Course content: This course adopts a psychological framework to explore the content, process and outcomes of organisational change. The aim of the course is to provide students with different psychological theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organisational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analyzing and diagnosing change; the role of the change agent, leading change from the top, bottom up change specific interventions; strategies of change; a justice perspective on organisational change; understanding recipients reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions.
Teaching: 21 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.
The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and

students are expected to actively contribute to their syndicate group throughout the year. The course is demanding of students and depends partly upon commitment and willingness to participate fully. The course is taught in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will take part in a mock exam in the LT.
Indicative reading: The course relies heavily on journal articles (for example, Academy of Management Journal, Journal of Applied Psychology, Journal of Organizational Behaviour, and Journal of Applied Behavioural Science) and the use of case studies. The following book is also useful Oreg, S., Michel, A., & By, T. B., (Eds.) (2013), The psychology of organizational change: Viewing change from the employee's perspective, Cambridge University Press.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4B8 Half Unit
Evolutionary Psychology and Management

This information is for the 2017/18 session.
Teacher responsible: Dr Satoshi Kanazawa NAB5.33
Availability: This course is available on the MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.
Course content: Principles of evolutionary psychology. The nature and limitations of the human brain as an evolved and adapted organ. Evolutionary origins of cognitive biases, and their effects on organisational behaviour. Sex differences in organisational behaviour. The importance of physical attractiveness and general intelligence in organisational behaviour. "Discrimination" in labour market. Evolutionary psychological perspectives on cooperation, reciprocity, altruism, hierarchy, and leadership in modern corporations. Evolutionary origins of organisationally relevant emotions such as envy, spite, and positional bias. This course introduces the evolutionary psychological perspective on business and management. The emerging science of evolutionary psychology sheds entirely new light on, and offers different solutions to, old problems of management, such as glass ceiling, occupational sex segregation, sexual harassment and suboptimal decision making, and points to new potential problems.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy
Formative coursework: One class presentation and one essay based on the class presentation.
Indicative reading: Browne, Kingsley R. 2002. Biology at Work: Rethinking Sexual Equality, New Brunswick: Rutgers University Press; Kanazawa, Satoshi. 2012. The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One. Pinker, Susan. 2008. The Sexual Paradox: Troubled Boys, Gifted Girls and the Real Difference Between the Sexes.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4B9 Half Unit
The World Trading System

This information is for the 2017/18 session.
Teacher responsible: Dr Veronica Rappoport-Redondo NAB5.29
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Management, MSc in Management and Strategy, MSc in Risk and Finance and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Basic Knowledge of Mathematics and Economics
Course content: The course studies a key component of the "globalization" process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international economy and overview of their causes and effects. The sources of international trade. Trade barriers - restrictions to international trade and their consequences. The economics and politics of international trade agreements. The rules, accomplishments and shortcomings of the GATT/WTO system. Regional trade agreements - motivation, implications, and recent trends. The costs and benefits from exporting for individual firms. Challenges and opportunities for national and multinational firms in the global economy.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: A mock examination will be held.
Indicative reading: Robert Feenstra and Alan Taylor, International Economics, Worth Publishers, 2008. Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004. The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011. Bernard M. Hoekman, Aaditya Mattoo, Philip English (editors), "Development, Trade, and the WTO: A Handbook," World Bank, 2002. Andrew Bernard, J. Bradford Jensen, Stephen Redding and Peter Schott, Firms in International Trade, Journal of Economic Perspectives 21(3), 105-130, 2007.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4C2 Half Unit
Organisational Behaviour

This information is for the 2017/18 session.
Teacher responsible: Dr Tara Reich NAB4.15
Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD), MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available on the CEMS Exchange, MBA Exchange, MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is available in the Michaelmas Term only.
Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we aim to demonstrate the contribution of a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence.
Key topics include: personality and individual differences, work motivation, decision-making, rewards systems, psychological contracts, organisational justice, organisational citizenship and

retaliatory behaviour, leadership, groups and group processes and organisational culture.
Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.
The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.
Students on this course will have a reading week in Week 6, in line with departmental policy
Formative coursework: Students will be expected to produce 1 essay in the MT.
Indicative reading: The course relies heavily on journal articles (from, for example, Academy of Management Journal, Journal of Applied Psychology, Journal of Organizational Behavior). An extensive reading list is provided at the start of the course. No suitable textbook exists but students may wish to consult one of the following:
Kolb, D. A., Osland, J. S., & Rubin, I. M. (2007). The Organizational Behavior Reader (8th ed.). Pearson. Porter, L. W., Bigley, G. A., & Steers, R. M. (2002). Motivation and work behavior (7th ed.). McGraw-Hill. Staw, B. M (2004). Psychological dimensions of organizational behavior (3rd ed.), Prentice-Hall.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4C3 Half Unit
Information Technology and Service Innovation

This information is for the 2017/18 session.
Teacher responsible: Dr Carsten Sorensen
Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is limited to 60 students.
Course content: The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary information technology (IT). The course relates the diversity of the design challenges facing contemporary IT development. The course embraces the shifting conditions for small teams of developers to design significant services in the context of technology-based startups, or as part of entrepreneurship within an existing enterprise or public institution. The design challenges relate to constantly shifting possibilities, for example, for the capture and processing of digital data previously beyond reach, the ability to leverage existing boundary resources (APIs, SDKs etc), and the expanding possibilities for reaching end-users in new ways. The course is constructed as the meeting of theory and practice. The former is constituted by the presentation and discussion of theoretical themes aimed at sharpening the student's ability to reason fundamentally about contemporary design challenges and opportunities. This aspect is also examined through an individual essay. The pratical design skills and primarily honed through a group project running throughout the course. Conducting this group design project will engage students in highly detailed and constructive design discussions leading to an actual design of an IT artifact. The practical design skills sought practiced in the course are related to but largely independent from skills solely aimed at setting and analysing requirements on the one hand, and expressing the design through programming, on the other. The course, therefore neither requires, nor teaches detailed programming techniques, but instead focuses on teaching design skills through practices and to sensitise these design skills through the discussion of pertinent theoretical themes. These themes takes their outset in the increasing complexity of designing IT artifacts as the granularity of technology and data capture is decreasing to enable increasing tracking of more and more granular aspects of human activities, while IT arrtifact design at the same time relates to a variety of personal-, local-, and global communications infrastructures, as well as a variety of possible multi-sided platforms and software middleware layers enabling rapid prototyping of complex designs. Topics addressed will be: Digital infrastructure innovation; Digital platform strategies; Designing technology affordance diversity; Understanding technology performances; Individual interaction intimacy; Amplified teams; The technological organisation; Global crowd innovation with IT; Global technology innovation tussles; Business innovation with information technology. The weekly seminars will consist of presentations and discussions offering students opportunity to critically reflect on theoretical and pragmatic issues related to the subject matter of the course, such as; the IT artifact and ecosystem, the role of IT in business innovation, understanding the paradoxes of technology performances, intimate technology experiences, IT mediated team-working, the IT-enabled organisation, innovating global IT mediated crowds, innovation as organisational tussles, and the role of IT-based innovation for business development.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.
Formative coursework: Classes are based around both the design group projects, as well as reading and discussing selected journal articles. Formative feedback is provided on class participation.

Assessment: Project (50%) and coursework (50%, 2500 words).
Assessment for this course consists of a group project (50%) and a 2500 word individual report (50%).
The project has three summative elements: a proposal (10%), a deck of slides (15%), and a technical description (25%).

MG4D1 Half Unit Not available in 2017/18
International and Comparative Human Resource Management

This information is for the 2017/18 session.
Teacher responsible: TBC
Availability: This course is available on the CEMS Exchange, MBA Exchange, MPhil/ PhD in Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course deals with the policies that organisations adopt to deal with a range of human resource issues, and develops an international and comparative perspective. The course considers managerial human resource policies in their institutional, social and market contexts in advanced industrial countries. As an integrating perspective, the lectures analyse how different employment systems shape organisations' HR strategies and policies. The course looks at problems of human resource management in international firms, training, migration, knowledge management, rewards, equal opportunities, employment flexibility, participation, and employer collective action all within the context of different types of employment systems.
Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours of lectures and 3 hours of seminars in the ST.
Students on this course will have a reading week in Week 6, in line with departmental policy
Indicative reading: Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course. Some useful texts include: D W Marsden, A Theory of Employment Systems: microfoundations of societal diversity, Oxford University Press, 1999; Briscoe D. S Schuler R. International human resource management, Routledge, London, 2009; Boselie, Paul, Strategic Human Resource Management: a balanced approach, McGraw-Hill, Maidenhead, 2010. J Baron & D Kreps, Strategic Human Resources: frameworks for general managers, Wiley, New York, 1999; A-W Harzing & J van Ruysseveldt (Eds), International Human Resource Management, 2004; C Crouch, D Finegold & M Sako, Are Skills the Answer? The political economy of skill creation in advanced industrial societies, Oxford University Press, 1999; K Koike, Human resource development; Japanese Economy & Labor Series, No 2, Japan Institute of Labor, Tokyo, 1997; D Rousseau & R Schalk (Eds), Psychological Contracts in Employment: cross-national perspectives, Sage, 2000; J Rubery & D Grimshaw, The Organization of Employment: an international perspective, Palgrave Macmillan, Basingstoke, 2003.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%) in the LT.
Students complete an assessed essay during the Easter vacation, which counts for one third of their assessment, and a summer examination, which counts for two thirds.

MG4D2 Half Unit
International Employment Relations

This information is for the 2017/18 session.
Teacher responsible: Dr Eddy Donnelly - NAB.4.07
Prof Carola Frege - NAB 5.20
Availability: This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: A general knowledge of the social sciences is required.
Course content: The course aims to provide an introduction to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. It will introduce the dynamics of employment relations across the increasingly global markets, the key concepts and topics surrounding it (such as employee voice, dignity of work, outsourcing, labour conflicts, labour productivity, skills), and the theories required to understand it. The strategies and policies of the main actors will be explored through cross-national comparative analysis. The course will also introduce the main 'models' of employment relations: the US/British, Japanese and European Social Models, as well as models of employment relations in the transitional economies.
The aim of the classes will be to provide an introduction to the comparative analysis of employment relations in a global world. It also ensures that students have both the conceptual and empirical grounding they need to take the options offered in international comparative human resource management and cross-cultural management.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students and depends for its success partly upon their commitment and willingness to participate fully.
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students have to complete a class presentation.
Indicative reading: C Frege & J Kelly (Eds) Comparative Employment Relations in the Global Economy, Routledge, 2013; G Bamber, R Lansbury & N Wailes (Eds), International and Comparative Employment Relations, 5th edn, Sage, 2011; R Hyman, Understanding European Trade Unionism: Between Market, Class and Society, Sage, 2001; M J Morley, P Gunnigle & DG Collings (Eds), Global Industrial Relations, Routledge, 2006.
Assessment: Essay (40%, 2500 words) in the MT.
Essay (50%, 2500 words) in the LT.
Class participation (10%).

MG4D3 Half Unit
The Dark Side of the Organisation

This information is for the 2017/18 session.
Teacher responsible: Dr Jonathan Booth NAB4.20
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange),

MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Introductory OB course required. MG4C2, MG434, MG105, or equivalent course in another institution. Students will be required to write a paragraph about their motivation for taking this course.
Course content: In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g., substance abuse, violent/aggressive, discriminatory, and retaliatory behaviours, and unethical behaviours/corporate corruption). In organisational behaviour courses, topics covered often explore how behaviours promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all behaviours and outcomes occurring in the workplace are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences. In addition to an organisational behaviour approach to the dark side, we will also explore industrial relations perspective.
Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Anand, V, Ashforth, B. E., & Joshi, M. 2005. Business as usual: The acceptance and perpetuation of corruption in organizations. Academy of Management Executive, 19, 9-23. R., & Cornwell, J. M. 2001. Pink Triangles: Antecedents and consequences of perceived workplace discrimination against gay and lesbian employees. Journal of Applied Psychology, 86, 1244-1261. Vaughan, D. 1999. The dark side of organizations: Mistake, misconduct, and disaster. Annual Review of Sociology, 25, 271-305.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Essay (35%, 2000 words) and class participation (15%).

MG4D4 Half Unit
Cross Cultural Management

This information is for the 2017/18 session.
Teacher responsible: Dr Hyun-Jung Lee NAB4.12
Availability: This course is available on the MBA Exchange, MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Social Innovation and Entrepreneurship and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Some background in psychology and organisational behaviour, and/or international business is useful, but not required.
Course content: The ability to communicate cross culturally and understand diverse perspectives is a necessity in order to achieve a competitive advantage in global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as opportunities in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions.
Topics include i) understanding my own and others' cultural conditioning, ii) cultural diversity in teams, iii) international assignments and global career development, iv) leading global organisation with responsibility.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of seminars in the ST.
Experiential learning is emphasised and team working is an integral part of the course. The teaching is highly participative. Students will be asked to make presentations and participate in exercise. The course is demanding of students and success depends partly upon student commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: The following reading list contains some easily accessible introductory discussions. Most of the course reading is taken from journals. A full reading list will be issued at the start of the course. B. Gerhke and M-T. Claes (eds.)(2014), Global leadership practices: A cross cultural management perspective, Palgrave Macmillan; R. Steers et al.(2013), Management across cultures, Cambridge University Press; R Nisbett (2003), The geography of thought, Nicholas Brealey Publishing.
Assessment: Essay (50%), project (40%) and class participation (10%).

MG4D7 Half Unit
Dissertation: MSc MISDI

This information is for the 2017/18 session.
Teacher responsible: All members involved with MSc MISDI are involved in dissertation support.
Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This

course is not available as an outside option.
Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or qualitative investigation in the field. It may be either a theoretical or empirical piece of research. Students must obtain the approval of their advisor before embarking on any research. The course MG496 Study Skills and Research Methods provides background material on undertaking dissertation work.
Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.
Referencing: Details on Group requirements for referencing and paraphrasing and the presentation of the dissertation are given during the MG496 Study Skills and Research Methods course. Students with any queries on this area should contact their dissertation advisor or the MSc Tutor.
Teaching: Teaching for the dissertation comprises two components: MY401: Research Design for Studies in Digital Innovation and MG496: Study Skills and Research Methods. Students must follow both of these courses.
Formative coursework: Students will present their research question, conceptual framework and research design. They will receive feedback from their supervisor and fellow peers.
Assessment: Dissertation (100%, 8000 words) post-summer term.
Two paper copies of the dissertation must be handed in on a specified date in late August. An electronic version of the dissertation must also be submitted. Penalties will be applied to any late submission. The word limit for the dissertation is 8000 words. The dissertation is critical to assessment on the programme.

MG4E2 Half Unit
Marketing Management

This information is for the 2017/18 session.
Teacher responsible: Dr Haider Ali
Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MSc in Management (1 Year Programme). This course is not available as an outside option.
Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies and data analysis to develop participant's skills at analysing and making sense of complex real world business situations.
Teaching: 30 hours of seminars in the MT. 2 hours of seminars in the ST.
Course instruction will be conducted using lectures, case discussions, readings, and analysis of data sets.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.
The formative will be an in-depth case analysis, with two components to it. One component will help prepare participants for the Marketing Project (i.e., more conceptual applications, using social science theories and frameworks to make sense of real-life "messy" cases), and the other component will help prepare participants for the Final Exam (i.e., application of theoretical as well as more analytical frameworks and data analysis that has a more clear pattern of right or wrong answers).
Indicative reading:
- Alex Chernev (2011), Strategic Marketing Management (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), Principles of Marketing (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), Marketing Management (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), Marketing Management: A Contemporary Perspective, McGrawHill
- Jobber, D. (2010), Principles and Practice of Marketing (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), Market-driven management: Strategic and operational marketing (2nd edition). London: Palgrave Macmillan.

Further references, especially for journal articles and case studies, will be provided at the commencement of the course.
Assessment: Exam (50%, duration: 3 hours) in the main exam period.
Project (50%) in the MT.

MG4E4 Half Unit
Analytic frameworks for policy evaluation

This information is for the 2017/18 session.
Teacher responsible: Dr Christine Cote and Prof Richard Bevan
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority will be given to students from the Department of Management's MSc programmes for any outside option spaces.
Pre-requisites: Students must have previously studied microeconomics.
Course content: The course will focus on concepts and cases relevant to understanding how to assess costs and benefits of policy options to enable governments to make hard choices. This entails accounting for: costs and benefits across different criteria and at different times, risk and uncertainty, and distributional effects; and designing evaluation to relate to the political process of making decisions.
The course examines three methods of evaluationl: cost benefit analysis (CBA), cost effectiveness analysis (CEA), multicriteria decision analysis (MCDA). It explains the principles of each method and examines case studies to show their strengths and weaknesses. The aim is for students to learn that, for policy analysis, that the concepts of micro-economics are necessary but not sufficient by relating the issues that emerge from the case studies to major intellectual arguments of the 20th Century. These are arguments over the nature of science, positivism, power, efficiency, equity, and justice. The objective is for students to learn what characterises policy analysis that is likely to succeed or fail in enabling governments to make hard choices.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 2 pieces of coursework in the MT.
A presentation as a member of a seminar group in the second week of term.

A detailed essay plan on two pages with introduction, one key paragraph and conclusion written in full on the principle of using markets to assess costs and benefits and problems with this approach.
Indicative reading: The course text is D M Hausman and M S McPherson, Economic Analysis, Moral Philosophy and Public Policy, Cambridge University Press, 2006.
Extracts from standard texts on methods of economic appraisal:
- HM Treasury, The Green Book. Appraisal and Evaluation in Central Government, TSO, 2011
- A Boardman, D Greenberg, A Vining, D Weimer, Cost-Benefit Analysis: concepts and practice, (4th Edition) Harlow: Pearson Education, 2014
- P Goodwin, G Wright, Decision Analysis for Management Judgment (5th edition) Chichester: John Wiley and Sons, 2014

Material on cases studies including:
- N Stern, Why are we waiting?: The logic, urgency, and promise of tackling climate change, MIT Press, 2015.

Extracts from classic works of leading scholars including:
- J Rawls, A Theory of Justice, Oxford University Press, 1971
- T S Kuhn, The Structure of Scientific Revolutions (2nd edn), University of Chicago Press, 1972
- IMD Little, A Critique of Welfare Economics, Oxford University Press, 1973
- T C Schelling, The Strategy of Conflict, Oxford University Press, 1973
- KR Popper, Conjectures and Refutations, Routledge and Kegan Paul (fourth edition), 1973
- R Nozick, Anarchy Sate and Utopia, Blackwell, 1974
- N Daniels, Just health care. Cambridge: Cambridge University Press, 1990
- D W Hands, Reflection without Rules, Cambridge: Cambridge University Press, 2001
- S Lukes, Power: A Radical View, 2nd edn, Palgrave, 2005.

Extracts from official reports and published papers.
Assessment: Essay (50%, 3000 words) in the LT.
Other (20%) and other (30%) in the MT.
The essay (50%, 3000 words) is a critique of the methods used in a case study relevant to an issue in the student's country.
The other (20%) consists of four group presentations as a member of a seminar group in the weekly seminars.
The other (30%) is a policy brief for a minister on a hard choice.

MG4E5 Half Unit

Governance, Markets and Competition in the Delivery of Public Services

This information is for the 2017/18 session.
Teacher responsible: Dr Simon Bastow and Prof Richard Bevan
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Management (1 Year Programme) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority will be given to students from the Department of Management's MSc programmes for any outside option spaces.
Pre-requisites: Students must have previously studied microeconomics.
Course content: The course examines competing models of governance in policy and delivery of public services. It looks in particular at the comparative strengths and limitations of three governance models - hierarchies, markets and networks - across different public services, with reference to developed and developing countries.
Strong emphasis is given to the growth and innovation in market and competition mechanisms in the public sector in recent decades: for example, the use of quasi-markets, vouchers, privatisation, Private Finance Initiatives (PFIs) and Public-Privat Partnerships (PPPs), payment by results (PBR); in different public services (hospitals, health insurers, criminal justice, schools, universities and public utilities such as water) to examine their efficacy and impact. The course will also look at networked or co-operative forms of delivery of public services, particularly in response to market failure and emergence of new digital paradigms.
Looking across these different models of governance, the course will consider issues around optimisation of design and integration of models. We will assess strengths and limitations against competing objectives of efficacy, cost control, equity, accountability and quality. The course draws on a range of analytical approaches to do so, including principal/agent problems, the economics of transaction costs and behavioural economics.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
A detailed essay plan of two pages with introduction, one key paragraph and conclusion written in full in preparation for the summative essay.
Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, the ecomonics of transaction costs and behavioural economics among other disciplines. Some indicative readings throughout the course include:
- AO Hirschman. Exit, voice, and loyalty: Responses to decline in firms, organizations, and states. London: Harvard university press, 1970
- O E Williamson, Markets and Hierarchies, The Free Press, 1975
- O E Williamson, The Economic Institutions of Capitalism: Firms, Markets and Relational Contracting, New York, The Free Press, 1985
- G Roland, Privatization: Successes and Failures, Columbia University Press, 2013
- J Le Grand, The Other Invisible Hand: Delivering Public Services Through Choice and Competition, Princeton University Press, 2007;
- R H Thaler and C R Sunstein, Nudge, Penguin, 2009
- Oliver A (ed) Behavioural Public Policy, Cambridge: Cambridge University Press, 2013
- G A Akerlof, RE Kranton, Identity Economics: How Identities Shape Our Work Wages and Well Being, Woodstock: Princeton University Press, 2010
- M Barber, How to run a government so that citizens benefit and taxpayers don't go crazy, Allen Lane, 2015
- R Rhodes, The New Governance: Governing without Government, Political Studies 44 (4), 1996
- G F Thompson, Between Hierarchies and Markets: The Logic and Limits of Network Forms of Organization, Oxford University Press, 2003
- W W Powell, Neither market nor hierarchy: Network forms of organization, Research in Organizational Behavior 12 (pp 295-336), 1990

Assessment: Essay (50%, 3000 words) in the ST.
Presentation (20%) and policy memo (30%) in the LT.
An essay of 3,000 words critically examining governance of a public service (preferably) in the student's own country (50%).
Presentations as a member of a seminar group in the weekly seminars (20%).
A policy brief for a minister, either for proposed reform or analysis of an existing market-based or network-based model of governance in action (30%).

MG4E7
Business Fundamentals

This information is for the 2017/18 session.
Teacher responsible: Prof Amitav Chakravarti NAB 5.13
Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.
This is a non-assessed introductory course.
Course content: The aim of the introductory Core is to deliver all business prerequisites to incoming students. Broadly, there will be three kinds of course materials covered during these two weeks. Some modules will cover basic statistical knowledge that is becoming absolutely essential in the current age of Big Data. Other modules will explore the various functional arenas (operations, finance, entrepreneurship, strategy, marketing,) and how they integrate within companies and organizations. Besides providing an integrated understanding of how business works, these modules also assist in career planning, coaching for marketing problem solving (e.g., as is common in consulting and/or case study-based interviews), with a broad understanding of the numerous options for internships, employment, companies, functions, and roles.
Teaching: 30 hours of lectures in the MT.
30 hours of teaching over two weeks prior to the Michaelmas Term. Full details of this will be sent to offer holders as part of their offer pack. The schedule will also include a full programme of activities and talks designed to welcome you to the LSE and the MSc Marketing programme.
Formative coursework: No formal assessment.
Indicative reading: Statistics: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). Statistics for Business and Economics (2nd edition), Hampshire: Cengage Learning. Huff (1991). How to Lie with Statistics. Penguin. Accounting: Boakes, K. (2010). Reading and Understanding the Financial Times. (2nd edition), Harlow: FR Prentice Hall; and Parker, R. (2007). Understanding Company Financial Statements. (6th edition), London: Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). Essential Mathematics for Economic Analysis. Prentice Hall; and Jacques, I. (2010). Mathematics for Economics and Business. (7th edition), Pearson. Writing skills: Wallace, M. and Wray, A. (2011). Critical Reading and Writing for Undergraduates (2nd edition), London: Sage.
Assessment:
No formal assessment.

MG4E8 Half Unit
Principles of Marketing

This information is for the 2017/18 session.
Teacher responsible: Prof Amitav Chakravarti NAB 5.13
Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.
Pre-requisites: Completion of the MSc in Marketing pre-sessional course, MG4E7 Business Fundamentals.
Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies and data analysis to develop participant's skills at analysing and making sense of complex real world business situations.
Teaching: 30 hours of lectures in the MT. 2 hours of lectures in the ST.
30 hours of lectures in the MT, concentrated in weeks 1-5 of term. This course is a pre-requisite to MG4E9 Marketing Analytics I which takes place in the latter part of the MT. 2 hours of review lectures in the ST.
Formative coursework: Students will be expected to produce 1 case study in the MT.
The formative coursework will be an in-depth case analysis, with two components to it. One component will help prepare participants for the Marketing Project (i.e., more conceptual applications, using social science theories and frameworks to make sense of real-life "messy" cases), and the other component will help prepare participants for the Final Exam (i.e., application of theoretical as well as more analytical frameworks and data analysis that has a more clear pattern of right or wrong answers).
Indicative reading:
- Alex Chernev (2011), Strategic Marketing Management (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), Principles of Marketing (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), Marketing Management (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), Marketing Management: A Contemporary Perspective, McGrawHill
- Jobber, D. (2010), Principles and Practice of Marketing (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), Market-driven management: Strategic and operational marketing (2nd edition). London: Palgrave Macmillan

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.
Assessment: Exam (50%, duration: 3 hours) in the main exam period.
Presentation (40%) and class participation (10%) in the MT.
The presentation will involve a Group Project in the MT.

MG4E9 Half Unit
Marketing Analytics I: Consumer Analysis Fundamentals

This information is for the 2017/18 session.
Teacher responsible: Leandro Galli
Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.
Pre-requisites: Completion of the MSc in Marketing pre-sessional course, MG4E7 Business Fundamentals.
Course content: This course lays down the foundations of Marketing Analytics which is an absolute essential in the age of Big Data. The broad objective of this course is to provide a fundamental understanding of marketing analytics and research methods employed by well-managed firms. The course focuses on integrating problem formulation, research design, questionnaire construction, sampling, data collection and data analysis to yield the most valuable information. The course also examines the proper use of statistical applications as well as qualitative methods, with an emphasis on the interpretation and use of results. Since analytics is the discovery and communication of meaningful patterns in data, this course will also provide students with an analytics toolkit, reinforcing basic probability and statistics while throughout emphasizing the value and pitfalls of reasoning with data. Applications will focus on connections among analytical tools, data, and business decision-making. Advanced analytical tools will be discussed in-depth in the follow-up course Marketing Analytics II.
Teaching: 30 hours of lectures in the MT. 2 hours of lectures in the ST.
30 hours of lectures in the MT, concentrated in weeks 7-11 of term.

This course follows MG4E8 Principles of Marketing which takes place in the first part of the MT. 2 hours of review lectures in the ST.
Formative coursework: Students will be expected to produce 1 case study in the MT.
The formative coursework will be an in-depth case analysis, with two components to it. One component will help prepare participants for the Marketing Analytics Project (i.e., more conceptual applications, using social science theories and frameworks to make sense of real-life "messy" data), and the other component will help prepare participants for the Final Exam (i.e., application of theoretical as well as more analytical frameworks and data analysis that has a more clear pattern of right or wrong answers).
Indicative reading:
- Churchill, Gilbert A. Jr., and Dawn Iacobucci. Marketing Research: Methodological Foundations. 8th ed. Chicago: The Dryden Press, 2002.
- Lehmann, Donald, Market Research and Analysis, Homewood, IL: Irwin (1989)
- Burchill, G. and C. H. Brodi, Voices Into Choices: Acting on the Voice of the Customer, Oriel Incorporated, 1997
- McQuaire, E. F. (1993), Customer Visits: Building a Better Market Focus, Newbury Park, Sage.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Presentation (30%) and class participation (10%) in the MT.

MG4F1 Half Unit
Marketing Action Learning Project

This information is for the 2017/18 session.
Teacher responsible: Prof Amitav Chakravarti NAB 5.13
Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.
Pre-requisites: Completion of the MSc in Marketing pre-sessional course, MG4E7 Business Fundamentals.
Course content: For the Marketing Project, each team selects a target issue for an organization and uses the marketing techniques developed in the course to arrive at a recommendation. The Marketing Project is aimed at producing an in-depth report that provides two critical classes of information: (a) Section 1 tells us how a "live" business is being run and what makes it tick (or not) from a marketing value-creation point of view, and (b) Section 2 provides data-based, scientific analysis of what the firm could do better for a more sustainable and competitive future. For details on the Marketing Action Learning Project please see Appendix at the end of this document.
Teaching: 6 hours of lectures in the MT.
Two formal lectures, plus individual appointments through MT, LT and ST with groups to discuss their chosen projects.
Formative coursework: Students will be expected to produce 2 exercises in the MT and LT.
Each term (end of MT and middle of ST) will have a deliverable ("mid-term report") associated with it; the grading of these deliverables (mid-term report 1 and 2) will serve as formative assessments, which will hopefully be used by the students as feedback for the final report.
Indicative reading:
- Building a Marketing Plan, by Ho Yin Wong; Kylie Radel; Roshnee Ramsaran-Fowda, Harvard Business School Publishing.
- Writing Great Marketing Plans, 2005, by T. Caulkins, Kellogg's/ Northwestern University.
- The Marketing Plan Handbook Paperback – 1 Sep 2011 by Alexander Chernev

Assessment: Project (90%) in August.
Class participation (10%) in the MT, LT and ST.

MG4F2 Half Unit
Marketing Analytics II: Analytics for Managing Innovations, Products and Brands

This information is for the 2017/18 session.
Teacher responsible: Prof Om Narasimhan NAB.5.06
Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing, MSc in Strategic Communications and TOMNCEMS. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: For MSc in Marketing students - completion of MG4E9 Marketing Analytics I: Consumer Analysis.
For non-MSc in Marketing students - completion of MG4B3 International Marketing: A Strategic Approach or MG4E2 Marketing Management.
Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.
Course content: Marketing managers make ongoing decisions about product features, prices, advertising (online and offline), distribution options, sales compensation plans, and so on. In making these decisions, managers choose from among alternative courses of action in a complex and uncertain world. Increasingly, in this age of Big Data, companies that emerge as market leaders tend to be the ones that employ sophisticated Marketing Analytics. This sequel course in Marketing Analytics will entail a deep-dive into the state-of-the-art Marketing Analytics models that allow managers to make scientific decisions regarding launching new products or innovations and managing more mature products and brands.
Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce 1 case study in the LT.
The formative coursework will be an in-depth case/mini-dataset analysis, with two components to it. One component will help prepare participants for the Marketing Analytic II Project (i.e., more conceptual applications, using social science theories and frameworks to make sense of real-life "messy" cases), and the other component will help prepare participants for the Final Exam (i.e., application of theoretical as well as more analytical frameworks and data analysis that has a more clear pattern of right or wrong answers).
Indicative reading:
- Lilien GL, Kotler Ph, Moorthy KS. Marketing Models. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. Building Models for Marketing Decisions. Kluwer Academic Publishers: Dordrecht / Boston 2000.

- Little JDC. Models and Managers: The Concept of a Decision Calculus. Management Science 1970; 16: B466-B485.

Assessment: Exam (60%, duration: 3 hours) in the main exam period.
Presentation (30%) and class participation (10%) in the LT.

MG4F3 Half Unit
New Media Marketing: Managing Online and Social Media

This information is for the 2017/18 session.
Teacher responsible: Dr Mareike Möhlmann
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), Global

MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: For MSc in Marketing students - completion of the first term of the programme.
For non-MSc in Marketing students - completion of either MG4B3 International Marketing: A Strategic Approach or MG4E2 Marketing Management.
Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.
Course content: Marketing is evolving from an art to a science and decisions in new media are on the forefront of this transformation. This course is aimed at developing state-of-the-art knowledge in the area of online marketing (e.g., Google Adwords, banner ads, etc.) and social media (e.g., Twitter, Facebook, etc.). Many firms have extensive information about consumers' choices and how they react to marketing campaigns, but few firms have the expertise to intelligently act on such information. In this course, students will learn the scientific approach to marketing with hands-on use of technologies such as databases, analytics and computing systems to collect, analyze, and act on customer information. While students will employ quantitative methods in the course, the goal is not to produce experts in statistics; rather, students will gain the competency to interact with and manage a marketing analytics team. We will also look at the importance of networks in these environments with an in-depth introduction to the emerging fields of social dynamics and network science. Using simple yet powerful hands-on interactive models and exercises, the course will cover both theory and applications.
Teaching: 30 hours of lectures in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce 1 case study in the LT.
The formative coursework will be an in-depth case analysis of a new media company, with two components to it. One component will help prepare participants for the New Media Project (i.e., more conceptual applications, using social science theories and frameworks to make sense of real-life "messy" cases), and the other component will help prepare participants for the Final Exam (i.e., application of theoretical as well as more analytical frameworks and data analysis that has a more clear pattern of right or wrong answers).
Indicative reading: Larsen and Draper (2015), Internet Marketing Essentials, Digital textbook. Stephen and Bart (2015), Social Media Marketing: Principles and Strategies, Digital Textbook. Multivariate Data Analysis (7th Edition) 7th Edition, by Joseph F. Hair Jr (Author), William C. Black (Author), Barry J. Babin (Author), Rolph E. Anderson (Author)
Assessment: Exam (50%, duration: 3 hours) in the main exam period.
Presentation (40%) and class participation (10%) in the LT.
Exam (50%, duration: 3 hours)
Group Project (40%, assessed presentation) in the LT.
Class participation (10%)

MG4F4 Half Unit
Strategy and Innovation in a Global Context

This information is for the 2017/18 session.
Teacher responsible: Dr Lourdes Sosa NAB 5.19
Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.
Course content: This course focuses on understanding the drivers of differences in profitability among firms in our economy, both in the short and long term. The overarching teaching objective is to learn to design managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future. Consequently, the course's topics are in a necessary sequence moving from short-term concepts such as industry factors to long-term concepts such as disruptive innovation.
A suggested list of topics to be covered by lecture is as follows:
1. Introduction and the Concept of Business Model
2. Average Industry Profitability and Competition
3. Value Proposition and Strategic Resources
4. Cumulative Resources and Internal Organization
5. The Effect of Innovation on Competition and the Concept of Value Innovation
6. Disruptive Innovation and Competence Destruction
7. The Concept of Value Chain and Business Model Innovation
8. Organizational Ambidexterity and Dynamic Capabilities
9. Organizational Complexity and Strategy as "Simple Rules"
10. Fundamentals of Corporate Strategy and Final Remarks
This course provides an introduction to strategic analysis aiming to explain the design of managerial recommendations to improve and defend the competitive advantage of a firm both immediately (cross-sectional analysis) and in the future (longitudinal analysis). It requires significant use of analytical reasoning as well as the ability to switch between considering the big picture and the fine-grained detail. A key step for the learning objectives of the course is the completion of a 1-week trip to an economy where students will be able to see strategy in the making in its full natural context.
Teaching: 10 x 180 minute seminars in the period after exams and summer term plus a week study trip abroad.
Formative coursework: Students will be expected to produce 1 presentation in July.
Indicative reading:
1. Barney, J.B. 1995. Looking Inside for Competitive Advantage. Academy of Management Executive.
2. Christensen, C.M., Bower, J.L. 1996. Customer Power, Strategic Investment and the Failure of Leading Firms. Strategic Management Journal.
3. Dierickx, I., Cool, K. 1989. Asset Stock Accumulation and Sustainability of Competitive Advantage. Management Science.
4. Sosa, L. 2011. From Old Competence Destruction to New Competence Access: Evidence from the Comparison of Two Discontinuities in Anticancer Drug Discovery. Organization Science.
5. Winter, S.G. 2003. Understanding Dynamic Capabilities. Strategic Management Journal.
Assessment: Essay (100%, 2000 words) post-summer term.
This course is assessed on a report that makes use of the concepts from the course and their application illustrated in the international trip. Details will be discussed during lectures.

MG4F5 Half Unit
Business in the Global Environment

This information is for the 2017/18 session.
Teacher responsible: Dr Veronica Rappoport-Redondo NAB 5.29
Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.
Course content: In this course we study two key components of the process called 'globalisation'. First, we consider the negotiation, implementation and implications of international trade agreements. These include the World Trade Organisation and the fast-growing web of regional trade agreements. Second, we look at the process of globalisation at the level of industries, firms and nations. We seek a solid understanding of the external, economy-wide factors that affect the performance and management of firms in today's global economy. The course relies on recent theoretical and empirical research. Topics include the changing structure of industries, the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and the differences between countries in their institutions and policies.
Course topics:

1) Globalisation: trends in the global economy, overview of their causes and effects
2) The workings, accomplishments and shortcomings of the GATT/WTO system
3) Trade barriers: causes and consequences of restrictions to international trade
4) The economics and politics of international trade agreements
5) Implications of trade agreements for national and multinational firms
6) Location of Production: Theory of Comparative Advantages
7) Location of Production: Factor Endowments across countries
8) Location of Production: Testing empirically the predictions of the theory
9) Location of Production: Empirical Analysis, institutions as a source of competitive advantage
10) Foreign Direct Investment and International Contracts

Teaching: 10 x 180 minute seminars in the period after exams and summer term
Formative coursework: Students will be expected to produce 2 problem sets in July.
Indicative reading: Giorgio Barba Navaretti & Anthony J Venables, Multinational Firms in the World Economy, Princeton, 2004. Robert Feenstra and Alan Taylor, International Economics, Worth Publishers, 2008. Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004. The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.
Assessment: Project (40%) in August.
Take home exam (60%).

MG4F6
Leadership in Practice

This information is for the 2017/18 session.
Teacher responsible: Mr Dan White
Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.
This is a core, non-assessed module in the summer.
Course content: This is a leadership development course intended to build specific skills required by leaders in organisations. Students who want to understand leadership theory should take MG4D5 Leadership: Theory and Practice during Lent Term as this course will not cover leadership theories. Each session of this course will focus on a different skill, including coaching, team leadership, performance management, presentation skills, upward management, giving and receiving feedback, and facilitating creativity. The instructor will provide a framework for learning the skill, then students will engage in interactive exercises to practice the skill and give each other feedback. By the end of the course, students will have acquired a set of leadership skills along with individual feedback from their peers that helps them gauge how well they have learned those skills.
Teaching: 6 x 180 minute seminars in the period after exams and summer term.
Formative coursework: Students will practice the leadership skills in class and receive feedback from their peers and the instructor. They will keep a learning log and use that information to complete a personal development plan (PDP) at the end of the course.
Indicative reading: There is no required textbook for this course. For students who are interested, a recommended textbook is: Yukl, G.A. (2012) Leadership in Organizations, 8th ed. Essex: Pearson Education Limited.
Assessment: This is a non-assessed course.

MG4F7 Half Unit
Business Analysis

This information is for the 2017/18 session.
Teacher responsible: To be confirmed.
Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.
Course content: The course is designed to achieve an understanding of fundamental notions of data presentation and data analysis and to use statistical thinking in the context of business problems. The course deals with modern methods of data exploration (designed to reveal unusual or problematic aspects of databases), the uses and abuses of the basic techniques of inference, and the use of regression as a tool for management and for financial analysis.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 project in the MT.
The formative will be an in-depth coursework, with two components to it. One component will help prepare participants for the Project (i.e., an application of a statistical technique to solve a company problem or research question), and the other component will help prepare participants for the Final Exam (i.e., a small problem set on which they will be tested).
Indicative reading:
- Statistics for Business Decision Making and Analysis, by Robert Stine and Dean Foster (S & F) second edition Pearson.
- An Essential Guide to Business Statistics by Dawn A. Willoughby April 2015
- Applied Business Statistics: Making Better Business Decisions, 7th Edition International Student Version
- Basic Econometrics, Oct 8, 2008 by Damodar Gujarati and Dawn Porter
- Multivariate Data Analysis (7th Edition), Joseph F. Hair Ronald L. Tatham Rolph E. Anderson William Black

Assessment: Project (35%, 3000 words), class participation (15%) and take home exam (50%) in the MT.

MG4F8 Half Unit
Social Innovation and Entrepreneurship II

This information is for the 2017/18 session.
Teacher responsible: Prof Saul Estrin NAB 4.24
Economic approaches - Saul Estrin
Quantitative Methods - Yally Avrahampour
Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.
Course content: The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises. Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life empirical phenomena and problems through interactive lectures, facebook discussions, cases, empirical studies, videos, but most importantly building to individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/dissertation course.
More specifically, students learn:
- Key theoretical approaches (economic and quantitative methods which comprise accounting and quantitative statistics) to understanding social innovations and entrepreneurship;
- Empirical findings - typically from recent management research and related fields; this is a young field - on how management aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important marketing and organisational behaviour (e.g. leadership, motivation, team development) insights, concepts, theoretical approaches to set-

up, manage, and scale up social innovation and enterprises;
- Relating theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems, through a group project;
- Also importantly this course provides essential knowledge for the individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/ dissertation course.

Teaching: 30 hours of lectures in the LT.
Five weeks will focus on core insights from economics applied to social enterprises (such as scale) and the other five weeks will focus on quantitative methods (accounting and quantitative statistics) to address issues related to the double bottom line (abbreviated as DBL or 2BL) which seeks to extend the conventional bottom line, that measures social enterprise performance with respect to social impact.
An introductory session will take place prior to the commencement of the quantitative methods portion of the course.
Formative coursework: Students will be expected to produce 1 essay in the LT.
The formative essay is a voluntary 'pre-run' of a summative essay, where the academic insights of the course are combined and synthesised with new insights sourced from academic literature by the student. Students receive feedback on their formative essay in the same way they get feedback on the summative essay.

Kramer, "Measuring Innovation: Evaluation in the Field of Social Entrepreneurship," April 2005, http://community-wealth.org/sites/clone.community-wealth.org/files/downloads/report-kramer.pdf
Assessment: Essay (90%, 3000 words) and class participation (10%) in the LT.

MG4F9 Half Unit
Social Innovation and Entrepreneurship I

This information is for the 2017/18 session.
Teacher responsible: Prof Harm Barkema NAB 4.24
Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.
Course content: The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises. Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life empirical phenomena and problems through interactive lectures, facebook discussions, cases, empirical studies and videos. In a very practical sense, students will apply this knowledge in a group marketing project and will grapple with effecting social change in relation to such topics as team management, motivation and cross-sector collaboration in the OB portion of the course.
More specifically, students learn:
- Key theoretical approaches (viz organisational behaviour and marketing) to understanding social innovations and entrepreneurship;
- Empirical findings - typically from recent management research and related fields; this is a young field - on how management aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important marketing and organisational behaviour (e.g. leadership, motivation, team development) insights, concepts, theoretical approaches to set-up, manage, and scale up social innovation and enterprises;
- Relating theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems, through a group project;
- Also importantly this course provides essential knowledge for the individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/ dissertation course.

Teaching: 15 hours of lectures in the MT.
Five weeks will focus on core insights from organisational behaviour and five weeks will focus on marketing with the aim of imparting key managerial knowledge and skills required to catalyse the changes required to launch and lead successful entrepreneurial ventures in social innovation.
Reading week in Week 6 in line with Department of Management policy.
Formative coursework: Students will be expected to produce 1 essay in the MT.
The formative essay is a voluntary 'pre-run' of a summative essay, where the academic insights of the course are combined and synthesised with new insights sourced from academic literature by the student to analyse a real life case. Students received feedback on their formative essay in the same way they get feedback on the summative essay.
Indicative reading: Karnani, A., 2007. The Mirage of Marketing to the Bottom of the Pyramid: How the Private Sector Can Help Alleviate Poverty. California Management Review 49 (4), 90-111. The Journal of Applied Behavioral Science, September 2004; vol. 40, 3: pp. 260-282.
Assessment: Project (45%, 2500 words) and class participation (10%) in the MT.
Essay (45%, 2500 words) in the LT.

MG4G1 Half Unit
Understanding Social Problems for Innovation and Entrepreneurship

This information is for the 2017/18 session.
Teacher responsible: Prof Harm Barkema NAB 4.24
Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.
Course content: A key insight of social innovation and enterprise is that the type of management solution (unlike traditional management solutions) depends entirely on – and varies with – the type of social problem at hand. Hence, social innovation and enterprise starts with understanding the social problem it seeks to address. This course starts with a rigorous examination of key insights, concepts and theoretical frameworks (economic, psychological, sociological perspectives) that are essential in understanding social problems for social innovation. Applied to globally identified core challenges: the Sustainable Development Goals (on poverty, health, education, and the natural environment). The theory will be taught through interactive lectures, FB discussions where students post and discuss new contributions, cases, empirical studies, and videos.
Next, the course continues with classes teaching (qualitative) methodologies, methods and tools, which are applied by student teams to a real life case/problem in one of the SDG domains and

presented and discussed in class as a pedagogical device.
Finally, two integration classes, where student teams synthesize and apply theory (insights, concepts, frameworks) and methodology (methods, tools) to their real life case/problem and develop an initial proposal for social innovation and enterprise, presented and discussed in class.
More specifically, students learn:
- Key theoretical approaches (economic, psychological, sociological) to understanding social problems underlying social innovation and entrepreneurship;
- How to apply these core theoretical approaches to a broad but important class of real life challenges, as addressed by the Sustainable Development Goals;
- Empirical findings – from social science research – on how social problems differ across contexts (cultural, economic, sociological, political);Core methodological approaches (methods and tools of qualitative analysis) to analyse real-life social problems;Synthesizing and relating theoretical and methodological insights, concepts, and frameworks, to understanding social problems, as applied to a real life case;
- More fundamentally, learning how and why management solutions in the domain of social innovations and social enterprise are not generic but always 'contextualized,' and depend on the specific social problem, and how core theoretical approaches and methodologies can be used to develop an evidence-based understanding of the local social problem at hand, as a starting point for designing social innovations and enterprises (developed further in MG4G2 Social Innovation Design).

Teaching: 15 hours of lectures and 15 hours of classes in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
The formative essay is a voluntary 'pre-run' of the individual summative essay, where the academic insights of the course are combined and synthesized with new insights sourced from the academic literature by the student to (theoretically) analyse a real life social problem (with suggestions for which methodology to apply & how and why). Students receive feedback on their formative essay in the same way they get feedback on the summative essay (although for the summative essay, they are not allowed to select the same social problem again).
Indicative reading: Beteille, A. (2003). Poverty and inequality. Economic and Political Weekly, 4455-4463. Wright, E.O., 2009, Understanding class, New Left Review, Nov-Dec. Banerjee, A. The microfinance promise. Journal of economic literature, 37(4), 1569-1614. Shakya, Y. B., & Rankin, K. N. (2008). The politics of subversion in development practice: an exploration of microfinance in Nepal and Vietnam. The Journal of Development Studies, 44(8), 1214-1235.
Assessment: Project (45%), essay (45%, 1500 words) and class participation (10%) in the MT.

MG4G2 Half Unit
Social Innovation Design

This information is for the 2017/18 session.
Teacher responsible: Prof Harm Barkema NAB 4.24
Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.
Course content: The course provides a rigorous overview of insights, concepts, frameworks, methods and tools for social innovation design, ranging from business model innovation to social innovation. The pedagogy implies interactive class and FB discussions (with other students and our social innovation and enterprise alumni), cases, videos, and most importantly, synthesizing insights and relating them to real life social (or environmental) problems by designing a new social enterprise.
This course – in the Lent term – directly builds on the MT courses MG4G1 Understanding Social Problems for Innovation and Entrepreneurship and MG4F8 Social Innovation and Entrepreneurship I. This course will have the same student teams as in MG4G1 Understanding Social Problems for Innovation and Entrepreneurship that culminated in developing an actual, initial idea/ proposal for problem-based intervention. This proposed idea is the starting point for the management design project in this course.
More specifically, students learn:
- Empirical findings – typically from recent management research and related fields; this is a young field – on social implications of a variety of social innovation designs; moderators; how these implications differ across contexts (cultural, economic, sociological, political);
- A rigorous framework synthesizing insights, concepts, methodologies/frameworks, and tools for social innovation design, including for extreme affordability (based on the course material developed at the LSE over the past ten years in MG437 and MG438, and other LSE courses);
- Synthesizing and relating theoretical and methodological insights, concepts, and frameworks for social innovation and enterprise to real world phenomena and problems, by designing an actual social enterprise;
- How social innovation designs are contingent – and can vary strongly – depending on the identified social problem.

Teaching: 15 hours of lectures and 15 hours of classes in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
The formative essay is a voluntary 'pre-run' of the summative essay, where the academic insights of the course are combined and synthesized with new insights sourced from the academic literature by the student to design an actual social enterprise. Students receive feedback on their formative essay in the same way they get feedback on the summative essay (although for the summative essay, they are not allowed to select the same design again).
Indicative reading: Abrahamson, E., 1996, Management Fashion, Academy of Management Review, vol. 21, 254-285. Abrahamson, E. and Fairchild, 1999, Management Fashion: Lifecycles, Triggers and collective learning processes, Administrative Science Quarterly, 708-740. Ana María Peredo and James J. Chrisman, Toward a Theory of Community-Based Enterprise, ACAD MANAGE REV April 1, 2006 31:2. Johnson, M. W., Christensen, C. M., Kagermann, H. , 2008. Reinventing your business model. Harvard Business Review 86(12), 50-59. Yunus, M., Moingeon, B., & Lehmann-Ortega, L. (2010). Building social business models: lessons from the Grameen experience. Long range planning, 43(2), 308-325. Dees, J. G., Anderson, B. B., & Wei-Skillern, J. (2004). Scaling social impact. Stanford social innovation review, 1(4), 24-32. Seelos, C., & Mair, J. (2005). Social entrepreneurship: Creating new business models to serve the poor. Business horizons, 48(3), 241-246.
Assessment: Project (45%), essay (45%, 1500 words) and class participation (10%) in the LT.

MG4G3 Half Unit
Designing and Managing Change in the Public Sector (H)

This information is for the 2017/18 session.
Teacher responsible: Dr Simon Bastow NAB 4.19
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS

MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority will be given to students from the Department of Management's MSc programmes for any outside option spaces.
Course content: The course focuses on important challenges for governments in both developed and developing countries in being able to design and manage transformative change in their public sector systems. Pressures on these governments to tackle 'wicked' problems, become more productive, build capacity, be more agile or innovative, or respond to rapidly changing environments make it ever more important that change is designed and managed carefully, and with some degree of success. The course looks at factors explaining governments' ability to adapt strategically to rapidly changing external environments, and also examines why public sector organisations may succeed or struggle in designing and delivering large-scale programmes of change.
MG4G3 integrates key theory, concepts, and extensive empirical case-based material. It introduces design-based and holistic approaches to change, examines important component aspects, and discusses limitations that constrain governments and public sector organizations in their ability to design, manage and ultimately deliver successful change.
The course looks at these challenges primarily from this perspective of the senior public sector officials involved, working at the interface of high politics, policy making, and operational delivery. It draws on cases from a wide range of sectors and policy areas, particularly core areas of public sector services such as criminal justice, health, welfare and defence. The course covers a broad range of literature and cases from developed and developing countries.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
Students on this course will have a reading week during Week 6, in line with Department of Management policy..
Formative coursework: Students will receive feedback on class seminar presentations in the MT.
Students will have the option to submit a formative essay by the end of the MT.
Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, management economics, public management and administration and organizational psychology amongst other disciplines. Some indicative readings throughout the course include:

- Kelman, Steven (2005) Unleashing Change: A Study of Organizational Change in Government (Brookings Institution Press: New York)
- Painter, M. and Pierre, J. eds. (2005) Challenges to State Policy Capacity: Global Trends and Comparative Perspectives (Basingstoke, UK: Palgrave Macmillan)
- Roberts, John (2004) The Modern Firm (Oxford, Oxford University Press)
- Simon, Herbert A. (1996) Administrative Behaviour. 4th Edition. (Simon and Schuster)
- Bryson, J. M. (2011). Strategic planning: For Public and Non-Profit Organizations: A Guide to Strengthening and Sustaining Organizational Achievement (San Francisco, Jossey-Bass).
- Hood, Christopher. (1998). The Art of the State: Culture, Rhetoric and Public Management. (Oxford, Oxford University Press)
- Schein, Edgar H. (2010) Organizational culture and leadership (San Francisco, John Wiley & Sons Inc.)
- Brehm, J. and S. Gates (1999). Working, Shirking, and Sabotage: Bureaucratic Response to a Democratic Public. (Michigan, The University of Michigan Press)
- Hood, C. and Margetts, H. (2007). The Tools of Government in the Digital Age. (Basingstoke, Palgrave MacMillan).
- Weick, Karl. E., (1995) Sensemaking in Organizations (London: Sage).

Assessment: Essay (70%, 4000 words) in the LT.
Presentation (10%) and other (20%) in the MT.
An essay of 4,000 words in response to one of the set essay questions – to be submitted by end of Week 6 in the Lent Term (70%)
An individual presentation in seminar on a set topic (four slides max.) (10%)
Written analysis of 1,500 words to accompany the slides (20%)

MG4G4 Half Unit
Topics in Management Research

This information is for the 2017/18 session.
Teacher responsible: Prof Diane Reyniers NAB5.22
Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit. Students must have prior knowledge of microeconomics and econometrics.
Pre-requisites: Microeconomics and econometrics (equivalent to LSE UG courses MG207 and MG205).
Course content: This course addresses various topics in management research which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.
The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether steeper incentives lead to better performance. The main objective of the course is to enable students to comprehend and critically assess the literature on selected management topics, to evaluate statements in terms of evidence and to detect false reasoning or logic.
Topics vary each year (based on student feedback) but examples are Racial discrimination, Negotiation, Experiments on Incentives, Placebo effects of price, Leadership.
Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of seminars in the LT.
Students on this course will have a reading week in Week 6, in line with Departmental policy.
Formative coursework: Two mock exams in the MT.
Indicative reading: A course pack containing all materials (lecture slides, articles, seminar sheets) will be available to students taking the course. The following readings are indicative only as topics vary:
Lecture 1: The IKEA effect and ideas
Hooshangi, S. & G. Loewenstein (2016) The impact of idea generation and potential appropriation on entrepreneurship: an experimental study. Management Science.
Lecture 2: Choking
Ariely, D.; U. Gneezy, G. Loewenstein & N. Mazar (2009) Large stakes and big mistakes. Review of Economic Studies, 76 (2), 451-469.
Lecture 3: Does Management Matter?
Bloom, Nick and Van Reenen, John (2007) Measuring and explaining management practices across firms and countries. Quarterly Journal of Economics, 122(4), 1351-1408

Lecture 4: Racial discrimination
Bertrand, M. & S. Mullainathan (2004) Are Emily and Greg more employable than Lakisha and Jamal? A field experiment on labor market discrimination. American Economic Review, 94, 4, 991-1013.
Lecture 5: Behavioural economics at work
Blanes I Vidal, J. & M. Nossol (2011) Tournaments without prizes: Evidence from personnel records. Management Science, 57, 10, 1721-36.
Lecture 6: Marketing and placebos
Shiv, B.; Z. Carmon & D. Ariely (2005) Placebo effects of marketing actions: consumers may get what they pay for. Journal of Marketing Research, XLII (November), 383-393.
Lecture 7: Creativity and cheating
Gino, F. & D. Ariely (2012) The dark side of creativity: Original thinkers can be more dishonest. Journal of Personality and Social Psychology, 102 (3), 445-459.
Lecture 8: The dark side of leadership
Nevicka, B.; F.S. Ten Velden, A.H.B. De Hoogh & A.E.M. Van Vianen (2011) Reality at odds with perceptions: Narcissistic leaders and group performance. Psychological Science, 22, 10, 1259-64.
Lecture 9: Do we know what we want?
Ariely, D; G. Loewenstein & D. Prelec (2003) "Coherent arbitrariness": stable demand curves without stable preferences. Quarterly Journal of Economics, 118, 1, 73-106.
Lecture10: Negotiation
Small, D. A., M. Gelfand, L. Babcock & H. Gettman (2007) Who goes to the bargaining table? The influence of gender and framing on the initiation of negotiation. Journal of Personality and Social Psychology, 93, 4, 600-613
Bowles, H.R., L. Babcock &L. Lai (2007) Social incentives for gender differences in the propensity to initiate negotiations: Sometimes it does hurt to ask. Organizational Behavior and Human Decision Processes, 103, 84-103.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MG4G5 Half Unit

Dissertation: Social Innovation and Entrepreneurship

This information is for the 2017/18 session.
Teacher responsible: Prof Harm Barkema NAB 4.24
Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.
Course content: The dissertation (in the form of a Capstone) gives an opportunity to apply, integrate, and deepen the knowledge, insights, and skills that the students have learned in the master's programme, in relation to a real-world issue (consulting project or designing a new social enterprise) or a research topic, consistent with the core philosophy of the master's programme. More specifically, students will be able to choose between:
1) An individual consulting project. In the projects students apply and integrate what they learned in the previous courses in terms of theory, evidence, methodologies, and tools, as well as individually research new ones from the relevant academic literature. These insights are related to an external consulting project, and combined with data collection (tapping into the acquired methodological knowledge, and deepened further during the thesis project, leading to an evidence-based analysis and recommendations. A major criteria for evaluation will be the way theory/research from academic journals as taught in the program and independently sourced as part of the project, will be reflected in the analysis and thesis report.
2) An individual design of a new social enterprise. In the design students apply and integrate what they have learned in previous courses in terms of theory, evidence, methodologies, and tools, as well as individually research new ones from the relevant academic and design literatures. These insights are related to a real world problem, in terms of understanding the social problem, and combined with data collection (tapping into the acquired methodological knowledge, and deepened further during the design project, leading to an evidence-based design of a social enterprise). A major criterion for evaluation will be the way the theory/research from academic journals and design methodologies as taught in the program and independently sourced as part of the project, will be reflected in the design and thesis report.
3) An empirical research project (on the approval of the Programme Director). The empirical research project is the third way thesis students can relate academic research to a real world issue in their thesis project. IN the research project students apply and integrate what they have learned in previous courses in terms of theory, evidence, methodologies, and tools and, more than in the previous options perhaps, individually research new ones from the relevant academic literature, in an attempt to develop a novel theoretical contribution to understanding empirical phenomena in the domain of social innovation and enterprise. The theoretical insights are related to a real world problem/issue (in the domain of social innovation and enterprise) and combined with data collection (tapping into the methodological knowledge acquired during the course, and deepened further during the research project), leading to a qualitative or quantitative research project. A major criterion for evaluation will be the way the theory/research from academic literature taught in the program, and especially, sourced independently, are reflected in the research project and report.
Teaching: 2 hours of lectures in the MT. 2 hours of lectures in the LT.
Projects will be guided by a pool of 6-10 dedicated supervisors for these dissertations.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Each student will be required present an outline of the subject of his/her dissertation to their supervisor for ongoing review and development.
Indicative reading: An excellent guide to the stages of doing a dissertation is given by Wayne C. Booth, Gregory G. Colomb, ; Joseph M. Williams, The Craft of Research (Chicago Guides to Writing, Editing & Publishing). 2nd Edition. 1995, 2003 Series: (CGWEP) Chicago Guides to Writing, Editing, and Publishing. Partington, D. (2002) Essential Skills for Management Research. London. Sage Publications. Other readings will be provided during lectures and by dissertation supervisors subject to the nature of the project chosen.
Assessment: Dissertation (100%, 6000 words) in August.

MG4G7 Half Unit

Contemporary Topics in Advanced Technology Management

This information is for the 2017/18 session.
Teacher responsible: Dr Edgar Whitley NAB 3.32
Availability: This course is available on the MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: This course assumes a general knowledge of information systems and their management equivalent to MG472 Global Strategy, Management and Information Systems.
Course content: This course introduces students to two Contemporary Topics in Advanced Technology Management. It uses academic perspectives on the topics to provide a detailed contextualisation of technology's historical and intellectual development and combines this with practitioner perspectives to highlight the management challenges associated with these technological developments.
In the first year, the topics are expected to be Artificial intelligence

and Machine learning and Financial Technologies including Distributed Ledgers and Blockchains.
Teaching: 9 hours of lectures, 10 hours and 30 minutes of lectures and 9 hours of seminars in the LT.
The lectures will be split into three 3-hour sessions and seven 90-minute sessions – a detailed schedule is available on Moodle. A reading week will take place during Week 6. There will be no teaching during this week.
Formative coursework: Students will be expected to produce 2 presentations, 1 essay and 1 other piece of coursework in the LT.
Indicative reading: The reading list will be technology specific, and determined by the guest academics. As such, they are likely to vary from year to year. Detailed readings will be made available on Moodle.
Artificial intelligence and Machine learning
- Fogel, M. (2016). The 10 Best AI, Data Science and Machine Learning Podcasts, Medium (available at https://medium.com/startup-grind/the-10-best-ai-data-science-and-machine-learning-podcasts-d7495cfb127c#.v7943hwof).

Assessment: Essay (50%, 2500 words), presentation (15%), presentation (25%) and class participation (10%) in the LT.
The individual essay will focus on the emergent management challenges introduced by one advanced technology not covered in the lecture.

MG4G8
Human Resource Management Skills and Practitioner Speaker Series

This information is for the 2017/18 session.
Teacher responsible: Dr Juan Lopez-Cotarelo
Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD). This course is not available as an outside option.
Course content: The course has a taught component, which is compulsory for all students in the stream, and a free-configuration component where students can choose among a variety of sessions that target specific skill development needs they have identified through their Skills Development Portfolio.
Taught sessions
There are 5 weekly sessions during Michaelmas Term (weeks 7 to 11). Sessions will combine lecture format with small group activities targeted at skill building. Topics are intended as follows:

Week	Topic
7	Evaluating HR initiatives
8	Costing HR initiatives
9	Selection Interviewing
10	Difficult Conversations
11	Ethics in HRM

Skills Development Portfolio
Students will plan their own individualised skills development, including the MG4XX free-configuration sessions, through the Skills Development Portfolio. The aim of this tool is to help each student identify gaps in their general and HRM management skills (as defined in CIPD's 7SBL module), plan for their development during their studies, and document achievements and newly developed skills at the end of the programme. Two submissions are required:
- A self-assessment and development plan, due in MT week 7.
- A portfolio documenting skill development and attainment, due in September 2018.

Free-configuration sessions
Students will be able to attend their choice of sessions within the HRO Speaker and Practitioner Panel series and LSE LIFE workshops to suit their development needs. Attendance to a minimum of 15 hours between the two is required.
- **HRO Speaker and Practitioner Panel Series**: The HRO team will arrange approximately 5 sessions with external speakers on topics that are relevant to our subject. These will typically be 2-hour evening sessions, and most will run during LT. A prospective programme will be announced in MT, and detailed arrangements publicised in due course.
- **LSE LIFE workshops**: LSE LIFE runs a broad range of 1-hour and 2-hour workshops on many topics that are relevant to the 7SBL module. Many of these sessions are run several times during MT and LT. Students will need to book a place in the relevant sessions themselves.

External activities
Where appropriate, students may apply to receive credit for attending an external session that is relevant to the 7SBL module and conducive to significant skill attainment. The decision to grant such credit will remain fully at the discretion of the MG4XX Course Leader and the HRO Programme Director, so students will be strongly advised to make their application before enrolment. No individual student will receive credit for external activities for more than 20% of the free-configuration requirement (i.e. 3 hours). We will not offer to fund external activities.
Teaching: 15 hours of lectures in the MT. 10 hours of lectures in the LT.
Please note that the LT sessions will take the form of a Speaker and Practitioner Panel Series.
Formative coursework: Students will receive written formative feedback on Sections 1 and 2 of the portfolio (Self-Assessment and Development Plan), due in MT week 7.
Indicative reading: N/A (this is a practical skills course)
Assessment: The course is not formally assessed.

MG4J1
Introduction to Mathematics and Data Analysis for Managers

This information is for the 2017/18 session.
Teacher responsible: Dr Ricardo Alonso NAB 5.31
Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.
Course content: The course is divided into two separate subjects: Data Analysis (Statistics) and Mathematics for Managers.
The Data Analysis (Statistics) course is for all students and covers

basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression. It also includes basic training on data analysis software (STATA). It provides students with the basic analytical tools required in MG4F7 Business Analysis to analyse business data for decision making. The Mathematics for Managers course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Basic Calculus, and Comparative Statics Analysis. It provides students with the basic analytical tools required in MG465 Operations and Managerial Economics to analyse supply chain models and models of product market and factor markets competition.
Teaching: 20 hours of lectures in the two weeks prior to the Michaelmas Term. There will also be some workshops and tutorial sessions for the statistics portion of the course, to support students preparing practical exercises. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.
Indicative reading: Statistics: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). Statistics for Business and Economics (2nd edition), Hampshire: Cengage Learning. Huff (1991). How to Lie with Statistics. Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). Essential Mathematics for Economic Analysis. Prentice Hall; and Jacques, I. (2010). Mathematics for Economics and Business. (7th edition), Pearson. Writing skills: Wallace, M. and Wray, A. (2011). Critical Reading and Writing for Undergraduates (2nd edition), London: Sage.
Assessment: No formal assessment. Students will sit a mock exam at the end of the statistics course based upon the material to aid learning.

MG4K3
MPA Capstone Project

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MPA in Social Impact. This course is not available as an outside option.
Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.
Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.
Indicative reading: Useful preliminary reading: Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979; Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Common Causes of Project Failure (London: OGC, 2004); Howard White, Theory-based Impact Evaluation: Principles and Practice (3ie, 2011); Curtis Cook, Just Enough Project Management (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, 'Dynamics in Groups and Teams: Groups as Complex Action Systems', chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).
Assessment: Project (100%, 15000 words) in the LT.
The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.
The group mark has three components:
1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item).
Additionally, each group member must complete the Capstone evaluation and personal reflection exercise. This will be submitted individually and separately from the report.

MG4K4
MPA Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option. Students may not take this course and an MPA Policy Paper.
Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their Academic Adviser. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.
Teaching: 6 hours of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises six seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; structuring and presenting policy analysis; and writing policy recommendations. The student's Academic Adviser will provide advice and guidance on this piece of work.
Indicative reading: David L. Weimer and Aidan R. Vining, Policy Analysis: Concepts and Practice, 5th ed. (Prentice Hall, 2010); Lisa Anderson ed., Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, A Primer for Policy Analysis (Norton, 1978); Anthony E. Boardman

et al., Cost-Benefit Analysis, 4th ed. (Prentice Hall, 2010); William N. Dunn, Public Policy Analysis: An Introduction, 4th ed. (Pearson, 2008); Eugene Bardach, Practical Guide for Policy Analysis, 4th ed. (CQ Press, 2011); Alec Fisher, The Logic of Real Arguments (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, Usable Knowledge: Social Science and Social Problem Solving (Yale University Press, 1979); Isabel Vogel, Review of the Use of 'Theory of Change' in International Development (DfID, 2012); Edward T. Jackson, Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most (Journal of Sustainable Finance and Investment, Vol 3, No 2, 95-110, 2013); Catherine Hakim, Research Design: Strategies and Choices in the Design of Social Policy, 2nd ed. (Routledge, 2000); Alan Bryman, Social Research Methods, 4th ed. (Oxford University Press, 2012); David Partington, Essential Skills for Management Research (Sage Publications, 2002); Diana Ridley, The Literature Review: A Step-by-Step Guide for Students (SAGE Study Skills Series, 2008); Christopher Hart, Doing Your Masters Dissertation (SAGE Study Skills Series, 2004); Patrick Dunleavy, Authoring a PhD (Palgrave Macmillan, 2003)
Assessment: Dissertation (90%, 10000 words) in the ST.
Other (10%) in the MT.
1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their Academic Adviser. Students will be given feedback on their proposal.
2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

MG4V8 Half Unit
MPA Policy Paper

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option.
Students may not take this course and an MPA Dissertation.
Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.
Teaching: 6 hours of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises six seminars in the MT and LT. These seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical frameworks; structuring and presenting policy analysis; and writing policy recommendations. The student's Academic Adviser will provide advice and guidance on this piece of work.
Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their Academic Adviser. Students will be given feedback on their proposal.
Indicative reading: David L. Weimer and Aidan R. Vining, Policy Analysis: Concepts and Practice, 5th ed. (Prentice Hall, 2010); Lisa Anderson, ed., Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, A Primer for Policy Analysis (Norton, 1978); Anthony E. Boardman et al., Cost-Benefit Analysis, 4th ed. (Prentice Hall, 2010); William N. Dunn, Public Policy Analysis: An Introduction, 4th ed. (Pearson, 2008); Eugene Bardach, Practical Guide for Policy Analysis, 4th ed. (CQ Press, 2011); Alec Fisher, The Logic of Real Arguments (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, Usable Knowledge: Social Science and Social Problem Solving (Yale University Press, 1979); Isabel Vogel, Review of the Use of 'Theory of Change' in International Development (DfID, 2012); Edward T. Jackson, Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most' (Journal of Sustainable Finance and Investment, vol. 3, No. 2, 95-110, 2013); Catherine Hakim, Research Design: Strategies and Choices in the Design of Social Policy, 2nd ed. (Routledge, 2000); Alan Bryman, Social Research Methods, 4th ed. (Oxford University Press, 2012); David Partington, Essential Skills for Management Research (Sage Publications, 2002); Patrick Dunleavy, Authoring a PhD (Palgrave Macmillan, 2003).
Assessment: Other (100%) in the ST.
6,000 word policy paper

MY400 Half Unit
Fundamentals of Social Science Research Design

This information is for the 2017/18 session.
Teacher responsible: Dr Alasdair Jones COL8.12
Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit. Research students please see MY500.
Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative and qualitative research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their dissertations.
Teaching: 20 hours of lectures and 8 hours of seminars in the MT.
Week 6 is a Reading Week during which students work independently on their first assignment.
Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). Real World Research. London: John Wiley.
Assessment: Research proposal (30%) and class participation (10%) in the MT.
Other (60%) in the ST.
Research Proposal assignment (1000 words), submitted in week 11 of MT (30%). Research Design (5000 words), submitted in Week 1 of ST (60%).

MY401 Half Unit
Research Design for Studies in Digital Innovation

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit Col 8.11 and Prof Chrisanthi Avgerou NAB 3.22
Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.
This course is compulsory on the MSc in Management of Information Systems and Digital Innovation.
Course content: This course will deliver the core methodological training for students completing a dissertation for the MSc in Management of Information Systems and Digital Innovation.
It covers issues of research design and research methods for information systems studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to information systems research. Drawing on a variety of examples in Information Systems, the course will provide the platform for students to consider a range of design options, as well as methodological techniques, to adopt in their own dissertations. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations.
The list of topics covered would consist of:
1. Introduction
2. Inference, causation, and treatment controls
3. Relationship between theory and data
4. Operationalization and measurement
5. Overview of Fixed versus flexible designs (survey of qualitative and quantitative strategies)
6. READING WEEK
7. Case study methods
8. Interviews and focus groups
9. Thematic analysis
10. Quantitative inference
11. The Analysis of Online and social media

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
Lectures for this course will be delivered by staff by the Department of Methodology. To help to contextualise the materials covered in the course for the students, and to ensure a good fit with the requirements of the MISDI dissertation, the seminars will be led by staff from the Department of Management. A formative assignment will be assigned for the middle of the teaching term (LT) for which students will be expected to submit a 1,000 word initial proposal for their dissertation.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Agresti, A. and Finlay, B. (2009) Statistical Methods for the Social Sciences [4th edition]. Prentice Hall. Bauer, M. and Gaskell, G. (2000) Qualitative Researching with Text, Image and Sound. Sage. Flick, U. (2014) An Introduction to Qualitative Research [5th edition]. Sage. King, G., Keohane, R. and Verba, S. (1994) Designing Social Inquiry. Princeton University Press. Robson, C. and McCartan, K. (2016) Real World Research [4th edition]. John Wiley. Seale, C. [ed.] (2004) Social Research Methods: A Reader. Routledge.
Assessment: Essay (100%, 2000 words) in the LT and ST.

MY405 Half Unit
Research Methods for Evaluation in Health, Development and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Flora Cornish COL.8.09
Availability: This course is available on the MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: There are no prerequisites but some familiarity with qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research. In the context of the rise of evidence-based policy, the course is designed to extend students' abilities to use evaluative information carefully and critically. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, process evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesising evidence. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.
10 x 1.5 hour lectures
9 x 1.5 hour seminars
Formative coursework: Students will be expected to produce 1 essay in the LT.
Students write a critical review (1,500 words) of a published evaluation report.
Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) Mastering Metrics: The Path from Cause to Effect. Princeton University Press. Bell, S. & Aggleton, P. (2016). Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives. London: Routledge. Cartwright, N. & Hardie, J. (2012). Evidence-Based Policy: A practical guide to doing it better. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) Running Randomized Evaluations: A Practical Guide, Princeton University Press. Patton, M. Q. (2015). Qualitative Research and Evaluation Methods. (4th Edition). London: Sage.
Assessment: Coursework (50%, 2500 words) in the LT.
Essay (50%, 2500 words) in the ST.
50% group-based coursework. Students work in groups to develop an evaluation design, and write it up individually (2,500 words).
50% essay. Students are given a choice of essay questions, in response to which they write one essay (2,500 words).

MY421 Half Unit
Qualitative Research Methods

This information is for the 2017/18 session.
Teacher responsible: Dr Eleanor Knott (MT) and Dr Flora Cornish, COL.8.09 (LT)
Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science, MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: None.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic, content, and discourse analysis. Issues of research design, quality indicators, epistemology and ethics are addressed.
This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY426 Doing Ethnography, MY427 Qualitative Research with Non-Traditional Data, or MY428 Qualitative Text Analysis.
Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.
The course runs twice per year: in MT (MY421M) and again in LT (MY421L). The content of the course is exactly the same in each term. Week 6 is a Reading Week during which students work independently on their formative assignments.
Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.
Indicative reading: M Bauer & G Gaskell, (2000) Qualitative Researching with Text, Image and Sound, London: Sage, U Flick, (2009) An Introduction to Qualitative Research, 4th edition, London: Sage. C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). Qualitative Research Practice. London: Sage. Please Note: No single publication covers the whole content of the course.
Assessment: Project (100%, 3000 words) in the ST.
The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods of data collection and analysis used.

MY426 Half Unit
Doing Ethnography

This information is for the 2017/18 session.
Teacher responsible: Dr Chana Teeger COL7.06
Availability: This course is available on the MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Marketing, MSc in Social Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data locally (interesting sites are chosen each year, e.g. the Occupy encampment at St Paul's, protests around London, volunteering activities), followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their formative assignments.
Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections, and brief interpretations of the significance of these observations. Written feedback will be provided.
Indicative reading: Bourgois, P. ; Schonberg, J. (2009). Righteous Dopefiend. University of California Press. DeWalt, K. M.,; DeWalt, B. R. (2002). Participant observation: A guide for fieldworkers. AltaMira Press. Emerson, R. M., Fretz, R. I., ; Shaw, L. L. (1995). Writing ethnographic fieldnotes. University of Chicago Press. Hammersley, M ; Atkinson, P. (2007). Ethnography: Principles in practice. Taylor ; Francis. Wacquant, L. (2004) Body and Soul: Ethnographic Notebooks of an Apprentice Boxer. New York: Oxford University Press.
Assessment: Essay (100%, 4000 words) in the LT.

MY427 Half Unit
Qualitative Research with Non-Traditional Data

This information is for the 2017/18 session.
Teacher responsible: Dr Jennifer Tarr COL8.06
Availability: This course is available on the MSc in Culture and Society, MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in Marketing and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is also available to PhD students, please see MY527.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. However, new technologies now offer a range of new tools for producing, gathering and analysing new kinds of data. This course will focus on three emerging strands: digital, visual and mobile methods. Additional sensory approaches will also be touched upon. Throughout, the focus will predominantly be on qualitative applications of these methods. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final research project on a topic of the students' choosing to be submitted at the beginning of summer term.
The course aims to understand how qualitative methods can be used in relation to these emerging streams of data. The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment. An optional enrichment activity may be assigned.

Formative coursework: Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.
Indicative reading: Note: No one text covers the whole course. Büscher M, Urry J, Witchger K (2011) Mobile Methods. Abingdon and New York: Routledge. Rose, G, 2016. Visual methodologies: An introduction to researching with visual materials. London: Sage. Rogers, R, 2013. Digital methods. Boston: MIT press. Pink, S, Horst H, Postill J, Hjorth L, Lewis T, Tacchi J. (2016) Digital Ethnography: Principles and Practice. London: Sage. Pink, S. (2009) Doing Sensory Ethnography, London: Sage.
Assessment: Project (100%, 4000 words) in the ST.
One 4000-4500 word research project related to the course material, on a topic selected by the student (100%).

MY428 Half Unit Not available in 2017/18
Qualitative Text Analysis

This information is for the 2017/18 session.
Teacher responsible: Dr Audrey Alejandro COL7.07
Availability: This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
The course is also available to PhD students, please see MY528.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure
Course content: The efficiency of power lies in its invisibility. Critical studies emphasise the need to take into account the implicit dimensions of the (re)production of the social and political order. But this theoretical standpoint raises a methodological challenge. As social agents ourselves, how do we assess the implicit, which by definition, we have been socialised not to perceive? How can we prove the implicit structuration of the world in a rigorous, empirical way? Focusing on discourses - the role they play in society, their relation to institutions, practices and perceptions - represents a stimulating and efficient method to address this challenge.
This course trains into the demanding craft of mapping the social and political implications of discourses and making explicit their implicit dimensions. It will mainly focus on Discourse Analysis but also covers other analytic traditions such as thematic analysis and content analysis. It introduces techniques and procedures available to researchers to identify and extract information from texts and speeches for social scientific purposes. Different types of materials will be investigated such as political speeches, news articles and cultural productions on a vast array of critical topics such as race or gender. The aim of this course is to equip participants with the right skills to engage the study of discourses and build critical thinking around those tools according to 1) Research Design 2) Type of data under consideration.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.
Formative coursework: A project proposal (c.1,000 words). Students write a proposal for the project that will comprise their summative assessment.
Indicative reading: Baker, P. and Ellece, S. (2010). Key Terms in Discourse Analysis, London: Continuum. Kendall, G. and Wickham, G. (1999) Using Foucault's Methods, London: Sage. Scheier, M. (2012) Qualitative Content Analysis. Sage, Thousand Oaks, CA. Sage, Thousand Oaks, CA. Seale, C., Gobo, G., Gubrium, J.F. and Silverman, D. (2004). Qualitative research practice. London: Sage, chapters 11-12.
Assessment: Essay (100%, 4000 words) in the LT.

MY429 Half Unit Not available in 2017/18
Special Topics in Qualitative Research: Introspection-based Methods in Social Research

This information is for the 2017/18 session.
Teacher responsible: Prof Martin Bauer Col.8.04
Availability: This course is available on the MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: The course will assume good knowledge of qualitative research methods as covered in MY421.
Course content: Course Description
Introspection comprises methods of empirically recording one's own subjective experience; the currently on-going, or perhaps very recently past, mental or emotional states and processes through methods of trained and technically supported self-observation. Historically, introspection is part of a quest of human self-knowledge and self-improvement. And a person's stream of consciousness is of interest in the social sciences, for example as reports of happiness or life satisfaction. Introspection has been difficult to verify, thus deemed not 'objective' and unscientific. The stream of consciousness (William James) was of interest mainly to literary elaboration. However, introspection-based methods survived and have re-emerged, not least because 1st person experience remains an indispensable source of evidence on an actor's states and processes that constrain and give meaning to human action. Not least recent advance in neurosciences accentuates the need for experience-focussed 1st person methods. Modern introspection-based methods are 'objectifications' of 1st person situated experiences in controlled settings that support episodic retention. Modern introspection-based methods create conditions which make immediate, pre-meditated experience less 'biased' and more accurate to record. This comprises techniques such as narrative and episodic interviewing, free-association techniques, survey-based reconstruction and attitudes, critical incident techniques, loud-thinking protocols, experience sampling and self-tracking methods, ecological momentary assessment, self-confrontation interviewing, and 1st person situated video methods, and auto-ethnography and the 'quantified self'. Many new techniques are mobile and adaptable to capture the fluid nature of mental and emotional states and processes. Miniature mobile devices for sound and video recording promise to overcome the bottlenecks that have hitherto plagued intensive and continuous introspection-based methods.
Learning Outcomes: Students on this course will
1) appreciate the long past, and the short history of introspection-based methods;
2) be familiar with a range of techniques of collecting introspective data;
3) know the problems of introspection–based methods and how different methods try to overcome them;
4) gain practical skills with modern introspection-based methods.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: One piece of assessed coursework (max. 1,500 words).
Indicative reading: A complete reading list will be provided at the beginning of the course.

Assessment: Coursework (100%, 3000 words) in the ST.
One 3,000 word written report (100%) on ONE from a choice of SEVERAL Take-home exercises. To be submitted at the beginning of the Summer term.

MY451 Half Unit
Introduction to Quantitative Analysis

This information is for the 2017/18 session.
Teacher responsible: Dr Benjamin Lauderdale Col.8.10 and Prof Jonathan Jackson Col.8.05
Availability: This course is compulsory on the MSc in Sociology (Research). This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in EU Politics, MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Health Policy, MSc in International Migration and Public Policy, MSc in Public Policy and Administration and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is also available to research students as MY551.
Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer classes give 'hands-on' training in the application of statistical techniques to real social science research problems using the SPSS computer package (no prior knowledge of SPSS is necessary).
Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST.
There will be no lectures or computer classes in Week 6 of the term.
This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY451M which is taught in Michaelmas Term, or MY451L which is taught in Lent Term.
Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.
Indicative reading: A course pack will be available for download online and can be purchases as a hard copy. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY451 and MY452.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
A two-hour open book unseen examination in ST.

MY452 Half Unit
Applied Regression Analysis

This information is for the 2017/18 session.
Teacher responsible: Mr Jack Blumenau COL8.02 and Dr Indraneel Sircar COL8.02
Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science, MSc in Political Science and Political Economy and MSc in Sociology (Research). This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MRes Political Science, MRes/PhD Political Science (Qualitative stream B), MRes/PhD Political Science (Quantitative stream A), MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Gender (Research), MSc in International Health Policy, MSc in Local Economic Development, MSc in Public Policy and Administration, MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.
MY452 is open to any and all post-grad students around the School who have already have a grounding in quantitative methods.
Pre-requisites: Students are required to have completed MY451 or an equivalent level statistics course
Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 20 hours of lectures and 10 hours of computer workshops in the LT.
This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY452M which is taught in Michaelmas Term, or MY452L which is taught in Lent Term.
There will be no lectures or computer classes in Week 6 of term.
Formative coursework: Class exercises and homework can be carried out using the Stata, SPSS or R software, according to the student's choice.
Indicative reading: A Agresti & B Finlay, Statistical Methods for the Social Sciences. A course pack will be available for download online and can be purchased as a hard copy. Additional reading will be recommended.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
A two-hour open book unseen examination in ST.

MY454 Half Unit
Applied Statistical Computing using R

This information is for the 2017/18 session.
Teacher responsible: Dr Benjamin Lauderdale COL.8.10
Availability: This course is available on the MSc in Social Research Methods. This course is available as an outside option to students

on other programmes where regulations permit.
The course is also available to research students, as MY554.
Pre-requisites: Students must have taken Applied Regression Analysis (MY452) or an equivalent intermediate regression course.
Course content: This course will cover basic statistical programming for social science research as well as several associated data analysis methods. Programming topics include basic programming, data structures, optimisation, and simulation. Applied statistical topics include nonparametric density estimation and regression, additive models, cross-validation, the bootstrap, and permutation/randomisation inference. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce 5 problem sets in the LT.
Each problem set is associated with a computer classes, and may be submitted for marking and feedback.
Indicative reading: Keele, L. Semiparametric Regression for the Social Sciences
Matloff, N. The Art of R Programming
Assessment: Exam (50%, duration: 2 hours, reading time: 5 minutes) in the main exam period.
Coursework (50%) in the ST.

MY455 Half Unit
Multivariate Analysis and Measurement

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL8.04
Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Marketing, MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is also available to research students as MY555.
Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452 (Applied Regression Analysis).
Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.
Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT. 1 hour of lectures in the ST.
Formative coursework: Exercises from the computer classes can be submitted for marking.
Indicative reading: D J Bartholomew, F Steele, I Moustaki; J I Galbraith (2008) Analysis of Multivariate Social Science Data (Second Edition).
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MY456 Half Unit
Survey Methodology

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL8.04
Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science. This course is available on the MSc in Marketing, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY452 or equivalent. MY456 can also be taken in parallel with MY452L. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.
Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys. Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be no lectures or computer classes in Week 6 of term.
Formative coursework: Exercises from the some of the seminars and computer classes are submitted for feedback
Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). Survey Methodology (2nd ed.). Wiley.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Project (50%, 2500 words).
The project is a report of approximately 20 to 30 pages, including tables and figures, or approximately 2,500 words, reporting the data analysis of a given research question and data set.

MY457 Half Unit
Causal Inference for Observational and Experimental Studies

This information is for the 2017/18 session.
Teacher responsible: Dr David Hendry
Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MPhil/PhD in Accounting, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.
Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and

observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer packages (Stata or R) are used for computation.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Formative coursework: Exercises from the computer classes are submitted for feedback.
Indicative reading: Angrist, J. D. and Pischke, J.-S. (2009). Mostly Harmless Econometrics. Princeton University Press. Rosenbaum, P.R. (2010). Design of Observational Studies. Springer.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MY459 Half Unit
Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit Col.8.11
Dr Pablo Barberá (Room TBC)
Availability: This course is available on the MSc in Data Science, MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is also available to research students as MY559.
Pre-requisites: Students must have completed Applied Regression Analysis (MY452).
Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Formative coursework: Exercises from the computer classes can be submitted for marking.
Indicative reading: quanteda: An R package for quantitative text analysis. http://kbenoit.github.io/quanteda/. Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." Political Analysis 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." The Journal of Finance 66(1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." Journal of Empirical Legal Studies 4(4, December):1007–1039.
Assessment: Project (40%, 3000 words) and coursework (60%, 2000 words) in the ST.

MY461 Half Unit
Social Network Analysis

This information is for the 2017/18 session.
Teacher responsible: Dr Eleanor Power and Dr Milena Tsvetkova COL 8.11
Availability: This course is available on the MSc in Data Science, MSc in Media and Communications (Data and Society) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority will be given to students in the MSc in Data Science, the MSc in Social Research Methods, and then to students from Statistics and Media and Communications (in particular the MSc in Media and Communications (Data and Society) track).
Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data from social media APIs, and structure and analyze this data using R.
Social networks have always been at the center of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behavior can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.
This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community measurement, to random graphs, network formation, information flow, and strategic games. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modeling and analysis using R, and network visualization using R and Gephi.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 10 problem sets in the LT.
Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.
Indicative reading: Easley and Kleinberg, Networks, Crowds, and Markets: Reasoning about a highly connected world. Cambridge Univ. Press, 2010. Newman, Networks: An introduction. Oxford Univ. Press, 2010. Jackson, Social and Economic Networks. Princeton Univ. Press, 2008. Borgatti, Stephen P and Martin G. Everett. Analyzing Social Networks. Sage, 2013. Luke, Douglas A. A User's Guide to Network Analysis in R. Springer, 2016.
Assessment: In class assessment (50%) and take home exam (50%) in the LT.

MY465 Half Unit
Intermediate Quantitative Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Jonathan Jackson COL8.05
Availability: This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).
Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.
Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques. Class exercises and homework are carried out using the Stata package.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.
Students on this course will have a reading week in Week 6. On-line quizzes will be provided on Moodle to aid revision during the reading week.
Formative coursework: Students will be expected to produce 9 exercises in the MT.
Indicative reading: A course pack will be available for download online.
Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data, and Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
This is an open-book unseen examination.

MY470 Half Unit
Computer Programming

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL8.11
Dr Ben Lauderdale
Availability: This course is compulsory on the MSc in Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment.
Teaching: 20 hours of lectures and 15 hours of classes in the MT.
Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates projectbased learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object oriented programming. The primary programming languages used in the course will be Python and R.
Formative coursework: Students will be expected to produce 10 problem sets in the MT.
Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.
Indicative reading: Lutz, Mark Learning Python. 5th Edition. O'Reilly, 2013. Intermediate and advanced documentation at https://www.python.org/doc/.
Gries, Paul, Jennifer Campbell, and Jason M Montojo. Practical Programming: An Introduction to Computer Science Using Python 3. The Pragmatic Bookshelf, 2013.
Grolemund, Garrett and Hadley Wickham. R for Data Science. O'Reilly, 2016. http://r4ds.had.co.nz
Grolemund, Garrett. Hands-On Programming with R. O'Reilly, 2014.
Assessment: Take home exam (50%) and in class assessment (50%) in the MT.
Student problem sets will be marked each week, and will provide 50% of the mark.

MY472 Half Unit Not available in 2017/18
Data Structures, Databases and Data Sharing

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL8.11
Availability: This course is available on the MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students in the MSc in Applied Social Data Science and the MSc in Data Science, followed by students from the MSc in Media and Communications (Data and Society) track.
Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most timeconsuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments.
Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.
In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded

electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.
Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an indepth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.
Formative coursework: Students will be expected to produce 10 problem sets in the MT.
Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.
Indicative reading: Chodorow, Kristina MongoDB: The Definitive Guide, 2nd Edition O'Reilly 2013. Churcher, Clare. Beginning Database Design: From Novice to Professional. Apress, 2007. London, Kyle Developing Large Web Applications: Producing Code That Can Grow and Thrive O'Reilly, 2010.
Assessment: Take home exam (50%) and in class assessment (50%).
Student problem sets will be marked each week, and will provide 50% of the mark.

MY498 Half Unit Not available in 2017/18
Capstone Project

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL8.04
Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is not available as an outside option.
Course content: The Capstone course is a dissertation project that represents the final element in the construction of a student's data science masters education. Work with a staff supervisor, and developed in a seminar, the dissertation provides students the means to combine all they have learned and embark on a self-guided project that will serve as their MSc study's crowning achievement.
Teaching: A series of around 4 dissertation seminars during MT and LT. The seminars cover methodological issues such as the literature review, sources of secondary quantitative data, topic guides for interviews, and sources of textual material.
There is no teaching for the Capstone project outside of supervision and our development seminars (currently MY499).
Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students during ST.
Indicative reading: NA - will differ with every student project
Assessment: Take home exam (100%).
2,500 word take home exam with a programming element

MY499
Dissertation

This information is for the 2017/18 session.
Teacher responsible: Prof Jonathan Jackson Col.8.05 and Dr Alasdair Jones Col.8.12
Dissertation supervisors.
Availability: This course is compulsory on the MSc in Social Research Methods. This course is not available as an outside option.
Course content: Students are required to write a 10,000 word dissertation based on an empirical investigation of an issue relevant to the programme content and on a topic within the field covered by their specialist subject and agreed with their supervisor.
Teaching: A series of 3-4 dissertation seminars during MT and LT. The seminars cover issues pertinent to writing a dissertation such as reviewing the literature, using secondary quantitative data, and research ethics.
Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students during ST.
Assessment: Dissertation (100%, 10000 words) post-summer term.
The 10,000 word dissertation must be submitted via Moodle by 5pm on Friday August 10th 2018.

MY4M1
Foundations of Social Research 1

This information is for the 2017/18 session.
Teacher responsible: Prof Jonathan Jackson MT/Dr Ben Lauderdale LT (MY451), Dr Alasdair Jones (MY400) and Dr Eleanor Knott MT/Dr Flora Cornish LT (MY421).
Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research), MSc in International Relations (Research) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components: 1. MY451 (MY451M in Michaelmas Term or MY451L in Lent Term) in **Introduction to Quantitative Analysis** - this course is intended for students with no previous experience of quantitative methods or statistics. Students who have already studied statistics and data

analysis should take MY4M2. Plus: 2. MY400 **Fundamentals of Social Science Research Design** 3. MY421 **Qualitative Research Methods** (MY421M in Michaelmas Term or MY421L in Lent Term).
Teaching: See separate course outlines.
Indicative reading: See separate course outlines.
Assessment:
Examination is by three pieces of assessed coursework (67%) and one two-hour paper (33%). Students registered on this course will submit assessed coursework covering MY400 (1000 words due in MT, 5000 due in ST), assessed coursework covering MY421 (3000 words) due in ST, and will take the exam paper MY4M1a (based on the MY451 syllabus) in ST.

MY4M2
Foundations of Social Research 2

This information is for the 2017/18 session.
Teacher responsible: Dr Jack Blumenau MT/Dr Indraneel Sircar LT (MY452); Dr Alasdair Jones (MY400); Dr Eleanor Knott MT/ Dr Flora Cornish LT (MY421)
Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research), MSc in International Relations (Research) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This programme is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components: 1.MY452 **Applied Regression Analysis**. This course is intended for students with some previous experience of quantitative methods or statistic, as described in the prerequisites for MY452. Students who have not previously studied quantitative methods or statistics should take MY4M1. The course can be taken either in MT (as MY452M) or in LT (as MY452L). 2.MY400 **Fundamentals of Social Science Research Design** 3.MY421 **Qualitative Research Methods** (either MY421M in Michaelmas Term or MY421L in Lent Term).
Teaching: See separate course outlines.
Indicative reading: See separate course outlines.
Assessment:
Examination is by three pieces of assessed coursework (67%) and one two-hour paper (33%). Students registered on this course will submit assessed coursework covering MY400 (1000 words in MT, 5000 due in ST), assessed coursework covering MY421 (3000 words) due in ST, and will take the exam paper MY4M2a (based on the MY452 syllabus) in ST.

PH400
Philosophy of Science

This information is for the 2017/18 session.
Teacher responsible: Dr Ioannis Votsis
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Social Research Methods. This course is not available as an outside option.
Pre-requisites: None.
Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.
Indicative topics include: Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account of confirmation, Bayesianism. Laws of Nature: the regularity view of laws, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Evidence-Based Medicine.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to write four essays (two in MT and two in LT), submit a few short answers before each seminar, and participate in seminar discussion.
Indicative reading: T S Kuhn, The Structure of Scientific Revolutions; K R Popper, Conjectures and Refutations; B van Fraassen, The Scientific Image; N Cartwright, How the Laws of Physics Lie.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH404 Not available in 2017/18
Scientific Revolutions: Philosophical and Historical Issues

This information is for the 2017/18 session.
Teacher responsible: Prof John Worrall
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.
Pre-requisites: None
Course content: The course examines a number of fundamental issues in philosophy of science, as they arise from instances of important theory-changes (so-called 'scientific revolutions') in the history of science. It is therefore by no means a 'straight' course in history of science: it looks at historical episodes to test and/or illustrate philosophical theses about science and its development.
1. The Copernican revolution: the switch from the Ptolemaic geocentric view of the world to the Copernican heliocentric one was probably the greatest revolution in human thought ever: What justified the switch? Was Ptolemaic theory definitively refuted by the data? Was Copernican theory simpler? Was the Church's view that Copernican theory should only be thought of as an instrument for calculating astronomical data purely theologically motivated or does it have some scientific rationale? What role was played in the eventual acceptance of the Copernican view by predictive success? Do we need to invoke social or other non-intellectual factors to explain why this 'revolution' occurred?
2. Galileo: Galileo and the telescope: are all observations 'theory-laden' and does this mean that there is a subjective element to all theory-choices? Galileo and the argument for his law of free fall: can theories be 'deduced from the phenomena'?
3. The Newtonian revolution: What was the relationship between Newton's theory and Kepler's and Galileo's laws? What does this tell us about theory-change in general?
4. The chemical revolution: What were Priestley and Lavoisier's experiments, and what exactly lead scientists to supplant phlogiston by oxygen? What does this tell us about theory change in general? In particular, in what sense was the replacement of phlogiston by oxygen rational?
5.19th Century revolutions in Optics: the switches from the corpuscular theory to the wave theory of light and from the wave theory to the electromagnetic theory. What do these cases of theory-change tell us about the twin theses of scientific rationality

and scientific realism?
6. The Darwinian Revolution: This revolution certainly ranks alongside the Copernican one in terms of its impact on man's view of herself. But debates about the scientific credentials of Darwin's theory began immediately on the publication of Darwin's work and continue to this day. Is Darwinian theory unfalsifiable (or even just one big tautology)? Can 'scientific' creationists explain everything that Darwin can?; What objections were raised by Darwin's critics to particular aspects of Darwinian theory? Were these valid objections and, in so far as they were, have they now been resolved?
Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
Formative coursework: Formative coursework: 2 x 1500 word essays per term.
Indicative reading: Background reading: T S Kuhn, The Structure of Scientific Revolutions; I Lakatos 'Falsification and the Methodology of Scientific Research Programmes' in his The Methodology of Scientific Research Programmes, Philosophical Papers 1; G Holton (revised by S Brush): Theories and Concepts in Physical Science; P Duhem The Aim and Structure of Physical Theory; P Kitcher Abusing Science: The Case against Creationism, K R Popper, Conjectures and Refutations; P Feyerabend Against Method. Recommended reading: The central text for the first part of the course is T S Kuhn, The Copernican Revolution, Harvard University Press. The central text on the Darwinian revolution will be P Kitcher, Abusing Science, the Case Against Creationism. MIT Press. There will be lecture slides on each topic including (i) a list of essential reading and suggestions for further reading and (ii) 'study questions' to guide your thought. Aside from the above reading for the section of the course on the Copernican revolution and the Darwinian revolution, reading for particular topics will be in the form of articles and selections from books. These will be made available electronically on Moodle.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH405
Philosophy of the Social Sciences

This information is for the 2017/18 session.
Teacher responsible: Dr Mattia Gallotti, LAK 3.01
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Philosophical issues concerning the nature of social scientific theory and its applications. Topics to be covered will include some or all of the following: the explanation and interpretation of action, naturalist and hermeneutic social theory; the nature of 'social facts'; reductionism and methodological individualism; functional and structural explanations; rationality and relativism; the role of values in social science; social norms; the construction of social reality; methods of evolutionary explanation in the social sciences; philosophical and methodological critiques of evolutionary psychology. In additional, philosophical problems of particular social sciences such as anthropology, sociology, and economics will also be addressed.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to write three essays: two in Michaelmas term and one in Lent term.
Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful background readings are: The Philosophy of Social Science Reader, edited by Francesco Guala and Daniel Steel; Daniel Little, Varieties of Social Explanation; Alex Rosenberg, Philosophy of Social Science; Martin Hollis, The Philosophy of Social Science; Brian Skyrms, Evolution of the Social Contract. A useful anthology is Readings in the Philosophy of Social Science, edited by Michael Martin and Lee McIntyre,
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the LT.

