

DIGITAL EDUCATION FUTURES PANEL INSIGHTS

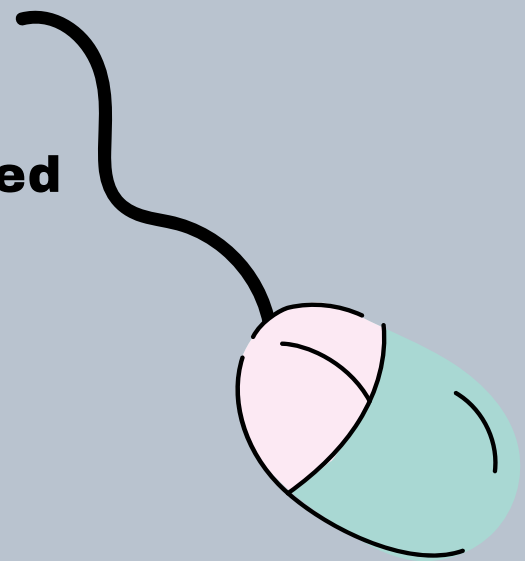

THE POSITIVES

"I find having the lectures recorded and available for future use very helpful. It allows me to actively listen and focus on the content being delivered by the teacher, instead, of scrambling to make notes of everything being said without absorbing the content. It's also helpful to have the ability to rewatch old recordings to understand the content I'm confused about it. It also allows me to learn at my own pace, slowing down, speeding up, or pausing lectures."

THE NEGATIVES

- **On campus spaces are designed for the old ways of learning.**
- **Digital platform overload and inconsistent use.**
- **Connectivity issues.**

CALL TO ACTION

- **Create on campus spaces for online learning.**
- **Greater digital consistency across departments.**
- **Ensure educators are trained in best practises around remote learning.**

MOVING FORWARD

- **Is on-line learning preferable to in-person, or do we hope to return to the pre-pandemic state of play?**
- **Students have a variety of opinions on this and the conversation is still evolving. It is important for the school to continue to listen to the diverse voices of the student body, and to ensure the conversation is inclusive.**
