MSc Learning Development Programme	783
Academic Development Programme	783
Postgraduate Certificate in Higher Education for GTAs	783
Postgraduate Certificate in Higher Education Career Track: Associate Level	784

Undergraduate Programme Regulations

Key to Undergraduate Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 15/16) means not available in the 2015/16 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

BSc in Accounting and Finance

Programme Code: UBAF

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|---------|--|
| 1 | AC100 | Elements of Accounting and Finance |
| 2 | EC100 | Economics A or |
| | EC102 | Economics B § |
| 3 | MA107 | Quantitative Methods (Mathematics) (H) and |
| | ST107 | Quantitative Methods (Statistics) (H) or |
| | ST102 | Elementary Statistical Theory or |
| | ST108 | Statistical Methods for the Social Sciences * |
| 4 | One of: | |
| | MA100 | Mathematical Methods (must be selected if ST102 taken under paper 3) or |
| | MA110 | Basic Quantitative Methods (must be selected if ST108 taken under paper 3)* |
| | | or an approved paper taught outside the Department |

Year 2

- | | | |
|---|---------------------|--|
| 5 | AC211 | Managerial Accounting |
| 6 | FM212 | Principles of Finance |
| 7 | Either EC201 | Microeconomic Principles I or EC202 |
| | | Microeconomic Principles II or EC210 Macroeconomic Principles |
| 8 | One of: | |
| | Either EC220 | Introduction to Econometrics or EC221 Principles of Econometrics |
| | Either MG203 | Organisational Theory and Behaviour (formerly ID200) (n/a 15/16), LL209 Commercial Law or MG211 Operational Research Methods (formerly OR202) |
| | | A student may take approved papers to the value of one unit not listed above (normally papers available only to second or third year students), but permission will need to be sought from the Departmental Tutor. |

Year 3

- | | | |
|----|------------------------------------|---|
| 9 | AC330 | Financial Accounting, Analysis and Valuation |
| 10 | Either AC310 | Management Accounting, Financial Management and Organizational Control or AC340 Auditing, Governance and Risk Management |
| 11 | Either FM300 | Corporate Finance, Investments and Financial Markets or FM320 Quantitative Finance |
| 12 | One from the selection list below: | |
| | | (if not already taken under papers 10 & 11): |
| | AC310 | Management Accounting, Financial Management and Organizational Control |
| | AC340 | Auditing, Governance and Risk Management |
| | FM300 | Corporate Finance, Investments and Financial Markets |
| | FM320 | Quantitative Finance |
| | | (if not already taken under papers 7 or 8): |
| | EC201 | Microeconomic Principles I |
| | EC210 | Macroeconomic Principles |
| | EC220 | Introduction to Econometrics or EC221 Principles of Econometrics |
| | | (if not already taken under paper 8): |
| | EH207 | The Making of an Economic Superpower: China since 1850 |

- | | |
|-------|--|
| MG203 | Organisational Theory and Behaviour (formerly ID200) |
| LL209 | Commercial Law |
| MG211 | Operational Research Methods (formerly OR202) |
| | Or a course or courses to the value of one unit from the following (if not already taken under paper 8): |
| EC315 | International Economics |
| EH240 | Business and Economic Performance since 1945: Britain in International Context |
| LN320 | Spanish Language and Society 5 (Mastery) |
| LN330 | French Language and Society 5 (Mastery) |
| MA207 | Further Quantitative Methods (H) |
| MA212 | Further Mathematical Methods |
| MA300 | Game Theory |
| MA301 | Game Theory 1 (H) |
| MA303 | Chaos in Dynamic Systems (H) |
| MG206 | Firms, Management and Competitive Advantage (H) |
| MG302 | Topics in Management Research (H) |
| SO203 | Political Sociology |
| SO212 | Work, Management and Globalisation |
| ST201 | Statistical Models and Data Analysis (H) |
| ST203 | Statistics for Management Sciences |
| ST307 | Aspects of Market Research (H) |
| ST308 | Bayesian Inference (H) |

In exceptional circumstances a student may take a course not listed above (normally papers available only to second or third year students), but permission will need to be sought from the Departmental Tutor.

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

* ST108 and MA110 must be taken by those students who have not studied Mathematics beyond GCSE level or equivalent.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification

This programme is externally accredited by the ICAEW, ICAS, CIMA and ACCA. Further information is available from the Department of Accounting (accounting@lse.ac.uk) or the BSc Finance and Accounting programme brochure lse.ac.uk/accounting/pdf/Final-BSc-Accounting-Finance-brochure-2014.pdf (pdf).

BSc in Actuarial Science

Programme Code: UBACT2

For first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|---------------------|---|
| 1 | ST102 | Elementary Statistical Theory |
| 2 | MA100 | Mathematical Methods |
| 3 | Either AC104 | Elements of Accounting, Financial Institutions and Financial Management * |
| | or MA103 | Introduction to Abstract Mathematics |
| 4 | EC100 | Economics A or |
| | EC102 | Economics B § |

Year 2

- | | | |
|---|--|---|
| 5 | ST202 | Probability, Distribution Theory and Inference |
| 6 | MA212 | Further Mathematical Methods |
| 7 | ST226 | Actuarial Investigations: Financial (H) and |
| | ST227 | Survival Models (H) |
| 8 | Courses to the value of one unit from: | |
| | AC104 | Elements of Accounting, Financial Institutions and Financial Management |
| | FM212 | Principles of Finance * |
| | MA103 | Introduction to Abstract Mathematics |
| | MA203 | Real Analysis |
| | | Or courses to the value of one unit - to be discussed with the academic advisor |

Year 3

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

* FM212 could lead to an exemption of CT2 for students who have chosen AC104

** Either ST300 or ST308 needs to be chosen for exemption of CT6.

Students can replace 10, 11 or 12 with subjects to the value of one unit approved by their tutor, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification

This programme is externally accredited by the Institute and Faculty of Actuaries. Further information is available on the Department of Statistics website lse.ac.uk/statistics/study/prospective/UG-Programmes/exemptions.aspx.

Programme Code: UBANLL2

For all first, second and third year students in 2015-16

Year 1

Year 2

Year 3

Notes No more than one unit taken under papers 8 and 12 may be selected from Anthropology Selection List A. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course

Anthropology Selection List A

Anthropology Selection List B

Anthropology Selection List C

AN300	Advanced Theory of Social Anthropology
AN301	The Anthropology of Religion

Law Selection List

LL201	Administrative Law
LL202	Commercial Contracts
LL203	Law of Business Associations
LL204	Advanced Torts
LL205	Medical Law
LL207	Civil Liberties and Human Rights
LL210	Information Technology and the Law
LL212	Conflict of Laws
LL221	Family Law
LL233	Law of Evidence
LL241	European Legal History
LL242	International Protection of Human Rights
LL250	Law and the Environment
LL251	Intellectual Property Law
LL253	The Law of Corporate Insolvency
LL257	Labour Law
LL259	Legal and Social Changes Since 1750
LL272	Outlines of Modern Criminology (H)
LL278	Public International Law
LL284	Sentencing and Treatment of Offenders (H)
LL293	Taxation
LL295	Media Law
LL300	Competition Law
LL305	Jurisprudence

This programme is externally accredited by the Law Society. Further information is available from the Department of Anthropology either by emailing anthropology.enquiries@lse.ac.uk or accessing the Anthropology Department website lse.ac.uk/anthropology/degree_programmes/degree_programmes_home.aspx.

BSc in Business Mathematics and Statistics

Programme Code: UBBMS2

For first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|---|-------------------------------|
| 1 | ST102 | Elementary Statistical Theory |
| 2 | MA100 | Mathematical Methods |
| 3 | Either EC100 Economics A* or EC102 Economics B § | |
| 4 | Either AC100 Elements of Accounting and Finance or MA103 Introduction to Abstract Mathematics | |

Year 2

- | | | |
|---|---|--|
| 5 | MA212 | Further Mathematical Methods |
| 6 | ST205 | Sample Surveys and Experiments (H) and ST211 Applied Regression (H) |
| 7 | Courses to the value of one unit from: | |
| | MA103 | Introduction to Abstract Mathematics |
| | MA203 | Real Analysis (H) |
| | MA208 | Optimisation Theory (H) |
| | MA209 | Differential Equations (H) |
| | MA210 | Discrete Mathematics (H) |
| | MA211 | Algebra and Number Theory (H) |
| | MG211 | Operational Research Methods (formerly OR202) |
| | ST202 | Probability, Distribution Theory and Inference |
| | ST226 | Actuarial Investigations - Financial (H) |
| | ST227 | Survival Models (H) |
| 8 | Courses to the value of one unit from: | |
| | AC100 | Elements of Accounting and Finance |
| | AC211 | Managerial Accounting |
| | EC202 | Microeconomic Principles II (only if EC102 has previously been taken) |
| | EC210 | Macroeconomic Principles (only if EC102 has previously been taken) |
| | FM212 | Principles of Finance |
| | GV101 | Introduction to the Study of Politics |
| | GY100 | Introduction to Geography |
| | MG203 | Organisational Theory and Behaviour (formerly ID200) (n/a 15/16) |
| | MG206 | Firms, Management and Competitive Advantage (H) |
| | MG207 | Economics for Management |
| | MG302 | Topics in Management Research (H) |
| | PH201 | Philosophy of Science |
| | PS102 | Social Psychology |
| | SA103 | Population, Economy and Society |
| | SO100 | Social Theory |
| | SO212 | Work, Management and Globalisation |
| | Students may also take a Language course unit at least at intermediate level, or a course taught outside the Department of Mathematics, Statistics and Operations Research with the approval of the Course Tutor. | |

Year 3

- | | | |
|---|--|--|
| 9 | Courses to the value of one unit from the following: | |
| | ST300 | Regression and Generalised Linear Models (H) |
| | ST301 | Actuarial Mathematics: (Life) (H) (formerly ST305) |
| | ST302 | Stochastic Processes (H) |
| | ST304 | Time Series and Forecasting (H) |
| | ST306 | Actuarial Mathematics: General (H) |
| | ST307 | Aspects of Market Research (H) (not if ST327 is taken) |
| | ST308 | Bayesian Inference (H) |
| | ST312 | Applied Statistics Project (H) |
| | ST327 | Market Research: An Integrated Approach (not |

if ST307 is taken)

ST330 Stochastic and Actuarial Methods in Finance (can only be taken in conjunction with ST302)

10 Courses to the value of one unit from the list below or from paper 9 (above):

- | | |
|-------|--|
| MA203 | Real Analysis (H) |
| MA208 | Optimisation Theory (H) |
| MA209 | Differential Equations (H) |
| MA210 | Discrete Mathematics (H) |
| MA211 | Algebra and Number Theory (H) |
| MA300 | Game Theory (not if MA301 also taken) |
| MA301 | Game Theory I (H) (not if MA300 also taken) |
| MA303 | Chaos in Dynamical Systems (H) |
| MA305 | Optimisation in Function Spaces (H) |
| MA310 | Mathematics of Finance and Valuation (H) |
| MA313 | Probability for Finance (H) |
| MA314 | Algorithms in Java (H) |
| MA315 | Algebra and its Applications (H) |
| MA317 | Complex Analysis (H) |
| MA318 | History of Mathematics in Finance and Economics (H) |
| MA319 | Partial Differential Equations (H) |
| MG308 | Simulation Modelling and Analysis (H) (formerly OR307) |
| MG313 | Practical Optimisation Modelling (H) (third year only) |

11 Courses to the value of one unit from:

- | | |
|--|---|
| AC211 | Managerial Accounting |
| AC310 | Management Accounting, Financial Management and Organizational Control |
| AC330 | Financial Accounting, Analysis and Valuation |
| AC340 | Auditing, Governance and Risk Management |
| EC202 | Microeconomic Principles II |
| EC210 | Macroeconomic Principles |
| EC313 | Industrial Economics |
| EC321 | Monetary Economics |
| FM212 | Principles of Finance |
| FM300 | Corporate Finance, Investments and Financial Mathematics |
| FM320 | Quantitative Finance |
| GV225 | Public Choice and Politics |
| LL209 | Commercial Law |
| LL210 | Information Technology and the Law |
| MG203 | Organisational Theory and Behaviour (formerly ID200) |
| MG206 | Firms, Management and Competitive Advantage (H) |
| MG207 | Economics for Management |
| MG302 | Topics in Management Research (H) |
| MG307 | International Context of Management (H) (formerly MN303) (Cannot be taken with MG303) |
| MG314 | Principles of Marketing (H) (third year only) |
| MG315 | Marketing Action Learning Project (H) (third year only) |
| PH201 | Philosophy of Science |
| PH311 | Philosophy of Economics (formerly PH211) |
| SA250 | Demographic Description and Analysis |
| SO212 | Work, Management and Globalisation |
| Students may also take a Language course unit at least at intermediate level, or a course taught outside of the Departments of Mathematics and Statistics with the approval of the Course Tutor. | |

12 Any courses to the value of one unit from the options listed under papers 9, 10 and 11 or from the list below:

- | | |
|-------|---|
| EC221 | Principles of Econometrics |
| MG211 | Operational Research Methods (formerly OR202) |
| ST202 | Probability, Distribution Theory and Inference (if not already taken under paper 7) |
| ST226 | Actuarial Investigations: Financial (H) |
| ST227 | Survival Models (H) |

Notes

§ Course allocation dependant on Economics A-level or

8 Undergraduate Programme Regulations

equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Econometrics and Mathematical Economics

Programme Code: UBEM

For first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 EC100 Economics A **or**
EC102 Economics B §
- 2 MA100 Mathematical Methods
- 3 ST102 Elementary Statistical Theory
- 4 An approved paper taught outside the Department of Economics

Year 2

- 5 EC202 Microeconomic Principles II
- 6 EC221 Principles of Econometrics
- 7 **Either** EC210 Macroeconomic Principles **or** MA212 Further Mathematical Methods **or** Courses to the value of one unit from: MA203 Real Analysis (H) **and** an appropriate Mathematics second half module, with the permission of the Department Tutor
- 8 **Either** ST202 Probability, Distribution Theory and Inference **or** an approved paper taught outside the Department

Year 3

- 9 **Either** EC309 Econometric Theory **or** EC319 Economic Theory and its Applications **or** EC333 Problems of Applied Econometrics
- 10 One from the Selection list below
- 11 **Either** a further paper from 9 above **or** an approved paper from the Selection list below
- 12 EC331 Project in Quantitative Economics
In exceptional circumstances a student may substitute an outside paper for paper 11. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

Econometrics and Mathematical Economics Selection list

- AC211 Managerial Accounting
- AC310 Management Accounting, Financial Management and Organisational Control
- AC340 Auditing, Governance and Risk Management (Students may take only one of AC211, AC310 and AC340 in year 3)
- FM212 Principles of Finance
- FM300 Corporate Finance, Investments and Financial Markets (if FM212 taken in second year)
- FM320 Quantitative Finance (if FM212 taken in second year) (Students may take only one of FM212, FM300 and FM320 in year 3)
- EC210 Macroeconomic Principles (if not taken under 7 above)
- EC301 Advanced Economic Analysis
- EC302 Political Economy
- EC303 Economic Policy Analysis
- EC307 Development Economics
- EC310 Behavioural Economics
- EC311 History of Economics: How Theories Change
- EC313 Industrial Economics
- EC315 International Economics
- EC317 Labour Economics

- EC321 Monetary Economics
- EC325 Public Economics
- MA300 Game Theory
- MG211 Operational Research Methods (formerly OR202)
- MG313 Practical Optimisation Modelling (H) (third year only)
- PH311 Philosophy of Economics
- ST202 Probability, Distribution Theory and Inference (if not taken under 8 above)

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Economic History

Programme Code: UBEH

For first year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 EH101 The Internationalisation of Economic Growth, 1870 to the Present Day
- 2 **Either** EC100 Economics A **or** EC102 Economics B §
- 3 EH102 Pre-industrial Economic History
- 4 An approved paper from outside the Department

Year 2

- 5 EH237 Theories and Evidence in Economic History
- 6 & 7 Two from:
EH204 Money and Finance: From the Middle Ages to Modernity
EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)
EH207 The Making of an Economic Superpower: China since 1850
EH211 Africa and the World Economy, 1500-2000
EH225 Latin America and the International Economy (n/a 15/16)
EH238 The Industrial Revolution
EH240 Business and Economic Performance since 1945: Britain in International Context
- 8 Another course from papers 6 and 7, or a level 200 or 300 course from outside the Economic History Department

Year 3

- 9 & 10 Two from:
EC311 History of Economics: How Theories Change
EH301 The Origins of the World Economy, 1450-1750 (n/a 15/16)
EH304 The Economic History of North America: from Colonial Times to the Cold War
EH306 Monetary and Financial History since 1750 (n/a 15/16)
EH307 The Economic History of South Asia, 1600-2000
EH308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries
EH325 Issues of Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth
EH326 Innovation and its Finance in the 19th and 20th Centuries
EH327 China's Traditional Economy and its Growth in the Very Long-Term
- 11 A further paper taught by the Department of Economic History from those listed under papers 7 or 9 & 10
- 12 EH390 Dissertation in Economic or Social History

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of

Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Economic History

Programme Code: UBEH

For second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 EH101 The Internationalisation of Economic Growth, 1870 to the Present Day

2 **Either** EC100 Economics A **or** EC102 Economics B

3 One from:

HY113 From Empire to Independence: the Extra-European World in the Twentieth Century

HY116 International History since 1890

An approved paper from outside the Department

Year 2

5 EH237 Theories and Evidence in Economic History

6 & 7 Two from:

EH204 Money and Finance: From the Middle Ages to Modernity

EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)

EH207 The Making of an Economic Superpower: China since 1850

EH211 Africa and the World Economy, 1500-2000

EH225 Latin America and the International Economy (n/a 15/16)

EH238 The Industrial Revolution

EH240 Business and Economic Performance since 1945: Britain in International Context

8 Another course from papers 6 and 7, or a level 200 or 300 course from outside the Economic History Department

Year 3

9 & 10 Two from:

EC311 History of Economics: How Theories Change

EH301 The Origins of the World Economy, 1450-1750 (n/a 15/16)

EH304 The Economic History of North America: from Colonial Times to the Cold War

EH306 Monetary and Financial History since 1750 (n/a 15/16)

EH307 The Economic History of South Asia, 1600-2000

EH308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

EH325 Issues of Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

EH326 Innovation and its Finance in the 19th and 20th Centuries

EH327 China's Traditional Economy and its Growth in the Very Long-Term

11 A further paper taught by the Department of Economic History from those listed under papers 7 or 9 & 10

12 EH390 Dissertation in Economic or Social History

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Economic History with Economics

Programme Code: UBEHWEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 EC100 Economics A **or**

EC102 Economics B §

2 EH101 The Internationalisation of Economic Growth, 1870 to the Present Day

3 MA100 Mathematical Methods

4 An approved paper taught outside the Departments of Economics and Economic History

Year 2

5 **Either** EC201 Microeconomic Principles I **or** EC202 Microeconomic Principles II **or** EC210 Macroeconomic Principles

6 EH237 Theories and Evidence in Economic History

7 One from:

EH204 Money and Finance: From the Middle Ages to Modernity

EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)

EH207 The Making of an Economic Superpower: China since 1850

EH211 Africa and the World Economy, 1500-2000

EH225 Latin America and the International Economy (n/a 15/16)

EH238 The Industrial Revolution

EH240 Business and Economic Performance since 1945: Britain in International Context

8 An approved paper taught outside the Departments of Economic History and Economics (normally papers available to 2nd and 3rd year students) **or** a further paper from 7 above

Year 3

9 One from:

Either EC201 Microeconomic Principles I **or** EC202 Microeconomic Principles II **or** EC210 Macroeconomic Principles

10 One from:

EC311 History of Economics: How Theories Change

EH301 The Origins of the World Economy, 1450-1750 (n/a 15/16)

EH304 The Economic History of North America: From Colonial Times to the Cold War

EH306 Monetary and Financial History since 1750 (n/a 15/16)

EH307 The Economic History of South Asia, 1600-2000

EH308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

EH325 Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

EH326 Innovation and its Finance in the 19th and 20th Centuries

EH327 China's Traditional Economy and its Growth in the Very Long-Term

11 **Either** a further paper from 7 above **or** a further paper from 10 above

12 EH390 Dissertation in Economic or Social History

Notes Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Economics

Programme Code: UBEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|---|-------------------------------|
| 1 | EC100 | Economics A or |
| | EC102 | Economics B § |
| 2 | MA100 | Mathematical Methods |
| 3 | ST102 | Elementary Statistical Theory |
| 4 | An approved paper taught outside the Department | |

Year 2

- | | | |
|---|--|--|
| 5 | EC201 | Microeconomic Principles I or EC202 |
| | | Microeconomic Principles II |
| 6 | EC210 | Macroeconomic Principles |
| 7 | Either EC220 Introduction to Econometrics or | |
| | EC221 | Principles of Econometrics |
| 8 | An approved paper taught outside the Department | |

Year 3

- | | | |
|-----------|--|--|
| 9, 10, 11 | Three from the Economics Selection List | |
| 12 | Either an additional paper from the Economics Selection List | |
| | or a paper from the list below: | |
| | AC211 | Managerial Accounting |
| | AC310 | Management Accounting, Financial Management and Organizational Control |
| | AC340 | Auditing, Governance and Risk Management |
| | EH207 | The Making of an Economic Superpower: China since 1850 |
| | EH225 | Latin America and the International Economy (n/a 15/16) |
| | EH240 | Business and Economic Performance since 1945: Britain in International Context |
| | EH304 | The Economic History of North America: From Colonial Times to the Cold War |
| | GV227 | Politics and Economic Policy |
| | GY201 | Urban and Spatial Economic Analysis I |
| | GY300 | Theories of Regional Development and Change |
| | IR204 | International Political Economy (H) |
| | LL209 | Commercial Law |
| | MA212 | Further Mathematical Methods |
| | MA300 | Game Theory |
| | MG211 | Operational Research Methods (formerly OR202) |
| | MG313 | Practical Optimisation Modelling (H) (third year only) |

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

In exceptional circumstances a student may substitute an outside paper for paper 12. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

Economics Selection List

- | | |
|-------|---|
| EC301 | Advanced Economic Analysis |
| EC302 | Political Economy |
| EC303 | Economic Policy Analysis |
| EC307 | Development Economics |
| EC310 | Behavioural Economics |
| EC311 | History of Economics: How Theories Change |
| EC313 | Industrial Economics |
| EC315 | International Economics |
| EC317 | Labour Economics |
| EC319 | Economic Theory and its Applications |
| EC321 | Monetary Economics |

- | | |
|--------------|--|
| EC325 | Public Economics |
| EC333 | Problems of Applied Econometrics |
| FM212 | Principles of Finance |
| FM300 | Corporate Finance, Investments and Financial Markets (if FM212 taken in 2nd year) * |
| FM320 | Quantitative Finance (if FM212 taken in 2nd year) * |
| PH311 | Philosophy of Economics (formerly PH211) |
| Notes | § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information. |
| | * Only one of FM300 and FM320 may be chosen for papers 9-11; students wishing to choose both must select the second as Paper 12. |

BSc in Economics and Economic History

Programme Code: UBCEH

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|-------|--|
| 1 | EC100 | Economics A or |
| | EC102 | Economics B § |
| 2 | EH101 | The Internationalisation of Economic Growth, 1870 to the Present Day |
| 3 | MA100 | Mathematical Methods |
| 4 | ST102 | Elementary Statistical Theory |

Year 2

- | | | |
|---|--|--|
| 5 | One from:
Either EC201 Microeconomic Principles I
or EC202 Microeconomic Principles II
or EC210 Macroeconomic Principles | |
| 6 | Either EC220 Introduction to Econometrics or EC221 Principles of Econometrics | |
| 7 | EH237 Theories and Evidence in Economic History | |
| 8 | One from:

- EH326 Innovation and its Finance in the 19th and 20th Centuries
- EH327 China's Traditional Economy and its Growth in the Very Long-Term
- 12 EH390 Dissertation in Economic or Social History
- Notes** § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
- LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Economics Selection List A

- EC301 Advanced Economic Analysis
- EC302 Political Economy
- EC303 Economic Policy Analysis
- EC307 Development Economics
- EC311 History of Economics: How Theories Change
- EC313 Industrial Economics
- EC315 International Economics
- EC317 Labour Economics
- EC321 Monetary Economics
- EC325 Public Economics
- EC333 Problems of Applied Econometrics

BSc in Economics with Economic History

Programme Code: UBCEWEH

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 EC100 Economics A **or**
EC102 Economics B §
- 2 EH101 The Internationalisation of Economic Growth, 1870 to the Present Day
- 3 MA100 Mathematical Methods
- 4 ST102 Elementary Statistical Theory

Year 2

- 5 **Either** EC201 Microeconomic Principles I **or** EC202 Microeconomic Principles II
- 6 EC210 Macroeconomic Principles
- 7 EH237 Theories and Evidence in Economic History
- 8 One from:
EH204 Money and Finance: From the Middle Ages to Modernity
EH205 Towns, Society and Economy in England and Europe, 1450-1750 (n/a 15/16)
EH207 The Making of an Economic Superpower: China since 1850
EH225 Latin America and the International Economy (n/a 15/16)
EH238 The Industrial Revolution
EH240 Business and Economic Performance since 1945: Britain in International Context

Year 3

- 9 & 10 Two from:
Either EC220 Introduction to Econometrics **or** EC221 Principles of Econometrics
EC301 Advanced Economic Analysis
EC302 Political Economy
EC303 Economic Policy Analysis
EC307 Development Economics
EC310 Behavioural Economics
EC311 History of Economics: How Theories Change
EC313 Industrial Economics
EC315 International Economics
EC321 Monetary Economics
EC325 Public Economics

- 11 One from:
EH301 The Origins of the World Economy, 1450-1750 (n/a 15/16)
EH304 The Economic History of North America: From Colonial Times to the Cold War
EH308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries
EH325 Issues of Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth
EH326 Innovation and its Finance in the 19th and 20th Centuries
- 12 **Either** An approved paper taught outside the Departments of Economics and Economic History **or** EH390 Dissertation in Economic or Social History
- Notes** § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
- LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Environmental Policy with Economics

Programme Code: UBENPOWEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 GY120 Environmental Change: Past, Present and Future
- 2 GY121 Sustainable Development
- 3 EC100 Economics A **or**
EC102 Economics B §
- 4 MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H)

Year 2

- 5 GY220 Environment: Science and Society

| 11 & 12 | Two from: | |
| | GY300 | Theories of Regional Development and Change |
| | GY301 | The Political Geography of Development and the South |
| | GY302 | Urban Development: Politics, Policy and Planning |
| | GY303 | The Geography of Gender: Global Perspectives |
| | GY306 | Geographies of Race |
| | GY324 | Environmental Governance |
| | GY325 | Environment and Development |
| | GY350 | Independent Research Project |
| | One other Geography course not taken under 7 & 8 | |
| | An approved Economics course including: | |
| | EC307 | Development Economics |
| | EC313 | Industrial Economics |
| | EC325 | Public Economics |

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Level 1 courses and modern language courses are not permitted as part of this degree programme in Years 2 and 3. Students wishing to study a modern language are encouraged to take one of the LSE Language Centre's extra-curricular courses.

BSc in Government

Programme Code: UBGV

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|-------|-----------------------------------|
| 1 | GV101 | Introduction to Political Science |
| 2 | GV100 | Introduction to Political Theory |

- | | |
|---|--|
| 3 | An approved course taught outside the Department |
| 4 | An approved course taught outside the Department |

Year 2

- | | |
|---------|---|
| 5, 6, 7 | Any three courses from Government list A |
| 8 | An approved course taught outside the Department (note: if either GV100 or GV101 was not taken in year 1, this outstanding course must imperatively be taken under this paper in the second year) |

Year 3

- | | |
|----|--|
| 9 | Either GV390 Government Dissertation Option Or A course from Government list B |
| 10 | Any course from Government list A |
| 11 | Any course from Government list A or list B |
| 12 | Either A further course from Government list A Or An approved course taught outside the Department |
- Notes** LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A

- | | |
|-------|--|
| GV225 | Public Choice and Politics |
| GV227 | Politics of Economic Policy |
| GV245 | Democracy and Democratisation |

EC311 History of Economics: How Theories Change
EC313 Industrial Economics
EC315 International Economics
EC321 Monetary Economics
EC325 Public Economics

BSc in Government and History

Programme Code: UBGVHY

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 **Either** GV101 Introduction to Political Science **or** GV100 Introduction to Political Theory
2 One from:
HY113 From Empire to Independence: the Extra-European World in the Twentieth Century
HY116 International History since 1890
HY118 Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800
3 **Either** the course not taken under 1 **or** a further course from 2
4 An approved course taught outside the Departments of Government and International History

Year 2

- 5 One from:
GV100 Introduction to Political Theory (compulsory if not taken in Year 1)
GV101 Introduction to Political Science (compulsory if not taken in Year 1)
An approved course from the Government list A (if both GV100 and GV101 taken in year 1)
6 Any course from Government list A
7 & 8 Two courses from the History list A

Year 3

- 9 **Either** GV390 Government Dissertation Option *
Or A course from Government list B
10 Any course from the History list B
11 **Either** Any course from Government list A
Or Any course from the History list B
Or HY300 Dissertation *
12 **Either** Any course from Government list A
Any course from the History list A or list B
An approved course taught outside the Departments of Government and International History

Notes

* The following courses are mutually exclusive and only one of them can be chosen: GV390 and HY300.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A

- GV225 Public Choice and Politics
GV227 Politics of Economic Policy
GV245 Democracy and Democratisation
GV247 Theories and Problems of Nationalism

For further information contact the Law Department lawdepartment@lse.ac.uk.

BSc in Management**Programme Code:** UBMG**For all first year students in 2015-16****Paper Course number and title**

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1	Either AC102 Elements of Financial Accounting (H) or AC103 Elements of Management Accounting and Financial Management (H)*
	MG101 Core Business Disciplines I: Finance and Operations Management (H)
2	EC100 Economics A or EC102 Economics B §
3	MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H)
4	MG100 Leadership and Communication in Teams (H) and MG102 Organisational Behaviour (H)

Year 2

5	MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems
6	MG207 Economics for Management
7	MG205 Learning from Quantitative Data
8	Courses to the value of one unit from the options list below.

Year 3

9	MG301 Strategy
10 & 11	Courses to the value of two units from the options list below.
12	Courses to the value of one unit from the courses in the options list below not already taken under Papers 8, 10 or 11, or any course from the following list: AN230 The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16) SO208 Gender and Society EC317 Labour Economics MA301 Game Theory (H) LL232 Law and Institutions of the European Union Or (subject to approval by the Departmental Tutor) any other paper which is normally available only to second or third year students taught within the School or at other colleges of the University where practicable (see Outside Options). Conditions under which the Departmental Tutor will approve papers are given in the BSc Management student handbook.

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

* In year one students choose between AC102 and AC103, on financial and management accounting respectively. Students MUST do ONE of these courses in year one; should they wish, they MAY choose to do the other in their second or third year as an option. All students are required to attend the first AC100 lecture to get an overview of the topics to be covered in each course. Students wishing to continue their studies with advanced financial accounting (AC330) in the second or third year should be advised to take AC102 in the first year. Students wishing to continue with advanced management accounting (e.g. AC211, AC310) in the second and third year should be advised to take AC103 in the first year. Should they wish to do both AC102 and AC103 in the course of their degree programme, it is recommended that they opt for the financial accounting unit (AC102) in the first year to ease their way through the management accounting and financial management unit (AC103).

Options list**Accounting**

- AC102 Elements of Financial Accounting (H) (if not taken under paper 1)
- AC103 Elements of Management Accounting and Financial Management (H) (if not taken under paper 1)
- AC211 Managerial Accounting
- AC310 Management Accounting, Financial Management and Organisational Control
- AC330 Financial Accounting, Analysis and Valuation

- Or (subject to approval by the Departmental Tutor) any other paper which is normally available only to second or third year students taught within the School or at other colleges of the University where practicable (see Outside Options). Conditions under which the Departmental Tutor will approve papers are given in the BSc Management student handbook.

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

* In year one students choose between AC102 and AC103, on financial and management accounting respectively. Students MUST do ONE of these courses in year one; should they wish, they MAY choose to do the other in their second or third year as an option. All students are required to attend the first AC100 lecture to get an overview of the topics to be covered in each course. Students wishing to continue their studies with advanced financial accounting (AC330) in the second or third year should be advised to take AC102 in the first year. Students wishing to continue with advanced management accounting (e.g. AC211, AC310) in the second and third year should be advised to take AC103 in the first year. Should they wish to do both AC102 and AC103 in the course of their degree programme, it is recommended that they opt for the financial accounting unit (AC102) in the first year to ease their way through the management accounting and financial management unit (AC103).

Options list**Accounting**

- AC102 Elements of Financial Accounting (H) (if not taken under paper 1)
- AC103 Elements of Management Accounting and Financial Management (H) (if not taken under paper 1)
- AC211 Managerial Accounting
- AC310 Management Accounting, Financial Management and Organisational Control
- AC330 Financial Accounting, Analysis and Valuation

Economics and Economic History

- EC210 Macroeconomic Principles

20 Undergraduate Programme Regulations

EC313 Industrial Economics
EH240 Business and Economic Performance Since 1945: Britain in International Context

Finance

FM212 Principles of Finance
FM300 Corporate Finance, Investments and Financial Markets

Information Systems

MG208 Business Transformation and Project Management (H)
MG209 E-business (H)
MG304 Digital Platform Innovation (H) (n/a 15/16)

Law

LL209 Commercial Law

Management Science and Methodology

MA207 Further Quantitative Methods (Mathematics) (H)
MG202 Analytical Methods for Management (if not already taken under Paper 7)
MG205 Learning from Quantitative Data (if not already taken under Paper 7)
MG211 Operational Research Methods (formerly OR202)
MG308 Simulation Modelling and Analysis (H) (formerly OR307)
MG310 Risk and Decision Analysis for Management and Policy (H) (third year only)
MG311 Behavioural Decision Science for Management and Policy (H) (third year only)
MG313 Practical Optimisation Modelling (H) (third year only) (formerly OR301)
ST201 Statistical Models and Data Analysis (H)

Managerial Economics and Strategy

MG206 Firms, Management and Competitive Advantage (H)
MG228 Managing the Stone-Age Brain (H)
MG302 Topics in Management Research (H)
MG303 Foreign Direct Investment and Emerging Markets (H) (Cannot be taken with MG307)
MG305 Innovation and Technology Management (H)
MG307 International Context of Management (H) (formerly MN303) (Cannot be taken with MG303)

Marketing

MG315 Marketing Action Learning Project (H) (third year only)
ST307 Aspects of Market Research (H)
ST327 Market Research: An Integrated Approach

Organisational Behaviour and Employee Relations

MG210 Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16)
MG306 Managing Diversity in Organizations (H) (formerly ID316) (n/a 15/16)
MG309 International Human Resource Management (H) (n/a 15/16)
MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (H)

Philosophy

PH225 Business and Organisational Ethics (H)

BSc in Mathematics and Economics

Programme Code: UBMAEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1 EC100 Economics A **or**
EC102 Economics B §
2 MA100 Mathematical Methods
3 ST102 Elementary Statistical Theory
4 MA103 Introduction to Abstract Mathematics

Year 2

5 **Either** EC201 Microeconomic Principles I **or** EC202 Microeconomic Principles II
6 MA212 Further Mathematical Methods
7 EC210 Macroeconomic Principles **or** EC221 Principles of Econometrics **or** FM212 Principles of Finance
8 MA203 Real Analysis (H)

and one of (i) MA208 Optimisation Theory (H) **or** (ii) MA209 Differential Equations (H) **or** (iii) MA210 Discrete Mathematics (H) **or** (iv) MA211 Algebra and Number Theory (H)

Year 3

9 One from:
EC301 Advanced Economic Analysis (if EC210 was taken under paper 7)
EC302 Political Economy
EC309 Econometric Theory (if EC221 was taken under paper 7)
EC310 Behavioural Economics
EC313 Industrial Economics
EC319 Economic Theory and its Applications
EC321 Monetary Economics (if EC210 was taken under paper 7)
EC325 Public Economics
EC333 Problems of Applied Econometrics (if EC221 was taken under paper 7)
10 Courses to the value of one unit from the following, but at most one MA2** can be taken:
MA208 Optimisation Theory (H) (if not taken under 8 above or 12 below)
MA209 Differential Equations (H) (if not taken under 8 above or 12 below)
MA210 Discrete Mathematics (H) (if not taken under 8 above or 12 below)
MA211 Algebra and Number Theory (H)
MA301 Game Theory I (H) (not to be taken with MA300 under 11 below)
MA303 Chaos in Dynamical Systems (H)
MA305 Optimisation in Function Spaces (H)
MA310 Mathematics of Finance and Valuation (H)
MA313 Probability for Finance (H)
MA314 Algorithms in Java (H)
MA315 Algebra and its Applications (H)
MA316 Graph Theory (H)
MA317 Complex Analysis (H)
MA319 Partial Differential Equations (H)
11 If FM212 was taken as paper 7 then:
Either EC210 Macroeconomic Principles **or** EC221 Principles of Econometrics
If EC210 or EC221 was taken under paper 7 then one from:
EC210 Macroeconomic Principles
EC221 Principles of Econometrics
MA300 Game Theory (not to be taken with MA301 under 10 above)
FM212 Principles of Finance
FM320 Quantitative Finance
ST202 Probability, Distribution Theory and Inference
Any paper listed under paper 9 (if not already taken under paper 9)
Another third year paper in Mathematics or Economics (MA3** or EC3**) with the approval of the Departmental Tutor.

12 A further paper to the value of one unit from papers 10 and 11. Note that no more than one MA2** course can be taken in year three. Also including:
MA318 History of Mathematics in Finance and Economics (H)

Any other paper approved by the Departmental Tutor.
Notes
§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Mathematics with Economics

Programme Code: UBMAWEC

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | | |
|---|-------|--------------------------------------|
| 1 | EC100 | Economics A or |
| | EC102 | Economics B § |
| 2 | MA100 | Mathematical Methods |
| 3 | ST102 | Elementary Statistical Theory |
| 4 | MA103 | Introduction to Abstract Mathematics |

Year 2

- | | |
|---|--|
| 5 | Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II |
| 6 | MA212 Further Mathematical Methods |
| 7 | MA203 Real Analysis (H) |
| 8 | Courses to the value of 1.5 units from: |
| | MA208 Optimisation Theory (H) |
| | MA209 Differential Equations (H) |
| | MA210 Discrete Mathematics (H) |
| | MA211 Algebra and Number Theory (H) |
| | ST202 Probability, Distribution Theory and Inference |

Year 3

- | | |
|---------|--|
| 9 | EC210 Macroeconomic Principles or |
| | EC221 Principles of Econometrics or |
| | EC302 Political Economy or |
| | EC310 Behavioural Economics or |
| | EC313 Industrial Economics or |
| | EC319 Economic Theory and its Applications |
| 10 & 11 | Courses to the value of two units from the following (no more than one MA2** course and no more than two of the listed ST courses can be taken): |
| | MA208 Optimisation Theory (H) (if not taken under 8) |
| | MA209 Differential Equations (H) (if not taken under 8) |
| | MA210 Discrete Mathematics (H) (if not taken under 8) |
| | MA211 Algebra and Number Theory (H) (if not taken under 8) |
| | MA300 Game Theory |
| | MA301 Game Theory I (H) |
| | MA303 Chaos in Dynamical Systems (H) |
| | MA305 Optimisation in Function Spaces (H) |
| | MA310 Mathematics of Finance and Valuation (H) |
| | MA313 Probability for Finance (H) |
| | MA314 Algorithms in Java (H) |
| | MA315 Algebra and its Applications (H) |
| | MA316 Graph Theory (H) |
| | MA317 Complex Analysis (H) |
| | MA318 History of Mathematics in Finance and Economics (H) |
| | MA319 Partial Differential Equations (H) |
| | ST300 Regression and Generalised Linear Models (H) |
| | ST302 Stochastic Processes (H) |
| | ST304 Time Series and Forecasting (H) |
| | ST308 Bayesian Inference (H) |

12 Any other paper approved by the Course Tutor.

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

BSc in Philosophy and Economics

Programme Code: UBPHEC

For all first year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- | | |
|---|-----------------------------|
| 1 | EC100 Economics A or |
|---|-----------------------------|

- | | |
|---------|---|
| | EC102 Economics B § |
| 2 and 3 | Either MA107 Quantitative Methods (Mathematics) (H) and ST107 Quantitative Methods (Statistics) (H) and PH101 Logic Or MA100 Mathematical Methods and ST102 Elementary Statistical Theory |
| 4 | PH103 Reason, Knowledge and Values: An Introduction to Philosophy |

Year 2

- | | |
|---|--|
| 5 | An approved paper from the Philosophy Option List below |
| 6 | Either PH104 Formal Methods of Philosophical Argumentation (must be taken if PH101 not taken under paper 3) Or an approved paper from the Philosophy Option List below |
| 7 | Either EC201 Microeconomic Principles I or EC202 Microeconomic Principles II |
| 8 | EC210 Macroeconomic Principles |

Year 3

- | | |
|----|---|
| 9 | An approved paper from the Philosophy Option List below |
| 10 | Either (a) an approved paper taught outside the Departments of Philosophy and Economics or (b) an approved paper from the Economics Option List or Philosophy Option List below |
| 11 | An approved paper from the Economics Option List below |
| 12 | PH311 Philosophy of Economics (formerly PH211) |
- Notes** § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Philosophy Option List

- | | |
|-------|---|
| LL305 | Jurisprudence (3rd year only) |
| LN253 | European Literature and Society |
| PH201 | Philosophy of Science |
| PH203 | Philosophy of the Social Sciences |
| PH213 | Scientific Revolutions: Philosophical and Historical Issues |
| PH214 | Philosophy, Morals and Politics |
| PH217 | Set Theory and Further Logic |
| PH220 | Scientific Method and Policy |
| PH221 | Problems in Analytic Philosophy |
| PH222 | Philosophy and Public Policy |
| PH225 | Business and Organisational Ethics (H) |
| PH227 | Genes, Brains and Society (H) |
| PH228 | Emotion, Cognition and Behaviour: Science and Policy (H) |
| PH229 | Global Justice (H) (n/a 15/16) |
| PH230 | Einstein for Everyone: From Time Travel to the Edge of the Universe (H) |
| PH232 | Physics and the City: From Quantum Jumps to Stock Market Crashes (H) |
| PH399 | Dissertation in Philosophy (formerly PH299) (third year only) |

Economics Option List

- Either** EC220 Introduction to Econometrics **or** EC221 Principles of Econometrics
- | | |
|-------|---|
| EC301 | Advanced Economic Analysis |
| EC302 | Political Economy |
| EC303 | Economic Policy Analysis |
| EC307 | Development Economics |
| EC311 | History of Economics: How Theories Change |
| EC313 | Industrial Economics |
| EC315 | International Economics |
| EC317 | Labour Economics |
| EC319 | Economic Theory and its Applications |
| EC321 | Monetary Economics |
| EC325 | Public Economics |

BSc in Philosophy and Economics

Programme Code: UBPHCEC

For all second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 EC102 Economics B
- 2 and 3 **Either** MA107 Quantitative Methods (Mathematics) (H) **and** ST107 Quantitative Methods (Statistics) (H) **and** PH101 Logic **or** MA100 Mathematical Methods and ST102 Elementary Statistical Theory
- 4 PH103 Reason, Knowledge and Values: An Introduction to Philosophy

Year 2

- 5 An approved paper from the Philosophy Option List below
- 6 **Either** PH101 Logic (must be taken if not taken under paper 3) **Or** an approved paper from the Philosophy Option List below
- 7 **Either** EC201 Microeconomic Principles I **or** EC202 Microeconomic Principles II
- 8 EC210 Macroeconomic Principles

Year 3

- 9 An approved paper from the Philosophy Option List below
- 10 **Either** (a) an approved paper taught outside the Departments of Philosophy and Economics **or** (b) an approved paper from the Economics Option List or Philosophy Option List below
- 11 An approved paper from the Economics Option List below
- 12 PH311 Philosophy of Economics (formerly PH211)
- Notes** LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Philosophy Option List

- LL305 Jurisprudence (3rd year only)
- LN253 European Literature and Society
- PH201 Philosophy of Science
- PH203 Philosophy of the Social Sciences
- PH213 Scientific Revolutions: Philosophical and Historical Issues
- PH214 Philosophy, Morals and Politics
- PH217 Set Theory and Further Logic
- PH219 Governing Knowledge: Foundational Issues in Science Policy (H) (withdrawn 15/16)
- PH220 Scientific Method and Policy
- PH221 Problems in Analytic Philosophy
- PH222 Philosophy and Public Policy
- PH225 Business and Organisational Ethics (H)
- PH227 Genes, Brains and Society (H)
- PH228 Emotion, Cognition and Behaviour: Science and Policy (H)
- PH229 Global Justice (H) (n/a 15/16)
- PH230 Einstein for Everyone: From Time Travel to the Edge of the Universe (H)
- PH231 Evidence and Policy (H) (withdrawn 15/16)
- PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (H)
- PH399 Dissertation in Philosophy (formerly PH299) (third year only)

Economics Option List

- Either** EC220 Introduction to Econometrics **or** EC221 Principles of Econometrics
- EC301 Advanced Economic Analysis
- EC302 Political Economy
- EC303 Economic Policy Analysis
- EC307 Development Economics
- EC311 History of Economics: How Theories Change
- EC313 Industrial Economics
- EC315 International Economics

- EC317 Labour Economics
- EC319 Economic Theory and its Applications
- EC321 Monetary Economics
- EC325 Public Economics

BSc in Philosophy, Logic and Scientific Method

Programme Code: UBPHS3

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 PH103 Reason Knowledge and Values: An Introduction to Philosophy
- 2 PH101 Logic
- 3 & 4 Two approved papers taught outside the Department

Year 2

- 5 PH201 Philosophy of Science **or** PH203 Philosophy of the Social Sciences **or** PH213 Scientific Revolutions: Philosophical and Historical Issues **or** PH220 Scientific Method and Policy **or** PH219 Governing Knowledge: Foundational Issues in Science Policy (H) (withdrawn 15/16) **and** PH231 Evidence and Policy (H) (withdrawn 15/16)
- 6, 7, & 8 Up to three papers from the Philosophy Option List below (can include an approved paper taught outside the Department)

Year 3

- 9, 10, 11 & 12 Up to four papers from the Philosophy Option List below (can include an approved paper taught outside the Department)
- Notes** LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Philosophy Option List

- LL305 Jurisprudence (third year only)
- LN253 European Literature and Society
- PH201 Philosophy of Science
- PH203 Philosophy of the Social Sciences
- PH213 Scientific Revolutions: Philosophical and Historical Issues
- PH214 Philosophy, Morals and Politics
- PH217 Set Theory and Further Logic
- PH219 Governing Knowledge: Foundational Issues in Science Policy (H) (withdrawn 15/16)
- PH220 Scientific Method and Policy
- PH221 Problems in Analytic Philosophy
- PH222 Philosophy and Public Policy
- PH225 Business and Organisational Ethics (H)
- PH227 Genes, Brains and Society (H)
- PH228 Emotion, Cognition and Behaviour: Science and Policy (H)
- PH229 Global Justice (H) (n/a 15/16)
- PH230 Einstein for Everyone: From Time Travel to the Edge of the Universe (H)
- PH231 Evidence and Policy (H) (withdrawn 15/16)
- PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (H)
- PH311 Philosophy of Economics (formerly PH211)
- PH399 Dissertation in Philosophy (formerly PH299) (third year only)

BSc in Philosophy, Politics and Economics

Programme code: UBPHPOLEC

For all students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1	Either	MA107	Quantitative Methods (Maths) (H)
	and	ST107	Quantitative Methods (Statistics) (H)
	Or	MA100	Mathematical Methods
2	Either	GV101	Introduction to Political Science
	Or	GV100	Introduction to Political Theory
3		PH103	Reason, Knowledge and Values: An Introduction to Philosophy (with supplementary five week Philosophy and Argumentative Writing Seminar)
4		EC100	Economics A or
		EC102	Economics B §

Year 2

5	Either	EC220	Introduction to Econometrics (if MA107 and ST107 taken under Paper 1)
	Or	ST102	Elementary Statistical Theory (if MA100 taken under Paper 1)
6	Either	GV101	Introduction to Political Science (if not already taken under paper 2)
	Or	GV100	Introduction to Political Theory (if not already taken under paper 2)
7		PH104	Formal Methods of Philosophical Argumentation
8	Either	EC201	Microeconomic Principles I (if MA107 and ST107 taken under paper 1)
	Or	EC201	Microeconomic Principles I (if MA100 taken under paper 1)
	Or	EC202	Microeconomic Principles II (if MA100 taken under paper 1)

In addition, students will also take EC240 PPE Interdisciplinary Research Seminar (LT) *

Year 3

9		Courses to the value of one full unit from the Government Option List	
10		Courses to the value of one full unit from the Philosophy Option List	
11		EC210	Macroeconomic Principles
12	Either	Courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List (if MA107 and ST107 taken under paper 1)	
	Or	EC220	Introduction to Econometrics (if MA100 taken under paper 1)
	Or	EC221	Principles of Econometrics (if MA100 taken under paper 1)

In addition, students will also take EC340 PPE Interdisciplinary Research Seminar (MT & LT) *

Year 4

13	PH341	Philosophy, Politics and Economics: Applications	
14	GV342	Philosophy, Politics and Economics: Capstone and Research Project	
15		Any 200 or 300 level courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List subject to timetabling constraints	
16		Any 200 or 300 level courses to the value of one full unit from the Government Option List, Philosophy Option List, or Economics Option List or outside these departments with permission subject to timetabling constraints.	

Notes

§ Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

* EC240 and EC340 will be assessed in the same manner as LSE100. Marks of F, P, M, DI appear on the transcript but do not affect progression or the final degree classification.

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Economics Option List

EC301	Advanced Economic Analysis
EC302	Political Economy
EC303	Economic Analysis of the European Union
EC307	Development Economics
EC311	History of Economics: How Theories Change
EC313	Industrial Economics
EC315	International Economics
EC321	Monetary Economics
EC325	Public Economics

Government Option List

GV225	Public Choice and Politics
GV227	Politics of Economic Policy
GV245	Democracy and Democratisation
GV247	Theories and Problems of Nationalism
GV248	Power and Politics in the Modern World: Comparative Perspectives
GV249	Research Design in Political Science
GV251	Government, Politics and Public Policy in the European Union
GV262	Contemporary Political Theory
GV263	Public Policy Analysis
GV264	Politics and Institutions in Europe
GV302	Key Themes in the History of Political Thought
GV303	From Empire to Globalisation (n/a 15/16)
GV308	Leadership in the Political World (H)
GV309	Politics of Money and Finance in Comparative Perspective (H)
GV311	British Government
GV312	Advanced Topics in Government: Executive Politics
GV313	Politics of Trade in Comparative Perspective (H)
GV314	Empirical Research in Government
GV316	Advanced Issues in Applied Political Theory (H)
GV335	African Political Economy (H)
GV366	Political Economy of the Developing World (n/a 15/16)
GV390	Government Dissertation Option

Philosophy Option List

LL305	Jurisprudence
LN253	European Literature and Society
PH201	Philosophy of Science
PH203	Philosophy of the Social Sciences
PH213	Scientific Revolutions: Philosophical and Historical Issues
PH214	Philosophy, Morals and Politics
PH217	Set Theory and Further Logic
PH220	Scientific Method and Policy
PH221	Problems in Analytic Philosophy
PH222	Philosophy and Public Policy
PH225	Business and Organisational Ethics (H)
PH227	Genes, Brains and Society (H)
PH228	Emotion, Cognition and Behaviour: Science and Policy (H)
PH229	Global Justice (H) (n/a 15/16)
PH230	Einstein for Everyone: From Time Travel to the Edge of the Universe (H)
PH232	Physics and the City: From Quantum Jumps to Stock Market Crashes (H)
PH311	Philosophy of Economics (formerly PH211)
PH399	Dissertation in Philosophy (formerly PH299)

BSc in Politics and International Relations

Programme code: UBPOLIR

For all students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 GV101 Introduction to Political Science
- 2 IR100 Concepts of International Society
- 3 **Either** GV100 Introduction to Political Theory
Or HY116 International history since 1890
- 4 An approved paper taught outside the departments of Government and International Relations

Year 2

- 5 **Either** GV100 Introduction to Political Theory
(compulsory if not taken in year 1)
Or Any paper from Government list A **(if both** GV100 **and** GV101 **taken in year 1)**
- 6 GV248 Power and Politics in the Modern World: Comparative Perspectives
- 7 IR200 International Political Theory
- 8 **Either** IR202 Foreign Policy Analysis 1
Or IR203 International Organisations

Year 3

- 9 Any paper from Government list A
- 10 **Either** IR202 Foreign Policy Analysis 1
Or IR203 International Organisations **(whichever was not taken in Year 2)**
- 11 **Either** GV390 Dissertation in Government
Or IR398 Dissertation in International Relations
Or Any course from the Government list B
Or Any paper from the International Relations list
- 12 **Either** Any paper from Government list A
Or Any paper from the International Relations list
Or An approved paper taught outside the departments of Government and International Relations

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A

- GV225 Public Choice and Politics
- GV227 Politics of Economic Policy
- GV245 Democracy and Democratisation
- GV247 Theories and Problems of Nationalism
- GV249 Research Design in Political Science
- GV251 Government, Politics and Public Policy in the European Union
- GV262 Contemporary Political Theory
- GV263 Public Policy Analysis
- GV264 Politics and Institutions in Europe

Government List B

- GV302 Key Themes in the History of Political Thought
- GV303 From Empire to Globalisation (n/a 15/16)
- GV308 Leadership in the Political World (H)
- GV309 Politics of Money and Finance in Comparative Perspective (H)
- GV311 British Government
- GV312 Advanced Topics in Government: Executive Politics
- GV313 Politics of Trade in Comparative Perspective (H)
- GV314 Empirical Research in Government
- GV316 Advanced Issues in Applied Political Theory (H)
- GV335 African Political Economy (H)
- GV366 Political Economy of the Developing World (n/a 15/16)

International Relations List

- IR204 International Political Economy (H)
- IR305 Strategic Aspects of International Relations
- IR311 Europe's Institutional Order (n/a 15/16)
- IR312 Genocide (H) (n/a 15/16)

- IR313 Managing China's Rise in East Asia (H)
 - IR314 Southeast Asia: Intra-regional Politics and Security (H)
 - IR315 The Middle East and International Relations Theory (n/a 15/16)
 - IR317 American Grand Strategy (H)
 - IR318 Visual International Politics (H)
 - IR319 Empire and Conflict in World Politics (H)
 - IR321 Revolutions and World Politics (H)
 - IR322 Sovereignty, Rights and Justice: Issues in International Political Theory (H)
 - IR347 Political Economy of International Labour Migration (H) *
 - IR354 Governing International Political Economy: Lessons from the Past for the Future (H)
 - IR355 Economic Diplomacy (H) *
 - IR367 International Political Economy of the Environment (H) * (n/a 15/16)
 - IR368 The Political Economy of Trade (H) *
 - IR369 Politics of Money in the World Economy (H) *
- Notes** * Prerequisite for this course is IR204 International Political Economy (H)

BSc in Politics and Philosophy

Programme Code: UBPOLPH

For all first, second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 PH101 Logic
- 2 PH103 Reason Knowledge and Values: An Introduction to Philosophy
- 3 GV100 Introduction to Political Theory
- 4 GV101 Introduction to Political Science

Year 2

- 5 Any course from the Government list A
- 6 **Either** PH214 Philosophy, Morals and Politics
Or GV262 Contemporary Political Theory
- 7 **Either** An approved course from the Government list A
Or An approved course taught outside the Departments of Government and Philosophy
- 8 **Either** PH201 Philosophy of Science
Or PH203 Philosophy of the Social Sciences
Or PH213 Scientific Revolutions: Philosophical and Historical Issues
Or PH220 Scientific Method and Policy
Or PH219 Governing Knowledge: Foundational Issues in Science Policy (H) (withdrawn 15/16)
And PH231 Evidence and Policy (H) (withdrawn 15/16)

Year 3

- 9 **Either** Any course from the Government list B
Or GV390 Government Dissertation Option
Or PH399 Dissertation in Philosophy (formerly PH299)
 - 10 PH222 Philosophy and Public Policy
 - 11 **Either** Any course from Government list A
Or An approved course taught outside of the Departments of Government and Philosophy if an outside option was not taken as paper 7.
 - 12 **Either** Any course from Government list A
Or Any course from the Philosophy list
Or An approved course taught outside of the Departments of Government and Philosophy
- Notes** LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Government List A

- GV225 Public Choice and Politics
- GV227 Politics of Economic Policy
- GV245 Democracy and Democratisation

- An approved paper taught outside the Department

BSc in Social Policy

Programme Code: UBSPA3

For all first year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 SA100 Foundations of Social Policy
- 2 & 3 Any two of the following:
SA101 Sociology and Social Policy
SA103 Introduction to Global Population Change
SA104 Social Economics and Policy
SA105 Crime and Society
- 4 An approved paper taught outside the Department. The following courses are strongly recommended:
EC100 Economics A **or**
EC102 Economics B §
GV100 Introduction to Political Theory
GV101 Introduction to Political Science
GY100 Introduction to Geography
MG103 Management, Labour and Work (formerly ID100 Employment Relations)
PH103 Reason, Knowledge and Values: An Introduction to Philosophy
PS102 Social Psychology
SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology

Year 2

- 5 SA219 Comparative and International Social Policy
- 6 SA201 Research Methods for Social Policy

- 7 One from the Selection List below
- 8 Either a paper from the Selection List below or an approved paper taught outside the Department

Year 3

- 9 SA349 A Long Essay on an approved topic
- 10 & 11 Two courses from the Selection List below
- 12 **Either** one from the Selection List below **or** an approved paper taught outside the Department. No first year Social Policy course can be taken in year 3 by Social Policy students.

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.

It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Selection List

- SA101 Sociology and Social Policy*
- SA103 Introduction to Global Population Change
- SA104 Social Economics and Policy*
- SA105 Crime and Society*
- SA204 Education Policy (n/a 15/16)
- SA217 Psychology of Crime and Criminal Justice
- SA218 Criminological Perspectives
- SA221 Poverty, Social Exclusion and Social Change
- SA223 Health and Social Care Policy
- SA250 Demographic Description and Analysis
- SA302 Assessing Social Progress
- SA309 Crime Control: Ideas and Controversies

Notes * If not taken under papers 2 and 3 above. Cannot be taken in year 3.

BSc in Social Policy

Programme Code: UBSPA3

For all second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 SA100 Foundations of Social Policy
- 2 & 3 Any two of the following:
SA101 Sociology and Social Policy
SA103 Introduction to Global Population Change
SA104 Social Economics and Policy
SA105 Crime and Society
- 4 An approved paper taught outside the Department. The following courses are strongly recommended:
EC102 Economics B (only for students with A level Mathematics)
GV100 Introduction to Political Theory
GV101 Introduction to Political Science
GY100 Introduction to Geography
MG103 Management, Labour and Work (formerly ID100 Employment Relations)

For all first year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

- 1 SA100 Foundations of Social Policy
- 2 GV101 Introduction to Political Science
- 3 GV100 Introduction to Political Theory
- 4 An approved paper taught outside the Departments of Government and Social Policy

Year 2

- 5 SA219 Comparative and International Social Policy
- 6 SA201 Research Methods for Social Policy
- 7 One from the Social Policy Selection List below
- 8 One from:
 - GV225 Public Choice and Politics
 - GV227 Politics of Economic Policy
 - GV245 Democracy and Democratisation
 - GV247 Theories and Problems of Nationalism
 - GV251 Government, Politics and Public Policy in the EU

30 Undergraduate Programme Regulations

	GV262	Contemporary Political Theory
	GV263	Public Policy Analysis
	GV264	Politics and Institutions of Europe
Note	Over years two and three students are required to select at least one paper from GV245, GV247, and GV264 and least one paper from GV225, GV227, GV262 and GV263	
Year 3		
9	SA349	A Long Essay on an approved topic
10	One from the Social Policy Selection List below. No first year Social Policy course can be taken in year 3 by Social Policy students.	
11	One from:	
	GV225	Public Choice and Politics
	GV227	Politics of Economic Policy
	GV245	Democracy and Democratisation
	GV247	Theories and Problems of Nationalism
	GV251	Government, Politics and Public Policy in the EU
	GV262	Concepts in Political Theory
	GV264	Politics and Institutions of Europe
	GV263	Public Policy Analysis
	GV302	Key Themes in the History of Political Thought
12	One from:	
	A paper from the Social Policy Selection List below	
	GV225	Public Choice and Politics
	GV227	Politics of Economic Policy
	GV245	Democracy and Democratisation
	GV247	Theories and Problems of Nationalism
	GV251	Government, Politics and Public Policy in the EU
	GV262	Concepts in Political Theory
	GV264	Politics and Institutions of Europe
	GV263	Public Policy Analysis
	GV302	Key Themes in the History of Political Thought
	An approved paper taught outside the Departments of Government and Social Policy	
Notes	Over years two and three students are required to select at least one paper from , GV245, GV247, and GV264 and at least one paper from GV225, GV227, GV262, GV263, and GV302	
	No first year Social Policy course can be taken in year 3 by Social Policy students.	
	It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses .	
	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.	

Social Policy Selection List

SA101	Sociology and Social Policy *
SA103	Introduction to Global Population Change
SA104	Social Economics and Policy *
SA105	Crime and Society *
SA204	Education Policy (n/a 15/16)
SA217	Psychology of Crime and Criminal Justice
SA218	Criminological Perspectives
SA221	Poverty, Social Exclusion and Social Change
SA223	Health and Social Care Policy
SA250	Demographic Description and Analysis
SA302	Assessing Social Progress
SA309	Crime Control: Ideas and Controversies
Notes	* Cannot be taken in year 3.

BSc in Social Policy with Government

Programme Code: UBSPWGV

For all second and third year students in 2015-16

Paper Course number and title

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1	SA100	Foundations of Social Policy
2	GV101	Introduction to Political Science
3	GV100	Introduction to Political Theory
4	An approved paper taught outside the Departments of Government and Social Policy	

Year 2

5	SA222	Implementing Social Policy: From Principles to Practice
6	SA201	Research Methods for Social Policy
7	One from the Social Policy Selection List Below (to exclude SA349)	
8	One from:	
	GV225	Public Choice and Politics
	GV227	Politics of Economic Policy
	GV245	Democracy and Democratisation
	GV247	Theories and Problems of Nationalism
	GV251	Government, Politics and Public Policy in the EU
	GV262	Concepts in Political Theory
	GV263	Public Policy Analysis
	GV264	Politics and Institutions of Europe

Notes

Students are required to select at least one paper from GV245, GV247, and GV264 and least one paper from GV225, GV227, GV262 and GV263

Year 3

9	SA320	Comparative and International Social Policy
10	One from the Social Policy Selection List below. No first year Social Policy course can be taken in Year 3 by Social Policy students.	
11	One from:	
	GV225	Public Choice and Politics
	GV227	Politics of Economic Policy
	GV245	Democracy and Democratisation
	GV247	Theories and Problems of Nationalism
	GV251	Government, Politics and Public Policy in the EU
	GV262	Concepts in Political Theory
	GV264	Politics and Institutions of Europe
	GV263	Public Policy Analysis
	GV302	Key Themes in the History of Political Thought
12	One from:	

A paper from the Social Policy Selection List below

GV225	Public Choice and Politics
GV227	Politics of Economic Policy
GV245	Democracy and Democratisation
GV247	Theories and Problems of Nationalism
GV251	Government, Politics and Public Policy in the EU
GV262	Concepts in Political Theory
GV263	Public Policy Analysis
GV264	Politics and Institutions of Europe
GV302	Key Themes in the History of Political Thought

An approved paper taught outside the Departments of Government and Social Policy

Notes

Students are required to select at least one paper from , GV245, GV247, and GV264 and at least one paper from GV225, GV227, GV262, GV263, and GV302

No first year Social Policy course can be taken in Year 3 by Social Policy students.

It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses. LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Social Policy Selection List

SA101	Sociology and Social Policy *
SA103	Introduction to Global Population Change
SA104	Social Economics and Policy *
SA105	Crime and Society *
SA204	Education Policy (n/a 15/16)
SA217	Psychology of Crime and Criminal Justice
SA218	Criminological Perspectives
SA221	Poverty, Social Exclusion and Social Change
SA223	Health and Social Care Policy
SA250	Demographic Description and Analysis
SA302	Assessing Social Progress
SA309	Crime Control: Ideas and Controversies
SA313	European Social Policy (withdrawn 15/16)
SA349	A Long Essay on an Approved Topic
Notes	* Cannot be taken in year 3 by Social Policy students.

BSc in Sociology**Programme Code:** UBSO2**For all first, second and third year students in 2015-16****Paper Course number and title**

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

1	SO102	Statistics in Society
2	SO100	Social Theory
3	SO110	Power, Inequality, and Difference: Contemporary Themes in Sociology
4	Either PS102 Social Psychology or an approved level 1 paper taught outside the Department or another paper taught outside the Department subject to the approval of your personal tutor and the Department Tutor.	

Year 2

5	SO221	Researching London: Methods for Social Research
6	SO201	Sociological Analysis
7	An approved year 2 or year 3 Sociology Option	
8	Either an approved year 2 or year 3 Sociology Option or an approved paper from outside the Department	

Year 3

9	SO302	The Sociological Dissertation
10	An approved year 2 or 3 Sociology Option	
11	An approved year 2 or 3 Sociology Option	
12	Either an approved year 2 or 3 Sociology Option or an approved year 2 or 3 paper taught outside the Department.	

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Sociology Option List

PS203	Societal Psychology: Theory and Applications (n/a 15/16)
SO203	Political Sociology
SO208	Gender and Society
SO210	Crime, Deviance and Control (cannot be taken with SA217, SA218 or SA309)
SO211	Sociology of Health and Medicine
SO212	Work, Management and Globalisation
SO224	The Sociology of Race and Ethnicity
SO230	Digital Technology, Speed and Culture (n/a 15/16)
SO231	Knowledge, Power, and Social Change (H)
SO308	Personal Life, Intimacy and the Family
SO309	Atrocity and Justice (H)

BSc in Statistics with Finance**Programme Code:** UBSTWFI**For all first, second and third year students in 2015-16****Paper Course number and title**

See note LSE100 The LSE Course: Understanding the causes of things.

Year 1

1	ST102	Elementary Statistical Theory.
2	MA100	Mathematical Methods
3	EC100	Economics A or
	EC102	Economics B §
4	AC104	Elements of Accounting, Financial Institutions and Financial Management* or
	MA103	Introduction to Abstract Mathematics
* Note that AC104 is a pre-requisite for all AC courses at levels 2 and 3.		

Year 2

5	MA212	Further Mathematical Methods
6	ST202	Probability, Distribution Theory and Inference
7	Courses to the value of one unit from the list below:	
	ST205	Sample Surveys and Experiments (H)
	ST226	Actuarial Investigations - Financial (H)
	ST227	Survival Models (H)
	MA103	Introduction to Abstract Mathematics (if not taken under paper 4)
	MA203	Real Analysis (H)
	MA208	Optimisation Theory (H)
	MA209	Differential Equations (H)
	MA210	Discrete Mathematics (H)
	MA211	Algebra and Number Theory (H)
8	FM212	Principles of Finance

Year 3

9	ST300	Regression and Generalised Linear Models (H) and
	ST304	Time Series and Forecasting (H)
10	Courses to the value of one unit from the list below:	
	ST301	Actuarial Mathematics: (Life) (H) (formerly ST305)
	ST302	Stochastic Processes (H)
	ST306	Actuarial Mathematics: General (H)
	ST307	Aspects of Market Research (H)
	ST308	Bayesian Inference (H)
	ST312	Applied Statistics Project (H)
	ST327	Market Research: An Integrated Approach
	ST330	Stochastic and Actuarial Methods in Finance
	MA203	Real Analysis (H)
	MA208	Optimisation Theory (H)
	MA209	Differential Equations (H)
	MA210	Discrete Mathematics (H)
	MA211	Algebra and Number Theory (H)
	MA300	Game Theory
	MA301	Game Theory I (H)
	MA303	Chaos in Dynamical Systems (H)
	MA305	Optimisation in Function Spaces (H)
	MA310	Mathematics of Finance and Valuation (H)
	MA313	Probability for Finance (H)
	MA314	Theory of Algorithms (H)
	MA315	Algebra and its Applications (H)
	MA317	Complex Analysis (H)
	MA318	History of Mathematics in Finance and Economics (H)
	MA319	Partial Differential Equations (H)
	MG308	Simulation Modelling and Analysis (H) (formerly OR307)
	MG313	Practical Optimisation Modelling (H) (third year only)
11	FM300	Corporate Finance, Investments and Financial Markets or
	FM320	Quantitative Finance
12	Courses to the value of one unit from paper 10 or the list below:	

32 Undergraduate Programme Regulations

FM300	Corporate Finance, Investments and Financial Markets or
FM320	Quantitative Finance
AC104	Elements of Accounting, Financial Institutions and Financial Management
AC211	Managerial Accounting
AC310	Management Accounting, Financial Management and Organisational Control
AC330	Financial Accounting, Analysis and Valuation
AC340	Auditing, Governance and Risk Management
EC202	Microeconomic Principles II
EC210	Macroeconomic Principles
EC221	Principles of Econometrics
LL209	Commercial Law
LL210	Information Technology and the Law
MG203	Organisational Theory and Behaviour (formerly ID200) (n/a 15/16)
MG206	Firms, Management and Competitive Advantage (H)
MG211	Operational Research Methods (formerly OR202)
MG307	International Context of Management (H) (formerly MN303)
MG308	Simulation Modelling and Analysis (H) (formerly OR307)
MG314	Principles of Marketing (H) (third year only)
MG315	Marketing Action Learning Project (H) (third year only)
PH201	Philosophy of Science
PH311	Philosophy of Economics (formerly PH211)
SA250	Demographic Description and Analysis
SO212	Work, Management and Globalisation
ST205	Sample Surveys and Experiments (H)
ST226	Actuarial Investigations: Financial (H)
ST227	Survival Models (H)

Notes § Course allocation dependant on Economics A-level or equivalent background. See course guides for further information.
LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Outside options

Outside options for first year students

Where the regulations refer to an approved paper taught outside the department, this means that you may take any course in a subject other than the principal subject(s) of your degree, subject to any restrictions listed in the Course Guides. If your degree is for joint honours (e.g., Philosophy and Economics) or is a major/minor combination (e.g., Geography with Economics), a course outside the department means a course taught in any department other than the two named in the title of your degree. The home department of each course is indicated by the letters in its code.

Please note that some course combinations are not allowed. Please see the Mutually Exclusive options list below.

The courses available for this purpose in your first year are:

(H) means a half-unit course

(n/a 15/16) means not available in the 2015/16 academic year

* means available with permission

AC100	Elements of Accounting and Finance
AN100	Introduction to Social Anthropology
AN101	Ethnography and Theory: Selected Texts
AN102	Reading Other Cultures: Anthropological Interpretation Of Text and Film
EC100	Economics A (dependant on Economics A-level or equivalent background)
EC102	Economics B (dependant on Economics A-level or equivalent background)

EH101	The Internationalisation of Economic Growth, 1870 to the Present Day
EH102	Pre-industrial Economic History *
GV100	Introduction to Political Theory
GV101	Introduction to Political Science
GY100	Introduction to Geography
GY103	Contemporary Europe
GY120	The Natural Environment
GY121	Environmental Change and sustainable Development
GY140	Methods in Spatial and Social Analysis
HY113	Empire to Independence: the Extra-European World in the Twentieth Century
HY116	International History since 1890
HY118	Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800
IR100	Concepts of International Society
LL104	Law of Obligations
LL105	Property I
LL106	Public Law
LL108	Criminal Law
LL109	Introduction to the Legal System
LN100	Russian Language and Society 3 (Advanced)
LN101	Russian Language and Society 1 (Beginner)
LN102	Russian Language and Society 2 (Intermediate)
LN104	Mandarin Language and Society 1 (Beginner)
LN110	Intensive German Language and Society 3 (Advanced)
LN120	Spanish Language and Society 3 (Advanced)
LN121	Spanish Language and Society 1 (Beginner)
LN122	Spanish Language and Society 2 (Intermediate)
LN130	French Language and Society 3 (Advanced)
LN131	French Language and Society 1 (Beginner)
LN132	French Language and Society 2 (Intermediate)
LN140	Mandarin Language and Society 3 (Advanced)
LN142	Mandarin Language and Society 2 (Intermediate)
LN200	Russian Language and Society 4 (Proficiency)
LN210	German Language and Society 4 (Proficiency)
LN220	Spanish Language and Society 4 (Proficiency)
LN230	French Language and Society 4 (Proficiency)
LN240	Mandarin Language and Society 4 (Proficiency)
LN250	English Literature and Society
LN251	Comparative Literature and 20th Century Political History
LN252	Contemporary Literature and Global Society
LN253	European Literature and Society
LN270	Society and Language: Linguistics for Social Scientists
LN320	Spanish Language and Society 5 (Mastery)
LN330	French Language and Society 5 (Mastery)
LN340	Mandarin Language and Society 5 (Mastery)
MA100	Mathematical Methods
MA103	Introduction to Abstract Mathematics
MA107	Quantitative Methods (Mathematics) (H) and
ST107	Quantitative Methods (Statistics) (H)
MA110	Basic Quantitative Methods
MG100	Leadership and Communication in Teams (H)
MG102	Organisational Behaviour (H)
MG103	Management, Labour and Work (formerly ID100 Employment Relations)
PH101	Logic
PH103	Reason, Knowledge and Values: An Introduction to Philosophy
PS102	Social Psychology *
SA100	Foundations of Social Policy *
SA101	Sociology and Social Policy
SA103	Introduction to Global Population Change
SA104	Social Economics and Policy *
SA105	Crime and Society
SO100	Social Theory
SO102	Statistics in Society
SO110	Power, Inequality, and Difference: Contemporary Themes in Sociology
ST102	Elementary Statistical Theory
ST107	Quantitative Methods (Statistics)
ST108	Statistical Methods for the Social Sciences

Outside options for second and third year students

Where undergraduate programme regulations refer to an approved paper taught outside the department this will be a paper in a subject other than the principal subject(s) of your degree, subject to timetabling constraints and any restrictions listed in the Course Guides. An outside paper may be selected from the Undergraduate Course Guides, subject to the approval of the candidate's tutor and to the successful completion of prerequisites where necessary, with the following exceptions:

certain first-year courses are not available to students in the second or third year of their degree;

some courses are not available as an outside option;

some papers are mutually exclusive and may therefore not be combined.

The following are courses that are available to second and/or third year students as an outside option where regulations permit.

(H) means a half-unit course

(n/a 15/16) means not available in the 2015/16 academic year

* means available with permission

AC100	Elements of Accounting and Finance
AC211	Managerial Accounting
AC310	Management Accounting, Financial Management and Organizational Control
AC330	Financial Accounting, Analysis and Valuation *
AN100	Introduction to Social Anthropology
AN101	Ethnography & Theory: Selected Texts
AN102	Reading Other Cultures: Anthropological Interpretation of Text and Film
AN200	The Anthropology of Kinship, Sex and Gender
AN205	The Anthropology of Melanesia
AN216	Cognition and Anthropology: Human Development in Cultural Environments (H) * (n/a 15/16)
AN221	The Anthropology of Christianity (H)
AN223	The Anthropology of South-East Asia (H)
AN226	Political and Legal Anthropology
AN227	The Anthropology of Economic Institutions and their Social Transformations (withdrawn 15/16)
AN230	The Anthropology of Industrialization and Industrial Life (H) (n/a 15/16)

AC100

Elements of Accounting and Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD 3.30, Dr Elisabetta Bertero STC677, Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is compulsory on the BSc in Accounting and Finance and BSc in Management Sciences. This course is available on the BSc in Business Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Financial accounting: role, nature, scope and limitations of accounting conventions. Regulatory accounting framework. Financial statements: construction, use and interpretation. Group accounting. Legal and economic considerations including elements of taxation. Extending the scope of financial reporting (eg, inflation accounting and reporting, approaches to equity maintenance etc).

Introduction to managerial accounting. The design, use and role of accounting information in the management of organisational activities. Costing and budgeting. The design and use of performance measurement systems.

Introduction to finance. The financial system and flow of funds. Introductory financial formulae. The financial decisions of firms, capital budgeting. The recent global financial turmoil.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of written work per term will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney *Financial Accounting for Decision Makers*, 7th edn, Financial Times, Prentice Hall, 2013; Peter Atrill and Eddie McLaney *Management Accounting for Decision Makers*, 8th edn, Financial Times, Pearson, 2015; Bodie Z, Merton R & Cleeton C, *Financial Economics*, 2nd edn, Prentice Hall International, 2009.

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

The first 15 minutes will be reading time.

in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of written work per term will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney *Financial Accounting for Decision Makers*, 7th edn, Financial Times, Prentice Hall, 2013.

Assessment: Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes of this will be reading time.

AC103 Half Unit

Elements of Management Accounting and Financial Management

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD 3.30, Prof Richard Macve OLD 3.11 and Mrs Chrisoulla Constantinou

Availability: This course is available on the BSc in Management. This course is not available as an outside option nor to General Course students.

Course content: Introduction to managerial accounting and financial management. The design, use and role of accounting information in the management and control of organisational activities. Costing and budgeting. Financial institutions and sources of financing. Financial evaluation of decisions in the shorter and longer terms. The design and use of performance measurement systems. Accounting for environmental impacts.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; some will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include: Peter Atrill and Eddie McLaney, *Management Accounting for Decision Makers*, 8th edn, Pearson (2015); Levinson, M *The Economist Guide To Financial Markets* (6th edition).

Assessment: Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes will be reading time.

AC102 Half Unit

Elements of Financial Accounting

This information is for the 2015/16 session.

Teacher responsible: Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is compulsory on the BSc in Management. This course is not available as an outside option nor to General Course students.

Course content: Financial accounting: role, nature, scope and limitations of accounting conventions. Regulatory accounting framework. Financial statements: construction, use and interpretation. Group accounting. Legal and economic considerations including elements of taxation. Extending the scope of financial reporting (eg inflation accounting and reporting, approaches to equity maintenance, etc).

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the LT. 1 hour of lectures and 1 hour of classes

AC104

Elements of Accounting, Financial Institutions and Financial Management

This information is for the 2015/16 session.

Teacher responsible: Dr Yasmine Chahed OLD3.30, Prof Richard Macve OLD3.11, Mr Ahmed Abdalla OLD 2.15 and Mrs Chrisoulla Constantinou

Availability: This course is available on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

Course content: Financial accounting section: Financial accounting: role, nature, scope and limitations of accounting conventions. Regulatory accounting framework. Financial statements: construction, use and interpretation. Group accounting. Legal and economic considerations including elements of taxation. Extending the scope of financial reporting (eg inflation accounting

and reporting, approaches to equity maintenance, etc).

Management Accounting, Financial Institutions and Financial Management sections:

Introduction to managerial accounting and financial management. The design, use and role of accounting information in the management and control of organisational activities. Costing and budgeting. Financial institutions and sources of financing. The accounts of insurance companies and pension funds. Financial evaluation of decisions in the shorter and longer terms. The design and use of performance measurement systems. Accounting for environmental impacts.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 21 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of work per term will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney *Financial Accounting for Decision Makers*, 7th edn, Financial Times, Prentice Hall, 2013; Peter Atrill and Eddie McLaney *Management Accounting for Decision Makers*, 8th edn, Financial Times, Prentice Hall, 2015; Levinson, M *The Economist Guide To Financial Markets* (6th edition).

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period. The first 15 minutes will be reading time.

AC211

Managerial Accounting

This information is for the 2015/16 session.

Teacher responsible: Mr Lukas Löhlein OLD 3.34, Dr Tommaso Palermo KSW 3.07, Dr David Twardowski 3.08

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. Please seek permission from the Accounting Department tutor. It is also an option for students taking the Diploma in Accounting and Finance.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course analyses the roles and applications of management accounting practices and concepts in contemporary organisations and enterprises. Management accounting is extensively involved in the planning, coordination and control of complex organisations and networks of organisations competing on a global scale. The course explores key management accounting concepts and tools, and their economic, strategic, behavioural and organisational underpinnings. The course is organised in four modules.

Management Accounting for Decision Making examines how management accounting information can be used in the context of a variety of short- and long-term decision problems, ranging from costing to pricing, outsourcing and investment appraisal.

Management Accounting and Strategy looks at management accounting change and at the emerging role of management accounting in strategy making.

Management Accounting and Organisational Control examines intra-organisational planning and control issues, focusing on how managerial action is guided by practices such as budgeting, variance

analysis and transfer pricing.

Performance Measurement addresses the use of financial and non-financial performance measures in complex organisational and managerial settings, with particular emphasis on their behavioural consequences and the limits of quantification.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

2 hour revision lecture in week 11 of LT.

Formative coursework: Students will be required to complete written assignments before each class. Four of these assignments, one per module, will be collected and graded by class teachers. Course work may take the form of an essay, a case analysis or a numerical exercise and may also include in-class presentation and team-based work. All students will be expected to contribute to class discussions. Feedback on performance and progress will be provided during class, on written homework assignments, and during office hours.

Indicative reading: Detailed course programmes and reading lists will be distributed before the first lecture of each module. Illustrative texts and articles include: Bhimani A, Horngren CT, Datar SM and Rajan MV (2012), *Management and cost accounting*, 5th edition, FT/Prentice Hall; Shank JK (1996), *Analysing technology investments – From NPV to strategic cost management*, *Management Accounting Research* 7, 185 – 197; Van der Stede, WA and Palermo, T (2011), *Scenario budgeting: Integrating risk and performance*, *Finance & Management* 184(1), 10–13; Eccles, GE (1983), *Control with fairness in transfer pricing*, *Harvard Business Review* (November/December), 149-161; Hall, M (2010). *Accounting information and managerial work*. *Accounting, Organizations and Society* 35, 301-315.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AC310

Management Accounting, Financial Management and Organisational Control

This information is for the 2015/16 session.

Teacher responsible: Prof Alnoor Bhimani OLD 3.08 and others

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Available to students on other undergraduate/Diploma programmes with the permission of the Accounting Departmental Tutor.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course addresses contemporary issues in management accounting, financial management, and organisational control. The course consists of four modules, all of which are taught by faculty with specific expertise in the area. The exact composition of the course may vary from year to year, but issues which are typically addressed include financial controls, organisational structures, performance measurement and incentive systems, budgetary control and public-sector and non-profit financial management.

The Function of management control systems: The course starts with the study of the quintessential role of management control systems in decentralised organisations, with a focus on the measurement and evaluation of the performances of organisational entities and their managers. Focusing on financial control systems,

this module analyses issues related to financial target setting (as part of organisations' planning and budgeting processes), performance measurement and evaluation, and the assignment of various forms of organisational rewards, such as bonuses and promotions.

Management accounting, budgets and behaviour: Building on the first module, this module focuses primarily on budgeting issues and on understanding how budgets impact employee behaviours and their decisions and actions. This module also discusses "beyond budgeting" and capital budgeting. This is done through the lens of different organisational theories, including contingency theory.

Accounting in non-governmental organisations: Many of the concepts from the prior two modules are then studied in the context of NGOs, including measuring the performance and effectiveness of NGOs, the use of 'business-like' management control and financial management systems (like budgets), the evaluation of programme efficiency and impact, and the accountability to donors and beneficiaries.

Accounting in the new public sector: The final module studies management accounting and financial management in the 'new public sector', including performance measurement, cost accounting, cost management and pricing; the roles of accounting controls in the health system reforms in the UK and elsewhere.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. In LT, the module on 'Accounting in non-governmental organisations' is taught using a 'flipped-lecture' approach, with a series of on-line lectures, and five 2-hour classes. The remainder of teaching in LT will be 10 hours of lectures and 5 hours of classes. Week 6 in both terms will be a reading week.

Formative coursework: Case studies and applications will be used extensively. Students will be expected to present cases and contribute to in-class discussions. Students will also be expected to produce four written assignments, two in each of MT and LT. The written assignment with the highest mark from each term will count towards the final mark for the course.

Indicative reading: Detailed reading lists will be given out at the start of each part of the course. Illustrative references include: Bhimani and Bromwich, *Management Accounting: Retrospect and Prospect*, Elsevier/CIMA (2009); Bhimani, *Contemporary Issues in Management Accounting*, OUP (2006); Olson, Guthrie & Humphrey (Eds), *Global Warning: Debating International Developments in New Public Financial Management*, Cappelen Akademisk Forlag As, Oslo (1998); Merchant & Van der Stede, *Management Control Systems: Performance Measurement, Evaluation and Incentives*, FT/Prentice Hall (2012).

Assessment: Exam (80%, duration: 3 hours) in the main exam period; the other 20% of the mark will be based on two of the four formative written assignments submitted during the year. The assignment with the highest mark from the two submitted pieces of work in each term (one of two in MT, and one of two in LT) will each count for 10% of the final mark for this course.

AC330

Financial Accounting, Analysis and Valuation.

This information is for the 2015/16 session.

Teacher responsible: Dr Vasiliki Athanasakou OLD 2.20, Dr Stefano Cascino OLD 3.32 and Prof Richard Macve OLD 3.11

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

The course is available as an outside option, subject to the course leader's permission, if students have achieved a sufficient standard of performance in the pre-requisite course **AC100 Elements of Accounting and Finance** or **AC102 Elements of Financial Accounting** or equivalent

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Financial Accounting (AC102) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course addresses the theory and practice of financial reporting. Accounting practices are examined in the light of historical development, regulatory requirements, theories of income and capital and other approaches to accounting theory and to the use of accounting information in business analysis and valuation.

Financial accounting with particular reference to company accounts. Issues in financial accounting including accounting for business combinations under International Accounting Standards. Implications of empirical research into stock market effects of management choice of accounting policies. Business analysis and valuation. Regulation of financial reporting. International standardisation of accounting practice. A conceptual framework for financial reporting. The measurement of income, costs and depreciation. The valuation of assets. Accounting for changing prices. Further details will be given at the start of the course.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

There will be a revision class in week 1 of ST.

Formative coursework: Students should prepare weekly written work for class discussion. At least two pieces per term will be collected for marking.

Indicative reading: Detailed reading lists of books and journal articles will be provided during the course. No one book covers the entire course. Recommended books include Whittington, G, *Inflation Accounting: an introduction to the debate*, CUP (1983); Baxter, WT, *Inflation Accounting*, Oxford, Philip Allan, (1984); Beaver, WH, *Financial Reporting: An Accounting Revolution*, Prentice-Hall (1998 - use latest edition); Palepu, KG, Healy, PM, Bernard, VL and Peek, E, *Business Analysis and Valuation*: IFRS Edition, Thomson (2013).

Assessment: Exam (100%, duration: 3 hours and 15 minutes, reading time: 15 minutes) in the main exam period.

AC340

Auditing, Governance and Risk Management

This information is for the 2015/16 session.

Teacher responsible: Dr Nadia Matringe KSW3.05, Dr Liisa Kurunmaki OLD 3.13 and Dr Julia Morley OLD 3.09

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Financial Accounting (AC102) or Elements of Accounting, Financial Institutions and Financial Management (AC104). Elements of Management Accounting and Financial Management (AC103) is recommended to complement AC102, but not required.

Course content: The course provides a critical analysis of auditing practices and their role in organisational governance and risk management. Auditing is demanded by, and provides assurance to, a variety of internal and external stakeholders, including corporate shareholders and regulators. As societal demands for accountability have increased, auditing has become both more important and more regulated itself. Auditing also remains controversial and this course will address contemporary debates.

The course addresses the theoretical basis of auditing, its role as a risk management function, its practical methodologies and its legal, professional and social environment. The course is divided into four modules.

Corporate Financial Audit provides a basic overview and

introduction to corporate auditing theory and practice. The module investigates the roles of corporate financial audit in contemporary society; discusses issues related to the collection of audit evidence and assurance of audit quality; and analyses recent national and international developments in audit regulation and standard setting. **Internal Control and Risk Management** critically examines recent developments in risk management and internal control practices, including the role of internal auditing and the problem of reporting on the effectiveness of control systems.

Public Sector Auditing and Accounting considers variants of the audit function in the public sector context, such as value for money auditing.

Sustainability Accounting and Auditing addresses the broader accountability framework of the corporation and related environmental and social accounting and auditing issues. While the primary focus of the course is upon UK practice, international comparisons will also be made. There is also an intention to run a small number of practitioner lectures during the 2014-15 session. Further details will be provided at the start of the session.

Teaching: 15 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 8 hours of classes in the LT. 2 hours of lectures in the ST.

There will be a reading week in week 6 of both MT and LT.

Formative coursework: Students will be expected to produce a minimum of four written essays per year and one class presentation. All students will be expected to contribute to class discussion.

Feedback on performance and progress will be provided during class, on written homework assignments, and during office hours.

Indicative reading: No one book covers the entire syllabus. In addition to professional and academic journals, reading will cover the following: Gray I, & Manson S, *The Audit Process*, Thomson, 2011; and refer to Power M, *The Audit Explosion*, Demos, 1996 and The Audit Society, OUP, 1999, Flint D, *Philosophy and principles of auditing*: an introduction, Macmillan Education, 1988. Background reading for the fourth module may be found in Henriques, A, *Corporate Truth: The Limits to Transparency* (Earthscan 2007). Students will also be provided with relevant examples of corporate and other reports and referred to relevant websites. Detailed course programmes and reading lists will be distributed at the first lecture of the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AC340 Mazars Prize

The international accounting firm, Mazars, sponsors a prize for the best examination performance in AC340. The prize has a value of £200 and is awarded at the end of the examination period each year.

AN100

Introduction to Social Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Laura Bear OLD 6.09
Katy Gardner OLD 5.07

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a general introduction to Social Anthropology as the comparative study of human societies and cultures. The Michaelmas term will focus on the relationship between culture and nature addressing topics such as: gender, body techniques and the senses; experiences of time; relations between the environment and society; race and nationalism. The Lent term will address institutions and concepts that shape society in various contexts including: love and kinship, space, place and belonging, ethnicity and migration and different forms of inequality and

hierarchy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: R Astuti et al (eds.), *Questions of anthropology* (2007), M Bloch, *Prey into Hunter* (1996); M Mauss, *The Gift* (1970).

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (15%, 2500 words) in the MT.

Essay (15%, 2500 words) in the LT.

AN101

Ethnography and Theory: Selected Texts

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13 and Prof David Graeber OLD 6.10

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course discusses important aspects of anthropological and sociological theory in relation to modern ethnographic texts. It ranges from the classical social theory by Marx, Durkheim and Weber to the most recent theoretical advances in the discipline. The course is intended to give students a sound grasp of central theoretical concepts and of their significance for empirical research.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: R Aron, *Main Currents in Sociological Thought*; A Giddens, *Capitalism and Social Theory*; R Nisbet, *The Sociological Tradition*; L Coser & B Rosenberg, *Sociological Theory: a Book of Readings*; K Morrison, *Marx, Durkheim, Weber*; R Borofsky (Ed), *Assessing Cultural Anthropology*; C Geertz, *The Interpretation of Cultures*; A Kuper, *Anthropology and Anthropologists*; G Stocking, *Observers Observed*; E E Evans-Pritchard, *Witchcraft oracles and magic among the Azande*; V Turner, *The Forest of Symbols*; W Roseberry, *Anthropologies and Histories*; R Rosaldo, *Culture and Truth*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (15%, 2500 words) in the MT.

Essay (15%, 2500 words) in the LT.

AN102**Reading Other Cultures: Anthropological Interpretation of Text and Film****This information is for the 2015/16 session.****Teacher responsible:** Mr James Johnston KGS 1.06
Mary Montgomery
Geoffrey Hughes**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This course aims to provide training in the reading and interpretation of visual and textual anthropology for first-year students, and to develop analytic skills. The course introduces students to detailed, holistic study of social and cultural practices within particular geographic and historical contexts, and develops skills in bringing together the various elements of cultural and social life analysed by anthropologists. By the end of each term, successful students will have both a detailed knowledge of three important texts, and also have a rounded view of the three settings studied. They will also have developed the capacity to think critically about ethnographic writing and film-making. In addition, the course aims to enable students to examine in detail the process by which ethnographic texts are produced. The course brings students to a closer understanding of anthropological fieldwork and evidence. Students will usually read three book-length ethnographic accounts (or the equivalent) per term, and will study a film (or pictorial, architectural or other visual material) associated with each text.**Teaching:** MT and LT. Three lectures per term plus an introductory lecture; three films/visual material presentations per term/six discussion classes per term/three two-hour seminars per term. This course will make consistent use of electronic resources, especially the 'public forum' posted on Moodle. Students are encouraged to avail themselves of this opportunity to constructively interact with the class and the class teachers.**Formative coursework:** Students will be required to read the three set texts per term, approximately 1/3 text (two-four chapters) each week, and it will be essential to do this in order to pass this course. The emphasis in classes and seminars will be on developing students' abilities to read and analyse texts as a whole, and to relate them to the other material offered on the course. Supplementary readings may be provided during the term. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.**Indicative reading:** Detailed reading lists (including this year's set texts) will be provided at the beginning of the course.For a general introduction to issues covered in the course, see the following: Engelke, M., ed. 2009. *The Objects of Evidence: Anthropological Approaches to the Production of Knowledge*. Oxford: Wiley-Blackwell. Grimshaw, A., and A. Ravetz. 2009. *Observational Cinema: Anthropology, Film, and the Exploration of Social Life*. Bloomington: Indiana University Press. MacDonald, S. 2013. *American Ethnographic Film and Personal Documentary: The Cambridge Turn*. Berkeley: University of California Press. Marcus, G. E., and M. M. J. Fischer. 1986. *Anthropology as Cultural Critique: An Experimental Moment in the Human Sciences*. Chicago: University of Chicago Press. Wolf, M. 1992. *A Thrice-Told Tale: Feminism, Postmodernism, and Ethnographic Responsibility*. Stanford: Stanford University Press.**Assessment:** Essay (15%, 2500 words) in the MT.
Essay (15%, 2500 words) in the LT.
Take home exam (70%) in the ST.**AN200****The Anthropology of Kinship, Sex and Gender****This information is for the 2015/16 session.****Teacher responsible:** Dr Nicholas Long OLD 6.14 and Dr Catherine Allerton OLD 6.13**Availability:** This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.**Teaching:** 10 hours of lectures and 10 hours of classes in the MT.
10 hours of lectures and 10 hours of classes in the LT.**Formative coursework:** Students are expected to prepare material for discussion in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.**Indicative reading:** Carsten, J. (ed) *Cultures of Relatedness* (2000); Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Fox, R. *Kinship and Marriage* (1967); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).**Assessment:** Exam (70%, duration: 3 hours) in the main exam period.

Essay (15%, 2500 words) in the MT.

Essay (15%, 2500 words) in the LT.

AN205 Half Unit**The Anthropology of Melanesia****This information is for the 2015/16 session.****Teacher responsible:** Dr Michael W. Scott, OLD 6.16**Availability:** This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.The three ethnographies, which have all been published within the last two years, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an

analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's *Leviathans at the Gold Mine*, a study of the relationship between indigenous landowners and a large international gold mine in their valley in the highlands of New Guinea.

These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state.

The readings will be supplemented by ethnographic films.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in classes and are required to write assessment essays.

Indicative reading: Christopher Wright, *The Echo of Things: The Lives of Photographs in the Solomon Islands* (2013); Alice Street, *Biomedicine in an Unstable Place: Infrastructure and Personhood in a Papua New Guinean Hospital* (2014); Alex Golub, *Leviathans at the Gold Mine: Creating Indigenous and Corporate Actors in Papua New Guinea* (2014).

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the MT.

AN216 Half Unit Not available in 2015/16

Cognition and Anthropology: Human Development in Cultural Environments

This information is for the 2015/16 session.

Teacher responsible: Prof Rita Astuti OLD6.11

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The course will examine the contribution that the study of human psychology can make to anthropology. After discussing why anthropologists should pay attention to psychology and why psychologists should pay attention to anthropology, we will examine a range of psychological findings (for example, on infant's knowledge of the physical and mental world) and their relevance to anthropology.

Teaching: 15 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: C Strauss and N Quinn, *A Cognitive Theory of Cultural Meaning* (1997); M Bloch, *How We Think They Think* (1998); D Sperber, *Explaining Culture* (1996); M Cole, *Cultural Psychology* (1996); M Tomasello, *The Cultural Origins of Human Cognition* (1999); P Boyer, *Religion Explained* (2001). Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the MT.

AN221 Half Unit

The Anthropology of Christianity

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course will examine a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher. Students are asked to participate in the fieldwork trip in years when this is available (please note that costs will be kept to a minimum and consideration will be given in any cases of financial hardship). Fieldnotes and other materials will be prepared by fieldtrip participants.

Indicative reading: M Bloch, *From Blessing to Violence:*

History and Ideology in the Circumcision Ritual of the Merina of Madagascar; F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London); W Christian, *Person and God in a Spanish Valley* (reprint 1988); J Comaroff, *Body of Power, Spirit of Resistance*; J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*; R Iletto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*; J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*; M Taussig, *The Devil and Commodity Fetishism in South America*. Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (30%, 2500 words) in the LT.

Take home exam (70%) in the ST.

AN223 Half Unit**The Anthropology of Southeast Asia**

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam).

The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed reframes, the theoretical debates at hand. Upon successful completion of the course, students will be able to:

1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.
6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Film screenings will also take place throughout the term.

Formative coursework: Students are expected to prepare material for discussion in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: Useful histories of Southeast Asia / Southeast Asian anthropology M.C. Ricklefs, B. Lockhart, A. Lau, P. Reyes, and M.A. Thwin, *A New History of Southeast Asia* (2010); V.T. King and W.D. Wilder, *The Modern Anthropology of South-East Asia: An introduction* (2003). Ethnographies Barker, J., E. Harms, and J. Lindquist, eds. 2014. *Figures of Southeast Asian Modernity*. Assessment: Take home exam (100%) in the ST.

AN226**Political and Legal Anthropology**

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09

Dr Insa Koch NAB 7.17

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The anthropological analysis of political and legal institutions as revealed in relevant theoretical debates and with reference to selected ethnography. The development of political and legal anthropology and their key concepts including forms of authority; forms of knowledge and power; political competition and conflict; colonial transformation of indigenous norms; writing legal ethnography of the 'other'; folk concepts of justice; the theory of legal pluralism; accommodation of religious practices in secular laws of European states.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes.

Indicative reading: Gledhill, J. 1994, *Power and its Disguises*; Leach, E. 1954, *The Political Systems of Highland Burma*; Sharma, A and Gupta, A, 2006, *The Anthropology of the State*; Verdery, K, 1999, *The Political Lives of Dead Bodies*; Moore, S F, 1978, *Law as Process*; Malinowski, B, 1916, *Crime and Custom in Savage Society*; Bohannan, P, 1957, *Justice and Judgement among the Tiv*; Comaroff J and Roberts S, 1981, *Rules and Processes*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (15%, 2500 words) in the MT.

Essay (15%, 2500 words) in the ST.

Students are required to write an assessment essay of 2000-2500 words in Michaelmas and Lent Term (15% each).

AN230 Half Unit Not available in 2015/16**The Anthropology of Industrialisation and Industrial Life**

This information is for the 2015/16 session.

Teacher responsible: Dr Gisa Weszkalnys

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology, BSc in Management and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted

exemption by the course teacher

Course content: This course deals with anthropological perspectives on the industrialisation process, on industrial life, and the transformation of nature involved, in relation to relevant theoretical debates and with reference to selected ethnographies. The aim is to lead students to develop a critical understanding of the dramatic societal changes brought about by industrialisation and, specifically, of how it affected relations between people and nature, for example, through the increasing exploitation as well as processing of natural resources and the production of energy on a large scale. The course will focus in particular on the practices and cosmologies of those people who in their everyday life or their work participate in these alterations, drawing on case studies from Papua New Guinea, Africa, South America. The themes touched on are likely to include the rural-urban and centre-periphery nexus linking neophyte proletarians with peasant villages and the producers of resources in the periphery with their consumers in the metropolitan centres; the ways in which industrialisation produces new social, environmental, and physical vulnerabilities; the contrast between the organised and unorganised sector; the new kinds of relations formed between companies and local communities in the context of corporate social responsibility programmes; local discourses about industrial pollution and environmental degradation; and the politics of ontology that arise where usable and exploitable nature meet. We will also discuss notions such as development, sustainability, the resource curse and peak oil, which point to the problems in the conduct of industrialised and post-industrialised production as we have come to know it. Throughout, students will be introduced to materials and viewpoints from within and outside the discipline, and will be encouraged to compare and evaluate the nature and value of ethnographic evidence and other approaches to these issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher

Indicative reading: A. Apter, *The Pan-African Nation: Oil and the spectacle of culture in Nigeria* (2005); J. Nash, *We eat the Mines and the Mines eat us: Dependency and Exploitation in Bolivian Tin Mines* (1979); A. Biersack, J. B. Greenberg, eds. *Reimagining Political Ecology* (2006); J. Ferguson, *Expectations of Modernity* (1999); S. Kirsch, *Reverse Anthropology: indigenous analysis of social and environmental relations in New Guinea* (2006); A. Tsing, *Friction: An Ethnography of Global Connection* (2005); K. Polanyi, *The Great Transformation* (1944); D. Rajak, *In Good Company* (2011).

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

AN231 Half Unit Not available in 2015/16 The Anthropology of China

This information is for the 2015/16 session.

Teacher responsible: Prof Stephan Feuchtwang OLD6.12 and Ms Charlotte Bruckermann KGS1.06

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The anthropological study of China offers new perspectives on general topics. Topics that will be considered are kinship; relatedness; gender; gift, honour, and trust; the

performance of love; ritual and belief; the ambivalence and scales of hospitality; the stranger king; gods and ghosts; civilisation and its others; and the modern state.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher

Indicative reading: Brandtstädter, Susanne and Santos, Gonçalo (eds.) *Chinese Kinship: Contemporary anthropological perspectives*; Fong, Vanessa *Only Hope: Coming of Age under Chinas One-Child Policy*; Feuchtwang, Stephan *The Anthropology of Religion, Charisma, and Ghosts: Chinese lessons for adequate theory*; Gates, Hill *Chinas Motor: A thousand years of petty capitalism*; Watson, James; E Rawski (Eds) *Death Ritual in Late Imperial and Modern China*; Stafford, Charles *Separation and Reunion in Modern China*; Yan, Yunxiang *Private Life under Socialism*. Good background reading in history: Spence, Jonathan D. (1990) *The Search for Modern China*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the MT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN237 Half Unit The Anthropology of Development

This information is for the 2015/16 session.

Teacher responsible: Professor Katy Gardner OLD 5.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course considers a range of contributions made by anthropologists to the analysis of development. It assesses the reconcilability of two divergent perspectives: development anthropology, with its corpus of writings by practitioners working on practical projects, and the 'anthropology of development', comprising a series of critiques of development theory and practice by anthropologists. It examines the historical background, showing how development and its discourses were made in the wake of the colonial encounter and exploring the role played by anthropologists in this process. Critiques of both state-planned and market-driven development are considered and weighed against the ethnographic evidence, and anthropological studies of development organisations, institutions and 'the aid industry' considered. The anthropology of planning and policy; actor-centred perspectives on development; NGOs and participatory approaches; microcredit and gender; and religion and development, are among the topics explored. Regional ethnographies used include those from various parts of Southern and West Africa, China, Latin America, South and South-East Asia.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher. Towards the end of the term the students will also have the opportunity to answer a quiz on the key concepts covered in the course which will be marked by the course teacher.

Indicative reading: F Cooper and R Packard (Eds), *International Development and the Social Sciences* (1997); A Escobar,

Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Essay (30%, 2500 words) in the MT.
The assessed essay must be between 2,000 – 2,500 words in length.

AN238 Half Unit Not available in 2015/16 Anthropology and Human Rights

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The tension between respect for 'local cultures' and 'universal rights' is a pressing concern within human rights activism. For well over two decades, anthropologists have been increasingly involved in these discussions, working to situate their understandings of cultural relativism within a broader framework of social justice. This course explores the contributions of anthropology to the theoretical and practical concerns of human rights work. The term begins by reading a number of key human rights documents and theoretical texts. These readings are followed by selections in anthropology on the concepts of relativism and culture as well as other key frameworks, such as identity and violence. Students will then be asked to relate their understandings of human rights to the historical and cultural dimensions of particular cases, addressing such questions as the nature of humanity, historical conceptions of the individual, colonialism and imperialism, the limits of relativism, and the relationship between human rights in theory and in practice. Case studies focus on Africa and Latin America.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students are expected to prepare discussion material for classes/seminars and are required to write an assessment essay. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: E Messer, 'Anthropology and Human Rights' Annual Review of Anthropology 1993; J Cowan et al (Eds), Culture and Rights: Anthropological Perspectives; R Wilson (Ed), Human Rights, Culture, and Context: Anthropological Perspectives; T Turner, 'Human Rights, Human Difference: Anthropology's Contribution to an Emancipatory Cultural Politics' Journal of Anthropological Research 1997; T Asad, Formations of the Secular; P Farmer,

'On Structural Violence', Current Anthropology 1999; M Mamdani, When victims become killers; C Taylor, Sacrifice as Terror; R Menchu, I, Rigoberta Menchu. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN240 Half Unit Not available in 2015/16 Investigating the Philippines - New Approaches and Ethnographic Contexts

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD6.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is most suitable for second and third year students but interested first year external students may seek an exemption. Also available to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in social anthropology unless granted exemption by the teacher.

Course content: This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of 'native ethnographies' by Filipino scholars resident both in the Philippines themselves and in the US. The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year); Migration, 'mail-order' brides, and the Philippine diaspora; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and "anitismo"; Tourism, symbolic economies and the impact of international capitalism.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for classes/seminars. Students in the Anthropology Department have the opportunity to submit non-assessed essays to their tutor. Students external to the Department may submit a short piece of written work to the course teacher by arrangement.

Indicative reading: Renato Rosaldo Ilongot Headhunters; Vicente Rafael Contracting Christianity; Fenella Cannell Power and Intimacy in the Christian Philippines; Sally-Ann Ness Where Asia Smiles; Heather L. Claussen, Unconventional Sisterhood; J.Neil C. Garcia Philippine Gay Culture: the Last Thirty Years; M. F. Manalansan Global Divas: Filipino Gay Men in the Diaspora; Vicente Rafael White Love and Other Events in Filipino History; Evelyn Tan Cullemar Babayanism in Negros; Benito M Vergera Displaying Filipinos: Photography and

Colonialism in Early 20th Century Philippines; Renaldo Clemena Iletto Pasyon and Revolution; K.F. Wiegele, Investing in Miracles: El Shaddai and the Transformation of Popular Catholicism in the Philippines; Nicole Constable Maid to Order in Hong Kong; Albert Alejo Generating Energies in Mount Apo: Cultural Politics in a Contested Environment; Catherine Ceniza Choy Empire of Care: Nursing and Migration in Filipino American History; Esther C.M. Yau and Kyung Hyun Kim Asia/Pacific Cinema; Caroline S. Hau, Necessary Fictions; Philippine Literature and the Nation. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN243 Half Unit Not available in 2015/16

Children and Youth in Contemporary Ethnography

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: For much of its history, and with some notable exceptions, anthropology has paid little serious attention to children. However, recent years have seen a growing interest in both 'childhood' as a historical and social construction, and in children's engagement with their own social worlds. This course aims to introduce students to emerging ethnographic work on children and youth, in order to explore both its theoretical and methodological challenges. Ethnographic studies will cover a wide range of societies and regions, including anthropological work on children and childhood in the US and UK. The course will begin with an investigation of children's place in anthropology, including early anthropological work on 'Culture and Personality' and 'child socialisation'. The course will then move to consider a variety of topics that have been the focus of recent ethnographic study. These may include: children's play, childhood identities and kinship, education and schooling, youth cultures and globalization, children's work, street children and children's competencies in contexts of crisis, including war.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Weekly lectures and classes in the Lent Term. Film screenings in the Lent Term.

Formative coursework: In addition to preparing discussion material for classes, students will normally write one tutorial essay for the course. Non-Anthropology students taking this course may submit an essay to the teacher responsible.

Indicative reading: RA LeVine and RS New (eds) 2008.

Anthropology and child development: a cross-cultural reader; N Scheper-Hughes and C Sargent (eds) 1998. *Small wars: the cultural politics of childhood*; KF Olwig and E Gullov (eds) 2003. *Children's Places: Cross-cultural perspectives*; D Durham and J Cole (eds) 2006. *Generations and globalization: youth, age and family in the new world economy*; M Liebel. 2004. *A will of their own: cross cultural perspectives on working children*; V Amit-Talai and H Wulff (eds) 1995. *Youth cultures: a cross-cultural perspective*; A James. 1993. *Childhood identities: self and social relationships in the experience of the child*; J Boyden and J de Berry (eds) 2004. *Children and youth on the frontline: ethnography, armed conflict and displacement*; BA Levinson, DE Foley and DC Holland (eds) 1996. *The cultural production of the educated person: critical ethnographies of schooling and local practice*; H

Montgomery. 2009. *An introduction to childhood: anthropological perspectives on children's lives*.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

AN244 Half Unit

Anthropology and Media

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke 6.12

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to anthropological analyses of media, including books and other printed texts, photography, radio, television, film, and the internet. Although 'the anthropology of media' is often understood to be a relatively new subfield, there has been a long-standing interest in media technologies within the discipline. There is also an important manner, from an anthropological point of view, in which 'media technologies' have to be understood not only as these cultural artefacts (radio, film) but also the more elementary senses they express (hearing, sight, etc). We therefore investigate media both as a broad conceptual category and as specific technologies of communication. The course begins with a historical overview of anthropologists' investigations of media technologies, broadly construed. We then move on to consider ethnographic case studies of media in context. Examples may include: photography in India, radio in Zambia, television and cassette circulation in Egypt, mobile phones in Jamaica, book groups in England, and 'indigenous video' in Brazil and Australia. Throughout the course, these case studies are framed in relation to some of the key theoretical debates that have shaped media studies in anthropology and related disciplines since the 1930s. Some attention is also given to the methodological problems involved in studying media, especially the extent to which it challenges the possibility of conducting fieldwork by participant observation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking the course, a formative essay may be submitted to the course teacher.

Indicative reading: *Domestication of the Savage Mind* (J Goody); *Imagined Communities* (B Anderson); *The Work of Art in the Age of Mechanical Reproduction* (W Benjamin); *Media Worlds* (F Ginsburg, L Abu-Lughod, and B Larkin, eds); *Understanding Media* (M McLuhan); *Understanding Media* (D Boyer); *'Anthropology and the Mass Media'* (D Spitulnik); *'Anthropology and its contributions to studies of Mass Media'* (S Dickey); *Media Rituals* (N Couldry); *A Voice: And Nothing More* (M Dolar); *The Presence of the Word* (W Ong).

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

AN250 Half Unit Not available in 2015/16

The Anthropology of South Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD5.09

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other

programmes where regulations permit and to General Course students.

Pre-requisites: Students taking this course should have completed an introductory course in social anthropology unless granted exemption by the teachers.

Course content: This course will aim to address issues of citizenship, inequality, political participation and democratic governance in rural and urban India. The course will cover both classic and current literature and weekly sessions will be organised thematically. We will start by looking at India's place in the world as a democracy and emerging economy and the many paradoxes that the country throws up - alongside some of the highest rates of economic growth, India also has one of the lowest performances on development indicators; despite 40% adult illiteracy, India has among the highest voter turnout rates in the world; despite local institutions having the least power compared to state level or the central government, ordinary people feel most invested in local elections; India remains largely rural yet India will hold the largest urban population in the world in less than ten years and so on. In order to understand these paradoxes, it is essential that issues of caste and class be examined in some detail, through the anthropological literature produced on these topics over the past 60 years or so. The changing caste dynamics will be examined through everyday practices of discrimination, violence and endogamy as well as institutional innovations of affirmative action for jobs and education. Class relations have also dramatically changed with land reforms in rural India as well as a substantial middle class has emerged in urban India. Economic reforms introduced since the 1990s have altered modes of retail and consumption in both urban and rural India creating new inequalities and entrenching old ones. In the political arena, these changing practices and dynamics have led to a democratic upsurge from below, leading to a greater participation in the electoral process by members of the lower castes and classes of India. All these issues and more will be addressed in this course through the rich corpus of anthropological literature on the subject alongside examples from India's vibrant media and popular culture.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Film screenings will be scheduled at the start of term. One revision session in ST.

Formative coursework: Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their academic advisers. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: Please read at least TWO of the following background readings before the start of the course and certainly by the end of the second week of the course: Sunil Khilnani, *The Idea of India*; Ramachandra Guha, *India After Gandhi*; Katherine Boo, *Behind The Beautiful Forevers*; Amartya Sen, *The Argumentative Indian*; Corbridge, S. and Harris, J. 2000, *Reinventing India: Liberalization, Hindu Politics and Popular Democracy*. London: Polity Press. Fiction: Vikram Seth, *A Suitable Boy*; Rohinton Mistry, *A Fine Balance*.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the MT.

AN251 Half Unit Not available in 2015/16

Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions

This information is for the 2015/16 session.

Teacher responsible: Prof Charles Stafford OLD6.02

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: This course focuses on human learning, thinking and cognitive development, specifically in relation to cultural-historical artefacts (such as writing) and social institutions (such as schools). The topics covered include: (1) cultural models and distributed cognition; (2) attachment behaviours and rites of passage; (3) emotions cross-culturally; (4) incest aversion and incest taboos; (5) morality and ethics cross-culturally; (6) numerical cognition and mathematics; (7) human logic and reason cross-culturally; (8) language and literacy; (9) training, schooling and expertise; (10) exchange, reciprocity and economic psychology.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in classes. Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisers. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Ed Hutchins, *Cognition in the wild*; Michael Cole, *Cultural psychology*; A. Wolf ; P. Durham (eds), *Inbreeding, incest and the incest taboo*; Jack Goody, *The domestication of the savage mind*; D. Holland; M. Eisenhart, *Educated in romance*; Unni Wikan, *Turbulent hearts*; M. Lambek (ed.), *Ordinary ethics*; Stanislas Dehaene, *The number sense*.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

AN252 Half Unit Not available in 2015/16

Anthropological Approaches to Value

This information is for the 2015/16 session.

Teacher responsible: Professor David Graeber OLD.6.10

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn's "values project", the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we'll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing new light on familiar problems.

Teaching: 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students registered for Anthropology degrees may submit formative tutorial essays on the course content and receive feedback from their academic advisers. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Graeber, D. (2001) *Toward an Anthropological Theory of Value: The False Coin of Our Own Dreams*. Graeber, D. (2011) *Debt: The First Five Thousand Years* Godbout, J. & Caillé, A. (1998) *The World of the Gift*. De Angelis, M. (2007) *The Beginning of History: Value Struggles and Global Capitalism* Appadurai, A. (2013) *The Future as Cultural Fact: Essays in the Global Condition*

Turner, T. (1984) "Value, production and exploitation in simple non-capitalist societies" Munn, N. (1986) The fame of Gawa: A symbolic study of value transformation in a Massim (Papua New Guinea) society

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the ST.

AN256 Half Unit

Economic Anthropology (1): Production and Exchange

This information is for the 2015/16 session.

Teacher responsible: Dr Gisa Weszkalnys OLD 6.08

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines 'the economy' as an object of scholarly analysis and a domain of social action. We start by asking how scholars measured, described, modeled, and predicted its behaviour. What forms do economic institutions take cross-culturally? How were these institutions transformed as a result of their incorporation into a wider capitalist markets, state systems, and development initiatives? For example, we will examine the central place of households within capitalist economies, largely overlooked by mainstream economic analyses, and the role that money can play in both dividing and uniting human societies. The course will familiarise students with fundamental aspects of the field and with core concepts used in economic analysis, such as production, consumption, exchange, property, alienation, scarcity, and value. But we will also try to break open the standard frames of the debate by highlighting, for example, the place of nature in the capitalist expansion, and how economic life is not just life in the ordinary. What progress have anthropologists made in understanding fluctuations, booms and busts? What can ethnography tell us about how people cope with crises, individually and collectively, and what the future may hold? Throughout the course, students will become familiar with the key concepts of economic anthropology with reference to selected ethnography and gain a solid understanding of relevant theoretical debates.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers.

Non-Anthropology students taking this course will submit a formative essay to the course teacher.

Indicative reading: J.G. Carrier and D. Miller (1998) *Virtualism: A New Political Economy*. M Sahlins (1974), *Stone Age Economics*; J Parry and M Bloch (Eds) (1989), *Money and the Morality of Exchange*; K. Polanyi (1944) *The Great Transformation*. K Ho (2010) *Liquidated: an Ethnography of Wall Street*. S. Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; E. Shever (2012) *Resources for Reform: Oil and Neoliberalism in Argentina*; C.Hann and K.Hart (2011) *Economic Anthropology: History, Ethnography, Critique*. This is an indicative reading list: detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours).

Essay (30%, 2500 words) in the LT.

AN269 Half Unit Not available in 2015/16

The Anthropology of Amazonia

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD6.14

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, myth and colonialism; indigenous social movements; sexuality and gender; cosmology and shamanism; trade and inter-ethnic relations; language and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Ten hours of lectures and ten hours of classes in the Lent Term. Film screenings will also be held throughout the term.

Formative coursework: Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Clastres, Pierre. 1987. *Society Against the State: Essays in Political Anthropology*. Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*. Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*. Descola, Philippe. 1994. In *The Society of Nature: A Native Ecology in Amazonia*. Gow, Peter. 2002. *An Amazonian Myth and its History*. Fisher, William H. 2000. *Rainforest Exchanges: Industry and Community on an Amazonian Frontier*. Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*. Gregor, Thomas. 1985. *Anxious Pleasures: The Sexual Lives of an Amazonian People*. Lévi-Strauss, Claude. 1984. *Tristes Tropiques*. Conklin, Beth. 2001. *Consuming Grief: Compassionate Cannibalism in an Amazonian Society*.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN274 Half Unit

Subjectivity and Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD 5.06B

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: This course will explore the nature and formation of the self and of subjective experience. It will draw together

a range of anthropological, psychological and philosophical approaches to subjectivity and the social and cultural phenomena that shape and condition it, attending both to the particulars of individual lives and settings and to more general, existential dimensions of the human condition. The course will be structured around engagements with three principal paradigms: psychoanalysis; phenomenology; and subjectivation. A key aim of the course will be to understand the strengths and limitations of these approaches for anthropological analysis as well as potential sites of convergence and divergence. Specific topics to be covered include the unconscious, dreams, illness and healing, embodiment, sound, intersubjectivity, interpellation, the feminist subject, and altered states of consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Ten hours of lectures and ten hours of classes in MT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher

Indicative reading: Hallowell, I. 1955. *Culture and Experience*. Philadelphia: University of Pennsylvania Press. Butler, J. 1997. *The Psychic Life of Power*. Stanford: Stanford University Press. Mahmood, S. 2005. *Politics of Piety: The Islamic Revival and the Feminist Subject*. Princeton: Princeton University Press. Biehl, J. et. al. 2007. *Subjectivity: Ethnographic Investigations*. Berkeley: University of California Press. Ortner, S. 2006. *Anthropology and Social Theory: Culture, Power, and the Acting Subject*. Durham: Duke University Press. Jackson, M. 1989. *Paths Toward a Clearing: Radical Empiricism and Ethnographic Inquiry*. Bloomington: Indiana University Press. Howes, D. (ed.) 1991. *The Varieties of Sensory Experience*. Toronto: University of Toronto Press. Moore, H. 2007. *The Subject of Anthropology: Gender, Symbolism and Psychoanalysis*. Cambridge: Polity Press. Turner, V. & E. Bruner (eds.) 1986. *The Anthropology of Experience*. Urbana: University of Illinois Press. Wikan, U. 1990. *Managing Turbulent Hearts: A Balinese Formula for Living*. Chicago: University of Chicago Press.

Assessment: Take home exam (90%) in the ST.

Class participation (10%) in the MT.

Assessment for this course will comprise a 'take-home' exam of up to five questions. Students will be asked to write a 2000-2500 word essay on two of the questions, drawing across the breath of the course. The take home essay will be worth 90% of the total mark. 10% of marks will be given for general class participation. Those who give full attendance and make some effort to participate in class will be able to achieve first class marks.

AN275 Half Unit

The Anthropology of Revolution

This information is for the 2015/16 session.

Teacher responsible: Dr Alpa Shah OLD 6.17A

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Optional for BA/BSc Social Anthropology and BA Anthropology and Law. Also available to students on other degree programmes as an outside option, and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology (AN100 Introduction to Social Anthropology).

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the

Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist 'People's War' in Nepal. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 4 hours of lectures, 4 hours of seminars and 12 hours of seminars in the MT.

Week 1, 4, 7, 10 – one 60 minute lecture followed by a one hour seminar (this is the only part of the course that is shared with MSc course of same name)

Week 2, 3, 5, 6, 8, 9 – one two hour seminar-workshop interspersed with lecturing.

Formative coursework: Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs: Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press. Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press. Pettigrew, Judith. (2013). *Maoists at the Hearth: Everyday Life in Nepal's Civil War*. Philadelphia: University of Pennsylvania Press.

Assessment: Take home exam (90%) in December.

Class participation (10%) in the MT.

Assessment for this course will comprise a 'take-home' exam of up to five questions. Students will be asked to write a 2000-2500 word essay on each of two questions, drawing across the breath of the course.

The take home essay will be worth 90% of the total mark.

10% of marks will be given for general class participation..

The take home paper will be given on the first Monday after the last week of the course. Due date: 72 hours later, Thursday morning.

AN298 Half Unit

Research Methods in Social Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Mathijs Pelkmans OLD 5.08

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The twofold aim of this course is to provide students with deeper insight of the process by which anthropological knowledge is produced, and to develop their skills with regard to the collection, analysis and representation of ethnographic data. We will review the main tools of anthropological research, and discuss the ways in which empirical data are being incorporated in ethnographic texts. The research techniques that will be reviewed include 'participant observation', various approaches to asking questions and interviewing, and research with documents and in archives. Students will carry out a small research project in London in which they address a specific research question from different angles, employing the various techniques learned during this course. They will report on their research activities and

write a 4,500 to 5000 word ethnographic essay on the basis of their research findings.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will write a short research proposal which will be formatively assessed.

Indicative reading: Cerwonka, A. and Malkki, L. *Improvising Theory: Process and Temporality in Ethnographic Fieldwork* (2007); Hammersley, A. Atkinson, P. *Ethnography: Principles in Practice* (2007); Narayan, K. *Alive in the Writing: Crafting Ethnography in the Company of Chekhov* (2012); Silverman, D. *Interpreting Qualitative Data* (2006); Spradley, J. *Participant Observation* (1980)

Assessment: Coursework (15%, 1000 words) and coursework (15%, 1000 words) in the LT.

Essay (70%, 5000 words) in the ST.

AN300

Advanced Theory of Social Anthropology

This information is for the 2015/16 session.

Teacher responsible: Prof David Graeber OLD 6.10, Dr Johannes Steinmuller OLD 5.06A and Dr Harry Walker OLD 5.06B

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: The aim of this course is to train students to engage critically with classic and contemporary texts in the discipline. It will examine the theoretical implications of particular anthropological approaches by surveying their origins, their strengths and their critique. The course will take the form of an intensive reading group in which six texts (three in each of MT and LT) will be discussed and analysed in depth, along with supplementary reading material where appropriate. Students will be expected to develop their own critical responses to the text, as well as an appreciation of the context in which it was written and its contribution to relevant theoretical discussions and debates.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in weekly classes and to write short commentaries on the required readings for each week. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: Bell. *Ritual Theory Ritual Practice*; Weller, Seligman, Puett. *Ritual and the Limits of Sincerity*; Sahlin. *Historical Metaphors and Mythical Realities*; Obeyesekere. *Apotheosis of Captain Cook*; Luhmann. *When God Talks Back*; Duranti. *Anthropology of Intentions*.

Assessment: Essay (34%, 2500 words) in the MT.

Essay (33%, 2500 words) and essay (33%, 2500 words) in the LT.

AN301

The Anthropology of Religion

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12 and Dr Michael Scott OLD 6.16

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: This course covers selected topics in the anthropology of religion, focusing upon relevant theoretical debates. In the Michaelmas term, the focus will also be on understanding through specific ethnographic and empirical case-studies, the ways in which lived religious practice, and the understanding of religion, get constituted inside and outside 'Western' and modern contexts. We will also pay attention to cases in which (as in all post-colonial settings, and in relation to so-called fundamentalisms) 'Western' and the 'non-Western' definitions are emerging in interplay with each other, including their relation to understandings of modernity and the secular. Some classic topics in the anthropology of religion are also considered, such as ritual, belief, and sacrifice. In the Lent term, we will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of 'religion' in relation to 'science'; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: H. H. Gerth and C. Wright Mills (eds.) 1946 (and later editions), *From Max Weber: essays in sociology*; E. Durkheim 1915 (and later editions), *The elementary forms of the religious life*; S. Mahmood 2005, *Politics of Piety*; J. Milbank 1990, *Theology and Social Theory*; T. Masuzawa 2005, *The Invention of World Religions*; R.A. Orsi (ed.) 2012, *The Cambridge Companion to Religious Studies*; C. Taylor 2007, *A Secular Age*; B Latour 2009 *The modern cult of the factish god*; H Hubert and M Mauss 1960, *On Sacrifice*; A. Abramson and M. Holbraad (eds.) 2014, *Framing Cosmologies: The Anthropology of Worlds*; G. Bateson and M. C. Bateson 1987, *Angels Fear: Towards an Epistemology of the Sacred*; B. Kapferer (ed.) 2002, *Beyond Rationalism: Rethinking Magic, Witchcraft and Sorcery*; L. Lévy-Bruhl 1926, *How Natives Think*; M. A. Pedersen 2011, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia*; K. Swancutt 2012, *Fortune and the Cursed: The Sliding Scale of Time in Mongolian Divination*; H. Whitehouse and J. Laidlaw (eds.) 2007, *Religion, Anthropology, and Cognitive Science*; R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (15%, 2500 words) in the MT.

Essay (15%, 2500 words) in the LT.

AN357 Half Unit Not available in 2015/16

Economic Anthropology (2): Transformation, Development, and Globalisation

This information is for the 2015/16 session.

Teacher responsible: Dr Laura Bear

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes

where regulations permit and to General Course students.

Course content: This course examines 'the economy', as an object of social scientific analysis and a domain of human action, focusing on the anthropology of globalisation. Scholars have various ways of analysing the new forms of production, consumption, exchange and circulation that have emerged since the 1980s. Some emphasise post-Fordist methods of flexible production and neo-liberal elite projects. Others focus on trans-state processes of globalisation. For other theorists shifts in state policies such as austerity, decentralised planning, public-private partnerships and the deregulation of financial markets are at the centre of analysis. Others address new forms of consumer society, popular desires for social mobility and transnational migration. Drawing from ethnographies and anthropological theory this course will cast a critical eye over these arguments. It will also revisit classic topics from the perspective of present realities — for example production and intimate economies; formal markets in relation to informalised, violent economies; circulation in relation to financial debt and risk; and consumption and consumer citizenship.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers. Non-Anthropology students taking this course will submit a formative essay to the course teacher.

Indicative reading: J Inda and R Rosaldo (eds) *The Anthropology of Globalisation* (2007); M Edelman and A Haugerud (eds) *The Anthropology of Development and Globalization* (2004); J Collier and A Ong (eds) *Global Assemblages: Technology, Politics and Ethics as Anthropological Problems* (2004); A Tsing, *Friction: an Ethnography of Global Connection* (2004); This is an indicative reading list: detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours). Essay (30%, 2500 words) in the LT.

AN398 Half Unit Not available in 2015/16 Special Essay Paper in Social Anthropology

This information is for the 2015/16 session.

Availability: This course is compulsory on the BA in Social Anthropology and BA in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Undergraduates taking this course need to have completed the first two years of either the BA/BSc Social Anthropology or the BA Anthropology and Law.

Course content: The essay may be based on any topic deemed to be amenable to anthropological analysis, and agreed by the student's academic advisor. Students should ensure that there is an adequate body of relevant literature available for analysis, and that the topic as defined is not unmanageably large.

There is no formal course content. Students will be expected to draw widely on their readings from other anthropology courses.

Teaching: 3 hours of lectures in the MT. 3 hours of lectures in the LT.

Formative coursework: Students have the opportunity to submit an abstract and bibliography to their academic advisor, who will advise candidates during their normal tutorial meetings on the chosen topic, the empirical and analytical scope of the essay, and on relevant readings. Students submit three-page outlines, and other writing assignments in Lent Term, and receive feedback on these during the seminar.

Indicative reading: There is no formal course content. Students will be expected to draw widely on their readings from other anthropology courses.

Assessment: Dissertation (100%, 8000 words) in the ST. The essay is 7,000 to 8,000 words of main text, including footnotes and appendices but excluding bibliography. The essay should be typed, double spaced, and should follow the reference procedures

of *The Journal of the Royal Anthropological Institute*. The essay must be handed in to the Anthropology Departmental Office by the date announced in the Department's Handbook, normally by May 1st

AN399

Ethnography as Research Method and Text

This information is for the 2015/16 session.

Teacher responsible: Dr Mathijs Pelkmans OLD 5.08

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Undergraduates taking this course need to have completed the first two years of either the BA/BSc Social Anthropology or the BA Anthropology and Law.

Course content: The twofold aim of this course is to provide students with deeper insight of the process by which anthropological knowledge is produced, and to develop their skills with regard to the collection, analysis and representation of ethnographic data. Students will carry out a small ethnographic research project and conduct library research, each of which will result in a written text. In the first half of the course the focus is on ethnographic research. We will review the main tools of anthropological research, and discuss the ways in which empirical data are being incorporated in ethnographic texts. The research techniques that will be reviewed include 'participant observation,' various approaches to asking questions and interviewing, and research with documents and in archives. Students will carry out a small research project in London in which they address a specific research question from different angles, employing the various techniques learned during the course. They will report on their research activities and write a short ethnography on the basis of their research findings. For the other half of the course students will write an extended essay based on any topic deemed to be amenable to anthropological analysis, and agreed by the candidate's tutor. The tutor will be concerned that there is an adequate body of relevant literature available for analysis, and that the topic as defined is not unmanageably large. Candidates will be expected to draw widely on their reading from other anthropology courses for their essay.

Teaching: 10 hours of lectures, 10 hours of classes and 1 hour of workshops in the MT.

Formative coursework: Students have the opportunity to write tutorial essays on topics from the course during Michaelmas Term and have the opportunity to submit an abstract and a three-page outline of their extended essay to their mentor during Lent Term.

Indicative reading: Cerwonka, A. and Malkki L.H. *Improvising Theory: Process and Temporality in Ethnographic Fieldwork* (2007); Davies, C.A. *Reflexive Anthropology: A guide to researching selves and others* (1999); Engelke, M. (ed.) *The Objects of Evidence: Anthropological approaches to the production of knowledge* (2009); Epstein, A. *The Craft of Social Anthropology* (1978); Hammersley, M. and Atkinson, P. *Ethnography: Principles in Practice* (2007); Jacobson, D. *Reading Ethnography* (1991); Spradley, J. *Participant Observation* (1980).

Assessment: Essay (50%, 8000 words) in the ST.

Project (35%) in the LT.

Other (15%) in the MT.

The three elements of assessment are the following: Two "Interim Reports" of 600 – 800 words each during MT (7.5% each). One 4,500-5,000 word "ethnography" or analytical description based on the research project to be submitted in the beginning of LT (35%). One 7,000-8,000 word "extended essay" based on literature research to be submitted in the beginning of ST (50%).

EC100

Economics A

This information is for the 2015/16 session.

Teacher responsible: Prof Alan Manning 32L 2.36A

Dr L. Rachel Ngai 32L 1.15

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in International Relations, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This is an introductory course in microeconomics and macroeconomics. It may not be taken if **Economics B** (EC102) has already been taken and passed. No previous knowledge of economics is assumed. The treatment will be non-mathematical, but students are expected to be able to interpret graphs. Entrance on to EC100 and EC102 is dependent on Economics A-level or equivalent background. Students with A-level economics (or equivalent) are not allowed to take EC100.

