Politics
This information is for the 2015/16 session.
Teacher responsible: Dr Steffen Hertog CON4.01
Availability: This course is available on the MRes Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Other PhD students must request permission from the class teacher, which is routinely granted subject to capacity.
Course content: This course introduces and critically evaluates, at the advanced postgraduate level, a key range of qualitative techniques and methods in political science. It aims to build students’ capability to evaluate such methods and to select, reject, and deploy them in research design and practice.
The course begins with debates over the place of qualitative methods in political science, and the question of how to match ideas to methods. The rest of the course is devoted to exploring a range of qualitative techniques, including case selection, case studies and process tracing, comparisons, interviews and field research, qualitative comparative analysis, and “mixed methods”. The content of each week will be integrated as closely as possible with participants’ own research projects (even if qualitative work constitutes only a small part thereof). The course is relevant for political scientists, but also students of development and international relations.
Teaching: 20 hours of seminars in the LT.
Formative coursework: Critiques of articles or books that use the various methodologies discussed in the course.
Assessment: Essay (30%, 1500 words) in the LT.
Project (70%, 2500 words) in the ST.
EITHER (1a) A thorough critique of an article which uses one of the methods discussed in the course (1500 words) OR (1b) A short project using one of the methods discussed in the course, focused on how to analyse and present qualitative findings (e.g. a short content analysis, a set of interviews around a particular topic, etc) (1500 words) AND FOR ALL STUDENTS (2) A complete “mock” research design, preferably (although not necessarily) on their own research question (2500 words).

GV514
Political Science and Political Economy
Doctoral Workshop
This information is for the 2015/16 session.
Teacher responsible: Dr Stephane Wolton CON 5.08
Availability: This course is compulsory on the MPhil/PhD in Government and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit. Mainly for second and subsequent year research students and staff in Government and elsewhere in the School involved in research in political science and/or political economy. First year MRes and research students may also attend if they wish.
Course content: The PSPE Doctoral Workshop/Work in Progress Seminar is intended as a setting in which Research Students from the Government Department present and receive feedback on early stage and ongoing research projects. In weeks when research students do not present, LSE PhD students, LSE staff, and visiting scholars from other departments will present. The Seminar aims to foster a strong and lively research community and as such, welcome empirical or theoretical work linked in any way to politics or political economy.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 15 hours of seminars in the ST.
The workshop will meet every week.
Assessment: Not assessed.
GV515  Not available in 2015/16
Researching People, Politics and Organisations
This information is for the 2015/16 session.
Teacher responsible: Dr Michael Bruter CON406, Prof Edward Page CON3.05 and Prof Martin Lodge CON3.08
Availability: This course is available on the MPhil/PhD in Government and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Optional for second and subsequent year research students in Government and elsewhere in the School involved in researching political science topics. First year students may attend if numbers permit.
Course content: The workshop is for all PhD students doing empirical work in political science, whether quantitative, qualitative or mixed, and whatever theoretical approach they take. Around six of the twelve regular sessions are to be devoted to PhD student presentations and concentrate on setting the problems faced and choices made in approaching the empirical research. In the remaining four sessions we will arrange workshops involving outside speakers dealing with crosscutting issues for which we have experienced substantial demand including issues closely related to the empirical analysis of government such as interviewing techniques and the availability and use of international data banks as well as sessions of more general appeal including on how the UK and US job market works, the journal publishing process and presenting at academic conferences and job interviews. If numbers of students mean that we need more than 10 sessions, we will arrange extra late afternoon sessions, up to five throughout the year, to accommodate the crosscutting issues.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Indicative reading: Workshops will tailor reading to the research of the participants.

GV517  Half Unit
Comparative Political Economy: New Approaches and Issues in CPE
This information is for the 2015/16 session.
Teacher responsible: Prof David Soskice and Prof Catherine Boone
Availability: This course is open to all LSE research students who are interested in comparative political economy.
Pre-requisites: This course will be open to research students (PhD students) from any of the LSE departments.
Course content: This half-unit reading seminar will survey a set of major topics in the Comparative Political Economy (CPE) of advanced capitalist and developing countries. We will consider different analytic strategies for conceptualizing variation in national economic structure, explaining change in economic structure, and understanding the political causes and effects thereof. The seminar is designed for PhD students (research students) across the School wanting to familiarize themselves with some of the major themes, controversies, and research frontiers in CPE. Our goal is to nurture innovation in doctoral-level CPE research at the LSE. While situating our analyses in the context of a changing global economy, our focus will be on describing and explaining transformation at the level of nation states. Drivers of change can be found in the locus and organization of political power, in technological change, and/or in the dynamics of capital. Our seminar will explore both productive connections and tensions that emerge across these explanatory models.
Course materials are organized around three major topic areas (though like most else in CPE they are interrelated): redistribution, accumulation, and domestic regimes. A great many questions fit into these areas and our idea is that the seminars should enable students to raise issues related to their research.
Teaching: 30 hours of seminars in the LT.

Formative coursework: For formative work, feedback will be provided on a dissertation proposal or chapter.
Indicative reading: Ben Ansell, From the Ballot to the Blackboard: The Redistributive Political Economy of Education Reform, CUP 2014
Brynjolfsson & McAfee, The Second Machine Age, Norton 2014
Kimberly Morgan, “Path Shifting of the Welfare State: Electoral Competition and the Expansion of Work-Family Policies in Western Europe”, World Politics, Jan 2013
Harvey, D. The New Imperialism: Accumulation by Dispossession, Monthly Review, 2004
Assessment: Coursework (100%), 5000 words in the LT.
Each student will submit a 20-25 page (double spaced) research paper, dissertation proposal, or draft dissertation chapter as the basis of assessment for this course.

GV555
Political Economy and Public Policy Workshop
This information is for the 2015/16 session.
Teacher responsible: Dr Mareike Kleine COW 1.01
Professor Jeffrey Chwieroth
Availability: This course is available on the MPhil/PhD in European Studies, MPhil/PhD in International Relations, MPhil/PhD in Government, MRes Political Science and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
This workshop is jointly organised by the European Institute, the Government Department and the International Relations Department for research students of these departments working in the general area of political economy and public policy and who have usually passed their first year. Research students from other departments wishing to attend should contact the teachers responsible.
It should be noted that the course has three codes- EU555, GV555 and IR555.
Course content: Presentation and intense discussion of thesis outlines, chapters and related work. A detailed programme is fixed at the start of the year. Seminar presentations by outside speakers may be added.
Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.
Seminars are fortnightly and begin in week 1 of MT and LT.
There is also a mini-conference in the ST, organised by the students themselves.
Assessment: There is no examination for this course. Regular attendance and active participation by all students is required.
Each attending student has to give at least one presentation of their thesis research.
GV599
Research Prospectus in Political Science

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann CON.S.17

Availability: This course is compulsory on the MRes Political Science. This course is not available as an outside option.

For MRes/PhD students in Political Science only.

Course content: A research paper, not to exceed 10,000 words, related to the student's designated major field, to be submitted in early September.

Assessment: Research project (100%, 10,000 words) in September.

GV5X1
Research Design in Political Science

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann CON.S.17 and Dr Joachim Wehner

Availability: This course is compulsory on the MRes Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: PhD students taking this course will find the focus on developing a research design for their PhD thesis immensely useful. The importance of a solid understanding of the principles of social scientific research design to the development of the PhD project cannot be underestimated. Students will learn to develop their research questions, to choose a feasible data collection strategy, and how to match data collection and analytic methods to the aims of the PhD project. They will also reflect on methodological issues related to normative and formal-theoretical research questions.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 6 hours of seminars in the ST.

Weeks 6 and 17 are reading and feedback weeks.

Formative coursework: This is a PhD level Research Design course – we do not intend to have additional essays. Students will give presentations and receive extensive feedback on their work in progress. These are part of formative rather than summative assessment and are an important part of professional development. The main learning outcomes are to help the PhD students develop professional research designs.

Assessment: Essay (20%, 2500 words), essay (20%, 2500 words) and research project (60%) in the ST.

GV5X2
Research Paper in Comparative Politics

This information is for the 2015/16 session.

Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option.

For MRes/PhD students taking this course will find the focus on developing a research design for their PhD thesis immensely useful. The importance of a solid understanding of the principles of social scientific research design to the development of the PhD project cannot be underestimated. Students will learn to develop their research questions, to choose a feasible data collection strategy, and how to match data collection and analytic methods to the aims of the PhD project. They will also reflect on methodological issues related to normative and formal-theoretical research questions.

Teaching: Attend the lectures, seminars and reading week activities

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Friday week one of the subsequent term. i.e. modules taken in the Michaelmas Term submit on Friday week one of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X3
Research Paper in European Politics and Policy

This information is for the 2015/16 session.

Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option.

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Friday of the first week of the subsequent term. i.e. modules taken in the Michaelmas Term submit in the first week of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X4
Research Paper in Global Politics

This information is for the 2015/16 session.

Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option.

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Friday of the first week of the subsequent term. i.e. modules taken in the Michaelmas Term submit in the first week of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.
GV5X5
Research Paper in Political Science and Political Economy

This information is for the 2015/16 session.
Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Audit a GV-prefixed course from the MSc in Political Science and Political Economy and write a research paper on a topic agreed by the convenor of the MSc course and the student’s PhD supervisor. Students must obtain permission from the relevant MSc course convenor to audit the course concerned under this option. In some instances, students will be expected to complete the assessment method specified by the course convenor where a research paper is not appropriate.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on the Friday of the first week of the subsequent term. i.e. modules taken in the Michaelmas Term submit in the first week of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X6
Research Paper in Political Theory

This information is for the 2015/16 session.
Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Audit a GV-prefixed course from the MSc in Political Theory and write a research paper on a topic agreed by the convenor of the MSc course and the student’s PhD supervisor. Students must obtain permission from the relevant MSc course convenor to audit the course concerned under this option.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on the Friday of the first week of the subsequent term. i.e. modules taken in the Michaelmas Term submit in the first week of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X7
Research Paper in Public Policy and Administration

This information is for the 2015/16 session.
Teacher responsible: MRes/PhD Political Science Programme Manager

Availability: This course is available on the MRes Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Audit a GV-prefixed course from the MSc in Public Policy and Administration and write a research paper on a topic agreed by the convenor of the MSc course and the student’s PhD supervisor. Students must obtain permission from the relevant MSc course convenor to audit the course concerned under this option.

Teaching: Attend the lectures seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on the Friday of the first week of the subsequent term. i.e. modules taken in the Michaelmas Term submit in the first week of the Lent Term. Modules taken in the Lent Term submit in Summer Term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GY500
Research Project Seminar

This information is for the 2015/16 session.
Teacher responsible: Dr Olmo Silva S506A and Dr Carmen Marchiori KG51.04

Availability: This course is compulsory on the MPhil/PhD Human Geography and Urban Studies, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development and MPhil/PhD in Regional and Urban Planning Studies. This course is not available as an outside option.