PH413
Philosophy of Economics

This information is for the 2017/18 session.
Teacher responsible: Dr Johanna Thoma LAK 4.02
Dr Campbell Brown
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes in Economics (Track 1), MRes/PhD in Economics, MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences, MSc in Philosophy of the Social Sciences, MSc in Social Research Methods and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Economics A (EC100).
Course content: This course provides a philosophical discussion of the methods and normative commitments of contemporary economics.
The first term will focus on economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread `irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? The second term will focus on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? What are the moral limits of markets? How should we resolve collective action problems? What is a fair distribution of the benefits from cooperation? Should there be barriers to international trade?
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT and 1 essay in the LT.
Indicative reading: D. Hausman, The Philosophy of Economics: An Anthology; J. L. Bermudez, Decision Theory and Rationality; J. Cohen and W. Easterly, What Works in Development: Thinking Big and Thinking Small; H. Davies, The Financial Crisis - Who is to Blame? D. Hausman and M. McPherson, Economic Analysis, Moral Philosophy, and Public Policy; D. Gauthier, Morals by Agreement; D. Satz, Why Some Things Should Not Be for Sale.
Assessment: Exam (65%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.
Presentation (10%) in the LT.

PH415
Philosophy and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Campbell Brown
This course is taught by Prof. Alex Voorhoeve (weeks 1-5 of Michaelmas Term); Dr. Campbell Brown (weeks 6-10 of MT); Dr. Johanna Thoma (weeks 1-5 of Lent Term); and Prof. Michael Otsuka (weeks 6-10 of Lent Term).
Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.
• What is a correct public measure of well-being?
• Should we distribute resources in health care to produce the most well-being overall or should we also aim to limit inequalities?
• Should people be left to bear the consequences of their free choices?
• May the government force you to buy health insurance?
• Should higher education be financed by student loans or general taxation?
• Should we be free to act as we choose so long as we do not harm others?
• Is killing morally worse than letting die?
• What is the optimal population size?
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT and 1 essay in the LT.
Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.
• Greg Bognar and Iwao Hirose (2014). The Ethics of Health Care Rationing.
• A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' Oxford Studies in Political Philosophy.
• Michael Rustin (2016), 'The neoliberal university and its alternatives', Soundings
• Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'
• Carol Kates (2004). 'Reproductive Liberty and Overpopulation' Environmental Ethics.
• John Stuart Mill (1859), On Liberty
• Jonathan Wolff (2011), Ethics and Public Policy: A Philosophical Inquiry
Additional readings will be available on Moodle.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH416
Philosophy, Morals and Politics

This information is for the 2017/18 session.
Teacher responsible: Dr Alexander Voorhoeve
The course is taught by Prof. Michael Otsuka (Michaelmas Term weeks 1-5); Prof. Luc Bovens (MT weeks 6-10); and Prof. Alex Voorhoeve (Lent Term weeks 1-10).
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of the Social Sciences and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.
Course content: Michaelmas Term weeks 1-5 (Michael Otsuka): The ethics of harming and saving from harm. We will discuss the following topics in normative ethics regarding the morality of harming and saving from harm: (i) Should one save the greater number from harm?; (ii) Can contractualism justify the saving of the greater number when and only when we ought to?; (iii) Should one be solely concerned with how badly off people are, or should one also care about inequality?; (iv) Does it make a moral difference that a person is less well off than she could have been? (a.k.a. 'the non-identity problem'); (v) Why is it permissible to divert a tram so that it runs over one rather than five, whereas it is impermissible to kill a single individual in order to redistribute his vital organs to save the lives of five? (a.k.a. 'the trolley problem').
Michaelmas Term weeks 6-10 (Luc Bovens): Moral psychology. We will study five topics in moral psychology, viz. hope, self-management, love, apologies and death. Hoping for something seems to be more than just believing it to be possible and desiring it—but what else is required for hope? Can it be reasonable to adapt our desires and beliefs to improve our quality of life? Or should be just dismiss this as sour grapes and self-deception? Should we conceive of romantic love foremost as a deep attraction to the features of a beloved, a commitment of caring for a beloved, or a desire to form a single identity with a beloved? What makes for a genuine apology? Why would one care that one be forgiven? What kind of hopes might people have in the face of death, if not eternal life? The core thread through our readings are various strategies of coping with life's challenges. We will also explore literary expressions and political dimensions of these concepts in moral psychology. The readings are a combination of chapters from a book manuscript by Luc Bovens and classical and contemporary sources.
Lent Term weeks 1-5 (Alex Voorhoeve): The good life, virtue, and the market. We will engage with two outstanding thinkers from the history of ethics: Aristotle and Hume. We will use their works to pursue the following questions in ethics: What is a good life? What makes a character trait a virtue or a vice? Why be moral? We will also consider social and political questions, including: what is the origin and role of property rights? Do markets corrupt us or make us better human beings?
Lent Term weeks 6-10 (Alex Voorhoeve): The moral law and social justice. In these weeks, we will draw on Kant's works to engage with the following moral questions: Are there moral laws that are binding on every rational being? What does respect for human beings require? Is impartial morality in tension with partial emotions like love? We will also use Rawls's work to pursue the following questions: What does justice require? Does it demand the redistribution of income from rich to poor in order to create a more egalitarian society?
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. Seminars PH416 20 x one-and-a-half hours (MT, LT); Students are strongly advised to attend PH214 Morality and Values lectures, 20 x one hour (MT, LT).
Formative coursework: Students will be expected to produce 1 presentation in the LT and 3 essays in the MT and LT.
Indicative reading: John Taurek, 'Should the Numbers Count?' Philosophy & Public Affairs, 6 (1977): 293-316; Derek Parfit, 'Equality and Priority', Ratio, 10 (1997): 202-221; Derek Parfit, Reasons and Persons; Luc Bovens Coping: a Philosophical Guide (mimeo). Adrienne Martin (2014) How We Hope, Princeton University Press. William James (1896) "The Will to Believe". Plato (1994) Symposium. Translated by Robin Waterfield. Oxford University Press. Jeffrie G. Murphy and Jean Hampton (1990) Forgiveness and Mercy, Cambridge University Press. Samuel Scheffler (2013) Death and the Afterlife, Oxford University Press. Aristotle Nichomachean Ethics. Translated by Terence Irwin. Hackett. Hume A Treatise of Human Nature and Enquiry Concerning the Principles of Morals (excerpts provided). Kant

Groundwork of the Metaphysics of Morals. Mary Gregor and Jens Timmermann. Cambridge. Alex Voorhoeve Conversations on Ethics. Oxford University Press. John Rawls, A Theory of Justice, revised edition;
Assessment: Exam (60%, duration: 2 hours) in the main exam period.
Essay (30%, 2000 words) in the ST.
Presentation (10%) in the LT.

PH418
Dissertation Seminar - Economics and Philosophy

This information is for the 2017/18 session.
Teacher responsible: Prof Richard Bradley LAK.203
Availability: This course is compulsory on the MSc in Economics and Philosophy. This course is not available as an outside option.
Course content: The course is intended to develop the ability to make philosophical arguments, to write good philosophical essays, and to present ideas effectively. It covers topics in the philosophy of economics and will serve to prepare students for research and for writing their dissertation.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 presentation in the MT, 1 presentation in the LT and 1 essay in the ST.
Indicative reading: Readings will be chosen by the seminar participants.
Assessment: This course is not assessed.

PH419
Set Theory and Further Logic

This information is for the 2017/18 session.
Teacher responsible: Dr Owen Griffiths, LAK 3.01
Availability: This course is available on the MPhil/PhD in Philosophy of the Social Sciences, MSc in Economics and Philosophy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Introductory level logic.
Course content: The aim of the course is to help students of philosophy become familiar with naive set theory, classical logic, and modal logic. From set theory, the course covers both 'working' set theory as a tool for use in formal reasoning, and some 'conceptual' set theory of philosophical interest in its treatment of infinite sets, cardinals and ordinals. From classical logic, the course deals with propositional and first-order inference from both semantic and axiomatic viewpoints, with also some material on first-order theories including celebrated theorems of Tarski and Godel. The material on propositional modal logic presents the main axiomatic systems and their analysis using relational models. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one 1,500 word essay on a topic from a list or proposed by the student and approved by the instructor.
Indicative reading: Textbooks: Makinson, David 2012 Sets, Logic and Maths for Computing, 2nd edition. Springer; Cameron, Peter 1999 Sets, Logic and Categories. Springer; Sider, Theodore 2010 Logic for Philosophy. Oxford University Press. Remark: Specific sections of these three textbooks that are relevant to the weekly topics will be indicated on the Moodle page for the course.
Complementary reading: Crossley, John 1972 What is Mathematical Logic? Dover reprint 1991; Goble, Lou (ed) 2001 The Blackwell Guide to Philosophical Logic, Blackwell; Halmos, Paul 1960 Naive Set Theory, Springer reprint 2011; Smith, Peter 2015, Gödel without (too many) tears. Internet access: http://www.logicmatters.net/igt/godel-without-tears/; Stanford Encyclopedia of Philosophy, internet access: http://www.plato.stanford.edu/.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH421
Dissertation Seminar - Philosophy and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Susanne Burri
Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is not available as an outside option.
Course content: Aim: This course is intended to develop the ability to write a structured philosophical essay and serves to prepare students in the MSc Philosophy and Public Policy for dissertation writing.
Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.
The course starts with a five hour module on argumentative writing in philosophy (weeks 1-5). This is followed by student presentations in which past MSc dissertations are scrutinized for strengths and weaknesses (weeks 6-10). During Lent Term, students are required to present their MSc dissertations as work in progress.
Formative coursework: Presentation of a past MSc dissertation
Presentation of own dissertation as work in progress
Optional draft of up to 6000 words due at the end of June
Indicative reading: None.
Assessment: This course is not assessed.

PH422
Dissertation Seminar - Philosophy of Social Science

This information is for the 2017/18 session.
Teacher responsible: Dr Mattia Gallotti, LAK 3.01
Availability: This course is compulsory on the MSc in Philosophy of the Social Sciences. This course is not available as an outside option.
Course content: The course is intended to develop the ability to make philosophical arguments and to write structured philosophical essays. It will serve to prepare students for research and writing their dissertation. In Michaelmas term, the first few meetings will cover philosophical and argumentative writing, with a number of in-class exercises. Then we will discuss the structure and content of an MSc dissertation in Philosophy and the grading rubric used for marking dissertations. The remainder of Michaelmas term will cover possible thesis topics in the philosophy of social science, with group presentations. In Lent term, seminars will cover topics that are chosen by MSc students for their theses.
Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.
Formative coursework: A number of assignments whose completion will aid the writing of the dissertation will be set over the course of MT and LT.
Assessment: This course is not assessed.

PH423 Not available in 2017/18
Scientific Method and Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Katie Steele
Availability: This course is compulsory on the MPhil/PhD in Philosophy of the Social Sciences. This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
The course is also open to all LSE MSc and research students.
Course content: Policy decisions should be responsive to our best evidence. But what does this mean? How should we negotiate conflicting sources of evidence? And whose responsibility is it to link policy and evidence?
These questions reflect the two main topics of the course.
The first topic concerns the quality, strength and relevance of the available evidence with respect to a given policy question. This is a central issue in the 'evidence-based' policy-and-medicine movement. Are randomised controlled trials really the gold standard? Can evidence be statistically significant without being scientifically or practically significant, and vice versa? What is the role of quantitative versus qualitative evidence in establishing causal claims? How do general causal laws bear on individual cases, and vice versa? Can some evidence be disregarded due to cultural and political biases?
The second topic concerns the roles and responsibilities of scientists, policy-makers and citizens alike in enhancing evidence-based policy making. What does it mean to say that there is a scientific consensus? Does expert knowledge of scientists constitute a threat to democratic processes? What is the 'Precautionary Principle' and does it provide a way forward when there is little evidence available? To what extent should individual rights be compromised to enable scientific research? What issues arise when scientists interpret and measure ethically-loaded concepts like poverty, well-being or bio-diversity? Is science a 'public good' and what does this mean for how it should be managed?
Examples referred to in the course are drawn from various areas of science in policy-making, including climate, conservation, international development, poverty, education, and health.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 3 essays and 1 presentation in the MT and LT.
Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful background readings are: Cartwright, N. and Hardie, J. (2012) Evidence-Based Policy: A Practical Guide to Doing it Better; Mackie, J.L. (1980) The Cement of the Universe; Howson, C. and Urbach, P. (1993) Scientific Reasoning: A Bayesian Approach; Kitcher, P. (2011) Science in a Democratic Society; Douglas, H. (2009) Science in Policy-Making: Objectivity, Values, and Risk; Stiglitz, J.E. Sen, A. and Fitoussi, J. (2010) Mismeasuring Our Lives: Why GDP Doesn't Add Up.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH425 Half Unit
Business and Organisational Ethics

This information is for the 2017/18 session.
Teacher responsible: Dr Susanne Burri
Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Management of Information Systems and Digital Innovation, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences, MSc in Risk and Finance and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Some tough-minded people believe that "business ethics" is a contradiction in terms. They argue that business is like a game where winning means making as much money as possible. These tough-minded people claim that whoever thinks otherwise --- whoever thinks that business is also about treating others respectfully --- is either naive, or deluded, or both. What people who argue in this way don't usually realise is that they are, in fact, making an argument within business ethics while they are denying that "business ethics" exists. To assert that business is a game where winning means making as much money as possible is to claim that when it comes to business, everyone should, or is at least permitted to, pay attention only to their personal gain. This statement may be correct, or it may be false. But it is definitely an ethical statement, simply because it makes claims about how people may permissibly behave.
In this introductory course to business ethics, we look at different types of ethical theories, and we apply them to problems that tend to arise in business contexts. The primary aim of the course is not to present you with solutions or dogmatic guidance, but to teach you to think critically, so that towards the end of the course, you will no longer be satisfied with simple answers to difficult problems. Participating in this course will help you sharpen your analytical skills. You will also become more experienced at expressing your thoughts clearly and concisely, both in writing and in discussion.
Topics discussed in the context of this course include:
- What are the moral responsibilities of managers? Is Milton Friedman correct that the main purpose of business is to increase profits?
- What, if anything, is wrong with exploitation? If sweatshop workers voluntarily choose to work under bad conditions because it is their best shot at having a decent life, isn't it wrong to outlaw sweatshop labour and rob the workers of this opportunity?
- If you want to live a morally good life, what career should you pursue? Is William MacAskill right that you should consider working for a hedge fund, and then give a large part of your earnings away to charities?
- Do employers have a duty to promote employee happiness? According to the ancient Greek philosopher Aristotle, happiness is the ultimate goal of all human beings. But is everyone responsible for their own happiness, or are employers required to make their employees happy as well?
- To what extent are the large pay packages that CEOs receive justified? What makes a wage fair?

Required readings amount to about two to three papers per week.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: One essay of 2000 words.
Indicative reading: Carr, Albert Z. (1968): "Is Business Bluffing Ethical?", in Harvard Business Review, 46 (1): 143-153. Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", New York Times Magazine, Sept. 13. Heath, Joseph (2014): "A Market Failure Approach to Business Ethics", in Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics, pp. 25-41. Oxford: Oxford University Press. Moriarty, Jeffrey (2009): "How Much Compensation Can CEOs Permissibly Accept?", in Business Ethics Quarterly, 19 (2): 235-250. Zwolinski, Matt (2007): "Sweatshops, Choice, and Exploitation", Business Ethics Quarterly 17 (4): 689-727.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in the ST.

PH427 Half Unit

Genes, Brains and Society

This information is for the 2017/18 session.
Teacher responsible: Dr Jonathan Birch
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: None.
Course content: This course examines, from a philosophical perspective, the ways in which recent developments in genetics and neuroscience challenge our conceptions of what we are — and what we could become.
Topics covered include:
Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits which are part of 'human nature' and those which are not? And is 'human nature' fixed, or can it be altered by technological means?
Sex and gender: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are they explained by genes or by culture? And should we reconcile ourselves to these differences, or should we try to eliminate them?
Race: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of 'race' have a legitimate role in medicine?
Free will and responsibility: Has neuroscience debunked the notion of 'free will'? If so, can we still be held responsible for our actions? Should neuroscientific data be used to predict—and prevent—wrongdoing?
Right and wrong: Has neuroscience shown that morality is more a matter of emotion than reason? Can we use neuroscience to help us choose between ethical theories, and to help us improve our own behaviour?
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Lectures: Weeks 1 - 10
Seminars: Weeks 1 - 10
Formative coursework: A critical analysis exercise (1000 words)
Indicative reading: Suggested introductory readings: Glover, J. (2008) Choosing Children. Fine, C. (2005) Delusions of Gender. James, M. (2011) "Race", in the Stanford Encyclopedia of Philosophy [online]. Greene, J. D. (2013) Moral Tribes.
Assessment: Essay (45%, 2000 words) and wiki entry (10%) in the LT.
Essay (45%, 2000 words) in the ST.
There is no exam for this half-unit. There will be two summative essays, each worth 45% of the final mark. 10% of the final mark will be awarded for contributions to a collaborative wiki.

PH428 Half Unit

Emotion, Cognition and Behaviour: Science and Policy

This information is for the 2017/18 session.
Teacher responsible: Adrian Boutel
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course provides an introduction to the (i) philosophical and (ii) scientific foundations of contemporary cognitive science with a particular focus on its (iii) ethical, social and political implications. No background in either philosophy or cognitive science is required.
Topics covered include:
Folk psychology and its discontents: We tend think of ourselves, and of others, as more-or-less rational instrumental deliberators, choosing actions that further our goals in light of our beliefs. But is this common-sense understanding a good psychological theory? Or is it, at best, a useful heuristic for dealing with something much more complex?
Cognition as computation: Is the brain (like) a computer? Is computation sufficient for thought? Could computers potentially do all the things our minds do?
Dual-process theories: Do our cognitive processes come in 'fast' and 'slow' varieties? Is the mind partitioned into two systems?
Implicit bias: Could we be unaware of our own racial, gender and other biases? If so, are we responsible for the decisions they influence? What can we do about them?
Thought outside the body: Are thoughts wholly 'in the head'? How might they extend beyond it? Will augmented reality paint our minds onto the world?
Happy societies: Should policymakers aim at increasing the happiness of society? What would this mean, and how would we go about it?
Nonhuman thought: Do we share cognitive capacities with animals? What kind of value judgements are involved in answering that question? And if AI is possible, what happens to us when machines can think better than we can?
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Lectures: Weeks 1 - 10
Seminars: Weeks 2 - 11
Formative coursework: One 2,000 word formative essay and comments on a draft of the assessed essay.
Indicative reading: Suggested introductory reading: Crane, T. (2003), The Mechanical Mind (2nd ed). Routledge. Kahneman, D. (2011), Thinking Fast and Slow. Allen Lane/Penguin. Steele, C.M. (2011), Whistling Vivaldi: How Stereotypes Affect Us and What We Can Do. W.W. Norton & Co. Thaler, R. H. and C. R. Sunstein (2008), Nudge. Yale/Penguin.
Assessment: Exam (67%, duration: 2 hours) in the LT week 0.
Essay (33%, 2000 words).

PH430 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2017/18 session.
Teacher responsible: Dr Bryan Roberts LAK 5.03
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.
Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space and time described by "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.
Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. The topics of the course will include: 1) Relativity: Slowing clocks, shrinking rods, and the relativity of simultaneity; 2) Spacetime: Thinking in higher dimensions, faster-than-light travel, and other philosophical issues; 3) Non-Euclidean thinking: Beyond the geometry of Euclid, measuring curvature, gravity as curved spacetime; 4) Cosmology: Our place in the universe, big bang cosmology, time travel; 5) Limits of space and time: Geometry, black holes, singularities.
Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications

of relativity theory. One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective.

Einstein for Everyone requires absolutely no background in physics or maths. Students are only required to learn two equations, which really cannot be omitted: E=mc2, and Einstein's equation! However, students with a background in physics will also benefit from the conceptual development and the philosophical problems posed in this course.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 2 essays in the MT.

In addition to this formative essay, which is due mid-term, students must complete 1-2 short weekly reading questions and submit them through Moodle to prepare for discussion in class.

Indicative reading: All weekly readings will all be made available to students on Moodle. The primary readings will be from Norton, John D. (2017) Einstein for Everyone.

Assessment: Essay (50%, 1500 words) in the MT.

Essay (50%, 1500 words) in January.

PH431 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2017/18 session.

Teacher responsible: Dr Bryan Roberts LAK 5.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set?

The course will proceed at a conceptual level that is suitable for students of all backgrounds. We begin by introducing the concept of atoms and of the random walk, and investigate the role it played in the development of statistical mechanics and quantum physics. We then explore how random walks and other models used in physics apply to understand financial ideas like rates of return, Black-Scholes option pricing, and stock market crashes, analysing the philosophical issues underlying this practice along the way.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

In addition to the formative essay due mid-term, students must complete 1-2 short weekly reading questions and submit them through Moodle to prepare for discussion in class.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Malkin, Burton G. A random walk down Wallstreet, excerpts.
- Norton, John D. Einstein for Everyone, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. The Physics of Wallstreet.
- Derman, E. My Life as a Quant. Excerpts.

Assessment: Essay (50%, 1500 words) in the LT.

Essay (50%, 1500 words) in the ST.

PH432 Half Unit

Effective Philanthropy: Ethics and Evidence

This information is for the 2017/18 session.

Teacher responsible: Prof Luc Bovens and Mr Stephan Chambers

Professor Bovens will deliver the weekly lectures and the seminars based on lecture material; Stephan Chambers, Marshall Institute Director, will arrange and chair the bi-weekly discussion with leaders in philanthropy.

Availability: This course is available on the MSc in Economics and Philosophy, MSc in International Development and Humanitarian Emergencies, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None.

Course content: The course will address key questions in philosophy and social science concerning philanthropy, including:

- Which motives actually drive philanthropy and which motives should drive it?
- What is the nature and extent of our moral obligations to philanthropy?
- Is the proper aim of philanthropy to 'do the most good'?
- How should the good aimed at be conceived of and measured?
- How, if at all, should people's rights and the risks of causing harm constrain the pursuit of the good?
- What are a charitable organisation's duties of accountability towards its stakeholders, that is, the donors, the recipients and its employees?
- Do we need Randomised Controlled Trials as evidence for the efficacy of philanthropic interventions?
- Which career and personal choices should one make in order to further philanthropic aims
- Which moral principles govern the relationship between the state and private philanthropy? Between corporations and charities?
- What is the role of foundations in support for the arts?
- How should the recipients of aid be represented in media campaigns of charities addressing global poverty?
- What behavioural techniques can be invoked to increase charitable giving and are these techniques respectful of the freedom and autonomy of the targeted donors?

Learning aims:

- Students will learn about key contemporary debates in the ethics of philanthropy through critical engagement with the philosophical literature.
- Students will learn to employ both social scientific research and normative (ethical and methodological) reasoning to assess philanthropic organisations.
- Students will develop independent research skills. In particular, they will learn how to search for relevant social scientific data and cases.
- Students will develop skills in independent and original philosophical questioning and argumentation. In particular, they will be encouraged to set their own research question and develop independent and original perspectives on existing philosophical theories.
- Students will learn team research for a joint summative research presentation.
- bi-weekly seminars

Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours

of seminars in the MT.
1 hour lecture per week (x 10), fortnightly 1 hour additional 'philanthropy in practice' guest lecture and seminar with leading figures in philanthropy organised by the Marshall Institute; seminars: 1 hour per week (maximum of 15 per seminar).
Formative coursework: Students will be expected to produce 1 essay in the MT.
This formative essay has a word limit of 2000 words.
Indicative reading: Essential Readings: Peter Singer The Life You Can Save, Random House (2009). Jennifer Rubenstein Between Samaritans and States: The Political Ethics of Humanitarian INGOs. Oxford: OUP. (2015). The GiveWell website. URL: http://www.givewell.org. Rob Reich, Chiara Cordelli and Lucy Bernholz, Philanthropy in Democratic Societies. Chicago: University of Chicago Press. Assessment: Exam (65%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.
In class assessment (10%).

PH445
Dissertation Seminar - Philosophy of Science

This information is for the 2017/18 session.
Teacher responsible: Prof Miklós Rédei
Availability: This course is compulsory on the MSc in Philosophy of Science. This course is not available as an outside option.
Course content: The course is intended to develop the ability to construct sharp analytic philosophical arguments and to write structured philosophical essays. It will help students to choose the topic of their dissertation, help with how to go about researching the topic and how to write the dissertation (by presentation and criticism of preliminary drafts). The course starts with reviewing the structure and content of an MSc dissertation in Philosophy, the requirements of, and grading scheme used for marking dissertations.This is followed by presentations by students on topics intended as possible topics of their dissertations. The presentations will be extensively discussed in the seminar by fellow students and in subsequent private meetings with the seminar leader. In the Lent Term each student will read two former MSc dissertations with topics close to the interest of the student, and each student will report in the seminar on the merits and weaknesses of the selected works, trying to understand why the chosen dissertations received the marks they did. In the final part of the seminar students will again give presentations on the progress of their research.
Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.
Formative coursework: A number of assignments - at least one per term - whose completion will aid the research into and writing of the dissertation will be set.
Assessment: The course is not assessed.

PH456
Rationality and Choice

This information is for the 2017/18 session.
Teacher responsible: Prof Richard Bradley
Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course examines the theory of rationality and rational decision making. It is in two parts (i) Probability and Decision: Probabilistic thinking, different interpretations of probability, decision making under risk, ignorance and uncertainty, the measurement of belief and desire, paradoxes of expected utility theory. (ii) Game Theory and Social Choice: Solution concepts for games, backward induction and hypothetical reasoning, bargaining theory, Arrow's Theorem, the Gibbard-Satterthwaite theorem, interpersonal comparability and Utilitarianism.
Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will submit a piece of written work each term and/or complete a number of exercises.

Indicative reading: Richard Jeffrey, The Logic of Decision, Michael Resnik, Choices: an introduction to decision theory, Martin Peterson An Introduction to Decision Theory, Amartya Sen Collective Choice and Social Welfare, Duncan Luce and Howard Raiffa Games and Decisions, Wulf Gaertner A Primer in Social Choice Theory, J. S. Kelly Social Choice Theory. An Introduction.
Assessment: Exam (100%, duration: 3 hours) in the main exam period.

PH458 Half Unit
Evidence and Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Ioannis Votsis
Availability: This course is compulsory on the MPhil/PhD in Philosophy of the Social Sciences. This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.
Although the emphasis throughout will be on ideas rather than formal techniques and although all the ideas will be explained simply and intuitively, some of the evidence relevant for policy is evidence about probabilities and so the course will involve issues about the correct interpretation of probability and statistics. Although no detailed formal manipulations will be required, students will need to feel happy thinking about the intuitive ideas underlying probability and statistics.
Course content: Good policy decisions - whether concerning climate, conservation, international development, poverty, education, medicine, or health - require rational deliberation over whether the proposed policy will (or is likely to) bring about the intended outcome. Will lowering CO2 emissions reduce global warming? Will mass mammography decrease the number of deaths from breast cancer? Will making a drug available on the NHS have (as a rule) a positive effect on patients? Will smaller class sizes enhance scholastic achievement? The obvious suggestion is that answers to such questions are the result of rational deliberation just in case they are based on good evidence and appropriate reasoning. But what counts as good evidence and appropriate reasoning? And what happens when different kinds of evidence pull in opposite directions? Are certain types of evidence more telling than others? And if so, why? Does evidence that the policy works in one country mean that we should have confidence that it will work in another country? If there can be no guarantee of success, will the given policy at least increase the probability of the desired outcome? These are some of the central issues addressed in the course. It might seem initially that only experts, only scientists involved in the field, can tell what counts as good evidence and appropriate reasoning. Yet even experts are susceptible to error. In this course, you can learn how to be 'evidence-savvy', how to ask the right questions about evidence and reasoning as well as how to think about risk-assessment and its relation to policy.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful initial readings are: Gigerenzer, G. (2002) Reckoning with Risk: Learning to Live with Uncertainty; Cartwright, N. and Hardie, J. (2012) Evidence-Based Policy: A Practical Guide to Doing it Better; Worrall, J. (2007) 'Evidence in Medicine and Evidence-Based Medicine', Philosophy Compass.
Assessment: Exam (67%, duration: 2 hours) in the main exam period.
Essay (33%, 2000 words) in January.

PH499
Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Susanne Burri, Prof Richard Bradley, Prof Miklos Redei and Dr Campbell Brown
Availability: This course is compulsory on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.
Course content: Students are required to write a 10,000-word dissertation (7,000 for MSc Economics and Philosophy) on a topic within the field covered by their course of study and approved by the Department of Philosophy, Logic and Scientific Method.
Assessment: Dissertation (100%, 10000 words) post-summer term.
The course is assessed 100% by Dissertation. Dissertations must be submitted on a specified date in late August in the academic year registered. (Part-time students are required to submit their dissertations in the August of their second year of part-time registration). All details are given in the Departmental course booklet.

PS400
Contemporary Social and Cultural Psychology

This information is for the 2017/18 session.
Teacher responsible: Prof Sandra Jovchelovitch QU.3.25
Availability: This course is compulsory on the MSc in Social and Cultural Psychology. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Availability as an outside option is also dependent on numbers.
Course content: Selected topics in cultural and modern social psychology. The interface mind, society and culture, with a core focus on: 1) the relationship individual-society and 2) culture as a universal and as a particular context for human cognition, emotion and behaviour. In addition: cultural transmission; ontogenesis and sociogenesis; intersubjectivity, perspectivity; thought and lanaguage; action and joint intentionality; mediation and artefacts; culture and the cross-cultural; global identities; intergroup relations; self and community; theory and research relevant to different fields of application including communication, education, racism and multiculturalism, health community development, social exclusion and disadvantage, mass media, amongst others. Topics are explored at different levels of analysis of social and cultural psychology: ontogenetic (individual self); sociogenetic (social interaction, inter-group relations); phylogenetic (evolutionary history of homo sapiens). Central to the syllabus is to sensitise and train students' to understand and manage cultural and societal variation in cognition, emotion and behaviour. Please note that fields of application and applied content may vary depending on faculty research.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Students' taking PS400 will also be required to attend PS443A lectures, 10 x 120 mins (MT), and 9 x 60 mins discussion groups.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Indicative reading: M Tomasello, The Cultural Origins of Human Cognition. Harvard University Press, 1999. M Cole, Cultural Psychology: A once and future discipline. Harvard University Press, 1996. Cambridge University Press, 1985. In addition, reading lists on specific topics will be distributed during the course.
Assessment: Exam (25%, duration: 1 hour) in the LT week 0. Essay (75%, 5000 words) in the MT.

PS404
Organisational Social Psychology

This information is for the 2017/18 session.
Teacher responsible: Dr Tom Reader QUE.3.10 and Dr Lucia Garcia QUE.3.23
Availability: This course is compulsory on the MSc in Organisational and Social Psychology. This course is available on the MPhil/PhD in Psychological and Behavioural Science, MSc in Social Research Methods and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course addresses both the social psychology of organisations and social psychological processes within organisations. It also provides multidisciplinary coverage of the organisational contexts in which social psychologists may work in a variety of professional domains. A basic familiarity with social psychological methods is assumed, but their application within organisational processes and contexts will be examined in detail within the course. Issues and techniques in organisational analysis, discourse, decision-making and change management are covered with emphasis on their social psychological aspects.
Lectures/seminars in the MT: These will cover key social psychological concepts and theories and their application to the understanding of organisations and the implementation of change processes. The specific topics covered include: 1) Introduction: critique of the tradition and logic underlying organisational psychology; history and frameworks in organisational analysis; "Scientific" management; Taylorism and Fordism; the Human Relations movement and the Socio-Technical approach; 2) Frameworks for analysis: for example, the cultural image of organisations; culture and identity in organisations; power, knowledge and organising; 3) People organising: for example, motivation; work groups and teams; decision-making; leadership, networking and collaborative work ; 4) Implications for practice: for example, managing organisational change.
Professional Seminar Series in the MT: These will centre on discussion of practical and research applications in domains where organisational social psychological investigation and analysis may play a leading role. Each topic will be presented by an external expert working practically in the domain.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Students taking PS404 will also be required to attend PS443A lectures 10 x 120 minutes (MT) and seminars/discussion groups 9 x 60 minutes (MT).
Formative coursework: Formative essay to be submitted in MT.
Indicative reading: Reading lists on specific topics will be distributed during the course. Texts which are recommended for general use throughout the course are: S Clegg & C Handy, Studying Organisations: Theory and Method, Sage, 1998; E H Schein, Organisational Psychology (3rd edn), Prentice Hall, 1988; G Morgan, Images of Organisation (2nd edn), Sage, 1997; A Bryman (Ed), Doing Research in Organisations, Routledge, 1988; Hosking, D.-M., & Morley, I. E. (1991). A Social Psychology of Organizing. Hemel Hempstead: Harvester Wheatsheaf. K E Weick, Sense Making in Organisation, Addison Wesley, 1995. A Furnham, The psychology of behaviour at work: The individual in the organisation, Psychology Press, 2005; S Haslam, Psychology in Organisations: The Social Identity Approach, Sage, 2004. P Spector, Industrial and Organisational Psychology: Research and Practice, John Wiley & Sons, 2012.
Assessment: Exam (25%, duration: 1 hour) in the LT week 0. Essay (75%, 5000 words) in the MT.

PS409 Half Unit
Political Psychology of Intercultural Relations

This information is for the 2017/18 session.
Teacher responsible: Dr Sophie Zadeh
Availability: This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students from all departments may attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible
Course content: The course demonstrates the importance of a Political Psychological perspective for the understanding of intercultural relations in general, with a particular focus on multiculturalism, politicised identities, ideologies of nationalism, racialised poverty, institutionalised discrimination and intercultural dialogue. The central issues we shall examine across an array of contexts are: what is the connection between politics and psychology within everyday encounters; what is the relevance of politics in intercultural relations and for systems of everyday knowledge about belonging, nationhood and cultural communities; what are the psychological consequences of exclusion, discrimination and inequality; what are the psychological processes involved in systems of social and political change? Theories of social representations, identity, discourse, contact, acculturation, community resilience and reconciliation shall be covered. Lecturers aim to achieve a balance between theoretical and applied issues, in the interests of critically investigating the ways in which conceptual tools can enhance our own understanding of intercultural relations and systems of inequality, and also contribute to broader social and political debates. We aim to establish an account of intercultural relations that connects the political (the ideological, the structural, the discursive) and the psychological (identity, representation and agency). We apply this critical political psychological account of production and consequences of cultural difference to the contexts of politics, community, education and everyday life in general, and examine the possibilities for productive intercultural contact, dialogue and engagement.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: A written assignment (maximum 1000 words). This will consist of an outline and short section of the summative assignment.
Indicative reading: Andrews, M. (2007) Shaping History: Narratives of Political Change. Cambridge: Cambridge University Press;Augoustinos, M. and Reynolds, K. (2001). Assessment: Essay (90%, 3000 words) and presentation (10%) in the LT.

PS410 Half Unit
Social Representations

This information is for the 2017/18 session.
Teacher responsible: Prof Sandra Jovchelovitch QUE.3.25
Availability: This course is available on the MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course focuses on social representation as a theory in social and cultural psychology and as phenomena in social life. It explores concepts, empirical studies and fields of application of social representations. The course aims to equip students with in-depth understanding of the production, transformation and contestation of representations in public spheres. Through an examination of concepts and key studies in the field, the course explores the dynamics of social thinking and the power of representations to construct meanings and social realities. It highlights process of communication and contestation between different knowledge systems and the dynamics of social change. The course covers: 1) origins and theoretical roots of social representations in the field of socio-cultural psychology and situated cognition; 2) processes and functions of social representation, including dialogicality, cognitive polyphasia, relating to the unfamiliar, semantic enablers and barriers, and the future of common sense vis-a-vis systemic encroachment and artificial intelligence; and 3) ongoing research on how communities think and the transformation of common sense in contemporary societies, in areas such as self and community, cultural encounters/cultural conflict, health, professional practices, urban transformations, social exclusion (these can vary depending on research at hand).
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: An essay plan of not more than 500 words is required.
Indicative reading: Key texts: G Sammut, E Andreouli, G Gaskell, and J Valsiner (Eds). Resistance, stability and social change: A handbook of social representations. Cambridge University Press, 2015. S Moscovici, Social Representations. Polity Press, 2000; S Moscovici, Psychoanalysis: its image and its public. Polity Press, 2008. S Jovchelovitch, Knowledge in Context: Representations, community and culture. Routledge, 2007. I Markova, Dialogicality and Social Representations. CUP, 2003. D Jodelet, Madness and Social Representations, Harvester/Wheatsheaf, 1991; W Wagner and N Hayes, Everyday Discourse and Common Sense, Palgrave, 2005. K Deaux & G Philogène, Representations of the Social: Bridging Theoretical Perspectives, Basil Blackwell, 2001.
Other texts: R M Farr & S Moscovici (Eds), Social Representations, Cambridge University Press, 1984; Howarth, C. "A social representation is not a quiet thing": Exploring the critical potential of social representations theory." British Journal of Social Psychology, 2006, 45: 65-86. I Marková & S Jovchelovitch (Guest Editors) Journal for the Theory of Social Behaviour, Special Issue on Psychoanalysis: its Image and its Public, 38(4) 2008. H Joffe, Risk and 'The Other'. Cambridge University Press, 1999. U Flick, The Psychology of the Social. Cambridge: Cambridge University Press, 1998. G Maloney and I Parker, Social Representations and Identity: content, process and power, Palgrave, 2007.
Assessment: Coursework (100%, 3000 words) in the ST.

PS411 Half Unit
Current Communication Research

This information is for the 2017/18 session.
Teacher responsible: Dr Bradley Franks QUE.3.05
Availability: This course is available on the MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Students on degrees without a psychology or communications component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.
Pre-requisites: None
Course content: The course content changes every year. It can either be a full thematic course or a collection of current research topics, and will involve contributions of staff members from the Department of Psychological and Behavioural Science and of visiting academics to the Department. The course provides research-led teaching on communication, using a range of theoretical approaches and addressing a wide variety of practical issues.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 3 presentations and 1 other piece of coursework in the LT.
Formative assessment involves:
i. ONE written plan for an answer to an essay question, selected from a range of topics
ii. THREE group presentations on core readings
Indicative reading: The reading list varies according to the particular contents taught in each year.
Indicative readings will be made available during MT
The reading list varies according to the particular contents taught in each year.
Indicative readings will be made available during MT
Assessment: Essay (100%, 3000 words) in the LT.
Summative assessment for this course comprises a 3000 word essay, submitted at the end of LT

PS415 Half Unit
Social Psychology of Economic Life: Advanced Topics

This information is for the 2017/18 session.
Teacher responsible: Dr Frederic Basso, QU.3.14
Availability: This course is available on the MSc in Media and Communications (Media and Communications Governance), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Students on degrees without a psychology or media component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.
Course content: The course takes the position that social

psychology is the key to understanding real-world economic life by taking in account cognitive, affective and social processes. Main concepts: analytic/experiential systems in decision-making, metaphors, images, stories/storytelling, self/extended self in consumption, dramaturgy/staging, social roles, face-to-face interactions, emotional labour/dissonance, gift economy, sharing economy, social group (inclusion/exclusion), stigma, social norms, nudging, disenchantment of the economic world, post-modern hyper-realities, experience economy, resistance to persuasion (inertia, scepticism, reactance), resistance to consumption (avoidance, minimisation, boycott/active rebellion).
Teaching: 15 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Reading lists will be provided for each topic, the following are of general use; S E G Lea, R M Tarpy & P Webley, The Individual in the Economy, Cambridge University Press, 1987; A Lewis, P Webley & A Furnham, The New Economic Mind: The social psychology of economic behaviour, Harvester, 1995.
Assessment: Essay (100%, 3000 words) in the LT.

PS418 Half Unit
Health Communication

This information is for the 2017/18 session.
Teacher responsible: Dr Jennifer Sheehy-Skeffington QUE.3.20
Availability: This course is available on the MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Population Health, MSc in Health and International Development, MSc in Health, Community and Development, MSc in Media, Communication and Development, MSc in Organisational and Social Psychology, MSc in Population and Development, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course centres on the application of social psychology to the challenge of health communication in a global context. While considering both health and communication in their widest sense, it focuses primarily on the practice of health promotion and its conceptual underpinnings. We will begin with an introduction to health psychology and expert-led approaches to health communication, before moving on to consider health and illness in their wider social and societal context. The final section of the course considers community development and social justice approaches that put empowerment and participation at their centre, enabling us to close with a critical yet hopeful appraisal of the future of health communication. Throughout, we will view the individual as a bio-psycho-social system, located within families, workplaces, communities, local and global cultures, unequal power hierarchies, and rapidly changing social settings. Through lectures, readings and seminar discussions, we will encounter theoretical debates about determinants of health and health-related behaviours, the nature of health communication, and the processes through which communication impacts on health. At the same time, we will consider the implications of these debates for health promotion campaigns and policies, learning about real-world examples through guest lectures, and gaining hands-on experience in designing and critiquing health communication campaigns through practical exercises.
Teaching: 15 hours of lectures and 10 hours of seminars in the LT. Changed to 90 minutes lectures
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Berry, D. (2007) Health Communication: theory and practice. Buckingham: Open University Press. Crossley M. (2000) Rethinking health psychology. Buckingham: Open University Press. Dixey, R. (Ed.) (2013). Health Promotion: Global Principles and Practice. Wallingford: CABI. Hofrichter, R. (Ed.) (2003) Health and Social Justice: Politics, Ideology, and Inequality in the Distribution of Disease. Jossey-Bass: San Francisco. Hook, D., Franks, B. and Bauer, M. (Eds) (2011). Communication for development and social change. Los Angeles: Sage. Tones K. and Green J. (2006). Health promotion: planning and strategies. London: Sage.
Assessment: Essay (100%, 3000 words) in the LT.

PS421 Half Unit
Issues in Social Psychology: Group Dynamics

This information is for the 2017/18 session.
Teacher responsible: Dr Neela Muhlemann, KSW.5.11
Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Students on degrees without a psychology component may attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible.
Pre-requisites: Students who come to this course without any background in social psychology are expected to familiarise themselves with the relevant literature. To this end, we strongly suggest that those students read the following books:
Hogg, MA & Vaughan, G. (eds) (2014). Social Psychology. 7th edition. Harlow: Prentice Hall.
Brown, R. (2000). Group processes: Dynamics within and between groups. 2nd edition. Oxford: Blackwell Publisher.
Course content: Group dynamics and interpersonal skills are an essential element in any successful organisation (in the broadest sense) and often provide a 'competitive advantage' in managing organisations of all sorts. Group dynamics directly affect the ability to think, learn and innovate together.
This course provides students with a critical understanding of different theories and practises associated with group dynamics. The objectives of the course are two-fold:
1) To introduce past and present theories of group dynamics by introducing concepts used by psychologists to understand and improve group behaviour
2) To apply and critically evaluate how group dynamic theories help us to explain and predict real-life experience.
Topics that will be covered include: 1) Origins of group dynamics 2) Influence and Power 3) Crowds and collective behaviour 4) Group dynamics and the Internet 5) Intra- and intergroup dynamics 6) Diversity in groups 7) Workgroups in temporary and fragmented contexts 8) Group performance and decision-making 9) The importance of groups for health
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Haslam, S.A., (2004). Psychology in Organiszations. A Social Identity Approach. London: Sage. Tajfel, H. & Turner, J. (1979). An integrative theory of intergroup conflict. Assessment: Essay (100%, 3000 words) in the LT.

PS428 Half Unit Not available in 2017/18
Knowledge Processes in Organizations

This information is for the 2017/18 session.
Teacher responsible: Dr Lucia Garcia-Lorenzo QUE.3.23
Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course focuses on the processes of knowing and learning to examine the varied ways in which people work together in a number of contexts, from project teams within single organisations to inter-organisational partnerships, networks and alliances. It offers students' a theoretical and practical understanding about how organisations construct, disseminate and share knowledge in those settings.
Concretely, the course addresses the following questions:1) What is organisational knowledge? Lectures will explore the differences and overlaps between personal, social/organisational and cultural knowledge and between the processes of learning and knowing. 2) How do we create new knowledge in organisations? To answer this question we will look into processes of learning, creativity, innovation and entrepreneurship. 3) How can we efficiently share/transmit knowledge in organisations? The course will address the challenges generated through the use of new technologies in the work place, the use of stories and narratives as a mode of knowledge transmission, the development of collaborative practices, power relations in organisations, etc. 4) How do we 'store' and use current organisational and personal knowledge? To answer this question lectures will address the uses of organisational history and memory as well as look into how we practice knowledge in every day organisational work.
The focus of the course is both theoretical and practical. Students' will be expected to engage with both current theoretical debates and emerging practical issues in organisational life.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Students will be expected to make extended use of the course intranet - for on-line discussions and group presentations.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Reading lists will be provided for each topic, the following are introductory texts of general use: Amabile, T.M. (1988). A model of creativity and innovation in organisations. Research in Organisational Behaviour 10 (1), 123-167. Castells, M. (1996) The Raise of the Network Society. Oxford: Blackwell; Czarniawska, B. (1998) A narrative approach to organisation studies. Qualitative research methods series. London: Sage. Davenport, T.H. & Prusak, L. (1998). Working knowledge: How organisations manage what they know. Harvard Business Press. Drucker, P. (2014). Innovation and entrepreneurship. Routledge. Heckscheer, C. and Adler, P.S (2006) The firm as a collaborative community. Oxford: Oxford University Press. March, J.G. (1991). Exploration and exploitation in organisational learning. Organisation Science, 2(1), 71-87. Tsoukas, H. (2005) Complex Knowledge: Studies in Organisational Epistemology. Oxford: Oxford University Press. Weick, K. E. (1995) Sensemaking in organisations. London: Sage..
Assessment: Essay (100%, 3000 words) in the LT.

PS429
The Social Psychology of Communication

This information is for the 2017/18 session.
Teacher responsible: Dr Bradley Franks QUE.3.05 and Prof Martin Bauer QUE.3.04
Availability: This course is compulsory on the MSc in Social and Public Communication. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course examines core theories towards a social psychology of communication. Issues raised will refer to verbal and non-verbal, face-to-face, rumours and mass mediated, as well as private and public, communal and strategic forms of communication. The second half of the course will provide an overview of applied communication research in various professional areas of public communication. Theories of communication covered in the course include evolutionary theory, classical rhetoric, diffusion research, pragmatics and relevance theory, semiotics and system theory and the theory of communicative action. Issues will be raised as to the critical analysis and the design of communicative action. Issues will be raised as to the critical analysis and the design of communication efforts in professional fields such as business corporations, NGOs, scientific professional bodies, health promotion, governments and political parties, police campaigns, and international organisations.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Students taking PS429 will also be required to attend PS443A lectures and discussion groups (PS443A lecture 10 x 120 mins (MT) and 9 x 60 mins discussion groups).
Formative coursework: Students' will complete one formative assignment in the MT.
Indicative reading: No one book covers the entire syllabus; students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course. J Habermas, Theory of Communicative Action, Vol 1 + 2, Polity Press, 1997; R Heath & B Jennings, Human Communication Theory and Research: Concepts, Contexts, and Challenges (2nd edn), Lawrence Erlbaum, 2000; A Mattelart & Mattelart, Theories of Communication: a Short Introduction, Sage, 1998; D McQuail, McQuail's Mass Communication theory (4th edn), Sage, 2000; R Rice & C Atkin, Public Communication Campaign, Sage, 2000; E Rogers, Diffusion of Innovation, Free Press, 1995; D Sperber & D Wilson, Relevance: Communication and Cognition, Cambridge, 1995. Hook, D, B Franks, MW Bauer (2011) (eds) The Social Psychology of Communication, London, Palgrave.
Assessment: Exam (25%, duration: 1 hour) in the LT week 0.
Essay (75%, 5000 words) in the MT.

PS438 Half Unit
Corporate Communications

This information is for the 2017/18 session.
Teacher responsible: Dr Ben Shenoy, KSW.5.13
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.
Students from other programmes may access this course subject to availability.
Course content: The different activities encompassed by the concept of corporate communication affect each one of us in various guises: as employees, customers, citizens, investors or, more generally, as observers of today's world. It is therefore essential to develop a critical understanding of the different practices associated with corporate communication. Future practitioners also need this critical perspective so as to understand better the challenges involved in the development and implementation of corporate communication programmes. The objectives of the course are two-fold: 1) to provide an introduction to corporate communication, here understood as a set of activities undertaken by organisations in order to establish favourable corporate images and reputations with all of an organisation's stakeholder groups; and 2) to underline how a better understanding of key social psychological concepts can contribute to the overall management and effectiveness of organisations and corporate communication.
This course is designed to apply relevant social psychological theory to gain insight into the changing world of corporate communication.
Teaching: 15 hours of lectures and 5 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 case study in the LT.
Indicative reading: J Cornelissen, Corporate Communications: A Guide to Theory and Practice. Chapters 5, 6, 7, 8, 9 and 15.
Assessment: Essay (100%, 3000 words) in the LT.

PS439 Half Unit
Science, Technology and Resistance

This information is for the 2017/18 session.
Teacher responsible: Prof Martin Bauer QUE.3.04
Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Tarde (1980) famously argued that creativity and invention have none or little regularity, while the diffusion of new ideas and practices follows the 'laws of imitation'. This idea remains very influential in the models of diffusion of innovation and the linear model of science translated into technical engineering and marketing. The course will examine critically how this model is only valid hen there is no or little resistance in the process which, however, is rare. More common are efforts of techno-scientific mobilisations that encounter resistance, and resistance changes the process by focussing attention where needed; enhancing the 'collective we-image', evaluating on-going efforts of mobilisation and urging strategic adaptation and delays to the plan. We will explore various conceptions of 'resistance' across the social sciences and develop the functional analogue to 'pain' in relation to collective activity (Bauer, 1991, 1995 and 2015). In this light, we will examine public resistance, public engagement with science and its debates and impact on the developments of nuclear power, genetic engineering and information technology leading into current mobilisations for Nanotechnology, synthetic life forms, and robotic automation.
Students' are expected to appreciate theory driven empirical research.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Bauer, M. (2015). Atoms, Bytes & Genes: public resistance and techno-scientific responses. New York: Routledge. Bauer, M.W. (2013). New technology: a social psychology of disinhibition and restraint. In M.W.Bauer, R. Harre & C. Jensen (Eds) Resistance and the Practice of Rationality. J Van der Plight, Nuclear Energy and the Public, Blackwell, 1992; Roger, E.M. (1996 [1962]). Diffusion of innovation 4th edition. New York: Free Press. Tarde, G. (1962 [1890]). The laws of imitation, Gloucester, MA: Peter Smith. Valente, T.W. & Rogers, E.M. (1995). The origins and development of the diffusion of the innovation paradigm as an example of scientific growth. Science Communication, 16, 3, 242-273. Wall, P.D. (1979). On the relation of injury to pain, The John J Bonica Lecture. Pain, 6, 253-264. Weart, S.R. (1988). Nuclear fear: A histor of images, Harvard University Press.
Each session will have its own particular readings, divided into essential texts and additional readings. This will be revised on an annual basis. No one text covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.
Assessment: Essay (100%, 3000 words) in the LT.

PS443A
Psychological and Behavioural Science

This information is for the 2017/18 session.
Teacher responsible: Dr Sophie Von Stumm QUE 3.22
Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

This course is a compulsory component of courses: PS400 Contemporary Social and Cultural Psychology; PS404 Organisational and Social Psychology; PS429 The Social Psychology of Communication; and PS465 Psychology of Economic Life.
Course content: What is the relevance of Psychology for social science? How is it useful for the study of organisations, intercultural relations, economic life and communication? Each week we tackle key debates for the social sciences through an examination of key theories in psychological and behavioural science. For example we ask: What drives human innovation and progress? How is human consciousness possible? How does our body affect the way we think? Is intergroup conflict inevitable? Are there cultural differences in how we think? Do we practice what we preach? Do certain organisations produce good leaders? How does social status impact social and economic behaviour? These questions are addressed though the introduction of the main theories of psychological and behavioural science, theories on social learning, cultural evolution, consciousness, social identity, intergroup relations, attitudes and behaviour, social representations, social influence, power, language and leadership. The course is aimed at MSc students with little or no background in psychology but will also include advanced material and critiques for students who want to study topics in-depth.
Teaching: 20 hours of lectures and 9 hours of seminars in the MT.
Formative coursework: This will take the form of a mock MCQ test, conducted in the MT.
Indicative reading: Augostinos, M. Walker I and N Donaghue. (2006) Social Cognition: An integrated Introduction (2nd edition).London: Sage; Bar-Tal, D. (2011) Intergroup conflicts and their resolution: A Social Psychological Perspective. Hove: Psychology Press. Farr, R.M. (1996) The Roots of Modern Social Psychology, Oxford: Blackwell; Flick, U. (1998) The Psychology of the Social. Cambridge: Cambridge University Press; Gergen, K. (1991) The Saturated Self: Dilemmas of Identity in Contemporary Life. New York: Basic Books. Haslam, A. (2007), Social Psychology Matters. Milton Keynes: Open University Press.Hook, D. (Ed). (2004).Critical psychology Cape Town: University of Cape Town Press;Ibanez, T. & Iniguez, L. (1997). Critical social psychology. London: Sage; Johannson, T. (2000) Social Psychology and Modernity. Buckingham: Open University Press; Jovchelovitch, S. (2007) Knowledge in Context: Representations, Community and Culture. London: Routledge. Haslam, S.A., Reicher, S.D. and Platwo, M. (2011) The New Psychology of leadership: Identity, influence and power. Hove: Psychology Press. Tajfel, T. (1981) Human Groups and Social Categories: Studies in Social Psychology, Cambridge University Press; Tomasello, M. (2009). Why we cooperate. Cambridge, Mass.: MIT Press.Walkerdine, V. (2002). (Ed.), Challenging Subjects: Critical Psychology for a New Millennium. Basingstoke: Palgrave.
Assessment: The material covered in this course contributes to the formal assessment of the PS400, PS404, PS465 and PS429 core courses. This material is assessed wholly by MCQ which will count for 25% of the overall grades on these core courses; these courses also have their own, specific essay-based assessments which will count for 75% of their overall grades.

PS445 Half Unit
Organisational and Social Decision Making

This information is for the 2017/18 session.
Teacher responsible: Dr Thomas Reader QUE.3.10
Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management Science (Decision Sciences), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on degrees without a psychology component may only attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible.
Course content: This course teaches on theory and research from the field of organisational and social decision-making. It is primarily focused on high-risk organisational settings, and explores contexts where there is uncertainty, high-consequences for failure, and complex social systems. PS445 provides a historical introduction to decision-making, and introduces the core concepts used by social psychologists to understand (and improve) decision-making processes in organisations. It draws upon the social, cognitive and organisational psychology literatures, and considers the core concepts and tools used to understand, research, and support decision-making in organisations. These theories and tools are contextualized through empirical and case study examples taken from domains such as finance, healthcare, the energy industry, government, and the military. Students will be encouraged to take a critical perspective, and to consider how the principles taught on the course can be applied to (and used to improve) a variety of social or organisational scenarios. The course will cover psychology (or 'Human Factors') concepts such as: intuitive and analytical forms of decision-making, individual traits and cognitive factors that influence decision-makers (e.g. biases and emotions), human error and decision-failures, rule breaking, and group decision-making processes (e.g. teamwork, leadership). It will teach on methods for analysing decision errors, identifying decision-making competencies, observing decision-making, and supporting group decision processes.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 case study in the LT.
Indicative reading: Brown, R. V. (2005). Rational choice and judgment: Decision analysis for the decider: Wiley.; Furnham, A. (2005). The Psychology of behaviour at Work: Psychology Press.; Kerr, N., & Tindale, R. S. (2004). Group performance and decision-making. Annual Review of Psychology, 55, 623-655. ;Klein, K., Ziegert, J. C., Knight, P., & Xiao, Y. (2006). Dynamic delegation: Shared, hierarchical, and deinidivudalized leadership in extreme action teams. Administrative Science Quarterly, 51, 590-621.; Koehler, D., & Harvey, H. (2007). Handbook of judgment and decision-making. Blackwell.; Lipshitz, R., Klein, G., Orasanu, G., & Salas, E. (2001). Taking stock of naturalistic decision making. Journal of Behavioural Decision Making, 14, 331-352.; Mellers, B., Schwartz, A., & Cooke, A. (1998). Judgement and decision-making. Annual Review of Psychology, 49, 447-477.; Reason, J. (1990). Human error. New York: Cambridge University Press; Reason, J. (1997). Managing the risks of organizational accidents. Aldershot, Ashgate.
Assessment: Essay (100%, 3000 words) in the ST.

PS446 Half Unit
Issues in Organizational and Social Psychology: Organizational Life

This information is for the 2017/18 session.
Teacher responsible: Mr Barry Rogers, KSW.5.13 and Ms Elsbeth Johnson, QUE.3.13
Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Students on degrees without a psychology component may only attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible. This course is capped at 25 students.

Course content: In recent years, much has been made of the demise of the traditional work organisation and with it, traditional organisational life. In popular rhetoric, globalisation, the rise of the knowledge economy, ICT and the credit crunch have all trumpeted the dawn of a very different world. The reality of the situation would seem to be far more complex.
So how do we understand and explain this complexity? This basic question has prompted huge soul searching within the social sciences as comfortable assumptions about the analysis of our world have been shown wanting. For many the current behavioural 'turn' throughout many of our disciplines act as an alternative lens for making sense of our reality - this has as its core the tools and approaches of social psychology.
The aim of the course is to give a social psychological perspective on the elements of continuity and change surrounding contemporary organisational life. It will focus in particular on the blurring of boundaries within our key organizational relationships: with employees, customers, clients, and stakeholders. Its primary objective is to facilitate students in developing a critical and reflective understanding of these emerging processes.
The course is informed throughout by a dual mandate. A rigorous approach to theory will be developed within the context of contemporary organisational issues, and current topics of debate. This essential relationship between theory and practice is a central feature of the course - outside speakers and practitioners are used throughout to supplement the learning for each topic and various forms of social media are employed to connect with an extended community of practice.
The course will address emerging organisational questions such as:
Perspectives: how do we make sense of the complexity of organisational Life?
Why do we work? How do different generations engage with work?
The rise of the BlackBerry: have we moved from the workplace to the 24/7 workspace?
Organisational time: is work life-balance a pipe dream?
After multiculturalism where now for organisational equality, diversity and inclusion?
Corporate Social Responsibility: how do organisations relate to wider stakeholders?
Customer, client or 'partner'? Co-creation as the dynamic for growth.
Beyond the 'ivory tower': how do we relate organisational theory to practice?
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: One formative piece of coursework to be submitted in the LT.
Indicative reading: Detailed references and class topics are distributed in the first lecture of the series. The following represents some key readings from the course:
Beck, U. (2000) The Brave New World of Work. Cambridge: Polity Press; Berger, P. & Luckmann, T. (1967) The social construction of reality. London: Penguin; Clegg, S.R. & Kornberger, M.[eds.] (2006) Space, Organization and Management Theory. Copenhagen: Liber & Copenhagen Business School; Cortina, L.M. (2008) Unseen Injustice: incivility as modern discrimination in organizations. Academy of Management Review, 33, No. 1, 55-75; Flaherty, M.G. (1999) A Watched Pot: how we experience time. New York: New York University Press; Matten, D. & Moon, J. (2008) "Implicit" and "Explicit" CSR: A Conceptual Framework for a Comparative Understanding of Corporate Social Responsibility, The Academy of Management Review, 33, 2, 404-424; Matthewman, S. & Hoey, D. (2006) What happened to postmodernism? Sociology, 40, 3, 529-547; Morgan, G. (1997) Images of Organisation. London: Sage; Rapoport, R., Bailyn, L., Fletcher, J.K. & Pruitt, B. H. (2002) Beyond Work-Family Balance, Advancing Gender Equality and Workplace Performance. San Francisco: Wiley; Smola, K.W. & Sutton, C.D. (2002) Generational differences: Revisiting generational work values for the new millennium. The Journal of Organisational Behaviour, 23, Special Issue, June 2002; Weick, K.E. (2003) Theory and Practice in the Real World in: Tsoukas, H. & Knudsen, C. (2003) The Oxford Handbook of Organizational Studies; Weick, K. E. (1995) Sensemaking in Organisations. California: Sage.
Assessment: Essay (100%, 3000 words) in the ST.

PS451 Half Unit
Cognition and Culture

This information is for the 2017/18 session.
Teacher responsible: Dr Bradley Franks QUE.3.05
Availability: This course is available on the MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Anthropology (Religion in the Contemporary World), MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course examines recent directions in research relating to the relationships between mind and culture. Specific content will include a variety of theoretical issues, for example: relationships between social facts and psychological facts; naturalistic and non-naturalistic concepts of culture; symbolic culture; cultural relativity and universals; evolutionary and developmental constraints on the relations between mind and culture; communication, cultural transmission and change. These issues will be discussed with reference to specific domains of investigation, such as: emotions, representations of religion, race and natural kinds; pragmatics and communication; and social divisions of labour in meaning and representation, including deference and expertise.
Teaching: 15 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 3 presentations, 1 quiz and 1 other piece of coursework in the LT.
Will consist of:
i. a plan for an answer to an essay or case study question
ii. group presentations of core readings over the term
ii. a self-administered multiple choice quiz
Indicative reading: Detailed references and a synopsis of lectures and class topics are distributed in the first lecture of the series, and are available in S315 and in Outlook/Public Folders/Departments/Social Psychology. The following are of general use: S Atran, Cognitive Foundations of Natural History, Cambridge University Press, 1990; P Boyer, The Naturalness of Religious Ideas, University of California Press, 1996; D E Brown, Human Universals, McGraw-Hill, 1991; D M Buss & D T Kenrick, Evolutionary Social Psychology, 1998, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), The Handbook of Social Psychology, Vol 2, McGraw-Hill, pps. 982-1026; M Cole, Cultural Psychology, Harvard University Press, 1996; S T Fiske et al, The Cultural Matrix of Social Psychology, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), The Handbook of Social Psychology, Vol 2, McGraw-Hill; L Hirschfeld, Race in the Making: Cognition, Culture and the Child's Construction of Social Kinds, MIT Press, 1996; R Nisbett & D Cohen, The Culture of Honor: The Psychology of Violence in the South, Westview Press, 1995; P B Smith & M H Bond, Social Psychology Across Cultures (2nd edn), Prentice Hall, 1998; D Sperber, Explaining Culture, Cambridge University Press, 1996.
Assessment: Other (100%) in the LT.
Students may choose to write EITHER a 3000 word essay OR a 3000 word case study

---

PS456 Half Unit
Consumer Psychology

This information is for the 2017/18 session.
Teacher responsible: Prof Saadi Lahlou QUE.3.26
Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public

Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is capped.
Course content: The objectives of the course are: 1) to provide students with an understanding of the social psychological and cognitive processes behind the consumption of goods and services; 2) to point at alternative modes of relationship with users/consumers than the current ones which are based on market and competition; and 3) to prepare students to build better business models or the sustainable provision of goods and services.
The course will address the social psychology of consumption at different levels of analysis: individual, group and societal. It will provide students with psycho-social theories which explain phenomena classically described in marketing and consumer science. It will also explore and present new and innovative research methods and business models.
This is not a standard marketing or consumer research course, it is oriented towards changing the world to a better place rather than moving brand territories and market shares. The students will learn how to analyse a consumption process and change the business models and providers' platforms to improve the world.
The narrative: the current consumer society and its Production Consumption System (PCS) are not sustainable. Happiness measures show that high happiness is not correlated with high GNP. There is a possibility for another PCS where happiness comes more from social factors and less from material consumption.
Changing the system is difficult because one must not only find new ways of consuming, but also a transition path which enables current suppliers to get to another regime.
There are however a series of emerging alternative models. The rise of multi-sided procurement platforms, especially using digital technologies, enables new models where sociability can be used to leverage schemes.
Teaching: 15 hours of lectures and 5 hours of seminars in the LT.
Formative coursework: Essay plan submitted in the LT.
Indicative reading: Griskevicius, V. & Kenrick, D.T. (2013). Fundamental motives: How evolutionary needs influence consumer behaviour. Journal of Consumer Psychology, 23 (3), 372-386. Cialdini, R.B. (2001). Influence: Science and Practice (4th Edt.). New York: Harper Collins. Belk, R.W. (1988). Possessions and the Extended Self. Journal of Consumer Research, 15(2), 139-168. Bourdieu, P. (1986). The forms of capital. In J Richardson (Ed). Handbook of Theory and Research for the Sociology of Education (New York: Greenwood), 241-258. Bendapudi, N.& Leone, R.P. (2003). Psychological Implications of Customer Participation in Co-Production. Journal of Marketing, 67 (January), 14-28. Rysman, M. (2009). The Economics of Two-Sided Markets. Journal of Economic Perspectives, 23(3), 125-143. Additional readings will be recommended throughout the course.
Assessment: Essay (100%, 3000 words) in the LT.
The assignment is understood as part of the learning, to provide the transferable skills of analysing a real case and marking sound recommendations to make the world a better place. In the first part, 'memorandum' (1,000 words), you will be asked to prepare a memorandum to the head of an organisation of your choice, with recommendations that make the business of that organisation more sustainable. The recommendations must be realistic. In the second part of the essay, 'justification' (2,000 words), you will justify the specific recommendations presented in the memorandum with reference to social psychological and consumer psychology literature and concepts. You can read examples of previous years assignments at http://www.lse.ac.uk/DPBS/videos/PS456.aspx. The best essays are sent to the CEOs.

PS458 Half Unit
Creativity and Innovation

This information is for the 2017/18 session.
Teacher responsible: Dr Alex Gillespie QUE.3.03
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.
This course is available to any graduate student within the Department of Psychological and Behavioural Science. This course is available as an outside option to students' on other programmes were regulations permit.
Pre-requisites: An undergraduate degree in a social science related discipline or equivalent.
Course content: This course examines creativity and innovation from a social psychological standpoint. The first lectures of the course examine creativity, focusing on the social conditions which lead to new ideas. Then we will examine the way in which new ideas and technologies are instituted and resisted. The role of play and materiality in creative production are discussed next, followed by creative problem solving and the societal transmission of innovation. The course will end with a focus on societal creativity, utopias and imagining the future. Guiding questions will be: How do new ideas and technologies come about? What social contexts are conducive to creativity and innovation? Can the resistance to innovation lead to innovation? What is the human imagination? Why do humans enjoy play, games and fiction? What leads to insightful problem solving? How does perspective-taking help us understand if something new is creative, productive or useful?
The course will cover the social conditions (i.e., face-to-face or online, one-to-one or group, autocratic or democratic, specialisation or integration, etc.) conductive to creativity and innovation, including the social conditions for socialisation creative individuals and the social and institutional factors which enable productive novelty to be recognised and instituted. Specific topics will include: theories of creativity, play & imagination, insight and problem solving, identifying good ideas, materiality, cultural evolution, the resistance to innovation, user innovation, utopias and how people imagine the future.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Bauer, M. (2014). Atoms, Bytes and Genes: public resistance and techno-scientific responses. New York: Routledge. Bechtoldt, M.N., De Dreu, C.K., Nijstad, B.A., and Choi, H.S. (2010). Motivated information processing, social tuning, and group creativity. Journal of Personality and Social Psychology, 99(4), 622. Fioratou, E., and Crowley, S.J. (2009). Assessment: Essay (100%, 3000 words) in the LT.

PS461 Not available in 2017/18
Health, Community and Development

This information is for the 2017/18 session.
Teacher responsible: Prof Catherine Campbell STC.303 and Dr Jenevieve Mannell STC.367
Availability: This course is compulsory on the MSc in Health, Community and Development. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course examines the psycho-social determinants of community health and social development, in the context of health inequalities and social marginalisation in the global North and South. In particular it explores the role of participation, partnerships and collective action in facilitating health, well-being, the management of illness (including prevention, service access, care and treatment) and health-enabling social change. Attention is given to promoting behaviours that facilitate both physical and mental health and well-being more generally, viewing health as a phenomenon that spans the individual, community and social levels of analysis.
The challenges of facilitating health, and health-enhancing collective action, are explored with reference to social identities, social representations and local knowledge, dialogue, empowerment, critical thinking, gender, social capital and social change. All this material is contextualised within wider debates about the global nature of public health, mainstream vs. alternative development policy, the respective roles of local and global social movements, and the potential for participation to alleviate the negative health impacts of social inequalities. Particular attention is given to the links between health and inequalities related to poverty, gender and sexuality, ethnicity, age (children and the elderly) and disability.
The over-riding ethos of the course is an interest in the links between theory and practice. Attention is given to providing students with actionable conceptual tools for the challenges of designing and evaluating community-focused programmes in the fields of public health, health promotion and health-supporting social transformation.
Teaching: 20 hours of lectures and 5 hours of seminars in the MT.
Formative coursework: A mini-essay submitted in MT.
Indicative reading: Chambers, R. (2003). Whose reality counts? Putting the first last. London: ITDG. Cornwall, A (Ed) (2011) The participation reader. Zed. Crisp, Nigel (2010) Turning the world upside down: the search for global health in the 21st century. London: Royal Society of Medicine. Assessment: Exam (50%, duration: 3 hours) in the main exam period.
Essay (50%, 5000 words) in the MT.

PS462 Half Unit
Theory and Practice of Organisational Development

This information is for the 2017/18 session.
Teacher responsible: Ajit Menon, KSW.5.13
Availability: This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.
Course content: The organisation is a social system that is complex, dynamic and ever changing. This course attempts to explore the management of organisational change and development in a practical way. It does this by recognising that there are research-based methodologies for ensuring that the potential inherent in change is harnessed, and that the capacity and potential of the organisation, in the pursuit of a broad range of organisational objectives, are enabled. While it is informed by a number of key theoretical frameworks, Organisation Development comes into its own in application. The aim of the course, therefore, is two fold: first to explore the body of core theory underpinning the practice; second, to examine the practice of Organisation Development as a 'process' (not a 'product' or a 'programme') which fundamentally influences and is influenced by the specific organisational context within which it takes place. Drawing on key theoretical frameworks and the approaches of major practitioners, the course also examines a range of current, best practice socio-psychological interventions. Students will be actively encouraged to relate key theoretical perspectives to organisational challenges covering a range of contemporary issues and contexts.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: C Argyris, On Organisational Learning (Malden, Mass: Blackwell Business, 1999); Richard Beckhard, Organisational Development: Strategies and Models (Reading, Mass. Addison-Wesley Publishing Co, Inc, 1969); W Bennis, K Benne & R Chin, The Planning of Change, (New York: Holt, Rinehart & Winston, 4th edn, 1984); P Checkland, Systems Thinking, Systems Practice (Chichester: Wiley, 1981); W Isaacs, Dialogue and the Art of Thinking Together (New York: Doubleday 1999); P R Lawrence & J W Lorsch, Developing Organisations: Diagnosis and Action (Reading, Mass. Addison-Wesley Publishing Co, Inc, 1969); M L Tushman & P Anderson, Managing Strategic Innovation and Change (New York: Oxford University Press, 1997); Edgar Schein, Process Consultation: Its Role in Organisation Development (Reading, Mass. Addison-Wesley Publishing Co, Inc, 1988); Edgar Schein, Organisational Culture and Leadership (San Francisco: Jossey Bass, 1992
Assessment: Presentation (45%), essay (45%) and class participation (10%) in the LT.

PS464 Half Unit
Social Influence

This information is for the 2017/18 session.
Teacher responsible: Prof Martin Bauer QUE.3.04
This is taught jointly with Dr Gordon Sammut, Lecturer at University of Malta, and Visiting Fellow to the Department of Psychological and Behavioural Science.
Availability: This course is available on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: The course is primarily intended for MSc and PhD students in Social Psychology, in particular those who follow PS429 Social Psychology of Communication or equivalent core modules in Social Psychology. But, conditional to available space, it will be open to any interested MSc or Research Student from across the school.
Course content: This course explores the many modes and modalities of social influence which social psychology has studied and developed concepts for. Modalities of social influence cover processes by which social groups and actors normalise, assimilate and accommodate private and public opinion, attitudes, social stereotypes, institute normative expectations and ways of life, and achieve recognition and social change. We will discuss the social psychological traditions such as rhetoric, crowd behaviour, public opinion, leadership, norms, opinion and attitude formation, majority and minority influence, resistance and obedience to authority, dual-processes of persuasion, mass media effect models; fait-accompli, inter-subjectivity and inter-objectivity. This discussion will unfold under three parallel perspectives: 1) the theoretical and empirical grounding of influence models; 2) the socio-historical context of their formulation, many models came out of WWII and Cold War; and 3) in the mirror of current formulations which often deploy new language without necessarily treading new ground. The course will discuss current ideas and models in comparison with canonical paradigms in order to assess 'real progress' of what often seems 'old wine in new bottles'. The course builds a theoretical integration of modalities of influence in the 'cycle of normativity and common sense' including the normalisation, assimilation and accommodation of social diversity (Sammut & Bauer, 2011). The moral ambiguity of social influence treads a fine line between promoting wellbeing and social recognition, and manipulating beliefs, opinion and attitudes. This raises ethical issues involved in the study and exercise of social influence in the modern public spheres.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Teaching arrangement: the course will be taught as a combination of weekly lecture and discussion seminar. Participants are expected to prepare at least one seminar discussion.
Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.
Participants will contribute to the reading seminars with a presentation, and they will be able to present an essay plan for formative feedback before the end of term.
Indicative reading: Some key references:
- Billig M
- Gigerenzer G (2007) Gut feelings, New York: Viking;
- Habermas J
- Kahnemann D (2011) Thinking, fast and slow; London: Penguin Books.
- Paicheler
- Pratkanis
- Sloane T d Encyclopedia OUP
- Sammut D W ds Communication Palgrave pp87-106.

Each session will have its own particular readings, separated in essential texts and additional readings. This will be revised on an annual basis. No one book covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.
Assessment: Essay (100%, 3000 words) in April.

PS465
Psychology of Economic Life

This information is for the 2017/18 session.
Teacher responsible: Prof Saadi Lahlou QU 3.26
Additional teacher(s): Dr Frédéric Basso QU 3.1.4
Availability: This course is compulsory on the MSc in Psychology of Economic Life. This course is not available as an outside option.
Course content: Human activity is goal-oriented and social; it is evaluated at individual level in terms of emotions and well-being.–a heritage of our Primate nature. Humans have now grown outside of the initial "natural" ecological condition of small tribes of hunters-gatherers to which their body and psyche were adapted. They have socially constructed socio-economic systems ("Production-Consumption Systems" –PCS). In these PCS, individual satisfaction and resources are obtained through participating into a labor division following institutional rules. While this institutionalized system enables canalizing positively some explosive characteristics of humans (competition, hierarchy, preference for the present etc.), the growth of such PCS in a limited world poses urgent problems of sustainability.
Some of the most blatant limitations to the current system come from human drives (competition, aggression, desire for more, inter-group rivalry, short-termism, etc.).
The problem addressed by the Psychology of Economic Life is therefore to explore new ways of constructing sustainable PCS, and to manage the transition from the current state to a more sustainable one. This exploration must be informed by a realistic psychology, which is the object of this course.
Teaching: The course is delivered in Michaelmas Term over 10 lectures of 2h (2 per week, over weeks 1 to 5); 5 weekly seminar sessions of 1.5 hours (weekly over weeks 1 to 5) and three special seminar sessions of 2 hours (weeks 7, 8, 9). Students taking PS465 will also be required to attend PS443A lectures, 10 x 120 mins (MT), and 9 x 60 mins seminars/ discussion groups (MT).
Lectures:
Week 1:
Lecture 1: Introductory lecture. Course narrative [SL]
Lecture 2: Societal psychology, economics and installation theory [SL]
Week 2
Lecture 3: Organisations and Markets [FB]
Lecture 4: The cognitive side of economic life (1): From procedural rationality to heuristics in decision-making [FB]
Week 3:
Lecture 5: Representations and Institutions. [SL]
Lecture 6: Installation Theory, Advanced. [SL]
Week 4
Lecture 7: Motivation at Work [FB]
Lecture 8: The socio-cognitive side of economic life: Thinking about other individuals [FB]
Week 5:
Lecture 9: Transactions and platforms: what is exchanged in interaction? [SL]
Lecture 10: Change processes: principles, forms; theories and practice [SL]
The lectures will be delivered in weeks 1 to 5 so the weeks from 6 to 10 can be used to prepare the case that will be used for the essay.
Formative coursework: Students will be expected to produce 1 quiz and 1 mini-essay in the Michaelmas Term.
The Quiz will be a multiple choice question formative exam (based on content of PS443A).
Indicative reading: There is no single text for PS465 but one may find the following texts useful. Barkow, J., Cosmides, L., &

Tooby, J. (1992). The adapted mind: Evolutionary psychology and the generation of culture. New York: Oxford University Press. Oxford University Press. Diamond, J. (2005). Collapse. How societies choose to fail or succeed. New York: Penguin Books. Goffman, E. (1959). The presentation of self in everyday life. New York: Doubleday Anchor books. Himmelweit, H. T. & Gaskell G. (1990). Societal psychology. London: Sage Publications, Inc. Johansson, T. (2000). Social Psychology and Modernity. Buckingham & Philadelphia: Oxford University Press. Kahneman, D. (2011). Thinking, fast and slow. New York: Farrar, Straus and Giroux. Lahlou, S. (n.d.). (2017) Installation Theory. The societal construction and regulation of individual behaviour. Cambridge: Cambridge University Press. Lewis, A. (Ed.). (2008). The Cambridge Handbook of Psychology and Economic Behaviour. Cambridge: Cambridge University Press. Lewis, A., Webley, P., & Furnham, A. (1995). The New Economic Mind. Hemel Hempstead: Harvester/ Wheatsheaf Books. Farr, R. M. (1997). "The new economic mind: The social psychology of economic behavior: A. Lewis, P. Webley, and A. Furnham (eds.)" Book review. Journal of Economic Psychology, 18(6), 713-717. Mead, G. H. (1934). Mind, self & society: from the standpoint of a social behaviorist. Chicago: The University of Chicago press. Thaler, R. H., & Sunstein, C. R. (2008). Nudge: Improving decisions about health, wealth, and happiness. New Haven & London: Yale University Press. Webley, P., Burgoyne, C., Lea, S., & Young, B. (2001). The Economic Psychology of Everyday Life. Hove & Philadelphia: Psychology Press
Assessment: Exam (25%, duration: 1 hour) in the LT week 0.
Essay (75%, 6000 words) in the MT.
The exam is a seated Multiple Choice Question based on PS443A.
The exam is individual.
The essay is written in groups.
Assessment is part of the learning process. Students must demonstrate their knowledge of theories learned in the course, and apply them to analyse a real case of economic phenomenon (business model, organization, public policy…) -and eventually propose realistic recommendations for an improvement of sustainability. The case must be different from cases studied in the option courses, and from the dissertation. This work is collective. The students will be assembled in groups and produce a case study collectively. The group essay is collectively marked by group; but students will also be asked requested to write a 1000 words individual short essay individually marked.
Both assessments are prepared by an unmarked formative.

PS466 Half Unit
Happiness

This information is for the 2017/18 session.
Teacher responsible: Prof Paul Dolan QUE.3.08
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Economics and Climate Change, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social and Cultural Psychology, MSc in Social and Public Communication and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit. This course is available as an outside option to students on other programmes where regulations permit and subject to the size of the room that is allocated for it.
This is a capped course. In teaching week 1 places will be allocated to students from the Department of Psychological and Behavioural Science on a first come first served basis. At the start of week 2 any remaining places will be allocated to students from other departments, again on a first come first served basis.
Course content: This course aims to introduce students to the main concepts and tools of the science of happiness. To achieve this aim, the course is based around ten lectures covering: 1) what is wellbeing?; 2) research on happiness; 3) evaluations of happiness; 4) experiences of happiness; 5) adaptation and attention; 6) mistakes about happiness; 7) happiness by design; 8) valuing non-market goods using preferences; 9) valuing non-market goods using happiness; 10) happiness as a (the?) policy objective.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures Formative coursework.
Formative coursework: Students will be expected to produce 1 essay (1000 words) in the LT.
Indicative reading: Clark, A, Frijters, P. Shields, M. (2007) Relative income, happiness and utility: an explanation for the Easterlin paradox and other puzzles. Journal of Economic Literature, 4695-144. Kahneman, D. Krueger, A. Schkade, D. Schwarz, N. Stone, A. (2004) Toward national well-being accounts. American Economic Review, 94(2), 429-434. Dolan P. Happiness by design: Finding pleasure and purpose in everyday life, Penguin 2016. Wilson, T. Gilbert, D. (2003) Affective forecasting. Advances in Experimental Social Psychology, 35, p345-411. Dolan P and Kahneman D, Interpretations of utility and their implications for the valuation of health, Economic Journal., 118 (525), 215–234, 2008.
Assessment: Essay (100%, 2500 words) in the ST.

PS467 Half Unit
Behavioural Science

This information is for the 2017/18 session.
Teacher responsible: Prof Paul Dolan QUE.3.08
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Economics and Climate Change, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social and Cultural Psychology, MSc in Social and Public Communication and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit. This course is available as an outside option to students on other programmes where regulations and room sizes permit.
This is a capped course. In teaching Week 1 places will be allocated to students from the Department of Psychological and Behavioural Science on a first come first served basis. At the start of Week 2 any remaining places will be allocated to students from other departments, again on a first come first served basis.
Course content: This course aims to introduce students to the main concepts and tools of behavioural science. To achieve this aim, the course is based around ten lectures covering: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions; 4) social and moral preferences; 5) biases and heuristics and rules of thumb; 6) the role of emotions in decision making; 7) dual-process models of behaviour; 8) the power of nudges; 9) compensating behaviours; 10) ethical considerations.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures.
Formative coursework: Students will be expected to produce 1 essay (1000 words) in the MT.
Indicative reading: Rabin, M. (1998). Psychology and Economics. Journal of Economic Literature, 36, 11-46. Weber, E.U., and Johnson, E.J. (2009). Mindful judgment and decision making. mindspace way, Journal of Economic Psychology, 33, 1, 264-277, 2012. Thaler, R. and Sunstein, C. (2003) Libertarian paternalism, American Economic Review, 93, 2, 175-179.
Assessment: Essay (100%, 2500 words) in the LT.

PS497
Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Frederic Basso QUE.3.14
Availability: This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.
Course content: The dissertation is an empirical investigation, carried out by the student, under the supervision of a member of staff. Research topics and methodologies vary considerably, but they must relate to the student's MSc Programme. All dissertation topics will need to be approved by a supervisor who is a faculty member of the Department of Psychological and Behavioural Science. By the end of the Michaelmas Term students will be introduced to the Dissertation module and members of staff will outline the research areas in which they would be keen to supervise projects. In the first instance students should approach the member of staff whom they would like to be supervised by. Students then submit a Dissertation Plan, outlining their project, and the supervisor who they have discussed the project with. Students are then allocated to supervisors. The supervisor will advise the student, help provide information and bibliography, and provide feedback on the research.
Teaching: 16 hours across LT and ST consisting of group supervision, workshops and related research activities.
Formative coursework: Students will receive formative feedback from their supervisor on the following coursework (1,000 words): 1) A Dissertation Plan 2) A Dissertation Progress Report
Assessment: Dissertation (100%, 10000 words) post-summer term.

PS4A5
Methods for Social Psychology Research: Qualitative and Quantitative Methods

This information is for the 2017/18 session.
Teacher responsible: Dr Bradley Franks QUE.3.05
Availability: This course is compulsory on the MSc in Health, Community and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option. All components of this course are compulsory for students taking MSc degree programmes in the Department of Psychological and Behavioural Science.
Course content: This course is for all MSc students' in the Department of Psychological and Behavioural Science. It will: 1) provide an overview of methodological issues for Social Psychological research; 2) cover core skills in research design in Social Psychology; and 3) provide training in core Social Psychological methods of analysing quantitative and qualitative data. By the end of the course as a whole, students' will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and possibly research after the MSc.
Teaching: All teaching takes place in the MT and LT. The course has three components: 1) PS4AA which consists of 13 hours of lectures on methodological issues and research design, as preparation for completing the course, PS497 Dissertation; 2) MY421M Qualitative Research Methods; and 3) MY465 Intermediate Quantitative Analysis. There is also a series of non-compulsory and non-assessed specialist workshops in LT and ST on specific research methods that students can choose to attend for preparation of their dissertation.
Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.
Indicative reading: Bauer, M. and Gaskell, G. (2000) Qualitative researching with text, image and sound - a practical handbook London, Sage Breakwell, G. Foot, H. and Gilmour. (1988) Doing Social Psychology: Laboratory and Field Exercises. Cambridge: Cambridge University Press. Miell, D. and Wetherwell, M. (1998) Doing Social Psychology. Milton Keynes: Open University Press.
Assessment: Other (100%).
PS4AA: Not assessed
MY421: 50% 3,000 word report (ST)
MY465: 50% unseen examination (ST)

SA403
Criminal Justice Policy

This information is for the 2017/18 session.
Teacher responsible: Prof Tim Newburn OLD 2.40a
Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course will be capped at 30 students with preference given to MSc Criminal Justice Policy students and then those on other MSc programmes in the Department of Social Policy. Some places are available for those on the Master of Laws and Master of Laws (extended part-time study). Once core course allocations are made, the remaining places will be offered on a ballot basis.
Course content: The course provides a detailed and critical introduction to the study of criminal justice institutions, practices and participants. It begins with an introduction to the nature of crime and contemporary criminal justice policy. It then examines the main elements of modern criminal justice systems (police, courts, prisons, probation, the media, and private security). Special emphasis is given to current issues such as restorative justice and increasing rates of incarceration. The course combines up-to-date empirical work with theoretical perspectives and also emphasises the role of historical and comparative perspectives in understanding current trends.
Teaching: 15 hours of lectures, 13 hours and 30 minutes of seminars and 1 hour and 30 minutes of workshops in the MT. 15 hours of lectures and 15 hours of seminars in the LT.
Lectures: SA403.1 20 weekly one and a half hour lectures, MT and, LT.
Seminars: SA403.2, 19 weekly one and a half hour seminars, MT and LT.
Workshop: SA403.3, 1 session of one and a half hours in MT
There will be a reading week in Weeks 6 of MT and LT.
There will be a revision session and mock exam in ST.
Formative coursework: Michaelmas Term – formative essay and one-to-one feedback. Summer term – mock exam (one question).
Indicative reading: There are two set texts for the course: M Maguire, R Morgan & R Reiner (eds.) (2012), The Oxford Handbook of Criminology, 5th edn; and T Newburn (2012), Criminology, 2nd edn.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA409 Half Unit
Social Security Policies

This information is for the 2017/18 session.
Teacher responsible: Dr Kitty Stewart OLD2.36
Availability: This course is available on the MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course analyses the purposes, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course – childhood, parenthood, old age – and from risk factors that will end up affecting only some – unemployment, sickness and disability. The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. The focus is largely on industrialised countries, but the course also touches on issues arising in delivering social protection in other parts of the world.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 2 hours of seminars in the ST.
Formative coursework: Seminar members will be expected to make one presentation to the seminar group and submit one written paper during the course of the term. Students will also be expected to come to seminars each week prepared to present on and debate the week's key readings.
Indicative reading: Basic reading for the course includes: R Walker, Social Security and Welfare: Concepts and Comparisons, Oxford University Press, 2005; J Millar (Ed), Understanding Social Security, 2nd ed. The Policy Press, 2009; J Dixon, Social Security in Global Perspective, Praeger, 1999; J Hills, Good Times, Bad Times: The Welfare Myth of Them and Us, Policy Press, 2014; ILO, World Social Protection Report 2014/15: Building Economic Recovery, Inclusive Development and Social Justice.
Assessment: Exam (75%, duration: 2 hours) in the main exam period. Essay (25%, 1500 words) in the LT.

SA429 Half Unit
Understanding Social (Dis)advantage

This information is for the 2017/18 session.
Teacher responsible: Professor Lucinda Platt OLD 2.25
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in Global Population Health, MSc in Inequalities and Social Science, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is currently capped at 60 places. Offers of places will be made on the basis of applicants' statements. Priority for places is given to students on Social Policy MSc programmes and to students on the MSc Inequalities and Social Science. Students from departments other than the Department of Social Policy may be accepted onto a waiting list. Places remaining available three days before the start of the course will not be held back for late applicants from Social Policy programmes but offered to students from the waiting list.
Course content: This course focuses on the emergence of a range of concepts key to social policy relating to selective cumulative advantage and disadvantage in society, including concepts that supersede or complement classic concepts of poverty, such as social exclusion, capability deprivation, social immobility, social/cultural capital deficiency. It examines the uses of such concepts in both developing and industrialised countries. Topics addressed on the course may include - changes in inequality and their causes; the theoretical and empirical issues provoked by the 'underclass' debate; family change and disadvantage; long term unemployment and welfare-to-work; area segregation, housing and 'welfare ghettos'; ethnic division; disability; employment; education; crime; social exclusion and citizenship.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: Students have the option of submitting a formative essay.
Indicative reading: The core text for the course is: H Dean & L Platt (eds) 2016.Social Advantage and Disadvantage. Oxford University Press. Other indicative background reading: Milanovic, B. 2016. Global Inequality. The Belknap Pess. Held, D. and Kaya, A. (eds). 2007. Global Inequality. Polity; Dorling, D. 2010. Injustice: Why social inequality matters.The Policy Press; Payne, G. (ed.) 2013. Social Divisions. Third Edition. Palgrave Macmillan; Platt, L. 2011. Understanding Inequalities. Polity.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA451
Social Policy Research

This information is for the 2017/18 session.
Teacher responsible: Prof John Hills, TW1.8.01H
Availability: This course is compulsory on the MSc in Social Policy (Research) and MSc in Social Research Methods. This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is capped at 45 students. All students for whom the course is compulsory will be allocated a space. Any remaining places (of which there are usually several) will be allocated on the basis of the statements provided by students in their course choice form. This will be done on the Monday following the opening of the course choice system and every two days thereafter, until the course is full.
Pre-requisites: None
Course content: The course equips you with transferable research design skills, including the design of policy evaluations, and an in-depth understanding of the role of different types of research in the social policy-making process. Lectures are given by leading academics engaged in research using the methods under consideration, many of whom have achieved substantial policy impact. Students are encouraged to critically assess applications of a wide range of research methods to contemporary national and international social policy questions. Topics include: the uses and abuses of quantitative and qualitative research, mixed methods, policy evaluation (including both Randomised Controlled Trials and non-experimental approaches); the participatory research paradigm; researching organisations (including organisational anthropology); in-depth interviews (especially with service users and clients); social surveys and the analysis of large datasets; longitudinal and life history analysis; micro-simulation techniques; systematic reviews, meta-analysis and meta-ethnographies; and small area, geographical and internationally comparative research. The relationship between research and policymaking is a theme

that runs throughout the course.
Teaching: 12 hours and 30 minutes of lectures and 15 hours of seminars in the MT. 12 hours and 30 minutes of lectures, 13 hours and 30 minutes of seminars and 15 minutes of help sessions in the LT. 2 hours and 30 minutes of lectures and 15 minutes of help sessions in the ST.
The lectures will be given by a member of staff or external expert in that particular method or topic and are followed by a seminar examining research exemplifying the approach and the issues raised. The help sessions are one-to-one tutorial sessions with the seminar leader to discuss feedback on essays and progress on the course.
Formative coursework: There will be three compulsory formative coursework essays, two of which will follow from a seminar presentation. In addition, there will be one optional formative assignment. These formative assignments are designed to prepare students for both the summative coursework and the exam. Written and verbal feedback will be provided.
Indicative reading: P Alcock et al (Eds) (2012), The Student's Companion to Social Policy, 4th edn; C Hakim (2000), Research Design: Strategies and choices in the design of social policy, 2nd edn; A Bryman (2012), Social Research Methods, 4th edn. Additional references will be supplied at the start of the course and in lectures.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 3000 words) in the ST.
For the summative coursework essay, students will be asked to design a research project to address a specified socal policy research question, and provide a justification for their proposed design.
The exam focuses on assessing students' abilities to critique social policy research approaches. Students will be asked to answer 3 out of a choice of 9 questions based on the research approaches we have studied during the course.

SA465
Criminal Justice Policy - Long Essay

This information is for the 2017/18 session.
Teacher responsible: Prof Tim Newburn OLD 2.40a
Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.
Course content: The objective is to write an original dissertation on an approved topic in the field. The selection of the topic is a matter primarily for the student, though the approval of the supervisor is needed for topic registration.
Teaching: The designated supervisor should discuss the selection of the topic and its title with the student, advise about preliminary reading, methods and broad analytical approach; and comment on the draft version. At their discretion, supervisors may give additional advice and comments.
Assessment: Dissertation (100%, 10000 words).
Dissertations should be no more than 10,000 words in length, excluding notes and appendices and should be typed. Formal titles should be registered with the Course Director in early December.

SA466
European and Comparative Social Policy - Long Essay

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Mangen OLD 2.62
Availability: This course is compulsory on the MSc in Social Policy (European and Comparative Social Policy). This course is not available as an outside option.
Course content: The purpose is to allow students to study a topic in depth by researching the literature and analysing a subject. Often these essays involve original perspectives or empirical research.
Teaching: An appropriate supervisor will be appointed to advise each candidate and comment on draft elements of the dissertation.
Selection of Topic
The dissertation should conform to one of the following formats
- a study of a single EU state (or region, city etc) and one or more policy areas focusing on the impact of EU level social policy. This state should not be the student's own country. Within this format the focus may also be at the sub-national level (regions, cities etc).
- a comparative study of two or more states (or their subnational levels) focusing on one or more policy areas. The sample may include the student's own country.The sample may include non-EU countries as well as the student's own country.
- a study of an element of EU-level social policy or EU processes of social policy making.

The general subject area of the dissertation should be approved by the MSc programme director and dissertation supervisor by the sixth week of the Michaelmas Term. This will facilitate a specific research topic for the dissertation to be subsequently formalised. This topic may only be changed by agreement with programme director and supervisor and, in any case, no later than the end of the Lent Term.
Assessment: Dissertation (100%, 10000 words).
The dissertation must not exceed 10,000 words, bibliography and tables will not be included in this total.

SA470
Dissertation - Social Policy and Development: Non-Governmental Organisations

This information is for the 2017/18 session.
Teacher responsible: Dr Armine Ishkanian OLD.2.54, Dr Timothy Hildebrandt OLD.2.56 and Dr Sunil Kumar OLD.2.55
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is compulsory on the MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.
Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to social policy and development from a civil society-centred perspective.
Teaching: 3 hours of lectures in the MT. 3 hours of lectures in the LT. There will be two Dissertation Clinics held during MT and LT Reading Weeks. Each Dissertation Clinic will be 3 hours long. Academic advisors will provide regular supervision and feedback throughout the three terms (MT, LT, and ST).
Formative coursework: The area of study is defined by the student, in consultation with their academic adviser. An outline proposal is developed on SA470 in Moodle and discussed with their adviser early in the Lent Term. Guidance is provided in dissertation writing and research skills.
Assessment: Dissertation (100%, 10000 words).
Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography.

SA471
Social Policy and Planning - Long Essay

This information is for the 2017/18 session.
Teacher responsible: Dr Timo Fleckenstein OLD.2.60
Availability: This course is compulsory on the MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is not available as an outside option.