Course content: This course provides a foundation in micro and macroeconomics, primarily to those without background in the subject. The course aims to provide students with methods of economic analysis that can enable them to think about when markets work well, when they are likely to fail and what policies might improve outcomes. Macroeconomics is the focus of Lent Term, which covers questions such as unemployment, inflation, monetary policy and an introduction to international economic issues. The analytical methods taught are applied to questions of contemporary importance e.g. issues of inequality, climate change, economic growth.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Lecture handouts are distributed at frequent intervals; they contain the outline of the lectures, details of suggested readings and questions for discussion in classes.

Two hours of revision lectures will be held in week 11 of both MT and LT

These classes are usually taught by Graduate Teaching Assistants. They deal mainly with questions arising out of the lectures and questions on the lecture handouts. They are also used to discuss students' written work.

Formative coursework: Class teachers will normally set and mark four pieces of written work from each student during the course.

Indicative reading: N. Gregory Mankiw and Mark P. Taylor (2011) *Economics*, South-Western Cengage Learning, Second Edition.

Assessment: Exam (50%, duration: 2 hours) in the LT week 0. Exam (50%, duration: 2 hours) in the main exam period.

The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC102

Economics B

This information is for the 2015/16 session.

Teacher responsible: Prof Francesco Caselli 32L 1.21 and Prof Gianmarco Ottaviano 32L 2.27A

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics,

BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in International Relations, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This is an introductory course in microeconomics and macroeconomics. Students without a mathematical background may consider taking an introductory mathematics course, such as Basic Quantitative Methods, at the same time. EC102 is unavailable to anyone who has passed **Economics A** (EC100). Entrance on to EC100 and EC102 is dependent on Economics A-level or equivalent background. Students without A-level economics (or equivalent) are not allowed to take EC102.

Course content: Part A Consumer and Producer Theory; Competitive Model; Welfare and Market failures; Monopoly, oligopoly and monopolistic competition; Game Theory; Missing markets. Part B Measurement of the aggregate economy; growth and development, economic fluctuations; stabilization policy; money and inflation; unemployment; financial and sovereign crises.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: Students will submit two problems sets per term on which written feedback will be provided. Feedback will also be provided on weekly Moodle quizzes.

Indicative reading: Part A: Morgan W., M. Katz and H. Rosen (2009) *Microeconomics*, 2nd edition, McGraw-Hill. Part B: N Gregory Mankiw, *Macroeconomics*, Worth, 8th edition.

Assessment: Exam (50%, duration: 2 hours) in the LT week 0. Exam (50%, duration: 2 hours) in the main exam period.

The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC201

Microeconomic Principles I

This information is for the 2015/16 session.

Teacher responsible: Dr Margaret Bray 32L4.27 and Dr Erik Eyster 32L4.29

Availability: This course is compulsory on the BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics B (EC102) and Quantitative Methods (Mathematics) (MA107). This is an intermediate course in microeconomic analysis. Students are expected to have completed EC102 Economics B or an equivalent introductory course in economics based on textbooks such as D Begg, S Fischer & R Dornbusch, *Economics*; P A Samuelson & W Nordhaus, *Economics*; or R G Lipsey, *Positive Economics*. Students are also expected to have completed an introductory mathematics course such as MA107 Quantitative

Methods (Mathematics) and should revise calculus including partial derivatives and the use of Lagrangians.

From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

Course content: I. Consumer Theory. Utility functions and indifference curves. Income and substitution effects. The Slutsky equation. The expenditure function, compensating and equivalent variation, and consumer surplus. Selected applications to savings and labour supply, including the effects of taxes and benefits. II. Producer Theory. Production and cost functions. Firm and industry supply. Perfect Competition and Monopoly. III. Strategic Choice. Basic ideas in game theory. Applications to oligopoly and auctions. IV. General equilibrium and welfare. Competitive equilibrium. Efficiency of equilibrium. Welfare criteria. V. Topics in welfare economics. Public goods and externalities. VI. Uncertainty and information. Choice under uncertainty. Insurance markets. Asymmetric information. Loss Aversion. Moral Hazard.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

Formative coursework: Students should complete the weekly web-based quizzes before attending classes. In addition, at least five pieces of written work will be required and marked by class teachers.

Indicative reading: A reading list will be provided at the start of the course. The main text for the course is Snyder, C. and Nicholson, W. "Microeconomic Theory: Basic Principles and Extensions". Reference is also made to other texts and to journal articles.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC202

Microeconomic Principles II

This information is for the 2015/16 session.

Teacher responsible: Prof Frank Cowell 32L3.25A and Prof Alessandro Gavazza 32L4.21

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Statistics with Finance, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics B (EC102) and Quantitative Methods (Mathematics) (MA107). This is an intermediate course in microeconomic analysis. Students are expected to have completed Economics B or an equivalent introductory course in Economics. Students who have thoroughly mastered mathematics to the level of MA107 should be able to follow the course, but would find it difficult. MA100 would give a better grounding.

From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

Course content: The coverage is similar to Microeconomic Principles I. However a greater mathematical facility will be assumed of the student permitting both greater depth and a number of additional topics, such as duality, to be covered. Further details are available on <http://darp.lse.ac.uk/Frankweb/courses/ec202/>.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required and marked by class teachers.

Indicative reading: The text for the course is Cowell, F.A. (2006) *Microeconomics: Principles and analysis*, Oxford University Press, Oxford. Additional readings to complement the lecture notes on specific topics from other books or articles will be indicated as needed.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC210

Macroeconomic Principles

This information is for the 2015/16 session.

Teacher responsible: Dr Kevin Sheedy 32L1.09

Dr Liwa Rachel Ngai 32L1.03

Professor Ricardo Reis (room TBC)

Availability: This course is compulsory on the BSc in Economics, BSc in Economics with Economic History, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environmental Policy with Economics, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Social Policy and Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics B (EC102).

This is an intermediate course in macroeconomic analysis, for BSc degrees in Economics and is also available to other students as permitted by the regulations. Students are expected to have completed Economics B or an equivalent introductory course in Economics. Students are also expected to have completed an introductory mathematics course such as Basic Quantitative Methods.

From 2016/17, either Economics A (EC100) or Economics B (EC102) will be suitable pre-requisites.

Course content: The course will cover: Economic growth, consumption, investment, unemployment, business cycles, inflation, monetary and fiscal policy, financial markets and international macroeconomics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both MT and LT

Formative coursework: Students are urged to attempt the assigned problems before attending classes. Two pieces of written work per term will be required and marked by class teachers.

Indicative reading: The main textbook for the course is O Blanchard and D R Johnson, *Macroeconomics*, 6th ed., supplemented by other reading selected by the lecturers.

A combined package will be available in the Economists' Bookshop.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Candidates are required to answer eight out of ten short questions from Section A and three out of six long questions from Sections B and C (with at least one question from each section).

EC220

Introduction to Econometrics

This information is for the 2015/16 session.

Teacher responsible: Prof Jörn-Steffen Pischke 32L2.16 (MT), Dr. Taisuke Otsu 32L 4.25 and Dr. Marcia Schafgans 32L 4.12 (LT)

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Management Sciences, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy and Economics, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. Availability to General Course students is with the permission of the lecturer.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Those who have taken MA107/ST107 should consider taking EC220 only if they have obtained marks of 65 or better on both courses

Course content: This course is an introduction to econometrics; it aims to present the theory and practice of empirical research in economics.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software package Stata analysing actual data sets. Students will learn how various tools are used to answer causal “what-if” questions (e.g. whether our estimates will deliver answers to questions like: “What is the effect of monetary policy on output?”).

In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the MT and LT. EC220.B for graduate students.

Formative coursework: Exercises are provided each week and are discussed in the classes. (MT) Students are required to hand in written answers to the exercises for feedback. (LT) While students are expected to attempt the weekly problem sets before each class, students will receive formal feedback on 4 occasions.

Indicative reading: J. W. Wooldridge *Introductory Econometrics. A Modern Approach*, 5th Edition, South-Western.

J. D. Angrist and J. S. Pischke *Mastering ‘Metrics. The Path from Cause to Effect*, Princeton University Press.

Further materials will be available on the EC220 Moodle page.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

and Economics, BSc in Philosophy, Politics and Economics, BSc in Statistics with Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: This course is a more advanced introduction to econometrics; it aims to present the theory and practice of empirical research in economics. Compared to EC220, in LT this course puts more emphasis on the underlying statistical theory and relies on the use of matrix algebra.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software package Stata analysing actual data sets. Students will learn how various tools are used to answer causal “what-if” questions (e.g. whether our estimates will deliver answers to questions like: “What is the effect of monetary policy on output?”).

In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

Compared to EC220 this course discusses more advanced topics such as method of moments estimation and maximum likelihood estimation (non-linear) with applications to binary choice and count data models.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

Additional help lectures 10 x 1 hour in the LT. Two hours of revision lectures will be held in week 11 of both the MT and LT.

EC221.B for graduate students.

Formative coursework: Exercises are provided each week and are discussed in the classes. (MT) Students are required to hand in written answers to the exercises for feedback. (LT) While students are expected to attempt the weekly problem sets before each class, students will receive formal feedback on 3 occasions.

Indicative reading: J. W. Wooldridge *Introductory Econometrics. A Modern Approach*, 5th Edition, South-Western. J. D. Angrist and J. S. Pischke *Mastering ‘Metrics. The Path from Cause to Effect*, Princeton University Press. Further materials will be available on the Moodle website. Other useful texts include: W. Greene, *Econometric Analysis*, 7th Edition, Pearson; J. Johnston and J. Dinardo, *Econometric Methods*, 4th Edition, McGraw-Hill; G.S. Maddala and K. Lahiri, *Introduction to Econometrics*, 4th Edition, John Wiley; J.H. Stock and M.W. Watson, *Introduction to Econometrics*, 3rd Edition, Pearson; C. Heij et al., *Econometric methods with Applications in Business and Economics*, Oxford University Press.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC221

Principles of Econometrics

This information is for the 2015/16 session.

Teacher responsible: Prof Jörn-Steffen Pischke 32L2.16 (MT) and Dr. Marcia Schafgans 32L 4.12 (LT)

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy

EC230

Economics in Public Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Sinclair office TBC and Dr Mohan Bijapur 32L.1.31

Availability: This course is available on the BSc in Environment and Development, BSc in International Relations and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not open to students who are Economics specialists.

Pre-requisites: Students normally will have completed Economics A

(EC100) or Economics B (EC102) or their equivalent.

Course content: This course develops economic analysis for the large questions in contemporary public policy, without the need for knowledge of calculus. Precise topics and readings will be announced and are selected to be of current interest. Last year's topics included Global growth and income inequality; the shifting distribution of global economic activity and resulting tensions in international financial and political systems, financial and currency crises, and tax and trade policy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

A one hour revision lecture will be held in week 11 of the MT and week 11 of the LT.

Formative coursework: Four pieces of written work to be handed in to the class teacher.

Indicative reading: There is no set course textbook. A list of selected texts and readings will be provided at the start of term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC240 Half Unit

PPE Interdisciplinary Research Seminar

This information is for the 2015/16 session.

Teacher responsible: Prof Timothy Besley

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

This course is only available to second year students on the BSc in Philosophy, Politics and Economics. The course will run from the beginning of Lent Term in year 2 and will continue as EC340 through to the end of Lent Term in year 3.

Course content: The course will include lectures given by top researchers from inside and outside LSE, including researchers from the public, private and third sector. The lectures will expose the students to research on the frontier in topics such as public economics, political economy and decision making in the public domain. This research and background reading will then be discussed in seminars.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

The course will run across three terms starting at the beginning of Lent term in year 2 of the PPE and continuing in Michaelmas and Lent term of year 3 of the PPE. Each term will consist of a series of biweekly lectures (5 x 90mins) and seminars (5 x 60mins).

Lectures will be given by outside speakers on a specific topic, such as inequality, and will allow for the opportunity to interact and ask questions. Depending on the availability of the speaker, there may be the opportunity for further discussion at an informal social event after the lecture. The seminars will discuss the previous lecture as well as examining background reading related to the topic.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Students will write a 1,000 word formative essay in the LT of year 2 to prepare them for the summative assessment of year 3. In addition, students will discuss present current research possibly in teams. Feedback on these essays and the presentation will help prepare students for the final, summative essay and presentation.

Indicative reading: Acemoglu, Daron and James Robinson, *Why Nations Fail*, Crown Books, 2012; Banerjee, Abhijit and Esther Duflo, *Poor Economics*, Random House, 2011; Besley, Timothy and Torsten Persson, *Pillars of Prosperity: The Political Economics of Development Clusters*, Princeton University Press, 2011; Fukuyama, Francis, *The Origins of Political Order*, Profile Books, 2011; Moore, Barrington, *Social Origins of Dictatorship and Democracy*, Beacon Press, 1966; North, Douglass, John Wallis and Barry Weingast, *Violence and Social Orders*, Cambridge University Press, 2009; Piketty, Thomas, *Capital in the 21st Century*, Harvard University Press, 2014; Sen, Amartya, *The Idea of Justice*, Allen Lane, 2009. An extensive list of

required and further readings will be available on Moodle.

Assessment: Students will be assessed throughout the course, through essays, presentations and class participation. There will be one summative essay per term and one presentation per term in MT and LT of the third year of the PPE.

Presentation (20%) and essay (70%, 2000 words) in the MT and LT of year 3 (see EC340).

Class participation in EC240 and EC340 (10%).

The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

EC301

Advanced Economic Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr L. Rachel Ngai 32L 1.15

Dr Shengxing Zhang 32L 1.16

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Macroeconomic Principles (EC210) and Microeconomic Principles I (EC201).

Mathematics to at least the level of Mathematical Methods.

Microeconomic Principles II (EC202) is also accepted (in place of EC201).

Course content: This course is divided into two sections introducing recent developments in economic theory. The first section focuses on the relationship between the financial sector and the macroeconomy. It studies frictions in the financial sector to better understand causes of financial crises, business cycle fluctuations and policy remedies. In the second section of the course we focus on economic growth, considering questions like these: Why was GDP per capita in the UK 15 times higher than China in 1960? Why did the factor of 15 decrease to 5 in 2000? To gain an understanding of the "whys" we have to ask deeper questions: what drives economic growth? Why do some economies grow faster and other slower? Thus this part of the course studies the determinants of economic growth through capital accumulation, reallocation of resources from agriculture into manufacturing and services and, technology innovation.

Teaching: 16 hours of lectures and 10 hours of classes in the MT. 16 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will submit, and receive feedback on, two problem sets per term.

Indicative reading: The course is mainly based on lecture notes and journal articles. As an example of the level and content of the reading in economics articles, students may wish to look at the following: Lucas, R. 2000. *"Some Macroeconomics for the 21st Century."* Journal of Economic Perspectives, 14: 159-168. Ngai, L. R. 2004. *"Barriers and the Transition to Modern Growth"*. Journal of Monetary Economics 51:1353-1383. A good textbook reference for economic growth is: Jones, C. and D. Vollrath (2013), *Introduction to Economic Growth*. W. W. Norton & Co.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC302

Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Ronny Razin 32L4.01

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

Course content: The course seeks to introduce students to the major theoretical models of Political Economy and the available empirical evidence. Sample topics to be covered include: Social Choice theory and Preference aggregation; Comparative electoral systems; Political economy of income redistribution; Turnout in elections; Strategic and Sincere voting; Political Parties; Debates and Communication

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: At least four exercises or pieces of written work will be required and assessed by class teachers.

Indicative reading: There is no text book covering all the material in the course. The following books are recommended as supplements to what is covered in the lectures. Analyzing Politics, Rationality, Behavior and Institutions, K.A. Shepsle and M.S. Bonchek. W. W. Norton & Company, New York, London. Liberalism Against Populism, W.H. Riker, Waveland Press, Prospect Heights, Illinois. For additional readings see <http://econ.lse.ac.uk/courses/ec302/>

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC303

Economic Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Sinclair TBC
Dr Michael Vlassopoulos - Room TBC

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I or II (or equivalent) and Macroeconomic Principles (or equivalent).

Course content: The course will concentrate on selected important economic policy issues and relevant economic tools. It will treat the issues at a level appropriate for students with the knowledge of economics provided by the courses already taken. The specific topics will be of contemporary interest, and will be announced by the start of each year. In any year the topics covered are likely to include some of the following: Globalisation: effects on welfare, development and income distribution. ii Inequality iii. International negotiations and trade policies iv. Global imbalances v. World trade collapse vi. Tax, fiscal policy and unemployment. vii. Monetary policy and exchange rate frameworks viii. Financial integration

and currency unions ix. Financial crises and relevant policies x. endogenous growth, exhaustible resources and relevant policies.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required.

Indicative reading: There is no course textbook. Detailed reading will be provided in the syllabus at the start of the year. Books that provided useful background reading Lent Term 2013/14 included:

(a) General books on the European economy / Union and the Eurozone: R. Baldwin, C. Wyplosz *The Economics of European Integration*, 3e McGraw Hill 2009 P. de Grauwe *The Economics of Monetary Union* 8e Oxford UP 2009 F. Allen, E. Carletti, G. Corsetti (eds), *Life in the Eurozone with or without Sovereign Default*, Wharton School, U Penn 2011 (b) Other financial crisis books V. Acharya et al, *Guaranteed to Fail* Princeton UP 2011 (USA: the mortgages debacle) D. Mayes, R. Pringle, M. Taylor (eds), *Towards a New Framework for Financial Stability*, Central Banking Publications 2009 (global / analytical) A. Sheng, *From Asian to Global Financial Crisis* Cambridge UP 2009 (c) Other books J. Gruber *Public Finance and Public Policy* 3e Worth 2011 P. Krugman and M. Obstfeld *International Economics: Theory and Policy* 7e Pearson 2010 L. Mahadeva and P. Sinclair *How Monetary Policy Works* Routledge Taylor and Francis 2005.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC307

Development Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Gregory Fischer 32L3.09 and Prof Oriana Bandiera 32L3.06

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I or II (or equivalent) and Macroeconomic Principles (or equivalent). A knowledge of introductory econometrics at least to the level provided by a course such as EC220 Introduction to Econometrics, or EC221 Principles of Econometrics, is also necessary. Students who do not have all three pre-requisites and General Course students must consult with Dr Bryan or Dr Fischer before selecting it.

Course content: The course provides an introduction to selected issues in economic development including theory, evidence and policy. It will analyse economic institutions in developing countries focusing around the themes of "Markets, Institutions and Welfare" and "Public Policy and Welfare". Failures in key markets such as those for land, labour, credit and insurance have far reaching implications both for productive efficiency and welfare. The story of economic development is, in many ways, one of how informal, imaginative institutions have evolved to fill the gaps left by these market failures. The course will study how institutions have evolved to cope with missing markets, and how they affect the allocation and the distribution of resources. The course will analyse both the channel through which the institutional environment affects efficiency and welfare and how public policy can be designed to increase welfare and growth. The course has a strong applied focus. Under each section we want to derive testable implications from the theory, subject these to econometric testing, comment on the

robustness of the results obtained and draw out policy conclusions.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

Indicative reading: Teaching in the course will be done mainly from journal articles drawn from the forefront of theoretical and applied research in development economics. Background texts for the course are A. Banerjee and E. Duflo, *Poor Economics, Public Affairs*, 2011 and D. Ray, *Development Economics*, Princeton UP, 1998.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC309

Econometric Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Tatiana Komarova 32L4.24 and Prof Francisco Hidalgo 32L4.20

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available on the BSc in Econometrics and Mathematical Economics and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Principles of Econometrics (EC221).

A good knowledge of linear algebra, calculus and statistical theory is essential, and therefore MA100 and ST102 or equivalent is required. Students taking this course who are not in BSc Econometrics and Mathematical Economics or BSc Mathematics and Economics must consult with Dr. Komarova before selecting this course

Course content: Introduction to the asymptotic theory of estimation and inference of economic models; Basics of large sample theory; Estimation of linear regression models (OLS, GMM, GLS); Testing hypotheses and model specifications; Estimation of nonlinear models (MLE, Nonlinear least squares); systems of equations; time series analysis.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The main text for the lectures is R Davidson & J G MacKinnon, *Econometric Theory and Methods*, Oxford University Press (2004). Other useful texts include Davidson (2000), *Econometric Theory* Amemiya (1985), *Advanced Econometrics*; and Hayashi (2000), *Econometrics*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC310

Behavioural Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Matthew Levy 32L3.21

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics with Economic History, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students. Students taking the course as an outside option are required to meet the pre-requisites as detailed below.

Pre-requisites: Ideally, students will have completed EC202 (or

equivalent). A highly motivated student who has done well in EC201 -- as a guideline 65 or better -- is welcome on the course, if he or she finds handling economics mathematically comes naturally. Any such student should see Dr Levy before the course starts.

Fluency in calculus is essential, and some knowledge of methods of mathematical proof, including those using sets, is necessary.

Course content: The course will expose students to a number of major topics in Behavioural Economics, and will link theory with empirical applications. The first half of the course will focus on departures from neoclassical preferences, while the latter half will cover departures from rational expectations. The particular topics to be covered include:

- Reference Dependent Preferences and Loss Aversion
- Social Preferences
- Hyperbolic Discounting
- Naiveté and Self-Control
- Projection Bias
- Happiness and Adaptation
- Heuristics and Biases
- Inattention and Shrouding
- Nudging and Framing
- Behavioural Welfare Analysis

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both the MT and LT.

Formative coursework: At least four exercises or pieces of written work will be required and assessed by class teachers.

Indicative reading: Congdon, William, Jeffrey Kling, and Sendhil Mullainathan. *Policy and Choice: Public Finance Through the Lens of Behavioral Economics* (selected chapters). Brookings Institution Press: Washington, D.C. 2011 [Free eBook download at <http://www.brookings.edu/press/Books/2011/policyandchoice.aspx>] Rabin, Matthew. 'Psychology and Economics', *Journal of Economic Literature*, 36(1), 1998: 11-46. DellaVigna, Stefano. 'Psychology and Economics: Evidence from the Field', *Journal of Economic Literature*, 47(2), 2009: 315-372. Fehr, Ernst and Simon Gächter. 'Fairness and Retaliation: The Economics of Reciprocity', *Journal of Economic Perspectives*, 14(3), 2000: 159-181. Laibson, David. 'Golden Eggs and Hyperbolic Discounting', *The Quarterly Journal of Economics*, 112(2), 1997: 443-477. Camerer, Colin, Linda Babcock, George Loewenstein, and Richard Thaler. 'Labor Supply of New York City Cabdrivers: One Day at a Time', *The Quarterly Journal of Economics*, 112, 1997: 407-441. Gabaix, Xavier and David Laibson. 'Shrouded Attributes, Consumer Myopia, and Information Suppression in Competitive Markets', *The Quarterly Journal of Economics*, 121(2): 505-540. Bernartzi, Shlomo and Richard Thaler. 'Save More Tomorrow: Using Behavioral Economics to Increase Employee Saving', *Journal of Political Economy*, 112(1), 2004: S164-S187. Kahneman, Daniel and Amos Tversky. 'Prospect Theory: An Analysis of Decision under Risk', *Econometrica*, 47(2), 1979: 263-292.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC311

History of Economics: How Theories Change

This information is for the 2015/16 session.

Teacher responsible: To Be Announced

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the ways in which

economics has developed from the Mercantilists of the 17th century to the Neoclassical thinking of the later 20th century.

The course will explore how the theories, concepts and methods of economics have changed over the last 250 years. We will use the original texts in order to understand how economists of the past approached perennial questions (about for example, the sources of growth or the role of money) and resolved them in the context of the economic conditions of their own time and place; and use theories about scientific change to understand the longer history of economics.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to discuss assigned texts and produce several pieces of written work.

Indicative reading: A reading list of original texts and secondary literature will be given at the beginning of the course. For an introduction, students may read R L Heilbroner's, *The Worldly Philosophers*; for general background, consult Roger E Backhouse's, *The Penguin History of Economics* or David Colander & Harry Landreth's, *History of Economic Thought*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC313

Industrial Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Mark Schankerman 32L4.30

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Students who believe they have completed an equivalent course instead of one of these must receive permission from Prof Schankerman first.

Course content: The aim of the course is to understand the structure, conduct, and performance of firms by studying analytical models of imperfect competition, determinants of industrial structure, entry in strategic settings, government regulation of natural monopolies, and markets with asymmetric information. The main subjects include monopoly, price discrimination, vertical and horizontal restraints, transactions costs and contract design, game theoretic models of firm behaviour, collusive arrangements, product differentiation, and strategic entry deterrence. Economic models will be used to address policy issues and will be illustrated in classes with case studies.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: At least four problem sets will be required and assessed by class teachers.

Indicative reading: A detailed reading list will be provided at the beginning of the course. The primary text is Tirole's *The Theory of Industrial Organization*. Specific sections will be assigned (others are too advanced for this course). A useful, less technical supplementary text is Church and Ware's *Industrial Organization: A Strategic Approach*. There will be additional required readings on empirical articles and case studies on competition policy.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC315

International Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Keyu Jin 32L1.17 and Dr Swati Dhingra 32L2.31

Availability: This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent.

Course content: International Macroeconomics: This section of the course offers an introduction to international macroeconomic theory and develops the main tools for macroeconomic policy analysis. We start by studying the balance of payments and the causes and consequences of global imbalances, followed by an in-depth study of the determination of exchange rates, money, and prices in open economies. We discuss the costs and benefits of different nominal exchange rate regimes and their sustainability, as well as examine the causes and consequences of debt and default, speculative attacks and financial crises.

International Trade: This section of the course offers an introduction to international trade theory and develops the main tools for trade policy analysis. We start by studying the patterns of trade distinguishing between inter-industry and intra-industry trade flows. We then proceed to an in-depth analysis of the causes and the effects of those flows based on the concepts of absolute and comparative advantage, relative factor abundance and relative factor intensity, increasing returns to scale and imperfect competition. Finally we discuss the gains and losses from trade, their distribution among people and firms, and their implications for the debate on trade liberalization vs. protectionism.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

Two hours of revision lectures will be held in week 11 of both MT and LT.

Formative coursework: Students will be expected to complete a problem set weekly, and two of these each term will be collected at random for marking and feedback.

Indicative reading: Paul Krugman, Marc Melitz and Maurice Obstfeld; *International Economics: Theory and Policy*, 10th ed.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC317

Labour Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Esteban Aucejo 32L2.30 and Dr Guy Michaels 32L2.10

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Management, BSc in Philosophy and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic

Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent, as well as Introduction to Econometrics (EC220) or equivalent.

Course content: This course is an introduction to the economic analysis of behaviour and institutions in the labour market. Primarily microeconomic models are applied to labour market phenomena, such as labour supply and participation, labour demand by firms, and wage determination under different institutional settings. Students learn how to distinguish alternative theories empirically and how key parameters are obtained from the data. The course explores how the models can be applied to evaluate labour market policies, such as the minimum wage, the welfare reform, or restricting immigration. The goal of the course is to enable students to think independently about labour market issues, drawing on the models and tools developed during the course.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Problems sets in the course involve hands-on statistical analysis of real world data.

Indicative reading: G Borjas, Labor Economics. Additional reading, drawn from journals, will be suggested during the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC319

Economic Theory and its Applications

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Ellis 32L 3.15 and Dr Francesco Nava 32L 3.20

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Philosophy and Economics, BSc in Social Policy and Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent. Fluency in calculus is essential, some knowledge of analysis, linear algebra and set theory. A highly motivated student with a less technical background could do the course, if he or she finds handling economics mathematically comes naturally. Any such student should see Dr Nava before the course starts.

Course content: This course reviews fundamental concepts in Economic theory and presents some of its most successful applications. The first part of the course consists of an introduction to Auction Theory. It presents standard auction formats and discusses strategic behaviour in such environments. Auctions will be analysed both in private and interdependent value environments. Fundamental topics such as the revenue equivalence theorem, the optimal auction design problem and the linkage principle will be covered in detail. Departures from the standard model will be also considered allowing for heterogeneity among players, risk aversion, and budget constraints. The focus of the course is mainly theoretical, but when possible some evidence supporting the formal models will be discussed with references to relevant work in the field. The second part of the course will revise concepts in non-cooperative game theory and will introduce students to game theoretic models of bargaining, voting, and communication. After setting up the primitives of the game theory framework, different solution concepts will be analysed with an emphasis on different applications. In studying models of bargaining, both axiomatic and non-cooperative approaches will be examined, such as Nash's axiomatic approach and the Rubinstein-Stahl model.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both the

MT and LT

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required.

Indicative reading: M. Osborne, *An Introduction to Game Theory*, Oxford University Press, 2003.

V. Krishna, *Auction Theory*, Academic Press, 2009.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC321

Monetary Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Kevin Sheedy 32L1.09
Professor Charlie Bean 32L 1.18

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent. Introduction to Econometrics (EC220) or Further Mathematical Methods (MA212) or equivalent are also strongly recommended. Students who have not taken either of these two courses are still welcome provided they can show other evidence of a strong quantitative background.

Course content: The course provides an introduction to monetary theory, to the effects of monetary variables on the macroeconomic system, the role of the Central Bank and the conduct of monetary policy. Subjects covered include: The nature and function of money. Classical monetary theory, neutrality and inflation. Interest-rate feedback rules. Theories of the demand for money. The banking system, financial intermediation and the determinants of the money supply. The transmission mechanism of monetary policy, including theories of nominal rigidities and the Phillips curve. The term structure of interest rates. The theory and practice of monetary policy and the design of optimal policies. Monetary policy strategies, including inflation targeting. Policymaking in an uncertain environment. The interaction between monetary and fiscal policy and the arguments for Central Bank independence. Financial crises and the role of the central bank as a lender of last resort. The 2007-8 financial crisis. The interest rate zero lower bound and unconventional monetary policy, including quantitative easing and forward guidance.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. Two hours of revision lectures will be held in week 11 of both MT and LT.

Formative coursework: Students are required to submit two essays or exercises in the MT and the LT. Feedback is provided on these by the class teacher.

Indicative reading: The most useful text books are M Lewis & P Mizen, *Monetary Economics*, and C Walsh, *Monetary Theory and Policy* 3rd edn. Other useful texts include: C Goodhart, *Money, Information and Uncertainty*, 2nd edn; D Laidler, *The Demand for Money*, 3rd edn; A Blinder, *Central Banking in Theory and Practice*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC325

Public Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Camille Landais 32L 2.23

Availability: This course is compulsory on the BSc in Social Policy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

Course content: The first part of Michaelmas term lectures focuses on the issues of equity, efficiency and the role of the state. We begin by looking at questions of equity and alternative theories of the role of the state. We then look at problems of public choice and political economics, and go on to consider the implications of recent research in behavioural economics for welfare analysis. We conclude the first part by discussing issues of market failure, public goods and externalities, including environmental policy. The second part is devoted to the evaluation problem and empirical methods. The third part studies education policies, and the fourth part is devoted to social insurance programs. The final part is devoted to taxation, behavioural responses and the design of tax policy. We begin by examining the effects of taxes and transfers on labour supply and migration, and then go on to consider incomes and behavioural responses at the top of the income distribution. We look at the implications of taxation for economic efficiency and explore the optimal taxation of commodities and income. The final lecture is devoted to the question of development and public finance.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Feedback is provided for one class presentation and one essay (1,500 words) each term (Michaelmas and Lent).

Indicative reading: The recommended textbook for the course is Jonathan Gruber (2011) *Public Finance and Public Policy*, 3rd edition, Worth Publishers. Many of the readings will be journal articles.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC331

Quantitative Economics Project

This information is for the 2015/16 session.

Teacher responsible: Dr Matthew Levy 32L3.21

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Principles of Econometrics (EC221) or exceptionally Introduction to Econometrics (EC220).

Course content: This course provides an opportunity to learn how to do independent quantitative economic research at an advanced level. Students are expected to pursue research on a question of their own choice under the supervision of a member of staff. They are expected to formulate an initial proposal near the start of MT in order to be matched with a supervisor, refining their choice into a manageable research question during that term. Following independent work during MT, a seminar in week 9 will review student progress. In the LT seminars, each student will present a preliminary outline of the results for comments by fellow students

and teachers, and later a follow-up presentation on further, more final results and a draft dissertation. Seminars in LT are formally timetabled as classes.

Teaching: 2 hours of seminars in the MT. 20 hours of seminars in the LT.

In week 11 of the MT and the LT students will work independently (with supervisory advice).

Formative coursework: Students are required to prepare material for their presentations in the seminar, but this is not formally graded. Students are additionally expected to participate in discussion on the presentations of other students' as this is part of the training of a research economist, but this is also not formally assessed.

Indicative reading: As each student chooses an individual research question, there is no common reading list for this course.

Assessment: Dissertation (100%, 10000 words) in the LT.

A completed dissertation (up to 10,000 words, not including abstract, footnotes, bibliography and tables) on an approved subject will be required to be submitted by 27 April 2015. There is no written examination. The dissertation carries all the marks.

EC333

Problems of Applied Econometrics

This information is for the 2015/16 session.

Teacher responsible: Dr Guy Michaels LRB. R438

Dr Matthew Gentry 32L4.28

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent, and either Introduction to Econometrics (EC220) or Principles of Econometrics (EC221).

Students who have completed EC220 rather than EC221 should refer to Dr Gentry for advice before starting the course regarding additional preparatory work for Lent term course material.

Course content: The purpose of this course is to provide a solid grounding in recent developments in applied econometrics. A major feature of the course is the use of both analytical and computer-based (data) exercises for the classes, which will enable students to gain practical experience in analysing a wide variety of econometric problems. The topics covered in the Michaelmas term include analysis of experimental and non-experimental data, identification of average treatment effects and local average treatment effects, weak instrument problems, quantile regressions, and regression discontinuity. The Lent term will focus on topics in the analysis of panel data of both static and dynamic models, including fixed and random effects, measurement error in panel contexts, instrumental variable regression, and generalized method of moments.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Michaelmas term: 2-3 problem sets, usually to include econometric questions and Stata applications. Feedback to be provided by the class teacher. Lent term: Students hand in weekly problem sets and get individual written feedback from their class teacher on approximately half of them. Students also receive written sample solutions for each problem set.

Indicative reading: A detailed reading list will be provided at the beginning of each term of the course. In parts of the Michaelmas we will use sections from the textbook "*Mostly Harmless Econometrics*" by Angrist and Pischke. There is no single text for the Lent term, but useful books (somewhat more advanced than the lectures) are Hsiao, "*The Analysis of Panel Data*" and Wooldridge, "*Econometrics*".

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC340

PPE Interdisciplinary Research Seminar

This information is for the 2015/16 session.

Teacher responsible: Prof Timothy Besley

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

This course is only available to third year students on the BSc in Philosophy, Politics and Economics. The course started at the beginning of Lent Term in year 2 as EC240 and continues as EC340 through to the end of Lent Term in year 3.

Course content: The course will include lectures given by top researchers from inside and outside LSE, including researchers from the public, private and third sector. The lectures will expose the students to research on the frontier in topics such as public economics, political economy and decision making in the public domain. This research and background reading will then be discussed in seminars.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of seminars in the MT. 7 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

The course will run across three terms starting at the beginning of Lent term in year 2 of the PPE and continuing in Michaelmas and Lent term of year 3 of the PPE. Each term will consist of a series of biweekly lectures (5 x 90 mins) and seminars (5 x 60 mins).

Lectures will be given by outside speakers on a specific topic, such as inequality, and will allow for the opportunity to interact and ask questions. Depending on the availability of the speaker, there may be the opportunity for further discussion at an informal social event after the lecture. The seminars will discuss the previous lecture as well as examining background reading related to the topic.

Formative coursework: Students will write a 1,000 word formative essay in the LT of year 2 (in EC240) to prepare them for the summative assessment of year 3. In addition, students will discuss present current research possibly in teams. Feedback on these essays and the presentation will help prepare students for the final, summative essay and presentation.

Indicative reading: Acemoglu, Daron and James Robinson, *Why Nations Fail*, Crown Books, 2012; Banerjee, Abhijit and Esther Duflo, *Poor Economics*, Random House, 2011; Besley, Timothy and Torsten Persson, *Pillars of Prosperity: The Political Economics of Development Clusters*, Princeton University Press, 2011; Fukuyama, Francis, *The Origins of Political Order*, Profile Books, 2011; Moore, Barrington, *Social Origins of Dictatorship and Democracy*, Beacon Press, 1966; North, Douglass, John Wallis and Barry Weingast, *Violence and Social Orders*, Cambridge University Press, 2009; Piketty, Thomas, *Capital in the 21st Century*, Harvard University Press, 2014; Sen, Amartya, *The Idea of Justice*, Allen Lane, 2009. An extensive list of required and further readings will be available on Moodle.

Assessment:

Students will be assessed throughout the course, through essays, presentations and class participation. There will be one summative essay per term and one presentation per term in MT and LT of the third year of the PPE.

Presentation (20%) and essay (70%, 2000 words) in the MT and LT of year 3.

Class participation in EC240 and EC340 (10%).

The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

EH101

The Internationalisation of Economic Growth, 1870 to the present day

This information is for the 2015/16 session.

Teacher responsible: Dr Christopher Minns SAR.5.12 and Prof Max-Stephan Schulze SAR.6.14

Availability: This course is compulsory on the BSc in Economic

History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available on the BA in History, BSc in Environment and Development, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the inter-relationships between the development of the international economy and the growth of national economies since the late nineteenth century. The course is designed to introduce students not only to a wide variety of topics and issues, but also to the wide variety of approaches used by historians. The course includes analyses of the original leading nation, Britain, and its replacement, the United States, as well as the catch-up of areas such as continental Europe, and the failure to catch-up of earlier well-placed areas such as Latin America. The effects of major events - such as wars and debt crises - are investigated, and we also consider the implications of changing global economic institutions, such as the Gold Standard and IMF, as well as the effects of sometimes rapid changes in product and process technology.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Lectures: There is one lecture course (EH101) with 21 lectures in the MT, LT and ST. A lecture programme will be circulated at the first meeting. This course uses Moodle to provide a web based location for your core LSE course materials. Classes: The lectures are accompanied by weekly classes (EH101.A). Classes are given by several different teachers. They do not necessarily deal with the same topics each week but they all cover the same ground.

Formative coursework: Students are expected to write four very short papers during the year and two longer essays.

Indicative reading: The following are particularly useful: A G Kenwood & A L Loughheed, *The Growth of the International Economy, 1820-2000* (2000); J Foreman-Peck, *A History of the World Economy*; R Floud & P Johnson (Eds), *The Cambridge Economic History of Modern Britain, Vol 2 & Vol 3* (2004); T Kemp, *The Climax of Capitalism. The US Economy in the 20th Century*; P Johnson (Ed), *Twentieth-Century Britain: Economic, Social and Cultural Change* (1994); E Jones, L Frost & C White, *Coming Full Circle. An Economic History of the Pacific Rim* (1993); C H Feinstein, P Temin & G Toniolo, *The European Economy between the Wars* (1997); M S Schulze (Ed), *Western Europe, Economic & Social Change*; B Eichengreen, *Globalizing Capital. A History of the International Monetary System*; M S Blackford, *The Rise of Modern Business in the USA, Britain and Japan*; William Easterly, *The Elusive Quest for Growth* (2002). (A fuller reading list and class topics will be given out at the first meeting.)

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH102

Pre-industrial Economic History

This information is for the 2015/16 session.

Teacher responsible: Prof Oliver Volckart

Availability: This course is compulsory on the BSc in Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course surveys long-term processes of growth and development in late medieval and early modern Europe (fourteenth to eighteenth centuries). It focuses on the transition from a hierarchical society of estates or corporate orders to a market society based on legal equality. There are two core questions: First, why did this transition occur in an evolutionary way in England and the Netherlands, whereas it was severely delayed the rest of Europe? And second, how is it related to the 'small divergence' between

the Dutch Republic and England on the one side and most of the Continent on the other, where the North-West enjoyed significantly higher living standards and per capita incomes than other countries even before industrialisation began?

The course thus raises fundamental questions about societies and economies: Was pre-industrial economic growth transitory and regional? Or was it a recurrent, even normal phenomenon, which however could occasionally be reversed? Was Dutch and British success the result of their social and institutional features? Or was it a combination of geographical factors and good fortune? To what degree did early modern governments help or hinder economic development? Did Europe's political fragmentation hold back the continent's development, or did competition between states have beneficial consequences? In conclusion, can we define an optimal combination of social, political, and economic institutions that sustained growth in the past (and thus, perhaps, in the future)?

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will give presentations on topics that form part of the course content.

Students will receive structured feedback on their formative coursework (both on their essay and the presentation).

Indicative reading: Anderson, J.L. (1991): Explaining long-term economic change, Cambridge (Cambridge University Press). Cipolla, C.M. ed. (1971/72). The Fontana economic history of Europe, vols. 1 and 2, London (Fontana). de Vries, J. (1976). The economy of Europe in an age of crisis, 1600-1750, Cambridge, London, New York etc. (Cambridge University Press). Hatcher, J. and Bailey, M. (2001): Modelling the Middle Ages. The History and Theory of England's Economic Development, Oxford (Oxford University Press). Miskimin, H. (1969). The Economy of Early Renaissance Europe 1300-1460. Englewood Cliffs/NJ: Prentice-Hall. Miskimin, H. (1977). The Economy of Later Renaissance Europe 1460-1600. Cambridge, London, New York, Melbourne: Cambridge University Press. Persson, K. G. (2010). An Economic History of Europe: Knowledge, Institutions and Growth, 600 to the Present. Cambridge: Cambridge University Press.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the LT.

EH204

Money and Finance: From the Middle Ages to Modernity

This information is for the 2015/16 session.

Teacher responsible: Prof Albrecht Ritschl SAR 6.06 and Prof Oliver Volckart SAR 6.10

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an overview of the main developments in monetary and financial history from 800 to the present day, taking the students from the simple beginnings of medieval European monetary history to the complex financial arrangements of the modern world. The first part of the course covers the emergence of money and finance from the medieval ages to the early modern period. The second part examines the main developments in the global financial system since the nineteenth century. Historical developments in major European and non-European countries (England, Spain, Italy, France, Germany, USA) will be discussed and compared. The course is designed to introduce students to the main concepts of money and finance (financial

development, financial integration, monetary policy, banking crises etc.) and to provide a long run perspective to the current policy debate.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: The students will produce 3 formative essays. The exercise will help them practice academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill both necessary for the dissertation they are expected to write in year 3 and helpful for the exam of this course that will take place in summer term. The class presentation has a formative character, too. Students will practice presenting complex arguments to their peers and answering questions from the audience.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH205 Not available in 2015/16

Towns, Society and Economy in England and Europe 1450-1750

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick Wallis C414

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines in outline the social and economic history of European towns between the mid-15th and the mid-18th centuries.

Towns and economic development; the urban economy: manufactures, services and domestic and international trade; town-country relations, towns and rural industry; towns and the state; capital cities; urban hierarchies and networks; social structure and social mobility; standards of living; social conflict, crime and criminal repression; population structure; women, family and work; poverty and welfare; medicine and health; religion, education and literacy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

Weekly lectures and classes (EH205). Classes are designed to discuss at greater depth topics covered in the lectures. Students are expected to prepare discussion papers for each class.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work in the course of the year.

Indicative reading: Detailed reading lists are distributed at the

beginning of the course. The following are useful general works: S R Epstein, *Town and Country in Europe 1300-1800* (2001); C Friedrichs, *The Early Modern City, 1450-1750* (1995); P M Hohenberg & L H Lees, *The Making of Urban Europe, 1000-1950* (1985); J Goodman & K Honeyman, *Gainful Pursuits: The Making of Industrial Europe, 1600-1914* (1988); C M Cipolla (Ed), *The Fontana Economic History of Europe, Vol 2* (1979); H A Miskimin, *The Economy of Later Renaissance Europe, 1460-1600* (1977); G C Clay, *Economic Expansion and Social Change: England, 1500-1700* (2 vols, 1984).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH207

The Making of an Economic Superpower: China since 1850

This information is for the 2015/16 session.

Teacher responsible: Dr Debin Ma SAR 6.12

Availability: This course is available on the BA in History, BSc in Accounting and Finance, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a survey of long-term economic change in China from the mid-nineteenth century to the present. It focuses on China's long path to becoming a major global economic power at the beginning of the new millennium. The course examines the importance of ideological and institutional change in bringing about economic transformations by surveying major historical turning points such as the opening of China in the mid-nineteenth century, the collapse of the Qing in 1911, the rise of the Communist regime in the 1950s and the adoption of a reform policy since the late 1970s. It examines both the constraints as well as the capacity of a giant traditional economy to respond and regenerate in the face of external challenge from outside since the Opium War of the mid-nineteenth century. The economic analysis of Chinese economic history will examine both macro and micro level questions.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Naughton, B., *The Chinese economy, transitions and growth* (MIT Press); Rawski, T., *Economic growth in prewar China* (Univ. of Berkeley Press); Brand, L. and Rawski, T (eds.) *China's great economic transformation* (Cambridge University Press); Richardson, P. *Economic change in China, c. 1800-1950* (Cambridge University Press); Spence, J.D *The search for modern China* (New York : W.W. Norton).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH211

Africa and the World Economy, 1500-2000

This information is for the 2015/16 session.

Teacher responsible: Dr Leigh Gardner SAR 5.07

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Course content: This course examines aspects of the economic history of sub-Saharan Africa, focusing on the nature and consequences for Africa of its external relationships. Lectures provide a chronological introduction to significant periods in African economic history, from the pre-colonial period through the slave trade, different periods of colonial rule, post-independence state-led development, and Structural Adjustment. Classes focus on case studies from individual countries and regions, which illustrate the diversity of experience across the continent. Primary source material related to the case studies will be included in the readings and facilitate the development of research skills in African economic history.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to write four essays or equivalent pieces of written work during the course

Indicative reading: For a general overview of African history over the period, see R.J. Reid, *A History of Modern Africa* (2009); J. Iliffe, *Africans: The History of a Continent* (1995). Specific texts on African economic history include R. Austen, *African Economic History* (1987); R. Bates, *Essays on the Political Economy of Rural Africa* (1983); C. Feinstein, *Conquest, Discrimination and Development: an Economic History of South Africa* (2005); J. Forbes Munro, *Africa and the International Economy, 1800-1950* (1976); A. Hopkins, *An Economic History of West Africa* (1973); R.M.A van Zwanenberg and A. King, *An Economic History of Kenya and Uganda, 1800-1970* (1975)

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH225 Not available in 2015/16

Latin America and the International Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Alejandra Irigoin CMK.C313

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the development trajectory of Latin America and its relation with the international economy from the Early Modern period (c. 1700) to the present. It focuses on the political and economic factors that drove - and that resulted from- the region's engagement with the world attending to the environment, population and factor endowments, institutions and policies. The causes and outcomes of this 'engagement' will be explored in the following broad themes: the determinants of Latin American growth performance, the political economic legacy of European rule and of the formation of modern states and markets; the ambivalent relation with international markets and institutions, the continuous quest for development together with political and macroeconomic instability; the economic aspects of different political experiments and political culture - from authoritarian to democratic regimes and various generations of populism interspersed with military rule and direct democracy- and the short and long run impact on equality, poverty and the prospect for sustained intensive growth.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of lectures and 3 hours of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Indicative reading: V. Bulmer-Thomas (2003) *The Economic History of Latin America since Independence*, Cambridge University Press and (2012) *The Economic History of the Caribbean since the*

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH237

Theories and Evidence in Economic History

This information is for the 2015/16 session.

Teacher responsible: Dr Leigh Gardner SAR 5.07
Dr Eric Schneider SAR 5.18

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course examines theories and concepts used in economic history, and provides an introduction to the methods used by economic historians to collect evidence and generate inference on relevant historical questions. The course will begin with an examination the development of history as a subject and discipline. Consideration will be given to the assumptions made in economics and their principal applications in economic history. The course will also introduce students to essential methods for the design and execution of a research project. Students will be introduced to the analysis of historical arguments and the critical interpretation of primary and secondary sources. The course will also provide students with the basic quantitative skills required to pursue an independent research project, and to engage critically with current scholarship in economic history.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Indicative reading: J Tosh, The Pursuit of History (2002), L Jordanovea, History in Practice (2000), CH Feinstein and M Thomas, Making History Count (2002), and P Hudson, History by Numbers (2000)

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Project (30%, 3000 words) in the LT.

EH238

The Industrial Revolution

This information is for the 2015/16 session.

Teacher responsible: Dr Neil Cummins SAR 5.13

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the Industrial Revolution

in Britain, the turning point into modern economic growth. The course is designed to introduce students to the key debates around industrialisation. It will consider the causes and timing of British industrialisation; the process of industrialisation; and the economic and social effects of the industrial revolution. The course focuses on the British case, but will also explore why some other countries did not industrialise at that point, and processes of catch-up that followed.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Mokyr, The British Industrial Revolution; Floud and Johnson, Cambridge Economic History of Modern Britain, vol I; Berg, Age of Manufactures; Allen, The British Industrial Revolution in Global Perspective; Crafts, British Economic Growth.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH240

Business and Economic Performance since 1945: Britain in International Context

This information is for the 2015/16 session.

Teacher responsible: Dr. Peter Cirenza SAR 5.06

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course looks at the history of British business and industry, with an emphasis on the post-war period. It examines some of the hypotheses on why the UK economy grew more slowly than other OECD nations with particular reference to the decades after the Second World War. Explanations of relative economic decline are examined in the context of comparisons with other European nations and with the US and Japan. The main attention is on recent decades, including current changes in performance, but the historical roots of Britain's poor performance are also considered. The focus is on business performance in the public and private sectors, including scale effects, multinationals' comparative performance, technology, labour management and management quality. Other factors alleged to have contributed to Britain's poor performance, ranging from 'culture' through government policy to education and trade unions, are also discussed.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Indicative reading: The course textbook is: Geoffrey Owen, From Empire to Europe: The Decline and Revival of British Industry since the Second World War. The following are also useful: R Floud & P Johnson (Eds), The Cambridge Economic History of Modern Britain, Vol III (3rd edn, 2004), chapters 3, 4, 5, 7, 10, 11, 12, 13 and 15; N F R Crafts & N Woodward (Eds), The British Economy since 1945 (1991); M Dintenfass, The Decline of Industrial Britain 1870-1980; B Elbaum & W Lazonick (Eds), The Decline of the British Economy (1986); S N Broadberry, The Productivity Race: British Manufacturing in International Perspective, 1850-1990 (1997).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH301 Not available in 2015/16**The Origins of the World Economy, 1450 - 1750**

This information is for the 2015/16 session.

Teacher responsible: Prof Oliver Volckart C215

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course examines economic and social development in Western and Eastern Europe and Asia from the late Middle Ages to the mid-18th century. Its purpose is to discuss comparatively the sources of long-term economic development and growth in the past.

The course surveys issues, theories and historiography; economic development in premodern western Europe, population; agriculture; industry and protoindustry; urbanization; market integration and trade; technology; state structure, policy and political economy; taxation; technology, causes and consequences of west European overseas expansion; the emergence and nature of a 'world economy'. Comparison with east-central Europe, Mong-Ching China, and Tokugawa Japan.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work. A full list of lectures and seminar papers is distributed at the beginning of the course.

Indicative reading: Detailed reading lists are distributed at the beginning of the course. The principal text is SR Epstein, *Freedom and Growth. The Rise of States and Markets in Europe, 1300-1750* (2000); The following are useful general works: D C North & R P Thomas, *The Rise of the Western World* (1973); E L Jones, *The European Miracle* (3rd edn, 2003); E L Jones, *Growth Recurring, Economic Change in World History* (2nd edn, 2000); J De Vries, *The Economy of Europe in an Age of Crisis, 1600-1750* (1976); K Pomeranz, *The Great Divergence. China, Europe, and the Making of the Modern World Economy* (2000).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH304**The Economic History of North America: from Colonial Times to the Cold War**

This information is for the 2015/16 session.

Teacher responsible: Dr Christopher Minns SAR 5.12

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course surveys major developments in the economic history of North America between 1600 and 2000. Colonial development; the American Revolution; Early North American Industry; Slavery; Westward expansion; the American Civil War; Regional Economic Development; Railroads and growth; International and internal trade; Finance and banking in the 19th century; Migration and labour markets in the 19th Century' World wars and North American Economies; the Great Depression; Post-war economic development and policy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

A weekly one-hour student led lecture and one-hour student led seminar.

Formative coursework: A minimum of two essays and a mock examination.

Indicative reading: Atack and Passell, *A New Economic View of American History* (1994); Engerman and Gallman, *The Cambridge Economic History of the United States*, vols 1,2,3 (2000); Hughes, *American Economic History* (1990); Haines and Steckel (eds.), *A Population History of North America*. (2000).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH306 Not available in 2015/16**Monetary and Financial History since 1750**

This information is for the 2015/16 session.

Teacher responsible: Dr Olivier Accominotti CMK.C216

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: This course covers international Monetary and Financial History since the mid-18th century. The course is designed to introduce students to the key issues around globalised finance and money. It will look into the rise and eventual demise of the Gold Standard, the emergence and occurrence of financial crises, the globalisation and geography of financial markets, and changes in policy responses and regulation over time.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

20 lectures and 20 classes across the Michaelmas and Lent Terms. A one-hour revision lecture and a one-hour revision class will be held in the Summer Term.

Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work

Indicative reading: Kindleberger, *Manias, Panics, and Crashes*, Ferguson, *Ascent of Money*, Foreman-Peck, *History of the World Economy*, Eichengreen, *Golden Fetters*, Eichengreen, *Globalising Capital*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH307**The Economic History of South Asia, 1600-2000**

This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 6.16

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: South Asia is one of the fastest growing economies of the world. The region is also home to nearly one-third of the world's poorest people. How did this paradoxical mix between the creation of wealth and persistence of poverty come into being? Does economic history suggest an answer? The course introduces the stylized facts and major debates in the economic history of modern South Asia. It considers the legacies of empires and developmental states, globalizations of the past and the present times, and the role of indigenous institutions and resource endowments. The course begins with a discussion of empires and markets before European colonial rule began, with special reference to maritime trade and craft production, in which the European

East India companies were interested in. For the colonial period, the major theme is the transformation engendered by colonialism and international economic integration. In the sixty years since the end of colonial rule, developmental states tried to overcome the obstacles to growth as the economists interpreted them. The course considers how successful they were in meeting the aim, and why they were limitedly successful.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work.

Indicative reading: 1. Dietmar Rothermund, *An Economic History of India* (1993)

2. B.R. Tomlinson, *The Economy of Modern India* (1993)

3. Tirthankar Roy, *The Economic History of India 1757-2010* (2011)

4. G. Balachandran, ed., *India and the World Economy 1850-1950* (2003)

5. David Ludden, ed., *Agricultural Production in Indian History*, (2005)

6. P.J. Marshall, ed., *The Eighteenth Century in Indian History* (2004)

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH308

Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries

This information is for the 2015/16 session.

Teacher responsible: Prof Juan Roses Vendoiro STC.S483

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course explores how and why the location of economic activities changes across time and space from industrialization up to the present. One goal for this course is to demonstrate the importance of history in the formation of the present-day economic landscape. An equally important goal is to demonstrate the applicability of the study of economic geography to the understanding of historical patterns of development and underdevelopment. The course is not organized chronologically but thematically. Particular attention focuses on four major issues: the development of cities, the creation of national markets, the historical basis for manufacturing agglomeration, and the historical evolution and sources of regional inequality.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Formative coursework: All students are expected to write two essays or equivalent pieces of written work.

Indicative reading: Crafts, Nicholas and Mulatu, Abay, (2006). "How Did the Location of Industry Respond to Falling Transport Costs in Britain Before World War I?", *Journal of Economic History*, vol. 66(03), pages 575-607. Combes, Pierre-Philippe, Thierry Mayer and Jacques-François Thisse, *Economic Geography: The Integration of Regions and Nations*. Princeton University Press, 2008. Garretsen, Harry and Martin, Ron (2010), *Rethinking (New) Economic Geography Models: Taking Geography and History More Seriously*, *Spatial Economic Analysis*, 5, 2, pp. 127-160. Kim, Sukkoo and Margo, Robert A., 2004. "Historical perspectives on U.S. economic geography," *Handbook of Regional and Urban Economics*, in: J. V. Henderson & J. F. Thisse (ed.), *Handbook of Regional and Urban Economics*, edition 1, volume 4, chapter 66, pages 2981-3019 Elsevier. Wolf, Nikolaus, Schulze, Max-Stephan and Heinemeyer, Hans-Christian, (2011), "On the Economic Consequences of the Peace: Trade and Borders After Versailles," *Journal of Economic History*, .vol. 71(04), pages 915-949.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (10%, 2500 words) in the MT.

Essay (10%, 2500 words) in the LT.

Presentation (10%) in the MT and LT.

EH325

Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

This information is for the 2015/16 session.

Teacher responsible: Prof Janet Hunter SAR 5.17

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course combines an examination of selected major themes and historiographical issues in modern Japanese development with a focus on particular empirical aspects of Japanese economic history since the mid-19th century. Topics will include pre-industrial growth and its legacy; economic growth before the Second World War; formal and informal empire; the Pacific War and the Occupation of Japan; trade and interaction with the international economy; consumption and living standards; institutions and organisations.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

21 weekly seminars (EH325) of two hours each. Students are expected to do prior reading and preparation, to participate in group discussion and to make presentations.

Formative coursework: students will be expected to write two essays of no more than 2,500.

Indicative reading: A detailed reading/seminar list is handed out at the beginning of the course, but the texts listed below provide a background: A Gordon, *A Modern History of Japan* (2003); P Francks, *Japanese Economic Development* (2nd edn, 1999); P Francks, *Rural Economic Development in Japan* (2006); J E Hunter, 'The Japanese Experience of Economic Development' in P O'Brien (Ed, *Industrialisation: Critical Perspectives on the World Economy* (1998); M Tanimoto (eds), *The Role of Tradition in Japan's Industrialisation* (2006), Part 1.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 3500 words) in the LT.

EH326

Innovation and its Finance in the 19th and 20th Centuries

This information is for the 2015/16 session.

Teacher responsible: Dr Gerben Bakker SAR 5.09

Professor Leslie Hannah SAR 5.08

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course explores the relationship between innovation and the financing of it in the nineteenth and twentieth centuries, the impact on economic growth and how policy makers managed (or failed) to encourage innovation investment and technology adoption.

Technological change and organizational innovation are critical determinants of the pace of economic growth. This course looks at the specific ways in which innovation transformed industries around the world in the modern era. The course has a global reach though it will concentrate on countries in Northern Europe and the United States. Particular attention focuses on links between innovation and finance: finance is a fundamental input for almost every type of productive activity. The course will explore issues such as; the relationship between market size and structure and technological progress; how firms developed the capabilities to profit from new technologies; and how policy makers attempted to nurture institutions to stimulate investment and technology adoption. The course will therefore cover themes such as the process of invention, innovation typologies, the history of R&D management, anti-trust policy, corporate governance, organisational change, incentives, intellectual property rights and the regulation of technology and its finance more broadly.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to write three essays or equivalent pieces of written work

Indicative reading: Naomi Lamoreaux and Kenneth Sokoloff eds., *Financing Innovation in the United States, 1870 to the Present* (MIT Press, 2007); Joel Mokyr, *The Gifts of Athena: Historical Origins of the Knowledge Economy*, (Princeton University Press, 2002); Raghuram Rajan and Luigi Zingales, "Financial Dependence and Growth," *American Economic Review* 88 (1998): 559-586; Nathan Rosenberg, *Inside the Black Box: Technology and Economics*, (Cambridge University Press, 1982); Joseph A. Schumpeter, "Can Capitalism Survive?" in his *Capitalism, Socialism and Democracy* (Routledge reprint, 1942, 2000); Benn Steil, David G. Victor and Richard R. Nelson eds., *Technological Innovation and Economic Performance* (Princeton University Press, 2002); John Sutton, *Technology and Market Structure: Theory and History* (MIT Press, 1998); James M. Utterback, *Mastering the Dynamics of Innovation* (Harvard Business School Press, 1996).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH327

China's Traditional Economy and its Growth in the Very Long-Term

This information is for the 2015/16 session.

Teacher responsible: Dr Kent Deng SAR 6.05

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course explores the main aspects China's economic growth in the very long term from c.1000 AD to 1800. It begins with a survey of general models/themes in Chinese economic history, followed by particular issues: the formation, expansion and the function of the Chinese empire; Confucian values and state economic policies; property rights; peasantry and peasant economy; proto-industrialisation; commerce and trade; science and technology; demographic fluctuations; living standards; external shocks and foreign influence; internal rebellions and revolutions; reforms and modernisation.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Students are expected to do prior reading and to make presentations on a regular basis.

Indicative reading: A full reading list and course outline are distributed at the beginning of the course. The following readings provide indication of the scope and nature of materials used in the course: K G Deng, 'A Critical Survey of Recent Research in of Chinese Economic History', *Economic History Review* (2000); J K

Fairbank, *Chinese Thought and Institutions* (1957); M Elvin, *The Pattern of the Chinese Past* (1973); C A Ronan, *The Shorter Science and Civilisation in China* (1978-86); J Y Lin, 'The Needham Puzzle: Why the Industrial Revolution did not Originate in China', *Economic Development and Cultural Change* (1995); G W Skinner, *The City in Late Imperial China* (1977); J Lee & F Wang, *One Quarter of Humanity* (1999); K Pomeranz, *The Great Divergence, Europe, China and The Making of the Modern World Economy* (2000); A Watson, *Economic Reform and Social Change in China* (1992); R B Wong, *China Transformed* (1997).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EH390

Dissertation in Economic or Social History

This information is for the 2015/16 session.

Teacher responsible: TBC

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available on the BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The subject of the dissertation should relate broadly to one of the economic history courses that have been chosen. The (compulsory) seminars cover the formulation of the thesis question; primary and secondary sources; analysis of evidence; and structuring and writing up the thesis.

Assessment: Dissertation (100%, 10000 words) in the LT.

The dissertation must not exceed 10,000 words in length.

After being marked, the dissertation will not be returned to the candidate. The title of the dissertation should be approved by the candidate's supervisor and a title form signed by the supervisor must be submitted to the course organiser before the end of the MT.

FM212

Principles of Finance

This information is for the 2015/16 session.

Teacher responsible: Prof Richard Payne

Dr Hongda Zhong

For enquiries related to this course (including requests to take the course) please contact the Lead Teacher, Dr Paula Lopes (p.v.lopes-cocco@lse.ac.uk).

Availability: This course is compulsory on the BSc in Accounting and Finance, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

(permission forms from General Course admin office should be submitted to the Department of Finance Student Information Centre OLD.3.06 with a copy of the transcript attached.)

Pre-requisites: Students must have completed: one level 1 Economics course (either EC100 Economics A or EC102 Economics B), one level 1 Mathematics course and one level 1 Statistics course.

Course content: The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, sources

of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Principles of Corporate Finance by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

FM300

Corporate Finance, Investments and Financial Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Dong Lou
Dr Claudia Custodio

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Management Sciences, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212).

Including both portfolio theory and corporate finance (FM212 or equivalent course).

Course content: This course is intended for third-year undergraduates and will be a broad-based follow-up to FM212 Principles of Finance. The goal is to broaden, and selectively deepen, students' understanding of finance, building on their existing knowledge of financial economics. The course will cover a broad range of topics, with both a theoretical and an empirical emphasis. These include topics in corporate finance, investments and performance evaluation and international finance. The course consists of two interchangeable ten-week components, one on investments and international finance, and the other on corporate finance.

The first component provides students with a way of thinking about investment decisions by examining the empirical behaviour of security prices. We first study the empirical evidence of the CAPM and other asset pricing models, and then analyze different tests of market efficiency focusing on event studies and investment anomalies. We also study the main empirical findings in behavioural finance. We then learn how to measure the performance of a portfolio manager and to attribute it to different types of skill. Finally, this section of the course introduces the foundations of international finance and explores issues related to international portfolio management.

The second component of the course examines theory and evidence concerning major corporate financial policy decisions. We focus particularly on the firm's decision to finance with debt vs. equity, the impact of taxes on such decisions, and the role of dividends. We will begin with the Modigliani and Miller proposition and discuss the firm's choice to raise capital using debt versus equity and the firm's choice to payout earnings using dividends versus repurchases. We will analyze the impact of taxes, financial distress, and asymmetric information on such decisions. We will also cover optimal managerial compensation, take on the role of the policy maker to learn about corporate governance mechanisms and discuss some recent corporate scandals. Finally, we will review empirical evidence from a wide range of international sources to support or refute the theories we discussed.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussions.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Bodie, Kane & Marcus, Investments (Irwin) and Grinblatt & Titman, Financial Markets and Corporate Strategy (Irwin, McGraw-Hill).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

FM320

Quantitative Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Jon Danielsson and Dr Rohit Rahi

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212), Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Introduction to Econometrics, Principles of Econometrics or other statistical courses where at least linear regression models are covered are recommended but not required. Students who have not taken Principles of Finance, but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

Course content: This course is intended for third-year undergraduates and builds upon FM212 Principles of Finance. The main topics covered are financial risk analysis and financial risk management (first part of the course) and derivatives pricing (second part). As such, this course is complementary to FM300 Corporate Finance, Investments and Financial Markets, with minimal overlap.

The first part of the course provides students with a thorough understanding of market risk from both a practical and technical point of view. We discuss the empirical properties of market prices (fat tails, volatility clusters, etc.), forecasting of prices, concepts of financial risk (volatility, Value-at-Risk, etc.), volatility models (ARCH, GARCH, etc.), and we analyse how interactions and feedback between market players can generate endogenous risk and liquidity crises. Finally, we discuss credit markets and liquidity, with applications to the current situation in financial markets. This part of the course presents methods and models used by banks and other financial institutions in the management of risk and allocation of risk capital, as well as models of financial crises. Students apply the models to real financial data using Matlab, a computer software popular in both industry and academia. No prior knowledge of programming is assumed: students will learn-by-doing in class. Students will at times use data and software for classwork assignments.

The second part of the course focuses on derivatives, with a particular emphasis on equity derivatives (European call and put options, exotic options), futures and forward contracts, and interest rate derivatives (swaps, caps and floors, swaptions). We systematically address three basic questions: how do these products work, i.e. what are their payoffs? How can they be used, for hedging purposes or as part of trading strategies? And above all: how are they priced? The course emphasizes a small number of powerful ideas and concepts: absence of arbitrage, replication, and risk-neutral pricing. These are typically introduced in the context of discrete-time models, but the course also covers some well-known

continuous-time models, starting with a comprehensive treatment of the Black-Scholes model. The level of mathematics is appropriate for third-year students with a solid quantitative background. Continuous-time stochastic processes and stochastic calculus will be introduced as we go.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 9 hours of classes in the LT.

Formative coursework: Students will be expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: J Danielsson, *Financial Risk Forecasting: The Theory and Practice of Forecasting Market Risk* will be the required textbook for the first half of the course. For the second half of the course, there is no required textbook, but the following is an excellent reference: *J Hull, Options, Futures, and Other Derivatives*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GI200

Gender, Politics and Civil Society

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Evans COL 5.04J

Availability: This course is available to all second and third year undergraduates who are permitted to take an outside option as part of their programme. This course is available to General Course students.

Course content: Term One

An introduction to the history of the Women's Library; issues of inclusion and exclusion in the holdings

The making of the categories of 'male' and 'female', 'masculinity' and 'femininity'; the ways in which ideas about these identities were formed by moral discourses; the emergence of cults of domesticity and family life.

The campaigns and the circumstances that changed ideas about gender and the making of the gendered citizen. The part that ideas, and ideals, about citizenship and the nation were informed by expectations about gender.

Term Two

The making of the British Empire: the negotiation and the transformation of gender in a globalising world; 'settling' the Empire and defining the boundaries of citizenship.

Politicising gender: the ways in which gender difference became a matter of politics and access to power. Fighting for, and against, transformations of gender roles and identities. The British campaign for suffrage and its connections with distinct traditions of social reform.

Representing gender: accounts, visual and written, of women and men; changing views about the body and sexuality. Sexuality and religion, the expression of symbolic power

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the MT.

Indicative reading: The following items indicate possible reading for the course:

Sally Alexander *Men's Fears and Women's Work: Responses to Unemployment in London between the Wars*, (Gender and History, 2000)

Lesley Hall *Sex, Gender and Social Change in Britain since 1880* (2013)

Jane Lewis *The End of Marriage? Individualism and Intimate Relations* (2003)

Pat Thane and Tanya Evans *Sinners? Scroungers? Saints?* (2012)

John Tosh *A Man's Place: Masculinity and the Middle Class Home* (1999)

Jeffrey Weeks *Sex, Politics and Society* (2007)

Assessment: Dissertation (100%, 10000 words) in the ST.

GV100

Introduction to Political Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Chandran Kukathas

Availability: This course is compulsory on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BSc in Environment and Development, BSc in Environmental Policy, BSc in International Relations, BSc in Politics and International Relations and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to the study of politics and political theory through the thought and texts of some of the most important western political theorists. A study of the ideas of some of the major political theorists from the ancient Greeks to the 20th Century. Topics will include theories of human nature, the origin of government and law, man's relation to society and the state, the rise, development and comparison of different constitutions (democracy, monarchy, republic etc), the nature of just and unjust government, the relation between the spiritual and the secular in thinkers, classical and modern natural law and natural rights, the basis of political obligation, the idea of social contract and the theory of utility. The thinkers discussed this year will include Plato, Aristotle, Augustine, Aquinas, Machiavelli, Nietzsche, Hobbes, Locke, Rousseau, J S Mill, and Marx.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students are required to write two 1500 word essays in the Michaelmas Term and two 1500 word essays in the Lent Term. Specific reading lists referring to modern commentaries and historical contexts will be available on the Moodle page at the beginning of the course.

Indicative reading: D. Boucher and P. Kelly, *Political Thinkers: From Socrates to the Present* (Oxford 2009). See also Plato, *Republic*, Aristotle, *Politics*, Cicero, *The Republic and On Duties*, Augustine, *City of God*, Aquinas, *Political Writings*, Machiavelli, *The Prince*, Hobbes, *Leviathan*, Locke, *2nd Treatise of Government*, Rousseau, *Discourse on the Origins of Inequality and The Social Contract*, J S Mill, *Utilitarianism*, *The Subjection of Women*, and *On Liberty*, Marx, *Selected Writings* (Ed D McLellan), Nietzsche, *Genealogy of Morals*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Candidates will be expected to answer four questions from a total of fourteen.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20% of the mark) and 5% attendance.

GV101

Introduction to Political Science

This information is for the 2015/16 session.

Teacher responsible: Dr Ryan Jablonski

Availability: This course is compulsory on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BSc in Business Mathematics and Statistics and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course is an introduction to politics in a globalised world, with a focus on how political science tries to understand and explain cross-country and cross-time differences. The course will begin by introducing students to some of the main empirical variations in political behaviour, political institutions, and outcomes across the world, focusing mainly on democratic and partially democratic countries (in both the developed and developing world), and introducing students to some of the basic theoretical ideas and research methods in political science. Each subsequent week will be devoted to a substantive topic, where a more detailed analysis of political behaviour, political institutions, or political outcomes will be presented and various theoretical explanations will be assessed. Most weeks will involve an interactive element. For example, students will be required to 'adopt a country', from the range of democratic or partially democratic countries across the world (which cannot be a student's home country). The aim is for a student to become an expert on the political behaviour, institutions and outcomes in his or her adopted country, particularly to provide material and knowledge for class discussions.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative Assessment:

- Problem set (Week 6 MT)
- Mock exam (Week 11 LT)
- Moodle entries on adopted country task (most/every week/s)

Indicative reading: W Clark, M Golder and S Nadenichek Golder, *Principles of Comparative Politics*, 2nd edn, CQ Press, 2012; J Colomer, *The Science of Politics: An Introduction*, Oxford University Press, 2011; A Lijphart, *Patterns of Government: Government Forms and Performance in Thirty-Six Countries*, 2nd edn, Yale University Press, 2012; G. Tsebelis, *Veto Players: How Political Institutions Work*, Princeton University Press, 2002.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 2000 words).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 75% formative coursework (with each piece of coursework counting for 15%). 25% class participation (including attendance and contribution).

GV225

Public Choice and Politics

This information is for the 2015/16 session.

Teacher responsible: Prof Torun Dewan

Additional teachers: Rafael Hortalá-Vallve

Availability: This course is compulsory on the BSc in Government and Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Government, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to the Study of Politics, or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: This course is concerned with positive political economy and public choice theory applied to the study of political conflicts, democratic institutions and public policy. The course covers the main tools for the study of public choice (rational decision-making theory, game theory, social choice theory) and a number of both theoretical and applied topics, including the

empirical study of institutions. This course will cover the main topics in positive political economy and institutional public choice. These include: the aggregation of preferences; voting paradoxes and cycles; electoral competition and voting behaviour; the problems of and solutions to collective action; welfare state and redistribution; the impact of information and mass media on voting behaviour and public policy; the theory of coalitions, the behaviour of committees and legislatures including agenda-setting and veto-player power; principal-agent problems in politics; models of bureaucracy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will complete at least one formative essay and at least one timed essay in each term to allow practise on problem sets and essay writing under exam conditions.

Indicative reading: Text Books: P Dunleavy, *Democracy, Bureaucracy and Public Choice*; D Mueller, *Public Choice III*; K A Shepsle & M S Bonchek, *Analyzing Politics*; George Tsebelis *Veto Players*. Major Works: A Downs, *An Economic Theory of Democracy*; M Olson, *The Logic of Collective Action*; W Niskanen, *Bureaucracy and Representative Government*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The exam will have two parts. Part A is a compulsory question. In Part B, candidates will answer two questions from eight posed.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% formative essay (best mark), 25% timed essay (best mark), 50% class participation (including presentations and attendance).

GV227

The Politics of Economic Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Heims

Availability: This course is compulsory on the BSc in Environmental Policy with Economics. This course is available on the BSc in Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to Political Science or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: The aim of this course is to look at political science explanations of changes in public policy, and to apply that literature to major cases of economic policy (both contemporary and historical). In particular, it aims to examine the extent to which economic policy change is affected by ideas, interests and institutions, and the interaction between international and national factors. The material for the course is drawn mainly from the comparative literature on the politics of markets in industrialised countries.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 6 hours of lectures, 10 hours of classes and 5 hours of workshops in the LT.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT. A revision lecture will run in week 11 of the LT.

Formative coursework: Two formative essays of 1,500 words each. One presentation to be given in class.

Indicative reading: W. Streeck and K Thelen eds, *Beyond*

continuity: institutional change in advanced political economies (Oxford: Oxford University Press, 2005), V Schmidt and M Thatcher (eds), *Resilient Liberalism in Europe's Political Economy* (Cambridge: Cambridge University Press 2013); C Hood, *Explaining Economic Policy Reversals* (Buckingham: Open University Press, 1994), Blyth, M (2002) *Great Transformations. Economic Ideas and Institutional Change in the Twentieth Century* (CUP), V S. Schmidt, *The Futures of European Capitalism* (Oxford: Oxford University Press, 2002), PA Hall and D Soskice (eds), *Varieties of Capitalism. The Institutional Foundations of Comparative Advantage* (Oxford: Oxford University Press, 2001).

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 10% attendance, 10% participation and project presentation, 80% formative coursework.

GV245

Democracy and Democratisation

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Panizza

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is concerned with theories and case studies of democratic transformations. It focuses on several different parts of the world including Eastern Europe, Latin America, South East Asia, China, India, the Middle East and the former Soviet Union. It analyses processes of transition to democracy in historical context and also analyses relations between democracy, democratisation and economic development in a global capitalist economy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: The most useful introductory reading are J. Grugel (2002) *Democratization: A critical introduction*; L. Whitehead *Democratization* (2002) and the articles in *Journal of Democracy*, January 2015. Other useful texts are Rueschemeyer, Dietrich, Evelyn Huber Stephens, and John D. Stephens. (1991) *Capitalist Development and Democracy*. Oxford and Cambridge: Polity, pp.41-78 69-105, 1995; A Przeworski, *Democracy and the Market* (1991); D. A. Rostow (1970) *Transitions to Democracy: Towards a Dynamic Model*; T. Carothers (2002) *The End of the Transition Paradigm?*; Donatella Della Porta (2013) *Can Democracy be Saved?*

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 70% formative coursework, 20% class presentation, 10% class participation (including attendance and contribution).

GV247

Theories and Problems of Nationalism

This information is for the 2015/16 session.

Teacher responsible: Dr Douglas Hutchinson

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in International Relations and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 3 groups. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: Students should have completed a suitable course in Anthropology, Sociology, Political Science, International Relations or History. Government students should have completed GV101 Introduction to Political Science.

Course content: This course considers debates concerning the increasing importance of nationalism and ethnic identity in modern history, their impact on political movements, states and international relations.

There are three principal concerns:

1. Theories of nationalism and ethnicity, including primordialist, ethno-symbolic, modernist and post-modernist approaches. These will be compared and critiqued.
2. The development of various kinds of nations, nation-states and nationalisms from pre-modern Europe to the global present, and a consideration of various concepts (e.g. civic/ethnic, political/cultural, Asian and African forms of nationalism) frequently used to understand as well as evaluate these historical and contemporary phenomena.
3. Nationalism and transnational politics, including problems of state sovereignty, secession and national self-determination; the European union, globalisation and religious fundamentalism.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Two formative essays per term, one of which is a timed-essay set in exam-like conditions.

Indicative reading: E Kedourie, *Nationalism*, Hutchinson, 1960; E Gellner, *Nations and Nationalism*, Blackwell, 2006; H Kohn *The Idea of Nationalism*, Transaction, 2005; H Seton-Watson, *Nations and States*, Methuen, 1977; B Anderson, *Imagined Communities*, Verso Books, 1983/1991; J Mayall, *Nationalism and International Society*, Cambridge University Press, 1990; E Hobsbawm, *Nations and Nationalism since 1780*, Cambridge University Press, 1990; A D Smith, *Nationalism*, Polity 2010; J Breuilly, *Nationalism and the State*, Manchester University Press, 2nd edn, 1993; J Hutchinson, *Nations as Zones of Conflict*, Sage, 2004; W Connor, *Ethno-Nationalism: The Quest for Understanding*, Princeton University Press, 1994; J Hutchinson & A D Smith (Eds) *Ethnicity*, Oxford University Press, 1996; A Hastings, *The Construction of Nationhood*, Cambridge University Press, 1997; A D Smith, *Nationalism and Modernism*, Routledge, 1998; M Hechter, *Containing Nationalism*, Oxford University Press, 2000; Jonathan Hearn, *Rethinking Nationalism: a critical introduction*, Palgrave, 2006.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 10% class presentation, 10% contribution to class discussions, 75% formative coursework, 5% attendance.

GV248

Power and Politics in the Modern World: Comparative Perspectives

This information is for the 2015/16 session.

Teacher responsible: Dr David Woodruff

Other members of Government Department staff will also teach on the course.

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Other background in political science will be considered as a substitute for GV101 for students outside of Government.

Course content: This course will acquaint students with the contemporary study of comparative politics, focusing on theories susceptible to testing with narrative historical evidence. Students will learn to address the methodological challenges of developing and testing such theories. The course will treat a wide variety of themes, including ethnic and political violence, the political impact of natural resources in developing countries, social movements and revolution, the political economy of distribution, and political ideologies. With respect to each theme, students will receive a grounding in theories of the topic and samples of application to empirical cases drawn from throughout the developed, developing, and post-Communist world.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 11 hours of lectures and 10 hours of classes in the LT.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT. There will be a revision lecture in week 11 of the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 2 essays in the LT.

Indicative reading: Cederman, Lars-Erik, Nils B. Weidmann, and Kristian Skrede Gleditsch. 2011. Horizontal inequalities and ethnonationalist civil war: A global comparison. *American Political Science Review* 105 (03): 478-495. Hertog, Steffen. Assessment: Exam (100%, duration: 3 hours, reading time: 5 minutes) in the main exam period.

course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce students to the fundamentals of research design in political science. The course will cover a range of topics, starting from the formulation of research topics and research questions, the development of theory and empirically testable hypotheses, the design of data collection activities, and basic qualitative and quantitative data analysis techniques. The course will address a variety of approaches to empirical political science research including experimental and quasi-experimental designs, large-n survey research, small-n case selection, and comparative/historical comparisons. As a result, topics covered in the course will be varied and span all areas of political science including political behaviour, institutions, comparative politics, international relations, and public administration.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1-10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to produce 8 problem sets in the MT and LT.

Approximately every other week throughout the course, students will complete a short "problem set" that allows them to apply material from the course to concrete political science examples (e.g., identifying design elements of a published research paper; proposing strategies for answering a given research question, etc.).

GV262

Contemporary Political Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann (MT) & Dr Laura Valentini (LT)

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is a pre-requisite for students wishing to take either of the third year options in Political Theory.

Pre-requisites: Introduction to Political Theory or equivalent.

Course content: This course provides an advanced introduction to contemporary political theory. The course is divided into two parts. The first focuses on key political concepts, such as liberty, equality, justice, rights, authority and democracy. The second turns to particularly pressing ethical questions characterizing the political domain. Some of these questions arise within the domestic political arena (e.g., the limits of freedom of speech; the regulation of abortion; respect for minority cultures), others in the international/global one (e.g., global poverty relief; terrorism; global climate change). Although the course will be concept and problem-driven, along the way, students will also be exposed to the views of leading contemporary political theorists, including John Rawls, Robert Nozick, Ronald Dworkin and many others. This course will provide students with a good grounding in the methods and substantive concerns of contemporary political theory as well as familiarity with the works of major thinkers in the field.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to submit at least two formative essays per term, one of which will be a timed-essay conducted under exam-like conditions.

The course requires ability to organize workload/do readings in advance/prepare for seminars. The course will present students with normative/ethical dilemmas they will need to tackle, and will enhance their analytical skills. As a course in political theory, verbal and written communication will be very much emphasized throughout.

Indicative reading: W. Kymlicka, *Contemporary Political Philosophy: An Introduction*; A. Swift, *Political Philosophy: A Beginners' Guide for Students and Politicians*; G. F. Gaus, *Political Concepts and Political Theories*; R. Goodin and P. Pettit (eds.) *A Companion to Contemporary Political Philosophy*; J. Wolff, *An Introduction to Political Philosophy*; C. Brown, *Sovereignty Rights and Justice: International Political Theory Today*; J. Rawls, *A Theory of Justice*; R. Nozick, *Anarchy, State and Utopia*; R. Dworkin, *Sovereign Virtue*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20%) and 5% attendance.

GV263

Public Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Prof Edward Page

Additional teachers: Prof Martin Lodge

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GV101 Introduction to Political Science (or equivalent)

Course content: A systematic examination of the policy process in the context of developed nations. This course introduces key theories and models in the study of public policy and encourages a critical appreciation of the main trends in contemporary public policy-making. The course looks at the different stages of the 'policy cycle' (e.g. agenda-setting, implementation and evaluation), the determinants of public policy (for example, public opinion, political parties, technology) as well as central themes in the study and practice of public policy, such as corruption and risk management.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Indicative reading: P Cairney, *Understanding Public Policy. Theories and Issues*, Palgrave, 2012; K Meier, *The Politics of Sin*, ME Sharpe 1994; M Hill, *The Policy Process in the Modern State*, (3rd edn), Prentice Hall, New York, 1997; F Fischer, G Miller and M Sidney *Handbook of Public Policy Analysis*, CRC Press, 2006; BW Hogwood & A L Gunn, *Policy Analysis for the Real World*, Oxford University Press, 1984; C Hood, *The Limits of Administration*, Wiley, 1976; B D Jones, *Reconceiving Decision-Making in Democratic Politics: Attention, Choice, and Public Policy*, University of Chicago Press, 1994; J W Kingdon, *Agendas, Alternatives and Public Policies* (2nd edn), HarperCollins, New York 1995; J L Pressman & A Wildavsky, *Implementation* (3rd edn), University of California Press, 1984; R Rose, *Learning from Comparative Public Policy*, Chatham House, 2004; CH Weiss, *Evaluation: Methods for Studying Programs and Policies* (2nd edn), Prentice Hall, 1998.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% attendance, 37.5% formative essay (best essay), 37.5% participation

GV264**Politics and Institutions in Europe**

This information is for the 2015/16 session.

Teacher responsible: Dr Vesselin Dimitrov CON 3.06

Prof Michael Bruter, Prof Simon Hix, Dr Eiko Thielemann, Dr Lukas Obholzer

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course aims to give students an understanding of the full range of leading topics and areas of debate and research relevant to the analysis of political institutions and politics in Europe. The course focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, immigration and Europeanisation. The course places particular emphasis on the diverse experiences of liberal democracy in different parts of Europe. The course covers not only long-established democracies in Western Europe, but also the relatively new democracies in Central and Eastern Europe. In the Lent Term, the course will study in depth a number of European countries, such as Britain, France, Germany and Italy, analysing the main developments in the country concerned in the last twenty years (elections, parties, governments), and then examining issues of particular interest related to that country. Course topics include: electoral behaviour; parties and party systems; government formation and coalitions; regionalism and federalism; national and European identities; immigration; and the challenge of Europeanisation.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 2 essays in the LT.

Indicative reading: M Gallagher et al, *Representative Government in Modern Europe* (5th edn) (2011); P Heywood et al (Eds), *Developments in European Politics* (2006); T Bale, *European Politics: A Comparative Introduction* (2nd edn) (2008); S Hix, *The Political System of the European Union* (2nd edn) (2005); I Budge et al, *The Politics of the New Europe: Atlantic to Urals* (1997); V Dimitrov, K H Goetz & H Wollmann, *Governing after Communism: Institutions and Policymaking* (2006); J Elster et al, *Institutional Design in Post-Communist Societies* (1998); J Hayward & E Page (Eds), *Governing the New Europe* (1994); J-E Lane & S O Ersson, *Politics and Society in Western Europe* (1999).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% general contribution to class discussions, 15% presentation(s) and, if applicable, essay outline(s), 60% grading of formative coursework (15% for each of the 4 essays), 10% attendance.

GV302**Key Themes in the History of Political Thought**

This information is for the 2015/16 session.

Teacher responsible: Dr Lea Ypi

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at two groups. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: Students will normally be expected to have taken Introduction to Political Theory or equivalent, in a previous year.

Course content: A thematic study of political thought in Ancient, Medieval/Renaissance and Modern periods. This advanced course treats some of the major themes in the history of western European political thought as drawn from the writings of selected political philosophers of the ancient Greek, Roman, Medieval, renaissance, early modern and modern periods. The aim is to demonstrate, and explain, some of the continuities and discontinuities in ethical and political problems and their solutions over time and changing context.

Examples of such themes: different views on the nature of "man" and the consequences for political agency of different perspectives on human reason, will, desire; debates on the origins of law and the purpose of legislation; changing conceptions of justice; different views on government and the state's relation to the individual; on the sources of public authority and the nature of legitimate sovereignty; on the relation of property ownership to personal identity and to participation in collective governance; the historical and socio-political presuppositions behind the different constitutional regimes: democracy, monarchy, republic etc; on the role of religion in politics; the changing perspectives on the relationship between life in the family and a life of active citizenship; theories of natural law and natural rights; social contract theories; idealist political theory; utilitarianism; nationalism; liberal, conservative and socialist traditions of thought; anarchism and feminism.

The themes, thinkers and primary texts will be selected each year to reflect the current debates in contemporary scholarly literature on them and the research interests of the lecturer.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

There will be a reading week in week 6 of the MT and week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: Two formative essays per term, one of which is a timed-essay set in exam-like conditions.

Indicative reading: Primary Sources: A selection of the following (this list should not be taken as exhaustive): Plato, *Republic*; Aristotle, *Politics*, Machiavelli, *Discourses*, Hobbes, *Leviathan*, Locke, *Second Treatise on Civil Government*, Rousseau, *On The Social Contract*, Hume, *Political Writings*, Kant, *Political Writings*, Hegel, *The Philosophy of Right*, Marx, *The German Ideology*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Four questions will be answered.

GV303 Not available in 2015/16**From Empire to Globalization****This information is for the 2015/16 session.****Teacher responsible:** Dr Jill Stuart

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

The course is capped and only available as an outside option to non-Government students and General Course students when there is space.

Course content: This course will provide a historical and comparative account of changing forms of world order in the modern period. Against the backdrop of the rise and fall of empires, it will examine the changing nature and form of globalisation and the rise of new forms of global politics.

The course content will cover the following topics though specific lecture titles may change from year to year: the contemporary debate about globalisation; international systems and empires in world history; changes in the nature of military power and war; the evolution of global economic governance; the globalisation of migration and environmental concerns; the role of global intergovernmental and nongovernmental organisations; global communications and culture; the nature of US power in the contemporary global order; and core issues of global ethics, citizenship and governance.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.

Indicative reading: Held, D. and McGrew, A. *Globalization/Anti-Globalization*, second edition, Cambridge, Polity 2007; D Held & A McGrew (Eds), *The Global Transformations Reader*, 2nd edn, Polity 2003; C. Brown, 'From International to Global Justice?' in *Oxford Handbook of Political Theory*, J. Dryzek, B. Honig, & A. Phillips (eds), Oxford, 2006; J. A. Scholte, *Globalization: a critical introduction*. Second edition, Palgrave 2005; B. Buzan and R. Little, *International Systems in World History*, OUP, 2000; D. Lieven, *Empire*, Pimlico, 2003; M. Kaldor, *New and Old Wars: Organised Violence in a Global Era*. Polity 1999; R Wade, *Is globalization reducing poverty and inequality?*, World Development, 2004; A. Walter, *World Power and World Money*, Harvester Wheatsheaf, 1993; UNDP, *Making Global Trade Work for People*, Earthscan, 2003; T. Rantanen, *The Media and Globalization*, Sage 2004; A. D. Smith, *Nations and Nationalism in a Global Era*, Polity 1995; D. Held, and M. Koenig-Archibugi, eds, *American Power in the Twenty-First Century*, Polity 2004; M. Glasius, *The International Criminal Court: A Global Civil Society Achievement*, Routledge 2005.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GV306 Half Unit Not available in 2015/16**Global Public Policy****This information is for the 2015/16 session.****Teacher responsible:** Dr Mathias Koenig-Archibugi

The course examines the process and outcomes of policy-making at the global level. It considers a range of modes of policy-making, from classic intergovernmental cooperation to novel forms of governance beyond the state such as transgovernmental networks, multistakeholder initiatives, and regulation by non-state actors. The lectures provide an analytical toolbox and cover the following topics: (1) What is the meaning of "global", "public", and "policy"? Does global public policy really exist? (2) What types of actors participate in global public policy? (3) Who sets the global policy agenda and how? (4) What types of governance institutions exist? (5) How

are governance institutions created or chosen, and what are the implications of their plurality and interplay? (6) What types of global public policies exist? (7) Who decides the content of global public policies and how? (8) How are global public policies implemented? (9) When can global public policy solve global problems? (10) When does global public policy have democratic legitimacy?

The seminars apply the analytical tools provided in the lectures and readings to case studies, to be explored through team work. Each student can choose an area of specialization from a range of global policy problems. Examples of relevant global policy problems include the surveillance and eradication of infectious diseases; access to essential medicines; tobacco control; food safety; labour standards; child labour and education; deforestation; protection of the ozone layer; illicit financial flows; internet regulation; arms control; and other topics that may change from year to year.

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: N/A

Course content: The course examines the process and outcomes of policy-making at the global level. It considers a range of modes of policy-making, from classic intergovernmental cooperation to novel forms of governance beyond the state such as transgovernmental networks, multistakeholder initiatives, and regulation by non-state actors. Concepts and analytical frameworks will be applied to cases such as the surveillance and eradication of infectious diseases; access to essential medicines; tobacco control; food safety; labour standards; child labour and education; deforestation; protection of the ozone layer; illicit financial flows; internet regulation; arms control; and others.

Assessment: Exam (50%, duration: 2 hours).

Essay (50%, 3000 words) in the LT.

GV308 Half Unit**Leadership in the Political World****This information is for the 2015/16 session.****Teacher responsible:** Prof Torun Dewan**Availability:** This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: Students must have completed Public Choice and Politics (GV225).**Course content:** Good leadership is central toward having effective organisations, well functioning institutions, and attaining desirable policy outcomes. But what is good leadership? What is successful leadership? Can we distinguish outcomes as causally related to the actions taken by good and successful leaders? And how important is a leader's style? The course will look at both theoretical and empirical frameworks for analysing these questions developing in particular rational choice accounts of leadership. Different notions of leadership will be discussed including: (1) Leading by Example; (2) The Leader as a Focal Point and (3) The Leader as an information source. These will be illustrated by specific examples.**Teaching:** 22 hours of seminars in the LT.

There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students will be expected to produce 1 presentation in the LT.**Indicative reading:** Ahlquist, JS. and M. Levi. 2011). "Leadership: What it means, what it does, and what we want to know about it". Annual Review of Political Science. vol. 14. Besley, T and Marta Reynal-Querol (2009) "Do Democracies Select More Educated Leaders?", American Political Science Review, 105,3 Humphreys, M., Masters, W., and Sandhu, M. E. (2006). The role of leadership in democratic deliberations: Results from a field experiment in Sao Tome and Principe. World Politics, Jones, B and Olken, B (2005) 'Do Leaders matter? National Leadership and Growth since World War 2', Quarterly Journal of Economics, 120, 3, 835–864 Schelling, T (1980), The Strategy of Conflict, Chapter 4 Shepsle, K and M. Bonchuck (1997), Analyzing Politics, Chapter 14 **Assessment:** Essay (75%, 5000 words) and in class assessment (25%).

In preparation for each class, students will read one or two core texts on political leadership and write a one page piece that reflecting upon these readings. This will then be used as a basis for class discussion. This will be marked as follows: completion and quality of the weekly statements (10%) and in class participation (10%). Each student will also be asked to produce a brief outline and 5 min presentation on the final essay (5%)

GV309 Half Unit**Politics of Money and Finance in Comparative Perspective****This information is for the 2015/16 session.****Teacher responsible:** Prof Cheryl Schonhardt-Bailey**Availability:** This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available with permission to General Course students.

A minimum attendance of 80% of the course is required. This course is capped at two groups. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: A background in political economy would be

advantageous.

Course content: The course focuses on the role of institutions, ideas and interests in the process and formulation of both (a) monetary policy, and (b) financial stability & regulation. We examine in particular the causal influences of institutions, ideas and interests in independent central banking, financial stability and financial regulation (including times of financial crisis), and the oversight and accountability of independent financial agencies. Focusing predominantly on OECD countries, we draw on theories from economics and political science to analyse both decision making and policy outcomes, using both contemporary and historical perspectives. The course adopts a comparative country perspective, rather than an international relations perspective.**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. There will be a reading week in week 6 of the MT for private study and assessment preparation.**Formative coursework:** Students will be expected to produce 1 essay in the MT.**Indicative reading:** The full reading list for this course is currently available on Moodle for GV353. This new course will take the readings from the introductory weeks, along with all the weeks covering issues of money and finance. Blinder, A., The Quiet Revolution: Central Banking Goes Modern (Yale Univ Press, 2004) M. Artis and F. Nixson, The Economics of the European Union, (Oxford: Oxford University Press, 2007 4rd ed) Blinder, A., After the Music Stopped: The Financial Crisis, the Response, and the Work Ahead (Penguin, 2013) Reinhart, Carmen & Rogoff, Kenneth, This Time Is Different: Eight Centuries of Financial Folly (Princeton University Press, 2009) McCarty, N., et al, Political Bubbles: Financial Crises and the Failure of American Democracy (Princeton, 2013) Schonhardt-Bailey, C., Deliberating American Monetary Policy: A Textual Analysis (MIT Press, 2013) W. Bernhard et al., The Political Economy of Monetary Institution, Special Issue, International Organization 56 (Autumn 2002) **Assessment:** Presentation (10%) and essay (90%, 3500 words).**GV311****British Government****This information is for the 2015/16 session.****Teacher responsible:** Prof Antony Travers**Availability:** This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday 2 October 2015.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).**Course content:** The course will provide an introduction to contemporary British government, notably the institutions involved and processes of policy-making. The first part of the course will explain the evolution of British government from the earliest times, including the philosophical ideas that have come to underpin contemporary politics. The key institutions of British government will be described and analysed, focusing on factors that explain the functioning of a complex modern State. By the end of the course, students will have a practical understanding of the entire system of British government and the influences that affect it.**Teaching:** 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

Lectures will run from week 1 - 10 in MT and LT. Classes will run from week 2-11 in MT and LT.

Formative coursework: Students will be required to submit 2 unassessed essays in both the Michaelmas and Lent Terms.

Indicative reading: R. Heffernan, P Cowley and C Hay Developments in British Politics 9, Palgrave Macmillan
P. Norton, The British Polity, 5th Edition, London, Pearson Longman, 2010

R. A. W. Rhodes, Everyday Life in British Government, Oxford University Press, 2011

C. Hood, The blame game: spin, bureaucracy, and self-preservation in government, Princeton University Press, 2011

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GV312

Advanced Topics in Government: Executive Politics

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday, 2 October 2015.

Pre-requisites: GV101 or GV100 or equivalent

Course content: This course offers an advanced consideration of select key themes in the study of executive politics. It focuses on the changing conditions in which politics takes place (demographic change, sovereign debt crisis, environmental change and societal values) and considers how these changes impact on national executives.

Teaching: 20 hours of classes and 2 hours of workshops in the MT. 20 hours of classes and 2 hours of workshops in the LT. The workshops will introduce and provide support for the assessed coursework projects.

Formative coursework: Three formative essays (2500 words) and project proposal for assessed essay component.

Indicative reading: Hood, C (2011) The Blame Game, Carpenter, D (2010) Reputation and Power, Lewis, DE (2009) The Politics of Presidential Appointments, Lodge, M and Wegrich, K (2012/eds) Executive Politics in Times of Crisis.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 2500 words).

GV313 Half Unit

Politics of Trade in Comparative Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Stephanie Rickard

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available with permission to General Course students.

A minimum attendance of 80% of the course is required. This course is capped at two groups. The deadline for receipt of applications from General Course Students is Friday 2 October 2015.

Pre-requisites: A background in political economy would be advantageous.

Course content: The course focuses on the role of institutions, ideas and interests in the process and formulation of trade policy. We examine the causal influences of institutions, ideas and interests in trade, focusing predominantly on developed countries. We draw on theories from economics and political science and analyze these using both historical and contemporary examples, and do so from a comparative perspective, rather than an international relations perspective.

The primary focus of the course is on actual policy outcomes.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Lectures will run from week 1 - 10 of the LT. Seminars will run from week 2-11 of the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Frieden, Lake and Schultz (2010) World Politics. 216-233.

Hiscox, Michael. (2002) "Commerce, Coalitions, and Factor Mobility: Evidence from Congressional Votes on Trade Legislation." American Political Science Review 96(3): 593-608. Edited by Robert Keohane and Helen Milner, p. 25-47.

Assessment: Essay (100%, 4000 words).

GV314

Empirical Research in Government

This information is for the 2015/16 session.

Teacher responsible: Prof Edward Page

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday 2 October 2015.

Course content: The course introduces a variety of techniques and issues in the empirical study of political science and applies them to a practical research project in which students participate throughout the year. The focus of the course will be the practical research project. For 2015/16 the proposed research project will probably explore the question of blame attribution, though this is subject to change. At the theoretical level the course will cover questions relating to the utilization of policy research, forms of research design, sampling, questionnaire construction, coding and converting non-quantitative to quantitative indicators, response rates, elite interviewing and research ethics. As the practical research project progresses classes will cover the development of practical skills such as, principles of research report writing and, where appropriate for the project, use of text processing programmes, and SPSS.

Teaching: 20 hours of seminars and 2 hours of workshops in the

MT. 20 hours of seminars and 2 hours of workshops in the LT. 2 hours of seminars in the ST.

The workshops will take place in the reading weeks (week 6 of MT and LT) and will consist of additional teaching activities to extend students' familiarity with the course content.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Sandra Halperin and Oliver Heath, *Political Research. Methods and Political Skills* (2012); Floyd J. Fowler Survey Research Methods, 5th edn (2013); Alan Buckingham and Peter Saunders, *The Survey Methods Workbook* (2004); Tim May, *Social Research: Issues, Methods and Process*, 3rd edn, (2001); Claus Moser and Graham Kalton, *Survey Methods in Social Investigation*, 2nd edn, (1985); Melanie Mauthner et al (eds), *Ethics in Qualitative Research*, (2002).

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 2500 words) and research project (25%).

GV316 Half Unit

Advanced Issues in Applied Political Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Spiekermann CON.517

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An investigation of contemporary questions in applied political theory. Taking as a starting point a pressing social and political challenge, the course instructs students to systematically apply different political theories to approach the problem, to understand and critically discuss different normative viewpoints, and to develop and defend their own position in these debates.

Examples of such themes include environmental and climate change, free speech, multiculturalism and toleration, poverty and global justice, colonialism, or surveillance and privacy. The topics are selected each year to reflect current debates and the interests of the course convener. The course gives students the opportunity to experience research-led teaching, as the course convener will typically create a syllabus to reflect their current research projects. In 2015/16, this course applies theories and concepts from political theory to the problems of environmental change. Among the topics discussed will be climate change, overpopulation, food and water scarcity, deforestation, desertification and the loss of biodiversity. Looking at contributions from political theorists, we will ask: How should we balance the interests of current and future generations? How does climate change affect our obligations towards the global poor? How do we make policy decisions if the effects are uncertain but potentially severe? Are we individually or collectively responsible for causing climate change, and what follows from this? How do we relate to the environment and what precisely is valuable about preserving it?

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. During the reading week (week 6), all students have the opportunity for a one-on-one meeting with the convener to plan for their formative essay.

Formative coursework: Students will be expected to produce 1 essay.

Indicative reading: John Broome (2012) *Climate Matters: Ethics in a Warming World*, New York (W.W. Norton); Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue, eds. (2010) *Climate Ethics: Essential Readings*, Oxford (Oxford University Press); Denis G. Arnold, ed. (2011) *The ethics of global climate change*, Cambridge (Cambridge University Press); Stephen

M. Gardiner (2011) *A Perfect Moral Storm: The Ethical Tragedy of Climate Change*, Oxford (OUP); Intergovernmental Panel on Climate Change (2013) *Fifth Assessment Report*, Available at www.ipcc.ch.

Assessment: Essay (100%, 3000 words).

GV335 Half Unit

African Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Boone CON 6.04

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy.

This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state and economy in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, and introduce students to theories that aim to identify causes of similarity and difference across and within countries. Students will come away with a better understanding of the possibilities and limits of structured, focused comparisons in comparative politics, and with an introduction to political economy approaches to questions of late development. They will also develop substantive knowledge of the political economy of sub-Saharan Africa and analytic tools to describe and make sense of its diversity.

Teaching: 20 hours of lectures and 16 hours and 30 minutes of seminars in the MT.

This course shares lectures with DV435 African Political Economy. Seminar classes are separate for undergraduate students.

Formative coursework: There will be one 1,200 formative assignment (short essay).

Indicative reading: Texts used may include all or part of the following:

Fred Cooper, *Africa Since 1940* (Cambridge U. Press, Keith Hart, *The Political Economy of West African Agriculture* (Cambridge, 1983). Jeffrey Herbst, *States and Power in Africa* (Princeton 2000). Mahmood Mamdani, *Citizen and Subject: Africa and the Legacy of late Colonialism* (Princeton 1996). Will Reno, *Warfare in Independent Africa* (Cambridge 2011)

Abiodun Alao, *Natural Resources and Conflict in Africa: The Tragedy of Endowment* (University of Rochester Press, 2007). Sara Berry, *No Condition is Permanent: The Social Dynamics of Agrarian Change in Africa* (U. of Wisconsin Press)

Crawford Young, *The Postcolonial State in Africa: Fifty Years of Independence*

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 1500 words).

Students will write one summative paper (50%) and take an exam, which will consist of 2 different essay questions (50%).

GV342 Not available in 2015/16

Philosophy, Politics and Economics: Capstone and Research Project

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Lodge con308

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside

option nor to General Course students.
Exclusive for fourth year BSc PPE students.

Pre-requisites: This course will be available exclusively for 4th-year PPE students.

Course content: The course introduces students to team-based and individual research work. The MT will focus on the capstone project. The initial three weeks of the course will introduce students to the requirements of capstone projects, key research strategies and essential questions. During weeks four to nine, they will be required to research, as part of small teams, problems in public and private sector organisations. The completed research has to be presented to fellow students (and the client organisations) both in form of a presentation as well as a research report.

In the LT, the focus shifts to the production of an individual academic paper. Students will be encouraged to develop an interdisciplinary research question and to complete a research paper and a poster on the conclusions of the paper by the end of the LT. The initial weeks' seminars during the LT will be focused on key questions for research design, with the following weeks focusing more on individual consultation and feedback sessions.

Teaching: 7 hours and 30 minutes of seminars and 9 hours of help sessions in the MT. 7 hours and 30 minutes of seminars and 9 hours of help sessions in the LT. 1 hour and 30 minutes of seminars in the ST.

The seminars will introduce the key issues and demands on the students. The help sessions will operate on the basis of feed-back and consultation sessions to support students' research efforts. The ST session will involve a 'poster exhibition' that allows all students to exhibit and discuss their research projects.

Formative coursework: Students will be expected to produce 1 presentation in the MT and 1 presentation and 1 essay in the LT. The team and the individual research efforts will be supported during the help sessions. To support the development of presentational skills, students are required to prepare a draft presentation and will receive feedback in the MT. Equally, students will be required to prepare a poster outlining their research for week 4 in the LT. This will help the development of the research ideas, but also provide for feedback on the intended research and the design of posters more generally. They will also be asked to provide for a draft paper outline in week 9 to receive additional feedback.

Indicative reading: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); C. R. Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschann, *Dynamics in Groups and Teams: Groups as Complex Action Systems*, chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004). An extensive list of readings will be made available on Moodle.

Assessment: Project (30%, 5000 words) and presentation (20%) in the MT.

Presentation (20%) and research project (30%) in the LT.

GV366 Not available in 2015/16 Political Economy of the Developing World

This information is for the 2015/16 session.

Teacher responsible: Dr Steffen Hertog CON4.01

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday 10 October 2014.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This course aims to introduce students to the broad theoretical traditions in the study of political economies outside of the OECD world, and to provide an analytical overview of a number of concrete social structures that shape the interplay of the political and economic realms in different world regions. It will address puzzles like: Why did some developing countries grow much faster than others after WWII? Are some forms of corruption more compatible with development than others? Which impact do natural resource rents have on politics and development? Under which conditions can countries with a short history of independent statehood build efficient institutions?

GV366 will engage with broad theoretical traditions like modernization theory, dependency theory, and neo-patrimonialism, and with concrete empirical topics like state-business relations, the developmental state, corruption and clientelism, the politics of public enterprise, and the political economy of resource-rich countries.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Indicative reading: Bardhan, Pradeep (1997). "Corruption and Development", *Journal of Economic Literature*, Vol. 35. Evans, Peter (1995). *Embedded Autonomy: States and industrial transformation* (Princeton: Princeton University Press). Richards, Alan, and John Waterbury (2007). *A Political Economy of the Middle East* (Boulder: Westview Press). Ross, Michael (2012). *The Oil Curse: How Petroleum Wealth Shapes the Development of Nations* (Princeton: Princeton University Press). Schneider, Ben Ross, and Sylvia Maxfield (eds.) 1997. *State-Business Relations in Developing Countries* (Ithaca: Cornell University Press). Wade, Robert (2003). *Governing the Market: Economic Theory and the Role of Government in East Asian Industrialization* (Princeton: Princeton University Press). Waterbury, John (1993). *Exposed to Innumerable Delusions: Public Enterprise and State Power in Egypt, India, Mexico, and Turkey* (Cambridge: Cambridge University Press).

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 3500 words) in the ST.

GV390 Government Dissertation Option

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Bruter

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course may be taken only in the third year. A BSc Government and History student cannot choose both HY300 and GV390 and a BSc Politics and Philosophy student cannot choose both GV390 and PH299.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by a proposed dissertation advisor and the Departmental Tutor. The topic should be chosen from any area within the field covered by the degree course and supported by a member of the academic staff from the Government Department willing to act as dissertation advisor. Following the dissertation information session organised by the Department in the second year of the students' curriculum, candidates should approach their tutor during the Lent Term or Summer Term of their second year to discuss the possibility of a proposed dissertation topic. After having received approval for a topic by a prospective advisor, students must submit a dissertation form detailing final title and synopsis/prospectus to the Departmental Tutor for approval by the

fourth week of the third year.

Teaching: 2 hours of seminars in the MT. 3 hours of seminars in the LT.

Five seminars split between the Michaelmas Term and Lent Term as well as individual supervision. Dissertation advisors can be expected to offer advice on reading and guidance on the organisation of the dissertation; they may also read and comment on a draft outline of up to 1,000 words. Tutors or other teachers are not permitted to read or comment on a final draft of the whole dissertation or any part of it. The number of individual meetings with the students will be strictly limited but should be at least once per term in the student's third year. It should be stressed that no member of staff is under an obligation to agree to supervise any proposed dissertation.

Assessment: Dissertation (100%, 10000 words).

Footnotes are to be included in the word limit - but not the bibliography. The examiners may determine that the candidate should be called for an oral examination.

GY100

Introduction to Geography

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Mason STC510 and Dr Claire Mercer STC418

Availability: This course is compulsory on the BA in Geography, BSc in Environment and Development and BSc in Geography with Economics. This course is available on the BSc in Business Mathematics and Statistics and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides students with an introduction to Geography at LSE. In Michaelmas Term we will examine human geography's key concepts, including space, place, scale, landscape, nature, globalization, development, society and city. In the Lent Term the course will move on to introductory sections on environmental geography and economic geography. The environmental section will cover topics such as the anthropocene, nature and culture, and global and local environmental problems. The economic geography section will introduce students to the changing location of economic activity, inequalities within and between countries, regions and cities, and the rationale, objectives and tools of local and regional development policies in a globalizing world.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 4 essays and 1 presentation in the MT and LT.

Indicative reading: Detailed reading-lists related to the different topics within the course will be provided at the start of the course. Clifford, N.J., S.L. Holloway, S.R. Rice and G. Valentine (eds) (2009) *Key Concepts in Geography*, 2nd Ed, Sage, London; Dicken, P. (2011) *Global Shift: Mapping the Changing Contours of the World Economy* 6th Edition Sage Publications; W.E. Murray, *Geographies of globalization*, 2006; A Pike, A Rodríguez-Pose & J Tomaney *Local and regional development*, 2006; N. Castree (2014) *Making Sense of Nature*

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

GY103

Contemporary Europe

This information is for the 2015/16 session.

Teacher responsible: Prof Simona Iammarino STC S410

Availability: This course is available on the BA in Geography, BSc in Environment and Development and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General

Course students.

Course content: This course aims at introducing students with little prior knowledge of European issues to some of the most important economic, social, and political challenges the European Union overcame in the past, and currently faces. The course develops a sound understanding of the determinants and the evolution of these challenges and the related public policies. Students will learn about strengths, weaknesses and lessons to be drawn from the most striking example of integration as a result of historical forces and in the context of a globalised world. The course covers issues such as economic integration, competitiveness, cohesion, growth, enlargement, ageing, migration, employment trends, social polarization and the emergence of regionalism and nationalism. Particular stress is laid upon the spatial constitution of these themes, at various levels of geography: supranational, national and subnational (regional) level.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 18 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

The 3 hour-class in the ST is Revision Session for the exam.

Formative coursework: Students will be expected to produce a minimum of two class essays during the year and will also be expected to give class papers.

Indicative reading: Given the diversity of the subject, there is no one textbook that covers all of the topics. A mix of academic articles and chapters from textbooks is used in the course. Reading lists are provided electronically, and additional web sources will also be indicated during the lectures. Indicative textbooks are the following: A Rodríguez-Pose, *The European Union: Economy, Society and Polity*, 2000; R Baldwin and C Wyplosz, *The Economics of the European Integration*, 3rd edition, 2009; S Senior Nello, *The European Union. Economics, Policies and History*, 2nd edition, 2009; W Molle, *European Cohesion Policy*, 2007.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

GY120

Environmental Change: Past, Present and Future

This information is for the 2015/16 session.

Teacher responsible: Prof David Jones STC S417

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Many consider that 'Climate Change' is the greatest challenge currently facing human society, mainly because of the 'Environmental Changes' that it will cause. But what are 'Climate Change' and 'Environmental Change'? What causes these changes? How much have they changed in the past and how do we know? How much is human activity responsible for the recent changes identified and when did this influence begin? How is the climate going to change in the next century and if water finds its own level, why does sea-level change vary over the Globe?

To answer these questions requires that the course focuses on developing an appreciation of the Planet Earth as the home of human societies. The analysis focuses on the physical nature of the 'natural' or biophysical systems and involves consideration of how the solid earth, the gaseous atmosphere, the hydrosphere and the biosphere, were formed, have evolved, interact and have changed over time due to both external (extra-terrestrial) and internal factors, including humans. From this, an appreciation of change and evolution over differing time-scales is developed, which will serve as an essential basis for students when evaluating the contemporary two-way interaction between humans and the environment. The

relevant science will be taught as and when required.

The course consists of the following sections:

A. Introduction to Environmental Change:

The structure and functioning of the Earth as a set of systems (The Geosystem). The Scientific Method. The systems approach and its application to environmental studies. Ecosystem concept. Biogeochemical cycles. The nature and causes of Environmental Change and Climate Change; "Change" and "Variability".

B. Key Aspects of Environmental Change:

(i) The Contemporary Atmosphere. Composition and structure of the atmosphere. Radiation and selective absorption (Greenhouse Effect). Global energy budget and global energy transfers.

(ii) The Hydrosphere: Hydrological cycles. Cloud formation, precipitation and evapotranspiration. General introduction to hydrology and the "Hydrological Cascade". Human Influences on river flow. Flooding.

(iii) The Biosphere; Development and change of Biodiversity over time due to evolution through Natural Selection

C. Long-term Geosystem Change. Consideration of relevant aspects of the following:

The nature, origin and evolution of the Solar System and Planet Earth. Catastrophism versus Uniformitarianism. The evolution of the solid Earth, lithosphere, atmosphere, hydrosphere and biosphere. Plate tectonics and environment/ climate change. Mass extinctions and the development of biodiversity. The Gaia Hypothesis.

D. Quaternary Environmental Change: Environmental Change over the last 2.6 million years.

The paradigm of Quaternary environmental change, i.e. the "Ice House - Hot House" paradigm. Ice cores, ocean sediment cores, isotope analysis, The Milankovitch Mechanism. Holocene Climate Change (i.e. the last 11,700 years) and debates regarding reconstructions and human influences. The nature and causes of sea-level change. Isostasy. Human impacts on the Ecosphere.

E. Global Environmental Change: Contemporary Climate/ Environmental Change and the basis of predictions to AD 2100.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce two essays during the year, one in each term, and give class papers.

Indicative reading: Bell, M. and Walker, J.C., Late Quaternary Environmental Change: Physical and Human Perspectives, 2005. ; P. Smithson, K. Addison and K. Atkinson, Fundamentals of the Physical Environment, 2008; T H van Andel, New Views on an Old Planet, 1994; R Chistopherson, Geosystems, 2005; J Gribbin, Almost Everyone's Guide to Science, 1998; A. E. Dessler, Introduction to Modern Climate Change, 2012; J. Houghton, Global Warming: The Complete Briefing, 2009 ; J Chapman & M J Reiss, Ecology. Principles and Applications, 1992; J E Lovelock, The Ages of Gaia, 1988; R Huggett, Catastrophism, 1997; ; W.J. Burroughs, Climate Change: A Multidisciplinary Approach, 2007.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (15%, 1500 words) and essay (25%, 2000 words) in the LT.

GY121

Sustainable Development

This information is for the 2015/16 session.

Teacher responsible: Prof Giles Atkinson

Dr J. Baka; Dr E. Campiglio

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: "Is development sustainable?" While this is undoubtedly a challenging question, the purpose of this course is to provide building blocks that will allow an answer to be formulated.

In doing so, we will seek to understand better how the natural world is affected by development decisions and crucially how those decisions shape human development prospects or widen the gap between development outcomes across geographical regions and socioeconomic groups. All of this gives rise to a rich array of themes and debates, which are reflected in distinct sections of the course. We begin by introducing a number of concepts including human development, sustainable development and natural capital. We will then explore a variety of linkages between human development and natural capital (resources and environment). In doing so, we consider the viewpoint that society is being 'guided by the wrong compass' in the way that social and economic progress conventionally is measured by e.g. "GDP". Resource scarcities are frequently relative and the uneven distribution of, or access to, resources has implications for how development outcomes and prospects are distributed globally and within countries. We will therefore investigate the way in which this affects specific human populations particularly those who are amongst the most vulnerable. This set of themes additionally will examine issues of resource security drawing on examples from debates about food, water and energy availability as well as broader debates about North-South resource conflicts, population growth and changing technology.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce class essays during the year and to give class presentations.

Indicative reading: There are a variety of texts available for this course. A detailed reading list will be given at the beginning of each term but will include: G Atkinson, S Dietz, E Neumayer and M Agarwala (eds) Handbook of Sustainable Development, 2nd edition, Elgar, 2014; WM Adams (2009) Greening Development: Environment and Sustainability in the Developing World, 3rd Edition, Routledge, JA Elliott (2012) An Introduction to Sustainable Development, 4th edition, Routledge, RB Potter, T Binns, JA Elliott and D Smith (2008) Geographies of Development: An Introduction to Development Studies, 3rd edition, Pearson. United Nations Development Report, Human Development Report 2011, UNDP, 2011; World Bank, World Development Report on Climate and Development 2010, World Bank, 2009.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%) in the LT.

GY140

Methods in Spatial and Social Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Alan Mace STC513a and Dr Murray Low STC512

Dr Austin Zeiderman

Availability: This course is compulsory on the BA in Geography.

This course is available on the BSc in Environment and Development and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Introduces students to a range of qualitative and quantitative research approaches and methods used in the construction of contemporary knowledge related to human geography and the environment. The course covers an introduction to philosophy of science and discusses philosophical approaches to research such as Marxism, feminism, and postmodernism.

The quantitative component of the course covers approaches to describing data visually and numerically, sampling techniques, the basics of statistical inference, and the principles of structured hypothesis testing. The course uses statistical software to analyse social deprivation data as well as the use of mapping software to represent these data spatially. The qualitative component of the course discusses research design and epistemology, the selection and analysis of case studies as a research method, the collection

and analysis of primary data through fieldwork, and methods of interpreting primary and secondary texts. The full week of fieldwork includes day trips to East and South London investigating themes of the impact of industrial restructuring, globalization, regeneration, and social exclusion, during which students are required to apply various methods from the course in their own research.

Teaching: 10 hours of lectures and 20 hours of classes in the MT. 10 hours of lectures and 20 hours of classes in the LT.

Compulsory fieldwork: one week, London

Formative coursework: Students will be expected to read and review research that employs a range of qualitative and quantitative methods. There is also an essay (750 words) in MT. Classes in MT serve as direct preparation for statistical methods to be used in the assessed practical exercise.

Indicative reading: A Blunt et al. (Eds), *Cultural Geography in Practice*, 2003; D Ebdon, *Statistics in Geography*, 1985; R Flowerdew; D Martin (Eds), *Methods in Human Geography*, 1997; I Hay (Ed), *Qualitative Research Methods in Human Geography*, 2010; K Hoggart, L Lees; A Davies, *Researching Human Geography*, 2002.

A number of more specialised texts will be recommended.

Assessment: Essay (25%, 1500 words) and project (35%, 3500 words) in the MT.

Project (40%, 4000 words) in the LT.

The course summative work comprises an essay of 1500 words (25%); a practical group research exercise based around inferential statistics (35%) and an independent fieldwork project in East London (40%).

GY200

Economy, Society and Space

This information is for the 2015/16 session.

Teacher responsible: Dr Alan Mace STC513a
Dr Ryan Centner

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: From a global perspective this course examines the inter-relatedness of economy and society and the spatiality of social and economic phenomena in contemporary societies. Issues covered include: political economy and theories of uneven development; changing working conditions and patterns of inequality at different spatial scales; gentrification and displacement; and urbanisation in comparative perspective. We will examine relationships between economic and social restructuring; the geographies of privilege, exclusion and marginality; as well as responses through urban regeneration, urban renewal and city planning. At the end of the course students should be able to understand the relationship between the economic, social and spatial realms and communicate and apply these understandings to the contemporary geographies of everyday life.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to prepare written work for weekly classes, and write one formative essay each term related to course readings.

Indicative reading: N. Brenner and N. Theodore, *Spaces of Neoliberalism*, 2002. D. Harvey, *A Brief History of Neoliberalism*, 2005. D. Massey, *World City*, 2007. P. McMichael, *Development & Social Change: A Global Perspective* (5th edition), 2012. K. Polanyi, *The Great Transformation*, 1944.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

In the examination students answer three out of nine questions.

Details of the style and layout of the essay will be provided at the start of the session.

GY201

Urban and Spatial Economic Analysis I

This information is for the 2015/16 session.

Teacher responsible: Prof John Henderson STC.S506b

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economics, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Economics B (EC102) is normally required; Economics A (EC100) is essential.

Course content: This course provides students with a theoretical and empirical understanding of spatial economic processes and how these influence the behaviour of firms and households and the wider economy.

The course draws primarily on international and urban economics.

Topics covered include: causes and consequences of international trade; the winners and losers from globalization; multinational companies; trade, firms, and productivity; offshoring and outsourcing; the function of cities and the urban system; cities as engines of growth; the sources of agglomeration and dispersion; the determinants of urban structure and the role of land markets and land market regulation.

Teaching: 18 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays and problem sets in both terms.

Indicative reading: Detailed reading lists will be given out at the beginning of each term. Readings will include journal articles. Some important items include: A O'Sullivan, *Urban Economics* (8th edn 2012), Irwin/McGraw-Hill; T A Pugel & P Lindert, *International Economics*, (14th edn) McGraw Hill, 2009.

Assessment: Exam (80%, duration: 3 hours) in the main exam period.

Essay (20%, 2000 words).

GY202

Introduction to Global Development

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Mercer S418

Dr Romola Sanyal

Availability: This course is compulsory on the BSc in Environment and Development. This course is available on the BA in Geography, BSc in Environmental Policy with Economics, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to analysing global development, focussing on key development, theories, strategies, problems and trajectories. In Michaelmas Term we cover concepts and ideas of development, colonial development, theories of development including modernization, dependency and post-development, the rise of the neoliberal project, the debt crisis, structural adjustment and PRSPs, participatory development and NGOs. In Lent Term we examine poverty, informality, housing, water, sanitation, gender, conflict and development.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will produce two essays during

the MT and the LT.

Indicative reading: S. Chant and C. Mclwaine, *Geographies of Development in the 21st Century: An Introduction to the Global South*, 2009; S. Chari and S. Corbridge (eds), *The Development Reader*, 2008; G. Williams, P. Meth and K. Willis, *Geographies of Developing Areas: the Global South in a Changing World*, 2009; V Desai & R Potter (Eds), *The Companion to Development Studies*, 2nd ed, 2008; T Forsyth (Ed), *The Routledge Encyclopaedia of Development*, 2005; D. Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

Students will be expected to produce two essays during the MT and LT, and also to prepare class presentations.

GY205

Political Geographies, Policy and Space

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low STC.S512

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to the relevance of a geographical perspective for explanation of contemporary political processes, and of a political perspective for explanation of contemporary geographies, at scales from the local to the global. Topics covered include: states; geopolitics; empires and national states; citizenship rights, migration and national 'closure'; nationalism, territory and identity; geographies of elections and representation; democratization; globalisation, neo-liberalism and governance.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 5 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to submit one formative essay per term of up to 1,500 words.

Indicative reading: Detailed reading lists will include journal articles, but indicative texts include: J Agnew, *Making Political Geography*, 2002; C Barnett and M Low (eds.) *Spaces of Democracy* 2004; J Agnew & S Corbridge, *Mastering Space*, 1995; K Cox, M Low and J Robinson (eds) *The Sage Handbook of Political Geography*, 2008.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

GY220

Environment: Science and Society

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Mason STC.510 and Prof David Jones STC.417

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines debates concerning the nature, cause, and effects of, and alternative solutions to, the key natural environmental degradation and pollution problems faced by

human societies. It highlights the role of science in environmental understanding and governance.

The course consists of three sections, although the specific content, order and relative proportion of teaching may change with staff availability. Part A: Introduction and Themes: this introduces students to social scientific perspectives on scientific knowledge and environmentalism. Part B: Environmental Risk and Science: this section examines the physical science basis of current regional and global environmental risks, including geohazards and global atmospheric pollution. Part C: Science and Environmental Governance: this final section of the course examines how environmental science is incorporated in global environmental governance. The course concludes with an examination of the notion of sustainability science.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays in the MT and LT.

Indicative reading: No one book or small group of books adequately covers the themes considered in the course, and separate reading lists are provided for each distinct part of the syllabus. Basic reading material includes: T. Forsyth, *Critical Political Ecology: The Politics of Environmental Science*, 2003; A. Goudie (Ed), *The Human Impact Reader*, 1997; C. L. Harper, *Environment and Society*, 2002; M. K. Hill, *Understanding Environmental Pollution*, 1997; J. Houghton, *Global Warming: The Complete Briefing*, 4th edition, 2009; M. Hulme, *Why We Disagree About Climate Change*, 2009; A.M. Mannion, *Dynamic World: Land Cover and Land-Use Change*, 2002; G. T. Miller (Ed), *Living in the Environment*, 2000; K. Smith, *Environmental Hazards*, 2001; United Nations Environment Programme, *Global Environmental Outlook 5*, 2012.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

GY222

Applied Environmental Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Susana Mourato STC. S420 and Prof Eric Neumayer STC. S503

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course is an introduction to economic principles in the analysis of environmental change and natural resource use, and in designing appropriate policy responses. The first part of the course largely covers the concepts and tools of environmental economics, while the second part applies these concepts and tools to specific challenges for real world policy-making. Topics to be covered include: the evaluation of regulatory and market based instruments in controlling pollution; moral suasion and voluntary regulation; economics of natural resource use; economic growth, the environment and sustainable development; cost-benefit analysis and environmental valuation; economics of biodiversity and ecosystem services conservation; trade and the environment; green finance; behavioural and happiness economics and the environment.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce a minimum of two (non-assessed) essays during the year and will also be expected to give class presentations.

Indicative reading: Detailed reading lists will be provided to support each course component. For an overview and introduction

to the main issues covered by the course students may wish to consult the following: N Hanley and EB Barbier, *Pricing Nature: Cost-Benefit Analysis and Environmental Policy*, 2009; J Kahn, *The Economic Approach to Environmental and Natural Resources*, 3rd ed. 2005; B Field and M Field, *Environmental Economics*, 6th ed. 2012; DW Pearce, G Atkinson and S Mourato, *Cost-Benefit Analysis and the Environment: Recent Developments*, 2006; E Neumayer, *Weak Versus Strong Sustainability: Exploring the Limits of Two Opposing Paradigms*, 4th Edition, 2013.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 2000 words).

GY240

Research Techniques (Spatial, Social and Environmental)

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low

Additional teacher(s): Dr Ryan Centner

Availability: This course is available on the BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: This course is similar to GY2A0 and shares most teaching arrangements with that course. It does not include the week long field-course associated with GY2A0.

This course aims to prepare second year students, who already have some grounding in social science methodology, to undertake individual research projects. It examines the methodologies used in Geographical research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student's own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers a variety of different approaches to social science methodology including: (i) analysis of quantitative data using linear regression including hypothesis testing, (ii) analysis of quantitative spatial data using geographic information systems (GIS) software, (iii) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including research ethics when conducting fieldwork (vi) techniques for the economic analysis of environmental issues; and (v) techniques for designing, carrying out and presenting an Independent Research Project

Teaching: 15 hours of lectures, 6 hours of classes and 6 hours of classes in the MT. 10 hours of lectures and 9 hours of classes in the LT. GY240 shares most teaching arrangements with GY2A0.

Formative coursework: In the MT classes, and during the field-course, students work on elements of the summative assessment for the course with opportunities for support and feedback from staff as they do so. In addition, there is one piece of formative assessment (no more than 1000 words) in each term.

Indicative reading: Assigned readings may include: A H Studemund (2001 or later edition) *Using Econometrics: A Practical Guide*; J Bell, *Doing your Research Project - Guide for first time researchers in education and social science* (2nd edition), 1993; J Burt & G Barber, *Elementary Statistics for Geographers*, 1996; I Heywood, S Cornelius & S Carver, *An Introduction to GIS*, 1998; P Kennedy, *A Guide to Econometrics*, 1985; A MacEachren, *Some truth with maps: a primer on symbolization and design*, 1994; K G Esterberg, *Qualitative methods in social research*, 2002; I Hay (Ed), *Qualitative research methods in human geography*, 2010. Students unfamiliar with basic inferential statistics and/or those who anticipate difficulty with the linear regression analysis component

of the course in Michaelmas Term weeks 1-5 should prepare in advance by studying Chapter 16: *Statistical Principles* in Studemund, A H (2000) *'Using Econometrics: A Practical Guide.'* Fourth edition (or later). Boston: Addison Wesley. or a similar text.

Assessment: Project (50%) and other (15%) in the LT.

Project (35%) in the ST.

(i) Quantitative methods/Geographical Information Systems project (50%)

(ii) Project in environmental and economic analysis (35%)

(iii) Proposal for 3rd Year Independent Research Project (15%)

GY244

London's Geographies: An Introduction to Cultural and Historical Geography

This information is for the 2015/16 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is available on the BA in Geography and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces you to cultural geography, with application to conditions of life, livelihood and urban experience in 19th, 20th and 21st century London. What is it that makes London such a specific kind of urban scene, and how have people sought to represent its specificity: this is the key question of the course. Rather than a comprehensive account of London's past and present, this course uses the synthetic (social, economic, political and cultural) tools of human geography to understand how and why London is a specific kind of city. London provides an opportunity for thinking about the interplay of culture, society, and space through time. We consider a series of questions about the spatial and social divides of the city and about urban and social transformation. Topics include, but are not limited to; landscape, spectacle, crime & terror, sexuality, migration & racism and labour politics. An important 'lab' component involves leaving the classroom to enter the LSE Archives and to walk the streets to interpret London's cultural geographies. You will be encouraged to access a wide range of sources to build up your interpretation of London, including; novels, film, photographs, music and blogs. You are encouraged to go on walks, to explore aspects of the city you do not already know, and to dig through archival material to find connections between past and present London.

Teaching: 15 hours of lectures and 10 hours of classes in the MT.

13 hours and 30 minutes of lectures and 7 hours of classes in the LT.

Formative coursework: Students are expected to write two formative essays and to participate actively in classes led by the Class Teacher.

Indicative reading: Mitchell D. 2002. *Cultural Geography*; a Critical Reader. Oakes T et al. 2008. *The Cultural Geography Reader*. Kureishi H. 1990. *The Buddha of Suburbia*. Nead L. 2000. *Victorian Babylon: People, Streets and Images in Nineteenth Century London*. Stedman Jones G.. 1984. *Outcast London*.

Assessment: Essay (40%, 3000 words) in the MT.

Presentation (10%) and essay (50%, 3750 words) in the LT.

GY2A0

Research Techniques (Spatial, Social and Environmental)

This information is for the 2015/16 session.

Teacher responsible: Dr Murray Low

Additional teacher(s): Dr Ryan Centner

Availability: This course is compulsory on the BA in Geography. This course is not available as an outside option nor to General Course students.

Course content: This course is similar to GY240 and shares most teaching arrangements with that course.

This course aims to prepare second year students, who already have some grounding in social science methodology, to undertake individual research projects. It examines the methodologies used in Geographical research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student's own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers a variety of different approaches to social science methodology including: (i) analysis of quantitative data using linear regression including hypothesis testing, (ii) analysis of quantitative spatial data using geographic information systems (GIS) software, (iii) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including research ethics when conducting fieldwork (vi) application of qualitative research techniques in the field; and (v) techniques for designing, carrying out and presenting an Independent Research Project.

Teaching: 10 hours of lectures, 6 hours of classes and 6 hours of classes in the MT. 9 hours of lectures and 9 hours of classes in the LT. There is a week-long fieldcourse associated with this course, normally overseas, and normally in the final week of the Lent Term. Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

Formative coursework: In the MT classes and during the field course, students work on elements of the summative assessment for the course with opportunities for support and feedback from staff as they do so. In addition, there is one piece of formative assessment (no more than 1000 words) each term.