Course content: Presentations by research students of aspects of their own research, stressing problems of theory, methodology and techniques.

Teaching: A series of workshops, running throughout the year, organised by each of the three research clusters in the Department of Geography & Environment (Economic Geography; Environmental Economics & Policy; Urban/Development).

Formative coursework: All students attending this course will be required to present their own research once each year.

Assessment: This course is not intended as preparation for any particular examination.

GY502
Staff / Research Students Seminars

This information is for the 2015/16 session.
Teacher responsible: Dr Olmo Silva S506A, Dr Simon Dietz TW3 11.01C and Dr Ryan Centner STC.412

Availability: This course is compulsory on the MPhil/PhD in Geography. This course is available on the MPhil/PhD in Regional and Urban Planning Studies. This course is available as an outside option to students on other programmes where regulations permit. For all MPhil/PhD students registered in the Department of Geography and Environment and staff. Other interested students may attend.

Course content: Topical seminar series involving presentations by speakers from both inside and outside the Department on aspects of their own research.

Teaching: There are three different seminar series taking place regularly throughout the year, organised by each of the three research clusters in the Department of Geography & Environment. The Economic Geography cluster seminar series is organized in conjunction with the Spatial Economics Research Centre (SERC), the Environmental Economics & Policy cluster seminar series is organized together with the Grantham Research Institute on Climate Change and the Environment, and the Urban/Development seminar series is organized with the Urban Research Centre. The timing and length of each seminar series vary across research clusters. Urban/ Development Cluster: 10 x one-and-a-half hour seminars in MT
HY501
International History Research Student Workshop

This information is for the 2015/16 session.
Teacher responsible: Dr Antony Best E405
Availability: This course is compulsory on the MPhil/PhD in International History. This course is not available as an outside option.
Course content: The workshop aims to introduce students to effective archival research, issues in the preparation of a thesis and means of launching a career in academic or related fields; and the opportunity to present research in progress.
Students yet to pass their upgrade from MPhil to PhD attend the Introductory Workshop, which meets weekly in the Michaelmas term. Meetings are devoted to research and interviewing techniques and mainly practical issues of historical research. Students due to be upgraded attend the Advanced Workshop held in the Lent and Summer terms, the frequency of meetings depending upon the number of participants. The meetings are intended primarily as a forum for reviewing research in progress, with a view to enabling students to pass their upgrade.
Teaching: 20 hours of seminars in the MT. 4 hours of seminars in the LT.
Indicative reading: TBC
Assessment: This course is not assessed.

HY509
International History Research Seminar

This information is for the 2015/16 session.
Teacher responsible: Dr Antony Best
Availability: This course is available on the MPhil/PhD in International History. This course is not available as an outside option.
Pre-requisites: Students need to have passed their upgrade to PhD.
Course content: Second, third and fourth year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.
Indicative reading: TBC
Assessment: This course is not assessed.

HY510
Cold War History Research Seminar

This information is for the 2015/16 session.
Teacher responsible: Dr Nicholas Ludlow SAR 2.16
Availability: This course is available on the MPhil/PhD in International History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Second and third year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.
Indicative reading: See the webpage for the course for further details.
Assessment: The course is not assessed.

IR501
Methods in International Relations Research

This information is for the 2015/16 session.
Teacher responsible: Dr Federica Bicchi CLM 4.13 and Dr Mathias Koenig-Archibugi CON 4.08
Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.
Course intended for first-year International Relations Department research students.
Course content: The main objective of this course is to familiarise students with the principal approaches to contemporary research in the main branches of International Relations and to help students identify the appropriate methodology for their project. The course is not a technical course on methods. Unless they have taken courses on methodology and methods in their prior studies, students are encouraged to attend appropriate courses at the Department of Methodology. The course will encourage awareness of the relationship between theory and method in the conduct of research. It will highlight trade-offs when choosing specific methods or research designs. Our aim is to train well-rounded academic professionals, who are able to comprehend, critically interrogate, and engage with scholarship employing diverse methodological toolkits. The course therefore aims to expose students to, and generate awareness of, a variety of research methods in the discipline irrespective of the particular approach employed in their doctoral work. The course will aim to promote an environment of mutual support and encouragement amongst first year research students, maximising the potential for cross fertilization between different projects. The course will develop students’ presentational skills in a group setting. In addition, sessions on professional development will be offered in the context of the course.
Teaching: 25 hours and 30 minutes of seminars in the MT. 19 hours and 30 minutes of seminars in the LT. 45 hours of seminars spread over MT and LT, beginning in Week 2 MT. In addition, professional development sessions will be offered.
Formative coursework: Students will be expected to prepare presentations on examples of published research, commenting on the methodology adopted and the way in which it is applied. Moreover, students are required to submit a short written piece describing and justifying the methodological choices for their PhD. The aim is to practice writing about methodological choices with a view to the chapter students are going to submit to their Research Panel in the Summer Term. More indications about presentations and the written piece will be provided at the beginning of the course.
IR502
International Theory Workshop

This information is for the 2015/16 session.
Teacher responsible: Dr Kirsten Ainley CLM 7.07, Dr George Lawson CLM 5.12 and Mr Mark Hoffman QLD 1.09
Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The workshop is based around papers in international theory, circulated in advance, and presented by LSE research students, faculty and external speakers.
Teaching: 12 hours of seminars in the MT. 15 hours of seminars in the LT.

IR504
Foreign Policy Workshop

This information is for the 2015/16 session.
Teacher responsible: Dr James Strong CLM 5.08
Prof Chris Alden CLM 5.13
Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Students present work in progress and obtain feedback. This enables them to assess how they respond to common challenges in doctoral research on foreign policy issues.
Teaching: 4 hours and 30 minutes of workshops in the MT. 6 hours of workshops in the LT. 1 hour and 30 minutes of workshops in the ST.

IR505
European International Politics Workshop

This information is for the 2015/16 session.
Teacher responsible: Dr Federica Bicchi CLM 4.13
Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This workshop is for MPhil/PhD candidates interested in the international politics of, and within, Europe.
Teaching: 4 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

IR506
The South and World Politics

This information is for the 2015/16 session.
Teacher responsible: Prof Chris Alden CLM 5.13
Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.
All interested research students involved in area studies.
Course content: The South in World Politics Workshop is aimed at exploring state and non-state relations between the industrialised North and the Global South with the focus ranging from foreign and security policies to development and interactions at societal levels.
Teaching: 4 hours and 30 minutes of workshops in the MT. 6 hours of workshops in the LT. 1 hour and 30 minutes of workshops in the ST.
Eight meetings, in weeks 3, 5 and 9 of MT, weeks 3, 5, 7 and 9 of LT and week 1 of ST.

IR507
Research Seminar: International Institutions

This information is for the 2015/16 session.
Teacher responsible: Dr Andrew Jillions CLM 5.08
Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.
Course content: This research workshop serves as an intellectual forum for faculty and graduate students interested in the theory, history, or practice of international institutions. The workshop’s principal objective is to foster intellectual exchange across disciplinary boundaries. It seeks to revitalize the study of international institutions by showcasing new and innovative work from leading and emerging scholars. The focus is on international institutions, broadly defined, with a particular emphasis on international law.
Teaching: 16 hours of seminars in the LT.

IR509
International Relations Research Design Workshop

This information is for the 2015/16 session.
Teacher responsible: Prof Iver Neumann CLM 6.06 and Prof Margot Light
Professor I Neumann (for first year research students),
Professor M Light (for second and third year research students)
Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.
This workshop is compulsory for all first year and second year International Relations Department (IRD) research students and open to other interested IRD research students.
Course content: In the first year, this workshop will address issues concerning the formulation and design of the PhD research project. Its principal objective is to assist first year research students in designing a well-thought out and manageable thesis. It seeks to do so by providing a forum in which first year students discuss their research topic, the particular set of questions they intend to address and the methods they wish to use with other members of the workshop. Its aim is to provide students with constructively critical observations about their research project and the problems they may confront. It also seeks to promote an esprit d’corps amongst the first-year research students by familiarising them with the work of their peers.
In the second year, the focus will be on preparing students for their...
upgrade Research Panel in the summer. Exactly how the workshop will proceed will be decided by the members in their first session, but the aim is to give students the opportunity to update and refine their research proposals, get peer reactions to the draft chapters on which the decision to upgrade will be based, and also to talk to each other about the common problems they face. There will also be some sessions to consider such ‘professional concerns’ as the balance to be struck between teaching and research, the role of presentations at conferences, seminars and similar professional gatherings. The third year workshop consists entirely of presentations of draft chapters and students are welcome to invite their supervisors and other scholars working in their field to attend their presentations. The second and third year workshops seeks to sustain the esprit d’corps research students developed during their first year.

**Teaching:** In the first year, the workshop will meet for 15 sessions starting in week six of the MT. Three initial lectures will ask what theory is and, by way of illustration, present a theoretical tradition (Durkheim via Mauss and Levi-Strauss and Foucault to Bourdieu) and a way of doing theory (the ideal type). All first-year students are required to give a presentation outlining their research to the seminar, a copy of their research proposal (of no more than 5,000 word) being circulated in advance to the workshop participants. There will be two or three presentations per meeting. Students must also attend IR501 Research Methods Training Seminar and participate in at least one of the Department’s other research workshops.

In the second year, the workshop will meet for 13 sessions starting in week five of the MT. All members of the workshop are required to present one or more draft chapters of their theses. They will need to provide a copy of the chapter for prior circulation to the workshop participants. Students must also participate in at least one of the Department’s other research workshops.

**IR516**

**Asia-Pacific Research Workshop**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jurgen Haacke CLM 7.09 (Michaelmas Term) and Prof William Callahan CLM 5.07 (Lent Term)

**Availability:** This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.

Available to research students with an interest in the international relations of the Asia Pacific.

**Course content:** Students and other speakers present work in progress and obtain feedback.

**Teaching:** 4 hours and 30 minutes of seminars in the MT. 6 hours of seminars in the LT.

3 meetings in the Michaelmas term - weeks 2, 5 and 8 and 4 meetings in the Lent term - weeks 2, 4, 7 and 9.

**Assessment:** This course is not assessed.

**IR555**

**Political Economy and Public Policy Workshop**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Mareike Kleine COW 1.01 and Prof Jeffrey Chwieroth CLM 5.11

**Availability:** This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This workshop is jointly organised by the International Relations Department, the Government Department and the European Institute for research students of these departments working in the general area of political economy and public policy. Research students from other Departments wishing to attend should contact the course convenors. It should be noted that the course has three codes - EU555, GU555 and IR555.

**Course content:** Presentation and intense discussion of thesis chapters and related work. A detailed syllabus is fixed at the start of the year. Seminar presentations by outside speakers may be added.

**Teaching:** 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

Ten 1.5 hour, fortnightly meetings in MT and LT, commencing in week one of MT. A mini-conference in the ST, organised by the students themselves.