Course content: The purpose is to allow students to study a topic in depth researching the literature and analysing a subject: often these dissertations involve original perspectives or research and some have been subsequently published.
Teaching: The general subject area of the dissertation should be approved by the tutor by the middle of the second term and the title should be submitted to the course convenor by the end of that term.
Arrangements for Supervision
An appropriate tutor will be appointed to advise each candidate and comment on the first draft of the dissertation.
Assessment: Dissertation (100%, 10000 words).
The dissertation must not exceed 10,000 words.

SA472
Dissertation - Social Policy and Development

This information is for the 2017/18 session.
Teacher responsible: Dr Armine Ishkanian OLD.2.54, Dr Timothy Hildebrandt OLD.2.56 and Dr Sunil Kumar OLD.2.55
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is compulsory on the MSc in Social Policy and Development. This course is not available as an outside option.
Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to social policy and development from a government-centred perspective.
Teaching: 3 hours of lectures in the MT. 3 hours of lectures in the LT.
There will be two Dissertation Clinics held during the MT and LT Reading Weeks. Each Dissertation Clinic will be 3 hours long. Academic advisors will provide regular supervision and feedback throughout the three terms (MT, LT, and ST).
Formative coursework: The area of study is defined by the student, in consultation with their academic advisor. An outline proposal is developed on SA472 and submitted via Moodle. The proposal is discussed with the academic adviser early in the Lent Term. Guidance is provided in dissertation writing and research skills.
Assessment: Dissertation (100%, 10000 words).
Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography.

SA47R
Social Policy (Research) - Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Tania Burchardt 32L 3.30
Availability: This course is compulsory on the MSc in Social Policy (Research). This course is not available as an outside option.
Course content: The purpose is to allow students to apply the research design, methods and critical analysis skills they are acquiring through other courses to carry out their own study addressing a social policy research question. The expectation is that empirical work will be undertaken - for example interviews or secondary data analysis - as part of the study, although the precise design will be governed by the research question. Students may opt to carry out their dissertation through a placement in another organisation such as an NGO working on social policy issues, which we can help to facilitate.
Teaching: 1 hour of help sessions in the MT. 1 hour of help sessions in the LT. 1 hour of help sessions in the ST.
An appropriate supervisor will be appointed in the first half of Michaelmas Term to meet regularly, advise each student throughout the dissertation process, and to provide feedback on ideas and draft material. The number and content of meetings will be determined by agreement between the student and supervisor, but as a rough guide, students might expect two half-hour meetings each term.
Students will also receive guidance through compulsory course MY400 Fundamentals of Research Design.
Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.
The student and his/her supervisor will discuss the content and timing of formative work as appropriate to the individual dissertation.
Indicative reading: Robson, C (2011) Real World Research
Bryman, A (2012) Social Research Methods
Assessment: Dissertation (100%, 10000 words).
The dissertation must not exceed 10,000 words. Please see departmental webpage for further guidance.

SA481 Half Unit
Population Analysis: Methods and Models

This information is for the 2017/18 session.
Teacher responsible: Prof. Michael Murphy, OLD.2.61
Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Development Studies, MSc in Global Population Health, MSc in Health and International Development, MSc in Population and Development, MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students should have basic numeracy, but the course does not require advanced mathematical knowledge.Some practical sessions will involve use of the spreadsheet EXCEL.
IT Training provides numerous self-paced student supervised workshops on EXCEL and downloadable course guides. Students with no prior experience of EXCEL are advised to attend one of these workshops before the course.
Course content: This course provides an introduction to the key concepts and methods required for population analysis.
The course will explain the dynamics of population change and enable students to learn basic methods for measuring population structure and the determinants of population size and change (fertility, mortality and migration). The course will also provide an introduction to population projections and describe and evaluate how demographic data are collected and used. Emphasis is placed on the understanding and interpretation of demographic data, as well as methods of population analysis.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: Students will be expected to complete exercises, write one essay and complete one multiple choice questionnaires during the term.
Indicative reading: Demography: Measuring and Modeling Population Processes by S H Preston, P Heuveline and M Guillot, 2001. This will be used as a reference text in the course. Students may also find it helpful to consult some of the other standard texts available including: Essential Demographic Methods by Kenneth W. Wachter, 2014 (recommended); Demographic Methods by Andrew Hinde, 1998; Demographic Methods and Concepts by Donald Rowland, 2003 (less advanced); or Methods and Models in Demography by C Newell, 1988 (less advanced).
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA488 Half Unit
Social Policy Goals and Issues

This information is for the 2017/18 session.
Teacher responsible: Dr Timo Fleckenstein OLD.2.60
Availability: This course is compulsory on the MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Social Policy and Planning). This course is available on the MSc in China in Comparative Perspective, MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in Global Population Health and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The nature of social policy and policy making: key approaches and issues. The goals of social policy in relation to policy formation and the policymaking process. Issues including: the political economy of social policy; social justice and social policy; human needs; the mixed economy of welfare; the governance of social policy; gender and social policy; poverty, inequality and social exclusion; globalisation and the future of social policy.
Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
Formative coursework: One 1500 word essay due in MT
Indicative reading: Some introductory texts are:
- R Lister, Understanding Theories and Concepts in Social Policy, The Policy Press, 2010;
- H Dean, Social Policy, 2nd edition, Polity, 2012;
- P Alcock et al. (eds) The Student's Companion to Social Policy, 4th edition, Blackwell, 2011;
- C Pierson et al. (eds) The Welfare State Reader, 3rd edition, Polity, 2014.
- H Glennerster, British Social Policy since 1945, Blackwell, 3rd Edition, 2007;
- M Hill, Social Policy in the Modern World: A comparative text, Blackwell, 2006;
- M Daly, Welfare, Polity, 2011;

A full bibliography will be handed out with the programme of seminar topics at the start of the course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4B3
MSc Global Population Health Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Arjan Gjonca Old. M.2.25
Availability: This course is compulsory on the MSc in Global Population Health. This course is not available as an outside option.
Course content: The purpose is to allow students to explore in greater depth a particular research topic relevant to Global Population Health.
Selection of topic
The area of study will be defined by the student in consultation with the allocated Academic Advisor. The topic must be approved by the Programme Director.
Supervision
An appropriate academic advisor will be appointed to advise each student.
Teaching: 3 hours of seminars in the MT. 2 hours of seminars in the LT.
Formative coursework: Students will be required to submit a formative dissertation proposal and give a formative presentation based on this proposal (in the LT).
Assessment: Dissertation (90%, 10000 words) and proposal (10%).
Students will be required to submit a formative dissertation proposal and give a formative presentation based on this proposal (in the LT). They should also prodice a dissertation of a maximum of 10,000 words. 10% of marks will be allocated for the combined proposal and presentation element and 90% for the dissertation.

SA4B5 Half Unit
International Planning and Children's Rights

This information is for the 2017/18 session.
Teacher responsible: Prof Eileen Munro OLD2.33 and Dr Armine Ishkanian OLD1.13
Availability: This course is available on the MSc in Health, Community and Development, MSc in Human Rights, MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This is an interdisciplinary course that explores the links between child rights and child poverty at all levels of development in rich and poor countries. The social and economic as well as the civil and political rights of children, as defined in recent international laws, charters and Conventions, are examined in relation to the conditions, especially poverty and multiple deprivation, experienced by many children. Human rights theories as a basis for international and social policies will be a focus of attention. There has to be universal planning and not only specific proposals to deal with serious violations of rights. Issues of child labour, the violations of war, cultural discrimination against girl children and the right to a minimally adequate family income will be discussed in relation to the roles played by international agencies, Trans National Corporations, governments and NGOs.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Indicative reading: H J Steiner & P Alston, International Human Rights in Context, Oxford University Press, 2000; P Townsend & D Gordon (Eds), World Poverty: New Policies to Defeat an Old Enemy, Policy Press, 2002; D Gordon, et al, Child Poverty in the Developing World, Policy Press, 2003; K Watkins, Rigged Rules and Double Standards: Trade, Globalisation and the Fight Against Poverty, London, World Development Movement, 2002; C Chinkin, 'The United Nation Decade for the Elimination of Poverty: What Role for International Law?', Current Legal Problems 2001, Oxford University Press, 2002; M Flekkoy & N Kaufman, The participation rights of the child. London, Jessica Kinglsey, 1997; D Fottrell (Ed), Revisiting Children's Rights: 10 Years of the UN Convention on the Rights of the Child, The Hague and London, Kluwer Law International, 2000; ILO, Social Security: A New Consensus, Geneva, 2001; ILO, P.Townsend, The Right to Social Security and National Development: Lessons from OECD Experience for Low-income Countries, Discussion paper 18, ILO, 2007; A. Hall and J. Midgley, Social Policy for Development, London, Sage, 2004; J. Smith, Textbook on International Human Rights, Oxford University Press, 2005; D. Gordon, R. Parker, F. Loughran and P. Heslop, Disabled Children in Britain, London, TSO, 2000. Redmond G, 2008, Children's Perspectives on Economic Adversity: A Review of the Literature, Unicef Innocenti Centre, Florence, Discussion Paper.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4B8 Half Unit
Ethnicity, Race and Social Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Coretta Phillips OLD.2.28
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in International Migration and Public Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course will be capped at 20 students, with preference given first to students on MSc programmes in the Department of Social Policy, then from MSc International Migration and Public Policy and MSc Gender, Policy and Inequalities. If spaces are still available, students from other MSc programmes, where regulations permit, will be selected.
Course content: Understanding Key Concepts; Disciplinary Frameworks; Migration and Citizenship, Theorising Multiculturalism; Ethnic Settlement and Housing Inequalities; Education; Employment, Poverty and Underclass; Criminalisation and Incarceration; Discrimination and the Role of the State I: Positive and Affirmative Action; Discrimination and the Role of the State II: Legislative Frameworks, Diversity, and Service Delivery.
Teaching: 15 hours of lectures, 15 hours of seminars and 2 hours of help sessions in the MT.
In Week 6 there will be an essay-writing guidance session.
Formative coursework: 2000 word essay due in in Week 7.
Indicative reading: S. Jivraj and L. Simpson Ethnic Identity and Inequalities in Britain: The Dynaics of Diversity, 2015, G. Craig et al., 2015, Understanding 'Race' and Ethnicity: Theory, History, Policy, Practice, 2012, D.T. Goldberg The Threat of Race: Reflections on Racial Neoliberalism, 2009, A. Bloch and J. Solomos Race and Ethnicity in the 21st Century, 2009, T. Patel Racism and Society, 2015, B. Bagilhole, Understanding Equal Opportunities and Diversity, 2009; P. Ratcliffe, Race', Ethnicity and Difference: Imagining the Inclusive Society, 2004; J. Solomos & L. Back, Racism and Society, 1996; P. Gilroy, After Empire: Melancholia or Convivial Culture?, 2004; J. Solomos, Race and Racism in Britain, 2003; G Bhattacharyya, J. Gabriel & S. Small, Race and Power: Global Racism in the Twenty-First Century, 2002; L. Back & J. Solomos Theories of Race and Racism: A Reader, 2000; H. S. Mirza, Black British Feminism: a Reader, 1997; M. Mac an Ghaill, Contemporary Racisms and Ethnicities: Social and Cultural Transformations, 1999.
Assessment: Essay (100%, 4000 words) in January.
The summative essay will be due in on the first Monday of LT.

SA4B9 Half Unit
Education Policy, Reform and Financing

This information is for the 2017/18 session.
Teacher responsible: Prof Anne West OLD.2.30
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Priority will be given to social policy students with a specific interest in education policies in developed countries.
Course content: The course considers education policy, reforms and financing across developed countries. It uses concepts and tools from a range of academic fields - economics, politics, social policy, philosophy and sociology - to scrutinise education, with a particular focus on equity, social justice and the distribution of resources.
Issues to be addressed include: the aims of education; the impact of social characteristics on educational outcomes (e.g. class, 'race'/ ethnicity and gender) and related policy reforms; accountability and market-oriented reforms in education; privatisation and the changing role of the state; power and the global politics of educational policy making; early years education; school-based education; and tertiary education.
Teaching: 25 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
This course is different from a 'standard' postgraduate course. Instead of lectures and seminars there are weekly seminars. These involve a short introduction one week; the next week there is a discussion of key questions and issues arising from students' reading followed by joint student presentations and a group activity. This format provides an opportunity for students to gain experience of carrying out focused research on a particular topic; working in a team; presenting their work to others in the group; and facilitating discussion amongst the student group.
Formative coursework: One formative essay in LT.
Indicative reading: Specialist lists for each topic will be provided. The following introductory books are recommended:
- Arthur, J., Peterson, A. (2011) The Routledge Companion to Education. London: Routledge;
- Glennerster, H. (2009) Understanding the Finance of Welfare (2nd edition). Bristol: Policy Press;
- Lauder, H., Brown, P., Dillabough, J., Halsey, A.H. (eds) (2006) Education, Globalization and Social Change. Oxford: Oxford University Press.
- Feintuck, M., Stevens, R. (2013) School Admissions and Accountability: Planning, Choice or Chance? Bristol: Policy Press.

Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4BA Half Unit Not available in 2017/18
Global Population Health Research Report

This information is for the 2017/18 session.
Teacher responsible: Dr Arjan Gjonca OLD M.2.25
An appropriate academic adviser will be appointed to advise each student.
Availability: This course is compulsory on the MSc in Global Population Health. This course is not available as an outside option.
This course is compulsory for students on the MSc in Global Population Health (reorganised MSc in Health Population and Society) unless they can demonstrate prior training and advanced knowledge of research design and analysis and are permitted to enrol on SA4B3. This course is not available as an outside option. Students taking this course are also enrolled in SA4P2 Global Population Health: Research Design and Analyses.
Pre-requisites: Students must have completed Global Population Health: Research Design and Analyses (SA4P2).
This course does not have any pre-requisites. It is compulsory for students of MSc in Global Population Health unless they can demonstrate prior training and advanced knowledge in research design and analysis and are permitted to enrol in SA4B3 (the full unit dissertation in MSc in Global Population Health). Students taking this course should also enrol in SA4P2 Global Population Health: Research Design and Analyses.
Course content: The research report enables students to analyse in greater depth a topic relevant to Global Population Health. The topic can be drawn from global health issues in high, middle or low income countries. The topic of research should reflect the topics that have been studied by the student during the year and will be decided with the allocated academic adviser.
Teaching: Student taking this dissertation course must take SA4P2 Global Population Health: Research Design and Analyses. This is a dissertation course and there is no teaching involved.

Assessment: Dissertation (90%, 5000 words) in September.
Presentation (5%) in the LT.
Project (5%, 500 words) in the MT.
The evaluation of this course is done through the research report which counts for 90% (submitted in September) of the final mark and 10 % will be equally split for a presentation (in LT) and the research proposal (end of MT).

SA4C1
Long Essay and the Research Process

This information is for the 2017/18 session.
Teacher responsible: Prof Tim Newburn Old 2.40a
Availability: This course is compulsory on the MSc in Criminal Justice Policy, MSc in Population and Development, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.
For all MSc Social Policy programmes involving a dissertation or long essay. Exemptions at the discretion of the course tutor. Lecture notes will be available electronically via Social Policy public folders (for part-time students)
Course content: The course aims to provide an understanding of issues associated with the research process in the context of MSc Social Policy long essays. It includes an examination of philosophical issues underpinning research methods in social policy, the place of different research methods (qualitative and quantitative) in social policy and the process of writing a long essay.
Teaching: 2 hours of lectures in the MT. 3 hours of lectures in the LT.
Indicative reading: Three useful texts are: Alan Bryman (2012) Social Research Methods, 4th edition Oxford University Press; C Robson, Real world research: A resource for social scientists and practitioner-researchers, 3rd edition Oxford University Press, 2011; N S R Wallimann, Your Research Project: A step-by-step guide for the first-time researcher, Sage, 2001.
Assessment:
Non-examinable. It is expected that the student's dissertation will be informed by the course and appropriate discussion of methodological issues will be incorporated in all dissertations.

SA4C2 Half Unit Not available in 2017/18
Basic Education for Social Development

This information is for the 2017/18 session.
Teacher responsible: Prof Anthony Hall OLD2.28
Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health, Community and Development, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is capped at 30 students
Pre-requisites: Work experience in a developing country is highly desirable but not essential.
Course content: The course is designed to examine the role of basic education in developing countries as it relates to social development and social policy. Content of the course includes: the history of education and current problems in developing countries, links between basic education and socio-economic development, primary schooling, decentralization policies, non-formal and vocational education, adult literacy, popular education for grassroots development, environmental education, ICT, and foreign aid in supporting basic education.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: In addition to seminar presentations and the assessed essay, students are required to write an unassessed (formative) essay for the course.
Indicative reading: A Hall & J Midgley, Social Policy for Development, 2004, chapter 5; K Watkins, The Oxfam Education Report, 2000; UNICEF, The State of the World's Children: Education, 2006; UNESCO, Education For All Global Monitoring Report, 2010; K Tomasevski, Education Denied, 2003; L Kane, Popular Education and Social Change in Latin America, 2001; A Banerjee & E Duflo, Poor Economics, 2011 (chapter 5); S Graham-Brown, Education in the Developing World: Conflict and Crisis, 1991; M Todaro, Economics for a Developing World, 2000, chapter 9; H Patrinos & D Ariasingam, Decentralisation of Education: Demand-Side Funding, 1997; J Huckle & S Sterling (Eds), Education for Sustainability, 1996; L Pritchett The Rebirth of Education, 2013; N Selwyn. Education in a Digital World, 2013
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2500 words) in the ST.
Students are required to choose a topic of their own interest for the essay.

SA4C6 Half Unit
International Housing and Human Settlements; Conflicts and Communities

This information is for the 2017/18 session.
Teacher responsible: Prof Anne Power OLD.2.57
Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.
This is a capped course. If it is oversubscribed places will be allocated by random ballot, first amongst Social Policy students then amongst other students for any remaining places. The first ballot will be held on Tuesday of MT week 1.
Course content: The course is an introduction to the global housing challenges of a fast urbanising world in the context of rapidly growing cities worldwide. There are 5 key themes: the push and pull factors in urban growth; the key actors in housing provision; slums and self-help; the environmental impact of low income settlements; the problems of poverty and exclusion in low income and informal settlements. The course includes 10 lectures in LT and one in ST. The main topics of the lectures are: housing needs and demand; contrasting patterns of housing development; owner occupation, renting and self-help; government intervention and finance; planning and renewal; international agencies, aid and NGOs; bottom-up shelter models and community-led initiatives; social exclusion and urban pressures; basic services and public infrastructure; participation and women's roles in low income settlements; environment of cities; urban and housing design; theories and practice in upgrading urban settlements. Case studies are used to illustrate arguments, policies and practical responses.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 3 hours of seminars in the ST.
Additional activity: occasional informal discussion sessions are organised at students' request.
Formative coursework: Students will be expected to participate actively in seminars and to complete one formative essay using case studies to illustrate their arguments. Students are also expected to prepare case studies for the seminar.
Indicative reading: UN (1996), An Urbanising World; A Power

(1999), Estates on the Edge; Badshah (2006), Our Urban Future; D Satterthwaite (1999), Sustainable Cities; UNCHS 2001-2014, The State of the World's Cities;. Doug Saunders, Arrival City (2010) Ed Glaeser, Triumph of the City (2012) D Satterthwaite and D Mitlin (2013) Reducing Urban Poverty in the Global South, D Satterthwaite and D Mitlin (2013) Urban Poverty in the Global South.
Environment and Urbanism Journal, 1997-2017
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4C8 Half Unit
Global Social Policy and International Organizations

This information is for the 2017/18 session.
Teacher responsible: Dr Hakan Seckinelgin, OLD.2.27
Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Health, Community and Development, MSc in Human Rights, MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: What do the, the Catholic Church, Bill and Melissa Gates, UNICEF and the World Bank have in common? They are in one way or another involved in social policy that goes beyond the nation state. Policy could be seen as the exercise of political power and this political power has often been concentrated within the nation state. Far from the traditional study of policy this includes the effect of globalization on a variety of actors in social policy. This course examines how globalization has changed the way we perceive areas such as health, education, social care and other areas that concern social citizenship. The course examines the international policy environment, particularly intergovernmental organisations; bilateral and multilateral aid agencies and non-governmental organizations (NGOs), which influence the social policy environment in developing countries. The impact of the inter-governmental policy process on policy outcomes is examined. The same goes for religious groups, social movements and corporations that all play a role in global social policy. The main goal of the course is not only to open up the understanding of social policy and globalization but also to show the complexity of goals and actors of social policy. It is expected that the students will devote considerable time to reading and preparing for the seminars.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Revision session(s) will be scheduled in the ST.
Formative coursework: Students will write a long essay.
Indicative reading: A detailed reading list will be presented at the beginning of the term. Some introductory texts include: B Deacon Global Social Policy and Governance Sage (2007); R. Baldwin The Great Convergence: Information Technology and The New Globalization. Belnap (2017); H. Seckinelgin he politics of Global AIDS: Institutoinalization of Solidarity, Exclsion of Context. Springer (2017) ; I. Gonzalez-Ricoy and A. Gossies, Instituoons for Future Generations.OUP (2016) ; R Mishra, Globalisation and the Welfare State, Edward Elgar (1999); D Nayyar, Governing Globalization: Issues and Institutions, OUP (2002); V S Peterson & A S Runyan, Global Gender Issues, Westview Press 1993. M. Callon,P. Lascoumes, and Y. Barthe, Acting in an Uncertain World. The MIT Press (2009). D. Carpenter, Reputation and Power: Organizational Image and Pharmaceutical Regulation at the FDA. Princeton (2010).
Assessment: Take home exam (100%) in the LT.

SA4C9 Half Unit
Social Policy - Organisation and Innovation

This information is for the 2017/18 session.
Teacher responsible: Professor Lucinda Platt OLD 2.25
Availability: This course is compulsory on the MSc in Social Policy (Social Policy and Planning). This course is available on the MSc in China in Comparative Perspective, MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in Global Population Health, MSc in Social Policy (European and Comparative Social Policy) and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course examines the organisation of social policy, structures, processes and delivery, and recent developments in social policy in industrialised countries. The course examines how policy debates affect policy implementation, with a particular focus on innovation, identifying the social forces influencing the relevant policy changes, and examining the practical consequences for service provision in industrialised countries. Changes in the organisational structure and management approach, in the nature of social control, and in the social and economic context are examined.
Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
Indicative reading: Le Grand J. 2007. The Other Invisible Hand: Delivering Public Services Through Choice and Competition. Princeton University Press; McLaughlin, K., Osborne, S.P., and Ferlie, E. (eds) 2001. New Public Management: Current Trends and Future Prospects. Routledge; Garland, D. 2001. The Culture of Control. Oxford University Press ; Hills, J. 2017. Good Times, Bad Times: The Welfare Myth of Them and Us. Second Edition. The Policy Press; G Lewis, Race, Gender and Social Welfare: encounters in a post colonial society, Polity Press (2000); M. Banton Discrimination (1994); Stern, N. 2007. The Economics of Climate Change: The Stern Review. Cambridge University Press; Klein, N. 2014. This Changes Everything. Allen Lane. Walker, R. 2005. Social Security and Welfare: Concepts and Comparisons. Oxford University Press.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the ST.

SA4D1 Half Unit
Critical Population Health Issues in High and Middle-Income Countries

This information is for the 2017/18 session.
Teacher responsible: Dr Arjan Gjonca OLD.2.45
Availability: This course is available on the MSc in Global Health, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: No pre-requisites are required for this course.
Course content: This course brings together key issues on the social and environmental determinants of population size and structure and population health in high and middle income countries from a multidisciplinary approach including a range of social science disciplines, epidemiology, demography and public health. This course reflects the developments of research in recent years on health trends and differentials. Topics addressed in this course include the relationship between health and economic change such as the effect of recession; divergent trends in Western European and former USSR states; family changes and their implications for population health; role of early-life events; social support, social capital and health; socio-demographic determinants and consequences of ageing at the individual and population level; comparison of trends in established market economies and BRICS; policy responses to inequalities in health;

prospects for mortality and morbidity change - a compression of morbidity?
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.
Formative coursework: One 1,500 word formative essay in MT.
Indicative reading: Merson, MH, Black, ER, Mills, AJ. (2012) Global Health: Diseases, Programmes, Systems, and Policies, London: Jones & Barlett Learning; Burlington, MA; London. Berkman L. F., Kawachi, I. and Glymour, M. M. (2014) Social Epidemiology (2nd ed.); Oxford University Press; Oxford; New York. Marmot, M. (2010) The Marmot review final report: Fair society, healthy lives: University College London. Wilkinson, R.G. and Pickett, K. (2009) The spirit level: why more equal societies almost always do better; Bloomsbury Press; London; New York. Bowling, A (2017) Measuring Health: A Review of Subjective Health, Well-being and Quality of Life Measurement Scales: McGraw-Hill Education.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the LT.

SA4D2 Half Unit

Key Population Health Issues in Low and Medium-income countries

This information is for the 2017/18 session.
Teacher responsible: Dr Arjan Gjonca OLD.2.45
Availability: This course is compulsory on the MSc in Global Population Health. This course is available on the MSc in China in Comparative Perspective, MSc in Global Health, MSc in Health and International Development, MSc in Health, Community and Development, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Population and Development, MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: No pre-requisites are required for this course.
Course content: This course brings together the key issues on the social and environmental determinants of population size and structure and population health in low and middle income countries from a multidisciplinary approach including social sciences, epidemiology, demography and public health. The course does not only take a theoretical approach, but it is also evidence based. This relationship between population change and health will be analysed in its dynamic. Another important aspect of the course is that it will focus on what will happen in the future of global health as a result of anticipated population changes.
Some of the main topics covered are: urbanisation and implications for health, poverty, population change and inequalities; maternal and child health; achievements and setbacks?; the double burden of disease and its consequences: the roles of nutrition and obesity; emerging and current infectious diseases (inc. HIV/AIDS); the global burden of mental disorders; priorities for health improvements in low income countries.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: One 1,500 word formative essay in MT.
Indicative reading: Merson, MH, Black, ER, Mills, AJ. (2012) Global Health: Diseases, Programmes, Systems, and Policies, London: Jones & Barlett Learning; Caldwell JC. Murray CJL and Lopez AD (1996). The global burden of disease: a comprehensive assessment of mortality and disability from diseases, injuries, and risk factors in 1990 and projected to 2020, Cambridge, MA; McMichael T (2001) Human Frontiers, environment and disease. Cambridge: Cambridge University Press; Montgomery MR. (2008) The health of urban populations in developing countries. New York, New York, United Nations, Department of Economic and Social Affairs, Population Division; Popkin, BM. (2001) The Nutrition Transition and Obesity in the Developing World. THE JOURNAL OF NUTRITION 131(3).
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the LT.

SA4D3 Half Unit

Behavioural Economics and the Valuation of Health Outcomes

This information is for the 2017/18 session.
Teacher responsible: Dr Adam Oliver OLD.2.35
Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc Health Policy, Planning and Financing, MSc in Global Population Health, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.
The course is of value to those wishing to work as health policy analysts or economists/behavioural economists after graduation, be that in academia, government, industry, or management and practice.
Course content: This course offers a thorough understanding of how economists tend to value health and explores some of the problems inherent in these valuations. As such, the course offers teaching in many aspects of behavioural economics, with specific health-related application.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.
Formative coursework: Students will be given a progress test at the end of MT--this will be a 50 minute test in which they answer one essay question from a choice of three. This is perfect practice for what the students might expect in the final exam.
Indicative reading: The following are background readings for the course: J Broome, 'QALYS', Journal of Public Economics, 50, 1993, 149-67; G Torrance & D Feeny, 'Utilities and Quality-Adjusted Life Years', International Journal of Technology Assessment in Health Care, 5, 1989, 559-75; G Loomes & L McKenzie, 'The use of QALYS in Health Care Decision-Making', Social Science and Medicine, 28, 1989, 299-308.
Assessment: Project (100%).
A ten-page project write-up, excluding abstract, referencing and appendices, formatted with 12 point Times New Roman with 1.5 spacing. The written output of the project is due in the first week of Lent Term.

SA4D5 Half Unit

Social Rights and Human Welfare

This information is for the 2017/18 session.
Teacher responsible: Prof Hartley Dean OLD.2.59
Availability: This course is available on the MSc in Human Rights, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is currently capped at 30 places. Offers of places will be made on the basis of applicants' statements. Initial priority for places is given to students on Social Policy MSc programmes and students on the MSc Human Rights. Other students may be accepted onto a waiting list. Places remaining available three days before the start of the course will not be held back for late applicants from the Department of Social Policy or the Human Rights programmes but offered to students from the waiting list.
Pre-requisites: none
Course content: The course will examine the basis of social or

welfare rights as a component of human rights. It will situate social/welfare rights in an historical and comparative context and explore a range of debates concerning the relevance and effectiveness of a rights based approach to poverty alleviation and social welfare provision, both in the developed and the developing world. It will address the practical limitations of and the constraints upon social/welfare rights. Specifically, it will address: concepts of social rights and welfare citizenship; human needs and human rights; social/welfare rights in global context; critiques of social/welfare rights as human rights; the scope and substance of social/welfare rights; social/welfare rights and mechanisms of redress; rights based approaches to poverty alleviation; social development and social/welfare rights; constitutional instruments and social/welfare rights; human rights and the ethics of welfare.
Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour of lectures in the ST.
Formative coursework: Students have the option of submitting a formative essay.
Indicative reading: H Dean, Social Rights and Human Welfare, Routledge, 2015. Other relevant readings include: H Dean, Understanding Human Need, The Policy Press, 2010; A Eide, et al (Eds), Economic, Cultural and Social Rights: A textbook, Martinas Nijhaff, 2001; B Turner, Vulnerability and Human Rights, Pennsylvania State University Press, 2006; T Pogge (Ed), Freedom from Poverty as a Human Right, Oxford University Press, 2007 A Nevile (Ed.), Human Rights and Social Policy, Edward Elgar, 2010; C Gearty & V Mantouvalou, Debating Social Rights, Hart Publishing, 2011.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 1500 words) in the LT.

SA4DA
Global Population Health

This information is for the 2017/18 session.
Teacher responsible: Dr Arjan Gjonca OLD.2.45
Availability: This course is compulsory on the MSc in Global Population Health. This course is not available as an outside option.
Pre-requisites: No pre-requisites is required for this course.
Course content: This course brings together the key issues on the social and environmental determinants of population size and structure and population health in both, high income countries as well as low and middle income countries from a multidisciplinary approach including social sciences, epidemiology, demography and public health. Topics addressed in this course include the relationship between health and economic change such as the effect of recession; different trends in Western European and former USSR states; social support, social capital and health; policy responses to inequalities in health; prospects for mortality and morbidity change; urbanisation and its implications for health, poverty, population change and inequalities; maternal and child health - achievements and setbacks; the double burden of disease and its consequences; the roles of nutrition and obesity for health of populations; emerging and current infectious diseases (incl. HIV/AIDS, TB and Malaria); the global burden of mental disorders; priorities for health improvements in low income countries.
Teaching: 15 hours of lectures and 30 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.
The ST lecture will be a revision lecture.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 piece of coursework in the LT.
This course has two formative evaluations. The first one is in the form of a formative essay given on a topic or topics derived from either the lectures or seminars, or both. Students are expected to argue pro and against a research question, similar to the way the exam questions are organised. Detailed feedback and a mark are given to students and are discussed in one to one basis with their seminar leaders/lecturer. The second formative evaluation is organised in the lent term as a mock exam in order to replicate the final exam conditions. Again, feedback and a mark are given to students and they could discuss them with their seminar leaders/lecturer. Both these formative essays help students prepare for the formal evaluation of the course.
Indicative reading: Merson, MH, Black, ER, Mills, AJ. (2012) Global Health: Diseases, Programmes, Systems, and Policies, London: Jones & Barlett Learning; Burlington, MA; London. Berkman L. F., Kawachi, I. and Glymour, M. M. (2014) Social epidemiology (2nd ed.); Oxford University Press; Oxford; New York. Wilkinson, R.G. and Pickett, K. (2009) The spirit level: why more equal societies almost always do better; Bloomsbury Press; London; New York. McMichael T (2001) Human Frontiers, environment and disease. Cambridge University Press; Cambridge. Murray, C.J.L. A.D. Lopez (1996) The global burden of disease: a comprehensive assessment of mortality and disability from diseases, injuries, and risk factors in 1990 and projected to 2020; Cambridge University Press: Cambridge. Walley, J. and Wright, J. (2010) Public Health: An action guide to improving health: Oxford University Press; Oxford; New York.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Essay (25%, 2500 words) in the LT.

SA4E6 Half Unit Not available in 2017/18
Rural Development and Social Policy

This information is for the 2017/18 session.
Teacher responsible: Prof David Lewis OLD2.40
Availability: This course is available on the MSc in African Development, MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Knowledge of rural areas and relevant work experience is desirable but not essential. Knowledge of sociological and anthropological approaches to rural development also desirable.
Course content: Theories of rural development, history of rural development policy, changing rural livelihoods, land and agrarian reform, agricultural research and extension, the roles of private and non-governmental actors, natural resource management, food security, climate change and rural-urban linkages.
Teaching: 15 hours of lectures and 12 hours of seminars in the MT. 2 hours of lectures in the ST.
Formative coursework: A formative 1500 word essay is required at end of Week 6, and feedback will be given.
Indicative reading: A detailed reading list is included in the seminar programme. The following is an introductory reading list: R McAreavey, Rural Development Theory and Practice (2009); World Development Report 2008: Agriculture for Development (World Bank 2009); A Hall & J Midgley, Social Policy for Development (2004); A Shepherd, Sustainable Rural Development (1998); B Crow & H Bernstein (Eds), Rural Lives: Crises and Responses (1992); N Long, Development Sociology: Actor Perspectives (2001); I Scoones & J Thompson, Farmer First Revisited (2009).
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2500 words).
Students are required to write an assessed essay of 2,500 words (25%). A two-hour written examination in the ST (75%).

SA4F1 Half Unit
Migration: Current Research, Critical Approaches

This information is for the 2017/18 session.
Teacher responsible: Dr Isabel Shutes OLD 2.58
Prof Lucinda Platt OLD.2.25
Availability: This course is available on the MSc in Global Population Health, MSc in Health and International Development, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Population and Development, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts; international migration patterns and forms of migration; migration and inequalities; migration, transnationalism and the transformation of welfare systems. Teaching across the course integrates critical theoretical approaches to migration with applications using different migration-related research methods.
Course outline: Global migration trends and processes; Defining migrants and migration; Citizenship, migration policies and the unequal movement of people; Migration motivations, types and processes; Gender and migration; Researching migration; Migration, transnationalism and welfare; The impacts of migration; What does migration mean for social and public policy.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students are expected to participate actively in seminars and to prepare a group presentation, linked to one written assignment.
Indicative reading: Readings across the course include: Castles, de Haas & Miller (2013) The Age of Migration; Shachar (2009) The Birthright Lottery: Citizenship and Global Inequality; Luthra, Platt & Salamonska (2016) "Types of Migration: The Motivations, Composition and Early Integration Patterns of 'New Migrants' in Europe", International Migration Review; Piper (ed) (2008) New Perspectives on Gender and Migration: Livelihood, Rights and Entitlements; Faist, Bilecen, Barglowski & Sienkiewicz (2015) "Transnational Social Protection: Migrants' Strategies and Patterns of Inequalities", Population, Space and Place, 21, 193-202; FitzGerald (2012) "A Comparativist Manifesto for International Migration Studies" Ethnic and Racial Studies, 35: 10, 1725-1740; De Genova (2002) "Migrant 'Illegality' and Deportability in Everyday Life", Annual Review of Anthropology, 31, 419-47.
Assessment: Coursework (100%) in the ST.

SA4F7 Half Unit Not available in 2017/18
The Economics of European Social Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Joan Costa-Font OLD 2.37
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in EU Politics, MSc in European Social Policy, MSc in European Studies (Research), MSc in Political Economy of Europe, MSc in Political Science and Political Economy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development, MSc in Social Policy and Development: Non-Governmental Organisations, MSc in Social Policy and Planning and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
This is a capped course. Students are required to register for this course on LSE for You and obtain permission from the European Institute to take this course.
Pre-requisites: Introductory economics is helpful.
Course content: This course attempts to apply economics to examine and evaluate social policies and problems in Europe. The course addresses the main goals for social intervention including poverty relief, inequality, efficiency and accountability. Students will acquire an understanding of the economic theory underpinning the analysis of social policy in the areas of health, education, long-term care, pension, housing, employment, family and housing policy. The course will provide an analysis of social and public insurance underpinning the financing of welfare states. Students will be asked to apply the economic principles to examples of cross-country reform in Europe. The course will address key questions on social policy intervention, inequality, poverty, tax financing v social insurance, longevity risks and pensions, long term care insurance, financing housing, family policy and wealth accumulation.
Teaching: 10 x 1 hour lectures and 10 x 1.5 hour seminars, LT.
1 x 1 hour revision lecture (ST).
Formative coursework: Two 2,000 word essays.
Indicative reading: P Pestieau (2006), The Welfare State in the European Union, OUP. N Barr (2004), The Economics of the Welfare State, 4th ed., OUP. Costa-Font, Joan and Courbage, Christophe, (eds.) (2011), Financing long-term care in Europe: institutions, markets and models. Palgrave Macmillan, Basingstoke, UK. Costa-Font, Joan, Courbage, Christophe and McGuire, Alistair, (eds.) (2009), The Economics of new health technologies. Oxford University Press, Oxford, UK.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4F8 Half Unit
Behavioural Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Adam Oliver OLD.2.35
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc Health Policy, Planning and Financing, MSc in Environmental Economics and Climate Change, MSc in Global Population Health, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Political Science and Political Economy, MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
This is a capped course. Places will be allocated to students on the basis of a short statement that is submitted during course choice, outlining the student's suitability for and interest in the course.
Course content: The aim of the course is to explore ways of changing behaviour to achieve the aims of public policy. One half of the course will be concerned with the behaviour of professionals who work in public services. How can doctors, teachers and social workers be motivated to provide the best possible care for their patients, pupils or clients? Should we rely upon professionalism and the public service ethos? Should we set up targets and league tables for performance, penalising those who fail to achieve the target or who drop down the table? Or should we rely upon patient or parental choice and competition to provide incentives to improve? The second half of the course explores ways of changing individuals' and households' behaviour in areas of policy concern such as smoking, obesity, and the environment. How can people be persuaded to stop smoking, to take more exercise, to

eat less, to reduce their carbon emissions? Should we rely upon punitive measures such as bans, on positive incentives such as financial rewards, or on 'nudge' policies that change the choice architecture? Should government intervene at all, if the only people harmed by their own activities are themselves? In trying to answer these questions, the course will draw on recent developments in behavioural economics, motivational and behavioural studies in psychology, and the philosophy of paternalism, including libertarian paternalism and the 'nudge' agenda. It will discuss evidence from a wide range of areas of public policy, but especially health care, education and social care, using illustrations and evidence from Europe, North America and Australasia.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour of lectures in the ST.
Formative coursework: All students will be required to present work in progress on their summative assignments during seminar class time. In addition, by the end of the reading weeks, students will be required to present to the course convener a two page plan for their summative assessment, on which they will receive written and oral feedback.
Indicative reading: J. Le Grand (2006) Motivation, Agency and Public Policy: of Knights and Knaves, Pawns and Queens. Revised paperback edition. Oxford: Oxford University Press. J. Le Grand (2007) The Other Invisible Hand; Delivering Public Services through Choice and Competition. Oxford: Princeton University Press. R. Thaler and C. Sunstein (2008) Nudge: Improving Decision about Health, Wealth and Happiness New Haven: Yale University Press. Ariely, D. (2008). Predictably irrational : the hidden forces that shape our decisions. London, HarperCollins. Kahneman, D. (2011) Thinking, Fast and Slow London, Allen Lane. P. Dolan et al (2010) Mindspace: Influencing Behaviour through Public Policy. London: Cabinet Office and the Institute for Government.
Assessment: Project (100%).
A ten-page project write-up, excluding abstract, referencing and appendices, formatted with 12 point Times New Roman with 1.5 spacing. The written output of the project is due in the first week of Summer Term.

SA4F9 Half Unit
Housing, Neighbourhoods and Communities

This information is for the 2017/18 session.
Teacher responsible: Prof Anne Power OLD.2.57
Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.
This is a capped course. If it is oversubscribed priority will be given to Social Policy Students with remaining places being allocated by random ballot. The first ballot will take place on Tuesday of MT week 1.
Course content: The course introduces MSc students to the links between housing, neighbourhoods and social policy, in urban areas of developed countries. It analyses how existing urban areas came to be developed and run. It explores housing systems in the UK, across Europe and North America, including home ownership, private renting and social renting, the role of government, housing providers and communities. In particular, the gap between neighbourhoods, the problems of housing costs and affordability, homelessness, and social exclusion. The course covers the management and maintenance of housing and neighbourhood services in cities, the impact of housing on social problems, on community relations, and on the environment. Case studies are used to examine how people relate to their neighbourhoods and to each other, particularly in low income, urban areas. How new communities are being developed, how existing areas can be adapted and how housing needs can be met are the big challenges this course addresses, using live case studies to illustrate the main themes.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 2 hours of seminars in the ST.
In addition there is one lecture/seminar in the ST. There are also organised site/project visits in MT. The course provides many case study examples for students to draw on.
Formative coursework: Students participate actively in seminars, present their case studies and complete two formative essays drawing on case study evidence.
Students are invited to join site visits which illustrate key housing themes.
Indicative reading: A. Power. City Survivors. 2007. A. Power. From Hovels to High Rise. 1993. R. Lupton. Poverty Street, 2003. R. Tunstall and A. Coulter. Turning the Tide? 25 Years on 20 Estates. Hanley (2004) Estates: a personal history. J Hills Ends And Means: The Future Roles Of Social Housing In England, 2007. Peter Somerville, Understanding Community, 2011. A Power et al. Jigsaw Cities 2007. J. Hills T. Sefton & K. Stewart. A more equal society? 2009. A. Power, J. Ploger, A. Winkler. Phoenix Cities. 2010.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 2000 words) in the LT.
Essay based on a housing case study

SA4G8 Half Unit
The Third Sector

This information is for the 2017/18 session.
Teacher responsible: Dr Timothy Hildebrandt OLD.2.56, Dr Armine Ishkanian OLD.2.54 and Dr Isabel Shutes OLD.2.58
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and MSc in Social Policy and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is capped at a maximum of 30 places.
Pre-requisites: Academic and/or practical knowledge of the the 'nonprofit', 'NGO', or 'voluntary sector' (in any country) desirable but not essential.
Course content: The 'third sector' is conceived as including all non-state and non-market organisations - such as non-governmental organisations, voluntary organisations, and community groups - and their activities. The course provides a concise introduction to theory and evidence on the nature, past and present roles and potential capacity of third sector organisations in social policy in developed and developing countries. It aims to answer the key questions: what is the 'third sector'?; what roles does it or should it play in meeting welfare needs?; how are third sector organisations involved in shaping social policy; how are changes in funding and in the provision of services affecting organisations? What are the limits to the roles of third sector organisations? Are the answers affected by country, institutions, policy, period, areas of activity? The course covers theoretical arguments and models of the ideal and actual roles of third sector organisations, and the historical development of the sector in different contexts. It assesses boundaries and relationships between the third sector, the state and the market, and its relationship with different social groups, service users and communities. It describes and explains the size and the role the sector takes in different periods, countries and areas of activity, and evaluates its impact. It considers the independence, interdependence, accountability and probity of third sector organisations. The course draws on examples from a range of areas of activity (such as education, employment, international development, social care), and areas of activity with particular groups (such as migrants and refugees, women, children and older people), as well as a range of countries.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
Formative coursework: Students will be expected to participate actively in seminars and to complete one piece of written formative coursework
Indicative reading: Anheier, H (2005) Nonprofit Organisations: Theory, Management, Policy; Billis, D (2010, ed.) Hybrid Organizations and the Third Sector: Challenges for Practice; Edwards, M (2009) Civil Society; Evers, A and Laville, J-L (eds) (2009) The Third Sector in Europe; Harris, M and Rochester, C (2001, eds.) Voluntary Organisations and Social Policy: Perspectives on Change and Choice; Ishkanian, A and Szreter, S (2012) The Big Society Debate: A New Agenda for Social Welfare?; Lewis, D. (2014) Non-Governmental Organizations, Management and Development; Lewis, D and Kanji, N (2009) Non-Governmental Organizations and Development; Kendall, J (2003) The Voluntary Sector: Comparative Perspectives in the UK; Powell, W and Steinberg, R (2006) The Nonprofit Sector: A Research Handbook; Salamon, L and Anheier, H (1997) Defining the Nonprofit Sector: A Cross-National Analysis; Taylor, M (2011) Public Policy in the Community.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4H
London School of Hygiene & Tropical Medicine - Units

This information is for the 2017/18 session.
Availability: Restricted to MSc Health Policy, Planning and Financing , MSc International Health Policy and MSc International Health Policy (Health Economics) students. This course is not available as an outside option.
Course content: London School of Hygiene and Tropical Medicine Linear Modules (MT)
Health Services
Health Policy, Process & Power
Basic Epidemiology: EPH & PHP*
Issues in Public Health
Students taking Linear Modules at the London School of Hygiene and Tropical Medicine (LSHTM) are required to sit for this examination. Students taking just one linear module will be assessed by a one-and-a-half hour written examination in the ST. Students taking two linear modules will be assessed by a three-hour written examination in the ST. A maximum of two LSHTM linear modules may normally be taken subject to academic approval, although in exceptional circumstances three may be taken subject to academic approval.
London School of Hygiene & Tropical Medicine Study Modules (LT and ST)
For a detailed list of modules available and codes students are advised to refer to their LSHTM MSc handbook. HPPF students can take a maximum of two LSHTM study modules at the London School of Hygiene and Tropical Medicine subject to academic approval. These are mostly assessed by assignments and there are usually no examinations.

SA4H7 Half Unit
Urbanisation and Social Policy in the Global South

This information is for the 2017/18 session.
Teacher responsible: Dr Sunil Kumar OLD.2.55
Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Population and Development, MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
For postgraduate students interested in urban social policy in developing and transitional countries. The course is also open to students on other MSc Programmes dependent on spaces being available. Some knowledge and experience of urban issues is desirable. In applying for a place on this course, students will have to upload a statement on LFY explaining why they want to enrol.
Course content: The course examines the social, economic and political challenges in urban areas in developing and transitional countries from various conceptual perspectives, and the policies and planning practices aimed at addressing them. Some of the themes explored in the course are: theoretical perspectives on the city; urbanisation and social change; migration; the rural-urban interface; urban poverty and livelihoods ; labour markets and housing; urban social movements; urban basic services; and urban management and governance.
Teaching: 15 hours of lectures and 16 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: All students are expected to read widely, and take part in a range of activities in the seminar sessions. Students are required to contribute to the seminars on a weekly basis by undertaking an un-assessed activity called My-City. All written work should be related to urban issues in either developing or transitional countries.
Indicative reading: A detailed reading list will be provided for each lecture and seminar. The following is an introductory list of books: Beall, J and S Fox (2009), Cities and Development, Routledge; Pieterse, E.A. (2008), City Futures: Confronting the Crisis of Urban Development, Zed Books; ; Staples, J. (Ed) (2007), Livelihoods at the Margins: Surviving the City. Left Coast Press; Westendorff, D. and D Eade (Ed) (2002), Development and Cities, OXFAM; ; J Gugler (Ed) (1997), Cities in the Developing World: Issues, Theory and Policy, Oxford University Press; Mitlin, D and D. Satterthwaite (2012), Urban Poverty in the Global South: scale and nature, Routledge; Mitlin, D. and D Satterthwaite (2004), Empowering Squatter Citizen : Local Government, Civil Society, and Urban Poverty Reduction, Earthscan; R J Skinner & M J Rodell (Eds) (1983), People, Poverty and Shelter, Methuen; J Hardoy, D Mitlin and D Satterthwaite (2001), Environmental Problems in Third World Cities, Eathscan; N Devas & C Rakodi (Eds) (1993), Managing Fast Growing Cities, Longman, S Bartlett et al (1999), Cities for Children, Earthscan; UN-Habitat (2011), Cities and Climate Change: Global Report on Human Settlements 2011, Oxford University Press; UN-Habitat (2011), The State of Asian Cities 2010/11, UN-Habitat; UN-Habitat (2010), State of the World's Cities 2010-2011, Oxford University Press; UNHCS (1996), An Urbanising World: Global Report on Human Settlements, Oxford University Press; UNFPA (2007), State of World Population 2007: Unleashing the Potential of Urban Growth, United Nations Population Fund.
Assessment: Exam (60%, duration: 2 hours) in the main exam period.
Essay (40%, 3000 words) in the LT.
All written work should be related to urban issues in either developing or transitional countries.

SA4H9 Half Unit
Non-Governmental Organisations, Social Policy and Development

This information is for the 2017/18 session.
Teacher responsible: Dr Armine Ishkanian OLD.2.54 and Dr Timothy Hildebrandt OLD.2.56
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is compulsory on the MSc in Social Policy and Development: Non-Governmental Organisations. This course is available on the MSc in Social Policy and Development. This course is not available as an outside option.
Pre-requisites: Students will preferably have some experience of

work within NGOs and/or relevant government departments or donor agencies working with NGOs.
Course content: The course focuses on the specialised field of non-governmental organisations (NGOs) within the field of social policy and development, and considers theoretical and policy issues. Main topics include the history and theory of NGOs; the changing policy contexts in which NGOs operate; NGO service delivery and advocacy roles in policy; challenges of NGO accountability; NGO organisational growth and change; conceptual debates around civil society, social capital, social movements and globalisation; and NGO relationships with other institutional actors including government, donors and private sector.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will sit a mock exam held in LT. Students will receive feedback from their academic adviser on the mock exam. Weekly student led seminars which involve discussion of the assigned readings will also help to develop students' critical thinking, reading, and analytical skills
Indicative reading: Anheier, H.K. (2005) Nonprofit Organizations: Theory, Management, Policy. London: Routledge; Bebbington, A., Hickey, S. and Mitlin, D. (2008) Can NGOs Make a Difference? London: Zed Books; Edwards, M. and Hulme, D. NGOs, Performance and Accountability: Beyond the Magic Bullet. London: Earthscan; Glasius, M, Lewis, D. and Seckinelgin, H. (2004) eds. Exploring Civil Society: Political and Cultural Contexts, London: Routledge; Kaldor, M. and Anheier, H.K. Global Civil Society Yearbooks 2001-2010. Oxford University Press/Sage; Holmen, H. (2010) Snakes in Parsdise: NGOs and the Aid Industry in Africa. Sterling VA: Kumarian; Howell, J. and J. Pearce (2001) Civil Society and Development: A Critical Exploration. London: Lynne Rienner; Lewis, D. and Kanji, N. (2009) Non-Governmental Organisations and Development. London: Routledge.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4J2 Half Unit

New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise

This information is for the 2017/18 session.
Teacher responsible: Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields and Prof Julian Le Grand Marshall Institute, 5 Lincoln's Inn Fields
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Public and Economic Policy, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is available in the first instance to students taking the MPA in Social Impact. It is also open to students taking other MPA programmes. If there is sufficient capacity, the course is available with permission to students taking Master's programmes in the Department of Social Policy and other Departments. The course is a collaboration between the Marshall Institute and the Department of Social Policy.
Course content: Private actions for public benefit - whether called philanthropy, charity, associationalism, social entrepreneurship or social business - have long been significant within societies. This arena of private action is currently experiencing both resurgence and disruption. This course takes a policy-oriented approach towards these new dynamics of private social action. It explores innovative mechanisms of financing, organisation and delivery, including impact investing, new coalitions for social impact (for instance, social impact bonds), venture philanthropy and social enterprise. A central focus is the opportunity created by bringing together market and business mechanisms and the social – but also the consequent challenge and complexity of achieving social impact through hybrid organisations, hybrid funding streams and hybrid mechanisms of coordination. Cross-cutting themes are how to design incentive structures which respond to the complex web of motivations of actors in this field, and the organisational tension inherent in responding to double or triple bottom lines.
Using analytical frameworks drawn from economics, sociology and political economy, the course will critically evaluate the challenges and advantages of these emerging institutions and mechanisms. Examples of the types of question that we will investigate include: what is social enterprise? How can social enterprises support social innovation and impact? Can we combine financial return, social impact and environmental sustainability? Why should an organisation be a non-profit, for-profit or other ownership form? How can the state, market and private altruistic action combine to achieve social impact? How can we design organisations and structures which nurture and capitalise on values and altruism? What are the differences between the culture, practice and motivations of state, commercial and charitable organisations, and what are the consequent challenges of implementation and management in hybrid organisations? The answers to these questions are contested and the course seeks to give participants the critical skills to make their own determination.
Teaching: 15 hours of lectures, 15 hours of seminars and 7 hours and 30 minutes of workshops in the LT.
The course comprises of one 90 minute lecture and one 90 minute seminar each week. In addition every fortnight there will be a 90 minute 'private action in practice' workshop organised by the Marshall Institute.
Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.
Formative assessment will consist of one 2,000 word essay, submitted in the middle of the LT. Students will also receive formative feedback on seminar presentations.

Assessment: Coursework (30%, 2000 words) and essay (70%, 3000 words) in April.

SA4J4 Half Unit

Designing and Implementing Evidence-Informed Policies and Programmes

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option.
Capped at 30
Course content: The aim of this half-unit course is to help students develop knowledge, critical analysis and skills necessary for evidence-informed policy making. It will enable students to assess, analyse, interpret and use evidence to design relevant and effective interventions. The course particularly emphasises the need to recognise the complexity of economic, social, institutional and political context and incorporate contextual analysis of social relations, gender inequalities, interests and incentives of societal actors in policy design and implementation arrangements. The course will equip students with the knowledge and skills to critically appraise how government agencies, international organisations and other actors generate and utilise evidence to design and implement policies and programmes.
The course covers evidence generation and use during three main stages of the policy cycle: policy design, implementation, and monitoring and evaluation. It introduces theory-based approaches and examines the use of social, gender, governance and political-economy analysis to inform policy design and implementation. It discusses the role of monitoring and evaluation in producing nuanced policy-relevant evidence.
The course draws on policies and programmes in the field of social policy and social development in both more and less developed countries. In seminars, students will review and critically assess project reports (e.g. project appraisal/completion reports) and research studies of actual policies and programmes. They will scrutinise different assessment tools developed and used by government agencies and international organisations (e.g. DFID, World Bank) for gathering policy relevant evidence.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
10 x 1.5 hour lectures (MT weeks 1-10)
10 x 1.5 seminars (MT weeks 2-11)
Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the MT.
Students will work in groups to deliver seminar presentations on assigned topics and contribute to seminar discussions. As well as enabling students to practise essential team working and presentation skills, this exercise is an important preparation for the final summative assessment. It will enable students to practise their ability to analyse and evaluate policies and programmes, prepare and present critiques, and use literature to frame and contextualise analysis.
Students will write a short individually-authored project identification report (1,000 words, MT week 7) in preparation for the summative assessment. This exercise will test their ability to use theory-based approaches, distinguish types and sources of evidence, and evaluate approaches and methods for generating evidence. Students will receive personalised feedback and suggestions for future improvement.
Indicative reading: Nutley, S. M., Walter, I. and H. T. O. Davies (2007) Using Evidence: How Research Can Inform Public Services, Policy Press: Bristol. Funnell, S. and P. Rogers (2011) Purposeful Program Theory: effective Use of Theories of Change and Logic Models, Wiley & Sons: San Francisco. Weiss, C. (1998) Evaluation: methods for Studying Programs and Policies, Prentice Hall: New York. Bacchi, C. (2009) Analyzing Policy: What's the Problem Represented to Be? Pearson Australia: Frenchs Forest, N. S. W. Holmes, R. and N. Jones (2013) Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets, Zed Books: London and New York. Fritz, V., Levy, B. and R. Ort (2014) Problem-driven Political Economy Analysis: The World Bank's Experience, Directions in Development - Public Sector Governance, World Bank: Washington, DC. Shah, N. B., Wang, P., Fraker, A. and D. Gastrfriend (2015) Evaluations with Impact: Decision-focused Impact Evaluation as a Practical Policymaking Tool, 3ie Working Paper 25. Roelen, K. and L. Camfield (2015) Mixed Methods Research in Poverty and Vulnerability: Sharing Ideas and Learning Lessons, Pagrave Macmillan: London.
Assessment: Essay (30%, 1500 words) in the MT.
Other (70%) in the LT.
Students will be required to complete two assignments designed to support the main learning outcomes of the course:
1. A three-part individually authored essay (30%), in which students answer pre-assigned questions, drawing on literature and course material (500 words for each answer, maximum 1,500 words in total, MT week 11). This assessment will support student learning of the main debates, issues and critiques and will help consolidate their disciplinary and methodological knowledge. It will develop the ability to recognise constraints on evidence-based policy making, and to recognise and evaluate the contribution of different assessment tools and evaluation approaches.
2. An individually-authored project appraisal report (70%) with an assessment of a real-life project, using knowledge and skills learned in the course and drawing on project design documents, evaluation reports and relevant literature (maximum 3,000 words, LT week 1). Students will be asked to re-design the project or its parts to incorporate evidence more rigorously.
This assessment is designed to enable students to apply the knowledge and skills they learned to assess the use of evidence in project design and propose arrangements to address policy weaknesses they identified. It will develop students' ability to appraise policies and programmes; evaluate, analyse, interpret and use evidence; design analytical frameworks; prepare and present written critiques; and write policy reports. This assessment is in line with the student-centred nature of the course delivery. It will allow students to exercise choice in selecting the project and offer an opportunity to carry out independent and creative work - both these features support student autonomy and tend to empower students.

SA4J8 Half Unit

Social Policy and Development: Core Concepts

This information is for the 2017/18 session.
Teacher responsible: Dr Armine Ishkanian OLD.2.54 and Dr Timothy Hildebrandt OLD2.55
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is compulsory on the MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.
Pre-requisites: Students will be required to take part in a three-day residential workshop at Cumberland Lodge in Windsor Great Park, during the Lent term. The cost is included in MSc SPD & NGOs student fees.
Course content: The course is designed to give students knowledge of core concepts within the theory and implementation of social policy in developing countries. Such an overview is essential for those focusing on mainstream social policy and development issues, and those choosing to specialise on non-governmental organisations. Main topics will include: Comparative social policy in north and south; social development and human development; conceptualizing the state, market and civil society as policy actors; citizenship, social justice, and rights; comparative approaches to the understanding of poverty, wellbeing and exclusion; welfare regime theory; concepts of sustainable

livelihoods; global institutions and the international aid system; conceptualizing the policy process.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
There is also a compulsory residential workshop held in Cumberland Lodge, Windsor during a weekend in January (Lent Term).
Formative coursework: All students will write and receive feedback on a 2000 word formative essay. The formative essay is based on a set question.
The weekly student-led seminars will require all students to come prepared to discuss the required readings and link these to the learning outcomes. The seminar teaching is designed to help students develop critical thinking, reading, and analytical skills.
Indicative reading: De Haan, A. (2007) Reclaiming Social Policy: Globalization, Social Exclusion and New Poverty Reduction Strategies. Basingstoke: Palgrave Macmillan; Deacon, B (2007) Global Social Policy and Governance, London: Sage; Gough, I. and G. Wood et al. (1997) Governance, Development and Administration: Making the State Work. Houndsmill: Macmillan.
Assessment: Essay (100%, 3500 words) in the LT.

SA4J9 Half Unit
States, Social Policy and Development

This information is for the 2017/18 session.
Teacher responsible: Dr Armine Ishkanian OLD.2.54, Dr Timothy Hildebrandt OLD.2.56 and Dr Sunil Kumar OLD.2.55
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is compulsory on the MSc in Social Policy and Development. This course is available on the MSc in Social Policy and Development: Non-Governmental Organisations. This course is not available as an outside option.
Course content: This course provides the analytical tools needed to understand and critically evaluate the key practical challenges of social development. A wide range of development contexts will be discussed using empirical research and case studies. Key themes include: linking social policy theory, implementation and practice; making social protection effective; managing sector reform processes; projects and programmes, including design and evaluation; participation and community development; gender analysis; the impact of corporate social responsibility and social enterprises on poverty reduction.
Teaching: 15 hours of lectures and 15 hours of seminars in the Lent Term.
Formative coursework: The formative work on this course is a mock exam held in the Lent Term. Students will receive feedback on their mock exam from their academic advisers.
Indicative reading: Barrientos, A. and D. Hulme, eds. (2008) Social Protection for the Poor and the Poorest: Concepts, Policies and Politics. London: ITDG; Willis, K. (2005) Theories and Practices of Development. London: Routledge.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SA4K2 Half Unit
Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2017/18 session.
Teacher responsible: Dr Timothy Hildebrandt OLD.2.55
Dr Hakan Seckinelgin OLD.2.27
Availability: This course is available on the MSc in Health, Community and Development, MSc in Social Policy (Research), MSc in Social Policy and Development and MSc in Social Policy and Development: Non-Governmental Organisations. This course is available as an outside option to students on other programmes where regulations permit.
This course is capped at 15 students.
Pre-requisites: None
Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
Formative coursework: Students will be expected to submit a formative essay (2,000 words), which is to be handed in by the end of week eight of Lent Term.
Indicative reading: Aggleton, P., Boyce, P. and Moore, H. (2012) Understanding Global Sexualities: New Frontiers. London: Routledge; Butler, J. (1990) Gender Trouble: Feminism and the Subversion of Identity. New York: Routledge; Canaday, M. (2009) The Straight State: Sexuality and Citizenship. Princeton university Press; Cornwall, A., Corrêa, S. and Jolly, S. (2008) Development with a Body: Sexuality, Human Rights and Development. London: Zed Book; Correa, S., Petchesky, R. and Parker, R. (2008) Sexuality, Health and Human Rights. London: Routledge; De La Dehesa, R. (2012) Queering the Public Sphere in Mexico and Brazil: Sexual Rights Movements in Emerging Democracies. Duke University Press; Reid, G. and Walker, L. (2005) Men Behaving Differently: South African Men since 1994. Doubleday books; Richey, L. A. (2008) Population Politics and Development: From the policies to the Clinics. London: Palgrave; Stoler, A. L. (2002) Carnal Knowledge and Imperial Power: Race and the Intimate in Colonial Rule. University of California Press; Tamale, S. (2011) African Sexualities: A Reader. Pambazuka Press.
Assessment: Essay (100%, 3000 words) in the LT.

SA4K3
MPA Capstone Project

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and MPA in Social Impact. This course is not available as an outside option.
Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, companies operating in the public management or public policy sector, international organisations or think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: 7 hours and 30 minutes of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises seven 1.5 hour Capstone seminars in the MT and LT. These seminars provide guidance on planning, structuring and presenting the Capstone report and the usage of research methods. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.
Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.
Indicative reading: Useful preliminary reading: Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979; Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Common Causes of Project Failure (London: OGC, 2004); Howard White, Theory-based Impact Evaluation: Principles and Practice (3ie, 2011); Curtis Cook, Just Enough Project Management (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, 'Dynamics in Groups and Teams: Groups as Complex Action Systems', chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).
Assessment: Project (100%, 15000 words) in the LT.
The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.
The group mark has three components:
1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item).
Additionally, each group member must complete the Capstone evaluation and personal reflection exercise. This will be submitted individually and separately from the report.

SA4K4
MPA Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option. Students may not take this course and an MPA Policy Paper.
Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research and/or analysis in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their Academic Adviser. The dissertation must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge- and theory-building. The main body of the dissertation should include literature review, method of investigation, results of the analysis, discussion of findings, conclusions and theoretical and policy implications. Dissertations can utilise quantitative and/or qualitative data and draw on primary and/or secondary research.
Teaching: 6 hours of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises six seminars in the MT and LT. These seminars provide academic and practical guidance on developing a research topic and question; designing an analytical framework; structuring and presenting policy analysis; and writing policy recommendations. The student's Academic Adviser will provide advice and guidance on this piece of work.
Indicative reading: David L. Weimer and Aidan R. Vining, Policy Analysis: Concepts and Practice, 5th ed. (Prentice Hall, 2010); Lisa Anderson ed., Pursuing Truth, Exercising Power: Social Science and Public Policy in the Twenty-first Century (Columbia University Press, 2005); Edith Stokey and Richard Zeckhauser, A Primer for Policy Analysis (Norton, 1978); Anthony E. Boardman et al., Cost-Benefit Analysis, 4th ed. (Prentice Hall, 2010); William N. Dunn, Public Policy Analysis: An Introduction, 4th ed. (Pearson, 2008); Eugene Bardach, Practical Guide for Policy Analysis, 4th ed. (CQ Press, 2011); Alec Fisher, The Logic of Real Arguments (Cambridge University Press, 1988); Charles Lindblom and David K. Cohen, Usable Knowledge: Social Science and Social Problem Solving (Yale University Press, 1979); Isabel Vogel, Review of the Use of 'Theory of Change' in International Development (DfID, 2012); Edward T. Jackson, Interrogating the Theory of Change: Evaluating Impact Investing where it Matters Most (Journal of Sustainable Finance and Investment, Vol 3, No 2, 95-110, 2013); Catherine Hakim, Research Design: Strategies and Choices in the Design of Social Policy, 2nd ed. (Routledge, 2000); Alan Bryman, Social Research Methods, 4th ed. (Oxford University Press, 2012); David Partington, Essential Skills for Management Research (Sage Publications, 2002); Diana Ridley, The Literature Review: A Step-by-Step Guide for Students (SAGE Study Skills Series, 2008); Christopher Hart, Doing Your Masters Dissertation (SAGE Study Skills Series, 2004); Patrick Dunleavy, Authoring a PhD (Palgrave Macmillan, 2003)
Assessment: Dissertation (90%, 10000 words) in the ST.
Other (10%) in the MT.
1) A 1,500 word dissertation proposal consisting of the title, abstract, research question and hypothesis, justification for research, feasibility of the dissertation topic, an explanation of sources, provisional structure and analytical framework will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their Academic Adviser. Students will be given feedback on their proposal.
2) The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

SA4K5 Half Unit
Issues in Contemporary Policing

This information is for the 2017/18 session.
Teacher responsible: Prof Tim Newburn OLD 2.40a
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Laws. This course is available as an outside option to students on other programmes where regulations permit.
While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms: Criminology and Criminal Justice, Legal Theory and Public Law.
Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) Criminology, London: Routledge, 3rd Edition
Course content: The flourishing sub-discipline of 'police studies' reflects the increasing centrality of policing in political debate and popular culture, and as a major concern of government policy. This course aims to familiarise students with the formidable volume of research knowledge that has now been built up. The course will enable students to understand the development and functioning of police organisations as well as providing them with an understanding of some of the key issues and debates affecting contemporary policing. The topics covered will include: the role and purposes of policing; the media and policing; governance and legitimacy; integrity and corruption; and policing and (in)equality.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be required to write and submit two pieces of formative coursework. The first will be an essay outline - in effect an outline of a answer to a potential examination question, including a full introductory paragraph. The second will be a written assessment of a published book review - as the basis for the summative work to come.
Indicative reading: Bittner, E. (1990) Florence Nightingale in pursuit of Willie Sutton, in Aspects of Police Work, Boston: Northeastern University Press. Bowling,B., Phillips,C. and Parmar,A. (2008) 'Policing ethnic minority communities' in Newburn, T. (ed) Handbook of Policing, Cullompton: Willan. Dick, M., Silvestri, M. and Westmarland, L. (2013) Women police; potential and possibilities for police, in J.Brown (ed.) The Future of Policing London: Routledge. Greer, C. and R.Reiner (2012): 'Mediated Mayhem' in M.Maguire et al The Oxford Handbook of Criminology Oxford University Press. Newburn, T. (ed) (2008) Handbook of Policing, Second Edition, Cullompton: Willan. Newburn, T. (ed) (2004) Policing: Key Readings, Cullompton: Willan. Reiner, R. (2010) The Politics of the Police, Oxford: Oxford University Press. Reiner, R. (2013) Who Governs? Criminology and Criminal Justice 13/2: 161-180. Silver, A. (1967) 'The demand for order in civil society', in D.J. Bordua (ed) The Police: Six Sociological Essays, New York: Wiley. Banton, M. (1964) The policeman in the community, London: Tavistock. Knuttson, J. and Tompson, L. (2017) Advances in Evidence-based Policing, London: Routledge. Lum, C. and Koper, C. (2017) Evidence-based policing: Translating theory into practice, New York: OUP. Monkkonen, E. (1982) From cop history to social history: The significance of police in American history, Journal of Social History, 15, 575-91. Newburn, T. (1999) Understanding and preventing police corruption, London: Home Office. Reuss-Ianni, E. and Reuss-Ianni, F. (1983) Street cops and management cops: the two cultures of policing, in Punch, M. (ed) Control in the Police Organization, Cambridge: MIT Press. Skolnick, J. (1994) A Sketch of the policeman's working personality, in Justice Without Trial, New York: Wiley. Styles, J. (1987) The emergence of the police - explaining police reform in eighteenth and nineteenth century England, British Journal of Criminology, 27, 1, 15-22. Zimring, F. (2017) When Police Kill, New York: OUP
Assessment: Essay (80%, 3000 words) in January.
Project (20%, 1000 words) in the Week 7.
The summative assessment will comprise a 3,000 essay involving a critical assessment of a minimum of two substantive issues covered in the course (80%), and a 1,000 word book review (20%).

SA4L1 Half Unit
The Governance of Welfare: The Nation State and the European Union

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Mangen OLD 2.62
Availability: This course is compulsory on the MSc in Social Policy (European and Comparative Social Policy). This course is available on the MSc in China in Comparative Perspective, MSc in EU Politics, MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Policy (Research) and MSc in Social Policy (Social Policy and Planning). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The initial lecture introduces the principal methods and analytic models of comparative social policy. This is followed by a review of the development of modern welfare states in Western Europe from the last quarter of the 19th century, when many of the key institutional features of European welfare were being created. Then a series of lectures provides analysis of contemporary welfare models as they have evolved in major EU member states since the end of the Second World War: Sweden (representing social democracy) France and Germany (representing two variants of 'conservative corporatism' as Esping-Andersen in the Three Worlds of Welfare Capitalism termed them), Italy and Spain (as representatives of the Mediterranean 'middle way') and welfare states of Transitional Economies in Central and Eastern Europe. Discussion of the social policy competence of the European Union completes the teaching in the last three sessions.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be required to submit one formative essay of 1500 words by the end of week 8 of the Michaelmas Term.
Indicative reading: Baldwin, P The Politics of Social Solidarity - Class Bases of European Welfare States 1875-1975, Cambridge University Press 1990; Buchs M New Governance of European Social Policy: the Open Method of Coordination. Palgrave, 2007;Esping-Andersen, G The Three Worlds of Welfare Capitalism, Polity 1990; Hay C & Wincott The Political Economy of European Welfare Capitalism, Palgrave 2012, especially chapters 2, 5, 6; Mangen S Europe and the Welfare State since 1945 in Larres K (ed) A Companion to Europe Since 1945. Blackwell, 2008; van Kersbergen K & Vis B Comparative Welfare State Politics, Cambridge OP 2014;Castles F G et al The Oxford Handbook of the Welfare State. Oxford UP, 2010.
Assessment: Essay (100%, 3000 words).

SA4L6 Half Unit
Illegal Drugs and Their Control: Theory, Policy and Practice

This information is for the 2017/18 session.
Teacher responsible: Dr Michael Shiner OLD.2.34
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Regulation, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Laws. This course is available as an outside option to students on other programmes where regulations permit.
If this course is oversubscribed places will be allocated firstly to MSc Criminal Justice Policy students, then other Social Policy students and then students from other departments on a first

come first served basis.
Pre-requisites: Some familiarity with criminology or sociology is preferable but not essential
Course content: This multi-disciplinary course draws on sociology, psychology, criminology and law to examine the place and meaning of illegal drug use in late modern societies and associated policy responses. It begins by considering drug use and subcultural formations; the 'normalisation' of drug use; drug tourism; the role of addiction; and the organisation of drug markets. It then goes onto consider the making of drugs policy; drugs, policing and the law; treatment and harm reduction; drugs as a development and human rights issue; decriminalisation and alternatives to prohibition.
Teaching: 10 x 1.5 hours of lectures and 10 x 1.5 hours of seminars in the MT.
Formative coursework: Students will be expected to submit a formative essay (2,000 words), which is to be handed in by the end of week eight of MT.
Indicative reading: Aldridge, J., Measham, F., and Williams, L. (2011) Illegal Leisure Revisited: Changing Patterns of Alcohol and Drug Use in Adolescents and Young Adults, London: Routledge. Bean, P. (2008) Drugs and Crime, Cullompton: Willan. R. Hughes, R. Lart., and P. Higate (2006) Drugs: Policy and Politics, Maidenhead: Open University press. Klein, A. (2008) Drugs and the World, London: Reaktion. MacCoun, R.J., and Reuter, P. (2001) Drug War Heresies: Learning from Other Vices, Times and Places, Cambridge: Cambridge University Press. Shiner, M. (2009) 'Drug Use and Social Change: The Distortion of History, Basingstoke: Palgrave Macmillan. M. Simpson, T. Shildrick and R. MacDonald (2007) Drugs in Britain: Supply, Consumption and Control, Basingstoke: Palgrave MacMillan. Stevens, A. (2011) Drugs Crime and Public Health: The Political Economy of Drug Policy, London: Routledge.
Assessment: Essay (100%, 3000 words) in the LT.
to be handed in during the first week of the LT.

SA4L7 Half Unit
Policing, Security and Globalisation

This information is for the 2017/18 session.
Teacher responsible: Prof Tim Newburn OLD 2.40a
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Laws. This course is available as an outside option to students on other programmes where regulations permit.
While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms: Criminology and Criminal Justice, Legal Theory and Public Law.
Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction in: Newburn, T. (2017) Criminology, London: Routledge, 3rd Edition
Course content: The sub-discipline of police studies is now well-established and is flourishing. Whilst much traditional policing scholarship has focused on policing within particular societies, increasingly attention is being drawn to both international and comparative matters. Indeed, the social and economic changes associated with globalisation have affected policing as all else. This course will focus on transnational public and private policing, and on the issues and challenges raised by globalisation: from the policing of transitional societies and emergent democracies, the problems of drugs control and the policing of migration, to new social movements and the policing of public order.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be asked to submit one piece of formative coursework: an essay outline - in effect an outline answer to the longer summative essay, including a full introductory paragraph.
Indicative reading: Bowling, B. and Sheptycki (2012) Global Policing London: Sage. Brodeur, J-P (2010) The Policing Web, New York: OUP. Newburn, T. (ed) (2008) Handbook of Policing, Second Edition, Cullompton: Willan (in process of updating). Newburn, T. (ed) (2004) Policing: Key Readings, Cullompton: Willan. Newburn, T. (ed) (forthcoming) Policing: Critical Concepts in Criminology, London: Routledge (4 vols). Reiner, R. (2010) The Politics of the Police, Fourth Edition, Oxford: Oxford University Press (new edition in 2017/18). Andreas, P. and Nadelmann, E. (2006) Policing the Globe: Criminalization and crime control in international relations, New York: OUP. Johnston, L. (2006) Transnational security governance, in Wood, J. and Dupont, B. (eds) Democracy, Society and the Governance of Security, Cambridge: CUP. Nadelmann, E. (1993) Cops across borders: the internationalisation of US law enforcement. Pennsylvania State University Press. Reiner, R. (1992/2004) Policing a postmodern society, in Newburn, T. (ed) Policing: Key Readings, Cullompton: Willan. O'Malley, P. (1997/2004) Policing, politics and postmodernity, in Newburn, T. (ed) Policing: Key Readings, Cullompton: Willa. Sheptycki, J. (1995) 'Transnational policing and the makings of a postmodern state'. British Journal of Criminology, 35:613-35. Sheptycki, J. (1998). 'Policing, postermodernism and transnationalisation'. British Journal of Criminology. 38: 485-503. Sheptycki, J (ed.) (2000) Issues in Transnational Policing. London: Routledge
Assessment: Essay (80%, 3000 words) in the ST.
Coursework (20%, 1000 words) in the Week 7.
The summative assessment will comprise a 3,000 word essay involving a critical assessment of two substantive issues covered in the course (80%), and a 1,000 word critique of a selected piece of policing research

---

SA4M1 Half Unit
Politics of Social Policy: Welfare and Work in Comparative Perspective

This information is for the 2017/18 session.
Teacher responsible: Dr Timo Fleckenstein OLD.2.60
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in EU Politics, MSc in EU Politics (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology, MSc in Public Policy and Administration, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course explores the politics of social policy in advanced political economies. In the first part of the course, the main analytical approaches for the cross-national analysis of welfare states are introduced (such as the industrialism thesis, the power resources model, new institutionalism, feminist theory and the globalisation thesis). These will be examined in the context of the rise of modern welfare states and their transformations since the end of the 'Golden Age' in the mid-1970s. These analyses and the theoretical approaches to cross-national study of welfare states will be harnessed in the second part of the course when the focus shifts towards more recent policy developments since the 1990s. The empirical focus is on the welfare-and-work nexus. The course analyses the development of labour market and family policies in Nordic countries, Continental Europe, Anglo-phone countries and East Asia.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Seminar members will be expected to make presentations to the seminar, and submit a formative essay of 1,500 words.

Indicative reading: Bonoli, Giuliano, and Natali, David, eds. (2012) The Politics of the New Welfare State, Oxford: OUP. Castles, Frances G. et al., eds. (2010) The Oxford Handbook of the Welfare State, Oxford: OUP. Clasen, Jochen, and Clegg, Daniel, eds. (2013) Regulating the Risk of Unemployment: National Adaptations to Post-Industrial Labour Markets in Europe, Oxford: OUP. Kersbergen, Kees van and Vis, Barbara (2013) Comparative Welfare State Politics: Development, Opportunities, and Reform, Cambridge: CUP. Lewis, Jane (2009) Work-Family Balance, Gender and Policy, Cheltenham: Edward Elgar
Assessment: Essay (100%, 3000 words).

SA4N5 Half Unit Not available in 2017/18 Global Ageing

This information is for the 2017/18 session.
Teacher responsible: Prof Emily Grundy OLD.1.11
This course is compulsory on the MSc Global Health, recommended for students on MSc Global Population Health and MSc Population and Development and available to students on other MSc programmes with an interest in the subject.
Availability: This course is available on the MSc in Global Population Health, MSc in Health and International Development and MSc in Population and Development. This course is available as an outside option to students on other programmes where regulations permit.
A core course for students taking MSc Global Health, very relevant to students on MSc Global Population Health, Social Policy MScs and MSc Population and Development. It is available to students on other programmes who have an interest in the topic. .
Course content: Population ageing is now a near global phenomenon and is perceived as presenting major challenges not only in regions with an already high representation of older people but also in low and middle income countries set to 'grow old before they grow rich'. This course will consider the process and implications of ageing at both the population and the individual level and policy responses.
The course will be structured into five sections. The first will focus on demographic change and the causes and the course of population ageing in various world regions. This element will include explanation and discussion of population dynamics (how populations age) and inter-related social and economic changes associated with demographic transition (why populations age) and their implications for both older and younger generations.
The second section will focus on the process of ageing at the individual level including an overview of recent biological theories of ageing; consideration of family and social support for older people and life course influences on ageing.
In the third section the emphasis will be on trends and differentials in the health of older populations. This will include discussion of measures of health and disability and current debates about the future health status of the older population in different settings and prospects for further changes in longevity.
The fourth section will consider different models of health and social care provision in older populations; associations between ageing and work and debates about economic implications of population ageing and different pillars of economic support for older people, including social pensions.
The final section will deal with policy responses to population ageing at the international and national and regional level.
Teaching: 15 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Students will be asked to work in groups (of 3-5) to prepare and lead seminars. Students will also be required to produce a 1,000 word essay similar to the type of essay questions included in the exam.
Indicative reading: Albertini M, Martin K, Vogel C. Intergenerational transfers of time and money in European families: common patterns – different regimes? Journal of European Social Policy 2007;17(4):319–34. Kinsella K, Wan H. An Aging World: 2008, International Population Reports, US Department of Health and Human Services, 2009. Lee R, Mason A. Population Ageing and the Generational Economy: A Global Perspective. Edward Elgar Publishing, 2011. McDaniel SA, Zimmer Z (eds). Global Ageing in the Twenty First Century. Siegel JS. The Demography and Epidemiology of Human Health and Aging. Springer, 2012. Uhlenberg P (ed). International Handbook of Population Aging, Springer, 2009.
Assessment: Exam (75%, duration: 2 hours) in the main exam period.
Essay (25%, 3000 words) in the LT.

SA4N8 Half Unit Riots, Disorder and Urban Violence

This information is for the 2017/18 session.
Teacher responsible: Tim Newburn (OLD 240a)
Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Laws. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2012) Criminology, London: Routledge, 2nd Edition.
Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as 'riots'. The course will consider the various approaches that have been taken to this subject - via history, psychology and sociology - and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively.
Teaching: 15 hours of lectures and 15 hours of seminars in the LT. There was strong and consistent feedback from students this year (the first year of the course) to increase the lecture time from 60 minutes to 90 minutes (in line with a number of other taught MSc modules in Social Policy).
Formative coursework: Students will be required to write and submit two pieces of formative coursework for assessment and peer feedback. The first will be an essay outline - in effect an outline of a answer to a potential examination question, including a full introductory paragraph. The second will be an outline of their intended case study. Both pieces of formative coursework will be shared via Moodle and all students will be encouraged to offer constructive feedback to each other as well, of course, as receiving feedback from the course director. Peer feedback will be utilised as a means of encouraging a degree of group work and collective endeavour among course participants.
Indicative reading: Baldassare, M. (1995) The Los Angeles Riots: Lessons for the Urban Future, Boulder: CO. Bergenson, A. and Herman, M. Waddington, D. and King, M. (2005) The disorderly crowd: From classical psychological reductionism to socio-contextual theory – The impact on public order policing strategies, Howard Journal, 44, 5, 490-503
Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the main exam period.
Coursework (40%) and presentation (10%).
The coursework (40%) will comprise a single summative essay offering an analytical case study of a modern riot and the presentation (10%) will comprise a poster presentation at an end of term mini academic conference.

SA4P2 Half Unit Not available in 2017/18
Global Population Health: Research Design and Analyses

This information is for the 2017/18 session.
Teacher responsible: Dr Ernestina Coast OLD M 2.24, Dr Arjan Gjonca OLD M 2.25, Dr Tiziana Leone OLD 2.56, Prof Emily Grundy OLD M 2.23 and Prof Michael Murphy
Availability: This course is compulsory on the MSc in Global Population Health. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is compulsory for students on the MSc in Global Population Health who are taking the half-unit dissertation option SA4BA Global Population Health Research Report.
This course will be available as an outside option to students in the department of Social Policy where regulations permit.
Pre-requisites: There are no pre-requisites.
This course is compulsory for students enrolled in the half-unit dissertation option SA4BA Global Population Health Report. It is available as an option for students on other MSc Programmes, with the permission of their Programme Director.
Course content: This half-unit course will provide students with basic training and knowledge in research design and analysis for global population health. Key topics include: formulating research questions and hypotheses; literature searching and systematic narrative reviews; research design; ethical issues in research; research instrument design; data collection; sampling strategies and statistical power; data management and documentation; presentation of results; hypothesis testing and statistical analyses; and, drawing conclusions. The course materials will focus on a broad range of quantitative and qualitative global population health research, and will help students not just to design, collect and manage data, but also to present and interpret their evidence.
Teaching: 10 hours of lectures and 12 hours of workshops in the MT. 3 hours of workshops in the LT.
10 x 1 hour lecture (MT)
10 x 1.5 hour seminar workshop (MT & LT)
Students on this course will have a reading week in Week 6, in line with departmental policy.
Formative coursework: Students will be expected to produce 5 quizzes in the MT.
Fortnightly online quizzes, linked to the content of lectures and seminars. All students are expected to pass these formative tests. They can be attempted as many times as needed until a pass is achieved.
Indicative reading: A full e-reading list will be available. Indicative general readings include:

SA4V8 Half Unit
MPA Policy Paper

This information is for the 2017/18 session.
Teacher responsible: Dr Babken Babajanian SAR.G.03
Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option.
Students may not take this course and an MPA Dissertation.
Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. MPA students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and

policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.
Teaching: 6 hours of seminars in the MT. 3 hours of seminars in the LT.
Teaching comprises six seminars in the MT and LT. These seminars provide academic and practical guidance on developing the policy paper topic and question; designing analytical framework; structuring and presenting policy analysis; and writing policy recommendations. The student's Academic Adviser will provide advice and guidance on this piece of work.
Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted in the MT. Students may only change their topic thereafter with the agreement of their Academic Adviser. Students will be given feedback on their proposal.

(Oxford University Press, 2012); David Partington, Essential Skills for Management Research (Sage Publications, 2002); Patrick Dunleavy, Authoring a PhD (Palgrave Macmillan, 2003).
Assessment: Other (100%) in the ST.
6,000 word policy paper

SA4X6
Welfare Analysis and Measurement

This information is for the 2017/18 session.
Teacher responsible: Prof Stephen Jenkins OLD2.29 and Dr Berkay Ozcan OLD2.32
Availability: This course is compulsory on the MPA in Public and Social Policy. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Social Impact, MSc in Inequalities and Social Science, MSc in International Health Policy, MSc in International Health Policy (Health Economics), MSc in Social Policy (European and Comparative Social Policy), MSc in Social Policy (Research), MSc in Social Policy (Social Policy and Planning) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: The course has no formal pre-requisites. Because much of the empirical evidence referred to in the course is quantitative in nature, a familiarity with basic statistical concepts and basic calculus is useful but not essential. (These topics are reviewed during the pre-sessional course of the MPA programme EC408.)
Course content: This course provides an introduction to the analysis and measurement of the welfare of individuals and societies, examining concepts, measurement and data, as well as providing illustrations. The aims are to provide an understanding of the main tools used to measure and monitor individuals and social welfare, and to develop skills for assessing academic research and official statistics (as produced by national or international agencies) and for undertaking one's own analysis. The first half of the course focuses on univariate monetary measures of economic wellbeing notably 'income', and on the experience of OECD countries (especially the UK, EU, and USA), but the aim is also to place these in the context of developments based on other approaches and in other countries including middle- and low-income nations. The topics covered include measurement of inequality, poverty, and mobility; setting poverty thresholds and equivalence scales; data sources and their quality; empirical illustrations considering assessments of trends within countries, cross-national differences, and global poverty and inequality. The second half of the course broadens the perspective to consider a range of non-monetary, multidimensional, and subjective measures of welfare for individuals and societies. Examples include occupational and socio-economic status (SES), anthropometric measures, the Human Development Index and related indices of development, and measures of happiness and life satisfaction.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.
The course provides a reading week in Week 6 of Michaelmas and Lent Terms.
Indicative reading: Most of the reading for the course is in journal articles. Books providing overviews include Salverda W, Nolan B, Smeeding TM (eds) The Oxford Handbook on Economic Inequality (2009); and Atkinson A and Bourguignon F (eds) Handbook of Income Distribution Volume 2 (2015) and the earlier Volume 1 (2000). A full reading list is distributed at the beginning of the course.
Assessment: Exam (75%, duration: 3 hours, reading time: 10 minutes) in the main exam period.
Essay (25%, 2000 words) in the LT.

SO407
Politics and Society

This information is for the 2017/18 session.
Teacher responsible: Dr Robin Archer STC.S114a
Availability: This course is compulsory on the MSc in Political Sociology. This course is available on the MSc in Social Research Methods, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course aims to explore some of the great debates about the relationship between politics and society. It will examine the interaction between political institutions, economic interests and cultural ideas, especially in societies that are both democratic and capitalist. The course will explores some of the classic empirical and historical controversies that have animated political sociologists. Each week, we will discuss questions like: What gave rise to states and nations? Why are some social movements more successful than others? How does social change shape parties and elections? Do repressive states give rise to radicalism? Why are welfare states more developed in some countries than others? Why is there no Labor Party in the United States? Under what conditions does democracy develop? What explains the growth of populism? And has neo-liberalism become hegemonic? The course will also look at the canonical writings of of authors like Marx, Weber and Tocqueville, as well as critically explore the use of some political concepts. In addition, it will enable you to build up your knowledge of a number of countries and to assess the strengths and weaknesses of some of the main theories and approaches that have dominated the study of

political sociology. These include functionalist, rational choice, and institutionalist theories, as well as historical and comparative approaches.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.
Reading weeks: week 6 MT and week 6 LT. Seminars: Papers will be presented by participants and, on occasion, by guest speakers. In addition to the weekly seminar, there will be a number of additional seminars specifically concerned with research strategies in political sociology. If possible, students should attend the lecture course SO203 Political Sociology when available.
Formative coursework: Members of the seminar will be required to present a number of papers during the course of the seminar. There will also be a termly essay in MT and LT.
Indicative reading: B. Anderson. Imagined Communities; R. Archer, Why is There No Labour Party in the United States?; M. McQuarrie et al, Democratizing Inequalities; P Evans et al, Bringing the State Back In; S M Lipset, 'The Social Requisites of Democracy Revisited', American Sociological Review, vol 59; S Lukes, Power: A Radical View; D McAdam, Comparative Perspectives on Social Movements; M Mann, The Sources of Social Power; M Olson, The Logic of Collective Action; T Skocpol, Protecting Soldiers and Mothers; C. Tilly, Coercion,Capital and European States; L. Weiss, The Myth of the Powerless State.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (30%, 3000 words) in the ST.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars and submission of all set coursework is required.

SO424
Approaches to Human Rights

This information is for the 2017/18 session.
Teacher responsible: Prof Chetan Bhatt STC.S107 and Dr Ayca Cubukcu STC.S113
Availability: This course is compulsory on the MSc in Human Rights. This course is available on the MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights who wish to take this as an option. Priority is given to postgraduate students in the Sociology Department and those registered on the LLM. The course is also available as an outside option for other MSc degrees where regulations and numbers permit. Students from other programmes who wish to apply for a place on SO424 must complete the online application form on LSEforYou stating reasons for wishing to take the course.
Course content: This is a multi-disciplinary course that provides students with a rigorous and focused engagement with different disciplinary perspectives on the subject of human rights including philosophy, sociology and international law. It provides students with contending interpretations of human rights as an idea and practice from the different standpoints that the disciplines present and investigates the particular knowledge claims and modes of reasoning that the respective disciplines engage. The course applies the insights of international law, philosophy and sociology to understand key human rights issues such as universality, the right to life, free speech, humanitarian intervention, war, genocide, human rights activism, globalization, and states of emergency.
Teaching: 10 hours of lectures and 18 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. 2 hours of seminars in the ST
Reading weeks: week 6 MT and week 6 LT.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.
Active participation in the workshops is expected and students will be asked to make a presentation to their group.
Indicative reading: Indicative reading: No one book covers the entire syllabus and students are expected to read widely from more general texts on human rights, to more specific texts outlining the debates on human rights from a particular disciplinary perspective. Introductory reading: Jack Donnelly, Universal Human Rights in Theory and Practice; Michael Freeman, Human Rights; Philip Alston and Ryan Goodman, International Human Rights (2013). Philosophy: P. Jones, Rights, (1994); A. Swift, Political Philosophy: A Beginners' Guide for Students and Politicians, (2006). International Law: A. Cassese, International Law, 2nd ed. (2005), chapter 19; P. Sieghart, The Lawful Rights of Mankind (1985), S.Greer, The European Convention on Human Rights - Achievements, Problems and Prospects, Cambridge University Press, 2007.
Sociology: L. Morris, Rights: Sociological Perspectives (2006); B. Turner, Vulnerability and Human Rights (2006); A. Woodiwiss, Human Rights (2005).
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Essay (30%, 3000 words) in the ST.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, STC S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO425
Regulation, Risk and Economic Life

This information is for the 2017/18 session.
Teacher responsible: Dr Leon Wansleben STC S208 and Prof Bridget Hutter STC S217
Availability: This course is compulsory on the MSc in Economy, Risk and Society . This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Accounting, MSc in Culture and Society, MSc in Environmental Policy and Regulation, MSc in Political Sociology, MSc in Regulation, MSc in Risk and Finance, MSc in Sociology, MSc in Sociology (Research) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course introduces students to sociological perspectives on economic life and risk regulation in advanced industrial societies. Topics include economic sociology, state risk regulation including regulatory variations, enforcement and business responses, economic and civil society sources of regulation, organizational risk management, science, experts and risk regulation, globalization, and trends in risk regulation. The course will draw upon a broad international literature on social and economic regulation and case studies from the environmental, financial and public health domains.
Teaching: 25 hours of seminars in the MT. 25 hours of seminars in the LT. 5 hours of seminars in the ST.
Reading weeks: week 6 MT and week 6 LT.
Indicative reading: Aspers, P & Dodd, N (eds) (2015) Re-Imagining Economic Sociology (Oxford University Press); Beck, U. (1999) World Risk Society. Cambridge: Polity; Beckert, J (2002) Beyond the Market: the Social Foundations of Economic Efficiency Princeton University Press; Bernstein, P L (1996) Against the Gods: The Remarkable Story of Risk (Princeton University Press); Dodd, N (2014) The Social Life of Money (Princeton University Press); Hutter, B.M.. (ed) (2010) Anticipating Risks and Organizing Risk Regulation, Cambridge University Press; Smesler, N. & Swedberg, R. (eds) (2005) The Handbook of Economic Sociology; Swedberg,

R. (2003) Principles of Economic Sociology Princeton University Press.
Assessment: Exam (70%, duration: 3 hours) in the main exam period.
Project (30%, 3000 words) in the ST.
Two hard copies of the assessed project, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars and submission of all set coursework is required.

SO426 Half Unit
Classical Social Thought

This information is for the 2017/18 session.
Teacher responsible: Dr Rebecca Elliott - STC S211
Availability: This course is available on the MSc in Culture and Society, MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: A review of classical social theory. The origins and development of classical sociological theory; exploring the work of Marx, Weber, Simmel and Durkheim through a close reading and interpretation of primary tests. It is not assumed that students have a basic grounding in classical social theory, although it is expected that students who register for this course will be prepared to develop their understanding through primary readings, and not rely on textbooks.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
Reading week: week 6 (MT)
Formative coursework: 1000-word formative memo, due in Week 6 of MT.
Indicative reading: Relevant books that provide an overview include: A Callinicos, Social Theory; N Dodd, Social Theory and Modernity; A Giddens, Capitalism and Modern Social Theory; G Ritzer, Sociological Theory. The reading list for each seminar will be divided up into essential and additional reading. Students will be asked to read between 50 and 100 pages of primary text per week. The following is a sample list of readings: Marx, K: The Communist Manifesto & Capital (sections of vols 1 & 3); Weber, M: The Protestant Ethic and the Spirit of Capitalism & 'Science as a Vocation'; Simmel, G: The Philosophy of Money (various sections) & various essays such as 'The Metropolis and Mental Life', 'The Stranger', etc.; Durkheim, E: The Division of Labour in Society & The Elementary Forms of the Religious Life (various sections from each).
Assessment: Essay (90%, 3000 words) in the LT.
Other (10%).
The other assessment will be a summative seminar plan and presentation, in pairs, due throughout MT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all seminars and submission of all set coursework is required.

SO427 Half Unit
Modern Social Thought

This information is for the 2017/18 session.
Teacher responsible: Prof Nigel Dodd STC S106
Availability: This course is available on the MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: Contemporary social theory. An introduction to the historical background, context and output of Walter Benjamin, Theodor Adorno, Michel Foucault, and Jean Baudrillard, and a close reading and study of some of their most significant texts.
Teaching: 20 hours of seminars in the LT.
Reading week: week 6 (LT)
Formative coursework: One formative essay in LT
Indicative reading: The following is merely a sample list of some of the texts to be covered: Benjamin, W: 'Theses on the philosophy of history' & The Arcades Project (Section N); Adorno, T: 'Theses against Occultism' & Negative Dialectics (various sections); Foucault, M: The History of Madness & The Order of Things (various sections); Baudrillard, J: Symbolic Exchange and Death (mainly chapter 5) & The Spirit of Terrorism. A number of secondary readings will be recommended, but students will be strongly discouraged from relying on these.
Assessment: Essay (100%, 5000 words) in the ST.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO430 Half Unit Not available in 2017/18
Economic Sociology

This information is for the 2017/18 session.
Teacher responsible: Teacher TBC
Availability: This course is available on the MSc in Economy, Risk and Society , MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course offers a general introduction to the theoretical foundations of economic sociology, providing an opportunity to understand how sociologists engage with the study of complex socioeconomic issues.
Topics covered in the course include: critical approaches to economy and society; economic rationality; the sociology of economics; social capital; new economic sociology; economic conventions; changing forms of production and work; new economies; economic identities and divisions; markets and values.
Teaching: 10 hours of lectures and 20 hours of seminars in the LT.
Formative coursework: A project overview due in week 7 of LT. Individual feedback sessions in office hours provided to check student project development.
Indicative reading: Recommended general texts: M Granovetter & R Swedberg (Eds), The Sociology of Economic Life; D Slater & F Tonkiss, Market Society: Markets and Modern Social Theory; N Smelser & R Swedberg (Eds), The Handbook of Economic Sociology; P Edwards & J Wajcman, The Politics of Working Life; V Nee & R Swedberg (Eds), The Economic Sociology of Capitalism. A detailed reading list will be provided at the beginning of the course.
Assessment: Project (100%, 4000 words) in the ST.
Two hard copies of the assessed project, with submission sheets attached to each, to be handed in to the Administration Office, S200, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all workshop sessions and submission of all set coursework is required.