Indicative reading: Reading lists will be available for each part of the course. Basic texts include: J Bell, Doing your Research Project - Guide for first time researchers in education and social science (2nd edn), 1993; J Burt & G Barber, Elementary Statistics for Geographers, 1996; I Heywood, S Cornelius & S Carver, An Introduction to GIS, 1998; P Kennedy, A Guide to Econometrics, 1985; A MacEachren, Some truth with maps: a primer on symbolization and design, 1994; K G Esterberg, Qualitative methods in social research, 2002; I Hay (Ed), Qualitative research methods in human geography, 2010

Students unfamiliar with basic inferential statistics and/or those who anticipate difficulty with the linear regression analysis component of the course in Michaelmas Term weeks 1-5 should prepare in advance by studying Chapter 16: Statistical Principles in Studenmund, A H (2000) 'Using Econometrics: A Practical Guide.' Fourth edition (or later). Boston: Addison Wesley or a similar text.

Assessment: Project (50%) and coursework (15%) in the LT. Research project (35%) in the ST.

(i) Quantitative methods/Geographical Information Systems project (50%)

(ii) Fieldwork component (35%)

(iii) Proposal for 3rd Year Independent Research Project (15%)

GY300

Theories of Regional Development and Change

This information is for the 2015/16 session.

Teacher responsible: Prof Michael Storper

Availability: This course is available on the BA in Geography, BSc in Economics, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with

Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: Analysis of theories and methods needed to understand territorial patterns of economic development in Europe, the US and other developed economies. Students will be given the basic toolkit needed to think about such issues as: why industries locate where they do; why there are tendencies toward geographical concentration and dispersion of economic activity; the reasons why economic activity concentrates in cities and metropolitan areas; why it leaves those areas; how existing trends toward globalization are affecting these processes. In addition, the course typically covers a range of policy-relevant topics relating to the economic performance of regions and countries around the world, including: human capital and education, innovation, international trade and quality of institutions.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce class essays during the year and will also be expected to give class presentations.

Indicative reading: H Armstrong ; P Taylor, Regional Economics and Policy, 2000; P Dicken, Reshaping the Global Economic Map in the 21st Century, 2003; G Clark, M Gertler, M P Feldman, eds The Oxford Handbook of Economic Geography, 2000.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the ST.

GY301

The Political Geography of Development and the South

This information is for the 2015/16 session.

Teacher responsible: Prof Gareth Jones S506 and Dr Claire Mercer S418

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: A critical analysis of the politics of contemporary development processes in the South and the global interests which influence them. The course considers development as both practical pursuit and as a series of discourses and representations.

1. Framing Geo-Politics and Development: introduction to Geopolitics, Security and Development, Critical Geopolitics, Postcolonialism.
2. Geo-Politics and Empires: End of Empire and the 'American Century'; The Cold War; New World (Dis)Order, Rogue States, Wild Zones; The War on Terror.
3. Geo-Politics and Neo-Liberal Development: Living with Perpetual Crisis; Corruption; Aid; New Development Actors; Good Governance; Civil Society; Microfinance.
4. Critical Geo-politics and Representation: Immigration, Drugs, Disease, Gangs, Slum Tours and Celebrity.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.

Formative coursework: Students are expected to complete four class essays during the year.

Indicative reading: No one book covers the syllabus. Key themes will be linked to a main or set of texts, complemented by a more detailed reading list.

Assessment: Exam (75%, duration: 3 hours) in the main exam period. Essay (25%, 2500 words) in the LT.

GY302

Urban Development: Politics, Policy and Planning

This information is for the 2015/16 session.

Teacher responsible: Dr Hyun Shin STC. S416 and Dr Murray Low STC. S512

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course covers theories and processes of urban politics and governance; urban problems and policy responses in developed and developing countries, within an institutional and political framework: Areas of study include:

1. Urban government in the UK and USA. Theories of urban politics. Politics of urban fiscal problems and local economic development policy. Management of urban social issues.

2. Urban policy and practice, e.g. speculative urbanisation, urban redevelopment, mega-event politics, gentrification, the right to the city. Case studies largely drawn from cities in mainland China and newly industrialised economies in East Asia

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students should produce two essays during the year.

Indicative reading: D Judge et al, Theories of Urban Politics, 1995; J S Davies and D L Imbroscio, Theories of Urban Politics (second edition), 2009; S Fairstein, The City Builders, 2001; S Body-Gendrot, The Social Control of Cities?, 1999; N Devas & C Rakodi (Eds), Managing Fast Growing Cities, 1993; R P Appelbaum and J W Henderson, States and development in the Asia Pacific rim, 1992; G Andrusz et al, (Eds), Cities after socialism, 1996; J Friedmann, China's urban transition, 2005; Park et al, Locating neoliberalism in East Asia, 2012; L Lees, HB Shin & E López-Morales (Eds), Global gentrifications: Uneven development and displacement, 2015

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

and 'feminisation' of labour; Gender dimensions of national and international migration; Gender and development policy; Girls and GAD; Men and masculinities.

LT: Gender in high income and emerging economies: Gender inequality in a global context; Production and reproduction; Gender work and identity; Theorising the changing organisation of work, gender divisions between paid and unpaid work; Global cities: polarisation and feminisation of work; Migrant workers and the global care chain. Changing gender divisions in high income and emerging economies – China; Economic crisis and gender equality; Policies for gender equality.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce one essay per term, and will also be expected to give class papers.

Indicative reading: No one book covers the entire syllabus, but the following are useful basic reading: MT: Benedek, W., Kisaakye, E. & Oberleitner, G. (2002) (Eds), Human Rights of Women: International Instruments and African Experiences, London: Zed;

Chant, S. (Ed.) (2010) The International Handbook of Gender and Poverty: Concepts, Research, Policy, Cheltenham: Elgar; Cornwall, A., Harrison, E. & Whitehead, A. (Eds) (2007), Feminisms in Development, London: Zed; Jackson, C. and Pearson, R. (Eds) (1998), Feminist Visions of Development, London: Routledge; Kabeer, N. (2003) Gender Mainstreaming in Poverty Eradication and the Millennium Development Goals, London: Commonwealth Secretariat. LT: Ehrenrich, B. & Hochschild, A. (2004) Global Women: Nannies, Maids and Sex Workers in the New Economy, New York: Jain, D. and Elson, D (Eds) (2011) Harvesting Feminist Knowledge for Public Policy; Lutz, H. (2011) The New Maids, London: Zed; McDowell, L. (2009) Working Bodies: Interactive Service Employment and Workplace Identities, Oxford: Wiley-Blackwell; Sassen, S. (2007) Sociology of Globalization, London: W.W. Norton.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

GY305

Urban and Spatial Economic Analysis II

This information is for the 2015/16 session.

Teacher responsible: Dr Olmo Silva STC.S506a

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students should have taken one or more from: EC100, GY201, GY222.

Course content: The aim of the course is to develop theoretical and empirical understanding of spatial economic processes in order to study and evaluate a wide range of issues and policies. Particular emphasis will be put on urban and regional economies and business and worker location decisions. More specifically, the first part of the course will study models of the location of economic and innovation activity with a particular emphasis on regional economies. The second part of the course continues to study location, but focuses more on household location decisions, personal mobility and their implications for spatial labour markets and residential neighbourhood.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce a minimum of two essays during the year.

Indicative reading: A detailed reading list will be given out at the beginning of the course. Reading will predominantly include journal articles and policy documents.

GY303

The Geography of Gender: Global Perspectives

This information is for the 2015/16 session.

Teacher responsible: Prof Sylvia Chant STC417a and Dr Martina Klett-Davies

Ms Jordana Ramalho

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: It would be an advantage if students have some grounding in gender and/or development issues from a second year course such as GY200 Economy, Society and Space, or GY202 Introduction to Development in the South.

Course content: An analysis of the geography of gender at a global scale covering high income countries, emerging economies and developing nations. The course focuses on the variability of gender roles and relations and their socio-spatial implications in different geographical contexts.

MT: Gender in the Global South- 'Engendering' the development agenda; Conceptualising and measuring gender inequality; the UNDP gender indices and beyond; Fertility, reproduction and health; Households and families; Employment and the 'informalisation'

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 2500 words) in the LT.

GY306

Geographies of Race

This information is for the 2015/16 session.

Teacher responsible: Dr Austin Zeiderman

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course will critically analyse the intimate relationship between race and space in the modern world. Through a range of historical and contemporary examples, it will examine how interconnected forms of racial and spatial difference are produced, reproduced, and transformed. Focusing on the material and cultural formation of radicalised geographies, students will learn to recognise how racially inflected discourses and practises shape the production of space and how geographical location matters to racial classification, identification, and discrimination. The course will be organised around a series of archetypal spaces: for example, the body, the home, the ghetto, the wild, the frontier, the prison, the plantation, the border, the colony, the school, and the street. In each case, students will examine the confluence of race and space as well as their intersection with broader themes processes, such as colonialism, capitalism, urbanisation, globalisation, environmentalism, migration, and incarceration. Since race is often entangled with other forms of difference, students will also learn to interrogate the influence of gender, class, religion, and sexuality on the production of space. Texts from human geography, critical race theory, colonial and postcolonial studies, and related fields in addition to other media, such as film, literature, journalism, and photography, will provide students with conceptual resources and methodological tools. Ultimately, the objective of the course is to advance a comparative, critical analysis of the relationship between race and space, past and present, and to explore the conditions of future possibility for the linked political projects of anti-racism and spatial justice.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: A detailed syllabus will be provided at the beginning of the course, but will include works such as: CLR James, *The Black Jacobins*, 1989; F Fanon, *Wretched of the Earth*, 1963; E Said, *Orientalism*, 1983; K Jackson, *Crabgrass Frontier*, 1985; A McClintock, *Imperial Leather*, 1995; TB Hansen, *Wages of Violence: Naming and Identity in Postcolonial Bombay*, 2001; RW Gilmore, *Golden Gulag: Prisons, Surplus, Crisis and Opposition in Globalizing California*, 2005; O Yiftachel, *Ethnocracy: Land and Identity Politics in Israel/Palestine*, 2006; KM Clarke and DM Thomas, *Globalization and Race*, 2006; JN Brown, *Dropping Anchor, Setting Sail: Geographies of Race in Black Liverpool*, 2005; L Pulido, *Black, Brown, Yellow and Left: Radical Activism in Los Angeles*, 2006.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

GY324

Environmental Governance

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Mason STC.510, Dr Carmen Marchiori KGS.102 and Dr Richard Perkins STC.413

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course seeks to explore and critically interrogate the evolving patterns and processes of environmental governance. The course begins by introducing different conceptions of environmental governance, highlighting the multiple actors, scales and interactions involved. It then considers the role of the territorial state, focusing on the organisations of national environmental governance, and how public environmental policy is made and implemented. The next part switches focus to the role of corporations in environmental governance, outlining the motives, practices and outcomes of corporate environmentalism. Lent Term provision examines the issues, actors and processes that shape environmental governance at the transnational and global scales. Introductory lectures on the global environmental policy process introduce different scholarly perspectives informing current research (e.g. regime analysis, critical political economy and constructivism): these perspectives will be referred to as subsequent lectures address particular actor groups and issues (e.g. sustainable energy transitions, climate security). Students will be encouraged to think critically about the ways in which the regulation of global environmental risk is framed and politically contested.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce a minimum of three 1,500 word formative essays/projects during the year.

Indicative reading: Adger, W.N. and A. Jordan (eds) (2009) *Governing sustainability*. Cambridge: Cambridge University Press. Blowfield, M. and A. Murray (2011) *Corporate responsibility: A critical introduction*, 2nd edition. Oxford: Oxford University Press. Carter, N. (2007) *The politics of the environment: Ideas, activism and policy*. Cambridge: Cambridge University Press. Evans, J.P. (2012) *Environmental governance*. London: Routledge. O'Neill, K. (2009) *The environment and international relations*. Cambridge: Cambridge University Press. Gupta, A. and M. Mason (2014) *Transparency in global environmental governance*. Cambridge, MA: MIT Press.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

GY325

Environment and Development

This information is for the 2015/16 session.

Teacher responsible: Dr Charles Palmer KGS2.06
Dr Jennifer Baka

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: *Applied Environmental Economics* (GY222) and/or *Intermediate Microeconomics* (EC201)

Course content: This course explores the complex relationships between development, poverty and the environment. It covers a

range of important natural resource and environmental issues in developing countries, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in political ecology and economics, the course will examine a range of topics, including: the politics of sustainable development; property rights and governance; the food-energy-water nexus; the resource curse; critical resource issues (including forestry, fresh water, and fisheries); biofuels; and urbanization.

By the end of the course, students should be able to:

- Assess key debates related to sustainable development
- Critically evaluate relationships between development, poverty, natural resource use and the environment
- Understand the natural resource linkages between developing and developed countries

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce one 750 word essay plan in the MT and a minimum of one 1,000 word formative essay in the LT.

Indicative reading: Barbier, E (2005) *Natural Resources and Economic Development*, Cambridge University Press; Lopez, R., and M. Toman (2006) *Economic Development and Environmental Sustainability*. Columbia University Press; Fairhead, J and M. Leach (1996) *Misreading the African Landscape: Society and Ecology in a Forest-Savanna Mosaic*, Cambridge University Press; Fischer-Kowalski, M. and H. Haberl (2007) *Socioecological Transitions and Global Change: Trajectories of Social Metabolism and Land Use*, Edward Elgar; Meiksins Wood, E. (2002), *The Origin of Capitalism: A Longer View*, Ellen Meiksins Wood, Verso Press; Polanyi, K (1944), *The Great Transformation: The Political and Economic Origins of our Time*, Beacon Press; Scott, J (1991) *Seeing Like a State: How Certain Schemes to Improve the Human Condition have Failed*, Yale University Press; Ray, D. (1999), *Development Economics*, Princeton: Princeton University Press.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 4000 words) in the LT.

GY350

Independent Research Project

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Mercer STC.418

Other teachers responsible: Student's Academic Adviser in the Department of Geography and Environment

Availability: This course is compulsory on the BA in Geography. This course is available on the BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

For students required to, or choosing to, submit an independent research project ('IRP') as part of a Bachelor's degree within the programmes' listed above.

Pre-requisites: GY2A0 or GY240 Geographical Research Techniques (Spatial, Social and Environmental) are a pre-requisite.

Course content: Students plan their own independent research project from start to finish on a geography topic of their choice. Carrying out the project generally includes reviewing the literature in their chosen topic area, formulating a viable and geography-relevant research question, analysing primary or secondary evidence or other material appropriate to the investigation (often a case study, data set, archival source, fieldwork observation, survey results or interviews, but also other material), and drafting the findings from their investigation into a final, polished submission. Students are expected to deal with the many procedural and analytical decisions that arise in independent research themselves, with guidance from

Academic Advisers and others.

Teaching: 2 hours of classes in the MT. 2 hours of classes in the LT. In the course of conducting their independent research students can draw on various forms of teaching support. A workshop on conducting the IRP will be held early in MT. Students regularly report on their research progress to their Academic Advisers during regular meetings in MT and LT. Students are also assigned a PhD student in the Department who is familiar with their general research topic. Students have the option to arrange further supervision with their PhD Adviser on an individual basis. Students will also present their research in progress to their peers and their Academic Advisor early in Lent Term.

Formative coursework: Students are required to produce an extended proposal which they must submit during the MT. They will be expected to report regularly to their Academic Adviser on the progress they are making on their independent research project, at least during regular termly Advisee meetings, if not more frequently. Students may also choose to arrange additional oversight and update arrangements with either their Academic Adviser or PhD Adviser.

Students are also expected to deliver a presentation of their dissertation project in a workshop during the LT.

Assessment: Research project (100%) in the LT.

IRPs should not exceed 10,000 words, exclusive of appendices and other supportive material. Appendices may be used for supporting documentation and evidence, but not for discussion and analysis. One bound copy of the IRP must be submitted to the Undergraduate Office in S406 by the published deadline, and by the same deadline an electronic copy must be submitted on Moodle.

HY113

From Empire to Independence: The Extra-European World in the Twentieth Century

This information is for the 2015/16 session.

Teacher responsible: Dr Antony Best E405

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introductory survey of events outside Europe in the twentieth century, with a particular emphasis on the collapse of the Western colonial empires, the development of relations between the West and the new states within Asia and Africa, revolutionary developments in Latin America, and the rise of non-Western models of political development. The state of the European empires in the first half of the century; the Japanese challenge to the West; the Chinese revolution; Indian independence; the Palestinian issue and the birth of Israel; the decolonization process in Asia and Africa; the Japanese developmental state; the rise of the non-aligned movement; the Cuban revolution and the Central American wars of the 1980s; the development of the Arab and non-Arab Middle East; American and Soviet relations with the Third World; post-independence South Asia; the modernization and underdevelopment debates; post-independence Africa; China under Mao and Deng; the rise of Islamic fundamentalism and the Arab-Israeli peace process.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

'Students on this course will have a reading week in Week 6, in line with departmental policy'

Formative coursework: Students will be asked to write at least three essays and to present a number of brief class reports

Indicative reading: W G Beasley, *The Rise of Modern Japan* (1990); A Best, J Hanhimaki, J Maiolo and K Schulze, *International History of the Twentieth Century* (2001); J Darwin, *Britain and Decolonization* (1988); J P Dunbabin, *International Relations since 1945, Vol 1, The Cold War, the Great Powers and their Allies* (1994)

Vol 2, The Post-Imperial Age, The Great Powers and the Wider World (1994); D Fieldhouse, Black Africa, 1945-1980 (1986); Goldschmidt, A Concise History of the Middle East; R Holland, European Decolonization, 1918-81 (1985); W Keylor, The Twentieth Century World (1984); S Sarkar, Modern India, 1885-1947 (1983); J Spence, The Search for Modern China (1990); M Yapp, The Near East since the First World War (1991); Skidmore and Smith, Modern Latin America (2005).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY116

International History since 1890

This information is for the 2015/16 session.

Teacher responsible: Prof David Stevenson 3.11 (SAR)

Availability: This course is compulsory on the BSc in International Relations and BSc in International Relations and History. This course is available on the BA in History, BSc in Economic History, BSc in Government and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The history of international relations from the 1890s through the 1990s. The course emphasises the changing character of international politics over the course of the 'long twentieth century', and aims to equip students with a comprehensive knowledge of international politics since 1890, to provide the factual grounding and conceptual apparatus necessary to understand the contemporary world, and to gain a sense of how some of the main historiographical debates have developed over the last few decades. Lectures and classes fall into six distinct chronological and analytical phases. The first segment covers the 'globalization' of the European balance-of-power system after 1890 through the advent of extra-European great powers: Russia-in-Asia, Japan, and the United States, and the crisis and collapse of the system in the First World War. The second segment covers the failure of both attempts to tame the resulting chaos: Wilson's new vision of international politics and British and French efforts to reconstitute the 1914 world. The consequences of failure, the successful revolt against world order of four discontented powers, Imperial Japan, Fascist Italy, National Socialist Germany, and the Soviet Union, and the outbreak of the 'second round of the German War', close the third phase. The fourth phase opens with the expansion of European war into global war and closes with the birth of a bipolar world dominated by the United States and the USSR. The ensuing era of superpower rivalry forms the fifth segment; themes covered include the origins of the Cold War in both Europe and Asia, decolonisation, European unity, the 'American war' in Vietnam, and the rise and fall of superpower détente. The final phase of the course examines the causes and consequences of the collapse of the Soviet empire, the rising power of China; and the patterns of international disorder in the post-Cold War era.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to write three 2,000-word essays during the course of the year, two in MT and one in LT, from topics designated in the course reading list, and in addition to complete a one-hour mock examination in ST. Essays and mock examination do not form part of the final course Assessment. But they are required components of the course, and students must complete them in order to be admitted to the course examination.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture, and will also be found, along with other course materials, in the public folders. The following works offer useful background; students should consider reading one or two of them in advance: W R Keylor, The Twentieth Century World: An International History; C J Bartlett,

The Global Conflict, 1880-1970; D Stevenson, The First World War and International Politics; P M H Bell, The Origins of the Second World War in Europe; Akira Iriye, The Origins of the Second World War in Asia and the Pacific; J P Dunbabin, International Relations since 1945 (2 vols).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY118

Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Keenan E391

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the international history of the early modern period by examining the complex political, religious, military and economic relationships between Europe and the wider world. The period between 1500 and 1800 enables the course to introduce students to a crucial period in international history. In political terms, it covers the rise of major dynastic states, with increasingly centralized institutions and concepts such as absolutism to promote the authority of the monarch, as well as the challenges to that authority and growing interest in political and social reform, culminating in the revolutions examined at the end of the course. Internationally, the period witnessed the gradual consolidation of leading European powers, as reflected in the Treaty of Westphalia (1648), with formerly peripheral states emerging to challenge their position by the early eighteenth century. At the same time, the rise of major Islamic empires in Eurasia and the growing contact between Europe and the wider world provide students with important points of comparison between European and non-European states. The intellectual, religious and cultural developments of this period provide a constant context for these major political events. The course will discuss the influence of key movements, such as the Renaissance, the Scientific Revolution and the Enlightenment, which re-ignited an interest in the Classical past and fostered a culture of rational enquiry into the natural world. Yet religion remained a vital component in the world-view of contemporaries, whether Christian, Muslim, or Jewish. This world-view was subject to challenges throughout the period, as during the Reformation, and often sought to impose its own orthodoxy, whether through religiously-motivated conflicts or the persecution / conversion of certain groups. The course seeks to familiarize students with some of the most important issues and current debates on these aspects of this period. While its scope is necessarily broad in nature, the course will help students to deal with the dynamics of continuity and change over a long period of time.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures, 10 hours of classes and 1 hour of workshops in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 piece of coursework in the ST. The formative essay in the Summer Term takes the form of a mock exam answer, which will be graded and given feedback.

 Project (50%, 1000 words) in the ST.

HY200

The Rights of 'Man': the History of Human Rights Discourse from the Antigone to Amnesty International

This information is for the 2015/16 session.

Teacher responsible: Dr Timothy Hochstrasser Sardinia House 2.14

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Human Rights are often assumed to have a precise twentieth-century origin in the 1948 Universal Declaration or in the succeeding decades of increasing activism. However, the history of human rights discourse and its practical impact emerged as only the latest stage of a sequence of intellectual debates and real-life struggles in specific historical settings over political, religious, economic rights, broadly defined. Different cultural milieus have produced a variety of contexts for working out tensions between claims by individuals or minorities for autonomy on the one hand and the rival demands of collective obligation and identity on the other.

This course will seek to explore an (inevitably selective) range of these historical contexts in order to demonstrate the continuity of perennial themes of conflict between the claims of individual actors and corporate institutions, whether states, churches, empires or other institutions, while also showing how and when key changes take place in the recognition of rights of political action, conscience, property ownership, gender identity and workers' rights etc. The growth of toleration and free speech, the abolition of slavery and torture, and the role of Declarations of Rights will all be examined, but less familiar subjects will also find their place. The contribution of the conceptual legacy and historical inspiration of Greece and Rome will be recognised as will the crucial role of the political thought of the High Middle Ages, and at the other end of the course specific connection will be made to the recent development of human rights organisations.

In each session a contrasted selection of contemporary writings will be studied to recover the intellectual framework of the discussion and the role of the dispositive political, social, and economic circumstances of the debate will also be considered.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

The course will comprise 10 seminars in each term of 2 hrs in duration. There will be a reading week in week 6 of each term. Students will be expected to read essential primary and secondary material for each weekly meeting, to participate fully in seminar discussions and offer presentations. Both participation and presentations will form part of summative assessment.

Formative coursework: There will be one essay of 3,000 words to be submitted in the Michaelmas Term.

Indicative reading: Michael Barnett, *Empire of Humanity: A History of Humanitarianism* (Ithaca, 2011)

HY203

The Arab-Israeli Conflict: Nationalism, Territory, Religion

This information is for the 2015/16 session.

Teacher responsible: Dr Kirsten Schulze M14 Sardinia House

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The 1948 Arab-Israeli War; Israeli foreign and defence policy; the 1956 Suez-Sinai Campaign; the 1967 Six-Day War; regime change in Egypt and Syria in 1970; 1970/71 Black September; the 1973 Yom Kippur War; the 1975 Lebanese civil war; the ascendance of the Likud; the Camp David Accords 1979; the invasion of the Lebanon 1982; Palestinian resistance; the 1987 Intifada; the 1991 Madrid Peace Conference; the 1993 Oslo Accords; the 1994 Jordanian-Israeli Peace Treaty; the 2000 al-Aqsa

intifada; and peace efforts since 2000.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. new academic year structure

Formative coursework: Students are required to write three essays, including a one-hour timed essay.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY206

The International History of the Cold War, 1945-1989

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Ludlow 2.16 SAR

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Cold War dominated the second half of the 20th century, but until recently we had only an imperfect sense of what it was all about. Historians wrote about it, of necessity, from within the event they were seeking to describe, so that there was no way to know its outcome. And because only a few Western countries had begun to open their archives, these accounts could only reflect one side of the story. Cold War history, hence, was not normal history: It was both asymmetrical and incomplete. The end of the Cold War and the subsequent partial opening of Soviet, Eastern European, and Chinese archives have revolutionised the field. Everything we thought we knew is up for reconsideration, whether because of the new documents available to us, or as a consequence of being able to reflect on how it all came out in new ways - given that the historical discipline has evolved methodologically as well.

The course will provide an introduction to key topics in the new, international history of the Cold War. The selected topics vary from the study of specific Cold War crises to the exploration of broader themes such as the roles of ideology and technology.

Course objectives: (i) To equip students with comprehensive knowledge of the international politics of the Cold War; (ii) To offer a firm basis for more advanced historical work in this area; (iii) To provide some of the factual grounding and conceptual apparatus necessary to understand the contemporary world.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Students are expected to keep up with readings for weekly seminars, and to participate in the class discussions.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Barrass, G, *The Great Cold War* (2009); Gaddis, J L, *The Cold War: A New History*; Hanhimäki, J & Westad, O A, *The Cold War: A History in Documents and Eyewitness Accounts*; Leffler, M P, *For the Soul of Mankind* (2007); Leffler, M P & Painter, D, *Origins of the Cold War* (2005); Reynolds, D, *One World Divisible: A Global History since 1945* (2001); Sarotte, M, 1989 (2009); Westad, O A, *Reviewing the Cold War: Approaches, Interpretations, Theory* (2000); Westad, O A, *The Global Cold War* (2005);

Assessment: Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) in the MT and LT.

Class participation (15%) in the MT and LT.

HY216

Four Reichs: Austria, Prussia and the Contest for Germany since 1618

This information is for the 2015/16 session.

Teacher responsible: Dr Christopher Brennan

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to demonstrate how Austria (The Habsburg Monarchy, subsequently the Republic of Austria) tackled the German Problem as incorporated in a series of challenges: organising and controlling the Holy Roman Empire; withstanding the rivalries of Louis XIV's France and Frederick II's Prussia; resisting the French revolutionary and Napoleonic threat to Germany; organising the German Confederation after 1815; attempting to unify the Habsburg Monarchy and the German Confederation under Austrian leadership after the revolutions of 1848; contesting the leadership of Germany with Bismarck; allying with Imperial Germany in peace and war between 1879 and 1918; co-existing with Weimar Germany; experiencing Anschluss and war between 1938 and 1945; accepting a different path to independence from Germany between 1945 and 1955; taking a different view of the Nazi past from Germany after 1955; and finally, joining Germany as a full member of the EU.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Under the new academic year structure there will be no ST teaching.

Formative coursework: Students will be expected to write one essay in the Michaelmas term and one in the Lent term as well as do at least one class paper over the year. There will be a mock exam in the summer term.

Indicative reading: Charles W. Ingrao, *The Making of the Habsburg Monarchy, 1618-1815*, 2nd. edition, Cambridge, 2000; Hajo Holborn, *A History of Modern Germany, 1648-1840*, Princeton, 1982; Alan Sked, Metternich and Austria. An Evaluation, Basingstoke, 2008; Alan Sked, Radetzky. Imperial Victor and Military Genius, London, 2010; Alan Sked, *The Decline and Fall of the Habsburg Empire, 1815-1918* 2nd. edition, London and New York, 2001; Gary W. Shanafelt, *The Secret Enemy. Austrian Nazism Yesterday and Today*, Detroit, 1989; Rolf Steininger, *Austria, Germany and the Cold War from the Anschluss to the State Treaty, 1938-1955*, New York, 2008; David Art, *The Politics of the Nazi Past in Germany and Austria*, Cambridge, 2006; Peter J. Katzenstein, *Disjoined Partners. Austria and Germany since 1815*, Berkeley, 1976.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY221

The History of Russia, 1682-1825

This information is for the 2015/16 session.

Teacher responsible: Prof Janet Hartley

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years, General Course students and as an outside option where regulations, timetabling constraints and teaching capacity permit.

Course content: The course provides an introduction to the history of Russia in all its major aspects from the reign of Peter I to the

accession of Nicholas I. The following topics are studied: Russia in 1682; the impact of the reign of Peter I on the internal development and international position of Russia; the social and political developments of the period 1725-1762; popular revolt during the eighteenth century; the domestic and foreign policies of Catherine II; the impact of the Enlightenment and the French Revolution on Russia; Russia and the Napoleonic Wars; the failure of constitutional and social reform in the first quarter of the nineteenth century; the policies towards non-Russians within the empire; the Decembrist Revolt of 1825. The course is taught chronologically but several main themes are addressed throughout the period. These themes include: tsarist rule as an instrument of both reform and reaction; the relationship between the ruler and the major social groups; the significance of serfdom for Russia's economic, institutional and legal development; the 'missing' middle class; the nature and impact of Western ideas on Russia; the role of the Orthodox Church within the Russian state; the growth of a disaffected elite in Russia; the relationship between Russia and other European powers; the development of Russia as a 'great power'; the policies towards the non-Russians in the multi-ethnic empire; the growth of a Russian national consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to write three essays, one of which will be done under examination conditions

Indicative reading: A full reading list will be provided at the start of the course. Useful introductory works include: J Hartley, *A Social History of the Russian Empire 1650-1825*; S Dixon, *The Modernization of Russia: 1682-1825*; M Raeff, *Understanding Imperial Russia: State and Society in the Old Regime*; J Billington, *The Icon and the Axe: An Interpretive History of Russian Culture*; A Kahan, *The Plow, the Hammer and the Knout: An Economic History of 18th Century Russia*; P Dukes, *The Making of Russian Absolutism, 1613-1801*; E Kimerling-Wirschafter, *Russia's Age of Serfdom*; D Saunders, *Russia in the Age of Reaction and Reform, 1801-1881*.

Assessment: Exam (90%, duration: 3 hours) in the main exam period. Presentation (10%).

HY226

The Great War 1914-1918

This information is for the 2015/16 session.

Teacher responsible: Professor David Stevenson, Sardinia House 3.11

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The international and comparative history of the First World War. The military, diplomatic, political, economic, social, and cultural aspects of the conflict will all receive attention. The origins and outbreak of the war; the military campaigning on the Western, Eastern, Italian, and extra-European Fronts; the war at sea and in the air; the intervention of neutral powers, war aims and attempts to negotiate peace; domestic politics in the belligerents; the war's economic and social effects; the experience of combat; the Russian Revolution and the road to the Armistice; the impact of the war on the international system and on individual and collective consciousness.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be required to write one essay in the MT and two essays in the LT. They will also be required to do a timed mock exam essay at the end of LT.

Indicative reading: N. Ferguson, *The Pity of War* (1998); H. Herwig, *The First World War: Germany and Austria-Hungary, 1914-*

1918 (London, 1997); G. Hardach, *The First World War, 1914-1918* (1977); J. Joll, *The Origins of the First World War* (1984); A. Millett & W. Murray (Eds), *Military Effectiveness, Volume I. Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY232

War, Genocide and Nation Building. The History of South-Eastern Europe 1914-1990

This information is for the 2015/16 session.

Teacher responsible: Prof Anita Prazmowska E506

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The course aims to explain the history of these regions as expressed and moulded by the peoples and their leaders during a particularly turbulent period in European History. Attention will be paid to two European wars and the Russian Revolution, all of which had a profound impact on these countries' freedom to determine their destiny. The study of the inter-war period will include a debate of the reasons for the collapse of democratic institutions, the emergence of patriotic and anti-Semitic movements, economic failures and responses to German and Italian aggression. The establishment, development and the collapse of Soviet domination of the region after the Second World War will be discussed on the background of ethnic and inter ethnic conflicts. In addition political, economic and cultural theories, which formed the background to the emergence of the independent states of Eastern and South Eastern Europe, will be considered. The course will develop these themes in the history of Poland, Czechoslovakia, Hungary, Bulgaria, Romania, Yugoslavia, Albania and the Baltic States. Final lectures will concentrate on the transition from Communism to democratic states. The break up of Yugoslavia and the wars in the Balkans will be considered in a separate lecture.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Indicative reading: R J Crampton, *Eastern Europe in the Twentieth Century* (1994); S K Pavlowitch, *A History of the Balkans 1804-1945* (1999); I Y T Berend, *Decades of Crisis. Central and Eastern Europe before World War II* (1998); A J Prazmowska, *Eastern Europe and the Outbreak of the Second World War* (1999); P G Lewis, *Central Europe since 1945* (1994); T Rakowska-Harmstone, *Communism in Eastern Europe* (1979); G Swain & N Swain, *Eastern Europe since 1945* (1993); F Fejto, *A History of the People's Democracies; Eastern Europe since Stalin* (1971); J Rothschild, *Return to Diversity. A Political History of East Central Europe since World War II* (1990); G Stokes, *The Walls Came Tumbling Down. The Collapse of Communism in Eastern Europe* (1993).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY233 Not available in 2015/16**Empire and Nation: Britain and India since 1750****This information is for the 2015/16 session.****Teacher responsible:** Dr Taylor Sherman E601**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: This course examines the history of South Asia from the eighteenth century to the present day. Focusing on the imperial relationship between Britain and India, it investigates the ways in which imperial rule shaped South Asian society, studies the nature of anti-colonial nationalisms, and explores the legacies of British rule for the independent states of South Asia. The course will explain how and why the East India Company acquired an empire in India, and will explore the techniques by which the British sought to derive profit, prestige and power from its empire in South Asia. It will ask, to what extent did the British seek to reform India, and what were the consequences - intentional or otherwise - of imperial efforts to understand and change Indian society? The course will examine the ways in which different groups of Indians responded to, benefited from, and resisted colonial rule in India. The economic impact of colonialism will be considered, as the course asks, did British rule drain India of its wealth? In the second term, it will assess the impulses behind the emergence of Indian nationalism, and discuss Gandhi's philosophy and his political strategies. The course will consider why British India was partitioned in 1947 when India and Pakistan gained independence, and it will investigate the long-term consequences of partition, including the conflict over Kashmir. The course concludes with a discussion of the impact that colonialism has had on the political and economic development of independent India, Pakistan and Bangladesh.**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.**Formative coursework:** Students will be required to submit two 2,000-word essays from topics designated in the course reading list and to sit a mock exam in the Summer Term. These assignments will not form part of the final assessment, but they are a required component of the course, and students must complete them in order to be admitted to the course examination.**Indicative reading:** A full reading list will be provided at the beginning of the course. The following are essential reading: Catherine B. Asher and Cynthia Talbot, *India before Europe* (Cambridge University Press, 2006) C.A. Bayly, *Indian Society and the Making of the British Empire* (Cambridge University Press, 1988); Bernard S. Cohn, *Colonialism and its Forms of Knowledge* (Princeton University Press, 1996); Barbara D. Metcalf and Thomas R. Metcalf, *A Concise History of India*, (Cambridge University Press, 2002); Douglas Peers, *India under colonial rule 1700-1885* (Longman, 2006); Sumit Sarkar, *Modern India 1885-1947* (London, 1989); Tirthankar Roy, *The Economic History of India 1857-1947* (Oxford University Press, 2006); R. Guha & G. Chakravorty-Spivak (eds), *Selected Subaltern Studies* (Oxford University Press, 1988); M. K. Gandhi, *Hind Swaraj and Other Writings* (ed. A J Parel) (Cambridge University Press, 1997); D. Hardiman, *Gandhi: in His Time and Ours* (Permanent Black, 2003); A. Jalal, *The Sole Spokesman* (Cambridge University Press, 1985); Dipesh Chakrabarty, *Rochona Majumdar and Andrew Sartori* (eds.), *From the Colonial to the Postcolonial: India and Pakistan in Transition* (Oxford University Press, 2007); Sunil Khilnani, *The Idea of India* (Penguin, 1997); Ian Talbot, *Pakistan: a Modern History* (Hurst, 1998)**Assessment:** Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words).

HY235**Modernity and the State in East Asia: China, Japan and Korea since 1840****This information is for the 2015/16 session.****Teacher responsible:** Dr Antony Best E405**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. It begins by looking at the impact of the arrival of Western imperialism in the mid-nineteenth century and the respective approaches taken by Japan, Korea and China in response to this encroachment. For Japan, it covers the rise of the Meiji state, the beginnings of constitutional government and the development of Japanese imperialism. This naturally is linked with the study of Korea's failed efforts to maintain its independence; in regard to China it deals with the attempts by the Qing state to introduce reforms and the final collapse of Imperial China. It then deals with the difficulties provoked by modernization and nationalism in the first-half of the twentieth century, taking in the rise and fall of Taisho democracy and the drift towards fascism in Japan and the Guomindang's revolution and state-building and the birth of the Chinese Communist Party in China. The course then concentrates on the aftermath of the Second World War for East Asia, studying the Chinese Civil War and the emergence of the People's Republic, the course and legacy of the US occupation of Japan and the formation of the two Koreas. The last part of the course covers the development of the People's Republic under Mao and Deng, the rise of Japan as an economic superpower and the emergence of South Korea and Taiwan as economic powers.**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

'Students on this course will have a reading week in Week 6, in line with departmental policy'

Formative coursework: Students will be required to submit three 2000 word essays in all and to sit a mock exam.**Indicative reading:** A detailed reading list will be issued at the start of the course, but the following survey texts are essential: W G Beasley, *The Rise of Modern Japan*; P Duus (Ed), *The Cambridge History of Japan: The Twentieth Century*; L Eastman (Ed), *The Nationalist Era in China, 1927-1949*; J L McLain, *Japan: A Modern History*; R MacFarquhar (Ed), *The Politics of China, 1949-1989*; A Buzo, *The Making of Modern Korea*; J Spence, *The Search for Modern China*.**Assessment:** Exam (100%, duration: 3 hours) in the main exam period.**HY238****The Cold War and European Integration, 1947-1992****This information is for the 2015/16 session.****Teacher responsible:** Dr Nicholas Ludlow E502**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** The course will investigate the evolution

of both the cold war in Europe and the process of European integration, asking what the linkages were between these parallel developments. The Marshall Plan; the birth of NATO; the Schuman Plan; German Rearmament and the EDC; the Western European Union; the US and Euratom; the other Community - the EEC; JFK's Grand Design; De Gaulle's rival vision; the 'double crisis' of 1965-6; Harmel, NATO and the WEU; Ostpolitik and the re-emergence of German foreign policy activism; enlargement, EPC, and Kissinger; Schmidt, Giscard and Carter; Euromissiles and Eurosclerosis; Genscher-Colombo and the revival of political Europe; Europe and the end of the cold war - spectator or actor?; a German Europe or a European Germany?; Paris, Berlin & Maastricht.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to submit three essays, the last one of which will be formally assessed. There will also be a mock exam in the Summer Term.

Indicative reading: A detailed reading list will be provided at the start of the course. It will include William Hitchcock, *France Restored: Diplomacy and the Leadership in Europe*; Michael Hogan, *The Marshall Plan: America, Britain, and the Reconstruction of Western Europe, 1947-1952*; Marc Trachtenberg, *A Constructed Peace: The Making of the European Settlement 1945-1963*; Geir Lundestad, *'Empire by Integration': the United States and European Integration 1945-1997*; Pascaline Winand, *Eisenhower, Kennedy and the United States of Europe*; Jeffrey Giauque, *Grand Designs and Visions of Unity*; N.Piers Ludlow, *The European Community and the Crises of the 1960s*; Timothy Gatten-Ash, *In Europe's Name: Germany and the Divided Continent*; Julius Friend, *The Long Presidency, France in the Mitterrand Years*; Phillip Gordon, *A Certain Idea of France: French Security Policy and the Gaullist Legacy*; Pekka Hamalainen, *Uniting Germany*; Kevin Featherstone, *The Road to Maastricht*

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 3000 words).

HY239 Not available in 2015/16 Latin America and the United States since 1898

This information is for the 2015/16 session.

Teacher responsible: Dr Tanya Harmer E602

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: HY239 is designed to provide students with an introductory overview of the history of the Americas and inter-American relations from 1898 to the present day. Rather than focussing exclusively on U.S. policy towards Latin America, the course explores the international history of Latin America and the United States from a variety of U.S and Latin American perspectives. It also incorporates broader thematic and interpretive questions alongside country specific studies. Among the major themes covered on the course are the concepts of imperialism, neo-colonialism and anti-imperialism, revolution and counter-revolution, nationalism and interventionism, democracy and dictatorship, human rights and repression, development and dependency, the 'war on drugs' and migration. More specific topics covered in lectures and class discussions include: the Spanish-American War; Big Stick and Dollar Diplomacy; FDR's 'Good Neighbour' policy; Juan Perón and Populism; the onset of the Cold War and post-war in the Americas; Jacobo Arbenz' Guatemala; the Cuban Revolution; JFK and the Alliance For Progress; the Brazilian Coup of 1964 and U.S. intervention in the Dominican Republic, 1965; Cuba's Latin American policy and Che Guevara's Bolivian mission; Salvador Allende's Chile; the 'Condor Years' and Cuban interventionism

in Africa; the Panama Canal Treaty and Carter's opening to Cuba; the Nicaraguan Revolution and Reagan's Central American interventions; 'The Lost Decade' and Debt crisis of the 1980s; the Washington Consensus, the War on Drugs and Hugo Chavez and the 'Bolivarian Alternative for the Americas' (ALBA).

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be required to do two presentations, to write one 2,000-word essay and one 1,000-1,500-word book review, to contribute to weekly Moodle discussion forums, and to sit a Mock exam in the Summer Term. These assignments will not form part of the final assessment but they are a required component of the course, and students must complete them in order to be admitted to the course examination.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture and will also be available on Moodle and in the departmental public folders. However, the following works are useful introductions and core texts for the course: E Williamson, *The Penguin History of Latin America*, Mark T Gilderhus, *The Second Century: U.S.-Latin American Relations since 1889*, Robert Holden and Eric Zolov, *Latin America and the United States: A Documentary History*, Walter Lafeber, *Inevitable Revolutions: The United States in Central America*, Alan McPherson, *Intimate Ties, Bitter Struggles: U.S.-Latin American Relations Since 1945*, Lars Schoultz, *Beneath the United States: A History of U.S. Policy Towards Latin America*, Peter H Smith, *Talons of the Eagle: Dynamics of U.S.-Latin American Relations*, Thomas Skidmore and Peter Smith, *Modern Latin America*, and Eduardo Galeano, *Open Veins of Latin America*.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 3000 words) in the LT.

HY240

From Empire to Commonwealth: war, race and imperialism in British History, 1780 to the present day

This information is for the 2015/16 session.

Teacher responsible: Dr Joanna Lewis SAR3.03

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course offers an advanced history of the British Empire that focuses on the metropolitan experience of building, running and then losing an empire. Its primary focus is on Africa. It covers the period from the loss of the American colonies to decolonisation and the survival of the Commonwealth. Within the context of Britain's wider political, social and cultural history, the course will examine the following: the extension of empire during the Victorian era; liberalism and racism; the expansion of colonies of white settlement; the role of missionaries; the scramble for Africa, the impact of empire at home, the running of empire overseas; gender and empire; managing national decline and empire; the contribution of empire to the First and Second World Wars; fast exit strategies; violent decolonisation; race and immigration; post-colonial dictators and the legacy of white settlers. Case studies include Britain and Zimbabwe; Idi Amin and Uganda; and the Mau Mau insurgency.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.

Formative coursework: 2 essays; one mock exam; class presentations.

Indicative reading: John Darwin, *The British Empire Project: The Rise and Fall of the British World System, 1830-1970* (OUP 2010);

C A Bayly, *The Birth of the Modern World, 1780 to 1914* (Blackwell 2004); Ronald Hyam, *Understanding the British Empire* (CUP, 2010); Ronald Hyam, *Britain's Imperial Century, 1815 to 1914* (CUP latest edn); L J Butler, *Britain and Empire: Adjusting to a Post-Imperial World* (I B Tauris, 2007); Sarah Stockwell (ed) *The British Empire: Themes and Perspectives* (Blackwell, 2007); Bernard Porter, *Absent Minded Imperialists: Empire, Society and Culture in Britain* (OUP, 2006) Bill Schwarz, *The White Man's World: Memories of Empire* (OUP, 2012); Peter Clarke, *Hope and Glory: Britain 1900-2000* (CUP, 2004); M W Doyle, *Empires: A Comparative Study* (Cornell University Press: 1986); P D Morgan; S Hawkins (ed) *The Black Experience and the Empire* (OUP, 2004); David Anderson, *Histories of the Hanged: Britain's Dirty War in Kenya and the End of Empire* (CUP 2006); Henry Morton Stanley, *How I found Livingstone* (1872; kindle ebook); Sir F D Lugard, *The Dual Mandate in British Tropical Africa* (1922); Ashley Jackson & David Tomkins, *Illustrating Empire: A Visual History of British Imperialism* (The Bodleian Library, Oxford; 2011); James Belich, *The Settler Revolution and the Rise of the Angloworld* (OUP, 2011).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

What is History? Methods and Debates

This information is for the 2015/16 session.

Teacher responsible: Dr Timothy Hochstrasser E407
Dr Elizabeth Shlala, E306

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: What is history? How and for what purposes do we study the past? What kinds of debates and controversies result from historical study? The purpose of this course is to provide undergraduate students with an introduction to these important issues. We will discuss the history of history from ancient times to the present and how it has changed as an intellectual pursuit over the years. We will think about different types of history – for example, international history, intellectual history, economic history, or the history of religion – and we will discern their different concerns and priorities. We will analyse some of the most important themes in modern historical study: empires and imperialism, revolutions, nationalism. We will outline different ideological frameworks for conducting historical research, for example Marxism, postmodernism, and gender studies. We will debate some of the key philosophical questions surrounding historical research: for example, how historians determine facts, and whether or not historical study can ever be truly objective? Finally, we will look at different ways of presenting the past: from traditional history books to museums and TV history. The course is highly recommended for all those students studying history, especially those completing a history-based dissertation.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Indicative reading: A full reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; L Jordanova, *History in Practice*; R Evans, *In Defence of History*; J Tosh, *The Pursuit of the Past*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY242

The Soviet Union: Domestic, International and Intellectual History

This information is for the 2015/16 session.

Teacher responsible: Dr Natalia Kibita SAR M.13

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will cover the history of the Soviet Union, from its inception as a combination of the Russian Revolution and a Bolshevik dictatorship, through the Stalinist terror and its role as an international centre of the 'socialist camp' during the Cold War, to its eventual, peaceful demise in 1991. Many courses on Soviet history deal separately with politics, social history, foreign policy, and intellectual/cultural developments. This course seeks to connect disparate threads into one historical and analytical narrative by focusing on major issues confronting the interpretation of the Soviet Union and its role in the international history of the twentieth century. The following questions will be examined during this course. Was the Soviet Union a continuation or rejection of its Russian heritage? What were the sources of Soviet legitimacy, modernization, and expansionism? What was Stalinism about? Can Soviet history be better understood as a multinational, imperial, or transnational history? How did the outside world affect Soviet domestic evolution? Why did the militarily successful Soviet state that emerged strongly from the Second World War then collapse so suddenly only a few decades later? Finally, the course will examine the legacy of the Soviet Union and the extent to which there is a Soviet 'path dependency' for today's Russia.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

There will be no classes in 6-week ST

Formative coursework: Students will be required to write two 2,000-word essays (one in MT and one in LT) and make two class presentations (one in MT and one in LT).

Indicative reading: Vladislav Zubok, *A Failed Empire. The Soviet Union in the Cold War from Stalin to Gorbachev* (2007); Vladislav Zubok, *Zhivago's Children: The Last Russian Intelligentsia* (2009); Martin Malia, *The Soviet Tragedy. A History of Socialism in Russia* (Free Press, 1995); Ronald Suny, *The Structure of Soviet History. Essays and Documents* (Oxford, 2002); Terry D. Martin, *The affirmative action empire: nations and nationalism in the Soviet Union 1923-1939* (Ithaca: Cornell University Press, 2001); Sheila Fitzpatrick, *Everyday Stalinism. Ordinary Life in Extraordinary Times* (Oxford, 2000); Jochen Hellbeck, *Revolution on my mind. Writing a Diary under Stalin* (Cambridge, MA: Harvard University Press, 2006); Varlam Shalamov, *Kolyma Tales* (New York : Norton, c1980); Catherine Merridale, *Ivan's War. Life and Death in the Red Army, 1939-1945* (Picador, 2007); Elena Zubkova, *Russia After the War : Hopes, Illusions, and Disappointments, 1945-1957* (E.M.Sharp, 1998); Geoffrey Hosking, *Rulers and Victims: Russians in the Soviet Union* (Belknap, 2006); Yuri Slezkine, *The Jewish Century* (Princeton, 2006); relevant chapters on the Soviet Union and Soviet foreign policy from Melvyn Leffler and Arne Westad, eds, *The Cambridge History of the Cold War* (2010), vols. 1-3; Katerina Clark and Evgeny Dobrenko, with Andrei Artizov and Oleg Naumov, *Soviet Culture and Power. A History in Documents, 1917-1953* (New Haven, Yale University Press, 2007); Yegor Gaidar, *Collapse of an Empire: Lessons for Modern Russia* (Washington, Brookings, 2007).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY243

Islamic Empires, 1400 - 1800

This information is for the 2015/16 session.

Teacher responsible: Dr Gagan D. S. Sood

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Following the Mongol incursions into the Islamic heartlands and India, the Ottoman, Safavid and Mughal empires arose to become among the richest and most powerful regimes known to the early modern world. Supported by an array of provincial and local elites, they were at the height of their powers in the sixteenth and seventeenth centuries, presiding over territories that extended from the Mediterranean to the Bay of Bengal, from Yemen to the Crimea. Their subjects were producers, consumers, importers and exporters of goods critical for global trade; their location accorded them a vital role in the flow of ideas and information; there was a remarkable flowering of the arts in the period; and conversion to the region's dominant religious tradition, Islam, continued apace, forging new frontiers. By the eighteenth century, however, the empires were shadows of their former selves, with power devolved to a variety of successor regimes vying with each other for supremacy. It is this struggle that paved the way for the region's later incorporation into Europe's global empires of modern times, and the emergence of today's Middle East and South Asia.

This course will examine the Ottoman, Safavid and Mughal empires, and the larger world of which they were part, from their origins in the fifteenth and early sixteenth centuries to their 'decline' in the eighteenth century. We will study how temporal authority was expressed symbolically and through governance; the patterns of daily life found in urban and rural settings, and on the frontier; Islam in theory and in reality, and its relationship to the region's other major religious traditions; diplomacy within and without the Islamic world; the new techniques and technologies of warfare; inherited and collective knowledge of other lands, near and far, and the everyday movement of people, goods and news; the signal achievements in the literary, visual and architectural realms; secular changes to the region's societies and economies; early modern millenarianism, fundamentalism and reformism; and the reasons for the eighteenth-century demise of the Ottoman, Safavid and Mughal empires as world powers.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Two 2000-word essays, one in MT and one in LT. Brief oral presentations in class. Short weekly memos/reading responses. One-hour mock exam in ST.

Indicative reading: Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004)

Stephen F. Dale, *The Muslim Empires of the Ottomans, Safavids and Mughals* (Cambridge, 2010)

and connective systems', *Journal of Islamic Studies* 8:2 (1997), 151-184

Gagan D. S. Sood, 'Circulation and exchange in Islamate Eurasia: A regional approach to the early modern world', *Past & Present* 212 (2011), 113-162

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY300

Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Gagan D. S. Sood

Availability: This course is compulsory on the BA in History. This course is available on the BSc in Government and History and BSc in International Relations and History. This course is not available as an outside option nor to General Course students.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by the candidate's supervisor. It is designed to allow a detailed and thorough exploration of a topic of interest to the candidate. The topic should fall within the parameters of the degree course. It should include the examination of primary sources, in printed, manuscript and/or digital form.

Teaching: 2 hours of workshops in the MT. 2 hours of workshops in the LT.

Candidates should secure in the course of the LT of their second year the agreement of a member of academic staff in the Department of International History (who need not be their advisor or tutor) to supervise a suitable topic, and then submit a title to the Undergraduate Programme Administrator by Wednesday of Week 9 of the LT. Supervisors can be expected to offer advice on the scholarly literature, guidance on research and writing, and detailed comments on a sample of up to 1,000 words.

Assessment: Dissertation (100%, 10000 words) in the LT.

The dissertation must be submitted to the Departmental Office by the published deadline in Week 11 of the LT in the student's third year. It should be typewritten. Precise details on length, format, presentation and deadline will be issued by the Department during the LT of the second year of study. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the dissertation is the candidate's own work.

HY311

Limited War During the Cold War Era: The US in Korea (1950-53) and Vietnam (1954-75)

This information is for the 2015/16 session.

Teacher responsible: Prof Steven Casey E311

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based on a variety of primary sources, and a wide range of secondary reading, this course will explore US attitudes and policies towards and during the Korean and Vietnam Wars.

The problems of limited war; the origins of the Korean War; Truman and the decision to intervene; Inchon and the decision to cross the 38th parallel; the Chinese intervention and its consequences; the US home front during the Korean War; the Truman-MacArthur Controversy; Korea and US Cold War strategy: NSC-68, NATO, and 'The Great Debate'; fighting while negotiating, 1951-53; legacies; JFK and Vietnam; LBJ and the decision to escalate; LBJ as Commander in Chief; the war on the ground in Vietnam: 'search and destroy' versus 'hearts and minds'; the Tet Offensive; the media and military at war; the US home front during the Korean

War; Vietnam and US Cold War strategy: détente and triangular diplomacy; fighting while negotiating, 1969-73; legacies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Students are expected to keep up with the readings (documents and secondary literature) for the weekly meetings, and to participate in seminar discussions.

Formative coursework: Students will be required to write two essays and two gobbet exercises during the year.

Indicative reading: A detailed course outline and reading list, as well as handouts, will be available as the start of the course. The following works are recommended: Steven Casey, *Selling the Korean War* (2008); William Stueck, *Rethinking the Korean War* (2002); Burton I. Kaufman, *The Korean War: Challenges in Crisis, Credibility and Command* (1986, or later edition); Rosemary Foot, *The Wrong War: American Policy and the Dimensions of the Korean Conflict, 1950-53* (1985); George Herring, *America's Longest War* (various editions); David L. Anderson, *Shadow on the White House: Presidents and the Vietnam War* (1993); David L. Anderson (ed), *The Columbia History of the Vietnam War* (2011); Robert J. McMahon, *The Limits of Empire: The United States and Southeast Asia since World War II* (1999).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY315

The European Enlightenment, c.1680-1799

This information is for the 2015/16 session.

Teacher responsible: Dr Timothy Hochstrasser SAR 2.14

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The European Enlightenment of the eighteenth century is conventionally taken to be the period in which the disciplines of philosophy, history, economics and anthropology, and other social sciences began to emerge as discrete disciplines independent of state and church control. This course therefore sets out to explore the new ideas generated in these areas as a result of a fresh understanding of man's place in the physical world. But while the course aims to look at ideas and concepts in themselves it is also concerned with the way that they were applied in political practice and adapted to provide new understanding of social structures, or as contemporaries put it, a 'Science of Man'. The chronological context of the Enlightenment is taken to be Europe between the reign of Louis XIV and the end of the Directory in France in 1799. Within this broad framework the following large themes provide the subject matter of both lectures and classes in the Michaelmas Term: the impact of the Scientific Revolution upon institutionalised religion; the emergence of a 'Republic of Letters'; English and French critiques of absolutist monarchy; the creation of scientific approaches to the study of ethics and politics; the political theory of enlightened despotism; the intellectual origins of the French Revolution; intellectual encounters with the New World; the concept of a Counter-Enlightenment; and the move from a private to a public sphere of cultural inquiry. The contributions of Newton, Locke, Voltaire, Montesquieu, and Rousseau - among others - will be highlighted. In the Lent Term the focus will be more narrowly directed to the study of individual key authors and texts and on the impact of enlightened ideas in particular countries, notably England, France, Prussia, Russia and the Habsburg Monarchy. Space will also be found for an examination of the contribution of enlightened thought to the visual arts and music in the 18th century. The course gives students the chance to consider whether or not the Enlightenment was an era of European history that fostered the application of reason to political and social reform, an end to censorship, torture, and hierarchical social models, and a beginning

to religious toleration and recognizably modern concepts of human rights, international law and social equality. The focus throughout will be on the writings of the philosophes themselves and their attempts to convert theoretical innovation into practical reform through the agency of bureaucracy and rulers.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Week 6 of the first term will be a reading week. Week 6 of the second term will contain a mock exam

Formative coursework: Two pieces of formative assessment are required, the first a source-criticism exercise in the Michaelmas Term (week 4), and the second a conventional essay in the Lent Term (week 4). In addition every student MUST give an assessed presentation in either the first or second terms, and there will be a mock-exam in the reading week of the Lent Term.

Indicative reading: A full reading list will be provided at the start of the course. The following represent basic introductory reading only, and an indication of some primary sources: T C W Blanning, *The culture of power and the power of culture* (2002); D Outram, *The Enlightenment* (1995); T Munck, *The Enlightenment* (2000); R Porter, *The Enlightenment* (2001). Anthologies: I Kramnik (Ed), *The Portable Enlightenment Reader* (1995); S Eliot & B Stern (Eds), *The Age of Enlightenment* (2 vols, 1979).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY319 Not available in 2015/16

Napoleon and Europe

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Keenan

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was covered by the Napoleonic Empire and its impact was felt on all of Europe and parts of the non-European world. The course is taught thematically and also by country/geographical area. Themes covered include the impact of the empire on the European international system, as well as on law, constitutionalism, the economy, religion and culture. By studying how Napoleon's empire was created and destroyed, the course will also focus on the nature of power in this era. An attempt will also be made to place the Napoleonic empire in a global context. The impact of the Napoleonic era on the rise of nationalism will be considered as part of the legacy of this period. The course ends with an assessment of the historiography of both the man – the 'Napoleonic myth' – and the period.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Formative coursework: Two conventional essays, one set of gobbet answers and one timed essay.

Indicative reading: A full reading list will be provided at the beginning of the course. Useful introductory reading includes: G. Ellis, *The Napoleonic Empire*; M. Broers, *Europe under Napoleon, 1799-1815*; C. Esdaile, *Napoleon's Wars*; S. J. Woolf, *Napoleon's Integration of Europe*; P. G. Dwyer (Ed), *Napoleon and Europe*; M. Rowe (Ed), *Collaboration and Resistance in Napoleonic Europe*; D. Laven & L. Riall (Eds), *Napoleon's Legacy*; P. Geyl, *Napoleon, For and Against*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY320

The Cold War Endgame

This information is for the 2015/16 session.

Teacher responsible: Dr Brier

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based upon a variety of primary sources, this course will explore why and how in the second half of the 1980s the Cold War confrontation between the United States and the Soviet Union transformed itself so suddenly and peacefully into the collapse of (European) communism, German unification and the end of the USSR and her empire. In doing so, we will ask what was the correlation between "high" and "low politics" in these events and processes? Topics will include: the onset of détente and neue Ostpolitik; the impact of Helsinki (1975) and human rights; détente's death, Euromissiles and the war in Afghanistan; the second Cold War of the early 1980s, pacifism and transatlantic turmoil; the Pope and the Polish crisis of 1980-81; Gorbachev's new thinking and reforms in the USSR; Reagan and Gorbachev: superpower summitry; German unification: domestic and international aspects; Kohl, Mitterrand and the road to the European Union; the eastern European revolutions and the collapse of the Soviet 'empire'; the Baltic independence struggle, Yeltsin, the coup and Soviet disintegration; explanations and interpretations of the end of the Cold War. The discussion in each seminar will draw on a combination of primary and secondary material.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

20 two-hour seminars, a mock exam, and a revision class.

Formative coursework: Students will be required to present one short class paper as well as undertaking small weekly tasks on Moodle, and to submit two essays à 1500 words and one document answer during MT and LT. There will also be a timed mock exam in ST.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, as well as a document pack will be available at the beginning of the course on Moodle. The following works are recommended as essential reading: A Brown, *The Gorbachev Factor* (1996); S Dockrill, *The End of the Cold War Era* (2005); R L Garthoff, *The great transition: American-Soviet relations and the end of the Cold War* (1994); Idem, *Détente and confrontation: American-Soviet relations from Nixon to Reagan* (1985); J Levesque, *The Enigma of 1989: The USSR and the Liberation of Eastern Europe* (1997); C S Maier, *Dissolution: the crisis of Communism and the end of East Germany* (1997); P Zelikow & C Rice, *Germany unified and Europe transformed: a study in statecraft* (1995); H Adomeit, *Imperial overstretch: Germany in Soviet policy from Stalin to Gorbachev* (1998); H Adomeit, *Imperial Overstretch: Germany in Soviet Policy from Stalin to Gorbachev* (1998); A Lieven, *The Baltic states: Latvia, Lithuania and Estonia, and the path to independence* (1993); R Summy & M E Salla (eds), *Why the cold war ended: a range of interpretations* (1995); O A Westad, *Reviewing the Cold War: Approaches, Interpretations, Theory* (2000); Idem, *The fall of detente: Soviet-American relations during the Carter years* (1997); Idem et al (eds), *The Cambridge History of the Cold War*, vols 2-3 (2010); M E Sarotte, 1989 (2009). Also students should familiarise themselves with the Cold War International History Project homepage (<http://www.wilsoncentre.org>) and in particular: Bulletins No 5 'Cold War Crises', No 8-9 'The Cold War in the Third World and the Collapse of Detente in the 1970s', and No 12/13 'The end of the Cold War'.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

HY321

The Struggle for the Persian Gulf, 1945-2003

This information is for the 2015/16 session.

Teacher responsible: Dr Roham Alvandi E310

Availability: This course is available on the BA in History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 30 students.

Course content: This course examines the international history of the Persian Gulf as an ongoing struggle among external powers and local actors for regional supremacy. Through the use of documentary primary sources, the course covers the history of this struggle for mastery in the Gulf in three stages. It begins with the decline of the British Empire and the rise of American power in the Gulf after the Second World War, in the face of Arab and Iranian nationalism. It then examines the long era of intense regional competition for primacy between Iran and Iraq, with particular reference to the Cold War and the 1979 Iranian Revolution. Finally, the course turns to the renewed Anglo-American military intervention in the Gulf since 1991 that continues until today.

As a List B paper, the course makes extensive use of primary sources as part of the weekly reading assignments. These will include government documents, public statements, diaries, and memoirs. These primary sources will all be in English and will all be available on Moodle for students to access. Key topics covered in the course include: nationalism in Mosaddeq's Iran and Qasim's Iraq; the Arab Cold War and the civil war in Yemen; the Cold War politics of reform in Mohammad Reza Shah's Iran and King Faisal's Saudi Arabia; the British withdrawal from the Persian Gulf between 1968 and 1971; Nixon and Kissinger in the Persian Gulf; the secret war between Iran and Iraq in Kurdistan from 1972 to 1975; the rise of OPEC and the 1973/74 energy crisis; the 1979 Iranian Revolution; the Iran-Iraq War of 1980 to 1988; the Persian Gulf War of 1991; the rise and fall of Iranian-American détente under Khatami; Saudi Arabia and the United States before and after 9/11; and the 2003 Anglo-American invasion of Iraq.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.

Formative coursework: Students are required to submit one essay of 2000 words in the MT; one set of gobbet answers during the LT; and one 1-hour timed mock exam in ST.

Indicative reading: Roham Alvandi, Nixon, Kissinger, and the Shah: The United States and Iran in the Cold War (Oxford University Press, 2014); W. Taylor Fain, *American Ascendancy and British Retreat in the Persian Gulf Region* (Palgrave Macmillan, 2008); F. Gregory Gause III, *The International Relations of the Persian Gulf* (Cambridge University Press, 2010); Trita Parsi, *Treacherous Alliance: The Secret Dealings of Israel, Iran, and the U.S.* (Yale University Press, 2007); Charles Tripp, *A History of Iraq*, Third Edition (Cambridge University Press, 2007); Daniel Yergin, *The Prize: The Epic Quest for Oil, Money, and Power* (Simon & Schuster, 1993).

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3000 words) in the LT.

HY322

Nazi Germany and the Second World War – Causes and Course, 1933-1945

This information is for the 2015/16 session.

Teacher responsible: Dr Felix Roemer will be responsible for the course.

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 30 students.

Course content: The Second World War is the most pivotal event of the 20th century. It was the most global war in history and involved almost every country. Although a huge number of nations fought in Europe, Asia and Africa, Nazi Germany was the central actor in WW II. Germany's radical war aims led to an unparalleled war of annihilation which included the Holocaust and the mass killing of millions Soviet POWs and civilians. The military success of Hitler's army in 1940/41 was the precondition for Italy's and also Japan's entry into the war. This course will explore the role of Nazi Germany in WW II in an international context. Starting with an analysis of WW I and its legacy to the International system in general and to Germany in particular, the course will investigate how the three revision powers – Germany, Italy and Japan – destroyed the system of International relations founded in Paris 1919/20 and followed their aggressive foreign policy which finally led to WW II. We will then analyse the character of the war in Poland, in Western Europe and in the Soviet Union with an emphasis on the cultures of violence and the perceptions of the war/holocaust by ordinary Germans. New methodological approaches will be discussed which include the history of mentalities whilst we seek to define the specific character of WW II, also by a comparison of the European and Asian theatres of war. The Grand Strategy of the Allies, the role of economies, the controversial debates about Strategic Air War will lead us finally to the end of the Third Reich in 1944/45.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be required to write two conventional essays of 2000 words and one set of gobbet answers during MT and LT; and one timed mock exam in ST.

HY323

Travel, Pleasure and Politics: The European Grand Tour, 1670-1825

This information is for the 2015/16 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Throughout the eighteenth century thousands of young British men and women embarked on extensive journeys to continental Europe – an activity known as the Grand Tour.

'Travel, Pleasure and Politics: The European Grand Tour 1670-1825' explores who these people were, where they went, and the reasons for their expeditions. For some, the Tour was the final stage of formal education; to others an opportunity for sexual adventures and pleasure-seeking. The course discusses the practical challenges of eighteenth-century travel, the political, religious, and cultural contexts of the Tour, as well as the key places to visit and the reasons for their popularity. It also considers what the Tourists brought back with them: from physical artefacts for public and private collections, to new ways of seeing and understanding the world. 'Travel, Pleasure and Politics' introduces students to the actual writings of the Tourists, showing how they experienced international travel and shaped the modern tourist industry.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT and 2 essays in the MT and LT.

Specifically, the course's formative coursework will consist of two essays (MT and LT), one document analysis (LT). Students will also have an opportunity to sit a mock exam.

HY324

Muslim-Jewish Relations: History and Memory in the Middle East and Europe, 622-1945

This information is for the 2015/16 session.

Teacher responsible: Prof Marc Baer E307

Availability: This course is available on the BA in History, BSc in Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Because of the Israeli-Palestinian conflict, most discussions of Muslim-Jewish relations focus on the period after 1948. Muslims and Jews, however, have engaged with one another for over 1,400 years. Just as at the beginning, when Muhammad first met Jewish Arabs in Medina in 622, Jewish and Muslim relations have spanned the whole range of human interaction. What approaches have historians taken to understand the connected histories of Jews and Muslims in Middle Eastern and European history, from their earliest relations in seventh-century Arabia to mid-twentieth-century Europe? Through attention to historical events and personalities as well to religious texts, language, law, ritual, sacred spaces, intellectual and spiritual movements, art, architecture, and literature we will explore different approaches to the history and memory of Muslim-Jewish relations in the Middle East and Europe, evenly divided between the pre modern and the modern period. Students are advised that this is not a history of the Palestinian-Israeli struggle, although its impact on the memory of Muslim-Jewish relations in history will be discussed.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

20 two-hour seminars in the MT and LT; two revision seminars in the ST. Students will be expected to read essential primary and secondary material for each weekly meeting and to participate in the seminar discussions.

Formative coursework: Students will be expected to produce 1 exercise in the MT and 1 exercise in the LT.

Students will be required to produce two primary document analyses during the year.

Indicative reading: 1. *A History of Jewish-Muslim Relations, From Their Origins to the Present Day*, ed. Abdelwahab Meddeb and Benjamin Stora (Princeton: Princeton University Press, 2013); *Medieval Iberia: Readings from Christian, Jewish, and Muslim Sources*, ed. Olivia Constable, 2nd ed. (Philadelphia: University of Pennsylvania Press, 2011); Norman Stillman, *The Jews of Arab Lands: A History and Source Book* (Philadelphia: The Jewish Publication Society, 1998); Norman Stillman, *The Jews of Arab Lands in Modern Times* (Philadelphia: The Jewish Publication Society, 2003); Marc David Baer, *The Dönme: Jewish Converts, Muslim Revolutionaries, and Secular Turks* (Stanford: Stanford University Press, 2010); Aomar Boum, *Memories of Absence: How Muslims Remember Jews in Morocco* (Stanford: Stanford University Press, 2013)

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

A three-hour unseen written examination in the ST. A mock examination paper will be distributed to students so that they can familiarize themselves with the structure of the examination. The final examination will count for 100% of the final course assessment.

Government and History and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The period between the onset of the Manchurian Crisis of 1931 and the decision of the Wilson Government in 1968 to accelerate the withdrawal from East of Suez saw Britain's position in the world transformed under the multiple pressures of economic decline, world war, nationalist opposition to colonial control, and the demands of Cold War confrontation with the Soviet Union and international communism more generally. This course examines how this change occurred by studying several central episodes in British foreign and defence policy. Its focus is predominantly on high-level policymaking in the diplomatic, military and economic realms, but it will all give attention to shifts in popular attitudes, parliamentary debates, the influence of electoral considerations, and the larger-scale transitions taking place in the international system. In common with other Level 3 courses, it will include study and discussion of primary sources throughout. Documents will be drawn from either published collections, including British Documents on Foreign Policy, 1919-1939, and Documents on British Policy Overseas, 1945-, official publications such as Command papers (including such material as international agreements and Defence White Papers), the diaries of key politicians or officials, and copies of documents from The National Archives at Kew. Much use will be made of online sources. Specific topics include the Italian invasion of Ethiopia; the Munich Agreement of 1938 and appeasement; British strategy in the Second World War; Anglo-Soviet relations in the Second World War; the formation of NATO; the Korean War; the Malayan emergency; Suez crisis; the first application to join the EEC; and the withdrawal from East of Suez in the 1960s.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Students will be expected to read essential primary and secondary material for each weekly class, to deliver presentations, and to participate in seminar discussions.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay and 1 other piece of coursework in the LT.

Formative assessment is by one essay for submission in week 5 of the MT, and one essay for submission in week 5 of the LT (each essay should be a maximum of 2000 words and be drawn from a list supplied at the start of the course). One gobbet exercise will also be conducted in the LT as a form of revision for the final examination.

Indicative reading: Paul W. Doerr, *British Foreign Policy, 1919-1939* (1998)

HY326

Slavery, Capital, and Empire in the British World, 1700-1900

This information is for the 2015/16 session.

Teacher responsible: Dr Padraic Scanlan

Availability: This course is available on the BA in History and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Salim, the narrator of V.S. Naipaul's novel *A Bend in the River*, explains that Europeans, and especially the British, "wanted gold and slaves, like everybody else; but at the same time they wanted statues put up to themselves as people who had done good things for the slaves." Salim's caustic observation summarizes the historical puzzle at the heart of this course. From the late sixteenth century until the early nineteenth century, Britain was one of Europe's most prolific slave-traders. British colonies in the West Indies and the colonies that eventually became the United States of America were among the most brutal and fully realized slave societies in world history. And yet, Britain was also the first major European state voluntarily to abolish its slave trade, and the first to resolve to emancipate its slaves.

Using primary and secondary sources, this course explores the interconnected histories of slavery, commerce, and capitalism in the history of Britain and the British world in the eighteenth and nineteenth centuries. The course explores how the British slave trade functioned both as political economy and as a system of everyday oppression, how it intertwined with trade in other commodities and financial products like bonds and insurance, how Britons profited by it, and how enslaved and free people resisted it. The course interrogates the limits of 'British' history in the context of a global system of trade, and investigates the complicated history of the end of slavery and continuities before and after abolition – what did it mean to be 'free' in the British empire?

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Each seminar is structured around analysis of an historical document, and debate about a problem or theme in the historiography. Students are expected to read essential primary and secondary materials for each meeting and to participate in discussion.

Formative coursework: Students will be expected to produce 2 exercises, 1 essay and 1 presentation in the MT and LT. Students will produce an essay of 1,500 words, and two 250-word analyses of a primary source. Students will also be expected to make a short presentation at the beginning of at least one of the seminars, framing the discussion for their peers.

[DT31 T51; also available online from LSE Library]; Williams, Eric. *Capitalism & Slavery*. Chapel Hill, NC: University of North Carolina Press, 1994. [HT1091 W72].

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (30%, 3000 words) in the LT.

Class participation (10%) and other (10%).

Students will be assessed on their participation in the seminar (10%). Assessed coursework also includes a 500-word analysis of a primary source (10%), a 3,000-word essay (30%) on a topic related to the course, determined in consultation with the course teacher, and a two-hour unseen written examination in Summer Term, consisting of an essay and primary-source analysis exercises (50%).

IR100

Concepts of International Society

This information is for the 2015/16 session.

Teacher responsible: Prof Iver Neumann CLM 6.06

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An examination of the concepts designed to explain the nature of contemporary international relations.

1. The emergence of the discipline and the nature of its subject matter.
2. Key agential concepts in IR: state; empire; international and subnational agents; foreign policy.
3. Key structural concepts in IR: the states system; Euro-centrism, globalisation, post-colonialism; global governance; security.
4. Key institutional concepts in IR: international society; great powers; diplomacy; war; balance of power; international law and human rights.
5. Key sociological concepts in IR: power and sovereignty; intervention; gender; anarchy.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of approximately 1,500 words. They will also be required to give at least one class presentation.

Indicative reading: A full course description and guide to reading will be provided: relevant course texts include J Baylis & S Smith (Eds), *Globalisation and World Politics*, 2nd edn, (Oxford UP, 2001); C Brown, *Understanding International Relations*, 2nd edn (Macmillan, 2001); R Jackson & G Sørensen, *Introduction to International Relations* (OUP, revised edn., 2003).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Sample papers are included in the full course description.

IR200

International Political Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Jillions CLM 5.08

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course consists of a survey, in two parts, of international relations theory. The first part deals with classical theories, the second with modern. It explores and analyses ways of explaining and understanding international relations. The focus is on debates provoked by classical thinkers such as Grotius, Hobbes, Kant and Marx and modern approaches such as realism and constructivism. Topics covered include war, peace, international law and order, international justice, intervention and non-intervention, sovereignty, diplomacy, revolution and counter-revolution, nationalism and national self-determination.

Teaching: 9 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of a maximum length of 1,500 words each to be set and marked by class teachers. They are also expected to give at least one class presentation.

Indicative reading: A F Lang, Jr., *International Political Theory*; C Brown, *Understanding International Relations*; H Bull, *The Anarchical Society*; E H Carr, *The Twenty Years' Crisis*; I Clark, *The Hierarchy of States*; M Donelan, *Elements of International Political Theory*; F H Hinsley, *Power and the Pursuit of Peace*; M Wight, *International Relations: The Three Traditions*; K Hutchings, *International Political Theory*; C Brown, T Nardin & N Rengger, *International Relations in Political Thought*; H Biddel, C Sylvest & P Wilson, *Classics of International Relations*.

A full course guide and reading list, will be available on Moodle at the beginning of the course. This will set out the structure and content of the course and providing detailed guidance on reading, sample examination questions, suggested essay titles, and topics for class discussion.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The examination paper requires that three questions be answered out of twelve.

IR202.2

Contemporary Foreign Policy in Practice

This information is for the 2015/16 session.

Teacher responsible: Prof Chris Alden CLM 5.13

Availability: This course is compulsory on the BSc in International Relations. This course is available on the BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This lecture course is not examinable as a course in itself. It is offered to any interested students on its own or as part of the teaching for the Foreign Policy Analysis I course (IR202.1). It is only available as credit for General Course students as part of IR202 as a whole.

Course content: The foreign policies and foreign policy processes of selected major states since 1945, depending on examination requirements and teachers available. An analysis of the foreign policies of a selected group of major states, with due regard to their respective national interests, external commitments, traditional

values and other relevant factors. The role of internal group interests and electoral considerations. Constitutional machinery for the formulation of foreign policy. Diplomatic services and techniques. Illustrative material will be drawn mainly from the post-1945 period. This year there will be lectures on Britain, China, the United States and the Soviet Union/Russia. Additional country case studies will be included for the remainder of lectures including some or all of the following: Indonesia, Brazil, South Africa, Iran, India and Japan.

Teaching: 15 hours of lectures in the LT.

Indicative reading: Recommended texts include

- (a) The United States: J Ikenberry (Ed), *American Unrivaled: the Future of the Balance of Power* (Ithaca, NY: Cornell UP 2002); N Ferguson, *Colossus: the Price of American Empire* (New York: Penguin 2004); C Kegley & E Wittkopf, *American Foreign Policy: Patterns and Process* (Basingstoke: Macmillan 1996).
- (b) The United Kingdom: M Curtis, *The Ambiguities of Power: British Foreign Policy Since 1945* (London: Zed Press, 1995); J Dumbrell, *A Special Relationship: Anglo-American relations in the Cold War and after*, Palgrave, 2001.
- (c) The Soviet Union/Russia: R Donaldson & J Noguee, *The Foreign Policy of Russia: Changing Systems, Enduring Interests* (London: M E Sharpe, 1998); F Fleron, et al (Eds), *Classic Issues in Soviet Foreign Policy: From Lenin to Brezhnev* (New York, Aldine de Gruyter, 1991); F Fleron, et al (Eds), *Contemporary Issues in Soviet Foreign Policy: From Brezhnev to Gorbachev* (New York, Aldine de Gruyter, 1991).
- (d) China: T W Robinson & D Shambaugh (Eds), *Chinese Foreign Policy: Theory and Practice* (Oxford: Clarendon Press, 1994); S Zhao (Ed), *Chinese Foreign Policy: Pragmatism and Strategic Behavior* (Armonk, NY, M E Sharpe, 2003), David M. Lampton (Ed), *The Making of Chinese Foreign and Security Policy in the Era of Reform* (Stanford UP 2001).

IR202

Foreign Policy Analysis 1

This information is for the 2015/16 session.

Teacher responsible: Prof Chris Alden CLM 5.13

Availability: This course is compulsory on the BSc in International Relations and BSc in Politics and International Relations. This course is available on the BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course analyses various theoretical perspectives on foreign policy, and the means of conduct of the main actors in the international system towards each other. It focuses mainly, but not entirely, on states. Foreign Policy Analysis as a sub-discipline of IR; the problem of formulating goals and choosing policy instruments; the role of leadership and psychological elements in policy making; the rational actor model; bureaucratic politics; the impact of history and identity on foreign policy; domestic sources of foreign policy including public opinion, pressure groups and constitutions; the motivations underpinning foreign policy; the role and influence of transnational actors in relation to foreign policy making; foreign policy crises. The discussion classes combine a discussion of these themes with their application to the foreign policies of major powers in the international system. A detailed programme of lectures will be provided at the start of the session.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of classes in the LT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of about 1,500 words each for their class teachers during the course and to make presentations in the discussion classes.

Indicative reading: C Alden and A Aran, *Foreign Policy Analysis – New Approaches*, Routledge, 2011; C Hill, *The Changing Politics of Foreign Policy*, Palgrave, 2003; S Smith, A Hadfield and T Dunne

(Eds), *Foreign Policies: Theories, Actors and Cases*, Oxford University Press, 2007.

A full list of references will be provided at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR203

International Organisations

This information is for the 2015/16 session.

Teacher responsible: Mr Arthur Kilgore

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have solid foundations in International Relations (including international political theory and international history). Prior or concurrent study of international law, although not a pre-requisite, will be an advantage.

Course content: Major theoretical and empirical aspects of the role of international organizations in international politics, including, inter alia, their impact on the practice of international cooperation and conflict, the maintenance of international peace and security, the management of international economic relations, the promotion of international environmental standards, the prosecution of international crimes, and related matters of concern to international society. International organizations to be discussed range from the League of Nations to the United Nations, from the World Bank to the World Trade Organization, from the European Union to the African Union, and from NATO to the International Criminal Court.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to write three essays of a maximum length of 1,500 words each in addition to at least one presentation (introduction to discussion) given in class. Class teachers will set and mark the essays and provide feedback on student presentations.

Indicative reading: Indicative reading [Please note: 10 titles, only one of which is introductory; the 2009-2010 entry contained 8 titles, most of which were introductory]

Clive Archer, *International Organizations*, Third edition (London: Routledge, 2001); Michael Barnett and Martha Finnemore, *Rules for the World: International Organizations in Global Politics* (Ithaca: Cornell University Press, 2004); Jeffrey T. Checkel, ed., *International Institutions and Socialization in Europe* (Cambridge: Cambridge University Press, 2007); Simon Chesterman, Thomas M. Franck, and David M. Malone, eds., *Law and Practice of the United Nations: Documents and Commentary* (Oxford: Oxford University Press, 2008); Inis Claude, *Swords into Plowshares: The Progress and Problems of International Organization*, Fourth edition (New York: Random House, 1984); Andreas Hasenclever, Peter Mayer, and Volker Rittberger, *Theories of International Regimes* (Cambridge: Cambridge University Press, 1997); Alastair Iain Johnston, *Social States: China in International Institutions, 1980-2000* (Princeton: Princeton University Press, 2007); William A. Schabas, *The UN International Criminal Tribunals: The former Yugoslavia, Rwanda and Sierra Leone* (Cambridge: Cambridge University Press, 2006); Wallace J. Thies, *Why NATO Endures* (Cambridge: Cambridge University Press, 2009); Ngaire Woods, *The Globalizers: The IMF, the World Bank, and Their Borrowers* (Ithaca: Cornell University Press, 2007).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR204 Half Unit

International Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr. Julia Gray, Room CLM 4.10

Availability: This course is available on the BSc in Economics, BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Students from other degree programmes will be admitted by permission of the Course Coordinator, including BSc Economic History

Pre-requisites: It is strongly recommended that students have completed Economics A (EC100) or The Internationalisation of Economic Growth, 1870 to the present day (EH101).

Course content: The course examines the role of power and politics in international economic relations. Besides international structural factors, it emphasises the role of domestic political interests and their influence over foreign economic policies. Major approaches covered include historical views on international political economy, systemic theories of international cooperation, interest groups politics and domestic institutions. The course provides an overview and explanation of the international monetary and trade systems since 1944. It also discusses current debates on regionalism and preferential trade, European monetary integration, the political roots of financial crises, globalisation and the retreat of the state, and environmental protection.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students write one essay of a maximum length of 1,500 words.

Indicative reading: Basic references are: D Baldwin, *Economic Statecraft*; J Frieden & D Lake, *International Political Economy*; T Oatley, *International Political Economy*; J Ravenhill, *Global Political Economy*; S Strange, *States and Markets*; A Walter & G Sen, *Analyzing the Global Political Economy*. A detailed reading list will be given at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

In the examination two questions are chosen from eight.

IR305

Strategic Aspects of International Relations

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Coker CLM 5.09

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also open to General Course students from the other University of London institutions by arrangement with the teacher.

Course content: Analyses various perspectives on strategy and war, the way war is conducted by states and within states and focuses on the way different cultures understand strategic outcomes. The attempt to humanise war; the western way of warfare; non-western ways of war, including Asian/Middle East; asymmetrical warfare; Globalisation and Security; Clausewitz and the western way of warfare; war and the risk society, war in the developing world; war and genocide, terrorism, the 'end of war' thesis. The discussion classes combine a discussion of these topics with their application by states in the international system.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 5 hours of lectures and 9 hours of classes in the LT.

The classes are compulsory. Students will be expected to contribute

to class discussions and present papers each week. Students on this course will have a reading week in Week 6 in line with departmental policy.

Formative coursework: Students will be required to write three essays (c. 1,500 words each) in the course of the year, in MT and LT.

Indicative reading: Daniel Pick, *The War Machine*; Martin van Creveld, *War and Technology*; Charles Gray, *Post-Modern War*; Martin van Creveld, *On Future War*; John Keegan, *A History of Warfare*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR306 Not available in 2015/16

Sovereignty, Rights and Justice: Issues in International Political Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Brown CLM 4.08

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in International Relations and BSc in International Relations and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice. Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the rights of peoples; the ethics of war and violence; the politics of humanitarian intervention (with case studies); justice in classical international thought; global social justice. Further details will be provided at the start of the session.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Formative coursework: Students will write four essays, maximum length of 1,500 words each during the year, and introduce class discussions.

Indicative reading: A detailed list of references will be provided: Widely used books include: C Brown, *Sovereignty, Rights and Justice* (Polity, 2002); Thomas Pogge & Darrel Moellendorf eds. *Global Justice: Seminal Essays* (2008); Michael Walzer *Just and Unjust Wars* (2006).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR308 Not available in 2015/16

Systemic Change in the 20th Century: Theories of the Cold War

This information is for the 2015/16 session.

Teacher responsible: Dr Christopher Kent CLM 4.05

Availability: This course is available on the BSc in International Relations and BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the nature of the Cold War system, the theories of its origins, causes and consequences, its relationship to systemic change and the reasons for its end. The course will provide a general analytical overview of the nature of and debates on the Cold War system and why it has been confused with all aspects of Soviet-American relations between the end of the Second World War and the collapse of the Soviet Union. The nature and significance of the systemic changes which its onset and sudden end produced will be analysed. And from a regional and systemic perspective the course will attempt to provide explanations

of how the Cold War was fought in different time periods and how the goals changed. Emphasis will be given to the changing nature of the relationship between ideology and power politics within the international system and to the differences and links between Cold War and Hot War and their respective requirements. There will be coverage of how domestic aspects of the Cold War, including intelligence, propaganda and culture interacted with regional and international developments, covert operations and psychological warfare. There will be a requirement to study at least one area of the world in more detail and an opportunity briefly to examine the historical characteristics of the Cold War and the international systems which preceded it.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 5 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Formative coursework: Students are expected to write four essays, each of a maximum length of 1,500 words, during the course of the year.

Indicative reading: R L Garthoff, *The Great Transition American-Soviet Relations and the End of the Cold War* (1994); Scott Lucas, *Freedom's War The US Crusade Against the Soviet Union 1945-1956* (1999); W La Feber, *America, Russia and the Cold War 1945-1996* (8th edn, 1997); Richard N Lebow & Thomas Risse-Kappen, *International Relations Theory and the End of the Cold War* (1995); J Young & J Kent, *Global Politics: A History of International Relations since 1945* (2nd edition, 2013); Saki Ruth Dockrill, *The End of the Cold War Era* (2005); Odd Arne Westad, *The Global Cold War: Third World Interventions and the Making of Our Times* (2005); Steven Hurst, *Cold War US Foreign Policy: Key Perspectives* (2005); Kenneth Osgood, *Total Cold War: Eisenhower's Secret Propaganda Battle at Home and Abroad* (2006); Archie Brown, *Seven Years that Changed the World: Perestroika in Perspective* (2007), Vladislav Zubok, *A Failed Empire: The Soviet Union in the Cold War from Stalin to Gorbachev* (2007), Sarah Jane Corke, *US Covert Operations and Cold War Strategy: Truman, Secret Warfare and the CIA 1945-53* (2007), Jonathan Haslam *Russia's Cold War* (2011); Melvyn P. Leffler and Odd Arne Westad (eds.) *The Cambridge History of the Cold War* (2010).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR311 Not available in 2015/16

Europe's Institutional Order

This information is for the 2015/16 session.

Teacher responsible: Prof Karen Smith CLM 4.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: Examination and explanation of the development of Europe's institutional order in the post-war era and its evolution since the end of the Cold War. Analysis of the importance of European organisations for both their member states and international relations in general. Theories of international institutions and regional integration. The importance of international organisations for European states. Development and evolution of European organisations including: the Council of Europe, NATO, the European Union, the Organisation of Security and Cooperation in Europe, Comecon, and the Warsaw Treaty Organisation. Enlargement of European regional organisations.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 9 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students are expected to write three essays of a maximum length of 1,500 words each to be set and marked by the class teachers.

Indicative reading: Useful introductions to the subject include: Clive Archer, *Organizing Western Europe*, 2nd ed. (Edward Arnold, 1994); Stuart Croft et al, *The Enlargement of Europe* (Manchester University Press, 1999); Desmond Dinan, *Ever Closer Union? An Introduction to the European Union*, 4th ed. (Macmillan, 2010); Mette Eilstrup-Sangiovanni, ed., *Debates on European Integration: A Reader* (Palgrave, 2006); Hugh Miall, *Shaping the New Europe* (Pinter, 1993); Peter Stirk & David Weigall, *The Origins and Development of European Integration* (Cassell, 1998); J de Wilde & H Wiberg (Eds), *Organized Anarchy in Europe: The Role of Intergovernmental Organizations* (Tauris, 1996).

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 5000 words) in the LT.

The 5,000 word essay must be submitted by 5p.m. on Monday, 16 March 2015.

IR312 Half Unit Genocide

This information is for the 2015/16 session.

Teacher responsible: Dr Jens Meierhenrich CLM 6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This lecture course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present - and for critically assessing the promise and limits of responding to collective violence.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students are required to research and write two essays (1,500 words each). In order to ensure a broad acquisition of knowledge, students should diversify the subject matter of their essays. In addressing a given essay topic, students must seek to integrate theory and history and bring empirical evidence to bear on the research question they have chosen. In constructing their answers, students may examine a number of cases, drawing comparisons among them, or may focus on a single case. Essays must be fully - and carefully - referenced using one of the major conventions consistently. Submissions are due in Weeks 4 and Week 8 and must be made in hard copy. Feedback is to be sought from class teachers, who are responsible for marking essays.

Indicative reading: Zygmunt Bauman, *Modernity and Holocaust* (Ithaca: Cornell University Press, [1989] 2000). Christopher R. Browning, *The Origins of the Final Solution: The Evolution of Nazi Jewish Policy, September 1939-March 1942*, with contributions by Jürgen Matthäus (London: Heinemann, 2004). Virginia Page Fortna, *Does Peacekeeping Work? Shaping Belligerents' Choices after Civil War* (Princeton: Princeton University Press, 2008). Robert Gellately and Ben Kiernan, eds., *The Specter of Genocide: Mass Murder*

in Historical Perspective (Cambridge: Cambridge University Press, 2003). John Hagan and Wenona Rymond-Richmond, *Darfur and the Crime of Genocide* (Cambridge: Cambridge University Press, 2008). Stathis N. Kalyvas, *The Logic of Violence in Civil War* (Cambridge: Cambridge University Press, 2006). Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR313 Half Unit Managing China's Rise in East Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Jurgen Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: The main focus of this class-based half-course on the contemporary international relations of East Asia is the management of China's rise. The course begins by exploring China's re-emergence as a major regional power, in part by discussing the economic, political and military dimensions of Chinese power, China's evolving identity, as well as the major aspects of its declaratory and substantive foreign and security policy. It also examines from different theoretical and political perspectives the implications that China's rise has been posing for East Asia. As regards the management of China's growing capabilities, status and ambitions, the course explores what political and security strategies vis-à-vis China have in turn been adopted by the key states that are either resident in or have a significant presence in the wider East Asia, such as the United States, Japan, Russia and India. The course also explores the ways in which China's rise has impacted on conflicts in the South China Sea and on the Korean peninsula, and the nature of the management of China's rise by states from continental and maritime Southeast Asia. It moreover examines how regional arrangements and institutional frameworks for dialogue and cooperation led by lesser regional states have served the management of China's rise. Concepts and theories from International Relations will be drawn upon as appropriate.

Teaching: 20 hours of classes in the MT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: William A. Callahan, *China the Pessimist Nation* (Oxford: Oxford University Press, 2010); Bill Emmott, *Rivals: How the Power Struggle between China, India and Japan will Shape our Next Decade* (London: Allen Lane, 2008); Christopher R. Hughes, *Chinese Nationalism in the Global Era* (Abingdon: Routledge, 2006); Alastair Iain Johnston and Robert S. Ross, eds,

Engaging China: The Management of an Emerging Power (London: Routledge, 1999); David C. Kang, *China Rising: Peace, Power, and Order in East Asia* (New York: Columbia University Press, 2007); Rex Li, *A Rising China and Security in East Asia: Identity Construction and Security Discourse* (Abingdon: Routledge, 2009); David Shambaugh, ed., *Power Shift: China and Asia's New Dynamics* (Berkeley: University of California Press, 2005); Robert G. Sutter, *U.S.-Chinese Relations: Perilous Past, Pragmatic Present*, 2nd ed (Rowman & Littlefield, 2013); Michael Yahuda, *Sino-Japanese Relations After the Cold War: Two Tigers Sharing a Mountain* (Abingdon: Routledge, 2013).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR314 Half Unit

Southeast Asia: Intra-regional Politics and Security

This information is for the 2015/16 session.

Teacher responsible: Dr Jurgen Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: This class-based half unit course examines key aspects of the contemporary international relations of Southeast Asia, with the primary focus being on the intramural relations of the member states of the Association of Southeast Asian Nations (ASEAN). In order to contextualise these intramural relations, the course first explores the different domestic political contexts in which Southeast Asian decision-makers operate, the historical backdrop to the region's major intrastate and interstate conflicts and disputes, the key security issues and challenges affecting the region and individual states, as well as the wider geopolitical context. The course also, secondly, engages in a comparative analysis of the foreign and security policies of the five original member states of ASEAN that will, for instance, take account of the influence of geographical factors, the relevance of ethnic politics and nationalism, political change, leadership ambitions, and the main economic and security interests pursued by governments. Finally the course explores how the respective domestic backdrop and foreign policy outlook of Southeast Asian states have shaped the nature, effectiveness and limits of ASEAN as a vehicle for intramural political-security cooperation. In this context, the course assesses the grouping's efforts to establish an ASEAN political-security community. The course will conclude by comparing the role played respectively by the ASEAN states and extra-regional powers in managing regional security and order. Concepts and theories drawn from International Relations, and especially Foreign Policy Analysis, will be applied as appropriate.

Teaching: 20 hours of classes in the LT. 2 hours of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: Beeson, Mark (2009) *Contemporary Southeast Asia*, 2nd ed. (Houndmills, Basingstoke: Palgrave Macmillan); Acharya, Amitav (2014), *Constructing a security community in Southeast Asia: ASEAN and the problem of regional order*, 3rd ed. (Abingdon: Routledge); Hamilton-Hart, Natasha (2012) *Hard Interests, Soft Illusions: Southeast Asia and American Power* (Ithaca: Cornell University Press); Ganesan, N. and Ramses Amer, eds (2010) *International Relations in Southeast Asia: Between Bilateralism and Multilateralism* (Singapore: ISEAS); Leifer, Michael (2000) *Singapore's Foreign Policy: Coping with Vulnerability* (London and New York: Routledge); Saravanamuttu, Johan (2010) *Malaysia's Foreign Policy: The First Fifty Years-Alignment, Neutralism, Islamism* (Singapore: ISEAS); Severino, Rudolfo (2006) *Southeast Asia in Search of an ASEAN Community* (Singapore:

ISEAS); Slater, Dan (2010) *Ordering Power: Contentious Politics and Authoritarian Leviathans in Southeast Asia* (Cambridge: Cambridge University Press); Sukma, Rizal (2003) *Islam in Indonesian Foreign Policy* (London and New York: Routledge); Tan, Andrew T.H., ed., *A Handbook of Terrorism and Insurgency in Southeast Asia* (Cheltenham: Edward Elgar, 2007).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR315 Not available in 2015/16

The Middle East and International Relations Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Katerina Dalacoura CLM 4.11

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

or an equivalent course.

Course content: The course applies the theories and conceptual tools of the discipline of International Relations to the study of the Middle East region. It uses the empirical material offered by the history, politics, political economy and international politics of the region to explore these concepts and theories. More specifically, it concentrates on the areas of foreign policy analysis, international political economy, gender, the study of international norms and conflict and peace studies. It explores the applicability of various International Relations theories (for example, realism and neo-realism; neo-liberalism; constructivism; English School; neo-Marxism and structuralism; and post-colonialism) to the study of the region.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Three essays of 1,500 words each.

Indicative reading: Raymond Hinnebusch, *The International Politics of the Middle East* (Manchester University Press, 2003); Fred Halliday, *The Middle East in International Relations: Power, Politics, and Ideology* (CUP, 2005); Shibley Telhami and Michael Barnett, *Identity and Foreign Policy in the Middle East* (Cornell University Press, 2002); Michael Barnett, *Dialogues in Arab Politics* (Columbia University Press, 1998); Simon Bromley, *Remaking Middle East Politics* (Polity Press, 1994); Baghat Korany and Ali Dessouki, *The Foreign Policies of Arab States* (The American University of Cairo Press, 2008).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

IR317 Half Unit

American Grand Strategy

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Trubowitz CLM 4.05

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course explores American foreign policy at the broadest level of analysis – the level known as grand strategy. The course showcases the main theoretical perspectives that inform the study of grand strategy and applies them to historical and

contemporary cases of American statecraft. In this connection, we will assess the relevance of the U.S. experience for theorizing about power politics and the implications of alternative theories for thinking critically about American international behavior. Emphasis is placed on the debates and controversies that animate the study of grand strategy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One short essay. Short weekly posts on the Moodle course page.

Indicative reading:

- G. John Ikenberry and Peter L. Trubowitz, *American Foreign Policy: Theoretical Essays* (Oxford University Press, 2014)
- John Lewis Gaddis, *Strategies of Containment*, revised edition (Oxford University Press, 2005)
- Colin Dueck, *The Obama Doctrine* (Oxford University Press, 2015).
- Adam Garfinkle, *Broken: American Political Dysfunction and What to Do About It* (American Interest, 2013)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR318 Half Unit

Visual International Politics

This information is for the 2015/16 session.

Teacher responsible: Prof William Callahan CLM 5.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: We live in a visual age. Images play an increasingly important role in shaping international political events and our understanding of them. The objective of this course is to examine how visual sources - maps, photographs, film, television, new media - influence international political phenomena, our perception of them, and public responses to them. The course has conceptual, empirical, and practical objectives. At a conceptual level students will acquire knowledge of key theoretical and methodological debates necessary to study visual international politics. At an empirical level, students will gain a better understanding of several concrete instances where images helped to shape international political phenomena, from wars to humanitarian crises, from global social movements to alternative world orders. At a practical level, students will learn how to make a short documentary film.

Teaching: 7 hours of lectures and 18 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 case study and 1 essay in the LT.

Indicative reading: Campbell, David (2007) 'Geopolitics and Visual Culture: Sighting the Darfur Conflict 2003-05'. *Political Geography* 26(4): 357-382. Der Derian, J. (2009). *Virtuous War: Mapping the Military-Industrial-Media-Entertainment-Network*. New York: Routledge. Evans, Jessica and Stuart Hall, eds. (1999) *Visual Culture: The Reader*. London: Sage. Harley, J.B. (1989) 'Deconstructing the Map', *Cartographica* 26(2): 1-20. MacDonald, Fraser, et al. (2010) *Observant States: Geopolitics and Visual Culture*. London: I.B. Tauris. Mitchell, W.J.T. (1994) *Picture Theory: Essays on Verbal and Visual Representation*. Chicago: University of Chicago Press. Rose, Gillian (2012) *Visual Methodologies: An Introduction to Researching with Visual Materials*. London: Routledge. Shapiro, Michael J. (2011) *Cinematic Geopolitics*. London: Routledge. Thongchai Winichakul (1994) *Siam Mapped: A History of the Geo-body of a Nation*.

Honolulu: University of Hawai'i Press. Weber, Cynthia (2011) *'I am an American': Filming the Fear of Difference*. Chicago: University of Chicago Press.

Assessment: Project (50%) in the LT.

Essay (50%, 2500 words) in the ST.

The project will be a ten minute documentary film, which will be made by groups of 2 or 3 students.

IR319 Half Unit

Empire and Conflict in World Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Tarak Barkawi CLM 4.07

Availability: This course is compulsory on the BSc in International Relations and History. This course is available on the BSc in International Relations and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: Many places and peoples in modern world politics have been shaped by relations and histories of imperialism. Across the social sciences and humanities, as in International Relations, there has been an explosion of interest in empire in recent decades. This course explores the violent dimensions of the imperial past and present. It covers histories and social relations of armed conflict in imperial context from "small war" to "counterinsurgency" and the War on Terror; it looks at the ways in which warfare shapes (and is shaped by) the societies, cultures and polities that populate world politics; and it considers some of the intellectual traditions that have arisen out of the experience of, and inquiry into, colonial violence, from the thought of resistance leaders to subaltern and postcolonial studies. The premise of the course is that warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings.

This course aims to familiarise students with scholarship on empire and conflict in International Relations and related disciplines. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalization in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such "small wars" have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and postcolonialism. The course will introduce students to this work and its applications to understanding world politics.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures

- 1) Introduction: Empire and International Relations
- 2) Empire/History/Globalization
- 3) Empire, the Regions, and World Politics
- 4) Politics/Strategy/War

- 5) War and Society in Global Perspective
- 6) Orientalism and 'Small war'
- 7) Revolutionary Guerrilla War
- 8) Counterinsurgency
- 9) Conflict and Development
- 10) The War on Terror in North/South Perspective

Undergraduate Class Topics

- 1) Globalization and History
- 2) Empire and the Making of Regions
- 3) War and Politics
- 4) War and Society
- 5) Orientalism
- 6) Revolutionary Guerrilla War
- 7) Counterinsurgency
- 8) Case Study: The Wars in Vietnam
- 9) Empire and the War on Terror

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Tarak Barkawi 'Empire and Order in International Relations and Security Studies', in Denmark, Robert A, ed., *The International Studies Encyclopedia*, Blackwell Publishing, Blackwell reference online; *The International Studies Encyclopedia*, Vol. III (Chichester: Wiley-Blackwell, 2010), pp. 1360-1379. (1997[1982]) *Europe and the People Without History*. Berkeley: University of California Press.

Assessment: Essay (100%, 4000 words) in the LT.

IR321 Half Unit**Revolutions and World Politics**

This information is for the 2015/16 session.

Teacher responsible: Dr George Lawson CLM 5.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: Revolutions are often considered to be a 'side order' to the 'main course' of International Relations. But as this course explores, the lack of attention paid to revolutions is a mistake – revolutions have played a major part in the making of modern international order. From the 'Atlantic Revolutions' of the late 18th and early 19th centuries to the 'colour revolutions' of the early 21st century, revolutions have been constitutive of notions of sovereignty, order, justice, and more. Revolutions have also been tightly bound up with dynamics of war and peace. This course explores both the theory and practice of revolutions, teasing out their effects and examining the prospects for revolutionary change in the contemporary world.

List of Topics**Part 1 Thinking about revolutions**

- Week 1 What are revolutions?
- Week 2 Key themes in the study of revolutions
- Week 3 Revolutions and world politics

Part 2 The experience of revolution

- Week 4 The Atlantic 'age of revolutions'
- Week 5 Socialist revolutions
- (Week 6 Reading week – session on the assessed essay)

Week 7 'Third World' revolutions

Week 8 The 'last great revolution'?

Week 9 'Colour' revolutions

Part 3 Revolution today

Week 10 The Arab uprisings

Week 11 Rethinking revolution

Teaching: 10 hours of lectures and 15 hours of classes in the LT.

The main aim of the course is to provide an opportunity for students to make informed judgments about how and in what ways revolutions have impacted on core features of modern international order. Additional aims include assessment of the place of revolution in the contemporary world and, more generally, the ability to connect theoretical arguments about revolutions with the substantive experience of revolutions.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will also submit an outline of their assessed essay during Lent Term.

Indicative reading: Doug McAdam, Sidney Tarrow and Charles Tilly (2001) *Dynamics of Contention* (Cambridge: Cambridge University Press). John Foran (2005) *Taking Power* (Cambridge: Cambridge University Press). John Foran, David Lane and Andreja Zivkovic eds. (2008) *Revolution in the Making of the Modern World* (London: Routledge). Jack Goldstone (2014) *Revolutions: A Very Short Introduction* (Oxford, Oxford University Press). Jeff Goodwin (2001) *No Other Way Out* (Cambridge: Cambridge University Press). Fred Halliday (1999) *Revolutions and World Politics* (London: Palgrave). Charles Kurzman (2008) *Democracy Denied* (Cambridge, MA: Harvard University Press). Daniel Ritter (2015) *Unarmed Revolutions* (Oxford: Oxford University Press). Eric Selbin (2010) *Revolution, Rebellion, Resistance* (London: Zed). Theda Skocpol (1979) *States and Social Revolution* (Cambridge: Cambridge University Press).

Assessment: Essay (80%, 3000 words) in the ST. Presentation (10%) and coursework (10%) in the LT.

IR322 Half Unit**Sovereignty, Rights and Justice: Issues in International Political Theory**

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Brown

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice.

Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the ethics of war and violence; the politics of humanitarian intervention; the politics of international criminal law and the ICC; global social justice. Further details will be provided at the start of the session.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will write two essays, maximum length of 1,500 words, and introduce class discussions.

Indicative reading: A detailed list of references will be provided: Widely used books include: C Brown, *International Society*, Global Polity: An Introduction to International Political Theory (2015), Anthony Lang, *International Political Theory* (2014); Michael Walzer *Just and Unjust Wars* (2015).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR347 Half Unit**Political Economy of International Labour Migration**

This information is for the 2015/16 session.

Teacher responsible: Dr Covadonga Meseguer 95 ALD 1.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The mobility of workers is one of the pillars of globalisation. However and surprisingly, international political economists have paid less attention to the political causes and consequences of international migration in comparison to that paid to other aspects of globalisation such as trade or finance. In this course, we shall employ a political economy perspective to study the historical evolution of migration policy, the relationship between trade and migration, and the political causes and consequences of migration flows. I shall place special emphasis on the study of the political consequences of migration for sending (rather than receiving) countries. We shall also pay attention to an important capital flow associated to international migration: remittances. Rather than focusing on the economic/developmental consequences of remittances, we shall discuss how remittances impact political outcomes as diverse as democratisation, the survival of dictatorships, political clientelism, corruption, political participation, and political accountability.

Week 1. Overview and Introduction

Week 2. Labour Flows and Economic Theory.

Week 3. Causes of International Labour Flows: Economics and Politics.

Week 4. Trade and International Migration in Historical Perspective.

Week 5. The Making of Migration Policy (I): Interests and Institutions.

Week 6. Reading Week

Week 7. The Making of Migration Policy (II): Immigration, the Economy, and Public Opinion.

Week 8. Economic Consequences of International Labour Migration for Sending Countries: Remittances.

Week 9. Political Consequences of International Labour Migration for Sending Countries (I): Autocracies.

Week 10. Political Consequences of International Labour Migration for Sending Countries (II): New Democracies.

Week 11. International Migration and International Cooperation.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT.

Students are expected to write two essays (1500-2000 words) to be handed in Week 7 and Week 11. The second essay can be written as a mock exam answer.

Students are expected to make one class presentation.

Indicative reading: Rosenblum, M and Tichenor, D (eds). 2012. *The Oxford Handbook of the Politics of International Migration*. New York: Oxford University Press. Hatton, T and J. Williamson. 2005. *Global Migration and World Economy. Two Centuries of Policy and Performance*. Cambridge, MA: MIT Press. Moses, J.W. 2011. *Emigration and Political Development*. New York: Cambridge University Press. Kapur, D. 2010. *Diaspora, Development, and Democracy: The Domestic Impact of International Migration from India*. Princeton, NJ: Princeton University Press. Solimano, A. 2010. *International Migration in the Age of Crisis and Globalization*. New York: Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

The paper contains 8 questions, of which two are to be answered.

IR354 Half Unit**Governing International Political Economy: Lessons from the Past for the Future**

This information is for the 2015/16 session.

Teacher responsible: Dr James Morrison 95 ALD 1.14

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Who governs the global economy? How do they do so? And to what ends do they govern it? This course examines these questions by examining the canonical theories of—and state approaches to—the challenges of global economic governance across the last several centuries. While this course takes history seriously, the primary objective is to use the history to tease out generalisable insights into those challenges we face today. More generally, this course of study will demonstrate the incomparable insights historical thinking offers in addressing contemporary challenges. History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.

Proceeding from the seventeenth century to the present, it examines:

- seminal theorists' particular treatments of international political economy

- the ongoing, timeless debate between these theorists

- the major shifts in the global economic order

- the interaction between theories and policy in each shift

The course begins with mercantilism and the 'age of empires.' It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-called 'English' political economy and the 'First Era of Globalisation' in the 19th Century.

The course then pivots to consider two major challenges to this hegemony of thought and practice. First, it traces the development of socialism from an internal critique through the writings of Marx & Engels to an instantiated alternative system in the early Soviet Union. Second, it considers the German Historical School's return to mercantilism—and Europe's concomitant return to imperial rivalry in the early twentieth century.

This brings the course into the interwar period. There, the course considers the battles that raged among liberals in their attempts to resuscitate the classical IPE tradition in the wake of the First World War. It looks at two variants of liberal IPE: progressive and Austrian. This leads to examination of both the ideas and influence of JM Keynes. A selection of Keynes's writings is coupled with analysis of the interwar collapse of IPE that consumed him—and the world. The course then transitions into a discussion of the Anglo-American Postwar Order, of which Keynes was a major architect.

Finally the course turns to the modern era. It examines the evolution of the global trade and monetary regimes. It examines the perspectives and trajectories of both developed and developing countries. It concludes by examining the tension between the apparent ascent of 'neoliberalism' within economic theory alongside critiques from 'non-economic' perspectives: environmental, democratic, and otherwise.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the LT.

Indicative reading: Thomas Munn. *England's Treasure by Foreign Trade*. Adam Smith. *An Inquiry into the Nature and Causes of the Wealth of Nations*. Karl Marx. *Communist Manifesto*. JM Keynes.

General Theory of Employment, Interest, & Money. Barton, et al. The Evolution of the Trade Regime: Politics, Law, and Economics of the GATT and the WTO.

Assessment: Essay (100%, 2000 words) in the LT.

IR355 Half Unit Economic Diplomacy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 613

The course is coordinated by an LSE academic but is supported by an experienced practitioner of economic diplomacy Sir Nicholas Bayne, former UK foreign service and ambassador and Kenneth Heydon (formerly Deputy Director at the OECD in Paris).

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction with each other. It provides students with both academic and practitioner perspectives of economic diplomacy and offers participants an opportunity to understand the challenges faced by negotiators through the simulation of a current multilateral negotiation.

Teaching: 10 hours of lectures, 9 hours of classes and 3 hours of workshops in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Bayne, Nicholas and Woolcock, S. The new economic diplomacy: decision-making and negotiation in international economic relations, Third edition, Ashgate, Stephen 2013. Buelow, A M Culture and Negotiation, 2011 Checkel, Jeffrey Social constructivism in global and European politics: a review essay 2004. Odell, John Negotiating the world economy 2000. Putnam, D Robert Diplomacy and Domestic Politics: the logic of two-level games, 1988. Sebenius, J,K Negotiation Analysis: A characterization and review, 1992.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the LT.

IR367 Half Unit Not available in 2015/16 International Political Economy of the Environment

This information is for the 2015/16 session.

Teacher responsible: Dr Robert Falkner CLM5.05

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: An introduction to concepts and issues in the study of international environmental politics, with special

emphasis on the political economy of environmental protection.

Environmentalism and the greening of international society; ecological perspectives on international political economy; domestic sources of environmental diplomacy; environmental leadership in international negotiations; international environmental regimes and their effectiveness; the role of nonstate actors (business, NGOs, scientists); corporate environmentalism; private environmental governance; trade and environment; international environmental aid; greening foreign direct investment; climate change; ozone layer depletion; biosafety regulation; deforestation.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. 10 lectures and 10 seminars in LT. Topics:

1. Introduction: The rise of global environmentalism in international politics
2. States and foreign environmental policy
3. Nonstate actors (NGOs and business) in global environmental politics
4. International environmental regimes and regime effectiveness
5. International trade and global environmental protection
6. Global finance, aid and sustainable development
7. Multinational corporations and private environmental governance
8. Climate change: international negotiations and multi-level governance
9. Biosafety: science and the politics of precaution
10. Deforestation: non-regimes and private governance

Formative coursework: Students will be expected to produce 2 essays in the LT.

Indicative reading: Andresen, S., E. L. Boasson and G. Hønneland (2012). International Environmental Agreements: An Introduction. London, Routledge. Biermann, F. and P. Pattberg, Eds. (2012). Global Environmental Governance Reconsidered. Cambridge, Mass., MIT Press. Chasek, P. S. and L. M. Wagner (2012). Climate Governance at the Crossroads: Experimenting with a Global Response after Kyoto. New York, Oxford University Press. Young, O. R., L. A. King and H. Schroeder, Eds. (2008). Institutions and Environmental Change: Principal Findings, Applications, and Research Frontiers. Cambridge, MA, MIT Press.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR368 Half Unit The Political Economy of Trade

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: The focus of the course is on explanations of trade policy choices as the result of political and economic factors. The first part of the course covers key models in the economics of international trade, including the New New Trade Theory. The second part of the course addresses political economy theories to explain protectionism and trade liberalisation. Particular attention is devoted to the role of interest groups and domestic political

institutions in trade policy. The third part of the course studies how international regimes (e.g. the WTO and preferential trade agreements) affect trade policy in developed and developing countries. The fourth part of the course focuses on the effect of trade liberalisation in developing economies. This part of the course places emphasis on the relationship between trade, foreign direct investment, and the activities of multinational companies. The last lecture of the course looks at the links between international trade and monetary policy during periods of crises.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy. 10 lectures and 10 seminars in LT. Topics:

1. Macro-economic models: Sector model and factor model
2. Macro-economic models: New Trade Theory and New New Trade Theory
3. Political economy models: The Role of Institutions
4. Political economy models: The Role of Interest Groups
5. From the GATT to the WTO: The multilateral trading system
6. The proliferation of preferential trade agreements: Causes and consequences
7. Trade and development
8. The Politics of FDI in developing countries
9. FDI, inequality, and economic growth in developing countries
10. Trade, exchange rates, and financial crises

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Alfaro, L., Chanda, A., Kalemli-Ozcan, S., and Sayek, S. (2004). Assessment: Exam (100%, duration: 2 hours) in the main exam period.

The final examination lasts 2 hours and students will be asked to answer 2 out of 8 questions.

IR369 Half Unit

Politics of Money in the World Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Jeffrey Chwieroth CLM.5.11

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Economy (IR204).

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students are expected to make presentations on topics of their choice and to write one 2,000-word essay, to be marked by the seminar teacher.

Indicative reading: No one book covers the entire syllabus, but the following general works provide a useful introduction: B Eichengreen, *Globalizing Capital* (2008); A Walter and G Sen, *Analyzing the Global Political Economy* (2009); R Gilpin, *The Political Economy of International Relations* (1987), Chapters 4&8; S Strange, *Mad Money* (1998); J Frieden and D Lake, *International Political Economy: Perspectives on Global Power and Wealth*, section III.C; T Porter, *Globalization and Finance* (2005); D Andrews (ed), *International Monetary Power* (2006).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

IR398

Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Wilson CLM 5.10

Availability: This course is available on the BSc in International Relations and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Course content: Candidates are required to submit a dissertation of up to 10,000 words, excluding bibliography, but including notes and any appendices and tables, by the beginning of May of their final year. The subject of the dissertation can be anything within the syllabus of the undergraduate degree in International Relations at the School. Candidates are required to submit the title of their dissertation for approval by the Course Co-ordinator before the last day of the Michaelmas Term of their third year. They are also required, by the same deadline, to submit to the Course Co-ordinator a brief plan of their proposed study.

Dissertations offer the chance to discover, and deal with, new and interesting material. Students are encouraged to participate in this challenge, which assesses different skills from examinations, and to use the opportunity to enhance their knowledge in an area of particular interest to them. The aim is to develop the ability to make independent judgements and decisions on extracting and analysing the most important and relevant material. The outcome will be the provision of a coherent, sustained, systematically developed, and well supported argument on a topic, predominantly empirical or theoretical, within the field of International Relations. The dissertation may deal entirely with secondary literature. There is no requirement for the use of original material such as unpublished documents, archives, or personal interviews.

The final text should contain a full bibliography of utilised sources. Direct quotations from published or unpublished work must be fully referenced. Standard scholarly practice with regard to referencing the ideas of other scholars should be followed. The completed dissertation must be typed with double spacing on one side of the paper and with a wide left-hand margin. The pages must be numbered consecutively and adequately secured. The first page should bear the full title, the candidate's number (but not name), together with the rubric: 'BSc International Relations 2015/16. Dissertation submitted in partial fulfilment of the requirements of the degree.' All students must add on the cover page of their dissertation a declaration which is required for all work submitted as part of the formal assessment of degrees other than work produced under examination conditions, to the effect that they have read and understood the School's rules on plagiarism and assessment offences at <http://www.lse.ac.uk/resources/calendar/academicRegulations/RegulationsOnAssessmentOffences-Plagiarism.htm> and that the work submitted is their own apart from properly referenced quotations. Further information including detailed information on footnote and referencing style can be found on the IR398 Moodle site.

Teaching: 2 hours of lectures and 1 hour of classes in the MT. 2 hours of lectures and 1 hour of classes in the LT.

There will also be a 1 hour introductory lecture in the Summer Term of the preceding year for all those interested in taking this option. Classes will be held in the groups of three beginning in the middle of Michaelmas Term. In the first class students will present for discussion a general outline of their topic. In the second class students will present a more advanced report on their progress.

Advice and Assistance

The dissertation is unsupervised and must be entirely the candidate's own work. In no circumstances are teachers within the School or the wider university community, permitted to read or comment upon a draft of the dissertation or any part thereof. This does not mean, however, that students will be without guidance. The Course

Co-ordinator will provide guidance on the nature and process of writing a dissertation in the field of International Relations. He will also provide bibliographical guidance, and will be available for consultation throughout the year to help students address more specific problems as and when they arise. Students are encouraged to approach other teachers within the department for bibliographic and general guidance on topics falling within that teacher's particular field of expertise. Students will have ample opportunity to discuss aspects of their topic, general and particular, with fellow students and the Course Co-ordinator throughout the year.

Assessment: Dissertation (100%, 10000 words) in the LT. Examiners of the dissertation look for a variety of skills and qualities such as: conceptual precision, skill in analysis, organisation of material, clarity of exposition, and capacity for logical reasoning. Examiners also attach weight to accuracy in English spelling, grammar, and punctuation. Candidates should ensure that their submitted dissertation does not exceed the word limit. A penalty will be deducted from the given mark for any dissertation that exceeds 10,000 words. The penalty will be a deduction of 5 points for each 500 words above the word limit (i.e. a 5 point reduction from 10,001 words; a further 5 points from 10,501, etc.). Dissertations over 12,000 words will automatically fail. There is no lower word limit, but students should be aware that it is very difficult to produce a sustained argument to the required standard in less than 8,000 words. For further details, please see the IR 398 Moodle site.

The dissertation must be handed in to room CLM 6.11 by 5 pm on Tuesday 3 May 2016.

Penalties for the late submission of course work.

- (i) Where a course includes course work as part of its assessment, the LSE requires that all students must be given clear written instructions on what is required and the deadline for its submission;
- (ii) if a student believes that s/he has good cause not to meet the deadline (e.g. illness), s/he should first discuss the matter with his/her academic advisor or Course Coordinator and seek a formal extension from the Chair of the Examination Sub-Board. Normally extensions will only be granted where there is a good reason backed by supporting evidence (e.g. medical certificate);
- (iii) if a student misses the deadline for submission but believes that s/he has good cause which could not have been alerted in advance s/he should first discuss the matter with his/her academic adviser or the Course Coordinator and seek a formal extension;
- (iv) any extension should be confirmed in writing to the student;
- (v) if a student fails to submit by the set deadline (or the extended deadline as appropriate) the following penalty will apply: Five marks out of 100 will be deducted for a Dissertation submitted within 24 hours of the deadline and a further five marks will be deducted for each subsequent 24-hour period (working days only) until the Dissertation is submitted.

LL104

Law of Obligations

This information is for the 2015/16 session.

Teacher responsible:

Dr Charlie Webb, NAB6.26

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Introduction to the law of contract, including formation of contracts, express and implied terms, misrepresentation, exclusion clauses, remedies for breach of contract. Introduction to the principles of the law of restitution. Introduction to the law of torts: negligence and other specific torts, causation, defences, remedies for torts.

Teaching: 18 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 4 hours of lectures and 2 hours of classes in the ST.

The lectures will be given by a number of different teachers. The basic work is done through the classes, and the lectures are designed to introduce the topics on the syllabus.

Formative coursework: Students will be expected to produce 4 essays in the MT and LT.

Assignments will be set, marked and returned by each class teacher.

Indicative reading: A general reading list will be issued at the commencement of each term. Students should follow the advice of their class teachers as to the textbooks to be read.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL105 Half Unit Property I

This information is for the 2015/16 session.

Teacher responsible: Prof Robert Pottage

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim is to introduce students to the role of property concepts in legal and social thought. Particular attention is paid to the context, development and function of property forms in contemporary legal systems. The course encompasses a broad range of established and emergent property forms, ranging from questions of copyright and share ownership to aspects of real property. Extensive use will be made of historical and other general commentaries on the question of property.

Teaching: 20 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Murphy & Roberts, *Understanding Property Law*; Ryan, *Property and Political Theory*; Rifkin, *The Age of Access*.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL106 Public Law

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Loughlin NAB 7.12

Additional Teachers: Dr Jo Murkens, Dr Thomas Poole, Professor Conor Gearty

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course covers: the conceptual framework of public law; central government and the executive; parliament; multi-layered government (the European Union, devolution and local government); judicial review; and civil liberties and human rights.

Teaching: 20 hours of lectures and 18 hours of classes in the MT. 20 hours of lectures and 20 hours of classes in the LT. 2 hours of lectures and 3 hours of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Other assignments will be set by the class tutor, as required.

Indicative reading: Basic texts: Martin Loughlin, *The British Constitution: A Very Short Introduction* (Oxford: Oxford University Press, 2013); A. Le Sueur, M. Sunkin & J. Murkens, *Public Law: Text, Cases, and Materials* (Oxford: Oxford University Press, 2nd edn, 2013); A.W. Bradley & K.D. Ewing, *Constitutional and Administrative Law* (London: Pearson, 15th edn., 2010).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL108 Criminal Law

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Ramsay

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the 'general part' of criminal law and selected areas of the special part of criminal law in the context of theories of the aims and functions of criminalisation. The course will discuss the limits to criminalization; the conceptual framework of criminal liability (conduct, responsibility, capacity, defences); criminal law's construction and regulation of interests in property (with particular reference to the offences of theft and fraud); attempts; 'pre-inchoate' offences; regulatory offences (with special reference to drugs); homicide; sexual offences; non-fatal violence against the person; secondary participation in crime.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 3 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

This will be set by the teacher in charge of the class. A minimum of two pieces of written work will be required, usually one essay and one problem.

Indicative reading: A detailed reading list will be distributed at the start of the course (for the current list, see the public folders).

A number of criminal law textbooks are available, and students will be expected to read the relevant parts of the most recent editions of one of these, e.g. Nicola Lacey, Oliver Quick & Celia Wells, *Reconstructing Criminal Law*; Andrew Ashworth and Jeremy Horder, *Principles of Criminal Law*; Jonathan Herring, *Criminal Law: Text, Cases and Materials*; M. Allen, *Introduction to Criminal Law*. They will also be expected to read all cases and materials marked as primary on the detailed reading lists provided.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL109 Half Unit Introduction to the Legal System

This information is for the 2015/16 session.

Teacher responsible: Dr Meredith Rossner and Ms Insa Koch

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Outline:

The course is designed as a foundation course to familiarize law students with the basic characteristics and functioning of legal systems.

The course will include:

1. What is law?
2. Legal pluralism
3. The trial and adjudication
4. The Legal profession
5. Lay participation in justice
6. Reading Law: Statutory interpretation
7. Reading Law: Common law and judicial precedent
8. Reading Law: Persuasive Authority
9. Reading Law: The Civil Law tradition
10. Alternative dispute resolution
11. Access to justice

Teaching: 20 hours of lectures and 9 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: This is a Moodle course, with the course

materials, lecture outlines, class reading and suggestions for further reading set out through links to relevant sites. The main background book for the course is Carl F Stychin and Linda Mulcahy (eds), *Legal Methods and Systems: Text and Materials*, 4th ed (2010) Thomson (Sweet and Maxwell).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL201

Administrative Law

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Poole NAB7.19

Additional Teachers: Professor Carol Harlow

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Outline:

Administrative Law is a vital subject throughout the modern world. An understanding of the role which it plays is essential to private practitioners. Commercial lawyers frequently come into contact with regulatory agencies whose special procedures derive from administrative law. Dealings with international agencies (including the European Union) are often governed by administrative law. Public law expertise opens the way to good careers in government service. There is a flourishing Administrative Law Bar, reflected in well-established sets of chambers.

The course aims to reflect the wider dimensions of administrative law, stressing links with public administration, commerce and politics. We emphasise the functions of law in the administrative process and the constitutional role of judicial review. We also aim to show how membership of the European Union and adherence to the European Convention on Human Rights has influenced our system of public law. We look at the way in which changed systems of governance, especially the rapid growth of regulatory agencies, can be reflected in and controlled by traditional rules of administrative law. We consider alternative dispute resolution, including public inquiries or the Citizens' Charter. In addition to compulsory essays there are opportunities for presentation of papers.

Syllabus:

Theories of administrative law. Decision-making and the administrative process: rules and discretion. The 'contracting state': administrative law and new public management. Risk and the regulatory state (including responses to the financial crisis of 2008-9). The changing nature of judicial review. Judicial review and the Human Rights Act. The role of public inquiries. European influences on national administrative law. 'Global administrative law'. The Ombudsman and complaints.

Teaching: 18 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Main texts: C. Harlow & R. Rawlings, *Law and Administration* (3rd ed., 2009); P. Cane, *An Introduction to Administrative Law* (2004); M. Taggart (ed.), *The Province of Administrative Law* (1997); N. Bamforth and P. Leyland (eds.), *Public Law in a Multi-Layered Constitution* (2003).

Assessment: Exam (67%, duration: 3 hours) in the main exam period.

Essay (33%, 4000 words) in the ST.

LL202

Commercial Contracts

This information is for the 2015/16 session.

Teacher responsible: Dr Solene Rowan NAB 7.26

Additional Teachers: Professor Michael Bridge, Dr Jo Braithwaite, Mr Andrew Dyson, Professor Michael Lobban, Dr Paul MacMahon

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Completion of LL104 - Law of Obligations is normally a prerequisite.

Course content: Objectives:

LL202 Commercial Contracts comprises a study of the general principles of English law governing commercial contracts. Its examination of this subject-matter divides into two parts. Part 1, 'Fundamentals of Commercial Contracting' examines several important aspects of, or themes in, the law's regulation of commercial contracting. The topics are chosen because of their intrinsic interest, and because of the opportunity offered for an advanced contextualised examination of contract law fundamentals. Part 1 therefore explores the process of commercial contracting; long-term relationships; multi-party transactions; agreed remedies; and alternative dispute resolution. Part 2, 'Fundamentals of Commercial Law' examines core topics in commercial law. It begins by examining the sale of goods contract, before proceeding to examine several important allied topics: money, payment and payment methods; credit, security and reservation of title; agency; and assignment.

Topics are likely to include:

1. Aspects of commercial contracting:
Freedom of contract and its restrictions
Agreed remedies
Interpretation of contracts
Pre-contractual duties and good faith
Privity of contract; multi-party transactions
Problems arising out of long-term contracts
Arbitration and international contracting
2. Aspects of commercial law:
Contracts for the sale of goods
Credit and security

Agency

Assignment

Banking law: money, payment and payment methods

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 4 hours of lectures and 2 hours of classes in the ST.

Formative coursework: Two formative essays per term.

Indicative reading: The principal textbooks for the course are:

Chen-Wishart, *Contract Law*, 4th edn (OUP 2012)
McKendrick, *Goode on Commercial Law*, 4th edn (Penguin 2010)
Beale, Bishop and Furmston, *Contract: Cases and Materials*, 5th edn (OUP 2007)

Sealy and Hooley, *Commercial Law: Text, Cases and Materials*, 4th edn (OUP 2008)

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL203

Law of Business Associations

This information is for the 2015/16 session.

Teacher responsible: Dr Eva Micheler NAB7.35

Additional Teachers: Professor David Kershaw and Mr Leslie Kosmin, QC.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations

permit and to General Course students.

Experience suggests that third year students are more successful.

Pre-requisites: It is helpful to have studied or be studying Property II, although this is not a formal pre-requisite.

Course content: Outline:

This course examines the nature of the legal vehicles available for the carrying on of entrepreneurial activities, paying particular attention to the analysis of companies. It examines the core features of the company. These are: separate legal personality, limited liability, centralised management, the allocation of control rights, and free transferability of shares. The course analyses how the law implements these features and the policy trade-offs among them. The course discusses the relationship between various groups with an interest in the affairs of the company – shareholders, directors, managers, financiers, trade creditors, employees, consumers and regulators – and the balance of power between them. The course looks beyond purely technical legal issues and encourages a critical examination of the system and proposals for reform.

Registered companies are creatures of statute and close attention to the Companies Acts and related legislation is essential. However, no attempt is made to deal with all, or even most, of the complex technical aspects of the legislation and non-statutory regulation. The course concentrates on the problems and policies underlying the legislation, with some more detailed consideration of selected provisions. The increasing influence of European Directives and Regulations on UK company law is also reflected.

Despite the importance of statute, common law and equitable principles have played a major role in the development of company law by the courts. This has relied heavily on principles of agency and the equitable principles relating to fiduciaries. Case analysis is therefore a major element of the course. Excellent case books are available.

This subject covers a wide range of businesses – from the one-person firm (the local greengrocer or plumber) to family companies, to major multinational groups listed on the Stock Exchange. This wide coverage plus the policy emphasis means that this course should appeal to all students with an interest in the economic, social and political aspects of business organisations and not only to those wishing to practise commercial law.

Topics usually covered are:

- Introductory concepts and themes including limited liability and corporate personality.
- Capacity of companies & the powers of individuals acting for companies.
- Shares and share capital.
- Directors: powers, duties and corporate governance issues.
- The role of shareholders in companies: rights, decision-making and governance.

Teaching: 20 hours of lectures and 8 hours of seminars in the MT. 20 hours of lectures and 14 hours of seminars in the LT. 4 hours of seminars in the ST.

Lectures are accompanied by fortnightly two-hour seminars, which follow the lectures closely. Reading lists provided by the lecturer in each topic are used as the basis for seminar work.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Gower and Davies, *Principles of Modern Company Law* (9th edn, 2012); David Kershaw, *Company Law in Context* (2nd edn, 2012); Sealy and Worthington, *Cases and Material on Company Law* (10th edn, 2012)

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL204

Advanced Torts

This information is for the 2015/16 session.

Teacher responsible: Miss Helen Reece NAB6.24

Additional Teachers: Dr Emmanuel Voyiakis and Dr Charlie Webb.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Law of Obligations (LL104).

Course content: Our course aims to broaden and deepen your knowledge of tort law in two ways. First, it looks at a range of important torts that are not covered in the Law of Obligations course. Second, it tackles the 'big' theoretical questions of tort law. On finishing the course, you will not only have gained a better understanding of the rules and principles that govern specific torts, but you will also be able to engage critically with different views about the overall purpose and the moral and social function of tort law.