Students on this course will have a reading week in Week 6, in line with departmental policy.

**Assessment:** There is no examination for this course. Regular attendance and active participation by all students is required. Each attending students has to give at least one presentation.

**LL500**

**Doctoral Research Seminar**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Linda Mulcahy NAB 7.15

**Availability:** This course is compulsory on the MPhil/PhD in Law. This course is available on the MPhil/PhD in Law (Socio-Legal Theory). This course is not available as an outside option.

**Course content:** This course aims to equip students with the skills required to undertake advanced legal research. The focus in
the MT is on methodological and theoretical issues arising in legal scholarship. The focus in the LT is on the various stages of the PhD process, and on preparation for professional life in academic law beyond the PhD. In the ST an Upgrade Conference is held at which first year research students present their work-in-progress.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 8 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT.

Assessment: There are no examination arrangements. However, attendance in the MT is compulsory for first year research students, and research students in other years are encouraged to attend.

MA500
Mathematics: Research Seminar

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Allen COL 4.05 and Dr Jozef Skokan COL 3.04

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit. Other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics and game theory. The seminar is regarded as an important part of research students’ formal training and they are expected to attend and contribute.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT. 14 hours of seminars in the ST.

MC500
Research Seminar for Media, Communications & Culture

This information is for the 2015/16 session.

Teacher responsible: Dr Bart Cammaerts STC.S213

Availability: This course is compulsory on the MPhil/PhD in New Media Innovation and Literacy and MPhil/Phd in Media and Communications. This course is not available as an outside option. For Research Students. The course is compulsory for students in the first and second years of the Doctoral Programmes in Media and Communications and in New Media, Innovation and Literacy. All Research Students in the Department are welcome and encouraged to attend.

Course content: The aim of the course is to raise awareness of theoretical, conceptual and methodological issues in the interdisciplinary field of media and communications research and to develop students skills with respect to theory building, research design and implementation. The course focuses, in particular, on the key conceptual issues and analytical strategies required in media and communication research, with special reference to the study of the changing environment of media production, dissemination and consumption, under conditions of globalization and digitization of information.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Compulsory for first and second year students and open to others. There may be additional seminars or workshops in ST.

Assessment: This course is based predominantly on student presentations on their work in progress. Students are expected to use MC500 seminars as a key resource towards their Upgrade document at the end of their first year of study and towards the submission of their formative assessment document at the end of their 2nd year of study.

MA501
Research Student Seminar

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Allen COL 4.05, Dr Luitgard Veraart COL 4.11, Prof Mikhail Zervos COL 4.02, Dr Albina Danilova COL 4.09, Dr Christoph Czichowsky COL 3.11, Dr Pavel Gapeev COL 4.10 and Dr Jozef Skokan COL 3.04

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit. Other members of the research community are welcome to attend.

Course content: The seminars range across many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics, algorithms and game theory. The seminars are regarded as an important part of research students’ formal training and they will all be expected to attend and contribute. Throughout the academic year, students are also invited to give presentations. See http://www2.lse.ac.uk/maths/Seminars/Lunchtime_Seminar.aspx There are additional reading groups aimed at students working in financial mathematics and discrete mathematics. These are compulsory for students working in this area but other students of the MPhil/PhD in Mathematics are welcome to attend. See http://www2.lse.ac.uk/maths/Seminars/Financial_Mathematics_Reading_Group.aspx

MC5M2
Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2015/16 session.

Teacher responsible: Dr Ellen Helgser S119c

Availability: This course is compulsory on the MPhil/PhD in New Media Innovation and Literacy and MPhil/Phd in Media and Communications. This course is not available as an outside option.

Course content: Principles of Research in Media and Communications: a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research: Workshop (three hours) x 10 LT (5
comprised of two x 1.5 hour sessions and 5 comprised of one x 3 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

iii. Principles of Social Research Analysis: Students have to take at least one statistics course offered by the Methodology Department. MY551M Introduction to Quantitative Analysis and MY552L Applied Regression Analysis are automatically included when you register for the standard MCSM2 course. (Students are permitted to substitute these for a more advanced quantitative or qualitative course offered by the Methodology Department as long as at least one statistical course is included in the course, with the approval of the MCSM2 course convenor and subject to timetabling constraints.)

Teaching:

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 10 LT (each comprised of two 1.5 hour sessions).

iii. Principles of Social Research Analysis: MY551M: Lecture (two hours) x 9 MT, Computer class (one hour) x 9 MT; MY552L: Lecture (two hours) x 9 LT; Computer class (one hour) x 9 LT.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words in week 10 of MT.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Principles of Social Research Analysis: Most statistics courses require weekly assignments. The qualitative analysis courses vary in their formative assessment.

Indicative reading:

Assessment:

1. Coursework: One written assignment of either 5,000 or 7,000 words to be submitted in ST, depending on the MY courses selected (66%).

2. One two-hour examination in ST relating to Quantitative Analysis MY551 and one two-hour examination in ST if another statistics course is taken (see Methodology Department course guides) (34%).

Note: Summative assignments differ depending on the components of the methodological training taken by the students. PhD students have to pass all components of MC5M2.

MG500

Information Systems PhD Seminar Series and Workshops

This information is for the 2015/16 session.

Teacher responsible: Prof Jannis Kallinikos NAB3.24 and Prof Christanthis Agerou

Availability: This course consists of a series of seminars and workshops at which PhD students present their work in progress.

Course content: This seminar series provides a forum for research students in management to present work in progress. Outside speakers may be invited from time to time.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.

For 2015/16 this will consist of a weekly, two hour, student-led seminar in weeks 2-9 of all three terms. There will also be one full-day PhD workshop with a guest speaker MT & LT. Details of these workshops are listed on the ISIG News and Events page and emailed to students and staff as they are arranged.

Assessment: There is no formal assessment but all students are expected to attend the one day workshops and must email the course teacher to explain any absences. Attendance at the weekly seminars is more flexible but students should make an effort to attend as many as possible and to be involved in the organisation of at least one per year.

MG501

Employment Relations and Organisational Behaviour Seminar

This information is for the 2015/16 session.

Teacher responsible: Dr Daniel Beunza NAB4.08

Availability: This course is compulsory on the MPhil/PhD in Management. This course is available on the MPhil/PhD in Management. This course is not available as an outside option.

MG501 is a compulsory, assessed course for first year students on the PhD Management (Employment Relations and Organisational Behaviour) programme. The course is optional for second year students on the PhD Management (Employment Relations and Organisational Behaviour) programme. This course is available with permission as an outside option to students on other tracks of the MPhil/PhD Management where regulations permit.

Course content: The PhD seminar in Employment Relations and Organisational Behaviour draws upon organisational, psychological and employment relations theories to advance an understanding of individual, group and firm behaviour. The course covers a number of issues at an advanced level, and introduces students to emerging topics in various fields such as Organisational Behaviour and Employment Relations, including employment systems, employee voice, status, trust, social exchange theory, organisational justice, ethics and ethical climate, and corporate social responsibility. The seminar discussions will be led by a combination of faculty at the EROB group within LSE and prestigious visiting faculty. Throughout the course, students will be exposed to the methodological issues related to conducting research in an up-and-coming area where the research questions may be less known. These methodological issues will provide continuity across the substantively different topics featured on the course.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.

Indicative reading: TBC

Assessment: Essay (100%, 8000 words) in the ST.
MG502  Half Unit
Foundations of Social Research in Information Systems: Paradigms and Traditions

This information is for the 2015/16 session.

Teacher responsible: Prof Jannis Kallinikos NAB3.24

Availability: This course is compulsory on the MPhil/PhD in Information Systems. This course is available with permission as an outside option to students on other programmes where regulations permit.

Compulsory for MPhil/PhD Information Systems and Innovation students in their first year. Students from related PhD programmes who are interested in epistemological paradigms may be able to join the course with the teacher’s permission.

Course content: The course introduces the foundations of social research and the key issues concerning the status of knowledge and the forms by which it is acquired. The course deals with the principal paradigms/traditions in the philosophy of science and epistemology and the answers they have provided to the basic questions concerning the status of knowledge claims and the forms by which valid knowledge claims can be made. The main focus of the course concerns the ways by which these key epistemological paradigms have been applied in the fields of Information Systems and Organization Studies. The course is structured around the following basic epistemological paradigms: Positivism Critical Realism Constructivism Hermeneutics, Phenomenology Critical Theory Structuralism Postmodernism

Teaching: 2 hours of lectures, 9 hours of lectures and 9 hours of seminars in the MT.

Assessment: Essay (100%, 7000 words) in the LT.

An essay of between 5,000-7,000 words to be submitted by the end of March.

MG503  Half Unit
Interpretations of Information

This information is for the 2015/16 session.

Teacher responsible: Prof Jannis Kallinikos NAB3.24, Dr Edgar Whitley and Dr Carsten Sørensen

Availability: This course is compulsory on the MPhil/PhD in Information Systems. This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Other MSc students may follow this course but a good knowledge of information technology is required.

Course content: The course explores the theoretical foundations of information and the technological and institutional processes by which information is increasingly becoming a pervading and crucial element of organizational and economic life. A central theme of the course is how information and the technologies by which it is produced and disseminated are involved in the constitution and coordination of organizational operations and the control of professional practices and organizational outcomes.

Teaching: 20 hours of seminars in the LT.

Indicative reading: Indicative readings are given below. A full reading list will be provided at the start of the course.

Assessment: Essay (100%, 7000 words).

An essay of 7,000 words (100%).

MY500  Half Unit
Fundamentals of Social Science Research Design

This information is for the 2015/16 session.

Teacher responsible: Dr Benjamin Lauderdale Col 8.10

Availability: The course is available to all research students.

Course content: Research design necessitates trade offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative and qualitative research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their PhD theses.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Week 6 is a Reading Week during which students work independently on their formative assignments.

MY521  Half Unit
Qualitative Research Methods

This information is for the 2015/16 session.
Teacher responsible: Dr Flora Cornish COL8.09
Availability: The course is available to all research students.
Course content: This course presents the fundamentals of qualitative research methods. It prepares students to design, carry out, report, read and evaluate qualitative research projects. Students learn how to collect data using methods including interviewing, focus groups, participant observation, and documentary and historical work. The challenges and opportunities of new media including visual images and Internet research are discussed. We then cover analysis, using thematic, content, discourse, and semiotic analysis. Issues of research design, quality indicators, epistemology and ethics are addressed. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice.

In seminars, research students gain experience of putting a range of data collection and analysis methods into practice, on topics within, or closely related to, their substantive area of research. A workbook details the seminar activities - and provides the guidance and basis for the formative and summative assignments.

Teaching: 15 hours of lectures and 10 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 10 hours and 30 minutes of seminars in the LT.

The course runs twice per year: in MT and again in LT. The content of the course is exactly the same in each term. Week 6 is a Reading Week, during which students work independently on their formative assignments.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment.