SO434
Cultural Theory and Cultural Forms

This information is for the 2017/18 session.
Teacher responsible: Dr Donald Slater STC S310
Availability: This course is compulsory on the MSc in Culture and Society. This course is available as an outside option to students on other programmes where regulations permit.
Course content: Cultural Theory and Cultural Forms is the core course for the MSc Culture and Society. The aim is to introduce you to a wide range of approaches, debates and issues that loom large in the study of cultural behaviour. By the end of this course you should feel you have a reasonable map of different aspects and approaches to researching cultural processes; and you should feel able to formulate your own research questions and strategies within the diverse traditions of the culture theory and cultural research.
In Term 1 we introduce the diverse approaches to cultural theory and the central debates that have structured the field, with particular attention to the ways in which these link to central sociological themes. The second focuses on understanding the production and consumption of culture, and on connecting cultural theory to empirical research.
Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. Reading weeks: week 6 (MT) and week 6 (LT)
Formative coursework: All students are expected to submit one piece of non-assessed written work per term and prepare seminar presentations.
Indicative reading: Becker, Howard S. 1982. Art Worlds. Berkeley: University of California Press. Bourdieu, P. 1984. Distinction: A Social Critique of the Judgment of Taste. London: Routledge. Butler, J (1998) Merely Cultural. New Left Review. Hall, S. (1992) `New Ethnicities' in Donald, J and Rattansi, A (eds.) (1992) "Race", Culture, Difference, London: Routledge. Hoggart, R.. 1998 [1957]. The Uses of Literacy. New Brunswick: Transaction Publishers. McGuigan, J. (2010) Cultural Analysis. London: Sage. McRobbie, A. (2005) The Uses of Cultural Studies. London: Sage. Oswell, D. (2006) Culture and Society. London: Sage. Walton, D. (2012) Doing Cultural Theory. London: Sage
Assessment: Essay (50%, 5000 words) in the LT.
Essay (50%, 5000 words) in the ST.
Two hard copies of each assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first essay is due by the second Thursday of Lent Term and the second essay is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each essay is due.
Attendance at all seminars and submission of all set coursework is required.

SO448
City Design: Research Studio

This information is for the 2017/18 session.
Teacher responsible: Dr Suzanne Hall STC.S212
Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.
Course content: The City Design Research Studio is the central unit of the MSc programme, linking the critical issues raised in the core and optional lecture courses, including questions of power and social justice, with the practical analysis of issues of city design and proposals for urban intervention. This course promotes a practical understanding of the city as a social and built environment. Through a mixed-methods engagement with site-based issues, the research studio explores the different ways city design relates to policy formation, planning processes, legal frameworks, financing mechanisms, local forms of organisation and the emerging needs of complex urban societies. It will provide students with an appreciation of the complexities of urban design and development processes, and with interdisciplinary tools for addressing specific urban challenges. The course addresses design as both informed and imaginative modes of research and practice that shapes urban environments, responds to urban problems, and connects visual, social and material dimensions of the city. It aims to integrate the physical, economic, social and political aspects of urban contexts, and develop ways to analyse these visually, textually and verbally. The studio-based approach to learning is an immersion in site-based research and experimental, strategic and pragmatic forms of design intervention. The course comprises of group based fieldwork in a London site, followed by an international fieldtrip.
Teaching: The Studio course runs for one full day each teaching week in MT and LT through lectures, workshops and regular small-group tutorials; additional specialist seminars and workshops are scheduled throughout the Studio course. Studio groups are expected to work together during the scheduled Studio hours, and prepare collectively for regular workshops and tutorials. In MT, the Studio course focuses on methods and approaches of social and spatial research and analysis. In the first four weeks of LT, Studio groups work intensively on a detailed analysis of a specific urban context, and develop a practical proposal for intervention in that site. The last six weeks of LT comprise of an international field trip, and individual work on a related written assignment.
Formative coursework: Group presentations for faculty and guest critics. 1 x research presentation and site analysis. (MT)
Assessment: Other (50%), other (25%) and other (25%).
The assessment consists of:
One Studio group submission (6000 words, 50%)
Individual tutor assessment based on contribution to Studio group work (25%)
Individual field trip assignment (3000 words, 25%)
Two copies of the Studio group submission, with submission sheets attached to each, to be submitted to the Administration Office, STC S116, no later than 16:30 on the fifth Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Two hard copies of the individual field trip assignment, with submission sheets attached to each, to be submitted to the Administration Office, STC S116, no later than 16:30 on the eleventh Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO449
Independent Project

This information is for the 2017/18 session.
Teacher responsible: Dr Suzanne Hall STC.S212
Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.
Course content: The independent project enables students to develop an original and extended piece of work on any approved topic within the field of the MSc programme - students are encouraged, but not required, to develop work on themes or sites introduced in their Studio or core courses. The project may focus on a small-scale urban research study or on a practical proposal for urban intervention. Approval for the topic must be obtained from your academic advisor.
Teaching: In LT students attend a project workshop and then submit a provisional project abstract; academic advisors for the independent project are assigned on the basis of the abstract.
In ST, each student has regular supervisory meetings with their academic advisor, and one day of final group reviews with members of faculty. Students are also encouraged to consult with other members of faculty during regular office hours.
Formative coursework: Students are required to submit one project abstract, and to produce regular formative project work in consultation with their academic advisor.

Assessment: Project (100%, 10000 words) post-summer term.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on the 22nd of August if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO451 Half Unit
Cities by Design

This information is for the 2017/18 session.
Teacher responsible: Dr Suzanne Hall STC.S212
Availability: This course is available on the MSc in City Design and Social Science, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
SO451 is a capped course and we can only accept 32 students. If you are not registered on the MSc City Design and Social Design please submit an e-mail to Suzanne Hall motivating your inclusion on the course, ONCE you have attended the first introductory lecture where we will be available to respond to individual questions.
Course content: The course examines the relationship between built form and its political, social and cultural relations in contemporary urban landscapes. By introducing students to established and emerging approaches to design, the course investigates how the design of our complex urban environments shapes and is shaped by the people who live in them, and the urgencies of time and place. The course focuses on current urban research across diverse urban contexts and attempts to reconcile the often complex inter-connections between urban theory, research, policy and practice. A range of contemporary cities form the base for the course, and these are explored through urban design milieu and architectures including: design as ideology, design as observation, and the architectures of infrastructure, evidence and insurgency.
Teaching: 10 hours of lectures and 20 hours of seminars in the MT.
Reading week: week 6
Formative coursework: Students will be expected to produce 1 essay in the MT.
Written feedback is given within two weeks of the essay submission, and in addition a writing seminar is incorporated in the course in preparation for the summative assessed essay.
Indicative reading: A detailed reading list will be distributed at the beginning of the course. We simultaneously engage with literatures by architects (as a broadly defined practice) and a range of social scientists. These include architects exploring new modes of practice and research, for example: Bremner, Burdett, Davis, Easterling, Hall, Hernandez, Lokko, King, Kurgan, Mehrotra and Weizmann, as well as social scientists exploring design and city space, for example: Datta, Hayden, Holston, Jacobs, Madden, Roy, Sennett, Scott, Simone, and Tonkiss.
Assessment: Essay (75%, 5000 words) in the LT.
Presentation (25%) in the MT.
An illustrated course essay of not more than 5,000 words to be submitted by 4pm on the first Tuesday of LT. Two hard copies of the assessed essay, with submission sheets attached to all copies, to be handed in to the Administration Office, S116. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.Attendance at seminars and submission of all set coursework is required.

SO454 Half Unit
Families and Inequalities

This information is for the 2017/18 session.
Teacher responsible: Dr Ursula Henz STC S100B
Availability: This course is available on the MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course provides an introduction into selected issues of family sociology, focusing on families in contemporary Western societies. It explores inequalities within and between families and the role of families in reproducing social inequality. Major themes include: childhood; adolescence, partnership formation and dissolution, parenthood; gender roles and the division of paid and unpaid work; intergenerational transfers.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT.
Reading week: week 6.
Formative coursework: Essay (1,500 words) in the LT.
Indicative reading: A detailed reading list will be provided at the beginning of the course. General reading: J Treas, J Scott, M Richards (eds.) (2014) The Wiley Blackwell Companion to The Sociology of Families, Chichester, West Sussex: Wiley Blackwell. Selected recommended books: S Arber & C Attias-Donfut (2000) The Myth of Generational Conflict. The Family and State in Ageing Societies. London and New York: Routledge; B Fox (2009) When Couples Become Parents. The Creation of Gender in the Transition to Parenthood. Toronto: University of Toronto Press; A Hochschild, Arlie (2012) The Second Shift. Working Parents and the Revolution at Home. New York: Penguin; A Lareau (2011) Unequal Childhoods. Class, Race and Family Life. University of California Press: Berkeley, Los Angeles, London.
Assessment: Essay (100%, 5000 words) in the LT.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all seminars and submission of all set coursework is required.

SO457 Half Unit Not available in 2017/18
Political Reconciliation

This information is for the 2017/18 session.
Teacher responsible: Dr Claire Moon STC S109
Availability: This course is available on the MSc in Human Rights, MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped.
Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-communist Europe, Australia and the US. Topics include transitional justice as a field of practice and a field of knowledge; historical injustice - apologies and reparations; state crimes; retributive and restorative justice; perpetration; theology and therapy in reconciliation; memory and atrocity.The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and the political subjects of reconciliation discourse. It is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy amongst others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
Reading week: week 6

Formative coursework: One formative essay to be returned in week seven of the MT (does not contribute towards the overall mark for the course).
Indicative reading: Hannah Arendt, Eichmann in Jerusalem: A Report on the Banality of Evil (Penguin Books, 1977); Penny Green and Tony Ward, State Crime: Governments, Violence and Corruption (London: Pluto Press, 2004); Priscilla Hayner, Unspeakable Truths: Confronting State Terror and Atrocity (Routledge, 2001); Michael Humphrey, The Politics of Atrocity and Reconciliation: From Terror to Trauma (Routledge, 2002); Karl Jaspers, The Question of German Guilt (Capricorn Books, 1961); Neil Kritz, Transitional Justice: How Emerging Democracies Reckon with Former Regimes (US Institute of Peace, 1995); Claire Moon, Narrating Political Reconciliation: South Africa's Truth and Reconciliation Commission (Lexington, 2008); Judith Shklar, Legalism: Law, Morals, and Political Trials (Harvard University Press, 1986); Nicholas Tavuchis & Mea Culpa, A Sociology of Apology and Reconciliation (Stanford University Press, 1991); Richard Wilson, The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State (Cambridge University Press, 2001).
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Essay (30%, 3000 words) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to Sara Ulfsparre, Centre for the Study of Human Rights,TW3.8.02, no later than 16:30 on the first Wednesday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars, completion of set readings and submission of set coursework is required.

SO458 Half Unit Not available in 2017/18
Gender and Societies

This information is for the 2017/18 session.
Teacher responsible: Dr Suki Ali STC S102
Availability: This course is available on the MSc in Gender, Policy and Inequalities, MSc in Political Sociology, MSc in Social Research Methods, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: The course introduces theoretical debates and contemporary issues in the sociological study of gender. Topics include femininities/masculinities; sexualities; nation and family; work; education; violence; transnational feminism; politics, representation. NB topics may change slightly from year to year.
Teaching: 30 hours of seminars in the MT.
Reading week: week 6
Indicative reading: Narayan, U and Harding, S Decentering the centre: philosophy for a multicultural, postcolonial and feminist world Bloomington:Indiana University Press 2000; Butler, J Gender Trouble London and New York: Routledge 1992 and Bodies that Matter London and New York: Routledge1993 Marshall, B and Witz, A (eds) Engendering the Social: Feminist Encounters with Sociological Theory. Buckingham: Open University Press. 2004; Ahmed, S Differences That Matter: Feminist Theory and Postmodernism. Cambridge: Cambridge University Press 1999; Nicholoson, L (ed.) The Second Wave: A Reader in Feminist Theory. London and New York: Routledge 1997;. Abelove, et al, The Lesbian and Gay Studies Reader, Routledge, 1993; J Alexander & C T Mohanty, Feminist Genealogies, Colonial Legacies, Democratic Futures, New York, Routledge, 1997; Edwards and Wajcman The Politics of Working Life, Oxford: Oxford University Press 2005. A more detailed reading list will be provided at the beginning of the course.
Assessment: Essay (100%, 5000 words) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all seminars and submission of all set coursework is required.

SO465 Half Unit
City-Making: the Politics of Urban Form

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Rode TW2 8.01K and Dr Savvas Verdis TW2.8.01.D
Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Sociology (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This case study-led course provides a critical understanding of major urban development initiatives and programmes in international city contexts. It is designed for students with a particular interest in urban development practices and how these connect with broader political debates. It will introduce students to the following knowledge and skills:
- general understanding of political theories underlying urban development models
- ability to situate major urban development initiatives within different development cultures and socio-economic policy agendas
- understanding the role of public, private and third party actors and formal and informal urban development processes
- perspectives on decision making at the strategic, pre-design stage for urban development initiatives and ability to relate urban policy to spatial outcomes, operating at different scales
- knowledge of key evaluation approaches and analytic frameworks used in the analysis of proposed and existing urban developments
- understanding of how urban development objectives, phases and processes can be integrated and how policy making, economic development, urban planning, city design, architecture, and engineering are related.

The course content is based on contemporary projects and urban trends examined in the context of cities throughout the world. These range from policies such as congestion charging (London) and Progressive City Development (Medellin) to urban development trends such as extreme urbanism in Mumbai and privatist planning (Canary Wharf, London and Santa Fe, Mexico City). Such projects will be examined through critical frameworks that include utilitarianism, cost benefit analysis, social and environmental justice, citizenship theory and the capabilities approach. The course will focus on negotiation, politics, financing, appraisals and decision-making for cities by inviting practitioners, experts and policy makers to join individual sessions for presentations and debate. Seminars and assessed project work for the course will be based on the analysis of Development Strategies and City Design briefs.
Further information on the course can be found on: www.citymaking.com
Teaching: 10 hours of lectures and 20 hours of seminars in the LT.
Reading week: week 6.
Formative coursework: 1 x contribution to student debate OR 1 x critical statement following a guest lecture AND submission of a 1,000 word position statement.
Indicative reading: Fainstein, Susan S. (1999). Can we make Cities we want? In The Urban Moment, ed. Sophie Body-Gendrot and Robert Beauregard. Thousand Oaks: Sage. Kymlicka, Will. (2002). Assessment: Project (100%, 5000 words) in the ST.
Two hard copies of the project, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO46 Half Unit
International Migration and Migrant Integration

This information is for the 2017/18 session.
Teacher responsible: Dr Patrick Mcgovern STC.S313
Availability: This course is available on the MSc in International Migration and Public Policy, MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Coverage of contemporary sociological perspectives on migrant integration including theories of international migration, immigration policy, labour market incorporation; welfare and social rights; 'assimilation' and social integration; multiculturalism; religion and ethnicity; and the second generation.
Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.
Reading week: week 6.
Formative coursework: All students are expected to write two non-assessed pieces of work during the term.
Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: S. Castles and M. J. Miller (2013) The Age of Migration (5th edn); P. Kvisto and T. Faist (2010) Beyond A Border and A. Portes (2014) Immigrant America (4th edn). A more comprehensive bibliography will be available to students taking this course.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
Exam will be held during the Summer Term exam session.

SO469 Half Unit
Risk and Governance: A Sociological Approach

This information is for the 2017/18 session.
Teacher responsible: Prof Bridget Hutter STC.S102
Availability: This course is available on the MPA in European Policy-Making, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Accounting, Organisations and Institutions, MSc in Culture and Society, MSc in Economy, Risk and Society , MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Political Sociology, MSc in Regulation, MSc in Risk and Finance, MSc in Sociology, MSc in Sociology (Research) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course aims to give students an advanced understanding of the various ways in which risk is governed in modern societies and an appreciation of the complexities of different levels of risk governance.
It will consider three main areas. First, state based risk governance regimes; second, risk governance beyond the state; and third transnational risk governance. The topics under consideration include a critical discussion of what is regarded as risk evidence and the role of experts in policy making; how state regulators incorporate risk based approaches into their governance regimes; the role of insurance companies and other business organizations in risk governance; the role of the public; and attempts to governance risks which traverse national borders. The course will draw on examples from a variety of domains including the environment, finance, biotechnology and food.
Teaching: 25 hours of seminars in the MT.
Reading week: week 6.
Formative coursework: Students should hand in one 2,000 word formative essay.
Indicative reading: Cashore, Ben. 2002. Legitimacy and the Privatization of Environmental Governance: How Non-State Market-Driven (NSMD) Governance Systems Gain Rule-Making Authority. Governance 15(4), 503-529; Ericson, R.V., Doyle, A. and Barry, D. (2003) Insurance as Governance University of Toronto Press. Hood, C., Rothstein, H. and Baldwin, R. (2001) The Government of Risk. Oxford: Oxford University Press. Hutter, BM (2010) (ed) Anticipating Risk Cambridge University Press. Renn, O. (2008) Risk Governance. London (Earthscan) Chapters 1 and 9.
Assessment: Essay (100%, 5000 words) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO470 Half Unit
The Sociology of Markets

This information is for the 2017/18 session.
Teacher responsible: Dr Leon Wansleben STC S208
Availability: This course is available on the MSc in Economy, Risk and Society , MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Economic Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course offers an introduction to the sociology of markets. We will look at this topic from two different sides: On the one hand, we will explore different theoretical issues in economic sociology, such as market structure, valuation, and the role of the state. Here, the underlying question is what sociology can contribute to a theoretical understanding of markets. On the other hand, we will explore particular case studies, such as illegal markets or markets for fine art; students will get the chance to study one of these cases in-depth. By the end of the course, students will be versed in the sociological and larger debates about markets, and they will be equipped to contribute to these debate with small, innovative case studies.
Teaching: 10 hours of lectures and 15 hours of seminars in the LT.
Reading week: week 6.
Formative coursework: A 1500 word essay is required.
Indicative reading: Recommended texts: Callon, Michel. 1998.

The laws of the markets. Blackwell Publishers: Oxford; Fligstein, Neil. 2001. The Architecture of Markets. An Economic Sociology of Twenty-First-Century Capitalist Societies. Princeton, NJ a.o.: Princeton University Press; Granovetter, Mark. 1995[1974]. Getting a Job: a Study of Contacts and Careers. Chicago; London: Chicago University Press; Krippner, Greta R. 2002. "The elusive market: Embeddedness and the paradigm of economic sociology." Theory and Society 30:775-810; Swedberg, Richard. 2003. Principles of Economic Sociology. Princeton, N.J.: Princeton University Press.
Assessment: Essay (100%, 5000 words) in the ST.
Assessment will consist of an essay analysis of two case studies along with the submission of a portfolio (100%).
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Attendance at all workshop sessions and submission of all set coursework is required.

SO471 Half Unit Not available in 2017/18
Technology, Power and Culture

This information is for the 2017/18 session.
Teacher responsible: Prof Judy Wajcman STC S203
Availability: This course is available on the MSc in Culture and Society, MSc in Media and Communications (Data and Society), MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Contemporary Social Thought). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including the environment, the internet, robotics, sex, and weapons.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Hackett, E. et al (2008) The Handbook of Science and Technology Studies (MIT Press). MacKenzie, D. and Wajcman J. (1999) The Social Shaping of Technology (MIT Press). Suchman, L. (2007) Human-Machine Configurations (CUP). Turkle, S. (2011) Alone Together (Basic Books). Wajcman, J. (2004) TechnoFeminism (Polity Press). Morozov, E. (2013) To Save Everything, Click Here: Technology, Solutionism and the Urge to Fix Problems That Don't Exist (Allen Lane)
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

SO473 Half Unit
Crime, Control and the City

This information is for the 2017/18 session.
Teacher responsible: Dr Janet Foster
Availability: This course is available on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies, MSc in Social Research Methods, MSc in Sociology and MSc in Sociology (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This half unit course examines crime and disorder in city landscapes, the relationship between crime, space and place, and the complex mix of informal and formal social controls that influence different types and levels of crime. Drawing on a range of comparative literature from different cities, and using a mixture of classic and contemporary texts, we examine the importance of informal social control in maintaining social order in cities, the role of policing, and what happens when formal and informal social controls fail using the riots, gangs and homicide as examples. We also explore the principles of crime prevention – both physical and social – and use public housing as a case study to critically examine the relationship between crime and design.
Teaching: 20 hours of seminars in the LT.
Reading week: week 6.
Indicative reading: Body-Gendrot (2012) Globalization, Fear and Insecurity (Palgrave Macmillan); Bottoms, A (2012) 'Developing socio-spatial criminology' in Maguire M et al (eds.) The Oxford Handbook of Criminology (5th edn.); Cochrane, A and Talbot, D (eds.) (2008) Security: Welfare, Crime and Society (Open University Press); Evans, K (2011) Crime Prevention: a critical introduction (Sage); Felson, M and Boba, R. (2010) Crime and Everyday Life (Sage); Graham, P. & Clarke, J. (2001) 'Dangerous Places: Crime and the City' in Muncie, J. & McLaughlin, E. (eds.) The Problem of Crime 2nd ed. (Sage); Le Gates R & Stout F (2011) The City Reader (Routledge); Mooney, G and Neal, S (eds.) (2009) Community: Welfare, Crime and Society (Open University Press); Pile, S. et al. (eds.) (1999) Unruly Cities (Routledge); Pitts, J (2008) Reluctant Gangsters: the changing face of youth crime (Willan); Wacquant, L (2008) Urban Outcasts: A Comparative Sociology of Advanced Marginality (Polity Press); Zukin, S (2010) Naked City: The Death and Life of Authentic Urban Places (Oxford University Press)
Assessment: Essay (100%, 5000 words) in the ST.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO475 Half Unit
Material Culture and Design

This information is for the 2017/18 session.
Teacher responsible: Dr Donald Slater STC S310
Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy, Risk and Society , MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course focuses on designed entities in everyday life, looking at the ways in which materials are configured into things, practices, spaces and forms, and at the assemblage of objects across production, design, consumption and use. Though aiming to produce expertise in specifically social science research, the course will bring together literatures and debates that cross the social sciences, humanities and science/technology, drawing particularly on actor-network theory, material culture studies, sociology of consumption, practice theory, urban and architectural studies, cultural theory and design studies. There will also be a strong emphasis on methodology: what tools are available to social scientists to investigate the emergent properties and impacts of designed objects. Case studies will be central to the teaching, developing theoretical and methodological strategies through a (changing) set of empirical cases that are likely to

include: digital objects (software, games); media objects; lights and lighting; fashion; domestic interiors.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT.
Reading week: week 6.
Formative coursework: One 2,500 essay applying a theoretical approach to a specific case study.
Indicative reading: Bijker, W. E. and J. Law (eds.) (1992) Shaping technology/building society: Studies in Sociotechnical change. Cambridge, MA: MIT Press. Frayling, C., E. King and H. Atkinson (2009) Design and popular entertainment. Manchester ; New York Lash, S. and C. Lury (2007) Global Culture Industry: the mediation of things. Cambridge: Polity Press. Latour, B. (2005) Reassembling the Social: An Introduction to Actor-Network-Theory. Oxford: Oxford University Press. Manovich, L. (2002) The language of new media. Cambridge, Mass. London: MIT. Miller, D. (2008) The Comfort of Things. Cambridge: Polity. Molotch, H. (2003) Where Stuff Comes From: How Toasters, Toilets, Cars, Computers and Many Other Things Come to Be as They Are. New York and London: Routledge. Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) The Design of Everyday Life. Oxford: Berg. Yaneva, A. (2009) The Making of a Building: A Pragmatist Approach to Architecture. Bern: Peter Lang.
Assessment: Essay (100%, 5000 words) in the LT.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO476
Researching Migration: research questions and research methods

This information is for the 2017/18 session.
Teacher responsible: Dr Patrick Mcgovern STC.S313
Availability: This course is compulsory on the MSc in International Migration and Public Policy. This course is not available as an outside option.
Course content: Having introduced the students to a range of possible research strategies, the students will be asked to prepare informal seminar presentations on their proposed research in the MT and LT. In addition, they will submit a one hundred word topic summary towards the end of the MT and a 400 word research proposal before the end of the LT. They will also prepare and deliver a formal presentation on their research for a workshop early in the ST. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to revise their research plans. A final proposal will be submitted after the ST workshop.
Teaching: Lectures 3 x 1 hour (3); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 12 hours
Formative coursework: Students will be expected to produce 3 presentations in the MT, LT and ST.
Indicative reading: Bryman, A. (2008) Social Research Methods, H62 B91; Gilbert, N. (ed.) (2008) Researching Social Life H62 R 43; Hancke, R. (2009) Intelligent Research Design: A Guide for Beginning Students in the Social Sciences, H62 H23; Landman, T. (2007) Issues and Methods in Comparative Politics, JF51 L25; Silverman, D. (2002) Doing Qualitative Research: A Practical Handbook H62 S58.
Assessment: This course is not assessed.

SO477 Half Unit
Urban Social Theory

This information is for the 2017/18 session.
Teacher responsible: Dr David Madden STC S209
Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in International Migration and Public Policy, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course is a comprehensive introduction to urban social theory. The class will focus on major concepts, paradigms, texts and thinkers in order to critically assess different ways of theorising the urban. It will analyse various forms of urban theory including political economy, human ecology, phenomenology, feminism and postcolonialism, which are used as lenses through which to understand a variety of topics, such as socio-spatial restructuring, neoliberalisation, public space, globalisation, technocracy, infrastructural politics, multiculture, cosmopolitanism, the right to the city and planetary urbanisation.
Teaching: 20 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
Indicative reading: Engels, Friedrich. 1887 [1872]. The Housing Question. London: Cooperative Publishing Society of Foreign Workers. Park, Robert E., Ernest W. Burgess and Roderick D. McKenzie. 1967 (1925). The City. Chicago: University of Chicago Press. Castells, Manuel. 1977. The Urban Question. Cambridge, MA: MIT Press. Lefebvre, Henri. 1991 [1974]. The Production of Space. "Theses on Urbanization." Public Culture 25 (1): 85-114.
Assessment: Essay (80%, 5000 words), other (10%) and class participation (10%) in the LT.
The other assessment consists of weekly memos (10%) submitted via Moodle the evening before each class session during the LT.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO478
Social Scientific Analysis of Inequalities

This information is for the 2017/18 session.
Teacher responsible: Prof Diane Perrons TW1, 11.01G
Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.
Course content: The course will consider interdisciplinary approaches to inequality, focusing on (a) how inequality can be conceptualised and explained, (b) how it can be measured and (c) ethical and political issues. Topics to be covered include patterns and trends in economic inequalities; gender, ethnicity, class and

age; cultural aspects of inequality; social and intergenerational mobility; global and comparative perspectives; geographical and neighbourhood polarisation; health and educational inequalities; media representation of inequalities; ethical and philosophical approaches; the impact of government, law and social policy.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of classes in the ST.
The course is taught in 20 x one-and-a-half hour lectures, plus 20 x one-and-a-half-hour seminars. It is divided into blocks of related lectures and linked seminars. The ST class is a revision class.
Formative coursework: Students will be expected to produce 1 essay in the MT and 1 mock exam in the LT.
Indicative reading: Anthony Atkinson - Inequality: What can be done? (Harvard University Press, 2015). David Grusky (ed) - Social Stratification; class, race and gender in sociological perspective, Westview. Branko Milanovic - Global Inequality: A New Approach for the Age of Globalization (2016). Hartley Dean and Lucinda Platt (eds), - Social Advantage and Disadvantage, Oxford, 2016
Assessment: Essay (30%, 3000 words) and presentation (20%) in the LT.
Take home exam (50%) in the ST.
The presentation will be from a group exercise in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the International Inequalities Institute administration TW1 8th floor, no later than 16:30 on the submission day. The essay is due by the first day of LT. An additional copy of the essay is to be uploaded to Moodle no later than 18:00 on the same day the essay is due.

SO479 Half Unit
Human Rights and Postcolonial Theory

This information is for the 2017/18 session.
Teacher responsible: Dr Ayca Cubukcu STC.S113
Availability: This course is available on the MSc in Culture and Society, MSc in Global Europe: Culture and Conflict, MSc in Global Europe: Culture and Conflict (LSE & Sciences Po), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology (Contemporary Social Thought). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Drawing on postcolonial theory and critique, this course explores how human rights and international law came to be institutionalized in the context of European colonialism, and what the contemporary implications of this historical fact may be today. Engaging with the fields of socio-legal studies, intellectual history and social theory, the course also asks why, and with what consequences, human rights tend to monopolize the political language through which many social movements throughout the world articulate their desires for social and global justice.
Teaching: 25 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading: Antony Anghie, Imperialism, Sovereignty, and the Making of International Law (Cambridge: Cambridge University Press, 2005). Hannah Arendt, Eichmann In Jerusalem: A Report on the Banality of Evil (New York: Penguin Books Edition). Talal Asad, On Suicide Bombing (New York: Columbia University Pres, 2007). Brett Bowden, The Empire of Civilization: The Evolution of an Imperial Idea (Chicago: University of Chicago Press, 2009). Partha Chatterjee, The Black Hole Of Empire: History of a Global Practice of Power (Princeton UP, 2012). David Harvey, Cosmopolitanism and the Geographies of Freedom (New York: Columbia University Press, 2009). David Kennedy, The Dark Sides of Virtue: Reassessing International Humanitarianism (Princeton: Princeton University Press, 2005). Sven Lindqvist, "Exterminate All the Brutes": One Man's Odyssey into the Heart of Darkness and the Origins of European Genocide (New York: The New Press, 1996). Karuna Mantena, Alibis of Empire: Henry Maine and the Ends of Liberal Imperialism (Princeton: Princeton University Press, 2010). Joseph Massad, Desiring Arabs (Chicago: University of Chicago Press, 2007). Mark Mazower, No Enchanted Palace: The End of Empire and the Ideological Origins of the United Nations (Princeton: Princeton University Press, 2009). Uday Mehta, Liberalism and Empire: A Study in Nineteenth Century British Liberal Thought (Chicago: University of Chicago Press, 1999).
Assessment: Essay (90%, 5000 words) in the ST.
Class participation (10%) in the LT.
Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, STC S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO480 Half Unit
Urban Inequalities

This information is for the 2017/18 session.
Teacher responsible: Prof Fran Tonkiss STC.S205
Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course offers a critical introduction to key issues and processes in the study of contemporary urban inequalities. Recent urban analysis has highlighted the growing share of the global population that now lives in cities; this course puts such growth in the context of another major urban trend: deepening patterns of inequality in many cities across the world. It examines the continuing role of 'older' bases of urban inequality - access to land and property, gender inequity, ethnic and racial discrimination, legal exclusion and informality – as well as significant emerging patterns, including extreme concentrations of wealth at the top, middle-class stagnation, privatisation and spatial secession, immigration and insecurity. It also examines the complex of ways in which urban inequality is experienced, not only in terms of income or property, but also in consumption inequalities, inequities in access to housing, transport, urban services and legal protections, spatial disparities and environmental risks and injustices. The course considers the range of social, economic, environmental and political factors that shape, and also might help to address, urban inequality in these different contexts.
The course will:
- provide a critical introduction to current and emerging patterns of urban inequality
- consider the production of urban inequalities through social, economic, political and spatial processes
- explore common themes and critical differences across cities in developed and developing economies
- address key debates in a range of urban disciplines, and situate these in specific urban contexts and examples

Key themes
- Urban growth and the growth of inequality
- Wealth, income and inequality
- Spatial injustice: segregation and access
- Environment and inequities
- Informality and insecurity
- Social inequality in the city: gender, race and legal exclusions
- Governing inequality

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
1 x 2000-word essay
Indicative reading:
- Beall, J. and Fox, S. (2009) Cities and Development. London: Routledge.

- Brenner, N., Marcuse, P. and Mayer, M. (eds) 2012) Cities for People, Not for Profit: critical urban theory and the right to the city. London: Routledge.

Assessment: Essay (100%, 5000 words) in the ST.
Two hard copies of the project, with submission sheets attached to each, to be submitted to the Administration Office, STC S116, no later than 16:30 on the first Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO481 Half Unit
Class, Politics and Culture

This information is for the 2017/18 session.
Teacher responsible: Dr Sam Friedman STC216
Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is not available as an outside option.
Course content: The course will begin by introducing traditional theories of social class and stratification before going on to examine the history and political significance of class in Britain, and how this compares with other countries throughout the world. It will then look at the place of class in a contemporary political context, critically examining the claim made by some 'postmodern' writers, and prominent politicians, that class boundaries have been irrevocably eroded. The course will then move on to look at the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people's cultural taste, with the privileged using their preferences for 'highbrow' culture as a means of expressing their superiority over the working classes, who tend to prefer more 'lowbrow' culture. We interrogate how these arguments relate today, where the lines between high and low culture are increasingly blurred, where strong cross-cultural differences persist between Europe and the U.S, and where new taste distinctions exist even in traditionally lowbrow art forms, such as comedy and pop music. We then take a more detailed look at class-based boundaries in taste and lifestyle. In particular, we focus on the way in which the middle classes demonise sections of the working class based on what they consider to be 'pathological' consumption choices – focusing in particular on the 'Chav' phenomenon in Britain. We go on to explore both the meaning and consequences of such overt class prejudice, both in Britain but also using research from the U.S, the Netherlands and other international contexts. Finally, the module will ask to what extent class boundaries are malleable? How easy is it for people to escape their backgrounds and move upward or downward in social space? This final section of the course thus looks at contemporary patterns of social mobility, examining the social benefits and challenges that mobility implies, increasing closure within global elites, and the rise of the middle classes in developing countries like China, Brazil and South Africa.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.
Reading week: week 6.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Alexander, P. (2013) Class in Soweto. Johannesburg: KZE Press. Bourdieu, P. (1984) Distinction: A Social Critique of the Judgment of Taste, Routledge: London. Crompton, R. (2008) Class and Stratification (Third Issue) Polity Press: Cambridge. Bennett, T., Savage, M., Silva, E., Warde, A., Gayo-Cal, M., Wright, D. (2009). Class, Culture, Distinction. London, Routledge. Skeggs, B. (2004) Class, Self, Culture, London and New York: Routledge. Bennett, T., Frow, J. and Emmison, M. (2005) The Moral Significance of Class, Cambridge: Cambridge University Press. Friedman, S. (2014) Comedy and Distinction: The Cultural Currency of a 'Good' Sense of Humour. Routledge. London. David Grusky (ed), Social Stratification: Class, Race and Gender in Sociological Perspective. Boulder, CO. Westview Press.
Assessment: Essay (100%, 5000 words) in the ST.
Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO482 Half Unit Not available in 2017/18
Topics in Race, Ethnicity and Postcolonial Studies

This information is for the 2017/18 session.
Teacher responsible: Dr Suki Ali STC S102
Availability: This course is compulsory on the MSc in Sociology (Research). This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course offers students a broad exposure to issues in the theory of race, racism and ethnicity as well as an opportunity to consider a range of contemporary instances in which the social and political problems arising from these factors of division have been manifested. It will offer a preliminary genealogy of race thinking connecting historical and theoretical work with new scholarly debates over multi-culture, diversity, genomics, postcolonialism, and human rights.
Teaching: 20 hours of seminars in the MT.
Reading week: week 6. Seminar length may be extended to three hours each depending on student numbers.
Formative coursework: Students have the option of writing a 3,000 word paper in preparation for the assessed essay.
Indicative reading: Appiah, Anthony (1996) Color conscious: the political morality of race, Princeton, N.J, Princeton University press; Ballhatchet, Kenneth (1980) Sex, Race and Class under the Raj, Weidenfeld and Nicolson; Barber, Butler, Judith P (2004) Precarious life: the powers of mourning and violence London, Verso; Cabral, Amilcar (2000) Return To The Source, Monthly Review;London, Hurst & Co; Eze, Emanuel Chukwudi (2001) Achieving our humanity: the idea of the postracial future, London, Routledge; Fanon, Frantz (1967) Toward The African Revolution, Grove; Fredrickson, George M (2002) Racism: a short history, Princeton,

N.J, Princeton University Press; Jones, Greta (1980) Social Darwinism and English Thought, Harvester; Hannaford, Ivan (1996) Race: the history of an idea in the West, Washington, D.C. Woodrow Wilson Center Press; Haraway, Donna (1997) Modest¿Witness@ Second¿Millennium, FemaleMan¿Meets¿OncoMouse: feminism and technoscience, New York, Routledge; London, Routledge; Kuhl, Stefan (1994) The Nazi connection: eugenics, American racism and German national socialism, New York, Oxford University Press (N. Y.); Lorimer, Doug (1978) Colour, Class and The Victorians, Leicester University Press; Mamdani, Mahmood (2004) Good Muslim, bad Muslim: America, the Cold War, and the roots of terror, 1st ed New York, Pantheon Books; Poliakov, Léon (1974) The Aryan myth: a history of racist and nationalist ideas in Europe, London, Chatto and Windus; Schiebinger, Londa (1994) Nature's body: sexual politics and the making of modern science, London, Pandora; Tapper, Melbourne (1999) In the blood: sickle cell anemia and the politics of race, Critical histories. Philadelphia, University of Pennsylvania Press;

Assessment: Essay (100%, 5000 words) in the LT.

Attendance at all seminars and submission of all set coursework is required.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of LentTerm. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO483 Half Unit
Social Change Organizations

This information is for the 2017/18 session.

Teacher responsible: Dr Michael McQuarrie STC.S217a

Availability: This course is available on the MSc in City Design and Social Science, MSc in Human Rights, MSc in Political Sociology, MSc in Sociology and MSc in Sociology (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The purpose of this class is to familiarise students with organisational sociology from the perspective of organisations other than firms or governments. Organisations are one of the primary tools society has for realising values and interests. However, organisations are not simply tools. They constrain and enable action for social change in a variety of ways and shape the outcomes of our efforts. Attempting to realise social change using organisations creates a set of dilemmas that must be managed and dealt with for efforts to be successful.

The course will focus on social movement organisations, NGOs, associations, cooperatives, communes, and the dilemmas that these organisations confront in attempting to realise their goal of a better society. The course will also familiarise students with the theoretical and analytical tools sociologists use to understand social change organisations.

Teaching: 20 hours of seminars in the LT.

The class format will be a combination of lectures, guest Q&A with leaders of social change organisations, and seminar discussion. Week 6 is a reading week.

Formative coursework: Formative coursework will consist of preparing and leading discussions, in-class analytical writing, and assignments meant to advance student work on the final essay.

Indicative reading: Katherine Chen, Enabling Creative Chaos. Monika Krause, The Good Project. Nina Eliasoph, Making Volunteers. James Ferguson, The Anti-Politics Machine. Timothy Mitchell, The Rule of Experts. David Graeber, The Democracy Project. Frances Fox Piven and Richard Cloward, Poor People's Movements. Charles Perrow, "A Society of Organizations". Elisabeth Clemens and Mary Bernstein, "The Multi-Institutional Perspective". V.I. Lenin "What is to be done?". Joreen, "The Tyranny of Structurelessness"

Assessment: Essay (100%, 4000 words) in the ST.

For their assessment students will complete an essay that does not exceed 4000 words in length. The essay will either be a review essay of the sociological literature on a topic related to social change organisations or an analysis of a social change organisation using the tools learned in the class.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO489 Half Unit
Family and Migration

This information is for the 2017/18 session.

Teacher responsible: Dr Ursula Henz STC.S100B

Availability: This course is available on the MSc in International Migration and Public Policy and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines the family life, family patterns and family relationships of contemporary migrant families in Great Britain and other societies. It applies three perspectives to migrant families: diversity, integration and transnationality. It examines variations in family life, patterns and relationships in migrant families; particular challenges that are associated with the migration of a family to a new country as well as transformations of family roles and intimacy in transnational families. After an overview over family forms in different cultures, the course explores selected substantive topics. Indicative topics are: migrant children and children left behind; marriage migration and transnational marriages; intermarriage and fertility as indicators of migrant integration; the roles of mother and father in immigrant and transnational families; migrant families and family care.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Kraler, Kofman, Kohli & Schmoll (eds.) (2011) Gender, Generations and the Family in International Migration; Baldassar & Baldock (2007) Families Caring Across Borders: Migration, Ageing and Transnational Caregiving. Beck & Beck-Gernsheim (2014): Distant Love; Ehrenreich & Hochschild (2004): Global Woman: Nannies, Maids, and Sex Workers in the New Economy; Dreby (2010): Divided by Borders. Mexican Migrants and Their Children; Foner (2009) Across Generations: Immigrant Families in America; Madianou & Miller (2011): Migration and New Media: Transnational Families and Polymedia; Parreñas (2005): Children of Global Migration;. Portes & Rumbaut (2001) Legacies: The Story of the Immigrant Second Generation

Assessment: Essay (80%, 4000 words) in the ST.

Class participation (20%).

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the Wednesday of Week 2 in ST. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO493
MSc in Culture and Society Dissertation

This information is for the 2017/18 session.

Teacher responsible: Dr Don Slater STC S310

Availability: This course is compulsory on the MSc in Culture and Society. This course is not available as an outside option.

Course content: This workshop will guide students through the process of conducting an independent dissertation project in the MSc Culture & Society.

Teaching: 1 hour and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.
There will be two workshops during MT for ALL MSc students based in the Sociology department. These will one taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.'
Indicative reading: This is a workshop and has no specific reading list.
Assessment: Dissertation (100%, 10000 words) in August.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on Thursday 16th of August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO494
MSc in Political Sociology Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Robin Archer STC.S114a
Availability: This course is compulsory on the MSc in Political Sociology. This course is not available as an outside option.
These seminars are for students on the MSc Political Sociology only.
Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have four seminars that aim to get students thinking at a meta-level about research in political sociology. The seminars can, of course, only address a small selection of approaches. Examples might include rational choice and institutionalist theories, or comparative and case study methods. But please note that the MSc in Political Sociology takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make a formal presentation once during the term.
Teaching: 6 hours of seminars in the MT. 15 hours of workshops in the LT.
4 x 1.5 hours seminars in MT. 10 x 1.5 hours workshops in LT.
There will be two workshops during MT for ALL MSc students based in the Sociology department. These will one taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.'
Formative coursework: Students will be expected to produce 1 presentation in the LT.
Students will: (1) assess the strengths and weakness of selected theories and methods; (2) formulate a clearly specified research question and set out the rationale for researching this question and a proposed approach; and (3) give a presentation which develops one or two of the main arguments they anticipate will be important to their project.
Indicative reading: Donatella Della Porta and Michael Keating (2008), Approaches and Methods in the Social Sciences: a Pluralist Approach, Thomas Janoski et al, (2005), The Handbook of Political Sociology, James Mahoney and Dietrich Rueschemeyer (2003), Comparative Historical Analysis in the Social Sciences.
Assessment: Dissertation (100%, 10000 words) post-summer term.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on Thursday 16th of August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system

SO495
MSc in Economy, Risk and Society Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Leon Wansleben STC S208
Availability: This course is compulsory on the MSc in Economy, Risk and Society . This course is not available as an outside option.
Pre-requisites: Risk, Regulation and Economic Life (SO425)
Course content: The dissertation is an extended piece of written work that that is your own independent research investigation of a human rights issue or problem, undertaken with the guidance of your dissertation supervisor. In the dissertation, you will critically appraise evidence, arguments and debates to reach a conclusion your research question. The key requirement is that the dissertation should demonstrate a high level of independent critical ability. You must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.
Teaching: 2 hours of seminars in the MT. 2 hours of seminars in the LT. 2 hours of seminars in the ST.
There will be one Introductory lecture in MT for all MSc Economy, Risk and Society students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an interdisciplinary programme. The LT and ST sessions will cover fieldwork and research ethics. Students will work in smaller groups, in which they present and discuss possible research questions and strategies, along with preparing the dissertation and timeline.
There will be two workshops during MT for ALL MSc students based in the Sociology department. These will one taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.
Formative coursework: Students are required to submit two pieces of work; one topic proposal during MT, and a formal abstract at end of LT.
Indicative reading:
- Alan Bryman, Social Research Methods (Oxford: Oxford University Press, 2004)
- Clive Seale, The Quality of Qualitative Research (London: Sage, 1999)
- Clive Seale (ed), Researching Society and Culture (London: Sage, 2012)
- Howard Becker, Writing for Social Scientists (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) post-summer term.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on Thursday 16th of August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO496
MSc in Human Rights Dissertation

This information is for the 2017/18 session.
Teacher responsible: Prof Chetan Bhatt STC.S107 and Dr Ayca Cubukcu STC.S113
The Programme Convenor is responsible for overseeing the Dissertation.
Availability: This course is compulsory on the MSc in Human Rights. This course is not available as an outside option.
This course is only available to MSc Human Rights students, and is a compulsory course for students on the programme.
Course content: The dissertation is an extended piece of written work that that is your own independent research investigation of a human rights issue or problem, undertaken with the guidance of your dissertation supervisor. In the dissertation, you will critically appraise evidence, arguments and debates to reach a conclusion your research question. The key requirement is that the dissertation should demonstrate a high level of independent critical ability. You must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.
Teaching: 2 hours of lectures in the MT. 3 hours of seminars in the LT. 2 hour of seminars in the ST
There will be one Introductory lecture in MT for all MSc Human Rights students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an inter-disciplinary programme. The Introductory session will also cover fieldwork and research ethics. This will be followed by 5 seminars/workshops in smaller groups, in which students present and discuss possible research questions and strategies, along with preparing dissertation proposal and timeline.
There will be two workshops during MT for ALL MSc students based in the Sociology department. These will one taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.'
Formative coursework: Students are required to submit a topic proposal at the end of MT and a fuller dissertation proposal at end of LT. During the seminars and in dissertation supervisions, students receive formative feedback on their ideas and research plans. The summative assessment is the submission of a completed dissertation in August.
Indicative reading: Alan Bryman, Social Research Methods (Oxford: Oxford University Press, 2004). Clive Seale, The Quality of Qualitative Research (London: Sage, 1999). Clive Seale (ed), Researching Society and Culture (London: Sage, 2012). Howard Becker, Writing for Social Scientists (Chicago: University of Chicago, 1986)
Assessment: Dissertation (100%, 10000 words) post-summer term.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, STC S116, no later than 16:00 on Thursday 16 August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO497
MSc in Inequalities and Social Science Dissertation

This information is for the 2017/18 session.
Teacher responsible: Prof Diane Perrons Tower 1, 11.01G
Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.
These seminars are for students on the MSc in Inequalities and Social Science only.
Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have seminars that aim to get students thinking at a meta-level about research on inequalities and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Inequalities and Social Science takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.
Teaching: 3 hours of seminars in the MT. 4 hours of seminars in the LT.
Formative coursework: A title, research proposal and annotated bibliography by the end of MT plus a presentation during the ST.
Indicative reading: Anand , S. (Ed) (2010) Debates on the Measurement of Global Poverty, Oxford: Oxford University Press. Atkinson, A.(2015), Inequality: what can be done?, Harvard UP. Back, Les and Solomos, John (2000), Theories of Race and Racism: A Reader, Routledge. Bourguignon, F. (2017) The Globalization of Inequality, Second Edition Pincton: Princeton University Press. Butler, Judith. [1990]2006. Gender Trouble: Feminism and the Subversion of Identity. New York: Routledge. Collins, Patricia Hill. 2000. Black Feminist Thought. 2nd Edition. Boston: Unwin Hyman. Grusky, David and Szelenyi S ed. 2011. The Inequality Reader: Contemporary and Foundational Readings in Race, Class, and Gender . Westview Press. McKenzie, L. (2015) Getting By , Bristol: Policy Press. Piketty, Thomas (2014), Capital in the 21st century, Harvard UP. Wright, Erik O. (2005) Approaches to Class Analysis, Cambridge UP
Assessment: Dissertation (100%, 10000 words) post-summer term.
Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the International Inequalities Institute office TW1 8.01F no later than 16:00 on Thursday 16th August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.
Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO499
MSc in Sociology Dissertation

This information is for the 2017/18 session.
Teacher responsible: Prof Nigel Dodd STC S106 and Dr Sam Friedman STC S216
Availability: This course is compulsory on the MSc in International Migration and Public Policy, MSc in Sociology, MSc in Sociology (Contemporary Social Thought) and MSc in Sociology (Research). This course is not available as an outside option.
Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Tutor.
Teaching: Dissertation Preparation
The candidate should confirm a working title and prepare a brief abstract for their intended dissertation (up to one A4 page, double-

spaced, including your name not your candidate number), which should be reviewed with their Academic Advisor no later than the Monday, week 8 of Lent Term. Along with the title and abstract the candidate and Academic Advisor should review and complete the Research Ethics Review Checklist by this same time. These abstracts are the basis for an MSc dissertation Workshop that is organised for each programme. Attendance at this workshop is optional but students are, of course, encouraged to attend.

Dissertation Particulars

The dissertation must be a report of a research project, whether it comprises primary empirical material, secondary empirical material or theoretical/exegetical work on a body of social thought: i.e. there must be an identifiable and clear research question governing the research project; there must be critical reflection on the methods used (including their limits and the reasons why they warrant the kinds of claims made); and substantive analysis of empirical or analytical material. Even where the topic is substantively a literature or policy-review exercise, candidates are expected to offer original reasoned argument and interpretation and to show evidence of a competence in research methods. Guidance on topic selection and methods will normally be provided by the candidate's tutor. The dissertation is primarily a reflection of the candidate's own work and so feedback will not be given on draft versions of the dissertation. The dissertation should reflect the candidate's own views.

There will be two workshops during MT for ALL MSc students based in the Sociology department. These will one taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Assessment: Dissertation (100%, 10000 words) post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on Thursday 16th of August 2018 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

SO4A1 Half Unit

Governing Cities in an Urban Age: Challenges and Opportunities

This information is for the 2017/18 session.

Teacher responsible: Prof Richard Burdett TW2 8.01J and Prof Antony Travers CON6.06

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Governing Cities in an Urban Age is an intensive introduction to global urbanisation and the state of cities. The course explores different stages of urban development in cities and regions across the world. It provides students with an understanding of the key challenges facing both mature and rapidly-developing metropolitan areas. It will locate the key challenges facing large cities, notably the persistent levels of social inequality, poverty, unsustainable resource use and constraints to economic efficiency. The course introduces the key tools for intervention such as planning, governance and management of land and infrastructure in response to critical pressures linked to economic development, globalisation, migration, social inclusion, climate change, resource efficiency, and resilience. The key purpose of the course will be to give participants a comprehensive framework for understanding the challenges which cities are facing today.

Topics include: global urbanisation, development and design, urban change, population growth, urban productivity, urban expansion, urban sprawl, densification, intensification, sociability, urban governance, urban institutions, budgets and responsibilities.

Teaching: 7 hours and 30 minutes of lectures, 15 hours of seminars and 7 hours and 30 minutes of workshops in the MT.

The course will be taught over a period of one week in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Submission of a 500 word non-assessed formative statement outlining the key political, environmental and socioeconomic challenges in the student's city that will shape the content of the 2,000 word assessed report.

Indicative reading: Angel, Shlomo (2011): Making Room for a Planet of Cities. Lincoln Institute of Land Policy. Barber, Benjamin R. (2013): If Mayors ruled the world: Dysfunctional Nations, Rising Cities. Yale University Press. Burdett, Ricky and Deyan Sudjic (2011): Living in the Endless City. Phaidon Press Ltd. London. Glaeser, E. (2011): Triumph of the City: How Our Greatest Invention Makes Us Richer, Smarter, Greener, Healthier, and Happier. Penguin Press. Travers, Tony (2004) The Politics of London Governing an Ungovernable City, Palgrave. Additional readings: Ackroyd, P. (2001) 'To Build A new' pp. 238-244, and 'Unreal City' pp. 771-76, in London: The Biography. London: Vintage. Fainstein, Susan, Gordon, Ian and Harloe, Michael (2011) Ups and downs in the global city: London and New York In the 21st century. In: Bridge, Gary and Watson, Sophie, (eds.) New Blackwell companion to the city. Wiley-Blackwell, Chichester, pp. 38-47. Gordon, I., Travers, T. (2010). "London: planning the ungovernable city" in City, culture and society, 1(2), pp. 49-55. Jacobs, Jane (1961): The death and life of great American cities. Random House.

Assessment: Essay (70%, 2000 words) and presentation (30%) in the MT.

A presentation and submission of a 2,000 word report in MT of how the student's city or organisation is dealing with some of the challenges and opportunities presented in the course.

SO4A2 Half Unit

Cities and Society: Design and Social Cohesion

This information is for the 2017/18 session.

Teacher responsible: Prof Richard Burdett 8.01J

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Cities and Society: Design and Social Cohesion looks at some of the major drivers of urban inequality and poverty and the key actions that cities are taking to reduce urban inequalities through urban design, infrastructure and policy. This is a heavily applied course providing students with tools to analyse the socio-demographic profile of households and neighbourhoods and their relation to spatial distribution and clustering in cities of the developing and developed world. Students are introduced to traditional measures of poverty and inequality such as income and wealth as well more recent multi-dimensional poverty measures such as health and education, and provided with analytical and mapping tools to identify areas of concentration of deprivation. A particular emphasis is placed on identifying spatial strategies that can alleviate the concentration of urban poverty and inequality by optimising access to jobs, housing, education, health, public space, transport and community infrastructure.

Cities and Society will also look at the macro-economic forces that are producing uneven regional and urban development and the key planning methods to reduce levels of inequality. These include spatially blind policies such as taxation and redistribution; spatially connective policies such as infrastructure links between high and low income neighbourhoods and finally spatially targeted policies where private and public investment is targeted at the most deprived urban areas.

Topics include: inequality and GINI coefficients; from income to multi-dimensional measures of poverty; the Human Development Index and its urban relevance; affordable housing, social infrastructure; equity planning (examples include London, Barcelona, Medellin and Bogota; the London model of urban regeneration; infrastructure and equity, health and well-being, migration.
Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.
The course will be taught over a period of three sessions.
Formative coursework: Students will be expected to produce 1 essay in the LT.
500 word submission identifying the social research methods used in the assessment of a policy or project of your choice
Indicative reading: Burdett, R and Sudjic, D (2011) Living in the Endless City. Dávila, Julio (2012): Urban Mobility and Poverty: Lessons from Medellin and Soacha, Colombia. Development Planning Unit, UCL and Universidad Nacional de Colombia. Davis, Mike (2007): Planet of Slums. Verso. Graham, S. and Marvin, S. (2001) Splintering Urbanism: networked infrastructures, technological mobilities and the urban condition London: Routledge. Denton (1993): American apartheid: segregation and the making of the underclass. Harvard University Press. Additional readings: Burdett,R and Sudjic, D (2008) The Endless City, London, Phaidon. Mitlin, Diana and David Satterthwaite (2013): Urban Poverty in the Global South: Scale and Nature. Routledge. Power, Anne (1987): Property before people: the management of twentieth-century council housing. Allen & Unwin. Saunders, Doug (2012): Arrival City: How the Largest Migration in History is Reshaping Our World. Vintage Books, a Division of Random House, Incorporated. Sennett, R (1991) The Conscience of the Eye: the design and social life of cities, London, Faber and Faber.
Assessment: Essay (70%, 2000 words) and presentation (30%) in the MT.
Design and present a research method to assess a project or policy of your choice (30%) and submission of an essay looking critically at the social research methods used in the assessment of an existing policy or project (70%).

SO4A3 Half Unit

Cities and the Economy: Urban Economic Development and Finance

This information is for the 2017/18 session.
Teacher responsible: Dr Savvas Verdis TW2 8.01E
Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.
This course is only available to students registered in the Executive MSc in Cities.
Course content: Cities and the Economy forms part of the Executive MSc in Cities. This is an applied course looking at how cities position themselves in a competitive global economy and on the role of city government and firms in driving local economic development. The course introduces key methodologies to measure and analyse the city economy as well as policies and tools available to attract investment and finance as well as improve growth and competitiveness.
From a global economic level, we will look at the forces shaping urban development and the capacity of national, regional and local policies to influence these drivers. From a more local economic level, we will look at the make-up and sectorial composition of a city economy; how we can measure the economic impact of policies and projects and finally how we can finance and fund complex infrastructure projects.
Topics include: measuring growth and competitiveness over time, comparative vs competitive advantage, key performance indicators of a city economy, local growth coalitions, the role of infrastructure and megaprojects in driving competitiveness, managing city budgets, financing your city, global city indexes, special economic zones and other incentives, preparing an economic development strategy.
Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.
The course will be taught over a period of three sessions.
Formative coursework: Students will be expected to produce 1 essay in the LT.
500 word submission describing the financing strategy of a project of your choice
Indicative reading: Greater London Authority 2010. The mayor's economic development strategy for London. Harris, Nigel and Fabricius, Ida 1996. Cities and structural adjustment. UCL Press. City Development Strategies and the Transition Towards a Green Urban Economy. The Economy of Green Cities: A World Compendium on the Green Urban Economy. Springer.
Assessment: Essay (70%, 2000 words) in the ST.
Presentation (30%) in the LT.
Pitch a financing strategy for a selected case study area to an expert panel (30%) and submission of a 2,000 word written report analysing the financing strategy of a project of your choice (70%).

SO4A4 Half Unit

Cities and the Environment: Urban Environmental Transitions

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Rode TW2 8.01I
Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.
This course is only available to students registered in the Executive MSc in Cities.
Course content: Cities and the Environment explores critical aspects of environmental sustainability in relation to both urbanisation globally and urban change in individual cities. This is an applied course giving students the relevant tools to measure, analyse and assess environmental impact. It introduces debates on different green city paradigms and focuses specifically on approaches to urban climate change mitigation and adaptation. The course further examines implications for urban planning, governance and management.
Cities and the Environment aims to provide the students with an analytical understanding of environmental challenges linked

to urban development. Based on these, students are introduced to planning approaches, policy instruments and governance arrangements enabling environmental sustainability and resilience, facilitating the transition to a green economy in cities.
Topics include: environmental sustainability, green economy, environmental impact assessments, climate change adaptation and mitigation in cities, climate resilience, urban environmental transition, resource consumption, pollution, biodiversity.
Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.
The course will be taught over a period of three sessions.
Formative coursework: Students will be expected to produce 1 essay in the LT.
500 word submission detailing the implementation logic of an urban environmental strategy of your choice

Urry, John (2011): Climate Change and Society. John Wiley & Sons.
Assessment: Presentation (30%) and essay (70%, 2000 words) in the LT.
Present an environmental strategy for an urban development project (30%) and submission of 2,000 word written report (70%).

SO4A5
Urban Infrastructure and Strategic Planning

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Rode TW2 8.01I and Prof Antony Travers CON6.06
Availability: This course is available on the Executive MSc in Cities. This course is not available as an outside option.
This course is only available to students registered in the Executive MSc in Cities and is offered as an option.
Course content: Urban infrastructure and strategic planning is a workshop based course providing practical insights on infrastructure development and strategic planning for cities. The course combines a series of lectures with studio-based group work on a case study city. Students are introduced to all key components of urban infrastructure, cutting across transport, energy, water, waste and digital network systems. A particular focus of this course is the interrelationship of transport infrastructure and urban form. This relationship forms the basis for an inquiry into strategic planning approaches and practical applications in cities around the world. Furthermore, the course covers important aspects of infrastructure governance, finance and regulation and examines implications for large-scale physical infrastructure as well as digital, smart city technologies. Infrastructure and strategic planning aims to provide the students with a praxis-oriented understanding of urban infrastructure development and strategic planning. The workshop-based nature of the course facilitates learning and skills development in relation to strategic development planning.
Topics include: urban infrastructure, transport, energy, water, waste, digital networks, strategic planning, smart cities, finance, privatisation, municipalisation, public private partnerships, design life, lock-in, phasing
Teaching: 3 hours of lectures and 1 hour and 30 minutes of seminars in the LT. 6 hours of lectures, 3 hours of seminars and 9 hours of workshops in the ST.
The course will be taught during the lent and summer terms through hands-on team based workshops
Formative coursework: Students will be expected to produce 1 essay in the ST.
Prepare a 500 word brief for your project indicating key deliverables
Indicative reading: Albrechts, Luis (2004): Strategic (spatial) planning re-examined. Pion Ltd. Cervero, Robert and Jin Murakami (2009): Rail and Property Development in Hong Kong: Experiences and Extensions. Delmon, Jeffrey (2011): Public-Private Partnership Projects in Infrastructure: An Essential Guide for Policy Makers. Cambridge University Press. Dimitriou, Harry T. and Ralph Gakenheimer (2011): Urban Transport in the Developing World: A Handbook of Policy and Practice. Edward Elgar Publishing Limited. Graham, Stephen and Colin McFarlane (2014): Infrastructural Lives: Urban Infrastructure in Context. Taylor & Francis. Guy, Simon, Simon Marvin, Will Medd and Timothy Moss (2012): Shaping Urban Infrastructures: Intermediaries and the Governance of Socio-Technical Networks. Taylor & Francis. Peterson, George (2009): Unlocking Land Values to Finance Urban Infrastructure. World Bank. Stead, Dominic and Evert Meijers (2009): Spatial Planning and Policy Integration: Concepts, Facilitators and Inhibitors. Routledge. Townsend, Anthony M. (2013): Smart Cities: Big Data, Civic Hackers, and the Quest for a New Utopia. W. W. Norton. Vasconcellos, Eduardo (2001): Urban transport, environment, and equity: the case for developing countries. Earthscan Publications.
Assessment: Coursework (80%, 5000 words) and presentation (20%) in the ST.
A group project report not exceeding 5,000 words, which will count for 80% of the final grade.
Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

SO4A6
Urban Development and Master Planning

This information is for the 2017/18 session.
Teacher responsible: Prof Richard Burdett TW2 8.01J and Dr Savvas Verdis TW2 8.01E
Availability: This course is available on the Executive MSc in Cities. This course is not available as an outside option.
This course is only available to students registered in the Executive MSc in Cities and is offered as an option.
Course content: Urban Development and Master Planning is an applied group project based on a major regeneration site. Groups of no more than six students will be introduced to one of the regeneration sites project teams which will include: local planning officers, developers, planners, designers and financing teams.
The groups will first immerse themselves in the offices of the host organisation as well as the site and understand some of the project challenges. The groups will then work in a collaborative environment in order to develop solutions to the challenges set by the project teams.
Using some of the key assessment and planning tools developed in courses SO4A1, SO4A2, SO4A3 & SO4A4 of the Executive MSc in Cities, this project will encourage students to apply the most appropriate analysis, planning and finance methods to an actual development site.
Topics covered: land ownership, development goals, developing the brief, urban design and master planning strategies, wider urban context, phasing, capturing value, mix of uses, public vs private space, financing projects, residual values, negotiations between developers and public agencies, planning constraints and policies, affordable housing, lifecycle assessment, built form, density and integration.
Teaching: 3 hours of lectures and 1 hour and 30 minutes of seminars in the LT. 6 hours of lectures, 3 hours of seminars and 9 hours of workshops in the ST.
The course will be taught during the lent and summer terms using a mixture of hands-on workshops and lectures.
Formative coursework: Students will be expected to produce 1 essay in the ST.
Prepare a 500 word brief for your project indicating key deliverables.
Indicative reading: Adams D., C Watkins and M White (eds.), 2005, Planning, Public Policy and Property Markets, Oxford: Blackwell. Campkin, Ben. Travers, T; Scanlon, K; Whitehead, C. and Fernández-Arrigoitia, Melissa: Public Spending Priorities in London GLA. May 2010. Fainstein S, 1994, The City Builders: Property, Politics and Planning in London and New York, Oxford: Blackwell.
Assessment: Essay (80%, 5000 words) and presentation (20%) in the ST.
This project is conducted in groups, and the assessment is based on a collective group mark for the following three components.
1 A presentation to the project team and LSE Cities staff, which counts for 20% of the total mark.
2 A group project report not exceeding 5,000 words, which will count for 80% of the final grade.
3 Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

SO4A7
Urban Consultancy Project

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Rode 8.01I and Dr Savvas Verdis 8.01E
Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.
This course is only available to students registered in the Executive MSc in Cities.
Course content: The Consultancy Project is a six-month individual consultation undertaken by a student in the Executive MSc in Cities in their own organisation or for an external organisation. Through the consultancy project, students will apply the knowledge and skills acquired in the first six courses of the programme to craft policy or program improvements for public or private agencies and non-profit organisations.
Through in depth interviews with the organisation's leaders as well as the relevant stakeholders, students will focus on a specific project and offer advice on one or more of its design and implementation phases. These may include but are not limited to the concept, feasibility, design, assessment, delivery and/ or evaluation phases in the project cycle.
Examples of projects include design briefs, assessment of master plans or strategic plans, social, economic and environmental impact assessment of projects, project finance and greening of projects and policies.
Teaching: 3 hours of seminars and 2 hours of help sessions in the ST.
Each student will be allocated a supervisor, who will provide overall guidance on the project's development. Other members of staff may also advise as required. Students will be supported with face to face or web based tutorials throughout the duration of their consultancy project.
Formative coursework: Students will be expected to produce 1 essay in the ST.
A 500 word proposal brief for the consultation project that will be carried out independently by each student.
Indicative reading: Cook, Curtis R. 2005. Just enough project management the indispensable four-step process for managing any project, better, faster, cheaper. New York: McGraw-Hill. Czerniawska, Fiona, and Paul May. 2006. Management consulting in practice award-winning international case studies. London: Kogan Page. Lindblom, Charles Edward, and David K. Cohen. 1979. Usable knowledge: social science and social problem solving. New Haven: Yale University Press. Office for Government Commerce. 2004. Common Causes of Project Failure. London: OGC. Prime Minister's Strategy Unit. 2004. Strategy Survival Guide. London.
Assessment: Project (100%, 6000 words) in the LT.
A consultancy report assessing an organisation's challenge and offering strategic advice on possible solutions at any stage of the project or policy cycle.

ST405 Half Unit
Multivariate Methods

This information is for the 2017/18 session.
Teacher responsible: Prof Irini Moustaki
Availability: This course is available on the MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc

in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Probability, Distribution Theory and Inference (ST202).
Course content: An introduction to the theory and application of modern multivariate methods used in the Social Sciences: Multivariate normal distribution, principal components analysis, factor analysis, latent variable models, latent class analysis and structural equations models.
Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer workshops.
Indicative reading: D J Bartholomew, F Steele, I Moustaki & J Galbraith, Analysis of Multivariate Social Science Data (2nd edition); D J Bartholomew, M Knott & I Moustaki, Latent Variable Models and Factor Analysis: a unified approach; C Chatfield & A J Collins, Introduction to Multivariate Analysis; B S Everitt & G Dunn, Applied Multivariate Data Analysis; K.V. Mardia, J.T. Kent and J.M. Bibby, Multivariate Analysis.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST409 Half Unit
Stochastic Processes

This information is for the 2017/18 session.
Teacher responsible: Prof Kostas Kardaras COL 6.07
Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Operations Research & Analytics, MSc in Risk and Finance, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Further Mathematical Methods (MA212).
Good undergraduate knowledge of distribution theory
Course content: A broad introduction to stochastic processes for postgraduates with an emphasis on financial and actuarial applications. The course examines Martingales, Poisson Processes, Brownian motion, stochastic differential equations and diffusion processes. Applications in Finance. Actuarial applications.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Week 6 will be used as a reading week.
Indicative reading: T Bjork, Arbitrage Theory in Continuous Time; T Mikosch, Elementary Stochastic Calculus; S I Resnick, Adventures in Stochastic Processes; B K Oksendal, Stochastic Differential Equations: An Introduction with Applications, D Williams, Probability with Martingales.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST411 Half Unit
Generalised Linear Modelling and Survival Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Fiona Steele COL.7.12
Availability: This course is compulsory on the MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Mathematics to the level of Mathematical Methods (MA100) and probability to the level of Probability, Distribution Theory and Inference (ST202). Some knowledge of linear regression.
Course content: An introduction to the theory and application of generalised linear models for the analysis of continuous, categorical, count and survival data. Topics include: linear regression, analysis of variance (ANOVA), logistic regression for binary data, models for ordered and unordered (nominal) responses, log-linear models for count data and contingency tables, and models for survival (duration) data. The Stata software package will be used in computer workshops.
Teaching: 20 hours of lectures and 15 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned weekly and returned to students with comments/feedback during the computer sessions.
Indicative reading: Dobson, A.J. & Barnett, A.G. (2002) An Introduction to Generalised Linear Modelling. 2nd edition. Chapman & Hall. McCullagh, P. & Nelder, J.A. (1989) Generalized Linear Models. 2nd edition. Chapman & Hall. Agresti, A. (2015) Foundations of Linear and Generalized Linear Models. Wiley [Available as electronic resource from LSE library]. Hosmer, D.W. & Lemeshow, S. (1999) Applied Survival Analysis, Regression Modeling of Time-to-Event Data. Wiley. Long, J.S. and Freese, J. (2006) Regression Models for Categorical Dependent Variables Using Stata. 2nd edition. Stata Press.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST416 Half Unit
Multilevel Modelling

This information is for the 2017/18 session.
Teacher responsible: Prof Irini Moustaki
Availability: This course is available on the MSc in Inequalities and Social Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.
Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g. student nested within classes, individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g. Stata).
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer lab sessions.
Indicative reading: T Snijders & R Bosker Multilevel Analysis: an

Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition); S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012); H Goldstein, Multilevel Statistical Models, Arnold (2003, 3rd edition); S W Raudenbush & A S Bryk, Hierarchical Linear Models: Applications and Data Analysis Methods, Sage (2002).
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST418 Half Unit

Non-Linear Dynamics and the Analysis of Real Time Series

This information is for the 2017/18 session.
Teacher responsible: Mr Edward Wheatcroft
Availability: This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: It is recommended that students have completed Time Series (ST422).
Course content: An introduction to the analysis of actual time series observations of real-world processes. The course casts both modern nonlinear methods and more traditional linear methods in a geometric approach. It introduces the properties of nonlinear mathematical models, covers chaos and the dynamics of uncertainty, and demonstrates the fundamental limitations in applied analysis which arise from model inadequacy. Fundamental aspects of predictability are addressed. Decision support under uncertainty is considered, with examples of economic impacts of forecasting, including weather and climate. The student will leave with a toolkit for the analysis and modelling of real data, with insights into how to evaluate which methods to employ (linear/non-linear, deterministic/stochastic) in a given problem, how to interpret the results in context, and how to avoid over interpreting nice theorems in practical circumstances. Concrete applications in economics (price time series, electricity demand, energy futures) and environment (weather, climate) as well as analytically tractable illustration from mathematics are considered.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST.
Week 6 will be used as a reading week.
Indicative reading: K Beven, Environmental Modelling: An uncertain Future? Routledge (2009); H Kantz & T Schreiber, Non-linear Time Series Analysis; E Ott, T Sauer & J A Yorke (Eds), Coping with Chaos: Analysis of Chaotic Data and The Exploitation of Chaotic Systems; E Ott, Chaos in Dynamical Systems; R Tsay, Analysis of Financial Time Series; L.A. Smith, Chaos: A Very Short Introduction. Oxford University Press (2007)
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Project (30%) in the ST.

ST421 Half Unit

Developments in Statistical Methods

This information is for the 2017/18 session.
Teacher responsible: Dr Wicher Bergsma COL 6.06
Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have statistical knowledge up to the level of the course ST425: Statistical Inference: Principles, Methods and Computation.
Course content: Our aim is to teach students important statistical methodologies that reflect the exciting development of the subject over the last twenty years, which include empirical likelihood, MCMC, bootstrap, local likelihood and local fitting, model Assessment and selection methods, and Gaussian process regression. These are computationally intensive techniques that are particularly powerful in analysing large-scale data sets with complex structure. A selection from the following topics will be covered: robustness of likelihood approaches: distance between working model and "truth", maximum likelihood under wrong models, quasi-MLE, model selection with AIC, robust estimation. Empirical likelihood: empirical likelihood of mean. Bayesian methods and Markov chain Monte Carlo (MCMC) basic Bayes, Gibbs sampler, Metropolis-Hastings algorithm, Hamiltonian Monte Carlo. Elements of statistical learning: global fitting versus local fitting, linear methods for regression, splines, kernel methods and local likelihood. Model assessment and selection: bias-variance trade-off, effective number of parameters, BIC, cross-validation. Further topics: statistical learning using Gaussian process regression. The course will be continuously updated to reflect important new developments in statistics.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be used as a reading week.
Formative coursework: Formative assessment consists of weekly exercises.
Indicative reading: T Hastie, R Tibshirani & J Friedman, The Elements of Statistical Learning: Data Mining, Inference and Prediction; Y Pawitan, In All Likelihood: Statistical Modelling and Inference Using Likelihood; M A Tanner, Tools for Statistical Inference.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST422 Half Unit

Time Series

This information is for the 2017/18 session.
Teacher responsible: Dr Wai-Fung Lam
Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Marketing, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Good undergraduate knowledge of statistics and probability.
Course content: A broad introduction to statistical time series analysis for postgraduates: what time series analysis can be useful for; autocorrelation; stationarity; causality; basic time series models: AR, MA, ARMA; ARCH and GARCH models for financial time series; trend removal and seasonal adjustment; invertibility; spectral analysis; estimation; forecasting. We will also discuss nonstationarity and multivariate time series.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Exercises will be given out to do at home during Week 6.
Indicative reading: Brockwell & Davis, Time Series: Theory and Methods; Brockwell & Davis, Introduction to Time Series and Forecasting; Box & Jenkins, Time Series Analysis, Forecasting and Control; Shumway & Stoffer, Time Series Analysis and Its Applications.

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST425

Statistical Inference: Principles, Methods and Computation

This information is for the 2017/18 session.
Teacher responsible: Prof Qiwei Yao COL 7.16
Availability: This course is compulsory on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. Amended paper details (11/07/2017 NB)
Pre-requisites: A knowledge of probability and statistics to the equivalent level of ST102 Elementary Statistical Theory.
Course content: The course will provide a comprehensive coverage on some fundamental aspects of probability and statistics methods and principles. It also covers linear regression analysis. Data illustration using statistical package R constitutes an integral part throughout the course, therefore provides the hands-on experience in simulation and data analysis.
Teaching: 40 hours of lectures, 10 hours of seminars and 10 hours of computer workshops in the MT.
Week 11 will be used as a revision week.
Formative coursework: Students will complete weekly assessed problem sheets. They will also complete R practice following instructions from the weekly computing workshop.
Indicative reading: L. Wasserman, All of Statistics. Y. Pawita, In All Likelihood. K. Knight, Mathematical Statistics. A. Zuur et al., A Beginner's Guide to R. (Available online from LSE Library.) N. Venables et. al., An Introduction to R (http://cran.r-project.org/doc/manuals/R-intro.pdf)
Assessment: Exam (85%, duration: 3 hours) in the LT week 0. Project (15%) in the MT.

ST426 Half Unit

Applied Stochastic Processes

This information is for the 2017/18 session.
Teacher responsible: Dr Erik Baurdoux COL 6.04
Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.
Course content: This course builds on material discussed in ST409 (Stochastic Processes). In particular, elements of the general theory of semi-martingales will be covered and emphasis will be given on presenting a variety of models involving processes with general dynamics, including jumps. The theory will be applied to a range of topics in mathematical finance and insurance, as well as financial economics.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.
Week 6 will be used as a reading week; exercises will be given out to students to do at home.
Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned. Additional formative exercise will be available through Moodle.
Indicative reading: Brownian Motion and Stochastic Calculus. Ioannis Karatzas and Steve Shreve. Numerical Solution of Stochastic Differential Equations with Jumps in Finance. Eckhard Platten, Nicola Bruti-Liberati. Essentials of Stochastic Finance: Facts, Models, Theory. Albert Shiryaev. Stochastic Integration and Differential Equations. Phillip Protter. Levy Processes in Finance: Pricing Financial Derivatives. Wim Schoutens. Selected papers from scientific journals.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST429 Half Unit

Statistical Methods for Risk Management

This information is for the 2017/18 session.
Teacher responsible: Dr Hao Xing COL 7.12
Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Data Science, MSc in Financial Mathematics and MSc in Statistics (Financial Statistics). This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).
ST202, ST302, or equivalent
Course content: A self-contained introduction to probabilistic and statistical methods in risk management. This course starts with risk factors models and loss distributions, which are illustrated via examples in stocks, derivatives, and bonds portfolios. Axioms of coherent risk measures are introduced. Value at risk and other risk measures are introduced and their relation with coherent risk measures is discussed. Multivariate factor models are introduced and analysed: covariance and correlation estimations, multivariate normal distributions and their testing, normal mixture distributions and their fitting to data. The theory of copulas is introduced: meta distributions, tail dependence, fitting copulas to data. Some limitations of copulas are also discussed. The extreme value theory is introduced: generalized extreme value distribution, threshold exceedances and generalized Pareto distribution, modelling and measures of tail risk. Applications to insurance with large loss are also discussed. Students will be exposed to financial data via sets of computer-based classes and exercises.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT. A exercise/problem-solving session will take place in Week 6.
Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned. A set of coding exercises which are similar to examples in computer lab sessions will be assigned.
Indicative reading: A.McNeil, R.Frey, P.Embrechts, Quantitative Risk Management: Concepts, Techniques, Tools; Princeton Series in Finance
Assessment: Exam (75%, duration: 2 hours) in the LT week 0. Project (25%, 2000 words).

ST433 Half Unit

Computational Methods in Finance and Insurance

This information is for the 2017/18 session.
Teacher responsible: Dr George Tzougas COL.7.04
Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative

Methods for Risk Management) (MA400).
Course content: The purpose of this course is to (a) develop the students' computational skills, (b) introduce a range of numerical techniques of importance in actuarial and financial engineering, and (c) develop the ability of the students to apply the theory from the taught courses to practical problems, work out solutions including numerical work, and to present the results in a written report.
Binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Finite difference schemes for the solution of ordinary and partial differential equations arising in insurance and finance. Numerical solutions to stochastic differential equations and their implementation. The course ends with an introduction to guidelines for writing a scholarly report/thesis.
Teaching: 20 hours of lectures and 10 hours of workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Weekly exercises and practicals are set and form the basis of the classes.
Indicative reading: N E Steenrod, P Halmos, M M Schiffer & J A Dieudonne, How to write mathematics (1973); D.J. Duffy, Finite Difference Methods in Financial Engineering: A Partial Differential Equation Approach, Wiley; P. Glasserman, MonteCarlo Methods in Financial Engineering, Springer; P.E. Kloden and E. Platen, Numerical Solution of Stochastic Differential Equations, Springer. Further material will be specified during the course.
Assessment: Exam (50%, duration: 2 hours) in the main exam period.
Project (50%) in the ST.

ST435 Half Unit
Advanced Probability Theory

This information is for the 2017/18 session.
Teacher responsible: Dr Luciano Campi COL.7.10
Availability: This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
The course is offered as a regular examinable half-unit as well as a service to students and academic staff.
Pre-requisites: Analysis and algebra at the level of a BSc in pure or applied mathematics and basic statistics and probability theory with stochastic processes. Knowledge of measure theory is not required as the course gives a self-contained introduction to this branch of analysis.
Course content: The course covers core topics in measure theoretic probability and modern stochastic calculus, thus laying a rigorous foundation for studies in statistics, actuarial science, financial mathematics, economics, and other areas where uncertainty is essential and needs to be described with advanced probability models. Emphasis is on probability theory as such rather than on special models occurring in its applications. Brief review of basic probability concepts in a measure theoretic setting: probability spaces, random variables, expected value, conditional probability and expectation, independence, Borel-Cantelli lemmas Construction of probability spaces with emphasis on stochastic processes. Operator methods in probability: generating functions, moment generating functions, Laplace transforms, and characteristic functions. Notions of convergence: convergence in probability and weak laws of large numbers, convergence almost surely and strong laws of large numbers, convergence of probability measures and central limit theorems. If time permits and depending on the interest of the students topics from stochastic calculus might be covered as well.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Week 6 will be used as a reading/revision week.
Formative coursework: Exercises are set weekly and solutions are discussed in the lectures. There will be one set of compulsory written coursework in the MT which will be marked.
Indicative reading: Williams, D. (1991): Probability with Martingales. Cambridge University Press; Kallenberg, O. (2002). Foundations of modern probability. Springer; Billingsley, P. (2008). Probability and measure. John Wiley & Sons; Jacod, J., & Protter, P. E. (2003). Probability essentials. Springer; Dudley, R. M. (2002). Real analysis and probability (Vol. 74). Cambridge University Press
Assessment: Exam (100%, duration: 2 hours) in the LT week 0.

ST436 Half Unit
Financial Statistics

This information is for the 2017/18 session.
Teacher responsible: Prof Piotr Fryzlewicz COL 6.01
Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Data Science and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Statistical Inference: Principles, Methods and Computation (ST425).
Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, predicting equity indices (case study), Markowitz portfolio theory and the Capital Asset Pricing Model, machine learning in financial forecasting, Value at Risk, simple trading strategies. The course ends with an extended case study involving making predictions of market movements in a virtual trading environment.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 11 will be spent working on the extended case study.
Formative coursework: Weekly marked problem sheets, with solutions discussed in class. Two marked case studies.
Indicative reading: Lai, T.L. And Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Yao (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST439 Half Unit
Stochastics for Derivatives Modelling

This information is for the 2017/18 session.
Teacher responsible: Dr Beatrice Acciaio COL 6.02
Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Stochastic Processes (ST409).
Course content: Valuation and hedging of derivative securities: general principles of mathematical finance; asset price models; static vs dynamic option pricing; connection with PDEs; exotic options; volatility derivatives; mean-variance hedging.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 11 will be used as a revision week.
Formative coursework: Weekly homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer.
Indicative reading: Steven Shreve, Stochastic Calculus for Finance II: Continuous-Time Models, Springer. Selected papers from scientific journals. Thorsten Rheinlander and Jenny Sexton, Hedging Derivatives, World Scientific.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST440 Half Unit
Recent Developments in Finance and Insurance

This information is for the 2017/18 session.
Teacher responsible: Dr Beatrice Acciaio COL 6.02
Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Stochastic Processes (ST409).
Course content: Recent developments in the theory of stochastic processes and applications in finance and insurance and their interface. A variety of topics will be chosen, from robust evaluation; optimal hedging; evaluation via utility criteria; optimal risk sharing; minimal capital requirement according to the Basel Accords and the Solvency Directives; life insurance.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Weeks 9 and 10 will be devoted to students' presentations, using material which will have been provided in week 1 or 2; as well as to discuss in groups solutions to problems that will have been set in class.
Week 11 will be used for exam revision.
Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned as well as a mock exam.
Indicative reading: H. Foellmer and A. Schied: Stochastic finance. An introduction in discrete time. (3rd ed.), de Gruyter.
Selected papers from scientific journals.
Assessment: Exam (90%, duration: 2 hours) in the main exam period.
Presentation (10%) in the Week 9.

ST441 Half Unit
Introduction to Markov Processes and their Applications

This information is for the 2017/18 session.
Teacher responsible: Dr Umut Cetin COL 6.08
Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students must have completed Stochastic Processes (ST409).
Course content: Markov property and transition functions. Feller processes. Strong Markov property. Martingale problem and stochastic differential equations, relation with partial differential equations. Diffusion processes. Affine processes. Piecewise deterministic Markov processes. Selection of topics from filtering and statistics of diffusion processes. Applications.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be used as a reading week.
Formative coursework: A weekly set of homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer. Students will also complete one or two sets of formative coursework during the year which will be marked. Feedback will be provided.
Indicative reading: An Introduction to Markov Processes and Their Applications. Lecture Notes by Umut Cetin. I. Karatzas and S. Shreve: Brownian Motion and Stochastic Calculus. Springer. D. Revuz and M. Yor: Continuous Martingales and Brownian Motion. Springer. K.L. Chung and. J. Walsh: Markov Processes, Brownian Motion and Time Symmetry. Springer
Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Project (20%) in the ST.

ST442 Half Unit Not available in 2017/18
Longitudinal Data Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Fiona Steele COL 7.08
Availability: This course is compulsory on the MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MSc in Inequalities and Social Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.
Amended paper details (11/07/2017 NB)
Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.
Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measures, (random effects) growth curve models, marginal models, dynamic (autoregressive) models, latent class models, and models for multivariate outcomes. The course will have an applied emphasis with fortnightly computer classes using the Stata software.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Week 6 will be used as a reading week.
Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the computer sessions.
Indicative reading: Singer JD, Willett JB. (2003) Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press. (Part I only). Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press. Hedeker D, Gibbons RD. (2006) Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

ST443 Half Unit
Machine Learning and Data Mining

This information is for the 2017/18 session.
Teacher responsible: Dr Xinghao Qiao
Availability: This course is compulsory on the MSc in Data Science. This course is available on the MSc in Marketing, MSc in Quantitative Methods for Risk Management, MSc in Statistics,

MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: The course will be taught from a statistical perspective and students must have a basic knowledge of statistical methods for linear regression models.
Students are not permitted to take this course alongside Algorithmic Techniques for Data Mining (MG4E1)
Course content: Machine learning and data mining are emerging fields between statistics and computer science which focus on the statistical objectives of prediction, classification and clustering and are particularly orientated to contexts where datasets are large, the so-called world of 'big data'. This course will start from the classical statistical methodology of linear regression and then build on this framework to provide an introduction to machine learning and data mining methods from a statistical perspective. Thus, machine learning will be conceived of as 'statistical learning', following the titles of the books in the essential reading list. The course will aim to cover modern non-linear methods such as spline methods, generalized additive models, decision trees, bagging, boosting, neural network and support vector machines, as well as more advanced linear approaches, such as LASSO, linear discriminant analysis, k-means clustering, nearest neighbours.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.
The first part of the course reviews regression methods and covers linear and quadratic discriminant analysis, variable selection, nearest neighbours, shrinkage, dimension reduction methods, neural networs. The second part of the course introduces non-linear models and covers, splines, generalized additive models, tree methods, bagging, random forest, support vector machines, principal components analysis, k-means, hierarchical clustering.
Week 6 will be used as a reading week.
Formative coursework: Students will be expected to produce 8 problem sets and 1 project in the MT.
The problem sets will consist of some theory questions and data problems that require the implementation of different methods in class using a computer package.
Indicative reading: James, G., Witten, D., Hastie, T. and Tibshirani, R. An Introduction to Statistical Learning. Springer, 2014. Available online at http://www-bcf.usc.edu/~gareth/ISL/. Hastie, T., Tibshirani, R. and Friedman, J. The Elements of Statistical Learning: Data Mining, Inference and Prediction. 2nd Edition, Springer, 2009. Available online at http://statweb.stanford.edu/~tibs/ElemStatLearn/index.html. Bishop, G. Pattern Recognition and Machine Learning. Springer-Verlag, 2006.
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Project (25%) in the Week 11.
Coursework (5%) in the MT.

ST444 Half Unit
Statistical Computing

This information is for the 2017/18 session.
Teacher responsible: Dr Yining Chen
Availability: This course is available on the MSc in Data Science, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: An introduction to the use of numerical linear algebra, optimisation, numerical integration and simulation in statistical computation, with their applications in statistical methods, including least squares, maximum likelihood, principle component analysis, LASSO, etc. If time permits, more advanced topics such as kernel methods and graphical LASSO will also be covered. Throughout the course, students will gain practical experience of implementing these computational methods in a programming language. Learning support will be provided for at least one programming language, such as R, Python or C++, but the choice of language supported may vary between years, depending on judged benefits to students, whether in terms of pedagogy or resulting skills.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Lectures will cover:
(1) **Introduction to Tools in Numerical Analysis**: linear algebra (Gaussian elimination, Cholesky decomposition, matrix inversion and condition); numerical optimization (bi-section, steepest descent, Newton's method, Quasi-Newton methods, stochastic search); convex optimization (coordinate descent, ADMM); numerical integration.
(2) **Introduction to Tools in Numerical Simulation**: random number generation (inverse CDF, rejection, Box-Muller, etc); Introduction to Monte-Carlo methods.
(3) **Applications in Statistics**: linear regression and least squares; generalised linear models; principle component analysis (PCA); Page rank; LASSO.
(4) **Other advanced topics** if time allows: bootstrapping; kernel density estimation; Graphical models and Graphical LASSO.
Week 6 will be used as a reading week.
Formative coursework: Students will be expected to produce 5 problem sets in the LT.
Bi-weekly exercises, usually involving some programming.
Indicative reading: Computational Statistics by Givens and Hoeting
Statistical computing in C++ and R by Eubank and Kupresanin
The Art of R Programming: A Tour of Statistical Software Design by Matloff
Think Python: How to Think Like a Computer Scientist by Downey
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Project (30%) in the LT.

ST450
Advanced Lectures on Special Topics in Statistics

This information is for the 2017/18 session.
Course content: Seminar series. Please refer to Departmental web page for details. http://www.lse.ac.uk/statistics/home.aspx
Teaching: 20 hours of seminars in the LT.

ST499
Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL. 8.04 and Dr Wai-Fung Lam COL. 6.09
Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research) and MSc in Statistics (Social Statistics) (Research). This course is not available as an outside option.
Course content: Independent project work on a subject chosen by the student.
Assessment: Dissertation (100%) in August.
(50 page limit).

Executive Taught Master’s Course Guides

EC409E Half Unit
Public Policy in Practice Workshop III (EMPA)

This information is for the 2017/18 session.
Teacher responsible: Dr Daniel Sturm and Dr Joachim Wehner
Availability: This course is compulsory on the Executive Master of Public Administration . This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One optional mock policy exercise will be provided.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course
Assessment: Essay (100%, 2000 words).
Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

EC410E Half Unit
Public Economics for Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Camille Landais and Dr Daniel Reck
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: Students must have completed Empirical Methods for Public Policy (EC455E) and Economic Policy Analysis (EC440E).
Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination will be offered.
Indicative reading: A full reading list will be distributed prior to the beginning of the course.
Assessment: Project (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPP/ Executive MPA programme inductions.

EC421E Half Unit
Global Market Economics

This information is for the 2017/18 session.
Teacher responsible: Professor Andrew Bernard
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: Students must have completed Empirical Methods for Public Policy (EC455E) and Economic Policy Analysis (EC440E).
Course content: This course focuses on the economic interdependence between countries in a global economy. The first part of the course examines the structure and geography of world trade and examines popular hypothesis such as the "global village" or "flat earth". The second part of the course analyses macroeconomic issues such as the magnitude and effects of international capital flows, the debate over fixed versus flexible exchange rates and the economics of a common currency
Teaching: A one-week modular teaching block.
Formative coursework: One mock essay opportunity will be provided.
Indicative reading: A full reading list will be distributed at the beginning of the course.
Assessment: Essay (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

EC440E Half Unit
Economic Policy Analysis

This information is for the 2017/18 session.
Teacher responsible: Professor Gerard Padró i Miquel and Dr Ethan Ilzetzki
Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The course will cover both key microeconomic policy issues, such as externalities, public goods and principal-agent problems and macroeconomic issues such as unemployment, fiscal and monetary policies, international trade and finance and the determinants of long-run growth.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination will be provided.
Indicative reading: A full reading list will be distributed at the beginning of the course.
Assessment: Project (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

EC454E Half Unit
Development Economics

This information is for the 2017/18 session.
Teacher responsible: Prof Robin Burgess LRB.R524 and Prof Oriana Bandiera LRB.R526
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: Students must have completed Empirical Methods for Public Policy (EC455E) and Economic Policy Analysis (EC440E).

Course content: The main focus of this course is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include growth and poverty, governance and accountability, motivation of bureaucrats, firms and markets, determinants of productivity, jobs and labour markets, shocks and insurance, infrastructure, connectivity, education and health, trade and globalization, the value of exporting, delivering public services, incentivising teachers and health workers, environment and climate change, management of natural resources, taxation and state capacity. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.
Teaching: A one-week modular teaching block.
Formative coursework: One mock essay opportunity will be provided.
Indicative reading: A reading list will be distributed at the start of the course.
Assessment: Essay (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. Essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

EC455E Half Unit
Empirical Methods for Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Daniel Sturm and Dr Gregory Fischer
Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course. Familiarity with the material covered in the EMPA/ EMPP Mathematics and Statistics Refresher module is assumed.
Course content: The course introduces students to the quantitative evaluation of public policies. The focus of the course is on practical applications of techniques to test the effectiveness of public policy interventions. The course begins with an overview over the key benefits of randomized experiments in the evaluation of public policies. Next the course covers a number of techniques that are widely used in the evaluation of public policies, including difference-in-differences regressions, regression discontinuity approaches and matching. It concludes with an introduction to cost-benefit analysis.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination will be provided.
Indicative reading: A full reading list will be distributed at the beginning of the course.
Assessment: Project (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

EC4H8E Half Unit
Executive MPP Capstone Project

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have a period of approximately 3 months to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.
Formative coursework: Feedback will be provided on presentations of work-in-progress during the project duration.
Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary reading includes: Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979; Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Office for Government Commerce Common Causes of Project Failure (London: OGC, 2004); Strategy Survival Guide (London: Prime Minister's Strategy Unit. July 2004; C. R. Cook, Just Enough Project Management (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, Dynamics in Groups and Teams: Groups as Complex Action Systems, chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).
Assessment: Project (100%, 10000 words).
The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.
1) Presentation and submission of the project report to the client organisation. 20% of the marks are assigned by the client organisation.
2) Group project report. The main body of the report may not exceed 10,000 words and will be read by academic markers whose assessment will count for 60% of the final grade.
Additionally, each group member must write a personal reflection on their contribution to the group's work, to be submitted alongside the report. The reflection should be no more than 600 words, and should include specific details of the student's contributions to the project. The reflections should not be included in the report submitted to the client.
3) The final 20% of the marks are allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties) and (ii) group working and self-management as a team.

EC4J3E Half Unit
Public Policy in Practice Workshop III (EMPP)

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPP to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One mock policy exercise will be offered.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.
Assessment: Essay (100%, 2000 words).
Assessment will consist of a 2,000 word reflective essay due 10

days after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

EU425E Half Unit

Interest groups, markets and democracy (modular)

This information is for the 2017/18 session.
Teacher responsible: Steve Coulter
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The focus of this course is on the representation of interests in Europe, and their role in Economic policy-making. Students will analyse the main theoretical issues and selected empirical questions on how interests are differently organised across countries and at the EU level, on the interplay between interest representation and electoral politics, and on the policy outcome after interest intermediation. The objective is to understand the dynamics of economic policy-making in comparative perspective, with an emphasis on the globalisation period.
Teaching: The course will run between 11-15 April 2015.
Formative coursework: One essay.
Indicative reading: Olson, M. (1982). The rise and decline of nations: economic growth, stagflation, and social rigidities. New Haven ; London, Yale University Press; Dahl, R. A. (1989). Democracy and Its Critics. New Haven and London Yale University Press. Chapter 20, pp.280-298; Bouwen, P. (2004). " Exchanging access goods for access. A comparative study of business lobbying in the European Union institutions." European Journal of Political Research, 43: 337-369; Streeck, W. and Schmitter, P. (1991) 'From National Corporatism to Transnational Pluralism', Politics and Society, 19, 133-164; Patterson, Lee Ann (1997) "Agricultural Policy Reform in the European Community: A Three-Level Game Analysis." International Organization 51 (1): 135-65; Streeck, W. and Kenworthy, L. (2005) "Theories and Practices of Neocorporatism". In Janoski, T., Alford, R. R., Hicks, A. M. and Schwartz, M. A. (eds) The Handbook of Political Sociology, Cambridge: Cambridge University Press, pp. 441-460; Cusack, T. R. (1997). "Partisan politics and public finance: Changes in public spending in the industrialized democracies, 1955-1989." Public Choice 91: 374-395; Iversen, T. and D. Soskice (2006). "Electoral Institutions and the Politics of Coalitions: Why Some Democracies Redistribute More Than Others." American Political Science Review 100(2): 165-181; Avdagic, S. and Colin Crouch (2006) "Organized Economic Interests: Diversity and Change in an Enlarged Europe." In Developments in European Politics, Paul Heywood, Erik Jones, Martin Rhodes, and Ulrich Sedelmeier (Eds.) Basingstoke and New York: Palgrave, 2006, p. 196-215.
Assessment: Essay (50%).
Take home exam (50%) in the ST.