Here are some topics we usually cover:

- (1) Theories of tort law: what is the aim of tort law and do judges need a theory of it?
- (2) Tort law and the 'compensation culture'
- (3) Tort law, moral responsibility and luck
- (4) Negligence focus: the position of public authorities; negligent endangerment
- (5) Wrongful life and wrongful birth
- (6) Interference with the person: assault; battery; harassment; the Wilkinson v Downton tort
- (7) Problems of causation: loss of chance
- (8) Illegality
- (9) Strict liability regimes: vicarious liability; liability for ultra-hazardous activities; liability for defective products; the justification of strict liability.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Indicative reading: Introductory Texts: John G. Fleming, *An Introduction to the Law of Torts* (2nd ed., 1985); Carol Harlow, *Understanding Tort Law* (3rd ed., 2005). General Texts: W V H Rogers, Winfield & Jolowicz on Tort (18th ed., 2010); N J McBride & R Bagshaw, *Tort Law* (4th ed., 2012); B A Hepple, D Howarth & M H Matthews, *Tort: Cases and Materials* (6th ed., 2008); S Deakin, A Johnston & B Markesinis, *Markesinis and Deakin's Tort Law* (7th ed, 2012); P Cane, *Atiyah's Accidents, Compensation and the Law* (7th ed., 2006). Advanced/Specialised Texts: Robert Stevens, *Torts and Rights* (2007); Jules Coleman, *Risks and Wrongs* (2002); Guido Calabresi, *The Cost of Accidents: A Legal and Economic Analysis* (1970); David Owen (ed.), *Philosophical Foundations of Tort Law* (1997); Harvey Teff, *Causing Psychiatric and Emotional Harm: Reshaping the Boundaries of Legal Liability* (2008); Nicolette Priaux, *The Harm Paradox: Tort Law and the Unwanted Child in an Era of Choice* (2007). If all goes according to plan, the degree of depth we will attain in the course and the focused nature of our reading lists for each topic will make textbooks redundant, or at least useful only as a basic introduction to the issues we will be covering. This means that the tort textbook you may have purchased for the LL104 Law of Obligations course will probably be good enough for the latter purpose. Here are some other introductory or general texts that you might like to consult from time to time, just to get a different perspective on things, and some more advanced or specialised books from which we will be setting reading for certain topics.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL205**Medical Law**

This information is for the 2015/16 session.

Teacher responsible: Dr Julie Mccandless NAB 6.07

Additional Teachers:

Mr Antony Blackburn-Starza, Ms Cressida Auckland

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Medical law is a rapidly developing and increasingly important subject. The rationing of expensive new drugs, and the future of the NHS have become central political issues. New scientific developments, such as cloning, face transplants, stem cell research and direct-to-consumer genetic testing, are invariably accompanied by demands for their regulation. In this course we examine the legal framework within which health services are provided, and we explore some of the difficult ethical dilemmas that arise when determining the limits of medical innovation.

Subjects include malpractice litigation; consent; capacity; confidentiality; research on human subjects; resource allocation; abortion; surrogacy; assisted conception; 'designer babies'; embryo and stem cell research; cloning; mental health law; organ transplantation and assisted dying.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Jackson, Medical Law: Text, Cases and Materials 3rd edition (Oxford UP, 2013).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL207**Civil Liberties and Human Rights**

This information is for the 2015/16 session.

Teacher responsible: Dr Kai Moller NAB 7.01

Additional Teachers: Dr Thomas Poole, Dr Peter Ramsay.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 50.

Course content: The course provides a challenging introduction to human rights law. The first term focuses on the European Convention on Human Rights with an in-depth analysis of the case law on several important rights, including but not limited to freedom of expression, freedom of association, freedom of religion, the right to respect for private life, and freedom from torture and inhuman or degrading treatment or punishment. The second term deals with the UK Human Rights Act and builds not only on the first term's work but also on the knowledge that students have acquired in Public Law in year one. Thus, students must engage with the law of two legal systems here: the European Convention on Human Rights and U.K. law.

The course takes a highly analytical approach; it will not be sufficient to approach the issues in a descriptive, "black letter" way. Rather, an overall aim is to enable students to critically assess the European Court's and the U.K. Supreme Court's arguments about the compatibility of a policy or administrative decision with human rights and the particularities of human rights adjudication within the U.K. legal system. To this end, the course will focus on the necessary doctrinal and conceptual framework – such as positive obligations, the margin of appreciation and proportionality –, an overview of the relevant case law, and in-depth analysis of selected problems in

human rights law.

This course does not touch upon strategic or policy issues (such as the most effective ways to promote human rights, NGO practices, etc.); rather it focuses on the controversial and often difficult moral and political issues that arise in human rights adjudication and on unravelling the implications of the unusual (some would say idiosyncratic) way in which U.K. law has incorporated the ECHR. Regard will however be had to the current argument over whether or not the Act should be repealed.

The teaching of this course is mainly case-based. To complete it successfully, students must prepare for each seminar by reading and thinking through the relevant cases; the seminars will be conducted on the basis of the expectation that the students are familiar with the materials. There is no comprehensive textbook available for this course.

Syllabus: The history of human rights protection in the UK; theoretical aspects of human rights; the Human Rights Act 1998; human rights and parliamentary sovereignty; human rights and standards of review; human rights and the common law; precedent and human rights law. The rights to life and freedom from torture; freedom of expression; freedom of association and 'militant democracy'; freedom of religion; the right to respect for private and family life. Mental health and human rights. Terrorism, security and states of emergency; 'social learning'. Anomalous zones.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: For European Convention law there exists no textbook which deals with the issues in adequate depth, but interested students may want to take a look at Harris, O'Boyle and Warbrick, Law of the European Convention on Human Rights 3rd edn (OUP, 2014) for an overview. For the more theoretical aspects of the course, see K. Möller's The Global Model of Constitutional Rights (OUP 2012; paperback edition 2015). For the second term, representative works include Conor Gearty, Civil Liberties (OUP, 2007), Tom Hickman, Public Law after the Human Rights Act (Hart, 2010) and Aileen Kavanagh, Constitutional Review under the UK Human Rights Act (CUP, 2009). Updates

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL209**Commercial and Enterprise Law**

This information is for the 2015/16 session.

Teacher responsible: Dr Ewan McGaughey

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Commercial and Enterprise Law introduces the basic institutions of the market economy, and the governance of enterprise, in a post-financial crisis world: the law of contract, companies, labour and insolvency. It is the LSE's oldest course (since 1895, originally named 'Commercial and Industrial Law') and probably the first in the world to teach labour law. Over the years it has attracted enquiring students from non-law departments, a number of whom became Nobel laureates.

Michelman term is the law of contract. We examine how agreements become legally binding, the regulation of unfair terms and basic consumer protection laws. We see how a contract may be cancelled when fully informed and true consent is not present, including through misrepresentation or coercion, and examine remedies for breach of contract.

Lent term examines enterprise governance: introducing companies, labour relations and insolvency law. How are company directors

accountable to shareholders, employees and other stakeholders? Which fiduciary duties and duties of care do directors owe a company? What voice does labour have in corporate governance? Should banks acquire privileges through securitised lending over other creditors? How will a corporate insolvency be administered, and the losses distributed? Finally, how can directors and shareholders be held to account after insolvency? The aim is to understand the operation of the basic institutions in the market segment of the economy.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Core texts:

E McKendrick, *Contract Law* (11th edn 2015)

A Dignam and J Lowry, *Company Law* (8th edn 2014)

A Burrows, *A Casebook on Contract* (4th edn 2013)

L Sealy and S Worthington, *Cases and Material in Company Law* (10th edn 2013)

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL210

Information Technology and the Law

This information is for the 2015/16 session.

Teacher responsible: Professor Andrew Murray NAB 7.11

Dr. Orla Lynskey NAB 6.23

Availability:

This course is available to LLB and Law and Anthropology students. It is also available as an outside option to students in other departments and to General Course Students. Students from other Universities should contact the course convenor regarding participation in this course.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This survey course, which is divided into six modules, introduces students to a selection of fundamental legal issues in the field of Information Technology (IT) Law. It begins by examining ongoing debates regarding the appropriate theoretical framework applicable to internet regulation and governance, tackling questions such as whether the internet should be controlled and, if so, by whom. It then examines substantive legal topics, such as data protection, cybercrime, intellectual property and online freedom of expression, against this theoretical backdrop. In particular, students are encouraged to consider both how the law has responded to the challenges of information technologies, and the extent to which legal issues have shaped the development of information society policy.

The focus will be initially on English law, although the increasingly global nature of IT law means that there are already strong EU and US legal influences upon the English system, so comparative aspects will be introduced in places, and readings will include materials drawn from, amongst others, US law journals.

At the end of the course, students should be able to assess critically ongoing developments in law relating to information technologies and to evaluate the internal coherence of these developments and their doctrinal and political implications.

Indicative Content:

Michaelmas 2015

- Introduction to Internet Regulation and Governance
- Data Protection and Online Surveillance
- Freedom of Expression Online

Lent 2016

- Cybercrime

- E-Commerce
- Intellectual Property Rights Online

For a more detailed outline, please visit the course Moodle page.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: **Murray: Information Technology Law: Law and Society 2nd ed, 2013, OUP. Reed (ed): Computer Law 7th ed., 2011, OUP. Klang & Murray (eds) Human Rights in the Digital Age, 2006, Cavendish. Lessig: Code and Other Laws of Cyberspace ver.2.0, 2006, Basic Books. Edwards & Waelde (eds): Law and the Internet 3rd ed, 2009, Hart.

** Recommended for purchase.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL212

Conflict of Laws

This information is for the 2015/16 session.

Teacher responsible: Dr Jacobus Bornhoff NAB6.09

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: A good knowledge of law is required. The majority of students taking this course tend to be in their third year. That said, many second year students have done very well on this course over the past years.

Course content: Conflict of laws - also known as private international law - is the area of law concerned with cases in which the facts present one or more international elements. The field's three main questions are (1) jurisdiction (will an English court or a foreign court hear a case?), (2) choice of law (should the court apply its own law or that of a foreign country?), (3) the recognition and enforcement of foreign judgements. During the course, these three questions will frame reflection on a range of topics, including commercial/practical issues (e.g. how can companies structure their cross-border transactions), but also questions of a more political nature (e.g. to what extent should States be able to regulate matters beyond their own borders?) or with a strong social/cultural dimension (e.g. how should foreign cultural understandings of justice be accommodated in domestic law?). Because of the growing role of the European Union in this area, the interaction between English and European approaches to conflict of laws issues will be an important running theme throughout the course.

Syllabus

-Jurisdiction: Brussels I Regulation 2012; English traditional rules; Comparative case studies (US and Canadian law); Choice of court agreements; Anti-suit injunctions.

-Choice of law: Contract and Tort (Rome I and Rome II Regulations); Comparative case studies; Public policy; Foreign illegality; Overriding mandatory rules.

-Foreign judgments: Brussels I Regulation 2012; English traditional rules; Comparative case studies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Students will be provided with a Course Reader, which is posted on Moodle in instalments throughout the year. The following texts may serve as sources of reference throughout the course: Jonathan Hill & Adeline Chong, International Commercial Disputes (Hart Publishing); Trevor Hartley, International Commercial Litigation (CUP); Peter North & James Fawcett, Cheshire & North's Private International Law (OUP); Adrian Briggs, The Conflict of Laws (OUP). Always make sure you have the

most recent edition.

Resources: www.conflictoflaws.net (Topical references, cases and reviews).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL221

Family Law

This information is for the 2015/16 session.

Teacher responsible: Miss Helen Reece (MT) NAB 6.24 and Dr Julie Mccandless (LT) NAB 6.07

Additional Teacher(s): Ms Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This is an exciting time to study Family Law! Maybe more than ever before, the family is in flux. With marriage rates tumbling, divorce rates escalating and reproductive technologies becoming normalised, record numbers of children are living outside the traditional nuclear family of their biological married mum and dad (the heteronormative family). What's more, after centuries of exclusion, lesbians and gay men are on the brink of entering into the most sanctioned relationship of all – marriage. Is the traditional family dead, has it changed beyond all recognition, or is the family functioning much as it always has done? How does the law respond to the modern family, and how should the modern family be regulated? If you want to chew over these and a host of other fascinating questions, Family Law is the course for you.

Term 1: Adult Relations: 1. Introductory concepts: (a) Intervention in the family; (b) Discrimination against families, in the context of human rights legislation. 2. Marriage and Civil Partnerships: (a) the distinction; (b) Gender Recognition Act; (c) nullity. 3. Divorce and Dissolution 4. Financial provision: (a) conceptions of equality; (b) the legal framework for discretion. 5. Domestic violence: the legal framework, and the limits of legislation.

Term 2: Child Law: 1. Introductory concepts: (a) children's welfare; (b) the welfare checklist; (c) legal parenthood; (d) parental responsibility: meaning and allocation. 2. Children and families: (a) legal framework; (b) regulation after relationship breakdown. 3. Children and the state: (a) care and supervision; (b) child abuse.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Students are provided with a detailed syllabus and reading list for class topics. Basic reading for each topic will be drawn from a number of sources including text books, cases and articles.

In case students wish to purchase any books the following are suggested:

Textbooks: Jonathan Herring, *Family Law* (7th edn, 2015, Pearson); Kate Standley and Paula Davies, *Family Law* (8th edn, 2013, Palgrave Macmillan); Stephen Gilmore and Lisa Glennon, *Hayes and Williams' Family Law* (4th edn, 2014, Oxford University Press); Rebecca Probert, *Cretney and Probert's Family Law* (9th edn, 2015, Sweet and Maxwell) Casebooks: Alison Diduck and Felicity Kaganas, *Family Law, Gender and the State* (3rd edn., 2012, Hart Publishing); Sonia Harris-Short, Joanna Miles and Rob George, *Family Law: Text, Cases and Materials* (3rd edn, 2015, Oxford University Press); Brenda Hale, David Pearl, Elizabeth Cooke and Daniel Monk, *The Family, Law and Society: Cases and Materials* (6th edn, 2009, Oxford University Press)

Reader: Jonathan Herring, Rebecca Probert and Stephen Gilmore, *Great Debates in Family Law* (2012, Palgrave Macmillan); Rob George, *Ideas and Debates in Family Law* (2012, Hart Publishing).

Assessment: Exam (100%, duration: 3 hours, reading time: 15

minutes) in the main exam period.

Approved statutory materials may be taken into the examination in accordance with School Regulations.

LL232

Law and Institutions of the European Union

This information is for the 2015/16 session.

Teacher responsible: Dr Floris De Witte

Additional Teachers: Dr Veerle Heyvaert, Dr Jan Komarek, Dr Michael Wilkinson.

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the BSc in Management and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course is an introduction to European Union Law. The course considers a legal and political system which has become the most formidable system of transnational government in modern times. It is also a system that has become, in recent years, a source of continual political conflict: both over the content of its measures and the presence of its involvement in many spheres of activity. Discussions on the democratic nature of the EU, its stance of the protection of fundamental rights, and the relationship between the welfare state and EU law, for example, will all be covered in this course.

This course covers three aspects of EU law. First, it covers the institutional and constitutional structure of the European Union. Second, it looks at the central policies of the European Union, notably the rights to free movement for goods, services, workers, and Union citizens. Third, it looks at some of the most topical policy areas in which EU law plays an increasingly important role: the area of freedom, security and justice (and in particular the European Arrest Warrant), EU social policy, and the euro area crisis.

Topics will be taken from:

- (1) Evolution of the European Union
- (2) Institutions and Law-Making of the European Union
- (3) Sovereignty and EU Law
- (4) The Authority of EU Law Outside the EU
- (5) Subsidiarity and the role of national parliaments
- (6) Policing of National Observance of EU Law
- (7) Judicial application of Union law within the Member States (e.g. Direct effect, indirect effect, state liability) and relations between the Court of Justice and National Courts
- (8) Fundamental Rights
- (9) The euro area crisis
- (10) Free Movement of Goods
- (11) Free Movement of Persons and European Citizenship
- (12) Free Movement of Services and Establishment
- (13) The Area of Freedom, Security and Justice and the European Arrest Warrant
- (14) EU Social Policy and Anti-Discrimination Law

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 4 hours of lectures and 2 hours of classes in the ST.

Week 6 MT and week 6 LT will be reading weeks. Essays will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: A minimum of two pieces will have to be submitted: an essay in MT and a mock exam in LT. One additional optional essay will be set in LT.

Indicative reading: The core text for this course is Chalmers et. al., *EU Law* (3rd edn, CUP 2014). An alternative textbook that is useful to consult is Craig & De Burca, *EU Law* (6th edn, 2015). In addition, the course uses a broad range of on-line reading material. Students are expected to retrieve these materials on Moodle and print these materials themselves: there is no course pack. Students are not required to purchase a statute book, and the statute book will not be allowed in examination (contrary to the policy in the past years).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The examination will contain 10 questions (of which some may be 'either/or') of which four are to be answered, and at least one question must be answered from each of two sections, which represent Lent and Michelmas term work respectively.

LL233

Law of Evidence

This information is for the 2015/16 session.

Teacher responsible: Dr Federico Picinali, NAB 5.10

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: If a person is suspected of committing a crime, how does the prosecution go about proving that they are guilty? Are there any restrictions on the type of evidence that the prosecution can use to prove its case? What protections does the law offer to defendants, to safeguard them against false conviction? These are the central questions in the law of criminal evidence, which looks at the rules governing the use of evidence in criminal trials.

This course concentrates on criminal, rather than civil evidence. The course is taught by seminar, and emphasis is placed on matters of principle and conceptual issues rather than the fine detail of legal rules. The aims of the course are to teach students how to reason about evidence, and to encourage them to reflect critically on the modern law of criminal evidence.

At a more detailed level, we look at issues such as the standard of proof, asking why the standard of proof in criminal trials is beyond reasonable doubt and what reasonable doubt means. We consider how inferences are drawn from evidence, and how basic ideas of probability can give insights on this process. We examine how the police gain confessions from suspects, and how the law regulates the admissibility of confessions. An important theme on the course relates to questions about what makes a trial fair, and here the European Convention on Human Rights is relevant. In this context, we look at whether courts should admit illegally or improperly obtained evidence and ask what the privilege against self-incrimination is and whether it can be justified. Much of the law of evidence involves rules of admissibility, and here we cover hearsay evidence (a topic now with an important human rights angle) and character evidence (can a defendant's previous convictions be introduced against him at trial?). We also look at expert evidence, concentrating on particular examples such as DNA evidence and fingerprint evidence.

Syllabus: While coverage may vary from year to year, we usually look at the following themes and topics:

Analysing evidence: Probability and reasoning under uncertainty; Inferences from silence. Risk allocation: Burden and standard of proof. Frail evidence: its creation and admissibility; Confessions; Eyewitness identification. Fair trials: Illegally/improperly obtained evidence; The privilege against self-incrimination; Entrapment. Exclusionary rules: Hearsay; Bad Character. Vulnerable Witnesses: Special measures; Sexual history evidence. Expert evidence: Fingerprints, DNA and others.

The course has a moodle page which you could look at to get a better idea of the topics and the sort of material we look at.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: There is no set text for the course, but standard texts, eg Ian Dennis, *The Law of Evidence* (5th edn, 2013) are useful on many topics.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL241

European Legal History

This information is for the 2015/16 session.

Teacher responsible: Dr Umberto-Igor Stramignoni NAB 7.34

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to equip students with an in-depth understanding of the social and cultural history of the Western legal tradition (from its foundations in Ancient Rome to the onset of modernity), in order to engender a solid grasp of the basic assumptions and practises that underpin the legal systems of today's Europe.

The seminars are built around certain significant traces left by Roman law, the heartland of the Western legal tradition, from its mythical beginning in the 8th century BCE all the way through to the French Revolution and the astonishing story of the birth of the French Civil code in 1804.

In the first part of the course we will study: law and religion in ancient Rome; the space of the law; the emergence of the people's legislative assemblies in Republican Rome; women, slaves, and foreigners in the eyes of the law; the rise to power of Augustus and his Chancery; the great jurists of the Empire; the challenges of the "new religion", Christianity, for the Roman constitution; the turmoil and decline of Empire; and the rise of the Eastern Emperors and of Byzantium as the "new Rome".

In the second part of the course we will be considering how Roman law, now increasingly referred to by English common lawyers as 'Civil Law', transformed itself from the Middle Ages onwards, continuing to play a very central role in the imagination, thought and language of Europe and the world over. We will look at: how Roman law became immensely influential once again (both in Europe and beyond), upon its reappearance in new and different guises, at the end of the Middle Ages; the consequences of the rediscovery of the Justinian Digest and the challenge it represented for the law of the mediaeval world of the Christian Church; the cultural revolution of the Italian Renaissance; the emergence of legal Humanism and of the "scientific" method; the early Enlightenment; the modern movement for legal codification; the French Revolution; and the birth of the French Civil Code and its lasting influence on contemporary Europe.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: The general textbook for the course is the short yet iconic book by Peter Stein, entitled *Roman Law in European History* (1999). However, a mixture of visual aids and further readings will be used to complement the textbook, including journal articles and book chapters from other monographs. Students are encouraged to explore the course Moodle page for more information.

Assessment: Assessment path 1

Exam (100%, duration: 3 hours) in the main exam period.

Assessment path 2

Dissertation (100%, 12000 words) in the ST.

LL242

International Protection of Human Rights

This information is for the 2015/16 session.

Teacher responsible: Dr Chaloka Beyani NAB7.04

Availability: This course is available on the BA in Anthropology and Law, BSc in International Relations and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students need to have already taken and done well in a course in Public International Law or in Civil Liberties Law.

Course content: This course aims to provide a comprehensive and analytical account of the application of human rights standards in international law, and the operation of the existing international machinery for the protection of human rights. The course is designed to be both theoretical and practical.

The course deals with important conceptual issues: What are human rights? What is their purpose and status in international law?

Are they absolute or relative? Can they be of equal significance to societies at different stages of development? When may they be qualified? What is the relation between economic and social rights as well as civil and political rights? Are rights attributable to groups as well as to individuals? Why are there special categories of protection, e.g. minorities, indigenous peoples, children, women and refugees?

Extensive use is made of relevant case law, of the Civil and Political Covenant, the European Convention, the American Convention, the African Charter, and the International Court of Justice; and particular rights (such as those of persons belonging to minorities, the right to life, the prohibition of torture, the right to a fair trial, family life, and the fundamental freedoms) are studied in considerable detail.

The law of human rights reflects attempts made internationally to articulate basic legal standards for the protection of individuals and groups in their relations with the state, and to use the authority of international law, institutions, and procedures, to secure compliance with such standards. Human rights law is a modern phenomenon; but it has an ancient lineage. Some account of its evolution is given, from natural rights, civil liberties, the history of minorities protection, and the progressive development of human rights in public international law since 1945.

However, the major part of the course relates to post-1945 events concerning the protection of human rights. A section of the course deals with the role and reform of the United Nations to promote and secure the observance, on a universal basis, of international standards of human rights. The development of important legal standards (such as those of non-discrimination) is traced; and the work of various UN bodies in applying human rights is analysed.

The International Covenants on Human Rights are closely studied, with equal emphasis on the Committee under the Civil and Political Covenant, and the Committee under the Economic Covenant.

Comparisons are also drawn with regional attempts to promote and protect human rights, with the European system, the Inter-American system and the African system receiving special attention as regards their treaties, their institutions, procedure, and case-law.

By the end of the course students should have a good understanding of the substantive content of contemporary human rights and of the existing and alternative means available for protecting these rights and fundamental freedoms.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: R. Smith, International Human Rights; S. Joseph, J. Schultz, M. Castan, The International Covenant on Civil and Political Rights: Cases, Materials and Commentary; Jacobs and White, European Convention on Human Rights or Harris, The Law of the European Convention on Human Rights or Janis, European Human Rights Law. A detailed reading list is also provided.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL250

Law and The Environment

This information is for the 2015/16 session.

Teacher responsible: Dr Veerle Heyvaert NAB7.06

Availability: This course is available on the BA in Anthropology and Law, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to study and understand how law can be used as a tool to pursue environmental goals and to think critically about law's contribution to local and global environmental protection.

THEMES:

I. General features of environmental law in the UK:

The introductory sessions examine how we understand 'the value of the environment' as an object of legal protection, and how environmental law evolved through time. We study the notions of 'risk' and 'precaution' as key concepts of environmental regulation, and examine how the relationship between Parliament, the Government and the Environment Agency affects the effectiveness of environmental laws and rules in the UK.

II. Controlling space

This section reviews legal strategies for environmental protection through the management of the built environment, parks and nature. It covers planning law, environmental impact assessment, and nature conservation law.

III. Controlling climate change

Studies international law and politics of climate change, the UK approach to climate change mitigation and adaptation, and discusses the pros and cons of market-based regulation as a response to the climate change challenge.

IV. Controlling enterprise

Section IV looks at how environmental harm can be prevented or limited by regulating particular industries (such as heavily polluting industries and the waste treatment sector), by targeting particular products (such as dangerous chemicals), or by focusing on particular activities (such as international trade). We examine how environmental regulation aims to balance between restricting hazardous activities on the one hand, and fostering free enterprise on the other, and review the court's role in adjusting this balance.

V. Remedying environmental harm

The final section examines the role of both case law and regulation in the remediation of environmental harm, paying attention to clean-up of contaminated land, common law and human rights based approaches to compensation, and legal responses to international environmental disasters.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Week 6 MT and week 6 LT will be reading weeks. Essays or equivalent writing assignments will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students are expected to write a formative essay; answer a problem set in writing; and participate in a mock exam.

Indicative reading: There is no set book that covers the entire course, however, several sessions use Bell, McGillivray & Pedersen, Environmental Law (8th edition, Blackstone Press, 2013). A detailed reading list is provided for each seminar. Materials that are not sourced from Bell, McGillivray & Pedersen or Holder & Lee are made available on Moodle. A good alternative source is Fisher, Lange & Scotford, Environmental Law. Text, Cases and Materials, 2013. Useful introductory books include: Ashford & Caldart, Environmental Law, Policy and Economics, 2008; Lazarus, The Making of Environmental Law, 2004; Holder & Lee, Environmental Protection, Law & Policy, 2007; R Carson, Silent Spring, 1962; R Eckersley, Environmentalism and Political Theory, 1992.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL251**Intellectual Property Law**

This information is for the 2015/16 session.

Teacher responsible: Dr Sivaramjani Thambisetty Ramakrishna
NAB 7.29

Additional teacher(s): Prof Robert Pottage NAB 7.21

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Content and Scope: Intellectual Property Law consists in the rules determining when, and subject to what conditions, the activity of producing information (broadly conceived) can generate rights to exclude others from access to information. Given that information is an increasingly important source of commercial value within the modern economy, particularly for the entertainment and media sectors and science-based industries, it is not surprising that IP law is such a fast-growing field here and abroad. However its apparently relentless growth is the focus of vigorous debate.

Copyright already provides the legal foundation for the well-established film, music, TV and publishing industries, and its continuing expansion is said by some to be crucial given the trend towards media convergence in the 'digital future', and by others to be a threat to free speech and freedom of access to information. Patents sustain such key sectors as pharmaceuticals, and increasingly now biotechnology, and their availability in this context raise complex ethical and political issues.

Trademarks are central to effective advertising and marketing but at the same time exemplify the tendency of more and more aspects of our cultural landscape to be 'commodified'; they have attracted support and denigration in equal measure for this reason.

This course will provide students with an introduction to the law relating to patents, trademarks and copyright, and to the factors responsible for the continuing rapid expansion of each of these regimes of rights. We will reflect upon the variety of economic, cultural, political and technological pressures for the reform of Intellectual Property Law, and upon the processes by which these become translated into legal initiatives. And we will evaluate critically the implications for economic activity and social life generally of recognising intellectual property rights.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: The recommended text will be Lionel Bently and Brad Sherman, *Intellectual Property Law* (4th ed., Oxford University Press 2013), and students will also be required to purchase one of the available edited collections of statutes. For a critical introduction to the field, see Peter Drahos with John Braithwaite, *Information Feudalism: Who Owns the Knowledge Economy?* (London: Earthscan, 2002); and James Boyle, *The Public Domain: Enclosing the Commons of the Mind* (Yale University Press, 2008), ebook available free online

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Candidates will be required to answer a total of three questions out of nine (one from each of three sections).

meriting study in its own right. The last thirty years has seen great strides in the development of corporate insolvency law in England. We have seen the adoption of an enhanced legislative framework and the development of conceptual aspects and jurisprudence of the subject. As the recession of the early 1990's eased off there was a period of reflection and assessment of our insolvency law and procedures which resulted in reform of law on the books, although perhaps not of law in action. English lawyers have had to revisit the toolbox during the financial crisis in order to adapt existing legal procedures to meet the needs of new, modern financing structures. There is now another period of wide spread reflection and debate in Europe and the US, as jurisdictions consider whether the insolvency law and procedures which they have are fit for the twenty-first century.

The course looks at the legal rules affecting distressed and insolvent companies and those concerned with them (for example, creditors, directors and employees) and it assesses the issues and principles underlying a corporate insolvency regime. (Corporate Insolvency Law bears a close relationship to the Law of Business Associations (BA) and students may find that taking BA as well as Corporate Insolvency will give them a broad understanding of major themes relating to corporate activity.)

Outline Syllabus

Corporate borrowing

(a) Outline of corporate borrowing and development and nature of security interests: fixed and floating charges; achieving the same economic effect as security through the use of ownership rights

(b) Types of creditor

The Role and Objectives of Corporate Insolvency Procedures

(a) Introduction: Aims and Objectives

(b) The Legal Identity of the Enterprise, the Significance of Limited Liability and the Problem of Corporate Groups

(c) Insolvency Practitioners/Turnaround Professionals

Averting Liquidation: Rescue

(a) Rescue Procedures I

Causes of corporate failure: the decision to rescue or wind-up.

Informal Rescues.

(b) Rescue Procedures II

Receiverships – a continuing role?; Administration Orders; Liability of Receivers and Administrators; Comparisons with US Bankruptcy Code Ch.11; Company Voluntary Arrangements; Role of Creditors and Management.

Liquidation

(a) Winding-Up and Control of Procedures

(b) Gathering-In the Assets: setting aside transactions; the *pari passu* principle; preferential claims; unsecured creditors

(c) Secured creditors

(d) Security devices for consumer creditors and commercial suppliers
Repercussions of Corporate Insolvency on Individuals

(a) Company Directors

(b) Employees

The European and International Dimension

Insolvency Regulation of EU – the road to a universal bankruptcy system for member states? International cooperation on insolvency matters and reciprocal assistance between insolvency courts.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 6 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Students will be expected to prepare for participation in weekly seminar discussion.

Indicative reading: Detailed reading lists will be provided during the course. The recommended book is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (2nd ed., 2009) (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The examination will be based on the full syllabus. Unmarked, unannotated versions of the relevant legislation may be taken into the examination.

LL253**The Law of Corporate Insolvency**

This information is for the 2015/16 session.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: The Law of Corporate Insolvency forms an increasingly important legal arena, which is now recognised as

LL257**Labour Law**

This information is for the 2015/16 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This subject builds on contract and tort, and to some extent public law and EU law, but introduces the distinctive legal regulation of employment relations, such as the law of dismissal and discrimination law, and the institutional arrangements of industrial relations, including trade unions and collective bargaining. The course looks at these topics in an industrial relations context informed by sociology and economics. Labour law is an important area of legal practice, with employment law disputes representing one of the largest topics of civil litigation.

Syllabus:

Contract of Employment: the duties of employer and employee; the variety of work relations; vulnerable workers and the personal scope of employment law.

Regulation of the Employment Relation: minimum wage, working time.

Anti-Discrimination Law: implications of the Equality Act 2010.

Dismissal: wrongful and unfair dismissal.

Human Rights in the Workplace: civil liberties of employees at work.

Membership of Trade Unions, Worker Representation, and Collective Bargaining: freedom of workers to associate with each other and to act in association with each other.

Industrial disputes: strikes and other industrial action; rights and liabilities of individual workers who take industrial action; civil liabilities for organising industrial action – the economic torts, the ‘golden formula’ immunities and loss of immunity – industrial action ballots.

Business restructuring: economic dismissals and redundancy.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 4 essays in the MT and LT.

Indicative reading: Reading lists are supplied for each week's seminar and links are supplied on Moodle for most readings. For a concise overview of the subject a suggestion is: H. Collins, *Employment Law* 2nd edn (Oxford University Press, 2010). See also Kahn-Freund's *Labour and the Law* (3rd ed. by P. Davies and M. Freedland, 1983) chapter 1.

The leading textbooks are H. Collins, K.D.Ewing, A. McColgan, *Labour Law: Law in Context* (2012); S. Deakin & G. Morris *Labour Law* 6th edn 2012; A.C. L. Davies, *Perspectives on Labour Law* 2nd edn (Cambridge University Press, 2009).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Candidates are permitted to take into the examination an unmarked copy of a collection of statutes.

begins with an exploration of the nature of eighteenth century criminal justice, and how this was transformed in the nineteenth century. It will then examine the nature of the system of civil justice, and how this was reformed in the era before the Judicature Acts. In the second term, the course will explore topics relating to status, examining the attitude taken by the law to women, workers and slaves. A final set of topics will turn to explore the impact of law on economic change, looking at how the law facilitated the growth of a modern economy.

The course will be taught by a combination of lectures and seminars in the Michaelmas and Lent Terms. Seminars take the form of a short introductory presentation by one or more students followed by class discussion in which all are expected to participate.

Lecture and Seminar Topics

Michaelmas term: The first term is devoted to an examination of the criminal and civil justice systems in the eighteenth and nineteenth centuries. Topics covered in the first term include the prosecution of crime in the era of the ‘Bloody Code’, the nature of the criminal trial before and after the arrival of criminal barristers in the courtroom, the reform of criminal punishments and the rise of the prison and modern policing. In the second half of the term, the course looks at the system of the civil courts, the nature of civil litigation and the reform of the major courts. It looks at topics including the ‘old corrupt’ court of Chancery depicted in Dickens's *Bleak House* and its reform into the modern Chancery Division.

Lent term: The second term is devoted to exploring the impact of law on society and the economy. Topics explored include the law relating to married women and the custody of children, the law of slavery, and the law relating to workers and trade unions. The economic topics addressed include the law relating to the environment, the transformation of tort and contract law, and the law relating to business organisation.

Teaching: 20 hours of lectures and 5 hours of classes in the MT.

20 hours of lectures and 5 hours of classes in the LT. 4 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Students who choose to be assessed by unseen examination must submit one essay each term. Those submitting a dissertation will produce outlines and drafts that will be used for formative coursework purposes.

Indicative reading: Reading will be suggested during the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Students can choose to be assessed by 100% examination or 100% dissertation.

LL272 Half Unit**Outlines of Modern Criminology**

This information is for the 2015/16 session.

Teacher responsible: Dr Meredith Rossner

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some familiarity with sociological or psychological literature would be an advantage, but is not a prerequisite.

Course content: This half unit course is a general introduction to the study of modern criminology. The course is highly selective and every effort is made to hold the reading requirements within reasonable limits. It is suitable for General Course students, and a limited number may be admitted on application.

The main focus is on the classical and contemporary theories developed over the past two hundred years to explain and predict criminal behaviour in society. The propositions, assumptions, empirical validity, and policy implications of these criminological theories, as well as the social context in which they were developed, will be examined. Other significant issues in criminology – such as

the measurement and extent of crime, the role of demographics (age, race, gender, social class) in the causation of and reaction to crime, and the changing boundaries of criminological research – will also be discussed.

Course content:

1. The history of criminological theory.
2. Trends in crime and crime statistics. How official statistics can be interpreted and the role of crime surveys
3. 'Classical' criminology, rational choice, and crime prevention theories.
4. Individual explanations of crime: biological, psychological and psychoanalytical theories.
5. Sociological explanations of crime, including macro and micro approaches and recent critical theories
6. Criminal justice policy and 'law and order' politics.
7. Discrimination, Inequalities, crime and criminal justice
8. Crime and the mass media

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Recommended Readings:

- *Vold's Theoretical Criminology* by G. Vold, T. Bernard and J. Snipes and A. Gerould. 6th edition (2010)
- *The Oxford Handbook of Criminology* by M. Maguire, R. Morgan, R. Reiner (eds) 5th edition (2012)
- *Law and Order: An Honest Citizen's Guide to Crime and Control* by R. Reiner (2007)
- *The Politics of the Police* by R. Reiner (2010)
- *Violence: A Micro-Sociological theory* by R. Collins (2009)
- *Crime, Shame, and Reintegration* by J. Braithwaite (1989); 6th Downes P
- *Criminology*, 2nd ed. by T. Newburn (2012)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL275

Property II

This information is for the 2015/16 session.

Teacher responsible: Prof Neil Duxbury NAB 6.10

In 2016 Neil Duxbury will be on research leave in the LT and ST and so there will be a different course convener for those terms.

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

This course is compulsory on the BA in Anthropology and Law and is available on the LLB in Laws. It is available with permission as an outside option to students on other programmes where regulations permit. Students requiring exemption from the Law Society's Part I exam are strongly advised to take this course in their 2nd or 3rd year

Pre-requisites: Students must have completed Property I (LL105).

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term. The Land Law component of Property II is designed to introduce students to the fundamental principles of the law of real property (i.e. land). The course examines the general principles governing the ownership and occupation of land, including concepts of estates and interests, legal and equitable ownership (trusts of land, including co-ownership and modes of transfer) and title registration. It also considers the law governing specific interests in land (licences, proprietary estoppel, easements, covenants and mortgages).

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to

beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including the applications and classifications of resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 4 essays in the MT, LT and ST.

Students will be expected to produce four essays (two in the MT, one in the LT and one for the first week of the ST).

Indicative reading: Advice on reading, including textbook recommendations, will be provided and the beginning of the first and second terms. An essay which students might valuably read before the commencement of the course is Peter Birks, 'Before We Begin: Five Keys to Land Law', in *Land Law: Themes and Perspectives*, ed. S. Bright & J. Dewar (OUP, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Students are required to answer questions on both the Land Law and Trusts components of Property II.

LL278

Public International Law

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lang

Additional Teachers: Dr Devika Hovell, Dr Stephen Humphreys and Dr Chris Thomas

Availability: This course is available on the BA in Anthropology and Law, BSc in Environmental Policy with Economics, BSc in International Relations, BSc in International Relations and History and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the concepts, principles, institutions and debates that define public international law today. We begin with an overview of the international legal system, considering how international law is made, how it relates to national legal systems, and what scope exists for pursuing those who violate it. In this connection we examine the work of the International Court of Justice, the International Criminal Court and the various ad hoc international criminal tribunals, along with judgments of national courts invoking international law. We then take up a range of topical issues of global concern, studying the ways in which they affect and are affected by public international law. The issues to be discussed include: war, trade and investment, and the protection of human rights. We also investigate aspects of the history of international law, its role in relation to the establishment and retreat of European empires, and its contemporary significance and prospects. Overall, our aim is to lay the basis for an informed assessment of the contribution and limits of international law as a force in world affairs.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Students are expected to participate actively in weekly classes in addition to writing assignments during the year. All formative coursework is set by class teachers.

Indicative reading: Reading lists will be provided for each topic on Moodle. You are asked to buy M. Evans (ed.), *International Law* (4th ed., 2014) and Blackstone's *International Law Documents*. Some other works to which you may wish to refer include: D. Harris, *International Law: Cases and Materials*; H. Charlesworth and C. Chinkin, *The Boundaries of International Law*; M. Shaw,

International Law; M. Koskeniemi, *From Apology to Utopia*; V. Lowe, *International Law*; and J. Crawford, *Brownlie's Principles of Public International Law*.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

LL284 Half Unit

Sentencing and Treatment of Offenders

This information is for the 2015/16 session.

Teacher responsible: Prof Jill Peay NAB6.11

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Scope

In recent years sentencing issues have been matters of considerable debate and conflict amongst the public and politicians alike. The syllabus is liable, therefore, to alter year by year, with a focus on recent issues and cases. The course examines both the climate in which sentencing occurs and the justifications for punishment, and looks at how courts practically carry out their sentencing function in the context of persistent statutory reform. The various custodial and non-custodial measures available are examined and their effectiveness assessed. Finally, responses to specific groups of offenders, such as mentally disordered offenders and offenders who kill, are explored together with an examination of the reality of treatment within confinement.

Content

The context of sentencing and the justifications for punishment

Sentencing - theory, practice and possibilities for reform

Custody - containment, treatment, mandatory life sentences

Community based penalties - their scope and future

Sentencing Rioters

Mentally disordered offenders and offenders who kill - the penal response to problematic groups.

Teaching: 22 hours of seminars in the MT. 2 hours of seminars in the ST.

Week six is a 'reading and project' work week, in part in preparation for student presentations in week 7-10. Week 11 is a review and revision week.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the MT.

Indicative reading: A list will be supplied at the beginning of the term together with key questions to be addressed in class. The recommended text for the course is A. Ashworth (2015) *Sentencing and Criminal Justice*. (6th edition) Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

LL293

Taxation

This information is for the 2015/16 session.

Teacher responsible: Dr Michael Blackwell

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 20 students.

Course content: Taxation is a topic that has throughout history pervaded political debate and is encountered in every area of life. Taxation was one of the very first subjects to be taught at LSE. The teaching of tax law as an academic subject started at LSE, where it was introduced by Professor GSA Wheatcroft in 1957.

On the LSE Taxation course legal issues are of vital importance, but are placed in their economic and social context. This makes

it easier to understand the purpose of the legislation, the reason for the problems encountered and why difficulties remain. So this taxation course suitable for a wide range of students – not just those interested in commercial law. The substantive law element of the course is UK based, but the issues that arise are ones that all jurisdictions have to face.

Students taking this course should be prepared to use a variety of sources ranging from statute and case law to literature on public policy. The precise balance of materials used varies from topic to topic. All the readings set will be accessible and non-mathematical. NO COMPUTATION is required and no knowledge of any discipline other than law is required. The course is open to second and third year law students, and experience suggests that it is equally suitable for both years.

By taking this course you should develop the following skills and attributes (i) working with and analysing legislation; (ii) working with and analysing case law; (iii) research skills; (iv) communication skills; (v) professionalism.

The syllabus is set out below, although there is some variation of topics selected from year to year, depending on the focus of current debate, and in the order of topics. The course starts with an examination of the objectives of a tax system. What is meant by a 'good' or 'fair' tax? The course examines how employees and the self-employed are taxed and the differences between them, the taxation of business profits, how this is influenced by accounting developments and the ways in which we can tax companies and capital. We also study tax avoidance – how is this distinguished from evasion and is there a distinction between unacceptable tax avoidance and legitimate tax planning? Other issues that are likely to be covered are taxation of corporate finance, the impact of EU membership on direct taxation, international taxation, and constitutional issues relating to the use of 'discretion' by the Inland Revenue.

Syllabus Topics

1. General principles of taxation, objectives of a tax system, types of taxation, capital and revenue. Structure and administration; powers of HM Revenue and Customs. Outline of the UK tax system. Taxation of the individual: rates, allowances and treatment of the family, national insurance contributions.
2. Employment income – taxation of salaries, wages and other remuneration of employees and officers.
3. Business income (trading income) – taxation of business profits, income taxation of unincorporated businesses.
4. Tax treatment of capital – capital gains tax; other taxes on capital and on income from capital – objectives and effectiveness.
5. International taxation – the tax base, tax residence and domicile, double-tax relief, tax treaties and the consequences of British membership of the EU for UK tax.
6. Corporations – legal forms for carrying on a business, reasons for taxing corporations, corporation tax, integration with taxation of individuals, distributions to shareholders, taxation of groups of related companies.
- 7 Statutory interpretation and tax avoidance – application and interpretation of tax legislation by the courts; tax evasion and tax avoidance and methods of controlling these activities.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT. 6 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Introductory reading:

J. Tiley and G. Loutzenhiser, *Revenue Law* (Hart, 7th ed, 2012), Chapters 1-5

M. C. Blackwell 'Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study' [2013] *British Tax Review* 154

The principal book for the course is expected to be Lee, *Revenue Law Principles and Practice* (Bloombury Professional, 33rd ed, 2015). Tiley, *Revenue Law* (Hart Publishing) will also be referred to. These texts are supplemented by the other readings that will be set. The cases and readings are readily available electronically or in the LSE library. Vouchers are available for students on the course to purchase of published copies of the tax legislation at a substantial

discount. N.B.: most tax law textbooks are revised extensively on an annual basis, so do not buy an old one!

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

Selected 'Legislation' may be taken into the examination, with non-verbal markings only.

LL295

Media Law

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the legal and administrative regulation of the press and broadcast media. It focuses on three areas: the regulation of content to protect private interests (such as those in privacy and reputation), the regulation of content in the public interest, and the control of news-gathering practices. The course centres on law and regulation in the UK, as influenced by European law. The course is introduced with an overview of two overarching areas: first, the media landscape and the main social, technological and regulatory influences shaping its development, and secondly, the protection of freedom of expression and freedom of the press in national and international law. It then proceeds to review potential restrictions on these values that are aimed at promoting or preserving specific private and/or public interests. The key private interests included are those in reputation, privacy, confidentiality, and intellectual property. The key public interests included are those in preservation of the integrity of the judicial process, the fairness of political debate, the protection from offensive content, and the protection of consumers. The third part of the course focuses on the regulation of journalists' news-gathering practices, and covers such themes as harassment, surreptitious methods (the 'Dark Arts'), cheque-book journalism, protection of sources, and access to state-held information.

Teaching: 9 hours of lectures and 14 hours of classes in the MT. 8 hours of lectures, 16 hours of classes and 20 minutes of help sessions in the LT. 20 minutes of help sessions in the ST.

The course is taught through a series of plenary lecture sessions, and group-based problem exercises in seminars that build progressively over the six weeks dedicated to each of the three parts of the course. In addition, a set of policy-focused questions is set out for consideration in seminars. This contact time will be supported by a series of pre-delivered lectures covering each course theme. Students will also receive supervision in respect of a short research paper.

Formative coursework: Students will be expected to produce 15 problem sets in the MT and LT.

Each week seminar group-work will focus on 2 sets of problem exercises, and 1 set of policy-focused themes. The problem exercises are designed to allow students to build the knowledge necessary to complete the summative problem-based assessment. The policy-focused sessions are intended to introduce students to themes that may be picked up as topics for the summative coursework.

Indicative reading: Parkes and Mullis (eds), *Gatley on Libel and Slander* (Sweet & Maxwell, 12th ed, 2013); Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, forthcoming 2015); Barendt et al, *Media Law, Texts, Cases and Materials* (Pearson, 2014); Fenwick and Phillipson, *Media Freedom Under the Human Rights Act* (OUP, 2006); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007); Doley and Mullis (eds), *Carter Ruck on Libel and Privacy* (6th edn, Lexis Nexis, 2010), Warby, Moreham and Christie (eds) *Tugendhat and Christie The Law of Privacy and the Media* (2nd edn, OUP, 2011).

Assessment: Coursework (50%, 2000 words) in the MT and LT. Essay (50%, 4000 words) in the ST.

The assessment for the course comprises two elements: x3 group-based coursework problems and x1 individual coursework essay. During the year, students must complete three problem exercises in groups, following extensive preparatory group-based problem exercises in seminars. These group-based problem exercises are released at the beginning of each part of the course, and the answers developed progressively over the subsequent six weeks. Submission of the group-based answers will take place in week 7 MT, week 3 LT and week 10 LT respectively. The best two grades achieved in these three exercises will comprise 50% of the overall grade for each student for the course.

Each student must also complete one 4,000 word research paper on a theme to be agreed with class teachers. The grade achieved for this paper will comprise the remaining 50% of the overall grade for the course. This work is supported through the policy-focused element of each seminar and through short supervision meetings in LT and ST as required.

LL298 Half Unit

Half-Unit Dissertation on an approved legal topic

This information is for the 2015/16 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: Where either a second or third year LLB student is taking the equivalent of three-and-a-half subjects she/he may make up the final half-subject by writing a 6- 8,000 word half-unit dissertation on a legal topic approved by the Law Department. Students wishing to do a half-unit dissertation should first consult their academic adviser in the preceding summer term to discuss:

- whether a dissertation is a suitable option for the student
- the particular dissertation topic
- who might be an appropriate dissertation supervisor

In light of their discussion with their academic adviser, a student wishing to pursue this option should approach a possible supervisor for their approval. The supervisor of the dissertation must be a permanent or ex-permanent member of staff.

It is not possible to submit a full-unit dissertation, LL299 and half-unit dissertation, LL298 in the same year.

Because this option requires considerable independent study, it is generally not advisable to opt to write a dissertation unless the student has been achieving marks of an upper second class standard in their examinations to date. The dissertation subject must be of a suitable academic character which has not already or will not have been explored in depth in any taught subject taken by the student but is related to subjects taught in the School. It is necessary for a student to have the approval of both a member of staff who is willing to supervise the dissertation and the Chair of the LLB Part I and II Exam Board for the proposed dissertation by 31 October of the year in question. Once they have their supervisor's approval, students will need to make a formal detailed application to the Chair of Exams for approval; a form for this will be circulated to those writing a dissertation early in the MT.

The essay should be word processed and be accompanied by a bibliography. Footnotes can be placed at the end of the text or at the bottom of the page to which they relate (the latter is preferable). The dissertation should be 6,000-8,000 words in length (including footnotes and excluding bibliography). The supervisor will be available to provide some guidance but it is intended that the student should do his/her own research. The dissertation should be submitted not later than the first day of the ST.

Teaching: 1 hour of lectures in the MT.

Beyond the one-to-one sessions held with the dissertation supervisor there is no formal teaching. However, there is a one hour session held in the Michaelmas term for all half-unit and full-unit dissertation students to orient them to the requirements of writing a dissertation.

Indicative reading: There is no essential reading as such, but there

is a dedicated moodle site for the LLB dissertation options.

Assessment: Dissertation (100%, 8000 words) in the ST.

LL299

Full- unit Dissertation on an approved legal topic

This information is for the 2015/16 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: A second or third year LLB student may write a full-unit dissertation on a legal topic approved by the Law Department. Students wishing to do a full-unit dissertation should first consult their academic adviser in the preceding summer term to discuss:

- whether a dissertation is a suitable option for the student
- the particular dissertation topic
- who might be an appropriate dissertation supervisor

In light of their discussion with their academic adviser, a student wishing to pursue this option should approach a possible supervisor for their approval. The supervisor of the essay must be a permanent or ex-permanent member of staff.

It is not possible to submit a full unit dissertation, LL299 and half unit dissertation, LL298 in the same year

Because this option requires considerable independent study, it is generally not advisable to opt to write a dissertation unless the student has been achieving marks of an upper second class standard in their examinations to date. The dissertation subject must be of a suitable academic character which has not already or will not have been explored in depth in any taught subject taken by the student but is related to subjects taught in the School. It is necessary for a student to have the approval of both a member of staff who is willing to supervise the dissertation and the Chair of the LLB Part I and II Exam Board for the proposed dissertation, by 31 October of the year in question. Once they have their supervisor's approval, students will need to make a formal detailed application to the Chair of Exams for approval; a form for this will be circulated to those writing a dissertation early in the MT.

The dissertation should be word-processed and be accompanied by a bibliography. Footnotes can be placed at the end of the text or at the bottom of the page to which they relate (the latter is preferable). The essay should be 12,000-15,000 words in length (including footnotes and excluding bibliography). The dissertation should be submitted not later than the first day of the ST.

It may be possible to use the dissertation option to do some work in a subject which is not being offered as a taught course in the year in question. Alternatively, students may be able to use it to do some more detailed work on a topic of particular interest to them, providing that this does not overlap with any course that they are taking to an unacceptable extent. It should be stressed that no member of staff is under an obligation to agree to supervise any proposed dissertation. However where a member of staff agrees to act as supervisor, students can expect to see their supervisor to discuss their work on a regular basis in each of the first two terms, with at least three meetings in each term.

Teaching: 1 hour of lectures in the MT.

Beyond the one-to-one supervision sessions held with the student's dissertation supervisor there is no formal teaching as such. However, a one hour session will be held in the Michaelmas term for all full-unit and half-unit dissertation students to orient them to the dissertation requirements.

Indicative reading: There is no essential reading as such. There is a moodle site dedicated to the LLB half and full-unit dissertations.

Assessment: Dissertation (100%, 15000 words) in the ST.

LL300

Competition Law

This information is for the 2015/16 session.

Teacher responsible: Dr Pablo Ibanez Colomo NAB5.16

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: It is widely accepted that competition is the best means to deliver better products at lower prices for consumers. The point of competition rules is to preserve the process of rivalry rivalry between firms. This is an area of the law applies to a broad range of corporate strategies. In some cases, competition authorities take action against powerful firms (think of multinationals such as Microsoft, Google, or Intel) that have the ability to influence market conditions and to exclude smaller rivals. In other instances, action is taken to block mergers and acquisitions damaging the competitive process (e.g. a merger creating a monopoly). Finally, authorities intervene frequently against attempts by firms to avoid competing by means of secret price-fixing arrangements (the so-called 'cartels'). Competition law has progressively become a major feature of legal systems around the world. It is a discipline with a long tradition in the US and Europe (under the lead of the European Commission). Competition law regimes have now been adopted (and/or actively enforced), inter alia, in jurisdictions like Brazil China, Hong Kong, India, Malaysia or Singapore. Interestingly, this is a truly cosmopolitan field, in the sense that the relevant provisions are virtually identical in their form and substance around the world and are enforced in very much the same way.

Following an introduction in which competition law is put in its economic and institutional context, this module will address the main substantive and procedural aspects of the discipline.

Topics covered include the following:

- Anticompetitive agreements between firms (including 'cartels' and distribution agreements).
- Abusive practices by dominant firms.
- Mergers and acquisitions, including both mergers between competitors and vertical and conglomerate arrangements.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: Whish and Bailey, *Competition Law* (8th ed 2015); Jones and Sufrin, *EU Competition Law* (5th ed 2014); Hovenkamp, *The Antitrust Enterprise* (2005).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

LL301 Not available in 2015/16

Global Commodities Law

This information is for the 2015/16 session.

Teacher responsible: Dr Stephen Humphreys 5.12

The course is convened by Dr Stephen Humphreys.

Availability: This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a critical introduction to the legal regulation of global commodities, with a focus on the colonial histories of Asia, Africa and the Americas. Taking some of the world's most heavily exchanged primary commodities as examples, we will track the development of their production and consumption, from their domestic origins to their circulation in the global sphere today. The histories of the principal commodities – such as coffee, cocoa, rubber, oil – tell the story of today's global economy in microcosm. Most significantly, their evolving regulation has

provided the base for many central elements of the contemporary international and transnational legal architecture. In exploring this history, we will also touch on cross-cutting issues relating to some or all of the following: human rights, trade law, environmental law, food security, investment arbitration, anti-slavery, labour law and animal welfare law. We will also be looking at theories of consumption and production more generally, to enrich our discussions of these topics.

Michaelmas term begins with an overview of the global commodity trade and an introduction to terms as well as key legislative instruments, and a look through some basic theoretical and historical texts. This is followed by a series of classes, running through Lent term, situating the regulation of the global economy through the histories of specific commodities, cognizant of the state-formation processes and trans-global networking often entailed in the consolidation of key commodity markets.

A caveat: The course is predominantly historical and theoretical in nature. It deals in the main with events from the colonial period (c. 1515-1960) as they relate to the history of international and transnational law. It does not aim to prepare students for life as a commodity trader and does not cover contemporary financial, trade, or company law. While this class is complementary to LL278 (Public International Law), it is not necessary to have studied LL278 to take this class.

Following completion of the course, students can expect to have a broad understanding of the evolution of global commodity trading, with specific knowledge of how those commodities have contributed to and shaped the most important international law challenges of our time. Through individual presentations and research projects students are expected to develop critical perspectives on aspects of the topics covered throughout the year. At the end of the course, students should be able to demonstrate:

- A broad understanding of the historical rise in trade of global commodities, and of the evolution of the early legal regimes, both international and transnational, for their regulation, especially during colonial times.
- An awareness of intersecting legal issues relating to, for example: human rights, trade disputes, law of the sea, laws of war, environmental law, labour, animal welfare and illegal trade.
- An understanding of the impact that historical patterns of production and consumption of commodities around the world have had on contemporary international law structures.
- An appreciation of the critical theory that informs existing scholarly analysis of the trade in global commodities.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will be expected to submit one 2,000-word essay in MT.

Indicative reading:

- Marian Radetzki, *A Handbook of Primary Commodities in the Global Economy* (2008)
- K.R.Khan, *The Law and Organisation of International Commodity Agreements* (1983)
- Benoit Daviron and Stefan Ponte, *The Coffee Paradox: Global Markets, Commodity Trade and the Elusive Promise of Development* (2005)
- Cheryl Shonhardt-bail, *From the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective* (2006)
- Thomas Rogers, *The Deepest Wounds: A Labour and Environmental History of Sugar in Northeast Brazil* (2010)
- Dennis O. Flynn, and Giráldez, Arturo (eds), *Metals and Monies in an Emerging Global Economy* (1997)
- Martin Lynn, *Commerce and Economic Change in East Africa: The Palm Oil Trade in the Nineteenth Century* (2002)
- Denys Forrest, *Tea for the British: The Social and Economic History of a Famous Trade* (1973)
- William Gervase Clarence-Smith, *Cocoa and Chocolate, 1765-1914* (2000)
- K.N. Chauduri, *The Trading World of Asia and the English East India Company, 1660-1770* (1978)

Assessment: Essay (85%, 8000 words) in the LT and ST.

Project (15%) in the MT and LT.

Summative assessment will be in two parts: 85% for a 6,000-8,000 word long essay (proposal to be submitted in LT); 15% for participation in, and presentation of, a group research project.

LL305

Jurisprudence

This information is for the 2015/16 session.

Teacher responsible: Dr Emmanuel Melissaris NAB5.15

Availability: This course is compulsory on the LLB in Laws. This course is available on the BA in Anthropology and Law, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The aims of the course are: To introduce students to thinking philosophically about the law. To familiarise students with the main methodological, ontological, and normative questions concerning the law and its legitimacy. To provide students with knowledge of some of the most influential legal and political philosophies and their theses on law. To encourage and enable students to think about doctrinal legal questions from a philosophical perspective. To help students develop legal reasoning skills by training them in constructing abstract, philosophical arguments. Some of the themes that the course covers are: natural law; conventionalist and epistemic legal positivism; the rule of law; principles and the requirement of coherence in legal reasoning; some influential accounts of the legitimacy of the modern state and its law (Hobbes; Kant; Rawls); law's legitimacy and democracy; Marxist approaches to law; disobedience to the law; Arendt's political philosophy and its implications for law.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to write at least one essay per term.

Indicative reading: Students are provided with outlines and readings for topics discussed in the Michaelmas and Lent Terms. For introductory and background reading see: J.E. Penner and E. Melissaris, McCoubrey & White's Textbook on Jurisprudence, OUP 2012; Brian Bix, *Jurisprudence: Theory and Context* (3rd ed.), Thomson Sweet & Maxwell 2003.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

The examination paper will be divided into first (section A) and second (section B) term questions. Students will be required to answer three questions from a wide choice of questions, but at least one question from each section.

LN100

Russian Language and Society 3 (advanced)

This information is for the 2015/16 session.

Teacher responsible: Dr Olga Sobolev TW3 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Russian Language and Society 2 (Intermediate) course (LN102); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e.

speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Svetlana Le Fleming and Susan Kay, *Colloquial Russian 2*, Routledge, 2003; Additional: Terence Wade, *A Comprehensive Russian Grammar*, Blackwell, 2000; Nicholas Rzhevsky, *Cambridge Companion to Modern Russian Culture*, Cambridge University Press, 2012; Robert Service, *A History of Modern Russia*, Penguin, 2009; Catriona Kelly & David Shepherd, *Russian Cultural Studies*, Oxford University Press, 1998; Russian newspapers on the web.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

LN101

Russian Language and Society 1 (beginner)

This information is for the 2015/16 session.

Teacher responsible: Dr Olga Sobolev TW3 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: No previous knowledge of Russian is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topic work; (b) oral classes; (c) grammar classes; (d) tutorials; and (e) guided study using Language Showroom, IT and web-based materials. Students should note that the timetable will be held extremely flexible to accommodate students from all departments. Please contact the teacher responsible if you would like to follow this language course. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Svetlana Le Fleming and Susan Kay, *Colloquial Russian 1*, Routledge, 2010; Sarah Smyth and Elena Crosby, *Rus', A Comprehensive Course in Russian*, Cambridge University Press, 2002.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

LN102

Russian Language and Society 2 (intermediate)

This information is for the 2015/16 session.

Teacher responsible: Dr Olga Sobolev TW3 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Russian Language and Society 1 (Beginner) course (LN101); or a good pass at GSCE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: A bridge from intermediate to advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 5 hours of classes in the ST.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Svetlana Le Fleming and Susan Kay, *Colloquial Russian 1*, Routledge, 2010; Sarah Smyth and Elena Crosby, *Rus', A Comprehensive Course in Russian*, Cambridge University Press, 2002; Cultural awareness: Nicholas Rzhevsky, *Cambridge Companion to Modern Russian Culture*, Cambridge University Press, 2012

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

LN104

Mandarin Language and Society Level 1 (Beginner)

This information is for the 2015/16 session.

Teacher responsible: Dr Hua Xiang tower 3, 601B

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: No previous knowledge of Mandarin is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. In this level, the students are required to read and write up to 750 Chinese characters.

Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Structured activities in week 11 of both MT and LT.

Formative coursework: The students will be required to complete weekly exercises. This includes grammar activities, writing Chinese characters and online communicative materials.

Indicative reading: CH Xiang, 2010, *Mastering Chinese*, London. Palgrave Macmillan. X Liu (ed.), 2006, *New Practical Chinese Reader*, Vol. 1, text book and workbook, Beijing. Beijing Language and Cultural University Press. Y Po-Ching & D Rimmington, 2002, *Beginners Chinese – A Grammar and Workbook*, Routledge. Oxford Chinese Dictionary, 2010, Oxford Dictionaries.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LN110

German Language and Society 3 (advanced)

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Skrandies TW3.6.01f

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: An A-level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the German language within the framework of the social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, and the use of authentic multi-media materials. The focus is on accuracy and communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities will take place in week 11 of the Michaelmas term and week 11 of the Lent Term.

Formative coursework: Weekly language exercises

Indicative reading:

- Beattied *Collins German Dictionary* 7th
- Durrell *Essential German Grammar* Routledge
- Luscher Renate *Landeskunde Deutschland* München Verlag für Deutsch
- Wolski, Werner (2012), *Pons Kompaktwörterbuch Deutsch als Fremdsprache*, Stuttgart: Klett Verlag

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LN120

Spanish Language and Society 3 (advanced)

This information is for the 2015/16 session.

Teacher responsible: Ms Mercedes Coca TW3 6.01 I

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Spanish Language and Society 2 (Intermediate) course (LN122); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Week 11 in MT and LT structured activities.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises

Indicative reading:

Structured activities during the reading week

Formative coursework: Two essays per year, presentations.

Indicative reading: Dostoevsky *Crime and Punishment* & *Notes from the Underground*; Kafka *Metamorphosis* & *The Trial*; Nabokov *Despair* & *Lolita*, Celan *Todesfuge and other poems*; St-Exupery *The Little Prince*; Solzhenitsyn *One Day in the Life of Ivan Denisovich*; Camus *L'Etranger* & *The Myth of Sisyphus*; Kundera *The Unbearable Lightness of Being*; Frayn *Copenhagen*; Stoppard *Dogg's Hamlet* *Cahoot's Macbeth*

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2500 words) in the LT.

LN270

Society and Language: Linguistics for Social Scientists

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Skrandies TW3.6.01f

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Course content: The course will introduce students to key (socio) linguistic concepts (semantic and pragmatic meaning, discourse, register, genre, dialect, idiolect, sociolect) employed in the analysis of language use as a social process. Students will explore the reciprocal relationship between language and specific social contexts and structures (class, gender, ethnicity), and study the role that language plays in the creation, maintenance and change of social relations and institutions. Important themes are changing attitudes to language and the prestige afforded to particular languages and language varieties. The use of language for academic purposes will be analysed, as will be situations of language contact, multilingualism and the role of translation in intercultural and international communication. The implications and consequences for less widely used languages of the emergence of English (and other widely spoken languages) as global lingua francas will be

outlined and discussed.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Two hours per week, featuring: (a) Lectures on a range of concepts and themes; (b) classes including students' presentations; (c) revision workshops; (d) tutorials. Structured activities will take place in week 11 of the Michaelmas and the Lent Term.

Formative coursework: Short essays, linguistic analyses, presentations.

Indicative reading:

- Mesthrie, Rajend (ed) (2011) *The Cambridge Handbook of Sociolinguistics*, Cambridge: Cambridge University Press
- Meyerhoff, Miriam (2011). *Introducing Sociolinguistics*, 2nd edition, London: Routledge;
- Mooney, Annabelle et al (2010). *Language, Society and Power. An Introduction*, 3rd edition, London: Routledge
- Wardhaugh, Ronald (2010). *An Introduction to Sociolinguistics*, Oxford: Wiley-Blackwell
- Weber, Jean-Jacques & Kristine Horner (2012). *Introducing Multilingualism. A Social Approach*, Routledge: London
- Yule, George (2010). *The Study of Language*, 4th ed., Cambridge: Cambridge University Press
- Wodak, Ruth et al (2011) *The SAGE handbook of sociolinguistics*, London: SAGE

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 3500 words) in the ST.

LN320

Spanish Language and Society 5 (mastery)

This information is for the 2015/16 session.

Teacher responsible: Mr Rafael Penas Cruz TW3 6.01 L

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Spanish Language and Society 4 (Proficiency) course (LN220) or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery) study of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Week 11 in MT and LT structured activities.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials

Formative coursework: The students will be required to complete weekly language exercises

Indicative reading: The following works are core texts:

- Gabriel Garcia Marquez, *Cien Años de Soledad*;
- Carmen Laforet, *Nada*;
- Tomas Eloy Martinez, *Santa Evita*,
- Luis CERNUDA, "La realidad y el deseo", Fondo Cultura Económica, Madrid, 1982,
- Poesía; Jaime GIL DE BIEDMA,: *Antología poética* (2001); Alianza Editorial, SA; Fuguet, Alberto; Sergio Gomez (Eds),
- Presentación del país McOndo, En McOndo, Barcelona: Grijalbo,

1996;

- Amores Perros (2000) Filmax DVD;
- Ay Carmela! [1990] Arrow Warner Home Video DVD;

Students will be advised to buy any relevant materials at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LN330

French Language and Society 5 (mastery)

This information is for the 2015/16 session.

Teacher responsible: Mr Francois Simon TW3 6.01 K

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed French Language and Society 4 (proficiency) (LN230).

An interview with the course co-ordinator prior to registration is compulsory.

Course content:

- Further advanced (up to the level of mastery) study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing - including grammar) through individual and group work, topical discussions, authentic and studio-based multi-media materials.
- The focus on accuracy, near native command of the target Language, maximisation of cultural awareness through the latest developments with a particular emphasis on using student centred approach in course delivery, preparing the students to be fully operational in a French speaking company or any other Organisation where near native command of French is an essential requirement.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Two hours per week, which will feature: (a) seminars; (b) Oral Classes; (c) Workshops; (d) Tutorials; and (e) Guided study using Language (f) grammar. Showroom, IT and web-based material including a virtual learning environment supported by Moodle.

Formative coursework: 1. Exam (60%, duration: 3 hours) in the main exam period.

2. Oral examination (20%) in the ST.

3. Continuous assessment (20%) in the MT and LT

Indicative reading: Students are encouraged to make full use of the resources of French books in the Library as well as reference books. Students are also strongly advised to use the resources available on the World Wide Web. The course is in the process of being supplemented with new activities, topics and themes that underpin French Modern Society.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the LT.

Continuous assessment (20%) in the MT and LT.

LN340

Mandarin Language and Society 5 (Mastery)

This information is for the 2015/16 session.

Teacher responsible: Dr Hua Xiang Tower 3, 601B

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed Mandarin Language and Society 4 (Proficiency) (LN240).

This is a Mastery course, and in order to register, completion of Language and Society 4 or equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery) study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 5000 Chinese characters.

Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Structured activities in week 11 of MT and LT.

Formative coursework: The students will be required to complete weekly exercises. This includes newspaper reading, research projects and online communicative materials.

Indicative reading: Students are encouraged to make full use of the resources of language gateway at LSE and online magazine subscription. There will be guided authentic materials from newspaper, web and journals.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

LSE100

The LSE Course: Understanding the causes of things

This information is for the 2015/16 session.

Teacher responsible: Prof George Gaskell KSW4.08

The LSE100 lectures are given by lecturers from a range of departments.

Availability: Compulsory course on all undergraduate programmes: students complete term one in Lent Term of their first year and term two in Michaelmas Term of their second year. The course is not available to General Course students or to second-year direct-entry students.

Course content: The course introduces students to the fundamental elements of thinking like a social scientist. Running through all of the social sciences are questions of evidence, explanation and theory. As no complex issue can be fully understood through the lens of a single discipline, LSE100 uses current issues of public concern and intellectual debate to explore these questions from the perspective of different fields of social science. The goal of the course is to enable students to complement intellectual grounding in their discipline with a broad understanding of different ways of thinking. In four five-week modules, the course will examine 'big' questions, such as: How should we address poverty? Are we witnessing a global power shift from West to East? Do nations matter? Is punishment the answer to crime? Through questions like these (this list is only illustrative), students will explore different types of evidence, different forms of explanation and different strategies for abstraction and modelling that are used across the social sciences. The intention is not only to broaden students' intellectual experience, but also to deepen their critical understanding of their core disciplines. The focus on the core elements of social scientific reasoning will be accompanied by a strong emphasis on critical thinking, research and communication skills.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Formative activities will be completed in

class and may include writing assignments or data analysis tasks.

Indicative reading: Readings are module-specific. Class reading packs are provided in hard copy and are all available from the LSE100 Moodle site, along with additional reading and resource recommendations.

Assessment: In both terms, a short essay will be due in Week 5 and a group project will be due in Week 10. Students will also complete brief portfolio exercises each week, to be reviewed in class and assessed at the end of each term. These exercises are designed to support students' understanding of key theories and critical analysis of arguments or evidence. The essays and group projects are each worth 20% of the student's final mark and the portfolio exercises are worth 10% per term. Students receive an overall mark for the course of Distinction, Merit, Credit or Fail.

MA100

Mathematical Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Ioannis Kouletsis

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course assumes knowledge of the elementary techniques of mathematics including calculus, as evidenced for example by a good grade in A Level Mathematics.

Course content: This is an introductory level course for those who wish to use mathematics seriously in social science, or in any other context. A range of basic mathematical concepts and methods in calculus of one and several variables and in linear algebra are covered and some applications illustrated. It is an essential pre-requisite for any mathematically orientated economics options and for many further mathematics courses. Topics covered: Matrices, reduced row echelon form, rank. Systems of linear equations, Gaussian elimination. Determinants. Vector spaces, linear independence, basis, dimension. Linear transformations, similarity. Eigenvalues. Diagonalization. Orthogonal diagonalization. Complex numbers. Vectors. Functions of several variables, derivatives, gradients, tangent hyperplanes. Optimisation including Lagrange's method. Vector-valued functions, derivatives and their manipulation. Inverse functions, local inverses and critical points, use in transformations. Integration, differential and difference equations. Some applications of the above topics.

Teaching: 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 11 hours of classes and 10 hours of workshops in the LT.

Formative coursework: Students will be expected to complete exercises assigned weekly in the lectures. Written answers to specified exercises are submitted to the appropriate class teacher for evaluation. Success in this paper depends on dealing with this written work as it is assigned, in a regular and systematic manner.

Indicative reading: Ken Binmore & Joan Davies, Calculus, Concepts and Methods; Martin Anthony & Michele Harvey, Linear Algebra, Concepts and Methods.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Exam (25%, duration: 1 hour) in the LT week 0.

MA103

Introduction to Abstract Mathematics

This information is for the 2015/16 session.

Teacher responsible: Prof Graham Brightwell
Prof Jan van den Heuvel

Availability: This course is compulsory on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken, or be taking concurrently, the course Mathematical Methods (MA100).

Course content: The course is an introduction to the use of formal definitions and proofs in mathematics, and to basic results of elementary set theory, number theory, linear algebra, algebra and analysis. Specific topics covered are as follows: Logic, integers, sets and functions, prime numbers, relations, real and complex numbers, greatest common divisor and modular arithmetic, infimum and supremum, sequences, limits, continuity, groups and vector spaces.

Teaching: 20 hours of lectures, 10 hours of classes and 9 hours of workshops in the MT. 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Students are expected to have one of the recommended textbooks: N L Biggs, Discrete Mathematics (2nd edn) or P J Eccles, An Introduction to Mathematical Reasoning. Further background reading can be found in R Allenby, Numbers and Proofs; M Liebeck, A Concise Introduction to Pure Mathematics; V Bryant, Yet Another Introduction to Analysis; R Bartle & D Sherbert, Introduction to Real Analysis and H Anton, Elementary Linear Algebra.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA107 Half Unit

Quantitative Methods (Mathematics)

This information is for the 2015/16 session.

Teacher responsible: Dr James Ward

Availability: This course is compulsory on the BSc in Management, BSc in Management Sciences and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: A-level Mathematics (or equivalent).

Students with A-level Mathematics who are confident of their mathematical skills may also consider the full unit **MA100**

Mathematical Methods.

Course content: The aim of this course is to develop the basic mathematical tools necessary for further study in economics and related disciplines. To this end we focus on: techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), and the solution of difference and differential equations. The ideas are taught systematically, with emphasis on their application to economic problems. Examples are used throughout the course for motivation and illustration.

Specific topics are as follows: sets, functions, equations, graphs. Difference equations, sequences, limits. Differentiation, inverse

functions, exponential and logarithmic functions. Partial differentiation, chain rule, homogeneous functions. Optimisation in two variables: unconstrained and constrained. Lagrange multipliers. Vector notation and convexity. Matrix notation, systems of linear equations, inverse matrices. Integration. Differential equations.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The course follows M Anthony & N L Biggs, Mathematics for Economics and Finance: Methods and Modelling, CUP, 1996. A useful background text which is the basis of a follow-on course is A Ostaszewski, Mathematics for Economics: Models and Methods, Blackwell, 1993. There are many other books with titles like Mathematics for Economists but none of them are close enough for use in this course. Further information will be provided in the lectures.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA110

Basic Quantitative Methods

This information is for the 2015/16 session.

Teacher responsible: Dr James Ward and Dr Pavel Gapeev

Availability: This course is available on the BSc in Accounting and Finance and BSc in Government and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GCSE or AS-level Mathematics (or equivalent). Students with A-level Mathematics (or equivalent) should take

MA107 Quantitative Methods (Mathematics) or MA100 Mathematical Methods.

Course content: The course is designed to provide students with the elementary mathematical tools that are needed to study Economics. Students will be introduced to basic mathematical concepts and manipulations. Examples of applying these techniques to a variety of economical and management problems are given throughout the course. Content - Part A: Arithmetic operations, powers and roots; basic algebra; introduction to linear programming; logarithms and exponential growth; sets, functions and graphs; differentiation of functions of one variable; marginal cost and marginal revenue; optimisation of functions of one variable; difference equations; equilibrium and stability in dynamical models. Content - Part B: Introduction to integration; consumer and producer surplus; matrix algebra; systems of linear equations; functions of several variables; partial differentiation; optimisation and the Lagrange multiplier method.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The course will be mostly taught from the lecturers' notes. The following books can provide additional material: T Bradley & P Patton, Essential Mathematics for Economics and Business; E T Dowling, Mathematics for Economists (Schaum's Outline Series); I Jacques, Mathematics for Economics and Business; M Rosser, Basic Mathematics for Economists; M Anthony & N L Biggs, Mathematics for Economics and Finance: Methods and Modelling, CUP, 1996.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA203 Half Unit

Real Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Eleni Katirtzoglou

Availability: This course is compulsory on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103), or some equivalent giving experience with formal proofs, convergence of sequences and continuity of functions.

Course content: This is a course in real analysis for those who have already met the basic concepts of sequences and continuity on the real line. Here we generalize these concepts to Euclidean spaces and to more general normed spaces and metric spaces. These more general spaces are introduced at the start and are emphasized throughout the course.

Topics covered are:

- Metric and normed spaces, open and closed sets, topological properties of sets and equivalent metrics.
- Sequences in metric spaces, compactness, completeness, pointwise and uniform convergence of sequences of functions.
- Infinite series on the real line and in normed spaces.
- Continuity of real valued functions and of functions between metric spaces, uniform continuity and Lipschitz condition.
- Differentiation of real valued functions, the mean value theorem, differentiation of functions between Euclidean spaces (Fréchet derivative) and partial derivatives.
- Riemann integral and the fundamental theorem of calculus.

Teaching: 22 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A comprehensive pack of lecture notes will be provided. The following may prove useful:

- Robert G Bartle & Donald R Sherbert, Introduction to Real Analysis
- W A Sutherland, Introduction to Metric and Topological Spaces
- Tom Apostol, Mathematical Analysis, second edition.
- Walter Rudin, Principles of Mathematical Analysis, third edition.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA207 Half Unit

Further Quantitative Methods (Mathematics)

This information is for the 2015/16 session.

Teacher responsible: Dr James Ward

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management and BSc in Management Sciences. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have previously taken **MA107 Quantitative Methods (Mathematics)**. It is not available to students who have taken **MA100 Mathematical Methods**, or equivalent, nor higher level methods courses.

Course content: This is a second course in quantitative methods, following on directly from Quantitative Methods (Mathematics) (MA107). This course will contain further algebra and calculus. As with the course MA107, the emphasis will be on applications in economics and finance. Topics covered: Matrix methods in portfolio analysis. Linear independence. Rank of a matrix. Eigenvalues and eigenvectors. Diagonalisation. Linear systems of recurrence equations. Markov process. Second-order recurrence equations. Macroeconomic models. Vector geometry. Gradient and directional derivative. Tangent hyperplanes and the optimal bundle. Resource

allocation and Pareto efficiency. Orthogonal matrices and quadratic forms. Critical points of quadratic functions. Taylor's approximation. Optimisation of functions of two or more variables.

Teaching: 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: M Anthony & N Biggs, Mathematics for Economics and Finance (Cambridge, 1996); A Ostaszewski, Mathematics in Economics (Blackwell, 1993).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA208 Half Unit

Optimisation Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Bernhard von Stengel COL 4.12

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) is desirable, and students who have not done MA203 should contact the teacher responsible.

Course content: The course describes various techniques of optimisation, gives a mathematical presentation of the relevant theory, and shows how they can be applied. Introduction and review of relevant mathematical background Introduction to combinatorial optimisation; shortest paths in directed graphs; algorithms and their running time. Classical results on continuous optimisation: Weierstrass's Theorem on continuous functions on compact set; optimisation of differentiable functions on open sets; Lagrange's Theorem on equality constrained optimisation; Kuhn and Tucker's Theorem on inequality constrained optimisation. Linear programming and duality theory. Finite horizon dynamic programming (time permitting).

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Information on important and required texts will be provided at the beginning of the course. Good sources of literature are R K Sundaram, A First Course in Optimisation Theory; N L Biggs, Discrete Mathematics (2nd edition). Additional notes will be handed out throughout the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA209 Half Unit

Differential Equations

This information is for the 2015/16 session.

Teacher responsible: Dr Eleni Katirtzoglou

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) and/or Further Mathematical Methods (MA212) are highly desirable, and students who have done neither MA203 nor MA212 should contact the lecturer.

Course content: The course concentrates on the theory and

qualitative analysis of (ordinary) differential equations, although some solution techniques will be considered as well. Special attention will be paid to geometric concepts and the role of differential equations in the theory of dynamical systems. Specific topics covered are: First examples; illustrations of use of the computer package Maple. Existence and uniqueness of solutions. Autonomous 1 and 2 dimensional systems. Linear equations and systems: phase portraits; classification of systems in the plane; higher dimensional systems and higher order equations. Nonlinear systems in the plane: local and global behaviour; linearisation and stability at equilibrium points; Lyapunov functions; limit cycles. Control theory; linear systems; controllability.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full notes will be handed out throughout the course. A good additional text book is D K Arrowsmith & C M Place, *Dynamical Systems - Differential Equations, Maps and Chaotic Behaviour*. Other books closely related to R Grimshaw, *Nonlinear Ordinary Differential Equations* and W A Brock & A G Malliaris, *Differential Equations, Stability and Chaos in Dynamic Economics*.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA210 Half Unit Discrete Mathematics

This information is for the 2015/16 session.

Teacher responsible: Prof Jan van den Heuvel

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 Introduction to Abstract Mathematics, or an equivalent course giving a background in rigorous mathematics.

Course content: This is a course covering a number of concepts and techniques of discrete mathematics. Topics covered: Counting: selections; inclusion-exclusion; generating functions; recurrence relations. Graph Theory: basic concepts; walks, paths, tours and cycles; trees and forests; colourings. Coding theory: basic concepts; linear codes.

Teaching: 21 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: PJ Cameron, *Combinatorics* (CUP 1994); NL Biggs, *Discrete Mathematics* (OUP 2004). Extensive notes covering the course content will be distributed as well.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA211 Half Unit Algebra and Number Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Konrad Swanepoel

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Abstract Mathematics (MA103) and Mathematical Methods

(MA100).

Course content: The aim of this course is to continue (from MA103) the study of abstract algebraic structures. There are two main strands in the course. First, we develop further the theory of groups, using permutation groups as a key example. We investigate the important concepts of normal subgroups and quotient groups. Secondly, we introduce rings, and study factorisation in rings, where we also look at some connections with number theory. Groups: Review of basic group theory; permutations and permutation groups; homomorphisms; conjugation, normal subgroups and quotient groups; the first isomorphism theorem for groups. Rings: basic properties of rings and examples (including polynomial rings, matrix rings, and number rings); subrings, ideals and ring homomorphisms; divisibility in integral domains; greatest common divisors; Euclidean rings and unique factorisation; applications to number theory; principal ideal domains.

Teaching: 20 hours of lectures, 1 hour of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Introduction to Algebra, Peter J Cameron (OUP 1988); Rings, Fields and Groups: Introduction to Abstract Algebra, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA212 Further Mathematical Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Jozef Skokan and Prof Adam Ostoja-Ostaszewski

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Econometrics and Mathematical Economics, BSc in Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme) and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course **Mathematical Methods** (MA100) or equivalent, entailing intermediate-level knowledge of calculus and linear algebra, linear independence, eigenvalues, diagonalisation, and proficiency in techniques of differentiation and integration.

Course content: This course develops ideas first presented in MA100. It is divided into two halves: calculus and linear algebra. The calculus half explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral (permitting application of the Laplace transform to discrete and continuous probability distributions), to a level of detail dependent on time constraints. The linear algebra half covers the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. An application to population dynamics. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 10 hours of classes in the LT. 1 hour of

lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A Ostaszewski, Advanced Mathematical Methods for both halves.

Useful background texts:

(i) for the calculus half: Ken Binmore & Joan Davies, Calculus, Concepts and Methods; M R Spiegel, Laplace Transforms; R A Adams, Calculus.

(ii) for the linear algebra half: Martin Anthony and Michele Harvey, Linear Algebra: Concepts and Methods (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA300

Game Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Lidbetter and Prof Olivier Gossner

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Basic knowledge of matrices as covered in **Mathematical Methods** (MA100) or **Quantitative Methods** (MA107). Some knowledge of probability. Knowledge of economics as covered in **Microeconomic Principles I** (EC201) or **Microeconomic Principles II** (EC202).

Course content: Concepts and methods of game theory with applications to economics. Part I: same as for Game Theory I (MA301). Part II: Coalitional game theory - central solution concepts with application: the core, Shapley value, stable sets, weighted majority games, market games, stable matching.

Teaching: 22 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture slides will be provided, as well as references to selected papers. Further reading: R Gibbons, A Primer in Game Theory, 1992; A Mas-Colell, M Whinston, J Green: Microeconomic Theory; M Osborne, A Rubinstein: A Course in Game Theory; M Maschler, E Solan, S Zamir: Game Theory.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MA301 Half Unit

Game Theory I

This information is for the 2015/16 session.

Teacher responsible: Dr Thomas Lidbetter

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Management Sciences, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Basic knowledge of matrices as covered in **Mathematical Methods** (MA100) or **Quantitative Methods** (MA107). Some knowledge of probability.

Course content: Concepts and methods of game theory with applications to economics. Game trees with perfect information, Nim. Backward induction. Extensive and strategic (normal) form of a game. Nash equilibrium. Commitment. Zero sum games, mixed strategies. Maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution. Multistage bargaining.

Teaching: 22 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. Further reading: K Binmore, Playing for Real: Game Theory CUP, 2007; E Mendelson, Introducing Game Theory and Its Applications, CRC 2004.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA303 Half Unit

Chaos in Dynamical Systems

This information is for the 2015/16 session.

Teacher responsible: Dr Robert Simon

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: **Mathematical Methods** (MA100) is a pre-requisite. Background in rigorous mathematical methods, such as provided in **Introduction to Abstract Mathematics** (MA103), is desirable. In particular, some familiarity with proving theorems would be useful.

Course content: Given a function $f: X \rightarrow X$, what is the (iterative) behaviour of $f^n(x) = f(f(\dots f(x)))$ (f applied n times). What do 'orbits' of f look like - an orbit has the form $x, f(x), f(f(x)), \dots$. Particular emphasis is given to long-term evolution and stability analysis of such systems $f: X \rightarrow X$. We explore connections with so-called fractal sets, which are roughly sets that look the same at any degree of magnification, and may have a dimension which is not an integer. We also discuss chaotic maps f , where $f^n(x)$ cannot be determined if there is any small uncertainty about x . Topics covered: Iteration of discrete maps. Orbit analysis. Contraction mapping theorem. Quadratic maps. Bifurcations. Definition of chaos. Sarkovskii's theorem. Fractal sets.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful, R Devaney, A First Course in Chaotic Dynamical Systems; R Devaney, An Introduction to Chaotic Dynamical Systems; E Scheinerman, Invitation to Dynamical Systems. A fun and interesting read might be Gleick, J., Chaos: Making a New Science.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA305 Half Unit

Optimisation in Function Spaces

This information is for the 2015/16 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have attended a course in Mathematical Methods, ideally **Further Mathematical Methods** (MA212).

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. This course develops a geometric approach to those optimisation problems which involve the choice of functions. Applications relevant to Economic Theory are studied. It introduces key methods of continuous time optimisation in a deterministic context, including the Calculus of Variations, Pontryagin's Principle and Bellman's Principle. Specific topics include: Introductory examples. Calculus of variations. Euler-Lagrange Equations. Necessary conditions. Maximum Principle. Transversality conditions. Linear time-invariant state equations. Controlability. Dynamical programming. Applications to Economics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A full set of lecture notes will be provided. D. G. Luenberger, Optimization by Vector Space Methods, Wiley, 1969.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA310 Half Unit Mathematics of Finance and Valuation

This information is for the 2015/16 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA313 Probability for Finance is required

Course content: Main mathematical ideas in the modelling of asset price evolution and the valuation of contingent claims (e.g., calls, puts); discrete methods will dominate. Introductory treatment of the Black-Scholes continuous-time model. This course introduces a range of mathematical concepts and techniques of modern finance. It considers discrete and continuous time models for the price dynamics of actively traded assets. It develops the basic principles of risk-neutral valuation of contingent claims, such as call and put options. The course contains some elements of stochastic analysis such as Brownian motion, stochastic integration, stochastic change of variable formula, change of probability measures. These analytic tools are used for the pricing of contingent claims in stochastic models of financial markets. Specific topics studied include: one-period and multi-period binomial tree models; the Black and Scholes model; self-financing replicating portfolios; martingales and conditional expectation; Itô calculus; risk-neutral valuation of call and put options in the absence of arbitrage; the Black and Scholes formula; option deltas, gammas, vegas, and other sensitivities.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. Background texts: T Bjork, Arbitrage Theory in Continuous Time, Oxford Finance, 2004; A Etheridge, A Course in Financial Calculus, CUP, 2002; M Baxter & A Rennie, Financial Calculus, CUP, 1996; P Wilmott, S Howison & J Dewynne, The Mathematics of Financial Derivatives, CUP, 1995; J Hull, Options, Futures and Other Derivatives, 6th edition, Prentice-Hall, 2005. D Lamberton & B Lapeyre, Introduction to stochastic calculus applied to finance, 2nd edition, Chapman

& Hall, 2008. S E Shreve, Stochastic Calculus for Finance. Volume I: The Binomial Asset Pricing Model; Volume II: Continuous-Time Models. Springer, New York, 2004.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA313 Half Unit Probability for Finance

This information is for the 2015/16 session.

Teacher responsible: Dr Andrew Lewis-Pye

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Experience obtained through other Mathematics and Statistics courses is highly desirable.

Course content: The purposes of this course are (i) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (ii) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Markov chains. Convergence of random variables. Conditional expectation and martingales, in the discrete case.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales. J Jacod & Ph Protter, Probability Essentials; A Klenke Probability Theory. A Comprehensive Course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA314 Half Unit Algorithms in Java

This information is for the 2015/16 session.

Teacher responsible: Dr Konrad Swanepoel

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: **Introduction to Abstract Mathematics** (MA103), or an equivalent course giving a background in rigorous mathematics.

Course content: Basics of Java programming. The Euclidean algorithm. Time complexity of algorithms. Asymptotic notation. Heaps. Sorting. Recursive algorithms. Stacks and queues. Linked lists. Graphs. Breadth-first and depth-first search. Connectivity and topological sorting. Dijkstra's algorithm. Closest pair in the plane.

Teaching: 20 hours of lectures, 1 hour of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: T H Cormen, C E Leiserson & R L Rivest, Introduction to Algorithms, MIT Press 1990 (or 2nd edn, 2001 or

3rd edn, 2009); J R Hubbard, *Programming with Java*, Schaum's outlines, McGraw-Hill, 2nd edn, 2004; R Sedgewick, K Wayne, *Introduction to programming in Java*, An interdisciplinary approach, Addison Wesley, 2008; D Flanagan, *Java in a Nutshell*, 3rd edn, or later, O'Reilly 1999

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Coursework (20%) in the MT.

MA315 Half Unit

Algebra and its Applications

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Anthony

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have passed MA103 Introduction to Abstract Mathematics and, ideally, have taken MA211 Algebra and Number Theory. Students who have not taken MA211 may still take the course with the lecturer's permission. (A small amount of additional reading on their part will be required).

Course content: The aim of the course is to continue the study of abstract algebraic structures and show how these structures can be used to solve concrete problems. There are three strands: Group actions; Rings, polynomials and fields; Applications, including coding and cryptography. Group actions; revision of permutation groups; orbits and stabilizers, the orbit-stabilizer theorem; applications to counting problems. Rings, polynomials and fields: revision of rings; quotient rings; polynomial rings and the Euclidean algorithm for polynomials; irreducible polynomials and factorisation of polynomials. fields; fields as quotients of polynomial rings; construction and properties of finite fields: Applications: Designs and orthogonal latin squares ; Error-correcting codes, including linear codes, cyclic codes and perfect codes; cryptography.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided but additional reading is recommended. *Discrete Mathematics*, N L Biggs, (specifically Chapters 20-24, together with some introductory material from earlier chapters). *Introduction to Algebra*, Peter J Cameron (OUP 1988); *Rings, Fields and Groups: Introduction to Abstract Algebra*, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991). *Codes and Cryptography*, D J A Welsh (Clarendon Press 1988) *Codes*, N.L. Biggs (Springer, 2008).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA316 Half Unit

Graph Theory

This information is for the 2015/16 session.

Teacher responsible: Dr Julia Boettcher and Dr Thomas Lidbetter

Availability: This course is available on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 or equivalent course giving a background in rigorous mathematics.

Course content: This course examines the basic concepts and techniques of graph theory. The topics to be covered are: fundamental concepts, flows, connectivity and matchings,

colourings, extremal problems. Optional topics include Ramsey theory, the probabilistic method, spectral graph theory, or matroids.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: D. B. West, *Introduction to Graph Theory*, Prentice Hall 2001; R. Diestel, *Graph Theory*, Springer 2010.

N. L. Biggs, *Discrete Mathematics*, OUP 2004; J.A. Bondy and U.S.R. Murty, *Graph Theory with Applications*, North-Holland, 1976; B. Bollobas, *Modern Graph Theory*, Springer 1998.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA317 Half Unit

Complex Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Amol Sasane

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Solid grounding in mathematics, especially analysis, in particular MA203 Real Analysis.

Course content: The course will cover the fundamental concepts and methods in complex analysis. The basic object of study in the course will be a complex differentiable function in a region, and the far-reaching consequences of the notion complex differentiability will be dealt with in the course. The specific topics that will be covered are: the geometry of complex numbers, complex differentiation, Cauchy-Riemann equations, Cauchy's integral theorem, Cauchy's integral formula, Taylor series. We continue by covering: Liouville's Theorem, Maximum Modulus Theorem, Rouche's Theorem. We also give a brief introduction to Laurent Series and use of the Residue Theorem. The core results will be illustrated with computational examples and applications.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) S.D. Fisher. *Complex Variables*. Corrected reprint of the second (1990) edition, Dover Publications, Inc., Mineola, NY, 1999. (2) J.E. Marsden and M.J. Hoffman. *Basic Complex Analysis*. Second edition, W. H. Freeman and Company, New York, 1987. (3) D.O. Tall. *Functions of a Complex Variable*. Routledge and Kegan Paul, London, 1985

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MA318 Half Unit

History of Mathematics in Finance and Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Norman Biggs

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This course surveys the development of mathematics from the beginning of history with an emphasis on its applications to finance and economics. Major themes are the development of arithmetic and geometry, the use of algebraic

symbolism, the creation of the calculus, geometry, probability, and game theory. In order to give this course a distinctive flavour, we will illustrate these themes with examples taken from the social sciences, broadly interpreted. For example, the algorithms of arithmetic will be illustrated by their applications in finance, rather than astronomy.

Teaching: 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to submit written work on a weekly basis. One of these assignments will be a short essay of 1000-1200 words.

Indicative reading: The course is based on source material which will be distributed to students as hard copy. J. Stedall's 'History of Mathematics: A Very Short Introduction' (Oxford 2011) is recommended for background reading.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 1650 words).

The assessed essay is due for submission in the Spring Vacation.

MA319 Half Unit

Partial Differential Equations

This information is for the 2015/16 session.

Teacher responsible: Dr Amol Sasane

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Introduction to Abstract Mathematics (MA103).

Course content: The aim of the course is to study the three main types of partial differential equations: parabolic (diffusion equation), elliptic (Laplace equation), and hyperbolic (wave equation), and the techniques of solving these for various initial and boundary value problems on bounded and unbounded domains, using eigenfunction expansions (separation of variables, and elementary Fourier series), integral transform methods (Fourier and Laplace transforms). Applications and examples, such as the solution technique for Black-Scholes option pricing, will be discussed throughout the course.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: 1 S.J. Farlow. *Partial Differential Equations for Scientists and Engineers*. Dover, 1993. 2 J.D. Logan. *Applied Partial Differential Equations*. Second Edition. Springer, 2004. 3 W. Strauss. *Partial Differential Equations. An Introduction*. Second Edition. John Wiley, 2008. Lecture notes will be provided.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG100 Half Unit

Leadership and Communication in Teams

This information is for the 2015/16 session.

Teacher responsible: Dr Tara Reich

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership

and considers how leadership develops. The emphasis will be on application of theory, comparing and contrasting approaches to leadership, and self-reflection. The group essay provides the opportunity for students to not only exercise leadership within their group but also apply the theories to a real-life leadership situation. The course examines: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; the dynamics between leaders and their followers; transformational and transactional forms of leadership; team leadership and co-leadership; leadership communication; leadership development; the future of leadership.

Teaching: 10 hours of lectures and 9 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

The Summer Term teaching will be review sessions. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Formative assessment will be a mock exam during the Lent Term.

Indicative reading: This course relies heavily on journal articles and book chapters. A full reading list will be provided at the beginning of the term. Students may wish to consult one of the following: Daft, R. L. (2011). *The Leadership Experience* (5th ed.). Mason, OH: Thomson/South-Western. Goffee, R., & Jones, G. (2006). *Why Should Anyone Be Led By You?* Boston, MA: Harvard Business School Press. Northouse, P. G. (2010). *Leadership: Theory and Practice* (5th ed.) Thousand Oaks: Sage. Yukl, G. (2009). *Leadership in Organizations*. (7th ed.). Englewood Cliffs, NJ: Prentice Hall.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) and other (5%) in the LT.

Assessment will be 25% group essay (2000 words), 5% Peer Evaluation of individual contribution to the group essay, and 70% Summer Term exam (2 hours).

MG101 Half Unit

Core Business Disciplines I: Finance and Operations Management

This information is for the 2015/16 session.

Teacher responsible: Dr David Newton and Dr Elisabetta Bertero

Availability: This course is compulsory on the BSc in Management. This course is not available as an outside option nor to General Course students.

Course content: This course is the first part of two integrated core courses in management. The aim is to provide students with an understanding of the drivers of organisational performance and with an introduction to finance. Organisational performance will include process flow analysis, inventory management, assembly line balancing; supply chain management; quality management and scheduling. The Finance part will include an introduction to the financial decisions of firms, in particular capital budgeting; the financial decisions of households; the role of the financial system in the economy and the flow of funds; causes and consequences of the recent financial crises.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One formative essay of 2000 words will be set in the Michaelmas Term for the Operations Management part and classwork exercises will be set in the Lent Term for the Finance part.

Indicative reading: Jacobs and Chase (2013), "Operations and Supply Chain Management", McGraw Hill
Goldratt, Cox and Whitford (2014), "The Goal", Gower Publishing
Womack and Jones (2008), "The Machine that Changed the World", Simon and Schuster

Assessment: Exam (50%, duration: 1 hour and 30 minutes) in the main exam period.

Project (50%, 3000 words) in the LT.

The exam will assess the Finance part of the course; the group project will assess the Operations Management part of the course. Students must pass both project and exam to pass the course.

MG102 Half Unit Organisational Behaviour

This information is for the 2015/16 session.

Teacher responsible: Dr Connson Locke

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course cannot be taken with MG203.

Course content: This course introduces students to social science theories and research related to understanding employee attitudes and behaviour. Each week focuses on a different topic investigating individual, group, and organisational issues. Weekly topics include: personality, motivation, perception and decision making, justice, culture and creativity.

Teaching: 15 hours of lectures and 9 hours of classes in the MT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST. Supplementary essay writing lecture/s to be held during reading week.

Formative coursework: Students will be expected to produce 1 essay of 1,500 words in the MT.

Indicative reading: The course relies on journal articles (for example, Journal of Applied Psychology, Journal of Organizational Behavior. A complete reading list will be provided at the start of the course. Sample texts include the following: Colquitt, J.A., LePine, J.A., & Wesson, M.J. (2009) Organizational Behavior: Improving Performance and Commitment in the Workplace (International edition). New York: McGraw-Hill and Nelson, D.L. & Quick, J.C. (2013) ORGB3. Cengage Learning.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 1500 words) in the LT.

MG103 Management, Labour and Work

This information is for the 2015/16 session.

Teacher responsible: Dr Eddy Donnelly NAB 4.07

Availability: This course is available on the BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course was formerly known as ID100 Employment Relations

Course content: The syllabus introduces students to the complex relationships between employers, managers, workers, trade unions and the state. It builds from the perspective of the individual worker and his/her job and proceeds, via discussion of management strategies and trade union responses, to contemporary views on globalisation and its impact on state policy.

The employment relationship in theory. Work organisation and work methods. Emotional labour. Japanisation. Human Resource Management. Pay and reward. Individual and collective resistance at work. Collective bargaining and trade unions. Industrial conflict and the right to strike. Comparative models of employment relations. The role of the state. Corporate governance. Globalisation and migrant work. International labour standards.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

A supplementary learning activity may take place during reading week, in Week 6.

Formative coursework: As well as contributing to class discussion, students are expected to provide one piece of written work at the end of each term (MT and LT) in preparation for their final exam.

Indicative reading: The lecture course does not follow a single prescribed textbook. A detailed reading list will be supplied. However the following are useful; M Noon, P Blyton & K Morrell, The Realities of Work, 4th edn, 2013; P Blyton & P Turnbull, The Dynamics of Employee Relations, 3rd edn, 2004; John W Budd, The Thought of Work, 2011; C Frege & J Kelly, Comparative Employment Relations in the Global Economy, 2013, Routledge.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems

This information is for the 2015/16 session.

Teacher responsible: Dr Will Venters, NAB 3.13

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Course content: This course is the second of two integrated core units in management, which aim to provide students with an understanding of the drivers of organisational performance. In this course, we cover perspectives and issues in (i) human resource management, (ii) marketing and (iii) information systems. (i) will include job design, job analysis and competency modelling; recruitment and selection methods; socialization, turnover and retention; training and development; performance appraisal and management. (ii) will include customer behaviour; segmentation, targeting and positioning; product management and diffusion; pricing, placement and promotion; and marketing relationships. (iii) will include data, information and knowledge; the evolution of IS management practices; information systems strategy; information systems projects and organisational change; ebusiness; globalisation and IT; information systems outsourcing; and IT infrastructure. The course will be explicitly integrative and a key part of the assessment process will be an integrative group exercise around a case study.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

A supplementary learning activity may take place during reading week, Week 6.

Formative coursework: Three formative assignments will be set, consisting of one mock exam question to be completed at the end of each of the three sections of the course. The purpose of the mock exam is to provide - as realistically as possible - a practice session for the real exam.

Indicative reading: Barrick, M., Feild, H. S., & Gatewood, R. (2011). Selection in Human Resource Management (International 7ed.). Andover: Cengage Learning. Laudon, K and Laudon, J (2013) Management Information Systems, Pearson, London.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.
Project (40%, 4000 words) in the LT.

MG202

Analytical Methods for Management

This information is for the 2015/16 session.

Teacher responsible: Prof Peter Abell and Dr Nuno Oliveira

Availability: This course is available on the BSc in Management. This course is not available as an outside option. This course is available to General Course students.

BSc Management students must take either MG202 or MG205 in their second year.

Pre-requisites: ST107 or equivalent is recommended but not required.

Course content: This course will provide students with the knowledge and tools required to perform qualitative and quantitative analysis in support of managerial decision making, and to read and interpret the management research literature. The course introduces the fundamentals of behavioural research design, and provides an introduction to various methods used to gather data, analyse data, and communicate results. In the course, students will: 1) acquire the knowledge needed to act as critical consumers of a wide range of academic and commercial research, 2) acquire some facility in designing valid research and reporting research results, and 3) be exposed to a range of stock knowledge regarding research design and research methods. A particular focus of the course will be on methods which are used in management research, and which are useful in doing applied research within a management context.

Topics covered: Introduction to behavioural research and causality. Designing valid research. Experimental design. Bivariate analysis. Survey design. Multivariate analysis. Measurement analysis. Semi-structured interviews and focus groups. Collecting and coding recorded behaviours. Collecting and analysing network data. Collecting and analysing process data. Communicating results. Forward engineering with data.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

A supplementary learning activity may take place during reading week, Week 6.

Formative coursework: Students will be provided with regular opportunities to submit formative work, consisting of both quizzes administered in class and short individual or group assignments to be discussed in class. Students will be expected to provide and receive formative peer feedback on all written assignments during class, and designated written formative assignments will be marked and commented on by course instructors.

Indicative reading: Cozby, and Bates, S 2012. *Methods in Behavioral Research*, New York: McGraw-Hill; Huff, D. (1991). *How to Lie with Statistics*. London: Penguin; Jackson, S. 2012. *Research Methods and Statistics: A critical thinking approach*. Wadsworth: Cengage Learning; Shadish, W., Cook, T., and Campbell, D. 2002. *Experimental and Quasi-Experimental Designs for Generalized Causal Inference*, New York: Houghton Mifflin Company.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

Project (25%, 3000 words) in the ST.

Lent Term coursework will be an individual essay; Summer Term coursework will be a group project.

MG203 Not available in 2015/16

Organisational Theory and Behaviour

This information is for the 2015/16 session.

Teacher responsible: To be confirmed

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management Sciences, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG102.

Course content: Individual behaviour including: attitudes, motivation, personality, emotion, work-life balance and stress. Group and inter-group processes including: social networks, cohesion, power, and leadership. Organisational dynamics including: structure, learning, cross-cultural issues, responses to work-life conflict, and change. This course introduces students to social science theories and research regarding individual, group and organisational issues in order to analyse employee behaviour in the context of work organisations.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to submit three pieces of written work throughout the year, in the form of two unassessed essays and one mock examination.

Indicative reading: A complete reading list will be provided at the start of the course. Sample texts include the following: J Child, *Organisations*; S Dawson, *Analysing Organizations*; S Robbins & T Judge, *Organizational Behaviour*; R Steers & L Porter, *Motivation and Work Behaviour*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG205

Learning from Quantitative Data

This information is for the 2015/16 session.

Teacher responsible: Dr Jordi Blanes i Vidal (NAB 5.28)

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. BSc Management students must take either MG205 or MG202.

Pre-requisites: Students must have completed Quantitative Methods (Statistics) (ST107).

Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression. The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. The approach is both formal, as the course makes extensive use of econometric theorems and techniques, and solidly grounded in intuition, as it provides numerous examples of tests of real-life relations. Many of these examples will be illustrated using the STATA software package, and the students will be expected to learn the basics of data manipulation and regression running. A solid base of introductory statistics and probability (equivalent to that provided by ST107) and

introductory algebra and calculus (equivalent to that provided by MA107) will be expected.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: In every lecture, a question will be presented to the students. This question will approximately be of the type that will appear in the final exam. Students will have 10 minutes to answer the question and the answers will be marked by class teachers.

Indicative reading: The textbook for the course is: James H. Stock and Mark W. Watson, *Introduction to Econometrics*, Second Edition, Pearson, 2007. Two other very useful (complementary) books are: Christopher Dougherty, *Introduction to Econometrics*, Third Edition, Oxford University Press, 2007; Jeffrey M. Wooldridge, *Introductory Econometrics - A Modern Approach*, Third Edition, South-Western, 2006.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG206 Half Unit

Firms, Management and Competitive Advantage

This information is for the 2015/16 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed EC100 OR EC102 OR equivalent.

Course content: This is not a course on corporate strategy. It focuses on the evolution of thinking about firms and the activity of management and examines firm advantages through conceptual ideas and empirical knowledge. There will be an emphasis on analysing firms as reservoirs of resources and capabilities and topics to be covered will include distinctive capabilities of firms, organisational design, decision making in firms, organisational routines, managerial leadership and the role of ethics. Particular attention will be given to firms in technology-based industries and the management of innovation and contrasts will be made with public sector management.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and to do the weekly class exercises

Indicative reading: A reading list will be available to students taking the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG207

Economics for Management

This information is for the 2015/16 session.

Teacher responsible: Dr Kristof Madarasz NAB 5.30 and Prof Saul Estrin NAB 4.32

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Business Mathematics and Statistics and BSc in Management Sciences. This course is

not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: EC102 Economics (B) or equivalent is a pre-requisite. This course cannot be combined with Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Course content: The objective of the course is to provide students with insights from economic theory which are relevant to applications in managerial decision making. The emphasis is on applying microeconomics ideas to solve problems. Topics covered include consumer theory, production, applications to the labour market, market structure, monopoly, oligopoly, product differentiation, pricing, game theory, decision analysis, bargaining, auctions, and asymmetric information.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to prepare answers to set problems on a weekly basis. Some of this work will be assessed. Assiduous preparation for the weekly tutorials is essential to achieve a good exam performance.

Indicative reading: No textbook covers the whole course but Saul Estrin, Daid Laidler and Michael Dietrich, *Microeconomics* (6th edition) or Hal R Varian, *Intermediate Microeconomics* (latest edition) are both good reference books for the course. In addition students are advised to refer to T C Bergstrom & H R Varian, *Workouts in Intermediate Microeconomics* (1990), P Milgrom & J Roberts, *Economics, Organisation and Management* (1992) and J Tirole, *The Theory of Industrial Organisation* (1990).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

MG208 Half Unit

Business Transformation and Project Management

This information is for the 2015/16 session.

Teacher responsible: Dr Elzbieta Klecun-Taylor NAB 3.37 and Dr Susan Scott NAB 3.12

Availability: This course is available on the BSc in Management and BSc in Management Sciences. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Projects are the way that organizations manage change. This course aims to review the theory and practice of project management in order to develop a critical understanding of the processes involved in business transformation. It will cover history and foundations of project management, responding to changing environments, governance and control, contracting and relationships, managing risk and organisational learning. The course will focus on issues and challenges raised by business analysis and project management. Example topics of study include: questioning business transformation and projects as a mode of organising; understanding the dynamics and relations involved in IT-enabled business transformation; strategy formation; business process analysis; projects as an organisational form; project escalation; project management approaches and techniques; and change management. To develop students' practical knowledge and skills and to prepare them for future employment as business analysts / project managers students will participate in group work based on a 'real-world' scenarios of business transformation projects. They will also be required to sit a 2 hour exam.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A variety of types of assignments are given for class discussion including exercises and case studies.

Written feedback will be given on formative assessment related to the group project and to the examination.

Indicative reading: Maylor, H. (2010) *Project Management* (Fourth Edition). Upper Saddle River, New Jersey: FT/Prentice Hall. Morris, P.W.G., Pinto, J.K. and J. Soderlund (2012) *The Oxford Handbook of Project Management* Oxford: Oxford University Press. Doherty, S. (2008) *Heathrow's Terminal 5: History in the Making*, Oxford: Blackwell. Drummond, H. (1996) *Escalation in Decision-Making: The tragedy of Taurus*. Oxford: OUP.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Project (30%, 1500 words) in the MT.

MG209 Half Unit

E-business

This information is for the 2015/16 session.

Teacher responsible: Dr Antonio Cordella NAB 3.30

Availability: This course is available on the BSc in Management and BSc in Management Sciences. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course presents an analysis of the management, economics and information systems theories and practices in online business. This is a management information systems course and not a technical course. It is mainly directed at undergraduate students. It focuses on the study of the impact of digital technologies on business strategies and market configurations. Internet-based systems offer new means to operate businesses and to compete in the global marketplace and it is important for future executives and entrepreneurs to understand the economic and managerial implications of these transformations. Students will gain a good understanding of why and how successful companies are taking advantage of e-business, as well as an understanding of the main challenges and risks associated with different e-business models and strategies in a fast changing technological and business environment.

The course is structured into four main sections:

1. Strategic, technological, and economic foundations of e-business
2. E-business and its configurations: B2C and B2B
3. E-business: strategic and organisational challenges
4. Implementation of e-business strategies'

Teaching: 30 hours of lectures in the LT. 3 hours of lectures in the ST.

Students will be taught in groups of maximum 30 students each. Each group will cover the same content but will be taught separately. Each group will have 1x3 hours lecture per week in the Lent Term.

A 3 hours revision session will be offered in the summer terms.

Students will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment based on previous exam questions.

Each student will receive feedback on the approach to the question, the structure of the presentation, and the argumentation they have proposed to discuss the assigned question.

Aim of the formative work is to offer students the opportunity to self-evaluate their understanding of the subject, to test their preparation, to help them better understand what are the criteria of assessment, and to help them to better identify what is need to achieve the desiderated outcomes.

MG210 Half Unit Not available in 2015/16

Corporate Social Responsibility and International Labour Standards

This information is for the 2015/16 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Any social science background

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of business strategy. This course critically evaluates CSR from a number of perspectives, drawing on material from a variety of different disciplines. Students analyse the emergence of CSR, its theoretical basis, the business case for the adoption of CSR programmes, as well as the social impacts of such policies. The opening lectures of the course focus on globalisation and international labour standards, and provide an understanding of how CSR relates to international regulatory institutions such as the International Labour Organisation. Subsequent lectures focus on the different aspects of CSR mentioned above, as well as topics such as comparative CSR. In terms of the impact and design of CSR policies, the course mainly focuses on issues relating to labour standards. As well as traditional academic readings and case studies, students will critically examine publically available material such as corporate policies and reports. Seminars will follow a mixture of formats including group activities and presentations. The course will include one interactive lecture from a CSR professional.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Locke, R. (2013) *The Promise and Limits of*

Private Power: Promoting Labor Standards in a Global Economy, Cambridge: Cambridge University Press. Vogel, D. (2005) The Market For Virtue: The Potential and Limits of Corporate Social Responsibility, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) The Oxford Handbook of Corporate Social Responsibility, Oxford: OUP. Elliot, K.A. and Freeman, R. (2003) Can Labor Standards Improve Under Globalization?, Washington D.C.: Peterson Institute for International Economics.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 2000 words) in the ST.

MG211

Operational Research Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Giacomo Zambelli NAB 3.07

Availability: This course is compulsory on the BSc in Management Sciences. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. This course was formerly known as OR202 Operational Research Methods.

Pre-requisites: Mathematics, Statistics and Probability Theory to the level of the courses Quantitative Methods and Introduction to Statistics for Accounting and Finance is required. In particular, students should have covered elementary distribution theory and the Poisson Process, and have an elementary knowledge of linear algebra. Students must be prepared to use computer packages when required. A further half-unit course MG313 Practical Optimisation Modelling which focuses on applications of Mathematical Programming for modelling real-world problems may be taken after or in conjunction with this course.

Course content: An introduction to all the main theoretical techniques of Operational Research. MG211.1 Operational Research Techniques. Some methodological aspects of operational research, and some of the main OR techniques, including: Critical Path Analysis, Production, Scheduling, Markov Chains, Queueing Theory, Replacement, Simulation, Stock Control, Dynamic Programming, Decision Theory, Theory of Games. MG211.2 Mathematical Programming. Linear programming: from the most basic introduction to sufficient conditions for optimality; duality; sensitivity of the solution; discovery of the solution to small problems by graphical methods, and proof of optimality by testing the sufficient conditions; solution to larger problems by using a computer package. The transportation programme: properties of solution, connection with graph theory, an algorithm for hand computation. Full lecture notes are provided.

Teaching: 20 hours of lectures and 18 hours of classes in the MT. 10 hours of lectures, 13 hours of classes and 5 hours of computer workshops in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy. Please note that lectures and classes are divided between the two parts of the course (MG211.1 and MG211.2), and that the computer workshops are optional help sessions.

Indicative reading: Recommended books are H G Daellenbach, J A George & D C McNickle, Introduction to Operations Research Techniques, Allyn & Bacon; A Ravindran, D T Philips & J J Solberg, Operations Research; H P Williams, Model Building in Mathematical Programming, Wiley; H P Williams, Model Solving in Mathematical Programming, Wiley; Wayne L Winston, Operations Research, Duxbury Press.

Students may also wish to consult R L Ackoff & M W Sasieni, Fundamentals of Operations Research; N A J Hastings, Dynamic

Programming with Management Applications; F S Hillier & G J Lieberman, Operations Research; E Page, Queueing Theory in OR; M Sasieni, A Yaspan & L Friedman, Operations Research: Methods and Problems.

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

MG228 Half Unit

Managing the Stone-Age Brain

This information is for the 2015/16 session.

Teacher responsible: Dr Satoshi Kanazawa NAB 5.33

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce second- and third-year Management students to the new science of evolutionary psychology and explore the biological and evolutionary foundations of human behaviour. In the first few weeks, various critiques of and competing perspectives on evolutionary psychology, with regard especially to the relative importance of biological/ evolutionary vs. social/cultural determinants of human behaviour and its sex differences will be discussed and debated. In later weeks, an evolutionary perspective will be applied to various topics in management such as organizational behaviour, occupational choice, productivity, and status hierarchy. The study of business and management is currently dominated by economic perspectives, supplemented by sociological and social psychological perspectives, in American business schools. The course will provide a necessary corrective to the dominance of economics perspectives in the study of business and management by providing biological and evolutionary perspectives and thereby throwing a new light on the old problems (and finding potential solutions for them) in organizations and organizational behaviour. The course will provide evolutionary and biological perspectives on management and organizational behaviour. It will introduce the students to the following topics: Principles of evolution; Principles of evolutionary psychology; Sex differences in preferences, values, cognition, emotions, and behaviour; Physical attractiveness; General intelligence; Evolutionary constraints on human behaviour and their relevance to organizational behaviour.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each student will give a class presentation on the week's readings and their presentation will be evaluated by the course instructor and the feedback will be given to the student within one week. During the first few years of the course, mock examinations will be given to the students in order to familiarize them with the anticipated exam contents and format.

Indicative reading: Buller, David J. 2005. Adapting Minds: Evolutionary Psychology and the Persistent Quest for Human Nature. Cambridge: MIT Press. [The most comprehensive book-length critique of modern evolutionary psychology to date] Saad, Gad. (Editor.) 2011. Evolutionary Psychology in the Business Sciences. New York: Springer. Nicholson, Nigel. 2000. Managing the Human Animal. New York: Thompson Texere. Miller, Geoffrey. 2009. Spent: Sex, Evolution, and Consumer Behavior. New York: Viking. Miller, Alan S. and Satoshi Kanazawa. 2007. Why Beautiful People Have More Daughters. New York: Penguin. Kanazawa, Satoshi. 2012. The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One. New York: Wiley.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG301**Strategy**

This information is for the 2015/16 session.

Teacher responsible: Dr Ricardo Alonso NAB 5.31

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Economics B (EC102) or equivalent, Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent, and Economics for Management (MG207) or Microeconomic Principles I (EC201) or equivalent.

Course content: The first half of the course studies strategic situations (competition and rivalry, entry deterrence, standard setting, etc.) and formulates decision models of these situations. While the modelling is based on game theory, students will be taught how players play in real life games according to growing empirical evidence.

The second half of the course studies the way managers interact with the different constituencies inside the firm- workers, board members, and other managers. It presents, again with a heavy emphasis on the evidence, different managerial styles and their impact on firm process, entrepreneurial management styles, organisational change and technology, managerial compensation and governance, and corporate culture.

Beyond the emphasis on the content of the course, the course also aims to be a course where students learn to think critically and analytically. Students will learn to read the primary literature, discuss papers in class, interpret the evidence etc. Students will learn to ask questions such as: What is the evidence? What evidence would convince me of the opposite hypothesis?

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Extra reviews may be held during reading week in Week 6.

Formative coursework: Formative work such as problem sets and mock exam questions will be set.

Indicative reading: Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff

The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. Games of Strategy (WW Norton, 3rd edition, 2009) by Avinash Dixit, Susan Skeath and David Reiley. Economics of Strategy (5th Edition) David Besanko, David Dranove, Mark Shanley, Scott Schaefer. (2009)

An Introduction to Game Theory (Oxford, 2003) by Martin J. Osborne Strategic Management, Garth Saloner, Andrea Shepard and Joel Podolny, Wiley, 2000

The Modern Firm: Organizational Design for Performance and Growth, John Roberts 2007.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

management research which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether successful entrepreneurs tend to have been juvenile delinquents, gender differences in negotiation.

The main objective of the course is to enable students to comprehend and critically assess the literature on selected management topics, to evaluate statements in terms of evidence and to detect false reasoning or logic.

We investigate aspects of Management and what motivates people in organisations. Topics vary each year (based on student feedback) but examples are Entrepreneurship, Racial discrimination, Negotiation, Experiments on Incentives, Placebo effects of price, Leadership, Corporate Culture.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 2 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two take-home mock exam papers.

Indicative reading: A paper course pack containing all materials (lecture slides, articles, class sheets) will be available to students taking the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG303 Half Unit**Foreign Direct Investment and Emerging Markets**

This information is for the 2015/16 session.

Teacher responsible: Prof Saul Estrin NAB 4.32

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG307.

Pre-requisites: BSc Management students should be in their 3rd year. Other students should have taken Economics A or Economics B, or equivalent.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. There will also be some external speakers from large international firms and from the banking and consulting community to bring contemporary views and arguments to bear.

Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance. This course will focus on how the institutional characteristics of

Teacher responsible: Prof Diane Reyniers NAB 5.22

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: MG207 (formerly MN201, intermediate microeconomics) or equivalent and MG205 (formerly MN203, research methods/econometrics) or equivalent.

Course content: This course addresses various topics in

emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concepts such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economies and working with a large variety of datasets and sources. The course will then turn to key topics. These will include the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, "The New Institutional Economies", *Journal of Economic Literature*, 2000; Estrin et. al., "Entry Mode in Emerging Markets", *Strategic Management Journal*, 2009; T. Khanna and K Palepu, "The Future of Business Groups in Emerging Markets", *Academy of Management Journal* 2004.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (25%, 1000 words) in the ST.

Project (25%, 2000 words) in the LT.

LT coursework will be a group project.

MG304 Half Unit Not available in 2015/16 Digital Platform Innovation

This information is for the 2015/16 session.

Teacher responsible: Dr Carsten Sorensen NAB 3.11

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides students with both practical and theoretical insights into the dynamics of large-scale digital service platforms and their associated ecosystems. The course will begin by exploring the span of business innovation challenges from securing intimate user-technology relationships to the establishment and control of global service ecosystems based on digital platforms. The course examines the components, operations and trends of digital ecosystems, for example focusing on the role of large distributed datasets applied for organisational intelligence of various forms. The course, furthermore, considers social networks both in terms of large distributed datasets, and as innovation platforms relying on associated service ecosystems. The course addresses the general challenges of business digitalisation and platformisation with specific focus on mobile smartphone and tablet platforms. The course will conclude with a broader consideration of digital infrastructures and the dynamics associated with their innovation and growth.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: The classes will engage students in discussions and they will form the foundation for checking, on a continuous basis, the progression of student understanding. Classes

will entail small assignments and written and oral feedback will be given during the classes.

Indicative reading: Benkler, Y. (2006): *The Wealth of Networks*. Yale University Press Frischmann, B. M. (2012): *Infrastructure: The Social Value of Shared Resources*. OUP USA. Gawer (2009): *Platforms, Markets and Innovation*. Edward Elgar. Kallinikos, J. (2006): *The Consequences of Information*. Edward Elgar Leonardi, P. M., B. A. Nardi, & J. Kallinikos, ed. (2012): *Materiality and Organizing*. Oxford: Oxford University Press. Mansell, R. (2012): *Imagining the Internet: Communication, Innovation, and Governance*. OUP Oxford. Sørensen, C. (2011): *Enterprise Mobility*. Palgrave Zittrain, J. (2008): *The Future of the Internet*. Allen Lane
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG305 Half Unit Innovation and Technology Management

This information is for the 2015/16 session.

Teacher responsible: Dr Jonathan Liebenau NAB 5.14

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive technologies, project escalation, technological disasters. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. Lectures will be shared with MSc students. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies from the course study pack on Moodle. Formative feedback is provided on class participation.

In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: J Howells, *The Management of Innovation and Technology*, Sage, 2005; J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006; D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998; M Bauer (Ed), *Resistance to New Technology: Nuclear Power Information Technology and Biotechnology*, CUP 1995; M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999; H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998; C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984; H Drummond, *Escalation in Decision-making: The Tragedy of Taurus*, Oxford University Press, 1996; D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998; J McLaughlin, P Rosen, D Skinner & A Webster, *Valuing Technology: organisations, culture and change*, Routledge, London and New York, 1999; J R Chiles *Inviting Disaster: Lessons from the edge of technology*, 2001; P Hall, *Great Planning Disasters*, 1982; C Sauer, *Why Information Systems Fail: A Case Study Approach*, Alfred

Waller, 1993.

Assessment: Exam (40%, duration: 2 hours) in the main exam period.

Essay (50%, 5000 words) in January.

In class assessment (10%).

MG306 Half Unit Not available in 2015/16 Managing Diversity in Organisations

This information is for the 2015/16 session.

Teacher responsible: Dr Alexandra Beaugregard NAB4.14

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course will be capped at 15 students.

Pre-requisites: None, but some background in either Organisational Behaviour (MG102) or Human Resource Management (MG201) would be useful.

Course content: The primary aim of the course is to develop students' understanding and critical awareness of issues associated with managing a workforce characterised by diversity in age, gender, race, religion, disability, and sexual orientation. The course endeavours to combine academic rigour with a practical focus on promoting equality, diversity and inclusion in the workplace, enabling students to both develop a critical understanding of relevant theoretical and empirical literature and apply acquired knowledge to specific diversity management scenarios. Seminars will require participation in group exercises designed to enhance students' appreciation of the wide range of issues associated with categorizing individuals as members of different groups, on whatever basis.

Students will become familiar with the drivers of increased workforce diversity, the psychological and sociological theories underlying discrimination and exclusion, current employment legislation related to diversity in the UK, and the barriers to equality of opportunity in the workplace for minority groups. Students will examine "best practice" in diversity management programmes and learn to critically assess organisational policies and practices for managing workplace diversity with regard to their ability to enhance organisational performance and avoid costly litigation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Lectures will be shared with MSc students, but separate classes will be held for undergraduate students.

Formative coursework: Students are required to submit an essay of 1,800 words

Indicative reading: A full reading list will be provided at the beginning of the course. Key texts include: Danowitz, M. A., Hanappi-Egger, E., & Mensi-Klarbach, H. (Eds.). *Diversity in organizations: Concepts and practices*. Basingstoke, UK: Palgrave Macmillan. Kirton, G., & Greene, A-M. (2010). *The dynamics of managing diversity: A critical approach*. Oxford, UK: Elsevier.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG307 Half Unit International Context of Management

This information is for the 2015/16 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG303.

Course content: The course aims to apply social science theory to the analysis of the conduct and management of transnational activities; to critically appraise concepts such as globalisation, regionalisation, national competitiveness, transnationality of firms, etc. in the context of international management structures and processes; to delineate the international political, economic, social and legal structures and environments within which the activity of management takes place. The topics to be covered will include: the nature of the contemporary global political economy; the globalisation of business, finance and trade in goods and services; Global competition; the transnational corporation in the global economy; the tension between globalisation and regionalisation; the international trading order; the international monetary regime; the impact of culture on global business; the changing position of the state in the global economy; the new diplomacy of states and firms.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and do the weekly class exercises.

Indicative reading: P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy* (7th edn), Sage Publications (2015); R W Griffen & M W Pustay, *International Business: A Managerial Perspective* (8th edn), Pearson Prentice-Hall (2015); O Shenker, Y Luo & T Chi, *International Business*, (3rd edn) Routledge (2015).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG308 Half Unit Simulation Modelling and Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Alicia Mejia-Salazar

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Elementary statistical concepts and experience of standard computer software is assumed.

Course content: The aim of the course is to introduce students to the concepts, techniques and applied aspects of the development and analysis of simulation models. The course will cover two main approaches for modelling problems bound by uncertainty (stochastic behaviour): Monte-Carlo Simulation (static problems) and Discrete Event Simulation (dynamic problems). Topics covered will include: types of uncertainty; types of simulation modelling; sampling methods; the simulation process; structuring problems for simulation; running simulation models; analysing simulation outputs; risk analysis using simulated models; testing and validating simulation models; applications of simulation. Excel modelling is an integral part of Monte Carlo simulation and at the end of the course students will have a sound foundation on how to set up different Excel models. Additional tutorial examples will be provided both throughout the course, and posted on Moodle to help develop this very important skill.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. An Excel help class may be held during reading week in Week 6.

Formative coursework: Three individual or small-group assignments will be required during the course.

Indicative reading: JR Evans & DL Olson (2002) *Introduction to Simulation and Risk Analysis*. Prentice-Hall: Upper Saddle River, NJ; AM Law (2006) *Simulation Modelling and Analysis*. McGraw-Hill: Boston, 4th ed.; M Pidd (2004) *Computer Simulation in Management Science*. Wiley: Chichester, 5th ed.; S Robinson (2004) *Simulation - The Practice of Model Development and Use*, Wiley:

Chichester; D Vose (2008) Risk Analysis - A Quantitative Guide, Wiley: Chichester, 3rd ed.

Assessment: Project (100%, 2000 words) in the ST.

An individual management report (maximum 2000 words) describing the modelling and results from a simulation study of a realistic decision problem. The problem will be defined by the end of the LT, the project should be completed by the beginning of the ST.

MG309 Half Unit Not available in 2015/16 International Human Resource Management

This information is for the 2015/16 session.

Teacher responsible: Dr Virginia Doellgast

Availability: This course is available on the BSc in Management. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None for students on the BSc Management degree. Students on other degrees and General Course students require permission of the instructor. Background in human resource management, employment relations, or sociology of work is recommended (e.g. ID100, ID205, SO212).

Course content: This course examines the human resource management (HRM) strategies of global corporations, with the aim of understanding both the causes of different strategic choices and the consequences of these strategies for diverse stakeholders. In course modules, we will evaluate the strategic choices facing global corporations, including the choice between adopting highly centralized or predominantly decentralized HR policies; HR considerations in the outsourcing and offshoring of work; and the role of HRM in managing international mergers and acquisitions. A central area of concern will be to analyze how institutional and cultural factors affect HRM policies and outcomes across the 'global supply chains' of MNCs.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 1 presentation and 1 exercise in the LT.

Indicative reading: Edwards, T. and C. Rees. (2011) International Human Resource Management: Globalization, National Systems, and Multinational Companies (2nd Edition). Essex: Pearson Education, Ltd. Harzing, A-W. and Ruysseveldt, J. V. (2011) International Human Resource Management, Third Edition. London: Sage Publications. Cattaneo, O., G. Gereffi, and C. Staritz (2010) Global Value Chains in a Postcrisis World. The World Bank Press. Edwards, T. and S. Kuruvilla (2005) International HRM: national business systems, organizational politics and the international division of labour in MNCs, International Journal of Human Resource Management. 16(1): 1-21. Gospel, H. and Sako M. (2010) The Re-bundling of Corporate Functions: The Evolution of Shared Services and Outsourcing in Human Resource Management, Industrial & Corporate Change. 19(5): 1367-1396.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Essay (20%, 2000 words).

MG310 Half Unit Risk and Decision Analysis for Management and Policy

This information is for the 2015/16 session.

Teacher responsible: To be confirmed

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is complementary to MG311 (Behavioural Decision Science for Management and Policy), which explains how unaided, intuitive decisions by individuals and groups are made, whereas this course explores how deliberation aided by quantitative models can improve the quality of decisions and develop shared understanding among the key players.

Pre-requisites: Elementary statistical and mathematical concepts and experience of standard computer software is assumed.

Course content: A major characteristic of all decisions in every organisation is that they are taken to achieve objectives, both short-term and long-term. To do this well is a fundamental skill for managers at every level in the organisation. But decisions are often hard to make in the presence of multiple objectives, uncertainty about the future, and differences of opinion among key players. For decisions that require large amounts of resources and commitments, the weight of responsibility felt by the decision maker can be heavy, especially when the consequences require considered judgements about trade-offs between benefits, risks and costs.

In this course students will learn how to use Risk and Decision Analysis as a form of analytics that supports decision making in private, voluntary and public organisations. The course shows how a consistent and realistic mix of data and judgement can help decision makers to better achieve their objectives. Based on sound theory underlying normative, descriptive and prescriptive decision-making research, the course emphasises the practical application of Risk and Decision Analysis for decision-making on any topic in any organisational setting.

The course is designed to enhance the students' decision capabilities when confronted with strategic or operational choices, when searching for decision opportunities, and when designing strategies and policies. It uses real-world Risk and Decision Analysis applications in organisations, and employs several case-studies (supported by specialised decision software) to build students' skills in decision modelling and analysis. It covers modelling and supporting decisions involving multiple stakeholders and conflicting objectives (multi-criteria decision analysis, portfolio decision analysis and resource allocation problems) as well as uncertainty (decision trees, influence diagrams, and risk analysis).

The course is suitable for third-year undergraduates, who will attend the same lectures as postgraduate MSc students, but different seminars. Past experience shows that both undergraduates and postgraduates benefit from asking questions and sharing their experiences in the interactive lectures.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Three formative assignments
Feedback on Group Project Plan

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer. Clemen, R.T. and Reilly, T. (2014) Making Hard Decisions. Pacific Grove: Duxbury. Edwards W., Miles Jr R.F. and von Winterfeldt D. (eds). Advances in Decision Analysis: From Foundations to Applications. Cambridge University Press: New York. Eisenführ, F., Weber, M. and Langer, T. (2010) Rational Decision Making, 1st ed. Berlin: Springer. Goodwin, P. and G. Wright (2014). Decision analysis for management judgement. Chichester, Wiley. Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection). Keeney, R. L. and Raiffa, H. (1993) Decisions with Multiple Objectives: Preferences and Value Trade-offs. Cambridge: Cambridge University Press, 2nd ed. McNamee, P. and Celona, J. (2007) Decision Analysis for the Professional. Menlo Park: Smart Org, 4th ed (e-book available in the library). G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley. Roy, B. (1996). Multicriteria Methodology for Decision Aiding. Dordrecht: Kluwer. von Winterfeldt, D. & Edwards, W. (1986) Decision Analysis and Behavioral Research. Cambridge: Cambridge University Press.

Assessment:

Group Project (50%) due week 11 of Lent Term
Individual Report (50%) due Week 1 of Summer Term

MG311 Half Unit**Behavioural Decision Science for Management and Policy**

This information is for the 2015/16 session.