Assessment: Research proposal (30%) in the MT.
Class participation (10%).
Research Proposal (1000 words) submitted in Week 9 MT (30%).
Provisional Research Design (5000 words) submitted in Week 1 in ST (60%).

MY526  Half Unit
Doing Ethnography

This information is for the 2015/16 session.
Teacher responsible: Dr Elena Gonzalez-Polledo Col.7.07 and Dr Flora Cornish Col.8.09
Availability: This course is available to PhD students in departments such as Media & Communications and Sociology. Also available where regulations permit and with permission of the teacher responsible.
Pre-requisites: A postgraduate qualitative research methods course, such as MY421, as pre- or co-requisite. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.
Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars and students’ experience of fieldwork. Fieldwork is a key component of the course, with students collecting data in a setting closely related to their PhD topic. Data collection is followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include access to study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students’ sensitivity and rigour as ethnographic researchers.

Teaching: 120 hours of lectures and 40 hours of seminars in the MT. Week 6 is a Reading Week during which time students work independently on their formative assignments.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections and brief interpretations of the significance of these observations. Written feedback will be provided.

Assessment: Essay (100%, 4000 words).

MY527  Half Unit
Qualitative Research With Non-Traditional Data

This information is for the 2015/16 session.
Teacher responsible: Dr Alasdair Jones Col.8.08 and Dr Elena Gonzalez-Polledo Col.7.07
Availability: The course is available to PhD students in departments such as Media & Communications and Sociology. Also available where regulations permit and with permission of the teacher responsible.
Pre-requisites: Introductory course on qualitative methods (e.g. MY421, MY521 or MC4M1) recommended as pre-requisite or co-requisite.
Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. Recently qualitative researchers have become interested in ways of capturing and documenting other kinds of data and other dimensions of social life. This course will examine methods for collecting and analysing data which are not primarily textual or linguistic, and how these can be integrated into qualitative research. Lectures will cover key topics such as time and memory; space, place and mobile methods; digital research and online environments; and using visual, audio and other sensory data. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final small research project on a topic of the students’ choosing to be submitted at the beginning of summer term.

The course aims to understand how qualitative methods can be applied to non-traditional data and how to address traditional methodological concerns such as rigour and representativeness. The course is aimed at students who are considering one or more...
of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.

**Teaching:** 20 hours of lectures and 9 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment.

**Formative coursework:** Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.

**Indicative reading:** Note: No one text covers the whole course.

**Assessment:** Project (100%, 7000 words).

One 5500-7000 word research project related to the course material, on a topic selected by the student (100%).

---

**MY528  Not available in 2015/16**

**Qualitative Text Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Aude Bicquelet COL 8.08

**Availability:** This course is available on the MPhil/Phd in Media and Communications. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A postgraduate qualitative research methods course, such as MY421, as pre- or co-requisite. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent

**Course content:** This course covers issues, methods, and applications of qualitative approaches for the analysis of textual data. It introduces techniques and procedures available to researchers to identify and extract information from texts for social scientific purposes. Topics discussed draw on a wide range of analytic traditions such as thematic analysis, content analysis, dialogical analysis and dictionary-based approaches. The aim of this course is to equip participants with the right skills to work within these traditions and select appropriate qualitative methods for analysing textual data according to 1) Research Design 2) Type of data under consideration.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.

**Formative coursework:** A project proposal (c.1,000 words).

Students write a proposal for the project that will comprise their summative assessment.

**Assessment:** Essay (100%, 4000 words) in the LT.

---

**MY529  Half Unit  Not available in 2015/16**

**Special Topics in Qualitative Research: Introspection-based Methods in Social Research**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Martin Bauer Col.8.04

**Availability:** The course is available to all research students.

**Pre-requisites:** The course will assume good knowledge of qualitative research methods as covered in MY521 and MY530.

**Course content:** Introspection comprises methods of empirically recording one’s own subjective experience; the currently on-going, or perhaps very recently past, mental or emotional states and processes through methods of trained and technically supported self-observation. Historically, introspection is part of a quest of human self-knowledge and self-improvement. And a person’s stream of consciousness is of interest in the social sciences, for example as reports of happiness or life satisfaction. Introspection has been difficult to verify, thus deemed not ‘objective’ and unscientific. The stream of consciousness (William James) was of interest mainly to literary elaboration. However, introspection-based methods survived and have re-emerged, not least because 1st person experience remains an indispensable source of evidence on an actor’s states and processes that constrain and give meaning to human action. Not least recent advances in neurosciences accentuates the need for experience-focused 1st person methods. Modern introspection-based methods are ‘objectifications’ of 1st person situated experiences in controlled settings that support episodic retention. Modern introspection-based methods create conditions which make immediate, pre-mediated experience less ‘biased’ and more accurate to record. This comprises techniques such as narrative and episodic interviewing, free-association techniques, survey-based reconstruction and attitudes, critical incident techniques, loud-thinking protocols, experience sampling and self-tracking methods, ecological momentary assessment, self-confrontation interviewing, and 1st person situated video methods, and auto-ethnography and the ‘quantified self’. Many new techniques are mobile and adaptable to capture the fluid nature of mental and emotional states and processes. Miniature mobile devices for sound and video recording promise to overcome the bottlenecks that have hitherto plagued intensive and continuous introspection-based methods.

**Learning Outcomes:** Students on this course will

1) appreciate the long past, and the short history of introspection-based methods;
2) be familiar with a range of techniques of collecting introspective data;
3) know the problems of introspection-based methods and how different methods try to overcome them;
4) gain practical skills with modern introspection-based methods.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.

**Indicative reading:** A complete reading list will be provided at the beginning of the course.

MY530
Advanced Qualitative Research Workshops

This information is for the 2015/16 session.

Teacher responsible: Dr Elena Gonzalez-Polledo COL 7.06

Availability: Research students who are undertaking projects using qualitative methods.

Pre-requisites: Some prior training in qualitative methods (eg: MY400 and MY421 or equivalent). Students who have no prior training in qualitative methods should consider taking MY521M or MY521L.

Course content: MY530 is a series of workshop modules that provide hands-on, in-depth and advanced training for specific methodologies of qualitative data collection, analytic techniques and research design issues. Research students can sign up to as many workshops as they wish. The programme includes topics such as in-depth interviews, focus groups, ethnography and participant observation, narrative interviewing and analysis, visual methods, classical content analysis, thematic analysis, etc. Each workshop consists of two sessions of two hours. The second session is practical. These interdisciplinary sessions provide a space for students to develop advanced methodological skills and exchange ideas with peers.

Teaching: Sessions to be held throughout the year, beginning in week 8 of MT and continuing throughout LT; Participants sign up via MOODLE.

Indicative reading: Each session will provide its own recommended reading list, available on Moodle.

Assessment: This course is non-examinable.

MY551  Half Unit
Introduction to Quantitative Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Jouni Kuha Col.8.02 and Dr Benjamin Lauderdale Col.8.10

Availability: The course is available to all research students.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bi-variate data analysis and have an appreciation of multiple linear regression. The computer classes give hands-on training in the application of statistical techniques to real social science research problems using the SPSS computer package (no prior knowledge of SPSS is necessary).

Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST.

There will be no lectures or computer classes in Week 6 of the term. This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY551M which is taught in Michaelmas Term, or MY551L which is taught in Lent Term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

MY552  Half Unit
Applied Regression Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Ben Badreldin, Dr Benjamin Lauderdale COL.8.10

Availability: This course is available to all research students. The course is also available to taught masters students with different assessment, as MY454.

Pre-requisites: Students must have taken Applied Regression Analysis (MY452) or an equivalent intermediate regression course.

Course content: This course will cover basic statistical programming for social science research as well as several associated data analysis methods. Programming topics include basic programming, data structures, optimisation, and simulation.

Assessment: A course pack will be available for download online and can be purchased as a hard copy. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data. Pearson Education; Or Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY551 and MY552).

Indicative reading: A course pack will be available for download online and can be purchased as a hard copy. Additional reading will be recommended.

A two-hour open book unseen examination in ST.
Applied statistical topics include nonparametric density estimation and regression, additive models, cross-validation, the bootstrap, and permutation/randomisation inference. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT. 2 hours of lectures in the ST.

**Formative coursework:** Students will be expected to produce 5 problem sets in the LT. Each problem set is associated with a computer classes, and may be submitted for marking and feedback.

**Indicative reading:** Keele, L. Semiparametric Regression for the Social Sciences
Matloff, N. The Art of R Programming
Shalizi, CR. Advanced Data Analysis from an Elementary Point of View.

**Assessment:** Coursework (100%) in the ST.
A single piece of coursework (100%) in the ST applying the methods covered in the course to a topic in the area of the student's research. The topic and scope of the assignment will be developed in discussion with the teacher responsible for the course during LT.

---

**MY555** Half Unit

**Multivariate Analysis and Measurement**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha Col.8.02

**Availability:** The course is available to all research students.

**Pre-requisites:** The course will assume a knowledge of standard linear regression models, to the level covered in MY452/MY552 (Applied Regression Analysis).

**Course content:** An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.

**Teaching:** 20 hours of lectures and 8 hours of computer workshops in the LT.

**Formative coursework:** Exercises from the computer classes can be submitted for marking.

**Assessment:** Research project (100%).
Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, reporting the data analysis of a given research question and data set (100%).

---

**MY557** Half Unit

**Casual Inference for Observational and Experimental Studies**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Dominik Hangartner COL8.03

**Availability:** Available to all research students.

**Pre-requisites:** Students must have completed Applied Regression Analysis (MY552), Fundamentals of Social Science Research Design (MY400) and Fundamentals of Social Science Research Design (MY500).

Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452/MY552 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent

**Course content:** This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer packages (Stata or R) are used for computation.

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT.
There will be no lectures or computer classes in Week 6 of term.

**Formative coursework:** Exercises from the computer classes can be submitted for marking.

**Assessment:** Coursework (100%, 4000 words).

---

**MY556** Half Unit

**Survey Methodology**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Jouni Kuha COL8.02 and Prof Jonathan Jackson COL8.05

**Availability:** This course is available to all Research students.

**Pre-requisites:** Knowledge of basic descriptive and inferential statistics, to the level of MY452/MY552 or equivalent. MY556 can also be taken in parallel with MY452L/MY552L. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent.

**Course content:** This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys.

Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; computer processes in answering survey questions; design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.
There will be no lectures or seminars in Week 6 of term.

**Formative coursework:** Exercises from the seminars can be submitted for marking.

**Assessment:** Research project (100%).
Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, reporting the data analysis of a given research question and data set (100%).

---

**MY559** Half Unit

**Special Topics in Quantitative Analysis: Quantitative Text Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Kenneth Benoit Col.8.11

**Availability:** The course is available to all research students.
Pre-requisites: The course will assume knowledge of linear and logistic regression models, to the level covered in MY452.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can all be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Assessment: Coursework (100%, 4000 words).