EU443E Half Unit

European Capitalism(s) and the Global Economy

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Coulter COW 3.12
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The course consists of two parts. In the first part we will discuss the basic arguments and methodological considerations of the Varieties of Capitalism literature and conduct a comparative analysis of the core issue areas in the political economy of contemporary capitalism: how capital, labour and product markets are structured. The second part will build on these thematic treatments to discuss the structure of and dynamics of the main Western, Southern and Central European models of capitalism.
Teaching: The course will run between 21-25 September 2015.
Formative coursework: One 2,000 word essay
Indicative reading: Peter A Hall & David Soskice (Eds), Varieties of Capitalism: The Institutional Foundations of Competitiveness. Oxford University Press, 2001; Hancké, Bob, Martin Rhodes and Mark Thatcher (eds.) 2007. Beyond Varieties of Capitalism: Conflict, contradiction and complementarities in the European Economy. (Oxford UP 2007) (henceforth HRT); Crouch, Colin, Capitalist Diversity and Change, Oxford University Press, 2005; Hancké, Bob (ed.), 2009, Debating Varieties of Capitalism: A Reader, Oxford UP.
Assessment: Essay (50%, 2000 words) in the LT.
Take home exam (50%) in the ST.

EU446E Half Unit

Economic Governance of EMU (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr Corrado Macchiarelli
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 as a source of evidence to assess both the performance of EMU and the theories about monetary integration. We consider briefly the political and economic rationale for the establishment of EMU and then examine in detail how these rationales played themselves out in practice (e.g. problems of free-riding, political exchange, information asymmetries between policymakers etc). Indicative questions addressed in this course include: how and why did the EU develop the EMU project?; did economic theories prepare us for the Euro area crisis of 2010-11?; what are the challenges for member states in adjusting to the discipline of the 'Euro-zone'?; what issues arise for the EU in managing relations between member states in the Euro-zone and those outside?; how does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks?; is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design?
Teaching: The course will run on 19th – 23rd June 2017
Formative coursework: One essay - 2,000 words
Indicative reading: Paul De Grauwe, The Economics of Monetary Union (Oxford University Press 2012, 7th ed.); Kenneth Dyson and Kevin Featherstone (1999), The Road to Maastricht, OUP; Special issue (2006): Economic Governance in EMU Revisited, Journal of Common Market Studies vol.44, No.4 (November); DG Ecfin (2009), Economic Crisis in Europe: Causes, Consequences and Responses, European Economy 7/2009; Jean Pisani-Ferry and Adam Posen (2009), The Euro at Ten: The Next Global Currency?, Peterson Institute for International Economics
Assessment: Essay (50%).
Take home exam (50%) in the ST.

EU449E Half Unit

Capitalism and Democracy in Central Europe (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr Claire Gordon KSW 5.04
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an

outside option.
Course content: The course applies concepts of political economy, economics and political science to its investigation of Central and Eastern Europe's evolution through post-communist transition to highly open, FDI-dependent emerging markets with 'European' expectations of welfare. Placing the region in the comparative context of both the EU15 and comparable emerging markets, the course investigates the ongoing challenges of political and institutional consolidation and the developmental consequences of the liberalization and FDI-led growth model of the 1990s/2000s. The course examines the emerging strengths and persistent weaknesses of these political economies and considers their implications for the region's emerging varieties of capitalism, relative international competitiveness and political stability.
Teaching: The course will run between 6-10 July 2015.
Formative coursework: One 2,000 word essay.
Indicative reading: J Kornai (1992) The Socialist System: The Political Economy of Communism, Princeton University Press; N Barr (ed.) (2005) Labor Markets and Social Policy in Central and Eastern Europe: The Accession and Beyond, Washington DC: The World Bank; H. Grabbe (2006) The EU's Transformative Power: Europeanization through Conditionality in Central and Eastern Europe, Basingstoke: Palgrave;; G Roland (2000) Transition and Economics: Politics, Markets and Firms, Cambridge MA: The MIT Press; Anna Grzymala-Busse (2007) Rebuilding Leviathan: Party Competition and State Exploitation in Post-Communist Democracies, Cambridge, New York: Cambridge University Press; Bohle, Dorothee and Bela Greskovits (2012) Capitalist Diversity on Europe's Periphery, Ithaca: Cornell University Press; Stephen Haggard and Robert R. Kaufmann, (2008) Development, Democracy and Welfare States: Latin America, East Asia and Eastern Europe, Princeton: Princeton University Press. Journals often cited: East European Politics and Society, Journal of Democracy, Economics of Transition and Europe-Asia Studies
Assessment: Essay (50%, 2000 words).
Take home exam (50%) in the MT.

EU452E
Key Issues in the Political Economy of Europe (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr Robert Hancke COW 2.09
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: This course forms the core course of the Executive MSc Political Economy of Europe. It tries to understand how the relation between state and economy in both Western Europe and Central and Eastern Europe has evolved over the post-war period. Key debates in this regard include the demise of Keynesianism as fiscal intervention by government and of real existing socialism, as well as the crisis of monetarism. We also examine how the operation of the EU as a whole, the Single Market and the monetary union in particular, interact with the political economy of European states inside and in the neighbourhood of the Community. The course aims to provide students with both an analytical understanding of and a systematic treatment of empirical issues related to the evolution of the European political economy.
Topics include: State and economy in European economies; Economic theory and policy in Europe; The political economy of European integration; EU membership as a reform lever in post-communist Europe and in mature Western welfare states; EU enlargement; Monetary union and its crisis; the evolution of the Single Market.
Teaching: 27 hours of seminars in the MT. 27 hours of seminars in the LT.
Formative coursework: One 2,000 word individual essay, one project, plus a trial examination.
Indicative reading: Barry Eichengreen, The European economy since 1945: coordinated capitalism and beyond (Princeton University Press, 2007); Paul De Grauwe, The Economics of Monetary Union (Oxford University Press 2012, 7th ed.); Gérard Roland, Transition and Economics: politics, markets and firms (Cambridge MA: The MIT Press 2000); Ben Rosamond, Theories of European Integration, (New York: St Martin's Press 2000); Helen Wallace, Mark A. Pollack and Alasdair R. Young (eds.). Policy-making in the European Union (Oxford University Press 2010, 6th ed.); Bob Hancké, Martin Rhodes and Mark Thatcher, Beyond Varieties of Capitalism (Oxford University Press 2007).
Assessment: Essay (50%, 2000 words).
Take home exam (50%) in the ST.

EU453E Half Unit
The Political Economy of Welfare State Reform (modular)

This information is for the 2017/18 session.
Teacher responsible: Prof Waltraud Schelkle - Room: COW 1.06
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states. The seminars establish the theoretical context, summarise the findings of quantitative comparative case studies and discuss European experience in the context of broader international experience. They then build on these concepts and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? What are the proper boundaries of EU social policy? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements?
Teaching: The Module will run between 12-16 September 2016.
Formative coursework: One formative essay - 2,000 words
Indicative reading: Barr, N. (2012) The Economics of the Welfare State, 5th ed., Oxford: Oxford UP; Leibfried, S (2010) European Social Policy: Left to Judges and the Market? In H Wallace, M Pollack and A.Young, Policy-Making in the European Union, ch 10 (or earlier edition); Pierson, P. (ed) (2001) The New Politics of the Welfare State, Oxford: Oxford University Press; Scharpf, F.W. and Schmidt, V.A. (eds.) (2000) Welfare and Work in the Open Economy, 2 vols, Oxford: Oxford University Press.
Assessment: Essay (50%, 2000 words).
Take home exam (50%) in the MT.

EU497E Half Unit
Dissertation

This information is for the 2017/18 session.
Availability: This course is compulsory on the Executive MSc in Political Economy of Europe. This course is not available as an outside option.
Course content: Students in the Executive MSc Political Economy of Europe are required to write a dissertation on a topic within the field of their programme. Preparation for the Dissertation will commence with a week-long seminar (9 x 3hours) on aspects of research, writing, etc., followed by at least two research proposal drafts within two-month intervals, including (virtual) office hours,

leading to a final dissertation project outline after 6 months (from December to July). The dissertation deadline is the second Monday in September of the second year.
Teaching: The course will run between 4-8 January 2016.
Assessment: Dissertation (100%).

FM405E Half Unit
Fixed Income Securities and Credit Markets

This information is for the 2017/18 session.
Teacher responsible: Dr Peter Kondor
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Interest rate modelling and derivatives
• Credit risk
• Credit derivatives and risk management
This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.
By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as Government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.
Teaching: 30 hours of lectures in the MT.
Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies. The following references can also be used to complement the reading material provided in the course pack: (i) Brigo, Damiano and Fabio Mercurio (2006). Interest Rate Models—Theory and Practice, with Smile, Inflation and Credit. Springer Verlag; (ii) Duffie, Darrell and Kenneth Singleton (2003). Credit risk. Pricing, management and measurement. Princeton University Press; (iii) Veronesi, Pietro (2010). Fixed Income Securities. John Wiley & Sons.
Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Coursework (20%) in the LT.

FM406E Half Unit
Topics in Portfolio Management

This information is for the 2017/18 session.
Teacher responsible: Dr Michela Verardo
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Balancing Risk and Risk Premia for the Construction of Optimal Portfolios
• Dynamic Investment Strategies
• Selecting and Monitoring Portfolio Managers
• Transactions costs and Liquidity Risk in Portfolio Construction
This course covers a wide range of topics in equity portfolio management, with a strong focus on empirical applications. The first part of the course starts with a theoretical and empirical overview of risk and risk premia in different segments of financial markets; it then focuses on the construction of optimal portfolios, with applications to equity, bond, and multi-asset portfolios.
The second part of the course introduces students to the implementation of several dynamic investment strategies, such as value, momentum, carry and others. The third part of the course focuses on selecting and monitoring mutual fund and hedge fund managers to form portfolios of managed funds. Finally, the course incorporates transactions costs and liquidity risk in the construction and evaluation of portfolios. The course is based on recent empirical studies and on applied exercises using financial data.
Teaching: 30 hours of lectures in the MT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are Modern portfolio theory and investment analysis, by E. J. Elton, M. J.Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.
Assessment: Exam (90%, duration: 2 hours) in the main exam period.
Coursework (10%) in the LT.

FM407E Half Unit
Mergers, Buyouts and Corporate Restructurings

This information is for the 2017/18 session.
Teacher responsible: Dr Vicente Cuñat
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Financial Analysis of Firms and Corporate Transactions
• Mergers, Acquisitions and Leveraged Buyouts
• Distress, Bankruptcy and Corporate Restructuring
This course covers advanced topics in Corporate Finance. It focuses on the strategy, valuation and execution of corporate deals. In particular, the first part of the course covers mergers, divestitures, partial-divestitures (e.g. equity carve outs) and leveraged buyouts. The second part of the course provides a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies and practitioner talks.
Teaching: 30 hours of lectures in the LT
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.
Assessment: Exam (70%, duration: 2 hours) in the main exam period.
Project (30%) in the LT.

FM408E Half Unit
Financial Engineering

This information is for the 2017/18 session.
Teacher responsible: Dr Jean-Pierre Zigrand
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students will be expected to show some familiarity with calculus and statistics.
Course content: Provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products.
This syllabus lists and describes the topics covered in this course. In a nutshell, the course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R and VBA.
Teaching: 30 hours of lectures in the MT.
Indicative reading: Based on a set of extensive lecture notes. No one book covers the material of the entire course. Books recommended include The Volatility Surface: A Practitioner's Guide, 2nd Edition, by Jim Gatheral, Option Pricing Models and Volatility by Maurice Rouah and Gregory Vainberg, Derivatives Markets, 2nd edition" by Robert McDonald, Options, Futures and Other Derivatives by John Hull, Principles of Financial Engineering by Salih Neftci as well as Keith Cuthbertson and Dirk Nitzsche's Financial Engineering.
Assessment: Exam (80%, duration: 2 hours) in the main exam period.
Project (20%) in the LT.

FM409E Half Unit
Risk Management in Financial Markets

This information is for the 2017/18 session.
Teacher responsible: Dr Christian Julliard
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Hedging in equity and fixed income markets
• Market Risk, Value at Risk and Expected Shortfall
• Endogenous Risk and Limits to Arbitrage
• Credit risk and structured products
The aim of this course is to give an introduction to the analysis and management of risk within financial markets.The objective of the course is to develop a conceptual framework for thinking about financial risk and to show how these concepts are implemented in practice in a variety of contexts. First, the course gives an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, will discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.
Teaching: 30 hours of lectures in the LT.
Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.
Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, Risk Management and Financial Institutions, Wiley, 2015, 4th edition.
Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, Risk Management, McGraw-Hill, 2001. Philippe Jorion, Value at Risk, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, Financial Risk Forecasting, Wiley, 2011. John C. Hull, Options, Futures and Other Derivatives, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, Credit Risk, Princeton University Press, 2003.
Assessment: Exam (90%, duration: 2 hours) in the main exam period.
Coursework (5%) and presentation (5%) in the MT.

FM414E Half Unit
Corporate Investment and Financial Policy

This information is for the 2017/18 session.
Teacher responsible: Prof Ulf Axelson
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).
Course content:
• Supporting the firm's strategy with Long-term and short-term financial management
• Real options and strategic investment decisions
• Family firms, IPOs, and corporate governance
• Risk management, International valuation, and currency exposure
A case based course aimed at deepening the understanding of how to apply corporate finance concepts in a wide variety of business situations. In particular, we will try to build on concepts in business strategy, valuation techniques, and capital structure theories covered in previous courses, and see how to apply those tools in a systematic and rigorous way when approaching complicated real-life corporate finance problems. Examples of topics include working capital management, capital structure, risk management, real options, initial public offerings, international corporate finance, and family firms. Students will have to read up on cases before class and be prepared to discuss them interactively in class.
Teaching: 30 hours of seminars in the MT.
Formative coursework: 5 formative case study assignments (similar to summative cases).
Indicative reading: Berk and DeMarzo, "Corporate Finance"
-Around 10 case studies
-A number of related scientific articles, including:
Opler, Tim, M. Saron, & S. Titman, 1997, "Designing Capital Structure to Create Shareholder Value," Journal of Applied Corporate Finance 10.1, 21-32 Bodily, Samuel E., 2005, "Real Options", Darden case study UV0433-PDF-ENG. Froot, Kenneth, David Scharfstein, and Jeremy Stein, 1994, "A Framework for Risk Management," Harvard Business Review 72, (November-December 1994): 59-71. James, Mimi, and Timothy M. Koller, "Valuation in Emerging Markets," McKinsey Quarterly 2000:4
Assessment: Exam (70%, duration: 2 hours and 30 minutes) in the main exam period.
Coursework (20%) and class participation (10%) in the LT.

FM422E
Corporate Finance

This information is for the 2017/18 session.
Teacher responsible: Professor Amil Dasgupta
Dr Dirk Jenter
Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.
Course content:
• Financing
• Valuation
This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies should finance their activities by issuing securities (debt, equity, and convertible claims) and

the interaction of business policy with financial policy. The aim is to understand what factors determine optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisition and initial public offerings. The course interweaves key conceptual material with a series of cases.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: The recommended textbooks for this course are Berk and DeMarzo, Corporate Finance and Higgins, Analysis for Financial Management. Other recommended readings from relevant journal articles will be included in a study pack.
Assessment: Exam (80%, duration: 3 hours) in the main exam period.
In class assessment (20%) in the MT and LT.

FM423E
Asset Markets

This information is for the 2017/18 session.
Teacher responsible: Dr Dong Lou and Dr Igor Makarov
Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.
Course content: • Investments and Securities Valuation
• Portfolio choice and performance evaluation
• Derivatives
The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.
Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 3rd Global Edition, Pearson International, and Bodie, Kane, and Marcus, Investments, 10th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.
Assessment: Exam (80%, duration: 3 hours) in the main exam period.
In class assessment (10%) in the MT.
In class assessment (10%) in the LT.

FM447 Half Unit
Global Financial Systems

This information is for the 2017/18 session.
Teacher responsible: Dr Jon Danielsson
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Finance (part-time) and MSc in Finance and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Students should have a strong background in microeconomics, and be comfortable with formal arguments.
Course content: This course examines the academic and policy debates on the operation of the global financial system. The course will aim to be topical, where the analysis of the issues will be based on economic arguments. The course begins with analysis of systemic risk, followed by an overview of important financial crisis and key institutions. Several theories of financial crises are then developed in some detail, and are assessed by reference to historical experience, The course concludes by analysis of the crises from 2007, including the latest policy and regulatory developments as well as the current situation in the European crisis.
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: Students are expected to attempt the problem sets and essay questions set in the classes.
Indicative reading: Most material will be provided by the book Global Financial Systems (www.globalfinancialsystems.org), by Jon Danielsson, published by Pearson
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

FM472 Half Unit
International Finance

This information is for the 2017/18 session.
Teacher responsible: Dr Elisabetta Bertero
Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Private Equity, MSc in Financial Mathematics and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.
(Permission required from the course leader). Interested graduate students enrolled in any programme not listed above must email the course leader to ask for permission. The email must include the list of finance and economics courses taken during their previous studies and the motivation for wanting to take the course. Only once this specific information is received by the course leader, the course request on Lse For You will be considered.
Course content: This course examines key issues in international finance, focusing on recent developments and incorporating theoretical, empirical, policy and institutional dimensions. The course uses exchange rates as a unifying theme and considers them from four perspectives: theory, policy, global risk and international investors. The course examines models of exchange rate determination and related empirical evidence. It analyses the

choice and coordination of exchange rate regimes, including the European Monetary Union. It examines exchange rates as one of the sources of global financial instability. It considers the risk exposure for investors arising from exchange rate volatility and its hedging with currency instruments. The course also explores the links, in each area, to current developments such as the internationalisation of the Chinese Renminbi, the EMU sovereign debt crisis, the recent financial crisis and global imbalances, forex carry trades and the high volatility of short term exchange rates.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students are required to undertake a group research project on a given topic in international finance.
Indicative reading: A selection of journal articles; background reading from a textbook such as Keith Pilbeam International Finance (Palgrave, 2013, 4th edition)
Assessment: Exam (100%, duration: 2 hours) in the main exam period.

FM475 Half Unit
Financial Management (modular)

This information is for the 2017/18 session.
Teacher responsible: Prof Daniel Ferreira CON2.07
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
The information in this course guide pertains to the 2017-2019 cohort.
Course content: The aim of the course is to provide a comprehensive overview of firms' financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students to address topical issues that modern corporations face. In particular, the course builds on concepts in business strategy, valuation techniques, and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial management, the course focuses on corporate finance and business valuation. Topics such as mergers and acquisitions and initial public offerings will also be covered.
Teaching: Taught during module three - 10 interactive lectures of 3 hours each (9-21 April 2018):
1. Introduction to financial management
2. Debt and equity
3. Capital structure – Case discussion
4. Tax shields – Case discussion
5. Capital markets and the pricing of risk
6. Initial public offerings – Case Discussion
7. Valuation – Discounted Cash Flow techniques
8. Valuation – Practical aspects
9. Mergers and Acquisitions
10. Valuing companies – Case discussion

Formative coursework: Feedback on class participation.
Indicative reading: The recommended textbook for this course is Higgins, Analysis for Financial Management, 9th Edition and a pack of business case studies.
Assessment: Essay (20%, 1500 words), project (65%) and class participation (15%).
The essay is an assessed 1,500 word group essay.
The project is a take-home individual project.

FM4T4E Half Unit
Corporate Investment and Financial Policy - Dissertation

This information is for the 2017/18 session.
Teacher responsible: Prof Ulf Axelson
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Course content: See entry for FM414E.
Teaching: 30 hours of seminars in the LT.
Assessment: Dissertation (70%, 6000 words) and coursework (30%) in the ST.
6,000 word dissertation in lieu of examination (70%) on a topic to be agreed with the course teacher, and coursework (30%). The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Deadline is June 2018.

FM4T6E Half Unit
Topics in Portfolio Management - Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Michela Verardo
Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.
Pre-requisites: Students must have completed Topics in Portfolio Management (FM406E).
Course content: See entry for FM406E.
Teaching: 30 hours of seminars in the MT.
Assessment: Essay (90%, 6000 words) and coursework (10%) in the ST.
6,000 word dissertation in lieu of exam (90%) on a topic to be agreed with the course teacher, and coursework (10%). The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Deadline is June 2018.

FM4T7 Half Unit
Global Financial Systems - Dissertation

This information is for the 2017/18 session.
Teacher responsible: Dr Jon Danielsson
Availability: This course is available on the MSc in Finance (part-time) and MSc in Finance and Economics. This course is not available as an outside option.
Course content: See entry for FM447
Teaching: 20 hours of lectures and 10 hours of seminars in the MT.
Assessment: Dissertation (100%, 6000 words) in the ST.
6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Deadline is June 2018.
Please note that MSc Finance and Economics students can submit a dissertation of 6,000-10,000 words.

FM4T8E Half Unit

GV478E Half Unit
Political Science and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Prof Simon Hix CON3.07
Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.
Course content: This course introduces students to core concepts and problems in politics and policymaking. Among the questions we address: What determines political preferences and electoral outcomes? How are interests represented? How do political institutions shape policy outcomes? We focus on tools that students should be able to apply broadly in analyzing the political world.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination will be provided.
Indicative reading: Analyzing Politics: Rationality, Behavior and Instititutions by Kenneth Shepsle (W.W. Norton, 2nd edition, 2010) is an excellent starting point and reference for many topics. A full reading list will be distributed at the beginning of the course.
Assessment: Essay (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after the module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

GV488E Half Unit
Regulatory Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Martin Lodge CON3.08
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.
Course content: The course examines contemporary issues in regulation in OECD countries and elsewhere. The focus is on exploring competing approaches towards regulation in the context of different domains, ranging from utility, environmental to health and safety regulation. Particular attention will be paid to issues such as institutional design, enforcement and compliance, as well as the relationship between politicians, regulators, business and other actors. Topics include institutional design, development and regulation, standard-setting, enforcement, 'better regulation', and accountability.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination opportunity will be provided.
Indicative reading: Managing Regulation by Martin Lodge and Kai Wegrich (Palgrave, 2012) introduces key themes. A different introduction is Understanding Regulation by Robert Baldwin, Martin Cave and Martin Lodge (Oxford University Press, second

edition, 2012)
Assessment: Essay (50%, 2000 words) and online assessment (50%).
A 2,000 word assessed essay (50%) and an online examination (50%). Please note that online examinations take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the EMPA/ Executive MPP programme inductions.

GV4E4E Half Unit
Fiscal Governance and Budgeting

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner
Dr Paolo de Renzio
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.
Course content: The course examines contemporary issues in fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.
Teaching: A one-week modular teaching block.
Formative coursework: One mock examination opportunity will be provided.
Indicative reading: Fiscal Governance in Europe by Mark Hallerberg, Rolf Strauch and Jürgen von Hagen (Cambridge University Press, 2009) introduces an important theoretical approach and is a good reference for several topics. The OECD Journal on Budgeting http://www.oecd.org/gov/budget/journal discusses current issues in applied budgeting. A full reading list will be distributed at the beginning of the course.
Assessment: Essay (50%, 2000 words) and online assessment (50%).
Please note that online examinations take place on the third Friday after module teaching concludes. Essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

GV4G8E Half Unit
Public Policy in Practice Workshop I (EMPA)

This information is for the 2017/18 session.
Teacher responsible: Dr Daniel Sturm 32L2.25 and Dr Joachim Wehner CON4.10
Availability: This course is compulsory on the Executive Master of Public Administration . This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One optional mock policy exercise will be provided.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.
Assessment: Project (100%, 3000 words).
Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

GV4G9E Half Unit
Public Policy in Practice Workshop II (EMPA)

This information is for the 2017/18 session.
Teacher responsible: Dr Daniel Sturm 32L2.25 and Dr Joachim Wehner CON4.10
Availability: This course is compulsory on the Executive Master of Public Administration . This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One optional mock policy exercise will be provided.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.
Assessment: Project (100%, 3000 words).
Assessment will consist of a 3,000 policy exercise. Policy exercises are usually due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

GV4H8E Half Unit
Executive MPP Capstone Project

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have a period of approximately 3 months to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem.
Teaching: Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.
Formative coursework: Feedback will be provided on presentations of work-in-progress during the project duration.
Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary reading includes: Charles E. Lindblom and David K. Cohen, Social Science and Social Problem Solving (New Haven: Yale University Press, 1979; Martha S. Feldman, Order Without Design: Information Production and Policy-making (Stanford, CA: Stanford University Press, 1989); Ray Pawson, Evidence-based Policy: A Realist Perspective (London: Sage, 2006); Office for Government Commerce Common Causes of Project Failure (London: OGC, 2004); Strategy Survival Guide (London: Prime Minister's Strategy Unit. July 2004; C. R. Cook, Just Enough Project Management

(McGraw-Hill, 2004); J. E. McGrath and F. Tschan, Dynamics in Groups and Teams: Groups as Complex Action Systems, chapter three in M. S. Poole and A. H. Van de Ven (eds) Handbook of Organizational Change and Innovation (Oxford University Press, 2004).
Assessment: Project (100%, 10000 words).
The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.
1) Presentation and submission of the project report to the client organisation. 20% of the marks are assigned by the client organisation.
2) Group project report. The main body of the report may not exceed 10,000 words and will be read by academic markers whose assessment will count for 60% of the final grade.
Additionally, each group member must write a personal reflection on their contribution to the group's work, to be submitted alongside the report. The reflection should be no more than 600 words, and should include specific details of the student's contributions to the project. The reflections should not be included in the report submitted to the client.
3) The final 20% of the marks are allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties) and (ii) group working and self-management as a team.

GV4J1E Half Unit
Public Policy in Practice Workshop I (EMPP)

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.
Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPP to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.
Teaching: A three-day modular teaching block.
Formative coursework: One mock policy exercise will be offered.
Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.
Assessment: Essay (100%, 3000 words).
Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

GV4J2E Half Unit
Public Policy in Practice Workshop II (EMPP)

This information is for the 2017/18 session.
Teacher responsible: Dr Joachim Wehner and Dr Daniel Sturm
Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no pre-requisites for this course.

GV4V8E Half Unit
Policy Paper

This information is for the 2017/18 session.
Teacher responsible: Dr Daniel Sturm and Dr Joachim Wehner
Participating students will be assigned an academic supervisor with relevant knowledge of the topic and supervision experience.
Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.
Pre-requisites: There are no formal pre-requisites but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors.
Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. Executive MPA/ EMPP students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with an Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.
Teaching: The student's Academic Adviser will provide advice and guidance on this piece of work as required during the duration of the assessment.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, LT and ST.
A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted well in advance of the assessment deadline. Students may only change their topic thereafter with the agreement of the Academic Adviser/ Programme Directors. Students will be given feedback on their proposal.
Indicative reading: A suitable programme of reading will be developed in consultation with the Academic Adviser. Useful background readings may include: Eugene Bardach, A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving, 4th ed. (CQ Press, 20121); Catherine F. Smith, Writing Public Policy: A Practical Guide to Communicating in the Policy Making Process, 3rd ed. (Oxford University Press, 2012). Charles Lindblom and David K. Cohen, Usable Knowledge: Social Science and Social Problem Solving (Yale University Press, 1979). Philip E. Tetlock, Expert Political Judgment: How Good Is It? How Can We Know? (Princeton University Press, 2006).
Assessment: Other (100%) in the MT, LT and ST.
6,000 word policy paper

HP4A1E Half Unit
Financing Health Care

This information is for the 2017/18 session.
Teacher responsible: Prof Elias Mossialos COW.4.08
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.
By the end of the course students will have:
- a grasp of the economic, political and philosophical concepts relevant to any discussion of health financing policy
- a good understanding of how financing arrangements affect the achievement of key health financing policy goals such as financial protection, equity in financing and equity of access to health care, incentives for efficiency and quality in the organization and delivery of health services, administrative efficiency, transparency and accountability
- the skills to critically assess current health financing arrangements and options for reform
- an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: 11 hours of lectures in total and 4 seminars (1.5 hours each).
Formative coursework: Students will sit a progress test in their own time. This will involve writing an essay under exam conditions. Their seminar leader will mark the essay and provide a mark and written feedback.
Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009)
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle. They will be expected to read these prior to the first day of class.
Assessment: Take home exam (100%) in the ST.

HP4A2E Half Unit
Health Administration and Management

This information is for the 2017/18 session.
Teacher responsible: Dr Irene Papanicolas COWG.04
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: This course is intended to provide the student an orientation and overview on managing organizations within health systems. The governance, execution, information management, quality of care, and sustaining human resources will be discussed, including an examination of the uses of accounting and other forms of reporting to manage health services. This is an introductory course, appropriate for students with no formal inpatient health care management experience. The course will cover the following topics: principle responsibilities of a health care system and organizations within the system; issues and strategies for enabling health care organizations to be responsive to their environment; concepts for supporting and implementing governance decisions; strategies for performance measurement and information, and analytical activities related to planning, finance, and information needs; characteristics and development of systems to assure quality of clinical services.
Teaching: 10 hours of lectures and 10 hours of seminars.
Formative coursework: Formative essay.
Indicative reading: The following are some of the background readings for the course:
Julian Le Grand, The Other Invisible Hand; Woodstock: Princeton University Press, 2007, David Hunter, The Health Debate, The Policy Press, 2008., Henry Mintzberg, "Structures in 5's: A Synthesis of Research on Organization Design," Management Science, 26 (3): 322-341 (1980)., C.S. Chapman, D.J. Cooper and P. Miller (eds), Accounting, Organizations and Institutions. Oxford: Oxford University Press.
Assessment: Essay (100%, 3000 words) in August.

HP4A3E Half Unit
Resource Allocation and Cost-effectiveness Analysis

This information is for the 2017/18 session.
Teacher responsible: Mr Gareth Hopkin
In addition, Professor M Drummond (Professor of Health Economics, University of York) will be teaching on the course.
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: The aim is to give an overview of the theory underlying economic evaluation as applied to the health care sector; to consider the different forms of economic evaluation; to give an understanding of the techniques associated with economic evaluation as applied to health care; to give an understanding of the interpretation of the results gained from economic evaluation; to provide the main practical tools necessary to undertake economic evaluation using computer-based programs. The course will cover the following topics: Conceptual rationales for economic evaluation in the health care sector (Pareto efficiency, Social Welfare, extra-welfarism and decision-making); Introduction to the methods of economic evaluation: cost-effectiveness analysis, cost-utility analysis, and Cost-benefit analysis; Cost data; Incremental cost-effectiveness analysis; Quality Adjusted Life Years gained and other outcome measures; Discounting; Uncertainty and sensitivity analysis; Economic evaluation and clinical trials; Policy decision-making using economic evaluation.
Teaching: 10 hours of lectures and 10 hours of seminars, including computer-based practical workshops.
Formative coursework: Mock exam given after teaching session with feedback from course organiser.
Indicative reading: M Drummond et al, Methods for the Economic Evaluation of Health Care Programmes, Oxford, OUP, 2015, fourth edition. M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, Oxford, OUP, 2002. Gray, A. Clarke, P.M, Wolstenholme, P., Wordsworth, S. Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation), Oxford, OUP, 2011.
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.
Assessment: Take home exam (100%) in August.

HP4A4E Half Unit
Health Economics

This information is for the 2017/18 session.
Teacher responsible: Prof Alistair Mcguire COW4.05
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: Distinction between health and health care. Nature of health care as an economic commodity. How markets and insurance markets work, and how they can fail for health care and health insurance.. Incentive mechanisms and principal-agent relationships in health care. Yardstick competition and Diagnostic Related Group payment schemes. Labour markets in health care. Economic evaluation as a regulatory tool.
Teaching: 12 hours of lectures and 10 hours of seminars in the MT.
Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, The Economics of Health and Health Care (3rd edn), Prentice Hall, 2001; B McPake, L Kumaranayake & C Normand, Health Economics - An International Perspective, Routledge, 2002.
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.
Assessment: Take home exam (100%) in the ST.

HP4B1E Half Unit
Pharmaceutical Economics and Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Panagiotis Kanavos COW3.08
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: The aim of this course it to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly.

- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: The course will comprise 10 x 1-hour interactive lectures, 1 x 1-hour revision session and 5 x 2-hour interactive seminars, where students will discuss specific case studies.
Formative coursework: A 2000 word formative essay, to mirror an exam question, to be written during seminar time.
Indicative reading: E Mossialos, M Mrazek & T Walley (eds), Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality, Buckingham, Open University Press (2004); S O Schweitzer, Pharmaceutical Economics and Policy, Oxford University Press (2006); W S Comanor, 'The Political Economy of the Pharmaceutical Industry', Journal of Economic Literature, XXIV (September): 1178-1217 (1986); F M Scherer 'The Pharmaceutical Industry', Chapter 25, in: A J Culyer & J P Newhouse (Eds), Handbook of Health Economics, Vol 1, Amsterdam, Oxford, Elsevier, 2000.
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.
Assessment: Take home exam (100%) in the ST.
This is the same course as SA427 Pharmaceutical Economics and Policy (H) but it has different teaching and assessment arrangements.

HP4B2E Half Unit
Health Care Quality Management

This information is for the 2017/18 session.
Teacher responsible: Dr Irene Papanicolas COW.G.04
This course will be led by Dr. Michael Holland, Medical Director and Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: An introduction and overview of quality improvement methodology as used in healthcare settings internationally. The course will cover the following areas:
1) History of quality management: The course will start with an overview of key theories in quality management such as those described Taylor, Shewhart, Deming and Juran. An overview of quality assurance systems used in healthcare, such as ISO 9000, Magnet, Baldridge award and their role in quality improvement. It will also include a discussion and overview of value-based healthcare.
2) A critical assessment of the mainstream schools of thought of quality as part of the production process - this will include a study of the relationship between supply chain procurement management and quality as well as the requirements for good production models and the critique of evidence-based decision-making in the clinical setting
3) Quantitative methods in quality management - This course will examine a number of tools for quality management purposes - both how to do them as well as how they fit into the various schools of thought on quality management. It will cover statistical process control which is a method of statistical analysis of time series data that is used in quality management. This method shows whether there is variability in processes and gives the user an ability to both measure improvements and declines in performance of both processes and outcomes and to understand whether processes are performing within acceptable limits. An overview of the quality improvement methodology known as Design of Experiments will also be given. The role of case mix adjustment in quality assessment will also be discussed.
4) Process Mapping - Understanding the value and power of mapping processes both at a systems level and at the individual process level. They will also be given an example of a process map from a healthcare environment to work on optimising.
5) Theories of capacity and flow management and examples of this in both in-patient and outpatient settings will be discussed. This will also include how DRG/HRG payment has a role within organisations of capacity management.

6) A critical overview of Lean, Six Sigma and Model for Improvement. While these models can be useful in healthcare management, these are not deep philosophies of organisation and many of the things which make healthcare unique (e.g. asymmetry of information, difficulty of measuring quality, patient behaviour and societal preferences for fairness) are sometimes not accounted for in these models.
Teaching: 5 lectures (5 x 2 hours) and 5 workshops (5 x 2 hours). The 5 workshops will focus on analysing case studies with of view of giving students a practical understanding of approaches to quality management in healthcare settings.
Formative coursework: A case study will be provided for the students to analyse and write an essay answering questions relating to it. Feedback will be provided on this essay by the seminar leader.
Indicative reading: Donabedian, A. (1966). "Evaluating the quality of medical care." The Millbank Memorial Fund Quarterly 44(3): 166-203. Hackman, J. Richard, and Ruth Wageman (1995), "Total Quality Management: Empirical, Conceptual, and Practical Issues," Administrative Science Quarterly 40 (2): 309-342. Garvin, David A. "Competing on the Eight Dimensions of Quality." Harvard Business Review 65, no. 6 (November-December 1987). Going Lean in Health Care. IHI Innovation Series white paper. Cambridge, MA: Institute for Healthcare Improvement; 2005. Langley, Moen, Nolan et al., 2009, The Improvement Guide, 2nd Edition (Wiley). Morton, A. and J. Cornwell (2009). "What's the difference between a hospital and a bottling factory?" British Medical Journal 339: 428-430. Crossing the Quality Chasm - Institute of Medicine, 2001. S Spear and H Kent Bowen; Harvard Business Review, Sept- Oct 1999; 97-106; Decoding the DNA of the Toyota Production system. To Err is Human - Institute of Medicine, 2000. Understanding variation - D Wheeler, 1993. The Machine that changed the world - Womack JP, Jones DT and Roos D, 2007. M.E. Porter and T. H. Lee; Harvard Business Review, Oct 2013; The Strategy That Will Fix Health Care
Assessment: Essay (50%, 2500 words) and essay (50%, 2500 words).
Two 2,500 word case study essays (50% each)

HP4B3E Half Unit
Measuring Health System Performance

This information is for the 2017/18 session.
Teacher responsible: Dr Irene Papanicolas COWG.04
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.
After taking this course students are expected to:
- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: 2 lectures (2 hours), 4 lectures (1.5 hours) and 5 seminars (2 hours).
Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.
Indicative reading: Papanicolas I and Smith PC (Eds), Health System Performance Comparison: An agenda for policy, information and research. Maidenhead: Open University Press, 2013. PC Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), Performance measurement for health system improvement: experiences, challenges and prospects. Cambridge University Press, 2010; Institute of Medicine, Crossing the Quality Chasm: A New Health System for the 21st Century. Washington, DC, National Academies Press, 2001; OECD, Measuring up: improving health system performance in OECD countries. Paris: OECD, 2002. World Health Organization (WHO), (2000) The world health report 2000:Health systems: Improving performance, Geneva: WHO Publications
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.
Assessment: Essay (75%, 3000 words) and in class assessment (25%).
In-class assessment (25%) and assessed piece of coursework (75%). In-class assessment on a presentation where students apply principles taught to construct an argument around a theory-based question informed from real world data. They would be assessed on their presentation as well as their ability to apply the conceptual material taught in class to practical data. Coursework is the production of a report where students are asked to evaluate and interpret key performance data for a particular country.

HP4B4E Half Unit
Principles of Evidence-Based Medicine and Clinical Trials

This information is for the 2017/18 session.
Teacher responsible: Dr Grace Lordan OLD.2.26
In addition, Professor Allan Hackshaw (Deputy Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: A large amount of medical research is conducted, with variable quality. Also, health claims are frequently reported in the media, and it can be difficult to determine which is based on reliable evidence and which is not. It is therefore essential to be able to interpret study results and conclusions appropriately, in order to change clinical practice or develop public health policy. This is achieved by Evidence-Based Medicine. The module will enable students to evaluate risk factors for disease or early death, and methods of disease prevention or treatment.
The module will provide students with practical skills in the following key areas:
- Understanding the different types of research that can be conducted in humans and their strengths and limitations, i.e. observational studies and a focus on clinical trials.
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports.
- Examining the efficacy and safety of health care interventions (an important part of a complete health economic evaluation of a clinical trial).
- Familiarity with systematic reviews (i.e. how several studies are combined, and the importance of looking at the evidence as a whole).

Teaching: 10 interactive seminars/workshops, each 2-3 hours long.

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. However, detailed written answers are provided, so the students can access these if they undertake any of the exercises after the contact week. The tutor is also available for one-to-one email contact with any student.
Indicative reading: - Hackshaw A. A concise guide to clinical trials. BMJ Books, Wiley-Blackwell, first edition 2009.
- Hackshaw A. A concise guide to observational studies in healthcare. BMJ Books, Wiley-Blackwell, first edition 2015.
- Greenhalgh T. How to Read a Paper: The Basics of Evidence-Based Medicine. BMJ Books, Wiley-Blackwell, fourth edition, 2010.

Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle.
Assessment: Other (50%) and other (50%) in the LT.
There will be two pieces of coursework based on a clinical trial of an intervention or a risk/causal factor, in the form of:
- a written assignment in the form of a PowerPoint slide deck (about 25 slides) and a statement of 400 words of further discussion and conclusions, based on a published paper and associated media news article of the paper (50%)
- 4-5 questions specific to a published paper with answers requiring 1-3 paragraphs each (50%).

HP4B5E Half Unit
Statistical Methods in Health Care Economic Evaluation

This information is for the 2017/18 session.
Teacher responsible: Dr Maria Raikou
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.
Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.
Teaching: 13 hours of lectures and 8 hours of seminars (computer based)
Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.
Indicative reading: The following are basic reading for the course: M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, OUP, 2002; M Drummond, B O'Brien, G Stoddart & T Torrance, Methods for the Economic Evaluation of Health Care Programmes, 2nd edn, OUP, 1997; M Gold, J Siegel, L Russell & M Weinstein, Cost-Effectiveness in Health and Medicine, OUP, 1996; M Johannesson, Theory and Methods of Economic Evaluation in Health Care, Kluwer, 1996; P Johansson, Evaluating Health Risks: An Economic Approach, CUP, 1995.
Students will be given access to essential readings before the course begins through the pre-sessional reading programme on Moodle, which they will be expected to read prior to the first day of class.
Assessment: Take home exam (100%).
This is the same course as SA4C3 Statistical Methods in Health Care Economic Evaluation (H) but it has different teaching and assessment arrangements.

HP4B6E Half Unit
Economics of Health and Wellbeing

This information is for the 2017/18 session.
Teacher responsible: Dr Grace Lordan M 2.26
Some lectures will be taken by Professor Andrew Clark (http://www.parisschoolofeconomics.com/clark-andrew/index.html#DEA). Andrew currently has a partial appointment at the LSE in CEP.
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Pre-requisites: To have progressed from year 1 of the MSc in Health Economics, Policy and Management into year two students will have passed HP4A2E Health Administration and Management, HP4A3E Resource Allocation and Cost-effectiveness Analysis, HP4A1E Financing Health Care and HP4A4E Health Economics.
Course content: Overall the lectures will follow the following structure:
1. Lecture 1 Introduction
2. Lecture 2 Measurement
3. Lecture 3: Determinants of wellbeing
4. Lecture 4: Determinants of health with a focus on the income/health gradient
5. Lecture 5: Determinants of unhealthy behaviours (drinking, smoking, drug taking, obesity) with a focus on peer effects
6. Lecture 6: Causal Evidence on the determinants of health and wellbeing

In addition, we will have four seminar sessions that will complement these lectures.
This course is being convened by Dr Grace Lordan and will introduce students to the economics of health and wellbeing. Focus will be on the health or wellbeing production function, and the related economics literature. In particular, the course will cover how health and wellbeing are measured in the literature and factors that determine these outcomes. Attention will be paid to defining what a causal effect is and specifying an appropriate health production function. In this regard the student can expect to become familiar with some basic econometrics. In terms of measurement, we will consider the value of subjective versus objective outcomes. We will discuss the human development index and the Millennium development goals. In addition, the course will review the main determinants of physical health, including inequality. (Un)healthy behaviours will also be covered, including drug taking, obesity and smoking. Some attention will be paid to the role of peer effects in this regard. The course will also cover well-being, income comparisons and the Easterlin Paradox. This component will be taken by Professor Andrew Clark who is an affiliate with the Wellbeing group at the CEP. Overall, students taking this course can expect to gain insight as to the challenges faced by policy makers in altering the health and wellbeing outcomes of a nation. Students will also gain some insight into policies that are likely to be the most fruitful. Students will also become more familiar with a literature that considers individual health and wellbeing. This course will be complementary to the content covered in Advanced Health Economics. However, there is no overlap and this course can also be taken on its own.
Teaching: 14 hours of lectures and 8 hours of seminars in the ST. This course will be a combination of lectures- where students learn theory- and seminars- where students apply what they have learned.
Formative coursework: Students will be given a mock exam on the last day and will receive feedback via a remote session.
Indicative reading: Main Readings:
Books:
1. The Economics Of Excess (2011) by Harold Winter
2. Mastering 'Metrics: The Path from Cause to Effect (2014) by Joshua D. Angrist, Jörn-Steffen Pischke
3. The Great Escape: Health, Wealth, and the Origins of Inequality (2013) Angus Deaton (for lecture:

Articles:
1. Healthy Bodies and Thick Wallets: The Dual Relation between

Health and Economic Status James P. Smith The Journal of Economic Perspectives, Vol. 13, No. 2 (Spring, 1999), pp. 145-166
2. Preston, S. H (1975). "The Changing Relation between Mortality and Level of Economic Development". Population Studies 29 (2): 231–248.)

Assessment: Take home exam (100%) in the MT.

HP4B7E Half Unit
Advanced Health Economics

This information is for the 2017/18 session.
Teacher responsible: Prof Alistair Mcguire COW4.05
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: The course will cover: international comparisons of health care expenditure, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), equity in health care, health behaviour and an introduction to econometric analysis applied to health care data.
Teaching: 19 hours of lectures.
Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, Handbook of Health Economics Volumes 1A &1B, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, Health Economics, (OUP, Oxford).
Assessment: Essay (100%, 3000 words).

HP4B8E
Health Care Negotiations

This information is for the 2017/18 session.
Teacher responsible: Dr Panagiotis Kanavos COW3.08
Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Pre-requisites: Students must have completed Financing Health Care (HP4A1E).
Course content: Lectures will cover the following material: The dynamics of health care stakeholders and the shifting balance of power among them; Introduction to the concept of negotiations and principles of game theory (principles of game theory, definition and properties of a Nash equilibrium; static and dynamic games; games with complete and incomplete information); the dilemma of complex, discontinuous, multiparty health care negotiations; the pepulator pricing exercise; the seven elements: defining success in health care negotiations; management as negotiation: frameworks and tools for analysing decision processes; the seven elements: defining success in health care negotiations; value creation and allocation in health care systems; when the people are the problem (partisan perceptions exercise; the three perspectives; the ladder of inference; the elements of relationship management).
Seminars will be interactive drawn based on case studies from specific health care environments (e.g. hospitals, drug coverage decision; health technology assessment; conflict between management and clinical excellence), and use frameworks such as Choice Analysis (a currently unresolved negotiation in which another party has or is expected to reject a proposal), Complex Problem Solving (a currently unresolved and complex situation involving so many parties and issues that the situation is unclear or confusing and our ability to influence the situation is in doubt), Rapport Management (one or more currently unresolved negotiations in which resolution of a troubled personal or corporate relationship with the key person(s) on the other side constitutes one of the major requirements or aspirations for agreement), Decision Rights Analysis (a live, unresolved task of persuasion involving one or more individuals negotiating in their capacity as employees of a large health care provider), and Value Creation (a complex, live, unresolved negotiation where lots of differing interests are implicated by the subject matter and the parties do not share the same interests or have the same priorities).
Teaching: The course will comprise 10 x 1-hour interactive lectures, 1 x 1-hour revision session and 5 x 2-hour interactive seminars, where students will discuss specific case studies.
Formative coursework: Students will be given a case study– reflecting a real-world situation - by the end of lecture 4 and will be asked to come up with a credible strategy/plan, which they will need to write up (2,000 words), submit and present during seminars.
Indicative reading: 1. Camerer C., Behavioural game theory: Experiments in strategic interaction, 2003.
2. Dunlop J.J., Collective bargaining: Principles and cases, 1958.
3. Fisher R, Patton B., Getting to Yes: Negotiating agreement without giving in, 2011.
4. Ury W., Getting to Yes, 1991.
5. Ury W., Getting past No, 1993.
6. Bolte Taylor J., My stroke of insight: a brain scientist's personal journey, 2009.
7. Kelly W., We have met the enemy and he is us, 1995.
8.de Caillieres M., On the manner of negotiating with Princes: from sovereigns to CEOs, envoys to executives - classic principles of diplomacy and the art of negotiation, 2000.
9. Tan G., negotiation by the book: 101 ageless principles made practical, 2011.
10. Shell R., Bargaining for advantage: Negotiation strategies for reasonable people (2nd edition), 2006.
11. Guasco M.P., Principles of negotiation: Strategies, tactics, techniques to reach agreement, 2007.
12. Brams S.J., Game theory and politics, 2011.
Assessment: Project (100%, 4000 words).
The project is a group project, where small groups will be allocated a case study to work on, but individual group members will be responsible for submitting their own 4,000 word project individually (100%).

HP4B9E Half Unit
Dissertation in Health Economics, Policy and Management

This information is for the 2017/18 session.
Teacher responsible: Dr Grace Lordan OLDM2.26
Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: The aim of the dissertation is for students to pursue an independent piece of research that will contribute to the field of health economics, health policy or health management. The contribution of the work to the chosen field must be made clear. The output will be a piece of work of 5000 words or less that is written in an article format that is suitable for submission to a peer reviewed journal. Students must obtain the approval of their supervisor before embarking on any research.
Arrangements for supervision
Students' tutors will act as their dissertation supervisor in the first

instance. If the specific topic a student wishes to cover for his/her dissertation requires a different supervisor, a MSc programme director can arrange this change. The dissertation supervisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.
Teaching: The dissertation process is supported by three teaching sessions.
Formative coursework: Students will have an opportunity to have one draft of their thesis proposal read by their tutor in December of Year 2. In addition, they will have an opportunity to have a 1000 word outline of their thesis read by their tutor.
Assessment: Dissertation (100%, 5000 words).
The dissertation paper copies must be handed in to the Department by the specified deadline of the second year of the MSc programme. An electronic version of the dissertation must be also submitted. Penalties will be applied to any late submission. The world limit for the dissertation is 5,000 words (excluding references and tables) and it must be in a journal article format.

HP4C1E Half Unit
Economic Analysis for Health Policy

This information is for the 2017/18 session.
Teacher responsible: Professor Andrew Street
Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: The course will serve as an introduction to major developments in the economics of health and health care. It will provide medical practitioners with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the changing nature of health care supply and delivery and the interactions between patients and health care systems. It will review major changes in the financing and delivery of health care and both domestic and international efforts to control health care costs and improve efficiency.
Seminar sessions will focus on current policy debates in the area of health and health care drawing on the theory and evidence from the lectures augmented by current readings from both academic and popular sources.
Teaching: 15 hours of lectures and 10 hours of seminars in the MT. This will include 10 x 90 minutes of interactive lectures and 5 x 120 minutes of case-study based seminars.
Formative coursework: An 800-word "mock" blog entry for The Conversation, which covers policy-relevant issues and often has academic contributors. A series of topics will be provided to students to choose from.
Indicative reading: Pauly M. The economics of moral hazard, American Economic Review, June 1968, 58(3). Coupled with Gladwell M. The Moral Hazard Myth. The Bad Idea Behind our failed Health-care System [www.gladwell.com/archive.html]. Some simple economics of mandated benefits, American Economic Review, May, 1989. Thomson S et al. Financing Health Care in the European Union, European Observatory on Health Systems and Policies, 2009. Skinner JS, Chandra A, Goodman DC, Fisher ES. The elusive connection between health care spending and quality. Health Affairs 2009;28(1):w119–23. Coupled with Gawande A. The cost conundrum, The New Yorker, 1 June 2009, Currie J. Healthy, wealthy, and wise? Socioeconomic status, poor health in childhood, and human capital development, Journal of Economic Literature, 2009;47(1):87–122. Stabile M, Thomson S et al. Containing health care costs in high-income countries: evidence from four nations, Health Affairs 2013;32(4):643–652. Cutler D. Your Money or Your Life, Oxford University Press, 2005. A selection of articles from the popular press by high quality journalists and public intellectuals on policy issues in health and health care.
Assessment: Other (70%) and other (30%).
The two assessments will be:
1. "Journal referee report" for a health economics paper, which will include 2 elements: a summary and critical appraisal of the paper (1500 words) and a peer-review report with suggestions for improving the paper (1000 words). This assessment will evaluate the students' ability in summarising, applying, and critically appraising the relevance of health economics concepts to a health policy.
2. Individual-based video presentation. Students will be asked to record a video on their own on a topic that will be assigned to them. This will assess the students' ability to describe, summarise, apply, critically appraise, and communicate the concepts learned in class to a particular case study.

HP4C2E Half Unit
Quality and Outcomes in Cardiovascular Sciences

This information is for the 2017/18 session.
Teacher responsible: Mr Huseyin Naci
Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: Against a backdrop of great technological advances and delivery system innovations, healthcare systems are facing daunting challenges. Over the past half-century, research on cardiovascular diseases has manifested remarkable advances in the prevention and treatment of cardiovascular diseases. Yet, great challenges remain, primarily due to a lack of strong research evidence about how best to improve the quality, outcomes, and efficiency in health systems with a focus on cardiovascular diseases. Outcomes research aims to produce such evidence.
In addition to briefly reviewing key epidemiological trends in cardiovascular diseases in Europe and globally, this course will introduce key 'evidence-practice' gaps in cardiovascular diseases. The first part of the course provides an overview of the definition of quality, its key components, and its measurement in different health care systems. The second part offers a critical perspective on the literature evaluating quality improvement interventions focused on the cardiovascular disease field. The third part focuses on the basics of study design for evaluating quality improvement interventions, programmes, and policies, distinguishing between strong and weak research designs.
The intended learning outcomes of this course are the following:
- Describe the epidemiological trends in cardiovascular disease
- Summarise the primary components of quality in health care
- Explain the main limitations of the literature evaluating quality improvement interventions
- Define the principal threats to validity in studies evaluating quality
- Design an evaluation strategy for a quality improvement policy or intervention in a group setting
- Critically evaluate empirical evaluations of quality and outcomes in health care research in oral and written form

Teaching: 12 hours of lectures and 10 hours of seminars in the MT. 1 hour of help sessions in the ST.
Formative coursework: Formative feedback on group presentations
Indicative reading: Krumholz HM. Outcomes research: generating evidence for best practice and policies. Circulation 2008;118:309–18. Ellwood PM. Shattuck lecture – outcomes management: a technology of patient experience. N Engl J Med 1988; 318: 1549–56. Clancy CM et al. Outcomes research: measuring the end results of health care. Science 1998; 282: 245–46. McGlynn EA. Six challenges in measuring the quality of health care. Health Affairs 1997;16.3:7–21. Chalkidou et al. Comparative effectiveness research and evidence-based health policy: experience from four countries. Milbank Quarterly 2009:87.2: 339–67. Cook TD. et al (1979). et al. Randomized, controlled trials, obser vational studies, and the hierarchy of research designs. N Engl J Med. 2000;342:1887–92.
Assessment: Essay (100%, 3000 words) in the LT.

HP4C3E Half Unit

Economic Evaluation in Health Care

This information is for the 2017/18 session.
Teacher responsible: Professor Mireia Jofre-Bonet
Dr. Victoria Serra-Sastre
Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: Health care decision makers are often faced with the challenges of resource allocation. Economic evaluation is used to formalize the process of decision-making on the basis of costs and benefits associated with multiple alternative scenarios or interventions. Decision makers use evidence from economic evaluation analyses to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health care interventions, as well as define best practices. This course will enable students to understand and apply analytic methods in the economic evaluation of health interventions and provide a strong foundation in the several advanced concepts in economic evaluation, and in particular cost-effectiveness of interventions used in long-term chronic illnesses. The course will provide an overview of the principles and practices of measuring and analyzing costs; and estimating effectiveness in terms of quality-adjusted life years and disability-adjusted life years. Practical topics will include the design and implementation of economic evaluation models and the role of clinical data inputs to inform economic evaluation analyses.
Teaching: 10 hours of lectures, 10 hours of seminars and 5 hours of computer workshops in the MT.
Formative coursework: Students will be expected to produce 1 project in the ST.
Indicative reading: Drummond M et al. Methods for the Economic Evaluation of Health Care Programmes. Oxford, OUP, 2005. Drummond M et al. Economic Evaluation in Health Care: Merging Theory with Practice, Oxford, OUP, 2002. Gray A. Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation), Oxford, OUP, 2011. Weinstein MC et al. Foundations of cost-effectiveness analysis for health and medical practices. N Eng J Med. 1977; 296 (13):716–21. Russell LB et al. The role of cost-effectiveness analysis in health and medicine. JAMA. 1996; 276 (14): 1172–77.
Assessment: Research project (100%) in the LT.

HP4C4E Half Unit

Systematic Review and Meta-analysis

This information is for the 2017/18 session.
Teacher responsible: Dr. Huseyin Naci
Availability: A core course available only for students taking MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences
Course content: Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.
This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.
Learning outcomes:
- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- randomized
- randomized
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 20 hours of seminars and 4 hours of computer workshops in the ST.
Formative coursework:
- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: Cochrane Handbook for Systematic Reviews of Inter ventions (version 5.1.0, updated March 2011). Institute of Medicine. Finding what works in health care: standards for systematic reviews. 23 March 2011. Sutton AJ et al. Methods for Meta-analysis in Medical Research. Wiley, Chichester, UK, 2000. Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. Annals of internal medicine 1997;126(5):376–80. Jansen JP et al. Is network meta-analysis as valid as standard pair wise meta- analysis? It all depends on the distribution of effect modifiers. BMC medicine 2013;11(1):159. Jansen JP et al. Interpreting indirect treatment comparisons and network meta-analysis for health-care decision making: report of the ISPOR Task Force on Indirect Treatment Comparisons Good Research Practices: part 1. Value Health 2011;14(4):417–28.
Assessment: Research project (100%) in the ST.

HP4C5E Half Unit

Using Health Economics to Analyse and Inform Policy and Practice

This information is for the 2017/18 session.
Teacher responsible: Andrew Street
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: The health care sector is extremely complex, and this gives rise to concerns about how the health system should be organised, how incentives should be designed, and how performance should be evaluated. The objective of the course is to give students an introduction to how health systems are constructed, and how the various parts of the system interact; the role of regulation, resource allocation, payment arrangements, and performance measurement; the complexities of evaluating policy and performance; and the contribution that health economics can make to the evaluation and development of health policy. Participants are introduced to variety of econometric methods as the course progresses.
Lecture 1: A bottomless pit? How much should we spend on health care?
Lecture 2: Getting more for our money? Health system productivity
Lecture 3: Evaluating outcomes: are some doctors better than others?
Lecture 4: Paying for complex care
Lecture 5: Costs and quality: is there a trade-off?

Lecture 6: Is it worth paying for performance?
Lecture 7: Public provision in public health systems
Lecture 8: Should doctors hold budgets?
Lecture 9: The economics of integrated care
Lecture 10: WHO has the best health system?
Teaching: 15 hours of lectures and 10 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
The formative assessment is a 500 word outline of the summative assessment essay question.
Indicative reading:
- Deb P and Trivedi PK. Empirical Models of Health Care Use. Chapter 14 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- Cookson R, Dawson D. Hospital Competition and Patient Choice in Publicly Funded Health Care. Chapter 20 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- Chalkley M. Contracts, Information and Incentives in Health Care Chapter 22 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- Rice T. The Physician as the Patient's Agent. Chapter 24 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- Iversen T, Lurås H. Capitation and Incentives in Primary Care Chapter 25 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.

- Propper C, Wilson D. The Use of Performance Measures in Health Care Systems Chapter 31 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- Smith PC, Street A. Concepts and Challenges in Measuring the Performance of Health Care Organizations Chapter 30 Jones A (ed) Elgar Companion to Health Economics, Edward Elgar Publishing, Cheltenham 2006.
- S Folland, A C Goodman & M Stano, The Economics of Health and Health Care(7th edn), Prentice Hall, 2012.
- J Bhattacharya, T Hyde & P Tu, Health Economics, Palgrave Macmillan, 2014.
- J Gruber, Public Finance and Public Policy (5th edn), Macmillan, 2016.

Assessment: Essay (100%, 3500 words) in the MT.
The course will be assessed on the basis of a 3500 word essay on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking. The content of the assessments will lead on from the illustrative case studies that have been used in the seminars.
Formative assessment will be based on a 500 word outline of the essay. This will give students an opportunity to develop their thoughts ahead of the summative assessment and will allow feedback from course teachers that will guide students when they work on their longer answers.
Due to the executive nature of the course and the 1 week nature of the module, this method of assessment will allow students to work away from campus alongside their professional roles.

HP4C6E Half Unit
Cardiovascular Epidemiology and Prevention

This information is for the 2017/18 session.
Teacher responsible: Professor Allan Hackshaw
Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: By the end of this course, students will be able to describe trends in cardiovascular disease incidence, survival and mortality over the last decades in different populations. The course will examine the evidence on well-established and emerging risk factors for cardiovascular disease, including behavioural risk factors such as dietary habits, physical activity, obesity and smoking, as well as metabolic risk factors such as blood pressure, serum lipids and glucose-insulin homeostasis. The course will also introduce students to evidence on the role of environmental risk factors including cultural, social, and physical (built- environment) factors, as major determinants of population-wide cardiovascular risk. The basic principles of nutritional and genetic epidemiology will also be discussed. The course will outline the principles of cardiovascular disease prevention. It will provide students with the skills to interpret findings from cardiovascular epidemiological studies. It will discuss evidence of preventive interventions that have been effective in reducing cardiovascular disease incidence and mortality around the world. The course will also discuss the key challenges for cardiovascular disease prevention over the next decades, with a particular focus on the clinical implications of population ageing for cardiovascular disease prevention.
Each course session will consist of 10 one-hour lectures introducing key concepts of cardiovascular epidemiology, and five two-hour seminars that deal with the key evidence, principles and challenges of cardiovascular disease prevention. Seminars will also discuss strengths and limitations of studies assessing cardiovascular disease prevention interventions, and it will draw clinical implications of specific cardiovascular disease prevention strategies shown to be effective.
Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 2 hours of help sessions in the ST.
Formative coursework: Students will be expected to produce 1 essay in the LT.
One non-assessed essay (2,000 words). This essay will be a first proposal of the final essay of the course, and will consist of a first proposal for an in-depth analysis of a specific cardiovascular disease prevention strategy. This essay should first identify a challenge in cardiovascular disease prevention (e.g., the obesity epidemic, hypertension control, smoking). Students will then review in the essay the available evidence of interventions to address this challenge, and they will critically assess the available prevention strategies to tackle the selected problem. Students will be expected to draw as much as possible on the concepts and principles of cardiovascular disease epidemiology and prevention discussed in class.
Indicative reading: Ford ES, Ajani UA, Croft JB, Critchley JA, Labarthe DR, Kottke TE, Giles WH, Capewell S. Explaining the decrease in US deaths from coronary disease, 1980- 2000. conducted for the U.S. Preventive Ser vices Task Force. Ann Intern Med. 2009;151(7):496–-507.
Assessment: Take home exam (50%) and other (50%) in the LT. The other assessment will be a PowerPoint presentation based on a published journal article with an accompanying media news article.

HP4C9E Half Unit

Dissertation in Health Economics, Outcomes, and Management in Cardiovascular Sciences

This information is for the 2017/18 session.
Teacher responsible: Dr. Huseyin Naci and supervisors
Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: The dissertation could be on any topic in the field of health economics, outcomes research, comparative effectiveness research, policy, and management. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health/clinical policy, economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.
Teaching: 5 hours of lectures in the ST.
In addition to the lectures, students will be given individual support by their allocated supervisor.
Indicative reading: Dunleavy, P. (1986) Studying for a Degree in the Social Sciences, Macmillan. (See Chapter 5: Writing a Dissertation). Denscombe, M. (2007) The Good Research Guide: for small-scale social research projects. Maidenhead: Open University Press. H61 D41. Kotz, D. and Cals J.W.L. Houndmills : Palgrave Macmillan LB2369 G87. Rudestam, K. and Newton, R. (2001) Surviving Your Dissertation: a comprehensive guide to content and process. London: Sage. LB2369 R91
Assessment: Dissertation (100%, 5000 words).

HP4D1E Half Unit

Introduction to Management in Health Care

This information is for the 2017/18 session.
Teacher responsible: Dr Brittany Jones NAB 4.04
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Pre-requisites: No Prerequisites
Course content: The course aims to introduce students to the main principles of management and strategy and related issues that impact on organisational change, group decision making, innovation and leadership. Key models and academic tools will be presented and their application to real world situations discussed. The course aims to give students a strong academic understanding and also enable them to apply this knowledge to their practice.
The course outline is below
1. Strategy and Managerial Work
In this session, we will explore the development of the modern practice of 'strategy' and what it means today. Along the way, we will show how organisational practices like planning met emerging ideas in academia, especially in economics, to develop new tools and ways of thinking that transformed the practice of management in the late 20th century. The development of strategic management and planning tools and the competitive environment in which they emerged will be discussed and the application of these tools will be examined in competitive markets.
2. Innovation Management
This part of the course will introduce the topic of innovation management. In particular, it introduces participants to the conceptualization of innovation as a means to affect the competitive process. Participants will be introduced to the basics of the competitive process and the effect of innovation on the competitive process. Participants will be active in analysing the competitive process surrounding their organization and the competitive position their organization occupies within it and activities will be used to promote thinking about how innovations, small or large, can defend and/or improve their competitive position.
3. How Individuals and Groups Organise and Make Decisions and Take Risk
This part of the course will introduce issues related to working as individuals within an organisation and as a group. It will look at the "benefits" and "harms" of group decision making processes – especially with reference to health care where collaborative multi-disciplinary teams are commonplace – and also discuss how group decisions making can be undermined by systematic biases.
4. Behaviour Change and Social Marketing
This part of the course will introduce the drivers and mechanisms of behaviour change in organisations. In particular, we will discuss how different organizational-level factors may influence behaviour change, including resistance to change from various levels and sustainability of changes across time, and how organizational behaviour change can be measured. Models of organisational behaviour change will be introduced and the principles of managing and leading change in established systems will be discussed with a focus on the stages of planning and implementation of change. Alongside this appropriate tools and resources will be introduced to aid future organisational changes. The coverage of social marketing will deal with the formulation and execution of strategies designed to influence behaviour change amongst groups at risk of cardiovascular disease.
5. Culture and Leadership
This part of the course will explore the definition of culture within organisations and leaders' role in creating and supporting successful teams. Key components of leadership, like the ability to establish direction and motivate and inspire a workforce as well as handle relationships with external stakeholders, will then be introduced with a consideration of how they affect culture and working practices.
Teaching: 10 hours of lectures, 10 hours of seminars and 1 hour of help sessions in the ST.
Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration consisting of 5x2-hour lectures and 5x2-hour seminars (in addition to a 1x1-hour online help session).
Formative coursework: Students will be expected to produce 1 essay in the ST.
The formative assessment is a 500 word outline of the summative assessment essay question.
Indicative reading: Mintzberg, H., Ahlstrand, B. and Lampel, J. (2008). Strategy Safari: The Complete Guide Through the Wilds of Strategic Management (Second Edition). Prentice-Hall. Chapters 1 and 4. Whittington, R. (2000). What is Strategy—and Does it Matter? (Second Edition) Thomson International. Chapters 1, 2 and 4. Barney, J. 1995. Looking Inside for Competitive Advantage. The Academy of Management Executive. 9(4): 49-61. Christensen, C.M., Raynor, M.E., McDonald, R. 2015. What Is Disruptive Innovation? Harvard Business Review. December Issue (available online athttps://hbr.org/2015/12/what-is-disruptive-innovation)
Assessment: Essay (100%, 2500 words) post-summer term.
The course will be assessed on the basis of a 2500 word essay

on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking. The content of the assessments will lead on from the simulation exercises that have been used in the seminars and students will be encouraged to use topics they have identified during reflections on their own work. Formative assessment will be based on a 500 word outline of the essay. This will give students an opportunity to develop their thoughts ahead of the summative assessment and will allow feedback from course teachers that will guide students when they work on their longer answers.
Due to the executive nature of the course and the 1 week nature of the module, this method of assessment will allow students to work away from campus alongside their professional roles.

HP4D2E Half Unit
Principles of Health Technology Assessment

This information is for the 2017/18 session.
Teacher responsible: Dr Panagiotis Kanavos
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.
Course content: Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.
Outline of the course is included below:
1. The role of Health Technology Assessment in health care decision making
2. Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
3. Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
4. Data and evidence requirements for value assessment
5. Health Technology Assessment and value assessment: focus on clinical benefit assessment
6. Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
7. Assessment methods in Health Technology Assessment
8. Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
9. The role of multiple criteria decision analysis in value assessment
10. Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements
Teaching: 10 hours of lectures, 10 hours of seminars and 1 hour of help sessions in the ST.
Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration.
Formative coursework: Students will be expected to produce 1 exercise in the ST.
A selection of multiple choice and open-ended questions to test extent of knowledge and understanding of syllabus
Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Rochaix, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Comparative Effectiveness Research and Evidence-Based Health Policy: Experience from Four Countries. Milbank Quarterly, 87(2), 339-367. Banta, H. D., & Luce, B. R. (1993). Health care technology and its assessment: an international perspective. Drummond, M. F., Schwartz, J. S., Jönsson, B., Luce, B. R., Neumann, P. J., Siebert, U., & Sullivan, S. D. (2008). Key principles for the improved conduct of health technology assessments for resource allocation decisions. International journal of technology assessment in health care, 24(03), 244-258. Sorenson, C., Drummond, M., & Kanavos, P. (2008). Ensuring value for money in health care: the role of health technology assessment in the European Union (No. 11). WHO Regional Office Europe. Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. Issue Brief (Commonwealth Fund), 91, 1-14.
Assessment: Research project (100%) post-summer term.
A 3,000-word (excluding references) case study on a specific topic

HP4D5E Half Unit
Research Design for Evaluating Health Programs and Policies

This information is for the 2017/18 session.
Teacher responsible: Dr Huseyin Naci COW 3.01
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.
Course content: The objective of this course is to teach students how to design and critically appraise research studies evaluating policies, programmes, and interventions.
This course will provide an overview of the principles and models of evaluation, and the role of theories, concepts, and hypotheses. In terms of research design, it will cover study design choices in light of bias, validity and other design trade-offs. The core of the course will focus on experimental, quasi-experimental, non-experimental, and qualitative designs for evaluating health interventions, programmes and policies aimed at achieving high quality care, reducing costs, and improving health outcomes. Data and measurement considerations for both quantitative and qualitative studies will be discussed alongside the importance of using mixed-methods and triangulation for interpreting findings and taking a critical approach to the results of evaluation. The course will conclude with practical and ethical issues when undertaking evaluation studies.
Teaching: 10 hours of lectures and 10 hours of seminars in the ST.
Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration.
Formative coursework: Students will be expected to produce 1 project in June.
Students will receive feedback on their project report outlines.
Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) Mastering 'Metrics: The Path from Cause to Effect. Princeton University Press. Cartwright, N. & Hardie, J. (2012). Evidence-Based Policy: A practical guide to doing it better. Oxford, UK: Oxford University Press. Glennerster, Rachel, and Kudzai Takavarasha. Running randomized evaluations: A practical guide. Princeton University Press, 2013. Patton, Michael Quinn. Qualitative research. John Wiley & Sons, Ltd, 2005. William R.. Shadish, Thomas D. Cook, and Donald Thomas Campbell. Experimental and quasi-experimental designs for generalized causal inference. Wadsworth Cengage learning, 2002.
Assessment: Research project (70%) in September.
Presentation (30%) in the ST.
Project (70%, 2,000 words)
Group presentation (30%)
Assessment is through a project that students will undertake in small groups and write up individually (2,000 word paper), to be submitted 10 weeks after the completion of the course. Group presentation will account for the remaining 30% of the grade.

IR442
Diplomacy and Challenges

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Cox TW1.9.01A
Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.
Course content: This course looks at six key aspects of diplomacy: the tools of diplomacy and negotiation; new international security and policy challenges, such as climate change; global flashpoints, such as Brexit, the South China Sea and Syria; policy assessment on a major current international problem; simulations on crisis management and diplomatic negotiations; the future of diplomacy and international affairs.
Teaching: 30 hours of lectures, 20 hours of seminars and 20 hours of workshops in the LT.
Formative coursework: One formative policy paper (2,000 words) with a pre-arranged task. Feedback will involve a meeting with each student to discuss their formative policy paper. We will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing policy options; formulate arguments and policy recommendations in a coherent and balanced fashion.
Indicative reading:
1. Bayne, N.; Woolcock, S. (eds.) (2012), The New Economic Diplomacy: Decision-Making and Negotiation in International Economic Relations, Third Edition.

13. Zartman, W.; Rubin, J. (2000), Power and Negotiation.
Assessment: Project (100%, 3000 words) in the LT.
3.000 word assessed policy paper setting out a detailed strategy to implement a policy.

IR443
Strategy in a Changing World

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Cox TW1.9.01A
Availability: This course is available on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.
Course content: This course examines five different perspectives on strategy: new approaches to strategy in international affairs; the interplay between old and new strategic actors; global strategic and economic trends; political and security developments in the world's key regions; the nature of strategic decisions.
Teaching: 40 hours of lectures and 30 hours of seminars in the MT.
Formative coursework: One 2,000 word formative essay with a pre-arranged title due in the MT. Feedback will involve a meeting with each student to discuss their formative essay. In the process, we will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing explanatory paradigms; formulate arguments in a coherent and balanced fashion.
Indicative reading:

Assessment: Essay (100%, 4000 words).

IR444 Half Unit
Strategy in Action

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Cox TW1.9.01A
Availability: This course is available on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.
Course content: In this course we will be examining through lectures, seminars and workshops major foreign policy decisions, the diplomatic background to each of these and the strategic thinking behind them. We will be asking the students through group exercises to prepare a strategy and policy paper relevant to the day.
Teaching: 8 hours of seminars in the ST.
The course is taught over 48 hours. This includes 3 intense sessions - a weekend of assessing strategic decisions involving drafting and crafting papers, a second weekend of formulating strategic decisions and briefing sessions on methodology. All these will lay the foundations for the dissertation plan.
Formative coursework: Group discussion and formulation of strategy/policy papers.
Indicative reading:
1. Maastricht - case study: Finn Laursen (Editor), Sophie Vanhoonacker (Editor), The Ratification of the Maastricht Treaty: Issues, Debates and Future Implications (1994)
2. Middle East - case study: Daniel C. Kurtzer and Scott B. Lasensky, Negotiating Arab-Israeli Peace: American Leadership in the Middle East (United States Institute of Peace Press, 2008).
3. Northern Ireland - case study: Michael Cox, Fiona Stephen and Adrian Guelke, A Farewell to Arms; After the Good Friday Agreement (2006) 4. The decision to go to war against Iraq - case study: John Kampfner, Blair's Wars 5.National Security Strategy of the United States, 2003 6. European Security Strategy, 2003
Assessment: Dissertation (100%, 3000 words) in the LT.

The formulation of a dissertation topic which must be in the form of a 3,000 word dissertation plan (100%). This should include the title, an abstract, a problem statement which should identify the features and theoretical concepts associated with the topic, the aims and objectives (including research questions or hypotheses), a literature review and the methodology. This module is taken in conjunction with IR496 Dissertation: MSc Diplomacy and International Strategy (1.5 units).

IR496 One and Half Unit

Dissertation: MSc International Strategy and Diplomacy (1.5 units)

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Cox TW1.9.01A
Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.
Course content: The dissertation will address a topic in the social sciences drawn broadly from the three core courses. The topic should make central use of concepts in the study of International Relations, strategy and diplomacy and should demonstrate a good understanding of these concepts and implications. The dissertation will draw on empirical topic areas but should also demonstrate a high degree of conceptual originality. Guidance on standards of presentation will be given in the handbook and conform to the standard laid down for MSc dissertations in the International Relations Department. The subject and title of the dissertation must be approved by the dissertation supervisor.
Teaching: Arrangements for supervision. Students will receive advice on how to choose a topic and how to write a dissertation from a 1.5 hour workshop and from three half hour individual supervision sessions.
Formative coursework: Students submit a 3,000 dissertation plan on which they receive written feedback (see the details of the IR444 course, taken in conjunction with IR496).
Assessment: Dissertation (100%, 15000 words) in the LT.
A 15,000 word dissertation (100%) to be submitted in September 2017. This course is taken in conjunction with IR444 Strategy in Action (H).
Using the dissertation plan (IR444), the dissertation will include an introduction, theoretical framework, a literature review and methodology followed by chapters, conclusion and bibliography.

LL400E Half Unit

European Capital Markets Law

This information is for the 2017/18 session.
Teacher responsible: Professor Niamh Moloney
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to key capital market actors across the Member States and which supports the integrated market. The topics covered include: the rationale for integration and the role of law, the evolution of the integration project, and the impact of the financial crisis; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market and the role of the Court; market access and the passport for investment services; the Markets in Financial Instruments Directive 2004 (MiFID I) and the 2014 reforms (MiFID II and the Markets in Financial Instruments Regulation) and regulation; the liberalization of order execution and the regulation of trading venues; the 'UCITS' mutual funds regime; retail investor protection and conduct regulation; the prospectus and disclosure regime; gatekeepers (credit rating agencies and investment analysts); and the institutional structure for law-making and for supervision, including the European System of Financial Supervision and the European Securities and Markets Authority. Course coverage may vary slightly from year to year.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, EU Securities and Financial Markets Regulation Regulation (2014); Veil (ed) European Capital Markets Law (2013); Chiu, Regulatory Convergence in EU Securities Regulation (2008); Skinner (ed), The Future of Investing in Europe's Markets after MiFID (2007); Ferrarini and Wymeersch (eds), Investor Protection in Europe. Corporate Law Making, the MiFID and Beyond (2006); Ferran, Building an EU Securities Market (2004); Avgerinos, Regulating and Supervising Investment Services in the European Union (2003).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL401E Half Unit

The Law of Armed Conflict

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Humphreys NAB5.12
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict or international humanitarian law)--as distinct from the law on the resort to force (jus ad bellum), which is a separate course. The course will take a critical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in recent conflicts, including the wars in Iraq, Afghanistan and Syria, the 'war on terror', and the Palestinian Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: It is worthwhile acquiring the following books: Yoram Dinstein, The Conduct of Hostilities under the Law of International Armed Conflict (Cambridge UP, 2nd ed., 2010, or 3rd ed., 2016), Roberts and Guelff, Documents on the Laws of War (Oxford UP, 2000); Michael Walzer, Just and Unjust Wars (Basic books, 4th ed. 2006) . Other useful books include: David Kennedy, Of Law and War (Princeton UP, 2006): Geoffrey Best, War and Law Since 1945 (Oxford UP, 1997). Detailed readings for each seminar will be made available on Moodle.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL402E Half Unit
Key Issues in Transnational Environmental Law

This information is for the 2017/18 session.
Teacher responsible: Dr Veerle Heyvaert NAB7.06
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course focuses on current developments in environmental law beyond the State, which includes both the European and international level. It reviews the main law and policy principles that inspire transnational environmental developments, and identifies opportunities for and obstacles to the effectiveness of transnational environmental law. Then, the course turns the spotlight on the most important environmental challenges of our time and examines the role of transnational law in managing or resolving them. The course is structured as follows:
1. Environmental law in context: economic and alternative approaches to sustainable development.
2. Sources and principles of international environmental law.
3. Transnational environmental law.
4. Transnational liability: responding to global catastrophes.
5. Controlling toxic substances: risk regulation and the precautionary principle.
6. Climate change: international law and policy developments.
7. Climate change litigation.
8. Protecting biodiversity through designation: the EU example.
9. Regulating markets for ecosystem services.
10. Trade and the environment.
11. Revision.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: A detailed reading list will be provided for each seminar. Essential reference works include Sands and Peel, Principles of International Environmental Law (CUP, 2012); Bodansky, The Art and Craft of International Environmental Law (Harvard University Press, 2010); Bodansky, Brunnee & Hey, The Oxford Handbook of International Environmental Law (OUP, 2007); Kingston, Heyvaert & Cavoski, European Environmental Law (CUO, 2017); R. Revesz, P. Sands & R. Stewart, Environmental Law, the Economy, and Sustainable Development (CUP, 2000); Carlarne, Climate Change Law and Policy. EU and US Approaches (OUP, 2010); R. Coase, 'The Problem of Social Cost' (1960) 3 The Journal of Law & Economics, 1-44; and Stern Review Executive Summary (online).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL403E Half Unit
International Human Rights: Concepts, Law and Practice

This information is for the 2017/18 session.
Teacher responsible: Dr Margot Salomon
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course is concerned with the international protection and promotion of human rights and its relation to a range of current global problems. The course draws on the international law and practice of human rights to examine how we might best understand the contribution and limitations of human rights to addressing contemporary ills. Through the consideration of a range of standards and thematic issues participants will learn about, and critically analyse, human rights concepts, norms, institutions and actors. The course begins by studying the ideas and objectives that underpin the post-1945 human rights legal order and then turns to consider the United Nations and regional architectures as well as standards of international human rights. We build on this foundation to examine a variety of human rights topics and to explore how international law in these areas has developed and is being applied. The lectures will explore civil and political rights, economic social and cultural rights, 'third generation' rights, the rights of particular groups as well as a selection of current issues. Subjects may include: the prohibition of torture and the war on terror; the right to privacy; the right to food; the right to self-determination; the right to development; the rights of indigenous peoples; women's human rights; transnational corporations and human rights; human rights and poverty, and; human rights and the environment.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: A Cassese, International Law (2005); O de Schutter, International Human Rights Law: Cases, Materials, Commentary (2nd edn., 2014); F Mégret, 'The Nature of Obligations' in D Moeckli, S Shah and S Sivakumaran (eds), International Human Rights Law (2nd edn., 2014); Report of the Eminent Jurists Panel on Terrorism, Counter-terrorism and Human Rights: Assessing Damage, Urging Action (International Commission of Jurists, 2009); M E Salomon, Global Responsibility for Human Rights: World Poverty and the Development of International Law (2007); Report to the United Nations General Assembly of the Independent Expert on Human Rights Obligations relating to the Enjoyment of a Safe, Clean, Healthy and Sustainable Environment, UN Doc. A/HRC/22/43 (2012); A Clapham, Human Rights Obligations of Non-State Actors (2006); H Charlesworth and C Chinkin, The Boundaries of International Law (2001); J Kozma, M Nowak and M Scheinin, A World Court of Human Rights – Consolidated Draft Statute and Commentary (2010).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL404E Half Unit
European and UK Human Rights Law

This information is for the 2017/18 session.
Teacher responsible: Prof Conor Gearty SAR.G.04
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course has two parts. In part one the origins, development and current standing of the European Convention on Human Rights and Fundamental Freedoms are considered. The primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also be referred to where appropriate. The course will analyse the Convention from the perspective of selected rights within it, but will also engage with the subject thematically, subjecting such concepts as the 'margin of appreciation', 'living instrument' and proportionality to close scrutiny. The goal of this part of the course is to give students a good critical understanding of the Convention, the case-law of the Strasbourg court and the Convention's place within the constitutional and political structure of 'Greater Europe'. The second part of the course is made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. This part of the course will identify the principles that underpin the UK Act and explain its proper place in British law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. Linkages with the broader European framework discussed in the first part will be made by students through their reading and through class-engagement. The implications for human rights of the UK's intended departure from the EU will also be considered.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Jacobs and White, The European Convention on Human Rights 6th edn (OUP, 2014) and/or Harris, O'Boyle and Warbrick, Law of the European Convention on Human Rights 3rd edn (Oxford, 2014). The text on the UK is Gearty, On Fantasy Island. Britain, Strasbourg and Human Rights (Oxford University Press, 2016). Also useful is Mowbray, Cases and Materials on the European Convention on Human Rights 3rd edn (Oxford, 2012). Kavanagh, Constitutional Review under the UK Human Rights Act (Cambridge, 2009), Hickman Public Law after the Human Rights Act (Hart, 2010) and Gearty, Principles of Human Rights Adjudication (Oxford University Press, 2004).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL405E Half Unit
Dispute Resolution and Advanced Mediation

This information is for the 2017/18 session.
Teacher responsible: Prof Linda Mulcahy NAB7.15
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The principal focus of the course is upon methods of resolving disputes other than adjudication. The course brings together theory and observation of practice and is divided into two parts. In the first section students examine what motivates people to enter into disputes and the range of outcomes they seek, the history of the "informal justice" movement and the transformation of attitudes to dispute resolution in the UK and beyond. The emphasis in this part of the course is also on looking at the two primary forms of dispute resolution, negotiation and mediation. In the second part of the course specialist practitioners work with the class in exploring the interface between theory and practice and the different dynamics of disputes and their resolution in specific subject areas such as commercial law, community disputes, international law and family law. The course is designed to complement the option on Commercial Arbitration.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Students will also find it useful to access the following books which provide important context for debate about the civil litigation system and negotiation tactics: Henry Brown and Arthur Marriot, (2012) ADR: Principles and Practice, London: Sweet and Maxwell. This is written by practitioners but also makes reference to a number of seminal academic studies. It provides a good framework within which to position the more in-depth arguments contained in the academic articles set each week. Genn, Hazel, (2009) Judging Civil Justice (The Hamlyn Lectures) Cambridge, Cambridge University Press. This book provides a really good overview of civil justice reforms across developed legal systems and will alert you to many of the academic and policy debates which have surrounded reform. Roger Fisher and William Ury (2012) Getting to Yes: Negotiating an Agreement Without Giving In, Random House. This is a classic text in the field and very simple to read. This book will also help you when we come to study mediation which is often described as a form of facilitated negotiation. Simon Roberts and Michael Palmer's 2005 (second edition) Dispute Processes: ADR and the Primary Forms of Dispute Resolution, Cambridge, Cambridge University Press. This is the most theoretical book in this list but provides extracts from many of the seminal works in the field that we will be studying. It adopts a very inter-disciplinary approach. This is useful as background reading.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL406E Half Unit
Regulation of Financial Markets I

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Paech NAB7.05
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course (Part I and Part II) examines the regulatory structures governing financial markets and investment services. It covers the main principles of international, EU and UK financial regulation, with the aim of developing a critical understanding of the dynamics and conceptual framework of financial regulation. The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.
The first part of this course will address the following topics:
Anatomy of the Financial Market and the Great Financial Crisis
Building Blocks of the Regulatory World
Rationales for its Regulation: Systemic Stability, Market Integrity, Principle-Agent Competition
Key Elements of Financial Regulation: disclosure, resilience, risk modelling and regulation inside firm
Global and EU Regulatory Structures
Financial Stability – Policy Issues, Principles and Global Standard Setters
Prudential Regulation of Banks – The Basel Accords
The EU Banking Union
Deposit Guarantees
Bank Resolution and Insolvency
Teaching: 24-26 hours of contact time (for each half unit)
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, The Future of Finance: The LSE Report (2010); S Valdez and P. Molyneaux, Introduction to Global Financial Markets (7th edn).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL407E Half Unit
Regulation of Financial Markets II

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Paech NAB7.05
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course examines the regulatory structures governing financial markets and financial services. It covers the main principles of international, EU and UK financial regulation with the aim of developing a critical understanding of the conceptual framework for financial regulation. This half unit focuses on financial stability, including macro and micro-prudential regulation, regulation of trading and market infrastructure, and on new and emerging issues in financial regulation.
The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects.
No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.
Topics include:
1. Unpicking the Great Financial Crisis
2. Mapping regulation for financial stability
3. States, Banks and Global Markets: the macroeconomic Background
4. The next Financial Crisis
5. Ethics in Finance
6. Market Integrity
7. The role of Consumers
8. Consumer Protection
9. Securities markets and Conduct of Business
10. Fast, global, decentralized– the Challenges of the Future
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, The Future of Finance: The LSE Report (2010); S Valdez and P. Molyneaux, Introduction to Global Financial Markets (7th edn).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL408E Half Unit
Comparative Constitutional Law: Institutions

This information is for the 2017/18 session.
Teacher responsible: Dr Jo Murkens NAB7.31
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course examines the central issues in comparative constitutional law across a range of jurisdictions and from a variety of perspectives. The course opens with an introduction on the purpose of comparative constitutional law.

The first substantive part discusses various approaches to the study of CCL as well as the migration of constitutional ideas (and related notions of constitutional borrowing, transplants etc). The second part deals with key constitutional concepts (constitution; rule of law; presidentialism, parliamentarism) which are discussed from a historical and comparative perspective. The point of these sessions is not to compare for the sake of comparing, but to equip you (the researcher) with the conceptual tools to do insightful, critical, and original comparative work of your own. The third part looks challenges the assumptions of liberal constitutionalism by examining constitutions in divided societies and authoritarian constitutionalism. The overall aim of the course is to develop students' understanding and use of many general theoretical explanations surrounding debates in CCL, and to develop students' critical/analytical approach to many of the questions facing judges and scholars in the next decade.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: There is no set book for this course. All materials will be made available in advance on Moodle.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL409E Half Unit
Comparative Constitutional Law: Rights

This information is for the 2017/18 session.
Teacher responsible: Dr Kai Moller NAB7.01
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These include: Abortion; Euthanasia and Physician-Assisted Suicide; 'Deviant' Sex: Sodomy, Sado-Masochistic Sex, and Incest; Religion in the Public Sphere; Hate Speech and Denial of the Holocaust; Obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, Comparative Constitutional Law, 3rd edition, 2014.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL410E Half Unit
International Financial Law and Practice I

This information is for the 2017/18 session.
Teacher responsible: Dr Philipp Paech NAB7.05
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: As the recent debate on shadow banking shows, the traditional financial market sectors of commercial banking, investment banking, derivatives, capital markets and asset management are nowadays converging. However, their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture of the entire financial market law. To this end, the course largely concentrates on the different activities of risk taking and risk shifting regardless of the type of financial institution involved. The course is also a novelty as it integrates both spheres of rulemaking for the financial markets, notably financial law and some fundamentals of financial regulation. Experience shows that approaching the framework for financial law without at least considering the interdependencies with risk management and capital requirements leaves us with only a fragmented picture. For non-practitioners, the market context of financial law appears sometimes confusing. Therefore, this course will first approach each subject from in a market perspective before coming to the legal framework. This short overview is essential with a view to understanding the permanent interaction between market behaviour and the legislators' and regulators' responses to it. The legal framework will be analysed taking into account international rules and developments as well as European legislation. Since the City of London is one of the globally most important financial markets, England will be used as anchor-jurisdiction in order to develop patterns of global significance that are addressed by legislators and regulators around the world, in particular also looking at the European Union and at international rulemaking. The course also highlights certain anomalies in differing legal treatment of the respective sectors, and considers key trends. It is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:
- The logic and the players of the financial market. The creation and allocation of risk. The distinction between 'Law' and 'Regulation'.
- The reasoning and sources of financial law and regulation. The role of European financial law and regulation. The role of international law.
- Understanding the financial crisis.
- Banks and their nature. Assets and Liabilities. Deposit taking and bank loans. Money market instruments. Rank of creditors in bank insolvencies.
- Raising capital. Primary market and secondary market. Issuance of debt securities (bonds). Issuance of Eurobonds. Issuance of equity (shares).
- Security interests and financial collateral.
- Rehypothecation, repurchase agreements and securities lending. Relevant conflict-of-laws problems.
- Guarantee, indemnity, insurance.
- Derivatives. Types of derivatives. The rise of derivatives. Recharacterisation risk. Standard documentation (ISDA).
- Netting and set-off. Relation to insolvency law. Importance for derivatives, repos, securities lending. Conflict-of-laws analysis. Cross-jurisdictional problems.
- Trusts.
- Fund structures (public and alternative).

• Structured finance, securitisation and asset-backed securities. The rationale behind it. Risks.
• Transfer of financial instruments. Stock exchanges. Trading and settlement of securities. Intermediated securities. Conflict of laws and cross-jurisdictional problems. Derivatives clearing.
• Syndicated loans.
• Regulatory arbitrage in respect of financial transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.
- J. Benjamin, Financial Law, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE campus only.
- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 7th ed., Palgrave-McMillan 2013, ca. £29.-P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL411E Half Unit
International Financial Law and Practice II

This information is for the 2017/18 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: There are no specific prerequisites for taking this course. While this course is complimentary to LL410E prior completion of the latter is not necessary to take LL411E.

Course content: This course explores contemporary issues of the commercial law of international financial markets. These include (a) the future of English law as reference law for international finance; (b) financial markets and modern trends in conflict-of-laws; (c) the legal characteristics of the various types of networks used in financial markets, and the disruptive force of the upcoming 'blockchain' technology; (d) the legal challenges flowing from the increasing use of 'big data' and artificial intelligence in financial services; (d) the role of commercial law in managing risk; (e) the nature of so-called smart contracts and their role in standard documentation and risk management. As the course is conceived to be very topical, some of the course content may change.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- The reading will consist of 2-3 scholarly articles per subject, such as P Paech, 'Governance of Blockchain Financial Networks', Modern Law Review (forthcoming), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2875487.
- Basic knowledge on international financial law (recommended in particular to students who did not take LL410E): P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound).
- Understanding the financial market: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 8th ed., Palgrave-McMillan 2015 (soft bound, ca. £29 - this is not a legal work but very useful for those new to the financial market).

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL412E Half Unit
International Economic Law I

This information is for the 2017/18 session.

Teacher responsible: Prof Andrew Lang NAB6.19

Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to the field of international economic law: its principles, rules, practices, and institutions, and the debates which attend each. The course focuses on the public international law rules and institutions which govern international trade. Students will be given a grounding in the jurisprudence of the WTO, but will also be introduced to interdisciplinary material on the broader political, economic, institutional and normative contexts in which international economic law operates. Key themes will include the question of 'development' and developing countries, the role of expertise in global economic governance, and institutional aspects of judicial international dispute settlement. Students will be expected to engage with the principles and practice of international economic law both at the technical level, and at the level of critical reflection.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, The Regulation of International Trade, 4th ed., Routledge, 2012; P. Van den Bossche and W. Zdouc, The Law and Policy of the World Trade Organization: Text, Cases and Materials, 3rd ed., Cambridge UP, 2013; S. Lester and B. Mercurio, World Trade Law: Texts, Materials and Commentary, 2nd ed., Hart Publishing 2012.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL413E Half Unit
International Economic Law II

This information is for the 2017/18 session.
Teacher responsible: Prof Andrew Lang NAB6.19
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course is a continuation of LL412E.
In International Economic Law II, topics to be covered may include: Trade Remedies (Antidumping, Countervailing duties and Safeguards); Trade and Global Value Chains; State-owned Enterprises; Advanced Issues in WTO Dispute Settlement; Digital Trade; Trade and Taxation; and others. In both courses, we will set aside time to consider topical issues, for example around public international regulation of global finance, regional economic integration, development and developing countries in the trading system, and environmental aspects of international trade.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, The Regulation of International Trade, 4th ed., Routledge, 2012; P. Van den Bossche and W. Zdouc, The Law and Policy of the World Trade Organization: Text, Cases and Materials, 3rd ed., Cambridge UP, 2013; S. Lester and B. Mercurio, World Trade Law: Texts, Materials and Commentary, 2nd ed., Hart Publishing 2012.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL415E Half Unit
Fundamentals of International Commercial Arbitration

This information is for the 2017/18 session.
Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course provides an introduction to the theory and practice of international arbitration, one of the most important mechanisms for settling disputes arising from commercial cross-border transactions. The focus is mainly on English arbitration law, which is put into a comparative perspective and contrasted especially with French law, which highlights the antagonism between Paris and London as the rivalling centres for international arbitration. Special attention is given to the applicable international treaties, the problems of conflicts of laws, and the different types of institutional and transnational rules that may have to be taken into consideration in an international arbitration. This course prepares for 'Advanced Issues of International Commercial Arbitration'.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: M. Moses, The Principles and Practice of International Commercial Arbitration (2nd edn, CUP 2012); G. Born, International Arbitration - Law and Practice (2nd edn, Kluwer 2015); N. Blackaby & C. Partasides, Redfern and Hunter on International Commercial Arbitration (6th edn, OUP 2015); J.-F. Poudret & S. Besson, Comparative Law of International Commercial Arbitration (Sweet & Maxwell 2007); E. Gaillard & J. Savage, Fouchard Gaillard Goldman on International Commercial Arbitration (1999).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL416E Half Unit
Advanced Issues of International Commercial Arbitration

This information is for the 2017/18 session.
Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: Fundamentals of International Commercial Arbitration (LL415E) or equivalent course in previous studies or relevant practical experience with international arbitration
Course content: This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is designed to allow intense discussions of these problems in order to raise the sensitivity for the issues at stake and to lead to a research oriented approach. Despite its academic outset, the course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a most significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the role of internationally mandatory rules of law, arbitration & insolvency, the scope of the competence-competence principle; arbitration and fraud and corruption, or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of developments.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: G. Born, International Commercial Arbitration (2nd edn, Kluwer 2015); N. Blackaby / C. Partasides, Redfern & Hunter on International Commercial Arbitration (6th edn, OUP 2015); J.-F. Poudret / S. Besson, Comparative Law of International Commercial Arbitration (Sweet & Maxwell 2007); E. Gaillard / J.