Teacher responsible: Dr Barbara Fasolo NAB 3.15

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: An introductory quantitative course, such as MA107 or ST107 or equivalent.

It is an advantage to have taken an introductory social science course in one of these fields: economics (e.g. EC101 or EC102), management, psychology or sociology.

Course content: This course develops your ability to make decisions or help others make better decisions, with the help of 'system 1' – the fast, intuitive and (before this course) automatic way our brain makes decisions, and evaluates others' decisions. The aim is for you to become a better intuitive decision maker.

In lectures, taught with MSc students, we examine how behavioural decision science came about and review a number of descriptive theories of decision making. We also focus on empirical research on heuristics, biases, decision style and other phenomena which can unconsciously affect decisions. Because behavioural science started in the lab, the course includes a visit to the Behavioural Research Lab, to give you the experience (as researcher and participant) of what is behind the scenes of 'behavioural science and insights'. In seminars which are uniquely designed for undergraduates you apply this research to personal, managerial or policy decisions. This is a course for undergraduates with a strong passion for behavioural science and a keen interest in the psychology of decision making and applications for management and policy. Lectures are taught at an advanced level, and experientially (e.g., in-class experiments). It is suitable for 3rd year undergraduates who are keen to learn alongside master's students in their first term at LSE, from diverse backgrounds and cultures. The course is a natural complement, and preparation for, MG310, which aims at improving the other side of the decision-making brain – the slow and analytic ability to make strategic decisions via modelling and decision analytic techniques

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 1 lecture session (2 hours) will take place in the Behavioural Research Lab. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A 500-word essay plan for one long essay (to include a detailed plan, introduction, one full paragraph and conclusion). 2-3 pages of A4 maximum to be submitted AFTER reading week.

Indicative reading: Ariely, D. (2008). *Predictably Irrational: The Hidden Forces That Shape Our Decisions*. Harper Collins.
Bazerman, M. (2006) *Judgment in Managerial Decision Making*. New York: Wiley. 6th edition
Hastie, R., and Dawes, R.M. (2001). *Rational Choice in an Uncertain World*. Sage Publications, Thousand Oaks
Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited,
Sunstein, C.R. Thaler, R.H. (2008) *Nudge* - New Haven, CT: Yale University Press

Yates, F. J. (2003). *Decision Management: How to Assure Better Decisions in Your Company*. Jossey-Bass

Assessment: Coursework (10%, 500 words) in the MT. Essay (90%, 3000 words) in the LT.

Assessment will be as follows:

A 500-word report on the lab experience or experiment to be submitted in week 11 of MT (10%)

An essay of not more than 3,000 words to be submitted no later than the beginning of week 7 of LT, Monday 22nd February at 12:00pm (90%)

The essay will include two parts. In the first part (no more than 1,000 words), you will be asked to prepare a memorandum to the

CEO of an organisation (be it public or private, an NGO, a business corporation or a third sector enterprise) giving a behavioural insight on some decision to make, or situation to improve, or goal to achieve. In the second part of the essay (no more than 2,000 words), you will justify the specific recommendations presented in the memorandum with reference to behavioural and decision science literature and theories. The first part of the essay will count for 50% of your mark while 50% will come from the second part.

MG312 Half Unit**Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts**

This information is for the 2015/16 session.

Teacher responsible: Dr Tara Reich and Dr Chia-Huei Wu

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Organisational Behaviour (MG102) or Organisational Theory and Behaviour (MG203)

Course content: Extreme OB seeks to understand atypical forms organisational phenomena. Alternative forms of organisations and unique individual circumstances have become more commonplace in recent years; however, OB theories—designed to apply to "typical" workplace behaviour and contexts—have not kept pace. The emphasis in this course will be on critically evaluating existing OB theories as they relate to extreme forms of workplace behaviour (e.g., workaholism, pro- and antisocial behaviour) and contexts (e.g., military, hospital, and artist culture). Weekly topics include isolated and high pressure work environments, passion work, virtual and flexible teams, and compliance and proactivity.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 pieces of coursework (1 essay outline and 1 mock exam) in the MT.

Indicative reading: The course relies heavily on journal articles (for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behaviour*, and *Harvard Business Review*). An extensive reading list is provided at the start of the course. Indicative readings include: Eikhof, D. R., & Haunschild, A. (2006). Lifestyle meets market: Bohemian entrepreneurs in creative industries. *Creativity and Innovation Management*, 15, 234-241. Green, F. (2004). Why has work effort become more intense? *Industrial Relations*, 43, 709-741. Griffin, M. A., Neal, A., & Parker, S. K. (2007). A new model of work role performance: Positive behavior in uncertain and interdependent contexts. *Academy of Management Journal*, 50, 327-347. Hewlett, S. A., & Luce, C. B. (2006). Extreme jobs: the dangerous allure of the 70-hour workweek. *Harvard Business Review*, 84, 49-59. Johns, G. (2006). The essential impact of context on organizational behavior. *Academy of Management Review*, 31, 386-408. O'Boyle, Jr., E. H., Forsyth, D. R., Banks, G. C., & McDaniel, M. A. (2012). A meta-analysis of the Dark Triad and work behavior: A social exchange perspective. *Journal of Applied Psychology*, 97, 557-579. Perrewé, P. L., Hochwarter, W. A., Ferris, G. R., McAllister, C. P., & Harris, J. N. (2014). Developing a passion for work passion: Future directions on an emerging construct. *Journal of Organizational Behavior*, 35, 145-150.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Other (30%) in the LT.

MG313 Half Unit

Practical Optimisation Modelling

This information is for the 2015/16 session.

Teacher responsible: Dr Xue Lu

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have a knowledge of Mathematics and Statistics to the level of MA107 (Quantitative Methods - Mathematics) and ST107 (Quantitative methods - Statistics), or ST102 (Elementary Statistical Theory). OR202 is not a prerequisite but is advisable to be taken previously or in conjunction with the course.

Course content: Mathematical Optimisation is one of the most powerful and widely-used quantitative techniques for making optimal decisions. The course has a pragmatic focus and aims at enabling students to model and solve real-life management problems. An overview is provided on fundamental technique, most importantly linear and integer programming, emphasising modelling and solution concepts and methods (e.g. feasibility, optimality, duality, multiple objectives, using binary variables for modelling, network models). The students will learn to formalise management problems using linear and integer programming models, to implement these models using specialised optimisation software, and to analyse and interpret the results, reflecting on the limitations of the models.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of classes in the MT. 1 hour and 30 minutes of classes in the LT. 8 hours of computer help sessions in the MT. 2 hours of computer help sessions in the LT. Computer help sessions are optional. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will have the opportunity to submit a mock project for marking and feedback before the final assessed project is due. Students will also be given weekly homework exercises.

Indicative reading: H. Paul Williams: Model Building in Mathematical Programming, Fifth Edition, Wiley 2013. F S Hillier and G J Lieberman: Introduction to Operations Research, McGraw-Hill
D Bertsimas and J N Tsitsiklis: Introduction to Linear Optimization, Athena Scientific. A Ravindran, D T Philips, J J Solberg: Operations Research: Principles and Practice, Wiley.

Assessment: Project (100%) in the LT.

The course is examined entirely on a project to be submitted at the end of LT.

Obama's use of technology throughout his election campaign, as well as more traditional consumer products companies such as Starbucks and Mountain Dew.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Formative assessment will take the form of one group case write up which will be specified at the beginning of the course – this will be presented in class according to a published timetable. There will also be an opportunity to submit a practice exam, completed privately in exam conditions for formative assessment.

Indicative reading: Philip Kotler and Kevin Keller (2011), Marketing Management (14th edition), Pearson PrenticeHall Alex Chernev (2011), Strategic Marketing Management (6th edition), Cerebellum Press Philip Kotler and Gary Armstrong (2001), Principles of Marketing (9th edition), Prentice Hall
Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), Market-driven management: Strategic and operational marketing (2nd edition). London: Palgrave Macmillan

Further references will be provided during the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG315 Half Unit

Marketing Action Learning Project

This information is for the 2015/16 session.

Teacher responsible: Dr Haider Ali

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Principles of Marketing (MG314) or Core Disciplines II: Marketing, Human Resource Management and Information Management (MG201) plus 2 x 2 hour additional seminars in week 1.

Course content: This course will build on theoretical concepts taught in MG314 or MG201, by applying these theories and concepts to a real life situation. Working in groups, students will develop a marketing plan for a new product/service launch; from ideation through to setting marketing launch budgets, and considering Return on Investment. With support from the course leader, who has herself been involved in business start-ups, and outside commercial guest speakers/consultants, students will get the opportunity to use knowledge gleaned from many management courses to craft a compelling business plan. Every year some groups decide to pursue their ideas by actually becoming entrepreneurs and launching their products for real. Could you be our next marketing success story?

Teaching: 10 hours of lectures, 4 hours of seminars and 10 hours of classes in the LT.

The two two-hour week 1 seminars are compulsory for students who have previously only taken MG201. Students who have previously taken Principles of Marketing (MG314) do not need to attend these sessions. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 other piece of coursework and 2 other pieces of coursework in the LT.

In addition to the final report, there are three intermediate midterm requirements – Formative assessments.

- i) One page memo drafting the scope of the project area
- ii) Mid Term Report One – proposing the market segment to be targeted (based on relative attractiveness)
- iii) Mid Term Report Two – Research Plan

MG314 Half Unit

Principles of Marketing

This information is for the 2015/16 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Principles of marketing will include an introduction to the 3C's (Customer, Competition, Company), Marketing Strategy – particularly Segmentation, Targeting & Positioning, and the 4P's – Product, Price, Place, Promotion. Contemporary issues in marketing taught in lecture, will be brought to life by classes dedicated to examining the application of these ideas through the use of case studies looking at marketing problems faced by organisations such as the London Olympics Games Organising Committee, Barack

Indicative reading: Malcolm McDonald, *Marketing Plans: How to Prepare them, How to use them*, 7th Edition, Wiley
Business Model Generation, Osterwalder & Pigneur, Wiley

Assessment: Project (90%, 5000 words) and presentation (10%) in the LT.

The project will be completed in a group. A Group Evaluation Form will be required, where students' comments on their peers can affect the final grade allocated.

PH101

Logic

This information is for the 2015/16 session.

Teacher responsible: Prof John Worrall LAK3.02

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: We reason or make deductions all the time - both in intellectual disciplines and in everyday life. For example, a scientist will test a particular theory by reasoning that if that theory were true then some other claim, one that can be checked observationally or experimentally, would have to be true as well - that is, by showing that some observationally testable claim is deducible from the theory. Mathematics is of course concerned with proofs and proofs are deductive inferences. Finally, philosophy is centrally concerned with arguments or deductions. To take one example, many have argued that the presence of evil in the world is incompatible with the existence of an all-powerful, all-knowing, all-merciful god as proposed in, for example, Judaeo-Christian theology. That is, they have claimed that if you assumed that there is such a god, then it would follow, or you could infer that, there would be no evil in the world. But since there is evil, it follows that there can be no such god. More mundanely, we reason, or make inferences, all the time - though we don't always think of it that way.

Deductive Logic is the study of such inferences - it therefore has an enormously broad scope. Different disciplines have different ways of garnering information in the first place (the way that we arrive at a scientific theory is different from the way that we arrive at an axiom in mathematics or a thesis in philosophy), but the way that we reason from that information is the same no matter what the discipline. The main task of logic is to give an explicit characterisation of those inferences that are correct, or as we shall say, VALID (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion really does follow from some premises and when it does not.

The course begins with a simple system called propositional or truth-functional logic, which despite its simplicity captures a great range of important arguments. The system of predicate logic that we study next is, however, still more powerful and provides the logical basis not only for ordinary inferences but also for inferences in the sciences. In both the case of propositional and of predicate logic, the course also covers other notions, such as the consistency of a set of sentences, and the independence of one sentence from a set of assumptions, that are closely related to validity of inference. Finally the course covers some issues in the foundations of logic - to do with truth and sets.

Teaching: 15 hours of lectures and 9 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

Formative coursework: Formative coursework will take the form of a number of computer based quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the computer based quizzes, students are required to complete them before a specific deadline; these will be discussed in class. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be

formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination for this course.

Indicative reading: Detailed course notes are provided and are intended to be sufficient reading for the course. However for those who like to have a book the one whose treatment is closest to that adopted in the lectures is P. Suppes *Introduction to Logic* (Van Nostrand).

Assessment: Exam (90%, duration: 3 hours) in the main exam period.

Class participation (10%).

PH103

Reason, Knowledge and Values: An Introduction to Philosophy

This information is for the 2015/16 session.

Teacher responsible: Dr Heather Dyke

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available on the BSc in International Relations and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In his Letter to Menoeceus, Epicurus (341-271 BC) advises us that the successful study of philosophy will help one to "live like a god among men." The aims and objectives of this course are more modest. Reason, Knowledge and Values provides an introduction to analytical philosophy by using classic and contemporary texts to study a selection of philosophical problems. It aims to acquaint students with some of the central questions of philosophy and to engage students in critical analysis of classic answers to these questions by authors including Plato, Popper, Hume, Hobbes, Mill, Locke and others. It also aims to develop students' ability to think about and discuss philosophical issues systematically, critically, and patiently, and to develop their philosophical curiosity and imagination. Students should complete this course with knowledge of the basic types of philosophical argument and of the following questions and some classic answers to them:

- Does morality depend on religion?
- Is the existence of evil compatible with the existence of God?
- What is the relationship between determinism, free will, and moral responsibility?
- What makes us the same person over time, even though we change in many ways?
- Does time flow? Is time travel possible?
- What is knowledge?
- Do we know anything for certain?
- Is there any difference between science and pseudo-science?
- What is the relation between science and philosophy? We will also examine some questions of applied ethics, such as:
 - When, if ever, is censorship permissible?
 - What, if anything, is wrong with drug use in sport?
 - How should we treat the environment? Students should also develop the ability to:
 - Think clearly and thoroughly about philosophical issues.
 - Understand a philosophical text on its own terms: determine the aims the author sets him- or herself, consider the meaning of words, concepts, and expressions particular to the text and the argument; ask questions about the context in which the argument is situated.
 - Critically evaluate arguments: distinguish valid from invalid, sound from unsound, deductive from inductive, plausible from implausible arguments.
 - Debate and write about these issues in a philosophical manner.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Parallel to this course, we will run a short five week course on 'Philosophy and Argumentative Writing' with practical advice to improve your writing style and with writing exercises. Students in the BSc in Philosophy and Economics, the BSc in Philosophy, Logic and Scientific Method, and the BSc in Philosophy, Politics and Economics are required to attend (5 hours of workshops in **either** MT **or** LT) and do all assignments. Other students are *invited* to do so.

Formative coursework: Students will be expected to write one formative essay in MT and two formative essays in LT.

Indicative reading: The readings will be articles and excerpts from books and will be made available via Moodle.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 1500 words) in the ST.

PH104 Not available in 2015/16

Formal Methods of Philosophical Argumentation

This information is for the 2015/16 session.

Teacher responsible: Prof John Worrall LAK 3.02

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is compulsory on the BSc in Philosophy, Politics and Economics (2nd year). It is compulsory on the BSc in Philosophy and Economics for those students who do not take PH101 in their first year. It is available as a more demanding alternative to PH101 the BSc Philosophy and Economics (1st year); BSc in Philosophy, Logic and Scientific Method and the BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students will be advised that it is a more demanding alternative to PH101. Only students with facility in formal reasoning (such as employed in mathematics or statistics) are advised to take this course rather than PH101.

Course content: 1. **Deductive Logic.** Philosophy is centrally concerned with arguments – for or against the existence of God, for or against the idea that humans possess free will, for or against the idea of an objective and absolute system of morality, etc. The first question to be asked of any argument (or inference) is whether or not it is valid: that is, does its conclusion really follow from the cited premises?

Validity of inference is the central problem of deductive logic. Logic has universal scope: different disciplines have different ways of garnering information (the way that we arrive at a scientific theory is different from the way that we arrive at an axiom in mathematics or a thesis in philosophy), but the way that we reason deductively from that information is the same no matter what the discipline. The key to answering some other formal questions that often arise in philosophy – such as whether a position (set of assumptions and claims) is consistent (let alone true) – is also provided by deductive logic.

This section of the course covers first a simple system called propositional or truth-functional logic, which despite its simplicity captures a great range of important arguments and provides a formal articulation of the key notions of validity and consistency. The main system covered, however, is (first order) predicate logic, which is powerful enough to capture not only simple inferences but also those involved in philosophy and the sciences.

The final section of this part of the course investigates more systematically how the formal techniques provided by these systems of logic relate to the invariably more informal arguments found in philosophy (and ordinary discourse).

2. **Probability.** In a valid deductive argument, the conclusion *must* be true if the premises are. Many inferences that we make,

however, conclude only that a certain claim is probable (or more probable than it would otherwise be). For example, we clearly cannot infer from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data), that s/he will die early from smoking-related illness, but we can infer that it is much more probable that she will than if s/he did not smoke. Issues about probabilities play many roles in current philosophical debates: in decision theory, philosophy of economics, philosophy of physics and many other areas. Building on the axiomatic development of probability that students will have covered in ST102, this section of the course will cover elements of probability logic together with some foundational issues. For example, it turns out that there are importantly different notions of probabilities, that is, different interpretations of these axioms. In particular, a subjective interpretation which makes probabilities credences or degrees of belief and objective interpretations which see probabilities as properties of physical events (like the probability of a particular radioactive atom decaying in a given time interval). Some interesting difficulties arise with both interpretations.

The subjective interpretation has been developed into a full-blown and general "Bayesian" account of theory confirmation in science, the essentials of which will also be covered.

3. **Formal Philosophical Devices.** This final section of the course covers some of the formal, technical ideas that are often presupposed in contemporary philosophical work: this may include the notions of sets and infinities; theories of truth; analyticity and apriority; possibility and necessity; and conditionals. Many of these notions have been clarified via analyses of various celebrated paradoxes that will also be covered in this section of the course.

Teaching: 15 hours of lectures and 9 hours of classes in the MT.

15 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

There are regular structured exercises on Moodle, as there are now for PH101.

Formative coursework: Students will be expected to produce 10 quizzes and 10 exercises in the MT and LT.

Formative coursework will take the form of a number of computer-based quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the computer-based quizzes, students are required to complete them before a specific deadline; these will be discussed in class. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination. For later sections of the course, exercises will include questions requiring brief essay answers.

Indicative reading: John Worrall; *Deductive Logic* (unpublished notes); Colin Howson and Peter Urbach: *Scientific Reasoning- the Bayesian Approach* 3rd edition, Open Court, 2006. Alan Hajek 'Interpretations of Probability' Stanford Encyclopaedia of Philosophy <http://plato.stanford.edu/entries/probability-interpret>. David Papineau, *Philosophical Devices: Proofs, Probabilities, Possibilities and Sets*. OUP 2012; Mark Sainsbury *Paradoxes*, CUP. For Part 1: extensive notes are provided that are intended to be sufficient reading for this section of the course. Patrick Suppes, *Introduction to Logic* (Van Nostrand) is the book that most closely follows the system developed in the lectures. For Part 2: Further course notes; Colin Howson and Peter Urbach: *Scientific Reasoning- the Bayesian Approach* 3rd edition, Open Court, 2006. Entry on 'Interpretations of Probability' by Alan Hajek in the Stanford Encyclopaedia of Philosophy <http://plato.stanford.edu/entries/probability-interpret> For Part 3: David Papineau, *Philosophical Devices: Proofs, Probabilities, Possibilities and Sets*. OUP 2012; Mark Sainsbury *Paradoxes*, CUP.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH201

Philosophy of Science

This information is for the 2015/16 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered. The issues we will tackle are the following. Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account, Bayesianism. Theories and laws: the received view of theories, the semantic view of theories, the regularity view of laws, law idealism, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and the no miracles argument, inference to the best explanation, antirealism and the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton's physics.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to write 2 formative essays per term, submit a few short answer questions before each class/seminar, and participate in class discussion.

Indicative reading: P Godfrey-Smith: *Theory and Reality: An Introduction to the Philosophy of Science*. C Hitchcock (editor): *Contemporary Debates in Philosophy of Science*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

explanations; rationality and relativism; the role of values in social science; social norms; the construction of social reality; methods of evolutionary explanation in the social sciences; philosophical and methodological critiques of evolutionary psychology. In addition, philosophical problems of particular social sciences such as anthropology, sociology, and economics will also be addressed.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to write two essays per term and to give class presentations.

Indicative reading: A detailed reading list may be found on the Moodle page for the course. Useful preliminary background readings include: The Philosophy of Social Science Reader Francesco Guala and Daniel Steel (eds); Daniel Little, *Varieties of Social Explanation*; Alex Rosenberg, *Philosophy of Social Science*; Martin Hollis, *The Philosophy of Social Science*; Brian Skyrms, *Evolution of the Social Contract*. A useful anthology is *Readings in the Philosophy of Social Science*, edited by Michael Martin and Lee McIntyre.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the LT.

PH213

Scientific Revolutions: Philosophical and Historical Issues

This information is for the 2015/16 session.

Teacher responsible: Prof John Worrall LAK 3.02

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No prior systematic knowledge of physical and biological science is presupposed.

Course content: The course examines a number of fundamental issues in philosophy of science, as they arise from instances of important theory-changes (so-called 'scientific revolutions') in the history of science. It is therefore by no means a 'straight' course in history of science: it looks at historical episodes to test and/or illustrate philosophical theses about science and its development.

1. The Copernican revolution: the switch from the Ptolemaic geocentric view of the world to the Copernican heliocentric one was probably the greatest revolution in human thought ever: What justified the switch? Was Ptolemaic theory definitively refuted by the data? Was Copernican theory simpler? Was the Church's view that Copernican theory should only be thought of as an instrument for calculating astronomical data purely theologically motivated or does it have some scientific rationale? What role was played in the eventual acceptance of the Copernican view by predictive success? Do we need to invoke social or other non-intellectual factors to explain why this 'revolution' occurred?

2. Galileo: Galileo and the telescope: are all observations 'theory-laden' and does this mean that there is a subjective element to all theory-choices? Galileo and the argument for his law of free fall: can theories be 'deduced from the phenomena'?

3. The Newtonian revolution: What was the relationship between Newton's theory and Kepler's and Galileo's laws? What does this tell us about theory-change in general?

4. 19th Century revolutions in Optics: the switches from the corpuscular theory to the wave theory of light and from the wave theory to the electromagnetic theory. What do these cases of theory-change tell us about the twin theses of scientific rationality and scientific realism?

5. The Darwinian Revolution: This revolution certainly ranks alongside the Copernican one in terms of its impact on man's view of herself. But debates about the scientific credentials of Darwin's

PH203

Philosophy of the Social Sciences

This information is for the 2015/16 session.

Teacher responsible: Prof Jason Alexander LAK. T501b

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in International Relations, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: No formal pre-requisites, but PH103 *Reason Knowledge and Values: An Introduction to Philosophy* or equivalent is recommended.

Course content: Philosophical issues concerning the nature of social scientific theory and its applications.

Topics to be covered will include some or all of the following: the explanation and interpretation of action; naturalist and hermeneutic social theory; the nature of social facts; reductionism and methodological individualism; functional and structural

theory began immediately on the publication of Darwin's work and continue to this day. Is Darwinian theory unfalsifiable (or even just one big tautology)? Can 'scientific' creationists explain everything that Darwin can?; What objections were raised by Darwin's critics to particular aspects of Darwinian theory? Were these valid objections and, in so far as they were, have they now been resolved?

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

Formative coursework: Students will be expected to write two essays per term of 1500 words maximum, and to give class papers.

Indicative reading: Background reading: T S Kuhn, *The Structure of Scientific Revolutions*; Imre Lakatos 'Falsification and the Methodology of Scientific Research Programmes' in his *The Methodology of Scientific Research Programmes*, Philosophical Papers 1; G Holton (revised by S Brush): *Theories and Concepts in Physical Science*. Recommended reading: The central text for the first part of the course is T S Kuhn, *The Copernican Revolution*, Harvard University Press; the central text for part 5 is Philip Kitcher: *Abusing Science: the case against Creationism*. MIT Press. There will be lecture slides on each topic including (i) a list of essential reading and suggestions for further reading and (ii) 'study questions' to guide your thought. Aside from the above reading for the section of the course on the Copernican revolution, reading for particular topics will be in the form of articles and selections from books. These will be made available through a combination of handouts, course pack and the Offprint Collection.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH214

Philosophy, Morals and Politics

This information is for the 2015/16 session.

Teacher responsible: Professor Michael Otsuka LAK.3.03 and Dr Susanne Burri LAK.4.02.

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Michaelmas Term: Morals (Michael Otsuka weeks 1-5; Susanne Burri weeks 6-10)

In weeks 1-5 of MT, Michael Otsuka will discuss the ethics of harming and saving from harm: **(i)** Should one save the greater number from harm?; **(ii)** Can contractualism justify the saving of the greater number when and only when we ought to?; **(iii)** Should one be solely concerned with how badly off people are, or should one also care about inequality?; **(iv)** Does it make a moral difference that a person is less well off than she could have been? (a.k.a. 'the non-identity problem'); **(v)** Why is it permissible to divert a tram so that it runs over one rather than five, whereas it is impermissible to kill a single individual in order to redistribute his vital organs to save the lives of five? (a.k.a. 'the trolley problem').

In weeks 6-10 of MT, Susanne Burri will cover the following topics: **(vi)** Kantian moral theory I: the project of the *Groundwork* and the Formula of Universal Law; **(vii)** Kantian moral theory II: the Formula of Humanity and proper respect for persons; **(viii)** Aristotelian virtue ethics I: the human good and the Function Argument; **(ix)** Aristotelian virtue ethics II: practical deliberation and the Doctrine of the Mean; **(x)** Why be moral? Why do what is right when moral reasons clash with what is in our rational self-interest?

Lent Term: Politics (Michael Otsuka all ten weeks)

Lent Term will be devoted to the topics of justice and legitimacy. We will begin with the following questions: What does justice require? Does it demand the redistribution of income from rich to poor in order to create a more egalitarian society? We'll discuss the answers

to these questions that John Rawls and Robert Nozick have provided. Rawls argues that such taxation is just, since it would be endorsed under fair conditions in which people are deprived of knowledge of whether they happen to be rich or poor, talented or unskilled. Nozick argues that redistributive taxation is unjust because on a par with forced labour. In addition, we'll consider their answers to the following questions: When it is unjust to constrain the liberties of some in order to prevent harm to others? What sort of equality of opportunity for jobs and university places does justice require? Are people entitled to compensation for historical injustices? What are the just conditions of acquisition of unowned natural resources? In answering the last question, we will also draw on the writings of John Locke, whose related views in his *Second Treatise* on the legitimacy of government we will also consider, along with the Locke-inspired views of Thomas Jefferson.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be required to participate in class discussions and to write two essays per term.

Indicative reading: John Taurek, 'Should the Numbers Count?' *Philosophy & Public Affairs*, 6 (1977): 293-316; Derek Parfit, 'Equality and Priority', *Ratio*, 10 (1997): 202-221; Derek Parfit, *Reasons and Persons*, Oxford University Press; Immanuel Kant, *Groundwork of the Metaphysics of Morals*; Aristotle, *Nicomachean Ethics*; John Rawls, *A Theory of Justice*, revised edition, Harvard University Press; Robert Nozick, *Anarchy, State and Utopia*, Blackwell; John Locke, *Second Treatise of Government*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH217

Set Theory and Further Logic

This information is for the 2015/16 session.

Teacher responsible: Makinson, David

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students must have completed Logic (PH101).

Course content: The aim of the course is to help students of philosophy become familiar with naive set theory, classical logic, and modal logic. From set theory, the course covers 'working' set theory as a tool for use in formal reasoning, and also some 'conceptual' set theory of philosophical interest in its treatment of infinite sets, cardinals and ordinals. From classical logic, it deals with propositional and first-order inference from both semantic and axiomatic viewpoints, with also some material on first-order theories including celebrated theorems of Tarski and Godel. The material on modal propositional logic presents the main axiomatic systems and their analysis using relational models. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one essay on a topic selected from a list or proposed by the student and approved by the instructor.

Indicative reading: Textbooks: Makinson, David 2012 *Sets, Logic and Maths for Computing*, 2nd edition. Springer; Cameron, Peter 1999 *Sets, Logic and Categories*. Springer; Sider, Theodore 2010 *Logic for Philosophy*. Oxford University Press. Remark: Specific sections of these three texts that are relevant to weekly topics will be indicated on the Moodle page for the course. Complementary reading: Crossley, John 1972 *What is Mathematical Logic?* (Dover reprint 1991); Goble, Lou ed 2001 *The*

Blackwell Guide to Philosophical Logic (Blackwell); Halmos, Paul Naive Set Theory (Springer reprint 2011); Smith, Peter 2015 Gödel without (too many) tears <http://www.logicmatters.net/igt/godel-without-tears/>; Stanford Encyclopedia of Philosophy <http://www.plato.stanford.edu/>.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH220

Scientific Method and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Katie Steele

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Policy decisions should be responsive to our best evidence. But what does this mean? How should we negotiate conflicting sources of evidence? And whose responsibility is it to link policy and evidence?

These questions reflect the two main topics of the course.

The first topic concerns the quality, strength and relevance of the available evidence with respect to a given policy question.

This is a central issue in the 'evidence-based' policy-and-medicine movement. Are randomised controlled trials really the gold standard? Can evidence be statistically significant without being scientifically or practically significant, and vice versa? What is the role of quantitative versus qualitative evidence in establishing causal claims? How do general causal claims bear on individual cases, and vice versa? Can some evidence be disregarded due to cultural and political biases?

The second topic concerns the roles and responsibilities of scientists, policy-makers and citizens alike in enhancing evidence-based policy making. What does it mean to say that there is a scientific consensus? Does expert knowledge of scientists constitute a threat to democratic processes? What is the 'Precautionary Principle' and does it provide a way forward when there is little evidence available? To what extent should individual rights be compromised to enable scientific research? What issues arise when scientists interpret and measure ethically-loaded concepts like poverty, well-being or bio-diversity? Is science a 'public good' and what does this mean for how it should be managed?

Examples referred to in the course are drawn from various areas of science in policy-making, including climate, conservation, international development, poverty, education, and health.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays and 1 presentation in the MT and LT.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful background readings are: Cartwright, N. and Hardie, J. (2012) *Evidence-Based Policy: A Practical Guide to Doing it Better*; Mackie, J.L. (1980) *The Cement of the Universe*; Howson, C. and Urbach, P. (1993) *Scientific Reasoning: A Bayesian Approach*; Kitcher, P. (2011) *Science in a Democratic Society*; Douglas, H. (2009) *Science in Policy-Making: Objectivity, Values, and Risk*; Stiglitz, J.E. Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH221

Problems of Analytic Philosophy

This information is for the 2015/16 session.

Teacher responsible: Dr Peter Dennis LAK2.01

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Pre-requisites: PH103 Reason, Knowledge and Values.

Course content: Short description: Some central topics in metaphysics, epistemology, the philosophy of mind and the philosophy of logic and language. Topics may vary by year. More detailed description: The rise of analytic philosophy will likely be remembered as one of the most significant revolutions in the history of the subject. The introduction of new and powerful methods transformed old problems and uncovered new ones, exercising the minds of some of the greatest philosophers of all time. These include early founders such as Gottlob Frege, G.E. Moore, Bertrand Russell, Ludwig Wittgenstein, and Elizabeth Anscombe, as well as more recent practitioners such as Donald Davidson and Hilary Putnam. So successful has it been that the vast majority of philosophy departments in the English-speaking world today would describe themselves as 'analytic'.

This course offers a snapshot of some of the deepest and most enduring problems of analytic philosophy, covering its four core areas: philosophy of language, philosophy of mind, epistemology, and metaphysics. By gaining familiarity with classic and contemporary texts in analytic philosophy, students will be encouraged to seek answers to questions such as the following.

Language
What is the relationship between language and reality? How do words 'pick out' objects in the world? Is meaning 'in the head'? What is truth? And could you have thoughts if you didn't already speak a language?

- Readings from Gottlob Frege, Bertrand Russell, Hilary Putnam, and Ludwig Wittgenstein.

Mind

What are minds? What is the relationship between minds and brains, and how do mental events cause physical ones? How does consciousness emerge from matter? And do the objects of thought extend beyond the contents of our own minds?

- Readings from Donald Davidson, J.J.C Smart, and David Chalmers.

Epistemology

We look at some foundational issues underlying epistemology such as: What is perceptual experience? Is there a 'gap' between experience and reality? Can we ever know the contents of another person's mind?

- Readings from A. J. Ayer, John Searle, Paul Snowdon and J.M. Hinton

Metaphysics

What is time? Is there any real difference between causes and effects, and if so how are they related? What makes you a different person from me, and what (if anything) makes you the same person throughout your life?

- Readings from David Lewis, Peter van Inwagen, Elizabeth Anscombe, and Derek Parfit.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Lectures are taught alongside PH501 postgraduate students.

Formative coursework: Students will be expected to participate actively in their classes and to write 3 formative essays, each with a 2000 word limit. None of these may be a draft of the summative assignment.

Indicative reading: Bertrand Russell, *Problems of Philosophy* (Any Edition)

A.P. Martinich & D. Sosa (eds.) *Analytic Philosophy: An Anthology*. Oxford: Blackwell

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH222

Philosophy and Public Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Alexander Voorhoeve, Prof Michael Otsuka, Dr Katie Steele and Dr Peter Dennis

Availability: This course is compulsory on the BSc in Politics and Philosophy. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as: 1. What is well-being, how is it measured, and how should it be measured? 2. When, if ever, is paternalism justified? 3. What is the role of personal responsibility in determining people's claims on public resources? 4. When, if ever, is equality in the distribution of goods (such as health, income, or well-being) important? 5. How should we evaluate risks of harm and chances of benefit to people? 6. When is it permissible to harm others in self-defence? 7. What are our rights to freedom of expression? 8. Is torture ever justified? 9. What are the limits on privacy? 10. What moral principles govern our treatment of non-human animals?

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay and 1 exercise in the LT.

Indicative reading: J. Wolff. (2011) *Ethics and Public Policy: A Philosophical Inquiry*; J. Feinberg. (1971) 'Paternalism'; J.S. Mill 'On Liberty'; National Institute for Clinical Excellence (2008) 'Social Value Judgments'; D. Parfit (2000) 'Equality or Priority?'; J. McMahan (2009), 'Killing in War'; R. Dworkin et al (1997): 'Assisted Suicide: The Philosophers' Brief'; S. White (2004) 'What's Wrong with Workfare?'; Regan (1980): 'Utilitarianism, Vegetarianism, and Animal Rights'; White

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH225 Half Unit

Business and Organisational Ethics

This information is for the 2015/16 session.

Teacher responsible: Dr Susanne Burri

Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available to General Course students.

Course content: This introductory course to business and organisational ethics introduces different approaches to normative theorising, explains how these approaches relate to standard ways of managerial and economic decision-making, and discusses to what extent business professionals should think of themselves as bound by moral requirements. The course is divided into three parts. The first part raises normative questions about the structure in which firms operate, including questions about the proper scope of markets and distributive justice. The second part outlines

a framework for incorporating moral principles into the decision-making of business professionals. The third part focuses on firms and corporations as units of moral concern, with a particular focus on their role in international and global affairs. Topics discussed include the significance of international labour standards, how business professionals should respond to practises like bribery and insider trading, and how responsibility is properly distributed between corporate and individual actors.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: One essay of 1500 words.

Indicative reading: Arthur I. Applbaum (2000), *Ethics for Adversaries*, Princeton University Press
Robert Audi (2005), 'The Place of Cost-Benefit Analysis in Business and the Professions', *Business and Professional Ethics Journal*, 24 (3), 2-21. Norman E. Bowie, (2001), *The Blackwell Guide to Business Ethics* (Blackwell Philosophy Guides), Wiley-Blackwell
Nien-he Hsieh (2009), 'Does Global Business Have a Duty to Promote Just Institutions?', *Business Ethics Quarterly*, Vol. 19 (2), 251-273

Martin Sandbu (2011), *Just Business: Arguments in Business Ethics*, Prentice Hall

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH227 Half Unit

Genes, Brains and Society

This information is for the 2015/16 session.

Teacher responsible: Andrew Buskell

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: This course introduces issues in bioethics, neuroethics, philosophy of biology, and philosophy of psychology. It demonstrates how philosophical tools can help make sense of the complex problems arising at the intersection of human beings' evolved nature and the social structures humans have erected. The course will challenge conceptions as to what human beings are, and what we, as human beings, might ultimately be responsible for.

Topics covered include:

Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits that are part of 'human nature' and those which are not? What might the evolutionary history of human beings as social agents have to tell us about 'human nature'?

Disability: How do we determine whether an individual is disabled or not? Does the recognition of an individual as disabled change their moral status? Does society bear some responsibility for the care of disabled individuals, and in what way?

Sex and gender: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are they explained by genes or by culture? And should we reconcile ourselves to these differences, or should we try to eliminate them?

Race: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of 'race' have a future, or will human societies soon become racially undifferentiated?

Responsibility and Social Structure: Are problems with racism, sexism, and disability systemic, societal problems? Or, by contrast, are they the result of biased, racist, and sexist individuals? How are we to enact changes to society on these different conceptions of the root cause(s)?

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: One essay (1,500 words)

Indicative reading: Suggested introductory readings: Brown, G. and Laland, K. (2002) *Sense and Nonsense*. Oxford University Press. Fine, C. (2011) *Delusions of Gender*. Icon Books. Goodley, D. (2011) *Disability Studies*. Sage. King, M.L. 'Letter from a Birmingham Jail' Available online: <http://www.uscrossier.org/pullias/wp-content/uploads/2012/06/king.pdf>

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 1500 words).

PH228 Half Unit

Emotion, Cognition and Behaviour: Science and Policy

This information is for the 2015/16 session.

Teacher responsible: Andrew Buskell.

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the (i) philosophical and (ii) scientific foundations of contemporary cognitive science with a particular focus on its (iii) ethical, social and political implications. No background in either philosophy or cognitive science is required.

Topics covered include:

Part I: Kinds of Minds

Animals and associations: What kind of cognitive capacities do we share with animals? Which of these capacities, if any, are still operational in human thought? Might human cognition be simpler than we suppose?

Thought as computation: What does it mean to say that thought is 'computational'? What is getting computed, and how? Are there limits to the 'computer' analogy?

Part II: Modelling Minds

'Dual-process' theories of cognition: Do cognitive processes come in 'fast' and 'slow' varieties? Is the mind partitioned into two systems? Or is the true picture more complicated than this?

The boundaries of thought: Are thoughts wholly 'in the head'? How might they extend beyond it? Where does cognition begin and end?

Part III: Implications and Applications

Emotion and morality: Is explicit moral reasoning nothing more than the after-the-event rationalization of snap judgements made in the emotional heat of the moment? If so, where does that leave ethics? Implicit bias: Could we be unaware of our own racial and gender biases? Are we responsible for the decisions they influence? And is there anything we can do about them?

Happy societies: Should policymakers attempt to increase or improve the happiness of society? What would this mean, and how would we go about enacting such a policy?

Cognitive enhancement: What are the prospects for enhancing human cognitive capacity by technological means? What are the ethical limits? Are there any?

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: One formative essay and comments on a draft of the assessed essay.

Indicative reading: Suggested introductory reading: Kahneman, D. (2011), *Thinking Fast and Slow*. Allen Lane/Penguin. Shapiro, L. (2011), *Embodied Cognition*. Routledge. Steele, C.M. (2011), *Whistling Vivaldi: How Stereotypes Affect Us and What We Can Do*. W.W. Norton & Co. Thaler, R. H. and C. R. Sunstein (2008), *Nudge*. Yale/Penguin.

Assessment: Exam (67%, duration: 2 hours) in the LT week 0. Essay (33%, 1500 words).

PH229 Half Unit Not available in 2015/16

Global Justice

This information is for the 2015/16 session.

Teacher responsible: Dr Alice Obrecht

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course addresses normative challenges that arise from globalization with a particular focus on the global economy. In doing so it raises foundational questions in moral and political philosophy (e.g., about the grounds and scope of justice), it reflects questions of method (e.g., about how to do empirically informed normative theory able to guide the action of real world actors), and tackles applied public policy issues (e.g., of how to make the international financial system more just). The course is divided into three parts. The first part examines how principles and values traditionally used to morally assess the political and economic institutions of domestic society apply beyond the nation state. The questions discussed include: What are normatively significant differences between the domestic basic structure and the international order? Do conditions of coercion or reciprocal cooperation give rise to obligations of distributive justice? Do individuals possess human rights simply in virtue of being human, or should we think of such rights as arising within particular political practices? The second part focuses on particular aspects of global capitalism and its institutions. Beginning with the problem of global poverty, which raises empirical and normative questions about the nature of both the interactions and obligations between various actors in the global economy, the course explores what moral principles apply to the practice of global trade, the international financial system and the distribution of natural resources. The third part explores different ways of bringing the global economy in line with the normative requirements that apply to it. Particular attention will be given to questions like: What is the promise of international taxation as an instrument for making the global order more just? Under what circumstances, if any, may the victims of global injustices resort to violence and war as a means of bringing about justice? How should policy makers balance the need for short-term improvements with the aspiration of long-term transformation?

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: 2 formative essays.

Indicative reading: Dobos, Ned, Christian Barry, and Thomas Pogge (eds.), *Global Financial Crisis: The Ethical Issues*. Palgrave Macmillan, 2011; James, Aaron. *Fairness in Practice: A Social Contract for a Global Economy*. Oxford University Press, 2012; Risse, Mathias. *On Global Justice*. Princeton University Press, 2012; Ronzoni, Miriam. "The Global Order: A Case of Background Injustice? A Practice-Dependent Account." *Philosophy & Public Affairs* 37, no. 3 (2009): 229-256; Sangiovanni, Andrea. "The Irrelevance of Coercion, Imposition, and Framing to Distributive Justice." *Philosophy & Public Affairs* 40, no. 2 (2012): 79-110.

Assessment: Exam (67%, duration: 2 hours) in the main exam period.

Essay (33%, 2000 words) in the ST.

PH230 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2015/16 session.

Teacher responsible: Dr Bryan Roberts

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations

permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and should we be worried about experiments at the LHC creating them? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. The topics of the course will include: 1) Relativity: Slowing clocks, shrinking rods, and the relativity of simultaneity; 2) Spacetime: Thinking in 4-dimensions, faster-than-light travel, and other philosophical issues; 3) Non-Euclidean thinking: Beyond the geometry of Euclid, measuring curvature, gravity as curved spacetime; 4) Cosmology: Our place in the universe, big bang cosmology, time travel; 5) Limits of space and time: Geometry, black holes, singularities.

Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory. One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves.

Einstein for Everyone requires absolutely no background in physics or maths. Students are only required to learn two equations, which really cannot be omitted: $E=mc^2$, and Einstein's equation!

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Weekly problem sets and short discussion questions submitted through Moodle and for review in classes.

Indicative reading: - Norton, John D. (2015) *Einstein for Everyone*. - Hugget, Nick. (2010)

- Einstein, Albert (1920) *Relativity: The special and general theory*.

- Euclid (1908) *The Thirteen Books of Euclid's Elements*, Vol I.

- Poincaré, Henri (1905) *Science and Hypothesis*.

Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles.

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

PH232 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2015/16 session.

Teacher responsible: Dr Bryan Roberts

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? What role should analogy play in physical

and financial modelling?

The course will proceed at a conceptual level that is suitable for students of all backgrounds. We begin by introducing the concept of atoms and of the random walk, and investigate the role it played in the development of quantum theory and particle physics. We then explore how random walks and other models used in physics are applied in financial models, and analyse some of the philosophical issues underlying this practice.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Weekly problem sets and short discussion questions submitted through Moodle and for review in classes.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Derman, E. *My Life as a Quant*. Excerpts.

- Mirowski, Phillip. *More Heat than Light*. Misc. Excerpts.

- Norton, John D. *Einstein for Everyone*. Chapters 34-37 on Brownian motion and the origins of quantum theory.

- Weatherall, James O. *The Physics of Wallstreet*. Chapter 5, "Physics Hits the Street" on the discovery of the Black-Scholes Equation.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

PH311

Philosophy of Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Joseph Mazor CONNAUGHT 3.01 and Dr Alexander Voorhoeve LAK 401

Availability: This course is compulsory on the BSc in Philosophy and Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics A (EC100).

Intermediate microeconomics and/or public economics recommended but not required for the material in the Michaelmas Term of the course.

Although it is a third-year course, second-year students can take it with permission.

Course content: The first term, 'Welfare Economics', covers several topics in the analysis of public policy, including efficiency and its critics; optimal taxation and its critics; cost-benefit analysis; public goods; externalities; fair prices; paternalism and behavioural economics; and the ethics of the discount rate.

The second term falls into three parts.

Part A: 'The Value of Economic Models' focuses on questions in the philosophy of science, including, 'Does it matter that economic models have false assumptions?'; and 'What makes for a good (or bad) model?'

Part B: 'Markets and Morals' covers key historical thinkers on the moral advantages and disadvantages of market institutions. We will also cover contemporary debates on the moral limits of markets, focusing especially on the question which goods ought (not) to be for sale.

Part C: 'New Interdisciplinary Research' discusses new research that draws on both disciplines.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay and 2 presentations in the LT.

Indicative reading: L. Robbins, "The Nature and Significance of Economic Science"; A. Sen, "Equality of What?"; D. Hausman and M. McPherson, "Economic Analysis, Moral Philosophy, and Public

Policy"; John Broome, "Discounting the Future"; C. Sunstein and R. Thaler, "Preferences, Paternalism, and Liberty"; D. Hausman 'The Philosophy of Economics: An Anthology'; D. Hume, "A Treatise on Human Nature" (excerpts); A.O. Hirschman, "Rival Interpretations of Market Society: Civilising, Destructive or Feeble?"; K. Marx, "Capital" (excerpts); D. Satz, "Why Some Things Should Not Be for Sale: The Moral Limits of Markets"; Additional readings will be made available on Moodle.

Assessment: Exam (65%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the ST.

Class participation (10%).

PH341 Not available in 2015/16

Philosophy, Politics and Economics: Applications

This information is for the 2015/16 session.

Teacher responsible: Dr Alexander Voorhoeve LAK 401

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Available only to fourth-year PPE students.

Pre-requisites: The course will be available only to 4th-year PPE students.

Course content: This course will draw on concepts, theories and findings from Philosophy, Politics and Economics to tackle questions faced by decision-makers in public and private institutions. Each week will focus on a case study. Students will be expected to have had some prior exposure to the issues in previous courses--this course will stand out by being more interdisciplinary, in-depth and practical. Questions covered may include:

1. What measure(s) should governments use as the 'currency of distributive justice'? We will look at merits and drawbacks of various 'currencies' (including subjective satisfaction, the capability approach, the 'equivalent incomes' approach, and quality-adjusted life-years) and how they have been used.

2. How should we measure inequality and poverty? We will look at merits and drawbacks of various measures in the light of both (i) the nature of reasons to be concerned with inequality and poverty; and (ii) practical concerns.

3. How, if at all, should governments aid the disadvantaged 'at home'? We will consider the merits and drawbacks of conditional versus unconditional transfer programmes.

4. Should public services be provided for free 'in kind' or should citizens be granted 'vouchers' which they can 'top up' with their own money?

5. How should priorities be determined in aiding the global poor? We will consider whether efforts should be guided by where they will 'do the most expected good' or whether they ought instead also to be directed to reforming unjust institutions.

6. What are the moral limits of markets? We will consider what kinds of goods can be traded for money and which goods ought to remain 'market-inalienable'.

7. How can governments permissibly shape a person's choices for his own good? We will consider the justifiability of the use of 'traditional' paternalistic instruments such as taxes and prohibitions and the use of 'nudges'.

8. How should one respond to the 'Democratic Trilemma', i.e., the conflict between three central demands on good democratic procedures: 'robustness to pluralism', 'majoritarianism', and 'collective rationality'? Discussion will centre on the merits and demerits of the various types of democracy that result from giving up each of these demands.

9. When people disagree, what are the conditions under which a consensus can be achieved and how desirable is it to do so? We will consider some of the epistemic and moral reasons for and against reaching a consensus and consider how some public organisations proceed in the face of disagreement.

10. How can and should collective action problems be resolved?

We will consider the nature of the obligations to address collective action problems and the ways in which they may be solved.

11. Why limit immigration? We consider the moral reasons for and against limits on immigration and immigration's political and economic consequences.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

The lectures will present theories and findings from the three disciplines relevant to the policy issue being studied in that week; they will also give the outline of a real-world case study. Classes will devote some time to clarifying concepts, theories and findings, but will focus especially on the practical policy question posed by the case study. At least three classes will involve team debates, in which students are assigned to teams which must argue for a particular solution to the dilemma posed by the case study. Two of these debates will be formative, and one summative.

Formative coursework: Students will be expected to produce 2 essays and 2 presentations in the MT and LT.

Students will write at least two 2,000-word formative essays. At least twice, students will be assigned to a debate team, which must together present a case in class for a particular resolution of a policy dilemma. Feedback on these essays and the presentation will help prepare students for the final, summative essay and final, summative presentation.

Indicative reading: D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy and Public Policy*. Cambridge University Press, 2006. M. Fleurbaey and D. Blanchet. *Beyond GDP: Measuring Welfare and Assessing Sustainability*. Oxford University Press, 2013. S. Okin, "Poverty, Well-Being, and Gender: What Counts, Who's Heard?" *Philosophy and Public Affairs*, 31 (2003): 280-316. A. Deaton. "Measuring Poverty in a Growing World". *Review of Economics and Statistics* 87 (2005): 1-19. D. Satz. *Why Some Things Should Not Be for Sale*. Oxford University Press, 2011. C. List, "The Logical Space of Democracy", *Philosophy & Public Affairs* 39 (2011): 262-297. E. Ostrom, *Governing the commons: the evolution of institutions for collective action*. Cambridge University Press, 1990. A. Oliver (ed.) *Behavioural Public Policy*. Cambridge University Press, 2013. L. Bovens, "The Ethics of Nudge." *In Theory and Decision Library* 42 (2009): 207-219. J. Carens. *The Ethics of Immigration*. Oxford University Press, 2013. An extensive list of required and further readings will be available on Moodle.

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the ST.

Presentation (20%) in the LT.

The grade for the presentation will normally be the same for all members of the presentation team. This is to incentivise working effectively together. Students will have two summative team presentations first before the formative one, so will have time to learn to work together effectively and get guidance from the class teacher where needed. All other marks are individual.

PH399

Dissertation in Philosophy

This information is for the 2015/16 session.

Teacher responsible: Dr Marie Milofsky

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Course content: The dissertation may be on any topic for which a suitable supervisor in the Philosophy department can be found.

Selection of topic

Candidates should have the subject of their dissertation approved

by their supervising member of department.

Arrangements for supervision

The dissertation is an opportunity to do extended independent research and writing and to present this work to one's peers. It should reflect the candidate's own views but must develop out of some established part of the philosophical literature. Students should carefully discuss their topic and approach with their supervisor who will also advise on reading and give feedback on written work. Students must have regular meetings with their supervisor, submit written work regularly, and keep a formal record of their work and progress. Students must also present an early version of their argument to fellow students and will be given feedback on the quality of their presentation as well as on the content of their arguments.

Teaching: 1 hour of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, 2 essays and 1 presentation in the LT and 1 piece of coursework in the ST.

The formative coursework sets out several steps towards the dissertation: a literature review (due in MT); a first 2,000 words (due in week 1 of LT), a subsequent 3,000 words (which may be in part a revision of the first 2,000 words), due in week 5 of LT; a presentation of the student's arguments in LT; and a full draft of the dissertation, due in week 1 of ST. All written coursework must be submitted by email to both the student's supervisor and the teacher responsible. Students who fail to submit this coursework on time may be barred from submitting the dissertation. Participation in the weekly seminar and the quality of the presentation will determine 10% of the final mark for the course.

Assessment: Dissertation (90%, 7000 words) in the ST.

Class participation (10%).

Dissertations must be submitted by 5pm June 2nd. They should be 5,000-7,000 words, and should be typewritten.

PS102

Social Psychology

This information is for the 2015/16 session.

Teacher responsible: Dr Christopher Tennant QUE.3.16

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Social Policy and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Theories and concepts such as: self and identity; attitudes; communication, influence and persuasion; groups, organisations and crowds; social cognition, e.g. how our expectations influence our perception of the social world, and how our culture and social world influences those expectations. Applications such as: exploring the meaning of public opinion polls; the social and psychological sources of prejudice; rioting; economic behaviour; crime and eyewitness testimony; media influence; leadership and motivation; the commons dilemma.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce two assignments as coursework, one in MT and one in LT. The first assignment comprises of three separate short answers responding to a choice of questions, comprising up to 1,500 words in total. The second assignment is an essay of 1,500 words. These will be assessed by the class teachers. Students are expected to give class presentations.

Indicative reading: Recommended reading: M Hogg & G Vaughan, Social Psychology, 7th edn, Prentice Hall, 2014; C.A. Sanderson, Social Psychology, Wiley, 2009; M Hewstone, W. Stroebe, K. Jonas. An introduction to Social Psychology, 5th edn. BPS Blackwell 2012; E R Smith & D M Mackie, Social Psychology, 3rd edn, Taylor

& Francis, 2007; D. Matsumoto & L. Juang, Culture & Psychology, 5th edn, Thomson Wadsworth 2013; L. Steg, A.P. Buunk, T. Rothengatter, Applied Social Psychology: Understanding and managing social problems, CUP, 2008. Additional references and a synopsis of lectures and class topics will be made available online in early September, and will also be distributed in the first lecture of the series.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

The exam will consist of four short answer and two essay questions.

PS203 Not available in 2015/16

Societal Psychology: Theory and Applications

This information is for the 2015/16 session.

Availability: This course is available on the BSc in Sociology.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course discusses major areas of application of social psychology to real-world issues. Emphasis is put on the complexities of translating theory into practice and on the theoretical developments which are prompted by research on topical social issues. A recurrent theme is the reciprocal interaction between theory and practice in relation to social issues of theoretical interest and practical importance. The interplay of theory and practice will be examined in relation to selected topics which illustrate the application of social psychology in real world settings, such as: crime and anti-social behaviour; mass media; gender and sexuality; evolution and social relationships; identity and community; prejudice and racism; language and communication; religion and cultural beliefs.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Attendance at all classes and submission of all set coursework is required.

Formative coursework: Students are expected to write four essays during the Session, which will be assessed by the class teachers, and to give class presentations. These will not count towards the final examination result.

Indicative reading: Detailed reading lists will be distributed at the beginning of the course. The following are useful preliminary reading: . P Boyer, Religion Explained: The Human Instincts That Fashion Gods, Spirits and Ancestors. Vintage, 2002; D. Sperber, Explaining Culture, Blackwell, 1996; D M Buss, The Evolution of Desire. Strategies of Human Mating, Basic Books, New York, 1994; X Chryssochoou, Cultural Diversity: Its Social Psychology, Blackwell Publishing, Oxford, 2004; H Himmelweit & G Gaskell, Societal Psychology, Sage, 1990; D Matsumoto & D Juang, Culture and Psychology (3rd edn), Thomson Wadsworth, 2004; F M Moghaddam, Social Psychology: Exploring Universals Across Cultures, W H Freeman and Co. 1998; J McGuire, Understanding Psychology and Crime: Perspectives on theory and action, Open University Press, 2004. Additional references and a synopsis of lectures and class topics are distributed in the first lecture of the series and are also available in Outlook/Public Folders/Departments/ Social Psychology/ PS203

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA100

The Foundations of Social Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Isabel Shutes OLD 2.46

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and

Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. Places on this course are limited to 45 and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the department. If you would like to take SA100 as an outside option, please contact the Undergraduate Programme Manager who will be able to advise you on availability (contact details available on the Social Policy web pages). This course is not available to third year students.

Course content: The course examines the nature of social provision in different policy fields and for different groups of people. This work is contextualised by reference to different kinds of welfare systems in developed countries, changes in role of the state and other providers of welfare, and changes in ideas and key concepts. The course considers how social problems are defined and policies formulated with reference to the fields of poverty, health, education, housing and income maintenance; discusses key concepts (for example, citizenship) and the position of different social classes, generations, ethnicities, and men and women; explores the changing boundaries between the roles of the state, the market, the family and the voluntary sector in the mixed economy of welfare; and considers the economic, social and political factors that are important to an understanding of policy formation and policy change.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to submit four pieces of written work (two in MT and two in LT), and to read for and prepare contributions to class discussion each week.

Indicative reading: P Alcock, M May & Rowlingson, K (Eds), *The Student's Companion To Social Policy*, 4th edn, 2012; J Baldock, N Manning & S Vickerstaff (Eds), *Social Policy*, 4th edn, 2011; A Deacon, *Perspectives on Welfare*, 2002; H Dean, *Social Policy, Short Introductions*, 2nd edition, 2012; H Glennerster, *British Social Policy Since 1945*, 2007; C Pierson, *Beyond the Welfare State*, 1998; C Pierson and F G Castles (eds), *The Welfare State Reader*, 2000, P Thane, *The Foundations of the Welfare State*, 1982; These are introductory texts; a full reading list will be provided in the first lecture of MT.

Assessment: Exam (100%, duration: 3 hours) in the ST.

SA101

Sociology and Social Policy

This information is for the 2015/16 session.

Teacher responsible: Professor Lucinda Platt OLD 2.25

Availability: This course is compulsory on the BSc in Social Policy and Sociology. This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to sociological ideas and thinking, and how they link to key illustrative social policy issues. The course is organised around certain major social policy concerns such as: inequalities in health, labour markets, and education; social stratification and social segregation; housing provision and neighbourhood deprivation; ethnic and racial inequalities; families, care and ageing, which are then related to key classical and contemporary theoretical perspectives and concepts that have been used to describe and explain them, such as theories of class and status, social control, gender and the division of labour, socialisation and intergenerational transmission, identity and belonging, urbanisation, globalisation and risk.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: One essay in the Michaelmas term.

Indicative reading: The course will be drawing on three four core texts: David Grusky, D. and Szelenyi, S. (Eds.) 2011 *The Inequality Reader: Contemporary and Foundational Readings in Race, Class, and Gender*. 2nd Edition. Westview Press; Fulcher, J. and Scott, J. (2011) *Sociology*, 4th Edition. Oxford University Press; Payne, G. (ed.) *Social Divisions*. Third Edition. Palgrave Macmillan; and Platt, L. 2011 *Understanding Inequalities: Stratification and Difference*. Polity Press.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 1500 words) in the LT.

SA103

Introduction to Global Population Change

This information is for the 2015/16 session.

Teacher responsible: Dr Tiziana Leone OLD2.56

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Environment and Development, BSc in Environmental Policy, BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is also an option for second and third year students in social policy and outside the department, where the regulations permit.

Pre-requisites: As a general introduction to Population Studies, it assumes no previous knowledge of the subject.

Course content: The course is concerned with inter-relationships between the population characteristics of a society (fertility, mortality and migration) and their economic and social context. Both the causes of population change and their consequences are examined. The approach of the course is comparative across time and space: it covers population issues across the developed and developing world, and examines trends over time in both regions. The course will address key global debates which include: is population growth sustainable; what is the relationship between population size and available resources; what are the social, biological and economic influences on population growth rates, especially the role of famine, disease and war. What role have family planning programmes in decreasing population size; is ageing a threat. A wide range of topics is covered, including the demographic and health transitions; HIV/AIDS; fertility decline; the changing characteristics of the family; global trends in population ageing and their social and economic consequences for the elderly; theories and trends in migration; urbanisation.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to prepare at least one class presentation per term and submit two essays per term.

Indicative reading: Detailed reading lists are provided at the beginning of each term. Key overview texts include: M Livi-Bacci, *A Concise History of World Population*; H Jones, *Population Geography*; E A Wrigley, *Population and History*; W Lutz, *The Future Population of the World*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA104

Social Economics and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Kitty Stewart OLD 2.36 and Prof David Piachaud OLD 2.64

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Places on this course are limited to 45 and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the department. If you would like to take SA104 as an outside option, please contact the Undergraduate Programme Manager who will be able to advise you on availability (contact details available on the Social Policy web pages).

This course is not available to third year students.

Pre-requisites: No prior knowledge of economics is required.

Course content: This course has two parts. The first part introduces basic economic concepts and principles and discusses their application to different social policy areas. It covers the concepts of supply and demand, externalities and market failure, private insurance and social insurance, and quasi-markets, and looks at the economics of health care, social care, housing, education and the environment. The second part analyses the distribution of household income and the drivers of poverty and inequality, including unemployment, low wages and wage inequality. It covers concepts of human capital and productivity and looks at a range of policy responses, including minimum wage legislation, trade union policy, government economic management, taxation and the social security system.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Four formative essays will be required during the year, and students will be expected to make at least two presentations to the class.

Indicative reading: J Le Grand, C Propper & R Robinson, *The Economics of Social Problems*, Fourth Edition, Palgrave, 2008; A B Atkinson, N Barr, *Economics of the Welfare State*, Fifth Edition, OUP 2012; J Le Grand, *The Other Invisible Hand Delivering Public Services through Choice and Competition*, Princeton, 2007; H Glennerster, *Understanding the Finance of Welfare*, The Policy Press, 2009; J Hills, *Inequality and the State*, OUP, 2004; J Hills, *Good Times, Bad Times: The Welfare Myth of Them and Us*, The Policy Press, 2014; A B Atkinson, *Inequality: What Can Be Done?* Harvard University Press, 2015.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

of crime and its control in contemporary society. It begins by considering different conceptualisations of crime, and its measurement, before critically examining the multiple ways in which crime patterns are understood by the public, politicians, the media, and criminologists. These understandings are used to explore particular crime types such as white collar crime, drugs, and violent crime. Next the course explores the impact of major social divisions - such as gender, age, ethnicity, class and community - on the social distribution of crime and considers how these patterns influence political responses to controlling crime. Lastly, the course selects key controversies in controlling crime, focusing on criminal justice agencies such as the police and considering sentencing practices of imprisonment and community punishment and restorative justice.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

In Weeks 6 of MT and LT there will be a reading week.

In ST there will be a revision lecture, class and mock examination.

Formative coursework: Two non-assessed essays will be required. Students will be expected to do the reading associated with the classes.

Indicative reading: T. Newburn *Criminology*, 2nd edn, 2012; E. Carrabine et al *Criminology: A Sociological Introduction*, 2nd edn, 2009; Hale et al. *Criminology*, 3rd edn, 2013; M Maguire, R Morgan & R Reiner, *The Oxford Handbook of Criminology*, 5th edn, 2012; Y Jewkes & G Letherby, *Criminology: A Reader*, 2002; E McLaughlin & J Muncie, *Criminological Perspectives: Essential Readings*, 3rd edn, 2013, A. Huckleby & A. Wahidin, *Criminal Justice*, 2nd edn, 2013.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA201

Research Methods for Social Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Eileen Munro OLD 2.46 and Prof Amanda Sheely OLD 1.10

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to give students a comprehensive introduction to methods of social research in social policy.

The design and analysis of social policy research. The nature of social measurement. The concept of statistical inference. Data collection by means of social survey, depth interviews, participant observation and documentary methods. Descriptive and inferential statistics, including bivariate and multivariate techniques. Analysis of data particularly from surveys. The use of computers in data analysis. Ethics and politics of Social Policy Research. Strengths and weaknesses of commonly used research methods. Methods of analysing qualitative data. Case studies and experimental designs.

Teaching: The course combines two elements:

SA201.1 Data Analysis for Social Policy: Dr A Sheely.

Lectures: 10 x SA201.1. Classes: 10 x SA201.1.

Weeks 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 (LT).

SA201.2 Research Methods for Social Policy: Professor E Munro & Dr I Shultz

Lectures: 11 x SA201.2.fortnightly Classes: 10 x SA201.2.

Weeks 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 (LT); and one revision class (ST).

Formative coursework: For the **Research Methods** class, students work in small groups on a research project of their choice and then write individual essays on an aspect of this exercise of 2,000-3,000 words. Participation in group work in class and preparation for classes is essential.

For the **Data Analysis** class, students will use a computer to

SA105

Crime and Society

This information is for the 2015/16 session.

Teacher responsible: Dr Coretta Phillips OLD M2.27

Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course introduces students to the study

analyse data, and will be expected to produce summaries and interpretations of their results. Students are also expected to submit an essay based on a past exam question at the beginning of the Lent term. Completion of a project report (Individual Project) is a condition of examination entry.

Indicative reading: Alan Bryman (2012) *Social Research Methods*, 4th edition Oxford University Press; Alan Bryman and Duncan Cramer (2005) *Quantitative Data Analysis with SPSS 12 and 13*, Routledge Press; Joseph Healey (2005) *Statistics: A Tool for Social Research*, Wadsworth Press.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Project (50%) in the LT.

The Individual Project topic will be given out early in the LT and the project must be handed in to the Undergraduate Administrator in the last week of the LT.

SA204 Not available in 2015/16

Education Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Anne West OLD 1.16

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course provides an introduction to the main issues in educational policy. It draws on interdisciplinary research literature and focuses on contemporary Britain although there is a comparative and international component. The course aims to show how major concepts in social policy can be applied to the study of education, for example, inequality, social justice and distribution of resources. The course focuses on broad issues of educational policy, including the 1944 Education Act, the 1988 Education Reform Act, the 1998 School Standards and Framework Act and the 2010 Academies Act. It also explores specific issues that have implications for equality of opportunity, equity and social justice: social class, ethnicity/ 'race' and gender, special educational needs/disability and financing education across different phases of education – early years, schools and higher education.

Teaching: 20 hours of seminars in the MT. 15 hours of seminars in the LT. 3 hours of seminars in the ST.

Indicative reading: Some introductory texts are recommended: R Aldrich, *A Century of Education*, 2002; C.Chitty, *Education Policy in Britain*, 2009; H. Lauder et al (eds) *Education, Globalization and Social Change*, 2006. A comprehensive bibliography will be provided.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA217

Psychology of Crime and Criminal Justice

This information is for the 2015/16 session.

Teacher responsible: Teacher responsible TBC

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This is a recommended course for BSc Social Policy and Criminology.

Course content: The course examines the contribution that psychology has made to our understanding of crime and criminal justice. It explores what psychological theory and research have to tell us about the causes of crime and the ways in which we respond

to such behaviour.

Particular attention is paid to the development of individual criminality and criminal careers; drug and alcohol related crime; varieties of criminal behaviour including violence, sexual crime and stalking; mental disorder and crime; victims and victimisation; fear of crime and public attitudes towards punishment; offender profiling and criminal investigation; eye witness testimony and legal decision making; rehabilitation and imprisonment.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

There will be a reading week in the MT and LT. In addition one revision class will take place in the ST.

Formative coursework: One essay per term (MT and LT) will be required.

Indicative reading: J.R. Adler and J.M.Gray, *Forensic Psychology: Concepts, Debates and Practice*, 2010; PB Ainsworth, *Psychology and Crime: Myths and Reality*, 2000; J.Brown and E.Campbell, *The Cambridge Handbook of Forensic Psychology*, 2010; C.R. Hollin, *Psychology and Crime: An Introduction to Criminological Psychology*, 2013; J McGuire, *Understanding Psychology and Crime*, 2004 F. Pakes and J. Winstone, *Psychology and Crime: Understanding and Tackling Offending Behaviour*, 2007.

Assessment: Exam (100%, duration: 3 hours) in the ST.

SA218

Criminological Perspectives

This information is for the 2015/16 session.

Teacher responsible: Dr Coretta Phillips OLD M2.27

Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course critically analyses the key features of a broad range of theories developed to explain patterns of social order in society and to illuminate the nature of the 'crime problem'. It will additionally consider the theories of punishment from the late eighteenth century to the present day.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

In Weeks 6 of MT and LT there will be a reading week.

Formative coursework: Three essays will be required. Students will be expected to do the reading associated with the classes and may be asked to give one presentation per term.

Indicative reading: Newburn, T (2012) *Criminology*, London: Routledge, 2nd ed; Newburn, T. (2009) *Key Readings in Criminology*; McLaughlin, E. et al (2012), *Criminological Perspectives*; Tierney, J (2009) *Criminology: Theory and Context*; Burke, R H (2013) *An Introduction to Criminological Theory*; Downes, D and Rock, P (2011) *Understanding Deviance*; Maguire, M, Morgan, R and Reiner, R (2012) *The Oxford Handbook of Criminology*, 2012, 5th ed; McLaughlin, E and Newburn, T (2013) *Sage Handbook of Criminological Theory*.

Assessment: Exam (100%, duration: 3 hours) in the ST.

SA219

Comparative and International Social Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Timo Fleckenstein OLD1.17

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other

programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: This course is available to students on other degrees who have completed Foundations of Social Policy (SA100).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments.

The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students are expected to submit one piece of non-assessed written work and are expected to read for and prepare contributions to class discussion each week.

Indicative reading: K Armingeon & G Bonoli (Eds), *The Politics of Post-Industrial Welfare States* (2006); F Castles, *The Future of the Welfare State* (2004); J Clasen, *Reforming European Welfare States* (2004); B Deacon, *Global Social Policy and Governance* (2007); I Gough & G Wood (Eds), *Insecurity and Welfare Regimes in Asia, Africa and Latin America* (2004); L Hantrais, *Social Policy in the European Union* (2007); J Lewis, *Work-Family Balance, Gender and Policy* (2009); P Taylor-Gooby (Ed), *New Risks, New Welfare* (2005).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA221

Poverty, Social Exclusion and Social Change

This information is for the 2015/16 session.

Teacher responsible: Prof Amanda Sheely

Availability: This course is available on the BSc in Environment and Development, BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will examine the definition, measurement and causes of poverty and social exclusion in general and analyse selected aspects drawn from the following: social and demographic change, gender and racial inequality, homelessness and housing deprivation, unemployment, worklessness, social security and poverty, area deprivation, educational inequality, crime and social exclusion.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: A minimum of two written essays will be required from students and each student will be asked to make a short presentation for discussion in class at least once each term.

Indicative reading: A detailed list will be provided at the start of the session. P Alcock, *Understanding Poverty* (3rd edition), Palgrave, 2006; D. Dorling, *Injustice: Why social inequality matters*, The Policy Press, 2010; J Hills, et al (Eds), *Understanding Social Exclusion*, OUP, 2002; R Lister, *Poverty*, Polity, 2004; G Payne (ed), *Social Divisions* (3rd edition), Palgrave Macmillan, 2013; P Townsend and D Gordon (Eds) *World Poverty: New policies to defeat an old enemy*, The Policy Press, 2002.

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 1500 words) in the ST.

SA222

Implementing Social Policy: From Principles to Practice

This information is for the 2015/16 session.

Teacher responsible: Dr Steen Mangen (MT and ST); Professor Lucinda Platt (LT)

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course is divided into three parts. The first deals with various approaches to theorising about the state in terms of what each implies for its role in interventions in the area of collective social welfare and the social values on which these are based.

Particular attention is played to the interplay between preferences for interventions by the state, the individual and family and the market. The second part deals with issues involved in translating these values and policies into practice - the implementation of social policy. Concepts like need, entitlement, solidarity, merit and redistribution are addressed. The final part examines evidence of the economic and social impact of policies in selected welfare areas.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Plus revision session in the ST

Formative coursework: Each student will be required to submit an essay to the class teacher at the end of the MT and LT. Students will be required to give individual and group presentations in class.

Indicative reading: A detailed reading list will be provided for each class. In advance, students are recommended to consult the following: students new to social policy should begin with H Dean, *Social Policy: Short Introductions*, 2005 or P Alcock et al, *The Student's Companion to Social Policy*, 4th Edn 2012; V George & P Wilding, *Welfare and Ideology*; M O'Brien & S Penna, *Theorising Welfare*; C Pierson & F G Castles, *The Welfare State: A Reader*. J Baldock et al, *Social Policy*, 4th edn, 2011; G Esping-Andersen, *The Three Worlds of Welfare Capitalism*, especially chapters 1-3; P Spicker *Social Policy: Themes and Approaches*, 2008; K Blakemore & L Warwick-Booth: *Social Policy: An Introduction*, 4th Edn. 2013. C Pierson et al *The Welfare State Reader*, 3rd Edn, 2013

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA223

Health and Social Care Policy

This information is for the 2015/16 session.

Teacher responsible: Prof Martin Knapp COW 4.03

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course covers the foundations of health and social care policy, including a number of key policy issues in the UK, the USA and elsewhere. In the first term, students will be introduced to the main dimensions of and challenges facing health and social care systems today. These include the concepts of need and demand for health and social care; mortality and morbidity trends; financing and payment of providers; health and behaviour; models of reform in the delivery of health and social care; and the US and UK health and social care systems.

In the second term, the course will look at a number of specific areas, including mental health policy; choice and personalisation; child protection; pharmaceuticals policy; prevention and public

health; health inequalities; performance assessment; evaluation; and health technology assessment.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: One essay of 1000 words (excluding references) and a one hour mock exam.

Indicative reading: There is no course textbook. A list of selected texts and readings will be included in the reading list which will be provided at the start of the term. E. Mossialos, A. Dixon, J. Figueras and J. Kutzin (2002) *Funding health care: options for Europe*. Buckingham, Open University Press. WHO (2010). *The World Health Report 2010 - Health systems financing: the path to universal coverage*. Geneva, WHO. Gregory S, Dixon A, Ham C (2012) *Health policy under the coalition government: a mid-term assessment*. London: King's Fund. Johnson J and De Souza, C (2008) *Understanding Health and Social Care. An Introductory Reader*. Milton Keynes: The Open University. Wanless D, Forster J, Fernandez JL et al (2006) *Securing Good Care for Older People*, King's Fund, London. Commonwealth Fund (2014) *Mirror, Mirror on the Wall, 2014 Update: How the U.S. Health Care System Compares Internationally*. Washington DC: Commonwealth Fund. Knapp M, McDaid D, Mossialos E, Thornicroft G, editors (2007) *Mental Health Policy and Practice Across Europe*. Maidenhead: Open University Press. Marmot M et al (2010) *Fair Society, Healthy Lives (The Marmot Review)*, London: UCL.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA250

Demographic Description and Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Moshi Herman (office TBA)

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Environmental Policy, BSc in Management Sciences, BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology, BSc in Social Policy with Government and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Assumes no previous knowledge of the subject. The course is not particularly mathematical or statistical and students with non-mathematical backgrounds should not be at a disadvantage.

Course content: This course provides an introduction to the techniques of demographic analysis and the interpretation of demographic data. The main style of presentation is to introduce and discuss techniques of analysis and then examine examples of their use to illustrate demographic concepts and trends. Topics covered include sources of information about demographic data; period and cohort methods of description and analysis; the construction of life tables; measurement of fertility, mortality, nuptiality and migration; the determinants of age structure and the intrinsic growth rate; use of survey data; the interpretation of demographic statistics; population dynamics and population projection.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: A number of practical exercises involving either computations or the interpretation of data will be set during the course and discussed in classes. In addition, a number of brief essays will be required from each student.

Indicative reading: A general reading list is circulated at the start of the course. In each lecture attention is drawn to the relevant readings. The following, however, are useful introductions: A Hinde, *Demographic Methods*; S H Preston, et al, *Demography: Measuring*

and Modelling Population Processes; R Pressat, *The Dictionary of Demography*, edited by C Wilson.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA302

Assessing Social Progress

This information is for the 2015/16 session.

Teacher responsible: Prof Stephen Jenkins OLD2.29

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Demonstrated familiarity with research methods to at least the level of SA201 (Research Methods for Social Policy) or equivalent.

Course content: The course aims to facilitate student understanding of key issues in assessing social progress. 'Assessing' is shorthand for developing a critical understanding of the relevant concepts and their policy relevance, practical issues associated with data collection and monitoring, and the policy implications of different findings. 'Social progress' is shorthand for 'are we getting better off'? There are many potential benchmarks that could be used for answering this question: comparisons with the past, with other countries, or with some absolute standards (e.g. meeting some basic needs). And at the personal level, one might compare one's self relative to other people within your 'society'. There are multiple domains that are relevant too: ranging from conventional summary measures such as income to life satisfaction and happiness, employment, health, housing and education. Much information about 'social progress' already incorporated in official statistics (from national and international agencies), and in more specialist academic analysis. But other interpretations of what social progress exist and are not routinely incorporated in existing monitoring exercises, and some say they should be. The course aims to reflect this diversity – to critically analyse both existing approaches and others that have been proposed. The course starts with relatively conventional approaches to assessment including macroeconomic indicators such as GDP and cross-national comparisons, income and work, and then considers newer approaches and related measures. The course also considers progress in several specific life domains. For each of the topics considered, the course addresses a specific question relating to social progress. In providing answers to the question, the course considers, from a critical perspective, relevant analytical approaches, data sources and empirical findings, and also discusses policy implications.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Two formative essays (one in MT and one in LT).

Indicative reading: Atkinson, A. B. (1995). *The Economics of Inequality*, 2nd edition. Oxford: Clarendon Press. Cribb, J., Hood, A., Joyce, R., and Phillips, D. (2013). *Living Standards, Poverty and Inequality in the UK: 2013*. Report R81. London: Institute for Fiscal Studies. www.ifs.org.uk/comms/r81.pdf OECD (2013). *How's Life? Measuring Well-Being*. Paris: OECD. Available as e-book to LSE members via LSE Library Catalogue. www.oecd-ilibrary.org/gate2.library.lse.ac.uk/economics/how-s-life_23089679. See also 2011 edition. Next edition due October 2015. ONS (2011) *Measuring National Well-Being: Measuring What Matters*. www.ons.gov.uk/ons/guide-method/user-guidance/well-being/index.html Stiglitz, J. E., Sen, A. K., and Fitoussi, J.-P. (2009). *Report by the Commission on the Measurement of Economic Performance and*

Social Progress. Download the report from the link under the 'European Commission' heading at http://ec.europa.eu/eurostat/c/portal/layout?p_l_id=118054&p_v_l_s_g_id=0

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Essay (25%, 2000 words) in the ST.

SA309

Crime Control: Ideas and Controversies

This information is for the 2015/16 session.

Teacher responsible: Dr. Leonidas Cheliotis, OLD M2.22

Availability: This course is compulsory on the BSc in Social Policy and Criminology. This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The purpose of the course is to provide students with an understanding of, and critical perspective on, key debates in contemporary crime control policy. The course examines the emergent features of current responses to problems of crime and social order, focusing in particular on issues such as: policing and security; crime prevention and surveillance; youth, crime and control; drugs policy; and punishment. Attention is given to both historical and comparative perspectives, together with analyses of developments in current government policy.

Teaching: Lectures x 19; Classes x 19, MT and LT, plus one revision class (ST).

Formative coursework: One essay per term (MT and LT) will be required.

Indicative reading: The two primary texts for the course are: M Maguire, R Morgan and R Reiner, *The Oxford Handbook of Criminology*, 5th ed, 2012; and, T Newburn, *Criminology*, 2nd ed, 2013. In addition, students might wish to consult: D Garland, *The Culture of Control: Crime and Social Order in Contemporary Society*, 2001; T Newburn, *Handbook of Policing*, 2008; N Tilley, *Handbook of Crime Prevention and Community Safety*, 2005; D Gilling, *Crime Reduction and Community Safety: Labour and the Politics of Local Crime Control*, 2008; RJ MacCoun and P Reuter, *Drug War Heresies: Learning from Other Vices, Times and Places*, 2001; R. Hughes, R. Lart and P. Higate, *Drugs: Policy and Politics*, 2006; J Muncie, *Youth and Crime*, 2009; W Taylor, R Earle and R Hester, *Youth Justice Handbook: Theory, Policy and Practice*, 2010.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA320

Comparative and International Social Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Timo Fleckenstein OLD1.17

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is available to students on other degrees who have completed Foundations of Social Policy (SA100) and Implementing Social Policy: From Principles to Practice (SA222).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments.

The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Plus revision session in the ST

Formative coursework: Students are expected to submit one piece of non-assessed written work and are expected to read for and prepare contributions to class discussion each week.

Indicative reading: K Armingeon & G Bonoli (Eds), *The Politics of Post-Industrial Welfare States* (2006); F Castles, *The Future of the Welfare State* (2004); J Clasen, *Reforming European Welfare States* (2004); B Deacon, *Global Social Policy and Governance* (2007); I Gough & G Wood (Eds), *Insecurity and Welfare Regimes in Asia, Africa and Latin America* (2004); L Hantrais, *Social Policy in the European Union* (2007); J Lewis, *Work-Family Balance, Gender and Policy* (2009); P Taylor-Gooby (Ed), *New Risks, New Welfare* (2005).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

SA349

A Long Essay on an Approved Topic

This information is for the 2015/16 session.

Teacher responsible: Departmental Tutor, Department of Social Policy.

Availability: This course is compulsory on the BSc in Social Policy. This course is available on the BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is not available as an outside option nor to General Course students.

Course content: An essay of not more than 8,000 words on a topic to be approved by the candidate's academic advisor. It is designed to allow a detailed and thorough exploration of an area of interest to the student. The essay should be a dissertation on a topic area within the field of the degree programme; it may involve original fieldwork, or the analysis and appraisal of existing literature.

Teaching: 5 hours of lectures in the MT.

Students will have preliminary discussions about the topic of their essay with their academic advisor in the ST of their second year. They will pursue their long essay under the supervision of their new academic advisor during the third year of their studies. There will also be a total of five support sessions taught in weeks 2-6 of the MT.

Formative coursework: Students will agree with their academic advisor, and submit to the departmental tutor, a final title for the essay by Friday 4th December 2015 in the third year. Academic advisors can be expected to offer advice on reading, guidance on the construction of the work, and comment on an initial draft, which should be handed in before the end of the LT.

Indicative reading: Students will be expected to draw extensively from the reading they have done throughout their programme of study, to read such specific materials as may be recommended by their academic advisor and, most importantly, to identify for themselves such additional literature as may be required for their studies. Students might in the first instance wish to consult H Dean, 'Doing projects in social policy', in P Alcock, et al (Eds) *The Student's Companion to Social Policy*, Fourth Edition, Blackwell, 2012.

Assessment: Essay (100%, 8000 words) in the ST.

Students in the third year must submit their essay to the Undergraduate Administrator in the first week of ST. The exact date and time will be notified in the LT. It should be typewritten. Precise details on format and presentation will be issued by the Department at the beginning of the third year of study. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the essay is the candidate's own work.

SO100

Social Theory

This information is for the 2015/16 session.

Teacher responsible: Prof Chetan Bhatt TW3.8.02A

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Business Mathematics and Statistics, BSc in International Relations and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to introduce students to sociological theory by examining the work and ideas of six key thinkers in social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also apply their analysis to contemporary social issues.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Four 2,000 word formative essays (two in MT; two in LT), for feedback from class teachers.

Indicative reading: A detailed reading list will be available at the first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, *The Problem of Sociology*; Z Bauman, *Thinking Sociologically*; S Bruce, *Sociology: A Very Short Introduction*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Attendance at all classes and submission of all set coursework is required.

SO102

Statistics in Society

This information is for the 2015/16 session.

Teacher responsible: Dr Jouni Kuha COL 8.02 and Dr Fabien Accominotti STC S206

Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores how numbers are deployed in social settings, and how they are used in sociology to construct and challenge our understanding of the social world. The first part of the course (taught by Fabien Accominotti) introduces students to the importance of quantification in modern societies, familiarizes them with the main instruments for the collection of quantitative data, and provides them with an overview of the methods used to treat such data in contemporary sociology. We cover both descriptive and explanatory methods, and we reflect on the vision of the social world implicitly associated with each of the methods we encounter. In the second part (taught by Jouni Kuha) students start learning basic descriptive skills of quantitative data analysis, notably how to download large data sets, how to manipulate variables and carry out descriptive statistical analyses with statistical software Stata, and how to present statistical information in tabular and graphical form.

Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the MT. 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One 2000 word essay asking students to reflect on the changing use of quantitative data in social scientific research.

Two practical exercises demonstrating basic knowledge of data processing and descriptive statistical analysis using statistical software.

Indicative reading: Gould, Stephen Jay. 1981. *The Mismeasure of Man*. New York: Norton. Desrosières, Alain. 2002. *The Politics of Large Numbers: A History of Statistical Reasoning*. Cambridge: Harvard University Press. Savage, Mike, and Roger Burrows. 2007. "The Coming Crisis of Empirical Sociology", *Sociology* 41: 885-898. Wasserman, Stanley, et Katherine Faust. 1994. *Social Network Analysis: Methods and Applications*. Cambridge: Cambridge University Press. Salganik, Matthew J., Peter S. Dodds, and Duncan J. Watts. 2006. "Experimental Study of Inequality and Unpredictability in an Artificial Cultural Market", *Science* 311: 854-856. Gelman, Andrew, and Jennifer Hill. 2006. *Data Analysis Using Regression and Multilevel/Hierarchical Models*. Cambridge: Cambridge University Press. Catherine Marsh and Jane Elliot (2008): *Exploring Data* (2nd ed.)

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 3000 words) in the ST.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO110

Power, Inequality, and Difference: Contemporary Themes in Sociology

This information is for the 2015/16 session.

Teacher responsible: Dr Suki Ali STC S102

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in Social Policy and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to different substantive areas of work in contemporary sociology. Students will gain an understanding of leading-edge research within the discipline worldwide. The sociological problems covered in the course can vary from year to year. They normally include: Class, power and inequality; Race, ethnicity and multi-culturalism; Nation states, war and conflict; Money, markets and work; Identity, cosmopolitanism, nationalism and religion; Gender, sexuality and the body; Crime, punishment and deviance; Family and the lifecourse; Health, illness and biomedicine.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.

Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Two formative essays in MT, one formative essay in LT.

Indicative reading: S Hall & B Gieben (Eds), *Formations of Modernity* (1992); R Sennett, *The Corrosion of Character: The Personal Consequences of Work in the New Capitalism* (1998); S Sassen, *Global Networks, Linked Cities* (2002); M Castells, *The Rise of the Network Society* (2000); S Hall, *Representation: Cultural Representations and Signifying Practices*, (1997); D Held et al, *Global Transformations: Politics, Economics and Culture* (1999); N Dodd, *The Sociology of Money: Economics, Reason & Contemporary Society* (1994); V Zelizer, *The Social Meaning of Money* (1997); D Slater, *Consumer Culture and Modernity* (1997); S Jackson & S Scott (Eds), *Gender: A Sociological Reader* (2002); S Jackson & S Scott, *Feminism and Sexuality A Reader* (1996); K Woodward (Ed), *Identity and difference* (2002); P Gilroy, *After Empire: melancholia or convivial culture?* (2004); D Downes & P Rock, *Understanding Deviance: a guide to the sociology of crime and rule breaking* (2003); U Beck & E Beck-Gernsheim, *The Normal Chaos of Love* (1995); J Metzel and A Kirkland, *Against Health: How Health Became the New Morality*.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (30%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all classes is required and submission of all set coursework is compulsory

SO201

Sociological Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is compulsory on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course engages key sociological issues through the critical reading of empirical research studies. The course explores the connections between theoretical arguments and the practice of social enquiry and analysis. Indicative topics include: culture, religion, bodies, risk, migration, nature, rights. Blocks of lectures will focus on three different research texts within each theme.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Two coursework submissions each term are a course requirement.

Indicative reading: Selected reading: There is no set textbook for this course - each week's teaching is based on the critical reading of key texts.

Assessment: Essay (50%, 3500 words) in the LT.

Essay (50%, 3500 words) in the ST.

Two hard copies of each assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first essay is due by the fourth Thursday of Lent Term and the second essay is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each essay is due.

Attendance at all classes and submission of all set coursework is required.

SO203

Political Sociology

This information is for the 2015/16 session.

Teacher responsible: Dr Robin Archer, STC S105, and Dr Michael McQuarrie, STC S107

Availability: This course is available on the BSc in Accounting and Finance, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Political Sociology concerns the way in which political and social factors interact to produce the societies in which we live. This course aims to discuss some central empirical and theoretical questions in the field. The course begins by examining classic comparative debates about the relationship between the development of the state and democracy on the one hand, and the rise of capitalism and liberalism on the other. We will then examine the impact that social cleavages have on parties, elections and other political institutions in a number of different countries. We will examine the strength and political impact of both labour movements and other important social movements. And we will

examine why similar countries can develop very different social and economic policies. In addition we will examine some of the founding writings of Marx, Weber and Tocqueville and critically assess the use of political concepts. Throughout the course we will consider some of the main theoretical approaches that are used in the study of political sociology.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of lectures and 4 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: At least one class presentation and a termly paper in both MT and LT.

Indicative reading: R Dalton, *Citizen Politics*, 5th edn; G Esping-Andersen, *The Three Worlds of Welfare Capitalism*; E. Gellner, *Nations and Nationalism*; A Giddens, *Capitalism and Modern Social Theory*; R Inglehart, *Culture Shift in Advanced Industrial Society*; J Manza & C Brooks, *Social Cleavages and Political Change*; F Piven and R. Cloward, *Poor People's Movements*; D. Rueschemeyer et al, *Capitalist Development and Democracy*; T Skocpol, *States and Social Revolutions*; S Tarrow, *Power in Movement*.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (30%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all classes and submission of all set coursework is required.

SO208

Gender and Society

This information is for the 2015/16 session.

Teacher responsible: Dr Suki Ali STC S102

Availability: This course is available on the BSc in Management, BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will explore the meaning of gender in contemporary society. It considers gendered relations of power and the articulation of gender with other kinds of social difference such as 'race', class and sexuality. A variety of theoretical perspectives will be applied to a number of substantive issues of contemporary concern.

Indicative topics are: gender and sexuality; the body; families; employment; violence; nation and citizenship; multiculturalism; reproductive technologies; globalisation; sex work; representation; body modification.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.

Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Students will be expected to prepare one essay per term and at least one class paper per term which will be written up and handed to the class teacher.

Indicative reading: S Jackson & S Scott (Eds), *Gender, London and New York: Routledge*, 2000; H Mirza (Ed), *Black British Feminism: A Reader*, London and New York: Routledge, 1997; R. Parker and P. Aggleton (eds.) *Culture, Society and Sexuality: A Reader* (2nd edn), 2007; D Bell & J Binnie, *The Sexual Citizen: Queer Politics and Beyond*, London: Polity, 2001; P Abbott & C Wallace, *An Introduction to Sociology: Feminist Perspectives* (3rd edn), 2005; R W Connell, *Gender and Power*, 1987; Littlewood, B *Feminist Perspectives on Sociology*. Essex: Pearson Education. 2005; I Grewal & K Caplan (Eds), *An Introduction to Women's Studies: Gender in a Transnational World*; M Mac an Ghail, *Understanding Masculinities*, 1996; *The Polity Reader in Gender Studies*, 1994; J M Alexander

& C T Mohanty (Eds), *Feminist Genealogies, Colonial Legacies, Democratic Futures*, London & New York: Routledge, 1997; Essed et al, *A Companion to Gender Studies*, 2005; C Wright & G Jagger (Eds), *Changing Family Values*, London & New York, 1999
A more detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Attendance at all classes and submission of all set coursework is required

SO210 Not available in 2015/16 Crime, Deviance and Control

This information is for the 2015/16 session.

Teacher responsible: Dr Janet Foster S218a

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course encourages students to think about and debate some of the major issues in Criminology. We explore the social construction of crime and deviance; the different sources of information about them; key factors that shape patterns, perspectives and experiences of crime and deviance, including social class, gender, ethnicity and the media; and different Criminological theories that have been used to explain crime and deviance. We also explore elements of social control including policing and prisons.

Teaching: 12 hours of lectures and 9 hours of classes in the MT. 13 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Lectures are one hour each, apart from five two-hour lectures in weeks 4 and 6 of MT and weeks 3, 5 and 8 of LT.

Formative coursework: Students are required to complete two formative essays – one in MT and one in LT

Indicative reading: There is no set text for this course, and a full reading list is provided at the first class. The following is useful introductory reading that includes topics covered on the course: Carrabine E et al (2008) *Criminology: A Sociological Perspective*; Downes, D & Rock, P (2011, 4th Edition) *Understanding Deviance*; Maguire, M et al, (2007, 4th Edition) *The Oxford Handbook of Criminology*, Tierney, J (2010, 3rd Edition) *Criminology: Theory and Context*; Walklate, S (2011) *Criminology: The Basics*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Attendance at all classes and submission of all set coursework is required.

SO211 Sociology of Health and Medicine

This information is for the 2015/16 session.

Teacher responsible: Dr Kay Inckle STC S110

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to the sociology of health and illness. It focuses on the social, economic, political, ethical and subjective aspects of health and healing. Key thematic areas of inquiry include: medicine as a social institution; the social, political and cultural parameters that shape illness experiences; health inequalities within the UK and globally; and the political economies of health care. Indicative topics explored within these thematic areas include: chronic illness, mental health, HIV/AIDS, disability, reproductive technologies, pharmaceuticals and clinical trials. The course aims to develop an understanding of key

issues in medicine and society that are empirically grounded and theoretically engaged, thereby introducing students to the social bases of health and illness. To achieve this, the course combines traditional learning with additional exercises. Exercises may include conducting an interview with a health professional and visiting the Wellcome Museum.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Students will be expected to produce three essays of 1,000-1,500 words due in Weeks 5, 10 and 15. A mock exam will be held in Week 20.

Indicative reading: S Nettleton *The Sociology of Health and Illness* (2006), A Nelson *Body and Soul: The Black Panther Party and the Fight Against Medical Discrimination* (2011), M Foucault *The Birth of the Clinic: An Archaeology of Medical Perception* ([1973] 1994), I Hacking *The Social Construction of What?* (1999), A Kerr *Genetics and Society: A Sociology of Disease* (2004), M Konrad *Narrating the New Predictive Genetics: Ethics, Ethnography and Science* (2005), E Martin *Bipolar Expeditions: Mania and Depression in American Culture* (2007), V Nguyen *The Republic of Therapy: Triage and Sovereignty in West Africa's Time of AIDS* (2010), A Mol *The Logic of Care: Health and the Problem of Patient Choice* ([2006] 2008), A Petryna *When Experiments Travel: Clinical Trials and the Global Search for Human Subjects*

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all classes is required. Submission of all set coursework is compulsory.

SO212 Work, Management and Globalization

This information is for the 2015/16 session.

Teacher responsible: Dr Patrick McGovern STC S119E

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Social Policy and Sociology, BSc in Sociology and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Coverage of contemporary sociological perspectives on the employment relationship, labour market divisions, change at work, globalization and labour. The employment contract; theoretical perspectives on the employment relationship; control and consent at work; scientific management and McDonaldization; labour market divisions; women in the labour market; discrimination at work; the changing employment relationship; work-life conflict; self-managing teams; management gurus; globalization, transnational corporations and labour; immigrant workers.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 3 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One essay and one class paper per term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: K Grint, *The Sociology of Work* (3rd edn); M Noon & P Blyton *The Realities of Work* (4th edn); C Tilly & C Tilly, *Work under Capitalism*; P Dicken *Global Shift* (4th edn). A more comprehensive bibliography will be available to students taking this course.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (30%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all classes and submission of all set coursework is required.

SO221

Researching London: Methods for Social Research

This information is for the 2015/16 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will provide students with a first understanding of research design issues and a dynamic introduction to research methods through practical exercises in the context of London's social life.

By the end of the course students will:

- understand the key role of research design for conducting original empirical social research. In particular, taking into account relevant extant literature, they will develop a research question of their own interest and identify appropriate research method(s) to address it.
- Have engaged with practical research strategies and methods including the design of questionnaires, conducting structured and semi-structured interviews, ethnographic observation, and documentary and web based sources in the context of London.
- Have a sense of the urban sociology of London and a first-hand experience of its potential for exploring contemporary social issues.
- Be able to analyse different kinds of data, using quantitative methods, grounded theory, and visual analysis.
- Be able to assess the different methodological strategies employed on the basis of measurement concepts such as reliability, validity and generalizability.
- Understand the ethical issues involved in social research.
- Have developed a research proposal which will inform and strengthen their dissertation design.

Teaching: 25 hours of workshops in the MT. 25 hours of workshops in the LT.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: There are two pieces of formative assessment which will be marked and on which you will get feedback in the Michaelmas Term (MT).

Indicative reading: A good introductory textbook is Angela Dale and Jennifer Mason, *Understanding Social Research: thinking creatively about method* (2011): see also A Bryman, *Social Research Methods* (4th edn 2012). Other useful textbooks are R H Hoyle, M J Harris & C M Judd, *Research Methods in Social Relations* (7th edn 2002); D A de Vaus, *Surveys in Social Research* (5th edn 2001).

Assessment: Essay (20%, 1500 words) and presentation (20%) in the LT.

Research proposal (60%) in the ST.

Two hard copies of each assessment, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessment, a qualitative interview transcript and 1,500 word essay (20%), is due by the first Thursday of Lent Term. The second assessment, a group presentation (15 slides maximum) based on the agreed group survey (20%), will be carried out in Lent Term. Each group presentation will be marked in class by both the course convenor and the group GTAs, who will then discuss and moderate marks after all the group presentations took place. Marks will take

into account the work done by each group in the previous six weeks (questionnaire design, survey data collection and data analysis) as well as the clarity of the presentation itself. The third assessment, a 2,000 word research proposal (60%), is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each assessment is due. Attendance at all workshops and submission of all set coursework is required.

SO224

The Sociology of Race and Ethnicity

This information is for the 2015/16 session.

Teacher responsible: Dr Suki Ali STC S102

Dr Nazia Hussein STC S207

Availability: This course is available on the BSc in Sociology.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Optional Course for BSc Sociology for 2nd and 3rd years and the Diploma in Sociology.

Course content: The course provides an introduction to theoretical, historical and contemporary debates around race, racism and ethnicity. It firstly explores the main theoretical perspectives which have been used to analyse racial and ethnic relations, in a historical and contemporary framework. It then examines in more detail the areas both theoretical and lived within our contemporary social and political climate where analyses of 'race', racism, culture, belonging and identity are urgently needed, focusing primarily on Britain, Europe and the US. Topics include: race and ethnicity in historical perspective; race, class and gender multiculturalism; diaspora and hybridity; whiteness; mixed race; race, disease and contamination; race and the senses; race and popular culture; urban multiculturalism and the street; race, riots and youth culture; community cohesion; Muslim identities; asylum and new migrations; the Far Right and the white working class.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Reading logs in addition to formative essay.

Indicative reading: L Back & J Solomos (Eds), *Theories of Race and Racism* (2nd Edition, Routledge 2009); M Bulmer & J Solomos (Eds), *Racism* (OUP 1999); M Banton, *Racial Theories* (CUP 1998), J Solomos & L Back, *Racism and Society* (Macmillan 1996), R Miles, *Racism after Race Relations* (Routledge 1993); J Bulmer & J Solomos (Eds), *Racial and Ethnic Studies Today* (Routledge 1999); H Mirza (Ed), *Black British Feminism* (Routledge 1997); K Owusu (Ed), *Black British Cultural Studies* (Routledge 1999); D T Goldberg, *Racist Culture* (Blackwell 1993); P Gilroy, *There Ain't No Black in the Union Jack* (Hutchinson 1987); J Donald & A Rattansi (Eds), *Race, Culture and Difference* (Sage, 1992); J Solomos, *Race and Racism in Britain* (3rd edn), (Palgrave, 2003); P Hill Collins, *Black Feminist Thought* (Routledge 1991); CCCS, *The Empire Strikes Back* (Hutchinson 1982); B Hesse (Ed), *Un/Settled Multiculturalisms* (Zed 2000); A Sharma, J Hutnyk & A Sharma (Eds), *DisOrienting Rhythms* (Zed 1996), D T Goldberg (Ed), *Multiculturalism: A Critical Reader* (Blackwell 1994); D McGhee, *The End of Intolerant Britain?* (Open University Press 2005); D. McGhee, *The End of Multiculturalism?* (Open University Press 2008); N Finney & L Simpson, *Sleepwalking to Segregation?* (Policy Press 2009); P.H. Collins & J. Solomos (eds) *Sage Handbook of Race and Ethnic Studies* (Sage 2010)

Assessment: Exam (30%, duration: 2 hours) in the main exam period.

Essay (45%, 2000 words) in the ST.

Other (25%) in the LT.

Two hard copies of each assessment of 2000 words, with

submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessed literature review is due on the first Thursday of Lent term and the second assessed essay is due by the third Thursday of Summer Term. An additional copy of each assessment is to be uploaded to Moodle no later than 18:00 on the same day each essay is due.

Attendance at all classes and submission of all set coursework is required.

SO230 Not available in 2015/16 Digital Technology, Speed and Culture

This information is for the 2015/16 session.

Teacher responsible: Prof Judy Wajcman S203

Availability: This course is available on the BSc in Sociology.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, speed, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including information and communication technologies, robotics, cyborgs, sex, and weapons.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to prepare one essay per term of 1500 – 2000 words and at least one presentation per term.

Indicative reading: Hackett, E. et al (2008) *The Handbook of Science and Technology Studies* (MIT Press)

MacKenzie, D. and Wajcman J. (1999) *The Social Shaping of Technology* (MIT Press). Suchman, L. (2007) *Human-Machine Configurations* (CUP)

Turkle, S. (2011) *Alone Together* (Basic Books)

Wajcman, J. (2004) *TechnoFeminism* (Polity Press)

Zittrain, J. (2008) *The Future of the Internet* (Allen Lane)

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Essay (30%, 2000 words) in the ST.

Attendance at all classes and submission of all set coursework is required.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S200, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO231 Half Unit Knowledge, Power, and Social Change

This information is for the 2015/16 session.

Teacher responsible: Dr Leon Wansleben STC208

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aims of the course are threefold: First, the course will provide an introduction to how key sociological theories reflect upon the nature of knowledge in society; it will thereby strongly connect to other theory courses. Second, it will explore knowledge and expertise as critical dimensions in the study of different empirical areas of interest, such as politics, the state, social movements; and media discourse. Third, the course will provide a forum for thinking about the role of our own sociological knowledge outside the university.

By the end of the course, students will be able to question the taken-for-grantedness of authoritative knowledge, understandings of knowledge, and the knowledge claims of experts. Second, students will be able to examine, evaluate, both in written and oral form, theories and debates within the sociology of knowledge.

Thirdly, students will be able to explore knowledge production and dissemination in contemporary society and develop corresponding sociological research projects (case studies) related these issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 case study and 1 essay in the MT.

Indicative reading: Espeland, Wendy N., & Sauder, Michael (2007). Rankings and Reactivity: How Public Measures Recreate Social Worlds. *American Journal of Sociology*, Vol. 113 No. 1, S. 1-40. Foucault, Michel (1984). What is Enlightenment? In *The Foucault Reader*, edited by Paul Rabinow, pp. 32-50. New York: Pantheon Books. Mannheim, Karl (1936). *Ideology and Utopia: an introduction to the sociology of knowledge*. London, Keegan Paul. Medvetz, Tom (2012). *Think Tanks in America*. Chicago, University of Chicago Press. Porter, Theodore M. (1995) *Trust in Numbers. The Pursuit of Objectivity in Science and Public Life*. Princeton: Princeton University Press.

Assessment: Essay (100%, 3000 words) in the LT.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO302 The Sociological Dissertation

This information is for the 2015/16 session.

Teacher responsible: Prof Francine Tonkiss STC S114 and Dr Claire Moon STC S109

Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

Course content: The project is to be in the form of an essay on a sociological topic to be approved by the Department of Sociology. The purpose is to allow the student to study in depth an interest of his or her own choosing. Many approaches are possible in the work for the Dissertation, but there are three main variants: original fieldwork, secondary analysis, and literature review.

Selection of topic

The topic must be within the general field of sociology and should fall within the range of competence of a member of the staff, normally a member of the Sociology Department. However, it need not be chosen from those areas of sociology which are at present taught within the Department. Students may follow up a theme suggested to them by their coursework, but the topic must allow

the material and arguments to be developed in greater depth than is possible in the lectures and seminars for the course.

Arrangements for supervision

The Dissertation Workshop meets formally during the first and second terms. Students should consult their academic advisors throughout the year in order to self-assess progress and resolve general issues related to their projects. The role of the academic advisor is not to give detailed instruction, but to suggest ways of tackling or limiting a topic, lines of enquiry and preliminary reading; their suggestions are not intended to be seen as exhaustive or definitive. How far the student can use and develop the help that he or she is given is, to a large extent, what the examination of the essay is concerned with. The third year academic advisor should not help with planning or writing the essay in detail, but may read and comment critically on an outline or a draft section if the student submits one.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One coursework submission each term is a course requirement.

Assessment: Research project (90%) in the ST. Presentation (10%) in the MT.

Assessment Particulars:

Two hard copies of the 10,000 word dissertation must be submitted to the Sociology Administration Office, Room S116, by 4.30pm on the second Thursday of ST, with a third copy posted to Moodle by 18:00 on the same day. Accidental loss of data or text on a computer will not be accepted as a reason for non-submission.

SO308

Personal Life, Intimacy and the Family

This information is for the 2015/16 session.

Teacher responsible: Dr Ursula Henz STC S100B

Availability: This course is available on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an overview over the area of family sociology, drawing predominantly on literature about Britain and other Western societies. The course focuses on recent and ongoing transformations of families, family relationships and family life. Throughout the course various theoretical approaches will be considered. Issues related to gender, ethnicity and migration will be cross-cutting themes of the course. Indicative topics are: family structures and family relationships; childhood, adolescence, partnership formation, childlessness, motherhood, fatherhood, divorce, post-divorce families, intergenerational ties, family violence, family and work, family and social inequality.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: At least one class presentation and two formative essays (1,500 words each).

Indicative reading: Scott, Jacqueline, Treas, Judith & Richards, Martin (eds) (2004): *The Blackwell Companion to the Sociology of Families*, Oxford: Blackwell covers many aspects of the course. Other recommended readings include: Beck, Ulrich & Beck-Gernsheim, Elisabeth (1995): *The Normal Chaos of Love*. London: Polity Press. Chambers, Deborah (2012): *A Sociology of Family Life*. Cambridge: Polity Press. Giddens, Anthony (1992): *The Transformation of Intimacy. Sexuality, Love and Eroticism in Modern Societies*. Oxford: Polity Press. Hochschild, Arlie (1990): *The Second Shift. Working Parents and the Revolution at Home*. London: Piatkus. Jamieson, Lynn (1998): *Intimacy: Personal Relationships in Modern Societies*. Cambridge: Polity Press. Lareau, Annette (2011): *Unequal Childhoods. Class, Race and Family Life*. University of California

Press: Berkeley, Los Angeles, London. Smart, Carol & Neale, Bren (1999): *Family Fragments?* Cambridge: Polity Press. Smart, Carol, Neale, Bren & Wade, Amanda (2001): *The Changing Experience of Childhood: Families and Divorce*. Cambridge: Polity Press.

Assessment: Essay (50%, 2500 words) and project (50%, 3500 words) in the ST.

Two hard copies of the assessed essay and the research report, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term and the fourth Wednesday of Summer Term, respectively. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO309 Half Unit

Atrocity and Justice

This information is for the 2015/16 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students. Sociology students will be given priority.

Pre-requisites: No specific pre-requisites, but this is open only to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: The course will cover a number of issues relevant to the study of atrocity and justice for atrocity. It looks at the social construction of atrocities, the Genocide Convention, structural approaches to understanding genocide (modernity, democracy and colonial rule), the perpetrators, victims and witnesses of atrocity, the problem of denial of state crimes, historical injustices in Australia, Canada and the US, forensic investigations of atrocity, retributive and restorative approaches to justice for atrocity, truth commissions and war crimes tribunals.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Formative assessment will be as follows:

1. Class presentation: students will conduct one class presentation and will receive detailed feedback which will focus on points for improvement for the assessed components;
2. Practice essay: students will carry out one practice essay during week 6 (reading week) of the LT. They will receive detailed feedback for this in preparation for the summative assessments.

Indicative reading: Arendt, Hannah (1994) *Eichmann in Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books) Bauman, Zygmunt (1989) *Modernity and the Holocaust* (Cambridge: Polity)

Browning, Christopher (1992) *Ordinary Men: Reserve Police Battalion 101* (New York: HarperCollins): Cohen, Stan (2001) *States of Denial* (Cambridge: Polity Press)

Hacking, Ian (1999) *The Social Construction of What?* (Cambridge: Harvard University Press)

Jones, Adam (2011) *Genocide: A Comprehensive Introduction*, 2nd edition (London: Routledge)

Wilson, Richard (2001) *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge: Cambridge University Press).

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

ST102

Elementary Statistical Theory

This information is for the 2015/16 session.

Teacher responsible: Dr James Abdey COL.7.09

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST107 Quantitative Methods (Statistics).

Pre-requisites: A-level Mathematics

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability theory, statistical ideas, methods and techniques. Students will also be exposed to the MINITAB statistical package. Topics covered are descriptive statistics, introduction to probability theory, random variables, some common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA), linear regression and other statistical tests.

Teaching: 22 hours of lectures, 9 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures, 11 hours of classes and 11 hours of workshops in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students will finish off new material or revise in week 11.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Larsen R. J. and Marx, M. L. (2011) *An Introduction to Mathematical Statistics and Its Applications* (5th edition), Prentice Hall (earlier editions are also fine).

Assessment: Exam (75%, duration: 3 hours) in the main exam period.

Exam (25%, duration: 1 hour) in the LT week 0.

ST107 Half Unit

Quantitative Methods (Statistics)

This information is for the 2015/16 session.

Teacher responsible: Dr James Abdey COL.7.09

Availability: This course is compulsory on the BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Management, BSc in Management Sciences, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST102 Elementary Statistical Theory.

Pre-requisites: A-level Mathematics

Course content: The elementary statistical tools necessary for further study in management and economics with an emphasis on the applicability of the methods to management and economic problems. Topics covered are data presentation, probability, discrete

probability distributions, continuous probability distributions, sampling theory, point estimation, interval estimation, hypothesis testing, contingency tables and the chi-squared test, correlation and regression.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

2 hours of lectures and 1 hour of classes in the ST.

Students will finish off new material or revise in week 11.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Newbold, P., W.L. Carlson and B.M. Thorne (2012) *Statistics for Business and Economics*. (Eighth edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST108

Statistical Methods for the Social Sciences

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Cron COL.2.04 and Dr Wicher Bergsma COL.6.06

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course is designed for students without a strong background in Mathematics, e.g. without A level Mathematics, and is suitable for students who wish to learn basic statistical methods for analysing social science data. This course cannot be taken with ST102 Elementary Statistical Theory, ST107 Quantitative Methods (Statistics) or ST103 Statistical Methods for Social Research.

Pre-requisites: A grade B in GCSE Mathematics or equivalent.

No background in statistics is required.

Course content: A basic foundation in elementary statistical methods, theory and statistical reasoning. Basic use of computers to analyse data. Probability, random variable theory and distributions. Normal distribution, sampling concepts and sampling distributions. Estimation, significance tests and confidence intervals, one and two-sample methods. Test for proportions, simple contingency tables. Linear regression, correlation. Basic decision theory.

Teaching: 14 hours of lectures, 8 hours of classes and 2 hours of computer workshops in the MT. 20 hours of lectures, 10 hours of classes and 2 hours of computer workshops in the LT. 3 hours of lectures and 3 hours of classes in the ST.

Students will have a two hour computer workshop in week 6.

Indicative reading: Notes will be provided and form the basic reading material. Pointers will be given to further reading.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Continuous assessment (30%) in the MT and LT.

At least a pass mark is required for both assessment components (i.e., the exam and the continuous assessment)

ST201 Half Unit

Statistical Models and Data Analysis

This information is for the 2015/16 session.

Availability: This course is available on the BSc in Accounting and Finance and BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also available to students who have studied statistics and mathematics to the level of MA107/ST107 Quantitative Methods.

Not to be taken in conjunction with ST203 Statistics for Management Sciences (Full unit).

Course content: A second course in statistics with an emphasis on problems of practical importance and statistical analysis using computers. Principles of modelling: data preparation, mathematical and statistical models, linear and non-linear models. Simple linear regression. Multiple regression: assumptions, transformations, diagnostics, model selection. Logistic regression: odds ratios and likelihood. Introduction to time series: smoothing, seasonal adjustment, autocorrelation.

Teaching: 20 hours of lectures and 16 hours of computer workshops in the LT. 4 hours of lectures in the ST. Students will be given their assessed project to start on in week 6 which is due in at the end of LT.

Formative coursework: Moodle quizzes and a Quantitative research project.

Indicative reading: Heij et al (2008), Econometric Methods with Applications in Business and Economics; Baddeley & Barrowclough (2009), Running Regressions: A Practical Guide to Quantitative Research in Economics, Finance and Development Studies; Diaz et al (2014), OpenIntro Statistics.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Coursework (20%) in the LT.

ST202

Probability, Distribution Theory and Inference

This information is for the 2015/16 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.6.10 and Dr Matteo Barigozzi COL.7.11

Availability: This course is compulsory on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students who have not taken these courses should contact Dr Kalogeropoulos or Dr Matteo Barigozzi.

Course content: The course covers the probability, distribution theory and statistical inference needed for third year courses in statistics and econometrics.

Michaelmas term (Dr Erik Baurdoux): Events and their probabilities. Random variables. Discrete and continuous distributions. Moments, moment generating functions and cumulant generating functions. Joint distributions and joint moments. Marginal and conditional densities. Independence, covariance and correlation. Sums of random variables and compounding. Multinomial and bivariate normal distributions. Law of large numbers and central limit theorem.

Lent term (Dr K Kalogeropoulos): Functions of random variables. Sampling distributions. Criteria of estimation: consistency, unbiasedness, efficiency, minimum variance. Sufficiency. Maximum likelihood estimation. Confidence intervals. Tests of simple hypotheses. Likelihood ratio tests. Wald tests, score tests.

Teaching: 20 hours of lectures, 9 hours of seminars and 10 hours of help sessions in the MT. 20 hours of lectures, 10 hours of seminars and 10 hours of help sessions in the LT. 4 hours of lectures in the ST. Week 6 in both terms will be used for class tests.

Formative coursework: Students will be expected to produce 4 pieces of coursework in the MT and LT.

Indicative reading: G C Casella & R L Berger, Statistical Inference (primary reading); R Bartoszynski & M Niewiadomska-Bugaj, Probability and Statistical Inference (stresses comprehension of concepts rather than mathematics, complimentary reading only); J Jacod & P Protter, Probability Essentials (for further reading, a more

advanced text on probability, using measure theoretic concepts and tools, still very accessible).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

ST203

Statistics for Management Sciences

This information is for the 2015/16 session.

Teacher responsible: Dr Sara Geneletti Inchauste COL.7.04

Availability: This course is compulsory on the BSc in Management Sciences. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with: ST201 Statistical Models and Data Analysis, or ST205 Sample Surveys and Experiments

Pre-requisites: Students must have completed Quantitative Methods (Statistics) (ST107) and Quantitative Methods (Mathematics) (MA107).

Course content: A second course in statistics encompassing a wide range of practical issues from the design of surveys and data collection to building models and making inferences. Computer packages used throughout.

There are two lecture courses. ST203.1: Statistical Models and Data Analysis (Mr Jose Pina-Sánchez). Principles of modelling: data preparation, mathematical and statistical models, linear and non-linear models. Simple linear regression. Multiple regression: assumptions, transformations, diagnostics, model selection. Logistic regression: odds ratios and likelihood. Introduction to time series: smoothing, seasonal adjustment, autocorrelation.

ST203.2: Sample Surveys and Experiments (Professor Chris Skinner). Sampling methods for social surveys. Survey design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: 20 hours of lectures, 9 hours of classes and 2 hours of workshops in the MT. 20 hours of lectures and 16 hours of computer workshops in the LT. 2 hours of lectures in the ST. There will be revision classes in week 11.

Indicative reading: S L Lohr, Sampling: Design and Analysis. (2nd Ed. 2010)

F J Fowler, Survey Research Methods (4th Ed. 2009)

S. Albright, WL Winston & CJ Zappe, Managerial Statistics.

DH Hildebrand and RL Ott Statistical Thinking for Managers.

Assessment: Exam (80%, duration: 3 hours) in the main exam period.

Coursework (20%) in the MT and LT.

ST205 Half Unit

Sample Surveys and Experiments

This information is for the 2015/16 session.

Teacher responsible: Prof Christopher Skinner COL.7.13

Availability: This course is compulsory on the BSc in Business Mathematics and Statistics. This course is available on the BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

For students who have studied mathematics and statistics to the level of MA107/ST107 Quantitative Methods or SA201 Research Methods for Social Policy. Not to be taken with ST203 Statistics for Management Sciences (full unit).

Course content: Sampling methods for social surveys. Survey design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: 20 hours of lectures, 9 hours of classes and 2 hours of workshops in the MT.

There will be a revision session in week 11.

Formative coursework: Weekly exercises and group presentations.

Indicative reading: S L Lohr, Sampling: Design and Analysis. (2nd Ed. 2010)

F J Fowler, Survey Research Methods (4th Ed. 2009)

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Coursework (20%) in the MT.

ST211 Half Unit Applied Regression

This information is for the 2015/16 session.

Teacher responsible: Dr Sara Geneletti Inchauste COL.7.04

Availability: This course is compulsory on the BSc in Business Mathematics and Statistics. This course is not available as an outside option nor to General Course students.

Course content: Tabulation, Graphical representation, Regression, Detection of outliers, Model diagnostics, Analysis of Variance.

Teaching: 10 hours of lectures and 20 hours of lectures in the LT. 2 hours of lectures in the ST.

Students will be given their assessed project to start on in week 6 which is due in at the beginning of ST.

Formative coursework: Weekly moodle quizzes.

Indicative reading: 1. P. Newbold, W.L. Carlson and B. Thorne. Statistics for Business and Economics, Prentice-Hall, Fifth Edition. (2003). 2. Neter, J., Kutner, M., Nachtsheim, C. and Wasserman, W. Applied Linear Statistical Models, McGraw-Hill, Fourth Edition. (2004). 3. Abraham, B. Ledolter, J. Introduction to Regression Modelling, Thomson Brooks Cole. (2006). 4. S. Weisberg Applied Linear Regression, Wiley, 3rd edition. (2005) (intermediate).

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Project (50%) in the ST.

ST226 Half Unit Actuarial Investigations: Financial

This information is for the 2015/16 session.

Teacher responsible: Dr Angelos Dassios COL.6.14

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: The application of compound interest techniques to financial transactions. Describing how to use a generalised cash-flow model to describe financial transactions such as a zero coupon bond, a fixed interest security, an index-linked security, cash on deposit, an equity, an interest only loan, a repayment loan, an annuity certain and others. The time value of money using the concepts of compound interest and discounting. Accumulation of payments and present value of future payments. Expressing interest rates or discount rates in terms of different time periods. Real and money interest rates. The calculation of the present value and the accumulated value of a stream of equal or unequal payments using specified rates of interest and the net present value at a real (possibly variable) rate of interest, assuming a constant rate of inflation. Compound interest rate functions; definitions and use. Equations of value with certain and uncertain payments and receipts; conditions for existence of solution. Describe how a loan may be repaid by regular instalments of interest and capital; flat rates and annual effective rates. Calculation of a schedule of repayments under a loan and identification of the interest and

capital components of annuity payments where the annuity is used to repay a loan for the case where annuity payments are made once per effective time period or p times per effective time period and identify the capital outstanding at any time. Discounted cash flow techniques and their use in investment project appraisal; internal rate of return, discounted payback period, money-weighted rate of return, time-weighted rate of return, linked internal rate of return. The investment and risk characteristics of fixed-interest Government borrowings, fixed-interest borrowing by other bodies, shares and other equity-type finance derivatives. The analysis of compound interest rate problems; the present value of payments from a fixed interest security where the coupon rate is constant and the security is redeemed in one instalment, upper and lower bounds for the present value of a fixed interest security that is redeemable on a single date within a given range at the option of the borrower, the running yield and the redemption yield from a fixed interest security, the present value or yield from an ordinary share and a property, given simple (but not necessarily constant) assumptions about the growth of dividends and rents, the solution of the equation of value for the real rate of interest implied by the equation in the presence of specified inflationary growth, the present value or real yield from an index-linked bond, the price of (or yield from) a fixed interest security where the investor is subject to deduction of income tax on coupon payments and redemption payments are subject to the deduction of capital gains tax.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. There will either be a reading week and a take home mock exam in week 6 or a reading week focussing on the relation of the course to real life applications in week 6. Students will decide.

Formative coursework: Compulsory written answers to one set of problems. An activity on the relation of the course to real situations or a mock exam will take place in week 6.

Indicative reading: R Norberg, Basic Life Insurance Mathematics; J J McCutcheon & W J Scott, An Introduction to the Mathematics of Finance, Heinemann; Institute of Actuaries, Formulae and Tables for Actuarial Examinations. Core reading notes obtainable from the Institute of Actuaries.

Assessment: Exam (100%, duration: 3 hours) in the LT week 0.

ST227 Half Unit Survival Models

This information is for the 2015/16 session.

Teacher responsible: Dr Erik Baurdoux COL.6.04

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: An introduction to stochastic processes with emphasis on life history analysis and actuarial applications. Principles of modelling; model selection, calibration, and testing; Stochastic processes and their classification into different types by time space, state space, and distributional properties; construction of stochastic processes from finite-dimensional distributions, processes with independent increments, Poisson processes and renewal processes and their applications in general insurance and risk theory, Markov processes, Markov chains and their applications in life insurance and general insurance, extensions to more general intensity-driven processes, counting processes, semi-Markov processes, stationary distributions. Determining transition probabilities and other conditional probabilities and expected values; Integral expressions, Kolmogorov differential equations, numerical solutions, simulation techniques. Survival models - the random life length approach and the Markov chain approach; survival function, conditional survival function, mortality intensity, some commonly used mortality laws. Statistical inference for life history data; Maximum likelihood

estimation for parametric models, non-parametric methods (Kaplan-Meier and Nelson-Aalen), regression models for intensities including the semi-parametric Cox model and partial likelihood estimation; Various forms of censoring; The technique of occurrence-exposure rates and analytic graduation; Impact of the censoring scheme on the distribution of the estimators; Confidence regions and hypothesis testing.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 3 hours of lectures and 1 hour of seminars in the ST.

Students on this course will have a reading week in week 6 where they will be given review exercises to work on based on the first 5 weeks of the course.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: S Ross, Stochastic Processes; R Norberg, Risk and Stochastics in Life Insurance; The Institute of Actuaries, Core reading Subject CT4. For full details of the syllabus of CT4, see http://stats.lse.ac.uk/angelos/guides/2004_CT4.pdf.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

ST300 Half Unit

Regression and Generalised Linear Models

This information is for the 2015/16 session.

Teacher responsible: Dr Wai-Fung Lam COL. 6.09

Availability: This course is compulsory on the BSc in Statistics with Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Probability, Distribution Theory and Inference (ST202).

Course content: A solid coverage of the most important parts of the theory and application of regression models, generalised linear models and the analysis of variance. Analysis of variance models; factors, interactions, confounding. Multiple regression and regression diagnostics. Generalised linear models; the exponential family, the linear predictor, link functions, analysis of deviance, parameter estimation, deviance residuals. Model choice, fitting and validation. The use of a statistics package will be an integral part of the course. The computer workshops revise the theory and show how it can be applied to real datasets.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Week 6 reading week in MT will be for revision of taught materials, while week 6 reading week in LT will be for your project completion.

Indicative reading: D C Montgomery, E A Peck & G G Vining, Introduction to Linear Regression Analysis; D C Montgomery, Design and Analysis of Experiments; A J Dobson, An Introduction to Generalised Linear Models; P McCullagh & J A Nelder, Generalized Linear Models; A C Atkinson, Plots, Transformations and Regression; A C Atkinson & M Riani, Robust Diagnostic Regression Analysis; JJ Faraway, Linear Models with R; JJ Faraway, Extending the linear Model with R. Related items from the Institute of Actuaries, Core reading Subject CT6. For full details of the syllabus of CT6, see http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

Assessment: Exam (85%, duration: 2 hours) in the main exam period.

Project (15%) in the LT.

ST301 Half Unit

Actuarial Mathematics (Life)

This information is for the 2015/16 session.

Teacher responsible: Dr Luciano Campi COL.7.10

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Survival Models (ST227).

Course content: Single life mortality models, assurance and annuity contracts and their actuarial notation, computation of their present values and variances; relations among the present values of the various contracts.

The equivalence principle: computation of net premiums for the main assurance policies.

Prospective and retrospective reserves, Thiele's differential equation as the main tool for the computation of reserves.

Expenses: gross premium and gross reserves. Selection effect and how it affects mortality tables.

Multi-life assurance contracts: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts.

Multi-states mortality models: basic notions of continuous-time Markov chains, Kolmogorov backward and forward equations, application to multiple decrements and disability models, computation of transition intensities.

Thiele differential equation for multi-states models, computation and analysis of reserves for main multi-state policies.

With-profit policies, unit-linked assurance policies, pensions.

Interplay between assurance and finance: embedded options, market consistent actuarial valuation.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a reading week.

Formative coursework: Compulsory written answers to one set of problems.

Indicative reading: R Norberg, Basic Life Insurance Mathematics; The Institute of Actuaries, Core reading Subject CT5 Dickson, Hardy, Waters, 'Actuarial Mathematics for Life Contingent Risks'

Wutrich, Buhlmann, Furrer, 'Market Consistent Actuarial Valuation'

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

ST302 Half Unit

Stochastic Processes

This information is for the 2015/16 session.

Teacher responsible: Dr Umut Cetin COL.6.08

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202).

Course content: A second course in stochastic processes and applications to insurance. Markov chains (discrete and continuous time), processes with jumps; Brownian motion and diffusions; Martingales; stochastic calculus; applications in insurance and finance. Content: Stochastic processes in discrete and continuous time; Markov chains: Markov property, Chapman-Kolmogorov equation, classification of states, stationary distribution, examples of infinite state space; filtrations and conditional expectation; discrete time martingales: martingale property, basic examples, exponential martingales, stopping theorem, applications to random

walks; Poisson processes: counting processes, definition as counting process with independent and stationary increments, compensated Poisson process as martingale, distribution of number of events in a given time interval as well as inter-event times, compound Poisson process, application to ruin problem for the classical risk process via Gerber's martingale approach; Markov processes: Kolmogorov equations, solution of those in simple cases, stochastic semigroups, birth and death chains, health/sickness models, stationary distribution; Brownian motion: definition and basic properties, martingales related to Brownian motion, reflection principle, Ito-integral, Ito's formula with simple applications, linear stochastic differential equations for geometric Brownian motion and the Ornstein-Uhlenbeck process, first approach to change of measure techniques, application to Black-Scholes model. The items in the course content that also appear in the content of ST227 are covered here at greater depth. However, ST227 is not a pre-requisite for this course.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. 1 hour of seminars in the ST.

Week 6 will be a reading week left free for students to revise by themselves.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: R Durrett, Essentials of Stochastic Processes; T Mikosch, Elementary Stochastic Calculus with Finance in View; Institute of Actuaries core reading notes.

Assessment: Exam (100%, duration: 3 hours) in the LT week 0.

ST303 Half Unit Stochastic Simulation

This information is for the 2015/16 session.

Teacher responsible: Dr Angelos Dassios COL6.14

Availability: This course is available on the BSc in Actuarial Science. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

As numbers might need to be capped if it proves too popular, students from the Statistics and Mathematics departments should be given priority. Given the prerequisites, it is unlikely we will get many students from other departments anyway.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

While the course ST306 is not a formal pre-requisite some examples from this course will be used. Students that have not taken ST306 might have to do a bit of extra reading to familiarise themselves with them.

Course content: An introduction to using R for stochastic simulation as well as methods of simulating random variables, complicated quantities involving several random variables and paths of stochastic processes. Applications will focus on examples from insurance and finance.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

- Introduction to R with an emphasis on stochastic simulation.
- Monte-Carlo integration.
- Generating continuous random variables; inverse distribution function method.
- Generating continuous random variables; acceptance rejection method.
- Generating continuous random variables; sums of random variables.
- Generating continuous random variables; other methods. Normal and Inverse Gaussian distributions.
- Generating discrete random variables.
- Generating the paths of stochastic processes; Insurance loss process; Brownian motion; Ornstein-Uhlenbeck process.
- Various applications in insurance and finance.

There will be a Q&A session on practical issues in week 11.

Formative coursework: Weekly exercises usually involving computing.

Indicative reading:

- Introducing Monte Carlo methods with R (main reference), by G. Robert and G. Casella.

Useful reading:

- Asmussen
- Glasserman

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Project (25%) in the LT.

Project (25%) in the ST.

ST304 Half Unit Time Series and Forecasting

This information is for the 2015/16 session.

Teacher responsible: Dr Matteo Barigozzi COL.7.11

Availability: This course is compulsory on the BSc in Actuarial Science and BSc in Statistics with Finance. This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: 2nd year statistics and probability

Course content: The course introduces the student to the statistical analysis of time series data and simple models. What time series analysis can be useful for; autocorrelation; stationarity, trend removal and seasonal adjustment, basic time series models; AR, MA, ARMA; invertibility; spectral analysis; estimation; forecasting; introduction to financial time series and the GARCH models; unit root processes.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: C Chatfield, The Analysis of Time Series; Brockwell & Davis, Introduction to Time Series and Forecasting; Brockwell & Davis, Time Series: Theory and Methods.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST306 Half Unit Actuarial Mathematics (General)

This information is for the 2015/16 session.

Teacher responsible: Dr Angelos Dassios COL.6.14

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

Course content: An introduction to actuarial work in non-life insurance. Decision theory concepts: game theory, optimum strategies, decision functions, risk functions, the minimax criterion and the Bayes criterion. Loss distributions with and without limits and risk-sharing arrangements; suitable, moments and moment generating functions, the gamma, exponential, Pareto, generalised Pareto, normal, lognormal, Weibull, Burr and other distributions suitable for modelling individual and aggregate losses; statistical inference. Risk models involving frequency and severity distributions; the basic short-term contracts, moments, moment generating functions and other properties of compound distributions.

Reinsurance treaties; proportional, excess of loss, stop-loss, deriving the distribution, moments, moment generating functions and other properties of the losses to the insurer and reinsurer under all the models above. Ruin theory for continuous and discrete models. Fundamental concepts of Bayesian statistics; Bayes theorem, prior distributions, posterior distributions, conjugate prior distributions, loss functions, Bayesian estimators. Credibility theory; Bayesian models. Experience rating models and applications. Claims reserving: run-off triangles. Monte-Carlo simulation and applications in insurance.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. There will be a reading week and a take home mock exam in week 6.

Formative coursework: Compulsory written answers to one set of problems. There will also be a mock exam during week 6.

Indicative reading: Notes are given out in the lectures. The Institute of Actuaries, Core reading Subject CT6.

For full details of the syllabus of CT6, see:

http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

Assessment: Exam (100%, duration: 3 hours) in the LT week 0.

ST307 Half Unit

Aspects of Market Research

This information is for the 2015/16 session.

Teacher responsible: Dr James Abdey COL.7.09

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Management Sciences and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Probability and statistics to the level of ST107.

Course content: The main ideas and applications of market research techniques. Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, and discriminant analysis.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of classes in the ST.

Lectures will run in weeks 1-10 and classes in weeks 2-11.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Malhotra, N.K., D.F. Birks and P.A. Wills (2012) *Marketing Research: An Applied Research* (Fourth edition), Pearson (earlier editions are also fine)

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST308 Half Unit

Bayesian Inference

This information is for the 2015/16 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.6.10

Availability: This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

ST202 is also recommended.

Course content: Statistical decision theory: risk, decision rules, loss and utility functions, Bayesian expected loss, Frequentist risk.

Bayesian Analysis: Bayes theorem, prior, posterior and predictive distributions, conjugate models (Normal-Normal, Poisson-Gamma, Beta-Binomial), Bayesian point estimation, credible intervals and hypothesis testing, Bayes factors and model selection. Comparison with Frequentist approaches.

Implementation: Asymptotic approximations (Laplace approximation, Monte Carlo methods, stochastic simulation), Markov Chain Monte Carlo (MCMC) simulation (Gibbs sampler, Metropolis-Hastings algorithm). Computer tools (R, WinBUGS). Illustration via applications in Regression (Linear, ANOVA, Multiple, Generalized Linear Models), Hierarchical/ Multilevel Models and Time Series.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST.

There will be a reading week in week 6.

Formative coursework: Optional problem sets and computer exercises.

Indicative reading: P.M. Lee, *Bayesian Statistics. An introduction.*

J.O. Berger, *Statistical Decision Theory and Bayesian Analysis.*

D. Gamerman, H. F. Lopes, *Markov Chain Monte Carlo: Stochastic Simulation for Bayesian Inference*

A. Gelman, *Bayesian data analysis.*

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Project (20%) in the ST.