MY560 Workshop in Advanced Quantitative Analysis

This information is for the 2015/16 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is available on the MSc in Social Research Methods (Social Policy). This course is available as an outside option to students on other programmes where regulations permit.

Course content: It is intended to provide research students with an introduction to specific advanced research methods and hands-on training in the use of these tools.

Teaching: One-day introductory workshops consisting of a morning lecture and afternoon computer workshop during the MT, LT and ST. Participants will sign up via MOODLE.

Assessment: This course is non-examinable.

MY565 Half Unit Intermediate Quantitative Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Jouni Kuha COL.8.02

Availability: This course is available to all research students where regulations permit.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. It covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques. Class exercises and homework are carried out using the Stata or SPSS package, according to the student’s choice.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6. On-line quizzes will be provided on Moodle to aid revision during the reading week.

Formative coursework: Students will be expected to produce 9 exercises in the MT.

Indicative reading: A course pack will be available for download online and for purchase as a hard copy.

Assessment: Exam (100%, duration: 2 hours). This is an open-book unseen examination.

MY591 Computing Packages for Applied Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Aude Bicquelet Col.8.08

Availability: This course is available on the MSc in Social Research Methods (Social Policy). This course is available as an outside option to students on other programmes where regulations permit.

For students who intend to use qualitative and quantitative computer packages in their research.

Course content: It is intended to provide research students with an appreciation of various computer packages through introduction and hands-on training in the use of these tools.

Teaching: 63 hours of seminars in the MT. 75 hours of seminars in the LT.

Half-day introductory training courses on computer packages such as, NVivo, ALCESTE, QDA Miner/Wordstat5/Simstat, Stata and SPSS during the MT and LT. Participants will sign up via MOODLE.

Formative coursework: NA.

Assessment: This course is non-examinable.
MY592
Workshop in Information Literacy: finding, managing and organising published research and data
This information is for the 2015/16 session.
Teacher responsible: Miss Maria Bell R102
Maria Bell (Course Convenor), Academic Support Librarian; Dr Jane Secker, Copyright and Digital Literacy Advisor, Centre for Learning Technology; Clive Wilson, Academic Support Librarian.
Availability: This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. First and second year research students and MSc Social Research Methods students.
Course content: MY592 is a six week programme of 2 hour workshops which aims to develop students’ research skills and introduce the essential sources and tools when undertaking research, and the skills required to use them. It is run by the Library and Centre for Learning Technology and is ideal for research students undertaking an extensive literature search and review. Students receive detailed advice on the most appropriate Library resources for their research topics. Materials, online activities and assessment will be available in Moodle to support the teaching.
Teaching: 24 hours of seminars in the MT. 24 hours of seminars in the LT.
Six two hour classes will be held weekly, and students are expected to attend all sessions in order to develop their information literacy skills. MY592 will run in both the Michaelmas and Lent terms and in the Summer term subject to demand. Dates and times will be advertised at the start of each term. Note that not all sessions will last for 2 hours but this will allow for individual contact time at the end of classes with class tutors.
If you only wish to attend an individual workshop, consult the Training classes offered by the Library and the Centre for Learning Technology on the LSE Training and Development System. Places on the entire programme can be booked using the LSE Training and Development System.
Assessment: This course is non-examinable.

MY599
Department of Methodology Seminar
This information is for the 2015/16 session.
Teacher responsible: Mr Benjamin Wilson Col.7.07
Availability: Open to all.
Course content: Papers on topics of methodological interest will be presented by staff and visitors.
Teaching: Meetings arranged as needed, taking place in COL.8.13 unless otherwise stated. Seminar dates, venues and speakers will be advertised on the Department of Methodology webpage.
Assessment: This course is non-examinable.

PH500
Research Methods in Philosophy
This information is for the 2015/16 session.
Teacher responsible: Prof Richard Bradley
Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Topics in contemporary philosophy.
Teaching: Seminars PH500 15 x two-hour (MT, LT, ST). Different members of the department will lead the seminar in each of the three terms.
A more detailed syllabus will be posted at the beginning of each term.
Assessment: This course is non-examinable.

PH501
Philosophical Problems Seminar
This information is for the 2015/16 session.
Teacher responsible: Dr Peter Dennis
Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.
Course content: The idea of the course is to read and carefully discuss together a range of classic papers in contemporary analytic philosophy that might not otherwise be covered in LSE Philosophy Department courses. Topics are selected from the philosophy of logic, language, metaphysics, and the philosophy of mind and action. This list is illustrative.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.
Indicative reading: Specific readings will be announced in a detailed syllabus at the start of the term.
Assessment: Four essays of 2,500-3,500 words each over the course of the two terms.

PH502
Reasoning and Logic
This information is for the 2015/16 session.
Teacher responsible: Prof John Worrall LAK 3.02
Availability: This course is available on the MPhil/PhD in Philosophy and MPhil/PhD in Philosophy of the Social Sciences. This course is not available as an outside option.
The course is, in general, only aimed at those students who have never taken a course in formal logic before. For such students the course is compulsory.
Course content: The course aims to give a precise formulation of correct deductive reasoning- of what it means for a sentence to follow from a set of other sentences taken as premises- and to investigate on this basis other important logical notions such as that of consistency. The course will also investigate how these formal principles are of use in analysing informal argumentation. Mathematicians lay down certain axioms and establish theorems by deducing them as consequences of the axioms; scientists postulate certain theories and test them by deducing certain consequences from them that can be checked experimentally; ordinary reasoners try to win (intellectual) arguments by showing that some position that they favour follows deductively from assumptions that everyone accepts. This course studies what exactly is involved in correct deductive reasoning. It begins by considering certain very simple inferences that can be formalized in a system called propositional logic. The semantic notion of deductive validity is developed for this system and the truth table, “no counterexample” and tree methods for establishing validity in propositional logic are introduced. The connections between validity and other important logical notions such as equivalence, consistency and independence are precisely detailed. Some simple results about propositional logic are proved. More complex inferences require a system called (first order) predicate logic. The course shows how to formalize some ordinary informal sentences (and therefore ordinary informal inferences) in predicate logic; and introduces methods for establishing the validity or invalidity of predicate logic inferences: both a system based on rules of proof and one based on the tree method will be studied. Again the relationships between validity of inference, on the one hand, and the notions of the logical equivalence of two sentences, the consistency of a set of sentences or the independence of one sentence from a set of sentences, on the other, are investigated for the more powerful system of predicate logic. Both the systems that we shall study – of propositional and predicate logic - are entirely formal. Although we shall emphasize how some especially simple ordinary arguments can be ‘captured’ within such systems, it is of course true that ‘ordinary reasoners’ do not explicitly employ such formal techniques. How then, if at all, can formal logic help in assessing ordinary deductive reasoning in science, social science and elsewhere?
Teaching: 15 hours of lectures in the MT. 15 hours of lectures in the LT. Appropriate back-up teaching will be arranged with individual students.

Formative coursework: Regular exercises will be set on the basis of the material covered in lectures; students are required to complete these exercises and to be ready to present and discuss answers in the associated seminar, where applications of formal logic to informal reasoning will also be investigated.

Indicative reading: Extensive lecture notes will be provided covering all aspects of the course. Students will however find it useful to consult C. Howson, Logic with Trees. This text concentrates exclusively on the method of trees, while the lecture also introduces other equivalent methods.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

---

**PH551**
Research Seminar in the Philosophy of Natural Sciences

This information is for the 2015/16 session.

Teacher responsible: Dr Bryan Roberts LAK.5.03

Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: Topics in the philosophy and history of modern science, with a special focus on the natural sciences. The seminar incorporates the regular meeting of the British Society for the Philosophy of Science (BSPS) and the Sigma Club. Details regarding BSPS and Sigma can be found on their respective websites (http://www.thebsps.org/ and http://www.lse.ac.uk/collections/CPNSS/projects/SigmaClub/Default.htm).

Together these take up about 5 meetings each term. The remaining meetings are run as a research seminar, meaning that research students and members of the department present recent research which will then be discussed. In the summer term five seminars are run jointly with the Department of Science and Technology Studies at UCL. The topic of the seminar will be chosen so that it covers aspects of both the history and the philosophy of science. The topic is to be chosen by seminar participants.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 12 hours of seminars in the ST.

---

**PS950**
Current Research in Social Psychology

This information is for the 2015/16 session.

Teacher responsible: Professor Saadi Lahlou QUE.3.26

Availability: This course is compulsory on the MPhil/PhD in Social Psychology. This course is not available as an outside option. This course is available to academic staff and research students only.

Course content: Weekly seminars including plenary and specialist sessions in Michaelmas Term, Lent Term and Summer Term. Seminars for research students in: Health, Community and Development; Social and Cultural Psychology; Organisational and Social Psychology; Social and Public Communication.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.

Assessment: No assessment.

---

**SA550**
Research Student Seminar

This information is for the 2015/16 session.

Teacher responsible: Prof Anne West OLD1.16 and Prof Jane Lewis OLD1.18.

Availability: For all MPhil/PhD students in the Department of Social Policy.

Course content: This course provides background sessions for MPhil/PhD students in their first year of study. It also provides the forum in which first year full-time and second year part-time MPhil/PhD students must present their work in advance of submitting their major review documents.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

---

**SO500**
Research Class for MPhil Students

This information is for the 2015/16 session.

Teacher responsible: Prof Michael Savage STC S210

Availability: This course is compulsory on the MPhil/PhD in Sociology. This course is not available as an outside option.

Course content: The research seminar aims to provide students with a conceptual and practical framework within which to think
through planning their research. This includes devising research questions, how to do a literature review, selecting appropriate methods for research, linking theory and practices, ethical issues and writing. The course will comprise workshops and student presentations. By the end of the course students should be able to formulate clear aims and methods for their own research. All first year MPhil students must attend.

**Teaching:** 20 hours of seminars in the MT. 20 hours of seminars in the LT.

**Reading weeks:** week 6 (MT) and week 6 (LT).

**Assessment:** Other (100%) in the ST.

5,000 word paper on the ‘Aims and Methods’ of the thesis, and a viva voce examination. For full-time students, three copies of this typed and paginated essay must be submitted to the Sociology Administration Office, Room S116, by the first Friday in May. Satisfactory completion of the ‘Aims and Methods’ paper, and the viva are necessary in order to proceed to the next stage of the course. Part-time students may elect to be evaluated in May or September of their first year or May of their second year.

**SO501**

**Research Students’ Seminar**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Lisa Mckenzie STC S212

**Availability:** This course is available on the MPhil/PhD in Sociology. This course is not available as an outside option. Only available to sociology research students in the second and subsequent years of their MPhil/PhD.