Savage, Fouchard Gaillard Goldman on International Commercial Arbitration (Kluwer 1999). Cases and doctrinal articles for each topic.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL417E Half Unit
International Commercial Contracts: General Principles

This information is for the 2017/18 session.
Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: Firm knowledge of contract law and/or international sales law from previous studies.
Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both examination and classes, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law (2nd edn, OUP 2010); J. Gordley & A. von Mehren, An Introduction to the Comparative Study of Private Law: Readings, Cases, Materials (CUP 2006).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL418E Half Unit
Comparative Corporate Governance

This information is for the 2017/18 session.
Teacher responsible: Dr Carsten Gerner Beuerle NAB5.08
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course will focus on the role of boards of directors in large public companies and groups of companies. It will deal with the legal regulation of agency problems arising between the board and shareholders as a class; between the board/majority shareholders and minority shareholders; and between the board and other stakeholder groups, notably creditors and employees. Although the main focus will be on board and shareholder relationships, the aim of the course is to develop and apply a framework of analysis which illuminates relations between the board and all stakeholder groups. The course will be taught largely on a comparative basis, focusing on English, US, German and French law.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Reading will be prescribed for each seminar. Preliminary reading can be found in P. Davies, Introduction to Company Law (OUP, 2nd edition 2010), chapters 5-9 ; R. Kraakman et al, The Anatomy of Corporate Law (2nd edition 2009); D. Kershaw, Company Law in Context: Text and Materials (OUP, 2nd edition 2012), chapters 5 and 6.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL419E Half Unit
Law of Corporate Finance

This information is for the 2017/18 session.
Teacher responsible: Dr Eva Micheler NAB7.35
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, reform and moving to a solvency test and financial assistance. The course will focus on English Law but reference will be made to the relevant EU rules.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Gower and Davies, Principles of Modern Company Law, 8th edition, 2008, part 2, 6 and 7; Eilis Ferran, Principles of Corporate Finance Law, 2008, chapters 1-13.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL420E Half Unit
International Law and Climate Change

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Humphreys NAB5.12
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course covers the international law dealing with climate change with a view to assessing how risks and uncertainties caused by climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and legal questions raised by climate change cannot be addressed by reference to climate change law (or indeed international environmental law) alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (international economic law, human rights law, state responsibility, international migration law) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative and/or ethical bases for choosing between actions designed to prevent and/or manage climate change and its consequences, attentive to developmental imperatives and the theoretical concerns raised by the 'fragmented' nature of international law
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Rosemary Rayfuse and Shirley Scott (eds.), Climate Change and International Law, Edward Elgar (2011) Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (Eds.), Climate Ethics: Essential Readings, Oxford University Press (2010); Patricia Birnie, Alan Boyle, Catherine Redgwell, International Law and the Environment, Oxford University Press (2009); Nicholas Stern, The Economics of Climate Change: The Stern Review, Cambridge: Cambridge University Press (2007); IPCC, Fourth Assessment Report, Cambridge University Press (2007); Stephen Humphreys (ed.), Climate Change and Human Rights, Cambridge University Press (2009); Larry Lohmann, Carbon Trading, Dag Hammerskjöld Foundation (2006); Lavanya Rajamani, Differential Treatment in International Environmental Law, Oxford University Press (2006).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL423E Half Unit
Media Law: Regulating Publication

This information is for the 2017/18 session.
Teacher responsible: Dr Andrew Scott NAB6.25
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course examines the legal and administrative regulation of mass media publication (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), national security, and the protection of children.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Warby, Moreham and Christie (eds) Tugendhat and Christie: The Law of Privacy and the Media, (3rd edn, OUP, 2016), Parkes and Mullis (eds), Gatley on Libel and Slander (Sweet & Maxwell, 12th ed, 2013); Fenwick and Phillipson, Media Freedom Under the Human Rights Act (OUP, 2006); Robertson and Nicol, Media Law (Sweet & Maxwell, 5th ed 2007), Doley and Mullis (eds), Carter Ruck on Libel and Privacy (6th edn, Lexis Nexis, 2010), Barendt, Freedom of Speech (OUP, 2nd ed 2005), Nicol, Millar and Sharland, Media Law and Human Rights (OUP, 2009); Cram, A Virtue Less Cloistered: Courts, Speech and Constitutions (Hart Publishing, 2002).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL424E Half Unit
Media Law: Regulating Newsgathering

This information is for the 2017/18 session.
Teacher responsible: Dr Andrew Scott NAB6.25
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector.

The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include protection of sources (in general; vis-a vis police and security interests; payment of sources); access to information held by the state (official secrets; news management; freedom of information); access to the justice system (secret justice / physical access to courts; access to court documents; technology and the courts - text-based reporting and broadcasting; access to prisoners); media-police interaction; harassment and media intrusion, and surreptitious newsgathering practices (hacking, tapping and subterfuge).
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Warby, Moreham and Christie (eds) Tugendhat and Christie: The Law of Privacy and the Media, (3rd edn, OUP, 2016), Millar and Scott, Newsgathering: Law, Regulation and the Public Interest (OUP, 2016); Robertson and Nicol, Media Law (Sweet & Maxwell, 5th ed 2007), Warby, Moreham and Christie (eds), Tugendhat and Christie: The Law of Privacy and the Media, (2nd ed, OUP, 2011), Nicol, Millar and Sharland, Media Law and Human Rights (OUP, 2009), Davies, Flat Earth News (Chatto & Windus, 2008).art Publishing, 2002).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL425E Half Unit
Competition Law

This information is for the 2017/18 session.
Teacher responsible: Dr Pablo Ibanez Colomo
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course is a comprehensive study of the main features of competition law. While the focus is on EU competition law, reference will be made to the laws of other jurisdictions (e.g. the United States and the UK) when these offer relevant points for comparison. The first part of the course examines the history and aims of competition law. It considers the role of economic analysis and its limitations in the light of non-economic considerations. The second part is a review of the major substantive fields: restrictive practices; the regulation of monopolies and dominant positions; distribution and cooperation agreements and merger control. The third part addresses the public and private enforcement of competition law.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Whish and Bailey Competition Law (7th edn, 2011); Jones & Sufrin, EC Competition Law: Cases and Materials (7th ed, 2014); Geradin, Layne-Farrar, and Petit, EU Competition Law and Economics (2011); Faull & Nikpay, The EC Law of Competition (3rd edn, 2004).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL426E Half Unit
Theory of Human Rights Law

This information is for the 2017/18 session.
Teacher responsible: Dr Kai Moller NAB7.01
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course will provide an introduction to the philosophy of human rights and theoretical issues in human rights law. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. The overarching questions to be examined are to what extent current philosophical theories of human rights can illuminate our understanding of the cases and legal doctrines, and to what extent the cases and doctrines can help improving the theoretical and philosophical understanding of human rights. Topics to be discussed will include: Interest Theories of Human Rights; Ronald Dworkin's Theory of Rights as Trumps; Balancing and Proportionality; Human Rights and Judicial Review I (The American Perspective); Human Rights and Judicial Review II (The European Perspective); Absolute Rights.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, James Griffin, Mattias Kumm, Jeremy Waldron and Frances Kamm.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL427E Half Unit
Constitutional Law and Theory

This information is for the 2017/18 session.
Teacher responsible: Prof Thomas Poole NAB 7.20
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The course deals with the following topics: the scope of constitutional theory; the constitution of government; constitutional politics; representation; sovereignty; constituent power; constitutional rights; the rule of law; liberalism and republicanism; constitutional adjudication; cultural pluralism; theories of federalism; the cosmopolitan polity.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Much of the reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle. Indicative reading includes: Hobbes, Leviathan; Rousseau, The Social Contract; Montesquieu, The Spirit of the Laws; Burke, Reflections on the Revolution in France; Tocqueville, Democracy in America; Schmitt, Constitutional Theory; Oakeshott, On Human Conduct; Hayek, The Constitution of Liberty.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL430E Half Unit
Investment Treaty Law

This information is for the 2017/18 session.
Teacher responsible: Mr Christopher Thomas NAB 7.18
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration.
The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has five main elements: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards – such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law – that may apply to the investor-state relationships; (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts; and (5) the discussion of the future of international investment law.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: R Dolzer and C Schreuer, Principles of International Investment Law (2nd edn, Oxford 2012); G Van Harten, Investment Treaty Arbitration and Public Law (Oxford, 2006); C McLachlan QC, L Shore, M Weiniger, and L Mistelis, International Investment Arbitration: Substantive Principles (Oxford, 2007)
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL431E Half Unit
Takeover regulation in the UK and US

This information is for the 2017/18 session.
Teacher responsible: Prof Robert Kershaw NAB7.16
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course will look at the regulation of the bid process and at takeover defence regulation in the UK and the US. The course will look at: transaction structures used in private equity deals; the function and effects of the market for corporate control; takeover process regulation; the extra-territorial effects of US process regulation; takeover defence regulation; deal protections; and regulating conflicts of interest in going private transactions.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: The course will use materials distributed through moodle and the course pack as well as D. Kershaw, Foundations and Principles of Takeover Regulation (forthcoming 2016) [to be distributed in draft through the course pack]. Background material can be found in R. Kraakman et al, The Anatomy of Corporate Law (2004); B. Black, The Law and Finance of Corporate Acquisitions (1995); and W. Carney, Mergers and Acquisitions (2003).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL432E Half Unit
Mergers, Acquisitions and Restructurings

This information is for the 2017/18 session.
Teacher responsible: Mr Edmund-Philipp Schuster NAB6.30
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: There are no formal pre-requisites for this module.
Course content: In this module, we will explore the regulation of mergers, acquisitions and restructurings in Europe. We will focus on legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on the legal issues arising in cross-border transactions in the EU.
There are a number of reasons for corporations wanting to restructure their operations or to make acquisitions. For instance,

firms may want to acquire a strategically valuable firm or asset in order to improve the efficiency (and thus increase the value) of their business operations; they may want to implement a better governance structure, enabling them to manage their undertaking more effectively; or they may want to subject themselves to more favourable legal or tax rules – including choosing among different national corporate laws.
EU law offers a range of legal vehicles for achieving such aims, and it is these vehicles we will explore throughout the term. In particular, we will look at re-incorporations of EU companies based on the relevant Treaty provisions; takeovers of (listed) EU companies; domestic ("statutory") mergers; de-mergers and spin-offs; cross-border mergers in the EU; and the European Company.
Content overview:

- The market for corporate control, corporate ownership structures and transaction structures for takeovers and restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers
- Employee participation (board-level co-determination) and board structures, and their relevance for corporate transactions
- The European Company (SE)
- Brief introduction to taxation of corporate transactions and tax-related drivers and incentives for intra-group reorganisation and company migration

Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, A Guide to Takeovers: Theory, Evidence and Regulation (1992) 9 Yale Journal of Regulation 119; RD Kershaw, Company Law in Context (2012), Web Chapter A [available here: http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf]; S Grundmann, European Company Law (Intersentia, 2nd ed. 2011): Chapter 3 (Mergers & Divisions); R Kraakman et al, The Anatomy of Corporate Law (OUP, 2nd ed. 2009): Chapter 7 (Control Transactions); PL Davies et al, The Takeover Directive as a Protectionist Tool? [available here: http://ssrn.com/paper=1554616]; C Clerk et al, A Legal and Economic Assessment of European Takeover Regulation [available here: http://www.ceps.eu/system/files/Takeover%20Bids%20Directive%20book%20-%20Final.pdf]; E-P Schuster, The Mandatory Bid Rule: Efficient, After All? (2013) 76 Modern Law Review 529; KJ Hopt and E Wymeersch (eds), European Takeovers: Law and Practice; M Pannier, The EU Cross Border Merger Directive – A New Dimension for Employee Participation and Company Restructuring (2005) 16 European Business Law Review 1424.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL433E Half Unit
State and Market in the EU

This information is for the 2017/18 session.
Teacher responsible: Dr Pablo Ibanez Colomo NAB5.16
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: Member States of the EU are not free to award subsidies to their national companies or to support them in a comparable way (by, inter alia, securing favourable supply conditions to the companies, granting loans at favourable rates or providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the control of State aid in the European Union (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part examines (i) the notion of State aid within the meaning of Article 107(1) TFEU and (ii) the conditions under which measures falling under the scope of that provision may be deemed compatible with the internal market. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Quigley, European State Aid Law and Policy (3rd Edition, 2015); Bacon (ed), European Community Law of State Aid (2nd Edition, 2013); Jones and Sufrin, EU Competition Law (online chapter) (5th Edition, 2014)
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL434E Half Unit
Regulation: Strategies, Theories and Implementation

This information is for the 2017/18 session.
Teacher responsible: Prof Gordon Baldwin NAB7.08
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course provides an introduction to key topics in the study of regulation from with a comparative and generic perspective drawn from public administration, socio-legal studies and institutional economics. Topics include: What is regulation and Why do it? What is Good Regulation? Regulatory Strategies. Explaining Regulation. Enforcing Regulation. Risk Regulation. Regulatory Standard Setting. Regulatory Competition. Regulation and Cost Benefit Analysis.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: R. Baldwin, M. Cave and M. Lodge, Understanding Regulation, 2nd ed. (OUP, 2011); R. Baldwin, M. Cave and M. Lodge (ed.) Oxford Handbook on Regulation (OUP, 2010); R. Baldwin, C. Hood and C. Scott, Socio-Legal Reader on Regulation (OUP, 1998); Responsive Regulation: Transcending the Deregulation Debate by Ian Ayres and John Braithwaite (OUP,

1992); B. Morgan and K. Yeung (2007), An Introduction to Law and Regulation (Cambridge University Press, 2007); J. Jordana and D. Levi-Faur, The Politics of Regulation (Edward Elgar, 2004); A. Ogus, Regulation (OUP, 1994); R. Baldwin, Rules and Government (OUP, 1995); I. Ayres and J. Braithwaite, Responsive Regulation (OUP, 1992).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL435E Half Unit
Innovation, Technology and Patent Law

This information is for the 2017/18 session.
Teacher responsible: Dr Siva Thambisetty NAB 7.29
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course critically examines UK and European patent law from different perspectives including the economic case for incentivising innovation, industry and technology-specific legal doctrine, international economic and political frameworks, institutional features, and national, regional and international pressures to harmonise patent law. Case studies from comparable jurisdictions such as US, India or Latin America will be used where appropriate. The course aims to deliver a sound grounding in legal principles while exploring unprecedented challenges raised by emerging technologies through appropriate case studies. Topics include 1) The economics of innovation and patenting/ Jurisprudential rationale for patents, legislative overview – international and domestic. 2) Priority, Novelty and Inventiveness 3) Industrial Application, disclosure and Genomic Inventions 4) The rationale for subject matter exclusions (Methods of medical treatment, diagnostic methods, computer programs, business methods, mental acts, discoveries, genetically modified animals, human embryonic stem cells) 5) Claim drafting, purposive construction and the doctrine of equivalents. 6) Direct/indirect infringement – international concerns 7) The research use exception and its application to post-genomics science 8) The TRIPS Agreement and the global pharmaceutical industry 9) The problem of patent enforcement 10) Patent offices and the property parameters of patents 11) Synthetic biology 12) Competition policy in the technology and pharmaceutical sector. This course complements a number of areas of national and international law and policy.
Students do not need a scientific background and will be supported in learning technical aspects.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Bently and Sherman Intellectual Property Law, OUP 2014, Pila The Requirement for an Invention in Patent Law Oxford University Press 2010, Spence Intellectual Property, Clarendon Law Series 2007, Roughton, Cook and Spence (Eds) The Modern Law of Patents Butterworths 2005, Landes and Posner The Economic Structure of Intellectual Property Law Harvard University Press 2003, Ducor, Patenting the Recombinant Products of Biotechnology, Kluwer Publications 1998, Jaffe & Lerner, Innovation and its Discontents, Princeton University Press 2004.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL436E Half Unit
Rethinking EU Law

This information is for the 2017/18 session.
Teacher responsible: Dr Michael Wilkinson NAB6.28
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: EU law is a fast-moving, dynamic area of law. The course will address core aspects of EU law and develop a number of key themes in the public law and policy of the EU and its Member States. It will provide a sophisticated understanding of the legal, political and constitutional issues surrounding the central debates in the EU, from its origins to the recent crises, including the Euro-crisis and Brexit. Topics will include: - Law and Politics of European Integration - Fundamental Freedoms - Collective Autonomy and Social Justice - Authority of EU Law - Sovereignty, Identity and Pluralism - Political Economy - Future of the EU. The course will use general theoretical accounts in law and related disciplines in order to situate EU law in its economic, political and social context. It uses the LSE's unique interdisciplinary expertise in European law, constitutional theory, public law, and legal theory for a rich and varied study of the challenges facing the EU and its future development.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Chalmers et al., European Union Law (CUP, 2014); Craig and Deburca, EU Law: Text, CAses and Materials (OUP, 2015); Craig and DeBurca (eds.) The Evolution of EU Law (OUP, 2011); Maduro and Azoulai (eds.) The Past and Future of EU Law (Hart, 2010); Dickson and Eleftheriadis (eds.) Philosophical Foundations of EU Law (OUP, 2012); Tuori and Tuori, The Eurozone crisis: A Constitutional Analysis (CUP, 2013)
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL437E Half Unit
International Criminal Law

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Humphreys NAB5.12
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: Some background in public international law is

helpful for this course. If an introduction or refresher is needed, a standard textbook such as Malcolm Shaw's International Law is recommended.
Course content: The course looks at the history of and background to international criminal law and at its substantive content—its origins in the early Twentieth Century, its purported objectives, and the core crimes set out in the Rome Statute over which the International Criminal Court has jurisdiction (war crimes, crimes against humanity, genocide). The course will then examine in more detail a number of areas of contemporary interest (universal jurisdiction, immunity, torture, terrorism). The course is mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution.
Teaching: 24-26 hours of contact time.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Cryer, Friman, Robinson & Wilmshurst, An Introduction to International Criminal Law and Procedure (Cambridge), 2nd edition (2009). Simpson, Law, War and Crime, Polity (2007).
Indicative reading
Gary Bass, Stay the Hand of Vengeance. The Politics of War Crimes Tribunals (Princeton, 2000); Judith Shklar, Legalism (Harvard, 1964); Mark Osiel, Mass Atrocity, Collective Memory & the Law (Transaction Publishers, 1997); T McCormack & G Simpson, The Law of War Crimes (Kluwer 1997); W Schabas, The International Criminal Court (Cambridge, 2001); H Arendt, Eichmann in Jerusalem (Penguin, 1997).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL438E Half Unit
Commercial Remedies

This information is for the 2017/18 session.
Teacher responsible: Dr Solene Rowan NAB 7.26 and Dr Charles Webb NAB 6.26
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Pre-requisites: Undergraduate contract and tort law
Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:
1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?
Teaching: 24 hours
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)
Indicative reading: Rowan, Remedies for Breach of Contract: A Comparative Analysis of the Protection of Performance (OUP 2012). Burrows, Remedies for Torts and Breach of Contract (3rd edn OUP 2004). Campbell, Halson, Harris, Remedies in tort and Contract (2nd edn CUP 2002). Andrews, Clarke, Tettenborn and Virgo, Contractual Duties: Performance, Breach, Termination and Remedies (Sweet & Maxwell 2012). Peel, Treitel: The Law of Contract (14th edn 2015). Chitty on Contracts (32nd edn Sweet & Maxwell 2015)
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL439E Half Unit
UK Corporate Law

This information is for the 2017/18 session.
Teacher responsible: Prof Robert Kershaw NAB7.16
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in Foss v Harbottle; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006.
Teaching: 20 hours of seminars in the MT.
24 hours (Executive LLM)
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: Core Texts: David Kershaw, Company Law in Context (2nd ed, OUP 2012). Paul Davies, Gower and Davies' The Principles of Modern Company Law (9th eds, Sweet & Maxwell, 2012). For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:
Session 1:
Paul Davies, Gower and Davies' The Principles of Modern Company Law (6th eds, Sweet & Maxwell, 1996), Chapter 1.
Extracts from N. Lindley, Treatise on the Law of Companies (as a Branch of the Law of Partnerships) (1889). F. Palmer, Company Law: A Practical Handbook for Lawyers and Business Men (5th eds, 1905). Extracts from D. Kershaw, The Path of Corporate

Fiduciary Law (2012) 8 New York University Journal of Law and Business 395. M. Lobban, Corporate Identity and Limited Liability in France and England 1825-67, 25 Anglo American Law Review. 397, 403-04 (1996). Ernst v Nichols (1857) 10 Eng. Rep. Ashbury Railways v Riche [1874-80] All ER Rep Ext.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL440E Half Unit
Digital Rights, Privacy and Security

This information is for the 2017/18 session.
Teacher responsible: Dr Orla Lynskey (NAB 6.23)
Professor Andrew Murray (NAB 7.11)
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.
Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. Personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks across the globe, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while other frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).
This course will critically evaluate the legal framework applicable to personal data processing. It will be do this predominantly with reference to the EU framework, as this has served as a model for over 80 other jurisdictions. However we will also examine the US legal framework as it differs considerably from other global legal regimes. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered: the application of data protection rules to online behavioural advertising; to the Internet of Things; and to State surveillance.
Teaching: 24-26 hours of contact time.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: Lynskey, The Foundations of EU Data Protection Law (OUP, 2015). Mayer-Schönberger, Delete: The Virtue of Forgetting in the Digital Age (Princeton UP, 2009). Kuner, Transborder Data Flows and Data Privacy Law (OUP, 2013). Bygrave, Data Privacy Law: An International Perspective (OUP, 2015)
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL441E Half Unit
Employment Law

This information is for the 2017/18 session.
Teacher responsible: Dr Astrid Sanders NAB7.19
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.
Teaching: 24-26 hours of contact time.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: Detailed syllabus of readings will be available and the materials can all be accessed through Moodle. Hugh Collins, Employment Law, 2nd edn (Oxford University Press, 2010), Chapters 1-9 or Hugh Collins, KD Ewing and Aileen McColgan, Labour Law (CUP, 2012).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL442E Half Unit
Insolvency Law: Principles, Rescue and Reconstruction Processes

This information is for the 2017/18 session.
Teacher responsible: Ms Sarah Paterson NAB6.06
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course is concerned with the principles and policies underlying the rescue of financially distressed companies and businesses. The course considers formal legal procedures available for dealing with companies and businesses in financial distress as well as informal approaches to rescue. Topics include: Introduction: Aims and Objectives. Corporate Rescue Procedures: Informal Rescues. Corporate Rescue Procedures: Formal Procedures. Comparative Approaches: USA, Chapter 11. Recognition of Rescue Procedures: EC and International.
Teaching: 24-26 hours of contact time.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, Corporate Insolvency Law: Perspectives and Principles (Cambridge University Press,

2009) (2nd edition). Wider background reading will include some comparative law reform and other material including: R. Olivares-Caminal et al, Debt Restructuring (Oxford University Press, 2013) and the ABI Commission to Study Reform of Chapter 11 Final Report
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL443E Half Unit
Corporate Bankruptcy

This information is for the 2017/18 session.
Teacher responsible: Ms Sarah Paterson NAB6.06
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course is concerned with the principles and policies underlying the legal treatment of corporate bankruptcy. The impact of these procedures and approaches on third parties, for example corporate groups, secured and unsecured creditors, directors and employees, is also considered. Topics include: Setting aside transactions; The pari passu principle and preferential claims; Secured creditors and security devices; Quasi-security devices for the unsecured creditor; The problem of corporate groups; Company directors in troubled times; Employees in distress and EC and international recognition in corporate bankruptcy
Teaching: 24-26 hours of contact time.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, Corporate Insolvency Law: Perspectives and Principles (Cambridge University Press, 2009) (2nd edition).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL444E Half Unit
International Law and the Use of Force

This information is for the 2017/18 session.
Teacher responsible: Mr Christopher Thomas NAB7.18
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: Executive version of an existing taught masters course (LL4A8).
Course content: This course examines the international law relating to when it is permissible to use force (jus ad bellum). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition. It looks in detail at the right of self-defence, humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression. The use of force by or with the authorization of the United Nations is also considered.
Teaching: 24-26 hours of contact time.
Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.
Indicative reading: A detailed reading list will be issued in the course pack. See, in particular: Dinstein, War, Aggression and Self-Defence (5th ed, 2011); Gray, International Law and the Use of Force (3rd ed, 2008).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL445E Half Unit
Cultural Property and Heritage Law

This information is for the 2017/18 session.
Teacher responsible: Dr Tatiana Flessas NAB7.27
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.
Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Neil Cookson, Archaeological Heritage Law (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, Law, Ethics and the Visual Arts (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural Heritage Vol 1 (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural

Heritage Vol 3 (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, Dissonant Heritage: the management of the past as a resource in conflict (1996 J. Wiley); Norman Palmer, Museums and the Holocaust: law, principles and practice (2000 Institute of Art and Law); John Henry Merryman, Thinking about the Elgin Marbles: critical essays on cultural property, art and law (2000 Kluwer Law International); Nick Merriman, Beyond the Glass Case: the past, the heritage and the public in Britain (1991); Jeanette Greenfield, The Return of Cultural Treasures (1989); Richard Prentice, Tourism and Heritage Attractions (1993); G.J. Ashworth and P.J. Larkham, eds. Building a New Heritage: tourism, culture, and identity (1994); Peter Mandler, The Fall and Rise of the Stately Home (1997); Patrick J O'Keefe, Trade in Antiquities: reducing destruction and theft (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. Historic Cities and Sacred Sites: cultural roots for urban futures (2001); Federico Mayor, Memory of the Future (1995); Peter J. Fowler, The Past in Contemporary Society: then, now (1992); David Brett, The Construction of Heritage (1996); Karl Ernest Meyer, The Plundered Past (1974).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL446E Half Unit
Art and Antiquities Law

This information is for the 2017/18 session.
Teacher responsible: Dr Tatiana Flessas NAB7.27
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of antiquities and works of art, and the problems that arise in regulating markets in art, antiquities and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art and antiquities trades. Against this legislative background, the course examines important cases in disputes regarding looting and provenance of antiquities, and questions of commodification and sale of cultural artefacts and antiquities, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. 'Antiquity Law is an engagement with the problems of the market(s) in antiquities and the legal and ethical burdens on the participants in this trade. We will look at the practices and constraints that arise in the context of both private purchasers/dealers and museums acquiring antiquities. We will focus on the case that the government of Italy brought against Marion True, the erstwhile Curator of Antiquities at the Getty Museum, and we will consider how that ground-breaking prosecution changed some of the practices in this area, as well as added to the toolbox for nations seeking repatriation of cultural objects. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.
Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.
Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Colin Renfrew, Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology (2000 Duckworth); Neil Cookson, Archaeological Heritage Law (2000 Barry Rose); James Cuno, Who Owns Antiquity? Museums and the Battle over our Ancient Heritage (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, Law, Ethics and the Visual Arts (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural Heritage Vol 1 (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, Law and the Cultural Heritage Vol 3 (1989 Butterworths); Norman Palmer, Museums and the Holocaust: law, principles and practice (2000 Institute of Art and Law); Olav Velthuis, Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art (2007 Princeton University Press); Jason Felch & Ralph Frammolino, Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum (2010 Houghton Mifflin Harcourt); Sarah Thornton, Seven Days in the Art World (2009 Granta Books); Jeanette Greenfield, The Return of Cultural Treasures (1989); Patrick J O'Keefe, Trade in Antiquities: reducing destruction and theft (1997); Karl Ernest Meyer, The Plundered Past (1974).
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL447E Half Unit
International Law: Courts and Tribunals

This information is for the 2017/18 session.
Teacher responsible: Dr Devika Hovell NAB6.32
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: The course introduces students to the practice and theory of international legal dispute resolution, focusing on dispute settlement before courts and tribunals. The former Prosecutor of the Yugoslav Tribunal, Richard Goldstone, resolved that: 'it seems to me that if you don't have international tribunals, you might as well not have international law'. Given the proliferation of courts and tribunals applying and enforcing international law, certain scholars have argued we are witnessing the emergence of an 'international judicial system' (Martinez).
The course involves three main elements:
1. Firstly, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and

the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyze and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.
Teaching: 24-26 hours of contact time.
Formative coursework: Students are encouraged to produce one 2,000 word formative essay during the course.
Indicative reading: Indicative reading includes Karen Alter, The New Terrain of International Law: Courts, Politics, Rights (2014 Princeton); Gleider Hernández, The International Court of Justice and the Judicial Function (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) European Journal of International Law 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 Journal of International Criminal Justice 571.
Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL448E Half Unit
Terrorism and the Rule of Law

This information is for the 2017/18 session.
Teacher responsible: Prof Conor Gearty SAR.G.04
Availability:
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism (and, latterly, the emerging field of 'extremism').
Teaching: 24-26 hours of contact time.
Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.
Indicative reading: There are four pieces ideally to be read before we meet:
(i) Richard English Terrorism: How to Respond (Oxford 2009; pb 2010).
(ii) Conor Gearty, Liberty and Security (Polity, 2013).
(Note both of these books are in paperback, and short!)
(iii) Conor Gearty, 'Terrorism and Human Rights' in Gearty, Selected Essays on Human Rights and Terrorism (Cameron May 2008), ch 24 – I have a PDF available.
(iv) Conor Gearty, 'Terrorist threats, Anti-terrorism and the Case against the Human Rights Act' in F Cowell (ed), Critically Examining the Case against the Human Rights Act (Hart 2017) I have a word version.
Please try to ensure that you have completed this reading prior to the module.
Further reading:

Assessment:
Either a take-home examination or 8,000 word assessed essay (100%).

LL449E Half Unit
Cyberlaw

This information is for the 2017/18 session.
Teacher responsible: Prof Andrew Murray NAB7.11
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Course content: This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets).
It begins by providing a theoretical framework for the regulation of the Internet, examining questions such as whether the internet

is capable of regulation, whether such regulation should be neutral and who should assume the task of regulating the online environment. Students taking the course will be expected to develop knowledge and understanding of the different values and interests brought to bear in the regulation of information technologies and communities.
Armed with this theoretical background, students will then be asked to consider how these values are reflected in the regulatory design of the online environment. This examination will be conducted by considering a number of case studies relating to online privacy, defamation, criminal activity and market power. The course concludes by examining the topical and politically charged question of whether Internet Service Providers should be allowed to vary service conditions by types of content.
Teaching: 24-26 hours of contact time.
Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.
Indicative reading: Murray, Information Technology Law: The Law and Society (OUP, 3rd ed, 2016). Lipton, Rethinking Cyberlaw: A New Vision for Internet Law (Edward Elgar, 2015). Murray, The Regulation of Cyberspace (Routledge, 2007). Lessig, Code Ver, 2.0 (Basic Books, 2006). Zittrain, The Future of the Internet (Penguin, 2009). Reed: Making Laws for Cyberspace (OUP, 2012). Sunstein, Republic.com 2.0 (Princeton UP, 2009).
Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL4COE Half Unit
Taxation of Wealth

This information is for the 2017/18 session.
Teacher responsible: Dr Andrew Summers NAB.6.02
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.
Pre-requisites: This course is suitable for students who have not previously studied taxation. Some prior familiarity with principles of tax design is advantageous but not essential.
Course content: The course examines the taxation of wealth from a variety of interdisciplinary perspectives, drawing on research from political theory, economics, social policy and law. The main aims of the course are to explain why wealth taxes currently play a relatively minor role in modern tax systems (compared, for example, with taxes on income), and to evaluate the options for taxing wealth, including: taxes on transfers of wealth; taxes on assets; and taxes on the returns on wealth. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions.
Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers, e.g. inheritance or estate tax, gift tax, comprehensive income tax; (ii) taxes on assets e.g. annual wealth tax, property tax, land-value tax; and (iii) taxes on returns e.g. capital gains tax, capital income tax.
Teaching: 25 hours of seminars in the ST.
24-26 hours of contact time.
Formative coursework: Students will be expected to produce 2 pieces of coursework in the ST.
Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of subheadings, and bibliography) based on past or sample summative essay titles.
Indicative reading: Atkinson, Inequality: What can be Done? (Harvard University Press 2015); Graetz & Shapiro, Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth (Princeton University Press 2005); Hills et al, Wealth in the UK: Distribution, Accumulation and Policy (OUP 2013); Institute for Fiscal Studies, The Structure and Reform of Direct Taxation: The Meade Report (Allen & Unwin 1978); Institute for Fiscal Studies, Tax by Design: The Mirrlees Review, Vols 1 & 2 (OUP 2011); Murphy and Nagel, The Myth of Ownership: Taxes and Justice (OUP 2002); Piketty, Capital in the Twenty-First Century (Harvard University Press 2014); Sandford, Taxing Personal Wealth (Allen & Unwin 1971); Scheve & Stasavage, Taxing the Rich: A History of Fiscal Fairness in the United States and Europe (Princeton University Press 2016); Waldron, The Right to Private Property (OUP 1991).
Assessment: Assessment path 1
Take home exam (100%) in the ST.
Assessment path 2
Essay (100%, 8000 words) in the ST.

LL4CPE Half Unit
Tax Avoidance

This information is for the 2017/18 session.
Teacher responsible: Dr Michael Blackwell NAB 7.30
Availability: This course is available on the Executive LLM. This course is not available as an outside option.
Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK and USA.
The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.
Taxpayers have always sought to minimise their tax burden. However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).
Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) the OECD response to BEPS; (vii) BEPS and the EU; and (viii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.
Teaching: The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online and hard copy materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, which will typically be held in the first half of September, December and April. Where there is student demand we will also offer modules taught over two intensive weekends. For the week-long sessions, the module will run from either Monday to Friday, or Sunday until Friday with a rest day on Wednesday.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.
Indicative reading: Dhammika Dharmapala, 'What Do We Know about Base Erosion and Profit Shifting? A Review of the Empirical Literature' (2014) 35(4) Fiscal Studies 421. J Feldman and JA Kay, 'Tax Avoidance' in Paul Burrows and Cento G Veljanovski (eds), The Economic approach to law (Butterworths 1981). Edward J McCaffery, Income Tax Law: Exploring the Capital Labour Divide (OUP 2012) 12-22; 182-202 (ie 1.6 until the end of Chapter 1 and 'Chapter 7, 'A Summary, of Sorts: Anatomy of a Tax Shelter') Judith Freedman, 'Interpreting Tax Statutes: Tax Avoidance and the Intention of Parliament' (2007) 53 LQR 123. David A Weisbach, 'An Economic Analyisis of Anti-Tax-Avoidance Doctrines' [2002] American Law and Economics Review 88. Grahame R Dowling, 'The curious case of corporate tax avoidance: Is it socially irresponsible?' (2014) 124 Journal of Business Ethics 173. Judith Freedman, 'The Tax Avoidance Culture: Who is Responsible?' (2006) 59 Current Legal Problems 359. Kevin Holland, Sarah Lindop, and Fatimah Zainudin, 'Tax Avoidance: A Threat to Corporate Legitimacy? An Examination of Companies' Financial and CSR Reports' [2016] (3) BTR 310
Assessment: Assessment path 1
Take home exam (100%) in the MT.
Assessment path 2
Essay (100%, 8000 words) in the MT.

MG406E Half Unit
Behavioural Decision Science

This information is for the 2017/18 session.
Teacher responsible: Dr Barbara Fasolo
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: This course introduces students to the fascinating field of behavioural "decision" science. We will explore a selection of current research topics relevant to personal and managerial decision making as well as policy-making. For each topic students will get acquainted with key psychological phenomena and principles of behavioural decision science through interactive lectures, and become alert to cognitive biases and learn how to overcome them. Students will read pre-assigned scientific articles and in class discuss lessons learned, limitations and implications of these concepts for the development of decision making competence in their organisation (e.g. via design of policies, training programmes, or tools). Topics will include: Origin of Behavioural Decision Science; the Building Blocks of Behavioural Decision Science: Preferences, Utility and Value; Probability, Uncertainty and Risk; Choice Architecture and Behavioural Change; Heuristics and Biases in Decisions about Money, Health, Consumer Products and People.
Teaching: 15 hours of lectures and 8 hours of seminars in the MT.
Formative coursework: The formative assignment will take place on the final day of the course after all the lectures and seminars have been completed. The assignment will consist of a plenary presentation in which students divided into small groups will be asked to give a short presentation discussing an intervention (de-biasing technique, nudging, or choice architecture) that can be used to tackle the most important biases in a decision making problem of their choice. Student groups will develop their plenary presentations during seminars while interacting with the course teachers and other students. The formative feedback will be given at a team level, and will focus on the rigour and use of behavioural science concepts learned in the course.
Indicative reading: Ariely, D. (2008). Predictably Irrational: The Hidden Forces That Shape Our Decisions. Harper Collins; Baron, J. (2000), Thinking and Deciding (3rd edition), Cambridge: Cambridge University Press; Bazerman, M. (2006) Judgment in Managerial Decision Making. New York: Wiley. 6th edition; Beach and Connolly (2005), The Psychology of Decision Making: People in Organizations, (2nd Edition), Sage; Hastie, R., and Dawes, R.M. (2001). Rational Choice in an Uncertain World. Sage Publications, Thousand Oaks; Kahneman, D. (2011) Thinking Fast and Slow. London: Allen Lane; Plous, S. (1993), The Psychology of Judgment and Decision Making, New York: McGraw Hill; Russo, J. E. & Schoemaker, P. J. H. (2002) Winning decisions: How to make the right decision the first time, Piatkus Publ. Limited; Sunstein, C.R. Thaler, R.H. (2008) Nudge - New Haven, CT: Yale University Press; Yates, F. J. (2003). Decision Management: How to Assure Better Decisions in Your Company. Jossey-Bass.
Assessment: Coursework (100%, 3000 words) in the MT.
The summative assignment will include two parts. In the first part (no more than 1,000 words), you will be asked to describe and critically evaluate how the decision problem as well as the intervention presented for the formative assessment came about. This part will be less academic because we will expect you to use individual reflection, and academic references will not be needed. In the second part of the essay (no more than 2,000 words), you will justify the specific nudging or debiasing intervention, with reference to behavioural literature, and theories. The first part of the essay will count for 25% of your mark while 75% will come from the second part.

MG407E Half Unit
Goals and Motivation for Individuals and Teams

This information is for the 2017/18 session.
Teacher responsible: Dr Heather Kappes
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: For the modern day enterprise, be it private firms seeking to maximize revenues and profits, non-profit organisations seeking to change behaviours and raise money for pro-social causes, or government bodies seeking to implement policy, the role of goals and motivations is critical, both at the individual level and the team level. For each entity it is important to gain a critical understanding of what kinds of goals individuals and teams are attracted to, how these goals are set and pursued, what factors and incentives aid or hinder such goal pursuit and goal achievement, and how teams and individuals react to feedback on their progress towards these goals. This course familiarises students with strategies for promoting success over every phase of goal pursuit, from first consideration, to commitment, to action, and beyond. Students will learn how to categorise goals using empirically-tested frameworks like construal level theory, regulatory focus theory, and mindset theory (learning versus performance goals). They will use these frameworks to identify the problems that plague goal pursuit: problems like failing to get started (e.g., trying to break a habit), getting derailed (e.g., ego depletion), and continuing when it would be better to quit (e.g., sunk costs phenomenon). Students will be introduced to empirical findings on the optimal ways to use tools like specific goal setting, implementation intentions, mental simulations of processes versus outcomes, and self-efficacy in order to boost motivation and aid in successful goal pursuit.
Teaching: 15 hours of lectures and 7 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Bargh, J., Gollwitzer, P. M. & Oettingen, G. (2010). Motivation. In S. T. Fiske, D. T. Gilbert, & G. Lindzey (Eds.), Handbook of social psychology, 5th ed. (Ch. 8, pp. 268-316). New York: Wiley. Hackman, J.R., & Katz, N. (2010). Group behavior and performance. In S. T. Fiske, D. T. Gilbert, & G. Lindzey (Eds.), Handbook of social psychology, 5th ed. (Ch. 32, pp. 1208-1251). New York: Wiley.
Assessment: Essay (100%, 4000 words) in the LT.

MG440 Half Unit
Managerial Economics (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr. Ricardo Alonso
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
The information in this course guide pertains to the 2017-2019 cohort.
Course content: A graduate-level introduction to the foundations of managerial economics and its application to high-level business decisions. Topics include:
1. Economics as a theory of organisation.
2. Demand, supply, and equilibrium: the determinants of consumers' and firms' market responses, the nature of non-strategic interaction, government intervention, international trade
3. Externalities and market failure
4. Strategic interaction and Game Theory
5. Choice under uncertainty: attitudes towards risk
6. Information and efficiency: adverse selection
7. Price discrimination: nonlinear pricing, social economics
8. Horizontal and Vertical Differentiation.
Teaching: Scheduled over one module. Eight 4 hour sessions plus two review sessions.
The course will run between the following dates:
• 29 August - 09 September 2017
Formative coursework: Students will be expected to produce 1 problem set in the MT.
Indicative reading: Optional textbook: B. Douglas Bernheim and Michael D. Whinston, Microeconomics, McGraw Hill, 2008. Further readings will be provided at the beginning of the course.
Assessment: Coursework (20%), class participation (15%) and take home exam (65%).

MG441 Half Unit
Foundations of Management (modular)

This information is for the 2017/18 session.
Teacher responsible: Prof Paul Willman
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
This information in this course guide pertains to the 2017-2019 cohort.
Course content: A thorough grounding in the key management disciplines. Students will be provided with an overview of the development of Management disciplines and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Each field will cover Origins and disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate.
Teaching: Scheduled over 2 modules – 10 sessions of up to 4 hours each.
The course will run between the following dates:
• 29 August - 09 September 2017
11-16 December 2017
Lectures:
1. Course Introduction and the Origins of Management
2: Management and Firm
3: The Rise and Decline of Labour
4: Taylorism, Motivation and Performance
5: The Rise of Human Resources Management
6: Making Decisions
7: Understanding Organisational Structures
8: The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
10 Managed by Markets?
Seminar classes:
1. Managers and Managerial Work
2. The Firm and the Manager
3. Internal Labour Market and Boundaries of Firms
4. Taylorism and Toyotaism
5. UBS Case study
6. Understanding Decision Biases
7. Understanding Organisational Structures
8. The Analysis of Competitive Forces
9. The Analysis of Competences
10. Strategy and Market oversight
Formative coursework: 2,000 word essay
Indicative reading: Paul Willman: Understanding Management: Social Science Foundations
Oxford University Press, September 2014.
Assessment: Class participation (10%) and take home exam (60%) in the LT.
Case assignment (30%) in the MT.

MG443 Half Unit
Organisational Behaviour (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr Connson Locke
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
This information in this course guide pertains to the 2017-2019 cohort.
Course content: The course seeks to understand individual attitudes and behaviour in an organizational context. It does this by reviewing psychological theories as they apply to organisations, demonstrating the contribution of a psychological perspective to understanding human behaviour at work, and critically evaluating the empirical evidence. The course attempts to strike a balance between theory and practice by applying the theories to practical problems in organizations.
Topics include personality and individual differences, motivation and rewards, intrinsic motivation, creativity, organizational justice, cross-cultural management, organisational culture and change.
Teaching: Teaching is spread over the first 3 modules. The teaching is highly participative and includes breakout discussions and exercises.
The course will run between the following dates:
29 August - 09 September 2017
11-16 December 2017
09 - 21 April 2018
Formative coursework: A practice exam will be provided and feedback will be given on this assignment.
Indicative reading: The course relies on journal articles (for example, Journal of Applied Psychology, Journal of Organizational Behaviour). A complete reading list will be provided at the start of the course. There is no required textbook. The following textbook is recommended for students who would like further reading: French, R., Rayner, C., Rees, G. & Rumbles, S. (2011) Organizational Behaviour, 2nd edition. John Wiley & Sons, Ltd.
Assessment: Essay (20%), take home exam (65%) and class participation (15%).
Class participation - based on group presentations.

MG445 Half Unit
Marketing Strategy (modular)

This information is for the 2017/18 session.
Teacher responsible: Prof Om Narasimhan
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.

The information in this course guide pertains to the 2017-2019 cohort.
Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential to building an effective marketing strategy. Peter Drucker, the father of business consulting once famously remarked, "Because the purpose of business is to create a customer, the business enterprise has two--and only two--basic functions: marketing and innovation". In today's highly competitive business environment these words ring even more true: a well-designed marketing strategy can make all the difference between success and failure in the marketplace. While marketing is commonly associated with consumer goods companies (e.g., Unilever) it would be myopic to restrict the relevance of marketing to such instances alone. Marketing, ultimately, is about understanding and shaping behaviour. Accordingly, banks and other financial institutions, as well as governmental, medical, and not-for-profit organisations - from those that design and sell financial products, to those that implement public policy (e.g., those dedicated to reducing drunk driving, increasing literacy, and encouraging safe contraception), have all found that a well-thought out marketing strategy can be a critical arbiter of success even in this "ideas marketplace."
By using a wide range of quantitative as well as qualitative methods, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop an analytical tool-kit that will be applicable to a wide range of industries and functions.
Teaching: Scheduled over two modules – one of which will take place overseas. Teaching will be spread across 10 sessions of up to 4 hours each.
Module 3 (9-21 April 2018) and module 4 (10-16 June 2018).
Formative coursework: Case write up.
Indicative reading: There is no required textbook. Further references will be provided at the commencement of the course.
Assessment: Take home exam (55%), class participation (15%) and other (30%).
The other assessment consists of a Summative Group Assignment (30%).

MG446 Half Unit
Strategy, Organisation and Innovation (modular)

This information is for the 2017/18 session.
Teacher responsible: Dr Lourdes Sosa
(Three sessions will be taught by a guest teacher - Dr Mia de Kuijper)
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
The information in this course guide pertains to the 2016-2018 cohort.
Course content: The course seeks to understand differences in profitability across (for-profit) firms with the objective of designing strategic recommendations for managers to improve (and defend) their firms' competitive positions. To do so we will first review industry-wide as well as firm-specific determinants of short-term profitability. On that foundation we will look at long-term determinants of profitability including dynamic capabilities and innovative ability. The course aims to balance exposure to general strategic principles and specific practical applications. To that purpose, we will use theoretical frameworks to analyse practical cases from a wide array of firms in varied countries.
Topics include business models, industry structure and coopetition, value proposition, strategic resources and inimitability, dynamic capabilities, disruptive innovation, power nodes strategy and scenario planning.
Teaching: Taught over 10 four-hour sessions spread over 2 modules. The teaching is highly participative and includes lectures, breakout discussion, exercises and a company visit.
The course will run between the following dates:
• 04 – 09 September 2017
• 02 – 06 January 2018
Formative coursework: Feedback will be given on one short essay, preparing students for the exam, as well as on in-class exercises.
Indicative reading: The course relies on journal articles (for example, Strategic Management Journal). A complete reading list will be provided at the start of the course. Sample texts include the following: Porter, M.E. (2008) The Five Competitive Forces that Shape Strategy (Harvard Business Review); Christensen, C., Bower J. (1996) Customer Power, Strategic Investment, and the Failure of Leading Firms (Strategic Management Journal); Teece, D., Pisano, G., Shuen, A. (1997) Dynamic Capabilities and Strategic Management (Strategic Management Journal); De Kuijper, M. (2009) Profit Power Economics.
Assessment: Essay (30%), class participation (10%) and take home exam (60%).

MG447 Half Unit
Foreign Direct Investment and Emerging Markets (modular)

This information is for the 2017/18 session.
Teacher responsible: Prof Saul Estrin NAB 4.32
Dr Christine Cote NAB 3.18
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
The information in this course guide pertains to the 2016-2018 cohort.
Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The new institutional economics has recently developed as a field to understand the impact of variation in institutions on economies performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will then provide an analysis of economic performance and growth in emerging markets building on the new institutional economies and working with a large variety of datasets and sources. The remainder of the course is devoted to specific topics of MNEs in emerging markets. These include the determinants and impact of FDI; entry mode choices; measures of institutional distance; outsourcing; and emerging market multinationals.
Teaching: 32 hours of lectures in the MT. 8 hours of lectures in the LT.
Scheduled over three modules, one of which will take place overseas – 10 sessions of up to 4 hours.
The course will run between the following dates:
04 – 09 September 2017
05 – 11 November 2017
02 – 06 January 2018
Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: R. Caves, Multinational Enterprise and Economic Analysis, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, Redefining Global Strategy, Harvard Business School Press, 2007; J. Williamson, The New Institutional Economies, Journal of Economic Literature, 2000; Estrin et. al., Entry Mode in Emerging Markets, Strategic Management Journal, 2009; T. Khanna and K Palepu, The Future of Business Groups in Emerging Markets, Academy of Management Journal 2004.
Assessment: Take home exam (60%) in the LT.
Presentation (30%) in the MT.
Class participation (10%) in the MT and LT.

MG498 Half Unit
Dissertation/Capstone Project (modular)

This information is for the 2017/18 session.
Teacher responsible: Various
Availability: This course is compulsory on the Executive Global MSc Management. This course is not available as an outside option.
Course content: This course consists of a project which will be undertaken throughout the second year of the degree. Students will choose between an academic dissertation or a capstone project. The academic dissertation will explore a question that is grounded in academic theory and literature. The capstone project will explore a business idea or venture. In both projects, students will collect original data relevant to their research question or business idea and must analyse the data, discuss limitations, and draw conclusions.
Teaching: Students are required to participate in 20 hours of scheduled seminar sessions from module 3 onwards which will provide guidance and support in developing their dissertation or capstone project. Separate seminars will be conducted to provide support for those who choose the academic dissertation and those who choose the capstone project. Students will be allocated a faculty advisor who will support and guide them. The course will run throughout the year.
Formative coursework: Students will be required to agree their dissertation/capstone topic with a faculty advisor and provide a plan which they will receive feedback on.
Indicative reading: Relevant reading will be provided by academic advisors.
Assessment: Dissertation (100%, 6000 words).

PH426E Half Unit
Philosophy and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Prof Luc Bovens, Dr Alexander Voorhoeve and Dr Susanne Burri
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: Course content:
This course yields insight into key moral and political values that are essential for policy-makers when they draw on behavioural science. Discussion is focused on cases and is thoroughly interdisciplinary: it draws on both normative philosophical arguments and findings from the social sciences to allow students to make informed and rigorous evaluations of public decisions. Topics may vary, but the following is a representative sample:
- When we aim to prevent harms, should we give less priority to harms that befall people only because of their free choices than to harms that they could not avoid through their choices?
- How should we balance the importance of respecting people's autonomy (self-governance) with the importance of promoting their well-being?
- Or Should some things never be for sale even if both the buyer and the seller wish to transact and no one else is harmed?
- When we have limited resources to distribute among people who are in need, how can we distribute them fairly?
- What is the nature of behavioural mechanisms? How should subjects, social scientists and policy makers approach patterns of agency that are determined by such mechanisms?
- What are the moral problems associated with libertarian paternalism or Nudge? How does this approach compare to other policy mechanisms, such as regulation, taxation and subsidies, and social advertisement, to address and correct internalities?

Teaching: 15 hours of lectures and 7 hours of seminars in the Easter Vacation.
Formative coursework: Students will be expected to produce 1 essay in the ST.
Indicative reading: Bovens, L. (2008) The Ethics of Nudge. In: Grune-Yanoff, Till and Hansson, Sven Ove (eds.) Preference Change: Approaches from Philosophy, Economics and Psychology. Theory and Decision Library. A (42). Springer, 207-19. Wolff, J. (2011) Ethics and Public Policy: A Philosophical Inquiry. Routledge. Satz, D. (2010) Why Some Things Should Not be For Sale: The Moral Limits of Markets. Oxford University Press. Sunstein, C. and Thaler, R. (2008) Nudge. Yale University Press. Oliver, A. (ed.) (2013) Behavioural Public Policy. Cambridge University Press. Feinberg, J. (1986) Harm to Self. Oxford University Press.
Assessment: Essay (100%, 4000 words) in the ST.

PS468E Half Unit
Behavioural Science and Policy

This information is for the 2017/18 session.
Teacher responsible: Prof Paul Dolan QUE.3.08
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science. The course covers the following topics: What is behavioural science?; What are preferences to economists and psychologists?; Dual-process models of behaviour and the role of the unconscious mind; Dual processing into policy using the MINDSPACE checklist; the role of emotions in decision making; compensating behaviours; breaking and creating habits; the use of carrots and sticks to trigger behaviour change.
Teaching: 15 hours of lectures and 7 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.
Indicative reading: Dolan, P. (2014). Happiness by design: finding pleasure and purpose in everyday life. London: Allen Lane. Kahneman, D. (2011). Thinking Fast and Slow. London: Penguin Books. Ayres, Ian, Carrots and Sticks, Unlock the Power of Incentives to Get Things Done, Bantam, 2010. Weber, E.U., and Johnson, E.J. (2009). Mindful judgment and decision making. Annual Review of Psychology, 60, 53-85. Rabin, M. (1998). Psychology and Economics. Journal of Economic Literature, 36, 11-46. Loewenstein, G., Weber, E.U., Hsee, C.K., and Welch, N. (2001). Risk as feelings. Psychological Bulletin, 127, 267-286. Thaler, R. and Sunstein, C. (2003) Libertarian paternalism, American Economic Review, 93, 2, 175-179. Gneezy U, Meier S, Rey-Beil P (2011), "When and Why Incentives (Don't) Work to Modify Behavior", Journal of Economic Perspectives, 25(4):191-210. Kamenica, Emir (2012), "Behavioral Economics and Psychology of Incentives", Annual Review of Economics, vol. 4, 427-52.
Assessment: Take home exam (100%) in the MT.

PS469E Half Unit

Research Methods for Behavioural Science

This information is for the 2017/18 session.
Teacher responsible: Dr Matteo Galizzi QUE.3.16
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: The course aims to introduce students to the main methodological concepts and tools in behavioural science. To achieve this objective, the course combines rigorous conceptual discussion with hands-on practical applications. The course covers: The beauty of experiments: how randomization solves the sample selection bias; randomized controlled experiments from the lab to the field: taxonomy, principles, best practices; online and lab-field experiments, Statistical tools: distributions and their moments, the inference problem; Experimental design: between-subjects design, block/stratified randomization, matched-pair design, within-subjects design, cluster randomization, the mechanics of randomization; Introduction to econometrics: simple and multiple linear regression models, econometric analysis of experimental data; Tests of hypothesis: principles and practices, parametric and non-parametric tests in practice; Sampling: optimal sample size calculation in practice, useful rules of thumbs; Experimental best practices and challenges: ethics, recruitment, informed consent form, attrition, non-compliance, external validity, behavioural data-linking; When randomization is not possible: before and after, matching, natural experiments, difference-in-difference, regression discontinuity design; Outcomes and preferences: surveys, measuring risk and time preferences; Game theory and behavioural game theory: games and strategic decision-making, measuring social preferences. The seminars involve hands-on practical applications using Stata and Qualtrics.
Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading:
- Angrist, J.D., Pischke J-S. (2015). Mastering 'Metrics: the Path from Cause to Effect. Princeton: Princeton University Press.

- List, J.A. (2006). Field experiments: a bridge between the lab and naturally occurring data. Advances in Economic Analysis and Policy, 6, 8.

Assessment: Take home exam (100%) in the LT.

PS470E Half Unit

Policy Appraisal and Impact Assessment

This information is for the 2017/18 session.
Teacher responsible: Séverine Toussaert, QUE.5.12
Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.
This course is one of two options.
Course content: This course aims to introduce students to the main concepts and tools of policy appraisal and project impact assessment. The course covers the following topics: 1) Architecture of Cost-Benefit Analysis for market and non-market goods; 2) Adjustments for time discounting, risk and uncertainty; 3) Elicitation of monetary values through revealed preference methods; 4) Stated preference methods: contingent valuation and QALYs; 5) The subjective well-being approach to valuation. The course offers practical examples and applications to key areas of public policy, such as health and the environment.
Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
Indicative reading:
- HM Treasury (2011) The Green Book: Appraisal and policy evaluation in central government. London, UK.
- Gruber J. and Koszegi B. (2008) A Modern Economic View of Tobacco Taxation. Paris: International Union Against Tuberculosis and Lung Disease.

Assessment: Take home exam (100%) in the ST.

PS471E

Dissertation in Behavioural Science

This information is for the 2017/18 session.
Teacher responsible: Dr Matteo Galizzi QUE.3.16
Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of behavioural science. The dissertation can consist of : an empirical analysis of existing data; a collection and analysis of new data; a randomised controlled experiment (lab, field, online); a systematic review of the literature. Students must obtain the approval of their supervisor before embarking on any research.
Teaching: 3 hours of classes in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.
Indicative reading: Relevant reading will be provided by supervisors.
Assessment: Dissertation (100%, 10000 words) in the MT.

PS472E Half Unit
Corporate Behaviour and Decision Making

This information is for the 2017/18 session.
Teacher responsible: Dr Grace Lordan OLD M 2.26
Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.
Course content: Lecture 1: Introduction
This lecture will give an overview of rational decision making from an economics perspective. Rationality should already be familiar to the students (from compulsory PS468E and MG406E), so they will simply re visiting this. Attention will also be paid to how students can identify credible empirical evidence from experiments (brief recap what was done in PS469E) and beyond (cover natural experiments). We will also recap on the interpretation, advantages and disadvantages of observational studies.
Lecture 2: Finding a Job
This lecture will cover the unconscious biases that are encountered corporate firms in:
1) Job Search
2) Job Advertising
3) Interview panels
Seminar 1: Lecture 2 will be complemented with a linked seminar which focuses on how these biases in job search and hiring affect success by gender in the labour market and in top tier jobs. Particular attention will be paid to increasing diversity on interview boards.
Lecture 3: Day to Day Work
We will discuss biases in allocated bonuses, promotions, deciding who is viewed as 'great' and the allocations of prestigious projects in corporate firms. We will also cover biases in how different types of people are 'heard' and 'seen' in business, and biases in what a 'successful' person looks like. We will brainstorm, with the help of received literature in behavioural economics, viable interventions to combat blind spots in promotions and bonus allocations in the corporate setting.
Seminar 2: Lecture 3 will be complemented with a linked seminar where particular attention will be paid to empirical evidence that relates to:
1) In-group/out groups at work
2) Herding and the implications for decisions in business.
3) Social norms
Lecture 4: When at Work: Trading and Investment
This behavioral finance lecture will cover psychological biases in trade and high stake investment decisions in finance. It will cover the efficient markets hypothesis and outline the behavioral biases in finance that will likely disrupt its predictions. We will also cover how these biases impact on forward futures and options markets, leverage cycles and corporate stocks.
Seminar 3: So far, we have focused on cognitive biases, this lecture will have a linked seminar that will cover the potential for biology to disrupt rational decision making within financial firms when making investment choices.
Lecture 5: When at Work: Complying with the Rules
We will begin by discussing the decision to comply to a firm's policies and procedures within a cost benefit framework. In practice, compliance depends on a number of factors, including employee behavior which is subject to biases already covered. This lecture will cover the insights from behavioral science, which can be used to encourage compliance in the face of these biases.
Seminar 4: Lecture 5 will have a linked seminar which considers high profile compliance issues in finance.
Seminar 5: Wrap up – bringing together of all the messages learned in the course. Student presentations based on group work on 'what was learned' each day.
Teaching: 12 hours and 30 minutes of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 case study in the LT.
Case study with short questions that matches the style of the summative assessment
Indicative reading: Bertrand Marrianne and Duflo Ester. Field Experiments on Discrimination. in Handbook of Economic Field Experiments. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. Leonard, and John A. List. "Gender differences in competition: Evidence from a matrilineal and a patriarchal society." Econometrica 77.5 (2009): 1637-1664. Johnston, David W. and Lordan, Grace (2016) Racial prejudice and labour market penalties during economic downturns European Economic Review, 84. 57-75. Finance and the Good Society, Princeton: Princeton University Press, 2012. Fama, Eugene, "Market Efficiency, Long-Term Returns, and Behavioral Finance," Journal of Financial Economics.
Assessment: Coursework (100%, 4000 words) in the ST.
Case study with ten short questions.

PS473E Half Unit
Behavioural Science for Health

This information is for the 2017/18 session.
Teacher responsible: Dr Matteo Galizzi QUE.3.16
Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option. Not available
Pre-requisites: No prerequisites
Course content: The course aims to introduce to students the main tools and principles of behavioural sciences and the key state-of-the-art applications to health economics, policy, and management. The course is designed to enhance students' abilities to apply rigorously and critically behavioural science tools to concrete challenges in the health area. It covers principles of behavioural science; behavioural health economics and policy, and behavioural experiments in health; risk preferences and health; time preferences and health; social preferences and health; behavioural principles for information policies in health; financial and non-financial incentives in health; nudging behavioural change in health; behavioural spillovers in health; behavioural principles for regulation of health and healthcare.
Teaching: 15 hours of lectures and 7 hours and 30 minutes of seminars in the ST.
5 x 3 hour lectures (15 hours)
5 x 1.5 hour seminars (7.5 hours each seminar group)
Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the ST.
Indicative reading: Charness, G, Gneezy, U (2009) Incentives to exercise. Econometrica, 77(3), 909-931. Dolan P, Galizzi MM (2015) Like ripples on a pond: behavioural spillovers and their consequences for research and policy. Journal of Economic Policy, 47, 1-16. Galizzi, MM (2014). What is really behavioural in behavioural health policy? And, does it work? Applied Economic Perspectives and Policy, 36(1), 25-60. Schwartz, JA, Chapman, GB (1999). Are more options always better? the attraction effect in physicians' decisions about medications. Medical Decision Making, 19, 315-323. Volpp, K, Loewenstein, G et al. (2008). Financial incentive-based approaches to weight loss. Journal of the American Medical Association, 300, 2631-2637.
Assessment: Essay (100%, 3000 words) in the ST.

SA4M9E Half Unit Not available in 2017/18
Systematic Review and Meta-analysis

This information is for the 2017/18 session.
Teacher responsible: Dr. Huseyin Naci
Availability: A core course available only for students taking MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences
Course content: Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.
This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.
Learning outcomes:
- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- randomized
- randomized
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 20 hours of seminars and 4 hours of computer workshops in the ST.
Formative coursework:
- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: Cochrane Handbook for Systematic Reviews of Inter ventions (version 5.1.0, updated March 2011). Institute of Medicine. Finding what works in health care: standards for systematic reviews. 23 March 2011. Sutton AJ et al. Methods for Meta-analysis in Medical Research. Wiley, Chichester, UK, 2000. Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. Annals of internal medicine 1997;126(5):376–80. Jansen JP et al. Is network meta-analysis as valid as standard pair wise meta- analysis? It all depends on the distribution of effect modifiers. BMC medicine 2013;11(1):159. Jansen JP et al. Interpreting indirect treatment comparisons and network meta-analysis for health-care decision making: report of the ISPOR Task Force on Indirect Treatment Comparisons Good Research Practices: part 1. Value Health 2011;14(4):417–28.
Assessment: Research project (100%) in the ST.

MRes/PhD Programme Regulations

Key to MRes/PhD Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 17/18) means not available in the 2017/18 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

Methodological Training and Study Skills

The Methodology Institute provides a number of courses for research track PhD programmes. MY4M1 **Foundations of Social Research 1** and MY4M2 **Foundations of Social Research 2** contain modules in quantitative and qualitative analysis and are required for the ESRC 1+3 scheme. In addition the Institute offers courses in study skills and specialist options in a range of aspects of social research. All PhD students are welcome to attend any courses offered by the Institute, details of which are in the relevant part of the section on master's degrees.

MRes/PhD in Anthropology

Programme Structure - MRes
Programme code: TMRESAN
Department: Anthropology

Paper	Course number and title
1	AN471 Qualitative and Quantitative Methods for Anthropologists
2	AN472 Evidence and Arguments in Anthropology and Other Social Sciences
3	AN442 Supervised Reading Course and Fieldwork Preparation
4	AN443 Research Proposal
	In addition students are required to complete the following courses, which are compulsory but not examined.
5	AN500 Seminar on Anthropological Research
6	All MRes students are required to audit one or two of the department's main lecture courses (to the value of one unit):
	AN402 The Anthropology of Religion
	AN405 The Anthropology of Kinship, Sex and Gender
	AN437 Anthropology of Learning and Cognition
	AN451 Anthropology of Politics (H)
	AN456 Anthropology of Economy (1): Production and Exchange (H)
	AN457 Anthropology of Economy (2): Transformation and Globalisation (H)

Award of the MRes in Anthropology

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree. For students entering in or before 2016/17: Classification for students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 will always be determined to the advantage of the student. From 2017/18 students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 shall be classified as follows:
Distinction/Merit borderline (scheme paragraph 3.3.2):
3.3.2 (c) marks of a Distinction grade in courses to the value of 2.5 units and a mark of a Merit grade in a course of 0.5 unit value will obtain an overall classification of a Distinction;
3.3.2 (d) marks of a Distinction grade in courses to the value of 2.0 units and marks of a Merit grade of at least 65 in courses to the value of 2.0 units; OR, marks of a Distinction grade in courses to the value of 2.0 units, marks of a Merit grade in courses to the value of 2.0 units, and an overall aggregate mark of at least 275 will obtain an overall classification of a Distinction.
Merit/Pass borderline (scheme paragraph 3.3.4):
3.3.4 (h) marks of a Merit grade in courses to the value of 2.5 units will obtain an overall classification of a Merit;
3.3.4 (i) marks of a Distinction grade in courses to the value of 1.0 unit, marks of a Merit grade in courses to the value of 1.0 unit, and marks of a Pass grade of at least 55 to the value of 2.0 units will obtain an overall classification of Merit
The marks for AN471 and AN472 will count respectively as 25% of the total mark for the year. The research proposal, worth 50% of the total mark for the MRes year, will be examined (and the examination includes a viva). In order to be upgraded to PhD registration and allowed to commence fieldwork, students (a) must earn an average of 60 or more across all units; (b) must earn a minimum mark of 60 on the research proposal.

Progression to the PhD

If the above MRes requirements are met, students will be upgraded to PhD registration and will commence the fieldwork phase of the programme. The mandatory first year progress review of PhD students will be based on written reports about the early phase of fieldwork. The mandatory third year progress review for students in Anthropology is held in the third term (or, exceptionally, in the fourth term) after their return from fieldwork; this entails a viva with both supervisors and one external examiner.

Programme Structure - PhD
Programme code: RPAN2

In the programme regulations below Years 1 and 2 are listed as "fieldwork", with Years 3 and 4 being post-fieldwork, although in practice the timing/duration of these stages may vary to some extent between students.

Year 1 Fieldwork
Year 2 Fieldwork
Year 3

Paper	Course number and title
1	AN505 Advanced Professional Development in Anthropology
2 & 3	Compulsory non-examined courses:
	AN503 Thesis Writing Seminar
	AN500 Seminar on Anthropological Research

Year 4

Paper	Course number and title
1 & 2	Compulsory non-examined courses:
	AN503 Thesis Writing Seminar
	AN500 Seminar on Anthropological Research

MRes/PhD in Economics

Programme codes: TMRESEC (MRes)
RPEC2 (PhD)
Department: Economics
For students starting in or after the 2015/16 session

A PhD in Economics consists of two years of coursework, followed by a thesis which is expected to take three years. The coursework requirement involves three PhD-level core courses in microeconomics, macroeconomics and econometrics, three field courses and a supervised research paper.
A place on the MSc Economics or the MSc Econometrics and Mathematical Economics will include a conditional offer of progression to the MRes/PhD in Economics, subject to the attainment of a Distinction grade in the MSc. Those who meet the progression requirement and decide to progress are registered as MRes students and undertake the same two-year MRes course requirement as with all other MRes/PhD students.

First year MRes

All students are required to attend EC400, the September Introductory Course in Mathematics and Statistics, in Year 1. Students are required to take the following MRes core courses:

Paper	Course number and title
1	EC441 Microeconomics for MRes Students
2	EC442 Macroeconomics for MRes Students
3	EC443 Econometrics for MRes Students **or** EC484 Econometric Analysis*

* Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

Second year or higher MRes
Students are required to take:

Paper	Course number and title
4	EC599 Research Paper in Economics (5,000 - 10,000 words in length)
5 & 6	Two courses from the Field Selection List below

Students are required to attend:
A. EC501 Work in Progress Seminars, where they present their research.
B. The weekly departmental seminar series closest to their major field.

First year PhD Programme
Students who have been upgraded to PhD are required to work on their research and write a PhD thesis. In addition they are required to take:

Paper	Course number and title
7	One course from the Field Selection List below

Students are also required to attend:
A. EC501 Work in Progress Seminars, where they present their research.
B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Second and subsequent years PhD Programme
Students are required to attend:
A. EC501 Work in Progress Seminars, where they present their research.
B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Progression to Year 2 of MRes in Economics
In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. With the permission of the MRes Programme Director, students who do not attain this standard may proceed to the second year with up to one resit paper (with the restriction that they can sit a maximum of four exams, including resits and EC599 in Year 2).

Award of the MRes in Economics
The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and in one of the Papers 5 or 6.
The marks for Papers 1 - 4 and the highest mark from Papers 5 or 6 will be used to determine the degree classification. A fail in one of these five classification papers (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 220 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5 and 6, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.
Condoning marks: A mark between 55 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in another from Papers 1, 2 or 3. A mark between 50 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in the EC599 research paper.
Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration.
Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.
Students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper at the next available opportunity. Students can resit each paper only once.
Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.
A student can appeal against the Department's decision on progression to PhD according to the Appeals Regulations for Research Students.

Progression to Year 2 of PhD In order to progress to the second year of PhD registration students are required to pass the PhD qualifying field (Paper 7) with a mark of 50% or higher.

Award of the PhD in Economics Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Special provisions for students who have completed an MSc degree within the Economics Department at LSE
Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one course from the Field Selection List below. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree.
With the approval of the Doctoral Programme Director, students who have completed an MSc degree within the Economics department at LSE will exceptionally be permitted to take their PhD qualifying field course (Paper 5) in the first year of the MRes and might take Paper 7 in their second year.
For students who have taken Paper 7 in their second year the progression and award regulations are adjusted as follows:

MRes award - Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and at least one mark of 50% in Papers 5-7. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration - For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5, 6 and 7, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.

Progression to PhD to Year 2 of PhD - In order to progress to the second year of PhD students are required to pass all the PhD qualifying field (Papers 5-7) with a mark of 50% or higher.

Course number	Title
EC518	Topics in Advanced Econometrics for Research

	Students**
EC532	International Economics for Research Students
EC533	Labour Economics for Research Students
EC534	Public Economics for Research Students
EC535	Development Economics for Research Students
EC536	Economics of Industry for Research Students
EC537	Microeconomic Theory for Research Students
EC539	Macroeconomics for Research Students
EC540	Political Economy
	Either FM502 Corporate Finance for Research Students ***or*** FM503 Asset Pricing for Research Students
PH413	Philosophy of Economics **and** PH555 Research Seminar in the Philosophy of Economics and Social Sciences ‡

**Students who have previously taken the EC485 component of this course at master's level may instead, with the agreement of the MRes Programme Director, take Statistics and/or Mathematics courses to the value of one unit.

‡ PH555: students are required to attend one term of choice and complete the term essay.

MRes/PhD in Economics

Programme codes: TMRESECRE (MRes Track 1)
TMRESEC2RE (MRes Track 2)
RPEC2 (PhD)

Department: Economics

For students starting in academic sessions 2010/11 to 2014/15

The MRes/PhD programme is offered in twin-track formats. Students on both tracks of the programme will have to complete MRes degree courses, a PhD-qualifying course and research training modules prior to submission of the PhD thesis. The different entrance qualifications of Track 1 and 2 students dictate the sequence and duration of the coursework.

Track 1 is aimed at students graduating with a postgraduate degree, or an undergraduate degree and exceptional grades in economics, mathematics, econometrics and other quantitative subjects. Track 2 is for students who have completed a graduate degree in economics from a reputable university institution and who have demonstrated exceptional performance in it. The decision on which track students are registered is a matter of academic judgement of the selectors for the programme. In practice almost all Track 2 entrants come from the LSE MSc programmes.

The School's regulations for Taught Master's Degrees apply to Track 1 course components 1-6 and Track 2 course components 1-5, except where the regulations below supersede the School's degree regulations.

Programme Structure

Track 1

Track 1: (5 MRes Papers + 1 PhD-qualifying paper)

Track 1 students are required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

First year of Track 1

Students are required to take the following MRes core courses:

1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. EC443 Econometrics for MRes Students or EC484 Econometric Analysis*

   * Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

Second year of Track 1

Students are required to take:

4. EC599 Research Paper in Economics (5,000 - 10,000 words in length)
5. One from the Field Selection List below

Students who obtain at least two marks of 60% or more and one mark of 50% or more in the core courses 1. - 3. will be allowed to take their second (PhD qualifying) field during Year 2 (Paper 6).

In addition, students attend:

A. EC501 Work in Progress Seminars
B. The weekly departmental seminar series closest to their major field.

Third and further years of Track 1

Students who have not completed paper 6 (PhD qualifying field course) will be required to take:

6. One from the Field Selection List below but different from Paper 5.

In addition, students attend:

C. EC501 Work in Progress Seminars, where they present their research
D. The weekly departmental seminar series closest to their major field

Students are required to work on their research and to write a PhD thesis.

Progression to Year 2 of MRes in Economics

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams (including resits and EC599) in Year 2.

Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve three marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4 and 5. Two marks of 60% or higher are required from the MRes core papers 1, 2, and 3. A mark between 55 - 59% in one of these core papers can be condoned by a mark of +70% in another core paper and/or a mark between 50 - 59% in one of these core papers can be condoned by a mark of +70% in the EC599 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students will also need to pass their PhD-qualifying field course (Paper 6), which is taken in the first year of PhD registration, with 50% or higher.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper in a subsequent year. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on progression to PhD according to the appeal's procedures against decisions on upgrading to PhD in the School's Regulations for Research Degrees.

Award of the PhD in Economics
Award of the PhD is contingent on meeting the progression requirements for the PhD, passing the PhD qualifying field with a mark of 50% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Track 2
Track 2: (4 MRes Papers + 1 PhD-qualifying paper)
Track 2 students may be required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

First year of Track 2:
Students are required to take:
1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. EC443 Econometrics for MRes Students or EC484 Econometric Analysis*
4. EC599 Research Paper in Economics (5,000 - 10,000 words in length)

* Permission must be obtained to sit EC484: it is intended for students with a strong econometrics background and an interest in pursuing a PhD with econometrics as the primary field. Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again and will have their MSc mark carried forward. These students are permitted to take their PhD qualifying field course (Paper 5) in place of Paper 3.

In addition, students attend:
A. EC501 Work in Progress Seminars
B. The weekly departmental seminar series closest to their major field.

Subsequent years of Track 2 (if upgraded to PhD):
Students are required to take:
5. One from the Field Selection List below (PhD qualifying field course).
Students who are permitted to take a PhD qualifying field in Year 1 are waived this additional requirement.
In addition, students attend:
C. EC501 Work in Progress Seminars, where they present their research
D. The weekly departmental seminar series closest to their major field.
Students are required to work on their research and to write a PhD thesis.

Award of the MRes in Economics
The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3 and 4. A fail in one of these papers (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 165 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration
For PhD registration students are required to achieve two marks of 60% or higher and two marks of 50% or higher in MRes papers 1, 2, 3 and 4. Two marks of 60% or higher are required from the MRes core Papers 1, 2, and 3. A mark between 55 - 59% in one of these core papers can be condoned by a mark of +70% in another core paper and/or a mark between 50 - 59% in one of these core papers can be condoned by a mark of +70% in the EC599 research paper. Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students will also need to pass their PhD-qualifying field course (Paper 5), which is taken in the first year of PhD registration, with 50% or higher.
Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.
Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper in a subsequent year. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.
A student can appeal against the Department's decision on progression to PhD according to the appeal's procedures against decisions on upgrading to PhD in the School's Regulations for Research Degrees.

Award of the PhD in Economics
Award of the PhD is contingent on meeting the progression requirements for the PhD, passing the PhD qualifying field with a mark of 50% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Field Selection List
EC532 International Economics for Research Students
EC533 Labour Economics for Research Students
EC534 Public Economics for Research Students
EC535 Development Economics for Research Students
EC536 Economics of Industry for Research Students
EC537 Microeconomic Theory for Research Students
EC518 Topics in Advanced Econometrics for Research Students**
EC539 Macroeconomics for Research Students
EC540 Political Economy
Either FM502 Corporate Finance for Research Students **or** FM503 Asset Pricing for Research Students
PH413 Philosophy of Economics **and** PH555 Research Seminar in the Philosophy of Economics and Social Sciences ‡
**Track 2 students who have previously taken the EC485 component of this course at Masters level may instead, with the agreement of the MRes Programme Director, take Statistics and/or Mathematics courses to the value of one unit.
‡ PH555: students are required to attend one term of choice and complete the term essay.

MRes/PhD in Finance
Programme codes: TMRESFI1 (MRes Route 1)
TMRESFI2 (MRes Route 2)
RPFI2 (PhD)
Department: Finance
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.
Students will take either Route 1 or Route 2 (depending on their previous master's qualification) as detailed below.

Route 1
Students who have not completed the MSc Finance and Economics (research) at LSE or an equivalent programme elsewhere.

Route 1 students are required to attend EC400, the September Introductory Course before commencing the MRes/PhD programme.

Year 1
Training courses:
Compulsory (examined)
1. EC441 Microeconomics for MRes Students
2. EC442 Macroeconomics for MRes Students
3. FM481 Financial Econometrics for Research Students

Transferable skills courses:
Compulsory (not examined)
A. FM436 Financial Economics
B. Capital Markets Workshop

Optional (not examined)
C. MY592 Workshop in Information Literacy: finding, managing and organising published research and data
D. Any relevant seminars in related areas.

Year 2
Training courses:
Compulsory (examined)
4. FM502 Corporate Finance for Research Students
5. FM503 Asset Pricing for Research Students
6. FM482 Research Paper in Finance (6,000 - 8,000 words in length)

Transferable skills courses:
Compulsory (not examined)
A. FM505 PhD Seminar in Finance. Presentation requirements: Students are required to do an FM505 seminar presentation in the second year.
B. Capital Markets Workshop

Optional (not examined)
C. Any relevant seminars in related areas

Year 3 (if upgraded to PhD)
Training courses:
Compulsory (examined)
7. FM505 PhD Seminar in Finance
Students need to pass Paper 7 with a mark of 65% or higher.

Transferable skills courses:
Compulsory (not examined)
A. Capital Markets Workshop

Progression and upgrade requirements
In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams in year 2, which must be the two resits, either paper 4 or 5, and paper 6.

Award of the MRes in Finance
The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in 5 of full-unit papers, which must include Paper 6 (Research paper) and four papers from Papers 1, 2, 3, 4, and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration
For PhD registration students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in papers 4 and 5 and a mark of 65% or higher in Paper 6.
Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.
Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

Route 2
Students who have taken the MSc Finance and Economics (Research) programme at LSE or equivalent from another institution may enter onto Route 2 of the programme (this will have been subject to the approval of the Programme Director).

Year 1
Training courses:
Compulsory (examined)
1. EC441 Microeconomics for MRes Students
2. FM502 Corporate Finance for Research Students
3. FM503 Asset Pricing for Research Students
4. FM482 Research Paper in Finance (6,000 - 8,000 words in length)

Transferable skills courses:
Compulsory (not examined)
A. FM505 PhD Seminar in Finance
B. Capital Markets Workshop

Year 2 (if upgraded to PhD)
Training courses:
Compulsory (examined)
5. FM505 PhD Seminar in Finance. Presentation requirements: Students are required to do a seminar presentation in the second year.
6. EC442 Macroeconomics for MRes Students or another full unit course approved by the PhD Director.
Students need to pass paper 5 with a mark of 65% or higher and Paper 6 with a mark of 50% or higher.

Transferable skills courses:
Compulsory (not examined)
A. Capital Markets Workshop

Award of the MRes in Finance
The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3 and 4. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration
For PhD registration students are required to achieve a mark of 50% of higher in Paper 1 and marks of 60% or higher in Papers 2 and 3, and a mark of 65% or higher in Paper 4.
Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be

permitted.
Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

Award of the PhD in Finance
Award of the PhD is contingent on meeting the progression requirements for the PhD, passing FM505 with a mark of 65% or higher, and on the completion and defence of an original research thesis, in accordance with LSE regulations.

MRes/PhD in International Development

Programme codes: TMRESDV (MRes)
RPDV2 (PhD)
Department: International Development

Year 1
Compulsory courses
1. DV501 Development History, Theory and Policy for Research Students (H)
2. Methodology course choice 1 to the value of one full unit (at the 400 and 500 level) (F)*
3. Methodology or Theory course choice 2 to the value of one full unit (at the 400 and 500 level) (F)*
4. Methodology or Theory course choice 3 to the value of one half unit (at the 400 or 500 level) (H)*
5. DV510 Research Design and Proposal in International Development (F)
6. DV500 Research Seminar in Development Studies (non-examined)

Notes
* Course choices must be approved by the supervisor and Doctoral Programme Director.

Optional Courses
7. EC400 Introductory Course in Mathematics and Statistics (September introductory course as a pre-requisite for 400 and 500 level EC courses for students planning to make use of advanced quantitative methods in their PhD research).

Award of the MRes in International Development The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree.

Upgrade to PhD
Upgrade to PhD is dependent upon:
1. Pass of the MRes with an average of 65 in the coursework (except as noted above).
2. Pass of the Research Proposal with a mark equal or greater than 65.

The Research Proposal Committee will offer constructive advice and make one of four decisions:
• Unconditional approval
• Conditional approval
• Revise and resubmit
• Fail
Students who are required to Revise and Resubmit are usually expected the resubmit the proposal within three months. These students will progress to a temporary MPhil status, with the approval of the Chair of the Research Degrees Subcommittee, while they are revising their research proposal. Students who are successful will be upgraded to PhD.
The progress of each student will be reviewed at the end of each subsequent year.

MRes/PhD in Political Science

Programme codes: TMRESPOLSC (MRes)
RPPOLSCI (PhD)
Department: Government
Students complete and are examined in courses to the value of four full units.

Paper	Course number and title
1	**Research Design**
	GV5X1 Research Design in Political Science
2	**Methods courses**
	Students take courses under A, B or C to the value of one unit:
	A) Quantitative research topics
	MY552M **or** MY552L Applied Regression Analysis (H)
	MY557 Causal Inference for Observational and Experimental Studies (H) **or**
	GV4G1 Applied Quantitative Methods for Political Science (H)
	GV4J6 Game Theory for Research (H) (not available 2017/18)
	B) Qualitative research topics
	GV513 Qualitative Methods in the Study of Politics (H)
	MY551M ***or*** MY551L Introduction to Quantitative Analysis (H)
	C) Political theory research topics
	GV504 Research Methods in Political Theory
	If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.
3	**Field seminars**
	Courses to the value of 1 unit from the following:
	GV517 Comparative Political Economy: New Approaches and Issues in CPE (H)
	GV5X2 Research Paper in Comparative Politics (half or full unit)
	GV5X3 Research Paper European Politics and Policy (half or full unit)
	GV5X4 Research Paper in Global Politics (half or full unit)
	GV5X5 Research Paper Political Science and Political Economy (half or full unit)
	GV5X6 Research Paper Political Theory (half or full unit)
	GV5X7 Research Paper Public Policy and Administration (half or full unit)
	Any course from Paper 2, above, not already taken, or any research methods course taught anywhere in the School, with the approval of the Course Convenor and the Doctoral Programme Director.
4	**Research Prospectus**
	GV599 Research Prospectus in Political Science
	Second, third, fourth and fifth year
	A) Research and write a dissertation
	B) Participate in at least one Doctoral Workshop in the Government Department or elsewhere in the School in each year. e.g. GV501 Doctoral Workshop: Political Theory; GV503 Political Philosophy Research Seminar, GV510 Ethnicity and Nationalism Research Workshop (withdrawn 2017/18), GV514 Political Science and Political Economy Doctoral Workshop, GV515 Researching People, Politics and Organisations (withdrawn 2017/18), GV555 Political Economy and Public Policy Workshop.
	C) Second year students have the option of taking EC540 Political Economy. Permission to attend is at the discretion of the course convenor.

Award of the MRes
The award and classification of the MRes is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree

Conditions for progression to PhD
1. Award of the MRes with at least a Merit
2. Award of GV599 with at least a Merit

Award of the PhD
The PhD is awarded according the rules of the LSE.

MRes/PhD in Quantitative Economic History
Programme codes: TMRESQEH (MRes)
RPQEH (PhD)
Department: Economic History

MRes
Students complete and are examined in courses to the value of four full units. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Paper	Course number and title	
1	Courses to the value of one full unit from the following:	
	EH404	India and the World Economy (H)
	EH408	International Migration, 1500-2000: from slavery to asylum (H)
	EH413	African Economic Development in Historical Perspective (H) (not available 2017/18)
	EH421	Economic History of Colonialism (H)
	EH423	Japan and Korea as Developing Economies (H)
	EH446	Economic Development of East and Southeast Asia (not available 2017/18)
	EH451	Latin American Development: Political Economy of Growth (H) (withdrawn 2017/18)
	EH452	Latin American Development and Economic History (H)
	EH454	Human Health in History
	EH463	The Long-Run Analysis of Firms and Industries (H)
	EH464	The Historical Context of Business (H)
	EH476	The Economic History of War (not available 2017/18)
	EH482	Pre-Modern Paths of Growth: Europe and the Wider World, 11th to 19th Centuries
	EH483	The Development and Integration of the World Economy in the 19th and 20th Centuries
	EH486	Shipping and Sea Power in Asian Waters, c1600-1860 (H)
2	EH course(s) to the value of one full unit from Paper 1 above	
3	EC411	Microeconomics **or** EC413 Macroeconomics *
4	EH473	Research Paper in Quantitative Economic History
5	EH474	Research Prospectus **

* If not already taken under Paper 3 of the MSc Quantitative Economic History.
** Not examined but subject to departmental approval.

Award of the MRes Quantitative Economic History
The award and classification of the MSc degree is consistent with the School's scheme for the award of a four-unit Taught Master's Degree. Student are required to achieve a pass mark of 50% in Papers 1, 2, 3 and 4 and submit paper 5 (EH474 Research Prospectus, not examined half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeTaughtMasters.pdf (see paragraph 3.2) apply.
A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MRes Quantitative Economic History to the PhD
To progress from the MRes to the PhD programme, students need to achieve at least a Merit overall in the MRes and at least 65% in the (full unit) Research Paper in Quantitative Economic History (EH473). In addition, their Research Prospectus (EH474) needs to be approved by the departmental Prospectus Review Committee following a viva.
If a student fulfils all other progression requirements but his/her Research Prospectus does not meet the expectations set out in the EH474 course description, the Prospectus Review Committee will grant an extension of up to three months to submit a revised version. If this revised version fails the required standards, the candidate will not be admitted to the PhD programme.

PhD
Non-examined courses
Years 1-4

Paper	Course number and title
EH590	Thesis Workshop in Economic History

MPhil/PhD Programme Regulations

Key to MRes/PhD Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 17/18) means not available in the 2017/18 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

MPhil/PhD in Accounting

Programme code: RPAC
Department: Accounting
For students entering in or after the academic year 2015/16.
The Department of Accounting offers an MPhil/PhD Accounting programme with two tracks. The aim is to ensure the highest quality in the development of research students, in their research skills and to support their progression to the completion and defence of high quality theses in their respective specialisms.
Track 1 is devoted to the study of interrelationships between accounting, organisations and institutions. Research in this track examines how accounting practices are much more than a collection of routine techniques, but are shaped by their institutional contexts, have behavioural consequences and can represent different values. Efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. Research in this track includes a wide variety of accounting topics examined through this lens using primarily qualitative methods, such as studies in management accounting, analyses of accounting systems in the private and public sector, transformations of auditing and risk regulation regimes, historical studies of accounting, as well as broader contributions to social theory.

Track 2 primarily examines accounting and financial reporting issues from an economics perspective. Research in this track covers a wide range of accounting topics including design and choices between alternative accounting methods, the use of accounting numbers for internal reporting, performance measurement, incentive systems, and in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting and performance measurement, and the interactions between financial reporting, legal and economic institutions, and corporate governance. While much research in these areas takes the form of empirical archival analysis, theoretical analysis and field research can also be relevant in some cases.
When making an application, MPhil/PhD students in Accounting will choose to follow either Track 1 or Track 2 as detailed below.

Track 1
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

(H) = half-unit course
Year 1
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
AC502 Foundations in Accounting, Organisations and Institutions (H)
Methodology Training: At least one examined methodology course to the value of one half unit including courses offered by the Department of Methodology, either in their first and/or second year of the programme.
Courses to the value of 1.5 course units from the following normally to be taken in the first year (one course may need to be taken in Year 2):
AC411 Accounting, Strategy and Control (H)
AC412 Accountability, Organisations and Risk Management (H)
AC415 Management Accounting for Decision Making (H)
AC444 Valuation and Security Analysis (H)
AC470 Accounting in the Global Economy (H)
AN473 Anthropological Approaches to Value (H)
EH429 History of Economics: Ideas, Policy and Performativity (H)
EH463 The Long-Run Analysis of Firms and Industries (H)
GV478 Political Science and Public Policy
GV481 Political Science and Political Economy (H)
GV488 Law and Politics of Regulation
GV4E4 Public Budgeting and Financial Management (withdrawn 2017/18)
GY420 Environmental Regulation: Implementing Policy
GY423 Environment and Development
GY455 Economic Appraisal and Valuation (H)
LL440 Corporate Law and Accounting
LL4AH Comparative Company Law (H) (not available 2017/18)
LL4BX Corporate Governance (H) (not available 2017/18)
SO425 Risk, Regulation and Economic Life
SO430 Economic Sociology (H) (not available 2017/18)
Any other graduate-level course available in the School with permission from the PhD Programme Director.

Transferable skills courses
Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
AC501 Empirical Financial Accounting and Capital Markets
Other research workshops and seminars held across the Department
Relevant seminars in related areas elsewhere in the School
Appropriate international workshops and colloquia

Year 2
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
Students who have completed less than 2.5 examined graduate-level course units in Year 1 will take additional courses, so that at the end of Year 2 all students have completed at least 2.5 examined graduate-level course units.

Optional: As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 3
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Optional:
As needed students may take course(s) or research training

session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 4
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Track 2
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.
(H) = half-unit course

Year 1
Training courses
Compulsory introductory course (examined):
EC400 Introductory Course in Mathematics and Statistics
Note: This is an introductory course starting in September. All students are normally required to attend EC400, the September Introductory Course in Mathematics and Statistics, before commencing the Track 2 MPhil/PhD Programme in Accounting.

Compulsory (not examined):
AC501 Empirical Financial Accounting and Capital Markets
Compulsory (examined): Courses to the value of 1.5 course units, normally taken from the following list in the first year of study (exceptionally one course may need to be taken in the second year of study):
AC411 Accounting, Strategy and Control (H)
AC415 Management Accounting for Decision Making (H)
AC444 Valuation and Security Analysis (H)
EC402 Econometrics
EC476 Contracts and Organisations
FM421 Applied Corporate Finance (H)
FM436 Financial Economics
FM437 Financial Econometrics
FM481 Financial Econometrics for Research Students
FM502 Corporate Finance for Research Students
FM503 Asset Pricing for Research Students
LL440 Corporate Law and Accounting
MY457 Causal Inference for Observational and Experimental Studies (H)
Any other graduate-level course available in the School with permission from the PhD Programme Director.

Transferable skills courses
Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Empirical Financial Accounting Research Seminars and Workshops

Optional (not examined):
AC500 Accounting, Organisations and Society
Other research workshops and seminars held across the Department
Relevant seminars in related areas elsewhere in the School
Appropriate international workshops and colloquia

Year 2
Training courses
Compulsory (examined):
AC501 Empirical Financial Accounting and Capital Markets

Compulsory (examined):
Students who have completed less than 1.5 examined graduate-level course units in Year 1 will take additional courses, so that at the end of Year 2 all students have completed at least 2.5 examined graduate-level course units.

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Empirical Financial Accounting Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 3
Training courses
Compulsory (not examined):
AC501 Empirical Financial Accounting and Capital Markets

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Empirical Financial Accounting Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 4
Training courses
Compulsory (not examined):
AC501 Empirical Financial Accounting and Capital Markets

Optional:
As needed students may take course(s) or research training session(s) offered by the Department of Methodology.
Transferable skills courses

Compulsory (not examined):
Department of Accounting Research Forums (ARFs)
Empirical Financial Accounting Research Seminars and Workshops

Optional (not examined):
Other research workshops and seminars held across the Department
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Progression and upgrade requirements for Tracks 1 and 2:
Progression requirements: The departmental MPhil/PhD Assessment Review Committee will reach a decision on progression for each student at the end of Years 1, 2 and 3, and progression from the introductory course (for students on Track 2). All MPhil/PhD Accounting students are normally required to achieve a mark of at least 65% in each of the 2.5 examined graduate-level course units required for progression on both tracks of the programme. The Committee may, in exceptional circumstances, condone a marginal fail if a student has demonstrated strength in other examined courses. Students failing an examined course can, at the discretion of the Committee, and taking into account overall performance, re-sit that course on one occasion only. The Committee may also decide to substitute an alternative assessment to redress any mark deficiencies and has the discretion to set additional requirements for progression where appropriate.
Students are required to make a seminar presentation in each year of their programme. These are formatively assessed. Performance at the seminar presentations will be taken into account by the MPhil/PhD Assessment Review Committee when reaching decisions on progression.

Upgrade: Students will initially be registered for the MPhil. Upgrade to PhD registration will normally happen at the end of Year Two. In order to progress to PhD registration, students must normally have met the progression requirements above (a mark of at least 65% in each of the required 2.5 examined graduate-level course units), and have made satisfactory progress in their research, which normally is understood to mean a solid draft of one complete chapter, plus a detailed outline for the rest of the dissertation with abstracts for each proposed chapter. Materials submitted for upgrade must include a clear framework for the research and a timetable for completion. Students will be provided with an opportunity to defend their submitted written materials orally. The departmental MPhil/PhD Assessment Review Committee will review the progress of each research student, and recommendations for upgrading to PhD will be made on a case-by-case basis.

Award of the PhD in Accounting:
Award of the PhD is contingent on the completion and defence of an original research thesis, in accordance with LSE regulations.

Teaching Experience
Students in Tracks 1 and 2 are required to gain teaching experience with appropriate training in years two and three, and they are encouraged to take presentation skills and other training offered by the Teaching and Learning Centre.

MPhil/PhD in Accounting

Programme code: RPAC
Department: Accounting
For students entering in or before the academic year 2014/15.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
AC502 Foundations in Accounting, Organisations and Institutions (H)
Two of the following (to the value of 1.5 course units) normally to be taken in the first year (one course may need to be taken in Year 2):
AC411 Accounting, Strategy and Control (H)
AC412 Accountability, Organisations and Risk Management (H)
AC415 Management Accounting for Decision Making (H)
AC444 Valuation and Security Analysis (H)
AC470 Accounting in the Global Economy (H)
AN473 Anthropological Approaches to Value (H)
EH429 History of Economics: Ideas, Policy and Performativity (H)
EH463 The Long-Run Analysis of Firms and Industries (H)
GV478 Political Science and Public Policy
GV481 Political Science and Political Economy (H)
GV488 Law and Politics of Regulation
GV4E4 Public Budgeting and Financial Management (withdrawn 2017/18)
GY420 Environmental Regulation: Implementing Policy
GY423 Environment and Development
GY455 Economic Appraisal and Valuation (H)
LL440 Corporate Law and Accounting
LL4AH Comparative Company Law (H) (not available 2017/18)
LL4BX Corporate Governance (H) (not available 2017/18)
SO425 Risk, Regulation and Economic Life
SO430 Economic Sociology (H) (not available 2017/18)
Any other graduate-level course available in the School with permission from the PhD Programme Director.

Optional (examined):
At least one methodology course, including courses offered by the Methodology Institute, either in their first and/or second year of the programme.

Transferable skills courses
Compulsory (not examined):
AC501 Empirical Financial Accounting and Capital Markets

Optional (not examined):
Relevant seminars in related areas elsewhere in the School
Appropriate international workshops and colloquia

Year 2
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Compulsory (examined):
Students who have completed less than 2 graduate-level course units in year one will take additional courses.

Optional (examined): As needed students may take course(s) or research training session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars

Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 3
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Optional (examined):
As needed, students may take course(s) or research training session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars

Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia

Year 4
Training courses
Compulsory (not examined):
AC500 Accounting, Organisations and Society

Optional (examined):
As needed, students may take course(s) or research training session(s) offered by the Methodology Institute.
Transferable skills courses

Compulsory (not examined):
Department of Accounting research seminars

Optional (not examined):
Relevant seminars in related areas offered elsewhere in the School
Appropriate international workshops and colloquia
Progression and upgrade requirements:
To proceed from Year One to Year Two, students must pass all course examinations normally with high Merit or Distinction marks
Examinations**:** All MPhil/PhD Accounting students are required to achieve a pass mark of at least 65% in their examined courses. The examiners may, in exceptional circumstances, condone a lower pass mark if there is strength elsewhere. Students failing a paper can, at the discretion of the departmental Postgraduate Assessment Review Committee, and taking into account overall performance, re-sit that paper on one occasion only. The departmental Postgraduate Assessment Review Committee may also decide to substitute a make-up assignment, such as a 5,000-word essay, to redress any mark deficiencies.

Seminar presentations:
Students are required to make a seminar presentation in each year of their programme.

Upgrade:
Students will initially be registered for the MPhil. In order to progress to PhD registration, students must have achieved a pass mark of at least 65% in their taught course exams, and have made satisfactory progress in their research, which normally is understood to mean a solid draft of one complete chapter, plus a detailed outline for the rest of the dissertation with abstracts for each proposed chapter. The departmental Postgraduate Review and Assessment Committee will review the progress of each research student, and make recommendations for upgrading to PhD on a case-by-case basis.

Teaching Experience:
Students are offered the opportunity to gain teaching experience with appropriate training, and are encouraged to take presentation skills and other training offered by the Teaching and Learning Centre.