ST312 Half Unit

Applied Statistics Project

This information is for the 2015/16 session.

Teacher responsible: Dr Wicher Bergsma COL.6.06

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Course content: Students will produce a project involving a critical investigation and collation of statistical data on a topic of their own interest.

Teaching: 10 hours of lectures in the MT. 6 hours of lectures in the ST.

Students on this course will have a research week in week 6 where they can look up data sources for their assessed project.

Formative coursework: Oral presentation at the end of MT.

Indicative reading: www.google.com/publicdata
data.worldbank.org

Assessment: Project (90%) and presentation (10%) in the ST.

ST327

Market Research: An Integrated Approach

This information is for the 2015/16 session.

Teacher responsible: Dr James Abdey COL.7.09 and Mr Karsten Shaw

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed one of the following: Elementary Statistical Theory (ST102), Statistics for Management Sciences (ST203), Learning and Quantitative Data (MG205), Analytical Methods for Management (MG202), or

equivalent. Not to be taken with ST307.

Course content: The main ideas and applications of market research techniques. ST327.1 Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, discriminant analysis, factor analysis, cluster analysis and conjoint analysis. ST327.2 Case Studies: Students use the information and techniques gained from ST327.1 to carry out a co-operative Market Research Case Study. Individual write up of the Case Study forms part of the assessment.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 6 hours of lectures in the LT. 1 hour of classes in the ST. Lectures will run in weeks 1-10 and classes in weeks 2-11.

Formative coursework: Students are given weekly exercises to work on for discussion in class

Indicative reading: Malhotra, N.K., D.F. Birks and P.A. Wills (2012) Marketing Research: An Applied Research (Fourth edition), Pearson (earlier editions are also fine)

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Coursework (25%) in the ST.

Presentation (15%) in the LT.

The assessed Case Study work is split into two parts; a group presentation and an individual piece of coursework.

ST330

Stochastic and Actuarial Methods in Finance

This information is for the 2015/16 session.

Teacher responsible: Prof Pauline Barrieu COL 6.03

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics and BSc in Statistics with Finance. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

Course content: Applications of stochastic processes and actuarial models in finance. Utility theory. Stochastic dominance and portfolio selection. Measures of investment risk. Mean-variance portfolio theory. Single and multifactor models. The Capital Asset Pricing Model. The efficient market hypothesis. Stochastic models for security prices and estimating their parameters. Option pricing: general framework in discrete and continuous time, the Black-Scholes analysis and numerical procedures (binomial models and Cox-Ross-Rubinstein models). The term structure of interest rates: the Vasicek, the Cox-Ingersoll-Ross and other models. Introduction to credit risk.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Students will work on and submit formative coursework in Week 11 of MT and a revision session will take place in Week 11 of LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis. Two sets of hand-in exercises will also be given during the year.

Indicative reading: N H Bingham & R Kiesel, Risk Neutral Valuation; A Cerny, Mathematical Techniques in Finance: Tools for Incomplete Markets; J Hull, Options, Futures & Other Derivatives; R Jarrow & S Turnbull, Derivative Securities; D Luenberger, Investment Science; Institute of Actuaries core reading notes, Subject CT8.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

Diploma Programme Regulations

Key to Diploma Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 15/16) means not available in the 2015/16 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

Diploma in Accounting and Finance

Programme code: TDAF

Students must take four courses as shown.

Paper	Course number and title
1	FM212 Principles of Finance*
2	AC211 Managerial Accounting or AC330 Financial Accounting Analysis and Valuation or AC490 Management Accounting, Decisions and Control (H) and AC491 Financial Accounting, Reporting and Disclosure (H)
3 & 4	Courses to the value of two full units from the following: AC211 Managerial Accounting or AC330 Financial Accounting, Analysis and Valuation (if not already selected under paper 2 above) or AC310 Management Accounting, Financial Management and Organisational Control AC340 Auditing, Governance and Risk Management AC470 Accounting in the Global Economy (H) EC201 Microeconomic Principles I EC202 Microeconomic Principles II EC210 Macroeconomic Principles EC313 Industrial Economics EC220 Introduction to Econometrics MA107 Quantitative Methods (Mathematics) and ST107 Quantitative Methods (Statistics) LL209 Commercial Law MG203 Organisational Theory and Behaviour (formerly ID200) (n/a 15/16) EH240 British Business and Economic Performance since 1945: Britain in International Context Any other course with the approval of the Programme Director §

Notes § means by special permission only.
 * by special permission of the Course Leaders, students may substitute FM300 Corporate Finance Investments and Financial Markets or FM320 Quantitative Finance.
 This programme is externally accredited by the ACCA. Further information is available on the Department of Accounting website lse.ac.uk/collections/accounting/.

Taught Master's Programme Regulations

Key to Taught Master's Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 15/16) means not available in the 2015/16 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

MSc in Accounting and Finance

Programme Code: TMAF

Academic-year programme but may be a full year depending on courses selected. Students must take courses to the value of four units as shown.

Paper	Course number and title
1	FM430 Corporate Finance and Asset Markets or FM429 Asset Markets A (H) and FM431M Corporate Finance A (H) or FM431L Corporate Finance A (H) or another approved paper*
2	AC420 Financial Reporting in Capital Markets or AC411 Accounting, Strategy and Control (H) and AC414 Financial Reporting, Capital Markets and Business Combinations (H) or AC414 Financial Reporting, Capital Markets and Business Combinations (H) and AC415 Management Accounting for Decision Making (H) or AC411 Accounting, Strategy and Control (H) and AC415 Management Accounting for Decision Making (H)
3 & 4	Students should select remaining papers to the value of two full units: AC411 Accounting, Strategy and Control (H) (if not taken under paper 2) AC412 Accountability, Organisations and Risk Management (H) AC415 Management Accounting for Decision Making (H) (if not taken under paper 2) AC414 Financial Reporting, Capital Markets and Business Combinations (H) (if not taken under paper 2 - cannot be taken with AC420) AC420 Financial Reporting in Capital Markets (if not taken under paper 2 - cannot be taken with AC414) AC444 Valuation and Security Analysis (H) AC470 Accounting in the Global Economy (H) FM402 Financial Risk Analysis (H) FM404 Forecasting Financial Time Series (H)** FM413 Fixed Income Markets (H) FM421 Applied Corporate Finance (H) FM440 Corporate Finance Theory (H) (n/a 15/16) FM441 Derivatives (H) FM442 Quantitative Methods for Finance and Risk Analysis (H)** FM445 Portfolio Management (H) FM447 Global Financial Systems (H) FM472 International Finance (H) GY462 Real Estate Finance (H) LL4BK Corporate Crime (H) LL4BL Financial Crime (H) MG4D5 Leadership in Organisations: Theory and Practice (H) (formerly ID420) Any other course *
	Students can also take a dissertation in either accounting or finance (students cannot take two dissertations): AC499 Dissertation FM499 Dissertation

Notes Students may elect to have their degree specialisation indicated on their degree certificate. Students who take both AC470 and FM472 as Paper 3 may choose to have **MSc Accounting and Finance: International Accounting and Finance** on their certificate. Students who take AC411 and AC415 or AC420 as Paper 3 may choose to have **MSc Accounting and Finance: Accounting and Financial Management** on their certificate. Students taking finance courses to the equivalent of two full units as Papers 3 and 4 may choose to have **MSc Accounting and Finance: Finance** on their certificate.

* means by special permission only.

** Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.

MA400 is a pre requisite for this course.

This programme is externally accredited by the ACCA. Further information is available on the Department of Accounting website lse.ac.uk/collections/accounting/prospectiveStudents/postgraduate/programme/MScAccountingAndFinance.htm.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Accounting, Organisations and Institutions

Programme Code: TMACORIN

Academic-year programme. Students take courses to the value of four units. There is also a pre-session course held in the week before MT: AC425 MSc Accounting, Organisations and Institutions: Pre-session course.

Paper	Course number and title
1	AC424 Accounting, Organisations and Institutions
2	AC490 Management Accounting, Decisions and Control (H) * AC491 Financial Accounting, Reporting and Disclosure (H) *
3 & 4	Courses to the value of two units: AC411 Accounting, Strategy and Control (H) AC415 Management Accounting for Decision Making (H) AC414 Financial Reporting, Capital Markets and Business Combinations (H) # AC420 Financial Reporting in Capital Markets AC444 Valuation and Security Analysis (H) AC470 Accounting in the Global Economy (H) DV413 Environmental Problems and Development Interventions (H) DV415 Global Environmental Governance (H) (n/a 15/16) EH463 The Long-Run Analysis of Firms and Industries (H) EH464 The Historical Context of Business (H) EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries EH487 International Economic Institutions since World War I (H) MG476 Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16) LL4BE Principles of Financial Regulation (H) (n/a 15/16) LL4BF International Financial Regulation (H) LL4BX Corporate Governance - Advanced Topics (H) (n/a 15/16) SO469 Risk and Governance: A Sociological Approach (H)

Notes Any course with the approval of the Programme Director
 * Students with a substantive and verifiable background in

accounting must do as Paper 2 either AC420§ **or** (AC411 and AC414#) **or** (AC414# and AC415) **or** (AC411 and AC415).

§ cannot be taken with AC414

cannot be taken with AC420

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in African Development

Programme Code: TMAFDV

Full-year programme. Students take courses to the value of three full units and a dissertation as shown.

Paper Course number and title

1	DV418 African Development (H)
	DV435 African Political Economy (H)
2	A choice of: DV400 Development: History, Theory and Policy or DV431 Development Management or A combination of DV442 Key Issues in Development Studies (H) and one of the following: DV420 Complex Emergencies (H) DV421 Global Health and Development (H) DV428 Managing Humanitarianism (H)
3	Courses to the value of one unit not already taken under paper 2 or from the following: DV407 Poverty (H) DV411 Population and Development: An Analytical Approach (H) DV413 Environmental Problems and Development Interventions (H) (n/a 15/16) DV415 Global Environmental Governance (H) (n/a 15/16) DV423 Global Political Economy of Development (H) (n/a 15/16) DV424 International Institutions and Late Development (H) DV432 China in Developmental Perspective (H) DV433 The Informal Economy and Non-State Governance (H) DV434 Human Security (H) (n/a 15/16) DV445 Research Themes in International Development (H) DV446 Technical Change, Paradigm Shifts and Global Development (H) DV447 Public Affairs, International Development and Gendered Violence (H) DV453 Humanitarian Consultancy Project (H) DV483 Information Technologies and Socio-Economic Development (H) DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (H) DV491 Economic Development Policy II: Microeconomic Analysis (H) DV492 Economic Development Policy III: Government Policy Analysis (H) AN436 The Anthropology of Development (H) GI407 Globalisation, Gender and Development GI409 Gender, Globalisation and Development: An Introduction (H) GI411 Gender, Postcolonialism, Development: Critical Perspectives and New Directions (H) (n/a 15/16) GI418 Feminist Economics and Policy: An Introduction (H) GI419 Gender and Contemporary Social Movements (H) (n/a 15/16) GI420 Globalisation, Gender and Development: Policy and Practice (H) GV483 Public Management Theory and Doctrine (H)

GV4C2	Globalisation, Conflict and Post-Totalitarianism (H)
GY403	Contemporary Debates in Human Geography (H)
GY407	Globalization, Regional Development and Policy
GY408	Local Economic Development and Policy
GY409	Globalization and Regional Development (H)

GY421	Gender and Development : Geographical Perspectives (H)
GY423	Environment and Development
GY431	Cities, People and Poverty in the South (H) (n/a 15/16)
GY432	Urban Ethnography (H) (n/a 15/16)
GY447	The Economics of Regional and Urban Planning (H)
GY464	Race and Space (H)
GY467	Global Migration and Development (H)
GY468	Environment and Development: Sustainability, Technology and Business (H)
GY469	Environment and Development: Ecosystem Services and the Global South (H)
IR422	Conflict and Peace Studies (with permission) (n/a 15/16)
IR461	Islam in International Relations: From Al-Andalus to Afghanistan
MG402	Public Management: A Strategic Approach (H) (n/a 15/16)
MG4B7	Organisational Change (H) (formerly ID431)
SA492	Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (H)
SA4E6	Rural Development and Social Studies (with permission) (H) (n/a 15/16)
SA4F1	Migration: Population Trends and Policies (H)
SA4H9	Non-Governmental Organisations, Social Policy and Development (H)
	Other relevant courses with permission of degree programme and course managers.
4	DV410 Research Design and Dissertation in Development Studies, Development Management, African Development and International Development and Humanitarian Emergencies

MSc in Anthropology and Development

Programme Code: TMANDV

Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at seminars and at non-assessed tutorials is compulsory.

Paper Course number and title

1	AN436 The Anthropology of Development (H) and either AN456 Anthropology of Economy (1): Production and Exchange (H) or AN457 Anthropology of Economy: Development (2): Transformation and Globalisation (H)
2	DV400 Development: History, Theory and Policy or DV442 Key Issues in Development Studies (H) and One half unit in Development (DV4**) from paper 3.
3	One full unit from the following: A paper from 1 or 2 above not already taken AN402 The Anthropology of Religion AN404 Anthropology: Theory and Ethnography AN405 The Anthropology of Kinship, Sex and Gender AN419 The Anthropology of Christianity (H) AN420 The Anthropology of South-East Asia (H)

AN421	The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16)
AN424	The Anthropology of Melanesia (H)
AN437	Anthropology of Learning and Cognition (n/a 15/16)
AN439	Anthropology and Human Rights (H) (n/a 15/16)
AN444	Investigating the Philippines- New Approaches and Ethnographic Contexts (H) (n/a 15/16)
AN447	China in Comparative Perspective
AN451	Anthropology of Politics (H)
AN458	Children and Youth in Contemporary Ethnography (H) (n/a 15/16)
AN459	Anthropology and Media (H)
AN467	The Anthropology of South Asia (H) (n/a 15/16)
AN469	The Anthropology of Amazonia (H) (n/a 15/16)
AN473	Anthropological Approaches to Value (H) (n/a 15/16)
AN474	Subjectivity and Anthropology (H)
AN475	The Anthropology of Revolution (H)

DV415	Global Environmental Governance (H) (n/a 15/16)
DV418	African Development (H)
DV420	Complex Emergencies (H)
DV428	Managing Humanitarianism (H)
DV429	Global Civil Society (H) (n/a 15/16)
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (H)
DV491	Economic Development Policy II: Microeconomic Analysis (H)
DV492	Economic Development Policy III: Government Policy Analysis (H)
GY449	Urban Futures (H)
GY467	Global Migration and Development (H)
Any other courses offered by Anthropology or Development Studies, as approved	
AN499	Dissertation

4

MSc in Anthropology and Development Management

Programme Code: TMANDVMG

Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at seminars and at non-assessed tutorials is compulsory.

Paper Course number and title

1	AN436	The Anthropology of Development (H) and either
	AN456	Anthropology of Economy (1): Production and Exchange (H) or
	AN457	Anthropology of Economy: Development (2): Transformation and Globalisation (H)
2	DV431	Development Management
3	One full unit from the following:	
	A paper from 1 above not already taken	
	AN402	The Anthropology of Religion
	AN404	Anthropology: Theory and Ethnography
	AN405	The Anthropology of Kinship, Sex and Gender
	AN419	The Anthropology of Christianity (H)
	AN420	The Anthropology of South-East Asia (H)
	AN421	The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16)
	AN424	The Anthropology of Melanesia (H)
	AN437	Anthropology of Learning and Cognition (n/a 15/16)
	AN439	Anthropology and Human Rights (H) (n/a 15/16)

AN444	Investigating the Philippines- New Approaches and Ethnographic Contexts (H) (n/a 15/16)
AN447	China in Comparative Perspective
AN451	Anthropology of Politics (H)
AN458	Children and Youth in Contemporary Ethnography (H) (n/a 15/16)
AN459	Anthropology and Media (H)
AN467	The Anthropology of South Asia (H) (n/a 15/16)
AN469	The Anthropology of Amazonia (H) (n/a 15/16)
AN473	Anthropological Approaches to Value (H) (n/a 15/16)
AN474	Subjectivity and Anthropology (H)
AN475	The Anthropology of Revolution (H)
DV407	Poverty (H)
DV413	Environmental Problems and Development Interventions (H) (n/a 15/16)
DV415	Global Environmental Governance (H) (n/a 15/16)
DV418	African Development (H)
DV420	Complex Emergencies (H)
DV428	Managing Humanitarianism (H)
DV429	Global Civil Society (H) (n/a 15/16)
DV442	Key Issues in Development Studies (H)
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (H)
DV491	Economic Development Policy II: Microeconomic Analysis (H)
DV492	Economic Development Policy III: Government Policy Analysis (H)
GY467	Global Migration and Development (H)
Any other courses offered by Anthropology or Development Studies, as approved	
AN499	Dissertation

4

MSc in Applicable Mathematics

Programme Code: TMAPMA

Full-year programme. Students must take courses to the value of four full units.

Paper Course number and title

1	One from:	
	MA407	Algorithms and Computation (H)
	MA421	Advanced Algorithms (H)
2, 3 & 4	Three from:	
	MA402	Game Theory I (H)*
	MA408	Discrete Mathematics and Graph Theory (H)
	MA409	Continuous-Time Optimisation (H)
	MA410	Information, Communication and Cryptography (H)
	MA411	Probability and Measure (H)
	MA412	Functional Analysis and its Applications (H)
	MA413	Games of Incomplete Information (H)
	MA414	Stochastic Analysis (H)
	MA418	Preferences, Optimal Portfolio Choice, and Equilibrium (H) (n/a 15/16)
	MA419	Search Games (H)
	MA420	Quantifying Risk Modelling and Alternative Markets (H)
	MA421	Advanced Algorithms (H) (if not taken under Paper 1)
5 & 6	Courses to the value of two half-units from:	
	FM402	Financial Risk Analysis (H)
	FM441	Derivatives (H)
	FM442	Quantitative Methods for Finance and Risk Analysis (H)**
	FM492	Principles of Finance***
	EC484	Econometric Analysis
	EC487	Advanced Microeconomics
	GV4A3	Social Choice Theory and Democracy (H)
	MG408	Combinatorial Optimisation (H) (formerly

	OR408)
MG409	Auctions and Game Theory (H) (formerly OR409)
MG4A7	Solving Unsolvable Problems: NP-completeness and how to cope with it (H) (formerly OR437)
MG4C1	Techniques of Operational Research (H) (formerly OR401)
MG4C6	Mathematical Programming: Theory and Algorithms (H) (formerly OR406)
MG4C5	Modelling in Applied Statistics and Simulation (H) (formerly OR426)
MG4C8	Model Building in Mathematical Programming (H) (formerly OR428)
ST409	Stochastic Processes (H)
ST418	Non-Linear Dynamics and the Analysis of Real Time Series (H)
ST422	Time Series (H)
	Another half unit from the list under 2, 3 and 4 above, or any other paper with the approval of the Programme Director and the teacher responsible for the course. ****
7	MA498 Dissertation in Mathematics
Notes	<p>* This option will not be available to those who have already studied MA300 and MA301, or who have studied this subject as part of an undergraduate degree.</p> <p>** Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.</p> <p>*** Students must seek permission from the Department of Finance to take this course. They will be required to complete an online form about their background in mathematics, statistics and economics. The forms will be reviewed and approved or rejected, or a student may be asked to provide more information.</p> <p>**** Students may not take MA415, MA416 or MA417.</p>

MSc in China in Comparative Perspective

Programme code: TMCHCP

Full-year programme. Students must take one compulsory course, select optional courses to the value of two units, and write a dissertation, as shown below. Attendance at seminars and at non-assessed tutorials is compulsory.

Students intending to use this degree to convert to a discipline in which they hope to qualify to do a research degree, should choose all their options (papers 2 and 3) in that discipline. At least one option should be a general introduction to that discipline (e.g. paper 2 courses) and others can be found on the departmental website the student is interested in.

Otherwise students select courses from paper 3 (these courses expect students from this MSc) or they can choose other options not listed below. In either case, the student must email the teacher responsible for the course, backing up their request to join it.

Paper Course number and title

1	AN447 China in Comparative Perspective
2	Courses to the value of one unit from the following: AN404 Anthropology: Theory and Ethnography EH482 Pre-Modern Paths of Growth: East and West Compared, 1000-1800 (Students who do not wish to advance their first degree in one of the disciplines above may take a full unit course from paper 3)
3	Courses to the value of one unit from the following: AN402 The Anthropology of Religion AN405 The Anthropology of Kinship, Sex and Gender AN421 The Anthropology of Industrialization and Industrial Life (H) (n/a 15/16) AN436 The Anthropology of Development (H) AN439 Anthropology and Human Rights (H) (n/a 15/16) AN451 Anthropology of Politics (H) AN456 Anthropology of Economy (1): Production and

	Exchange (H)
AN457	Anthropology of Economy (2): Development, Transformation and Globalisation (H)
AN459	Anthropology and Media (H)
AN473	Anthropological Approaches to Value (H) (n/a 15/16)
DV411	Population and Development: an Analytical Approach (H)
DV413	Environmental Problems and Development Interventions (H) (n/a 15/16)
DV415	Global Environmental Governance (H) (n/a 15/16)
DV432	China in Developmental Perspectives (H)
EH446	Economic Development in East and Southeast Asia (n/a 15/16)
EU443	European Models of Capitalism (H)
GV4H1	Chinese Political Thought (H)
GY438	Cities and Social Change in East Asia (H) (n/a 15/16)
GV467	Introduction to Comparative Politics (H)
GY480	Remaking China: Geographical aspects of Development and Disparity (H)
HY461	East Asia in the Age of Imperialism, 1839-1945*
	A full-unit from MSc International Relations (papers 2 & 3), subject to availability and the approval of the relevant course convenor. The following courses would be particularly appropriate:
IR411	Foreign Policy Analysis III
IR418	International Politics: Asia and the Pacific
IR462	Introduction to International Political Theory (H) (n/a 15/16)
IR463	The International Political Theory of Humanitarian Intervention (H) (n/a 15/16)
IR464	The Politics of International Law † (H)
	A full-unit in Social Policy chosen from the following, subject to availability and the approval of the relevant course convenor:
SA488	Social Policy: Goals and Issues (H)
SA4C8	Globalization and Social Policy (H)
SA4C9	Social Policy - Organization and Innovation (H)
SA4D2	Global Health and Population Change (H)
SA4H9	Non-Governmental Organisations, Social Policy and Development
SA4L1	The Governance of Welfare: The Nation State and the European Union (H)
SA4L2	Contemporary Issues in European Social Policy (H) (n/a 15/16)
	Other Anthropology courses (to the value of one full unit) may be taken, subject to the approval of the Programme Director.
4	AN498 Dissertation - MSc China in Comparative Perspective
Notes	*means subject to space

MSc in City Design and Social Science

Programme code: TMCIDSS

Full-year programme which can also be taken part-time over three years. Students must take the City Design: Research Studio course, two compulsory half-unit courses, an independent project, and one unit of optional courses.

Paper Course number and title

1	SO448 City Design: Research Studio
2	SO451 Cities by Design (H)
3	SO465 City-Making: the Politics of Urban Form (H)
4	Courses to the value of one full unit from the following: GY409 Globalisation and Regional Development (H) GY410 Economics of Local and Regional Development (H)

	GY431	Cities, People and Poverty in the South (H) (n/a 15/16)
	GY432	Urban Ethnography (H) (n/a 15/16)
	GY438	Cities and Social Change in East Asia (H) (n/a 15/16)
	GY439	Cities, Politics and Citizenship (H)
	GY441	The Politics of Housing (H) (n/a 15/16)
	GY446	Planning for Sustainable Cities (H)
	GY448	Social and Political Aspects of Regional and Urban Planning (H)
	GY449	Urban Futures (H)
	GY455	Economic Appraisal and Valuation (H)
	GY479	Urban Revolutions (H)
	SA429	Understanding Social (Dis)advantage (H)
	SA4C6	International Housing and Human Settlements (H)
	SA4F9	Housing, Neighbourhoods and Communities (H)
	SO473	Crime, Control and the City (H) (n/a 15/16)
	SO475	Material Culture and Design (H)
	SO477	Urban Social Theory (H) (n/a 15/16)
	SO480	Urban Inequalities (H) (n/a 15/16)
	SO483	Social Change Organizations (H)
5	SO449	Independent Project
	Any other course in the Department of Sociology, or other departments §, by agreement with the course tutor	
Notes	§ means by special permission only.	

MSc in Comparative Politics

Programme code: TMCP

Full-year programme. Students must take papers to the value of four full units as shown. All students are required to write a 10,000-word dissertation. Note that some of the courses must be taken together. Part-time students may take up to four courses in their first year. All students, except those opting for No Specialism, must choose one of the following streams: Democracy and Democratization, Nationalism and Ethnic Politics, Comparative Political Economy, Popular Politics, Comparative Political Institutions, Politics of the Developing World, and take a minimum of one full unit from within that stream.

Core Elements

Paper	Course number and title
1	GV467 Introduction to Comparative Politics (H) (M)
2	GV499 Dissertation

Specialisms

Democracy and Democratization

Paper	Course number and title
3	GV4E1 Comparative Democratization in a Global Age (H) (M)
4	One half-unit from the following: GV427 Democracy in East and South Asia (H) (M) GV442 Globalisation and Democracy (H) GV444 Democracy and Development in Latin America (H) (L) GV4C9 Democratization and its Discontents in Southeast Asia (H) (M) GV4E2 Capitalism and Democracy (H) (L) GV4J4 Citizen Representation and Democracy in the European Union (H) (formerly EU466)
5	Courses to the value of 1.5 units, either from paper 4 above, or from the approved paper option list.

Nationalism and Ethnic Politics

Paper	Course number and title
3	GV479 Nationalism
4	One half-unit from the following: EU457 Ethnic Diversity and International Society (H) GV465 War, Peace and the Politics of National Self-Determination (H) (L) GV4C7 Warfare and National Identity (H) (M) GV4G6 Nationalism and Global Politics (H) (M) (n/a

	15/16)
	GV4H7 Subnational Politics in Comparative Perspective (H) (n/a 15/16)
5	Courses to the value of 1 unit, either from paper 4 above, or from the approved paper option list.

Comparative Political Economy

Paper	Course number and title
3	GV441 States and Markets (H) (M)
4	One half-unit from the following: GV4D4 The Politics of Inequality and Redistribution (H) (L) GV4E2 Capitalism and Democracy (H) (L) GV4F8 Institutions in the Global Economy (H) (L) SA4M1 Politics of Social Policy: Welfare and Work in Comparative Perspective (H)
5	Courses to the value of 1.5 units, either from paper 4 above, or from the approved paper option list.

Popular Politics

Paper	Course number and title
3	Courses to the value of 1 unit from the following: GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H) (L) GV4C9 Democratization and its Discontents in Southeast Asia (H) (M) GV4D3 Local Power in an Era of Globalization, Democratization and Decentralization (H) (L) GV4F2 Popular Politics in the Middle East (H) (L) GV4J4 Citizen Representation and Democracy in the European Union (H) (formerly EU466)
4	Courses to the value of 1.5 units, either from paper 3 above, or from the approved paper option list.

Comparative Political Institutions

Paper	Course number and title
3	Courses to the value of 1 unit from the following: GV443 The State and Political Institutions in Latin America (H) (M) GV4C4 Legislative Politics: US (H) (L) (n/a 15/16) GV4C6 Legislative Politics: European Parliament (H) (L) GV4E8 Conflict and Institutional Design in Divided Societies (H) (L) (n/a 15/16)
4	Courses to the value of 1.5 units, either from paper 3 above, or from the approved paper option list.

Politics of the Developing World

Paper	Course number and title
3	Courses to the value of 1 unit from the following: GV427 Democracy in East and South Asia (H) (L) GV432 Government and Politics in China GV443 The State and Political Institutions in Latin America (H) (M) GV444 Democracy and Development in Latin America (H) (L) GV4F2 Popular Politics in the Middle East (H) (L) GV4F9 African Politics, Wars and Violence (H) GV4G5 The History and Politics of the Modern Middle East
4	Courses to the value of 1.5 units, either from paper 3 above, or from the approved paper option list.

No specialism

Paper	Course number and title
3	Courses to the value of 2.5 units from any of the specialisms or from the approved paper option list.

Approved Paper Option List (for all Comparative Politics streams) Any course listed under a specialism that has not already been taken †

AN436	The Anthropology of Development (H) *
AN451	Anthropology of Politics (H) *
EU457	Ethnic Diversity and International Society (H) *
EU475	Muslims in Europe (H)
GV439	Government and Politics in Central and Eastern Europe (H)
GV4A5	International Migration and Immigration Management (H)

GV4B8	The Politics of Civil Wars (H) (L)
GV4B9	The Second Europe (H)
GV4C2	Globalisation, Conflict and Post-Totalitarianism (H) (L)
GV4H2	Contemporary India: The World's Largest Democracy in the Early 21st Century (H) (n/a 15/16)
GV4H7	Subnational Politics in Comparative Perspective (H) (n/a 15/16)
GV4J3	Public Opinion, Political Psychology and Citizenship (H)
GI413	Gender and Militarisation (H) *
HY411	European Integration in the Twentieth Century *
IR482	Russia and Eurasia: Foreign and Security Policies (n/a 15/16)
MY421M	or MY421L Qualitative Research Methods (H)
MY426	Doing Ethnography (H) (L)
MY451M	or MY451L Introduction to Quantitative Analysis (H)
MY452M	or MY452L Applied Regression Analysis (H)
IR411	Foreign Policy Analysis III *
SA4M1	Politics of Social Policy: Welfare and Work in Comparative Perspective (H) * (n/a 15/16)

A course from the Government Department or another department, with the consent of the convener of MSc Comparative Politics and the teacher of the course.

Notes † Students on a particular specialism will have automatic right of entry to the courses listed under the specialism. Other students will have access subject to availability.
* Approval from the teacher of the course is required.

MSc in Conflict Studies

Programme code: TMCS

Full-year programme. Students must take courses to the value of four full units.

Paper	Course number and title
1	GV4G4 Comparative Conflict Analysis (H) MY421M or MY421L Qualitative Research Methods (H) or MY451M or MY451L Introduction to Quantitative Analysis (H)
2	Courses to the value of one unit from the following: GV4A8 Nationalist Conflict, Political Violence and Terrorism (H) GV4B8 The Politics of Civil Wars (H) GV4C2 Globalisation, Conflict and Post-Totalitarianism (H) GV4D3 Local Power in an Era of Democratisation and Decentralisation (H) GV4E3 Democratisation, Conflict and Statebuilding (H) GV4E8 Conflict and Institutional Design in Divided Societies (H) (n/a 15/16) GV4H9 Armed Groups: Violence, Governance, and Mobilization (H)

SA4H9	Non-Governmental Organisations, Social Policy and Development (H)

Notes

† For students without a first degree in Economics.

* GI407 cannot be taken alongside GI409 or GI420

‡ Entry to these courses may be restricted.

§ Course designed for those with a minimum of one year's practical working experience in developing countries; seminars draw extensively on students' own experience. Entry may be restricted. Interested students should attend lectures and consult the lecturers.

MSc in Development Studies (Research)

Programme code: TMDVRE

Paper Course number and title

1	DV400	Development: History, Theory and Policy
2	DV410	Research Design and Dissertation in Development Studies, Development Management, African Development and International Development and Humanitarian Emergencies
3	Courses to the value of one full unit taught in the Methodology Institute	
4	Courses to the value of one full unit from the options listed under paper 3-4 on MSc Development Studies Promotion to the second year (i.e. admission onto the doctoral programme at the Department of International Development) is subject to the following conditions: An overall average mark of 65 in MSc Development Studies (Research), to include at least a mark of 65 for DV410; Availability of appropriate supervision; A research proposal that is evaluated as coherent by the Doctoral Programme Committee.	

MSc in Econometrics and Mathematical Economics

Programme code: TMEM

Academic-year programme. Students must take courses to the value of four full units as shown. Students are also required to attend the September Course EC400

Paper Course number and title

1	EC484	Econometric Analysis
2	EC487	Advanced Microeconomics
3	One course selected from the following: EC475 Quantitative Economics EC476 Contracts and Organisations EC485 Topics in Advanced Econometrics	
4	MSc EME Option List - courses to the value of one unit from the following papers: EC413 Macroeconomics ST409 Stochastic Processes (H) ST411 Generalized Linear Modelling and Survival Analysis (H) ST418 Non-linear Dynamics and the Analysis of Real Time Series (H) ST421 Developments in Statistical Methods (H) ST422 Time Series (H) Or other courses in Statistics, Mathematics or Finance may be selected with the approval of the Programme Director to the total value of one unit. Or a course from the Paper 4 list of options on the MSc in Economics Or a further paper listed under Paper 3 on MSc Econometrics and Mathematical Economics The Bologna Process in relation to taught masters programmes of nine or ten months duration.	

MSc in Econometrics and Mathematical Economics (two-year Programme)

Programme code: TMEMT

Students without a strong background in both economics and mathematics are required to take the MSc programme over two years, starting with attendance on the September Course EC400. The first year of the programme is governed by the 'Regulations for Diplomas'; students who successfully complete the examinations at the end of the first year will be awarded a Diploma in Econometrics and Mathematical Economics. In order to progress to the second

year, which is governed by the 'Regulations for Taught Masters Degrees', students must gain marks of 60% or higher in each examinable course at the end of their first year. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

Paper Course number and title

Year 1

1	EC309	Econometric Theory
2	EC411	Microeconomics † or EC202 Microeconomic Principles II
3	One course from the following list: MA212 Further Mathematical Methods ST202 Probability, Distribution Theory and Inference EC319 Economic Theory and its Applications*	

Year 2 Students must take courses to the value of four full units as shown.

Paper Course number and title

1	Course number and title	
2	EC484	Econometric Analysis
3	EC487	Advanced Microeconomics
	One course selected from the following:	
	EC475	Quantitative Economics
	EC476	Contracts and Organisations
	EC485	Topics in Advanced Econometrics
4	MSc EME Option List - courses to the value of one unit from the following papers:	
	EC413	Macroeconomics
	ST409	Stochastic Processes (H)
	ST411	Generalized Linear Modelling and Survival Analysis (H)
	ST418	Non-linear Dynamics and the Analysis of Real Time Series (H)
	ST421	Developments in Statistical Methods (H)
	ST422	Time Series (H)
	Or other courses in Statistics, Mathematics or Finance may be selected with the approval of the Programme Director to the total value of one unit.	
	Or a course from the Paper 4 list of options on the MSc in Economics	
	Or a further paper listed under Paper 3 on MSc Econometrics and Mathematical Economics	
Notes	* Only available if EC411 is chosen as Paper 2	
	† Students must obtain the permission of the relevant course proprietor.	

MSc in Economic History

Programme code: TMEH

Full-year programme. Students must take compulsory courses to the value of 1.5 units, and **either** optional courses to the value of two units and a half-unit dissertation, **or** optional courses to the value of 1.5 units and a full unit dissertation.

Paper Course number and title

1	EH401	Historical Analysis of Economic Change (H)
2	EH482	Pre-modern Paths of Growth: East and West compared, c1000-1800 or EH483 The Development and Integration of the World Economy in the 19th and 20th centuries
3 & 4	Either EH498	Dissertation: MSc Economic History (H) and courses to the value of two full units from the following Or EH499 Dissertation: MSc Economic History and courses to the value of 1.5 units from the following: EH402 Research Design and Quantitative Methods in

	Economic History (H)

	Capitalism in Historical Perspective
EC476	Contracts and Organisations
FM429	Asset Markets A (H) and FM4T1 Forecasting Financial Time Series - Dissertation (H) or FM4U1 Fixed Income Markets - Dissertation (H) or FM4T5 Portfolio Management - Dissertation (H) *
FM431M	Corporate Finance A (H) and FM4T2 Applied Corporate Finance - Dissertation (H) or FM4T3(n/a 15/16) Corporate Finance Theory - Dissertation (H) *

Any other course in Economics approved by the candidate's teachers. Such approval will only be given in exceptional circumstances.

- Notes**
- † Students must obtain the permission of the course proprietor.
 - * For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.
 - The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Economics (Two Year Programme)

Programme code: TMECT

Students without a strong background in economics are required to take the MSc programme over two years. The first year of the programme is governed by the 'Regulations for Diplomas'; students who successfully complete the examinations at the end of the first year will be awarded a Diploma in Economics. In order to progress to the second year, which is governed by the 'Regulations for Taught Masters Degrees', students must attain or exceed the progression threshold for each of the four courses they have taken. The progression threshold is 60% for courses EC201, EC210, EC220, and MA100, while the progression threshold is 55% in courses EC202, EC221, MA212 and other advanced MAXXX options. The Sub-Board of Examiners may, at its discretion, consider for progression candidates who fall marginally short of this requirement. However, students gaining the Diploma in a re-sit attempt are not eligible for progression onto the MSc, nor are students entitled to re-sit first year examinations already passed in order to achieve the progression standard.

Paper Course number and title

Year 1

1	EC201	Microeconomic Principles I or
	EC202	Microeconomic Principles II
2	EC210	Macroeconomic Principles
3	MA100	Mathematical Methods or
	MA212	Further Mathematical Methods
4	EC220	Introduction to Econometrics or
	EC221	Principles of Econometrics

Notes: Candidates may be allowed to substitute one other course for one of the above papers with the permission of the Programme Director.

Year 2 Students must take three compulsory courses, one unit of optional courses and an extended essay linked to the optional course as shown. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title

1	EC413	Macroeconomics
2	EC411	Microeconomics or
	EC487	Advanced Microeconomics †
3	EC402	Econometrics
4	One of the following courses:	
	EC421	International Economics
	EC423	Labour Economics
	EC424	Monetary Economics
	EC426	Public Economics
	EC427	Economics of Industry

EC428	Development and Growth
EC453	Political Economy
EC465	Economic Growth, Development, and Capitalism in Historical Perspective
EC476	Contracts and Organisations
FM431M	Corporate Finance A (H) and FM4T2 Applied Corporate Finance - Dissertation (H) or FM4T3 Corporate Finance Theory - Dissertation (H) *
FM429	Asset Markets A (H) and FM4T1 Forecasting Financial Time Series - Dissertation (H) or FM4U1 Fixed Income Markets - Dissertation (H) or FM4T5 Portfolio Management - Dissertation (H) *

Any other course in Economics approved by the candidate's teachers

- Notes**
- † Students must obtain the permission of the relevant course proprietor.
 - * For the purposes of degree classification the Finance half unit courses are combined and averaged to produce a final mark.

MSc in Economics and Management

Programme code: TMECMN

A ten-month programme. Students take three core courses, two half-unit options and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title

1	MG411	Firms and Markets
2	EC486	Econometric Methods
3	FM431M	Corporate Finance A (H)
4 & 5	Two half unit Options from the following list:	
	MG412	Globalization and Strategy (H)
	MG421	Foreign Direct Investment and Emerging Markets (H)
	MG422	Thinking Strategically (H)
	MG452	Behavioural Economics for Management (H)
	MG4A8	Strategy for the Information Economy (H) (formerly MN430)
	MG4B9	The World Trading System (H) (formerly MN429)
	FM421	Applied Corporate Finance (H)
	FM440	Corporate Finance Theory (H) (n/a 15/16)
	AC490	Management Accounting, Decisions and Control* (H)

Or a MSc level course which is offered in the School, subject to approval of the academic adviser and course leader.

- 6 MG417 Extended Essay (H)
- * Subject to approval of the Course Teacher
 - The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Economics and Philosophy

Programme code: TMECPH

Full-year programme. Students take courses to the value of four units and a dissertation. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper Course number and title

1 & 2	Two of the following:	
	EC402	Econometrics
	EC411	Microeconomics
	EC413	Macroeconomics

GY460	Techniques of Spatial Economic Analysis (H)
GY465	Concepts in Environmental Regulation (H)
GY469	Environment and Development: Resources, Institutions and the Global South (H)
GY475	Issues in Environmental Governance (H)
IR467	International Political Economy of the Environment (H) (n/a 15/16)
SA4E6	Rural Development and Social Policy (H) (n/a 15/16)
SA4F8	Behavioural Public Policy (H)
SA4L4	Behaviour, Happiness and Public Policy
SO469	Risk and Governance: A Sociological Approach (H)
	Or other relevant courses to the value of one full unit, subject to approval of the programme director and the relevant course proprietor.
5	GY499 Dissertation
Notes	* Students wishing to take courses in the Economics Department ('EC' prefix) are required to complete to the required standard the EC400 pre-session course.

MSc in Environmental Policy and Regulation

Programme code: TMENPR

Full-year programme. Students must take two compulsory courses, a dissertation, and either 1 or 1.5 units of optional courses.

Paper	Course number and title
1	GY420 Environmental Regulation: Implementing Policy
2	GY423 Environment and Development or GY468 Environment and Development: Sustainability, Technology and Business (H)
3	Courses to the value of 1.5 units if taking GY468, or 1 unit if taking GY423 (under paper 2 above): DV415 Global Environmental Governance (H) (n/a 15/16) EU421 Policy-Making in the European Union (H) GY427 Climate Change: Science, Economics and Policy (H) GY446 Planning for Sustainable Cities (H) GY455 Economic Appraisal and Valuation (H) IR467 International Political Economy of the Environment (H) (n/a 15/16) LL4A6 Climate Change and International Law (H) LL4BV Transnational Environmental Law (H) SO425 Regulation, Risk and Economic Life SO469 Risk and Governance: A Sociological Approach (H)
4	GY499 Dissertation

MSc in Environment and Development

Programme code: TTMENDV

Full-year programme. Students must take courses to the value of four full units.

Paper	Course number and title
1	GY423 Environment and Development
2	One full unit or two half units offered by the Department for International Development (Not DV431)
3	One full unit or two half units offered by the Department of Geography and Environment from the following: GI409 Gender, Globalisation and Development: An Introduction (H) GY400 The Economics of Urbanisation (H) GY403 Contemporary Debates in Human Geography (H) GY407 Globalization, Regional Development and Policy GY409 Globalization and Regional Development (H) GY413 Regional Development and Policy (H) (n/a 15/16) GY420 Environmental Regulation: Implementing Policy GY421 Gender and Development: Geographical Perspectives (H) GY427 Climate Change: Science, Economics and Policy (H) GY431 Cities, People and Poverty in the South (H) (n/a 15/16) GY432 Urban Ethnography (H) (n/a 15/16) GY438 Cities and Social Change in East Asia (H) (n/a 15/16) GY439 Cities, Politics and Citizenship (H) GY455 Economic Appraisal and Valuation (H) GY459 Urban Theory and Policy in the Global South (H) GY464 Race and Space (H) GY465 Concepts in Environmental Regulation (H) GY467 Global Migration and Development (H) GY475 Issues in Environmental Governance (H) GY479 Urban Revolutions (H) GY480 Remaking China: Geographical Aspects of Development and Disparity (H) LL4A6 Climate Change and International Law (H) GY499 Dissertation or one full or two half units from any courses listed under 3 or offered by the Department for International Development
4	

MSc in EU Politics

Programme code: TMEUPOL

Students must take courses to the value of three units and a dissertation as shown. Additionally, all students must take EU465 Research Methods and Design in EU Politics, and if their timetable allows, EU450 European Union: Contemporary Issues, in preparation for the dissertation.

Paper Course number and title

Part I: Foundation

1	Students must choose two out of the following three courses: EU421 Policy-Making in the European Union (H) (cannot be taken with IR431) EU435 History and Theory of European Integration (H) IR416 The EU in the World
---	---

Part II: Optional courses

2 & 3 Any courses which in combination with the foundation courses bring the total list of courses to the value of three units. If students wish their optional courses to result in a degree specialism, their chosen optional courses must come to a total value of at least one full unit from that specialism. Only one specialism is permitted. Courses from the heading 'Methods' cannot result in a specialism.

Policy Making and Public Policy in the European Union

MSc in Finance (full-time)**Programme code:** TMFIFT

TMFIFTW (Work Placement Pathway)

Academic-year (10 month) programme (TMIFT). Students must take two compulsory courses and optional courses to the value of two full units as shown. All students must submit a dissertation in one of the optional half unit courses and take an examination in the other three half unit courses. Admitted students are required to attend a pre-session course at the start of the programme in September. The dissertation must be submitted by the 3rd week of June. Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Paper Course number and title

1	FM422	Corporate Finance
2	FM423	Asset Markets
3 & 4	Students should select 4 half unit courses to the value of 2 full units. Students must select at least three courses from the dedicated list of options marked (*):	
	FM405	Fixed Income Securities and Credit Markets (H) (Dissertation code FM4U5)*
	FM406	Topics in Portfolio Management (H) (Dissertation code FM4T6)*
	FM407	Mergers, Buyouts and Corporate Restructurings (H) (Dissertation code FM4U7)*
	FM408	Financial Engineering (H) (Dissertation code FM4T8)*
	FM409	Risk Management in Financial Markets (H) (Dissertation code FM4U9)*
	FM414	Corporate Investment and Financial Policy (H) (Dissertation code FM4T4)*
	FM440	Corporate Finance Theory (H) (Dissertation code FM4T3) (n/a 15/16)
	FM457	Applied Computational Finance**
	FM472	International Finance (H) (Dissertation code FM4T9)

In exceptional cases it may be possible to take an unlisted optional course with the approval of the Programme Director.

Work Placement Pathway**Paper Course number and title**

5	FM411	Finance Work Placement and Assessment ***
---	-------	---

Notes Students are required to write a 6,000 word dissertation (replacing the exam) in one of the half unit courses. Students will be required to attend teaching for the course which they choose to write their dissertation on.
+ With the approval of the course leader.

** This course is not for credit and can be taken in addition to courses to the value of two full units selected from Paper 3 & 4.

*** This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

MSc in European Studies (Research)**Programme code:** TMEURE**Paper Course number and title****First year:**

MSc in Finance and Economics

Programme code: TMFIEC

TMFIECW (Work Placement Pathway)

Academic-year (10 month) programme (TMFIEC). Students must take three compulsory full-unit core courses and two optional half-unit courses. All students must submit a 6,000 word dissertation in one of the optional courses and take a two-hour examination in the other. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics. The dissertation must be submitted in the third week of June.

Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Paper	Course number and title
1	EC411 Microeconomics *
2	FM436 Financial Economics
3	FM437 Financial Econometrics
4	Courses to the value of one full unit selected from the following (one to be examined by dissertation and one by examination). Students on the Work Placement Pathway must also select FM411 Finance Work Placement and Assessment:
	FM404 Forecasting Financial Time Series (H) (Dissertation code FM4T1)**
	FM407 Mergers, Buyouts and Corporate Restructurings (H) (Dissertation code FM4U7)**
	FM408 Financial Engineering (H) (Dissertation code FM4T8)
	FM409 Risk Management in Financial Markets (H) (Dissertation code FM4U9)
	FM413 Fixed Income Markets (H) (Dissertation code FM4U1)
	FM421 Applied Corporate Finance (H) (Dissertation code FM4T2)
	FM440 Corporate Finance Theory (H) (Dissertation code FM4T3) (n/a 15/16)
	FM442 Quantitative Methods for Finance and Risk Analysis (H) (Dissertation code FM4U2)
	FM445 Portfolio Management (H) (Dissertation code FM4T5)
	FM447 Global Financial Systems (H) (Dissertation code FM4T7)
	FM457 Applied Computational Finance***
	FM472 International Finance (H) (Dissertation code FM4T9)

Work Placement Pathway

Paper **Course number and title**

5 FM411 Finance Work Placement and Assessment §

Notes: * With the approval of the Programme Director, students who have already completed the equivalent of EC411 in their prior studies may be permitted to take EC413 Macroeconomics.

** Places on this optional course are not automatically guaranteed, students must obtain approval from the Associate Programme Director to take this course.

*** This course is not for credit and can be taken in addition to courses to the value of one full unit selected from Paper 4.

§ This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

The Bologna Process in relation to taught master's programmes of nine or ten months duration.

MSc in Finance and Economics (Research)

Programme code: TMFIECRE

TMFIECREW (Work Placement Pathway)

Academic-year (10 month) programme. Students must take three compulsory full-unit core courses and two optional half-unit courses. Students must apply for entry into the programme at the start of October. Entry will be upon acceptance onto EC487 and FM481 by the course leaders in the Departments of Economics and Finance respectively. Students must take courses as shown. They must submit a 6,000-10,000 word dissertation in one of the optional half unit courses and take a two-hour examination in the other course. Students are required to attend EC400 Introductory Course in Mathematics and Statistics. The dissertation must be submitted in the third week of June.

Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Paper **Course number and title**

1	FM436 Financial Economics
2	FM481 Financial Econometrics for Research Students
3	EC487 Advanced Microeconomics*
4	Two half-unit courses selected from the following. Students on the Work Placement Pathway must also select FM411 Finance Work Placement and Assessment:
	FM404 Forecasting Financial Time Series (H) (Dissertation code FM4T1)**
	FM407 Mergers, Buyouts and Corporate Restructurings (H) (Dissertation code FM4U7)**
	FM408 Financial Engineering (H) (Dissertation code FM4T8)
	FM409 Risk Management in Financial Markets (H) (Dissertation code FM4U9)
	FM413 Fixed Income Markets (H) (Dissertation code FM4U1)
	FM421 Applied Corporate Finance (H) (Dissertation code FM4T2)
	FM440 Corporate Finance Theory (H) (Dissertation code FM4T3) (n/a 15/16)
	FM442 Quantitative Methods for Finance and Risk Analysis (H) (Dissertation code FM4U2)
	FM445 Portfolio Management (H) (Dissertation code FM4T5)
	FM447 Global Financial Systems (H) (Dissertation code FM4T7)
	FM457 Applied Computational Finance***
	FM472 International Finance (H) (Dissertation code FM4T9)

One unlisted optional course with the approval of the Programme Director.

Work Placement Pathway

Paper **Course number and title**

5 FM411 Finance Work Placement and Assessment §

Notes * With the approval of the Programme Director, students who have already completed the equivalent of EC487 in their prior studies may be permitted to take EC413 Macroeconomics.

** Places on this optional course are not automatically guaranteed, students must obtain approval from the Associate Programme Director to take this course.

*** This course is not for credit and can be taken in addition to courses to the value of one full unit selected from Paper 4.

§ This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Finance and Private Equity

Programme code: TMFIPE

TMFIPEW (Work Placement Pathway)

Academic-year (10 month) programme (TMFIPE). Students must take three compulsory courses (FM410 Private Equity includes a dissertation) and optional courses to the value of 1.5 units.

Admitted students are required to attend the Quantitative Methods September course. The dissertation must be submitted by the third week in June.

Students who choose to transfer to the Work Placement Pathway must undertake a work placement and assessment in addition to the courses listed above. Transferring to the Work Placement Pathway extends the duration of the programme to 12 months. Students have the option to transfer to the Work Placement Pathway upon receipt of an offer to undertake an internship placement, which must be approved by the Department. Students on this pathway are required to undertake a full-time internship or work placement during the summer and to submit an essay of 2000 words following the placement (see FM411 for details). The essay will be assessed on a pass/fail basis and students must pass the essay to graduate from the programme.

Paper	Course number and title
1	FM422 Corporate Finance
2	FM423 Asset Markets
3	FM410 Private Equity (H)
4	Three of the following half unit courses (students must select at least two courses from the list of dedicated options marked (*). Students on the Work Placement Pathway must also select FM411 Finance Work Placement and Assessment:
	FM404 Forecasting Financial Time Series (H) +
	FM405 Fixed Income Securities and Credit Markets (H)*
	FM406 Topics in Portfolio Management (H)*
	FM407 Mergers, Buyouts and Corporate Restructurings

(H)*

FM408	Financial Engineering (H)*
FM409	Risk Management in Financial Markets (H)*
FM414	Corporate Investment and Financial Policy (H)*
FM440	Corporate Finance Theory (H) (n/a 15/16)
FM457	Applied Computational Finance**
FM472	International Finance (H)

In exceptional circumstances it may be possible to take an unlisted optional course with the approval of the programme Director.

Work Placement Pathway

Paper	Course number and title
5	FM411 Finance Work Placement and Assessment ***

Notes Students are required to write a 6,000 word dissertation in FM410 and must sit examinations in all other courses.
+ with the approval of the course leader.

** This course is not for credit and can be taken in

addition to courses to the value of three half units selected from Paper 4.

*** This element is not for credit, but is a requirement for students on the Work Placement Pathway and must be taken in addition to courses to the value of two full units selected from Papers 3 & 4. Successful completion of FM411 is a requirement for students to be eligible for the award of the degree.

The Bologna Process in relation to taught master's programmes of nine or ten months duration.

MSc in Financial Mathematics

Programme code: TMFIMA

Academic year programme (10 months). Students must take five compulsory half-unit courses and optional courses to the value of one-and-a-half units as shown.

There is also a two-week compulsory pre-session course MA400 September Introductory Course relating to MA415 and MA417.

Paper	Course number and title
1	MA415 Mathematics of the Black and Scholes Theory (H)
2	MA416 The Foundations of Interest Rate and Credit Risk Theory (H)
3	ST409 Stochastic Processes (H)
4	FM413 Fixed Income Markets (H)
5	MA417 Computational Methods in Finance (H)
6	One of the following:
	MA402 Game Theory I (H)
	MA411 Probability and Measure (H)
	MA414 Stochastic Analysis (H)
	MA418 Preferences, Optimal Portfolio Choice, and Equilibrium (H) (n/a 15/16)
	MA420 Quantifying Risk Modelling and Alternative Markets (H)
	ST439 Stochastics for Derivatives Modelling (H)
	ST440 Recent Developments in Finance and Insurance (H)
	ST441 Introduction to Markov Processes and Their Applications (H)
7 & 8	The equivalent of one unit from the following:
	FM402 Financial Risk Analysis (H)
	FM404 Forecasting Financial Time Series (H)
	FM441 Derivatives (H) (n/a 15/16)
	FM442 Quantitative Methods for Finance and Risk Analysis (H)
	FM445 Portfolio Management (H)
	FM472 International Finance (H)
	FM492 Principles of Finance
	ST422 Time Series (H)
	ST426 Applied Stochastic Processes (H)
	ST427 Insurance Mathematics (H)
	ST429 Probabilistic Methods in Risk Management and Insurance (H)

Further half unit(s) from those courses listed under paper 6 above.

Further half unit(s) from the MA4** level courses or any other appropriate MSc course, subject to the approval of the Programme Director and Teacher Responsible for the course.

Students can also take MA422 Research Topics in Financial Mathematics, a non-assessed course taken in addition to the required five compulsory half-unit courses and optional courses to the value of one-and-a-half units detailed above.

The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Gender

Programme code: TMGE

Full-year programme. Students must take two compulsory courses and options to the value of two full units and a dissertation as shown.

Paper Course number and title

1	GI424	Gender Theories in the Modern World: An Interdisciplinary Approach (H)
2	GI402	Gender, Knowledge and Research Practice (H)
3	Courses to the value of 2 units from the following*:	
	AN405	The Anthropology of Kinship, Sex and Gender
	GI403	Gender and Media Representation (H)
	GI407	Globalisation, Gender and Development †
	GI409	Gender, Globalisation and Development: An Introduction (H) †
	GI410	Screening the Present: contemporary cinema and cultural critique (H)
	GI411	Gender, Postcoloniality, Development: Critical Perspectives and New Directions (H) (n/a 15/16)

GI499	Dissertation

Notes

* Students can take courses to a maximum of one full unit from outside the Gender Institute.

†GI407 cannot be taken alongside GI409 or GI420

††GI422 cannot be taken alongside GI421 or GI423

MSc in Global Health

Programme code: TMGLHE

Students take five compulsory half unit courses, options to the value of two units, and a dissertation.

Paper	Course number and title
Year 1	
1	SA4N3 Social Policy and Global Health (H)
2	SA4K1 Global Health Policy: Institutions, Actors and Politics (H)
3	SA4N4 Financing Health Care: Comparative Perspectives (H)
4	SA4M6 Economic Analysis for Health Policy (H)
5	SA4N5 Global Ageing (H)
6	Students take optional courses to the value of two full units as follows: One course from: SA4C8 Globalisation and Social Policy (H) or SA4N6 Principles of Modern Epidemiology (H) One course from: DV421 Global Health and Development (H) or SA4C4 Cost-Effectiveness Analysis in Health Care (H) One course from: SA4D4 Measuring Health System Performance (H) or SA4D6 Health Systems and Policies in Developing Countries (H) One course from: SA485 Planning for Population and Development (H) or SA492 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (H) or SA4D2 Global Health and Population Change (H)
7	SA4J3 Dissertation in Global Health (H)

MSc in Global History

Programme code: TMGLHY

Full-year programme. Students must take compulsory courses to the value of 2.5 units, and **either** optional courses to the value of one unit and a half-unit dissertation, **or** optional courses to the value of 0.5 units and a full unit dissertation.

Paper	Course number and title
1	EH481 Economic Change in Global History: Approaches and Analysis
2&3	Two of the following: EH482 Pre-modern Paths of Growth: East and West compared, c1000-1800 EH483 The Development and Integration of the World Economy in the 19th and 20th centuries HY423 Empire, Colonialism and Globalization
4	Either EH479 Dissertation: Global History (H) and courses to the value of one full unit from the following (if not already taken under paper 2) Or EH480 Dissertation: MSc Global History and courses to the value of 0.5 units from the following (if not already taken under paper 2): EH402 Research Design and Quantitative Methods in Economic History (H) EH404 India and the World Economy (H) EH408 International Migration, 1500-2000: from slavery to asylum (H) EH409 Chinese Economy in Transition: 1850-1950 (H) EH413 African Economic Development in Historical Perspective (H) EH422 Topics in Quantitative Economic History EH423 Japan and Korea as Developing Economics (H) (n/a 15/16) EH424 The British Economy in Global Perspective, 1000-2000 (H) (n/a 15/16) EH426 Quantitative Topics in Economic History I: Cross-section and Panel Data (H)** EH427 Quantitative Topics in Economic History II: Time Series and Economic Dynamics (H)** EH428 History of Economics: Making Political Economy into a Social Science (H) (n/a 15/16) EH429 History of Economics: Ideas, Policy and Performativity (H) (n/a 15/16) EH446 Economic Development of East and Southeast Asia (n/a 15/16) EH447 Great Depressions in Economic History (H) (n/a 15/16) EH451 Latin American Development: political economy of growth (H) (n/a 15/16) EH452 Latin American Development and Economic History (H) (n/a 15/16) EH463 The Long-Run Analysis of Firms and Industries (H) EH464 The Historical Context of Business (H) EH467 Epidemics: epidemic disease in history, 1348-2000 (H) (n/a 15/16) EH476 The Economic History of War EH482 Pre-modern Paths of Growth: East and West compared, c1000-1800 EH483 The Development and Integration of the World Economy in the 19th and 20th centuries EH486 Shipping and Sea Power in Asian Waters, c1600-1860 (H) EH487 International Economic Institutions since World War I (H)

Notes ** These courses cannot be combined with EH422. Students can also take HY449 **Long-term History: The Patterns of the Past and the Shape of Things to Come**, a non-assessed course taken in addition to the required four full-units as detailed above.

MSc in Global Politics

Programme Code: TMGLPO2

The MSc includes a core course, 'The Politics of Globalization' (paper 1) which all students must take. It draws on specialist knowledge from across the LSE's Politics staff to offer a comprehensive introduction to the changing structure of the global order, and the contemporary challenges of global politics. The rest of the MSc allows considerable choice of options whilst seeking to blend a global focus with more detailed thematic or regional knowledge. Students can also choose the Global Civil Society stream, in which case they must take a second core course, Global Civil Society, and additional options as detailed below. All students must write a 10,000 word dissertation.

PLEASE NOTE: Due to staff sabbaticals and research leave, the School cannot guarantee that all the courses listed below will be available.

Paper Course number and title

MSc Global Politics

1	GV4A4 The Politics of Globalization
2	GV499 Dissertation*
3 & 4	Courses to the value of two full units selected from the option list below Global Civil Society stream (not available 2015/16)
1	GV4A4 The Politics of Globalization
2	DV429 Global Civil Society (H) (n/a 15/16)
3	GV499 Dissertation*
4	Courses to the value of 1.5 units selected from the option list below Options (access to the following courses is not necessarily guaranteed and may require the permission of the course coordinator: please consult the individual course guides for further information on availability)
	DV413 Environmental Problems and Development Interventions (H) (n/a 15/16)
	DV415 Global Environmental Governance (H) (n/a 15/16)

	SA4D2	Global Health and Population Change (H)
	SA4D6	Health Systems and Policies in Developing Countries (H)
	SA4K2	Sexuality, Everyday Lives and Social Policy in Developing Countries (H)
4	PS497	Dissertation *

Notes

In cases where there are no timetabling clashes, a student will be permitted to do other half unit options in the School, subject to permission from the Programme Director and the agreement of the teacher responsible for the relevant option.

* Failures on this course cannot be condoned. A bad fail is defined as a mark less than 29%.

MSc in Health Policy, Planning and Financing

Programme code: TIHPPF

Full-year programme taught jointly with the London School of Hygiene and Tropical Medicine. Students must take courses to the value of five units as shown below, and undertake a 10,000 word dissertation. It is highly recommended that students select courses which spread the workload over the course of the year. The dissertation will be completed during the summer.

Paper Course number and title

1	SA407	Financing Health Care (H)
2	(LSHTM) 1107	Health Services (H) or (LSHTM) 1117 Health, Policy Process and Power
3		Obligation for all students to take one additional course (half unit) at LSE from the following:
	SA408	Health Economics (H)
	SA427	Pharmaceutical Economics and Policy (H)
	SA447	Foundations of Health Policy (H)
4		Obligation for all students to take one additional course (half unit) at LSHTM from the following:
	(LSHTM) 1107	Health Services (H)
	(LSHTM) 1117	Health Policy, Process and Power (H)
	(LSHTM) 1123	Issues in Public Health (H)
	(LSHTM) 2001	Basic Epidemiology (H)
5-6		Two LSE Courses* from the following:
	SA4C3	Statistical Methods in Health Care Economic Evaluation (H)
	SA4C4	Cost-effectiveness Analysis in Health Care (H)
	SA4D3	Valuing Health (H)
	SA4D4	Measuring Health System Performance (H)
	SA4D6	Health Systems and Policies in Developing

	Countries (H)
	SA4E9 Advanced Health Economics (H)
	SA4F8 Behavioural Public Policy (H)
	Another LSE Course (not listed above) with permission.
7-8	Two LSHTM Courses* from the following:
	(LSHTM) 1304 Health Impact and Decision Analysis (H)
	(LSHTM) 1402 Conflict and Health (H)
	(LSHTM) 1403 Organisational Management (H)
	(LSHTM) 1501 Economic Evaluation (H)
	(LSHTM) 1503 Globalisation and Health (H)
	(LSHTM) 1504 Economic Analysis for Health Policy (H)
	(LSHTM) 1606 Analytical Models for Decision Making (H)
	(LSHTM) 1808 Health Systems (H)
	Another LSHTM Course (not listed above) with permission.
9	SA4G9 Dissertation for MSc Health Policy, Planning and Financing
Notes	* At the discretion of the Programme Directors, students may be given the flexibility to choose an additional course from one institution, up to a total of four courses between both institutions under paper 5, 6, 7 and 8. For example, three courses from LSE under paper 5-6 and one course from LSHTM under paper 7-8, or vice versa. It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses .

MSc in Health, Population and Society

Programme Code: TMHEPOSO

Full-year programme. Students must take courses to the value of three full units and a dissertation

Paper	Course number and title
1	SA4D1 Social Epidemiology (H)
	SA4D2 Global Health and Population Change (H)
2	One of the following half unit courses:
	DV411 Population and Development: An Analytic Approach (H)
	DV421 Global Health and Development (H)
	GI417 Gender, Population and Society (H)
	SA481 Population Analysis: Methods and Models (H)
	SA485 Planning for Population and Development (H)
	SA492 Reproductive Health Programmes: Design, Implementation and Evaluation (H)
	SA493 Demographic Change and Development (H) (n/a 15/16)
	SA4D6 Health Systems and Policies in Developing Countries (H)
3	Courses to the value of one-and-a-half units from the following:
	Any course not taken under paper 2
	MG483 eHealth: Policy, Strategy and Systems (H) (formerly IS415)
	SA407 Financing Health Care (H)
	SA408 Health Economics (H)
	SA427 Pharmaceutical Economics and Policy (H)
	SA429 Understanding Social (Dis)advantage (H)
	SA447 Foundations of Health Policy (H)
	SA488 Social Policy: Goals and Issues (H)
	SA4C3 Statistical Methods in Health Care Economic Evaluation (H)
	SA4C4 Cost-effectiveness Analysis in Health Care (H)
	SA4C9 Social Policy: Organisation and Innovation (H)
	SA4D3 Valuing Health (H)
	SA4D4 Measuring Health System Performance (H)
	SA4F1 Migration: Population Trends and Policies (H)
	SA4F3 US Health Policies (H)
	SA4F8 Behavioural Public Policy (H)

	A related course from another programme
4	SA4B3 Dissertation on a topic approved by the supervisor, to be handed in by 1 September

Notes It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses.

MSc in History of International Relations

Programme Code: TMHYIRS

Full-year programme. Students take courses to the value of three full units (only one of which can be an outside option i.e. a course not listed below) and a dissertation:

Paper	Course number and title
1, 2, 3	Courses to the value of three full units from the following list:
	HY400 Crisis Decision-Making in War and Peace, 1914-2003

GY439 Cities, Politics and Citizenship (H)
GY446 Planning for Sustainable Cities (H)
GY447 The Economics of Regional and Urban Planning (H)
GY448 Social and Political Aspects of Regional and Urban Planning (H)
GY449 Urban Futures (H)
GY459 Urban Theory and Policy in the Global South (H)
GY464 Race and Space (H)
GY467 Global Migration and Development (H)
GY479 Urban Revolutions (H)
GY480 Remaking China: Geographical Aspects of Development and Disparity (H)
or Another coherent combination of GY and non-GY courses to the value of one and a half units as approved by the Programme Manager. |
|---|--|

Part III

- | | |
|---|--------------------|
| 4 | GY499 Dissertation |
|---|--------------------|

Notes †GI407 cannot be taken alongside GI409 or GI420

MSc in Human Resources and Organisations

Full-year programme. Students must take compulsory and optional courses to the value of three units and a full unit dissertation as shown below. The number of compulsory and optional units will vary depending on the specialism taken.

All students take the following compulsory courses:

Paper Course number and title

- | | |
|---|---|
| 1 | MG480 Management of Human Resources: Strategies |
|---|---|

- | | |
|---|---|
| 6 | MG493 and Policy (H)
Developing Professional Research and Employability Skills |
|---|---|

Students take the following courses according to their chosen specialism:

Specialism 1 - Organisational Behaviour

Programme code: TMHRORG3

Paper Course number and title

- | | |
|---|---|
| 2 | MG4C2 Organisational Behaviour (H) |
| 3 | MG4B7 Organisational Change (H) |
| 4 | MG475 Organisational Theory (H) |
| 5 | Two half-unit courses from the Options list |

Specialism 2 - Human Resource Management (CIPD)

Programme code: TMHRORG2

Paper Course number and title

- | | |
|---|--|
| 2 | MG4C2 Organisational Behaviour (H) |
| 3 | MG478 Globalisation and Human Resource Management (H) |
| 4 | MG4A9 Foundations of Business and Management for Human Resources (H) |
| 5 | Two half-unit courses from the Options list |

Specialism 3 - International Employment Relations & Human Resource Management

Programme code: TMHRORG

Paper Course number and title

- | | |
|---|---|
| 2 | MG4D2 International Employment Relations (H) and |
| 3 | MG478 Globalisation and Human Resource Management (H) |
| 4 | One course from the following:
MG4C2 Organisational Behaviour (H) or
MG473 Negotiation Analysis (H) or
MG475 Organisational Theory (H) or
MG4B5 Business in the Global Environment (H) |
| 5 | Two half-unit courses from the Options list |

Options list

Paper Course number and title

- | | |
|-------|--|
| LL4H8 | Employment Law (H) |
| LL4H9 | Human Rights in the Workplace (H) |
| MG421 | Foreign Direct Investment and Emerging Markets (H) |
| MG423 | Leading Entrepreneurial Organisations in Global Markets (H) |
| MG450 | Social Network Analysis and Strategies (H) |
| MG474 | Managing Diversity in Organisations (H) (n/a 15/16) |
| MG476 | Corporate Social Responsibility and International Labour Standards (H) (n/a 15/16) |
| MG477 | Reward System: Key Models and Practices (H) |
| MG4B2 | Personnel Economics (H) (n/a 15/16) |
| MG4B7 | Organisational Change (H) (specialisms 2 & 3 only) |
| MG4D1 | International and Comparative Human Resource Management (H) (n/a 15/16) |
| MG4D3 | The Dark Side of the Organisation (H) (n/a 15/16) |
| MG4D4 | Cross Cultural Management (H) |
| MG4D5 | Leadership in Organisations: Theory and Practice (H) |

Specialism 1 only (Organisational Behaviour):

- | | |
|-------|---|
| MG478 | Globalisation and Human Resource Management (H) |
| PS428 | Knowledge Processes in Organisations (H) |
| PS445 | Organisational and Social Decision Making (H) |
| PS462 | Theory and Practice of Organisational Development (H) |

Specialism 3 only (International Employment Relations):

- | | |
|-------|--|
| EU425 | Interest Representation and Economic Policy-Making in Europe (H) |
| EU443 | European Models of Capitalism (H) |

EU453	The Political Economy of European Welfare States (H)
GI409	Gender, Globalisation and Development: An Introduction (H)
GI418	Feminist Economics and Policy: An Introduction (H)
GV4A5	International Migration and Immigration Management (H)
SO438	Sociology of Employment I: Social Relations at Work (H)(n/a 15/16)

Progression requirement for part-time students on Specialism 2 - Human Resource Management (CIPD)

Part-time students following the HRM (CIPD) specialism will follow the standard regulations and classification scheme for a four unit masters. These students are expected to take a minimum of 1 unit and a maximum of 3 units in each year with a recommendation that they take 2 units each year as follows:

Year 1

Paper Course number and title

1	MG480	Management of Human Resources: Strategies and Policy (H) (MT)
2	MG4C2	Organisational Behaviour (H) (MT)
3	MG478	Globalisation and Human Resource Management (H) (LT)
5	One half unit elective from the Options list (LT)	

Year 2

Paper Course number and title

4	MG4A9	Foundations of Business and Management for Human Resources (H) (MT)
5	One half unit elective from the Options list (LT)	
6	MG493	Developing Professional Research and Employability Skills

MG493 is designated as critical to assessment and must be passed in order for the student to obtain the award. Students are required to pass MG480 and MG4C2 for progression from year 1 to year 2. If a course is failed but is not a "bad fail" then the student may be permitted to progress upon the approval of the examination Sub-Board.

MSc in Human Rights

Programme Code: TMHURI

Full-year course. Students are required to take one compulsory course, optional courses to the value of two units, and write a dissertation as shown.

Paper Course number and title

1	SO424	Approaches to Human Rights
	Optional Courses to the value of two full units from the following (registration for these options depends on availability, regulations and the conditions of the outside department. Some further restrictions apply to Law Department options that are part of the LLM degree) Access is not guaranteed for any option.	
2 & 3	AN436	Anthropology of Development (H)

	Other course from Law, Anthropology or a related discipline may be taken subject to the approval of the course teachers.
4	LL4E9 Dissertation: MSc Law, Anthropology and Society

Notes Candidates with a first degree in law must take at least one of the papers 2 & 3 in anthropology; candidates with a first degree in social science must take at least one papers 2 & 3 in law. Students in this programme will be closely advised by their supervisor in choosing the courses for papers 2 & 3 so as to form a well-designed programme in view of their previous studies and their dissertation topic.

LLM

Programme codes: TMLL2 (Full time)

TMML2EPT (Extended part time)

The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes on the online Calendar apply to the LLM programme except in the event of inconsistency when these regulations for the LLM take priority.

In order to obtain the degree, students must complete courses (see Course list below) to the value of four full units, which will normally comprise eight half unit courses. One of these eight half units will be the compulsory half unit Legal Research Skills course, which will be assessed by a 10,000 word dissertation. This stand-alone dissertation will provide the element of extended writing for all LLM students. Students will be required to sign a statement on plagiarism when submitting this dissertation.

Students can complete the LLM course requirements in either one full-year programme, or as a part-time student in two years, or by extended part-time study within a maximum of six years. Courses should be chosen from the list below. Subject to availability and with the permission of the Programme Director of the LLM, one complementary course from other Master's courses at the School may be selected to replace one from the list below to the total equivalent of one half unit. Exceptionally, and subject to the same conditions courses to the total value of one full unit may be selected to replace two courses from the list below.

Part-time students must satisfy the same requirements as those applicable to full-time students. Part-time students must take courses to the value of two units in their first year and courses to the value of two units in their second year.

Extended part-time students must satisfy the same requirements as those applicable to full-time students. Students must take courses to the value of one unit in the first year and successfully complete this. Students who successfully complete four units within a period of six years will satisfy the requirements for the degree.

Students registered before 2013-14

The LLM programme regulations for students entering in or after 2013-14 differ from those in force in previous years. This reflects a move to half unit courses in 2013-14. Students registered before 2013-14 are covered by the regulations which were in operation at the time of their initial registration on the programme. For earlier editions of the regulations please refer to the page for previous academic sessions lse.ac.uk/resources/calendar/PreviousAcademicSessions.htm. This page contains links to reference copies of programme regulations for years 2009-10, 2010-11, 2011-12, 2012-13 and 2013-14. If continuing students have

any queries on these matters they should consult their Academic Adviser.

Examination

Students will be examined in courses to the total value of four full units.

An oral examination may be held if the examiners so determine.

For courses assessed by written examination (which will be the norm on the LLM apart from the Legal Research Skills course), the examination will normally be held in January, May or June.

Questions may be set on recent legislation and current proposals for law reform within the scope of the syllabus. No materials may be brought into the examination room except in accordance with the regulations for the particular course.

Degree certificate

Students who successfully complete the LLM examination may elect to have one of the following titles attached to their degree certificate if, in the opinion of the Programme Director of the LLM, the title reflects the course of study followed by the student. The possible titles are listed below with the courses attached to those areas listed with them. If no such election is made, the LLM degree certificate will state 'LLM' without further specification.

Courses

Compulsory course for all LLM students

LL4F9 Legal Research and Writing Skills (H)

Banking Law and Financial Regulation

LL4A5 Investment Funds Law in Europe (H) (n/a 15/16)

	GY449	Urban Futures (H)
	GY459	Urban Theory and Policy in the Global South (H)
	GY460	Techniques of Spatial Economic Analysis (H)
	GY465	Concepts in Environmental Regulation (H)
	GY475	Issues in Environmental Governance (H)
	GY480	Remaking China: Geographical aspects of Development and Disparity (H)
	MY452M or MY452L	Applied Regression Analysis (H) A relevant course from another programme as approved by the Programme Director
4	GY499	Dissertation

MSc in Management**Programme code:** TMMNT

These regulations apply to students entering in the 2015-16 academic year.

A two-year programme. Students take courses to the value of 8 units. The second year includes a dissertation. Students complete the course MG488 MiM Capstone Course - Management in Action (H)

over both years, part A (unassessed) in year 1 and part B (assessed) in year two.

All students are required to attend MG4A1 MSc Management pre-
sessional: Skills Preparation for the MiM.

Year 1

Core Courses

Paper Course number and title

- | | | |
|---|-------|---|
| 1 | MG431 | Managerial Economics (H) |
| | MG461 | Quantitative Analysis in Management (H) * |
| 2 | MG434 | Organisational Behaviour (H) |
| | MG462 | Qualitative Analysis in Management (H) |
| 3 | MG458 | Foundations of Management I (H) |
| | MG459 | Foundations of Management II (H) |

Students also take the compulsory unassessed part of MG488:

MG488A MiM Capstone Course - Management in Action

Optional Courses

- 4 Students take courses up to the value of one full unit from the Elective Courses listed below.

It is not compulsory for students to take a full unit of optional courses under paper 4 in the first year. Instead, students can elect to take a full or half unit of optional courses in year two, in addition to their second year optional courses taken under papers 7 and 8. +

Notes

*Students who have already taken statistics at university level covering these topics, can choose a half unit course from the following:

MG4C1 Techniques of Operational Research (H) (formerly OR401)

MY452M **or** MY452L Applied Regression Analysis (H)

MY455 Multivariate Analysis and Measurement (H)

Or another appropriate quantitative course from elsewhere in the School, subject to the course proprietor and programme director's approval.

Year 2

Core Courses

- | | | |
|---|--------|--|
| 5 | MG430 | Strategy, Organisation and Innovation (H) |
| | MG420 | Dissertation (H) |
| 6 | MG488B | MiM Capstone Course - Management in Action (H) |

Optional Courses

- 7 & 8 Courses to the value of 2.5 full units from the Elective Courses listed below.

Notes

+ Students who have not taken courses under paper 4 or have taken a half unit under paper 4 in their first year, will also need to take either a further full unit of courses or a half unit course in addition to papers 7 and 8.

Elective Courses

Students must take a total of 3.5 units of elective courses across years one and two (chosen under papers 4, 7 and 8).

- | | |
|-------|---|
| AC411 | Accounting, Strategy and Control (H) |
| AC412 | Accountability, Organisations and Risk Management (H) |

| MG4D3 | The Dark Side of the Organisation (H) (formerly |

	ID423) (n/a 15/16)
MG4D5	Leadership in Organisations: Theory and Practice (H) (formerly ID420)
PH425	Business and Organisational Ethics (H)
ST429	Probabilistic Methods in Risk Management and Insurance (H)
Notes	Or another MSc-level course which is offered in the School, subject to approval of the course proprietor.
	++ Finance I is a pre-requisite to Finance II.
	† Courses not available in Year 1: GI407, GI409 and GI420
	‡ Access is by permission of the course proprietor.
	SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and MG462). If a student fails one compulsory course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the compulsory courses to the same value. If a student fails more than one of these compulsory courses they will not be allowed to progress to year two. If students fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.
	See the programme regulations for MSc Management (CEMS MiM) stream

MSc in Management

Programme code: TMMNT

These regulations apply to students entering in the 2014-15 academic year.

A two-year programme. Students take courses to the value of 8.5 units.

The second year includes a dissertation and students complete the course MG488 MiM Capstone Course - Management in Action (H). All students are required to attend MG4A1 MSc Management pre-sessional: Skills Preparation for the MiM.

Paper Course number and title

Year 1		
1	MG431	Managerial Economics (H)
	MG461	Quantitative Analysis in Management (H) *
2	MG434	Organisational Behaviour (H)
	MG462	Qualitative Analysis in Management (H)
3	MG458	Foundations of Management I (H)

Notes	<p>+ Students who have not taken paper 4 or have taken a half unit under paper 4 in their first year, will also need to take either a further full unit of courses or a half unit course from papers 4, 6, 7 and 8 in their second year.</p> <p>++ Finance I is a pre-requisite to Finance II.</p> <p>‡ Access is by permission of the course proprietor.</p> <p>SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and MG462). If a candidate fails one core course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the core courses to the same unit value. If a candidate fails more than one of these compulsory courses they will not be allowed to progress to year two. If candidates fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.</p> <p>Please note that under regulation 6.2 of the classification scheme, if a candidate has met the requirements for the award of a degree having re-sat failed courses, s/he can only be recommended for the award of a Pass degree unless, in the judgement of the examiners, the initial failure(s) was at least in part a direct result of medical and/or extenuating circumstances.</p> <p>See the programme regulations for MSc Management (CEMS MiM) stream</p>

MSc in Management (CEMS MiM)

Programme code: TMMNTCEMS

These regulations apply to students entering in the 2015-16 academic year.

A two-year programme. Students are also awarded the CEMS Masters in Management (MIM) degree, subject to successful completion of the CEMS MIM requirements.

Students take courses to the value of 8 units which includes: two units at a partner CEMS Institution (MG410); CEMS compulsory MG463 CEMS Global Management Practice (H); a dissertation; and the course MG488 MiM Capstone Course - Management in Action (H) taught over both years, part A (unassessed) in year 1 and part B (assessed) in year two.

All students are required to attend MG4A1 MSc Management pre-sessional: Skills Preparation for the MiM.

Year 1

Core Courses	
Paper	Course number and title
1	MG431 Managerial Economics (H)
	MG461 Quantitative Analysis in Management (H) *
2	MG434 Organisational Behaviour (H)
	MG462 Qualitative Analysis in Management (H)
3	MG458 Foundations of Management I (H)
	MG459 Foundations of Management II (H)
	Students also take the compulsory unassessed part of MG488:
	MG488A MiM Capstone Course - Management in Action
	Optional Courses
4	Students take courses up to the value of one unit from the Elective Courses listed below.
	It is not compulsory for students to take 1 unit of optional courses under paper 4 in the first year. Instead, students can elect to take a full or half unit of optional courses in year two, in addition to their second year core courses taken under papers 5, 6, 7 and 8. +
Notes	<p>*Students who have already taken statistics at university level covering these topics, can choose a half unit course from the following:</p> <p>MG4C1 Techniques of Operational Research (H) (formerly OR401)</p> <p>MY452M or MY452L Applied Regression Analysis (H)</p> <p>MY455 Multivariate Analysis and Measurement (H)</p> <p>Or another appropriate quantitative course from elsewhere in the School, subject to the course proprietor and programme director's approval.</p>

Year 2

Core Courses	
5	MG420 Dissertation (H)
	MG430 Strategy, Organisation and Innovation (H)
6	MG463 CEMS Global Management Practice (H)
	MG488B MiM Capstone Course - Management in Action (H)
7 & 8	MG410 Term Abroad. Courses to the value of two units to be taken at one of the partner CEMS Institutions.
Notes	<p>+ Students who have not taken courses under paper 4 or have taken a half unit under paper 4 in their first year, will also need to take either a further full unit of courses or a half unit course in addition to core second year courses, chosen from the Elective Courses list below.</p> <p>Elective Courses</p> <p>Students must take a total of 1 unit of elective courses chosen under paper 4.</p> <p>AC411 Accounting, Strategy and Control (H)</p> <p>AC412 Accountability, Organisations and Risk Management (H)</p> <p>AC414 Financial Reporting, Capital Markets and Business Combinations (H)</p> <p>AC490 Financial Reporting and Management: Management Accounting, Strategy and Control (H)</p>

Or another MSc-level course which is offered in the School, subject to approval of the course proprietor.

Notes

++ Finance I is a pre-requisite to Finance II.

†GI407 cannot be taken alongside GI409 or GI420

‡ Access is by permission of the course proprietor.

SUPPLEMENTARY CRITERIA FOR PROGRESSION FROM THE FIRST TO THE SECOND YEAR OF MSc MANAGEMENT To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the six compulsory courses (MG431, MG434, MG458, MG459, MG461 and MG462). If a student fails one compulsory course up to the value of 0.5 units, they will not be permitted to progress unless the fail can be compensated by a mark of Merit standard in another of the compulsory courses to the same value. If a student fails more than one of these compulsory courses they will not be allowed to progress to year two. If students fail any of their optional courses taken in year one, they will be allowed to progress to year two provided they have no Bad Fail marks. A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The Repeat Teaching Panel may consider an application for repeat tuition in any failed courses from a student. Results obtained following a repeated attempt at assessment shall bear their normal value.

MSc in Management and Strategy

Programme code: TMMNST

Full-year programme. Students must take the four compulsory half-unit courses, optional courses to the value of three half units, and a half-unit dissertation.

Paper	Course number and title
1	Four half-unit compulsory courses: MG4A3 Incentives and Governance in Organizations (H) (formerly MN404) MG4A5 The Analysis of Strategy A (H) (formerly MN415) MG4A6 The Analysis of Strategy B (H) (formerly MN416) MG4B6 Design and Management of Organisations (H) (formerly MN426)
2	Two half-unit courses from the following list: AC444 Valuation and Security Analysis (H) AC470 Accounting in the Global Economy (H) AC490 Management Accounting, Decisions and Control (H) AC491 Financial Accounting, Reporting and Disclosures (H) FM421 Applied Corporate Finance (H) FM429 Asset Markets A (H) FM431M Corporate Finance A (H) or FM431L Corporate Finance A (H) GV483 Public Management Theory and Doctrine (H) MG402 Public Management: A Strategic Approach (H) (n/a 15/16) MG403 Pricing Strategy (H) MG404 Behavioural Fundamentals for Marketing and Management (H) (n/a 15/16) MG423 Leading Entrepreneurial Organisations in Global Markets (H) MG452 Behavioural Economics for Management (H) MG409 Auctions and Game Theory (H) (formerly OR409) MG473 Negotiation Analysis (H) (formerly ID433) MG4A4 Empirical Research Strategy for Managerial Economics (H) (formerly MN434) MG4A8 Strategy for the Information Economy (H) (formerly MN430) MG4B1 Corporate Strategy (H) (formerly MN431) MG4B2 Personnel Economics (H) (formerly MN432) MG4B3 International Marketing: A Strategic Approach (H) (formerly MN413) MG4B5 Business in the Global Environment (H) (formerly MN425) MG4B8 Evolutionary Psychology and Management (H) (formerly MN428) MG4B9 The World Trading System (H) (formerly MN429)
3	One other half-unit course listed under paper 2, or, with the approval of the programme director, a half-unit course not on this list.
4	MG497 Dissertation: MSc Management and Strategy (H) (formerly MN497)

MSc in Management of Information Systems and Digital Innovation

Programme Code: TMMISDI

(Formerly MSc Management, Information Systems and Innovation)

Full-year programme which is available on a part-time basis. Students must take three half unit compulsory courses, three half unit optional courses and a dissertation. Students are also required to attend an unassessed skills course (MG496).

Part-time students are required to take taught courses in the Michaelmas and Lent Terms of their two years and the work load will be split equally across both years (three half units per year). The dissertation will be completed in the Summer Term of the second year.

Paper	Course number and title
-------	-------------------------

1	MG487	Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
2	MG481	Innovating Organisational Information Technology (H) (formerly IS471)
3	MG472	Global Strategy, Management and Information Systems (H) (formerly IS472)
4 & 5	Two courses from the following:	
	DV483	Information Technologies and Socio-Economic Development (H)
	MG460	Handling Disruption: Humanitarian Emergencies Management and Development (H)
	MG479	Information Systems for the Public Sector (H) (formerly IS479)
	MG483	eHealth: Policy, Strategy and Systems (H) (formerly IS415)
	MG484	Global Sourcing and Management of Business and IT Services (H) (formerly IS417)
	MG486	Social Computing, Data and Information Services (H) (formerly IS418)
	MG485	Management and Economics of E-Business (H) (formerly IS485)
	MG492	Data Governance: Privacy, Openness and Transparency (H) (formerly IS489)
	MG4C3	Information Technology and Service Innovation (H) (formerly IS480)
6	Either another course from 4 & 5 above OR one course from the following:	
	AC490	Management Accounting, Decisions and Control (H)
	FM473	Finance I (H)
	MG4B7	Organisational Change (H) (formerly ID431)
	MG401	Operations Management (H)
	MG402	Public Management: A Strategic Approach (H) (n/a 15/16)
	MG418	Open Innovation (H)
	MG423	Leading Entrepreneurial Organisations in Global Markets (H)
	MG462	Qualitative Analysis in Management (H)
	MG482	Innovation and Technology Management (H)
	MG4C1	Techniques of Operational Research (H) (formerly OR401)
	PH425	Business and Organisational Ethics (H)
	A course from another programme with permission of the Programme Director*	
7	MG4D9	Dissertation in Management Information Systems and Digital Innovation (formerly IS499)

Notes * means by special permission only.

MSc in Management, Organisations and Governance

Programme code: TMMNORGV

Paper Course number and title

1	MG426	Organisations in the Economy and Society
2	MG427	Innovation in Organisations (H)
3	MG428	Enterprise Development (H)
4	Courses to the value of 1.5 units from the following:	
	AC411	Accounting, Strategy and Control (H)
	AC412	Accountability, Organisations and Risk Management (H)
	AC415	Management Accounting for Decision Making (H)
	AC490	Management Accounting, Decisions and Control (H)
	MG401	Operations Management (H)
	MG402	Public Management: A Strategic Approach (H) (n/a 15/16)
	MG403	Pricing Strategy (H)
	MG404	Behavioural Fundamentals for Marketing and Management (H) (n/a 15/16)

MG405	Behavioural Decision Science (H)
MG418	Open Innovation (H)
MG421	Foreign Direct Investment and Emerging Markets (H)
MG422	Thinking Strategically (H)
MG425	Global Business Management (H)
MG436	Firms, Markets and Crises (H)
MG437	Business Model Innovation at the 'Base of the Pyramid' (H)
MG438	Business Model Innovation at the 'Base of the Pyramid' (full unit)
MG450	Social Network Analysis and Strategies (H)
MG453	Managing Digital Business (H) (n/a 15/16)
MG460	Handling Disruption: Humanitarian Emergencies Management and Development (H)
MG473	Negotiation Analysis (H) (formerly ID433)
MG475	Organisational Theory (H) (formerly ID435)
MG476	Corporate Social Responsibility and International Labour Standards (H) (formerly ID440)
MG482	Innovation and Technology Management (H)
MG485	Management and Economics of E-Business (H) (formerly IS485)
MG4B3	International Marketing: A Strategic Approach (H)* (formerly MN413)
MG4B7	Organisational Change (H) (formerly ID431)
MG4C2	Organisational Behaviour (H) (formerly ID430)
MG4C3	Aspects of Information Technology and Service Innovation (H) (formerly IS480)
MG4D1	International and Comparative Human Resource Management (H) (formerly ID411) (n/a 15/16)
MG4D3	The Dark Side of the Organisation (H) (formerly ID423) (n/a 15/16)
MG4D5	Leadership in Organisations: Theory and Practice (H) (formerly ID420)
PH425	Business and Organisational Ethics (H)
ST429	Probabilistic Methods in Risk Management and Insurance (H)

Students may take another course not listed above to the value of one course unit with the approval of the Course Tutor.

5 MG416 Project (H)

Notes * Only with special permission can students take MG4B3 (formerly MN413)

MSc in Management Science

Programme codes: TMMSDS (Decision Sciences)

TMMSOR (Operational Research)

Full-year programme with two disciplinary streams. Students are required to take compulsory and optional courses to the value of four full units as shown.

All courses are half-units except MG4C7 (formerly OR440) and MG4C9 (formerly OR499).

Paper Course number and title

1	MG4C5	Computer Modelling: Applied Statistics and Simulation (H) ‡ (formerly OR426)
2	MG4C7	Applied Management Science (project) ± or (formerly OR440)
	MG4C9	Dissertation: MSc Management Science (formerly OR499)

Disciplinary streams

Operational Research

3	MG4C1	Techniques of Operational Research (H) (formerly OR401)
4	MG4C8	Model Building in Mathematical Programming (H) ‡ (formerly OR428)
5	One of the following half-unit courses:	
	MG405	Behavioural Decision Science (H) ‡
	MG408	Combinatorial Optimisation (H) (formerly OR408)

	MG409	Auctions and Game Theory (H) (formerly OR409)
	MG455	Behavioural Decision Science for Management and Policy (H)
	MG456	Risk and Decision Analysis for Management and Policy (H)
	MG4A2	Operational Research and Decision Sciences in Practice (H) (formerly OR432)
	MG4A7	Solving Unsolvability Problems: NP-completeness and how to cope with it (H) (formerly OR437)
	MG4B4	Advanced Topics in Operational Research (H) (formerly OR414) (n/a 15/16)
	MG4C6	Mathematical Programming: Theory and Algorithms (H) † (formerly OR406)
	MG4E1	Algorithmic Techniques for Data Mining (H)
6 & 7	Two of the following half-unit courses:	
	AC491	Financial Accounting, Reporting and Disclosure (H)
	MA419	Search Games (H)
	MG401	Operations Management (H)
	MG423	Leading Entrepreneurial Organisations in Global Markets (H)
	MG425	Global Business Management (H)
	MG481	Innovating Organisational Information Technology (H) (formerly IS471)
	MG4B7	Organisational Change (H) (formerly ID431)
	MG4C2	Organisational Behaviour (H) (formerly ID430)
	ST422	Time Series (H)
	Any course listed in 5 above	
	A course from any other MSc programme §	
	Decision Sciences	
3	MG455	Behavioural Decision Science for Management and Policy (H)
4	MG456	Risk and Decision Analysis for Management and Policy (H)
5	One of the following half-unit courses:	
	MG405	Behavioural Decision Science (H) ‡
	MG409	Auctions and Game Theory (H) (formerly OR409)
	MG4A2	Operational Research and Decision Sciences in Practice (H) (formerly OR432)
	MG4A7	Solving Unsolvability Problems: NP-completeness and how to cope with it (H) (formerly OR437)
	MG4B4	Advanced Topics in Operational Research (H) (formerly OR414)
	MG4C1	Techniques of Operational Research (H) (formerly OR401)
	MG4E1	Algorithmic Techniques for Data Mining (H)
6 & 7	Two of the following	
	MA402	Game Theory 1 (H)
	MG401	Operations Management (H)
	MG423	Leading Entrepreneurial Organisations in Global Markets (H)
	MG425	Global Business Management (H)
	MG4B7	Organisational Change (H) (formerly ID431)
	MG4C2	Organisational Behaviour (H) (formerly ID430)
	PS445	Organizational and Social Decision Making (H)
	Any other course listed in 5	
	A course from any other MSc programme §	
Notes	‡ Examined entirely by means of essays and project reports.	
	± This is an extended practical project or a dissertation which will be introduced in the summer term and worked on throughout the summer.	
	§ means by special permission only.	

MSc in Media and Communications

Programme Code: TMMEC

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Paper	Course number and title
1	MC408 Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
	MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life) (H)
2	MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H)
3	Courses to the value of one and a half units from the following ‡ :
	GI403 Gender and Media Representation (H)
	GI410 Screening the Present: contemporary cinema and cultural critique (H)
	GI421 Sexuality, Gender and Culture (H)
	LL4H2 Media Law: Regulating Publication (H)
	LL4H3 Media Law: Regulating Newsgathering (H)
	MC401 Mediated Resistance and Citizens (H)
	MC402 The Audience in Media and Communications (H)
	MC403 Contemporary Issues in Media and Communications Policy (H)
	MC405 Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
	MC407 International Media and The Global South (H)
	MC409 Media, Technology and Everyday Life (H)
	MC413 Information, Communication and Knowledge Systems (H)
	MC416 Representation in the Age of Globalisation (H)
	MC420 Identity, Transnationalism and the Media (H)
	MC421 Critical Approaches to Media, Communication and Development (H)
	MC422 Critical Studies in Media and Journalism (H)
	MC423 Global Media Industries (H)
	MC424 Media and Communication Governance (H)
	MC425 Interpersonal Mediated Communication (H)
	MC426 Film Theory and World Cinema (H)
	MC427 Digital Media Futures (H)
	MC428 Media Culture and Neoliberalism in the Global South (H)
	MC429 Humanitarian Communication: vulnerability, discourse and power (H)
	MG486 Social Computing, Data and Information Services (H) (formerly IS418)
	MG487 Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
	MG503 Interpretations of Information (H) (formerly IS581)
	MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
	PS415 The Social Psychology of Economic Life (H)
	PS429 The Social Psychology of Communication
	PS439 Science, Technology and Resistance (H) (n/a 15/16)
	SO433 Cultural Theory (H) (n/a 15/16)
	SO471 Technology, Power and Culture (H) (n/a 15/16)
	Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.
4	MC499 Dissertation (10,000-12,000 words)*

MSc in Media and Communications (Data and Society)

Programme code: TMMECD5

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

- | | |
|--------------|--|
| 1 | MC408
Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
MC430 Data in Communication and Society (H)
MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H) |
| 2 | Options outside the Department of Media and Communications are subject to availability and other departments' regulations. Students following the Data and Society stream will be expected to take at least 0.5 unit from the following courses up to a maximum of 1.5 units:
GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H)
LL4S1 Cyberlaw (H)
LL4S4 Digital Rights, Privacy and Security (H)
MC401 Mediated Resistance and Citizens (H)
MC402 The Audience in Media and Communications (H)
MC409 Media, Technology and Everyday Life (H)
MC413 Information, Communication and Knowledge Systems (H)
MC416 Representation in the Age of Globalisation (H)
MC422 Critical Studies in Media and Journalism (H)
MC424 Media and Communication Governance (H)
MC425 Interpersonal Mediated Communication (H)
MC427 Digital Media Futures (H)
MG486 Social Computing, Data and Information Services (H) (formerly IS418)
MG487 Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
MG492 Data Governance: Privacy, Openness and Transparency (H) (formerly IS489)
MG503 Interpretations of Information (H) (formerly IS581)
SO471 Technology, Power and Culture (H)
SO475 Material Culture and Design (H) |
| 3 | Additional options can be selected from the following courses up to a combined maximum of 1.5 units for papers 2 and 3:
GI403 Gender and Media Representation (H)
MC403 Contemporary Issues in Media and Communications Policy (H)
MC407 International Media and The Global South (H)
MC420 Identity, Transnationalism and the Media
MC423 Global Media Industries (H)
MC426 Film Theory and World Cinema (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
PS415 The Social Psychology of Economic Life (H)
PS429 The Social Psychology of Communication
PS439 Science, Technology and Resistance (H)
Any other course which is offered in the School at master's level, subject to the consent of the candidate's programme director. |
| 4 | MC499 Dissertation (10,000-12,000 words)* |
| Notes | *Passing this course is a requirement for passing the programme |

MSc in Media and Communications (Media and Communication Governance)

Programme Code: TMMECMCG

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

- | | |
|---|---|
| 1 | MC408
Theories and Concepts in Media and Communication I |
|---|---|

- | | |
|--------------|---|
| 2 | (Key concepts and interdisciplinary approaches) (H)
MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H) |
| 3 | MC424 Media and Communication Governance (H) |
| 4 | Courses to the value of one full unit from the following:
EU421 Policy-Making in the European Union (H)
LL4H2 Media Law: Regulating Publications (H)
LL4H3 Media Law: Regulating Newsgathering (H)
MC403 Contemporary Issues in Media and Communications Policy (H)
MC405 Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
MG486 Social Computing, Data and Information Services (H) (formerly IS418)
MG487 Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
MG503 Interpretations of Information (H) (formerly IS581) |
| 5 | One of the following half unit courses:
MG486 Social Computing, Data and Information Services (H)** (formerly IS418)
MG503 Interpretations of Information (H)** (formerly IS581)
MC401 Mediated Resistance and Citizens (H)
MC402 The Audience in Media and Communications (H)
MC404 Political Communication (H)
MC405 Current Issues in Media and Communications (H)**
MC407 International Media and The Global South (H)
MC413 Information, Communication and Knowledge Systems (H)
MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life)
MC421 Critical Approaches to Media, Communication and Development (H)
MC423 Global Media Industries (H)
MC425 Interpersonal Mediated Communication (H)
MC426 Film Theory and World Cinema (H)
MC427 Digital Media Futures (H)
MC428 Media Culture and Neoliberalism in the Global South (H)
PS415 The Social Psychology of Economic Life (H)
Any other half unit paper which is offered in the School at master's level, subject to the consent of the student's teachers |
| 6 | MC499 Dissertation (10,000-12,000 words)* |
| Notes | *Passing this course is a requirement for passing the programme
‡ Students can take up to one full unit of courses outside the Media and Communications Department (non MC-prefixed courses)
** If not taken under Paper 4 |

MSc in Media and Communications (Research)

Programme Code: TMMECRE

Full year programme. Students must take courses to the value of three full units and a dissertation as shown below.

- | Paper | Course number and title |
|-------|--|
| 1 | MC408 Theories and Concepts in Media and Communication I (Key concepts and interdisciplinary approaches) (H)
MC418 Theories and Concepts in Media and Communications II (Processes of communication in modern life) (H) |
| 2 | MC4M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)* |

3	Courses to the value of one unit from the following:	
	GI403	Gender and Media Representation (H)
	GI410	Screening the Present: contemporary cinema and cultural critique (H)
	LL4H2	Media Law: Regulating Publication (H)
	LL4H3	Media Law: Regulating Newsgathering (H)
	MC401	Mediated Resistance and Citizens (H)
	MC402	The Audience in Media and Communications (H)
	MC403	Contemporary Issues in Media and Communications Policy (H)
	MC405	Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
	MC407	International Media and The Global South (H)
	MC409	Media, Technology and Everyday Life (H)
	MC413	Information, Communication and Knowledge Systems (H)
	MC416	Representation in the Age of Globalisation (H)
	MC420	Identity, Transnationalism and the Media (H)
	MC421	Critical Approaches to Media, Communication and Development (H)
	MC422	Critical Studies in Media and Journalism (H)
	MC423	Global Media Industries (H)
	MC424	Media and Communication Governance (H)
	MC425	Interpersonal Mediated Communication (H)
	MC426	Film Theory and World Cinema (H)
	MC427	Digital Media Futures (H)
	MC428	Media Culture and Neoliberalism in the Global South (H)
	MC429	Humanitarian Communication: vulnerability, discourse and power (H)
	MG486	Social Computing, Data and Information Services (H) (formerly IS418)
	MG487	Innovation and Information Systems: Concepts and Perspectives (H) (formerly IS470)
	MG503	Interpretations of Information (H) (formerly IS581)
	MY427	Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
	PS415	The Social Psychology of Economic Life (H)
	PS429	The Social Psychology of Communication
	PS439	Science, Technology and Resistance (H) (n/a 15/16)
	SO433	Cultural Theory (H) (n/a 15/16)
	SO471	Technology, Power and Culture (H)
	Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.	
4	MC499	Dissertation (10,000-12,000 words)*
Notes	*Passing this course is a requirement for passing the programme	

MSc in Media, Communication and Development

Programme Code: TMMECODE

Full year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Paper	Course number and title
1	MC421 Critical Approaches to Media, Communication and Development (H)
2	MC408 Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (H)
3	MC4M1 Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H)
4	Three half-unit courses from the following ‡ : MC401 Mediated Resistance and Citizens (H) MC402 The Audience in Media and Communications (H)

MC405	Current Issues in Media and Communications: Policies for ICTs, Society and Development (H)
MC407	International Media and The Global South (H)
MC409	Media, Technology and Everyday Life (H)
MC413	Information, Communication and Knowledge Systems (H)
MC418	Theories and Concepts in Media and Communications II (Processes of communication in modern life) (H)
MC420	Identity, Transnationalism and the Media (H)
MC423	Global Media Industries (H)
MC424	Media and Communication Governance (H)
MC425	Interpersonal Mediated Communication (H)
MC426	Film Theory and World Cinema (H)
MC428	Media Culture and Neoliberalism in the Global South (H)
MC429	Humanitarian Communication: vulnerability, discourse and power (H)
DV423	Global Political Economy of Development (H) (n/a 15/16)
DV424	International Institutions and Late Development (H)
DV483	Information Technologies and Socio-Economic Development (H)
GI425	Women, Peace and Security (H)
GV443	The State and Political Institutions in Latin America (H)
MG479	Information Systems for the Public Sector (H) (formerly IS479)
PS418	Health Communication (H)
Any other MSc level course which is offered in the School, subject to the consent of the candidate's programme director.	

5	MC499	Dissertation: Media and Communications (10,000-12,000 words)*
---	-------	---

Notes *Passing this course is a requirement for passing the programme.
‡ Students can take up to one full unit of courses outside the Media and Communications Department (non MC-prefixed courses)

MSc in Organisational and Social Psychology

Programme code: TMOSOPS

Full-year programme. Students must take two compulsory courses, optional courses to the value of 1 unit and a dissertation as shown.

Paper	Course number and title
1	PS404 Organisational Social Psychology
2	PS4A5 Methods for Social Psychology Research: Fundamental Qualitative and Fundamental Quantitative Methods
3	Courses to the value of 1 unit from the following: GI403 Gender and Media Representation (H) PS409 Political Psychology of Intercultural Relations (H) (n/a 15/16) PS410 Social Representations (H) PS411 Current Communication Research (H) (n/a 15/16) PS415 The Social Psychology of Economic Life (H) PS418 Health Communication (H) PS421 Issues in Social Psychology: Group Dynamics (H) PS428 Knowledge Processes in Organisations (H) PS438 Corporate Communications (H) PS439 Science, Technology and Resistance (H) (n/a 15/16) PS445 Organisational and Social Decision Making (H) PS446 Issues in Organisational and Social Psychology: Organisational Life (H) PS451 Cognition and Culture (H) PS456 Consumer Psychology (H)

	PS458	Creativity and Innovation (H)
	PS460	Inter-cultural Relations and Racism (H) (n/a 15/16)
	PS462	Theory and Practice of Organisational Development (H)
	PS464	Social Influence (H) (n/a 15/16)
	Courses to the value of one half unit from another programme can be taken (subject to the approval of the candidate's Programme Director)	
5	PS497	Dissertation*
Notes	* Failures in this courses cannot be condoned. A bad fail is defined as a mark less than 29%.	

MSc in Philosophy and Public Policy

Programme code: TMPHPP

Full-year programme. Students must take two compulsory courses, one unit of optional courses, one compulsory seminar and a dissertation as shown.

Paper	Course number and title
1	PH415 Philosophy and Public Policy
2	PH416 Philosophy, Morals and Politics or PH423 Scientific Method and Policy
3	Courses to the value of one unit from the following: PH400 Philosophy of Science PH405 Philosophy of the Social Sciences PH413 Philosophy of Economics PH416 Philosophy, Morals and Politics (if not taken under paper 2) PH423 Scientific Method and Policy (if not taken under paper 2) PH425 Business and Organisational Ethics (H) PH427 Genes, Brains and Society (H) PH428 Emotion, Cognition and Behaviour: Science and Policy (H) PH429 Global Justice (H) (n/a 15/16) PH430 Einstein for Everyone: From time travel to the edge of the universe (H) PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (H) PH456 Rationality and Choice Alternatively, you can choose a course or courses to the value of one unit from the wide array of policy courses at LSE on a space-available basis
4	PH499 Dissertation Students must also take PH421 Dissertation Seminar - Philosophy and Public Policy (non-assessed)

MSc in Philosophy of Science

Programme code: TMPHYS

Full-year programme. Students must take three courses and a dissertation as shown.

Paper	Course number and title
1	PH400 Philosophy of Science or PH423 Scientific Method and Policy
2 & 3	Courses to the value of two units from the following: PH400 Philosophy of Science (if not taken under paper 1) PH404 Scientific Revolutions: Philosophical and Historical Issues Either PH405 Philosophy of the Social Sciences or PH413 Philosophy of Economics PH419 Set Theory and Further Logic PH423 Scientific Method and Policy (if not taken under paper 1) PH425 Business and Organisational Ethics (H) PH427 Genes, Brains and Society (H) PH428 Emotion, Cognition and Behaviour:

	Science and Policy (H)
	PH429 Global Justice (H) (n/a 15/16)
	PH430 Einstein for Everyone: From Time Travel to the Edge of the Universe (H)
	PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (H)
	PH456 Rationality and Choice
4	PH499 Dissertation Students must also take PH445 Philosophical Research and Writing Seminar - Philosophy of Science (non-assessed)

MSc in Philosophy of the Social Sciences

Programme code: TMPHSS

Full-year programme. Students take optional courses to the value of 3 units, a compulsory seminar and a dissertation as shown.

Paper Course number and title

1, 2 & 3	Courses to the value of three units from the following: EH428 History of Economics: Making Political Economy into a Social Science (H) * (n/a 15/16) EH429 History of Economics: Ideas, Policy and Performativity (H) * (n/a 15/16) PH400 Philosophy of Science PH404 Scientific Revolutions: Philosophical and Historical Issues PH405 Philosophy of the Social Sciences ‡ PH413 Philosophy of Economics ‡ PH416 Philosophy, Morals and Politics PH419 Set Theory and Further Logic PH423 Scientific Method and Policy PH425 Business and Organisational Ethics (H) PH427 Genes, Brains and Society (H) PH428 Emotion, Cognition and Behaviour: Science and Policy (H) PH429 Global Justice (H) (n/a 15/16) PH430 Einstein for Everyone: From time travel to the edge of the universe (H) PH431 Physics and the City: From Quantum Jumps to Stock Market Crashes (H) PH456 Rationality and Choice
4	PH499 Dissertation Students must also take PH422 Dissertation Seminar - Philosophy of Social Science (non assessed)
Notes	‡ Students must take at least one of PH405 and PH413 * Subject to approval, students may take up to one unit of non-PH courses not listed above. This would be instead of either EH428 and/or EH429 and not in addition to these courses.

MSc in Political Economy of Europe

Programme code: TMPOCEU

Full-year programme. Students must take one compulsory course, optional courses to the value of two units (at least one unit of courses listed under 2) and a dissertation as shown. Additionally, all students must take EU410 Interdisciplinary Research Methods and Design and EU450 European Union: Contemporary Issues, in preparation for the dissertation. Students without some background in economics are strongly encouraged to take EU409 Basic Economic Concepts for European Political Economy as an additional course to support their studies.

Paper Course number and title

1	EU452 Political Economy of Europe
2	Two of the following half unit courses: Political Economy in Action: EU425 Interest Representation and Economic Policy-Making in Europe (H) EU443 European Models of Capitalism (H)

	EU446	The Political Economy of European Monetary Integration (H)

	EH404	India and the World Economy, 1750-1950 (H)
	EH408	International Migration, 1500-2000: from slavery to asylum (H)
	EH409	Chinese Economy in Transition: 1850-1950 (H)
	EH413	African Economic Development in Historical Perspective (H)
	EH423	Japan and Korea as Developing Economics (H) (n/a 15/16)
	EH424	The British Economy in Global Perspective, 1000-2000 (H) (n/a 15/16)
	EH446	Economic Development in East and Southeast Asia (n/a 15/16)
	EH451	Latin American Development: political economy of growth (H) (n/a 15/16)
	EH452	Latin American Development and Economic History (H) (n/a 15/16)
	EH467	Epidemics: epidemic disease in history, 1348-2000 (H) (n/a 15/16)
	EH486	Shipping and Sea Power in Asian Waters c1600-1860 (H)
	EH487	International Economic Institutions since World War I (H)
5	EH491	Dissertation in the Political Economy of Late Development (H) (10,000 words on a topic that must relate to EH414)

MSc in Political Science and Political Economy

Programme code: TMPSPPE

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Paper	Course number and title
1	GV481 Political Science and Political Economy (H)
2	GV4C8 Game Theory for Political Science (H)
3	MY452 Applied Regression Analysis (H)
	(Must be taken in Term 1. Course can be substituted with an option from paper 6 if a student can demonstrate they have already taken a course with multivariate regression).
4	MY457 Causal Inference for Observational and Experimental Studies (H)
5	One of the following:
	EC453 Political Economy*
	GV454 Parties, Elections and Governments (H)
	GV482 Political Science and Political Economy: Advanced Topics (H)
	GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H) (n/a 15/16)
	GV4A3 Social Choice Theory and Democracy (H)
	GV4C4 Legislative Politics: US (H) (cannot be taken with GV4C6) (n/a 15/16)
	GV4C5 Politics of Economic Policy (H)
	GV4C6 Legislative Politics: European Parliament (H) (cannot be taken with GV4C4)
	GV4F8 Institutions in the Global Economy (H)
	GV4G1 Applied Quantitative Methods for Political Science (H)
	GV4H6 Behavioural and Experimental Political Economy (H) (n/a 15/16)
	GV4J3 Public Opinion, Political Psychology and Citizenship (H)

6	One half unit course (or if MY452 is not taken under paper 3, courses to the value of one full unit). A second course listed under 5, above
DV431	Development Management*
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (H)
DV491	Economic Development Policy II: Microeconomic Analysis (H)
DV492	Economic Development Policy III: Government Policy Analysis (H)
EC440	Micro and Macro Economics for Public Policy*
EU439	Political and Fiscal Integration and Disintegration in EU Member States (H)
EU446	The Political Economy of European Monetary Integration (H)*
EU449	Emerging Markets, Political Transition and Economic Development in Central and Eastern Europe (H)*
EU453	The Political Economy of European Welfare States (H)*
GV441	States and Markets (H)
GV4D4	The Politics of Inequality and Redistribution (H)
GV4E2	Capitalism and Democracy (H)
GV4E4	Public Budgeting and Financial Management*

IR468	The Political Economy of Trade (H)*
IR469	Politics of Money in the World Economy (H)*
MY455	Multivariate Analysis and Measurement (H)
MY459	Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
SA4F7	The Economics of European Social Policy (H)* (n/a 15/16)
SA4F8	Behavioural Public Policy (H)
	Another half-unit or full-unit course taught in the Government Department or elsewhere in the school, with the approval of the Programme Convenor.
GV499	Dissertation
7	
Notes	* courses with restricted access, which require the approval of the course convenor.

MSc in Political Sociology

Programme code: TMPOSO(SO)

Full-year programme. Students must take three courses and a dissertation as shown.

Paper	Course number and title
1	SO407 Politics and Society
2	One full unit or two half units from the following:
	EU425 Interest Representation and Economic Policy-Making in Europe (H)
	EU460 European Society and Politics beyond the Nation State (H)
	GV479 Nationalism
MC408	Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (H)
SA4M1	Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16)
SO401	Social Research Methods
SO424	Approaches to Human Rights
SO425	Regulation, Risk and Economic Life
SO426	Classical Social Thought (H)
SO427	Modern Social Thought (H)
SO430	Economic Sociology (H) (n/a 15/16)
SO457	Political Reconciliation (H)
SO458	Gender and Societies (H)

SO463	Contemporary Social Thought
SO468	International Migration and Migrant Integration (H)
SO469	Risk and Governance: A Sociological Approach (H)
SO470	The Sociology of Markets (H)
SO471	Technology, Power and Culture (H) (n/a 15/16)
SO479	Human Rights and Postcolonial Theory (H) (n/a 15/16)
SO481	Class, Politics and Culture (H)
SO482	Topics in Race, Ethnicity and Postcolonial-Studies (H)
SO483	Social Change Organizations (H)
3	One full unit or two half units either from the list under paper 2 above, or from any of the MSc courses offered in any department or institute at the LSE, so long as they are relevant to the study of political sociology, and subject to the approval of both Programme Director and course teacher.
4	SO494 MSc in Political Sociology Dissertation

MSc in Political Theory

Programme code: TMPOTY

Full-year programme. Students must take 2.5 course units, a compulsory course (0.5 units) and dissertation (1 unit) as shown. Part-time students may take up to four half unit courses in their first year.

Paper Course number and title

1, 2, 3, 4 & 5	Courses to the value of 2.5 units but no more than 1.5 units in any one term:
GV408	Contemporary Disputes about Justice (H)
GV442	Globalisation and Democracy (H)
GV476	Twentieth-Century European Liberal Thought (H) (n/a 15/16)
GV498	Multiculturalism (H) (n/a 15/16)
GV4A3	Social Choice Theory and Democracy (H)
GV4B6	Kant's Political Philosophy (H)
GV4B7	The Liberal Idea of Freedom (H)
GV4D7	Dilemmas of Equality (H) (n/a 15/16)
GV4F5	Advanced Study of Key Political Thinkers (H) (n/a 15/16)
GV4F7	The Political Theory of Jurgen Habermas (H)
GV4G7	Marx and Marxism (H)
GV4H1	Chinese Political Thought (H)
GV4H3	Feminist Political Theory (H) (formerly GI406)
GV4H5	The Politics and Philosophy of Environmental Change (H)

Students can take courses to the value of one full unit from the following:

IR462	Introduction to International Political Theory (H) (n/a 15/16)
IR463	The International Political Theory of Humanitarian Intervention (H) (n/a 15/16)
IR464	The Politics of International Law (H)
PH416	Philosophy, Morals and Politics
	A half-unit course from the Government or another department §
6	GV4H4 Foundations of Political Theory (H)
7	GV499 Dissertation

Notes § means by special permission only.

MSc in Politics and Communication

Programme code: TMPOCOM

Full year programme. Students must take courses to the value of three full units and a dissertation as shown below.

Paper Course number and title

1	MC404 Political Communication (H)
2	MC408 Theories and Concepts in Media and

		Communications I (Key concepts and interdisciplinary approaches) (H)
3	MC417	Democracy and the Media (H)
4	MC4M1	Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (H)
5	Options to the value of one unit:	
	Media and Communications:	
	MC401	Mediated Resistance and Citizens (H)
	MC402	The Audience in Media and Communications (H)
	MC403	Contemporary Issues in Media and Communications Regulation (H)

	MC423	Global Media Industries (H)
	MC424	Media and Communication Governance (H)
	MC425	Interpersonal Mediated Communication (H)
	MC426	Film Theory and World Cinema (H)
	MC428	Media Culture and Neoliberalism in the Global South (H)
	Government:	
	GV479	Nationalism *
	GV4A2	Citizens' Political Behaviour in Europe: Elections, Public Opinion and Identity (H) * (n/a 15/16)
	Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme convenor	
6	MC499	Dissertation (10,000-12,000 words)**
Notes	* Subject to overall numbers	
	**Passing this course is a requirement for passing the programme	

MSc in Population and Development

Programme code: TMPNDV

Full-year programme. Students must take courses to the value of three full units, non-assessed course SA4C1 and a dissertation as shown.

Paper	Course number and title
1	DV400 Development: History, Theory and Policy or DV442 Key Issues in Development Studies (H) and 1 other half-unit DV course from paper 3 below
2	Two half-units from: DV411 Population and Development: An Analytic Approach (H) SA481 Population Analysis: Methods and Models (H) SA493 Demographic Change and Development (H) (n/a 15/16) SA4D2 Global Health and Population Change (H)
3	Two half-units or one full unit from: Any courses not taken from 2 above DV400 Development: History, Theory and Policy (if not already taken under paper 1) DV407 Poverty (H) DV413 Environmental Problems and Development Interventions (H) (n/a 15/16) DV418 African Development (H) DV420 Complex Emergencies (H) DV421 Global Health and Development (H) DV428 Managing Humanitarianism (H) DV442 Key Issues in Development Studies (H) (if not already taken under paper 1) GI414 Gender and Social Policy: Theory and Practice (H) GI417 Gender, Population and Policy (H) GY421 Gender and Development: Geographical Perspectives (H) GY431 Cities, People and Poverty in the South (H) (n/a

	15/16)
	PS418 Health Communication (H)
	SA485 Planning for Population and Development (H)
	SA492 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (H)
	SA4D6 Health Systems and Policies in Developing Countries (H)
	SA4F1 Migration: Population Trends and Policies (H)
	SA4H7 Urbanisation and Social Policy in the Global South (H)
	SA4N5 Global Ageing (H)
	Any other course approved by tutor*
4	SA4C1 Long Essay and the Research Process (not assessed)
5	SA499 Dissertation on Population and Development, to be handed in by 1 September
Notes	* By special permission only.
	It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses .

MPA Dual Degree

Programme codes: TMDMPA2 (LSE & Columbia)
TMDMPA3 (LSE & Sciences Po)
TMDMPA4 (LSE & Hertie)
TMDMPA5 (LSE & NUS / Lee Kuan Yew)

These regulations apply to students entering in or after the 2014-15 academic year.

Route 1

Year 1 at LSE

Before Year 1 - All students attend the MPA pre-session course (EC408) unless exempted

During Year 1 - All students must complete the three Compulsory Courses:

Paper	Course number and title
1	EC440 Micro and Macro Economics (for Public Policy)
2	EC455 Quantitative Approaches and Policy Analysis
3	GV478 Political Science and Public Policy
4	In addition, in Year 1, all students must complete either: Courses to the value of one unit from the list of Policy Stream Courses or Courses to the value of one unit from the MPA options list The course(s) chosen by the student must have a total credit value of 1.0 unit (therefore, either one course with a credit value of 1.0, or two courses which both have a credit value of 0.5).
Policy Stream courses:	
Public Policy and Management	
	MG419 Public Management - Strategy, Innovation and Delivery
	GV4E4 Public Budgeting and Financial Management
International Development	
	DV441 Development Policy and Management (withdrawn 2015/16) *
	DV448 Political Economy of Development I (H) and
	DV449 Political Economy of Development II (H)
European Public and Economic Policy	
	EU452 Political Economy of Europe
Public and Social Policy	
	SA4X6 Welfare Analysis and Measurement
Notes	* DV441 was withdrawn at the end of 2014/15. It has been replaced by two half units DV448 and DV449 as of 2015/16.
	Year 2 at Columbia University, Sciences Po, the Hertie School of Governance or the Lee Kuan Yew School of Public Policy On successful completion of the first year of that

programme at LSE, students who have accepted an offer of a dual degree place will transfer to the MPA Dual Degree. See the MPA criteria for progression from year one to year two.

Students will follow the second year of the MPA programme at SIPA, Columbia University, the MPA programme at Sciences Po, the MPP programme at Hertie or the MPP programme at Lee Kuan Yew.

Route 2

Year 1 at Columbia University, Sciences Po, the Hertie School of Governance or the Lee Kuan Yew School of Public Policy

Students will follow the first year of the MPA/MIA programme at SIPA, Columbia University, the MPA programme at Sciences Po, the MPP programme at Hertie or the MPP programme at Lee Kuan Yew.

Year 2 at LSE

Students must take courses to the value of four units as set out below:

Paper	Course number and title
1	EC4B3 GV4B3, DV4B3, EU4B3, SA4K3 MPA Capstone Project
2-4	Plus one of the following: MPA Policy Paper (H) and 2.5 units of optional courses or MPA Dissertation and 2 units of optional courses or 3 units of optional courses

Master of Public Administration (MPA)

Programme code: TMMPA

Policy stream codes: TMEUPEP (European Public and Economic Policy)

TMINDE (International Development)

TMPEP (Public and Economic Policy)

TMPPM (Public Policy and Management)

TMPSP (Public and Social Policy)

These regulations apply to students entering in or after the 2014-15 academic year.

The programme is taught over two academic years (21 months). Some courses have a unit value of 1.0 and some have a unit value of 0.5 (H). To be awarded the degree, students must complete courses to the value of 8 units in total over two years.

There are three types of courses:

1. Compulsory courses, studied by all students;
2. Policy Stream courses, which students will take depending on which Policy Stream (specialism) they choose at the start of Year 2;
3. Optional courses.

Note that some courses on one Policy Stream may be optional Courses on other Policy Streams.

No interim award is available: students completing courses with a unit value of less than 8.0 receive no award, regardless of performance in the courses that have been successfully completed. Students can apply to spend their second year at one of the LSE MPA Partner Institutions. If offered a place and upon successful completion of year one, the student will transfer onto the Dual MPA Programme.

Before Year 1

All students attend the MPA pre-session course EC408 (unless exempted).

Year 1

Paper	Course number and title
	All students must complete the following three Compulsory courses:
1	EC440 Micro and Macro Economics (for Public Policy)
2	EC455 Quantitative Approaches and Policy Analysis
3	GV478 Political Science and Public Policy
4	Plus courses to the value of one unit from the list of Policy Stream courses or from the list of Optional courses. Note: two Policy Stream courses (EC406 and EC454) are not available to students in their first year.

At the start of year 2, all students must select one of the five Policy Streams: (i) Public and Economic Policy; or (ii) Public Policy and Management; or (iii) International Development; or (iv) European Public and Economic Policy; or (v) Public and Social Policy.

Year 2

Paper Course number and title

All students must complete the following Compulsory course:

- 5 EC4B3/GV4B3/DV4B3/EU4B3/SA4K3 MPA Capstone Project
- 6-8 Students must take the course(s) required by their chosen Policy Stream detailed below, plus sufficient Optional courses to ensure that they have taken courses to a total unit value of 8 over Year 1 and Year 2.

Policy Stream courses:

Public and Economic Policy - Students must complete: EC406 Economic Policy Analysis (not available in year 1)

Public Policy and Management - Students must complete, or have completed in Year 1:

MG419 Public Management - Strategy, Innovation and Delivery **or**

GV4E4 Public Budgeting and Financial Management

International Development - Students must complete, or have completed in Year 1:

DV441 Development Policy and Management (withdrawn 2015/16) *

DV448 Political Economy of Development I (H) **AND**

DV449 Political Economy of Development II (H) **AND**

EC454 Development Economics (not available in year 1)

European Public and Economic Policy - Students must complete, or have completed in Year 1:

EU452 Political Economy of Europe

Public and Social Policy - Students must complete, or have completed in Year 1:

SA4X6 Welfare Analysis and Measurement

Optional courses:

EC4V8/ GV4V8/DV4V8/EU4V8/SA4V8 MPA Policy Paper (H) **or**

EC4B4/ GV4B4/DV4B4/EU4B4/SA4K4 MPA Dissertation

Courses from the MPA options list

Notes Students may not take both the MPA Dissertation and the MPA Policy Paper.

Total unit value 8 = Compulsory courses (4) + Policy Stream courses (1 or 2 depending on the stream) + Optional courses (3 or 2 depending on which Policy Stream is chosen).

* DV441 was withdrawn at the end of 2014/15. It has been replaced by two half units DV448 and DV449 as of 2015/16.

See the Scheme for the award of MPA degrees students entering in or after 2011/12 for MPA programme criteria for progression.

MPA Options List

Students may also seek approval from their Programme Supervisor and the Course Convenor to enrol on other MSc options. Not all courses may be offered each year and are subject to cancellation, substitution and timetabling constraints.

SO425	Regulation, Risk, and Economic Life
SO469	Risk and Governance: A Sociological Approach (H)
Or one half unit MSc level course which is offered in the School, subject to approval of the academic adviser, and a second half unit MSc level course (or one full unit MSc level course) subject to the approval of the programme director.	
6	MG499 Dissertation (H)

MSc in Public Policy and Administration**Programme code:** TMPPA

Full-year programme. Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Part-time students may take courses up to the value of two full course units in their first year. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered.

By choosing particular combinations of core courses, students can choose to have the title of a specialised stream added to the title of their degree:

MSc Public Policy and Administration (Comparative); or
MSc Public Policy and Administration (Public Management).

Paper	Course number and title
1	GV4E9 Approaches and Issues in Public Policy and Administration
2	Either GV477 Comparative Public Policy Change (H) or GV483 Public Management Theory and Doctrine (H) or GV4F4 Policy Advice in Theory and Practice (H)
3	Courses to the value of one unit from the following: Public Management: AC412 Accountability, Organisations and Risk

	Management (H)
DV413	Environmental Problems and Development Interventions (H) (n/a 15/16)
DV415	Global Environmental Governance (H) (n/a 15/16)
GV483	Public Management Theory and Doctrine (H)
GV4A2	Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H) (n/a 15/16)
GV4C8	Game Theory for Political Science (H)
GV4E4	Public Budgeting and Financial Management
LL4AT	Regulation: Strategies and Enforcement (H)
LL4AU	Regulation: Legal and Political Aspects (H)
MG402	Public Management: A Strategic Approach (H) (n/a 15/16)
PH415	Philosophy and Public Policy (H)

Comparative Public Policy and Administration:

EU421	Policy-Making in the European Union (H)
EU443	European Models of Capitalism (H)
GV403	Network Regulation (H)
GV441	States and Markets (H)
GV477	Comparative Public Policy Change (H)
GV4A5	International Migration and Immigration Management (H)
GV4C4	Legislative Politics: US (H) (L) * (n/a 15/16)
GV4C5	Politics of Economic Policy (H) (M)
GV4C6	Legislative Politics: European Parliament (H) *
GV4C8	Game Theory for Political Science (H)
GV4D4	The Politics of Inequality and Redistribution (H)
SA4F8	Behavioural Public Policy (H)
SA4L1	The Governance of Welfare: The Nation State and the European Union (H)
SA4L2	Contemporary Issues in European Social Policy (H) (n/a 15/16)
SA4M1	Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16)

Another course with the permission of the programme convenor.

4

Either

MY451M **or** MY451L Introduction to Quantitative Analysis (H) **or**
MY452M **or** MY452L Applied Regression Analysis (H)
GV499 Dissertation

5

Notes

* Students must not take both GV4C4 and GV4C6. To qualify for a stream, the following courses must be taken:

Comparative Public Policy and Administration

stream GV4E9 Approaches and Issues in Public Policy and Administration

GV477 Comparative Public Policy Change (H) **or** GV4F4 The Politics of Policy Advice (H)

One half-unit from the Comparative Public Policy and Administration courses under paper 3.

Public Management stream GV4E9 Approaches and Issues in Public Policy and Administration

GV483 Public Management Theory and Doctrine (H)

One half-unit from the Public Management courses under paper 3.

MSc in Quantitative Economic History

Programme code: TMQEH

Students complete and are examined in courses to the value of four full units.

Paper Course number and title

1	EH401	Historical Analysis of Economic Change (H)
2	EH422	Topics in Quantitative Economic History
3	EC411	Microeconomics or EC413 Macroeconomics
4	EC402	Econometrics
5	EH472	Essay in Quantitative Economic History (H)

Award of the MSc Quantitative Economic History

The award and classification of the MSc degree is consistent with the School's scheme for the award of a four-unit Taught Master's Degree. Student are required to achieve a pass mark of 50% in papers 1 (half unit), 2, 3, 4 and 5 (half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in lse.ac.uk/intranet/LSEServices/TQARO/Calendar/SchemeTaughtMasters.pdf (see paragraph 3.2) apply. A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MSc to the MRes Quantitative Economic History

To progress unconditionally from the MSc to the MRes Quantitative Economic History degree programme, students need to obtain at least a Pass overall in the MSc and at least 50% in the (half unit) Essay in Quantitative Economic History (EH472). Candidates who achieved a Pass overall but received a Fail (but not a Bad Fail) in the (half unit) Essay in Quantitative Economic History (EH472) are permitted to progress to the MRes, but will need to re-submit the EH472 essay and pass with at least 50% in order to be eligible for completion of the MRes.

MSc in Real Estate Economics and Finance

Programme code: TMREEF

Full-year programme. Students must take four compulsory papers and one optional half-unit course and a dissertation as shown.

Paper Course number and title

1	GY458	Real Property Market Practice (H)
2	GY457	Applied Urban and Regional Economics
3	GY462	Real Estate Finance (H)
4	FM429	Asset Markets A (H) or
	FM473	Finance I (H)
5	GY400	The Economics of Urbanisation (H)
		A relevant half-unit course where offered §
6	GY499	Dissertation

Notes

§ means by special permission only. FM430 can be chosen instead of Paper 4 and 5

This programme is externally accredited by the RICS and the IPF. Further information is available on the Geography and Environment Department lse.ac.uk/geographyAndEnvironment/Home.aspx website.

MSc in Regional and Urban Planning Studies

Programme code: TMRUP

Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are required to take GY450 Planning Practice and Research.

Paper Course number and title

1	GY447	The Economics of Regional and Urban Planning (H)
2	GY448	Social and Political Aspects of Regional and Urban Planning (H)
3	GY454	Urban Policy and Planning (H)
4	Courses to the value of one and a half units:	
	GI407	Globalisation, Gender and Development †
	GI409	Gender, Globalisation and Development: An Introduction (H) †
	GI420	Globalisation, Gender and Development: Theorising Policy and Practice (H) †
	GY400	The Economics of Urbanisation (H)
	GY403	Contemporary Debates in Human Geography (H)
	GY407	Globalization, Regional Development and Policy
	GY410	Economics of Local and Regional Development (H)
	GY413	Regional Development and Policy (H)
	GY415	Local Capacity and Economic Development Policy (H)
	GY421	Gender and Development: Geographical

	Perspectives (H)
GY431	Cities, People and Poverty in the South (H) (n/a 15/16)
GY432	Urban Ethnography (H) (n/a 15/16)
GY438	Cities and Social Change in East Asia (H) (n/a 15/16)
GY439	Cities, Politics and Citizenship (H)
GY441	The Politics of Housing (H) (n/a 15/16)
GY446	Planning for Sustainable Cities (H)
GY449	Urban Futures (H)
GY455	Economic Appraisal and Valuation (H)
GY460	Techniques of Spatial Economic Analysis
GY464	Race and Space (H)
GY465	Concepts in Environmental Regulation (H)
GY467	Development, Diaspora and Migration (H)
GY479	Urban Revolutions (H)
GY480	Remaking China: Geographical aspects of Development and Disparity (H)
SA4C6	International Housing and Human Settlements (H)
SA4F9	Housing, Neighbourhoods and Communities (H)
SO465	City-Making: the Politics of Urban Form (H)
SO473	Crime, Control and the City (H) (n/a 15/16)
SO480	Urban Inequalities (H) (n/a 15/16)
	A half-unit course from another programme at the discretion of the Programme Director §
5	GY450 Planning Practice and Research (non-assessed but compulsory)
6	GY499 Dissertation
Notes	<p>†GI407 cannot be taken alongside GI409 or GI420</p> <p>§ means by special permission only.</p> <p>This programme is externally accredited by the RICS. Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).</p>

MSc in Regulation

Programme code: TMREG

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown.