**Course content:** Seminars will discuss some recent influential or prize-winning articles or books in a number of areas of sociological endeavour. The purpose of the seminars is to introduce research students to what sociologists internationally consider to be leading examples of contemporary research, and to ensure that MPhil/PhD students graduating from the department have a chance to acquire a command of debates beyond the special expertise they develop in their own area of research. The seminars will begin with a thirty minute student presentation on the article or book in question, followed by discussion. On occasion, an academic with expertise in that area may be invited to act as a respondent. In addition, there will be a special day seminar devoted to helping those students who are preparing for their upgrade viva. This will provide them with an opportunity to present and defend a significant aspect of their argument.

**Teaching:** 10 hours of seminars in the MT. 10 hours of seminars in the LT. 8 hours of seminars in the ST. Fortnightly seminars in the MT and LT for all sociology research students in their second and subsequent years. For those students preparing for their upgrade viva there will also be a special day seminar usually in ST.

**Assessment:** There is no formal assessment, but participants are asked to present papers, contribute to discussion and read the work of selected scholars in the course of the session.

**SO521**

**Not available in 2015/16**

**Research Seminar on Cities and Space**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Francine Tonkiss STC 219

**Availability:** This course is available on the MPhil/PhD Cities Programme and MPhil/PhD in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

For MPhil/PhD students doing research on urban and spatial issues in the Cities Programme/Department of Sociology. If space is available, other graduate students may apply.

**Course content:** This graduate seminar is based on discussion of key readings in the fields of urban social theory and spatial analysis. It also provides a forum for discussion of research issues relating to the study of cities and space.

**Teaching:** 10 hours of seminars in the MT. 10 hours of seminars in the LT. One two-hour seminar every two weeks in the MT and LT.

**Assessment:** This course is not assessed.

**ST501**

**Half Unit**

**Multilevel Modelling**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Irini Moustaki COL 6.05

**Availability:** This course is available on the MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

**Course content:** A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g., individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g., Stata).

**Teaching:** 20 hours of lectures and 10 hours of seminars in the LT.
**Formative coursework:** Students will be expected to produce 5 exercises in the LT.

Formative coursework is assigned fortnightly and returned to students with comments/feedback during the lab sessions.

**Indicative reading:**

**Assessment:** Coursework (100%, 4000 words).

Assessment is by 100% coursework given to students in week 8 of the course.

---

**ST542 Half Unit**

**Longitudinal Data Analysis**

This information is for the 2015/16 session.

**Teacher responsible:** Prof Fiona Steele COL 7.08

**Availability:** This course is available on the MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

**Pre-requisites:** A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

**Course content:** A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, (random effects) growth curve models, marginal models, dynamic (autoregressive) models, latent class models, and multiprocess models for multivariate outcomes. The course will have an applied emphasis with weekly computer classes using appropriate software (e.g. Stata).

**Teaching:** 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be a reading week.

**Formative coursework:** Students will be expected to produce 5 exercises in the LT.

Formative assessment is based on data analysis problems that require the use of the statistical software to apply the statistical techniques taught in the lectures and computer classes. Coursework is given out to students every two weeks and returned with feedback and comments.

**Indicative reading:**

**Assessment:** Coursework (100%, 4000 words) in the ST.

Assessment is by 100% coursework which is given to students in week 8 of the course.

Modern Foreign Language Certificate Courses

LN701
Arabic: Level One (Standard)

This information is for the 2015/16 session.
Teacher responsible: Mr Nadim Ben Mohamed Mahjoub TW3.6.01
Pre-requisites:
• No previous knowledge of Modern Standard Arabic required.
• Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
• Students should dedicate at least two hours per week for coursework in addition to classes.
• This course is suitable for students wanting to learn Modern Standard Arabic.
• Admission into the course upon tutor’s approval during the information sessions.

Course aims:
• To develop the ability to use Arabic effectively for purposes of practical communication at survival level.
• The course introduces the students to the Arabic writing system and enables them to read and write basic words and sentences.
• To deal with a range of predictable simple language tasks using a limited range of language.
• To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
• To bring the students to level A1- of Common European Framework.

Communicative content
• Greetings
• Asking for and giving personal information
• Talking about your immediate family
• Talking about studies and jobs
• Say where you live
• Talking about your city and country
• Talking about present actions

Structural content
• Alphabet
• Joining letters
• Pronunciation
• Feminine and masculine words
• Roots
• Present tense
• The definitive article
• Independent pronouns and pronoun suffixes
• Nouns-adjective phrases
• Numbers
• Plural
• Dual
• Word order
• Demonstrative: this (masc./fem.)
• Possessive pronouns
• Interrogatives (where, when, what, in which, etc.)
• Nisba (nationality)
• Idafa (genitive construction)
• Introduction to Past Tense
• Use of “also, where, in the same, etc.”

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.
• This is a 40-hour-course.
• Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Students will be provided with a study pack.
Other useful materials for this level
• Alif Baa: Introduction to Arabic, Letters and Sounds by Brustad et all. Georgetown Univ. Press, Second or Third Editions
• Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005
• Mastering Arabic 1, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2007

Language Centre Learning Support
• Tandem Learning: Regular events to improve your spoken language skills - Join our Language Exchange programme! Find out about the details and our Facebook Groups
• Online Language Learning: Try our Moodle site “LSE Language Gateway” as extra support for your language learning (includes links to podcasts, streaming television, free online courses).
• Go to www.lse.ac.uk/languages and click on ‘Learning Support’

Assessment: Continuous assessment (50%) in the MT and LT.
Oral examination (30%) and in class assessment (20%) in the LT.

LN702
Arabic: Level One (Fast Track for Learners Familiar with Arabic Script)

This information is for the 2015/16 session.
Teacher responsible: Mr Luay Hasan TW3.6.01
Pre-requisites:
• Students who have familiarity with Arabic script. Admission into the course upon tutor’s approval during the information sessions.
• Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
• Students should dedicate at least two hours per week for coursework in addition to classes.
• This course is suitable for students wanting to learn Modern Standard Arabic.

Course aims:
• To develop the ability to use Arabic effectively for purposes of practical communication at survival level.
• The course enables students to read and write basic words and sentences.
• To deal with a range of predictable simple language tasks using a limited range of language.
• To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
• To bring the students to level A1 of the Common European Framework.

Communicative content
• Greetings
• Asking for and giving personal information, directions and opinions
• Talking about family
• Talking about your country
• Describing people, places and objects
• Talking about past events and experiences
• Using the dictionary (basic)
• Asking and giving the time
• Talking about present events
• Talking about future events (basic)
• Ordering in a restaurant
• Asking for and giving directions
Structural content
- Roots
- The definitive article
- Independent pronouns and pronoun suffixes.
- Nouns-adjective phrases
- Numbers
- Feminine and masculine words
- Adjective-noun agreements
- Word order
- Verb-subject agreement
- Demonstratives (singular)
- Possessive pronouns
- Interrogatives (where, when, what, how many, etc)
- Prepositions: in, between
- Nisba (nationality)
- Idafa (genitive construction)
- Past tense
- Linking words (Firstly, after, lately, etc.)
- Present tense
- Future tense (basic)
- Plural (sound, masc./fem.)
- Negative phrases (past, present, future)
- Prepositions with pronoun suffixes
- Persons of the verb (sing./pl.)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.
- This is a 40 hour-course.
- Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study Pack will be provided
Other materials useful for this level
- Mastering Arabic 1, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2007

LN703
Arabic: Level Two (Standard)
This information is for the 2015/16 session.
Teacher responsible: Mr Nadim Ben Mohamed Mahjoub TW3.6.01
Pre-requisites:
- Students should have previously learnt … see description of "Communicative content" and "Structural Content" of Level 1 Standard (LN701) and/or Level 1 Fast Track (LN702). Admission into the course upon completion of level test and tutor's approval.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.
- This course is suitable for students wanting to improve Modern Standard Arabic.

Course content:
Course aims:
- To use Arabic effectively for purposes of practical communication and reading comprehension in familiar work and social contexts.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2- of Common European Framework.

Communicative content
- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about daily habits/routine
- Making comparisons
- Using both past and present
- Talking about future plans (basic)
- Expressing preferences
- Expressing likes/dislikes
- Writing a postcard

Structural content
- Revision of present tense
- Revision of Nisba (nationality)
- Revision of Idafa (genitive construction)
- Revision of possessive
- Negative phrases
- Prepositions with pronoun suffixes
- Past tense
- Comparative
- Adverbs of frequency
- Introduction to Masdar (verbal noun)
- Time expressions
- Verb Kana (To be)
- Dual and Plural (sound and broken)
- Future tense
- Numbers
- Number-noun agreement (1-10)
- Adjective-noun agreement (human/non human)
- Demonstratives
- Quantities
- Introduction to cases and declination (nominative, accusative, genitive)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST. This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study Pack
Other useful materials for this level

LN704
Arabic: Level Two (Fast Track)
This information is for the 2015/16 session.
Teacher responsible: Mr Nadim Ben Mohamed Mahjoub TW3.6.01
Pre-requisites:
- Students should have previously learnt … see description of
“Communicative content” and “Structural Content” of Level 1 Fast Track (LN702) and/or Level 2 Standard (LN703). Admission into the course upon completion of level test and tutor's approval.

- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.
- This course is suitable for students wanting to improve Modern Standard Arabic.

Course content:

Course Aims
- To use Arabic effectively for purposes of practical communication and reading comprehension in familiar work and social contexts.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2 of Common European Framework.

Communicative Content
- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about habits, hobbies and daily routine
- Making comparison between people, things or places
- Using both past and present
- Talking about future plans (further details)
- Giving opinions
- Expressing agreement
- Expressing wishes and plans for the future
- Writing a postcard or letter

Structural Content
- Revision of past tense
- Revision of present tense
- Negative phrases
- Prepositions with pronoun suffixes
- Forms of the Arabic verb (1-4)
- Comparatives
- Adverbs of frequency
- Masdar (verbal noun)
- Time expressions
- Verb Kana (To be) and introduction to hollow verbs
- Plural (broken plural 1-5)
- Future tense
- Numbers
- Adjective-noun agreement (human/non-human)
- Use of the accusative
- Declination (nominative, genitive, accusative).

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.
This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

LN705

Arabic: Level Three (Standard)
This information is for the 2015/16 session.
Teacher responsible: Mr Luay Hasan TW3.6.01
Pre-requisites:
- Students should show command (at both oral and written level) … see description of “Communicative content” and “Structural Content” of Level 2 Fast Track (LN704). Admission into the course after completion of level test and tutor's approval.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.
- This course is suitable for students wanting to improve Modern Standard Arabic.

Course content:

Course aims
- To use Arabic effectively for purposes of practical communication and reading comprehension in familiar work and social contexts.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- Level B1 of Common European Framework.