MPhil/PhD in Cities Programme

Programme code: RPCP
Department: Sociology
For first and second year students in 2017/18.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)
SO500 Research Class for MPhil Students
Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined)
MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY526 Doing Ethnography (H)
Selection of additional courses, with agreement of supervisor, including:
Other courses from Sociology master's programmes
Specialist research courses: SO511 Research Seminar in Political Sociology, SO521 Research Seminar on Cities and Space (not available 2016/17), SO491 Quantitative Social Research Methods, and SO492 Qualitative Research Methods.
Specialist course on urban theory and urban life (for auditing)
SO451 Cities by Design (H)

Transferable skills courses
Optional (not examined)
MY591 Computing Packages for Applied Analysis
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Optional (not examined)
SO501 Data Analysis Workshop (this course is strongly recommended)

Year 3 Training courses Compulsory (not examined)
SO505 Becoming a Professional Sociologist

Progression and upgrade requirements
In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.
By the end of Year 2, students are expected to have completed their fieldwork, and to be ready to submit two draft chapters for upgrade. All full-time research students are expected to have made the transition from the MPhil to PhD (upgrading) within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD by the end of their third year, and to submit their thesis within six years.
The decision to upgrade from MPhil to PhD is taken by a panel consisting of two academics from the Department or the School, with the supervisor(s) in attendance and available to be consulted by the panel. For upgrade, students submit three draft chapters of their thesis, plus thesis abstract and outline schedule for completion. This material is then assessed by viva voce and a written report is made by the panel.
Students should aim to have a complete first draft of their thesis in years three to four and allow three to six months for revision and submission.

MPhil/PhD in Cities Programme

Programme code: RPCP
Department: Sociology
For third year students in 2017/18.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)
SO500 Research Class for MPhil Students
Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined)
MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY526 Doing Ethnography (H)
Selection of additional courses, with agreement of supervisor, including:
Other courses from Sociology master's programmes
Specialist research courses: SO511 Research Seminar in Political Sociology, SO521 Research Seminar on Cities and Space (not available 2016/17), SO491 Quantitative Social Research Methods, and SO492 Qualitative Research Methods.
Specialist course on urban theory and urban life (for auditing)
SO451 Cities by Design (H)

Transferable skills courses
Optional (not examined)
MY591 Computing Packages for Applied Analysis
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Optional (not examined)
SO501 Data Analysis Workshop (this course is strongly recommended)

Year 3
Training courses
Optional (not examined)
SO505 Becoming a Professional Sociologist

Progression and upgrade requirements
In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.
By the end of Year 2, students are expected to have completed their fieldwork, and to be ready to submit two draft chapters for upgrade. All full-time research students are expected to have made the transition from the MPhil to PhD (upgrading) within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD by the end of their third year, and to submit their thesis within six years.
The decision to upgrade from MPhil to PhD is taken by a panel consisting of two academics from the Department or the School, with the supervisor(s) in attendance and available to be consulted by the panel. For upgrade, students submit three draft chapters of their thesis, plus thesis abstract and outline schedule for completion. This material is then assessed by viva voce and a written report is made by the panel.
Students should aim to have a complete first draft of their thesis in years three to four and allow three to six months for revision and submission.

MPhil/PhD in Data, Networks and Society

(formerly MPhil/PhD in New Media, Innovation and Literacy)
Programme code: RPDNS
Department: Media & Communications
These regulations apply to students entering in or after the 2017/18 academic year.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Plus
MC5M2 Advanced Methods of Research in Media & Communications (includes MY551 Introduction to Quantitative Analysis and MY552 Applied Regression Analysis). By agreement, the Methodology Institute components (MY551 and/or MY552) can be replaced by other, more advanced, statistics courses or an advanced qualitative course taught at the Methodology Institute. At least one half-unit course of statistics needs to be included.

Optional (examined/not examined)
Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Departmental PhD Symposium

Optional (not examined)
LN988 Thesis Writing course
Modern Foreign Language courses offered by the Language Centre
Other graduate seminars of relevance to research subject

Presentation requirements
At least one presentation annually at MC500 Research Seminar for Media, Communications and Culture

Year 2
Training courses
Optional (examined/not examined)
Either MY530 Advanced Qualitative Analysis Workshops (H) or
MY555 Multivariate Analysis and Measurement (H)
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
ST416 Multilevel Modelling (H)
Other graduate courses relevant to research subject and agreed with supervisor

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Optional (not examined)
Other graduate seminars of relevance to research subject

Year 3
Transferable skills courses
Optional (not examined)
MC500 Research Seminar for Media, Communications and Culture

Year 4
Students are expected to complete their research

Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by 1 June in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with the examinations in Methods (MC5M2) and the other two chosen compulsory first year courses from the list above, this paper will form part of the evaluation process, and, together with an oral examination based on the Thesis Proposal, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

MPhil/PhD in Demography/Population Studies

Programme code: RPDEPS
Department: Social Policy
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Optional (not examined)
If not already taken previously:
SA451 Social Policy Research
MY400 Fundamentals of Social Science Research Design (H)
MY421M ***or*** MY421L Qualitative Research Methods (H)
MY451M ***or*** MY451L Introduction to Quantitative Analysis (H)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.
Transferable skills courses

Compulsory (not examined):
SA550 Research Student Seminar

Optional (not examined):
Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute

Year 2
Training courses
Optional (not examined):
MY452M **or** MY452L Applied Regression Analysis (H)
MY455 Multivariate Analysis and Measurement (H)
Transferable skills courses

Optional (not examined):
SA550 Research Student Seminar

Year 3
Transferable skills courses
Optional (not examined):
SA550 Research Student Seminar

Year 4
Transferable skills courses
Optional (not examined):
SA550 Research Student Seminar
Progression and Upgrade requirements
Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.
Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Research Students' Programme Director.
Each pre-Major Review student is expected to make a presentation on their proposed research to the SA550 seminar prior to the submission of their major review document and to address issues raised by the Research Students' Programme Director(s).

MPhil/PhD in Development Studies

Programme code: RPDV
Department: International Development
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses Compulsory (examined)
All students will be required to take either a full or two half unit courses in research methods in the School's Methodology Institute. The precise courses taken will be decided in consultation with the student's primary supervisor.

Compulsory (not examined)
DV500 Research Seminar in Development Studies
Students who have not received their MSc Development Studies from the LSE will be required to attend the lectures for the core course DV400 Development: History, Theory and Policy. All first year students are required to attend a special seminar for research students.

Optional (not examined)
Further appropriate graduate level courses in the Department of International Development and agreed with supervisor.

Optional (not examined)
MPhil/PhD students will find it advantageous to attend the weekly Visiting Lecture Series in Development Studies in Michaelmas Term.

By Year 4
Students are expected to have completed their research.

Progression and Upgrade requirements
Students will be required to achieve a minimum mark of 65% in the Methodology courses. Failure to do so may mean that you are unable to progress onto the PhD programme and will remain at MPhil until you have either completed a further methodology course or achieved an improved grade.
All students will be interviewed during the Michaelmas Term of their second year by the Graduate Review Committee. Continued registration for a second year will be conditional on the work presented being of a satisfactory standard and if satisfactory, will be upgraded from MPhil to PhD. By the end of Summer Term of the second year students should have finished all fieldwork (where applicable). By the end of the third year students should be able to complete their dissertation.

MPhil/PhD in Economic Geography

Programme code: RPECGY
Department: Geography & Environment
For students entering in or after the academic year 2017/18.
In addition to progressing with their research, students are expected to take the courses listed below. Students may take

courses other than those listed but must discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
Relevant subject-specific training courses to the value of one unit:
1. **Either** GY457 Applied Urban and Regional Economics, or GY407 Globalisation, Regional Development and Policy, or GY408 Local Economic Development and Policy (not available 2017/18).
Note: Students who have graduated from either the MSc in Local Economic Development or the MSc in Real Estate Economics and Finance cannot repeat courses taken as part of their master's programme. In order to fulfil their obligation to sit for one full unit of subject-specific training, students who have already taken all three of GY457/GY407/GY408 can choose additional options to the value of one unit from the following list:
GY404 Topics in Local Economic Development (H)
GY447 The Economics of Regional and Urban Planning (H)
EC411 Microeconomics (requires students to take introductory course EC400)

Other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval.
2. One relevant advanced research methods course to the value of one unit:

GY428 Applied Quantitative Methods (H)
GY460 Techniques of Spatial Economic Analysis (H)
MY500 Fundamentals of Social Science Research Design
MY521 Qualitative Research Methods (H)
MY526 Doing Ethnography (H)
MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
MY556 Survey Methodology (H)
MY557 Causal Inference for Observational and Experimental Studies (H)
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training courses
Optional (not examined)
GY502 Staff/Research Students Seminars
Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Progression and upgrade requirements:
Once on the MPhil/PhD programme you will go through a First Year Progress Review, taking place in the Summer Term of your first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

Normally, there will be a progress review meeting between the student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by the supervisor(s) and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Economic Geography

Programme code: RPECGY
Department: Geography & Environment
For students entering before the academic year 2017/18.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1
Students who have completed MSc Local Economic Development or MSc Real Estate Economics and Finance will

enter in Year 1 and take the course specified below:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. Courses to the value of one unit from the following (the course(s) must be different to those taken on the MSc):
   GY404 Topics in Local Economic Development (H)
   GY407 Globalisation, Regional Development and Policy
   GY408 Local Economic Development and Policy (not available 2017/18)
   GY447 The Economics of Regional and Urban Planning (H)
   GY457 Applied Urban and Regional Economics
   EC411 Microeconomics (requires students to take introductory course EC400)
2. One relevant advanced research methods course to the value of one unit:
   GY428 Applied Quantitative Methods (H)
   GY460 Techniques of Spatial Economic Analysis (H)
   MY500 Fundamentals of Social Science Research Design (H)
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY556 Survey Methodology (H)
   MY557 Causal Inference for Observational and Experimental Studies (H)
   MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Students who have completed MSc Local Economic Development or MSc Real Estate Economics and Finance will be required to take a different course(s) from those taken on the degree.

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)

Year 4
Training courses
Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Route 2
Students without MSc Local Economic Development or MSc Real Estate Economics and Finance will take the following specified courses:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. **Either** GY457 Applied Urban and Regional Economics, or GY407 Globalisation, Regional Development and Policy, or GY408 Local Economic Development and Policy (not available 2017/18).
2. One relevant advanced research methods course to the value of one unit:
   GY428 Applied Quantitative Methods (H)
   GY460 Techniques of Spatial Economic Analysis (H)
   MY500 Fundamentals of Social Science Research Design
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY556 Survey Methodology (H)
   MY557 Causal Inference for Observational and Experimental Studies (H)
   MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training courses
Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Progression and Upgrade requirements for both routes
Progression and upgrade requirements:

Students in the MPhil/PhD programme will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year 2 for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Economic History

Programme code: RPEH

Department: Economic History

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)

EH520 Approaches to Economic and Social History EH401 and EH402 (unless already taken as part of the Master's degree, and, where appropriate, a pre-sessional statistics course)

Optional (not examined) Supervisors may require students in their first or subsequent years of study to take other relevant economic history courses, methodological courses provided by the Methodology Institute or the Institute of Historical Research or skills training courses as required for their thesis topic.
Transferable skills courses

Compulsory (not examined)

EH590 Thesis Workshop in Economic History

Year 2
Training courses
Compulsory (not examined)

EH590 Thesis Workshop in Economic History

Year 3
Training courses
Compulsory (not examined)

EH590 Thesis Workshop in Economic History

Year 4
Training courses
Compulsory (not examined)

EH590 Thesis Workshop in Economic History

Progression and upgrade requirements

By the start of the Summer Term students are required to submit at least one draft thesis chapter and a 3-5 page thesis outline to the department's Graduate Review Committee. Students taking one or more MSc examination may, with the support of their supervisor, apply to defer their submission of work to no later than the start of the 7th week of the Summer Term. The Committee will interview all students during the Summer Term, and re-registration for a second year will be conditional on the work presented being of a satisfactory standard. All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars and conferences to complement the expertise gained from intense thesis research.

By the Summer Term of the second year the Graduate Review Committee will normally expect to see about half the thesis in draft. The Committee will interview students, and if the submitted work is of an acceptable standard, students will be upgraded from MPhil to PhD. Students may defer the upgrade decision until their third year for fieldwork or other reasons, but only with the support of their supervisor.

MPhil/PhD in Environmental Economics

Programme code: RPENEC

Department: Geography & Environment

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1
Students with MSc Environmental Economics and Climate Change will enter Year 1 and take the specified courses below:

Year 1
Training courses
Compulsory (not examined)

GY502 Staff/Research Students Seminars

Compulsory (examined)

1. EC411 Microeconomics (Note that students must take the introductory course EC400).
2. Relevant advanced research methods course(s) to the value of one unit from the following:
   EC402 Econometrics
   MY555 Multivariate Analysis and Measurement (H)
   MY556 Survey Methodology (H)
   MY557 Causal Inference for Observational and Experimental Studies (H)
   MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
   GY526 Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy (H)

Transferable skills courses

Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training Courses
Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Route 2
Students without MSc Environmental Economics and Climate Change will enter Year 1 and take the specified courses below:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. EC411 Microeconomics (Students must take the introductory course EC400).
2. GY426 Environmental and Resource Economics
3. Advanced research methods course(s) to the value of one unit from the following list:
   EC402 Econometrics
   GY428 Applied Quantitative Methods
   MY555 Multivariate Analysis and Measurement (H)
   MY556 Survey Methodology (H)
   MY557 Causal Inference for Observational and Experimental Studies (H)
   MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
   GY526 Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy (H)

Transferable skills courses
Compulsory (not examined)

Compulsory (not examined)
GY500 Research Project Seminar

Progression and Upgrade requirements for Routes 1 and 2
Once students are in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year 2 for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Importantly, progression is also dependent on students having **passed all** required examinations and obtained **at least one merit**, and having presented their work satisfactorily in the doctoral presentation workshops.
All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year 3 for students in the 1+3 route. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.
In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Environmental Policy and Development

Programme code: RPENPD
Department: Geography & Environment
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1
Students who have completed MSc Environmental Policy and Regulation or MSc Environment and Development will enter in Year 1 and take the courses specified below:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. Courses to the value of one unit from the list of options on the relevant MSc degrees.
2. Relevant advanced research methods course(s) to the value of one unit from the following:
   MY500 Fundamentals of Social Science Research Design (H)
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (not available 2017/18)

Students will be required to take a different course(s) from those taken on the MSc degree.

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training Courses
Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Route 2
Students without MSc Environmental Policy and Regulation or MSc Environment and Development will take the following specified courses:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. GY420 Environmental Regulation: Implementing Policy, or GY423 Environment and Development.
2. Relevant advanced research methods course(s) to the value of one unit from the following:
   MY500 Fundamentals of Social Science Research Design
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (not available 2017/18)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Progression and Upgrade requirements for both routes
Once students in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year Two for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and justification for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review

in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.
All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year Three for students in the 1+3 route. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrade committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.
In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Employment Relations and Organisational Behaviour

Programme code: RPEROB
Department: Management
(Programme withdrawn 2017/18. Last intake 2016/17)
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

MPhil/PhD in European Studies

Programme code: RPEU
Department: European Institute
In addition to progressing with their research, students are expected to take the listed research training and transferable skills courses. Students may take courses in addition to those listed and should discuss this with their supervisor. For a complete list of courses please refer to the 2017/18 Handbook for Research Degree Students.

Year 1
Training courses
Compulsory (not examined):
EU550 Research Workshop in European Studies
EU554 Research Methods and Design in European Studies (withdrawn 2017/18)

Optional (examined):
MY552M ***or*** MY552L Applied Regression Analysis (H)
Further training courses provided by the Department of Methodology and agreed with their supervisors.
Transferable skills courses

Optional (not examined):
EU455 Concepts in Political Economy (H)

Year 2
Training courses

Compulsory (not examined):
EU550 Research Workshop in European Studies
Students expected to take relevant course(s) in the Department of Methodology or in other departments as agreed with their supervisors.

Optional (not examined): It is highly recommended that students with research interests in political economy attend and present their work in the interdepartmental research seminar EU555/GV555/IR555 Political Economy and Public Policy Workshop.
Transferable skills courses

Optional (not examined):
EU455 Concepts in Political Economy (H)

Year 3
Training courses

Compulsory (not examined):
EU550 Research Workshop in European Studies

Optional (not examined):
If not taken in Year Two:
EU555/GV555/IR555 Political Economy and Public Policy Workshop
Transferable skills courses

Optional (not examined):
EU455 Concepts in Political Economy (H)

Year 4
Transferable skills courses
Optional (not examined):
EU550 Research Workshop in European Studies

Upgrading to PhD/**Targets for Progress**
Year 1 - For a standard thesis: a research proposal (approximately 2,500 words) and abstract of the whole thesis (one page); a sample chapter (approximately 8,000 words); a chapter synopsis, and a timetable for completion. For a thesis as a series of publishable papers: a research proposal (approximately 2,500 words) and an abstract covering the three prospective papers; a full draft of the introduction or a full draft of one of the papers (approximately 8,000 words); and a timetable for completion.
Year 2 - For a standard thesis: at least two further substantive chapters (of approximately 5,000-7,000 words each). For a thesis as a series of publishable papers: at least one fully written paper (approximately 10,000 words); and outlines of the other two papers (approximately 2,000 words).
Year 3 - For a standard thesis: a full draft of all core chapters and agreed timetable for completion.
For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for completion of the thesis.

MPhil/PhD in Gender

Programme code: RPGE
Department: Gender Studies
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)
Aims and Methods (first year programme)

Compulsory (not examined)
GI424 Gender Theories in the Modern World: An Interdisciplinary Approach (H) (lectures only)
GI402 Gender, Knowledge and Research Practice (lectures, seminars and workshops)

Optional (not examined)
GI499 Dissertation Methodologies in Interdisciplinary Perspective
Quantitative and/or qualitative training courses provided in the Methodology Institute, as agreed with supervisor.
Audit any course from the Department of Gender Studies menu:
GI403 Gender and Media Representation
GI407 Globalisation, Gender and Development
GI409 Gender, Globalisation and Development: An Introduction
GI410 Screening the Present: contemporary cinema and cultural critique
GI411 Gender, Postcolonialism, Development: Critical Perspectives and New Directions
GI413 Gender and Militarisation
GI499 Dissertation
GV4H3 Feminist Political Theory (H)
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses
Compulsory (not examined)
GI500 Doctoral Workshop: Department of Gender Studies

Year 2
Training courses
Optional (students should agree with their supervisor whether the courses taken will also be examined)
Quantitative and/or qualitative training courses provided in the Methodology Institute as agreed with supervisor
Audit any course from the Department of Gender Studies menu as above
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses
Compulsory (not examined)
GI500 Doctoral Workshop: Department of Gender Studies

Year 3
Training courses
Optional (students should agree with their supervisor whether the courses taken will also be examined)
Quantitative and/or qualitative training courses provided in the Department of Methodology and/or Department of Gender Studies as agreed with supervisor
Audit any course from the Department of Gender Studies menu as above.
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses
Compulsory (not examined)
GI500 Doctoral Workshop

Year 4
Training courses
Optional (examined/not examined):
Quantitative and/or qualitative training courses provided in the Methodology Institute, as agreed with supervisor
Audit any course from the Department of Gender Studies menu as above.
Audit of relevant courses on other Masters programmes with agreement of the supervisor

Transferable skills courses
Compulsory (not examined)
GI500 Doctoral Workshop: Department of Gender Studies

Progression and upgrade requirements
In the first year students will go through their Aims and Methods examination. This is held in the summer term and materials should be submitted by the end of the second week of summer term. Students submit a draft chapter and a research proposal for consideration by a panel of their supervisor and advisor (and occasional one other person with appropriate expertise). The research proposal follows a specific template and includes research objectives, the methodology and short research rationale. The nature of the chapter should be agreed with the supervisor. Both parts of the assessment focus on the student's own research and draw on material and debates engaged in GI424 and GI402 where relevant. Students must pass Aims and Methods before progressing to their second year. If unsuccessful at first sit, students have the opportunity to retake Aims and Methods once more at the end of September.
Research students make the transition from MPhil to PhD (Upgrading) by the end of the MT of their second year. In order to upgrade, students must have passed their Aims and Methods. For Upgrade students submit a detailed outline for their thesis (including the anticipated division into chapters), two substantive draft chapters (usually a literature review, methodology or introductory chapter, in discussion with supervisor), and a timetable for completion. The Upgrade is examined in a viva and the committee consists of the main and advisory supervisors and one other person who is not familiar with the student's work. Part-time student submissions are calculated pro-rata for both Aims and Methods and Upgrading.
Expectations for successful Aims and Methods and Upgrading:
• Satisfactory completion of materials for submission and appropriate academic presentation of the same
• Completion of compulsory courses, attendance and contribution to Doctoral Workshop
• Development of appropriate LSE courses in discussion with supervisor
Having successfully Upgraded you will have an annual review with your supervisor and advisor to ensure satisfactory progress.

MPhil/PhD in Government
Programme code: RPGV
Department: Government
(Programme withdrawn 2012/13. Last intake 2011/12)
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined)
GV5X1 Research Design in Political Science

Optional (not examined/examined)
Relevant course(s) provided in the Methodology Institute agreed with supervisor.

Year 2
Training courses
Compulsory (not examined)
At least one workshop from the following (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics):

GV501 Doctoral Workshop: Political Theory
GV503 Political Philosophy Research Seminar
GV510 Ethnicity and Nationalism Research Workshop (withdrawn 2017/18)
GV513 Qualitative Methods in the Study of Politics
GV514 Political Science and Political Economy Doctoral Workshop
GV515 Researching People, Politics and Organisations (withdrawn 2017/18)
GV555 Political Economy and Public Policy Workshop

Presentation requirements: students are required to present at one of the workshops attended

Year 3
Training courses
Compulsory (not examined)
At least one workshop from the above (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics).

Year 4
Training courses
Compulsory (not examined)
At least one workshop from the above (workshop content varies from year to year, but a typical profile includes workshops in political theory, institutional analysis and political economy, European politics and policy, rational choice, and comparative politics).
Progression and upgrade requirements Year 1 - To be allowed to re-register for the second year, first year students are required to give a satisfactory account of the progress and future direction of their research. This should take the form of:
1. A short prospectus, of approximately 3,000 words, setting out the research question, initial theoretical ideas, how these ideas will be applied in empirical research or theoretical enquiry, and a fully referenced discussion of the location of the proposed thesis in relation to existing research, questions, and controversies.
2. A list of intended chapter headings, giving the hypothetical contents of the thesis, together with a short abstract of one paragraph and no more than a page of A4, which summarises, albeit tentatively, the argument, anticipated or hoped for empirical findings or theoretical conclusions of the prospective thesis.
3. One substantial piece of writing, which would normally be a draft chapter. The draft chapter should not be a literature review: it should be a forward looking piece dealing directly with the planned research.
A student is allowed to re-register if, in the opinion of the panel, there is a strong probability that the student will complete a PhD in the permitted time.
Year 2 - The annual review examines the progress made by the student and especially the likelihood of completion of a thesis of sufficient standard within the normal periods (four years for a full-time student and eight for a part-time one).
Year 3 - The annual review examines the progress made by the student and especially the likelihood of completion of a thesis of sufficient standard within the normal periods (four years for a full-time student and eight for a part-time one).

MPhil/PhD in Human Geography and Urban Studies

Programme code: RPHUGY
Department: Geography & Environment
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Route 1
Students with MSc Human Geography and Urban Studies (Research) will take the following specified courses:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. Course(s) to the value of one unit from the list of options available on MSc Human Geography and Urban Studies.
2. Relevant advanced qualitative research methods course(s) to the value of one unit from the following:
   MY500 Fundamentals of Social Science Research Design (H)
   MY521 Qualitative Research Methods (H)
   M526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (not available 2017/18)

Students who have completed MSc Human Geography and Urban Studies must take a different course(s) to those that they have already taken.

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training Courses
Optional (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Optional (not examined)
GY500 Research Project Seminar

Route 2
Students without MSc Human Geography and Urban Studies will take the following specified courses:

Year 1
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Compulsory (examined)
1. GY403 Contemporary Debates in Human Geography.
2. Courses to the value of a half unit from the options available on MSc Human Geography and Urban Studies (Research).

3. Relevant advanced qualitative research methods course(s) to the value of one unit from the following:
   MY500 Fundamentals of Social Science Research Design
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (not available 2017/18)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 4
Training courses
Compulsory (not examined)
GY502 Staff/Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Progression and Upgrade requirements for both Routes 1 and 2
Once students are in the MPhil/PhD part of the programme, they will go through a First Year Progress Review taking place in the Summer Term of their first research year. This is Year 1 for students in the +3 programme and Year Two for students in the 1+3 programme. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year (third year of the 1+3 programme). Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.
All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. This is Year 2 for students in the +3 programme and Year Three for students in the 1+3 route. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion.
The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise.
The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.
In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in International History

Programme code: RPIH
Department: International History
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined)
HY501 International History Research Student Workshop

Year 2
Training courses
Optional (not examined)
HY509 International History Research Seminar
HY510 Cold War History Research Seminar

Year 3
Training courses
Optional (not examined)
HY509 International History Research Seminar
HY510 Cold War History Research Seminar

Year 4
Training courses
Optional (not examined)
HY509 International History Research Seminar
HY510 Cold War History Research Seminar
Progression and upgrade requirements
On being admitted, all students are formally registered for an MPhil. By 13 June (Week 8 Summer Term) of their first year (1 March of their second year for part-time students) they are required to submit three hardcopies of their dossier containing (1) the provisional title of their thesis, together with the provisional titles of their chapters; (2) a bibliography, setting out as comprehensively as possible the primary published and unpublished sources they intend to use, along with the books, articles, unpublished theses and other sources they will consult; (3) an historiographical essay, evaluating the contributions of other scholars to their subject, and indicating clearly how their own thesis will contribute to it; and (4) a draft chapter of approximately 10,000 words based largely upon primary sources. The dossier will be read by three members of the Department , and students will

be required to undergo a 20-30 minute viva. After the viva you will be informed of the outcome and will receive a joint report from the panel. If the Committee deems the dossier/viva satisfactory, the Department will recommend the student for transfer of registration from MPhil to PhD status. If it is less than satisfactory it will be examined by the Committee who will determine whether the student should be allowed to resubmit revised upgrade materials, which may be permitted once. The review and viva process is designed to determine whether the student is likely to meet the requirements of a PhD, and whether the chosen topic is suitable for a doctoral dissertation.

MPhil/PhD in International Relations

Programme code: RPIR
Department: International Relations
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined)
IR501 Methods in International Relations Research
IR509 International Relations Research Design Seminar

Year 2 Training courses compulsory (not examined)
IR509 International Relations Research Design Seminar (second-year workshops)

Optional (examined/not examined)
The subject workshops offered by the International Relations Department comprise international relations theory; security and statecraft; international institutions, law and ethics; international political economy; Asia-Pacific; and the Middle East.
Relevant courses provided by the Methodology Institute and agreed with supervisor, including:
MY400 Fundamentals of Social Science Research Design
MY521 Qualitative Research Methods
MY551M **or** MY551L Introduction to Quantitative Analysis (H)
MY552M ***or*** MY552L Applied Regression Analysis (H)
MY555 Multivariate Analysis and Measurement
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
MY599 Methodology Institute Seminar
MY530 Advanced Qualitative Analysis Workshops
MY591 Computer Packages for Qualitative Analysis

Transferable skills courses
MY592 Workshop in Information Literacy: finding, managing and organising published research and data (Year 1)
Progression and upgrade requirements Early in the Summer Term first- and second-year research students will have their progress reviewed by a Research Panel. They may also be held at the end of the third or subsequent years of registration at the request of a supervisor or student. Supervisors will not attend Research Panels but will provide reports on progress. Panel members may attend student presentations at the Research Design Seminar (IR509). Students are expected for the first Panel to submit an outline of their proposed research and one draft chapter. Students who are deemed not to have made satisfactory progress will either be refused permission to re-register or will be required by the Research Panel to produce written work over the summer as a condition for re-registration in the autumn. In the event of conditions to re-registration being set, a further Research Panel may be reconvened in the September prior to re-registration.
For the second Panel, which will decide on the question of upgrading from MPhil to PhD, students will be expected to submit two additional draft chapters. The two chapters should be substantially new work, but may include revised material from year one. Students who have not made sufficient progress to be converted from MPhil to PhD registration by the end of their second year will normally have re-registration made conditional on further progress (details to be decided by the Panel) or may, exceptionally, be prohibited from re-registering.

MPhil/PhD in Law

Programme code: RPLL
Department: Law
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory
1. LL500 Doctoral Research Seminar
2. Law Department lunchtime seminar series
3. One other relevant course offered by any department or other unit within the School

Year 2
Training courses
Compulsory (not examined)
Minimum of three workshops of MY530 Advanced Qualitative Analysis Workshops

Optional (not examined)
Staff Seminar Series

Year 3
Training courses
Compulsory (not examined)
PhD lunchtime seminar series

Optional (not examined)
Staff Seminar Series

Year 4
Transferable skills courses
Optional (not examined)
Staff Seminar Series
Progression and upgrade requirements
Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

MPhil/PhD in Law (Socio-Legal Theory)

Programme code: RPLLSL
Department: Law
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory
1. LL500 Doctoral Research Seminar
2. LL4L5 Socio-Legal Theory and Practice
3. Law Department lunchtime seminar series
4. One relevant course selected from those offered by the Department for Methodology

Year 2
Training courses
Compulsory (not examined)
Minimum of three workshops of MY530 Seminar in Advanced Qualitative Analysis

Optional (not examined)
Staff Seminar Series and PhD Seminar Series

Year 3
Training courses
Optional (not examined)
Staff Seminar Series and PhD Seminar Series

Year 4
Transferable skills courses
Optional (not examined)
Staff Seminar Series

Progression and upgrade requirements
Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

MPhil/PhD in Management

Programme codes: RPMG
Department: Management
For students entering in or after the academic year 2012/13.
(Programme withdrawn 2017/18. Last intake 2016/17)
The Department of Management offers an MPhil/PhD Management programme with five tracks:

MPhil/PhD in Management: Business Economics *(withdrawn 17/18)*
MPhil/PhD in Management: Employment Relations and Organisational Behaviour *(withdrawn 17/18)*
MPhil/PhD in Management: General Management *(withdrawn 17/18)*
MPhil/PhD in Management: Information Systems and Innovation *(withdrawn 17/18)*
MPhil/PhD in Management: Management Science *(withdrawn 17/18)*
These are offered either within the Department or one of the its Academic Groups (Employment Relations and Organisational Behaviour, Information Systems and Innovation, Management Science).
(H) = half unit

Guidelines for interpreting programme regulations
Business Economics Track
Programme code: RPMGBE
(Track withdrawn 2017/18. Last intake 2016/17)

Year 1
Training courses
Compulsory (examined)
Full course unit Research Paper
EC441 Microeconomics for MRes Students
MG411 Firms and Markets (students who have already taken MG411 should discuss alternatives with the programme director)
One of the below:
EC532 International Economics for Research Students
EC533 Labour Economics for Research Students
EC536 Economics of Industry for Research Students
EC537 Microeconomic Theory for Research Students
FM502 Theories of Finance
FM503 Empirical Finance

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 2
Transferable skills courses
Optional (not examined) Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 3
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 4
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Employment Relations and Organisational Behaviour Track
Programme code: RPMGER
(Track withdrawn 2017/18. Last intake 2016/17)

Year 1
Training courses
Compulsory (examined)
Research Paper (full unit)
MG501 Employment Relations and Organisational Behaviour Seminar (not available 2017/18)
1.5 units from the following:
MY551 Introduction to Quantitative Analysis (H)
MY552 Applied Regression Analysis (H)
Or MG461 Quantitative Analysis in Management (H)
MG462 Qualitative Analysis in Management (H)
MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H) **or** MG462 Qualitative Analysis in Management (H)
Students may take alternative methods courses if more suitable to their research project or prior background as agreed with their supervisor and programme director. However, it is intended that students should graduate with knowledge of both quantitative and qualitative research methods.
1.5 units from the following:
MG414 Designing and Managing Change in the Public Sector (withdrawn 2017/18)
MG426 Organisations in the Economy and Society (withdrawn 2017/18)
MG436 Firms, Markets and Crises (H) (not available 2017/18)
MG473 Negotiation Analysis (H)
MG474 Managing Diversity in Organisations (H) (withdrawn 2017/18)
MG476 Corporate Social Responsibility and International Labour Standards (H) (not available 2017/18)
MG478 Globalisation and Human Resource Management (H)
MG4D2 International Employment Relations (H)
MG4B7 Organisational Change (H)
MG4D1 International and Comparative Human Resource Management (H) (not available 2017/18)
MG4D4 Cross Cultural Management (H)
** Recommended for PhDs with a strong OB content
Students may also take appropriate MSc level courses from within DoM or from another department as agreed with their supervisor and programme director.

Year 2
Training courses
Compulsory (not examined):
MG501 Employment Relations and Organisational Behaviour Seminar (not available 2017/18)

Year 3
Training courses
Compulsory (not examined):
MG501 Employment Relations and Organisational Behaviour Seminar (not available 2017/18)

Year 4
Training courses
Compulsory (not examined):
MG501 Employment Relations and Organisational Behaviour Seminar (not available 2017/18)

General Management Track
Programme code: RPMGGM
(Track withdrawn 2017/18. Last intake 2016/17)
For all students in Years 1 to 4
MG504 General Management PhD research seminar (withdrawn 2017/18)
Quantitative Approaches (for students with prior statistics background)

Year 1
Training courses
Compulsory (examined)
Full Unit Research Paper
1.5 units from the following:
MY552 Applied Regression Analysis (H)
MG461 Quantitative Analysis in Management (H)
MG462 Qualitative Analysis in Management (H)
1.5 units from the following:
MG414 Designing and Managing Change in the Public Sector (withdrawn 2017/18)
MG426 Organisations in the Economy and Society (withdrawn 2017/18)
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 2
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 3
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 4
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Quantitative Approaches (for students with no prior statistics background)

Year 1
Training courses
Compulsory (examined)
Full Unit Research Paper
1.5 units from the following:
MY551 Introduction to Quantitative Analysis (H)
MY552 Applied Regression Analysis (H)
Or MG461 Quantitative Analysis in Management (H)
MG462 Qualitative Analysis in Management (H)
1.5 units from the following:
MG414 Designing and Managing Change in the Public Sector (withdrawn 2017/18)
MG426 Organisations in the Economy and Society (withdrawn 2017/18)
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 2
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 3
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 4
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Qualitative Approaches
Year 1
Training courses
Compulsory (examined)
Full unit Research Paper
1.5 units from the following:
MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H) or MG462 Qualitative Analysis in Management (H)
MY551 Introduction to Quantitative Analysis (H) or MG461 Quantitative Analysis in Management (H)
1.5 units from the following:
MG414 Designing and Managing Change in the Public Sector (withdrawn 2017/18)
MG426 Organisations in the Economy and Society (withdrawn 2017/18)
Management optional course or optional course from another department as agreed with supervisor and programme director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 2
Transferable skills courses
Optional (not examined)

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 3
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 4
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Information Systems and Innovation Track
Programme code: RPMGIS
(Track withdrawn 2017/18. Last intake 2016/17)

Year 1
Training courses
Compulsory (examined)
Full Unit Research Paper MG502 Foundations of Social Research in Information Systems: Paradigms and Traditions (H) (not available 2017/18)
MG503 Interpretations of Information (H) (not available 2017/18)
Half unit course from Department of Management or other department, subject to approval from the supervisor and the Research Chair. The option would normally be an advanced level postgraduate course in an area that would contribute to their understanding or approach to the thesis topic.
MY500 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY552 Applied Regression Analysis (H)

Transferable skills courses
Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year 2
Transferable skills courses
Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year 3
Transferable skills courses
Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Year 4
Transferable skills courses
Compulsory (not examined)
MG500 Information Systems PhD Seminar Series and Workshops (students are expected to attend each term and present at least once a year)

Optional (not examined)
PhD Seminar Series
Faculty Research Seminars

Management Science Track
Programme code: RPMGMS
(Track withdrawn 2017/18. Last intake 2016/17)

Year 1
Training courses
Compulsory (examined)
Full Unit Research Paper
MA408 Discrete Mathematics and Graph Theory (H)
1.5 units from the following:
MG409 Auctions and Game Theory (H)
MG455 Consumer Insights II: Judgement and Decision Making (H) (not available 2017/18)
MA402 Game Theory I (H)
MA407 Algorithms and Computation (H)
MA409 Continuous-Time Optimisation (H)
MA411 Probability and Measure (H)
MA412 Functional Analysis and its Applications (H)
MA418 Preferences, Optimal Portfolio Choice, and Equilibrium
ST405 Multivariate Methods (H)
ST409 Stochastic Processes (H)
ST411 Generalized Linear Modelling and Survival Analysis (H)
ST418 Non-Linear Dynamics and the Analysis of Real Time Series (H)
ST422 Time Series (H)
An Department of Management, LSE, University of London, or London Taught Course Centre (LTCC), or National Taught Course Centre in Operational Research (NATCOR) courses that are relevant and at an appropriate level, with the approval of the Programme Director.

Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 2
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 3
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Year 4
Transferable skills courses
Optional (not examined)
Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Progression and upgrade requirements (all tracks)
Students will normally be required to pass their first year modules with Merit or above in order to progress to the second year.
The research paper must be submitted in the autumn of the second year for the upgrade decision. The panel will decide

whether to upgrade the student to PhD status by the end of MT, or require them to 'revise and resubmit', with continued advice from the supervisor, by the end of March. A final decision would then be made.

MPhil/PhD in Management Science

(formerly MPhil/PhD Operational Research)

Programme code: RPMS

Department: Management

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Training Courses and Seminars There are no prescribed courses for all research students. Your supervisor will discuss with you your experience and background and will advise you or require you to take courses as appropriate. These would normally be taken in your first year of registration as a research student.
Students would be expected to be active participants in the Group's Research Seminar Series and, where appropriate to their research, with the Mathematical Programming Study Group Seminar Series held in conjunction with the Operational Research Society.
Normally research students are expected, under the guidance of their supervisor, to present their work and findings to the whole Group every summer in a session devoted to that purpose.
Students engaged in preparing the final draft of their thesis are exempted from this requirement.
Methodological Training You will work closely with your principal supervisor, who will provide advice and guidance. You will also have the opportunity to take advantage of research methodology courses provided by the Methodology Institute and the academic and professional development programme offered by the Teaching and Learning Centre.
Upgrading to PhD
The review to upgrade to the PhD normally takes place within two years of full time registration. Progress is assessed by the first and/or second supervisor in consultation with the PhD programme director and another expert in the field of the research undertaken by the student. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status.

Targets for Progress
Year 1 - Successful completion of any taught courses required
Year 2 - Upgrade to PhD
Year 3 - Completion of research and thesis
Year 4 - Completion of research and thesis

MPhil/PhD in Mathematics

Programme code: RPMA

Department: Mathematics

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses - Compulsory (not examined) Courses designed for research students in Mathematics, chosen in consultation with their lead supervisor. Discrete Mathematics and Algorithms and Game Theory students will attend four courses organised by the London Taught Course Centre (www.ltcc.ac.uk), but there are separate arrangements for students in Financial Mathematics, where courses are provided by the London Graduate School in Mathematical Finance (www.londonmathfinance.org.uk). Students also have the option of attending or auditing LSE Taught Masters modules, where appropriate.

Transferable skills courses - Compulsory (not examined)
MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation
MA501 Research Student Seminar - students to attend and to make presentations.

Optional (not examined)
MA422 Research Topics in Financial Mathematics

Year 2
Training courses - Optional (not examined)
Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance

Transferable skills courses - Compulsory (not examined)
MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation
MA501 Research Student Seminar

Optional (not examined)
MA422 Research Topics in Financial Mathematics

Year 3
Training courses - Optional (not examined)
Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance

Transferable skills courses - Compulsory (not examined)
MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation
MA501 Research Student Seminar

Optional (not examined)
MA422 Research Topics in Financial Mathematics

Year 4
Training courses - Optional (not examined)
Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance

Transferable skills courses - Compulsory (not examined)
MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation
MA501 Research Student Seminar

Optional (not examined)
MA422 Research Topics in Financial Mathematics
Teaching opportunities All students are offered the opportunity to teach for the department, subject to a successful interview and language requirements.

Progression and upgrade requirements
Students are initially registered for the MPhil, and will be able to upgrade to PhD registration during their second year, dependent on satisfactory progress. Progress is assessed regularly by the student's supervisors, in consultation with the Doctoral Programme Director, on the basis of the extent to which the agreed research goals have been achieved. Any upgrade is dependent on the successful completion of a Major Review, the date of which is determined by the Doctoral Programme Director in consultation with the lead supervisor.

MPhil/PhD in Media and Communications

Programme code: RPME
Department: Media & Communications
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)
MC408/418 Theories and Concepts in Media and Communications I and II (for students without the appropriate background)
MC5M2 Advanced Methods of Research in Media & Communications (includes MY551 Introduction to Quantitative Analysis and MY552 Applied Regression Analysis). By agreement, the Methodology Institute components (MY551 and/or MY552) can be replaced by other, more advanced, statistics courses or an advanced qualitative course taught at the Methodology Institute. At least one half-unit course of statistics needs to be included.

Optional (examined/not examined)
Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Departmental PhD Symposium

Optional (not examined)
LN988 Thesis Writing course
Modern Foreign Language courses offered by the Language Centre
Other graduate seminars of relevance to research subject

Presentation requirements
At least one presentation annually at MC500 Research Seminar for Media, Communications and Culture

Year 2
Training courses
Optional (examined/not examined)
Either MY530 Advanced Qualitative Analysis Workshops (H) ***or***
MY555 Multivariate Analysis and Measurement (H)
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
ST416 Multilevel Modelling (H)
Other graduate courses relevant to research subject and agreed with supervisor

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Optional (not examined)
Other graduate seminars of relevance to research subject

Year 3
Transferable skills courses
Optional (not examined)
MC500 Research Seminar for Media, Communications and Culture

Year 4
Students are expected to complete their research

Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by 1 June in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with the Methods (MC5M2) and Theories & Concepts (MC408/418) examinations, this paper will form part of the evaluation process, and, together with an oral examination based on the Thesis Proposal, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

MPhil/PhD in New Media, Innovation and Literacy

Programme code: RPMEIL
Department: Media & Communications
These regulations apply to students entering in or before the 2016/17 academic year.
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Plus
MC5M2 Advanced Methods of Research in Media & Communications (includes MY551 Introduction to Quantitative Analysis and MY552 Applied Regression Analysis). By agreement, the Methodology Institute components (MY551 and/or MY552) can be replaced by other, more advanced, statistics courses or an advanced qualitative course taught at the Methodology Institute. At least one half-unit course of statistics needs to be included.

Optional (examined/not examined)
Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Departmental PhD Symposium

Optional (not examined)
CLT04 Digital Literacy
LN988 Thesis Writing course
Modern Foreign Language courses offered by the Language Centre
Other graduate seminars of relevance to research subject

Presentation requirements
At least one presentation annually at MC500 Research Seminar for Media, Communications and Culture

Year 2
Training courses
Optional (examined/not examined)
Either MY530 Advanced Qualitative Analysis Workshops (H) or
MY555 Multivariate Analysis and Measurement (H)
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)
ST416 Multilevel Modelling (H)
Other graduate courses relevant to research subject and agreed with supervisor

Transferable skills courses
Compulsory (not examined)
MC500 Research Seminar for Media, Communications and Culture
Annual Joint PhD Symposium for Second Years and above, at

Goldsmiths, Westminster and City

Optional (not examined)
Other graduate seminars of relevance to research subject

Year 3
Transferable skills courses
Optional (not examined)
MC500 Research Seminar for Media, Communications and Culture

Year 4
Students are expected to complete their research

Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by 1 June in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with the examinations in Methods (MC5M2) and the other two chosen compulsory first year courses from the list above, this paper will form part of the evaluation process, and, together with an oral examination based on the Thesis Proposal, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

MPhil/PhD in Philosophy

Programme code: RPPH
Department: Philosophy, Logic and Scientific Methods
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Year 1
Training courses
Compulsory (examined/not examined)
PH501 Philosophical Problems Seminar
Students who have never taken a paper in formal logic at degree must take PH502 Reasoning and Logic (examined).
Students who have already taken a formal logic course should choose one further MSc course not already taken as part of an MSc degree. Students can either decide to be examined in this course or instead choose to write two assessed essays, one at the end of each of the first two terms. This with the exception of students who choose PH419 Set Theory and Further Logic, in which case the examination is compulsory.
Either a further MSc course (again one not taken as part of the MSc course) plus one term unit of PhD level seminars. The seminars on offer are PH551 Research Seminar in Philosophy of Natural Sciences, PH555 Research Seminar in the Philosophy of Economics and Social Sciences or PH500 Research Methods in Philosophy. If students choose to take a further MSc course, they can either decide to be examined or instead choose to write two assessed essays, one at the end of each of the first two terms. PhD level seminars are not examined and assessment is solely based on essays.
Or three term units of PhD level seminars with associated coursework. Taking three term units means that students can either take all three terms of one of these seminars or 'mix and match' by taking different seminars in different terms. Seminars must be taken with associated course work.

Optional (not examined)
Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year 2
Training courses
Optional (not examined)
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined) Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year 3
Training courses
Optional (not examined)
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined)
Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Year 4
Training courses
Optional (not examined)
PH551 Research Seminar in the Philosophy of Natural Sciences
PH555 Research Seminar in the Philosophy of Economics and Social Sciences
PH500 Research Methods in Philosophy

Optional (examined/not examined)
Transferable skills courses offered by the Teaching and Learning Centre or the Methodology Institute.

Progression and upgrade requirements
Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages; the research plan around 10 pages. Both have to be handed in to the Departmental Office by 1 September. This upgrading will normally take place after the successful completion of Year 1 requirements in Case A, and after the successful completion of Year 2 requirements in Case B. In both cases once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

MPhil/PhD in Philosophy of the Social Sciences

Programme code: RPPHSS
Department: Philosophy, Logic and Scientific Methods
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Year 1
Training courses
Compulsory (examined/not examined)
1. MY551 Introduction to Quantitative Analysis
2. MY552 Applied Regression Analysis
3. MY521 Qualitative Research Methods
4. Either PH419 Set Theory and Further Logic (if students have previous logic training) or PH502 Reasoning and Logic (if no logic training)
5. PH458 Evidence and Policy (H)
6. Students also attend a Research Seminar in the Department

Year 2
Training courses
Compulsory (examined)
7. MY555 Multivariate Analysis and Measurement
8. MY500 Fundamentals of Social Science Research Design

Year 3 and 4
Completion of the thesis.

Progression and upgrade requirements
Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages; the research plan around 10 pages. Both have to be handed in to the Departmental Office by 1 September. This upgrading will normally take place after the successful completion of Year 1 requirements. Once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

MPhil/PhD in Psychological and Behavioural Science

(formerly MPhil/PhD in Social Psychology)
Programme code: RPPB
Department: Psychological and Behavioural Science
These regulations apply to students entering in or after the 2017/18 academic year.
The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

* Students also take the unassessed course PS443A Psychological and Behavioural Science.

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined) Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined)**

Year 2
Training courses
Compulsory (students should agree with their supervisor whether the courses taken will also be examined): Quantitative pathway
MY452M ***or*** MY452L Applied Regression Analysis (H) (if MY421 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H) (if MY452 taken in Year 1)

Qualitative pathway
MY455 Multivariate Analysis and Measurement (H)

Combined pathway
MY452M ***or*** MY452L Applied Regression Analysis (H) (if MY421 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H) (if MY452 taken in Year 1)
MY456 Survey Methodology (H) (if MY455 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H)

Optional (examined/not examined) Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined)**

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined).**

Year 3
Training courses
Compulsory (examined/not examined)
Students can take further compulsory courses which they should discuss with their supervisor (**students should agree with their supervisor whether the courses taken will also be examined):**
Optional (examined/not examined) Selection of courses taken at more advanced level than those in Years 1 and 2

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Year 4
Training courses
Students can take further courses following discussion with their supervisor.

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor

Progression and upgrade requirements
The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student's supervisor, as well as two other academic colleagues.

Targets for progress
Year 1 - Extended Essay of 6,000 words, submitted on first day of Lent Term.
Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Lent Term. These chapters form the basis of an oral examination by three person thesis committee usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.
Year 3 - Completed first draft by end of three years.

Teaching experience
Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

MPhil/PhD in Regional and Urban Planning Studies

Programme code: RPRP
Department: Geography & Environment
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (not examined)

GY502 Staff/Research Students Seminar

Compulsory (examined)
1. Courses to the value of one unit from the list of options on the relevant MSc degrees
2. Relevant advanced research method courses to the value of one unit from the following:
   GY428 Applied Quantitative Methods (H)
   GY460 Techniques of Spatial Economic Analysis (H)
   MY500 Fundamentals of Social Science Research Design (H)
   MY521 Qualitative Research Methods (H)
   MY526 Doing Ethnography (H)
   MY527 Non-Traditional Data: New Dimensions in Qualitative Research (H)
   MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (H) (not available 2017/18)
   MY556 Survey Methodology (H)
   MY557 Casual Inference for Observational and Experimental Studies (H)
   MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (H)

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Compulsory (not examined)
GY502 Staff / Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Year 3
Training courses
Compulsory (not examined)
GY502 Staff / Research Students Seminars

Transferable skills courses
Compulsory (not examined)
GY500 Research Project Seminar

Progression and upgrade requirements
Students on the MPhil/PhD programme will go through a First Year Progress Review taking place in the Summer Term of their first research year. For the First Year Progress Review, the student submits a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review, in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.
Research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.
In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the relevant Doctoral Programme Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

MPhil/PhD in Social Policy
Programme code: RPSA
Department: Social Policy
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Optional (not examined)
If not already taken previously:
SA451 Social Policy Research
MY400 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY551M **or** MY551L Introduction to Quantitative Analysis (H)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses
Compulsory (not examined)
SA550 Research Student Seminar

Optional (not examined) Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute

Year 2
Training courses
Optional (not examined)
MY552M ***or*** MY552L Applied Regression Analysis (H)
MY555 Multivariate Analysis and Measurement (H)

Transferable skills courses
Optional (not examined)
SA550 Research Student Seminar

Year 3
Transferable skills courses
Optional (not examined)
SA550 Research Student Seminar

Year 4
Transferable skills courses
Optional (not examined)

SA550 Research Student Seminar

Progression and Upgrade requirements Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.
Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Doctoral Programme Director(s).
Each pre-Major Review student is expected to make a presentation on their proposed research to the SA550 seminar prior to the submission of their major review document and to address issues raised by the Doctoral Programme Director(s).

MPhil/PhD in Social Psychology

Programme code: RPPS
Department: Psychological and Behavioural Science
These regulations apply to students entering in or before the 2016/17 academic year.
The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

* Students also take the unassessed course PS443A Psychological and Behavioural Science.

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined) Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined)**

Year 2
Training courses
Compulsory (students should agree with their supervisor whether the courses taken will also be examined): Quantitative pathway
MY452M ***or*** MY452L Applied Regression Analysis (H) (if MY421 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H) (if MY452 taken in Year 1)

Qualitative pathway
MY455 Multivariate Analysis and Measurement (H)

Combined pathway
MY452M ***or*** MY452L Applied Regression Analysis (H) (if MY421 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H) (if MY452 taken in Year 1)
MY456 Survey Methodology (H) (if MY455 taken in Year 1)
MY455 Multivariate Analysis and Measurement (H)
Optional (examined/not examined) Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined)**

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor **(students should agree with their supervisor whether the courses taken will also be examined).**

Year 3
Training courses
Compulsory (examined/not examined)
Students can take further compulsory courses which they should discuss with their supervisor (**students should agree with their supervisor whether the courses taken will also be examined):**
Optional (examined/not examined)
Selection of courses taken at more advanced level than those in Years 1 and 2

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Year 4
Training courses
Students can take further courses following discussion with their supervisor.

Transferable skills courses
Compulsory (not examined)
PS950 Current Research in Social Psychology

Optional (examined/not examined)
Students can take further optional courses which they should discuss with their supervisor

Progression and upgrade requirements
The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student's supervisor, as well as two other academic colleagues.

Targets for progress
Year 1 - Extended Essay of 6,000 words, submitted on first day of Lent Term.
Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Lent Term. These chapters form the basis of an oral examination by three person thesis committee usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.
Year 3 - Completed first draft by end of three years.

Teaching experience
Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

MPhil/PhD in Social Research Methods

Programme code: RPMI
Department: Methodology
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Optional (students should agree with their supervisor whether the courses taken will also be examined)
A selection of:
MY400 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY551M ***or*** MY551L Introduction to Quantitative Analysis (H)
MY552M ***or*** MY552L Applied Regression Analysis (H)

MY555 Multivariate Analysis and Measurement (H)
MY556 Survey Methodology (H) MY557 Causal Inference for Observational and Experimental Studies (H)
MY570 Computer Programming (H)
MY572 Data Structures, Databases and Data Sharing (H) (not available 2017/18)
MY573 Managing and Visualising Data (H)
A typical selection would be to take MY400, MY521, MY552 and MY555 in the first year, but students may be excused from some or all of them if they have previously taken graduate-level courses covering the same material. Students who use quantitative methods in their research, are also encouraged to take MY559 in their first or second year. The courses they take may also include ones from other institutes or departments at LSE, dependent on their needs.

Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year 2
Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year 3
Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology Seminar

Year 4
Transferable skills courses
Compulsory (not examined)
MY599 Department of Methodology
Progression and upgrade requirements In the Summer Term of their first year, candidates will produce a 10,000 word 'first year review' that outlines the aims and methods of their thesis: this means summarising the key literature(s), motivating their specific research questions, and highlighting the planned contributions of their work. A first year review document typically includes a general introduction, a comprehensive literature review (covering relevant empirical and theoretical work), a motivation of the research questions and hypotheses, and an indication of the literature(s) that the candidate is seeking to contribute to (i.e. the gaps in knowledge that will be addressed). Candidates will also give an oral presentation of their proposal at the Department of Methodology PhD day.
Written and oral work will be assessed by two academics (not on the supervisory team), normally members of Department of Methodology staff. This work has to reach an acceptable standard to enable them to progress to the second year. It is particularly important that the first year review clearly states the objectives of the doctoral research ands indicate how the empirical work will be carried out. If the panel deems the first year review to be not suitably clear, they can choose not to accept the submitted document and give the candidate up to a month to clarify. This decision will be taken maximum one week after the Department of Methodology PhD Day. Examples of unclear work might include (but not be limited to):
• A first year review that does not state clear research questions;
• A first year review that does not adequately review the specific literatures that the empirical work is contributing to;
• A first year review that does not give enough methodological detail, showing how the design will produce data that allows the candidate to address the theoretical issues at stake in a systematic and rigorous way.
After the first year candidates will spend more time on independent study under the guidance of their supervisor(s). This will involve the collection, organization and analysis of data, and writing up the results. During their second year of registration, they will typically submit three (minimum) draft chapters of their thesis plus a short introduction and a detailed plan for its completion. The three draft chapters will typically include a detailed literature review, specification of research problem(s) and two empirical chapters. If candidates are pursuing a paper-based thesis, their upgrading documents will typically include a short introduction, a literature review and at least two empirical papers. Whether a traditional or paper-based thesis, the material will be evaluated by an upgrading committee (two academics, not necessarily of the MI or even the LSE) who will recommend transferral to PhD registration if their work is judged to be of sufficient quality and quantity.
Throughout the MPhil/PhD and PhD, candidates will attend the Institute's research seminar and other specialist workshops and seminars related to their interests. The student must present at every Department of Methodology PhD day.

MPhil/PhD in Sociology

Programme code: RPSO
Department: Sociology
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Compulsory (examined)
SO500 Research Class for 1st year MPhil Students
Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined)
MY400 Fundamentals of Social Science Research Design (H)
MY521 Qualitative Research Methods (H)
MY551M ***or*** MY551L Introduction to Quantitative Analysis (H)
MY552M ***or*** MY552L Applied Regression Analysis (H)

Selection of additional courses, with agreement of supervisor, including:
Other courses from Sociology Masters programmes
Specialist research courses: SO511 Research Seminar in Political Sociology, SO521 Research Seminar on Cities and Space (not available 2017/18), SO491 Quantitative Social Research Methods (H) and SO492 Qualitative Social Research Methods (H)

Transferable skills courses
Optional (not examined)
MY591 Computing Packages for Qualitative Analysis
MY592 Workshop in Information Literacy: finding, managing and organising published research and data

Year 2
Training courses
Optional (not examined)
SO501 Data Analysis Workshop (this course is strongly recommended)

Year 3
Training courses
Optional (not examined)
SO505 Becoming a Professional Sociologist

Progression and upgrade requirements
In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors

may be required, or a recommendation may be made that the student not be allowed to re-register.

By the end of Year 2, students are expected to have completed their fieldwork, and to be ready to submit two draft chapters for upgrade. All full-time research students are expected to have made the transition from the MPhil to PhD (upgrading) within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD by the end of their third year, and to submit their thesis within six years. The decision to upgrade from MPhil to PhD is taken by a panel consisting of two academics from the Department or the School, with the supervisor(s) in attendance and available to be consulted by the panel. For upgrade, students submit three draft chapters of their thesis, plus thesis abstract and outline schedule for completion. This material is then assessed by viva voce and a written report is made by the panel.

Students should aim to have a complete first draft of their thesis in years three to four and allow three to six months for revision and submission.

MPhil/PhD in Statistics

Programme code: RPST
Department: Statistics
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Year 1
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542 (not available in 2017/18).

Transferable skills courses
Compulsory (not examined)
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined)
Courses provided by the Methodology Institute.

Year 2
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

Transferable skills courses
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):
Courses provided by the Methodology Institute.

Year 3
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

Transferable skills courses Compulsory (not examined)
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined)
Courses provided by the Methodology Institute.

Year 4
Training courses
Optional (not examined)
Courses offered by the London Graduate School in Mathematical Finance.
Courses offered by the London Taught Course Centre.

Optional (examined)
Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly ST405, ST411, ST421, ST501 and ST542.

Transferable skills courses
Annual Research Presentation Event.

Optional (not examined)
Departmental Seminar Series.
Joint Econometrics and Statistics Workshops with the Department of Economics.
Risk and Stochastics Seminar/Workshop.
London Graduate School in Mathematical Finance Seminar Day.
Poster Presentations.
The department encourages students to attend and, where the

opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined)
Courses provided by the Methodology Institute.

Progression and upgrade requirements Formal assessment is made towards the end of each Summer Term. This assessment is based on statements made by the student and the supervisors in the progress report form. Students are also required to complete a supplementary report of 1-2 pages (A4), providing in more detail an outline of their current research.
The review to upgrade to the PhD normally takes place within two years of full time registration. Progress is assessed by the first and/or second supervisor in consultation with the PhD programme director and another expert in the field of the research undertaken by the student. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status. The department's research committee also monitors the progress of PhD students.

Teaching opportunities The department employs Graduate Teaching Assistants (GTAs) to teach a number of its undergraduate and postgraduate courses. In particular ST102, Elementary Statistical theory, and ST107, Quantitative Methods, are taught to a large number of students across the School and require a significant number of classes. Research students are encouraged to undertake some teaching from year two onwards. First year MPhil/PhD students are normally not permitted to teach, although some marking may be available during the year or for the external degree at the end of the year. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue this.

Research Course guide

AC500
Accounting, Organisations and Society

This information is for the 2017/18 session.
Teacher responsible: Dr Andrea Mennicken KSW 3.09 and Prof Michael Power KSW 3.12
Availability: This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
There will be a reading week in week 6 of both MT and LT.
Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.
Assessment: Assessment will be based on written work as agreed with the Course Director.

AC501
Empirical Financial Accounting and Capital Markets

This information is for the 2017/18 session.
Teacher responsible: Prof Bjorn Jorgensen OLD 2.17 and Prof Ane Miren Tamayo OLD 5.05
Availability: This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.
Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.
Assessment: Second year MPhil/PhD students in Accounting (Track 2) are formally assessed by:
(i) A referee report of a current working paper (25% weighting). This will normally be assigned in week 5 of Lent term to be worked on during the following week (6) when there is no class meeting.
(ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 over the current academic year (2017/18) and previous academic year (2016/17). It will be designed to be completed within a three-day (72 hour) period during Summer term.
First year MPhil/PhD students in Accounting (Track 2) will not normally be formally assessed but they will receive feedback in the form of formative assessments. In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC502
Foundations of Accounting, Organizations and Institutions

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Power KSW 3.12
Availability: This course is compulsory on the MPhil/PhD in Accounting (Track 1). This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is also offered for students from other MPhil/PhD programmes, with the approval and written permission of the PhD in Accounting Programme Director.
Course content: The object of the course is to provide students with an advanced understanding of the changing role and position of accounting practices in organisations, both public and private, and societies more generally. Students will be exposed to advanced thinking about how accounting practices are much more than a collection of routine techniques but are shaped by their institutional contexts, have behavioural consequences and can represent different values. We will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents will be addressed.
The course emphasises the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each lecture will provide the necessary technical foundations.
Indicative topics include:
Foundations of Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Performance, Accountability Incentives; Accounting for Sustainability; Organisational Failure as a Process.
Teaching: 10, 3-hour seminars in weeks 1-10 of MT and a 2-hour essay workshop in week 11 of MT.
Formative coursework: Students will be required to produce two pieces of written work. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentations and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.
Indicative reading: Chapman, Cooper & Miller (eds), Accounting, Organizations and Institutions (Oxford, 2009); Hopwood & Miller (eds), Accounting as Social and Institutional Practice, Cambridge, 1994; Power, The Audit Society, Oxford, 1999; Roberts, The Modern Firm, Oxford, 2004.
Assessment: Essay (100%, 6000 words) in the ST.
MPhil/PhD in Accounting students must pass the course examination, normally with high Merit (at least 65%) or Distinction marks, to proceed to the next year of the programme.

AN500
Seminar on Anthropological Research

This information is for the 2017/18 session.
Teacher responsible: Prof Rita Astuti OLD 6.11, Dr Alpa Shah OLD 6.17a and Dr Fenella Cannell
Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.
Course content: Seminar on Anthropological Research
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.
Assessment: This course is not assessed.

AN503
Thesis Writing Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Nicholas Long OLD 6.14 and Prof Laura Bear OLD 6.09
Dr. Katy Gardener OLD 5.07
Availability: This course is available on the MRes/PhD in Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year post-fieldwork students.
Course content: Students present draft dissertation chapters in their cohort.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.
This course has reading week in Week 6 of the MT and LT.
Assessment: This course is not assessed.

AN505
Advanced Professional Development in Anthropology

This information is for the 2017/18 session.
Teacher responsible: Dr Gisa Weszkalnys OLD 6.08, Prof David Graeber OLD 6.10, Dr Catherine Allerton OLD 6.13 and Dr Fenella Cannell
Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.
Course content: This seminar course has two main aims. First, it examines key theoretical concepts and approaches in Anthropology at an advanced level that may be relevant to post-fieldwork doctoral candidates. It may focus on widely ranging thematic areas, e.g. recent developments in cognitive anthropology and/or in material culture studies and/or in anthropological studies of ontology. The aim is to enhance the ability of students to engage with such debates at an advanced level. Second, the course aims to enhance the professional development of doctoral students by providing them with advanced training in writing and presentation skills, and more generally in relation to skills relevant to their career progression.
Teaching: 14 hours of seminars in the MT. 14 hours of seminars in the LT. 12 hours of seminars in the ST.
Assessment: This course is not assessed.

DV500
Research Seminar in Development Studies

This information is for the 2017/18 session.
Teacher responsible: Dr Elliott Green CON8.07 and Prof David Keen CON7.15
Availability: This course is compulsory on the MPhil/PhD in Development Studies and MRes/PhD in International Development. This course is available as an outside option to students on other programmes where regulations permit.
Course content: This seminar is designed as a forum for discussing theoretical and methodological issues in Development Studies research. Modules are organized around broad methodological issues (e.g. research design, case studies, causal inference) and presentations of research, with the former featuring heavily in the MT and the latter in the LT and ST. Research presentations at the seminar are made by DESTIN research students and also by staff, with some invited speakers from outside.
All research students are expected to attend the seminar while in residence in London. First year students are required to present a draft of their research proposal to the seminar during the LT or ST. Continuing students are invited to make presentations based on a report of their research, draft chapters or even their final draft of the dissertation. In making their presentations students are asked to provide (a) background material about the particular issue at hand, (b) a clear statement of the research questions and/or hypotheses that are being addressed, and (c) discussion of the research methods to be employed. Students should inform their supervisor(s) of the date when they are scheduled to make a presentation.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.
Assessment: This course is not assessed.

DV501 Half Unit
Development History, Theory and Policy for Research Students

This information is for the 2017/18 session.
Teacher responsible: Prof James Putzel
Availability: This course is compulsory on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. During Michaelmas Term the course critically discusses concepts of 'development' and the historical evolution of paradigms of development thinking and policy. Through an examination of comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies and path dependencies and the political economy of growth, poverty and freedom. We examine how differential experiences of financial crisis, state fragility, democratic and populist politics affect development thinking and possibilities. During Lent Term the course draws on recent research and policy documents to discuss current cutting edge policy issues and challenges in the developing world including: demographic change and its implications, poverty and inequality ; industrialisation, international trade and industrial policy; agriculture, new technologies and agrarian reform policies; gendered development and responses; the impact of violent conflict; environmental threats and sustainability; and the evolution of development practice and aid.
Teaching: 20 hours of lectures and 20 hours of seminars in the MT.
Students will attend the Michaelmas Term lectures for DV400 and an associated weekly seminar for research students only.
Formative coursework: Students will be expected to produce 2 presentations in the MT.
Indicative reading: The following are recommended basic readings for the course: A. Kohli, State-Directed Development: Political Power and Industrialization in the Global Periphery (Cambridge, 2004). A Sen, Development as Freedom (Anchor, 1999). HJ Chang, Kicking Away the Ladder: Development Strategy in Historical Perspective (Anthem, 2002). HJ Chang, Economics: The User's Guide (Penguin, 2014). D Rodrik, One Economics, Many Recipes: Globalization, Institutions, and Economic Growth (Princeton University Press, 2008). J.Ferguson, The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho (Cambridge, 1990). M. Jerven, Poor Numbers: How we are misled about African development statistics and what to do about it (Cornell, 2013). United Nations, “Transforming Our world: the 2030 Agenda for Sustainable Development” (SDGs) A/RES/70/1 (25 September 2015). World Bank, World Development Report 2017: Law and Governance (World Bank, 2017)
Assessment: Essay (100%, 5000 words) in January.

DV510
Research Design and Proposal in International Development

This information is for the 2017/18 session.
Teacher responsible: Dr Elliott Green and Prof David Keen
Availability: This course is compulsory on the MRes/PhD in International Development. This course is not available as an outside option.
Course content: Students will work with their academic supervisors to structure a doctoral research proposal that has the potential to make a significant contribution to knowledge and that reflects a sophisticated mastery of advanced theoretical and methodological tools from one or more academic disciplines related to international development. They will learn how to identify good research questions that are embedded in the current academic literature, and how to apply recognisable, defensible and academically sophisticated methodologies to address those questions. The doctoral research proposal itself will identify a key research question(s) for investigation, a justification well embedded in existing academic literature for why the topic is theoretically and empirically important, and a well-developed theoretical and methodological framework for researching the question(s).
Teaching: Students will meet their supervisors three times a term during their first year of study in accordance with the LSE's regulations for Research Degrees. Their proposals will be developed over the course of these meetings.
Formative coursework: Students will be expected to produce 3 pieces of coursework in the MT, LT and ST.
Students will submit drafts of their proposal to their supervisors and receive feedback.
Indicative reading: The reading list for each student will be determined by the research they propose undertaking.
Assessment: Other (100%) in the ST.

DV518 Half Unit
African Development

This information is for the 2017/18 session.
Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Thandika Mkandawire CON 8.02 Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor
Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.
This course is available as an option for students enrolled in the MRes/PhD in International Development only.
Course content: The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.
Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social social protection, cash transfers, Millennium Development Goals, horizontal inequality and conflict.
Teaching: 16 hours and 30 minutes of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval
Indicative reading: Eastwood, R. & M. Lipton, 2011. Demographic transition in sub-Saharan Africa: How big will the economic dividend be? Population Studies: A Journal of Demography, 65(1), 9-35. Assessment: Essay (100%, 5000 words) in the ST.
1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV520 Half Unit
Complex Emergencies

This information is for the 2017/18 session.
Teacher responsible: Prof David Keen CON 7.16 and Dr Diana Weinhold CON 7.10
Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor
Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.
This course is available as an option to students enrolled in the MRes/PhD in International Development only
Course content: The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters.
Teaching: 16 hours and 30 minutes of lectures and 13 hours and 30 minutes of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval
Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, Complex Emergencies (Polity, 2008). Other texts of interest include David Keen, Useful Enemies: When Waging Wars is More Important than Winning Them (Yale University Press, 2012); Stathis Kalyvas, The Logic of Violence in Civil War (Cambridge University Press, 2006); David Keen, Conflict and Collusion in Sierra Leone (James Currey, 2005); David Keen, Endless War? Hidden Functions of the 'War on Terror' (Pluto, 2006); Michael Mann, The Dark Side of Democracy: Explaining Ethnic Cleansing (Cambridge University Press, 2005); Amartya Sen, Poverty and Famines (Oxford University Press, 1981); Frances Stewart and Valpy FitzGerald (eds.), War and Underdevelopment, Volumes 1 and 2 (Oxford University Press, 2001); and Jeremy Weinstein, Inside Violence: The Politics of Insurgent Violence (Cambridge University Press, 2007); Tim Allen, Trial Justice: The International Criminal Court and the Lord's Resistance Army (Zed Press, 2006), Chris Dolan, Social Torture: The Case of Northern Uganda, 1986-2006 (Berghahn, 2009); Zoe Marriage, Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict (Hurst and Co., 2006); Christopher Cramer, Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries (Hurst and Co., 2006); Mats Berdal and David Malone, Greed and Grievance: Economic Agendas in Civil Wars (Lynne Rienner, 2000); Hugo Slim, Killing Civilians: Method, Madness and Morality in War (Hurst and Co., 2008).
Assessment: Essay (100%, 5000 words) in the ST.
1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV528 Half Unit
Managing Humanitarianism

This information is for the 2017/18 session.
Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Dr Darron Gordon CON 8.10
Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor
Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.
This course is available as an option to students enrolled on the MRes/PhD in International Development only.
Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, physicians, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and other forms of political and military intervention. It looks at how differing forms of humanitarianism relate to ideas of human rights and justice, the politics of securitisation and of neglect. It looks at the explanation as to why humanitarian organisations and governments respond to some crises and not to others and considers the critique of humanitarian assistance and the ways in which the UN and NGO communities have responded and sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.
Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval
Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' International Review of the Red Cross nternational Review of the Red Cross / Volume 97 / Issue 897-898 / June 2015, pp 77-109. M. Barnett (2011), Empire of Humanity: A History of Humanitarianism, Ithaca: Cornell University Press; M. Barnett, M. Barnett & T. G. Weiss (Eds.), 2008. Humanitarianism in Question Politics Power and Ethics, Ithaca: Cornell University Press; A. De Waal,1997. Famine Crimes: Politics and the Disaster Relief Industry in Africa. London: James Currey. Loescher (2001) The UNHCR and World Politics, Oxford University Press. D. Rieff (2002) A Bed for the Night: Humanitarianism in Crisis, Vintage/Random House.
Assessment: Essay (100%, 5000 words) in the LT.
1 x 5000 word research paper to be submitted on the first Friday of the Lent Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor

DV531
Development Management

This information is for the 2017/18 session.
Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Jean-Paul Faguet CON 8.06
Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD supervisor
Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.
This course is available to students in Year 2 or above of the MRes/PhD in International Development only. It is available to students in Year 1 of the MRes/PhD in International Development with permission.
Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It

reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into four parts: (1) Analytical Assumptions, (2) Government and Governance, (3) Private Sector, and (4) Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: 20 hours of lectures, 15 hours of seminars and 15 hours of workshops in the MT. 16 hours of lectures, 12 hours of seminars and 15 hours of workshops in the LT. 3 hours and 30 minutes of lectures in the ST.

There will be an introductory workshop, 18 two-hour lectures and 18 one-and-a-half hour seminars over the Michaelmas & Lent Terms. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) Reconstructing Development Theory; Faguet, JP. 2012. Decentralization and Popular Democracy: Governance from Below in Bolivia. Ann Arbor: University of Michigan Press; Chang, H. 2003, Rethinking development economics, Anthem Press; London, Intermediate Technology; Kohli, A. 2004 State-directed development: political power and industrialization in the global periphery, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, Problems of democratic transition and consolidation, Johns Hopkins; Olson, M. 1982 The rise and decline of nations, Yale University Press; North, D. 1990. Institutions, Institutional Change and Economic Performance. Cambridge University Press. Putnam, R. D. 1993. Making Democracy Work: Civic Traditions in Modern Italy. Princeton: Princeton University Press; Rodrik, D. (Ed.). 2003. In Search of Prosperity: Analytical Narratives on Economic Growth: Princeton University Press; Sen. A., 1999 Development as Freedom. Oxford University Press; Stiglitz, J. 2002 Globalization and its discontents, Allen Lane, 2002; World Bank, World Development Report, 2004, Making services work for poor people, Washington, World Bank.

Assessment: Assessment path 1

Essay (100%, 10000 words) in the ST.

Assessment path 2

Exam (60%, duration: 3 hours) in the main exam period.

Essay (40%, 5000 words) in the ST.

The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV545 Half Unit
Research Themes in International Development

This information is for the 2017/18 session.

Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Tim Allen CON 7.12

Head of Department, Doctoral Programme Directors, MSc Course Convenors and student's PhD Supervisor

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled on the MRes/PhD in International Development only.

Course content: The objectives of the course are: a) to introduce students to the practical world of development which will both facilitate their `career paths' and also prepare them for the consultancy projects by becoming more familiar with how such organisations think and work; b) to introduce students to the interface between policy practice and development academe. Each week speakers from different development organisations will speak to students about policy and research work in their organisation, how their organisation uses research and for what purposes, and some of the hot topics.

Teaching: 20 hours of lectures in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading:

Allen T (with Melissa Parker) (2012) "Will mass drug administration eliminate lymphatic filariasis? Evidence from Northern Coastal Tanzania" Journal of Biosocial Science http://journals.cambridge.org/action/displayAbstract?fromPage=online&aid=8700071&fulltextType=RA&fileId=S0021932012000466. Wade, Robert Hunter (2011) "Emerging world order?: from multipolarity to multilateralism in the G20, the World Bank, and the IMF". Politics & Society, 39 (3).

Assessment: Essay (100%, 5000 words) in the ST.

1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor

---

DV590 Half Unit
Economic Development Policy I

This information is for the 2017/18 session.

Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Danny Quah

Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course focuses on analytically and empirically rigorous analyses of economic policies for

macroeconomic growth in developing countries. We review current theoretical debates and consider how the use of empirical evidence can help to inform our analyses. In particular, increasing data availability has meant that the effectiveness of development policies, in terms of improving welfare, reducing poverty and promoting growth, can now be analysed using a variety of quantitative techniques. By looking at how these approaches can be applied to a range of development issues, the course will provide an overview of new thinking on the design of public policy in developing countries. While a strong mathematical or statistical background is not necessary to follow the course, students will be expected to actively learn and engage with regression analysis and other econometric techniques. These skills are developed through the term with mandatory weekly problem sets and occasional in-class quizzes supplementing the lectures and readings. The course consists of one lecture on the interpretation of empirical regression analysis and the role of quantitative methods in policy evaluation, and a further 9 two-hour lectures on theory and policy issues of relevance to developing countries. Topics themselves may vary from year to year but may include determinants of growth; human capital accumulation; globalisation and the political economy of trade policy; the global evolution of income distribution, structural adjustment, and financial crises; economic geography of development; aid; debt relief; and environment and growth. Seminars consist of student-led participatory in-depth analyses of best-practice theory and quantitative empirical research papers which students assess.
Teaching: 20 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval
Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, Development Economics (1998) which will serve as the course text, W Easterly, The Quest for Growth;
Assessment: Essay (100%, 5000 words) in the ST.
1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor

DV591 Half Unit
Economic Development Policy II

This information is for the 2017/18 session.
Teacher responsible: Prof David Keen CON 7.16, Dr Diana Weinhold CON 7.10 and Prof Danny Quah
Head of Department, Doctoral Programme Directors, MSc Course Convenor and PhD Supervisor
Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.
This course is available as an option for students enrolled in the MRes/PhD in International Development only.
Course content: This course focuses on analytically and empirically rigorous analyses of microeconomic economic policies in developing countries. We review current theoretical debates and consider how the use of empirical evidence can help to inform our analyses. In particular, increasing data availability has meant that the effectiveness of development policies, in terms of improving welfare, reducing poverty and promoting growth, can now be analysed using a variety of quantitative techniques. By looking at how these approaches can be applied to a range of development issues, the course will provide an overview of new thinking on the design of public policy in developing countries. Students without a strong background in statistics and economics should take DV590 as a prerequisite as students will be expected to actively engage with regression analysis and other econometric techniques. These skills are further developed through the term with mandatory weekly problem sets and occasional in-class quizzes supplementing the lectures and readings. The course consists of 10 2-hour lectures on microeconomic theory and policy issues of relevance to developing countries. Topics themselves may vary from year to year but may include health and education intra-household resource allocation; credit markets; social networks; and behavioural economics applied to the design of development policies. Seminars consist of student-led participatory in-depth analyses of best-practice theory and quantitative empirical research papers which students assess and critique.
Teaching: 20 hours of lectures and 15 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.
A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval
Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Assessment: Essay (100%, 5000 words) in the ST.
1 x 5000 word research paper to be submitted on the first Friday of the Summer Term. The research paper will be co-marked by the course convenor and the student's PhD supervisor

EC501
Work in Progress Seminars

This information is for the 2017/18 session.
Availability: This course is compulsory on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: Research students present their work to faculty and peers in the designated field. Outside speakers are also invited from time to time.
Teaching: Seminars EC501: eight seminar groups covering the major field options. The frequency of meetings to be determined according to the number of students in each specialism, but generally each group will meet weekly throughout the session.
Assessment: This course is not examinable.

EC518
Topics in Advanced Econometrics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Prof Francisco Hidalgo 32L.4.20 and Dr Taisuke Otsu 32L.4.25
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research.
Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 hours of EC518 lectures in each of the MT and the LT.
Indicative reading: See reading list for EC485. Additional readings will be recommended at the start of the course.
Assessment: Exam (50%, duration: 2 hours) in the LT week 0.
Exam (50%, duration: 2 hours) in the main exam period.

EC532
International Economics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Thomas Sampson 32L.2.34 and Dr Keyu Jin 32L.1.17
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. One term covers international trade and the other term covers international macroeconomics.
The course is based around research papers. Topics covered vary from year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade, theories of heterogeneous firms and trade, theories of incomplete contracts and trade, and the political economy of trade policy. A list of representative topics in international macroeconomics includes international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

EC533
Labour Economics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Machin 32L.2.06A, Dr Guy Michaels 32L.2.10, Prof Jorn Pischke 32L.2.16 and Prof Yona Rubinstein NAB.5.32
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for carrying out independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, and discuss the advantages and limitations of existing empirical work and assess policy options.
Topics include:
- Labour supply, household behaviour, and the allocation of time
- Labour demand and monopsony
- Search, matching, labour market frictions, unions, and unemployment
- Wage determination, compensating differentials, race and gender gaps, and wage inequality
- Human capital, returns to schooling, and training
- Contracts and incentives in the labour market

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and feedback given by teachers.
Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

EC534
Public Economics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Camille Landais 32L.3.23 and Dr Johannes Spinnewijn 32L.3.24
Dr Xavier Jaravel and Dr Daniel Reck
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.
The specific topics covered may vary from year to year, but the following general areas would typically be included:
- Behavioural responses to taxes and transfers
- Optimal taxation
- Dynamic taxation
- Behavioural public economics
- Social insurance
- Federalism
- Privatization and regulation
- Voting
- The role of communication in politics
- Special-interest politics
- Political institutions
- Political accountability

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and feedback given by teachers.
Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of the Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.) and of T Persson and G. Tabellini, Political Economy, MIT Press, 2002.
Assessment: Other (40%) and other (30%) in the MT and LT.
Take home exam (30%) in the ST.
The assessment for this course is as follows:
1) 4 problem sets due throughout the MT and LT terms (40%)
2) An "extended replication exercise" (30%) which would consist of:
   i) writing a referee report on that paper (MT)
   ii) replicating a paper (empirical paper or paper based on simulations), (beginning of LT)
   iii) starting an extension of that paper (which requires developing a research design, positioning the question of the extension in the literature, etc.) ; (end of LT, start of ST)
3) A take-home exam in the ST (30%)

EC535
Development Economics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Gharad Bryan 32L.3.10 and Prof Maitreesh Ghatak 32L.3.08A
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and feedback will be given by teachers.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.
Assessment: Other (100%) in the MT and LT.
There will be six take home problem sets, three in MT and three in LT. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each problem set will carry equal weight.

EC536
Economics of Industry for Research Students

This information is for the 2017/18 session.
Teacher responsible: Prof Alessandro Gavazza 32L.4.21, Dr Matthew Gentry 32L.4.28, Prof Martin Pesendorfer 32L.4.19 and Dr Pasquale Schiraldi 32L.4.22
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research.
Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and feedback given by teachers.
Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.
Assessment: Other (100%) in the MT and LT.
8 take home problem sets (two for each part - four in MT and four in LT). Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC537
Microeconomic Theory for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Andrew Ellis 32L.3.15, Dr Matthew Levy 32L.3.21 and Prof Balazs Szentes 32L.4.05
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Pre-requisites: Students must have completed Microeonomics for MRes students (EC441).
Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory. Topics will include:
• Classic static and dynamic game theory
• Contract theory
• Bounded rationality
• Psychology and economics.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and assessed by teachers.
Indicative reading: Osborne M, and Rubinstein A, A Course in Game Theory, MIT Press, 1994. Fudenberg D, and Tirole J, Game Theory, MIT Press, 1991.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

EC539
Macroeconomics for Research Students

This information is for the 2017/18 session.
Teacher responsible: Prof Philippe Aghion 32L.2.30, Dr David Baqaee 32L.1.10, Prof Ricardo Reis 32L.1.27 and Dr Shengxing Zhang 32L.1.16
Availability: This course is available on the MRes in Economics and MRes/PhD in Economics. This course is not available as an outside option.
Course content: Surveys the most recent development in macroeconomics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: One piece of work per term will be required and feedback given by teachers.
Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

EC540
Political Economy

This information is for the 2017/18 session.
Teacher responsible: Prof Torun Dewan CON.6.07, Dr Ethan Ilzetzki 32L.1.10, Prof Gilat Levy 32L.4.31 and Prof Torsten Persson
Availability: This course is available on the MRes in Economics, MRes/PhD in Economics and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.
Course content: The course will provide students with the economic methodology and tools for the analysis of political decision making and its effect on public policy. We will consider how political institutions shape economic policy, e.g., how do institutions such as election, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider how in the absence of institutions, political attitudes, beliefs and norms shape policies. The course will focus on analytical models and their testable implications.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Formative coursework: Students will discuss papers in lectures and will be given the opportunity to solve problem sets.
Indicative reading: Political Economics by T. Persson and G. Tabellini (MIT Press 2000); Special Interest Politics by G. Grossman and E. Helpman (MIT Press 2001); Whither Political Economy? Theories, Facts and Issues, by A. Merlo, in Blundell, Richard, Newey, Whitney and Torsten Persson (eds.), Advances in Economics and Econometrics, Vol.1, Cambridge University Press, 2005; Tim Besley and Torsten Persson, Pillars of Prosperity: The Political Economics of Development Clusters, Princeton University Press Torsten Persson & Guido Tabellini, 2005; "The Economic Effects of Constitutions," MIT Press Books, The MIT Press; Positive Political Theory 1, Collective Preference, D. Austen-Smith and J. Banks , Michigan, 2000; Positive Political Theory 2, Strategy and Structure , D. Austen-Smith and J. Banks , Michigan, 2005.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

EC599
Research Paper in Economics

This information is for the 2017/18 session.
Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.
Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted mid-way through the summer term.
Assessment: Dissertation (100%, 10000 words) in the ST.

EH510
Seminar on Modern Economic History

This information is for the 2017/18 session.
Teacher responsible: Prof Juan Roses Vendoiro SAR.5.15
Availability: This course is available on the MPhil/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.
For research students. Also open to other EH graduate students and attended by LSE and other faculty.
Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development during the modern period.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 4 hours of seminars in the ST.

EH518
The Economic History of Firms & Industries Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Gerben Bakker SAR 5.09
Availability: This course is available on the MPhil/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.
For research students. Also open to other EH graduate students and attended by LSE and other faculty.
Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development. Presentations in this seminar relate particularly to economic development issues beyond the N American-European area, including aspects of global economic history.
Teaching: 6 hours of seminars in the MT. 6 hours of seminars in the LT. 6 hours of seminars in the ST.

EH520
Approaches to Economic and Social History

This information is for the 2017/18 session.
Teacher responsible: Prof Mary Morgan SAR 609
Availability: This course is compulsory on the MPhil/PhD in Economic History. This course is not available as an outside option.
This course is restricted to 1st year MPhil students in the Department of Economic History, for whom attendance is compulsory.
Course content: Approaches to Economic and Social History
Teaching: 20 hours of seminars in the MT. 16 hours of seminars in the LT.
Indicative reading: There is no indicative reading list for this course as readings are updated annually to reflect student's interests.
Assessment: Assessment is by two pieces of written work, each approximately 1,500 words, on nominated topics to be submitted by the end of the Lent Term.

EH590
Thesis Workshop in Economic History

This information is for the 2017/18 session.
Teacher responsible: Prof Juan Roses Vendoiro SAR 515
Availability: This course is compulsory on the MPhil/PhD in Economic History. This course is not available as an outside option.
Course content: Thesis workshop in Economic History.
Teaching: 26 hours of seminars in the MT. 34 hours of seminars in the LT. 8 hours of seminars in the ST.
Assessment: This course is not examined.

EU550
Research Workshop in European Studies

This information is for the 2017/18 session.
Teacher responsible: Dr Vassilis Monastiriotis COW 2.05, Dr Waltraud Schelkle COW 1.06, Dr Jonathan White COW 1.09 and Dr Sara Hagemann COW 1.05
Availability: This course is compulsory for all first, second and third year European Institute MPhil/PhD students. The course is also recommended for those second and third year PhD students in the Government Department whose research focuses on European topics.
Course content: Presentation and detailed discussion of PhD theses, outlines and progression. Discussion of thesis chapters and related doctoral research. Discussion of research design and methodology. Practice conference panel sessions. A detailed syllabus is fixed at the start of each term.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.
Assessment: There is no examination for this course. Regular attendance and active participation is required. All students are required: to present at least one substantial chapter/paper draft; to act as a discussant on another paper; and to make a contribution to a conference panel session.

EU555
Political Economy and Public Policy Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Sara Hagemann, Prof Mark Thatcher, Dr Stephen Woolcock and Dr James Morrison
Availability: This course is available on the MPhil/ PhD in European Studies, MPhil/ PhD in Government (Joint) and MPhil/ PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
This workshop is jointly organised by the European Institute, the Government Department and the International Relations Department for research students of these departments working in the general area of political economy and public policy and who have usually passed their first year. Research students from other departments wishing to attend should contact the teachers responsible. It should be noted that the course has three codes-EU555, GV555 and IR555.
Course content: Presentation and intense discussion of thesis outlines, chapters and related work. A detailed programme is fixed at the start of the year. Seminar presentations by outside speakers may be added.
Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

Seminars take place every other week throughout MT and LT. There is also a mini-conference in the ST, organised by the students themselves.
Assessment: There is no examination for this course. Regular attendance and active participation by all students is required. Each attending student has to give at least one presentation of their thesis research.

FM502
Corporate Finance for Research Students

This information is for the 2017/18 session.
Teacher responsible: Professor Michael Burkart, Dr Martin Oehmke, Prof Daniel Paravisini Maggi and Prof Ashwini Agrawal
Availability: This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is available on the MPhil/PhD in Accounting and MRes/PhD in Economics. This course is available with permission as an outside option to students on other programmes where regulations permit. Doctoral students in the Departments of Finance and Economics, and other students with the permission of the PhD Finance Programme Director
Course content: The first half of this course focuses on the theory of corporate finance. The theory half of the course can, in turn, be subdivided into two parts. The first part reviews some of the classical concepts in corporate finance, using tools from game and contract theory to study incentive and information problems at the level of the firm, examining how financial contracts can be designed to mitigate these problems. This part of the course also considers how takeovers and ownership concentration can help to mitigate conflict of interests among insiders and investors in firms. The second part focuses on the theory of financial intermediation. This component reviews classic theories of financial intermediation and will introduce students to some recent work in this field. The second half of the course will consider empirical research in corporate finance. Several lectures will be devoted to research methodologies, such as data collection methods, randomized control trials, the use of instrumental variables in linear regressions, regression discontinuity designs, event studies, and structural estimation techniques. There will also be extensive discussion of current and established topics within empirical corporate finance, such as firm financing decisions, investment behaviour, control transactions, corporate governance, financial intermediation, household finance, and overlapping topics with industrial organization and labour economics.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Indicative reading: Readings will be mainly based on books and journal articles including: Tirole, Jean, The Theory of Corporate Finance, 2006, Princeton University Press. Freixas, X. and Rochet, J.C., The Microeconomics of Banking, 1997, MIT Press. J. Wooldridge, Econometric Analysis of Cross-Section and Panel Data, Cambridge: The MIT Press, 2002. M. Roberts and T. Whited: "Endogeneity in Empirical Corporate Finance," Handbook of the Economics of Finance, vol. 2.
Assessment: Exam (75%, duration: 3 hours) in the main exam period.
Project (25%) in the LT.

FM503
Asset Pricing for Research Students

This information is for the 2017/18 session.
Teacher responsible: Dr Georgy Chabakauri, Prof Ian Martin and Dr Dong Lou
Availability: This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is available on the MPhil/PhD in Accounting and MRes/PhD in Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: The course is divided into two parts relating to asset pricing theory empirical asset pricing. The asset pricing theory half of the course will cover static models of frictionless markets, dynamic discrete-time models, dynamic continuous-time models, and models with frictions. The second half of the course is dedicated to empirical evaluation of asset-pricing models. Representative agent models (with power, habit and recursive preferences) and their application to valuation of equities are covered. Next, no-arbitrage term-structure and option-pricing models are discussed. The class concludes with both equilibrium and reduced-from models of currencies.
Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.
Indicative reading:
- Darrell Duffie Asset Pricing Theory, Princeton University Press
- John Campbell, 1999, Asset prices, consumption, and the business cycle, in J. B. Taylor and M. Woodford, Eds., Handbook of Macroeconomics, Volume 1C, Elsevier Science B.V
- John Cochrane, 2004, Asset Pricing, Princeton University Press
- Kenneth Singleton, 2006, Empirical Dynamic Asset pricing, Princeton University Press

Assessment: Exam (90%, duration: 3 hours) in the main exam period.
Project (10%) in the LT.

FM505
PhD Seminar in Finance

This information is for the 2017/18 session.
Availability: This course is compulsory on the MRes/PhD in Finance (Route 1) and MRes/PhD in Finance (Route 2). This course is not available as an outside option.
Course content: This is a seminar course for PhD students in the early stages of their research to present their work in progress. Outside speakers may also be invited from time to time.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Other meetings to be arranged as necessary.
Assessment: Essay (100%, 10000 words) in the LT.
A 10,000 word essay on a topic to be agreed with the student's supervisor. This essay is to be submitted by the end of the ST of the third year of registration for Route 1 students, and by the end of the ST of the second year of registration for Route 2 students.

GI500
Doctoral Workshop: Department of Gender Studies

This information is for the 2017/18 session.
Teacher responsible: Professor Diane Perrons
Availability: This course is compulsory on the MPhil/ PhD in Gender Studies. This course is not available as an outside option.
Course content: The aim of this course is to give students experience and practice in presenting chapters or papers related to their current research for critical discussion. The focus of the seminar is on the research process and students are expected to present at least once per year. Some summer term sessions may be used for professional training, such as CV preparation, conference paper preparation, publishing and teaching organisation.
Teaching: 15 one-and-a-half hour seminars held fortnightly in the MT, LT and ST. First year students must also audit GI424 Gender Theories in the Modern World (lectures only) and GI402 Gender, Knowledge and Research Practice (full participation in course). All students are expected to participate in courses run by the Department of Methodology, LSE Gender or within the School

as advised by their supervisors. Students are also expected to participate in research seminars and public lectures.
Indicative reading: PhD chapters and articles suggested by students relevant to their topic.
Assessment: No summative assessment, but attendance and participation is considered part of the overall formal assessment of progress, including upgrade at the end of the first year and annually thereafter. Students are normally expected to attend GI500 until the end of their third year.
Students should refer to the PhD handbook for advice on milestones.

GV501
Doctoral Workshop: Political Theory

This information is for the 2017/18 session.
Teacher responsible: Prof Katrin Flikschuh and Prof Christian List
Availability: Compulsory for PhD students in the Government Department specialising in political theory.
Course content: An opportunity for students to present chapters or papers related to their current research for critical discussion.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 4 hours of seminars in the ST.
There are typically 5 sessions in MT and 5 sessions in LT, and a variable number of sessions in ST. The precise schedule will be made available at the start of each term.

GV503
Political Philosophy Research Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Kai Spiekermann
Dr Lucia Rubinelli
Availability: Compulsory for all PhD students in the Government Department specialising in political theory. Other interested students are welcome to attend, if numbers permit.
Course content: Guest speakers present papers and initiate discussion at seminars.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 4 hours of seminars in the ST.
Assessment: No assessment

GV504
Research Methods in Political Theory

This information is for the 2017/18 session.
Teacher responsible: Prof Anne Phillips and Prof Chandran Kukathas
Availability: This course is compulsory on the MRes Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give doctoral students a comprehensive conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields and will prepare doctoral students for choosing and reflecting on their methodological approach. The course runs in concurrence with the Political Philosophy Research Seminar and the Doctoral Workshop in Political Theory, complemented by a reading group in the Lent Term on methodological questions in political theory.
Teaching: 20 hours of workshops in the MT. 10 hours of seminars and 20 hours of workshops in the LT. 4 hours of workshops in the ST.
Formative coursework: Regular presentations in the reading group.
Indicative reading: Some possible choices for the reading group:
- Roxanna Euben, 2008, Journeys to the Other Shore, Princeton University Press.
- Jonathan Lear, 2008, Radical Hope: Ethics in the Face of Cultural Devastation, Harvard University Press.
- Lois McNay, 2014, The Misguided Search for the Political: Social Weightlessness in Democratic Theory, Polity Press.
- J. David Velleman, 2013, Foundations for Moral Relativism, Open Book Publishers.
- Jacob Levy, 2015, Rationalism, Pluralism and Freedom, OUP.
- Michael Freeden, 2013, The Political Theory of Political Thinking, OUP.
- Miranda Fricker, 2007, Epistemic Injustice: Power and the Ethics of Knowing, OUP.
- Philip Pettit, 2012, On the People's Terms, CUP.

Assessment: Essay (50%, 4000 words) in the LT.
Essay (50%, 4000 words) in the ST.

GV510 Not available in 2017/18
Ethnicity and Nationalism Research Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Douglas Hutchinson and Prof John Breuilly
Availability: This course is available on the MPhil/PhD in Government, MRes Political Science and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
For MRes/PhD students specialising in Ethnicity and Nationalism, who have attended an LSE Undergraduate or Master's course in this or a related field, or equivalent at another University. By permission, Visiting Students and others may also participate.
Course content: Critical analysis of recent theories and research in the fields of Ethnicity and Nationalism.
Teaching: 8 hours of workshops in the MT. 20 hours of workshops in the LT.
Students may also attend the lectures in GV479 Nationalism and participate (subject to space) in the seminars in this course.
Formative coursework: There is no formative assessment. This is a reading course.
Indicative reading: This changes each year, depending on the theme chosen.
Assessment: There is no examination for this course.