Paper	Course number and title
1	GV488 Law and Politics of Regulation
2 & 3	Courses to the value of two full units from the following:
	Environmental Regulation
	DV413 Environmental Problems and Development Interventions (H) (n/a 15/16)
	DV415 Global Environmental Governance (H) (n/a 15/16)
	GY420 Environmental Regulation: Implementing Policy
	GY465 Concepts in Environmental Regulation (H)
	GY475 Issues in Environmental Governance (H)
	IR467 International Political Economy of the Environment (H)* (n/a 15/16)
	LL4BV Transnational Environmental Law (H)
	PS439 Science, Technology and Resistance (H) (n/a 15/16)

Financial and Commercial Regulation

AC470	Accounting in the Global Economy (H)
AC490	Management Accounting, Decisions and Control (H) or
FM492	Principles of Finance

	AN451	Anthropology of Politics (H)
	AN456	Anthropology of Economics 1) Production and Exchange (H)
	AN457	Anthropology of Economics 2) Development, Transformation and Globalisation (H)
	AN473	Anthropological Approaches to Value (H) (n/a 15/16)
	HY435	Political Islam from Ibn Taymiyya to ISIS
	PS451	Cognition and Culture (H)
	An additional unit from Paper 2 not previously taken.	
	A course from another MSc subject to the approval of programme director.	
4	AN497	Dissertation: Religion in the Contemporary World

MSc in Risk and Finance

Programme code: TMRIFI

Full-year programme. Student must take courses to the value of four full units (of which one paper includes a dissertation) as shown below.

Paper	Course number and title
1	FM403 Management and Regulation of Risk (includes dissertation)
2	Papers to the value of one half-unit from the following list of Finance courses: FM429 Asset Markets A (H) FM431M Corporate Finance A (H) or FM431L Corporate Finance A (H) FM473 Finance I (H) Or any other half-unit quantitative Finance course with the permission of the programme director
3 & 4	Papers to the value of two and a half units from the following: AC412 Accountability, Organisations and Risk Management (H) AC444 Valuation and Security Analysis (H) AC470 Accounting in the Global Economy (H) FM402 Financial Risk Analysis (H) FM404 Forecasting Financial Time Series (H)* FM413 Fixed Income Markets (H) FM421 Applied Corporate Finance (H) FM429 Asset Markets A (H) (if not taken under paper 2) FM430 Corporate Finance and Asset Markets FM431M Corporate Finance A (H) or FM431L Corporate Finance A (H) (if not taken under paper 2) FM442 Quantitative Methods for Finance and Risk Analysis (H)* FM445 Portfolio Management (H) FM472 International Finance (H) FM473 Finance I (H) (if not taken under paper 2) GY420 Environmental Regulation: Implementing Policy GY455 Economic Appraisal and Valuation (H) GY462 Real Estate Finance (H) GY465 Concepts in Environmental Regulation (H) GY475 Issues in Environmental Governance (H) LL4BE Principles of Financial Regulation (H) (n/a 15/16) LL4BF International Financial Regulation (H) LL4BK Corporate Crime (H) LL4BL Financial Crime (H)

LL4BX	Corporate Governance - Advanced Topics (H) (n/a 15/16)
MG455	Behavioural Decision Science for Management and Policy (H)
MG4B9	The World Trading System (H) (formerly MN429)
MG4A8	Strategy for the Information Economy (H) (formerly MN430)
PH425	Business and Organisational Ethics (H)
SO425	Regulation, Risk and Economic Life
SO469	Risk and Governance: A Sociological Approach (H)
ST409	Stochastic Processes (H)
Any other paper with the approval of the Programme Director	

Notes * Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.

MSc in Risk and Stochastics

Programme code: TMRIST

Students take five compulsory half unit courses and one and a half units of optional courses.

Paper	Course number and title
1	ST409 Stochastic Processes (H)
2	ST427 Insurance Mathematics (H)
3	ST433 Computational Methods in Finance and Insurance (H)
4	ST439 Stochastics for Derivatives Modelling (H)
5	ST440 Recent Developments in Finance and Insurance (H)
6	One of the following: MA411 Probability and Measure (H) MA415 The Mathematics of the Black and Scholes Theory (H) MA416 The Foundations of Interest Rate and Credit Risk Theory (H) MA420 Quantifying Risk Modelling and Alternative Markets (H) ST422 Time Series (H) ST426 Applied Stochastic Processes (H) ST429 Probabilistic Methods in Risk Management and Insurance (H) ST435 Advanced Probability Theory (H) ST436 Financial Statistics (H) ST441 Introduction to Markov Processes and Their Applications (H) (n/a 15/16)
7 & 8	Two of the following: FM404 Forecasting Financial Time Series (H) FM441 Derivatives (H) FM442 Quantitative Methods for Finance and Risk Analysis (H)* MA409 Continuous Time-Optimisation (H) Further half unit(s) from those courses listed under paper 6 above. Further half unit(s) from other appropriate MSc courses, subject to the approval of the Programme Director and the Teacher responsible for the course.

Notes * Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.
Students can also take MA422 **Research Topics in Financial Mathematics**, a non-assessed course taken in addition to the required five compulsory half unit courses and one and a half units of optional courses detailed above.
The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Social and Cultural Psychology

Programme code: TMSCPS

Full-year programme. Students are required to take two compulsory courses, optional courses to the value of 1 unit and a dissertation as shown.

Paper	Course number and title
1	PS400 Contemporary Social and Cultural Psychology
2	PS4A5 Methods for Social Psychology Research: Fundamental Qualitative and Fundamental Quantitative Methods
3	Courses to the value of 1 unit from the following: PS409 Political Psychology of Intercultural Relations (H) (n/a 15/16) PS410 Social Representations (H) PS411 Current Communication Research (H) (n/a 15/16) PS415 The Social Psychology of Economic Life (H) PS418 Health Communication (H) PS421 Issues in Social Psychology: Group Dynamics (H) PS428 Knowledge Processes in Organisations (H) PS438 Corporate Communications (H) PS439 Science, Technology and Resistance (H) (n/a 15/16) PS445 Organisational and Social Decision Making (H) PS446 Issues in Organisational and Social Psychology: Organisational Life (H) PS451 Cognition and Culture (H) PS456 Consumer Psychology (H) PS458 Creativity and Innovation (H) PS460 Inter-cultural Relations and Racism (H) (n/a 15/16) PS462 Theory and Practice of Organisational Development (H) PS464 Social Influence (H) (n/a 15/16) A course from another programme (subject to the approval of the Candidate's Programme Director)
4	PS497 Dissertation*
Notes	* Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.

MSc in Social and Public Communication

Programme code: TMSOPUCO

Full year programme. Students are required to take two compulsory courses, optional courses to the value of 1 unit and a dissertation as shown.

Paper	Course number and title
1	PS429 The Social Psychology of Communication
2	PS4A5 Methods for Social Psychology Research: Fundamental Qualitative and Fundamental Quantitative Methods
3	Courses to the value of 1 unit from the following: PS409 Political Psychology of Intercultural Relations (H) (n/a 15/16) PS410 Social Representations (H) PS411 Current Communication Research (H) (n/a 15/16) PS415 The Social Psychology of Economic Life (H) PS418 Health Communication (H) PS421 Issues in Social Psychology: Group Dynamics (H) PS428 Knowledge Processes in Organisations (H) PS438 Corporate Communications (H) PS439 Science, Technology and Resistance (H) (n/a 15/16) PS445 Organisational and Social Decision Making (H) PS446 Issues in Organisational and Social Psychology: Organisational Life (H) PS451 Cognition and Culture (H) PS456 Consumer Psychology (H) PS458 Creativity and Innovation (H) PS460 Inter-cultural Relations and Racism (H) (n/a 15/16) PS462 Theory and Practice of Organisational Development (H)

PS464 Social Influence (H) (n/a 15/16)
Courses to the value of one half unit from another programme (subject to the approval of the candidate's Programme Director)

5 PS497 Dissertation*

Notes * Failures in this course cannot be condoned. A bad fail is defined as a mark less than 29%.
Students who complete PS429 and PS438 can be granted exemption from up to two CIPR Diploma units. Further information is available from the Department of Social Psychology website lse.ac.uk/socialPsychology/Home.aspx.

MSc in Social Anthropology

Programme Code: TMAN

Full-year programme. Students must take courses to the value of three full units and a dissertation as shown. Attendance at seminars and at non-assessed tutorials is compulsory.

Paper	Course number and title
1	AN404 Anthropology: Theory and Ethnography
2	One or two of the following to the value of one full unit: AN402 The Anthropology of Religion AN405 The Anthropology of Kinship, Sex and Gender AN451 Anthropology of Politics (H) AN456 Anthropology of Economy (1): Production and Exchange (H) AN457 Anthropology of Economy (2): Development, Transformation and Globalisation (H)
3	One or two of the following to the value of one full unit: A paper from 2 above not already taken AN419 The Anthropology of Christianity (H) AN420 The Anthropology of South-East Asia (H) AN421 The Anthropology of Industrialisation and Industrial Life (H) (n/a 15/16) AN424 The Anthropology of Melanesia (H) AN436 The Anthropology of Development (H) AN437 Anthropology of Learning and Cognition (n/a 15/16) AN439 Anthropology and Human Rights (H) (n/a 15/16) AN444 Investigating the Philippines- New Approaches and Ethnographic Contexts (H) (n/a 15/16) AN447 China in Comparative Perspective AN458 Children and Youth in Contemporary Ethnography (H) (n/a 15/16) AN459 Anthropology and Media (H) AN467 The Anthropology of South Asia (H) (n/a 15/16) AN469 The Anthropology of Amazonia (H) (n/a 15/16) AN473 Anthropological Approaches to Value (H) (n/a 15/16) AN474 Subjectivity and Anthropology (H) AN475 The Anthropology of Revolution (H)
4	AN499 Dissertation

MSc in Social Anthropology (Learning and Cognition) (not available in 2015/16)

Programme code: TMSALC

Full-year programme. Students take two compulsory courses, options to the value of one unit and a dissertation as shown. Attendance at seminars and at non-assessed tutorials is compulsory.

Paper	Course number and title
1	AN437 Anthropology of Learning and Cognition
2	AN404 Anthropology: Theory and Ethnography
3	Any full unit, or any two half unit Anthropology courses.
4	AN499 Dissertation

MSc in Social Anthropology (Research)

Programme Code: TMANRE

(Programme withdrawn 2015/16. Last intake 2014/15)

Full-year programme. Students must take the following five courses and attend the weekly AN500 Seminar on Anthropological Research.

Paper	Course number and title
1	AN455 Statistics and Causal Analysis for Social Anthropologists (H) (n/a 15/16) or MY452M or MY452L Applied Regression Analysis (H) (only in the case of students who already have a background in statistics)
2	AN449 Ethnography in Relation to Other Research Methods (H) (n/a 15/16)
3	AN441 Anthropological Fieldwork Methods (n/a 15/16)
4	AN442 Supervised Reading Course and Fieldwork Preparation
5	AN443 Research Proposal

MSc in Social Policy (European and Comparative Social Policy)

Programme code: TMSPEUCSP

Full-year programme. Students must take compulsory courses to the value of one unit, optional courses to the value of two units, the non-assessed course SA4C1 and a dissertation as shown.

Paper	Course number and title
1	SA4L1 The Governance of Welfare: The Nation State and the European Union (H)
2	SA488 Social Policy: Goals and Issues (H)
3	European Contextual options Two half units from: EU420 European Union Law and Government (H) * EU421 Policy-Making in the European Union (H) EU439 Political and Fiscal Integration and Disintegration in EU Member States (H) EU453 The Political Economy of European Welfare States (H) IR431 European Union Policy-Making in a Global Context (H) (n/a 15/16) SA4F7 The Economics of European Social Policy (H) (n/a 15/16) Or another appropriate course(s) with approval of the Programme Director.
4	Social Policy Options Courses to the value of one full unit: GI414 Gender and Social Policy: Theory and Practice (H) GI415 Gender and European Welfare States (H) GI417 Gender, Population, and Policy (H) GY454 Urban Policy and Planning SA407 Financing Health Care (H) SA409 Social Security Policies (H) SA429 Understanding Social (Dis)advantage (H) SA451 Social Policy Research SA4B8 Ethnicity, Race and Social Policy (H) SA4B9 Education Policy, Reform and Financing (H) SA4C6 International Housing and Human Settlements (H) SA4C8 Globalization and Social Policy (H) SA4C9 Social Policy: Organisation and Innovation (H) SA4D4 Measuring Health System Performance (H) SA4D5 Social Rights and Human Welfare (H) SA4F8 Behavioural Public Policy (H) SA4F9 Housing, Neighbourhoods and Communities (H) SA4G8 The Third Sector (H) SA4L2 Contemporary Issues in European Social Policy (H) (n/a 15/16) SA4L6 Illegal Drugs and Their Control: Theory, Policy and Practice (H) (n/a 15/16) SA4M1 Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16) Or a course from another MSc programme with approval

5	SA466 European and Comparative Social Policy - Long Essay (10,000 words) to be handed in by 1 September
	SA4C1 Long Essay and the Research Process (not assessed)

Notes * May only be taken with the permission of the Course Tutor and the MSc Programme Director.
It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses.

MSc in Social Policy (Research)

Programme code: TMSOPORE

Full-year programme. Students take two compulsory courses, one unit of options and a dissertation.

Paper	Course number and title
1	SA451 Social Policy Research
2	MY4M1 Foundations of Social Research 1 or MY4M2 Foundations of Social Research 2
3	Courses to the value of one full unit from the following: GI414 Gender and Social Policy: Theory and Practice (H) GI415 Gender and European Welfare States (H) GY441 The Politics of Housing (H) (n/a 15/16) LL4CL Explaining Punishment: Philosophy, Political Economy, Sociology (H) MY426 Doing Ethnography (H) SA408 Health Economics (H) SA409 Social Security Policies (H) SA427 Pharmaceutical Economics and Policy (H) SA429 Understanding Social (Dis)advantage (H) SA447 Foundations of Health Policy (H) SA485 Planning for Population and Development (H) SA488 Social Policy: Goals and Issues (H) SA493 Demographic Change and Development (H) (n/a 15/16) SA4B8 Ethnicity, Race and Social Policy (H) SA4B9 Education Policy, Reform and Financing (H) SA4C2 Basic Education and Social Development (H) SA4C6 International Housing and Human Settlements (H) SA4C9 Social Policy - Organization and Innovation (H) SA4D5 Social Rights and Human Welfare (H) SA4E6 Rural Development and Social Policy (H) (n/a 15/16) SA4F7 The Economics of European Policy (H) (n/a 15/16) SA4F8 Behavioural Public Policy (H) SA4F9 Housing, Neighbourhoods and Communities (H) SA4G8 The Third Sector (H) SA4H7 Urbanisation and Social Policy in the Global South (H) SA4H9 Non-Governmental Organisations, Social Policy and Development (H) SA4J8 Social Policy and Development: Core Concepts (H) SA4J9 States, Social Policy and Development (H) SA4K2 Sexuality, Everyday Lives and Social Policy in Developing Countries (H) SA4L1 The Governance of Welfare: The Nation State and the European Union (H) SA4L2 Contemporary Issues in European Social Policy (H) (n/a 15/16) SA4L4 Behaviour, Happiness and Public Policy SA4L6 Illegal Drugs and Their Control: Theory, Policy and Practice (H) (n/a 15/16) SA4M1 Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16) SA4X6 Welfare Analysis and Measurement
4	SA471 Dissertation: Social Policy and Planning
Notes	A course from another MSc programme, with the permission of your tutor, the MSc Programme Director and the

Course Tutor.

It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses.

MSc Social Policy (Social Policy and Planning)

(Formerly MSc Social Policy and Planning)

Full-year programme. Students must take: two half unit compulsory courses, attend the non-assessed course SA4C1, optional courses to the value of two full units and a dissertation.

Paper	Course number and title
Compulsory courses	
1	SA488 Social Policy: Goals and Issues (H)
	SA4C9 Social Policy: Organisation and Innovation (H)
2 & 3	Optional courses Choose to the value of two full units from the following courses:
	GI414 Gender and Social Policy: Theory and Practice (H)
	GI415 Gender and European Welfare States (H)
	GI417 Gender, Population, and Policy (H)
	GY441 The Politics of Housing (H) (n/a 15/16)
	GY454 Urban Policy and Planning (H)
	SA407 Financing Health Care (H)
	SA409 Social Security Policies (H)
	SA429 Understanding Social (Dis)advantage (H)
	SA451 Social Policy Research
	SA4B8 Ethnicity, Race and Social Policy (H)
	SA4B9 Education Policy, Reform and Financing (H)
	SA4C6 International Housing and Human Settlements (H)
	SA4C8 Globalization and Social Policy (H)
	SA4D4 Measuring Health System Performance (H)
	SA4D5 Social Rights and Human Welfare (H)
	SA4F7 The Economics of European Policy (H) (n/a 15/16)
	SA4F8 Behavioural Public Policy (H)
	SA4F9 Housing, Neighbourhoods and Communities (H)
	SA4G8 The Third Sector (H)
	SA4H7 Urbanisation and Social Policy in the Global South (H)
	SA4L1 The Governance of Welfare: The Nation State and the European Union (H)
	SA4L2 Contemporary Issues in European Social Policy (H) (n/a 15/16)
	SA4L4 Behaviour, Happiness and Public Policy
	SA4L6 Illegal Drugs and Their Control: Theory, Policy and Practice (H) (n/a 15/16)
	SA4M1 Politics of Social Policy: Welfare and Work in Comparative Perspective (H) (n/a 15/16)
	Or a full or half unit course from another MSc programme*
4	SA471 Dissertation: Social Policy and Planning (10,000 words) to be handed in by 1 September
	SA4C1 Long Essay and the Research Process (not assessed)

Notes * May only be taken with the permission of your tutor, the MSc Programme Director and the Course Tutor. It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses.

MSc in Social Policy and Development

Programme code: TMSPDV

Full-year programme. Students must take two compulsory courses and optional courses to the value of two full units, non-assessed course SA4C1 and a dissertation as shown.

Paper	Course number and title
1	SA4J8 Social Policy and Development: Core Concepts (H)
2	SA4J9 States, Social Policy and Development (H)
3	Courses to the value of two full units from the following:
	DV407 Poverty (H)
	DV420 Complex Emergencies (H)
	GI418 Feminist Economics and Policy: An Introduction (H)
	GY438 Cities and Social Change in East Asia (H) (n/a 15/16)
	GY441 The Politics of Housing (H) (n/a 15/16)
	GY467 Global Migration and Development (H)
	GY479 Urban Revolutions (H)
	GY480 Remaking China: Geographical aspects of Disparity and Development (H)
	SA447 Foundations of Health Policy (H)
	SA493 Demographic Change and Development (H) (n/a 15/16)
	SA4H7 Urbanisation and Social Policy in the Global South (H)
	SA4H9 Non-Governmental Organisations, Social Policy and Development (H)
	SA4C2 Basic Education for Social Development (H)
	SA4C6 International Housing and Human Settlements (H)
	SA4C8 Globalisation and Social Policy (H)
	SA4D2 Global Health and Population Change (H)
	SA4D5 Social Rights and Human Welfare (H)
	SA4E6 Rural Development and Social Policy (H) (n/a 15/16)
	SA4F7 The Economics of European Policy (H) (n/a 15/16)
	SA4F8 Behavioural Public Policy (H)
	SA4G8 The Third Sector (H)
	SA4K2 Sexuality, Everyday Lives and Social Policy in Developing Countries (H)
	Any course within the Department of Social Policy
	A course from another programme (with permission).
	Students are also encouraged to audit MY400
	Fundamentals of Social Science Research Design (not assessed).
4	SA4C1 Long Essay and the Research Process (not assessed)
5	SA472 Dissertation- Social Policy and Development, to be handed in by 1 September

Notes It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses. Students outside the degree programme who opt to take either SA4J8 or SA4J9 will be required to take part in a three day residential workshop on applied social planning at Cumberland Lodge in Windsor Great Park, during the Lent term. The cost of this three day workshop is £200.

MSc in Social Policy and Development: Non-Governmental Organisations

Programme code: TMSPDVNGO

(Formerly MSc NGOs and Development)

Full-year programme. Students must take two compulsory courses, optional courses to the value of two full units, non-assessed course SA4C1 and a dissertation as shown.

Paper	Course number and title
1	SA4J8 Social Policy and Development: Core Concepts (H)
2	SA4H9 Non-Governmental Organisations, Social Policy and Development (H)
3	Courses to the value of two full units from the following: DV407 Poverty (H) DV420 Complex Emergencies (H) DV432 China in Developmental Perspectives (H) GI419 Gender and Contemporary Social Movements (H) (n/a 15/16) GY438 Cities and Social Change in East Asia (H) (n/a 15/16) GY467 Global Migration and Development (H) SA447 Foundations of Health Policy (H) SA493 Demographic Change and Development (H) (n/a 15/16) SA4C2 Basic Education for Social Development (H) SA4C6 International Housing and Human Settlements (H) SA4C8 Globalisation and Social Policy (H) SA4D2 Global Health and Population Change (H) SA4D5 Social Rights and Human Welfare (H) SA4E6 Rural Development and Social Policy (H) (n/a 15/16) SA4F7 The Economics of European Policy (H) (n/a 15/16) SA4F8 Behavioural Public Policy (H) SA4H7 Urbanisation and Social Policy in the Global South (H) SA4J9 States, Social Policy and Development † SA4K2 Sexuality, Everyday Lives and Social Policy in Developing Countries (H) Another course from within the Social Policy Department. A course from another programme (with permission). Students are also encouraged to audit MY400 Fundamentals of Social Science Research Design (not assessed).
4	SA4C1 Long Essay and the Research Process (not assessed) (option only possible within the constraints of the timetable)
5	SA470 Dissertation- Social Policy and Development: Non-Governmental Organisations, to be handed in by 1 September
Notes	It is not always possible to offer students a place on each of their preferred courses. This is particularly the case where courses are offered outside the Department of Social Policy (ie not prefixed with 'SA'). For further information please see lse.ac.uk/socialPolicyCourses . Students outside the degree programme who opt to take either SA4J8 or SA4J9 will be required to take part in a three day residential workshop on applied social planning at Cumberland Lodge in Windsor Great Park, during the Lent term. The cost of this three day workshop is £200.

MSc in Social Research Methods

Programme code: TMSORM

Full-year programme.

Part 1: Social Research Methods. Students must take courses to the value of three full units and a dissertation as shown.

Part 2: Disciplinary streams. Students must take courses to the value of one full unit in one of the ten streams as shown.

Part 1 Social Research Methods

Paper	Course number and title
1	Two of the following: MY451M or MY451L Introduction to Quantitative Analysis (H) MY452M or MY452L Applied Regression Analysis (H) MY455 Multivariate Analysis and Measurement (H) or courses in Statistics to the value of one full unit §
2	MY400 Fundamentals of Social Science Research Design

(H) **and**

MY421M **or** MY421L Qualitative Research Methods (H)

3 MY499 Dissertation (August)

Notes § means by special permission only.

Part 2 Disciplinary Streams

Sociology

Courses to the value of one full unit from the following:

MY426 Doing Ethnography (H)
 MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
 SO407 Politics and Society
 SO438 Sociology of Employment I: Social Relations at Work (H) (n/a 15/16)
 SO458 Gender and Societies (H)
 Courses to the value of one unit from the Methodology options list (below)

Social Psychology

Courses to the value of one full unit from the following:

MC402 The Audience in Media and Communications (H)
 MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)
 PS404 Organisational Social Psychology
 PS411 Current Communication Research (H) (n/a 15/16)
 PS415 The Social Psychology of Economic Life (H)
 PS418 Health Communication (H)
 PS421 Issues in Social Psychology: Group Dynamics (H)
 PS439 Science, Technology and Resistance (H) (n/a 15/16)
 PS445 Organisational and Social Decision Making (H)
 PS464 Social Influence (H) (n/a 15/16)
 Courses to the value of one unit from the Methodology options list (below)

Philosophy
 Courses to the value of one full unit from the following:

PH400 Philosophy of Science
 PH405 Philosophy of the Social Sciences
 PH413 Philosophy of Economics
 Courses to the value of one unit from the Methodology options list (below)

Social Policy
 SA451 Social Policy Research
 Courses to the value of one unit from the Methodology options list (below)

Statistics
 Any approved Graduate level courses in Statistics to the value of one unit, for example:

MY459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
 MY456 Survey Methodology (H)
 MY457 Causal Inference for Observational and Experimental Studies (H)
 ST416 Multilevel Modelling (H)
 ST425 Statistical Inference: Principles, Methods and Computation
 ST442 Longitudinal Data Analysis (H)
 Courses to the value of one unit from the Methodology options list (below)

Decision and Policy Sciences
 Any half unit in MSc Decision Sciences, subject to timetabling constraints, and as approved by the course tutor.

Courses to the value of one unit from the Methodology options list (below)

Government
 Any Graduate level course(s) in Government, subject to timetabling constraints, and as approved by the course tutor, to the value of one full unit.

Courses to the value of one unit from the Methodology options list (below)

Development Studies
 Any Graduate level course(s) in Development Studies, subject to timetabling constraints, and as approved by the

course tutor, to the value of one full unit.

Courses to the value of one unit from the Methodology options list (below)

Management

Any Graduate level course(s) in Management, subject to timetabling constraints, and as approved by the course tutor, to the value of one full unit.

Courses to the value of one unit from the Methodology options list (below)

Population

One compulsory half unit:

SA481 Population Analysis: Methods and Models (H)

One half unit from the following:

DV411 Population and Development: an Analytical Approach (H)

GI415 Gender and European Welfare States (H)

GI417 Gender, Population and Policy (H)

SA485 Planning for Population and Development (H)

SA492 Reproductive Health Programmes: Design, Implementation and Evaluation (H)

SA493 Demographic Change and Development (H) (n/a 15/16)

SA4D1 Social Epidemiology (H)

SA4D2 Global Health and Population Change (H)

Methodology options list

MY400 Fundamentals of Social Science Research Design (H)

MY421M **or** MY421L Qualitative Research Methods (H)

MY426 Doing Ethnography (H)

MY427 Qualitative Research With Non-Traditional Data (H) (n/a 15/16)

MY428 Qualitative Text Analysis (H) (n/a 15/16)

MY429 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (n/a 15/16)

MY451M **or** MY451L Introduction to Quantitative Analysis (H)

MY452M **or** MY452L Applied Regression Analysis (H)

MY454 Applied Statistical Computing using R (H)

MY455 Multivariate Analysis and Measurement (H)

MY456 Survey Methodology (H)

MY457 Causal Inference for Observational and Experimental Studies (H)

MY459 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

MY560 Workshop in Advanced Quantitative Analysis (H)

Or any other course approved by the tutor *

* means by special permission only

Notes

MSc in Sociology

Programme code: TMSO

Full-year programme. Students must take courses to the value of three units and write a dissertation as shown.

Paper Course number and title

1	SO401	Social Research Methods
2 & 3	Courses to the value of two full units from the following:	
	GV479	Nationalism
	SO407	Politics and Society
	SO424	Approaches to Human Rights
	SO425	Regulation, Risk and Economic Life
	SO426	Classical Social Thought (H)
	SO427	Modern Social Thought (H)
	SO430	Economic Sociology (H) (n/a 15/16)
	SO433	Cultural Theory (H) (n/a 15/16)
	SO438	Sociology of Employment I: Social Relations at Work (H) (n/a 15/16)
	SO451	Cities by Design (H)
	SO454	Families in Contemporary Societies: a Life Course Perspective (H)

SO457	Political Reconciliation (H)
SO458	Gender and Societies (H)
SO463	Contemporary Social Thought
SO468	International Migration and Migrant Integration (H)
SO469	Risk and Governance: A Sociological Approach (H)
SO470	The Sociology of Markets (H)
SO471	Technology, Power and Culture (H) (n/a 15/16)
SO473	Crime, Control and the City (H) (n/a 15/16)
SO475	Material Culture and Design (H)
SO477	Urban Social Theory (H) (n/a 15/16)
SO481	Class, Politics and Culture (H)
SO482	Topics in Race, Ethnicity and Postcolonial Studies (H)
SO483	Social Change Organizations (H)
SO499	Dissertation

MSc in Sociology (Contemporary Social Thought)

Programme code: TMSOCST

Full-year programme. Students must take courses to the value of three units and write a dissertation as shown.

1	SO463	Contemporary Social Thought
2 & 3	Courses to the value of two units from the following:	
	SO426	Classical Social Thought (H)
	SO427	Modern Social Thought (H)
	SO433	Cultural Theory (H)
	SO471	Technology, Power and Culture (H) (n/a 15/16)
	SO475	Material Culture and Design (H)
	SO477	Urban Social Theory (H) (n/a 15/16)
	SO479	Human Rights and Postcolonial Theory (H) (n/a 15/16)
	SO481	Class, Politics and Culture (H)
	Other options from the Department of Sociology and approved outside options.	
4	SO499	Dissertation

MSc in Sociology (Research)

Programme code: TMSORE

This is a full-year programme (one year full-time, two years part-time). Students will be required to take courses to the value of three full units and a dissertation as shown.

Paper	Course number and title
1	SO401 Social Research Methods
2	MY451 Introduction to Quantitative Analysis (H)
3	MY452 Applied Regression Analysis (H)
4	Sociology option(s) to the value of one unit
5	SO499 Dissertation

MSc in Statistics

Programme code: TMST

Academic-year programme. Students must take courses to the value of four full units.

Paper	Course number and title
1	ST425 Statistical Inference: Principles, Methods and Computation
2-4	Courses to the value of three full unit from the following:
	ST405 Multivariate Methods (H)
	ST409 Stochastic Processes (H)
	ST411 Generalised Linear Modelling and Survival Analysis (H)
	ST416 Multilevel Modelling (H)
	ST418 Non-linear Dynamics and the Analysis of Real

	Time Series (H)
ST421	Developments in Statistical Methods (H)
ST422	Time Series (H)
ST426	Applied Stochastic Processes (H)
ST435	Advanced Probability Theory (H)
ST442	Longitudinal Data Analysis (H)
ST443	Machine Learning and Data Mining (H)
ST444	Statistical Computing (H)
EC484	Econometric Analysis
MA407	Algorithms and Computation (H)
MY456	Survey Methodology (H)
MY457	Causal Inference for Observational and Experimental Studies (H)
MG4C6	Mathematical Programming: Theory and Algorithms (H) (formerly OR406)
SA481	Population Analysis: Methods and Models (H)
	Other non-ST course(s), with permission

Note: The total value of all non-ST courses, including those listed under paper 2-4 above, should not exceed one unit. This programme is externally accredited by the RSS. Further information is available on the Department of Statistics website. lse.ac.uk/collections/statistics
The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Statistics (Financial Statistics)

Programme code: TMSTFS

Academic-year programme. Students take three compulsory courses (two units) and options to the value of two units.

Paper	Course number and title
1	ST425 Statistical Inference: Principles, Methods and Computation
2	ST436 Financial Statistics (H)
3	ST422 Time Series (H)
4	Courses to the value of two full units from the following*:
	ST405 Multivariate Methods (H)
	ST409 Stochastic Processes (H)
	ST411 Generalised Linear Modelling and Survival Analysis (H)
	ST416 Multilevel Modelling (H)
	ST418 Non-linear Dynamics and the Analysis of Real Time Series (H)
	ST421 Developments in Statistical Methods (H)
	ST426 Applied Stochastic Processes (H)
	ST427 Insurance Mathematics (H)
	ST429 Probabilistic Methods in Risk Management and Insurance (H)
	ST433 Computational Methods in Finance and Insurance (H)
	ST435 Advanced Probability Theory (H)
	ST439 Stochastics for Derivatives Modelling (H)
	ST440 Recent Developments in Finance and Insurance (H)
	ST441 Introduction to Markov Processes and Their Applications (H)
	ST442 Longitudinal Data Analysis (H)
	ST443 Machine Learning and Data Mining (H)
	ST444 Statistical Computing (H)
	EC484 Econometric Analysis
	FM402 Financial Risk Analysis (H)
	FM404 Forecasting Financial Time Series (H)
	FM413 Fixed Income Markets (H)
	FM429 Asset Markets A (H)
	FM441 Derivatives (H) (n/a 15/16)
	MA407 Algorithms and Computation (H)
	MA415 The Mathematics of the Black and Scholes Theory (H)
	MA416 The Foundations of Interest Rate and Credit Risk Theory (H)
	MA420 Quantifying Risk Modelling and Alternative

	Markets (H)
MY456	Survey Methodology (H)
MY457	Causal Inference for Observational and Experimental Studies (H)
MG4C6	Mathematical Programming: Theory and Algorithms (H) (formerly OR406)

Other non-ST course(s), with permission.

Notes: The total value of all non-ST courses, including those listed under paper 4 above, should not exceed one unit. The Bologna Process in relation to taught masters programmes of nine or ten months duration.

MSc in Statistics (Financial Statistics) (Research)

Programme code: TMSTFSRE

Academic-year programme. Students take three compulsory courses (two units), a dissertation, and optional courses to the value of one unit.

Paper	Course number and title
1	ST425 Statistical Inference: Principles, Methods and Computation
2	ST436 Financial Statistics (H)
3	ST422 Time Series (H)
4	ST499 Dissertation
5	Courses to the value of one unit from the following:
	ST405 Multivariate Methods (H)
	ST409 Stochastic Processes (H)
	ST411 Generalised Linear Modelling and Survival Analysis (H)
	ST416 Multilevel Modelling (H)
	ST418 Non-linear Dynamics and the Analysis of Real Time Series (H)
	ST421 Developments in Statistical Methods (H)
	ST426 Applied Stochastic Processes (H)
	ST427 Insurance Mathematics (H)
	ST429 Probabilistic Methods in Risk Management and Insurance (H)
	ST433 Computational Methods in Finance and Insurance (H)
	ST435 Advanced Probability Theory (H)
	ST439 Stochastics for Derivatives Modelling (H)
	ST440 Recent Developments in Finance and Insurance (H)
	ST441 Introduction to Markov Processes and Their Applications (H) (n/a 15/16)
	ST442 Longitudinal Data Analysis (H)
	ST443 Machine Learning and Data Mining (H)
	ST444 Statistical Computing (H)
	EC484 Econometric Analysis
	FM402 Financial Risk Analysis (H)
	FM404 Forecasting Financial Time Series (H)
	FM413 Fixed Income Markets (H)
	FM429 Asset Markets A (H)
	FM441 Derivatives (H)
	MA407 Algorithms and Computation (H)
	MA415 The Mathematics of the Black and Scholes Theory (H)
	MA416 The Foundations of Interest Rate, Foreign Exchange, and Credit Risk Theory (H) (n/a 15/16)
	MA420 Quantifying Risk Modelling and Alternative Markets (H)
	MY456 Survey Methodology (H)
	MY457 Causal Inference for Observational and Experimental Studies (H)
	MG4C6 Mathematical Programming: Theory and Algorithms (H) (formerly OR406)
	Other non-ST course(s), with permission

Note: The total value of all non-ST courses, including those listed under paper 5 above, should not exceed one unit.

MSc in Statistics (Research)

Programme code: TMSTRE

Full-year programme. Students must take courses to the value of three full units and a dissertation.

Paper Course number and title

1	ST425	Statistical Inference: Principles, Methods and Computation
2	ST499	Dissertation
3 & 4	Courses to the value of two full units from the following:	
	ST405	Multivariate Methods (H)
	ST409	Stochastic Processes (H)
	ST411	Generalised Linear Modelling and Survival Analysis (H)
	ST416	Multilevel Modelling (H)
	ST418	Non-linear Dynamics and the Analysis of Real Time Series (H)
	ST421	Developments in Statistical Methods (H)
	ST422	Time Series (H)
	ST426	Applied Stochastic Processes (H)
	ST435	Advanced Probability Theory (H)
	ST442	Longitudinal Data Analysis (H)
	ST443	Machine Learning and Data Mining (H)
	ST444	Statistical Computing (H)
	EC484	Econometric Analysis
	MA407	Algorithms and Computation (H)
	MY400	Fundamentals of Social Science Research Design (H)
	MY456	Survey Methodology (H)
	MY457	Causal Inference for Observational and Experimental Studies (H)
	MG4C6	Mathematical Programming: Theory and Algorithms (H) (formerly OR406)
	SA481	Population Analysis: Methods and Models (H)
	Other non-ST course(s), with permission	
Note:	The total value of all non-ST courses, including those listed under paper 3&4 above, should not exceed one unit. This programme is externally accredited by the RSS. Further information is available on the Department of Statistics website lse.ac.uk/collections/statistics .	

MSc in Theory and History of International Relations

Programme code: TMTHHYIR2

Full-year programme. Students must take courses to the value of four units, including a dissertation as shown.

Paper Course number and title

1	One course from the following list:	
	HY400	Crisis Decision-Making in War and Peace, 1914-2003
	HY422	Presidents, Public Opinion and Foreign Policy: From Roosevelt to Reagan, 1933-1989
	HY429	Anglo-American Relations from World War to Cold War
	HY435	Political Islam: From Ibn Taymiyya to ISIS
	HY436	Race, Violence and Colonial Rule in Africa
2	Courses to the value of one unit:	
	IR411	Foreign Policy Analysis
	IR412	International Institutions
	IR415	Strategic Aspects of International Relations
	IR416	The EU in the World
	IR418	International Politics: Asia and the Pacific
	IR419	International Relations of the Middle East
	IR455	Economic Diplomacy (H)
	IR431	European Policy-making in a Global Context (H) (n/a 15/16)
	IR462	Introduction to International Political Theory (H) (n/a 15/16)
	IR463	The International Political Theory of Humanitarian Intervention (H) (n/a 15/16)

IR464	The Politics of International Law (H)
IR466	Genocide (H)
IR481	Europe, the US and Arab-Israeli Relations (H)
IR482	Russia and Eurasia: Foreign and Security Policies (n/a 15/16)

3	One course from the following list:	
	HY411	European Integration in the Twentieth Century
	HY432	From Cold Warriors to Peacemakers: the End of the Cold War Era, 1979-1999
	HY434	The Rise and Fall of Communism in Europe 1917-1990
	HY438	Western Intellectuals and the Challenge of Totalitarianism (withdrawn 15/16)
	HY439	War Cultures, 1890-1945 (n/a 15/16)
	HY440	The Emergence of Modern Iran: State, Society and Diplomacy
	HY441	Islam, State and Rebellion in the Indonesian Archipelago (n/a 15/16)
	HY444	The Cold War in Latin America (n/a 15/16)
	HY448	Living with the Bomb: An International History of Nuclear Weapons and the Arms Race from the Second World War to the end of the Cold War
	HY460	Ideologies and Political Thought in Germany in the Era of Extremes (1914-1990)
	HY461	East Asia in the Age of Imperialism, 1839-1945
	HY463	The Origins of the Cold War, 1917-1962
	HY465	The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict
	HY469	Maps, History and Power: The Spaces and Cultures of the Past
	EH451	Latin American Development: political economy of growth (H) (n/a 15/16)
	EH452	Latin American Development and Economic History (H) (n/a 15/16)
	EU426	The West: Identity and Interests (H) (n/a 15/16)
	EU475	Muslims in Europe (H)
	EU476	Turkey and Europe (H)
	GV479	Nationalism

A further course from the paper 2 selection list

A further course from the paper 1 selection list (subject to approval by the programme director)

4	HY499	Dissertation
---	-------	--------------

Notes Students can also take HY449 **Long-term History: The Patterns of the Past and the Shape of Things to Come**, a non-assessed course taken in addition to the required four full-units as detailed above.

MSc in Urbanisation and Development

Programme code: TMURDV

Full-year programme. Students must take courses to the value of four full units.

Paper Course number and title

1	GY459	Urban Theory and Policy in the Global South (H)
	GY452	Urban Research Methods (H)
2	Students choose courses up to the value of 1 unit from:	
	DV400	Development: History, Theory and Policy
	DV407	Poverty (H)*
	DV411	Population and Development: An Analytical Approach (H)
	DV418	African Development (H)
	DV420	Complex Emergencies (H)
	DV421	Global Health and Development (H) *
	DV433	The Informal Economy and Development (H)
	DV442	Key Issues in Development Studies (H)
3	Courses up to the value of 1 unit (or 1.5 units if only choosing a half unit from Paper 2) from the following:	
	GY400	The Economics of Urbanisation (H)
	GY421	Gender and Development: Geographical Perspectives (H)

- GY431 Cities, People and Poverty in the South (H) (n/a 15/16)
 GY432 Urban Ethnography (H) (n/a 15/16)
 GY438 Cities and Social Change in East Asia (H) (n/a 15/16)
 GY439 Cities, Politics and Citizenship (H)
 GY441 The Politics of Housing (H) (n/a 15/16)
 GY446 Planning for Sustainable Cities (H)
 GY449 Urban Futures (H)
 GY455 Economic Appraisal and Valuation (H)
 GY464 Race and Space (H)
 GY467 Global Migration and Development (H)
 GY479 Urban Revolutions (H)
 GY480 Remaking China: Geographical aspects of Development and Disparity (H)
 SO480 Urban Inequalities (H) (n/a 15/16)

Other urban and/or development courses available in the School as approved by the programme director

4

Notes

GY499 Dissertation (on an approved topic)

* Capped course with priority for International Development students so admission not guaranteed.

In exceptional cases it may be possible to make alternative choices for papers 2 & 3 with the approval of the Programme Director.

Executive Taught Master's Programme Regulations

Key to Taught Master's Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 15/16) means not available in the 2015/16 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

Executive MSc in Behavioural Science

Programme code: TMBSEX

16 month, part-time modular programme consisting of three full units of taught courses and one full unit dissertation. Alternative exit points are available to students who are not able to complete the degree. An LSE Diploma is available on the completion of six taught courses and an LSE Certificate on the completion of four taught courses.

Paper Course number and title

Year 1

1	SA4M2E	Behavioural Science and Policy (H)
2	MG406E	Behavioural Decision Science (H)
3	SA4M3E	Research Methods for Behavioural Science (H)
4	SA4M4E	Policy Appraisal and Impact Assessment (H)
5	PH426E	Philosophy and Public Policy (H)
6	MG407E	Goals and Motivation for Individuals and Teams (H)

Year 2

7	SA4M5E	Dissertation in Behavioural Science
---	--------	-------------------------------------

Executive Global MSc in Management

Programme Code: TMGLMG

These regulations apply to students entering in or after the 2015-16 academic year.

A 17 month programme. Students take eight compulsory half unit courses (four units in total) and two non-assessed courses in Leadership in Practice (MG454) and Foundations of Management 2 (MG457).

Paper Course number and title

Year 1

1	MG440	Managerial Economics (modular) (H)
2	MG441	Foundations of Management (modular) (H)
3	MG443	Organisational Behaviour (modular) (H)
4	FM475	Financial Management (modular) (H)
5	MG445	Marketing Strategy (modular) (H)

Year 2

6	MG446	Strategy, Organisation and Innovation (modular) (H)
7	MG447	Foreign Direct Investment and Emerging Markets (modular) (H)
8	MG498	Dissertation/Capstone Project (H)

Executive Global Masters in Management - Progression Rules

Candidates who attain at least a Pass grade in MG440, MG441 and MG443 will be eligible to proceed into the second year. FM475 and MG445 are not required for progression.

A student who does not meet this criterion must resit all failed/deferred papers in accordance with the resit process detailed below. If, following the resit attempt, a student:

- has attained at least a Pass grade in each of the first year papers, he/she will be eligible to proceed into the second year.
- has attained at least a Pass grade in at least one of the first year papers, he/she will be eligible to proceed into the second year:
 - at the discretion of the Chair of the Sub-Board of Examiners; and
 - subject to ratification by the Graduate School Board of Examiners (GSBE).
- Has failed all of the first year papers, he/she will not be eligible to

proceed into the second year, as he/she will no longer be able to successfully complete the programme according to the School's Scheme for the Award of a Taught Master's Degree (four units).

The marks of any student who fails up to two papers over the course of the programme will be subject to the penalty rules stipulated at paragraph 3.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Global Masters in Management - Resit Process

A student shall normally be entitled to re-sit any failed courses only (on one occasion).

For first year courses required for progression, where the individual assessment takes the form of an assignment or take home exam, once grades have been ratified, the faculty member responsible for the failed first year course will set the new paper and deadline for re-submission to take place as soon as possible and before the beginning of the second year. Results for resits and any subsequent progression will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course.

The results of first year courses FM475 and MG445 will initially be provisionally released and subsequently formally ratified by the Sub-Board of Examiners and Graduate School Board of Examiners in November. If it is determined that as a result of a fail in one or both of these courses an award cannot be made the faculty member responsible for the failed course will set the new paper and deadline for re-submission to take place as soon as possible. A candidate resitting these courses cannot graduate until the July Sub-Board and Graduate School Board of Examiners has met to ratify their results. For second year courses, once grades have been ratified by the Sub-Board of Examiners and it is determined that an award cannot be made, the faculty member responsible for the failed second year course will set the new paper and deadline for re-submission to take place as soon as possible. Results for resits and subsequent classification will be agreed by the Chair of the Sub-Board of Examiners and will be subject to ratification by the Graduate School Board of Examiners. If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive Global MSc in Management

Programme Code: TMGLMG

These regulations apply to students entering in the 2014-15 academic year.

A 17 month programme. Students take eight compulsory half unit courses (four units in total) and three non-assessed courses in Leadership in Practice (MG454), Getting Things Done With Research (MG444) (withdrawn 15/16) and Foundations of Management 2 (MG457).

Paper Course number and title

Year 1

1	MG440	Managerial Economics (modular) (H)
2	MG441	Foundations of Management (modular) (H)
3	MG443	Organisational Behaviour (modular) (H)
4	FM475	Financial Management (modular) (H)
5	MG445	Marketing Strategy (modular) (H)

Year 2

6	MG446	Strategy, Organisation and Innovation (modular) (H)
7	MG447	Foreign Direct Investment and Emerging Markets (modular) (H)
8	MG498	Dissertation/Capstone Project (H)

If a student does not re-submit an assignment/exam by the deadline set, they will be deemed to have failed the course. Resits for second year courses will result in delayed Graduation.

Executive MSc in Health Economics, Policy and Management

Programme code: TMHEPMEX

Students take four compulsory half unit courses, options to the value of two units, and a dissertation.

Paper Course number and title

Year 1

1	SA4G1	Financing Health Care (H)
2	SA4G2	Health Economics (H)
3	SA4E1	Health Administration and Management (H)
4	SA4E2	Resource Allocation and Cost-effectiveness Analysis (H)

Year 2

5	SA4E3	Dissertation in Health Economics, Policy and Management (H)
6	Students take optional courses to the value of two full	

units as follows:

December of Year 2:

Students select one of the following courses:

SA4G3	Pharmaceutical Economics and Policy (H) or
SA4K8	Health Care Quality Management (H)

Students select one of the following courses:

SA4G6	Measuring Health System Performance (H) or
SA4F2	Principles of Evidence-Based Medicine and Clinical Trials (H)

June of Year 2:

Students select one of the following courses:

SA4K9	Advanced Health Economics (H) or
SA4K7	Health Care Negotiations (H)

Students select one of the following courses:

SA4G4	Statistical Methods in Health Care Economic Evaluation (H) or
SA4G5	Valuation, Behaviour and Policy (H) (n/a 15/16)
SA4N7	Economics of Health and Wellbeing (H)

Executive LLM

Programme Code: TMLL2EX

1. The general regulations for MA and MSc Degrees and the Code of Practice for Taught Masters Programmes in the online Calendar apply to the Executive LLM programme except in the event of inconsistency when these regulations for the Executive LLM take priority.
2. In order to obtain the Degree, students must complete eight Executive LLM courses (see list below). Students must complete the requirements as a part-time student over a period of four years, or with the approval of the Programme Director within a period of six years. The minimum period within which the Degree can be completed is three years.
3. Alternative exit points are available to students who are not able to complete the Degree. An LSE Diploma in Legal Studies is available on completion of six courses and a Certificate of Legal Studies on the completion of four courses. There is no minimum period for completion of the alternative exit points of Certificate of Legal Studies or Diploma in Legal Studies.
4. Courses should be chosen from the list below and are subject to availability as not every course will be offered each year. Subject to the availability of teaching staff, it is intended that every course be offered at least once within the four year degree period. No other courses at LSE or elsewhere may be taken as part of the Executive LLM programme.

Intensive Teaching

5. The Executive LLM courses will be taught in short intensive week-long sessions, which will typically be taught in the first half of April, September and December. Each course will provide between 24 and 26 hours of contact teaching time. Teaching will normally run from Monday to Friday. However, in the exceptional event where a course cannot be taught on the set weekday/s (e.g. due to last minute teacher illness), teaching may be extended to the Saturday and Sunday morning of that week. Accordingly, students are expected to book trains or flights for the day before teaching commences and should, where possible, book return trains or flights on the Sunday afternoon or evening following the completion of the course.
6. Where there is student demand we may elect also to offer some courses in two intensive weekends. The two weekends will not be more than four weekends apart. Where courses are offered in the intensive weekend format the same course will also be offered in week-long intensive format at least once every four years.

Payment of Fees

7. All Executive LLM offer holders will be required to pay a Registration Fee of £500 within 14 days of receiving their offer of admission. The registration fee is non-refundable. Only on receipt of the registration fee, may students register onto the programme. Registered students are then required to pay a per course tuition fee in advance of their chosen course date, to secure their place.

Students will only be permitted to attend a module if payment is received in time. Fee payment deadlines can be found at: lse.ac.uk/intranet/LSEServices/financeDivision/feesAndStudentFinance/Paying%20fees/Executive%20programmes.aspx#llm

8. The registration fee of £500 is non-refundable. If you withdraw from the course before starting a session or are unable to attend a session for which you have registered, all module fees will be credited to a module in a later session. You must inform the Programme Manager if you are unable to attend a module you are registered for. In exceptional circumstances, at the Director's discretion, the funds paid for that session will be refunded. Changes in fee levels may occur over the course of the programme. The student will remain liable for any difference between the fees chargeable at the later session and the fee credit from the module which the student withdrew from. Module fees are non-refundable, and will not be credited to another session, if you have attended classes but withdraw before the assessment.

9. It is our intent to offer each advertised module at least once during the four year degree period. This may not always be possible due, for example, to teacher illness or resignation. It is possible that a module may need to be cancelled at short notice, such as where the teacher is unavailable or participant numbers are very low. If this happens, students will be given the option of taking another module during the same session or, alternatively, the fees paid towards that module will be held in credit for your next chosen module/session or refunded if preferred. Students will be informed of the withdrawal of a module no later than two weeks prior to the commencement of the module.

Assessment

10. All Executive LLM courses are assessed by either take-home examination or 8,000 word extended essay.

11. To comply with the Department's writing requirement at master's level, all students are required to write one extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate.

12. Extended essays must not exceed the set word limit and must be submitted by a set deadline. Students must provide evidence of original work or a capacity for critical analysis. Students will be required, at the time of submission of their work, to sign a statement on plagiarism. An oral examination may be held if the examiners so determine.

13. The take-home examinations will be set two months after the completion of the intensive teaching. The date of the examination will be provided at the date courses are available for selection. They will be uploaded and submitted electronically.

14. All students are required to write an extended essay of 8,000 words as the assessment for one of their courses to obtain the Degree, the Diploma or the Certificate. Students are not permitted to take more than three courses assessed by extended essay to obtain the Degree or the Diploma or more than one course assessed by extended essay to obtain a Certificate. The extended essay topic will be set by the course teacher. The student may propose essay topics and ideas to the teacher.

15. All students will be required to be online during the examination period in case there is any need to contact them.

16. Students will be able to re-sit a course examination once. A re-sit examination will be set as soon as possible after the student is notified of the failure. At the Programme Director's sole discretion in lieu of a re-sit or deferred examination the student may be required to submit an 8,000 word essay. This can only occur when the student has not already completed the maximum of three 8,000 word essays.

17. Any student who fails an exam twice in the same course will not be able to proceed to complete the Executive LLM programme. Students will not be able to proceed to take further courses if at the first sit and the re-sit examination are both bad fails or if the failure is not a bad fail but the student has failed another course following the re-sit. If such a student has already successfully completed 4

courses or 6 courses prior to such a failure, the student will be awarded a Certificate of Legal Studies or Diploma of Legal Studies.

Registration

18. The maximum period of registration on the programme is six years. Therefore completion of all the degree requirements (or Diploma, Certificate) must be within a six year period.

Course Completion Rate

19. Students will be expected to take one to two courses per year. Any student who fails to take a course for a two year period will be asked to provide reasons for the failure to complete courses. Any student who following such a request either fails to provide a response to the Programme Director or fails to complete a course in the year following the giving of these reasons, may be deregistered from the programme.

Courses

Course number and title

LL400E	European Capital Markets Law (H)
LL401E	Law of Armed Conflict(H)
LL402E	Key Issues in Transnational Environmental Law (H)

Executive MSc in Political Economy of Europe

Programme code: TMPOECEUEX

Two-year, part-time modular programme.

Paper **Course number and title**

Year 1

1	EU452E	Key issues in the Political Economy of Europe
2	EU449E	Capitalism and Democracy in Central Europe (H)

3	EU443E	European Capitalism(s) and the Global Economy (H)
Year 2		
4	EU425E	Interest groups, markets and democracy (H)
5	EU497E	Dissertation (H)
6	EU446E	Economic Governance of EMU (H)
7	EU453E	The Political Economy of Welfare State Reform (H)

Executive MSc Political Economy of Europe - Progression from Y1 to Y2 and Resit Rules

- Students who attain at least a Pass grade in each of the first year courses will be eligible to proceed into the second year.
- Students who attain a Fail grade in a course of 0.5 unit value, but attain at least a Pass in the remaining 1.5 units will be eligible to proceed into the second year. Such students will be able to resit the failed course (only on one occasion) at the next available opportunity alongside their second year courses.
- Students who attain a Fail grade in courses to the value of 1.0 unit, but who attain at least a Pass in the remaining 1.0 unit will only be permitted to progress at the discretion of the Sub- Board of Examiners who will consider their overall performance and may recommend that the student cannot progress until they have successfully completed a resit in their failed course(s). Where a student is permitted to progress, they will be able to resit the failed course (only on one occasion) at the next available opportunity.
- Students who attain a Bad Fail grade in any course or who attain a Fail grade in courses to the value of 1.5 units will not be eligible to progress and will need to undertake resits at the next available opportunity. If, following the resits a student has failed to improve their grade, he/ she may not be eligible to proceed into the second year, if he/she will no longer be able to successfully complete the programme according to the School's Scheme for the Award of a Taught Master's Degree (four units).
- The marks of any student who fails up to 1.0 units over the course of the programme will be subject to the penalty rules stipulated at paragraph 5.2 of the School's Scheme for the Award of a Taught Master's Degree (four units).

Executive Master of Public Administration

Programme code: TMMPAEX

19 month programme. Students must take courses to the value of 8 half units as set out below. Alternative exit points are available to students who are not able to complete the degree. An LSE Diploma is available on the completion of six courses and an LSE Certificate on the completion of four courses.

Year 1 and 2 at LSE

Paper	Course number and title
Year 1	
1	GV4G8E Public Policy in Practice Workshop I (EMPA) (H)
2	GV478E Political Science and Public Policy (H)
3	EC455E Empirical Methods for Public Policy (H)
4	GV4G9E Public Policy in Practice Workshop II (EMPA) (H)
Year 2	
5	EC440E Economic Policy Analysis (H)
6-7	Two of the following: EC421E Global Market Economics (H) EC454E Development Economics (H) GV488E Regulatory Analysis (H) GV4E4E Fiscal Governance and Budgeting (H) SA4X6E Welfare Analysis and Measurement (H) (n/a 15/16)
8	EC409E Public Policy in Practice Workshop III (EMPA) (H) To be eligible to progress into the second year, students

should attain at least a Pass grade in each of the first year courses GV4G8E, GV478E and EC455E. The Year 1 course GV4G9E will not count towards progression but the grade will count towards the final degree classification. If a single paper is failed, the student may proceed to the second year and resit the failed paper along with the second year papers. The Sub-Board of Examiners may, at its discretion, consider an application to progress to the second year of the degree from a student who has fallen marginally short of this requirement.

Executive Master of Public Policy

Programme code: TMMPPPEX

Year 1 and 2 at LSE

Paper	Course number and title
Year 1	
1	GV4J1E Public Policy in Practice Workshop I (EMPP) (H)
2	GV478E Political Science and Public Policy (H)
3	EC455E Empirical Methods for Public Policy (H)
4	GV4J2E Public Policy in Practice Workshop II (EMPP) (H)
Year 2	
5	EC440E Economic Policy Analysis (H)
6	One of the following: EC421E Global Market Economics (H) EC454E Development Economics (H) GV488E Regulatory Analysis (H) GV4E4E Fiscal Governance and Budgeting (H)
7	EC4J3E Public Policy in Practice Workshop III (EMPP) (H)
8	EC4H8E / GV4H8E Executive MPP Capstone Project

MSc in Finance (part-time)

Programme code: TMFI

Academic year programme lasting 21 months part-time (evenings). Students must take two full unit compulsory courses in the first year and four of the half-unit options available in the second year. They must submit a dissertation in one of the optional half-unit courses and take an examination in the other three half-unit courses.

Paper	Course number and title
Year 1	
1	FM422E Corporate Finance
2	FM423E Asset Markets
Year 2	
3 & 4	Students should select 4 half unit courses to the value of 2 full units. Students must select at least three courses from the dedicated list of options marked (*)
	FM405E Fixed Income Securities and Credit Markets (H) (Dissertation code FM4U5E)*
	FM406E Topics in Portfolio Management (H) (Dissertation code FM4T6E)*
	FM407E Mergers, Buyouts and Corporate Restructurings (H) (Dissertation code FM4U7E)*
	FM408E Financial Engineering (H) (Dissertation code FM4T8E)*
	FM409E Risk management in Financial Markets (H) (Dissertation code FM4U9E)*
	FM414E Corporate Investment and Financial Policy (H) (Dissertation code FM4T4E)*
	FM440 Corporate Finance Theory (H) (Dissertation code FM4T3) (n/a 15/16)
	FM447 Global Financial Systems (H) (Dissertation code FM4T7)
	FM472 International Finance (H) (Dissertation code FM4T9)
	In exceptional cases it may be possible to take an unlisted optional course with the approval of the Programme Director.

Notes You will be required to write a 6,000 word dissertation (replacing the exam) in one of your half unit courses. You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on. FM404, FM440, FM447 and FM472 are taught during the daytime only. To take these courses students must be able to attend teaching during the day.

Supplementary criteria for progression from the first to the second year of the MSc Finance (part-time)

To be eligible to proceed into the second year, candidates must attain at least a Pass grade in the two compulsory courses: FM422E and FM423E. If a candidate fails (but does not 'Bad Fail') one compulsory course, the Board may exceptionally allow progression to the second year. Exceptional progression will be at the sole discretion of the Board. If a candidate fails both of these compulsory courses they will not be allowed to progress to year two. If a candidate has a 'Bad Fail' in one or both courses they will not be allowed to progress to year two.

A student shall normally be entitled to re-sit any failed courses only (on one occasion) and at the next normal opportunity. The School may consider an application for repeat tuition in any failed courses from a student. Results obtained at re-sit shall bear their normal value.

MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences

Programme code: TMHECSEX

Students take five compulsory half unit courses, options to the value of one and a half units, and a dissertation.

Paper Course number and title

Year 1

- | | | |
|---|--------|---|
| 1 | SA4M6E | Economic Analysis for Health Policy (H) |
| 2 | SA4M7E | Quality and Outcomes in Cardiovascular Sciences (H) |
| 3 | SA4M8E | Economic Evaluation in Health Care (H) |
| 4 | SA4M9E | Systematic Review and Meta-analysis (H) |

EH486 Shipping and Sea Power in Asian Waters, c1600-1860 (H)

Regarding Economic History (EH) courses only: it may be possible to take further options among EH courses with the agreement of the course teacher responsible and the Academic Coordinator of the Double Degree. One of the above may be replaced by a further course from other LSE departments (subject to agreement with tutor and teacher responsible for the course).

5 **Compulsory Language Requirement** Students can fulfil the language requirement of the dual Master's degree in three different ways:

- 1) By taking two years of language training while at Columbia and the London School of Economics.
- 2) By taking, and passing, two translation exams. (Both translation exams must be taken at Columbia. See sample translation exams on the CU History Department website).
- 3) By taking, and passing, one translation exam and studying a language for one year, either at Columbia or at the LSE Language Centre.

Notes Students can also take HY449 *Long-term History: The Patterns of the Past and the Shape of Things to Come*, a non-assessed course taken in addition to the required four full-units as detailed above

MSc Global Media and Communications (with Fudan or USC)

Programme code: TMGLMECO (LSE & USC)

Programme code: TMGLMECO2 (LSE & Fudan)

Full-time programme taken over two calendar years. Students must take courses at LSE as shown below and follow either the programme at Fudan or USC in year two.

Year 1 at LSE

Students take a total of three LSE units and a dissertation as shown

Paper	Course number and title
1	MC408 Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (H)

MC420 Identity, Transnationalism and the Media (H) +
MC422 Critical Studies in Media and Journalism (H)
MC423 Global Media Industries (H) +
MC424 Media and Communication Governance (H)
MC425 Interpersonal Mediated Communication (H)
MC426 Film Theory and World Cinema (H)
MC428 Media Culture and Neoliberalism in the Global South (H) +

MC429 Humanitarian Communication: vulnerability, discourse and power (H)

SO420 Globalisation: Economy, Politics and Power (H) (withdrawn 15/16)

SO433 Cultural Theory (H) (n/a 15/16)

Any other MSc-level course which is offered in the School, subject to the consent of the candidate's programme director.

6 MC499 Dissertation (10,000-12,000 words)**

Year 2 at Fudan

7 Core and optional courses in Chinese language, culture and media, including:

Chinese Language and Culture - (Chinese Civilization-Oriented)

Covering China - China's Print Journalism

CMC and New Media

Speciality Chinese: Media and Communication in China
Chinese Politics

Theories and Practices of China Journalism (Part I and Part II)

Chinese Broadcasting: An overview of the Industry and Programming

Studies on Chinese Documentaries

Research on China's Economy

Year 2 at USC. Students take a total of 24 USC units.

8 COMM 598 Global Communication Research Practicum (4 USC units)
20 USC units (normally total of 5 courses; all Communication courses 4 units each):
500 Managing Communication (4, Sp/Sm)
501 Communication Management Pro-Seminar (4, Fa/Sp)
502 Strategic Corporate Communication (4, Sp)
504x Seminar in Interpersonal Communication (4, Fa, even years)
505 Communication in Work Settings (4, Fa)
506 Images and Image Management (4, Sp)
507 Information Management (4, Fa)
508x Power, Politics and Conflict in Communication (4, 2 years, Sp)
509x Seminar in Classical Rhetorical Theory (4, Fa)
510 Communication, Values, Attitudes, and Behavior (4, Fa/Sp)
511x Seminar in Contemporary Rhetorical Theory (4, Sp)
512x Seminar in Rhetorical Criticism (4, Fa)
513x Seminar in Neoclassical Rhetorical Theory (4, 2 years, Sm)
514x Seminar: Social Movements as Rhetorical Form (4, 2 years, Sp)
515x Seminar in Postmodern Rhetorical Theory (4, 2 years, Fa)
516x Seminar: Feminist Theory and Communication (4, 2 years, Sp)
517x Seminar in Rhetorical Theory and Culture (4, Sp)
518x American Public Address (4, Sp, odd years)
519x Seminar: Cultural Studies in Communication (4, 2 years, Fa)
520 Social Roles of Communication Media (4, Fa/Sp)
521x Seminar in Argumentation (4, 2 years, Sp)
522x Seminar in Kenneth Burke's Dramatistic Theory (4)
524x Seminar in Small Group Process (4, Sp, even years)
528 Web Designs for Organizations (4, Fa/Sp)
530 Social Dynamics of Communication Technologies (4, Sp/Sm)

531 Communication and the International Economy (4, Fa)
 532 Development of American Media Industry (4, Fa)
 533 Emerging Communication Technologies (4, Fa/Sp)
 534 The Culture of New Technologies (4, Fa/Sp)
 535 Virtual Groups and Organizations (4, Fa/Sp)
 540 Uses of Communication Research (4, Fa/Sp)
 541 Integrated Communication Strategies (4, Sp)
 542 Business Strategies of Communication and Entertainment Firms (4, Sp)
 543 Managing Communication in the Entertainment Industry (4, Fa)
 544 The Arts and New Media (4, Fa)
 545 Communication and Global Competition (4, Sp)
 546 Seminar in Diffusion Theory and Research (4, 2 years, Sp)
 547 Distribution of Recordings: Media, Retail and Online Channels (4, Sp)
 548 Issues in Children's Media (4, Sp)
 553 Political Economy of Global Telecommunications and Information (4, Sp)
 557 Communication Policy in the Global Marketplace (4, Fa)
 558 The International Entertainment Marketplace (4, Fa)
 559 Globalization, Communication and Society (4, Fa)
 560 Communications Policy (4, Fa/Sm)
 562x Cognitive Approaches to Communication (4, 2 years, Fa)
 565 Communication Law and Broadcasting (4, Fa/Sp)
 566 Communication Law and New Technologies (4, Sp)
 567 Internet Policy, Practice and Regulation (4, Fa/Sp)
 570 Economics of the Communication Industries (4, Fa)
 571 Communications Technologies (4, Fa/Sp)
 572 Telephone, Data, and Video Telecommunication Systems (4, Sp)
 573 Evaluating Communication Needs (4, Sp)
 574 Tele-Media: A Strategic and Critical Analysis (4, Fa/Sp)
 575 Advocacy and Social Change in Entertainment and the Media (4, Fa)
 576 Communication Strategies for Conflict Management (4, Sm)
 580 Media and Politics (4, Fa/Sp)
 581 Media in Social Services: Design and Evaluation of Campaigns (4, Fa)
 582 International Communication: National Development (4, Sm)
 583 Global Entertainment Education Programs (4, Sp)
 584 Seminar: Interpreting Popular Culture (4, Fa)
 585x Organizational Communication (4, 2 years, Sp)
 587 Audience Analysis (4, Fa)
 605 Advanced Macro Theories of Communication I (4, 2 years, Sp)
 610 Studies in Rhetorical Theory (4, max 8, Fa/Sp/Sm)
 618 Mass Media Effects (4, Fa)
 620 Studies in Communication Theory (2-4, max 8, Fa/Sp)
 625 Theory Construction in Communication (4, Sm)
 629 Global Culture (4, Fa)
 630 Communication Technology and Social Change (4, Sp)
 631x Minds and Media (4, Sp)
 635 Economics of Information (4, Sp)
 636 Interpretive and Cultural Approaches in Organizational Communication (4, 2 years, Fa)
 637 Current Readings in Organizational Communication (4, 2 years, Sp)
 638 Global, International and Intercultural Communication in Organizations (4, 2 years, Fa)
 640 Communication and Organizational Change (4, Fa)
 645 Communication Networks (4, 2 years, Sp)
 646 Negotiating Boundaries in Environmental Research (2)
 647x Seminar on the Network Society (4, Fa)
 599 Special Topics (various special one-time course offerings
 In addition to coursework offered at the Annenberg School of Communication, students may take up to a maximum of 4 units of graduate-level coursework

from other schools or departments at the University of Southern California towards their remaining 20 unit requirement, subject to the consent of the candidate's USC adviser.

Notes

* Courses are subject to availability and the permission of the course lecturer.

** Passing this course is a requirement for passing the programme.

+ Only available to students if they did not take it under Paper 2

(Fa) means Fall semester

(Sp) means Spring semester

(Sm) means Summer semester

MA Global Studies: A European Perspective

Two-year programme. Students attend LSE for either their first or second year and also attend, for a year, one of the following participating institutions: Leipzig, Roskilde, Vienna, or Wrocław. Students follow the MSc Global History programme at the LSE:

MSc Global History

Programme code: TMGLHY2

Full-year programme. Students must take compulsory courses to the value of 2.5 units, a dissertation and optional courses. Students taking year one of the programme at LSE will need to complete EH479 (6,000 word dissertation) and take one unit of options; students taking year two at LSE will complete EH480 (10,000 word dissertation) and 0.5 units of options.

Paper Course number and title

1	EH481	Economic Change in Global History: Approaches and Analysis (H)
2 & 3	Two of the following:	
	EH482	Pre-modern Paths of Growth: East and West compared, c1000-1800
	EH483	The Development and Integration of the World Economy in the 19th and 20th centuries
	HY423	Empire, Colonialism and Globalization
4	Either	
	EH479	Dissertation: Global History (H) and courses to the value of one full unit from the following (if not already taken under paper 2)
	Or	
	EH480	Dissertation: MSc Global History and courses to the value of 0.5 units from the following (if not already taken under paper 2):
	EH402	Research Design and Quantitative Methods in Economic History (H)
	EH404	India and the World Economy (H)
	EH408	International Migration, 1500-2000: from slavery to asylum (H)
	EH409	Chinese Economy in Transition: 1850-1950 (H)
	EH412	Research Topics in Economic History A (H) (withdrawn 15/16)
	EH413	African Economic Development in Historical Perspective (H)
	EH419	Research Topics in Economic History B (H) (withdrawn 15/16)
	EH422	Topics in Quantitative Economic History
	EH423	Japan and Korea as Developing Economies (H) (n/a 15/16)
	EH424	The British Economy in Global Perspective, 1000-2000 (H) (n/a 15/16)
	EH426	Quantitative Topics in Economic History I: Cross-section and Panel Data (H)**
	EH427	Quantitative Topics in Economic History II: Time Series and Economic Dynamics (H)**
	EH428	History of Economics: Making Political Economy into a Social Science (H) (n/a 15/16)
	EH429	History of Economics: Ideas, Policy and Performativity (H) (n/a 15/16)

EH446	Economic Development of East and Southeast Asia (n/a 15/16)
EH447	Great Depressions in Economic History (H) (n/a 15/16)
EH451	Latin American Development: political economy of growth (H) (n/a 15/16)
EH452	Latin American Development and Economic History (H) (n/a 15/16)
EH463	The Long-Run Analysis of Firms and Industries (H)
EH464	The Historical Context of Business (H)
EH466	Labour and Work in Preindustrial Europe (H) (withdrawn 15/16)
EH467	Epidemics: epidemic disease in history, 1348-2000 (H) (n/a 15/16)
EH476	The Economic History of War
EH482	Pre-modern Paths of Growth: East and West compared, c1000-1800
EH483	The Development and Integration of the World Economy in the 19th and 20th centuries
EH486	Shipping and Sea Power in Asian Waters, c1600-1860(H)
EH487	International Economic Institutions since World War I (H)

Notes ** These courses cannot be combined with EH422

LSE-PKU Double Degree in Public Administration and Government

Programme code: TMPAGV

Two-year programme. Students take the first year at Peking University, and the second year at LSE as follows: Students must take courses to the value of 2.5 units and a skills course and dissertation as shown. Candidates may, subject to the approval of their supervisor, substitute for up to two of the written papers listed under 3 below, any paper which is offered in the MSc, LLM or MA which involves at least 20 weeks of an integrated teaching programme and which counts as one quarter (or one full unit) of the complete MSc programme in which it is offered.

Paper	Course number and title
1	GV4E9 Approaches and Issues in Public Policy and Administration
2	Either GV477 Comparative Public Policy Change (H) Or GV483 Public Management Theory and Doctrine (H) Or GV4F4 Policy Advice in Theory and Practice (H)
3	Courses to the value of one unit from the following: Public Management: AC412 Accountability, Organisations and Risk Management (H) DV413 Environmental Problems and Development Interventions (H) DV415 Global Environmental Governance (H) (n/a 15/16) GV483 Public Management Theory and Doctrine (H) GV4A2 Citizens' Political Behaviour in Europe: Elections Public Opinion and Identities (H) (n/a 15/16) GV4C8 Game Theory for Political Science (H) GV4E4 Public Budgeting and Financial Management LL4AT Regulation: Strategies and Enforcement (H) LL4AU Regulation: Legal and Political Aspects (H) MG402 Public Management: A Strategic Approach (H) (n/a 15/16) PH415 Philosophy and Public Policy (H) Comparative Public Policy and Administration: EU421 Policy-Making in the European Union (H) EU443 European Models of Capitalism (H) GV403 Network Regulation (H) GV441 States and Markets (H)

GV477	Comparative Public Policy Change (H)
GV4A5	International Migration and Immigration Management (H)
GV4C4	Legislative Politics: US (H) (L) * (n/a 15/16)
GV4C5	Politics of Economic Policy (H) (M)
GV4C6	Legislative Politics: European Parliament (H) *
GV4C8	Game Theory for Political Science (H)
GV4D4	The Politics of Inequality and Redistribution (H)
LL407	Media and Communication Regulation (H) (n/a 15/16)
SA4F8	Behavioural Public Policy (H)
SA4L1	The Governance of Welfare: The Nation State and the European Union (H)
SA4L2	Contemporary Issues in European Social Policy (H)
SA4M1	Politics of Social Policy: Welfare and Work in Comparative Perspective (H)
Another course with the permission of the programme convenor.	
4	Either MY451 Introduction to Quantitative Analysis (H) or MY452 Applied Regression Analysis (H)
5	GV499 Dissertation
Notes	* Students must not take both GV4C4 and GV4C6.

LSE-Sciences Po Double Degree in Urban Policy

Programme code: TMURPO

Students take the first year at Sciences Po and the second year at LSE. At LSE students will follow the programme regulations for **either** the MSc Local Economic Development; **or** MSc Regional and Urban Planning Studies; **or** MSc Urbanisation and Development as follows:

MSc Local Economic Development

Full-year programme. Students must take courses to the value of three full units as shown and a dissertation.

Paper	Course number and title
1	GY404 Topics in Local Economic Development (H)
2	GY407 Globalisation, Regional Development and Policy GY415 Local Capacity and Economic Development Policy (H)
3	Courses to the value of 1 unit from the following list: EU434 The Political Economy of Southeast Europe (H) EU439 Political and Fiscal Integration and Disintegration in EU Member States (H) GI418 Feminist Economics and Policy: An Introduction (H) GY400 The Economics of Urbanisation (H) GY420 Environmental Regulation: Implementing Policy GY428 Applied Quantitative Methods (H) GY431 Cities, People and Poverty in the South (H) (n/a 15/16) GY438 Cities and Social Change in East Asia (H) (n/a 15/16) GY447 The Economics of Regional and Urban Planning (H) GY449 Urban Futures (H) GY459 Urban Theory and Policy in the Global South (H) GY460 Techniques of Spatial Economic Analysis (H) GY465 Concepts in Environmental Regulation (H) GY475 Issues in Environmental Governance (H) GY480 Remaking China: Geographical aspects of Development and Disparity (H) MY452 Applied Regression Analysis (H) A relevant course from another programme
4	GY499 Dissertation

MSc Regional and Urban Planning Studies

Full-year programme. Students must take courses to the value of three full units and a dissertation. Additionally all students are

required to take GY450 Planning Practice and Research.

Paper	Course number and title
1	GY447 The Economics of Regional and Urban Planning (H)
2	GY448 Social and Political Aspects of Regional and Urban Planning (H)
3	GY454 Urban Policy and Planning (H)
4	Courses to the value of one and a half units:
	GI407 Globalisation, Gender and Development †
	GI409 Gender, Globalisation and Development: An Introduction (H) †
	GI420 Globalisation, Gender and Development: Theorising Policy and Practice (H) †
	GY400 The Economics of Urbanisation (H)
	GY403 Contemporary Debates in Human Geography (H)
	GY409 Gender, Globalisation and Development (H)
	GY410 Economics of Local and Regional Development (H)
	GY413 Regional Development and Policy (H)
	GY415 Local Capacity and Economic Development Policy (H)
	GY421 Gender and Development: Geographical Perspectives (H)
	GY431 Cities, People and Poverty in the South (H) (n/a 15/16)
	GY432 Urban Ethnography (H) (n/a 15/16)
	GY438 Cities and Social Change in East Asia (H)
	GY439 Cities, Politics and Citizenship (H)
	GY441 The Politics of Housing (H) (n/a 15/16)
	GY446 Planning for Sustainable Cities (H)
	GY449 Urban Futures (H)
	GY455 Economic Appraisal and Valuation (H)
	GY460 Techniques of Spatial Economic Analysis
	GY462 Real Estate Finance (H)
	GY464 Race and Space (H)
	GY465 Concepts in Environmental Regulation (H)
	GY467 Global Migration and Development (H)
	GY479 Urban Revolutions (H)
	GY480 Remaking China: Geographical aspects of Development and Disparity (H)
	SA4F9 Housing, Neighbourhoods and Communities (H)
	SO465 City-Making: the Politics of Urban Form (H)
	SO480 Urban Inequalities (H) (n/a 15/16)
	A half-unit course from another programme at the discretion of the Programme Director §
5	GY450 Planning Practice and Research (non-assessed but compulsory)
6	GY499 Dissertation
Notes	†GI407 cannot be taken alongside GI409 or GI420 § means by special permission only.

This programme is externally accredited by the RICS. Further information is available on the Geography and Environment Department lse.ac.uk/collections/geographyAndEnvironment/ website (see Quick Links to Regional and Urban Planning Studies).

Taught Master's Course Guides

AC411 Half Unit

Accounting, Strategy and Control

This information is for the 2015/16 session.

Teacher responsible: Prof Wim Van der Stede OLD 2.18

Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit. Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor if they have sufficient relevant background knowledge.

The course is capped to three sections of around 55 students; ie 165 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Course content: This course provides an advanced overview of current theoretical and practical developments in the area of organisational control, which is an essential function of management to ensure that the organisation's objectives and strategies are carried out effectively. Good management control increases the probability of organisational success.

Specifically, the course discusses what it means to have an organisation be in control, what alternatives managers have for ensuring good control, and how managers should choose from among various control system alternatives. Then we will focus on each of the elements of financial control systems, which provide the dominant form of control in the vast majority of decentralised organisations. These elements include financial target setting, performance measurement and evaluation and the assignment of various forms of organisational rewards, such as bonuses and promotions. The latter part of the course extends these key notions of management control from the intra-organisational level to the inter-organisational level, highlighting some of the difficulties involved in organisational control of new, fluid, inter-organisational settings and configurations, such as joint-ventures and various types of alliances, often involving global alliance partners.

The course will cover the following topics:

- Strategy and the design of planning and control systems
- Management control systems and organisational architecture
- Decision rights and results accountability in decentralised organisations
- Incentive compensation systems
- Performance measurement and evaluation
- Management control in inter-organisational relationships
- Corporate governance.

As a final note, the discipline of management accounting is often partitioned into (1) management control systems and (2) cost and management accounting systems, where the latter is the key focus of another course, AC415. AC411 can, but is not required to, be taken with AC415. Students can take AC411 or AC415, or both.

Teaching: 30 hours of seminars in the MT.

30 hours of seminars in the MT. (Note: Week 1 of MT is reserved for an intensive pre-session course for MSc Accounting and Finance students; therefore, main courses, including AC411, start in Week 2 of Michaelmas term; hence, teaching is during 10 weeks from Week 2 through 11.)

Specifically, AC411 consists of 10 principal topics delivered in two sessions of 1.5 hours each week. The first session each week typically provides an introduction, conceptual analysis, and discussion of the key facets of the topic. The second session offers a further discussion and expansion of the issues through case study analysis and real-world applications. Each session is conducted in groups of about 55 students. The case study analyses and discussions permit the exploration of management control issues in a broad range of settings. The case method of instruction, however, requires good advance preparation by the students, and every person should be ready to contribute to the case discussion when called upon. Students should expect to be "cold called" and not count on being able to hide behind classmates who volunteer

to participate. Active participation is also expected and encouraged during non-case sessions.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Reference textbook: Merchant & Van der Stede, *Management Control Systems: Performance Measurement, Evaluation and Incentives*, 3e (Prentice Hall, 2012).

Assessment: Exam (70%, duration: 2 hours) in the LT week 0. Essay (15%) in the MT.

Project (15%) in January.

Students are required to complete two essays during term-time (totalling 15% of the mark for the course), a group project, due in January (15%), and a final exam (70%).

AC412 Half Unit

Accountability, Organisations and Risk Management

This information is for the 2015/16 session.

Teacher responsible: Prof Mike Power KSW 3.12 and Dr Tommaso Palermo KSW 3.07

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPhil/PhD in Accounting, MSc in Accounting and Finance, MSc in Economy, Risk and Society, MSc in Law and Accounting, MSc in Management, MSc in Management and Regulation of Risk, MSc in Management, Organisations and Governance, MSc in Public Management and Governance, MSc in Public Policy and Administration and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor.

Course content: This is an advanced course focusing on the organisational and institutional settings within which risk is managed.

The first five lectures deal with key issues in organisational responses to risk and uncertainty, including the impact of disasters and accidents and the growing formalisation and standardisation of risk management practice. The second five lectures explore the intersections of risk and corporate governance, by focusing on the risks that arise at top management and board of directors level, including lack of external oversight, executive pay issues, board interlocks, and strategic irreversibility. The overall purpose of the course is to provide students with a critical appreciation of the management of risk as an organisational and social process. The course is necessarily cross-disciplinary, drawing on scholarship within accounting, organisational sociology and regulation studies.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures in the ST.

In week 6 there will be a reading and feedback week, including a writing workshop.

Formative coursework: Two pieces of written work will be assessed during the term but the grades will not count towards the overall course assessment.

Indicative reading: No single book covers the entire course.

Key readings include: Bebbchuk & Fried, *Pay Without Performance* (Harvard, 2004); Coffee, *Gatekeepers: The Professions and Corporate Governance* (Oxford, 2006); Hutter & Power (eds) *Organizational Encounters with Risk*, (Cambridge, 2005); Power, *Organized Uncertainty: Designing a World of Risk Management* (Oxford, 2007); Turner & Pidgeon, *Man-Made Disasters*, (Butterworth/Heinemann, 1997); Vaughan, *The Challenger Launch Decision*, (Chicago, 1997); Short & Clarke (eds) *Organizations, Uncertainties and Risks* (Westview, 1992); Weick & Sutcliffe,

Managing the Unexpected: Assuring High Performance in an Age of Complexity (Jossey-Bass, 2007).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AC414 Half Unit

Financial Reporting, Capital Markets and Business Combinations

This information is for the 2015/16 session.

Teacher responsible: Dr Vasiliki Athanasakou OLD 2.20 and Prof Ane Miren Tamayo OLD 5.05

Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Management and MSc in Management (CEMS MIM). This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor if they have sufficient academic background knowledge. This course cannot be taken in conjunction with **AC420 Financial Reporting in Capital Markets**.

The course is capped to one section of around 55 students; ie, 55 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Pre-requisites: Knowledge of financial accounting at undergraduate level is presumed.

Course content: A number of financial reporting issues and topics are covered. It is likely that they include but are not restricted to the following: accounting for value creation with special emphasis on cash flows and revenues, business combinations, corporate disclosure, capital markets efficiency, and corporate governance. Most topics are covered from an International Financial Reporting Standards (IFRS) and/or United States Generally Accepted Accounting Principles (US GAAP) perspective.

Teaching: 30 hours of seminars in the MT. Teaching is delivered in a 3-hour session each week. Each session is conducted in groups of about 55 students, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: The lecturers set exercises, essays or case studies for class discussion each week. Many of these involve reading key papers and other writings in the financial accounting literature and illustrating their effects numerically. Two pieces of work, based on these assignments, are collected for formative assessment.

Indicative reading: Detailed reading lists are handed out at the start of the course, and will be largely based on papers in academic journals. Relevant books covering specific parts of the course are: Keith Alfredson, Ruth Picker, Janice Loftus, Kerry Clark, Victoria Wise, Matt Dyki, Applying International Financial Reporting Standards, 2nd edn, Wiley, 2009; Beaver WH, Financial Reporting: An Accounting Revolution, 3rd edn, Prentice-Hall, 1998; Scott W, Financial Accounting Theory, Prentice Hall, 1997; Watts RL & Zimmerman JL, Positive Accounting Theory, Prentice-Hall, 1986; David Alexander, Anne Britton, and Ann Jorissen, International Financial Reporting and Analysis, 5th edn, Thomson.

Assessment: Exam (100%, duration: 1 hour and 45 minutes) in the main exam period.

The first 15 minutes is reading time.

AC415 Half Unit

Management Accounting for Decision Making

This information is for the 2015/16 session.

Teacher responsible: Prof Bjorn Jorgensen Old 2.17

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management, MSc in Management (CEMS MIM) and MSc in Management, Organisations and Governance. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be taken concurrently with **AC490**

Management Accounting, Decisions and Control.

Other students may be admitted only with the agreement, in writing, of the MSc (Accounting) Course Tutor if they have sufficient relevant background knowledge.

The course is capped to two sections of around 55 students; ie, 110 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Course content: This course is focused on management accounting, which is a key function in organisations that involves developing and using financial and non-financial information to support decision making, not only in a technical sense, but bearing in mind that the way in which management accounting systems are designed and implemented often determines whether employees will be motivated to act in ways that are congruent with the objectives of the organisation.

The discipline of management accounting is often partitioned into (1) cost and management accounting systems and (2) management control systems, where the latter is the key focus of another course, AC411. AC415 can, but is not required to, be taken with AC411.

Students can take AC411 or AC415, or both.

Returning to AC415, while financial accounting requires that product cost information be accumulated in particular ways for external reporting, the focus in AC415 is on cost and other accounting and non-accounting information systems that aid managerial decision making. This includes the study of management accounting systems in widespread use today as well as an analysis of the problems associated with these systems in today's business environment (such as their tendency to provide distorted product cost information), as well as approaches to mitigate these problems (eg, activity-based costing; use of non-financial information).

With the above brief overview in mind, this course analyses key concepts which form the discipline of management accounting:

- Product costing and pricing
- Activity-based costing/management (ABC/ABM)
- Profitability and variance analysis
- Transfer pricing including tax considerations for international transactions
- Performance measurement and incentive compensation systems
- ROI, EVA, and other performance metrics

Teaching: 33 hours of seminars in the LT.

That is, AC415 is delivered in two sessions of 1.5 hours each week.

Each session is conducted in groups of circa 55 students and is almost exclusively taught by way of the case method of instruction. Case studies permit the exploration of management accounting issues in a broad range of settings. The case method of instruction, however, requires good advance preparation by the students, and every person should be ready to contribute to the case discussion when called upon. Students should expect to be "cold called" and not count on being able to hide behind classmates who volunteer to participate.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases.

Indicative reading: A detailed reading list is laid out for each session on the syllabus.

Reference textbook: Horngren, Sundem, Burgstahler, and

Schatzberg, Introduction to Management Accounting, 16e (Prentice Hall, 2014).

Assessment: Exam (75%, duration: 2 hours) in ST
Case Assignment (10%) during LT
Project (15%) during LT

Thus, students are required to complete two assignments during term time (totalling 25% of the mark for the course) and a final exam (75%).

AC420

Financial Reporting in Capital Markets

This information is for the 2015/16 session.

Teacher responsible: Dr Vasiliki Athanasakou OLD 2.20, Dr Pascal Frantz OLD 3.07, Prof Peter Pope OLD 5.04 and Prof Ane Miren Tamayo OLD 5.05

Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions and MSc in Law and Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted if they have knowledge of financial accounting acquired at undergraduate level, and only with the agreement, in writing, of the MSc (Accounting) Course Tutor. This course cannot be taken in conjunction with **AC414 Financial Reporting, Capital Markets and Business Combinations**.

The course is capped to three sections of around 55 students; ie, 165 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Course content: Corporate financial statements are a key source of information about the economic activities of a firm. This course is intended to enhance the student's ability to relate economic events to financial statements and disclosures. It also seeks to aid in developing a coordinated set of concepts and principles to serve as a framework for analysing a wide variety of financial reporting issues. The goal is to enable students to understand the mapping between underlying economic events and the information in financial statements, and how this mapping affects inferences about the economic activities and position of the firm. The course also explores the regulatory environment and political climate, and how these link with the introduction of new standards and their underlying theories. Students are encouraged to relate economic events to diverse practices in financial statements, and to think critically of ongoing controversies and debates.

The course objectives are achieved through teaching a variety of financial reporting issues and topics including the following: standard setting with respect to the conceptual frameworks; accounting for business combinations; accounting for value creation; capital markets efficiency; corporate disclosure; and corporate governance. Most topics are covered from an International Financial Reporting Standards and/or United States Generally Accepted Accounting Principles perspective. The course also covers a number of theoretical perspectives such as deductive approaches, based on the notion of financial accounting as the measurement of economic income and value (including applications to current accounting controversies); economic approaches, regarding corporate financial reporting as an information system, including signalling and disclosure, and studying the demand for and supply of accounting information in a market setting and its stock market impact; and regulatory approaches, examining the nature of and case for and against the regulation of corporate financial reporting. Illustrations are provided on how these theories are used in standard setting and in valuation. Detailed choice of subjects will be determined by those lecturing on the course and many vary to some extent from year to year. Knowledge of basic accounting is assumed.

Teaching: 30 hours of seminars in the MT and 33 hours of seminars in LT. Teaching is delivered in a 3-hour session each week. Each

session is conducted in groups of about 55 students, often involving case study analyses and group discussions. This mode of teaching requires good advance preparation by the students; hence, every student should be ready to contribute to the discussion when called upon. Active participation is expected and encouraged.

Formative coursework: The lecturers set exercises, essays or case studies for class discussion each week. Many of these involve reading key papers and other writings in the financial accounting literature and illustrating their effects numerically. Four pieces of work, based on these assignments, are collected for formative assessment.

Indicative reading: Detailed reading lists are handed out at the start of the course, and will be largely based on papers in academic journals. Relevant books covering specific parts of the course are: Keith Alfredson, Ruth Picker, Janice Loftus, Kerry Clark, Victoria Wise, Matt Dyki, Applying International Financial Reporting Standards, 2nd edn, Wiley, 2009; Beaver WH, Financial Reporting: An Accounting Revolution, 3rd edn, Prentice-Hall, 1998; Scott W, Financial Accounting Theory, Prentice Hall, 1997; Watts RL & Zimmerman JL, Positive Accounting Theory, Prentice-Hall, 1986; David Alexander, Anne Britton, and Ann Jorissen, International Financial Reporting and Analysis, 5th edn, Thomson.

Assessment: Exam (100%, duration: 3 hours and 15 minutes) in the main exam period.

The first 15 minutes is reading time.

AC424

Accounting, Organisations and Institutions

This information is for the 2015/16 session.

Teacher responsible: Dr Matthew Hall OLD 2.11A

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not available to other students except in special circumstances and with the written permission of the Course Director.

Pre-requisites: There are no specific pre-requisites and the course does not require a background in accounting. Pre-session training in the form of various intensive sessions prior to the start of term will be offered for those who need a brief 'technical' preparation for the Programme.

Course content: The object of the course is to provide students with an advanced understanding of the changing role and position of accounting practices in organisations, both public and private, and societies more generally. Students will be exposed to advanced thinking about how accounting practices are much more than a collection of routine techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents will be addressed.

The course will emphasise the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each lecture will provide the necessary technical foundations.

Indicative topics, listed along the lines of "Foundations" and "Risk Management, Accountability, and Corporate Governance" include: Foundations-Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Accountability, Incentives and Performance; Accounting for Sustainability; Organisational Failure. Risk Management, Accountability and Corporate Governance-Disasters, Accidents and Errors; Organisations and the Management of Uncertainty; The Risk Management Process; Mapping and

Communicating Risk in Organisations; Organisations, Security and Resilience; Corporate Governance: Board Functioning, Gatekeepers, Executive Compensation, Regulation.

Teaching: 30 hours of seminars and 2 hours of workshops in the MT. 20 hours of lectures and 9 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be required to produce two pieces of written work per term. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentation and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.

Indicative reading: Chapman, Cooper & Miller (eds.), *Accounting, Organizations and Institutions* (Oxford, 2009); Hopwood & Miller (eds.), *Accounting as Social and Institutional Practice* (Cambridge, 1994); Power, *The Audit Society* (Oxford, 1999); Roberts, *The Modern Firm* (Oxford, 2004); Power, *Organized Uncertainty: Designing a World of Risk Management* (Oxford, 2007); Hutter & Power (eds.), *Organizational Encounters with Risk* (Cambridge, 2005); Hood, Baldwin & Rothstein, *The Government of Risk* (Oxford, 2000); Coffee, *Gatekeepers: The Professions and Corporate Governance* (Oxford, 2006); Bebchuk & Fried, *Pay Without Performance* (Harvard, 2004)

Assessment: Exam (50%, duration: 2 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

AC425

MSc Accounting, Organisations and Institutions: Pre-sessional course

This information is for the 2015/16 session.

Teacher responsible: Dr Matthew Hall OLD 2.11A

Availability: This course is available on the MSc in Accounting, Organisations and Institutions. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is normally only available to MSc Accounting, Organisations and Institutions students. The purpose of the two pre-sessionals is to acquaint students without any prior, or little, background in accounting to two core areas within accounting: Financial Accounting and Management Accounting. Students with some prior background in accounting may find the sessions to be useful as a "refresher".

Course content: Session 1: Introduction to Financial Accounting and Auditing Session 2: Introduction to Management Accounting

Teaching: The two sessions are held over two days in September before the start of MT.

Formative coursework: Study materials for the pre-sessional will be made available by means of selected handouts

Assessment: There is no assessment.

AC444 Half Unit

Valuation and Security Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Pascal Frantz OLD 3.07 and Mr Jose Carabias Palmeiro OLD 2.13

Availability: This course is available on the MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other students may be admitted to the course if they have a reasonable knowledge of financial accounting or finance acquired at undergraduate or equivalent level, and only with the agreement,

in writing, of the MSc (Accounting) Course Tutor.

Pre-requisites: It is advantageous for students to have knowledge of financial accounting and finance (asset pricing).

Course content: The aim of this course is to introduce students to security analysis and valuation from both theoretical and empirical perspectives. Students are furthermore provided with an opportunity to apply their skills by valuing, in small groups, from the point of view of a "sell-side analyst", a firm's equity of their choice using technologies based on the present values of free cash flows and economic value added. The course should appeal to students interested in investment analysis and fund management.

The course is presented in three parts. The first part, financial analysis, focuses on past and present performance evaluation, which is used by financial analysts to generate expectations about future performance (prospective analysis). The second part, security valuation, focuses on the determination of intrinsic security prices, which, in efficient markets, reflect prospective performance. The third part, returns to fundamental and technical analysis, provides empirical evidence on returns to trading strategies based on either financial analysis or past stock returns.

Teaching: 20 hours of lectures, 9 hours of seminars and 3 hours of workshops in the LT.

Students will present their corporate valuation projects during the LT workshops.

There will be a reading week in week 6 of LT.

Indicative reading: Lectures are based on Beccalli E and Frantz, P, *Valuation and Securities Analysis*, 2012. Other books recommended include Penman S, *Financial Statement Analysis and Security Valuation*, McGraw-Hill, 2012, as well as Palepu K, Healy B & Bernard V, *Business Analysis and Valuation*, South-Western College Publishing, 2012. For background reading for the corporate valuation project: Koller T, Goedhart M & Wessels D, *Valuation: Measuring and Managing the Value of Companies*, Wiley, 2010, The course also relies on journal articles published in the financial analysis and financial markets literatures.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Project (30%) in the lent term.

AC470 Half Unit

Accounting in the Global Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Andrea Mennicken OLD 3.12

Availability: This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Accounting and Finance, MSc in Accounting, Organisations and Institutions, MSc in Development Management, MSc in International Political Economy, MSc in Law and Accounting, MSc in Management and Regulation of Risk, MSc in Management and Strategy, MSc in Regulation and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped to one section of around 55 students; ie, 55 total. Students on the waiting list will be admitted on a first-come first-served basis, although MSc students on the Accounting programmes will be given priority.

Pre-requisites: There are no specific pre-requisites and the course does not require a background in accounting.

Course content: This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. This course critically

examines dynamics of accounting regulation, including international standard-setting and consequences for financial statement users, business entities and wider local and global stakeholders.

Topics include:

Political, institutional and economic influences in changing national and international financial reporting frameworks. The political economy of accounting standard-setting. The work of the International Accounting Standards Board (IASB), the European Union, national accounting bodies, and their political and economic environments.

The effects of national financial reporting requirements and International Financial Reporting Standards (IFRS) on business entities and economic development, particularly developing and emerging economies (including the BRIC countries: Brazil, Russia, India, China). The enforcement of financial reporting requirements through auditors, securities regulators, the World Bank and others. Specific technical challenges (for example, impairment tests, derivatives and other financial instruments, fair value accounting and intangible assets).

The course explores issues from different theoretical perspectives through comparative empirical analysis.

Teaching: 30 hours of seminars in the MT. (Note: Week 1 of MT is reserved for an intensive pre-session course for MSc Accounting and Finance students; therefore, main courses, including AC470, start in Week 2 of MT; hence, teaching is for 10 weeks from weeks 2-11.) A 2-hour essay workshop and also a revision session in week 11 of MT.

It is intended to run a small number of additional sessions with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

Formative coursework: Students are required to write an assessed essay of 3,500-4,000 words, to be submitted after the Christmas break. The word limit excludes the bibliography. This written work forms 40% of the overall assessment. A workshop will be held in preparation for the essay assignment. Individual feedback will be given on essay outlines. Further readings, exercises and case studies are set for class discussion each week.

Indicative reading: Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include policy briefings, regulatory documents, green and white papers, World Bank reports (ROSC). Relevant books: Camfferman and Zeff, *Aiming for Global Accounting Standards, 2001-2011* (Oxford University Press, 2015); Botzem, *The Politics of Accounting Regulation* (Edward Elgar, 2012); Chapman, Cooper & Miller, *Accounting, Organizations and Institutions* (Oxford University Press, 2009); Djelic & Quack, *Transnational Communities: Shaping Global Economic Governance* (Cambridge University Press, 2010); Bowden & Seabrooke, *Global Standards of Market Civilization* (Routledge, 2006); Doupnik, *International Accounting* (McGraw-Hill, 2014); Nobes & Parker, *Comparative International Accounting* (Prentice Hall, 2012); Walter, *Governing Finance: East Asia's Adoption of International Standards* (Cornell University Press, 2008).

Assessment: Exam (60%, duration: 1 hour and 30 minutes) in the main exam period.

Essay (40%, 3,500-4,000 words) in LT.

The 4,000 words exclude the bibliography.

does not require a background in accounting.

Course content: This course examines the fast changing practices and institutions of accounting in the global economy, with a particular emphasis on the roles of accounting in global financial governance. International accounting and auditing standards have been advocated as a way of enhancing global financial stability, so as to stimulate the flow of cross-national investment, expand the scope for market-oriented development, and integrate local enterprises into global financial markets. Specific technical challenges (for example, impairment tests, derivatives and other financial instruments, fair value accounting and intangible assets).

The course explores issues from different theoretical perspectives through comparative empirical analysis

Teaching: 18 hours of lectures and 8 hours of seminars in the MT. A 2-hour essay workshop in week 11 of MT. 2 hours of lectures in the ST.

It is intended to run a small number of additional lectures with invited speakers who are centrally involved at a senior level in the setting, enforcement and convergence of international accounting regulations. Further details will be provided at the start of the session.

Formative coursework: Students are required to write a 7,500-8,000 word assessed long essay (word limit includes bibliography), to be submitted after the Christmas break. This written work forms 100% of the assessment. Individual feedback will be given on long essay outlines and chapters. Further, a workshop will be held in preparation for the essay assignment. Essay relevant readings, exercises and case studies are set for class discussion each week.

Indicative reading: Detailed reading lists will be given out at the start of the session, and are largely based on academic journal articles. Other readings include policy briefings, regulatory documents, green and white papers, World Bank reports (ROSC). Relevant books: Camfferman and Zeff, *Aiming for Global Accounting Standards, 2001-2011* (Oxford University Press, 2015); Botzem, *The Politics of Accounting Regulation* (Edward Elgar, 2012); Chapman, Cooper & Miller, *Accounting, Organizations and Institutions* (Oxford University Press, 2009); Djelic & Quack, *Transnational Communities: Shaping Global Economic Governance* (Cambridge University Press, 2010); Bowden & Seabrooke, *Global Standards of Market Civilization* (Routledge, 2006); Doupnik, *International Accounting* (McGraw-Hill, 2014); Nobes & Parker, *Comparative International Accounting* (Prentice Hall, 2012); Walter, *Governing Finance: East Asia's Adoption of International Standards* (Cornell University Press, 2008).

Assessment: Essay (100%, 7,500-8,000 words) in LT.

The 8,000 words include the bibliography.

AC471 Half Unit

Accounting in the Global Economy (MSc Management [IMEX route] only)

This information is for the 2015/16 session.

Teacher responsible: Dr Andrea Mennicken OLD 3.12

Availability: This course is available on the MSc in International Management. This course is not available as an outside option.

Pre-requisites: There are no specific pre-requisites and the course

AC490 Half Unit

Management Accounting, Decisions and Control

This information is for the 2015/16 session.

Teacher responsible: Prof Alnoor Bhimani OLD 3.08

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Economics and Management, MSc in Law and Accounting, MSc in Management, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Public Management and Governance and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This introductory course may also be taken by MSc students who have not previously studied accounting subjects. Students in the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC491. This course cannot be taken concurrently with **AC415 Management Accounting for Decision Making**. The course is capped at 115 students.

Course content: Enterprises must today tackle markets that are affected by global economic and social forces and the extensive advances in internet-based technologies. They must seek success in the face of intense competition including the ever more sophisticated corporate strategies of their competitors. At the same time, the interface between business decisions and management accounting is regarded as becoming more complex and a more significant determinant of high corporate performance. This course provides students with an introduction to issues of accounting information and cost management, managerial decision making and performance measurement. It discusses also the interface between management accounting and technology, corporate strategy, e-business and marketing.

The course will cover:

- established managerial accounting concepts such as cost-volume-profit relationships, overhead cost allocations, activity based costing, the balanced scorecard, target cost management and quality costing;
- the implications for accounting of flexible organisational technologies such as just-in-time systems, enterprise resource planning, computer integrated system and collaborative manufacturing;
- operational, marketing and corporate strategy issues including cost management, e-business and internet-based business models;
- organisational arrangements such as functional and multidivisional firms as well as strategic alliances, joint ventures and virtual enterprises;
- comparative international management accounting systems;
- accounting controls and organisational designs including responsibility centres, financial performance measurements, variance analysis, and incentives;
- strategic accounting tools and practices.

The course will provide participants with:

- an understanding of strategic, market and technological links to management accounting and control practices;
- the ability to apply cutting edge management accounting techniques within competitive business environments;
- a knowledge of interrelationships between behavioural, organisational and cultural issues and management accounting systems.

Teaching: 20 hours of lectures and 9 hours of seminars in the LT. There will be a reading week in week 6 of LT. A 2-hour revision lecture will be held in ST or extra office hours will be held.

Formative coursework: Students are expected to produce several pieces of written work, including accounting exercises, analyses of case studies, and essays. At least two pieces of written work will be collected for feedback during the course. Students are also required to participate actively in a variety of discussions and debates as part of the class activities.

Indicative reading: A detailed reading list will be given out at the start of the course. Illustrative references include: Bhimani A, Strategic Finance, Strategy Press, 2013; Bhimani A, and Bromwich M, Management Accounting: Retrospect and Prospect, Elsevier/CIMA, 2010.

Assessment: Exam (100%, duration: 2 hours and 15 minutes) in the main exam period.

The first 15 minutes will be reading time.

AC491 Half Unit

Financial Accounting, Reporting and Disclosure

This information is for the 2015/16 session.

Teacher responsible: Mr Marcus Witzky OLD 3.34 and Prof Bjorn Jorgensen OLD 2.17

Availability: This course is compulsory on the MSc in Accounting, Organisations and Institutions. This course is available on the Diploma in Accounting and Finance, MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Law and Accounting, MSc in Management, MSc in Management Science (Operational Research) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course may also be taken by MSc students who have not previously studied accounting subjects to a significant extent. Students on the MSc Accounting and Finance programme are not permitted to enrol in this course or in AC490. This course cannot be taken in conjunction with **AC414 Financial Reporting, Capital Markets and Business Combinations** or **AC420 Financial Reporting in Capital Markets**.

The course is capped at 115 students.

Course content: This course provides students with an introduction to financial accounting, and highlights aspects of reporting that are important to users of financial information. The course covers the preparation of key financial statements and the frameworks of accounting regulation. The course will also cover accounting issues related to depreciation, goodwill, intangible assets, equity, debt, leases, deferred taxes, and consolidation. Students will be introduced to financial statement analysis and research on the use of accounting information in financial markets.

Teaching: 20 hours of lectures and 8 hours of seminars in the MT. There will be a reading week in week 6 of MT. 2 hours of lectures in ST.

Formative coursework: Students are expected to produce several pieces of written work, including accounting exercises and essays.

Indicative reading: A detailed reading list will be made available at the start of the course. Illustrative texts: Tracy and Tracy. How to Read a Financial Report. 8th edn, Wiley, 2014. Weetman P, Financial Accounting: an Introduction, 6th edn, Prentice Hall, 2013.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Students answer four questions (one compulsory question; two from four questions; and one out of two essay questions).

AC499

Dissertation

This information is for the 2015/16 session.

Teacher responsible: Prof Ane Miren Tamayo OLD 5.05

Availability: This course is available on the MSc in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will normally elect to take this as an option in paper 3

or 4. Permission to select the long essay option must be obtained from the Programme Director by the end of the third week of MT. Students wishing to select this option must first identify and secure agreement from a member of faculty who is willing to provide supervision for the dissertation. Approval for this option will not be granted if such an agreement is not obtained from an academic staff member.

Course content: The dissertation usually consists of an empirical investigation of a selected problem. Occasionally, the dissertation may consist of a survey and critical evaluation of the relevant literature.

The dissertation must identify relevant issues, sustain reasoned argument, and draw supportable conclusions. It must be arranged in an organised manner and include a full bibliography.

Teaching: There is no teaching associated with the dissertation, but students who select this option are encouraged to attend the dissertation workshop sessions organised by the Teaching and Learning Centre.

Arrangements for supervision

Students writing a dissertation will be supervised by a member of faculty who will not necessarily be their academic supervisor. Students are responsible for identifying an appropriate member of staff to supervise their dissertation essay, and for ensuring the member of staff agrees to provide supervision. As a general rule, supervisors of dissertations will not comment on the work after a discussion of the first draft.

Assessment: Dissertation (100%, 10000 words) in the ST. Two typewritten copies of the dissertation must be submitted to the MSc Programme Manager, due by 31 May. The dissertation should be double-spaced, on A4 paper, with a maximum word limit of 10,000 words, not including Appendices. Mark penalties will apply if the word limit is exceeded.

AN402

The Anthropology of Religion

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12 and Dr Michael Scott OLD 6.16

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers selected topics in the anthropology of religion, focusing upon relevant theoretical debates. In the Michaelmas term, the focus will also be on understanding through specific ethnographic and empirical case-studies, the ways in which lived religious practice, and the understanding of religion, get constituted inside and outside 'Western' and modern contexts. We will also pay attention to cases in which (as in all post-colonial settings, and in relation to so-called fundamentalisms) 'Western' and the 'non-Western' definitions are emerging in interplay with each other, including their relation to understandings of modernity and the secular. Some classic topics in the anthropology of religion are also considered, such as ritual, belief, and sacrifice. In the Lent term, we will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of 'religion' in relation to 'science'; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

10 hours of lectures and 10 hours of seminars in the LT.

Indicative reading: H. H. Gerth and C. Wright Mills (eds.) 1946 (and later editions), *From Max Weber: essays in sociology*; E. Durkheim 1915 (and later editions), *The elementary forms of the religious life*; S. Mahmood 2005, *Politics of Piety*; J. Milbank 1990, *Theology and Social Theory*; T. Masuzawa 2005, *The Invention of World Religions*; R.A. Orsi (ed.) 2012, *The Cambridge Companion to Religious Studies*; C. Taylor 2007, *A Secular Age*; B Latour 2009 *The modern cult of the factish god*; H Hubert and M Mauss 1960 *On Sacrifice*; A. Abramson and M. Holbraad (eds.) 2014, *Framing Cosmologies: The Anthropology of Worlds*; G. Bateson and M. C. Bateson 1987, *Angels Fear: Towards an Epistemology of the Sacred*; B. Kapferer (ed.) 2002, *Beyond Rationalism: Rethinking Magic, Witchcraft and Sorcery*; L. Lévy-Bruhl 1926, *How Natives Think*; M. A. Pedersen 2011, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia*; K. Swancutt 2012, *Fortune and the Cursed: The Sliding Scale of Time in Mongolian Divination*; H. Whitehouse and J. Laidlaw (eds.) 2007, *Religion, Anthropology, and Cognitive Science*; R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN404

Anthropology: Theory and Ethnography

This information is for the 2015/16 session.

Teacher responsible: Prof Adam Kuper OLD 6.02 and Prof Deborah James OLD 6.06

Availability: This course is compulsory on the MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective and MSc in Law, Anthropology and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main aim of this course is to examine the relationship between theory and ethnography in modern social and cultural anthropology; the course focuses mainly on the development of anthropology before circa 1970 (with an emphasis on the British School) during the MT, and after that date during the LT. The course starts with the influence on social anthropology of classic social theorists Durkheim, Marx, and Weber. It covers topics such as the origin of the concept of the social sciences as a distinct branch of knowledge, and of key concepts within that paradigm (for instance, 'kinship' or 'religion') functionalism/structural functionalism; methodological individualism; conflict and the critique of functionalism; class consciousness and ideology, ethnic group and social stratification; and 'elective affinities' between cultural predispositions and economic action. The significance of these foundational concepts for an understanding of current anthropology and key stages in its development is also a focus of the course. The second term covers topics which may include structuralism; Sahlins, Ortner and practice theory; theories of culture and interpretive anthropology; postmodernism and ethnographic critique. The precise emphasis and distribution of topics may vary from year to year.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 1 hour of workshops in the ST.

Formative coursework: Formative coursework consists of participation in weekly seminars, and the opportunity to work on formative essays with the student's academic tutor, as per normal departmental arrangements.

Indicative reading: A. Callinicos 2007 *Social Theory*; a historical introduction; A Kuper, 2005, *The Reinvention of Primitive Society*;

transformations of a myth; H L Moore and T Sanders (eds.), 2006, *Anthropology in Theory: Issues in Epistemology*; D Mclellan, 1977, *Karl Marx: Selected Writings*; W Runciman, 1978, *Weber: Selections in Translation*; S Lukes, 1973, *Emile Durkheim: His Life and Work*; B Malinowski, 1922, *Argonauts of the Western Pacific*; EE Evans-Pritchard, 1971, *Nuer Religion*; E Leach, *Political Systems of Highland Burma*; M Gluckman, 1958, *Analysis of a Social Situation in Modern Zululand*; M Sahlins, 1976, *Culture and Practical Reason*; M Bloch, 1983, *Marxism and Anthropology*; C Lévi-Strauss, 1966, *The Savage Mind*; A Kuper, 2000, *Culture: the Anthropologists' Account*; M Sahlins, 2000, *Culture in Practice*; P Bourdieu, *Outline of a Theory of Practice*; C Geertz, 1973, *The Interpretation of Cultures*; D Schneider, 1968, *American Kinship: a cultural account*. Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN405

The Anthropology of Kinship, Sex and Gender

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14 and Dr Catherine Allerton OLD 6.13

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Gender, MSc in Law, Anthropology and Society, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to prepare material for discussion in the seminars. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: Carsten, J. (ed) *Cultures of Relatedness* (2000); Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Fox, R. *Kinship and Marriage* (1967); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN419 Half Unit

The Anthropology of Christianity

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course examines a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars. Students are asked to participate in the fieldwork trip in years when this is available (please note that costs will be kept to a minimum and consideration will be given in any cases of financial hardship). Fieldnotes and other materials will be prepared by fieldtrip participants.

Indicative reading: M Bloch, *From Blessing to Violence*:

History and Ideology in the Circumcision Ritual of the Merina of Madagascar; F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London); W Christian, *Person and God in a Spanish Valley* (reprint 1988); J Comaroff, *Body of Power, Spirit of Resistance*; J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*; R Iletto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*; J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*; M Taussig, *The Devil and Commodity Fetishism in South America*. Detailed reading lists are provided at the beginning of the course.

Assessment: Take home exam (100%) in the ST.

AN420 Half Unit

The Anthropology of Southeast Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Nicholas Long OLD 6.14

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and

MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam).

The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed reframes, the theoretical debates at hand. Upon successful completion of the course, students will be able to:

1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.

6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

Film screenings will also take place throughout the Lent Term.

Formative coursework: Students are expected to prepare material for discussion in the seminars. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Assessment: Take home exam (100%) in the ST.

AN421 Half Unit Not available in 2015/16

The Anthropology of Industrialisation and Industrial Life

This information is for the 2015/16 session.

Teacher responsible: Prof Jonathan Parry A505

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Law, Anthropology and Society, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course deals with anthropological perspectives on the industrialization process, on industrial life and industrial work, examined in relation to relevant theoretical debates and with reference to selected ethnographies. The themes touched on are likely to include the way in which local understandings of modern machine production are laid down on the template of pre-existing cultural assumptions and cosmological ideas; the rural-urban nexus linking neophyte proletarians with peasant villages; the extent to which traditional forms of social structure and inequality are reproduced in the modern factory; the modern factory as an ethnic 'melting-pot' and as an agent of the 'secularization' and 'disenchantment of the world'; shop-floor organization, cultural and organizational factors affecting the intensity of labour, and the extent to which factory production requires new concepts of time and new kinds of work discipline; the social organization of the industrial neighbourhood; gender relations in factory and neighbourhood; the extent to which industrial workers in 'the Third World' represent an 'aristocracy of labour', the contrast between workers in the organised sector and the unorganised sector, and the conditions under which the industrial workforce emerges as a class 'for itself'; trade-union activism; resistance to and collusion with management; local discourses about industrial pollution and environmental degradation.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 2 hours of seminars in the ST.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars.

Indicative reading:

J Nash, *We eat the Mines and the Mines eat us: Dependency and Exploitation in Bolivian Tin Mines* (1979); A Ong, *Spirits of Resistance and Capitalist Discipline: Factory Women in Malaysia* (1987); D Wolf, *Factory Daughters: Gender, Dependency and Rural Industrialization in Java* (1992); S Westwood, *All Day, every Day: Factory and Family in the Making of Women's Lives* (1984); F Zonabend, *The Nuclear Peninsula* (1993); R Chandavarkar, *The Origins of Industrial Capitalism in India: Business Strategies and the Working Classes in Bombay, 1900-40* (1994); M Holmstrom, *South Indian Factory Workers: their Life and their World* (1976); M Holmstrom, *Industry and Inequality: towards a Social Anthropology of Indian Labour* (1984); J Parry, J Bremen & K Kapadia (Eds), *The Worlds of Indian industrial labour* (1999).

Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN424 Half Unit

The Anthropology of Melanesia

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W Scott, OLD 6.16

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.

The three ethnographies, which have all been published within the last two years, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's *Leviathans at the Gold Mine*, a study of the relationship between indigenous landowners and a large international gold mine in their valley in the highlands of New Guinea.

These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today.

Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state. The readings will be supplemented by ethnographic films.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in seminars.

Indicative reading: Christopher Wright, *The Echo of Things: The Lives of Photographs in the Solomon Islands* (2013); Alice Street, *Biomedicine in an Unstable Place: Infrastructure and Personhood in a Papua New Guinean Hospital* (2014); Alex Golub, *Leviathans at the Gold Mine: Creating Indigenous and Corporate Actors in Papua New Guinea* (2014). Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

of economic growth or modernisation) the course shows how anthropological insights have been used to change practices from within as well as critique development from the outside. From anthropological work which seeks pragmatic engagement to that which deconstructs development as an oppressive and power laden discourse, the course aims to give students a broad background to the field. Topics covered include the role of the state, participation and farmer first approaches; gender and development; development as discourse and 'aidnography'; neo liberalism and global capital; corporate social responsibility; markets and micro credit; and the relationship between 'tradition' and modernity. Throughout, the course will draw upon a broad range of ethnographic examples.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the seminars.

Indicative reading: Scott, J. (1998) *Seeing it Like a State: How Certain Schemes to Improve the Human Condition have Failed*; Ferguson, J (1990) *The Anti Politics Machine: depoliticisation and bureaucratic power in Lesotho*; Ferguson, J (1999) *Expectations of Modernity: Myths and Meanings of Life on the Zambian Copperbelt*; Tania Li (2007) *The Will to Improve: Governmentality and the Practice of Politics*; K Gardner, *Discordant Development: Global Capitalism and the Struggle for Connection in Bangladesh* (2012); K Gardner and D Lewis, *Anthropology, Development : Twenty First Century Challenges* (2014); R D Grillo and R L Stirrat, *Discourses of Development: anthropological perspectives*; D Mosse, *Cultivating Development: an ethnography of aid policy and practice* (2004), London, Pluto Press; Cornwall, A., Harrison, E., and Whitehead (2007) *Feminisms in Development: Contestations, Contradictions and Challenges*; Escobar, A. 1995 *Encountering Development*; Mosse, D ed. (2011) *Adventures in Aidland*; Rajak, D. (2011) *In Good Company: An Anatomy of Corporate Social Responsibility*; Karim, L (2011) *Microfinance and its discontents*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN437 Not available in 2015/16

Anthropology of Learning and Cognition

This information is for the 2015/16 session.

Teacher responsible: Prof Rita Astuti OLD 6.11 and Prof Charles Stafford OLD 6.02

Availability: This course is compulsory on the MSc in Social Anthropology (Learning and Cognition). This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will start by examining the contribution that the study of human psychology can make to anthropology. After discussing why anthropologists should pay attention to psychology and why psychologists should pay attention to anthropology, we will examine a range of psychological findings (for example, on infants' knowledge of the physical and mental world) and their relevance to anthropology. Throughout, the course will focus on the relationship between mechanisms of cultural transmission, both informal and institutional, and what anthropologists have called 'culture' and 'society'. We will look at the way universal human capabilities develop and are used during different stages of life to create unique cultural understandings. Topics covered include 'innateness', 'theory of mind', informal and formal education, emotions, expertise, and the nature of different types of beliefs. We will consider how themes of this kind - elaborated in cognitive anthropology and in cognitive science more generally - lead to a reconsideration of classic anthropological concerns, including kinship, religion, politics and economics.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT.

AN436 Half Unit

The Anthropology of Development

This information is for the 2015/16 session.

Teacher responsible: Professor Katy Gardner OLD 5.07

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Health, Community and Development, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores how anthropologists have evaluated, criticised and contributed to development. Focussing on both 'Big D' development (schemes of improvement or projects) and 'little d' development (change which occurs as the result

10 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Indicative reading: M Cole, *Cultural Psychology*; D Holland and N Quinn, *Cultural Models in Language and Thought*; E Hutchins, *Cognition in the Wild*; J Lave, *Cognition in Practice*; M Bloch, *How We Think They Think*; D Sperber, *Explaining Culture*; P Boyer, *Religion explained*; R Astuti, G Solomon and S Carey, *Constraints on Conceptual Development*; M Tomasello, *The Cultural Origins of Human Cognition*.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN439 Half Unit Not available in 2015/16 Anthropology and Human Rights

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Human Rights, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The tension between respect for 'local cultures' and 'universal rights' is a pressing concern within human rights activism. For well over two decades, anthropologists have been increasingly involved in these discussions, working to situate their understandings of cultural relativism within a broader framework of social justice. This course explores the contributions of anthropology to the theoretical and practical concerns of human rights work. The term begins by reading a number of key human rights documents and theoretical texts. These readings are followed by selections in anthropology on the concepts of relativism and culture as well as other key frameworks, such as identity and violence. Students will then be asked to relate their understandings of human rights to the historical and cultural dimensions of particular cases, addressing such questions as the nature of humanity, historical conceptions of the individual, colonialism and imperialism, the limits of relativism, and the relationship between human rights in theory and in practice. Case studies focus on Africa and Latin America.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students are expected to prepare discussion material for seminars

Indicative reading: E Messer, 'Anthropology and Human Rights' *Annual Review of Anthropology* 1993; J Cowan et al (Eds), *Culture and Rights: Anthropological Perspectives*; R Wilson (Ed), *Human Rights, Culture, and Context: Anthropological Perspectives*; T Turner, 'Human Rights, Human Difference: Anthropology's Contribution to an Emancipatory Cultural Politics' *Journal of Anthropological Research* 1997; T Asad, *Formations of the Secular*; P Farmer, 'On Structural Violence', *Current Anthropology* 1999; M Mamdani, *When victims become killers*; C Taylor, *Sacrifice as Terror*; R Menchu, I, *Rigoberta Menchu*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN441 Not available in 2015/16 Anthropological Fieldwork Methods

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W Scott, OLD 6.16

Availability: This course is compulsory on the MSc in Social Anthropology (Research). This course is not available as an outside option.

This course is for MSc Social Anthropology (Research) students

preparing their detailed research proposal prior to embarking on fieldwork and other forms of empirical research.

Course content: The course aims to give you a thorough understanding of what is involved in carrying out ethnographic fieldwork, and what kinds of knowledge it can and cannot generate. It focuses both on the classic fieldwork methods used by anthropologists in the first half of the 20th century, and on more recent methodological developments and techniques that correspond to transformations in the nature of the social. It examines the realities of turning research ideas into realistic plans, in the context of your chosen area of fieldwork. The first half of the course deals with general ethnographic methods. These include participant observation; field notes and the organization of data; visual methods; ethics and anthropological 'codes of ethics'; interviews; written ethnography, ethnographic knowledge, and problems of representation; critical approaches to existing ethnographic texts; place, multi-sited ethnography, the local and the global; research into family, kinship and the genealogical method; archives and how to use documentary material; fieldwork methodology and the research proposal. In the second half of the course, students present drafts of their projects and think through associated methodological and ethical issues.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students are required to write and present a paper in the LT.

Indicative reading: P Caplan (Ed), *The Ethics of Anthropology Debates and Dilemmas* (Routledge, 2003); M Banks and H Morphy (Eds), *Rethinking visual anthropology* (Yale UP, 1999); R Ellen (ed), *Ethnographic Research: a guide to general conduct* (Academic Press, 1985); A Gupta and J Ferguson (Eds), *Culture, Power, Place: explorations in critical anthropology* (Duke University Press, 1997); K Hastrup, 'Getting it right: knowledge and evidence in anthropology'. *Anthropological Theory* 4 (4): 455-72; (2004) M Jackson, *Paths Towards a Clearing* (Indiana UP 1989); L H Malkki and A Cerwonka, *Improvising Theory: process and temporality in ethnographic fieldwork* (Chicago, 2007); G Marcus, *Ethnography Through Thick and Thin* (Princeton, 1998); D Mosse, *Cultivating development: an ethnography of aid policy and practice* (London, 2005); K Narayan, 'How Native is a "Native" Anthropologist?' *American Anthropologist*, 95(3), 1993; P Steven Sangren, 'Rhetoric and the authority of ethnography'. *Current Anthropology*, 29(3), 405-435, 1988; R Sanjek (Ed), *Fieldnotes: the Makings of Anthropology* (Cornell, 1990); Bernard H Russell, *Research Methods in Cultural Anthropology* (Sage, 1990); N Scheper-Hughes, 'The Primacy of the Ethical. Propositions for a Militant Anthropology'. *Current Anthropology* 36(3), 409-420, 1995; ASA Ethical Guidelines <http://www.theasa.org/ethics/guidelines.shtml>

Assessment: Students' progress is monitored throughout the course by the teachers responsible. The work undertaken for this course is expected to feed directly into the preparation of your Research Proposal (AN443): The formal examination of the Proposal constitutes the assessment of the course.

AN442 Supervised Reading Course and Fieldwork Preparation

This information is for the 2015/16 session.

Teacher responsible: Members of staff of the Anthropology Department (students' supervisors).

Availability: This course is compulsory on the MPhil/ PhD in Anthropology, MRes/PhD in Anthropology and MSc in Social Anthropology (Research). This course is not available as an outside option.

Course content: The programme of supervised reading aims to give students a detailed knowledge of the regional ethnographic literature relevant to their proposed research project, as well as providing them with a firm grounding in the theoretical literature

relevant to their research objectives. The programme also aims to aid students in the practical organization of their field research (eg organizing language training, obtaining research permits and academic affiliations) through their supervisors' personal guidance. The programme of supervised reading will be specific to each student. It will be agreed with his/her supervisors at the beginning of the academic year and it will be closely reviewed during the course of the academic year.

Teaching: Students should expect to meet with at least one of their supervisors at 2-3 weekly intervals during term time, and to submit essays relevant to the preparation of their Research Proposal (AN443).

Formative coursework: Students will be required to write essays for their supervisors throughout the academic year.

Assessment: Other (100%).

Students' progress will be monitored by their supervisors through verbal discussion of the submitted written work. The work they undertake for this course is expected to feed directly into the preparation of the Research Proposal (AN443) and will be formally examined through it.

AN443 Research Proposal

This information is for the 2015/16 session.

Teacher responsible: Members of staff of the Anthropology Department

Availability: This course is compulsory on the MRes/PhD in Anthropology and MSc in Social Anthropology (Research). This course is not available as an outside option.

Course content: All students must prepare a formal Research Proposal of 8,000-10,000 words (excluding references) for submission to the Department on or before the deadline in June/August. The proposal is written under the guidance of their supervisors (as set out in AN442), and will normally draw on material studied as part of AN471 Qualitative and Quantitative Methods for Anthropologists and AN472 Evidence and Arguments in Anthropology and Other Social Sciences. It will be expected to demonstrate knowledge of the regional ethnography, and theoretical and methodological literatures, relevant to the proposed research.

Assessment: Research proposal (100%).

AN444 Half Unit Not available in 2015/16 Investigating the Philippines - New Approaches and Ethnographic Contexts

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD6.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to MPhil Anthropology students where recommended by their supervisors, normally as part of the pre-fieldwork preparation year. This course may be taken as an outside option by master's students from other departments, as the regulations permit. It may also be taken by MPhil students from other departments as the regulations permit and with the agreement of the lecturer.

Pre-requisites: Graduates taking this course will normally have taken or be taking a foundational course in anthropology. However, topics may be of interest to those in several disciplines. Exemptions may therefore be sought from the lecturer, e.g. for students external

to the department, who wish to explore what anthropology can bring to bear on their own fields.

Course content: This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of 'native ethnographies' by Filipino scholars resident both in the Philippines themselves and in the US.

The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year) ; Migration, 'mail-order' brides, and the Philippine diaspora ; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and "anitismo"; Tourism, symbolic economies and the impact of international capitalism.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students may be required to prepare discussion material for seminars.

Indicative reading: Detailed reading lists are provided at the beginning of the course, these are a selection: Michell Rosaldo, Knowledge and Passion; Vicente Rafael, Contracting Colonialism; Fenella Cannell, Power and Intimacy in the Christian Philippines; Sally-Ann Ness, Where Asia Smiles; Heather L Claussen, Unconventual Sisterhood; M F Manalansan, yes"> Global Divas: Filipino Gay Men in the Diaspora; Vicente Rafael, White Love and Other Events in Filipino History; Nicole Constable, Maid to order in Hong Kong; Albert Alejo, Generating Energies in Mount Apo.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

Two-hour examination in ST (100%) for MSc students. MPhil/PhD students may be asked to complete an essay on a topic from the course, as advised by their supervisors.

AN447 China in Comparative Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Johannes Steinmuller OLD 5.06A and Prof Stephan Feuchtwang SHF 3.01

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit. Places are limited and priority is given to MSc China in Comparative Perspective students.

Course content: The main object of the course is to help students develop ways of putting the politics, economy and social life of China into a framework in which they can compare and juxtapose it with other major examples. Students will bring whatever theoretical approaches they have already learned and are continuing to learn in the disciplines they bring to the course. They will be expected to demonstrate and explain how they are using them as well as

to listen to other approaches and disciplinary perspectives. The topics for each week are as follows: 1. Introduction; 2. The Imperial Bureaucracy; 3. Great and Little Tradition; 4. Long-term history and political economy comparisons; 5. Economic and demographic transitions; 6. Chinese Religion; 7. Nationalism and the Modern State; 8. Revolution and Maoism; 9. Socialism; 10. Postsocialism; 11. The Countryside; 12. The City; 13. Family and Gender; 14. Property rights; 15. Consumerism; 16. School and ideology; 17. Civil society; 18. The Rule of Law; 19. Democracy and Political Reform; 20. Transnational China.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT. 6 hours of lectures and 4 hours of seminars in the ST.

Formative coursework: Those who have registered for this degree (but not those who take this as a unit in another degree) will attend tutorials in groups of three to five every two weeks, starting in week 2. For these tutorials, students will write four essays, two in Michaelmas Term and two in Lent Term. These essays will not be assessed for the degree.

Indicative reading: Deng, Kent G. 2003. 'Development and its deadlock in imperial China', *Economic Development and Cultural Change* 51:2, pp 479-522. Fei Xiaotong 1992 [1948]. *From the Soil, the Foundations of Chinese Society: A Translation of Fei Xiaotong's Xiangtu Zhongguo*, with an Introduction and Epilogue, transl. Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN449 Half Unit Not available in 2015/16

Ethnography in Relation to Other Research Methods

This information is for the 2015/16 session.

Teacher responsible: Prof Rita Astuti OLD6.11 and Prof Charles Stafford OLD6.02

Availability: This course is compulsory on the MPhil/ PhD in Anthropology and MSc in Social Anthropology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course considers research practices across a range of social and natural sciences in order to explore methodological issues which are specifically relevant to ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different fields. In each section of the course, case-studies taken from different disciplines will be considered in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; philosophy; medical science and epidemiology; history; sociology; economics.

Teaching: 20 hours of seminars in the MT.

Formative coursework: Weekly presentations in seminars from weeks 2-4, for which indicative grades will be given.

Indicative reading: R. Astuti et al, *Constraints on conceptual*

development; J. Henrich et al, *Foundations of human sociality*; R. Lucas, *Lectures on economic growth*; L. Ross and R. Nisbett, *The Person and the Situation: Perspectives of social psychology*; W. Lyons, *Modern philosophy of mind*; R. Rorty, *Objectivity, relativism and truth*; M. Carrithers, *Why humans have cultures*; A. Wolf, *Sexual attraction and childhood association*; G. Davey-Smith, *Health inequalities: life-course approaches*; A. Molho and G.S. Wood (eds), *Imagined Histories: American historians interpret the past*.

Assessment: Presentation (20%), presentation (20%), presentation (20%) and essay (40%, 2500 words) in the MT.

Students make three presentations in seminars (each presentation is worth 20% - 60% in total); an essay of 2,500 words (40%).

AN451 Half Unit

Anthropology of Politics

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09

Availability: This course is available on the MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Comparative Politics, MSc in Development Studies, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the notion of power and its cross-cultural application. Using Marxist, Weberian, and Foucauldian approaches it explores how power travels through different socio-cultural contexts, paying attention to issues such as domination and resistance, patron-client relations, the mafia, revolution and violence. A recurring theme throughout the course concerns the state. How should the state be studied anthropologically? Processes of state formation and disintegration, nationalism in its various guises, and state-society relations will be reviewed in order to understand how European, post-colonial, and post-socialist societies are governed.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will undertake collaborative discussion duties during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

Indicative reading: Anderson, B, 1991 [1983], *Imagined communities: reflections on the origin and spread of nationalism*; Asad, Talal, 1973, *Anthropology and the Colonial Encounter*; Barth, F, 1965, *Political leadership among Swat Pathans*; Blok, Anton, 1988, *The Mafia of a Sicilian Village 1860-1960: a study of violent peasant entrepreneurs*; Evans-Pritchard, EE and Fortes, M, 1940, *African Political Systems*; Evans-Pritchard, EE, The Nuer; Gledhill, John, 1994, *Power and its disguises*; Hansen, T B and Stepputat F (eds), 2001, *States of Imagination: Ethnographic Explorations of the Postcolonial State*; Leach, Edmund, 1954, *The Political Systems of Highland Burma*; Mbembe, A, 2001, *On the Postcolony*; Navaro-Yashin, Yael, 2002, *Faces of the state: secularism and public life in Turkey*; Vincent, J, 2002, *The Anthropology of Politics*.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN455 Half Unit Not available in 2015/16

Statistics and Causal Analysis for Social Anthropologists

This information is for the 2015/16 session.