Communicative content
- Talking about present events and experiences
- Talking about past events and experiences.
- Describing people, places and objects.
- Making comparisons.
- Expressing wishes, plans for the future, uncertainty and doubts.
- Giving opinions and judgements
- Expressing agreement and disagreement.
- Talking about current issues
- Giving advise

Structural content
- Revision of past tense and Present tense
- Revision of negative phrases
- Forms of the Arabic verb (1-10)
- Plural patterns
- Comparative forms
- Verb Kana (To be) and other hollow verbs
- Future tense
- Numbers
- Verb/subject agreements
- Assimilated, doubled and defective verbs
- Verbs with hamza
- The subjunctive
- Kana and its sisters
- Inna and its sisters
- Relative clauses
- Imperative: do/don’t
- Passive
- Dual (verbs, nouns, adjectives, pronouns and relative clauses)

LN726
French: Level Three (CIA Courtauld Institute of Art)

This information is for the 2015/16 session.
Teacher responsible: Mr Halim Benzine TW3 6.01
Pre-requisites:
- This level is suitable for students from the Courtauld Institute of Art who learnt French for some time (a few years) a long time ago (secondary school).
- A good foundation but find it difficult to express themselves mostly orally.
- This level can also be taken by GCSE students from LSE.

SPEAKING:
- Use simple phrases and sentences to describe where they live and people they know.
- Speak about what they study (history of art, arts), and be able to function within a range of basic activities relating to work, study...
or time spent in the country.

WRITING
• Write short, simple greetings.
• Fill in forms with personal details, basic communication in e-mails, or short descriptions or paragraphs relating to an area of interest in arts.

LISTENING:
• Recognise familiar words and very basic phrases concerning self, family and immediate concrete surroundings when people speak slowly and clearly.
• Understand short excerpts from current affairs, programmes or news items on TV and Radio.

READING:
• Understand the gist of and some details of original text extracts, for example on notices, posters, in newspapers, adverts and on the web, and in simple articles relating to the Social Sciences.
• Admission to the course upon completion of online level test and tutor's approval during needs analysis.
• For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French.

Course Aim:
SPEAKING AND SPOKEN INTERACTION:
• Use a series of phrases and sentences to describe in simple terms family and other people, living conditions, educational background and present or most recent work.
• Produce talks on simple topics relating to Art.
• Communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar topics and express opinions in discussion of familiar topics.

WRITING:
• Write short simple notes, messages and e-mails relating to matters in areas of immediate need or paragraphs or short essays in areas of interest relating to Art.

LISTENING:
• Understand phrases and the highest frequency vocabulary related not only to areas of most immediate personal relevance (e.g. personal and familiar information, shopping, local geography, and employment), but also to topic areas relating to the world of Culture and Art.

READING:
• Read short and simple texts related to news and current issues, find specific, predictable information in simple everyday material such as advertisements, prospectuses, menus and timetables, and understand items of both personal and professional written communication e.g. Email and web-based material + art related articles.

To bring students to level B1 of CEFR.

Communicative content:
• Introduce oneself, talk about opinions, beliefs, political views.
• Talk about daily activities. Make an appointment, reschedule, accept, refuse.
• Give your opinion and justify it. Talk about a past event, past experiences…
• Take/ give advice and make/respond to suggestions.
• Future plans and projects. Express a wish, a will. Express doubt, certainty, possibility.
• Express causes, consequence, obligation, aim.

Structural Content:
• Consolidation of major grammatical points (direct, indirect pronouns & en…).
• Perfect, past tenses, conditional. Present tense irregular verbs consolidation.
• Question formation with a wide range of tenses.
• Adjectives, place, agreement. Express duration (depuis, pendant, pour).
• Use of relative pronouns (qui/que, ce qui/ce que).

Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.

This is a 46 hour-course. Please refer to the LSE timetable for course teaching arrangements.
Course Aim:

**SPEAKING AND SPOKEN INTERACTION:**
- Use a series of phrases and sentences to describe in simple terms family and other people, living conditions, educational background and present or most recent work.

**LN760**

**Italian: Level Two (Standard)**

This information is for the 2015/16 session.

Teacher responsible: Mrs Anna Giuffria TW3 6.01

Pre-requisites: This is an elementary level course. Students should have previously learnt ... see description of “Communicative content” and “Structural Content” of Level 2 (LN759). Students should: Demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments. Dedicate at least one hour per week for coursework in addition to classes. Admission onto the course upon completion of online level test and tutor's approval. This course may be suitable for re-starters.

Course content:

Course Aim:

• To develop the ability to use Italian effectively for purposes of practical communication and reading comprehension in familiar and social contexts.

• To establish the skills, language and attitude required to promote and facilitate further study of Italian at an intermediate level.

• To acquire the substantial information on Italy in relation to topics such as: economy, life style, education, jobs and history and social issues.

• The course also aims to revise and consolidate all the basic structures before advancing to more difficult language structures.

• Students will be encouraged to practise productive skill, speaking and writing, and to improve receptive skills, reading and writing. Students will also start to study or analyse more authentic than artificial material. At the end of the course students should be able to interact with native speakers and be confident in the use of the language in daily life situations. Students should also acquire the required level to continue the study of the language at level 3.

• To bring the students to level A2 of CEFR.

Communicative content:

• Talking about your daily life, hobbies and social life.
• Asking and giving past and current information.
• Giving a summary of a past holiday.
• Talking about habitual actions in the past.
• Express likes, dislikes and preferences.
• Expressing opinion in simple context and making comparisons between people and things or events.
• Describing feeling and object in the past.
• Giving information about your education background.
• Talking about ideal jobs.
• Future plans.

---

**Course Aim:**

To further develop the ability to use Chinese in all four skills (speaking, listening, reading and writing) effectively for purposes of practical communication at survival level. To improve Chinese pronunciation. To consolidate and expand knowledge of Chinese characters. To deal with a range of predictable simple language tasks using a limited linguistic range to meet the needs of differing but familiar situations and topics. To establish the skills, language and attitudes required to promote and facilitate further study of Chinese. To prepare students for the equivalent of A2 CEFR.

**Course content:**

- Greetings.
- Introducing yourself and others.
- Talking about job, nationality, identity.
- Asking for permission.
- Looking for someone.
- Making comments and suggestions.
- Meeting people for the first time.
- Talking about one's study.
- Introducing your family.
- Talking about one's university.
- Asking about someone's age and birth place.
- Celebrating birthday.
- Solving language problems.
- Understanding Chinese currency.
- Shopping and bargaining.
- Talking about likes and dislikes.
- Expressing one's ability.
- Talking about one's health.
- Expressing need or desire.
- Renting a house.
- Making a complaint or an apology.
- Expressing holiday greetings.

This course will introduce the basics of Mandarin in the following grammatical areas:

- Word order in Chinese sentences.
- Sentences with ‘是’.
- Sentence with a verbal predicate.
- Attributives expressing possession.
- Yes/no questions.
- Use of adverbs.
- Sentence with ‘有’.
- Propositional phrases.
- Sentences with double objects.
- Serial verb phrases.
- Alternative questions.
- Model verbs.

The course will also introduce 350 words and 120 Chinese characters.

**Teaching:** 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40-hour course. Please refer to the LSE timetable for course teaching arrangements.

**Indicative reading:** Key textbook:

New practical Chinese Reader, textbook + workbook, vol. 1, by Liu Xun, Beijing Language and Culture University Press, 2007 (the textbook comes with DVD or audio materials)

**Recommended Readings:**

- Beginner's Chinese Script by E. Scurfield and Song Lianyi (Teach Yourself books), 1998.

**Assessment:** Continuous assessment (50%) in the MT and LT.

Oral examination (30%) and in class assessment (20%) in the LT.

---

**LN714**

**Mandarin: Level 2 (Fast Track)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Lijing Shi TW3 601H

**Pre-requisites:** Students should have successfully completed LSE Level 1 fast track course LN712 or have learned equivalent content, see description of “Communicative Content” and “Structural Content” of Level 1 Fast track (LN712). Students will have to: Demonstrate full commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week for coursework, in addition to classes. Admission into the course after completing the online test and upon tutor’s approval during the Needs Analysis Interview. For anyone who wants to improve Mandarin Chinese. This course may be suitable for re-starters with sufficient knowledge of words and characters.

**Indicative reading:** N/A

---

**Assessment:**

Exam (20%, duration: 1 hour).
Coursework (50%, 6 words) in the MT and LT.
Oral examination (30%) in the LT.

---

**LN8214**

**Mandarin: Level 5 (Legal Issues)**

This information is for the 2015/16 session.

**Teacher responsible:** Dr Lijing Shi Tower3, 601H

**Pre-requisites:** Students must have completed Mandarin: Level 5 (Standard) (LN719).

Student should have successfully completed LSE Level 5 or have reached high proficiency level of Chinese. They are expected to be able to communicate on rather complicated non-routine topics and recognise around 3000 characters.

**Course content:**

**Course Aim:**

The linguistic focus will continue to advance the four language skills: listening, speaking, reading and writing, meanwhile helping the students to gain substantial knowledge into vocabulary, syntactic structures and pragmatic usages widely used in legal discourse.

It features the general introduction into China’s legal system and its legal professions, with particular emphasis on Chinese civil and commercial laws. Authentic legal documents will be introduced extensively.

The course will enhance the students’ Chinese skills in legal contexts so as to prepare them for successful participation in their future professional communication.

**Communicative content:** The course is focused on the following communicative functions: Participating in discussion

- Logical argument
- Interaction/Exchange specific information in legal context
- Communication in legal context
- Reading and summarizing complex legal texts
- Writing letters, report and documents with legal elements
- Using language strategies to cope with specialized topics: i.e. law, business, politics and current issues.

**Structural Content:** This course will focus on the following grammatical areas:

- Mandarin pronunciation: Pinyin and tones
- Simplified characters
- Chinese advanced grammar review
- Specific grammatical aspects of topical texts
- Relevant grammatical issues for advanced and specialized communication
- Attributes
- Adverbials
- Appositives
- Regular group or individual translation of legal works
- Reading and summarizing complex legal texts
- Advanced language tasks with reference to case studies
- Advanced language tasks with reference to Contemporary Chinese laws
- Reading comprehension
- Oral presentation

The course will introduce 350 words used in legal discourse and 200 Chinese characters.

It will bring students to level C2 of CEFR.

**Teaching:**

Teaching: 8 hours of workshops in the MT. 11 hours of workshops in the LT. 1 hour of workshops in the ST.

