

Department of Health Policy:

IMPROVING HEALTH & REDUCING INEQUALITY BY IMPROVING ACCESS TO MEDICINES & LONG-TERM CARE

Research & Expertise: Access to Medicines

Focus on **studying health systems, improving infrastructure, workforce capacity, and healthcare finance**. Academics such as **Dr Olivier Wouters'** research contributes to achieving SDG targets **3.8** of universal health coverage & **10.4** of adopting policies to achieve equality.

Research & Expertise: Access to Long-Term Care

The department's focus includes **long-term care financing, mental health, Out-of-Hospital Care, social care economics and unpaid care**. **Professor Martin Knapp's** research will help global progress toward achieving SDG targets **10.2**, which aims to empower people regardless of age & **3.4**, which aims to reduce mortality by promoting mental healthcare.

Partnerships: Access to Long-Term Care

Through the **Care Policy and Evaluation Centre (CPEC)**, led by **Professor Martin Knapp**, the department is affiliated to international and national research groups under International Long-Term Care Network (ILPN) & National Institute of Health and Care Research (NIHR).

The SDGs

The department has published over **>100** articles on its research.

Partnerships: Global Access to Medicines

The Health Policy department engages extensively with external partners including national governments, large pharmaceutical companies, intergovernmental bodies and the WHO especially through **LSE Health** led by **Prof Elias Mossialos**.