Teacher responsible: Radu Umbres

Availability: This course is available on the MSc in Social Anthropology (Research). This course is not available as an outside

option.

Course content: This course aims to provide anthropology students with proficiency in using and interpreting quantitative data with readily available software. It is for those new to quantitative analysis, and designed to complement ethnographic methods of analysis. The following areas are addressed: descriptive statistics; hypothesis testing; exploratory statistical data analysis; statistical inference and measures of association. The objectives are to equip students to understand some basic principles of statistical analysis and sampling methods, to apply them appropriately in their own research, to read critically anthropological texts in which these methods are applied or referred to. Particular attention will be paid to the connections between statistical analysis and causal explanation, and the complementary use of quantitative and qualitative methods. Specific statistical tests will be taught, but most emphasis will be placed on understanding the reasoning behind them. Practical work will be based on a range of anthropological data sets with different substantive and technical features, and will include discussion of possible applications to students' own research plans, including the practicalities of data gathering, and hands-on training in the use of Excel and SPSS. Week 1: - Designing field studies and sampling schemes. Week 2: - Designing questionnaires. Week 3: - Processing data; creating spreadsheets, tables and graphs, descriptive statistics. Week 4: - Probabilities and hypothesis testing. Week 5: - Correlation and regression. Week 6: - Reading week, no class. Week 7: - Multiple regression. Week 8: - Univariate measures of group difference, Mann-Whitney U-test, Kruskal-Wallis. Week 9: - Contingency tables and odds ratios. Week 10: - Logistic regression. Week 11: - Final Exam

Teaching: 20 hours of lectures and 20 hours of seminars in the LT. 2 hours of lectures and 2 hours of seminars in the ST. Introductory session MT. Weekly lectures LT, weekly seminars LT. Note that teaching takes place within UCL term times, which may be slightly different from LSE's.

Indicative reading: A. Agresti & B. Finlay, 1997, *Statistical Methods for Social Sciences*; L. Madrigal, 1998, *Statistics for Anthropology*; G. Kalton, 1983, *Introduction to Survey Sampling*; R. Henkel, 1976, *Tests of Significance*; M. Lewis-Beck, 1980, *Applied Regression An Introduction*; C. Achen, 1982, *Interpreting and Using Regression*; J. Gibbons, 1982, *Nonparametric Statistics. An Introduction*; T. Rudas, 1997, *Odds Ratios in the Analysis of Contingency Tables*; D. Knoke and P. Burke, 1980, *Log-Linear Models*; H. R. Bernard, 2006, *Research Methods in Anthropology*; C. Marsh, 1988, *Exploring Data - An Introduction to Data Analysis for Social Scientists*; T. Wonnacott and R. Wonnacott, 1990, *Introductory Statistics*.

Assessment: Continuous assessment (50%) and in class assessment (50%) in the LT.

There will be a practical assignment given each week, which will be due by the next class meeting. Practical assignments (50%) can be worked on during the practical session, and TA assistance will be available during this practical. Answers to each practical will be made available on the Moodle page after each submission deadline (no late submissions accepted). There will be a final examination (50%) during the last class meeting in the form of a series of practical exercises done and submitted in class.

AN456 Half Unit

Anthropology of Economy (1): Production and Exchange

This information is for the 2015/16 session.

Teacher responsible: Dr Gisa Weszkalnys OLD 6.08

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative

Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines 'the economy' as an object of scholarly analysis and a domain of social action. We start by asking how scholars measured, described, modeled, and predicted its behaviour. What forms do economic institutions take cross-culturally? How were these institutions transformed as a result of their incorporation into a wider capitalist markets, state systems, and development initiatives? For example, we will examine the central place of households within capitalist economies, largely overlooked by mainstream economic analyses, and the role that money can play in both dividing and uniting human societies. The course will familiarise students with fundamental aspects of the field and with core concepts used in economic analysis, such as production, consumption, exchange, property, alienation, scarcity, and value. But we will also try to break open the standard frames of the debate by highlighting, for example, the place of nature in the capitalist expansion, and how economic life is not just life in the ordinary. What progress have anthropologists made in understanding fluctuations, booms and busts? What can ethnography tell us about how people cope with crises, individually and collectively, and what the future may hold? Throughout the course, students will become familiar with the key concepts of economic anthropology with reference to selected ethnography and gain a solid understanding of relevant theoretical debates.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will do presentations during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

Indicative reading: J.G. Carrier and D. Miller (1998) *Virtualism: A New Political Economy*. M Sahlins (1974), *Stone Age Economics*; J Parry and M Bloch (Eds) (1989), *Money and the Morality of Exchange*; K. Polanyi (1944) *The Great Transformation*. K Ho (2010) *Liquidated: an Ethnography of Wall Street*. S. Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; E. Shever (2012) *Resources for Reform: Oil and Neoliberalism in Argentina*; C.Hann and K.Hart (2011) *Economic Anthropology: History, Ethnography, Critique*. This is an indicative reading list: detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN457 Half Unit

Anthropology of Economy (2): Development, Transformation and Globalisation

This information is for the 2015/16 session.

Teacher responsible: Dr Laura Bear OLD 6.09

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MRes/PhD in Anthropology, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Law, Anthropology and Society, MSc in Regulation, MSc in Religion in the Contemporary World, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course addresses topics in the anthropology of globalisation. Scholars in a wide range of disciplines have sought to understand the new forms of production, consumption, exchange and financial circulation that have emerged since the

1980s. Some emphasise post-Fordist methods of flexible production and neo-liberal elite projects. Others focus on trans-state processes of globalisation. For other theorists shifts in state policies such as austerity, decentralised planning, public-private partnerships and the deregulation of financial markets are at the centre of analysis. Others address new forms of consumer society, popular desires for social mobility and transnational migration. Drawing from ethnographies and anthropological theory this course equips students to evaluate these arguments. Importantly it also revisits classic topics in economic anthropology from the perspective of present realities — for example production and intimate economies; formal markets in relation to informalised, violent economies; circulation in relation to financial debt and risk; and consumption and consumer citizenship.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will do presentations during seminars for which they will receive formative feedback. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

Indicative reading: J Inda and R Rosaldo (eds), *The Anthropology of Globalisation* (2007); M Edelman and A Haugerud (eds), *The Anthropology of Development and Globalization* (2004); C. Freeman, *High Tech and High Heels in the Global Economy: women, work and pink-collar identities in the Caribbean* (2000); M Mills, *Thai Women and the Global Labour Force: consuming desires, contested selves* (1999); A Wilson, *The Intimate Economies of Bangkok: Tomboys, Tycoons and Avon Ladies in the Global City* (2004); A Aneesh, *Virtual Migration: the Programming of Globalisation* (2004); N Constable, *Migrant Workers in Asia: Distant Divides, Intimate Connections* (2010); M O'Dougherty, *Consumption Intensified: the politics of middle class daily life in Brazil* (2002); J Collier and A Ong, *Global Assemblages: Technology, Politics and Ethics as Anthropological Problems* (2009); A Tsing, *Friction: an Ethnography of Global Connection* (2004); K Hetherington, *Guerilla Auditors: the politics of transparency in Paraguay* (2011); E Shever, *Resources for Reform: oil and neo-liberalism in Argentina* (2011); C Hann, *Life in Debt: Times of Care and Violence in Neo-Liberal Chile* (2012); K Ho, *Liquidated: an Ethnography of Wall Street* (2010).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN458 Half Unit Not available in 2015/16

Children and Youth in Contemporary Ethnography

This information is for the 2015/16 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Law, Anthropology and Society and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: For much of its history, and with some notable exceptions, anthropology has paid little serious attention to children. However, recent years have seen a growing interest in both 'childhood' as a historical and social construction, and in children's engagement with their own social worlds. This course aims to introduce students to emerging ethnographic work on children and youth, in order to explore both its theoretical and methodological challenges. Ethnographic studies will cover a wide range of societies and regions, including anthropological work on children and childhood in the US and UK. The course will begin with an investigation of children's place in anthropology, including early anthropological work on 'Culture and Personality' and 'child socialisation'. The course will then move to consider a variety of topics that have been the focus of recent ethnographic study. These may include: children's play, childhood identities and kinship, education and schooling, youth cultures and globalization,

children's work, street children and children's competencies in contexts of crisis, including war.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 4 hours of film screenings in LT. 1 hour revision session in ST.

Formative coursework: In addition to preparing discussion material for seminars, students will normally write one tutorial essay for the course. Students will be supplied with a mock exam paper.

Indicative reading: R.A. LeVine and R.S. New (eds) 2008.

Anthropology and child development: a cross-cultural reader; N. Scheper-Hughes and C. Sargent (eds) 1998. *Small wars: the cultural politics of childhood*; K.F. Olwig and E. Gullov (eds) 2003. *Children's places: cross-cultural perspectives*. D. Durham & J. Cole (eds) 2006. *Generations and globalization: youth, age and family in the new world economy*; M. Liebel. 2004. *A will of their own: cross cultural perspectives on working children*; V. Amit-Talai and H. Wulff (eds) 1995. *Youth cultures: a cross-cultural perspective*; A. James. 1993. *Childhood identities: self and social relationships in the experience of the child*. A. de Waal and N. Argenti (eds) 2002. *Young Africa: Realising the rights of children and youth*; J. Boyden and J. de Berry (eds) 2004. *Children and youth on the frontline: ethnography, armed conflict and displacement*; Levinson, B, D. Foley & D. Holland. (eds) 1996. *The cultural production of the educated person: critical ethnographies of schooling and local practice*; H. Montgomery. 2009. *An introduction to childhood: anthropological perspectives on children's lives*;

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN459 Half Unit

Anthropology and Media

This information is for the 2015/16 session.

Teacher responsible: Prof Matthew Engelke OLD 6.12

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and USC), MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to anthropological analyses of media, including books and other printed texts, photography, radio, television, film, and the internet. Although 'the anthropology of media' is often understood to be a relatively new subfield, there has been a long-standing interest in media technologies within the discipline. There is also an important manner, from an anthropological point of view, in which 'media technologies' have to be understood not only as these cultural artefacts (radio, film) but also the more elementary senses they express (hearing, sight, etc). We therefore investigate media both as a broad conceptual category and as specific technologies of communication. The course begins with a historical overview of anthropologists' investigations of media technologies, broadly construed. We then move on to consider ethnographic case studies of media in context. Examples may include: photography in India, radio in Zambia, television and cassette circulation in Egypt, mobile phones in Jamaica, book groups in England, and 'indigenous video' in Brazil and Australia. Throughout the course the case studies are framed in relation to some of the key theoretical debates that have shaped media studies in anthropology and related disciplines since the 1930s. Some attention is also given to the methodological problems involved in studying media, especially the extent to which it challenges the possibility of conducting fieldwork by participant observation.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course

to their personal tutors. For non-Anthropology students taking this course, a formative essay will be submitted to the course teacher.

Indicative reading: Domestication of the Savage Mind (J Goody); Imagined Communities (B Anderson); 'The Work of Art in the Age of Mechanical Reproduction' (W Benjamin); Media Worlds (F Ginsburg, L Abu-Lughod, and B Larkin, eds); Understanding Media (M McLuhan); Understanding Media (D Boyer); 'Anthropology and the Mass Media' (D Spitulnik); 'Anthropology and its contributions to studies of Mass Media' (S Dickey); Media Rituals (N Couldry); A Voice: And Nothing More (M Dolar); The Presence of the Word (W Ong).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN466

Understanding Religion in the Contemporary World

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07 and Prof Matthew Engelke OLD 6.12

Availability: This course is compulsory on the MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will consider the distinctive definition and understanding of 'religion' within the social sciences, asking the key question 'what is the object of "religion" for the social sciences?'. The course will introduce students to the classical social science sources on religion (including, but not limited to, Durkheim, Weber and Marx) and the particular problematics which their views on religion imply. There will be discussion of the different traditions of social scientific thinking about religion which flow from these foundational thinkers into current debates. Secondly, the course will focus on a range of empirical and ethnographic case studies, which illustrate some of the diversity of religious practice around the world, and some of the consequences which may flow from adopting particular definitions of what 'religion' is. One underlying theme in the course, will be the need to pay attention to ways in which the category and the domain of religion are redefined, or claimed to be redefined, in modernity, in relation to other domains of life including politics, kinship and economy. The focus will be on understanding through specific ethnographic and empirical materials, the ways in which lived religious practice, and the understanding of religion, may differ radically inside and outside 'Western' and modern contexts. We will also pay attention to cases in which (as in all post-colonial settings, and in relation to so-called fundamentalisms) 'Western' and the 'non-Western' definitions are emerging in interplay with each other. The first term considers key themes and theoretical topics in the anthropology of religion literature in the light of these framings. The second term will include sustained case-studies drawing on current research within the LSE, and comparative thematic discussions. Students have the opportunity to work with their lecturers through lines of analysis and problems in evidence and reasoning drawn from the lecturers' primary research, and to see at first hand how professional anthropologists move towards their conclusions. The second term therefore encourages students to begin to think like research anthropologists themselves, while also consolidating key theoretical and ethnographic bodies of knowledge. There will be a focus on contemporary issues in the study of religion including the organization of religion in a range of different societies, its relationship to broad social change including the rise of modernity/capitalism, global political-economy, and its codification in institutions such as the family, law, gender and the state.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 20 hours of seminars in the LT. 1 hour of lectures in the ST. In LT the format is one two-hour interactive seminar per week.

Formative coursework: Formative coursework will include 1) discussions and presentations during the dedicated seminar and

2) the writing of non-coursework essays which will be discussed in small-group tutorials within the anthropology department as described above.

Indicative reading: H.H. Gerth and C. Wright Mills (eds.) 1946 (and later editions) From Max Weber; essays in sociology; E. Durkheim 1915 (and later editions) The elementary forms of the religious life; E.B. Tylor 1871 (and later editions) Primitive Culture; T. Asad 2003 Formations of the secular: Christianity, Islam, Modernity; M. Lambek 2002 A Reader in the Anthropology of Religion; J. Milbank 1990 Theology and Social Theory; T. Masuzawa 2005 The Invention of World Religions; R.A. Orsi, ed. 2012 The Cambridge Companion to Religious Studies; F. Cannell, ed. 2006 The Anthropology of Christianity; C. Taylor 2007 A Secular Age.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

AN467 Half Unit Not available in 2015/16

The Anthropology of South Asia

This information is for the 2015/16 session.

Teacher responsible: Dr Mukulika Banerjee OLD5.09

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course will aim to address issues of citizenship, inequality, political participation and democratic governance in rural and urban India. The course will cover both classic and current literature and weekly sessions will be organised thematically. We will start by looking at India's place in the world as a democracy and emerging economy and the many paradoxes that the country throws up - alongside some of the highest rates of economic growth, India also has one of the lowest performances on development indicators; despite 40% adult illiteracy, India has among the highest voter turnout rates in the world; despite local institutions having the least power compared to state level or the central government, ordinary people feel most invested in local elections; India remains largely rural yet India will hold the largest urban population in the world in less than ten years...and so on. In order to understand these paradoxes, it is essential that issues of caste and class be examined in some detail, through the anthropological literature produced on these topics over the past 60 years or so. The changing caste dynamics will be examined through everyday practices of discrimination, violence and endogamy as well as institutional innovations of affirmative action for jobs and education. Class relations have also dramatically changed with land reforms in rural India as well as a substantial middle class has emerged in urban India. Economic reforms introduced since the 1990s have altered modes of retail and consumption in both urban and rural India creating new inequalities and entrenching old ones. In the political arena, these changing practices and dynamics have led to a democratic upsurge from below, leading to a greater participation in the electoral process by members of the lower castes and classes of India. All these issues and more will be addressed in this course through the rich corpus of anthropological literature on the subject alongside examples from India's vibrant media and popular culture.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

10 hours of lectures and 10 hours of seminars in MT as well as film screenings (to be scheduled at the start of term). One revision session in ST.

Indicative reading: Please do at least TWO of the following background reading before the start of the course and certainly by the end of the second week of the course.

Sunil Khilnani The Idea of India

Ramachandra Guha India After Gandhi

Katherine Boo Behind The Beautiful Forevers

Amartya Sen The Argumentative Indian

Corbridge, S. and Harris, J. 2000, Reinventing India: Liberalization,

Hindu Politics and Popular Democracy. London: Polity Press
 Fiction: Vikram Seth A Suitable Boy
 Rohinton Mistry A Fine Balance

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN469 Half Unit Not available in 2015/16 The Anthropology of Amazonia

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD6.14

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, myth and colonialism; indigenous social movements; sexuality and gender; cosmology and shamanism; trade and inter-ethnic relations; language and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Ten hours of lectures and ten hours of seminars in the Lent Term. Film screenings will also be held throughout the term.

Formative coursework: Students registered for Anthropology degrees will have the opportunity to prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting formative essays to the course teacher.

Indicative reading: Clastres, Pierre. 1987. *Society Against the State: Essays in Political Anthropology*. Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*. Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*. Descola, Philippe. 1994. *In the Society of Nature: A Native Ecology in Amazonia*. Gow, Peter. 2002. *An Amazonian Myth and its History*. Fisher, William H. 2000. *Rainforest Exchanges: Industry and Community on an Amazonian Frontier*. Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*. Gregor, Thomas. 1985. *Anxious Pleasures: The Sexual Lives of an Amazonian People*. Lévi-Strauss, Claude. 1984. *Tristes Tropiques*. Conklin, Beth. 2001. *Consuming Grief: Compassionate Cannibalism in an Amazonian Society*.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN470 Half Unit Anthropology of Religion: Current Themes and Theories

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W. Scott OLD 6.16

Availability: This course is available on the MSc in Religion in the Contemporary World. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Through readings in contemporary ethnography and theory, this course will explore phenomena and questions classically framed as the anthropology of religion. We will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of 'religion' in relation to 'science'; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Discussions and presentations during seminars.

Indicative reading: A. Abramson and M. Holbraad (eds.) 2014, *Framing Cosmologies: The Anthropology of Worlds*; G. Bateson and M. C. Bateson 1987, *Angels Fear: Towards an Epistemology of the Sacred*; B. Kapferer (ed.) 2002, *Beyond Rationalism: Rethinking Magic, Witchcraft and Sorcery*; L. Lévy-Bruhl 1926, *How Natives Think*; M. A. Pedersen 2011, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia*; K. Swancutt 2012, *Fortune and the Cursed: The Sliding Scale of Time in Mongolian Divination*; H. Whitehouse and J. Laidlaw (eds.) 2007, *Religion, Anthropology, and Cognitive Science*; R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN471 Qualitative and Quantitative Methods for Anthropologists

This information is for the 2015/16 session.

Teacher responsible: Dr Mathijs Pelkmans OLD 5.08

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: The twofold aim of this course is to provide students with insights into the process by which anthropological knowledge is produced, and to train them in the collection and analysis of qualitative and quantitative data. In doing so it offers students a methodological framework for conceptualising and designing their own PhD research projects. The course discusses the nature of ethnographic data and evidence, its implications for research, and ways of incorporating empirical data in ethnographic texts. Special attention is paid to statistical analysis and sampling methods as a means to strengthen and enhance qualitative insights.

Teaching: 40 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Assessment: Essay (25%, 3000 words) and research project (75%) in the MT.

AN472 Evidence and Arguments in Anthropology and Other Social Sciences

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD 5.06B and Prof Matthew Engelke OLD 6.12

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course considers research

practices across a range of social and natural sciences in order to explore methodological issues which are specifically relevant to ethnography. In particular, it focuses on the relationship between evidence and the kinds of inferences and conclusions which are drawn by researchers in different social science fields. In the first half of the course, case-studies taken from different disciplines will be considered in relation to the research practices of ethnographers. The disciplines covered may include: cognitive science & developmental psychology; philosophy; history; quantitative sociology; economics. In the second half of the course, students will present their own draft research proposals to other both in written and oral form, focusing on (1) the questions they hope to explore in their dissertations; (2) the kinds of evidence they will need in order to adequately explore these questions; (3) the methods they will adopt in order to collect this evidence.

Teaching: 40 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Assessment: Essay (25%, 2500 words), presentation (50%) and class participation (25%) in the LT.

AN473 Half Unit Not available in 2015/16 Anthropological Approaches to Value

This information is for the 2015/16 session.

Teacher responsible: Prof David Graeber OLD6.10

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Religion in the Contemporary World and MSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn's "values project", the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we'll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing new light on familiar problems.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students registered for Anthropology degrees may submit formative tutorial essays on the course content and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Graeber, D. (2001) *Toward an Anthropological Theory of Value: The False Coin of Our Own Dreams*. Graeber, D. (2011) *Debt: The First Five Thousand Years*. Godbout, J. & Caillé, A. (1998) *The World of the Gift*. De Angelis, M. (2007) *The Beginning of History: Value Struggles and Global Capitalism*.

Appadurai, A. (2013) *The Future as Cultural Fact: Essays in the Global Condition*.

Turner, T. (1984) "Value, production and exploitation in simple non-capitalist societies"

Munn, N. (1986) *The fame of Gawa: A symbolic study of value transformation in a Massim (Papua New Guinea) society*

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

AN474 Half Unit

Subjectivity and Anthropology

This information is for the 2015/16 session.

Teacher responsible: Dr Harry Walker OLD 5.06B

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: This course will explore the nature and formation of the self and of subjective experience. It will draw together a range of anthropological, psychological and philosophical approaches to subjectivity and the social and cultural phenomena that shape and condition it, attending both to the particulars of individual lives and settings and to more general, existential dimensions of the human condition. The course will be structured around engagements with three principal paradigms: psychoanalysis; phenomenology; and subjectivation. A key aim of the course will be to understand the strengths and limitations of these approaches for anthropological analysis as well as potential sites of convergence and divergence. Specific topics to be covered include the unconscious, dreams, illness and healing, embodiment, sound, intersubjectivity, interpellation, the feminist subject, and altered states of consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Ten hours of lectures and ten hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.

Indicative reading: Hallowell, I. 1955. *Culture and Experience*. Philadelphia: University of Pennsylvania Press. Butler, J. 1997. *The Psychic Life of Power*. Stanford: Stanford University Press. Mahmood, S. 2005. *Politics of Piety: The Islamic Revival and the Feminist Subject*. Princeton: Princeton University Press. Biehl, J. et. al. 2007. *Subjectivity: Ethnographic Investigations*. Berkeley: University of California Press. Ortnor, S. 2006. *Anthropology and Social Theory: Culture, Power, and the Acting Subject*. Durham: Duke University Press. Jackson, M. 1989. *Paths Toward a Clearing: Radical Empiricism and Ethnographic Inquiry*. Bloomington: Indiana University Press. Howes, D. (ed.) 1991. *The Varieties of Sensory Experience*. Toronto: University of Toronto Press. Moore, H. 2007. *The Subject of Anthropology: Gender, Symbolism and Psychoanalysis*. Cambridge: Polity Press. Turner, V. & E. Bruner (eds.) 1986. *The Anthropology of Experience*. Urbana: University of Illinois Press. Wikan, U. 1990. *Managing Turbulent Hearts: A Balinese Formula for Living*. Chicago: University of Chicago Press.

Assessment: Take home exam (90%) in the ST. Class participation (10%) in the MT.

AN475 Half Unit

The Anthropology of Revolution

This information is for the 2015/16 session.

Teacher responsible: Dr Alpa Shah OLD 6.17A

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is available as an outside option to students on other programmes where regulations permit.

Optional for MSc students in Anthropology. Also available to

students on other degree programmes as an outside option.

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist 'People's War' in Nepal. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 4 hours of lectures, 4 hours of seminars and 12 hours of seminars in the MT.

Type MT sessions

Week 1, 4, 7, 10 – one 60 minute lecture followed by a one hour seminar (this is the only part of the course which is shared with UG students)

Week 2, 3, 5, 6, 8, 9 – one two hour seminar-workshop interspersed with lecturing.

Formative coursework: Anthropology students taking this course will submit a tutorial essay for this course to their academic advisers. Non-Anthropology students taking this course will submit a formative essay to the course teacher.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs: Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press. Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press. Pettigrew, Judith. (2013). *Maoists at the Hearth: Everyday Life in Nepal's Civil War*. Philadelphia: University of Pennsylvania Press.

Assessment: Take home exam (90%) in December.

Class participation (10%) in the MT.

Assessment for this course will comprise a 'take-home' exam of up to five questions. Students will be asked to write a 2000-2500 word essay on each of two questions, drawing across the breath of the course.

The take home essay will be worth 90% of the total mark.

10% of marks will be given for general class participation.

AN497

Dissertation: Religion in the Contemporary World

This information is for the 2015/16 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07

Availability: This course is compulsory on the MSc in Religion in the Contemporary World. This course is not available as an outside option.

Pre-requisites: As for the Programme.

Course content: The dissertation will address a topic in the social sciences of Religion in the Contemporary World. This will normally be a library-based dissertation, but may be supplemented by minor original research elements in consultation with the academic adviser. The topic should make central use of concepts in the study of religion in the social sciences drawn from approved courses on the programme, particularly from the core course, and should demonstrate a good understanding of those concepts and their implications. The dissertation may draw on empirical topic areas suggested by the taught core and option courses of this

programme, but must demonstrate an element of originality in analysis, content or both. The dissertation will normally contain an inter-disciplinary element which may be in the combination of material, the combination of critical, analytical or theoretical concepts, or both. Guidance on standards of presentation etc will be given in the MSc handbook, and will conform to the current standard laid down for the dissertations in MSc social anthropology.

Teaching: A small group tutorial in both MT and LT. A dissertation workshop in ST.

Formative coursework: Small group tutorials, individual mentoring, discussion of abstracts: please see Programme Proposal. Presentations and class discussions in all programme courses will also contribute towards the formative preparation for the dissertation.

Assessment: Dissertation (100%, 10000 words) in August. The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies and an electronic copy, with the 5-digit examination number on the front, must be submitted to the Departmental Office in late August.

AN498

Dissertation- MSc China in Comparative Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Johannes Steinmuller OLD.5.06A

Availability: This course is compulsory on the MSc in China in Comparative Perspective. This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant social science literature and empirical material from China and elsewhere. It should elaborate a theoretical framework to compare Chinese and non-Chinese data. The topic should have been discussed with and approved by the academic adviser. Note that the dissertation must be based on published sources rather than primary research undertaken by the student.

Teaching: Students attend a one-hour dissertation workshop at the end of Lent Term. After deciding on a topic during the Lent term, in consultation with their academic advisers (and other members of staff where appropriate), students submit a one-page abstract in the first week of the Summer term. Each student attends a one-on-one dissertation tutorial with his/her academic adviser in the ST. During these, abstracts will be evaluated and commented upon. Students continue to consult their academic advisers during the Summer Term.

Assessment: Dissertation (100%, 10000 words).

The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies must be submitted to the Departmental Office and one electronic copy has to be uploaded to the LSE Moodle system in late August.

AN499

Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Michael W. Scott OLD 6.16

Availability: This course is compulsory on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Social Anthropology and MSc in Social Anthropology (Learning and Cognition). This course is not available as an outside option.

Course content: The dissertation must demonstrate an adequate knowledge of relevant theoretical literature and the ethnography of one or more contexts. It should attempt to consolidate a theme

introduced during the course, developing a sustained research focus on one specific issue in anthropology, using existing ethnographic literature as appropriate. Note that the dissertation must be based on published sources rather than fieldwork undertaken by the student. For the MSc Social Anthropology, the problem should be framed with reference to literature from within the discipline of anthropology (drawn from mainstream journals or ethnographic texts). For the MSc Anthropology and Development and the MSc Anthropology and Development Management, the topic should span the fields of both Social Anthropology and Development Studies - it may cover, but need not be restricted to, the area of overlap, i.e. the anthropology of development as narrowly defined. For the MSc Social Anthropology (Learning and Cognition), the dissertation should draw not only on specifically anthropological literatures and engage with anthropological themes, but also make judicious use of non-anthropological literature from cognitive science, and therefore from related disciplines such as psychology and/or philosophy.

Teaching: 3 hours of workshops in the ST.

After deciding on a topic during the Lent term, in consultation with their tutors (and other members of staff where appropriate), students submit a one-page abstract in the first week of the Summer term. Abstracts are circulated and students attend an AN499 workshop followed by a series of specific workshops for each of the four programmes. During these, abstracts will be evaluated and commented upon. Students continue to consult their tutors during the Summer term.

Assessment: Dissertation (100%, 10000 words) in August. The dissertation must not exceed 10,000 words including text and footnotes (but excluding bibliography and appendices). Three bound copies and an electronic copy, with the 5-digit examination number on the front, must be submitted to the Departmental Office in late August.

DV400

Development: History, Theory and Policy

This information is for the 2015/16 session.

Teacher responsible: Dr Rajesh Venugopal CON.8.09 and Dr Kathleen Meagher CON.7.11

Availability: This course is compulsory on the MSc in Development Studies. This course is available on the MSc in African Development, MSc in Anthropology and Development, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Political Economy of Late Development, MSc in Population and Development and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. During Michaelmas Term the course critically discusses concepts of 'development' and the historical evolution of paradigms of development thinking and policy. Through an examination of comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies and path dependencies and the political economy of growth, poverty and freedom. During Lent Term the course draws on recent research and policy documents to discuss current cutting edge policy issues and challenges in the developing world usually including: the determinant of state resilience and fragility and international responses, demographic change, social policy and poverty; international trade; industrial policy; agriculture and agrarian reform; foreign investment; development aid; governance and democratisation; security and development and environmental sustainability.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

There will be a two hour revision session in late LT or early ST

Formative coursework: One 2,000 word essay with written feedback submitted in Michaelmas Term and at least two seminar presentations on literature (one in Michaelmas and one in Lent).

Indicative reading: The following are recommended basic readings for the course:

A. Kohli, *State-Directed Development: Political Power and Industrialization in the Global Periphery* (Cambridge, 2004)

A Sen, *Development as Freedom* (Anchor, 1999)

HJ Chang, *Kicking Away the Ladder: Development Strategy in Historical Perspective* (Anthem, 2002)

HJ Chang, *Economics: The User's Guide* (Penguin, 2014)

D Rodrik, *One Economics, Many Recipes: Globalization, Institutions, and Economic Growth* (Princeton University Press, 2008)

W Easterly, *The Tyranny of Experts: Economists, Dictators and the Forgotten Rights of the Poor* (Basic Books, 2013)

J.Ferguson, *The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho* (Cambridge, 1990)

M. Jerven, *Poor Numbers: How we are misled about African development statistics and what to do about it* (Cornell, 2013)

Assessment: Exam (80%, duration: 3 hours) in the main exam period.

Essay (20%, 2000 words) in the LT.

DV407 Half Unit

Poverty

This information is for the 2015/16 session.

Teacher responsible: Dr Elliott Green CON.8.07 and Dr Mahvish Shami CON.8.12

Availability: This course is available on the MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Course content: The course is an interdisciplinary analysis of poverty, where the focus is on poverty both as a dependent variable (what causes poverty) and an independent variable (what poverty causes). The course will draw from a variety of disciplines but will pay special attention to the political economy of poverty; however, no prior mathematical or statistical qualification is required.

The topics to be covered begin with an examination into the definition and measurement of poverty. We focus as well on the relationship between poverty and inequality, education, gender and human development, with special attention to the relationship between poverty, violence, and democracy. We also examine the origins of modern famines and whether democratization contributes to poverty reduction. We close with further thoughts on poverty reduction and the Millennium Development Goals.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

Indicative reading: The course has two required purchase books, namely Amartya Sen, *Development as Freedom* (Oxford University Press, 1999) and Abhijit V. Banerjee and Esther Duflo, *Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty* (PublicAffairs/Penguin, 2011). Other texts that will be useful include Sabina Alkire, *Valuing Freedoms: Sen's Capability Approach and Poverty Reduction* (Oxford University Press, 2005); Anirudh Krishna, ed. *Poverty, Participation and Democracy: A Global Perspective* (Cambridge University Press, 2008) and Amartya Sen, *Poverty and*

Famines (Oxford University Press, 1981).

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2000 words) in the ST.

DV410

Research Design and Dissertation in Development Studies, Development Management, African Development and International Development and Humanitarian Emergencies

This information is for the 2015/16 session.

Teacher responsible: Prof Duncan Green CON.8.03

Availability: This course is compulsory on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research) and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: The course combines a dissertation with supporting lectures on research methods and the use of research in development practice. Students will initially submit a dissertation title with a 150-250 word abstract in the first half of Lent Term. They then go on to write a more detailed research proposal towards the dissertation on a topic within Development Studies / Management / IDHE / African Development. This will be conducted under the supervision of a member of the International Development staff, through individual tutorials. The student research proposals will form the basis for discussion and debate in dissertation workshops. The research proposal will identify a key question for investigation, the theoretical and methodological framework to be employed in the work and a justification for why the topic is theoretically and empirically important, with reference to the literature. A tentative outline and preliminary bibliography will be included.

The course lectures aim to equip students to critically use research by learning how to evaluate and critique the quality of research; understanding and appreciating a range of research methodologies, exploring what constitutes analytical rigour and the choice of particular methodologies for particular problems and contexts. Lectures will discuss how different methodologies are used in practice, for example to inform policy and practice, or as the basis for advocacy by NGOs and others.

Faculty and guest lecturers will also introduce a range of new/cutting edge areas in research, including launches of relevant new books and hot topics such as the results agenda, theories of change, the data revolution, or complexity and systems thinking.

Teaching: 40 hours of lectures in the MT. 20 hours of lectures in the LT.

Dissertation workshops / surgeries in MT, LT and ST.

Students will attend individual tutorial sessions with either Academic Advisers or other members of International Development staff, as relevant to the topic, during Michaelmas Term and Lent Term to identify a research topic and to design research proposals. The proposal must be approved by the assigned Academic Adviser. Dissertation preparation will also be addressed in the context of the DV410 lectures. Proposals will be evaluated, commented upon and approved by staff. Students will present their research proposals during dissertation workshops/surgeries in all three terms.

Assessment: Dissertation (100%, 10000 words) in the ST.

Students will submit a research proposal of not more than 2,000 words at the start of ST. This will be evaluated, commented upon and must be approved before proceeding to write the dissertation. Students will submit a dissertation of not more than 10,000 words by midday on the last Thursday in August.

Students will also take tests, which are run electronically. These will be made available in MT. All students are expected to pass these tests. They can be attempted many times. However, they do

not count towards the final mark. They are intended to assist in dissertation preparation.

Students additionally have the option to take an additional half unit that is assessed by a research essay (DV445). Details of the DV445 assessment are explained in the DV445 course guide.

DV411 Half Unit

Population and Development: an Analytical Approach

This information is for the 2015/16 session.

Teacher responsible: Prof Tim Dyson, CON.8.04

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Health, Population and Society, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Social Research Methods, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note that in case of over-subscription to this course priority will be given to students undertaking the MSc in Population and Development and students from the Department of International Development and its joint degrees (where their regulations permit).

Course content: Using the demographic transition as its framework, the course examines different analytic approaches to the main interrelationships between population change and socio-economic development. It draws on a variety of theoretical and historical experiences to address and explore these interconnections. It aims to provide balance between theoretical understanding, knowledge of empirical evidence and basic causal processes, and implications for policy.

The course begins by providing an overview of the world's current demographic situation at both the global and the regional levels. It then addresses Malthusian and anti-Malthusian perspectives on the basic relationships linking population growth and economic growth. These contrasting perspectives are considered in the context of both historical and contemporary experience. The course then proceeds to assess demographic transition theories and their relationships to theories and processes of economic development, urbanisation and socio-structural change. Urban growth, migration, and urbanization receive special attention. The implications of population change for issues of employment, savings and investment are considered, as are issues relating to energy, food production and security, carbon emissions and climate change. Contemporary neo-Malthusian arguments, with their environmental components are also considered, as are issues relating to women's empowerment, democratization and population aging. Further details will be provided at the start of the session.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be given the opportunity to undertake a 'mock examination' essay. This will be graded and accompanied by written feedback within two weeks of its submission.

Indicative reading: A detailed reading list will be provided. However, relevant readings include: T Dyson Population and Development - The Demographic Transition, Zed Books 2010; T Dyson 'A partial theory of world development: The neglected role of the demographic transition in shaping modern society' in International Journal of Population Geography, 7, 2001; N. Birdsall, A C Kelley and S Sinding (eds) Population Matters: Demographic change, Economic Growth, and Poverty in the Developing World, Oxford University Press 2001; M Livi-Bacci A Concise History of World Population, Blackwell Publishers, Oxford 2001; T Dyson,

Population and Food: Global Trends and Future Prospects, Routledge, 1996; R H Cassen (Ed), Population and Development: Old Debates, New Conclusions, Overseas Development Council, Washington DC, 1994; World Bank, Population Change and Economic Development, Washington DC, 1985. and various contributions to G. McNicoll, J. Bongaarts and E. P. Churchill (eds.) Population and Public Policy : Essays in Honor of Paul Demeny - Supplement to Population and Development Review 38 (2012) which is available open access.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

DV413 Half Unit Not available in 2015/16 Environmental Problems and Development Interventions

This information is for the 2015/16 session.

Teacher responsible: Dr Andreas Scheba

Availability: This course is available on the MPA in International Development, MSc in Accounting, Organisations and Institutions, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Population and Development, MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit). This course is capped at 60 students.

Pre-requisites: There will be a ninety minute revision session in late LT or early ST.

Course content: This course is for MSc students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions. The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. To begin with, the course considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in development contexts, adaptation to population growth and resource scarcity; gender and environment; and vulnerability to 'natural' hazards. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global environmental policy).

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1 essay in the ST.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. Students are not advised to buy a single textbook for this course but to read selectively and critically from

various sources. The following books might be useful introductions. Adams, W.M. 2009 Green Development: environment and sustainability in a developing world. 3rd ed. London: Routledge. Forsyth, T. 2003. Critical Political Ecology: the politics of environmental science, London, Routledge. Jones, S. and Carswell, G. 2004. The Earthscan reader in environment, development and rural livelihoods. London ; Sterling, VA : Earthscan. Neumann, R. 2005. Making Political Ecology, London: Hodder Arnold. Robbins, P. Political ecology: a critical introduction, Blackwell. Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S. (eds.) 2002 The Drama of the Commons: Understanding Common Pool Resource Management. Washington, D.C.: National Academy Press. L Schipper and I Burton (eds) The Earthscan Reader on Adaptation to Climate Change, Earthscan, 2008.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words) in the LT.

DV415 Half Unit Not available in 2015/16 Global Environmental Governance

This information is for the 2015/16 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MPA in International Development, MSc in Accounting, Organisations and Institutions, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit). This course is capped at 45 students.

Course content: This course is for any MSc student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. Some of this draws upon debates within International Relations, but this course also considers literatures from other forms of environmental politics that consider the formulation, deliberation, and implementation at the sub-state level, and beyond the scope of formal treaties. Indeed, some of the most difficult political problems arise when trying to implement global policy at the sub-state scale, such as the clashes between local forest users in developing countries and international actors implementing 'global' climate and biodiversity policies.

To make the course focused, it will consider the three main topics of anthropocentric climate change, biodiversity, and the global regulation of forests. In addition, these topics will be analysed from the perspective of the role of states and inter-state agreements; business actors and non-governmental organisations (NGOs); the regulation of trade; and the evolution of financial assistance, including from the World Bank.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 1

essay in the LT.

Indicative reading: There is no single textbook for this course, but we recommend the following as a basic reading list:

Betsill, M. and Corell, E. (eds) *NGO Diplomacy: The Influence of Nongovernmental Organizations in International Environmental Negotiations*, MIT Press, 2007
 Biermann, F, Pattberg, P. and Zelli, F. (eds) *Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation*, Cambridge University Press, 2010
 Bulkeley, H. and Newell, P. *Governing Climate Change*, Routledge, 2010. Chasek, Pamela S., David L. Downie, and Janet Welsh Brown. *Global Environmental Politics*, 4th Edition. Boulder: Westview Press, 2006. Dauvergne, P. (ed) (2005) *Handbook of global environmental politics*, Elgar. Forsyth, T. (2003) *Critical Political Ecology*, Chapter 7. Goldman, M. (2005) *Imperial nature: the World Bank and struggles for social justice in the age of globalization*. New Haven: Yale University Press. Humphreys D. Logjam: Deforestation and the Crisis of Global Governance, Earthscan, 2009
 Jasanoff and Marybeth Long Martello (eds) (2004) *Earthly politics: local and global in environmental governance*, Cambridge, Mass: MIT Press. Malone, E. (2009) *Debating Climate Change: Pathways through Argument to Agreement*, London: Earthscan. Miller, C. and Edwards, P. (eds) (2001) *Changing the atmosphere: expert knowledge and environmental governance*. Cambridge, Mass.: MIT Press. Newell, P. and Paterson, M. (2010) *Climate capitalism : global warming and the transformation of the global economy*, Cambridge Uni Press. O'Neill, K. (2009) *The environment and international relations*, Cambridge Uni Press.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words) in the ST.

DV418 Half Unit African Development

This information is for the 2015/16 session.

Teacher responsible: Prof Thandika Mkandawire CON. H802

Availability: This course is compulsory on the MSc in African Development. This course is available on the MPA in International Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Population and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

Course content: The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social social protection, cash transfers, Millennium Development Goals, horizontal inequality and conflict.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will write a 2,000 word essay chosen from class questions and in discussion with the course leader, to be submitted by the beginning of week 6 of Lent Term.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. The following readings provide an introduction to the course:

- 1 Paul Nugent, *Africa Since Independence: A Comparative History*. Basingstoke, Palgrave Macmillan: 2004.
 - 2 Nick Van de Walle, *African Economies and the Politics of Permanent Crisis*. Cambridge: Cambridge University Press, 2001.
 - 3 Robert Bates, *Markets and States in Tropical Africa*. Berkeley: University of California Press, 1981.
 - 4 G. Hyden, *No Shortcuts to Progress: African Development Management in Perspective*. London: Heinemann, 1983.
 - 5 Mahmood Mamdani, *Citizen and Subject: Contemporary Africa and the Legacy of Late Colonialism*. London: James Currey, 1996.
 - 6 C Clapham, *Africa and the International System*. Cambridge: Cambridge University Press, 1996.

- Assessment:** Exam (80%, duration: 2 hours) in the main exam period.
 Essay (20%, 2000 words) in the ST.

DV420 Half Unit Complex Emergencies

This information is for the 2015/16 session.

Teacher responsible: Prof David Keen CON. H715

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc

in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development, MSc in Human Rights, MSc in International Development and Humanitarian Emergencies, MSc in Population and Development, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is not available as an outside option.

Course content: The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will have the opportunity to receive feedback on formative work, in the form of a practice assessed essay.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008). Other texts of interest include David Keen, *Useful Enemies: When Waging Wars is More Important than Winning Them* (Yale University Press, 2012); Stathis Kalyvas, *The Logic of Violence in Civil War* (Cambridge University Press, 2006); David Keen, *Conflict and Collusion in Sierra Leone* (James Currey, 2005); David Keen, *Endless War? Hidden Functions of the 'War on Terror'* (Pluto, 2006); Michael Mann, *The Dark Side of Democracy: Explaining Ethnic Cleansing* (Cambridge University Press, 2005); Amartya Sen, *Poverty and Famines* (Oxford University Press, 1981); Frances Stewart and Valpy Fitzgerald (eds.), *War and Underdevelopment*, Volumes 1 and 2 (Oxford University Press, 2001); and Jeremy Weinstein, *Inside Violence: The Politics of Insurgent Violence* (Cambridge University Press, 2007); Tim Allen, *Trial Justice: The International Criminal Court and the Lord's Resistance Army* (Zed Press, 2006); Chris Dolan, *Social Torture: The Case of Northern Uganda, 1986-2006* (Berghahn, 2009); Zoe Marriage, *Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict* (Hurst and Co., 2006); Christopher Cramer, *Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries* (Hurst and Co., 2006); Mats Berdal and David Malone, *Greed and Grievance: Economic Agendas in Civil Wars* (Lynne Rienner, 2000); Hugo Slim, *Killing Civilians: Method, Madness and Morality in War* (Hurst and Co., 2008).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

DV421 Half Unit Global Health and Development

This information is for the 2015/16 session.

Teacher responsible: Dr Philipa Mladovsky

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Global Health, MSc in Global Politics, MSc in Health, Community and Development, MSc in Health, Population and Society, MSc in International Development and Humanitarian Emergencies, MSc in Population and Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is concerned with inter-relationships between challenges to human health and health systems in the developing world and their socio-economic, cultural, historic and political context. Both the causes of health threats and their consequences are examined. The approach of the course is to

discuss specific (re-)emerging health threats, and to critically assess their determinants and impacts, and policies and interventions to address their spread. A wide range of topics is covered, including: the relationship between health, population and development; the demographic and epidemiological transitions; biological, behavioural, socio-economic, cultural and environmental influences on health outcomes; the causes and consequences of the HIV/AIDS pandemic; Neglected Tropical Diseases (NTDs); non-communicable diseases; mental health; and, local and international health intervention efforts and policies, with a focus on health systems. By the end of the course, students should be able to: understand the complex relationships between health and poverty / inequality in and across low and middle income countries; evaluate multi-disciplinary evidence on a range of global health issues and interventions and apply this evidence to policy analysis and development; and understand how politics, power and moral frameworks influence global health policy.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students are expected to prepare at least one class presentation and submit one essay.

Indicative reading: A detailed weekly reading list will be provided at the first lecture. The readings for this course are from journals and select book chapters in the fields of public health and epidemiology, health systems, public policy, demography, sociology, philosophy, and anthropology among others. Readings will also include case studies of disease control efforts in various countries and reports, papers and articles published by international organizations, think-tanks, and a variety of other sources.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

DV423 Half Unit Not available in 2015/16 Global Political Economy of Development

This information is for the 2015/16 session.

Teacher responsible: Prof Robert Wade CON. H707

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in Management, MSc in Management (CEMS MIM), MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit). The instructors reserve the right to limit enrolment on the course. At the instructors' discretion, enrolment may be denied to any student on the basis of a pre-quiz. The course is capped at 75 students.

Course content: The course examines the political economy of 'North-South' relations, focusing on how changes in international organizations and the international policy framework affect developing countries' economic trajectories and national-level strategies for interaction with the global economy. It covers the performance of the world economy as a whole; international systems of production, trade, and finance; the rules or regimes which govern interaction between economies, states and firms (regimes such as Bretton Woods, and the Post Bretton Woods dollar standard); and several international organizations (such as the World Bank and IMF). Along the way it analyses the major financial/economic crises of 1997-99 and 2007-continuing. In contrast to much writing in International Political Economy, it looks at these things from the perspective of the low and middle-income countries (in the spirit of the Swahili proverb, "Until lions have their own historians tales of hunting will always glorify the hunters"), and

does not take for granted that the G7 states provide a generally benign ("win-win") environment for development in the rest of the world.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of lectures in the ST. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students have the option of writing one essay of 2,000 words.

Indicative reading: Core text: John Ravenhill (ed), *Global Political Economy*, 4th edition, OUP, 2014.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

DV424 Half Unit

International Institutions and Late Development

This information is for the 2015/16 session.

Teacher responsible: Prof Kenneth Shadlen CON.7.08

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies, MSc in Management, MSc in Management (CEMS MIM), MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is not available as an outside option. Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development and its joint degrees (where their regulations permit).

Course content: This course examines the politics of the international economy. We analyze the overarching rules and regulations that structure the international economy, and thereby provide context for development policy; and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in international regimes and organizations, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesizes a variety of explanations of the role that international organizations play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt and finance, public and private. We analyze the politics of debt relief for the poorest and most heavily-indebted countries, where most of the debt is owed to public creditors; and we analyze the politics of debt restructuring for middle-income countries where significant shares of the debt is owed to private/commercial creditors. The course then turns to the politics of international trade, investment, and intellectual property. This cluster of five sessions is organized around a dialogue between multilateral and regional frameworks for integration into the global economy. For this section of the course the World Trade Organization (WTO) serves as our principal point of reference. We examine the emergence of the WTO, both in terms of the substance of the Uruguay Round agreements and as an inter-governmental organization with its own set of procedures for agenda-setting, rule-making, and dispute-settlement. We then examine emerging arrangements for global governance in the areas of foreign investment and intellectual property. Finally, we focus explicitly on the resurgence of new, North-South, bilateral and regional trade agreements, focusing on the implications of such agreements for development and the factors that contribute to their proliferation. In concluding the course we assess alternatives for reforming global multilateral economic organizations, e.g. the World Bank, International Monetary Fund, and WTO. Then, taking a step back and reviewing the term's material from a "birds-eye view," we analyze contrasting trajectories of change in two development regimes, one regarding "industrial transformation" and mobility

in the international division of labour, and another regarding "humanitarianism" and poverty reduction.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 2 hours of lectures in the ST.

There will be a two hour revision session in late LT or early ST.

Formative coursework: Students have an opportunity to submit written work for formative assessment. Details of the exercise will be announced early in the term.

Indicative reading: A detailed reading list is presented at the beginning of term.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Essay (40%, 4000 words) in the ST.

DV428 Half Unit

Managing Humanitarianism

This information is for the 2015/16 session.

Teacher responsible: Dr Stuart Gordon

Availability: This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in Health, Community and Development, MSc in Human Rights, MSc in International Migration and Public Policy, MSc in Political Economy of Late Development, MSc in Population and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.

Please note that in case of over-subscription to this course priority will be given to students from the Department of International Development's MSc Development Management, MSc Development Studies, MSc Development Studies (Research), MSc African Development and then its joint degrees (where their regulations permit).

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, physicians, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention. How humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. Why humanitarian organisations and governments respond to some crises and not to others. It also considers the critique of humanitarian assistance and the ways in which the UN and NGO communities have responded and sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

The course will be taught in the Michaelmas Term and will consist of 10 lectures of 90 minutes. Five to six voice of experience lectures of up to two hours (from 1800 on Mondays or Thursdays depending on speaker availability), and ten seminars of one-and-a-half hours (various days and times). There will be a two hour revision session in

late LT or early ST.

Formative coursework: Students will receive feedback on seminar group presentations and have the option to write a practice essay under take-home exam conditions, not exceeding 2,000 words. Essay topics will relate to seminar discussions and lecture material covered to date. Students will receive an indicative grade and written feedback before the end of the term.

Indicative reading: M. Barnett (2011), *Empire of Humanity: A History of Humanitarianism*, Ithaca: Cornell University Press; M. Barnett, M. Barnett & T. G. Weiss (Eds.), 2008. *Humanitarianism in Question Politics Power and Ethics*, Ithaca: Cornell University Press; De Waal, A. 1997. *Famine Crimes: Politics and the Disaster Relief Industry in Africa*. London: James Currey. G. Loescher (2001) *The UNHCR and World Politics*, Oxford University Press. D. Rieff (2002) *A Bed for the Night: Humanitarianism in Crisis*, Vintage/Random House.

Assessment: Take home exam (100%) in the ST.

The paper will be released via the course Moodle site. Please note that as this is a three-day take-home examination, extensions for disabilities will apply in exceptional circumstances. Students who cannot commit to be available for the exam period may NOT register for this course.

DV429 Half Unit Not available in 2015/16 Global Civil Society

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Kaldor

Availability: This course is compulsory on the MSc in Global Politics (Global Civil Society). This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health, Community and Development, MSc in Human Rights and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Civil society has come to be considered as an essential element of contemporary global politics, taken either as a normative concept linked to the idea of democracy or as a descriptive concept that refers to the activism of NGOs, social movements, and global advocacy networks. This course provides students with the conceptual and empirical background that allows them to critically engage with the complex debate over global civil society and to assess the potential and the challenges of civil society activism in the context of our increasingly globalising world. The first part of the course covers the historical evolution of the concept of civil society and the relevance of different interpretation of civil society to our global age. It will include Enlightenment thinkers such as Hobbes, Locke or Adam Ferguson, the Marxist and Hegelian tradition, ideas drawn from classical Islam, and contemporary ways of understanding the concept especially in the Central European revolutions of 1989 and the Middle Eastern revolutions of 2011. The second part of the course is more practical and covers the characteristics, repertoires and impacts of key global civil society actors, such as NGOs, social movements, nationalist groups, religious movements and global advocacy networks; the relevance of the media and Internet activism; as well as the role of global civil society on key issues such as the economic crisis, the War on Terror and democracy.

Our readings cover key texts on civil society and globalisation, NGOs, social movements, nationalist and religious movements and advocacy networks.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: One non-assessed essay (not more than 1,200 words) during term and at least one presentation.

Indicative reading: A detailed reading list will be presented at the beginning of the term. A basic introductory text is: Kaldor, Mary

(2003) *Global Civil Society: An Answer to War* Cambridge: Polity Press.

Assessment: Exam (40%, duration: 2 hours) in the main exam period.

Essay (60%, 5000 words) in the ST.

The course will be assessed by one 3-5,000-word-essay (60%) due on the first day of Summer Term. The assessed essay can be an extension of the non-assessed one. A two-hour unseen examination in Summer Term (40%).

DV431

Development Management

This information is for the 2015/16 session.

Teacher responsible: Prof Jean-Paul Faguet CON.8.06, Dr Mayling Birney CON.8.14 and Prof Edwin Brett CON.8.12

Availability: This course is compulsory on the MSc in Anthropology and Development Management and MSc in Development Management. This course is available on the MSc in African Development and MSc in Political Science and Political Economy. This course is not available as an outside option.

Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into four parts: (1) Analytical Assumptions, (2) Government and Governance, (3) Private Sector, and (4) Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: 20 hours of lectures, 15 hours of seminars and 4 hours of workshops in the MT. 16 hours of lectures, 12 hours of seminars and 3 hours of workshops in the LT. 3 hours and 30 minutes of lectures in the ST.

There will be an introductory 4 hour workshop on Wednesday afternoon of week 1, 18 two-hour lectures and 18 one-and-a-half hour seminars over the Michaelmas & Lent Terms. There are also special evening sessions specifically on practical and professional aspects of the consultancy projects, and a development policy debate. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise. Students will also take part in and be assessed on the Development Management Project, a live consultancy exercise for real development agencies in consultation with International Development staff. Workshops will be organised to assist student

groups to formulate their proposals and negotiate their projects with their commissioning agencies.

There will be a three and a half hour revision session in late LT or early ST.

Formative coursework: In the Michaelmas Term students are expected to produce one short essay on a topic agreed with an individual tutor.

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) *Reconstructing Development Theory*; Faguet, JP. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press; Chang, H. 2003, *Rethinking development economics*, Anthem Press; London, Intermediate Technology; Kohli, A. 2004 *State-directed development: political power and industrialization in the global periphery*, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, *Problems of democratic transition and consolidation*, Johns Hopkins; Olson, M. 1982 *The rise and decline of nations*, Yale University Press; North, D. 1990. *Institutions, Institutional Change and Economic Performance*. Cambridge University Press. Putnam, R. D. 1993. *Making Democracy Work: Civic Traditions in Modern Italy*. Princeton: Princeton University Press; Rodrik, D. (Ed.). 2003. *In Search of Prosperity: Analytical Narratives on Economic Growth*: Princeton University Press; Sen. A., 1999 *Development as Freedom*. Oxford University Press; Stiglitz, J. 2002 *Globalization and its discontents*, Allen Lane, 2002; World Bank, *World Development Report*, 2004, *Making services work for poor people*, Washington, World Bank.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Project (40%) in the ST.

Students are required to pass the final exam in the main exam period in order to pass the course. A fail in the exam can not be condoned by a pass in other elements of assessment.

DV432 Half Unit

China in Developmental Perspective

This information is for the 2015/16 session.

Teacher responsible: Prof Jude Howell CON. 8.11

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in the so-called Third World, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader debates and theories in development studies.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of

seminars in the LT.

In addition, one introductory seminar session in LT and one essay preparation session in LT.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words

Indicative reading: Harneit-Sievers, A., Marks, S., and Naidu, S., 2010, *Chinese and African perspectives on China in Africa*, Pambazuka Press; Jude Howell, 2003, *Governance in China*. Rowman and Littlefield Inc., Lanham; Ching Kwan Lee, 1998, *Gender and the South China Miracle. Two Worlds of Factory Women*, University of California Press, Berkeley; Hung, Ho-fung (ed) (2009) *China and the Transformation of Global Capitalism*. Baltimore, John Hopkins University Press; Ka Ho Mo and Ray Forrest (eds), 2008, *Changing Governance and Public Policy in East Asia*, Routledge, New York; Martin Ravallion and Chen Shaohua, 2004, *Inequality and Growth in Modern China*, World Bank Development Research Group Poverty Team, Washington D.C.; Theda Skocpol 1994 *Social Revolutions in the Modern World*, Cambridge University Press; Yao Shujie, 2005, *Economic Growth, Income Distribution and Poverty Reduction in Contemporary China*, RoutledgeCurzon, London and New York; Gordon White, Jude Howell and Shang Xiaoyuan, 1996, *In Search of Civil Society. Whyte (ed), 2009, *One Country, Two Societies. Rural/Urban Inequality in China*.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 2500 words) in the ST.

DV433 Half Unit

The Informal Economy and Development

This information is for the 2015/16 session.

Teacher responsible: Dr Kathleen Meagher CON.711

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Contrary to standard development thinking, the informal economy has expanded rather than contracted in the face of liberalisation and globalisation, and now creates more jobs than the formal economy in most developing countries. Accounting for more than 50% of non-agricultural employment across much of the developing world, the informal economy is attracting growing policy attention. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, social exclusion, and governance. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social policy or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries is shaping processes of growth and governance in the global south. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course

include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social policy, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading: 1. Portes, Alejandro, Manuel Castells and Lauren A. Benton, eds. (1989) *The Informal Economy: Studies in Advanced and Less Developed Countries*. Baltimore: John Hopkins University Press.

2. Perry et al. (2007) *Informality: Exit and Exclusion*, World Bank (available on Google Books).

9. Levy, Santiago (2008) *Good Intentions, Bad Outcomes: Social Policy, Informality and Economic Growth in Mexico*. Brookings Institution.

10. Lindell, I. (2010) *Africa's Informal Workers: Collective Agency, Alliances and Transnational Organizing in Urban Africa*. London: Zed Books.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 3000 words) in the ST.

DV434 Half Unit Not available in 2015/16 Human Security

This information is for the 2015/16 session.

Teacher responsible: Prof Mary Kaldor

Availability: This course is available on the MSc in African Development, MSc in Conflict Studies, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Global Politics, MSc in Global Politics (Global Civil Society), MSc in International Development and Humanitarian Emergencies and MSc in International Migration and Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit. No more than 5 students, per academic year, can be accepted from programmes other than the listed programmes. Capped at 30 students, first come, first served in order of priority.

Course content: This inter-disciplinary course will introduce students to the concept of human security. Human security refers to the security of individuals and communities as opposed to the security of the state. It combines physical security and material security; freedom from fear and freedom from want. The course will introduce students to the debates about the concept and its relevance in the contemporary era. It will combine political, military, legal and economic approaches to human security implementation. The course will cover topics including: intellectual foundations and debates over the concept of human security; new and old wars;

persistent conflict; just war thinking and whether it can be applied to human security; international humanitarian law and human rights law; humanitarian intervention and the Responsibility to Protect; international capabilities for human security; counterinsurgency, stabilisation, and statebuilding; transitional justice.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to undertake class essays as well as class presentations. Students will receive feedback on both.

Indicative reading: Mary Kaldor, *New and Old Wars: Organised Violence in a Global Era*, Polity Press, 2006; Shannon Beebe and Mary Kaldor, *The Ultimate Weapon is no Weapon: Human Security and the New Rules of War and Peace*, Public Affairs, 2010; Ruti Teitel, *Humanity's Law*, Oxford University Press, 2011; Marlies Glasius and Mary Kaldor, eds, *A Human Security Doctrine for Europe*, Routledge, 2005; World Development Report 2011: Conflict, Security, and Development, World Bank, 2011; Human Security Report 2005, University of British Columbia, 2005; Human Security Now: Report of the Commission on Human Security, Co-Chairs S Ogata and A Sen, United Nations, 2003; A Human Security Doctrine for Europe: The Barcelona Report of the Study Group on European Security Capabilities, Barcelona, 2004; G. Evans, M. Sahnoun, et al., *The Responsibility to Protect: Final Report of the International Commission on Intervention and State Sovereignty*, Ottawa, 2001; Independent International Commission on Kosovo, *The Kosovo Report*, Oxford University Press, 2001.

Assigned reading will be given for each session.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

DV435 Half Unit African Political Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is compulsory on the MSc in African Development. This course is available on the MPA in International Development, MSc in Development Management, MSc in Development Studies and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state, national economy, development in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and sub-national trajectories and in the political-economic character of different African countries, drawing attention to causes of similarity and difference across and within countries. Students will come away with a better understanding of the economic and social underpinnings of order and conflict in African states.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Optional formative essay due in November.

Indicative reading: David E. Bloom, Jeffrey D. Sachs, Paul Collier, Christopher Udry, "Geography, Demography, and Economic Growth in Africa," *Brookings Papers on Economic Activity*, vol. 1988, n. 2 (1998): 207-295. Benno J. Ndulu, "The Evolution of Global Development Paradigms and their Influence on African Growth [through policy]," in Benno J. Jean-Paul Azam, "The Redistributive State and Conflict in Africa," *Journal of Peace Research* 38/4 (2001): 429-444.

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2500 words) in the LT.

DV442 Half Unit

Key Issues in Development Studies

This information is for the 2015/16 session.

Teacher responsible: Dr Elliott Green and other ID staff

Availability: This course is compulsory on the MSc in African Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research), MSc in Environment and Development, MSc in Political Economy of Late Development, MSc in Population and Development and MSc in Urbanisation and Development. This course is not available as an outside option.

Course content: This course provides an overview of the key issues and debates in international development. It features lectures from leading LSE experts on subjects such as climate change, conflict, poverty, the financial crisis, demography and democratisation, among other topics.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. There will also be visiting speaker lectures each Friday in the Michaelmas Term (10 x 2 hours).

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will give at least one class presentation.

Indicative reading: The following are recommended basic readings for the course: D. Acemoglu and J. Robinson, *Why Nations Fail: The Origins of Power, Prosperity and Poverty* (Profile, 2012). Abhijit Banerjee, Roland Benabou and Dilip Mookherjee, eds, *Understanding Poverty* (Oxford University Press, 2006). A Sen, *Development as Freedom* (Anchor, 1999).

Assessment: Exam (75%, duration: 2 hours) in the main exam period.

Essay (25%, 2000 words) in the LT.

DV445 Half Unit

Research Themes in International Development

This information is for the 2015/16 session.

Teacher responsible: Prof Duncan Green CON.8.03

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in Development Studies (Research) and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

This course is only available to students taking DV410 and is therefore not available as an option for students from other departments. It builds on the weekly lectures/seminars given as a component of DV410.

Course content: DV445 offers ID students the opportunity to work as a research assistant with an ID professor, and prepare a research paper under her or his supervision.

Students will produce a 5,000 word research paper supported by individual tutorials with an allocated member of staff. The DV445 essay must be a clearly distinct piece of work from the DV410 dissertation. However, the DV445 essay can be related to the dissertation topic if it constitutes a discrete piece of work.

Teaching: 40 hours of lectures in the MT. 20 hours of lectures in the LT.

Teaching in lectures and workshops is the same as for DV410.

Individual tutorials with the supervising member of staff.

Formative coursework: The formative assessment will be a 3,000 word draft of the final assignment for discussion with the relevant member of staff.

Indicative reading: Allen T (with Melissa Parker) (2012) "Will mass drug administration eliminate lymphatic filariasis? Evidence from Northern Coastal Tanzania" *Journal of Biosocial Science* <http://journals.cambridge.org/action/displayAbstract?fromPage=online&aid=8700071&fulltextType=RA&fileId=S0021932012000466>

Assessment: Essay (100%, 5000 words) in the ST.

DV446 Half Unit

Technical Change, Paradigm Shifts and Global Development

This information is for the 2015/16 session.

Teacher responsible: Carlota Perez

Availability: This course is available on the MSc in African Development, MSc in Development Management and MSc in Development Studies. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This is an interdisciplinary course aimed at understanding how technical change modifies the windows of opportunity for growth and development, as well as how technology and institutions influence each other. The course will be structured in three parts. Part One: Theory of Technical Change and Paradigm Shifts will provide a set of tools for analysing technology from a social science perspective, connecting neo-Schumpeterian theories of technology and innovation with theories of development. Part Two: Technical Change and Development Opportunities will use that framework to explain why development opportunities are a moving target and why what may have been impossible in a particular period can become possible in another,

thus requiring an evolutionary perspective of development strategies. Part Three: Technology, Paradigm Shifts, Social Institutions and Development Policies will examine the way in which social forces, movements and policies shape and are shaped by technology and the social innovation potential it provides.

Teaching: 15 hours of lectures and 20 hours of seminars in the LT.

Note: part of the teaching and the seminar guidance will be performed by guest professors, Mary Kaldor and Robin Murray

Formative coursework: Reading three or four papers for each lecture and submitting comments as requested in each case. Participating in the exercises and debates proposed in the seminars. Searching for examples in the media of the issues being discussed. Participating in the discussion of their colleagues' exam presentations. Writing an essay during the Lent Term in order to receive comments with a view to improving the final essays. Giving presentations on chosen topics in the seminar sessions and participating in the discussion of colleagues' presentations. While the assessed element of the course is minimal compared to many at LSE, this is a intensive and immersive class, and a high level of engagement and participation is expected of students who take a place.

Indicative reading: Part One

Assessment: Essay (50%, 2500 words) and presentation (50%) in the ST.

DV447 Half Unit

Public Affairs, International Development and Gendered Violence

This information is for the 2015/16 session.

Teacher responsible: Dr Rochelle Burgess

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Development Studies and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Previous study of the social sciences or humanities is preferred.

Course content: The framework for this course will see economic, social and private aspects of development and public policy as reference points to examine silences, biases and analyses of sex and violence against women. We will consider the sexually informed constructions of women's place in the home and in the public sphere, how development and public policy make assumptions about control over women's bodies, and the ways in which such are challenged or reinforced. We will look at war and conflict, humanitarian work and times of 'peace'. We will examine assumptions and judgements about (hetero)-sexuality, sexual control (by the self and by others) and how these have been drawn on by policy-makers and other actors, both in the public and domestic spheres. There will be discussions about the labour market and workplace, education, the household, family, marriage, reproduction and father-/motherhood and health. Violence – both physical and sexual – will be given attention. We will also explore issues relating to identity, religion and culture and power in relation to the grounding of concepts and expectations that infuse not only private life but also the thinking of policy-makers.

Teaching: 15 hours of lectures and 15 hours of classes in the LT. There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be expected to write a short paper of 800-1000 words on the topic on which they will lead a class.

Indicative reading: Bott S, Morrison A, Ellsberg M, (2005)

Preventing and responding to gender-based violence in middle and low-income countries a global review and analysis, World Bank Engels F, (1884) *The Origin of the family, private property, and the state*.

Khalid Hosseini (2007) *A Thousand Splendid Suns*, Bloomsbury or Andre Brink (2012) *Philida*, Harvill Secker

Nussbaum, M (2011) *Creating Capabilities: The Human Development Approach*, Harvard University Press

Sen, A (2000) *Development as Freedom*, Oxford: Oxford paperbacks

Sen, P, (2003) *Successes and Challenges: Understanding the Global Movement to end Violence against Women*, in *Global Civil Society yearbook*, Anheier H, Glasius M, Kaldor M (eds)

Tamale, S. (2011). *African Sexualities, A reader*. Cape Town: Pambazuka Press

Assessment: Exam (80%, duration: 2 hours) in the main exam period.

Essay (20%, 2000 words) in the LT.

DV448 Half Unit

Political Economy of Development I

This information is for the 2015/16 session.

Teacher responsible: Dr Lloyd Gruber CON.6.03

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MSc in Development Studies. This course is available with permission as an outside option to students

on other programmes where regulations permit.

Course content: This half-unit MT course explores why governments and organisations pursue the development policies they do. Whenever experts get together to debate development policy, attention usually focuses on what the relevant actors should be doing: Which policies should the leaders of developing countries be adopting (or discarding) to stimulate growth and reduce poverty? What kinds of strategies should policymakers in the industrialised world be implementing to help poorer countries develop? Much of the time, however, the people who hold positions of power in developing countries do not do what outsiders say they should. Sometimes they choose – and even institutionalize – protectionist, redistributive, and “statist” policies frowned upon by outside analysts, who find them misguided and self-defeating. Students who take this course can expect to acquire a deeper understanding of the forces that can bias political and organisational actors toward development policies whose long-run effects are socially, politically, or economically suboptimal. Students will also be given opportunities to apply these conceptual insights to concrete cases of development management and mis-management. In sum, the course is designed for students who want more experience putting collective action, institutional, and other cutting-edge political economy theories to use in solving current development problems at different levels of government – global, national, and local – and across different sectors of the economy – public, private, and non-profit.

Teaching: 22 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce one practice memo and one practice presentation. A ‘formative’ Development Policy Application (DPA) question will be assigned in the first weeks of the course, and students will be encouraged, although not required, to submit individually-authored policy memos by the beginning of week 3. These memos will be handed back – with comments – shortly thereafter (by the end of week 4 at the very latest).

In addition, practice DPA presentations will be held (and, where possible, videoed) during special sessions arranged in week 3. The members of each DPA group will be given feedback on substance as well as presentational style during their week 3 seminars. Students will be encouraged to attend office hours to receive more individualized feedback.

7 Dani Rodrik, *The Globalization Paradox: Democracy and the Future of the World Economy* (W. W. Norton & Company, 2011).

Assessment: Essay (15%), presentation (15%) and take home exam (70%) in the MT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. A specific – and current – issue of major importance to developing countries will be introduced in the first week of this exercise. Each student will then be asked to prepare an individually-authored essay (policy memo) on the topic. This memo will be worth 15% of the overall course mark.

In the second part of the exercise, students will be randomly assigned into small groups and begin preparing a jointly-delivered oral presentation outlining and defending their group’s preferred policy. These presentations – which will count for an additional 15% of the overall course mark – will take place the following week.

An individually-authored essay (or set of essays) totalling a maximum of 4,000 words will be assigned at the end of the course.

The essay question(s) will ask students to think creatively about the ideas and arguments presented to that point in the course, but will not require any outside research. This component of the assessment will count for 70% of the course mark.

DV449 Half Unit

Political Economy of Development II

This information is for the 2015/16 session.

Teacher responsible: Dr Tasha Fairfield CON.6.02

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MSc in Development Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Building upon the theoretical material and applications introduced in the MT course Political Economy of Development I, this course emphasizes politics on the ground in developing countries. Who gets the policies they want, why, when, and how? Throughout, we will pay close attention to actors, interests, institutions, and power. Understanding the politics of policymaking is critical for development specialists and policy practitioners. Policies recommended by technical experts are not always politically feasible, and progress may require implementing second-best solutions. Moreover, approaches that work in one case may not work in another. Drawing on real-world examples from a range of policy domains including taxation and social spending, we will discuss strategies for enacting pro-development reforms that might otherwise be politically infeasible. The course will also introduce students to key issues in conceptualization and measurement by examining indices and indicators of governance and democracy that are widely used by development practitioners. Upon completing the course, students can expect to (1) be able to critically engage with the key debates in international development, (2) be able to identify political constraints that may impede implementation of pro-development policies, (3) apply collective action, institutional, and other political economy theories to explain ‘real world’ cases of development policy successes and failures, and (4) design strategies that can help make pro-development policies more politically feasible in a given country context.

Teaching: 22 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will receive feedback on formative written assignments and formative presentations in seminars during the first weeks of the term that will prepare them for the assessed DPA at the end of the term.

The two-hour revision session in LT will prepare students for the assessed exam.

Park, PA: Penn State University.

7 Tasha Fairfield. 2013. "Going Where the Money Is: Strategies for Taxing Economic Elites in Unequal Democracies," *World Development* 47 (July), pp. 42-57.

Assessment: Exam (60%, duration: 2 hours) in the main exam period.

Presentation (15%) and other (25%) in the LT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. A specific issue of major importance to developing countries will be introduced early in the term. Students will be assigned into small groups, and each group will pick a country of its choice for the project. The project is assessed through a group-authored policy memo (worth 25%) and an accompanying oral presentation (worth 15%). The DPA will count for 40% of the course mark.

A cumulative, 2-hour final exam will be given in the Summer Term.

The exam will count for 60% of the course mark.

DV450 Half Unit

Bureaucracy and Development

This information is for the 2015/16 session.

Teacher responsible: Dr Adnan Khan 32L4.03A

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies and MSc in Development Studies (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some knowledge of economics, especially microeconomics, at the undergraduate or graduate level is highly desirable. However, some students who may not fulfil these requirements may still be admitted at the Lecturer's discretion provided they can demonstrate that this course is a close fit for them given their background and ambition, and that they will learn the basics of economic theory on their own.

Course content: The first part of the course introduces the scope of government policies and the role of bureaucracy in public provision. It then covers classic issues in personnel economics. It looks at recruitment into civil service and at screening of job applicants with imperfect information. It also covers incentives for candidates to signal ability and to invest in relevant skills. Finally it covers performance evaluation and the design of monetary and non-monetary incentives to elicit good performance.

The second part of the course covers political economy of bureaucratic decision making and accountability. It analyses bureaucratic working using the principal-agent and game-theoretic frameworks. It discusses the necessity of delegation to bureaucrats and the potential problem associated with it, looks at constraints imposed by collective action and credible commitment.

The third part of the course examines evidence based policy formulation and programme evaluation and explores under what conditions policy actors effectively use evidence to inform policy decisions and discusses ways of shifting bureaucratic culture towards pro-development change. It will look at some cases where good evidence is produced, understood and acted upon to shape policy in critical ways, even in environments characterised by limited resources and weak governance.

The final part of the course explores ways of recognising and building on opportunities for policy change.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 individual assignment and 1 group assignment in the MT.

Indicative reading: Relevant chapters from:

Relevant research papers

Assessment: Essay (50%, 3000 words) in the LT.

Project (40%) in the MT.

Class participation (10%).

Individual Assignment (50% of grade): This is a 2,500 to 3,000 words paper that applies the concepts and framework of this course to a specific topic. After approval of topics by week 4, students will submit a draft outline and will receive feedback on it in week 7.

The final paper will be due at the beginning of Lent Term.

Group Assignment (40% of grade): This involves groups of students jointly working on pre-approved topics. This will involve feedback on the work in progress and a final presentation in weeks 9 and 10, followed by submission of a short policy brief (3 pages).

DV451 Half Unit

Money in an Unequal World

This information is for the 2015/16 session.

Teacher responsible: Prof Nigel Dodd S277 and Prof John Hart

Availability: This course is available on the MPA in International Development, MSc in Development Management, MSc in Development Studies and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a single term course consisting of 10 x 3 hours workshops for up to 30 Masters students. The course will introduce students to approaches to money from sociology, anthropology, development studies, geography, political economy and cultural theory. The course extends an ongoing dialogue between the course organizers, an anthropologist and a sociologist, and will draw on major theoretical approaches and historical studies to examine how money operates – its social organization and governance, its production in global and local financial networks. As a measure and symbol of economic inequality, money is both a problem for development and potentially a major part of its solution. Students will therefore investigate how new and alternative forms may help us to rethink and re-organize money and mount a sustained challenge to prevailing economic systems. The lecture-seminars will cover the following topics:

Week One: Capital in the global distribution of wealth

Overview of course: the organization of money and global capitalism; the world's monetary institutions; global, regional, national and local politics of money; world money, national currencies and the future of money.

Week Two: What is money and what do people do with it?

The social functions and meanings of money; special vs. general purpose monies; spheres of exchange; personal vs. impersonal money; earmarking; money and scales of value.

Week Three: The origins of money

Competing theories of the origins of money, barter vs. tribute; money and gift exchange; Simmel's theory of money; the state theory of money.

Week Four: Money as credit/debt

The social, institutional and cultural connections between money, credit and debt; banks and the production of money; money and

the 'debt problem'; money as public debt.

Week Five: The rise and fall of national currencies

The geography and geopolitics of money; history and future of state currency; states, central banks and monetary governance; gold and international money; Bretton Woods and its aftermath; world money.

Week Six: The history and ethnography of finance

The concept of financialization; history of finance and the growth of managed money; finance, securitization and new forms of money (CDOs, derivatives etc.).

Week Seven: Community and complementary currencies

History of monetary reform, 'monetary utopianism' and alternative currencies; theory and history of LETS, Time Banks, labour money, microcredit, etc.

Week Eight: Digital commerce, e-money and mobile money

The digitalization of money; virtual money; history of digital currency; mobile money (M-Pesa); the Bitcoin phenomenon.

Week Nine: The Euro

Globalization and the future of world money; history of European monetary integration and the present crisis; the rationale for currency union and the prospects for other regional unions.

Week Ten: Money in the making of world society

General review. Is a human economy possible? Is money a central means to such an economy or its antithesis?

Teaching: 30 hours of lectures in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Dodd, N (1994) *The Sociology of Money* (Polity)

Dodd, N. (2014) *The Social Life of Money* (Princeton University Press)

Assessment: Essay (100%, 5000 words) in January.

DV453 Half Unit

Humanitarian Consultancy Project

This information is for the 2015/16 session.

Teacher responsible: Dr Rachel Ibreck

Availability: This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in African Development. This course is not available as an outside option.

Course content: This unit is a core course for the MSc IDHE.

Students work on a consultancy report in Michaelmas Term and Lent Terms.

Students will gain practical experience of dealing with current policy issues and best practice in the fields of humanitarian assistance or international development by working on a live consultancy team project for a real client and an historical case study of a major humanitarian emergency. The consultancies are based around an experiential learning format. Students also receive guidance through a series of three workshops in the Michaelmas Term and a supervision process.

Students will be allocated to consultancy teams comprising between three and five people. Students are able to express preferences for particular clients but may not be allocated to one of these. Past project sponsors have included the UK Department of International Development (DFID), the ICRC, MSF, the Disasters and Emergency Committee (DEC), Christian Aid, the UK Stabilisation Unit and NATO.

The consultancy project begins in Michaelmas Term with client

reports due at the end of Lent Term. The client report and final presentation form part of the assessment.

Consultancy Skills Workshops - There will be a series of three skills-oriented lecture and group work sessions (each lasting three hours). Students will also be expected to attend a one-day workshop covering logframes, monitoring and evaluation and other relevant practitioner skills in Michaelmas Term (usually held on the Saturday between weeks 4 and 5).

Academic Component - The individual essay will require students to critically review selected academic literature relevant to their consultancy project.

Teaching: 9 hours of lectures and 6 hours of workshops in the MT.

Formative coursework: Students will contribute to the Group inception, interim and final reports/presentations and will be given feedback and indicative grades for each of these. At the end of Michaelmas Term there is a progress board for each consultancy group.

Indicative reading: John Rowley and Frances Rubin, 'Effective Consultancies in Development and Humanitarian and Humanitarian Programmes' (Oxfam: Oxford: 2006); Michael Bamberger, Jim Rugh and Linda Mabry, 'Real World Evaluation: working Under Budget, Time, Data and Political Constraints' (Sage: London, 2012); Michael Quinn Patton, 'Utilization Focused Evaluation' 4th Edition (Sage: London, 2008); Michael Edwards and Alan Fowler, 'NGO Management' (Earthscan: Oxford, 2002); Eric James 'Managing Humanitarian Relief: An Operational Guide for NGOs' (Practical Action Publishing: Rugby, 2008)

Assessment: Project (75%, 6000 words) and presentation (5%) in the LT.

Essay (20%, 1500 words) in the MT.

Individual 1500 word essay (critical review): (20%) in week 1 of Lent Term

Consultancy group project report (6000-10000 words depending on the client's terms of reference and student group size) (75%), submitted at the end of Lent Term

Consultancy group presentation to clients: (5%) at the end of Lent Term

Final client presentations are at the end of the Lent Term and are scheduled by the students in consultation with academic staff AND the clients. Students should be aware that presentations to clients MAY have to take place during the first week of Easter Vacation.

They will be informed as soon as possible, but should not make any travel plans until presentation dates are confirmed.

DV483 Half Unit

Information Technologies and Socio-Economic Development

This information is for the 2015/16 session.

Teacher responsible: Dr Shirin Madon CON.8.13

Availability: This course is available on the MSc in African Development, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management of Information Systems and Digital Innovation and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This interdisciplinary course is about understanding the role played by Information and Communication Technology (ICT) towards achieving developmental goals. We begin by juxtaposing dominant theoretical assumptions about ICT and socio-economic change with different conceptualisations of development. Using this as a critical frame of reference, during the rest of the course we focus on a variety of current topics including global software outsourcing, e-commerce/ m-commerce, ICT and smallholder agriculture, ICT and education, e-government and telecentres, health informatics, ICT and collective action, ICT and humanitarianism.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a ninety minute revision session in late LT or early ST.

Formative coursework: Students will be invited to submit an abstract of their summative essay for written comments.

Indicative reading: Avgerou, C. (2010) Discourses on ICT and Development, Information Technologies and International Development, 6, 3, pp. 1-18. Brown, A. and Grant, G. (2010) Highlighting the Duality of the ICT and Development Research Agenda, Information Technology for Development, 16, 2, pp. 96-111.

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

Essay (30%, 3000 words) in the ST.

DV490 Half Unit

Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development

This information is for the 2015/16 session.

Teacher responsible: Dr Diana Weinhold

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

A take home quiz will be used to determine entry. Entry onto the course might be limited at the discretion of the instructor.

Course content: This course explores the foundations of applied macroeconomic policy analysis by combining a rigorous introduction to advanced quantitative methods with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, with a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing. Topics including growth theory, institutions and history, economic geography, globalization, balance of payments and financial crises, environmental policy and international finance. Classes in the first half of term will focus on building analytical skills to read, interpret, and critique econometric approaches to causal identification commonly used in the academic development literature. The emphasis will be on developing rigorous intuition rather than technical details; we focus on teaching students from a broad range of backgrounds to understand and critically consume high-level applied research in a sophisticated manner. The seminars in the second half of term give students an opportunity to repeatedly practice and improve their skills by working through problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development. While some background in economics and statistics is helpful, the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.

IMPORTANT: For students without strong skills in economics and statistics DV490 constitutes the foundational prerequisite for DV491 and DV492 in the Lent term. Thus students wishing to most fully develop their skills in analytical policy analysis should plan to take this course in conjunction with either DV491 and/or DV492 or both. Our experience is that the majority of students benefit most from a full academic year of repeated practice and

exposure to the techniques covered to develop their intuition and ability. Furthermore, DV491 and DV492 will cover additional empirical approaches more commonly employed in micro- and public economics, as well as providing an introduction to statistical programming in STATA (coordinated so that students taking both need not face repetition).

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. There will be a two hour revision session in late LT or early ST.

Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, Development Economics (1998) which will serve as the course text, W Easterly, The Quest for Growth;

Assessment: Exam (70%, duration: 2 hours) in the main exam period.

In class assessment (30%) in the MT.

DV491 Half Unit

Economic Development Policy II: Microeconomic Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Sandra Sequeira

Availability: This course is available on the MPA in International Development, MSc in African Development, MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (DV490) or equivalent background in statistics and economics.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future.

The course is structured around four main themes:

- (i) Human Development: including discussions on health policy, education policy and intra-household dynamics
 - (ii) Institutions and Markets: including discussions on labor markets, state capacity for public service delivery and private sector development
 - (iii) Social Networks, Economic History and Cultural Economics: including discussions on the importance of culture, historical developments, social dynamics and migratory movements on development
 - (iv) Behavioral Economics and Development Policy Design: including discussions on the importance of psychology in explaining economic behavior and how it can inform better development policy design
- Through in class discussions, lectures and coursework, students will develop analytical and quantitative skills for the study and practice of international development policy. These skills will enable students to interpret and critique both conceptual arguments and the empirical evidence used in the development economics literature and discourse.

Coursework will include a combination of class discussions with guest lecturers engaged in international development, problem sets, presentations and computer-lab based sessions for students to

explore programming and statistical skills.

Students are strongly encouraged to take DV492, as a highly complementary course that will also apply the empirical methods taught in DV490 to topics in government policy such as redistribution, taxation and social insurance.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

DV492 Half Unit

Economic Development Policy III: Government Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Joana Naritomi CON.6.12

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in African Development, MSc in Anthropology and Development, MSc in

Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to MSc and MPA students from throughout the LSE subject to space constraints; specifically we reserve the right to limit enrolment of students from outside the Department of International Development.

Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: 'DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development' or equivalent.

Course content: This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics.

Coursework will include a combination of class discussions, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills.

Students are strongly encouraged to take DV491, as a highly complementary course that will also apply the empirical methods taught in DV490 to topics in Human Development, Institutions and Markets, Social Networks, Economic History and Cultural Economics, and Behavioural Economics and Development Policy Design.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. There will be a two hour revision session in late LT or early ST.

Formative coursework: Students will be expected to produce 3 exercises and 1 other piece of coursework in the LT.

Indicative reading:

10 Singhal, M. and Luttmer, F.P. 2014. "Tax Morale". *Journal of Economic Perspectives*, 28(4):149-168

Assessment: Exam (70%, duration: 2 hours) in the main exam period. Coursework (30%) in the LT.

The course assessment will be based on a final exam (70%) and problem sets (30%).

DV4B3

MPA Capstone Project

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem

Teaching: 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.

Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.

Indicative reading: Useful preliminary reading: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); Common Causes of Project Failure (London: OGC, 2004); Howard White, *Theory-based Impact Evaluation: Principles and Practice* (3ie, 2011); Curtis Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, 'Dynamics in Groups and Teams: Groups as Complex Action Systems', chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Project (100%, 15000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

- 1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
- 2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
- 3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i)

scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group's work to be submitted individually and separately from the report.

DV4B4

MPA Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

Indicative reading: David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice*, 5th ed. (Prentice Hall, 2010); Lisa Anderson ed., *Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century* (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, *A Primer for Policy Analysis* (Norton, 1978); Anthony E. Boardman et al., *Cost-Benefit Analysis*, 4th ed. (Prentice Hall, 2010); William N. Dunn, *Public Policy Analysis: An Introduction*, 4th ed. (Pearson, 2008); Eugene Bardach, *Practical Guide for Policy Analysis*, 4th ed. (CQ Press, 2011); Alec Fisher, *The Logic of Real Arguments* (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979); Isabel Vogel, *Review of the Use of 'Theory of Change' in International Development* (DfID, 2012); Edward T. Jackson, *Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most* (Journal of Sustainable Finance and Investment, Vol 3, No 2, 95-110, 2013); Catherine Hakim, *Research Design: Strategies and Choices in the Design of Social Policy*, 2nd ed. (Routledge, 2000); Alan Bryman, *Social Research Methods*, 4th ed. (Oxford University Press, 2012); David Partington, *Essential Skills for Management Research* (Sage Publications, 2002); Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008); Christopher Hart, *Doing Your Masters Dissertation* (SAGE Study Skills Series, 2004); Patrick Dunleavy, *Authoring a PhD* (Palgrave Macmillan, 2003)

Assessment: Dissertation (90%, 10000 words) in the ST. Other (10%) in the MT.

- 1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.
- 2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

DV4V8 Half Unit MPA Policy Paper

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA dissertation.

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

Indicative reading: David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice*, 5th ed. (Prentice Hall, 2010); Lisa Anderson, ed., *Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century* (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, *A Primer for Policy Analysis* (Norton, 1978); Anthony E. Boardman et al., *Cost-Benefit Analysis*, 4th ed. (Prentice Hall, 2010); William N. Dunn, *Public Policy Analysis: An Introduction*, 4th ed. (Pearson, 2008); Eugene Bardach, *Practical Guide for Policy Analysis*, 4th ed. (CQ Press, 2011); Alec Fisher, *The Logic of Real Arguments* (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979); Isabel Vogel, *Review of the Use of 'Theory of Change' in International Development* (DfID, 2012); Edward T. Jackson, *Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most* (Journal of Sustainable Finance

and Investment, vol. 3, No. 2, 95-110, 2013); Catherine Hakim, *Research Design: Strategies and Choices in the Design of Social Policy*, 2nd ed. (Routledge, 2000); Alan Bryman, *Social Research Methods*, 4th ed. (Oxford University Press, 2012); David Partington, *Essential Skills for Management Research* (Sage Publications, 2002); Patrick Dunleavy, *Authoring a PhD* (Palgrave Macmillan, 2003).

Assessment: Other (100%) in the ST.

6,000 word policy paper

EC400 Introductory Course in Mathematics and Statistics

This information is for the 2015/16 session.

Teacher responsible: Dr Margaret Bray 32L.4.27, Dr Francesco Nava 32L.3.20, Dr Marcia Schafgans 32L.4.12 and Dr Shengxing Zhang 32L.1.16

Availability: This course is compulsory on the MRes in Economics (Track 1), MRes in Economics (Track 2), MRes/PhD in Finance (Route 1), MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Econometrics and Mathematical Economics (Research), MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics (Research), MSc in Economics and Management, MSc in Economics and Philosophy and MSc in Finance and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this pre-session course is to provide students with the essential mathematical, statistical, economic and econometric background for the core Economics courses of these programmes. The course starts with mathematics revision sessions and progresses to sections covering mathematics for microeconomics, mathematics for macroeconomics, and probability and statistical inferences. MSc Finance and Economics students do not take mathematics for macroeconomics. MSc Management and Economics students attend lectures on literacy in accounting instead of the mathematics for macroeconomics.

Teaching: Approximately 25 hours lectures and 36 hours classes during September.

Indicative reading: Students will be advised of recommended readings in the Summer.

Assessment: Students will be required to complete a set of self-testing exercises during the course. At the end of the course, students on MSc Management and Economics and MSc Finance and Economics are examined on two mathematics modules (revision mathematics and mathematics for microeconomics) and probability and statistical inferences. All other students are examined on mathematics modules (revision mathematics, mathematics for microeconomics and mathematics for macroeconomics), and probability and statistical inferences. Students wishing to continue studying Economics MSc-level courses must achieve an overall grade of 50% in EC400 with no one subject exam less than 40%. Students wishing to study MRes-level courses must achieve an overall grade of 70% with no one subject exam less than 60%.

Application for EC400 must be made to the Department of Economics by the end of June.

EC402 Econometrics

This information is for the 2015/16 session.

Teacher responsible: Dr Vassilis Hajivassiliou 32L.4.23, Prof Danny Quah TW1 10.01A and Prof Mark Schankerman 32L.4.30

Availability: This course is compulsory on the MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Quantitative Economic History. This course is available on the MPA in European

Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPhil/PhD in Accounting and MSc in Economics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed an undergraduate degree or equivalent in Economics and EC400 (Introductory course in Mathematics and Statistics).

Course content: The course aims to present and illustrate the techniques of empirical investigation in economics.

1. Regression models with fixed regressors (simple and multiple). Least squares and other estimation methods. Goodness of fit and hypothesis testing.
2. Regression models with stochastic regressors.
3. Asymptotic Theory and its application to the regression model.
4. The partitioned regression model, multicollinearity, misspecification, omitted and added variables, measurement errors.
5. Heteroskedasticity, Autocorrelation, and Generalized Least Squares.
6. Exogeneity, Endogeneity, and Instrumental Variables.
7. Serial Correlation.
8. Vector Autoregression.
9. Unit roots and cointegration.
10. Estimating causal effects in panel data: Diff-in Diff estimator.
11. Panel data and static models: fixed and random effect estimators, specification tests, measurement error.
12. Panel data and dynamic models: Arellano-Bond estimator, generalized method of moments.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Two marked assignments per term.

Exercises are provided each week and are discussed in classes.

In order to have any chance of completing the course successfully, these exercises must be attempted. Special test exercises will be set at three points during the year. These will be carefully marked and the results made available.

Indicative reading: J Johnston & J diNardo, *Econometric Methods* (4th edn) or W H Greene, *Econometric Analysis* (6th edn), James D. Hamilton, *Time Series Analysis* (1994), J Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2002), J Angrist and J Pischke, *Mostly Harmless Econometrics* (2009)

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC406

Economic Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Daniel Sturm and Dr Thomas Sampson

Availability: This course is compulsory on the MPA in Public and Economic Policy. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Social Policy, MSc in Public Policy and Administration (LSE and Peking University) and MSc in Public Policy and Administration (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to reinforce the ability of students to use statistics and economics to evaluate policy questions. In many ways the course builds on the material covered in Quantitative Approaches and Policy Analysis (EC455) and Micro and Macroeconomics for Public Policy (EC440) and covers similar questions but at greater depth. At the beginning of the first term the course covers the key techniques to evaluate policy in more

detail than in EC455. After this review of key regression techniques, the course covers a wide range of current public policy issues. Each lecture typically gives a brief introduction to a policy issue and then considers one or two recent empirical papers on this question in detail and draws out policy implications.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will complete additional exercises, which will be marked, as formative assessment.

Indicative reading: There is no single textbook for the course. James H. Stock and Mark W. Watson "Introduction to Econometrics", remains a very useful reference. A substantially more advanced reference for background reading is Joshua Angrist and Jorn-Steffen Pischke "Mostly Harmless Econometrics". A full reading list with the readings for each topic will be made available at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC408

Introduction to Quantitative Methods for the MPA Programme

This information is for the 2015/16 session.

Teacher responsible: Dr Gregory Fischer

Availability: This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Also available to other MPhil/PhD students with the agreement of the course tutor.

Course content: An introduction to basic mathematical and statistical concepts for use in MPA courses in economics and quantitative approaches. The course covers the following topics: Statistics: Discrete and continuous random variables, jointly distributed random variables, the Normal distribution, sampling and the Central Limit Theorem, properties of estimators, introduction to hypothesis testing. Mathematics: Linear functions, quadratic, logarithmic and exponential functions, the derivative of a function and rules of differentiation, unconstrained optimization with one variable, functions of several variables and their differentiation, unconstrained optimization with several variables, constrained optimization.

Teaching: The course runs over 8 days, during the two weeks prior to the start of the Michaelmas Term. In total, students will attend ten lectures and six classes during the two weeks of the course.

Indicative reading: Notes covering the course material will be made available at the beginning of the course. Two widely used introductory statistics books that can be used as background reading for the statistics part are Newbold, Carlson and Thorne *Statistics for Business and Economics* (6th edition) and Wonnacott and Wonnacott *Introductory Statistics for Business and Economics* (4th edition). However, there are also many other introductory statistics textbooks that cover the same material.

Two widely used introductory mathematics books that can be used as a background reading for the mathematics part are Ian Jacques *Mathematics for Economics and Business* (5th edition) and Wisniewski's *Introductory Mathematical Methods in Economics* (2nd edition). Also in this case there are a large number of excellent alternative textbooks that cover the same material. Those who want a more advanced treatment of the same material can use Simon and Blume's *Mathematics for Economists*, but this treatment is more formal than what we require for this course. We do not recommend buying a new textbook for this course, if you already own a textbook that covers similar material.

Assessment: Exam (100%, duration: 1 hour) as part of modular teaching.

The course will be assessed with a one hour test at the end of week two. The test result does not count towards the MPA final degree, but will be used in advising students on suitable option course choices.

EC410 Half Unit**Public Economics for Public Policy**

This information is for the 2015/16 session.

Teacher responsible: Dr Johannes Spinnewijn 32L.3.24 and Prof Henrik Kleven 32L.3.16

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have taken EC440 Macro and Microeconomics (for Public Policy) or an equivalent course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

Indicative reading: J Gruber (2011) *Public Finance and Public Policy*, 3rd edition, Worth Publishers. [CC HJ141 G88] [or Gruber (2007), 2nd edition]. N Barr (2012), *The Economics of the Welfare State*, 5th ed., OUP [CC HB99.3 B26]. Institute for Fiscal Studies (2010-2011), 21st Century, Volume 1 (2010): *Dimensions of Tax Design*, Volume 2 (2011): *Tax by Design*. Oxford University Press, Oxford. Available online at: <http://www.ifs.org.uk/mirrleesReview> On developments in public spending in the UK, see H Glennerster (2003), *Understanding the finance of welfare* (Policy Press); or H Glennerster and J Hills (eds) (1998), *The State of Welfare: The economics of social spending* (Oxford) [CC HV245 S79]. Students wishing to review their microeconomic theory should consult a textbook on intermediate microeconomic theory, such as Morgan, Katz and Rosen (2006) *Microeconomics*, McGraw Hill (CC HB172 M84) or J Perloff (2008) *Microeconomics: Theory & applications with calculus*, Pearson (CC HB172 P45). On the structure of taxation in the UK, see IFS (2011) *A Survey of the UK Tax System*, Briefing Note no. 9 (<http://www.ifs.org.uk/bns/bn09.pdf>) and the HM Revenue and Customs website, (<http://www.hmrc.gov.uk>). The Institute for Fiscal Studies is an independent policy research institute and its website (<http://www.ifs.org.uk>) has a wide range of useful publications. The HMRC website includes information on the tax structure and statistics on tax payments (by income group, by type of tax, etc.) and overall revenues raised. The UK Treasury website (<http://www.hm-treasury.gov.uk/>) provides a range of documents on economic policies and the public finances, including the annual publication, *Financial Statement and Budget Report* (the 'Red Book'), published each year on Budget Day. For comparative international fiscal data, information and analysis, useful sources include the International Monetary Fund, IMF (<http://www.imf.org/>), the World Bank (<http://www.worldbank.org/>) and the Organisation for Economic Cooperation and Development, OECD (<http://www.oecd.org>).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC411**Microeconomics**

This information is for the 2015/16 session.

Teacher responsible: Dr Francesco Nava 32L. 3.20 and Prof Martin Pesendorfer 32L. 4.19

Availability: This course is compulsory on the MSc in Finance and Economics. This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics and Philosophy, MSc in Environmental Economics and Climate Change and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems. The first part of the course focuses on classical theories of market behaviour and strategic interaction. We begin by presenting foundations to utility maximization, by analysing the optimisation problems of price-taking consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. We then introduce models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields will be discussed in lectures. The second part of the course focuses on models of imperfect competition and information economics. We begin with an analysis of models of monopoly, oligopoly, product differentiation, and public goods. Then, we study markets with imperfect and incomplete information including search, adverse selection, auctions, signalling, screening, and moral hazard. Special emphasis will be given to economic applications.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term. There will be mock examinations at the start of LT.

Indicative reading: The course will draw on a variety of texts, the main ones being: - J G Riley, *Essential Microeconomics*, Cambridge; - J R Green, A Mas-Colell & M D Whinston, *Microeconomic Theory*, Oxford. More detailed readings will be given at the beginning of the course and some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC413**Macroeconomics**

This information is for the 2015/16 session.

Teacher responsible: Prof Wouter Den Haan 32L.1.08A and Prof Alwyn Young 32L. 2.20

Availability: This course is compulsory on the MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and Philosophy, MSc in Finance and Economics and MSc in Quantitative Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to give a wide-ranging overview of modern macroeconomics.

Economic growth (Michaelmas)

The Michaelmas term of EC413 is an introduction to the techniques needed to critically read and evaluate academic research in economic growth. Topics are facts about growth, the Solow growth model (theory and empirics), the Neoclassical Growth model (growth with dynamic optimization), and endogenous technical change.

Business Cycles (Lent)

The Lent term of EC413 focuses on the main characteristics of business cycle fluctuations with a special emphasis on what happened during the financial crisis and different macroeconomic models to study business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term. Exercises are discussed in each class. There will be a one-and-a-half-hour mock examination at the start of LT.

Indicative reading: Primary reading will be journal articles and a couple chapters from Daron Acemoglu, *Introduction to Modern Economic Growth*. A full list will be available at the start of each term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC421

International Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Swati Dhingra 32L. 2.31, Dr Thomas Sampson 32L. 2.34 and Dr Gianluca Benigno 32L. 1.12

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: A graduate course in international economics consisting of i) the fundamentals of trade theory and its application to policy and ii) international macroeconomics. Trade: Comparative advantage and the gains from trade. Theories of comparative advantage. Factor endowments, the international location of production, and patterns of international trade. Empirical tests of trade models. Trade and the labour market. Intra-industry trade. Firm heterogeneity and selection into trade. Foreign direct investment. General equilibrium trade policy.

International macroeconomics: Intertemporal trade and the current account balance. Dynamics of small open economies. The real exchange rate and the terms of trade. Uncertainty and international financial markets. Monetary model of exchange rate determination: flexible and sticky prices. Introduction to currency crises models.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: A full reading list will be distributed at the beginning of the course. Some important items are: R Feenstra, *Advanced International Trade: Theory and Evidence*, Princeton,

2004; A Dixit & V Norman, *Theory of International Trade*, Cambridge, 1980; E Helpman & P Krugman, *Market Structure and Foreign Trade*, MIT, 1985; M Obstfeld & K Rogoff, *Foundations of International Macroeconomics*, MIT Press, 1996.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC423

Labour Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Esteban Aucejo 32L. 2.30

Prof Jörn-Steffen Pischke 32L.2.16

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: An advanced course in labour economics issues, including theory, evidence and policy. The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, and to provide them with the tools for developing independent research interests. The course has a strong applied focus. For each major topic covered we will derive testable implications, provide insights into the research methodology, discuss the advantages and limitations of existing empirical work, and draw policy conclusions.

Topics include: labour supply, labour demand, market power of firms and workers, wage determination, unemployment, minimum wage, compensating differentials, returns to schooling, discrimination, role of non-cognitive skills in the labour market, and immigration.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the reading is from journal articles. A detailed reading list is available on Moodle.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC424

Monetary Economics

This information is for the 2015/16 session.

Teacher responsible: Dr Keyu Jin 32L.1.17 and Prof Ricardo Reis (room TBC)

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The course aims to develop the student's ability to undertake research in monetary economics by studying a number of current issues both theoretical and applied. In the MT, we study open economy models with nominal rigidity to examine

the impact of monetary and fiscal policies and their transmission across countries. We then study the prorogation of international financial shocks, as well as liquidity traps, forward guidance, and quantitative easing. The third part of the term focuses on basics of asset pricing theory in general equilibrium and models of the yield curve. In the LT, we discuss and answer five questions: (i) How can central banks control inflation? (ii) How can we measure agents' inflation expectations? (iii) Can central banks become insolvent and how can they help during a fiscal crisis? (iv) How does monetary policy affect unemployment and real activity? (v) Why is central bank transparency important and how can policymakers use communication to steer the economy?

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: A reading list will be handed out by the lecturers at the beginning of their sessions.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC426

Public Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Frank Cowell 32L.2.25A, Prof Henrik Kleven 32L.3.16 and Dr Johannes Spinnewijn 32L.3.24

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and Master of Laws. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: A graduate course in (i) the principles of public economics and (ii) selected topics in public economics. Principles of public economics Welfare analysis; concepts of fairness, equity and efficiency; social welfare. Policy design: social insurance, income taxation. Taxation; household and firm behaviour. Public goods, externalities and environmental policy. Behavioural public economics, including implications for welfare analysis and savings policy. Selected topics in public economics such as behavioural responses to taxation; empirical strategies in public economics; poverty, inequality and optimal low-income support; compliance problems; inheritance and wealth taxation; global public finance and fiscal governance; political economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Attention is also drawn to Issues in Taxation Seminar (Dr Leape and Dr Ian Roxan) LL900: eight Monthly, Sessional.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the readings will be in the form of journal articles, but some will also be made of the following texts: A Auerbach & M S Feldstein (Eds), Handbook of Public Economics, Vols I-III, North-Holland; A B Atkinson & J E Stiglitz, Lectures on Public Economics, McGraw-Hill, 1980; G Myles, Public Economics, Cambridge University Press, 1995.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC427

The Economics of Industry

This information is for the 2015/16 session.

Teacher responsible: Prof John Sutton 32L. 4.32 and Dr Pasquale Schiraldi 32L. 4.22

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: A graduate course in Industrial Organization, which aims to provide students with a working knowledge of current theoretical and empirical methods for industry studies. Applications of these methods are considered in industry case studies.

Topics include: Pre-requisites in Game Theory, An introduction to current developments in Oligopoly Theory. A formal analysis of conduct in concentrated industries (cartel stability, limit pricing, predatory pricing, etc), Demand estimation in homogenous and differentiated product industries, Production function estimation, Empirical techniques for oligopoly models and auction markets, Identification of conduct, Economies of Scale, R&D, Advertising, Vertical restraints. The topics will be discussed with detailed applications for selected industries and considering competition policy questions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: Two books which provide a basic framework are J Tirole, Theory of Industrial Organization, MIT Press, 1989 and J Sutton, Technology and Market Structure, MIT Press, 1998. A full reading list will be supplied at the beginning of the course.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC428

Development and Growth

This information is for the 2015/16 session.

Teacher responsible: Prof Robin Burgess 32L.3.03B and Prof Maitreesh Ghatak 32L. 3.08A

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Development Studies, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: This course will cover a number of topics at forefront of development economics. These include current methodological debates; the allocation of capital and labour across firms, space and sectors; structural change during the development process; finance; psychology and development; governance and accountability; conflict and civil war; motivation of civil servants; taxation and development; firms and markets; trade; infrastructure; energy and the environment; and climate change.

Development economics is, arguably, the fastest growing and most vibrant field within economics. The course will enable the students to apply their econometric and theoretical skills to what are some of the world's most pressing problems. The experience of applying their economic knowledge to these topics will generate analytical skills that can be used in a wide variety of applied settings.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course. However, the following references may serve as an introduction to material included in the syllabus. Handbook of Development Economics, Volumes I and II edited by Chenery and Srinivasan, Volume III and IV edited by Behrman and Srinivasan, Amsterdam: North-Holland, 1994; D Ray, Development Economics, Princeton UP, 1998.

Assessment: Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%, 6000 words) in the ST.

EC440

Micro and Macro Economics (for Public Policy)

This information is for the 2015/16 session.

Teacher responsible: Dr Ethan Ilzetzki 32L.1.10

Availability: This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: An introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The first term (MT) covers microeconomics and the second term (LT) covers macroeconomics.

MT: Microeconomics: Demand and Supply in Competitive Markets: Consumer Optimisation: Demand for Goods: Consumer Optimisation and Labor Supply: Firms' Optimisation, the Supply of Goods and the Demand for Labour: Monopoly: Uncertainty and Insurance: Markets and Asymmetric Information: Monopolistic Competition and Game Theory: Externalities in Consumption and Production: Public Goods.

LT: Macroeconomics: Understanding Macroeconomic Data; Long-run Economic Growth; Business cycles; Aggregate Demand; Money, Inflation and Monetary Policy; Stabilization Policy; Fiscal Policy and Government Debt; the Labour Market and Unemployment; Exchange Rates and International Economic Policy; the Financial System and the Macroeconomy.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours) in the main exam period.

Continuous assessment (30%) in the MT and LT.

EC441

Microeconomics for MRes students

This information is for the 2015/16 session.

Teacher responsible: Prof Michele Piccione 32L.4.07 and Prof Balazs Szentes 32L.4.05

Availability: This course is compulsory on the MPhil/PhD in Finance, MRes in Economics (Track 1), MRes in Economics (Track 2), MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.

Pre-requisites: A good undergraduate knowledge of economic theory and calculus is required.

Course content: The aim of the course is to:

- i. introduce the basic analytical tools that are necessary to conduct research in any field in economics.
- ii. give the students a full understanding of the classic Microeconomic Theory and of the modern developments of Microeconomic Theory
- iii. enable students to address a microeconomic problem by structuring it as a mathematical model and enhance the understanding of economic issues through the use of mathematical tools.

Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, economics of information, agency theory, contracts, topics in mechanism design.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Exercises are set for each class. In addition, there will be mock examinations in Lent term week 0 and in Summer term week 1.

Indicative reading: The main text is Mas-Collel, Whinston & Green, Microeconomic Theory, OUP. Other sources include: D Fudenberg & J Tirole, Game Theory, MIT Press; D M Kreps, A Course in Microeconomic Theory, Harvester Wheatsheaf; H R Varian, Microeconomic Analysis (3rd edn), Norton; M J Osborne & A Rubinstein, A Course in Game Theory, MIT Press; G A Jehle & P J Reny, Advanced Microeconomic Theory, Longman.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC442

Macroeconomics for MRes students

This information is for the 2015/16 session.

Teacher responsible: Dr Ethan Ilzetzki 32L.1.10, Prof Per Krusell 32L.1.18 and Dr Shengxing Zhang 32L.1.16

Availability: This course is compulsory on the MRes in Economics (Track 1), MRes in Economics (Track 2) and MRes/PhD in Finance (Route 1). This course is available on the MRes/PhD in Finance (Route 2). This course is not available as an outside option.

Course content: The course will cover topics in advanced macroeconomics with emphasis on fundamentals and applications to recent theoretical advances:

- i. Economic growth: Neoclassical Growth Model, Optimizing Behaviour in dynamic models under certainty, Endogenous Technological Change, Imitation and Convergence, Growth and Development Accounting, Appropriate Technology.
- ii. Search and Matching: The Matching Model, Efficiency Wages, Growth and Unemployment.
- iii. Dynamic Stochastic General Equilibrium Models: Real Business Cycles, applications to models of heterogeneous agents and open economy. Fiscal policy analysis.
- iv. Monetary Economics: models with credit frictions, sticky prices, search.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Exercises are set for each class. In addition, there will be mock examinations in Lent term week 0 and in

Summer term week 1.

Indicative reading: A good general textbook that is mostly below the level of the course is:

D Romer, *Advanced Macroeconomics*, McGraw-Hill Advanced Series in Economics, New York, 1996.

For the growth part the main references are the textbooks by:

D. Acemoglu, *Introduction to Modern Economic Growth*, Princeton University Press, 2009; R J Barro & X Sala-i-Martin, *Economic Growth*, McGraw-Hill, 1997.

Other useful texts include:

L Ljungqvist & T Sargent, *Recursive Macroeconomic Theory*, MIT Press, 2000; N Stokey & R E Lucas, *Recursive Methods in Economic Dynamics*, Harvard University Press, 1989.

More economic applications, with some required readings can be found in:

M Obstfeld & K Rogoff, *Foundations of International Macroeconomics*, MIT Press, 2000; P Aghion & P Howitt, *Endogenous Growth Theory*, MIT Press 1998; C A Pissarides, *Equilibrium Unemployment Theory*, MIT Press 2000.

References for recent theoretical advances published in the journals will be given during the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC443

Econometrics for MRes students

This information is for the 2015/16 session.

Teacher responsible: Dr Vassilis Hajivassiliou 32L.4.23, Dr Tatiana Komarova 32L.4.24 and Dr Marcia Schafgans 32L.4.12

Availability: This course is compulsory on the MRes in Economics (Track 1) and MRes in Economics (Track 2). This course is not available as an outside option.

Pre-requisites: Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

Course content: The first part [Inference, Classical- and Generalized Linear Regression] begins with methods of estimation and optimality, followed by an introduction to asymptotic theory. It proceeds with statistical inference and the trinity of classical testing (Wald, Likelihood Ratio, and Lagrange Multiplier). It then discusses the classical linear regression model and commences the discussion of violation of the classical assumptions by discussing the Generalized Linear Regression Model (heteroskedasticity and autocorrelation).

The second part [Generalized Regression Methods] provides a further discussion of violations of the classical assumptions including measurement error, omitted variables, simultaneity, missing data; non-linear regression models and instrumental variables. It proceeds to the Generalized Method of Moments and efficient estimation methods under conditional moment restrictions. It also covers the topics of quantile regression and bootstrapping.

The third part [Time-series, Panel-data, and Microeconomic Methods] begins with a discussion of Time-Series topics, including single equation theory for non-stationary variables; serially correlated errors with lagged dependent variables; unit roots; simultaneous equations for non-stationary variables; co-integration; and ARCH and GARCH models. It proceeds to Panel data methods such as fixed and random effects estimators and their extensions for applying to dynamic linear and non-linear panel data models. The next major topic presents models with Limited Dependent Variables. The final part [Specialized Econometric Methods] discusses simulation-based inference, nonlinear panel data, and duration models. Finally, it covers the topics of program evaluation, nonparametrics, kernel estimation, and differences in differences.

Teaching: 30 hours of lectures and 15 hours of classes in the MT. 30 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Exercises are set for each class. In addition, there will mock examinations in Lent term week 0 and in

Summer term week 1.

Indicative reading: Lecture notes will be made available through the departmental website and in course-packs for each part of the course. Please note there is no set book for this course.

Recommended books are: W H Greene, *Econometric Analysis*, 6th edn, Pearson Education; R Davidson & J MacKinnon, *Estimation and Inference in Econometrics*, Oxford University Press, 1993; P. Ruud, *An Introduction to Classical Econometric Theory*, Oxford University Press, 2000; T Amemiya, *Advanced Econometrics*, Harvard University Press, 1985; J Johnston, *Econometric Methods*, 3rd edn, McGraw Hill; G Judge et al, *A Course in Econometrics*, Wiley, 1988; G Maddala, *Econometrics*, McGraw Hill, 1977.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC453

Political Economy

This information is for the 2015/16 session.

Teacher responsible: Dr Stephane Wolton CON 5.08

Availability: This course is available on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: An advanced treatment of Political Economy, covering theory, evidence and current issues. The course material will expand students' capacity to think about policy relevant issues at the intersection between economics and political science, and will cover democratic and autocratic politics. Topics include election as information aggregation; politics as a principal agent problem; political economy and public finance; constitutional rules and policy outcomes; bureaucracy; media; special interest group politics; legislatures; political parties; direct democracy; rebellion and terrorism; democratization; international conflicts.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 11 hours of seminars in the LT.

Formative coursework: At least two written assignment for handing in per term (assignment will include some work with data sets provided by the instructor).

Indicative reading: Most of the reading is from journal articles; lists will be supplied at the start of each term. Two books supply the basic framework: T Besley, *Principled Agents? Selection and Incentives in Politics*, Oxford University Press, 2005 and T Persson & G Tabellini, *Political Economics: Explaining Political Outcomes*, MIT Press, 2000.

Assessment: Assessment path 1

Exam (50%, duration: 3 hours) in the main exam period.

Essay (50%) in the ST.

Assessment path 2

Exam (100%, duration: 3 hours) in the main exam period.

Students taking MSc Economics or MSc Econometrics and Mathematical Economics will be required to submit an extended essay at the beginning of the ST; for such students, the written examination and the extended essay will each count for half of the marks.

EC454

Development Economics

This information is for the 2015/16 session.

Teacher responsible: Prof Robin Burgess 32L.3.03 and Prof Oriana Bandiera 32L.3.02

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Course content: An introductory graduate course providing the necessary development economics skills for high level public policy making. The focus is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students to complete weekly exercises based on course readings with one of these exercises being marked in a given term.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC455

Quantitative Approaches and Policy Analysis

This information is for the 2015/16 session.

Teacher responsible: Dr Jeremiah Dittmar and Dr Gregory Fischer

Availability: This course is compulsory on the MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS) and MPA Dual Degree (LSE and Sciences Po). This course is not available as an outside option.

Pre-requisites: The course has no formal pre-requisites. A familiarity with basic statistical concepts and basic calculus are very useful. These topics are reviewed during the pre-session course of the MPA programme (EC408). Students not participating in the pre-session course need to provide evidence of comparable prior knowledge.

Course content: The course introduces students to the quantitative evaluation of public policies with the help of regression based evaluation methods, cost-benefit analysis and computable general equilibrium modelling. The first six weeks of the course introduce students to basic multiple regression analysis including hypothesis testing, modelling of non-linear relationships, and dummy variables. From week 7 of MT the course covers a number of regression based evaluation methods to assess the casual effectiveness of policy interventions. These include the use of randomized experiments, natural or quasi-experiments, panel data, difference-in-differences estimation, instrumental variables, matching and regression discontinuity designs. The final part of the course provides an overview over cost-benefit and cost-effectiveness analysis and an introduction to the use of computable equilibrium models to assess policy interventions.

Teaching: 20 hours of lectures and 11 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: Particularly useful textbooks are Josh Angrist and Steve Pischke, 'Mastering Metrics'; James Stock & Mark Watson, 'Introduction to Econometrics'; and Jeffrey Wooldridge, 'Introductory Econometrics'. The material in the textbooks will be complemented with recent research papers and chapters from other books. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.

Coursework (30%) in the MT and LT.

Presentation (10%) in the LT.

EC465

Economic Growth, Development, and Capitalism in Historical Perspective

This information is for the 2015/16 session.

Teacher responsible: Dr Jeremiah Dittmar 32L.2.22 and Dr Neil Cummins S487

Availability: This course is available on the MSc in Economic History, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed courses in intermediate level microeconomics, macroeconomics, and econometrics.

Course content: This course will provide a rigorous introduction to the analysis of long run economic growth and development. The focus is on acquiring the necessary empirical skills to engage in advanced analysis of economic evidence, and to develop an understanding of how historical evidence can shape and inform economic theory. Topics at the forefront of economics and economic history will be covered. These include political economy, technological change, economic growth, education, demography, the economics of law and property rights, gender, culture, and the distribution of income. The emphasis will be on combining theory and data to evaluate fundamental ideas in economics concerning the determinants of well-being and the dynamics of market economies.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 presentation and 1 exercise in the MT and LT.

The formative coursework will consist of a combination of student presentations, written exercises, data analysis, and problems.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course. However, the following references may serve as an introduction to material included in the syllabus: Nunn, "The Importance of History for Economic Development" (2009); Robinson and Acemoglu, "Why Nations Fail" (2012); Acemoglu, "Introduction to Modern Economic Growth" (Princeton, 2009); Hall and Jones, "The New Kaldor Facts: Ideas, Institutions, Population, and Human Capital" (2010); Mokyr, "Lever of Riches" (1988); Piketty (2013) "Capital in the Twenty-First Century".

Assessment: Exam (60%, duration: 3 hours, reading time: 10 minutes) in the main exam period.

Essay (40%, 5000 words) in the ST.

The summative assessment consists of an exam that reviews and synthesises all course materials and an essay. The essay will be a critical analytic essay providing an opportunity for original empirical research.

EC475**Quantitative Economics**

This information is for the 2015/16 session.

Teacher responsible: Prof Mark Schankerman 32L.4.30
Dr David Baqaee

Availability: This course is available on the MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are expected to take EC400 in September and achieve the requisite standard.

A knowledge is expected of econometric theory and applied econometrics corresponding to Principles of Econometrics or Methods of Economic Investigation. Students must be prepared to read journal articles with a difficult mathematical and statistical content.

Course content: The course will focus on going through modern quantitative papers which demonstrate the application of econometric techniques to modelling the behaviour of individual economic agents (households and firms) and economies. The first part of this course will explore topics in applied macroeconomics, with emphasis on the intersection of empirical analysis and theory. It will cover different quantitative approaches for assessing macroeconomic models and theories. The topics covered will include models of consumption, investment, technological change, monetary policy, fiscal policy, and financial frictions. The thematic focus will be on understanding business cycles. The second half of the course will focus on papers in the empirical literature on productivity, innovation and intellectual property rights, illustrating the challenges of identification in both structural and reduced form models. The lectures will cover a wide range of topics in applied micro-econometrics with a view to illustrating the interplay between models, data and methods.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: Articles in economic journals will be assigned at the start of Michaelmas and Lent terms. The course will also draw on methodological topics covered in Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2nd edition, 2010), and Angrist and Pischke, *Mostly Harmless Econometrics* (2009).

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

applications to non-linear pricing, optimal auctions and regulation, and the theory of mechanism design with multiple agents (multiple agents screening and common agency).

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course. The following textbooks provide a treatment of part of the material presented in the course: Jean-Jacques Laffont, *The Economics of Uncertainty and Information*, MIT Press; D Fudenberg & J Tirole, *Game Theory*, MIT Press; Jean-Jacques Laffont & Jean Tirole, *A Theory of Incentives in Procurement Regulations*, MIT Press; Bernard Salanié, *The Economics of Contracts: A Primer*, MIT Press, Bolton, P., and M. Dewatripont (2005), *Contract Theory*, MIT Press, Hart, O. (1995), *Firms, Contracts, and Financial Structure*, Oxford University Press.

Assessment: A three-hour written examination in the ST.

Non-EME students will be assessed as follows: A three-hour written examination in the ST (50%) and a 6000-word extended essay due at the beginning of the ST (50%).

EC484**Econometric Analysis**

This information is for the 2015/16 session.

Teacher responsible: Dr Taisuke Otsu 32L. 4.25 and Professor Peter Robinson 32L. 4.13

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available on the MRes in Economics (Track 1), MRes in Economics (Track 2), MSc in Applicable Mathematics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: This course gives an advanced treatment of the theory of estimation and inference for econometric models. Part (a) Matrix background; asymptotic statistical theory: modes of convergence, asymptotic unbiasedness, uniform integrability, stochastic orders of magnitude, convergence in distribution, central limit theorems, applications to linear regression, consistency and asymptotic normality of implicitly defined extremum estimators. Part (b) Non-linear-in variables systems: maximum likelihood and instrumental variables estimates, optimal instrumental variables estimates for static and dynamic models, and models with autocorrelated disturbances. Simultaneous equations systems, identification, estimation, asymptotic behaviour of estimators and hypothesis testing. Wald, generalised likelihood ratio and Lagrange multiplier hypothesis tests, asymptotic null and local behaviour and consistency.

Teaching: 30 hours of lectures and 15 hours of seminars in the MT. 30 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course, and lecture notes and relevant articles will be circulated.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC476**Contracts and Organisations**

This information is for the 2015/16 session.

Teacher responsible: Prof Gilat Levy 32L 4.31
Prof John Hardman-Moore 32L 4.14
Prof Philippe Aghion

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Environmental Economics and Climate Change. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The course will cover topics from : contract theory, incomplete contracts, the economics of moral hazard and adverse selection in strategic settings, dynamic theory of incentive contracts (efficiency of long-run relationships, short-term versus long-term contracts and renegotiation, static mechanism design and self-selection contracts (revelation principle for Bayesian-Nash and dominant strategy equilibria, static screening contracts) with

EC485**Further Topics in Econometrics**

This information is for the 2015/16 session.

Teacher responsible: Professor Javier Hidalgo 32L 4.20

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Econometrics and Mathematical Economics and MSc in Econometrics and Mathematical Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to introduce the student to topics at the frontier of econometric research of importance both at a theoretical and empirical level. The course consists of four series of ten lectures on specialised topics in econometrics. These lectures change from year to year. Presently they include: long memory time series; non-parametric and semi-parametric estimation; dependence in economics: an overview; panel data models.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

Formative coursework: Two marked assignments per term

Indicative reading: No one book covers the entire syllabus; lists of references will be provided and lecture notes circulated.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC486**Econometric Methods**

This information is for the 2015/16 session.

Teacher responsible: Dr Pasquale Schiraldi 32L 4.22

Mr Alessandro Gavazza, 32L 4.21

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: This course aims to present the theory and practice of empirical research in economics. Beyond the theory, the course will put a substantial amount of effort in having the students work with Stata and other econometric software in analyzing actual data sets, reproducing and criticising results in previous work and learning the actual practice of econometrics as undertaken by the best applied economists, both in general (in MT) and specifically within the IO field (in the LT).

Teaching: 20 hours of lectures and 8 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures and 2 hours of seminars in the ST.

Formative coursework: Students are required to complete answers to problem sets on a week by week basis.

Indicative reading: MT: James H. Stock and Mark W. Watson, Introduction to Econometrics; reading lists of chapters and journal articles will be supplied at the start of each term.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC487**Advanced Microeconomics**

This information is for the 2015/16 session.

Teacher responsible: Dr Erik Eyster 32L.4.29 and Prof Leonardo Felli 32L. 4.02

Availability: This course is compulsory on the MSc in Finance and Economics (Research). This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Econometrics and Mathematical Economics (2 Year Programme), MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit. Students on MSc Economics will need additional approval of lecturers.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of this course is to: (i) introduce and develop the analytical tools of graduate level Microeconomics with a special emphasis on mathematical models; (ii) provide the students with a firm grounding in classical Microeconomic Theory as well as its modern development.

Topics include: Consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, oligopoly, economics of information, topics in mechanism design, topics in behavioural economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Problem sets will be discussed in class and two marked assignments will be given in MT and LT. There will also be mock examinations at the start of LT.

Indicative reading: The main texts are A Rubinstein Lecture Notes in Economic Theory, Princeton University Press and Mas-Colell, Whinston & Green, Microeconomic Theory, OUP. Other sources include: D M Kreps, Microeconomic Foundations I: Choice and Competitive Markets, Princeton University Press; Fudenberg and Tirole, Game Theory, MIT Press.

Assessment: Exam (100%, duration: 3 hours) in the main exam period.

EC4B3**MPA Capstone Project**

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.

Teaching: 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.

Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. In addition, students can benefit from the MPA Skills Development Seminars focusing on essential aspects of policy analysis and writing. Students are asked to participate in the Capstone Professional Development exercises designed to support

effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.

Indicative reading: Useful preliminary reading: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979; Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); Common Causes of Project Failure (London: OGC, 2004); Howard White, *Theory-based Impact Evaluation: Principles and Practice* (3ie, 2011); Curtis Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschann, 'Dynamics in Groups and Teams: Groups as Complex Action Systems', chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Project (100%, 15000 words) in the LT. The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

- 1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
- 2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
- 3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must write a personal reflection of no more than 600 words on their contribution to the group's work to be submitted individually and separately from the report.

EC4B4

MPA Dissertation

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Teaching comprises ten 1.5 hour Skills Development Seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; conducting a rigorous literature review; undertaking

mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Students will be allocated a supervisor, who will provide advice and guidance on this piece of work.

Indicative reading: David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice*, 5th ed. (Prentice Hall, 2010); Lisa Anderson ed., *Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century* (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, *A Primer for Policy Analysis* (Norton, 1978); Anthony E. Boardman et al., *Cost-Benefit Analysis*, 4th ed. (Prentice Hall, 2010); William N. Dunn, *Public Policy Analysis: An Introduction*, 4th ed. (Pearson, 2008); Eugene Bardach, *Practical Guide for Policy Analysis*, 4th ed. (CQ Press, 2011); Alec Fisher, *The Logic of Real Arguments* (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979); Isabel Vogel, Review of the Use of 'Theory of Change' in International Development (DfID, 2012); Edward T. Jackson, *Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most* (Journal of Sustainable Finance and Investment, Vol 3, No 2, 95-110, 2013); Catherine Hakim, *Research Design: Strategies and Choices in the Design of Social Policy*, 2nd ed. (Routledge, 2000); Alan Bryman, *Social Research Methods*, 4th ed. (Oxford University Press, 2012); David Partington, *Essential Skills for Management Research* (Sage Publications, 2002); Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008); Christopher Hart, *Doing Your Masters Dissertation* (SAGE Study Skills Series, 2004); Patrick Dunleavy, *Authoring a PhD* (Palgrave Macmillan, 2003)

Assessment: Dissertation (90%, 10000 words) in the ST. Other (10%) in the MT.

1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

EC4V8 Half Unit

MPA Policy Paper

This information is for the 2015/16 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy and MPA in Public and Social Policy. This course is not available as an outside option.

Students may not take this course and an MPA Dissertation

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: 10 hours and 30 minutes of seminars in the MT. 4 hours

and 30 minutes of seminars in the LT.

These ten 1.5 hour Skills Development Seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; conducting a rigorous literature review; undertaking mixed methods analysis; structuring and presenting policy analysis; writing policy recommendations; and research ethics. Additionally, students will be allocated a supervisor who will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

Indicative reading: David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice*, 5th ed. (Prentice Hall, 2010); Lisa Anderson, ed., *Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century* (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, *A Primer for Policy Analysis* (Norton, 1978); Anthony E. Boardman et al., *Cost-Benefit Analysis*, 4th ed. (Prentice Hall, 2010); William N. Dunn, *Public Policy Analysis: An Introduction*, 4th ed. (Pearson, 2008); Eugene Bardach, *Practical Guide for Policy Analysis*, 4th ed. (CQ Press, 2011); Alec Fisher, *The Logic of Real Arguments* (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979); Isabel Vogel, *Review of the Use of 'Theory of Change' in International Development* (DfID, 2012); Edward T. Jackson, *Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most* (Journal of Sustainable Finance and Investment, vol. 3, No. 2, 95-110, 2013); Catherine Hakim, *Research Design: Strategies and Choices in the Design of Social Policy*, 2nd ed. (Routledge, 2000); Alan Bryman, *Social Research Methods*, 4th ed. (Oxford University Press, 2012); David Partington, *Essential Skills for Management Research* (Sage Publications, 2002); Patrick Dunleavy, *Authoring a PhD* (Palgrave Macmillan, 2003).

Assessment: Other (100%) in the ST.

6,000 word policy paper

EH401 Half Unit Historical Analysis of Economic Change

This information is for the 2015/16 session.

Teacher responsible: Dr Debin Ma SAR 612

Availability: This course is compulsory on the MSc in Economic History, MSc in Economic History (Research) and MSc in Quantitative Economic History. This course is not available as an outside option.

Course content: The course provides basic awareness of central themes and key methodological and theoretical issues in economic history; introduces students to important analytic tools used by economic historians, with an emphasis on their practical application in economic history research; and examines major ways in which economic historians collect, analyse and interpret evidence. The training is expected to inform dissertation work. The course covers two main areas. 1) Theory and Research: this section introduces theoretical approaches to major issues in economic history, and considers the practical application in historical analysis of concepts from economics (primarily) and related disciplines. The specific topics evolve but an illustrative list includes: processes of economic growth; economic development; culture and economic behaviour; the rational-choice institutionalist paradigm; imperfect information and incentive structures; modern macro-economic ideas (especially on money and finance); welfare outcomes. 2) Historical Methodology: this section introduces methodological issues in combining social science frameworks with historical materials. It considers problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing and interpreting evidence.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: Students are required to make one class presentation and also to submit one paper on an additional topic during the term.

Indicative reading: D. North, *Institutions, Institutional Change and Economic Performance* (1990); A. Greif, *Institutions and the Path to the Modern Economy* (2006); K. Pomeranz, *The Great Divergence: China, Europe and the Making of the Modern World Economy* (2000); R. Allen, *The British Industrial Revolution in Global Perspective* (2009); D. Rodrik (Ed), *In Search of Prosperity* (2003); E. Helpman, *The Mystery of Economic Growth* (2004); T. Rawski (Ed), *Economics and the Historian* (1996); J. Tosh, *The Pursuit of History* (2nd Edition, 1991); D. Little, *Varieties of Social Explanation* (1991).

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH402 Half Unit Research Design and Quantitative Methods in Economic History

This information is for the 2015/16 session.

Teacher responsible: Dr David Chilosi SAR 607

Availability: This course is available on the MA Global Studies: A European Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Global History and MSc in Quantitative Economic History. This course is not available as an outside option.

Course content: This course is concerned with how economic historians have used quantitative methods and with how researchers design and structure a research project. In terms of quantitative methods the emphasis is on the applied and practical rather than the theoretical and will range from the use of simple summary descriptive statistics to multiple regression. The course will start with a consideration of broad issues in research design, this might include, for example, models, narrative and case studies. The rest of the course will then be concerned with quantitative issues, the problems of analysing and interpreting quantitative historical evidence. It will consider topics such as sampling and statistical distributions, correlation, simple and multiple regression, specification problems, hypothesis testing, logit and probit analysis, non-parametric tests, and modern time series analysis, although the content may vary slightly from year to year. The course will also provide students with training in using an econometrics software package. An important component of the course is the deconstruction of historical articles that have used quantitative techniques.

Teaching: 10 hours of seminars and 20 hours of computer workshops in the MT. 2 hours of computer workshops in the ST. MT only. Three hours per week. One-and-a-half hours computing session, one-and-a-half hours classes weekly.

Formative coursework: Students are required to do weekly exercises and to submit one paper during the term.

Indicative reading: C. H. Feinstein and M. Thomas, *Making History Count* (2002); P. Hudson, *History by Numbers* (2002); C. H. Lee, *The Quantitative Approach to Economic History* (1977); G. Hawthorn, *Plausible Words* (1991).

Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

EH404 Half Unit India and the World Economy

This information is for the 2015/16 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the MA Global Studies: A European Perspective, MRes in Quantitative Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global History, MSc in International and World History (LSE & Columbia) and MSc in

Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: From the eighteenth century, the South Asia region played an important part in international transactions in goods, people, and money. The world economy, in turn, shaped potentials for economic growth in the region. The aim of the course is to impart an understanding of the global factors that shaped economic change in the South Asia region in the 18th through the early-20th century. It will also deal with the principal ways in which South Asia contributed to economic change in the rest of the world. The political context of globalization, especially imperialism and colonial policies, will be considered. The course will be divided into a set of topics, which together cover a large ground, but a selection from which will be discussed in the class. Lectures and seminars will centre on the readings assigned to each topic.
