

Microsoft PowerPoint (PowerPoint and PowerPoint 2019): Exam MO-300

The Microsoft Office Specialist: PowerPoint Associate Certification demonstrates competency to create, edit, and enhance presentations and slideshows. The exam covers the ability to create and manage presentations, insert and format shapes and slides, create slide content, apply transitions and animations and manage multiple presentations. Presentation examples include professional-grade sales presentations, employee training, instructional materials, and kiosk slideshows.

An individual earning this certification has approximately 150 hours of instruction and hands-on experience with the product, has proven competency at an industry associate-level and is ready to enter into the job market. They can demonstrate the correct application of the principal features of PowerPoint and can complete tasks independently.

Microsoft Office Specialist Program certification exams use a performance-based format testing a candidate's knowledge, skills and abilities using the Microsoft Office 365 and Office 2019 programs:

- Microsoft Office Specialist Program exam task instructions generally do not include the command name. For example, function names are avoided, and are replaced with descriptors. This means candidates must understand the purpose and common usage of the program functionality in order to successfully complete the tasks in each of the projects.
- The Microsoft Office Specialist Program exam format incorporates multiple projects as in the previous version, while using enhanced tools, functions, and features from the latest programs.