**Formative coursework:** Students will be expected to produce 6 pieces of coursework in the MT and LT.

**Indicative reading:**

This book will focus on the following grammatical areas:

- Mandarin pronunciation: Pinyin and tones
- Simplified characters
- Chinese advanced grammar review
- Specific grammatical aspects of topical texts
- Relevant grammatical issues for advanced and specialized communication

**Assessment:**

Exam (20%, duration: 1 hour).
Coursework (50%, 6 words) in the MT and LT.
Oral examination (30%) in the LT.
LN822
Mandarin: Level 5 (China Issues)
This information is for the 2015/16 session.
Teacher responsible: Dr Lijing Shi
Pre-requisites: Students must have completed Mandarin: Level 5 (Standard) (LN719).
Course content: This course aims to develop students’ linguistic skills at a mastery level through studying the authentic materials on Chinese society (e.g. e-Commerce, wealth inequality, gender discrimination, migrant workers, etc.). The students will be given opportunities to learn the key vocabulary of current issues in China, and discuss the analysis of those issues. The course is communicative and interactive. The students are required to read authentic materials in the target language and learn to discuss, summarise and debate ideas and issues in China as well as the rest of the world.
Teaching: 8 hours of classes in the MT. 11 hours of classes in the LT.
1 hour of classes in the ST.
Formative coursework: Students will be expected to produce 6 essays in the MT and LT.
Indicative reading: Authentic materials.
Assessment: Continuous assessment (50%) in the MT, LT and ST. Oral examination (30%) and in class assessment (20%) in the LT.

LN823
Mandarin: Level 5 (Advanced Reading)
This information is for the 2015/16 session.
Teacher responsible: Dr Lijing Shi
Pre-requisites: Students must have completed Mandarin: Level 5 (Standard) (LN719).
Course content: This course includes advanced level of reading authentic materials - mainly taken from various resources such as FT financial times; BBC China and academic journals. The course focuses on skimming and scanning, summarising main themes and overall comprehension and vocabulary expansion.
Teaching: 8 hours of classes in the MT. 11 hours of classes in the LT.
1 hour of classes in the ST.
Formative coursework: Students will be expected to produce 6 pieces of coursework in the MT and LT.
Indicative reading: Authentic materials taken from FT Chinese, BBC: Chinese and academic journals.
Assessment: Continuous assessment (50%) in the MT, LT and ST. Oral examination (30%) and in class assessment (20%) in the LT.

LN818
Portuguese: Level One (Fast track)
This information is for the 2015/16 session.
Teacher responsible: Ms Benvinda Alves TW3 6.01
Availability: Available to Undergraduates, Postgraduates, LSE staff and outside clients.
Pre-requisites: No previous knowledge required. It may be suitable for re-starters. Demonstrate full commitment to regular attendance, completion of homework, completion of portfolio and all assessments. Dedicate at least two hours per week for coursework, in addition to classes. Admission into the course upon tutor’s approval during the information sessions. Student profile: students should be able to demonstrate a successful track record of learning Portuguese and facilitate further study of Portuguese.
Course aims: Course aims:
- To develop the ability to use Portuguese effectively for purposes of practical communication in familiar work and social contexts.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Additional:

Assessment: Continuous assessment (50%) in the MT, LT and ST. Oral examination (30%) in the LT and ST. In class assessment (20%) in the LT.

LN776

Russian: Level Four (Standard)

This information is for the 2015/16 session.

Teacher responsible: Dr Olga Sobolev C614 and Mrs Irina Forbes C614

No previous knowledge of Russian required, but students should demonstrate commitment to regular attendance, completion of homework and all assessments; dedicate at least two hours per week for coursework in addition to classes. Admission into the course upon tutor's approval during the information sessions. Students are expected to be experienced language learners and/or to have a good command in two languages.

Course content:

Course Aim:
- To bring students’ knowledge of written and spoken Russian up to low intermediate level, corresponding to A1/A2 of CEFR.
- To develop an ability to use Russian effectively for the purposes of practical communication in familiar work and social contexts.
- To deal with a variety of predictable simple language tasks (using limited vocabulary and linguistic structures) to meet the needs of everyday situations and topics.
- To establish linguistic skills and attitudes required for promoting and facilitating further study of Russian.

Communicative content: At the end of the programme students will be able to demonstrate competence in the use of communicative functions in the four skills (oral, aural, reading, writing) by:
- Showing competence in the use of complex and technical language in a variety of contexts and with a substantial requirement to select and adapt appropriate language strategies;
- Being able to respond to a wide range of spontaneous foreign language interventions;
- Being able to use a variety of sources (print, audio, video, IT-based);
- Handling factual knowledge within specific perspective;
- Being able to produce, in a coherent and structured way, an oral presentation and a written work within the framework of studied topics;
- Being able to grasp the main ideas of a document in a target language and produce a coherent summary in English.

Structural Content:
- This course is focused on discussion, gist translation and essay work, based on extracts from newspaper articles, recorded materials and topical texts.
- All major grammatical areas are revised and covered in depth; particular attention is paid to syntax. In written work the emphasis is on structure and register of the language.
- The language command in these areas is expected to be appropriate to the level and task with the emphasis on active usage.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: The course is based on the current Russian press and media materials.

Optional:

Assessment: Continuous assessment (50%) in the MT and LT. Oral examination (30%) and in class assessment (20%) in the LT.

Teaching and Learning Centre Courses
## Teaching and Learning Centre Courses

### Key to TLC course guides
- (H) means a half-unit course
- (C) means this course is capped
- (n/a 15/16) means not available in the 2015/16 academic year
- (M) means Michaelmas Term
- (L) means Lent Term
- (S) means Summer Term

### Undergraduate Learning Development Programme
**This information is for the 2015/16 session.**

**Teacher responsible:** Teaching and Learning Centre staff

**Availability:** All undergraduate students are welcome and all events are free of charge.

**Pre-requisites:** No previous knowledge required.

**Course content:** This is a year-long series of lectures and workshops designed to complement undergraduate students’ academic learning. Topics include:
- How to study at LSE;
- How to build confidence for academic writing;
- How to write essays at LSE;
- How to present with skill and confidence;
- How to be mindful and reduce stress.

**Teaching:** All events follow the dates of the LSE teaching year. Further details, and links to booking pages, can be found at Undergraduate Learning Development Programme [lse.ac.uk/intranet/LSEServices/UndergraduateLearningDevelopmentProgramme.aspx](http://lse.ac.uk/intranet/LSEServices/UndergraduateLearningDevelopmentProgramme.aspx).

**Assessment:** There is no formal assessment for this course.

### MSc Learning Development Programme
**This information is for the 2015/16 session.**

**Teacher responsible:** Teaching and Learning Centre staff

**Availability:** All MSc students are welcome and all events are free of charge.

**Pre-requisites:** No previous knowledge required.

**Course content:** This is a year-long series of lectures and workshops designed to complement MSc students’ academic learning. Topics include:
- How to study at LSE;
- How to build confidence for academic writing;
- How to write essays at LSE;
- How to present with skill and confidence;
- How to be mindful and reduce stress;
- How to get started on your MSc dissertation.

**Teaching:** All events follow the dates of the LSE teaching year. Further details, and links to booking pages, can be found at MSc Learning Development Programme [lse.ac.uk/intranet/LSEServices/TLCMScStudents/MScLearningDevelopmentProgramme.aspx](http://lse.ac.uk/intranet/LSEServices/TLCMScStudents/MScLearningDevelopmentProgramme.aspx).

**Assessment:** There is no formal assessment for this course.

### Academic Development Programme
**This information is for the 2015/16 session.**

**Teacher responsible:** Teaching and Learning Centre staff

**Availability:** All LSE academic and research staff are welcome and all events are free of charge, but booking for each event is required.

**Pre-requisites:** For some events, participants are requested to bring along current work and/or be prepared to participate actively.

**Course content:** This year-long series of interdisciplinary workshops is designed for academic and research staff who are keen to pursue professional development and enhance the impact of their teaching and research. Workshop subjects include:
- Understanding student learning: theory and practice;
- The core elements of good course design;
- Lecturing at LSE: new ideas and approaches;
- Research methods: teaching practice and exchange;
- Using the voice to engage and inspire.

**Teaching:** All events follow the dates of the LSE teaching year. Further details, and links to booking pages, can be found at Academic Development Programme [lse.ac.uk/intranet/LSEServices/TLC/academicStaff/AcademicDevelopmentProgramme.aspx](http://lse.ac.uk/intranet/LSEServices/TLC/academicStaff/AcademicDevelopmentProgramme.aspx).

**Assessment:** There is no formal assessment for this course.

### Postgraduate Certificate in Higher Education for GTAs
**This information is for the 2015/16 session.**

**Teacher responsible:** Dr Claudine Provencher (Teaching and Learning Centre)

**Availability:** All participants will be working as graduate teaching assistants and must be teaching a minimum of 20 contact hours at LSE during the academic year of enrolment.

**Pre-requisites:** Participants will be asked to complete an initial task before being enrolled.

**Course content:** The course has two levels, Associate and Full, both of which are built around a series of workshops, practical assignments and teaching observations.

**Associate level (Year One) requires the completion of modules on:**
- small group teaching;
- evaluating teaching;
- student learning.

Successful participants will be awarded the Postgraduate Certificate in Higher Education Associate level and are eligible for HEA accreditation at the Associate Fellow level.

**Full level (Year Two) requires the completion of modules on:**
- assessment and feedback;
- course design.

Successful participants will be awarded the Postgraduate Certificate in Higher Education Full level and are eligible for HEA accreditation at the Fellow level.

**Teaching:** All events follow the dates of the LSE teaching year. Further details can be found at Postgraduate Certificate in Higher Education for GTAs [lse.ac.uk/intranet/LSEServices/TLC/graduateTeachingAssistants/PGCertHEforGTAs.aspx](http://lse.ac.uk/intranet/LSEServices/TLC/graduateTeachingAssistants/PGCertHEforGTAs.aspx).

**Assessment:** Participants are required to submit a portfolio of their course work in either June or November which will be assessed.
Postgraduate Certificate in Higher Education
Career Track: Associate Level

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Gordon (Teaching and Learning Centre)

Availability: New career track members of faculty with fewer than three years' teaching experience in higher education and who do not hold an equivalent teacher development qualification have been required since 2009 to take the Associate level Postgraduate Certificate in Higher Education before passing Interim Review.

Faculty members with teaching responsibilities who have completed their PhD and have at least two to three years' teaching experience may also take this programme.

Pre-requisites: As above.

Course content: This is a one year practice based course requiring participants to prepare a portfolio on their evolving teaching practice including:

• short written tasks on effective disciplinary teaching and student learning;
• a short project on evaluating teaching;
• the development of new and revised course designs;
• two teaching observations.

Participants are strongly encouraged to draw on their previous teaching experience both during discussions and in their assignments and to consider how this informs their teaching at LSE.

Teaching: In addition to the New Academic Induction Programme in September, participants have the opportunity to attend regular workshops offered as part of LSE’s Academic Development Programme lse.ac.uk/intranet/LSEServices/TLC/academicStaff/AcademicDevelopmentProgramme.aspx which explore different aspects of teaching and learning linked to assignments.

Assessment: Participants are required to submit a portfolio of their course work in either June or November which will be assessed.

Successful candidates will be awarded the Postgraduate Certificate of Higher Education Associate level and are eligible for HEA accreditation at the Associate Fellow level.