GV513 Half Unit
Qualitative Methods in the Study of Politics

This information is for the 2017/18 session.
Teacher responsible: Dr Steffen Hertog CON4.01
Availability: This course is available on the MRes Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
Other PhD students must request permission from the class teacher, which is routinely granted subject to capacity.
Course content: This course introduces and critically evaluates, at the advanced postgraduate level, a key range of qualitative techniques and methods in political science. It aims to build students' capability to evaluate such methods and to select, reject, and deploy them in research design and practice.
The course begins with debates over the place of qualitative methods in political science, and the question of how to match ideas to methods. The rest of the course is devoted to exploring a range of qualitative techniques, including case selection, case studies and process tracing, comparisons, interviews and field research, qualitative comparative analysis, and "mixed methods". The content of each week will be integrated as closely as possible with participants' own research projects (even if qualitative work constitutes only a small part thereof). The course is relevant

for political scientists, but also students of development and international relations.
Teaching: 20 hours of seminars in the LT.
Formative coursework: Critiques of articles or books that use the various methodologies discussed in the course.
Indicative reading: G. King, R. Keohane, and S. Verba, Designing Social Inquiry: Scientific inference in qualitative research (Princeton, 1994). Antoinette Burton ed., Archive Stories: Facts, Fictions, and the Writing of History (Duke University Press, 2006). Paul Rabinow, Reflections on Fieldwork in Morocco, first published 1977 (University of California Press, 2007); David Collier and Henry Brady, Rethinking Social Inquiry (Rowman and Littlefield 2010); John Gerring, Case Study Research: Principles and Practices (Cambridge University Press 2007).
Assessment: Essay (30%, 2500 words) in the LT.
Project (70%, 3000 words) in the ST.
(1) A thorough critique of an article which uses one of the methods discussed in the course (2500 words) and (2) EITHER a complete "mock" research design, preferably (although not necessarily) on their own research question (3000 words) OR a discussion of the advantages and limitations of a specific empirical technique, based on a review of at least two pieces of published research (3000 words).

GV514
Political Science and Political Economy Doctoral Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Stephane Wolton CON 5.08
Availability: This course is available on the MPhil/PhD in Government, MRes Political Science and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Mainly for second and subsequent year research students and staff in Government and elsewhere in the School involved in research in political science and/or political economy. First year MRes and research students are welcome to attend.
Course content: The PSPE Doctoral Workshop/Work in Progress Seminar is intended as a setting in which Research Students from the Government Department present and receive feedback on early stage and ongoing research projects. In weeks when research students do not present, LSE PhD students, LSE staff, and visiting scholars from other departments will present. The Seminar aims to foster a strong and lively research community and as such, welcome empirical or theoretical work linked in any way to politics or political economy.
Teaching: 16 hours and 30 minutes of seminars in the MT. 16 hours and 30 minutes of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.
The workshop will meet every week.
Assessment: Not assessed.

GV515 Not available in 2017/18
Researching People, Politics and Organisations

This information is for the 2017/18 session.
Teacher responsible: Prof Michael Bruter CON406, Prof Edward Page CON3.05 and Prof Martin Lodge CON3.08
Availability: This course is available on the MPhil/PhD in Government and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Optional for second and subsequent year research students in Government and elsewhere in the School involved in researching political science topics. First year students may attend if numbers permit.
Course content: The workshop is for all PhD students doing empirical work in political science, whether quantitative, qualitative or mixed, and whatever theoretical approach they take. Around six of the twelve regular sessions are to be devoted to PhD student presentations and concentrate on setting the problems faced and choices made in approaching the empirical research. In the remaining four sessions we will arrange workshops involving outside speakers dealing with crosscutting issues for which we have experienced substantial demand including issues closely related to the empirical analysis of government such as interviewing techniques and the availability and use of international data banks as well as sessions of more general appeal including on how the UK and US job market works, the journal publishing process and presenting at academic conferences and job interviews. If numbers of students mean that we need more than 10 sessions, we will arrange extra late afternoon sessions, up to five throughout the year, to accommodate the crosscutting issues.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Indicative reading: Workshops will tailor reading to the research of the participants.

GV517 Half Unit
Comparative Political Economy: New Approaches and Issues in CPE

This information is for the 2017/18 session.
Teacher responsible: Prof David Soskice and Prof Catherine Boone
Availability: This course is available on the MRes Political Science and PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is open to research students from any of the LSE departments.
Pre-requisites: This course will be open to research students (PhD students) from any of the LSE departments.
Course content: This half-unit reading seminar will survey a set of major topics in the Comparative Political Economy (CPE) of advanced capitalist and developing countries. We will consider different analytic strategies for conceptualizing variation in national economic structure, explaining change in economic structure, and understanding the political causes and effects thereof. The seminar is designed for PhD students (research students) across the School wanting to familiarize themselves with some of the major themes, controversies, and research frontiers in CPE. Our goal is to nurture innovation in doctoral-level CPE research at the LSE.
While situating our analyses in the context of a changing global economy, our focus will be on describing and explaining transformation at the level of nation states. Drivers of change can be found in the locus and organization of political power, in technological change, and/or in the dynamics of capital. Our seminar will explore both productive connections and tensions that emerge across these explanatory models.
Course materials are organized around three major topic areas (though like most else in CPE they are interrelated): redistribution, accumulation, and domestic regimes. A great many questions fit into these areas and our idea is that the seminars should enable students to raise issues related to their research.
Teaching: 30 hours of seminars in the LT.
Formative coursework: For formative work, feedback will be provided on a dissertation proposal or chapter.
Indicative reading: Ben Ansell, From the Ballot to the Blackboard: The Redistributive Political Economy of Education Reform, CUP 2014. Beramendi, Hausermann, Kitschelt and Kriesi eds. The Politics of Advanced Capitalism CUP 2015. Brynjolfsson & McAfee, The Second Machine Age, Norton 2014. VoxEU.org, Secular Stagnation: Facts, Causes and Cures CEPR 2014 (chaps by Summers, Eichengreen, Krugman, Gordon, Glaeser, Mokyr, Crafts) Kimberly Morgan, "Path Shifting of the Welfare State: Electoral

Competition and the Expansion of Work-Family Policies in Western Europe", World Politics, Jan 2013. Ellen Meikins Woods, "Unhappy Families: Global Capitalism in a World of Nation-States," Monthly Review, 51/3 (1999). Acemoglu, Daron, and James A. Robinson, Economic Origins of Dictatorship and Democracy (Cambridge: Cambridge University Press, 2006), chapters 2-3 (pp. 15-87). Ali Kadri, Arab Development Denied: Dynamics of Accumulation by Wars of Encroachment (Anthem 2014). Richard F. Doner, The Politics of Uneven Development: Thailand's Economic Growth in Comparative Perspective (Cambridge U. Press, 2009). Harvey, D. The New Imperialism: Accumulation by Dispossession, Monthly Review, 2004. Jean-Paul Azam, Trade, Exchange Rate and Growth in Sub-Saharan Africa (Cambridge University Press), 2008. Ben Ross Schneider, Hierarchical Capitalism in Latin America: Business, Labor, and the Challenges of Equitable Development (CUP 2013).
Assessment: Coursework (100%, 5000 words) in the LT.
Each student will submit a 20-25 page (double spaced) research paper, dissertation proposal, or draft dissertation chapter as the basis of assessment for this course.

GV555
Political Economy and Public Policy Workshop

This information is for the 2017/18 session.
Teacher responsible: Prof Mark Thatcher, Dr Stephen Woolcock, Dr James Morrison and Dr Sara Hagemann
Availability: This course is available on the MPhil/ PhD in European Studies, MPhil/ PhD in International Relations, MPhil/PhD in Government, MRes Political Science and PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.
This workshop is jointly organised by the European Institute, the Government Department and the International Relations Department for research students of these departments working in the general area of political economy and public policy and who have usually passed their first year. Research students from other departments wishing to attend should contact the teachers responsible.
It should be noted that the course has three codes- EU555, GV555 and IR555.
Course content: Presentation and intense discussion of thesis outlines, chapters and related work. A detailed programme is fixed at the start of the year. Seminar presentations by outside speakers may be added.
Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.
Seminars take place every other week throughout MT and LT. There is also a mini-conference in the ST, organised by the students themselves.
Assessment: There is no examination for this course. Regular attendance and active participation by all students is required. Each attending student has to give at least one presentation of their thesis research.

GV599
Research Prospectus in Political Science

This information is for the 2017/18 session.
Teacher responsible: Dr Kai Spiekermann CON 5.17
Availability: This course is compulsory on the MRes Political Science. This course is not available as an outside option.
For MRes/PhD students in Political Science only.
Course content: A research paper, not to exceed 10,000 words, related to the student's designated major field, to be submitted in August.
Assessment: Research project (100%, 10000 words) in August.

GV5X1
Research Design in Political Science

This information is for the 2017/18 session.
Teacher responsible: Dr Kai Spiekermann CON.517, Dr Joachim Wehner and Mr Thomas Leeper
Availability: This course is compulsory on the MRes Political Science. This course is available as an outside option to students on other programmes where regulations permit.
Course content: The aim of this course is to help PhD students develop a research design. Students will learn how to find their research questions, choose a feasible data collection or modelling strategy, and match data collection and analytic methods to the aims of the PhD project. We also consider the relation of political theory and political science and explore research methodologies in normative theory. This course is therefore designed to be a primer in asking the right questions, exploring the options available to us and understanding the consequences of the design decisions that we make. Accordingly, this course is ultimately about turning good research questions into systematic projects that deliver interesting and worthwhile results. We also debate issues in research ethics and provide advice on publication strategies
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 6 hours of seminars in the ST.
Weeks 6 and 17 are reading and feedback weeks.
Formative coursework: This is a PhD level Research Design course – we do not intend to have additional essays. Students will give presentations and receive extensive feedback on their work in progress. These are part of formative rather than summative assessment and are an important part of professional development. The main learning outcomes are to help the PhD students develop professional research designs.
Indicative reading: King, G., R. Keohane & S. Verba (1994) Designing Social Inquiry. Princeton UP. Box-Steffensmeier, J., H. Brady & D. Collier (eds) (2008) The Oxford Handbook of Political Methodology. OUP. Dunning, T. (2012) Natural Experiments in the Social Sciences: A Design-Based Approach. CUP. Dryzek, J., B. Honig & A. Phillips (eds.) (2008) The Oxford Handbook of Political Theory. OUP.
Assessment: Essay (20%, 2500 words), essay (20%, 2500 words) and research project (60%) in the ST.

GV5X2
Research Paper in Comparative Politics

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Comparative Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.
Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X3
Research Paper in European Politics and Policy

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Comparative Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.
Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X4
Research Paper in Global Politics

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Global Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.
Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X5
Research Paper in Political Science and Political Economy

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Political Science and Political Economy and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. In some instances, students will be expected to complete the assessment method specified by the course convenor where a research paper is not appropriate. Regular attendance and active contributions to the seminars are required.
Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval where applicable.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X6
Research Paper in Political Theory

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Political Theory and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.
Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X7
Research Paper in Public Policy and Administration

This information is for the 2017/18 session.
Teacher responsible: MRes/PhD Political Science Programme Manager
Availability: This course is available on the MRes Political Science. This course is not available as an outside option.
Students on the MRes/PhD in Political Science only.
Course content: Attend a GV-prefixed course from the MSc in Public Policy and Administration and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to

the seminars are required
Teaching: Attend the lectures seminars and reading week activities (if applicable) of the relevant MSc course.
Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.
Assessment: Other (100%).
Either a 5,000 word research paper (for a half-unit course) or a 10,000 word research paper (for a full-unit course), to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GY500
Research Project Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Olmo Silva STC 5.06A, Dr Murray Low STC 5.12 and Dr Benjamin Groom KGS 2.03
Availability: This course is compulsory on the MPhil/PhD Human Geography and Urban Studies, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development and MPhil/PhD in Regional and Urban Planning Studies. This course is not available as an outside option.
Course content: Presentations by research students of aspects of their own research, stressing problems of theory, methodology and techniques.
Teaching: A series of workshops, running throughout the year, organised by each of the three research clusters in the Department of Geography & Environment (Economic Geography; Environmental Economics & Policy; Urbanisation, Planning and Development).
Formative coursework: All students attending this course will be required to present their own research once each year.
Assessment: This course is not intended as preparation for any particular examination.

GY502
Staff / Research Students Seminars

This information is for the 2017/18 session.
Teacher responsible: Prof Simon Dietz TW3 11.01C, Dr Ryan Centner STC.412, Prof Christian Hilber, Dr Felipe Carozzi and Dr Ted Pinchbeck
Availability: This course is compulsory on the MPhil/PhD Human Geography and Urban Studies, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development and MPhil/PhD in Regional and Urban Planning Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.
For all MPhil/PhD students registered in the Department of Geography and Environment and staff. Other interested students may attend.
Course content: Topical seminar series involving presentations by speakers from both inside and outside the Department on aspects of their own research.
Teaching: There are three different seminar series taking place regularly throughout the year, organised by each of the three research clusters in the Department of Geography & Environment. The Economic Geography cluster seminar series is organized in conjunction with the Spatial Economics Research Centre (SERC); the Environmental Economics & Policy cluster seminar series is organized together with the Grantham Research Institute on Climate Change and the Environment; and the Urbanisation, Planning and Development seminar series. The timing and length of each seminar series vary across research clusters.
Urbanisation, Planning and Development Cluster: *8 x one-and-a-half hour seminars in MT and 8 x one-and-a-half hour seminars in LT
Economic Geography Cluster: *10 x one-and-a-half hour seminars in MT and 10 x one-and-a-half hour seminars in LT
Environmental Economics and Policy Cluster: *11 x one-and-a-half hour seminars in MT, LT and ST
*Note that the actual seminar schedule is subject to change due to availability of speakers.
Assessment: This course is not intended as preparation for any particular examination. But, students will find it useful in increasing their awareness of current research and the application of research methods across the discipline.

GY526 Half Unit
Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Antony Millner TW2 Grantham Research Institute and Dr Benjamin Groom STC 420
Availability: This course is available on the MPhil/PhD in Environmental Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.
A strong background in economics is required to take this course for credit. A Master's degree in economics or equivalent will usually be required. Students from the MSc in Environmental Economics and Climate Change and those enrolled on GY426: Environmental and Resource Economics are allowed to audit the course.
Pre-requisites: The course will be core training for the PhD in Environmental Economics. A background in Economics is therefore required to take this course. Students taking the MSc in Environmental Economics and Climate Change or students enrolled on the GY426: Environmental and Resource Economics can audit the course.
Course content: Many of the most important environmental problems require us to choose between policy options with very uncertain, very long-run, consequences. Climate change provides an archetypal example, but this is also true of e.g. biodiversity loss and the decline in global fisheries. This half unit course will introduce you to the decision tools economists use to inform long-run, uncertain, policy choices. We will critically examine these tools, and how they are applied in environmental economics. The aim is to provide you with enough technical background to be able to read current research papers in the field, evaluate their claims for yourself, and begin to formulate your own research questions. Topics will include intertemporal choice and discounting, risk, uncertainty and learning, catastrophes, and some more advanced discussion of dynamic optimization. We will connect some of the economics literature on these topics to parallel discussions in philosophy. We will illustrate the theory we cover with applications to common-pool resource problems, climate change, and renewable and exhaustible resource management.
There will be 5 x 2 hour lectures:
1) Inter-temporal Decision Making;
2) Risk and Uncertainty;
3) Information and Learning;
4) The Economics of Catastrophes;
5) Elements of Dynamic Optimisation.
Teaching: 10 hours of lectures and 5 hours of seminars in the LT.
There will be 5 x 2 hour lectures:
1) Inter-temporal Decision Making;
2) Risk and Uncertainty;
3) Information and Learning;
4) The Economics of Catastrophes;
5) Elements of Dynamic Optimisation.
Formative coursework: Students will be expected to produce 5

problem sets in the LT.
Formative coursework will take the form of a problem set each week.
Indicative reading: Human well-being and the natural environment. Partha Dasgupta, Oxford University Press, 2004; Valuing the Future: Economic Theory and Sustainability. Geoffrey Heal, Columbia University Press. 2000; Pricing the Planet's Future. Christian Gollier, Princeton University Press, 2012; Intergenerational Equity. Geir Asheim, Annual Review of Economics. volumer 2, 197-222; On Second-Best National Saving and Game Equilibrium Growth. E. Phelps and R. Pollak, Review of Economic Studies; The Economics of Risk and Time, Christian Gollier. MIT Press, 2004; Theories of Decision under Uncertainty. Itzhak Gilboa, Econometrics Society Monograph. 2009.
Assessment: Project (100%, 5000 words) in the ST.
The summative assessment project counts for 100% of the overall grade for the course. This project will test understanding of the theoretical methods and their application to real world problems.

HY501
International History Research Student Workshop

This information is for the 2017/18 session.
Teacher responsible: Prof Vladislav Zubok SAR 3.13
Availability: This course is compulsory on the MPhil/ PhD in International History. This course is not available as an outside option.
Course content: The workshop aims to introduce students to effective archival research, issues in the preparation of a thesis and means of launching a career in academic or related fields; and the opportunity to present research in progress.
Students yet to pass their upgrade from MPhil to PhD attend the Introductory Workshop, which meets weekly in the Michaelmas term. Meetings are devoted to research and interviewing techniques and mainly practical issues of historical research. Students due to be upgraded attend the Advanced Workshop held in the Lent and Summer terms, the frequency of meetings depending upon the number of participants. The meetings are intended primarily as a forum for reviewing research in progress, with a view to enabling students to pass their upgrade.
Teaching: 20 hours of seminars in the MT. 4 hours of seminars in the LT.
Assessment: This course is not assessed.

HY509
International History Research Seminar

This information is for the 2017/18 session.
Teacher responsible: Prof Vladislav Zubok SAR 3.13
Availability: This course is available on the MPhil/ PhD in International History. This course is not available as an outside option.
Pre-requisites: Students need to have passed their upgrade to PhD.
Course content: Second, third and fourth year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.
Assessment: This course is not assessed.

HY510
Cold War History Research Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Roham Alvandi SAR M.12
Availability: This course is available on the MPhil/ PhD in International History. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Second and third year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.
Indicative reading: See the webpage for the course for further details.
Assessment: The course is not assessed.

IR501
Methods in International Relations Research

This information is for the 2017/18 session.
Teacher responsible: Dr Mathias Koenig-Archibugi CON 4.08
Availability: This course is compulsory on the MPhil/ PhD in International Relations. This course is not available as an outside option.
Course content: The main objective of this course is to familiarise students with the principal approaches to contemporary research in the main branches of International Relations and to help students identify the appropriate methodology for their project. The course is not a technical course on methods. Unless they have taken courses on methodology and methods in their prior studies, students are encouraged to attend appropriate courses at the Department of Methodology. The course will encourage awareness of the relationship between theory and method in the conduct of research. It will highlight trade-offs when choosing specific methods or research designs. Our aim is to train well-rounded academic professionals, who are able to comprehend, critically interrogate, and engage with scholarship employing diverse methodological toolkits. The course therefore aims to expose students to, and generate awareness of, a variety of research methods in the discipline irrespective of the particular approach employed in their doctoral work. The course will aim to promote an environment of mutual support and encouragement amongst first year research students, maximising the potential for cross fertilization between different projects. The course will develop students' presentational skills in a group setting. In addition, sessions on professional development will be offered in the context of the course.
Teaching: 16 hours and 30 minutes of seminars in the MT. 22 hours and 30 minutes of seminars in the LT.
39 hours of seminars spread over MT and LT, beginning in Week 2 MT. In addition, professional development sessions will be offered.
Formative coursework: Students will be expected to prepare presentations on examples of published research, commenting on the methodology adopted and the way in which it is applied. Moreover, students are required to submit a short written piece describing and justifying the methodological choices for their PhD. The aim is to practice writing about methodological choices with a view to the chapter students are going to submit to their Research Panel in the Summer Term. More indications about presentations and the written piece will be provided at the beginning of the course.
Indicative reading: Janet M. Box-Steffensmeier, Henry E. Brady & David Collier (eds), The Oxford Handbook of Political Methodology (Oxford: Oxford University Press, 2008). Alexander L. George and Andrew Bennett, Case Studies and Theory Development in the Social Sciences (MIT Press, 2005); John Gerring, Social Science Methodology: A Unified Framework, 2nd edition (Cambridge and

New York: Cambridge University Press, 2012). Peregrine Schwartz-Shea and Dvora Yanow, Interpretative Research Design: Concept and Processes (London: Routledge 2012); Patrick T. Jackson, The Conduct of Inquiry in International Relations (Routledge, 2010); Gary Goertz and James Mahoney, A Tale of Two Cultures: Qualitative and Quantitative Research in the Social Sciences (Princeton: Princeton University Press, 2012).
Assessment: This course is not assessed.

IR502
International Relations Theory Research Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Kirsten Ainley CLM.7.07 and Dr George Lawson CLM.5.12
Availability: This course is available on the MPhil/ PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.
Course content: IR502 is part of the research-training programme for all research students working in the area of international theory, broadly defined to include work in rationalist, constructivist and critical traditions. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars developing innovative theoretical approaches to better explain, understand and critique world politics. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. The papers are circulated in advance.
Teaching: 12 hours of seminars in the MT. 15 hours of seminars in the LT.
Assessment: This course is not assessed.

IR504
Security and Statecraft Research Workshop

This information is for the 2017/18 session.
Teacher responsible: Prof Peter Trubowitz CLM.4.05 and Dr Milli Lake
Availability: This course is available on the MPhil/ PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.
Course content: IR504 is part of the research-training programme for all research students working in the area of security and statecraft broadly defined. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area draws on diverse theoretic and methodological approaches, and ranges across levels of analysis, regions, and eras. Specific foci of research include diplomacy, foreign and security relations, foreign policy analysis, comparative strategy, identity and security, war and society, state-building, peace-building and conflict resolution, revolutions, human security and genocide.
Teaching: 12 hours of workshops in the MT. 15 hours of workshops in the LT.
Assessment: This course is not assessed.

IR507
International Institutions, Law and Ethics Research Workshop

This information is for the 2017/18 session.
Teacher responsible: Prof Karen Smith CLM.4.09
Dr Uli Sedelmeier CLM.5.06
Availability: This course is available on the MPhil/ PhD in International Relations. This course is not available as an outside option.
It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.
Course content: IR507 is part of the research-training programme for all research students working on the theory, history or practice international institutions, international law and ethics. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area runs from the study of intergovernmental and nongovernmental institutions and global governance, to the politics of international law, to the ethical and normative dimensions of global politics. It includes, but is not limited to, the study of international institutions such as the European Union, North Atlantic Treaty Organisation, and the International Criminal Court and international issues such as human rights, humanitarian intervention, climate change, and international crime.
Teaching: 12 hours of seminars in the MT. 15 hours of seminars in the LT.
Assessment: This course is not assessed.

IR509
International Relations Research Design Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Tomila Lankina (for first year research students),
Professor Margot Light (for second year research students).
Availability: This course is compulsory on the MPhil/ PhD in International Relations. This course is not available as an outside option.
This workshop is compulsory for all first year and second year International Relations Department (IRD) research students and open to other interested IRD research students.
Course content: In the first year, this workshop will address issues concerning the formulation and design of the PhD research project. Its principal objective is to assist first year research students in designing a well-thought out and manageable thesis. It seeks to do so by providing a forum in which first year students discuss their research topic, the particular set of questions they intend to address and the methods they wish to use with other members of the workshop. Its aim is to provide students with constructively critical observations about their research project and the problems they may confront. It also seeks to promote an esprit d'corps amongst the first-year research students by familiarising them with the work of their peers.
In the second year, the focus will be on preparing students for their upgrade Research Panel in the summer. Exactly how the workshop will proceed will be decided by the members in their first session, but the aim is to give students the opportunity to update and refine their research proposals, get peer reactions to the draft chapters

on which the decision to upgrade will be based, and also to talk to each other about the common problems they face. There will also be some sessions to consider such 'professional concerns' as the balance to be struck between teaching and research, the role of presentations at conferences, seminars and similar professional gatherings.
Teaching: In the first year, the workshop will meet starting in week 1 of Lent Term. There will be initial discussions of various theoretical traditions and different approaches to research design within International Relations. All first-year students are required to give a presentation outlining their research to the seminar, a copy of their research proposal (of no more than 5,000 word) being circulated in advance to the workshop participants. There will be two presentations per meeting. Students must also attend IR501 Research Methods Training Seminar and participate in at least one of the Department's other research workshops.
In the second year, the workshop will meet starting in week five of the MT. All members of the workshop are required to present one or more draft chapters of their theses. They will need to provide a copy of the chapter for prior circulation to the workshop participants. Students must also participate in at least one of the Department's other research workshops.
Assessment: This course is not assessed.

IR555
International Political Economy Research Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Stephen Woolcock CLM.6.13 and Dr James Morrison 95 ALD1.14
Availability: This course is available on the MPhil/ PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.
It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.
This workshop is run with the Government Department and European Institute (GV555 and EU555).
Course content: IR555 is part of the research-training programme for all research students working in the area of international political economy: the relationship between states and markets in a global context. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area works at multiple levels of analysis and draws on an array of theoretic and methodological approaches from several disciplines. Both historical and contemporary questions are addressed across a range of issues including: trade, migration, global environmental politics, international economic organisations, economic diplomacy, international finance, foreign investment, exchange rates, and monetary relations.
Teaching: 12 hours of seminars in the MT. 15 hours of seminars in the LT.
Assessment: This course is not assessed.

LL500
Doctoral Research Seminar

This information is for the 2017/18 session.
Teacher responsible: Prof Susan Marks NAB.7.14
Availability: This course is compulsory on the MPhil/ PhD in Law. This course is available on the MPhil/PhD in Law (Socio-Legal Theory). This course is not available as an outside option.
Course content: This course aims to equip students with the skills required to undertake advanced legal research. The focus in the MT is on methodological and theoretical issues arising in legal scholarship. The focus in the LT is on the various stages of the PhD process, and on preparation for professional life in academic law beyond the PhD. In the ST an Upgrade Conference is held at which first year research students present their work-in-progress.
Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.
There will be a Reading Week in week 6 of MT and LT
We have an Upgrade Conference in ST. Length of conference is determined by the number of students in that year.
Assessment: There are no examination arrangements. However, attendance in the MT is compulsory for first year research students, and research students in other years are encouraged to attend.

MA500
Mathematics: Seminar on Combinatorics, Games and Optimisation

This information is for the 2017/18 session.
Teacher responsible: Dr Julia Boettcher, Dr Laszlo Vegh and Dr Paul Duetting
Availability: This course is compulsory on the MPhil/ PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Other members of the research community are welcome to attend.
Course content: The seminar ranges over many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics, operations research and game theory. The seminar is regarded as an important part of research students' formal training and they are expected to attend and contribute.
Teaching: 33 hours of seminars and 33 hours of seminars in the MT. 33 hours of seminars and 33 hours of seminars in the LT. 21 hours of seminars and 21 hours of seminars in the ST.

MA501
Research Student Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Peter Allen COL 4.05, Dr Christoph Czichowsky COL 3.11, Dr Pavel Gapeev COL 4.10, Prof Jozef Skokan COL 3.04, Dr Laszlo Vegh NAB.3.05, Dr Julia Boettcher COL 4.03, Dr Paul Duetting COL 3.08 and Dr Albina Danilova COL 4.09
Availability: This course is compulsory on the MPhil/ PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.
Other members of the research community are welcome to attend.
Course content: The seminars range across many areas of pure, applied and financial mathematics. The emphasis is on topics in discrete mathematics, algorithms, operations research, game theory, financial mathematics and control theory. The seminars are regarded as an important part of research students' formal training and they will all be expected to attend and contribute. Throughout the academic year, students are also invited to give presentations. There are additional reading groups aimed at students working in financial mathematics and discrete mathematics. These are compulsory for students working in this area but other students of the MPhil/PhD in Mathematics are welcome to attend.
See http://www2.lse.ac.uk/maths/Seminars/Financial_Mathematics_Reading_Group.aspx and http://www.lse.ac.uk/maths/Seminars/PhD-Seminar-on-Combinatorics,-Games-and-Optimisation.aspx
Teaching: PhD Seminar on Combinatorics, Games and

Optimisation (MA501.1): 11 one-and-a-half-hour seminars in the MT and LT. 7 one-and-a-half-hour seminars in the ST. LGSMF Portfolio Optimisation Seminar (MA501.2): 11 three-hour seminars in the LT. 7 three-hour seminars in the ST. Financial Mathematics Reading Group Seminar (MA501.3): 11 three-hour seminars and 11 one-hour seminars in the MT and LT. 7 three-hour seminars and 7 one-hour seminars in the ST. Discrete Mathematics Reading Group Seminar (MA501.4): 11 three-hour seminars in the MT and LT. 7 three-hour seminars in the ST. Approximately 80-90 meetings of between 1 and 3 hours throughout the MT, LT and ST, dependent on speakers. See http://www2.lse.ac.uk/maths/Seminars/Research_Seminars.aspx for schedule and more details.

MC500
Research Seminar for Media, Communications & Culture

This information is for the 2017/18 session.
Teacher responsible: Prof Sonia Livingstone TW2.7.01L
Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/Phd in Media and Communications. This course is not available as an outside option. For Research Students. The course is compulsory for students in the first and second years of the Doctoral Programmes in the Department of Media and Communications. All Research Students in the Department are welcome and encouraged to attend.
Course content: The aim of the course is to raise awareness of theoretical, conceptual and methodological issues in the interdisciplinary field of media and communications research and to develop students skills with respect to theory building, research design and implementation. The course focuses, in particular, on the key conceptual issues and analytical strategies required in media and communication research, with special reference to the study of the changing environment of media production, dissemination and consumption, under conditions of globalization and digitization of information
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
Compulsory for first and second year students and open to others. There may be additional seminars or workshops in Summer Term.
Indicative reading:
- Manuel Castells, Communication Power, OUP, 2009;
- Lilie Chouliaraki (ed), Self-mediation: New media, citizenship and civil selves, Routledge, 2012;
- Lilie Chouliaraki, The Spectatorship of Suffering, Sage, 2006;
- Peter Dahlgren, Media and civic engagement: citizens, political communication, and democracy Cambridge 2008;
- Klaus B. Jensen (ed), A Handbook of Media and Communication Research, Routledge, 2002;
- Leah A Lievrow and Sonia Livingstone (eds.) The Handbook of New Media (updated edition), Sage, 2006;
- Robin Mansell, Imagining the Internet, OUP, 2012;
- Robin Mansell, Chrisanthi Avgerou, Danny Quah and Roger Silverstone (eds.), Oxford Handbook of Information and Communication Technologies, Oxford, 2007;
- Roger Silverstone, Media and Morality: The Rise of the Mediapolis, Polity, 2006.
- Other reading will be given as appropriate during the course.

Assessment: This course is based predominantly on student presentations on their work in progress. Students are expected to use MC500 seminars as a key resource towards their Upgrade document at the end of their 1st year of study and towards the submission of their formative assessment document at the end of their 2nd year of study.

MC5M2
Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2017/18 session.
Teacher responsible: Dr Jean-Christophe Plantin TW3.7.01i
Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society. This course is available on the MPhil/PhD in Media and Communications. This course is not available as an outside option.
Course content:
i. Principles of Research in Media and Communications: a series of lectures offered by Department of Media and Communications faculty in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.
ii. Principles of Social Research: Workshop (three hours) x 10 Lent Term (5 comprised of two x 1.5 hour sessions and 5 comprised of one x 3 hour sessions) offered by Department of Media and Communications faculty in Lent Term. Students are required to participate in all ten workshops.
iii. Principles of Social Research Analysis: Students have to take at least one quantitative analysis course offered by the Department of Methodology (MY551M is the basic option). In addition, students need to take either another quantitative or a qualitative analysis course offered by the Department of Methodology. The combination of courses must be approved by the supervisor and discussed with the MC5M2 convenor.
Teaching:
i. Principles of Research in Media and Communications: Lecture (one hour) x 10 Michaelmas Term; Lecture on Writing Methodological Chapters and Papers (one hour) x 1 Lent Term.
ii. Principles of Social Research: Workshop (three hours) x 10 Lent Term (each comprised of two 1.5 hour sessions).
iii. Principles of Social Research Analysis: Quantitative analysis course in Michaelmas Term: Lecture (two hours) x 9 Michaelmas Term; Computer class (one hour) x 9 Michaelmas Term; Quantitative or Qualitative Analysis course in Lent Term (Varies depending on the course): Lecture (two hours) x 9 Lent Term; Computer class or Seminar (one hour) x 9 Lent Term.
Formative coursework:
i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words in week 11 of MT.
ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.
iii. Principles of Social Research Analysis: Most quantitative analysis courses require weekly assignments. The qualitative analysis courses vary in their formative assessment.
Indicative reading:

- Silverman, D. (2013). Doing Qualitative Research: A Practical Handbook. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (34%, duration: 2 hours) in the main exam period.
Coursework (66%) in the ST.
Description of assessment:
1 Coursework: One written assignment of either 5,000 or 7,000 words to be submitted in Summer Term, depending on the MY courses selected.
2 One two-hour examination in Summer Term relating to Quantitative Analysis (e.g. MY551) and one two-hour examination in Summer Term if another quantitative analysis course is taken (see Department of Methodology course guides).
Note: Summative assignments differ depending on the components of the methodological training taken by the students. Students must pass all components of MC5M2.

MG500
Information Systems PhD Seminar Series and Workshops

This information is for the 2017/18 session.
Teacher responsible: Prof Jannis Kallinikos NAB3.24 and Prof Chrisanthi Avgerou
Availability: This course consists of a series of seminars and workshops at which PhD students present their work in progress.
Course content: This seminar series provides a forum for research students in management to present work in progress. Outside speakers may be invited from time to time.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 20 hours of seminars in the ST.
For 2015/16 this will consist of a weekly, two hour, student-led seminar in weeks 2-9 of all three terms. There will also be one full-day PhD workshop with a guest speaker MT & LT. Details of these workshops are listed on the ISIG News and Events page and emailed to students and staff as they are arranged.
Assessment: There is no formal assessment but all students are expected to attend the one day workshops and must email the course teacher to explain any absences. Attendance at the weekly seminars is more flexible but students should make an effort to attend as many as possible and to be involved in the organisation of at least one per year.

MG501 Not available in 2017/18
Employment Relations and Organisational Behaviour Seminar

This information is for the 2017/18 session.
Teacher responsible: Prof David Marsden NAB 4.22 and Dr Daniel Beunza NAB 4.27
Course content: The PhD seminar in Employment Relations and Organisational Behaviour draws upon organisational, psychological and employment relations theories to advance an understanding of individual, group and firm behaviour. The course covers a number of issues at an advanced level, and introduces students to emerging topics in various fields such as Organisational Behaviour and Employment Relations, including employment systems, employee voice, status, trust, social exchange theory, organisational justice, ethics and ethical climate, and corporate social responsibility. The seminar discussions will be led by a combination of faculty at the EROB group within LSE and prestigious visiting faculty. Throughout the course, students will be exposed to the methodological issues related to conducting research in an up-and-coming area where the research questions may be less known. These methodological issues will provide continuity across the substantively different topics featured on the course.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.
Indicative reading: The following reading list covers six weeks of seminars. All other readings will appear on Moodle. Anderson, J. C., & Gerbing, D. W. (1988). Structural Equation modeling in practice: A review and recommended two-step approach.Psychological Bulletin, 103, 411-423. Bentler, P. M., & Chou, C. (1987). Practical issues in structural modelling. Sociological Methods and Research, 16, 78-117. MacCallum, R. C., & Austin, J. T. (2000). Applications of structural equation modeling in psychological research. Annual Review of Psychology, 51, 201-226. Mueller, R. (1997). Structural equation modeling: Back to basics. Structural Equation Modeling, 4, 353-369. Chen, F. F., & West, S. G. (2008). Measuring individualism and collectivism: The importance of considering differential components, reference groups, and measurement invariance. Journal of Research in Personality, 42, 259-294. Jackson, D. L., Gillaspy, J. A., Jr., & Purc-Stephenson, R. (2009). Reporting practices in confirmatory factor analysis: An overview and some recommendations. Psychological Methods, 14, 6-23. Schmitt, N., & Kuljanin, G. (2008). Measurement invariance: Review of practice and implications. Human Resource Management Review, 18, 210-222. Vandenberg, R. J., & Lance, C. E. (2000). Assessment: Essay (100%, 8000 words) in the ST.

MG502 Half Unit Not available in 2017/18
Foundations of Social Research in Information Systems: Paradigms and Traditions

This information is for the 2017/18 session.
Teacher responsible: Prof Jannis Kallinikos NAB3.24
Availability: This course is compulsory on the MPhil/ PhD in Information Systems. This course is available with permission as an outside option to students on other programmes where regulations permit.

Compulsory for MPhil/PhD Informations Systems and Innovation students in their first year. Students from related PhD programmes who are interested in epistemological paradigms may be able to join the course with the teacher's permission.
Course content: The course introduces the foundations of social research and the key issues concerning the status of knowledge and the forms by which it is acquired. The course deals with the principal paradigms/traditions in the philosophy of science and epistemology and the answers they have provided to the basic questions concerning the status of knowledge claims and the forms by which valid knowledge claims can be made. The main focus of the course concerns the ways by which these key epistemological paradigms have been applied in the fields of Information Systems and Organization Studies. The course is structured around the following basic epistemological paradigms: Positivism Critical Realism Constructivism Hermeneutics, Phenomenology Critical Theory Structuralism Postmodernism
Teaching: 2 hours of lectures, 9 hours of lectures and 9 hours of seminars in the MT.
Indicative reading: Archer, M. et al. (eds.), (1998) Critical Realism, Readings. London: Routledge; Dreyfus, H & Rabinow, P. (1982) Michel Foucault: Beyond Structuralism and Hermeneutics. London: Harvester; Crotty, M. (1998), The Foundations of Social Research: Meaning and Perspective in the Research Process. London: Sage; Lakatos, I. & Musgrave, A. (eds.) (1970) Criticism and the Growth of Knowledge. Cambridge: Cambridge University Press; Morgan, G. (1983) Beyond Method: Strategies for Social Research. London: Sage; Myers, M.D. & Avison, D. (eds.) (2002) Qualitative Research in Information Systems. London: Sage.
Assessment: Essay (100%, 7000 words) in the LT.
An essay of between 5,000-7,000 words to be submitted by the end of March.

MG503 Half Unit
Interpretations of Information

This information is for the 2017/18 session.
Teacher responsible: Prof Jannis Kallinikos NAB3.24, Dr Edgar Whitley and Dr Carsten Sorensen
Availability: This course is compulsory on the MPhil/ PhD in Information Systems. This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: Other MSc students may follow this course but a good knowledge of information technology is required.
Course content: The course explores the theoretical foundations of information and the technological and institutional processes by which information is increasingly becoming a pervading and crucial element of organizational and economic life. A central theme of the course is how information and the technologies by which it is produced and disseminated are involved in the constitution and coordination of organizational operations and the control of professional practices and organizational outcomes.
Teaching: 20 hours of seminars in the LT.
Indicative reading: Indicative readings are given below. A full reading list will be provided at the start of the course.
Borgmann A (2010) Reality and technology. Cambridge Journal of Economics 34(1), 27-35. Henderson RM and Clark KB (1990) Architectural Innovation: The Reconfiguration of Existing Product Technologies and the Failure of Established Firms. Administrative Science Quarterly 35(1), 9-30. Kallinikos J, Aaltonen A and Marton A (2012) The Ambivalent Ontology of Digital Artifacts. MIS Quarterly 37(2), 357-370. Mathiassen L and Sørensen C (2008) Towards A Theory of Organizational Information Services. Journal of Information Technology 23(4), 313-329. Tilson D, Lyytinen K and Sørensen C (2010) Research commentary: Digital Infrastructures: The Missing IS Research Agenda. Information Systems Research 21(5), 748–759. Urry J (2000) Mobile Sociology. British Journal of Sociology 51(1), 185-203. Weick KE (1993) The collapse of sensemaking in organizations: The Mann Gulch disaster. Administrative Science Quarterly 38, 628-652. Yoo Y, Boland RJ, Lyytinen K and Majchrzak A (2012) Organizing for Innovation in the Digitized World. Organization Science 23(5), 1398-1408.
Assessment: Essay (100%, 7000 words).
An essay of 7,000 words (100%).

MG505 Half Unit Not available in 2017/18
Contemporary Topics in Organisational Behaviour

This information is for the 2017/18 session.
Teacher responsible: Dr Shoshana Riza
Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Information Systems and Innovation). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Advanced course on current topics in organisational behaviour. Sessions are led by different faculty members from the department with the purpose of introducing and discussing contemporary topics in the field of organisational behaviour, typically drawn from the faculty members' research expertise. Throughout the course, students are exposed to the methodological and conceptual issues related to conducting research in contemporary organisational topics.
Teaching: 30 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
The goal of this assignment is to enable students to begin thinking through the logic of critically evaluating research areas and suggesting future research.
Indicative reading: Each faculty presenter will select his/her own reading list, which will rely heavily on journal articles (for example, Academy of Management Review, Journal of Applied Psychology, Journal of Organisational Behaviour). An extensive reading list is provided at the start of the course. Indicative readings for one faculty presenter's session include: Berg, J. M., Grant, A. M., & Johnson, V. (2010). When callings are calling: Crafting work and leisure in pursuit of unanswered occupational callings. Organization Science, 21(5), 973-994. Bunderson, J. S., & Thompson, J. A. (2009). The call of the wild: Zookeepers, callings, and the double-edged sword of deeply meaningful work. Administrative Science Quarterly, 54(1), 32-57. Dobrow, S. R. (2013). "Dynamics of calling: A longitudinal study of musicians." Journal of Organizational Behavior, 34(4), 431-452. Dobrow, S. R., & Tosti-Kharas, J. (2011). Calling: The development of a scale measure. Personnel Psychology, 64(4), 1001-1049. Wrzesniewski, A., McCauley, C. R., Rozin, P., & Schwartz, B. (1997). Jobs, careers, and callings: People's relations to their work. Journal of Research in Personality, 31(1), 21-33.
Assessment: Coursework (100%, 5000 words) in the MT.
Summative assessment will be based on a conceptual paper (5,000 words), which will be supported by one formative assessment.

MG506 Half Unit Not available in 2017/18
Micro Organisational Behaviour in Organisations

This information is for the 2017/18 session.
Teacher responsible: Dr Uta Bindl NAB 4.01
Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Information Systems and Innovation). This course is available with permission

as an outside option to students on other programmes where regulations permit.
Course content: This course seeks to provide PhD students with the underlying foundations of understanding Organisational Behaviour. Specifically, this course will introduce students to psychology theories and research, with a focus on micro-level research. Sessions are highly interactive, such that students are required to critically engage with Organisational Behaviour Theory, as well as to start familiarising themselves with formulating research-related questions in Organisational Behaviour.
Teaching: 30 hours of seminars in the MT.
Formative coursework: Formative feedback on the individual presentation, as well as on the assignment, will be provided throughout the course, such that students will informally present work in progress on the individual presentation, as well as on the assignment, during the sessions.
Indicative reading: The course relies heavily on journal articles (for example, Academy of Management Journal, African Journal of Management, Journal of Applied Psychology, Journal of Organizational Behaviour). The focus of papers will be on introducing the core areas of Micro Organisational Behaviour in Organisation, as well as will emphasise on how to formulate 'relevant' research questions and to build conceptual arguments in Organisational Behaviour. The readings will also cover a balanced mix between conceptual papers, as well as different types of empirical papers, to encourage a familiarisation of students with different research approaches of discussing Micro Organisational Behaviour. Indicative readings include: Barsade, S. G., & Gibson, D. E. (2007). Why does affect matter in organizations? Academy of Management Perspectives, 21(1), 36-59. Davis, M.S. (1971). That's Interesting: Towards a Phenomenology of Sociology and a Sociology of Phenomenology, Phil. Soc. Sci., 1:4, 309-344. Hewlin, P. F. (2009). Wearing the cloak: Antecedents and consequences of creating facades of conformity. Journal of Applied Psychology, 94, 727-741. Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. Journal of Applied Psychology, 87, 765-780. Mathieu, J., Maynard, M. T., Rapp, T., & Gilson, L. (2008). Team effectiveness 1997-2007: A review of recent advancements and a glimpse into the future. Journal of Management, 34, 410-476. Parker, S. K. (2014). Going Beyond Motivation: Work Design for Development, Health, and Ambidexterity. Annual Review of Psychology, 65(1), 661-691. Scott, S. G., & Bruce, R. A. (1994). Determinants of innovative behavior: A path model of individual innovation in the workplace. Academy of Management Journal, 37(3), 580-607. Tett, R.P. and Burnett, D.D. (2003). A personalty trait-based interactionist model of job performance Journal of Applied Psychology, 88(3), 500-517. Williams, M. L., McDaniel, M., & Nguyen, N. T. (2006). A meta analysis of the antecedents and consequences of pay level satisfaction. Journal of Applied Psychology, 91, 392-413.
Assessment: Essay (60%, 2500 words) and presentation (40%) in the MT.

MG507 Half Unit Not available in 2017/18
Organisational Behaviour in Context

This information is for the 2017/18 session.
Teacher responsible: Dr Chia-Huei Wu NAB 4.27 and Dr Tara Reich NAB
Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: MG505 Contemporary Topics in Organisational Behaviour and MG506 Micro Organisational Behaviour in Organisations.
Course content: This course will focus on the influence of context (e.g. time, organisational structure, and culture) in shaping organisational behaviour. It will broaden students' scope of learning by enhancing their understanding of different ways that context can influence employees' behaviour in work settings and offering opportunities to apply their learning to generate knowledge for their own future OB research.
Teaching: 30 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 presentation in the MT.
Students will present their ideas for how to incorporate context (in one of the forms discussed in the course) into their area of research interest. The presentation supports ILO #4. Students will receive feedback from their peers as well as the course instructor(s) (supporting ILO #3), which they will then use to develop their ideas into the summative paper.
Indicative reading: The course relies heavily on journal articles (for example, Academy of Management Review, Journal of Applied Psychology, Journal of Organizational Behaviour). An extensive reading list is provided at the start of the course. Indicative readings include: Johns, G. (2006). The essential impact of context on organizational behavior. Academy of Management Review, 31, 386-408. Johns, G. (2001). In praise of context. Journal of Organizational Behavior, 22, 31-42. Meyer, R. D., Dalal, R. S., & Hermida, R. (2010). A review and synthesis of situational strength in the organizational sciences. Journal of Management, 36, 121-140. Tett, R.P. and Burnett, D.B. (2003). A personality trait-based interactionist model of job performance. Journal of Applied Psychology, 88(3): 500–17. Hershcovis, M. S., & Reich, T. C. (2013) Integrating workplace aggression research: Relational, contextual, and method considerations. Journal of Organizational Behavior, 34: S1, pp. S26–S42. Giumetti, G. W., Hatfield, A. L., Scisco, J. L., Schroeder, A. N., Muth, E. R., & Kowalski R. M. (2013). What a rude e-mail! Examining the differential effects of incivility versus support on mood, energy, engagement, and performance in an online context. Journal of Occupational Health Psychology, 18, 297-309.
Assessment: Essay (100%, 5000 words) in the MT.
Summative assessment will be based on a conceptual paper (5,000 words), which will be supported by two forms of formative assessment.
Conceptual paper: Students will be required to identify a specific topic of organisational behaviour as well as at least one form of context they plan to address. Students will be expected to (1) describe the importance of the topic, (2) review the existing literature in the area, (3) elaborate why focusing on the role of context can advance the existing understanding, (4) elaborate the theories/models/research approaches that they have chosen to adopt to understand the role of context for the selected topic, (5) propose a new perspective or a conceptual model based on their selected theory/model/research approach and finally (6) discuss the potential contributions of their conceptual work and make suggestions for future research.
The emphasis of the conceptual paper will be on applying theories/models/research approaches taught in the course to generate insights into an existing OB topic by considering the influence of context. Students will be expected to draw on a number of individually-sourced scholarly readings, synthesise theoretical frameworks and empirical findings when needed, and develop a new perspective to understand the selected topic. The conceptual paper will be due at the start of LT week 1, and will be supported by two formative academic journal peer review sessions (weeks 9 and 10) as well as a presentation session (week 11).

MG512 Half Unit Not available in 2017/18
Marketing: Consumer Behaviour

This information is for the 2017/18 session.
Teacher responsible: Prof Amitav Chakravarti NAB 5.13
Availability: This course is compulsory on the MRes/PhD in Management (Marketing). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course objective is to familiarize students with research in cognitive psychology, social psychology, and marketing on information processing and judgment and decision making related topics to better understand and develop marketing strategies that affect consumer behavior. There are two main aims of this course: (1) to give students a strong foundation for critical thinking in the area of consumer behavior, and (2) to enable students to conceptualize, develop and operationalize research ideas. Therefore, the focus is on understanding current theoretical and methodological approaches to various aspects of consumer behavior, as well as advancing this knowledge by developing testable hypotheses and theoretical perspectives that build on the current knowledge base. This means that students have to actively read prior research in different areas – try to understand the authors' ideas and develop the habit of constructive criticism of the research. To encourage this habit, the role of author of certain papers may be assigned to some students in the class and the role of reviewer assigned to others.
Teaching: 30 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay and 1 essay in the MT.
Indicative reading:
- Higgins, E. T., & Kruglanski, A. W. (Eds.). (2007). Social psychology: Handbook of basic principles (2nd ed.). New York: Guilford Press.
- Cognitive Psychology: Mind and Brain, Edward E. Smith, Columbia University, Stephen M. Kosslyn, Stanford University, 2007 | Pearson
- Bazerman, Max H. (1994), Judgment in Managerial Decision Making, John Wiley & Sons.
- Russo, J.E. and P.J.H. Shoemaker (1989), Decision Traps, Doubleday.
- Thaler, Richard H. (1992), The Winner's Curse: Paradoxes and Anomalies of Economic Life, Princeton University Press.

Assessment: Essay (40%, 2500 words), essay (40%, 2500 words), essay (5%, 1200 words), essay (5%, 1200 words), essay (5%, 1200 words) and essay (5%, 1200 words) in the MT.
Participants will be required to (a) write 4 short, 2-page critiques of a paper from the reading lists in order to demonstrate their understanding of an area/topic, and (b) develop 2 new research ideas (throughout MT) that will help participants advance the current state of knowledge. An additional preliminary critique paper and research idea paper will be used as formative assessments. The latter two new research idea papers, weighted 40% and 40% respectively, will be used as the summative assessment components. The balance 20% of the grade will be based on the last 4 short, 2-page critiques of specific papers in the reading list.

MG513 Half Unit Not available in 2017/18 Marketing: Quantitative Modelling

This information is for the 2017/18 session.
Teacher responsible: Prof Om Narasimhan NAB 5.06
Availability: This course is compulsory on the MRes/PhD in Management (Marketing). This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Requiring some understanding of calculus, probability, statistics and matrix algebra, the course is designed to develop the quantitative foundations for marketing decisions. Both theoretical models which help analyse marketing issues, and decision-support models will be covered. Features of the course include a focus all marketing decisions: product, pricing, advertising, salesforce and distribution. All necessary analysis tools from resource allocation models to NEIO (New Empirical Industrial Organization) models will be discussed. A comprehensive set of exercises will enable students to test their knowledge of models and their understanding of the material discussed in class. The course will also incorporate recent research findings in all aspects of marketing including online marketing and social media marketing.
Teaching: 30 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 1 essay and 1 essay in the LT.
Indicative reading:
- Lilien GL, Kotler Ph, Moorthy KS. Marketing Models. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. Building Models for Marketing Decisions. Kluwer Academic Publishers: Dordrecht / Boston 2000.
- Hanssens DM, Parsons LJ, Schultz RL. Market Response Models: Econometric and Time Serie Analysis. Kluwer Academic Publishers, Boston 2001.
- Lilien GL, Rangaswamy A. Marketing Engineering, 2nd edition. Prentice Hall: Upper Saddle River, NJ, 2003.
- Little JDC. Models and Managers: The Concept of a Decision Calculus. Management Science 1970; 16: B466-B485.

Assessment: Essay (40%, 2500 words), essay (40%, 2500 words), essay (5%, 1200 words), essay (5%, 1200 words), essay (5%, 1200 words) and essay (5%, 1200 words) in the LT.
Participants will be required to write 4 short 2-page critiques of a paper from the reading lists in order to demonstrate their understanding of an area/topic (these critiques might involve the analysis of a dataset as well), and (b) develop 2 new research ideas (throughout MT) that will help participants advance the current state of knowledge. An additional preliminary critique paper and research idea paper will be used as formative assessments. The latter two new research idea papers, weighted 40% and 40% respectively, will be used as the summative assessment components. The balance 20% of the grade will be based on the last 4 short, 2-page critiques of specific papers in the reading list.

MG515 Half Unit Not available in 2017/18 Social Organisation

This information is for the 2017/18 session.
Teacher responsible: Prof Harm Barkema
Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available with permission as an outside option to students on other programmes where regulations permit.
Pre-requisites: MG506 Micro Organisational Behaviour in Organisations ('M-OB') and MG514 Macro OB: Organisation and Management Theory.
Course content: Management research – and more specifically, OB and OMT – in the 21st century, is broadening its focus at an increasing pace (as measured by the number of papers recently published in our top journals, and 'in press'), by also studying organizations with social goals. For instance, corporations with social goals (e.g., CSR programs, supply chains with social goals), social enterprises or entrepreneurship under broader social programs (e.g., to increase employment, or women empowerment), NGOs, charities, social movements, incubators with social goals, and – at a more micro-level – 'calling' of workers, moral contracting and ideological currency. The course helps PhD students to understand key theoretical and methodological aspects of this emerging research, including of non-Western contexts, and to develop the insights and skills to formulate their own research agenda in this domain.
Teaching: 15 hours of lectures and 15 hours of seminars in the MT.
Formative coursework: Students will be expected to produce 1 essay in the MT.
The formative assignment will be to develop an "outline" version of the conceptual paper to be written for the summative assignment (rather than a full write-up). The goal of this assignment is to enable students to begin thinking through how to formulate a research agenda in this domain. We will devote our last course

session to debriefing and providing peer feedback on these outlines.
Indicative reading: Each faculty presenter will select his/her own reading list, which will rely heavily on journal articles (for example, Academy of Management Journal, Academy of Management Review, Journal of Applied Psychology). An extensive reading list is provided at the start of the course.
Assessment: Coursework (100%, 5000 words) in the MT.

MG576 Half Unit Not available in 2017/18
Corporate Social Responsibility and International Labour Standards

This information is for the 2017/18 session.
Teacher responsible: Prof David Marsden NAB 4.22
Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.
Course content: This course examines the human resource management (HRM) and employment relations (ER) strategies of global corporations, with the aim of understanding both the causes of different strategic choices and the consequences of these strategies for diverse stakeholders. It takes the perspective that HRM/ER strategies are influenced by a range of variables, including internal business strategy and resources, as well as external factors such as national legislation, business systems and culture, and regional and global institutions.
The lecture and group-work content are the same as for MG476, but with a special tutorial-style additional programme of work for the doctoral students taking this elective. Assessment will be by the summer examination for MG478 and a 3500 word extended essay.
Teaching: 10 hours of lectures, 15 hours of seminars and 7 hours of help sessions in the LT.
Lectures: 10 hours
Group work: 15 hours (Auditing MG478 classes)
Doctoral tutorials: 7 hours (two-weekly intervals)
Formative coursework: Students will be expected to produce 1 essay in the LT.
Indicative reading: Vogel, D. (2005) The Market For Virtue: The Potential and Limits of Corporate Social Responsibility, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) The Oxford Handbook of Corporate Social Responsibility, Oxford: OUP. Elliot, K.A. and Freeman, R. (2003) Can Labor Standards Improve Under Globalization?, Washington D.C.: Peterson Institute for International Economics. Locke, R., Qin, F. & Brause, A. (2007) 'Does monitoring improve labor standards? Lessons from Nike,' Industrial and Labor Relations Review, 61, 1: 3- 31.
Assessment: Exam (40%, duration: 2 hours) in the main exam period.
Essay (60%, 3500 words) in the ST.

MG599 Not available in 2017/18
Research Paper in Management

This information is for the 2017/18 session.
Teacher responsible: Prof Amitav Chakravarti NAB 5.13
Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.
Course content: Students produce a research paper, between 7,000 and 15,000 words, related to the student's designated major field, to be submitted at the end of Lent Term.
Formative coursework: Students will be expected to produce 10 pieces of coursework in the LT and ST.
Feedback on progress will be provided by the student's PhD Programme director.
Assessment: Coursework (100%, 15000 words) in the LT.

MY500 Half Unit
Fundamentals of Social Science Research Design

This information is for the 2017/18 session.
Teacher responsible: Dr Alasdair Jones COL8.12
Availability: The course is available to all research students.
Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative and qualitative research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their PhD theses.
Teaching: 20 hours of lectures and 8 hours of seminars in the MT. Week 6 is a Reading Week during which students work independently on their formative assignments.
Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). Real World Research. London: John Wiley.
Assessment: Research proposal (30%) in the MT.
Other (60%) in the ST.
Class participation (10%).
Research Proposal (1000 words), submitted in week 11 of MT (30%). Research Design (5000 words), submitted in Week 1 of ST (60%).

MY505 Half Unit
Research Methods for Evaluation in Health, Development and Public Policy

This information is for the 2017/18 session.
Teacher responsible: Dr Flora Cornish COL.8.09
Availability: This course is open to any Research level student.
Pre-requisites: There are no prerequisites but some familiarity with qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research. In the context of the rise of evidence-based policy, the course is designed to extend students' abilities to use evaluative information carefully and critically. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesising evidence. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

10 x 1.5 hour lectures
9 x 1.5 hour seminars
Formative coursework: Students will be expected to produce 1 essay in the LT.
Students write a critical review (1,500 words) of a published evaluation report.
Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) Mastering Metrics: The Path from Cause to Effect. Princeton University Press. Bell, S. & Aggleton, P. (2016). Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives. London: Routledge. Cartwright, N. & Hardie, J. (2012). Evidence-Based Policy: A practical guide to doing it better. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) Running Randomized Evaluations: A Practical Guide, Princeton University Press. Patton, M. Q. (2015). Qualitative Research and Evaluation Methods. (4th Edition). London: Sage.
Assessment: Coursework (50%, 2500 words) in the LT.
Essay (50%, 2500 words) in the ST.
50% group-based coursework. Students work in groups to develop an evaluation design, and write it up individually (2,500 words). 50% essay. Students are given a choice of essay questions, in response to which they write one essay (3,000 words).

MY521 Half Unit
Qualitative Research Methods

This information is for the 2017/18 session.
Teacher responsible: Dr Eleanor Knott (MT) and Dr Flora Cornish, COL.8.09 (LT)
Availability: The course is available to all research students.
Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data.. Second, we cover analysis, using thematic, content, and discourse analysis. Issues of research design, quality indicators, epistemology and ethics are addressed.
This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY526 Doing Ethnography, MY527 Qualitative Research with Non-Traditional Data, or MY528 Qualitative Text Analysis. Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.
Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.
The course runs twice per year: in MT and again in LT. The content of the course is exactly the same in each term. Week 6 is a Reading Week, during which students work independently on their formative assignments.
Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.
Indicative reading: M Bauer; G Gaskell, (2000). Qualitative Researching with Text, Image and Sound, London: Sage; U Flick, (2009). An Introduction to Qualitative Research, 4th edition, London: Sage; C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). Qualitative Research Practice. London: Sage. Please Note: No single publication covers the whole content of the course.
Assessment: Project (100%, 5000 words) in the ST.
One final written project of 4000-5000 words, based on seminar exercises (100%). It takes the form of a research project report, with detailed appendices documenting the methods of data collection and analysis used.

MY526 Half Unit
Doing Ethnography

This information is for the 2017/18 session.
Teacher responsible: Dr Chana Teeger COL7.06
Availability: This course is available to all research students.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data in a setting closely related to their PhD topic. Data collection is followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include access to study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which time students work independently on their formative assignments.
Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections and brief interpretations of the significance of these observations. Written feedback will be provided.
Indicative reading: Bourgeois, P. & Schonberg, J. (2009). Righteous Dopefiend. University of California Press. De Laine, M. (2000). Fieldwork, participation and practice: Ethics and dilemmas in qualitative research. Sage Publications Ltd. DeWalt, K. M., ; DeWalt, B. R. (2002). Participant observation: A guide for fieldworkers. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). Writing ethnographic fieldnotes. University of Chicago Press. Wacquant, L. (2004) Body and Soul: Ethnographic Notebooks of an Apprentice Boxer. New York: Oxford University Press.
Assessment: Essay (100%, 4000 words).

MY527 Half Unit
Qualitative Research With Non-Traditional Data

This information is for the 2017/18 session.
Teacher responsible: Dr Jennifer Tarr COL8.06
Availability: The course is available to PhD students in departments such as Media & Communications and Sociology. Also available where regulations permit and with permission of the teacher responsible.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or

collection and analysis of documents. However, new technologies now offer a range of new tools for producing, gathering and analysing new kinds of data. This course will focus on three emerging strands: digital, visual and mobile methods. Additional sensory approaches will also be touched upon. Throughout, the focus will predominantly be on qualitative applications of these methods. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final research project on a topic of the students' choosing to be submitted at the beginning of summer term.
The course aims to understand how qualitative methods can be used in relation to these emerging streams of data. .The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment. An optional enrichment activity may be assigned.
Formative coursework: Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.
Indicative reading: Note: No one text covers the whole course. Büscher M, Urry J, Witchger K (2011) Mobile Methods. Abingdon and New York: Routledge. Rose, G, 2016. Visual methodologies: An introduction to researching with visual materials. London: Sage. Rogers, R, 2013. Digital methods. Boston: MIT press. Pink, S, Horst H, Postill J, Hjorth L, Lewis T, Tacchi J. (2016) Digital Ethnography: Principles and Practice. London: Sage. Pink, S. (2009) Doing Sensory Ethnography, London: Sage.
Assessment: Project (100%, 7000 words).
One 5500-7000 word research project related to the course material, on a topic selected by the student (100%).

MY528 Not available in 2017/18
Qualitative Text Analysis

This information is for the 2017/18 session.
Teacher responsible: Dr Audrey Alejandro COL7.07
Availability: This course is available to all research students who are permitted to take an outside option as part of their programme.
Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.
Course content: The efficiency of power lies in its invisibility. Critical studies emphasise the need to take into account the implicit dimensions of the (re)production of the social and political order. But, this theoretical standpoint raises a methodological challenge. As social agents ourselves, how do we assess the implicit, which by definition, we have been socialised not to perceive? How can we prove the implicit structuration of the world in a rigorous, empirical way? Focusing on discourses - the role they play in society, their relation to institutions, practices and perceptions - represents a stimulating and efficient method to address this challenge.
This course trains into the demanding craft of mapping the social and political implications of discourses and making explicit their implicit dimensions. It will mainly focus on Discourse Analysis but also covers other analytic traditions such as thematic analysis and content analysis. It introduces techniques and procedures available to researchers to identify and extract information from texts and speeches for social scientific purposes. Different types of materials will be investigated such as political speeches, news articles and cultural productions on a vast array of critical topics such as race or gender. The aim of this course is to equip participants with the right skills to engage the study of discourses and build critical thinking around those tools according to 1) Research Design 2) Type of data under consideration.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.
Formative coursework: A project proposal (c.1,000 words). Students write a proposal for the project that will comprise their summative assessment.
Indicative reading: Baker, P. and Ellece, S. (2010). Key Terms in Discourse Analysis, London: Continuum. Kendall, G. And Wickham, G. (1999) Using Foucault's Methods, London: Sage. Scheier, M. (2012) Qualitative Content Analysis. Sage, Thousand Oaks, CA. Sage, Thousand Oaks, CA. Seale, C., Gobo, G., Gubrium, J.F. and Silverman, D. (2004). Qualitative research practice. London: Sage, chapters 11-12.
Assessment: Essay (100%, 4000 words) in the LT.

MY529 Half Unit Not available in 2017/18
Special Topics in Qualitative Research: Introspection-based Methods in Social Research

This information is for the 2017/18 session.
Teacher responsible: Prof Martin Bauer Col.8.04
Availability: The course is available to all research students.
Pre-requisites: The course will assume good knowledge of qualitative research methods as covered in MY521 and MY530.
Course content: Introspection comprises methods of empirically recording one's own subjective experience; the currently on-going, or perhaps very recently past, mental or emotional states and processes through methods of trained and technically supported self-observation. Historically, introspection is part of a quest of human self-knowledge and self-improvement. And a person's stream of consciousness is of interest in the social sciences, for example as reports of happiness or life satisfaction. Introspection has been difficult to verify, thus deemed not 'objective' and unscientific. The stream of consciousness (William James) was of interest mainly to literary elaboration. However, introspection-based methods survived and have re-emerged, not least because 1st person experience remains an indispensable source of evidence on an actor's states and processes that constrain and give meaning to human action. Not least recent advance in neurosciences accentuates the need for experience-focussed 1st person methods. Modern introspection-based methods are 'objectifications' of 1st person situated experiences in controlled settings that support episodic retention. Modern introspection-based methods create conditions which make immediate, pre-meditated experience less 'biased' and more accurate to record. This comprises techniques such as narrative and episodic interviewing, free-association techniques, survey-based reconstruction and attitudes, critical incident techniques, loud-thinking protocols, experience sampling and self-tracking methods, ecological momentary assessment, self-confrontation interviewing, and 1st person situated video methods, and auto-ethnography and the 'quantified self'. Many new techniques are mobile and adaptable to capture the fluid nature of mental and emotional states and processes. Miniature mobile devices for sound and video recording promise to overcome the bottlenecks that have hitherto plagued intensive and continuous introspection-based methods.
Learning Outcomes:
Students on this course will
1) appreciate the long past, and the short history of introspection-based methods;
2) be familiar with a range of techniques of collecting introspective data;
3) know the problems of introspection–based methods and how different methods try to overcome them;
4) gain practical skills with modern introspection-based methods.
Teaching: 10 hours of lectures and 10 hours of seminars in the LT.
Indicative reading: A complete reading list will be provided at the

beginning of the course.

Assessment: Project (100%, 3000 words) in the ST.

PhD students taking this course will be assessed on the basis of a small Research Project using an introspective method (3000 words).

MY530
Advanced Qualitative Research Workshops

This information is for the 2017/18 session.

Teacher responsible: Dr Jennifer Tarr COL8.06

Availability: Research students who are undertaking projects using qualitative methods.

Pre-requisites: Some prior training in qualitative methods (eg: MY400 and MY421 or equivalent). Students who have no prior training in qualitative methods should consider taking MY521M or MY521L.

Course content: MY530 is a series of workshop modules that provide hands-on, in-depth and advanced training for specific methodologies of qualitative data collection, analytic techniques and research design issues. Research students can sign up to as many workshops as they wish. The programme includes topics such as in-depth interviews, focus groups, ethnography and participant observation, narrative interviewing and analysis, visual methods, classical content analysis, thematic analysis, etc. Each workshop consists of two sessions of two hours. The second session is practical. These interdisciplinary sessions provide a space for students to develop advanced methodological skills and exchange ideas with peers.

Teaching: Sessions to be held throughout the year, beginning in week 8 of MT and continuing throughout LT; Participants sign up via MOODLE.

Indicative reading: Each session will provide its own recommended reading list, available on Moodle.

Assessment: This course is non-examinable.

MY551 Half Unit
Introduction to Quantitative Analysis

This information is for the 2017/18 session.

Teacher responsible: Dr Benjamin Lauderdale Col.8.10 and Prof Jonathan Jackson Col.8.05

Availability: The course is available to all research students.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer classes give hands-on training in the application of statistical techniques to real social science research problems using the SPSS computer package (no prior knowledge of SPSS is necessary).

Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST. There will be no lectures or computer classes in Week 6 of the term.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY551M which is taught in Michaelmas Term, or MY551L which is taught in Lent Term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A course pack will be available for download online and can be purchases as a hard copy. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY551 and MY552).

Assessment: Exam (100%, duration: 2 hours) in the main exam period.

MY552 Half Unit
Applied Regression Analysis

This information is for the 2017/18 session.

Teacher responsible: Mr Jack Blumenau COL8.02 and Dr Indraneel Sircar COL8.02

Availability: Research students where programme regulations allow.

Pre-requisites: Students are required to have completed MY451/MY551 Introduction to Quantitative Analysis or an equivalent level statistics course.

Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 20 hours of lectures and 10 hours of computer workshops in the LT.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY552M which is taught in Michaelmas Term, or MY552L which is taught in Lent Term.

There will be no lectures or computer classes in Week 6 of term.

Formative coursework: Class exercises and homework can be

carried out using the Stata, SPSS or R software, according to the student's choice.
Indicative reading: A Agresti & B Finlay, Statistical Methods for the Social Sciences. A course pack will be available for download online and can be purchased as a hard copy. Additional reading will be recommended.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
A two-hour open book unseen examination in ST.

MY554 Half Unit
Applied Statistical Computing using R

This information is for the 2017/18 session.
Teacher responsible: Dr Benjamin Lauderdale COL.8.10
Availability: This course is available to all research students. The course is also available to taught masters students with different assessment, as MY454.
Pre-requisites: Students must have taken Applied Regression Analysis (MY452) or an equivalent intermediate regression course.
Course content: This course will cover basic statistical programming for social science research as well as several associated data analysis methods. Programming topics include basic programming, data structures, optimisation, and simulation. Applied statistical topics include nonparametric density estimation and regression, additive models, cross-validation, the bootstrap, and permutation/randomisation inference. Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 2 hours of lectures in the ST.
Formative coursework: Students will be expected to produce 5 problem sets in the LT.
Each problem set is associated with a computer classes, and may be submitted for marking and feedback.
Indicative reading: Keele, L. Semiparametric Regression for the Social Sciences. Matloff, N. The Art of R Programming
Assessment: Coursework (100%) in the ST.
A single piece of coursework (100%) in the ST applying the methods covered in the course to a topic in the area of the student's research. The topic and scope of the assignment will be developed in discussion with the teacher responsible for the course during LT.

MY555 Half Unit
Multivariate Analysis and Measurement

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL8.04
Availability: The course is available to all research students.
Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452/MY552 (Applied Regression Analysis)
Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.
Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT.
Formative coursework: Exercises from the computer classes can be submitted for marking.
Indicative reading: D J Bartholomew, F Steele, I Moustaki ; J I Galbraith (2008) Analysis of Multivariate Social Science Data (Second Edition).
Assessment: Research project (100%).
Research paper 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, answering a set of questions by applying multivariate analyses to some data (100%).

MY556 Half Unit
Survey Methodology

This information is for the 2017/18 session.
Teacher responsible: Dr Jouni Kuha COL8.04
Availability: This course is available to all Research students.
Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY452/MY552 or equivalent. MY556 can also be taken in parallel with MY452L/MY552L. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent.
Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys.
Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.
Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be no lectures or seminars in Week 6 of term.
Formative coursework: Exercises from the seminars can be submitted for marking
Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). Survey Methodology (2nd ed.). Wiley.
Assessment: Research project (100%).
Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, reporting the data analysis of a given research question and data set (100%).

MY557 Half Unit
Causal Inference for Observational and Experimental Studies

This information is for the 2017/18 session.
Teacher responsible: Dr David Hendry
Availability: Available to all research students.
Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452/MY552 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent
Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer

packages (Stata or R) are used for computation.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
There will be no lectures or computer classes in Week 6 of term.
Formative coursework: Exercises from the computer classes can be submitted for marking.
Indicative reading: Rosenbaum, PR. (2010). Design of Observational Studies. Springer; Angrist, J. D. and Pischke, J.-S. (2009). Mostly Harmless Econometrics. Princeton University Press.
Assessment: Coursework (100%, 4000 words).

MY559 Half Unit
Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL.8.11
Dr Pablo Barberá
Availability: The course is available to all research students.
Pre-requisites: The course will assume knowledge of linear and logistic regression models, to the level covered in MY452.
Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can all be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.
Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Formative coursework: Exercises from the computer classes can be submitted for marking.
Indicative reading: quanteda: An R package for quantitative text analysis. http://kbenoit.github.io/quanteda/Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." Political Analysis 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." The Journal of Finance 66 (1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." Journal of Empirical Legal Studies 4 (4, December):1007–1039.
Assessment: Coursework (100%, 4000 words).

MY560
Workshop in Advanced Quantitative Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Jonathan Jackson COL8.05 and Dr Benjamin Lauderdale COL8.10
Availability: MY560 is a series of workshops available to any post-graduate student who signs up via Moodle.
Course content: It is intended to provide research students with an introduction to specific advanced research methods and hands-on training in the use of these tools.
Teaching: One-day introductory workshops consisting of a morning lecture and afternoon computer session during the MT, LT and ST. Participants will sign up via MOODLE.
Assessment: This course is non-examinable.

MY565 Half Unit
Intermediate Quantitative Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Jonathan Jackson COL8.05
Availability: This course is available to all research students where regulations permit.
Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).
Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.
Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques. Class exercises and homework are carried out using the Stata package.
Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.
Students on this course will have a reading week in Week 6. On-line quizzes will be provided on Moodle to aid revision during the reading week.
Formative coursework: Students will be expected to produce 9 exercises in the MT.
Indicative reading: A course pack will be available for download online.
Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) Statistics: The Art and Science of Learning from Data, and Alan Agresti and Barbara Finlay (2009, 4th edition) Statistical Methods for the Social Sciences.
Assessment: Exam (100%, duration: 2 hours) in the main exam period.
This is an open-book unseen examination.

MY570 Half Unit
Computer Programming

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL8.11
Dr Ben Lauderdale
Availability: This course is available on the PhD in Methodology. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is available to all research students where regulations permit.
Course content: This course introduces students to the

fundamentals of computer programming as students design, write, and debug computer programs using the programing language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment.
Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.
Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates projectbased learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object oriented programming. The primary programming languages used in the course will be Python and R.
Formative coursework: Students will be expected to produce 10 problem sets in the MT.
Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.
Indicative reading: Lutz, Mark Learning Python. 5th Edition. O'Reilly, 2013. Intermediate and Advanced documentation at https://www.python.org/doc/. Gries, Paul, Jennifer Campbell, and Jason M Montojo. Practical Programming: An Introduction to Computer Science Using Python 3. The Pragmatic Bookshelf, 2013. Grolemund, Garrett and Hadley Wickham. R for Data Science. O'Reilly, 2016. http://r4ds.had.co.nz. Grolemund, Garrett. Hands-On Programming with R. O'Reilly, 2014.
Assessment: Take home exam (50%) and in class assessment (50%) in the MT.
Student problem sets will be marked each week, and will provide 50% of the mark.
Marking of these assessments will be at a level appropriate for PhD students.

MY572 Half Unit Not available in 2017/18 Data Structures, Databases and Data Sharing

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL8.11
Availability: This course is available on the PhD in Methodology. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is available to all research students where regulations permit.
Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most timeconsuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments.
Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.
In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.
Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an indepth look at the mark-up languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.
Formative coursework: Students will be expected to produce 10 problem sets in the MT.
Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

London, Kyle Developing Large Web Applications: Producing Code That Can Grow and Thrive O'Reilly, 2010.
Assessment: Take home exam (50%) and in class assessment (50%) in the MT.
Student problem sets will be marked each week, and will provide 50% of the mark.
Marking of these assessments will be at a level appropriate for PhD students.

MY573 Half Unit
Managing and Visualising Data

This information is for the 2017/18 session.
Teacher responsible: Prof Kenneth Benoit COL8.11
Availability: This course is available on the PhD in Methodology. This course is available with permission as an outside option to students on other programmes where regulations permit.
This course is available to all research students where regulations permit.
Course content: The course be divided into two halves. The first five weeks will focus on data structures and databases, covering the principles of digital methods for storing and structuring data, including data types, relational and non-relational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most time-consuming part of any data science project. This part of the course will introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project. The second five weeks will focus on visualising data, starting with univariate and bivariate data, discussing the advantages/disadvantages of some commonly used graphics, then turning to more sophisticated tools, including three-dimensional tools, maps and interactive and dynamic graphics. This part of the course will cover: data visualisation basics (history and classic examples; best practice for univariate and bivariate data; image formats and resolution); data visualisation principles (cognition and human visual perception; grammar of graphics; application to examples); design principles (graphic design; layout; visual style; titles and annotations; animations; interactive and dynamic graphics); statistical analysis and maps (binwidths/bandwidths for histograms and kernel density estimation; regression diagnostics; maps).
Teaching: 20 hours of lectures and 15 hours of lectures in the MT.
Formative coursework: Students will be expected to produce 6 problem sets in the MT.
Indicative reading: Wilkinson, Leland. The Grammar of Graphics, 2nd Ed., Springer, 2005. Wickham, Hadley. Ggplot2: Elegant Graphics for Data Analysis, Springer, 2009. Cook, Dianne and Swayne, Deborah. Interactive and Dynamic Graphics for Data Analysis - with R and GGobi, Springer, 2007. Murray, Scott. Interactive Data Visualisation for the Web, O'Reilly, 2013.
Assessment: Project (60%) and continuous assessment (40%) in the MT.
Four of the problem sets submitted by students weekly will be assessed (40% in total). In addition, there will be a take-home exam (60%) in the form of an individual project in which they will demonstrate the ability to manage data and visualise it through effective statistical graphics using principles they have learnt on the course. This may be done by publishing the visualisation and code to a GitHub repository and GitHub pages website.
Marking of these assessments will be at a level appropriate for PhD students. For the project, it is expected that PhD students submit a more detailed project that what will be expected of students taking the MSc level course.

MY591
Computing Packages for Applied Analysis

This information is for the 2017/18 session.
Teacher responsible: Dr Chana Teeger COL7.06
Availability: For students who intend to use qualitative and quantitative computer packages in their research. This course is available as an outside option where regulations permit.
Course content: It is intended to provide research students with an appreciation of various computer packages through introduction and hands-on training in the use of these tools.
Teaching: 63 hours of seminars in the MT. 75 hours of seminars in the LT. 30 hours of seminars in the ST.
Half-day introductory training courses on computer packages such as, Nvivo, ALCESTE, QDA Miner/Wordstat/Simstat, Stata and SPSS during the MT and LT. Participants will sign up via MOODLE.
Formative coursework: NA.
Indicative reading: R Tesch, Qualitative Research; Analysis Types and Software Tools (1990); N G Fielding; R M Lee, Computer Analysis; Qualitative Research (Sage, 1998); Roberts CW (1997) Textanalysis for the Social Sciences, Mahwah, Lawrence Erlbaum Ass.; Popping, R (2000) Computer-assisted Text Analysis, London, Sage, E A Weitzman ; M B Miles, Computer Programs for Qualitative Data Analysis (Sage, 1995).
Assessment: This course is non-examinable.

MY592
Workshop in Information Literacy: finding, managing and organising published research and data

This information is for the 2017/18 session.
Teacher responsible: Miss Maria Bell R102
Maria Bell (Course Convenor), Academic Support Librarian; Dr Jane Secker, Copyright and Digital Literacy Advisor, Centre for Learning Technology; Clive Wilson, Academic Support Librarian.
Availability: First and second year research students. This course is available as an outside option where regulations permit.
Course content: MY592 is a six week programme of 2 hour workshops which aims to develop students' research skills and introduce the essential sources and tools when undertaking research, and the skills required to use them. It is run by the Library and Centre for Learning Technology and is ideal for research students undertaking an extensive literature search and review. Students receive detailed advice on the most appropriate Library resources for their research topics. Materials, online activities and assessment will be available in Moodle to support the teaching.
Teaching: 24 hours of seminars in the MT. 24 hours of seminars in the LT.
Six two hour classes will be held weekly, and students are expected to attend all sessions in order to develop their information literacy skills. MY592 will run in both the Michaelmas and Lent terms and in the Summer term subject to demand. Dates and times will be advertised at the start of each term. Note that not all sessions will last for 2 hours but this will allow for individual contact time at the end of classes with class tutors.
If you only wish to attend an individual workshop, consult the Training classes offered by the Library and the Centre for Learning Technology on the LSE Training and Development System.
Places on the entire programme can be booked using the LSE Training and Development System.
Assessment: This course is non-examinable.

MY599
Department of Methodology Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Flora Cornish COL8.09 and Dr David Hendry COL7.05
Availability: Open to all.
Course content: Papers on topics of methodological interest will be presented by staff and visitors.
Teaching: Meetings arranged as needed, taking place in COL.8.13 unless otherwise stated. Seminar dates, venues and speakers will be advertised on the Department of Methodology webpage
Assessment: This course is non-examinable.

PH500
Research Methods in Philosophy

This information is for the 2017/18 session.
Teacher responsible: Prof Richard Bradley
Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.
Course content: Topics in contemporary philosophy.
Teaching: Seminars PH500 15 x two-hour (MT, LT, ST). Different members of the department will lead the seminar in each of the three terms.
A more detailed syllabus will be posted at the beginning of each term.
Assessment: This course is non-examinable.

PH501
Philosophical Problems Seminar

This information is for the 2017/18 session.
Teacher responsible: Dr Anna Mahtani and Prof Christian List
Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.
Course content: In this course, we will read and carefully discuss together a range of classic papers in contemporary analytic philosophy that might not otherwise be covered in LSE Philosophy Department courses. Topics are selected from metaphysics, the philosophy of mind and action, epistemology, and the philosophy of language. This list is illustrative.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.
Indicative reading: Specific readings will be announced in a detailed syllabus at the start of the term.
Assessment: Two essays of 5000 words each over the course of the two terms. Either or both of these essays may be replaced by two shorter essays each of 2500 words.

PH502
Reasoning and Logic

This information is for the 2017/18 session.
Teacher responsible: Dr Owen Griffiths
Availability: This course is available on the MPhil/PhD in Philosophy and MPhil/PhD in Philosophy of the Social Sciences. This course is not available as an outside option.
The course is, in general, only aimed at those students who have never taken a course in formal logic before. For such students the course is compulsory.
Course content: This course concerns formal methods of reasoning in philosophy.
1. Deductive Logic. Philosophy is centrally concerned with arguments. The first question to be asked of any argument (or inference) is whether or not it is valid: that is, does its conclusion really follow from its cited premises.Validity of inference is the central problem of deductive logic.Logic has universal scope: different disciplines have different ways of garnering information, but the way that we reason deductively from that information is the same no matter what the discipline.The key to answering some other formal questions that often arise in philosophy - such as whether some set of assumptions is consistent - is also provided by deductive logic.
This section of the course covers first a simple system called propositional or truth-functional logic, which, despite its simplicity, captures a great range of important arguments and provides a formal articulation of the notions of validity of inference and consistency of a set of sentences.The main system covered, however, is (first order) predicate logic, which is powerful enough to capture not only simple inferences but also those involved in philosophy and the sciences.
The final section of this first part of the course investigates more systematically how the formal techniques provided by these systems of logic relate to the more informal arguments found in philosophy (and ordinary discourse).
2. Probability. In a valid deductive argument, the conclusion must be true if the premises are. However many inferences conclude only that a certain claim is probable (or more probable than it would otherwise be). For example, we clearly cannot conclude from the premise that someone smokes 40 cigarettes a day that s/he will die early from a smoking-related illness, but we can infer that such an early death is much more probable than if s/he did not smoke.
Issues about probabilities play many roles in current philosophical debates: in decision theory, philosophy of economics, philosophy of physics and many other areas. This section of the course introduces the axioms of probability theory and then turns to foundational issues. It turns out that there are different interpretations of the probability axioms: in particular, a subjective interpretation which sees probabilities as credences or degrees of belief in the truth of some proposition, and objective interpretations which see probabilities as properties of physical events (such as the decay of a particular radioactive molecule in a given time interval. Interesting difficulties arise with both interpretations. The subjective interpretation has been developed into a full-blown, general Bayesian account of theory-confirmation in science - the essentials of this account will also be covered.
3. Formal Philosophical Devices. The final section of the course covers some of the formal, technical ideas that are often presupposed in contemporary philosophical work: including the notions of sets and infinities;theories of truth (and partial truth);analyticity and the a priori; possibility and necessity; and conditionals. Some of these notions have been clarified via analyses of some celebrated 'paradoxes' that will also be covered in this section of the course.
Teaching: 15 hours of lectures in the MT. 15 hours of lectures in the LT.
Appropriate back-up teaching will be arranged with individual students.
Formative coursework: Regular exercises will be set on the basis of the material covered in lectures.
Indicative reading: Extensive lecture notes will be provided covering the first part of the course. Further reading for parts 2 and 3 will be listed on the weekly worksheets available on Moodle.
Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the main exam period.

PH551
Research Seminar in the Philosophy of Natural Sciences

This information is for the 2017/18 session.
Teacher responsible: Dr Bryan Roberts LAK.5.03
Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: This is a special topics course on the philosophy of science. It meets weekly, and has two components.
The first component (roughly half the meetings) will consist in a reading group on mathematical topics in philosophy of science. Although ultimately determined by attendants, the possible topics include: philosophy of mathematics, representation theorems and philosophy of representation, foundations and dynamics of financial markets, philosophy of space and time, philosophy of quantum mechanics, and philosophy of thermal and statistical physics.
The second component will consist in attending lectures and outside reading groups involving professional philosophers of science. Students may choose from the Sigma Club and BSPS lectures on Monday evenings, Choice Group meetings involving philosophy of science, and the All London History and Philosophy of Science reading group. Background readings to prepare students for these lectures as well as essay topics will sometimes be suggested.
Together this amounts to roughly 10 meetings in Michaelmas Term and 10 meetings in Lent Term. Details about the meetings will be provided on Moodle, and information about the Sigma Club and BSPS lecture series can be found on the LSE Philosophy homepage under the "Events" heading.
Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.
As this is a reading group, each participant is invited to take the lead on at least one meeting, choosing a topic and readings in consultation with the instructor, and leading the discussion during at least one of the Monday-evening seminars.
Formative coursework: Students will be expected to write one essay per term and to give a seminar presentation.

PH555
Research Seminar in the Philosophy of Economics and Social Sciences

This information is for the 2017/18 session.
Teacher responsible: Prof Richard Bradley LAK2.03
Availability: This course is available on the MPhil/PhD in Philosophy and MRes/PhD in Economics. This course is not available as an outside option.
Course content: Philosophical issues in economics and the social sciences.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 10 hours of seminars in the ST.
Formative coursework: Students will be expected to write one essay per term and to give seminar presentations.

SA550
Research Student Seminar

This information is for the 2017/18 session.
Teacher responsible: Prof Anne West OLD 1.16 and Dr Hakan Seckinelgin OLD 2.57.
Availability: For all MPhil/PhD students in the Department of Social Policy.
Course content: The course for first year students provides structured sessions for MPhil students (e.g. the MPhil/PhD process, ethics, risk). It also provides the forum in which first year full-time and second year part-time MPhil students must present their work to fellow students and staff in advance of submitting their major review (upgrade) document.
The course for second and third year students provides the forum where third year full-time (or equivalent) PhD students must present their work to fellow students and staff in advance of submitting their third year review document.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
First year: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
Second and third year: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

SO500
Research Class for MPhil Students

This information is for the 2017/18 session.
Teacher responsible: Dr Carrie Friese STC213
Availability: This course is compulsory on the MPhil/PhD in Sociology. This course is not available as an outside option.
Course content: The research seminar aims to provide students with a conceptual and practical framework within which to think through planning their research. This includes devising research questions, how to do a literature review, selecting appropriate methods for research, linking theory and practices, ethical issues and writing. The course will comprise workshops and student presentations. By the end of the course students should be able to formulate clear aims and methods for their own research. All first year MPhil students must attend.
Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.
Reading weeks: week 6 (MT) and week 6 (LT).
Assessment: Other (100%) in the ST.
5,000 word paper on the 'Aims and Methods' of the thesis, and a viva voce examination. For full-time students, three copies of this typed and paginated essay must be submitted to the Sociology Administration Office, Room S116, by the first Friday in May. Satisfactory completion of the 'Aims and Methods' paper, and the viva are necessary in order to proceed to the next stage of the course. Part-time students may elect to be evaluated in May or September of their first year or May of their second year.

SO501
Data Analysis Workshop

This information is for the 2017/18 session.
Teacher responsible: Dr Carrie Friese STC213
Availability: This course is available on the MPhil/PhD in Sociology. This course is not available as an outside option.
Only available to sociology research students in the second and subsequent years of their MPhil/PhD.
Course content: Seminars will focus on doing data analysis using materials made and collected as part of PhD research. Each student will present data to the group at least one time. Students may submit the following types of data: (part of) a qualitative interview to code OR a collection of interview sections coded as 'X' to be analysed according to a specified method (e.g., narrative analysis, grounded theory); fieldnotes for coding or for reflections on what is needed for 'thick description'; an image or text to code or analyse according to a specified method (e.g., discourse analysis); a map of the research situation (e.g., situational analysis, network analysis); a regression analysis that requires interpretation, etc. All students will be asked to read the data before the workshop. The workshop will start with the student briefly presenting their data and contextualizing it within their research question, data set and methodological approach. As a group, that piece of data will be closely analysed using the method specified by the student.
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
Fortnightly seminars in the MT and LT for all sociology research students in their second and subsequent years
Assessment: There is no formal assessment, but participants are asked to present research materials, read other students' research materials, and contribute to discussion.

SO505
Becoming a Professional Sociologist

This information is for the 2017/18 session.
Teacher responsible: Dr Carrie Friese STC.S213
Availability: This course is available on the MPhil/PhD in Sociology. This course is not available as an outside option.
This course will be available for Year 3 students as an optional training course for 2017/18. It is not available to PhD students outside the department.
Pre-requisites: Students must have completed Research Class for MPhil Students (SO500).
Students will have completed SO500 and passed Aims and Methods. Ideally they will have completed SO501. However, exceptions will be made for students who were outside of London in Year 2 for fieldwork and intend to complete their PhD in three years. In that instance students can take SO501 and SO502 simultaneously.
Course content: This half-unit course will bring in two members of the Sociology faculty to discuss key aspects in developing a career as a Sociologist. These will include:
1. Writing, submitting and revising journal articles.
2. Writing a book proposal.
3. Applying for research funding.
4. Using social media.
5. Developing CVs.
6. CV Clinic. Here students would be asked to bring their CV in to develop with other students and the Convener.

Students will:
- Gain an understanding of the different aspects involved in developing a career in academic Sociology
- Gain practical understanding of how to pursue the different elements of a sociological career in order to be in a good position in the job market and for postdoctoral funding
- Provide support for students as they are finishing their PhD and move into the next stage of their career as sociologists

Teaching: 15 hours of workshops in the MT.
Course Outline
Week 1. Writing, submitting and revising journal articles
Week 3. Writing a book proposal
Week 5. Applying for research funding
Week 7. Using social media.
Week 9. Developing your CV.
Week 11. CV Clinic.
Formative coursework: There is no formative assessment for this course.
Indicative reading: There is no reading list for this course.
Assessment: There is no summative assessment for this course. The course is a pass/fail and is dependent on attendance.

SO511
Research Seminar in Political Sociology

This information is for the 2017/18 session.
Teacher responsible: Dr Robin Archer STC.S114a
Availability: This course is available on the MPhil/PhD in Sociology. This course is available as an outside option to students on other programmes where regulations permit.
MPhil/PhD students whose research is in the field of political sociology. Students from all departments are welcome.
Course content: Political sociologists seek to understand fundamental political phenomenon by studying them in their social context. This seminar seeks to provide a small, friendly forum in which research students can discuss important recent publications and debates in this field. It often spends a number of weeks reading recent prize-winning books and articles in the field, and sometimes examines a topical theme for part of a term. There are also occasional guest lectures. In recent years, for example, there were lectures by Michael Mann (UCLA) on the rise and fall of neo-liberalism. Theda Skocpol (Harvard) on the future of American politics, and Andreas Wimmer (Princeton) on ethnic conflict and state formation. The seminar also provides an opportunity to develop individual research projects. In each seminar, a twenty or thirty minute presentation is followed by discussion.
Teaching: 8 hours of seminars in the MT. 10 hours of seminars in the LT. 6 hours of seminars in the ST.
Fortnightly in MT and LT.
Indicative reading: A short list of some important recent books and articles that could be discussed in the seminar will be suggested at the beginning of the year, and the seminar is always open to suggestions from participants. Readings continually change, but, for the purposes of illustration, recent seminars have discussed global anti-capitalism, suicide missions and the new imperialism, Christianity and American democracy, the welfare state, the politics of free markets, labour protest in China, street politics in Egypt, boycotts, and the crisis of capitalism.
Assessment: There is no formal assessment but participants are asked to present papers, contribute to discussion and read the work of selected scholars in the course of the session.

SO521 Not available in 2017/18
Research Seminar on Cities and Space

This information is for the 2017/18 session.
Teacher responsible: Prof Francine Tonkiss STC 219
Availability: This course is available on the MPhil/PhD Cities Programme and MPhil/PhD in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.
For MPhil/PhD students doing research on urban and spatial issues in the Cities Programme/Department of Sociology. If space is available, other graduate students may apply.
Course content: This graduate seminar is based on discussion of key readings in the fields of urban social theory and spatial analysis. It also provides a forum for discussion of research issues relating to the study of cities and space
Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.
One two-hour seminar every two weeks in the MT and LT.
Assessment: This course is not assessed

ST501 Half Unit
Multilevel Modelling

This information is for the 2017/18 session.
Teacher responsible: Prof Irini Moustaki COL 6.05
Availability: This course is available on the MPhil/ PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.
Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g., students nested within schools, individuals nested within households or geographical areas) and longitudinal data (eg repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g., Stata).
Teaching: 20 hours of lectures and 10 hours of seminars in the LT.
Formative coursework: Students will be expected to produce 5 exercises in the LT.
Formative coursework is assigned fortnightly and returned to students with comments/feedback via Moodle before the lab sessions
Indicative reading: T. Snijders & R Bosker Multilevel Analysis: an

Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition). S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012). Also recommended are: A Skrondal & S Rabe-Hesketh, Generalized Latent Variable Modeling: Multilevel, Longitudinal and Structural Equation Models, Chapman & Hall (2004); H Goldstein, Multilevel Statistical Models, Arnold (2003); S W Raudenbush & A S Bryk, Hierarchical Linear Models: Applications and Data Analysis Methods, Sage (2002); G Verbeke & G Molenberghs, Linear Mixed Models for Longitudinal Data, Springer (2000); E Demidenko, Mixed Models, Wiley (2004).
Assessment: Coursework (100%, 4000 words).
Assessment is by 100% coursework given to students in week 8 of the course.

ST542 Half Unit Not available in 2017/18 Longitudinal Data Analysis

This information is for the 2017/18 session.
Teacher responsible: Prof Fiona Steele COL 7.08
Availability: This course is available on the MPhil/ PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.
Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.
Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, (random effects) growth curve models, marginal models, dynamic (autoregressive) models, latent class models, and multiprocess models for multivariate outcomes. The course will have an applied emphasis with weekly computer classes using appropriate software (e.g. Stata).
Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.
Week 6 will be a reading week.
Formative coursework: Students will be expected to produce 5 exercises in the LT.
Formative assessment is based on data analysis problems that require the use of the statistical software to apply the statistical techniques taught in the lectures and computer classes. Coursework is given out to students every two weeks and returned with feedback and comments.
Indicative reading: Hedeker D, Gibbons RD. Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc. (2006). Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press. Singer JD, Willett JB. Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press (2003). (Part I only).
Assessment: Coursework (100%, 4000 words) in the ST.
Assessment is by 100% coursework which is given to students in week 8

Continuous assessment (70%) in the MT and LT.

LN726
French: Level Three (CIA Courtauld Institute of Art)

This information is for the 2017/18 session.
Teacher responsible: Mr Halim Benzine TW3 6.01, Miss Florence Niclot TW3.6.01D and Mr Francois Simon TW3.6.01K
Pre-requisites:
• This level is suitable for students from the Courtauld Institute of Art who learnt French for some time (a few years) a long time ago (secondary school).
• A good foundation but find it difficult to express themselves mostly orally.
• This level can also be taken by GCSE students from LSE.
SPEAKING
• Use simple phrases and sentences to describe where they live and people they know.
• Speak about what they study (history of art, arts), and be able to function within a range of basic activities relating to work, study or time spent in the country.
WRITING
• Write short, simple greetings.
• Fill in forms with personal details, basic communication in e-mails, or short descriptions or paragraphs relating to an area of interest in arts.
LISTENING
• Recognise familiar words and very basic phrases concerning self, family and immediate concrete surroundings when people speak slowly and clearly.
• Understand short excerpts from current affairs, programmes or news items on TV and Radio.
READING
• Understand the gist of and some details of original text extracts, for example on notices, posters, in newspapers, adverts and on the web, and in simple articles relating to the Social Sciences.
• Admission to the course upon completion of online level test and tutor's approval during needs analysis.
• For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French.
Course content:
Course aim:
SPEAKING AND SPOKEN INTERACTION
• Use a series of phrases and sentences to describe in simple terms family and other people, living conditions, educational background and present or most recent work.
• Produce talks on simple topics relating to Art.
• Communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar topics and express opinions in discussion of familiar topics.
WRITING
• Write short simple notes, messages and e-mails relating to matters in areas of immediate need or paragraphs or short essays in areas of interest relating to Art.
LISTENING
• Understand phrases and the highest frequency vocabulary related not only to areas of most immediate personal relevance (e.g. personal and familiar information, shopping, local geography, and employment), but also to topic areas relating to the world of Culture and Art.
READING
• Read short and simple texts related to news and current issues, find specific, predictable information in simple everyday material such as advertisements, prospectuses, menus and timetables, and understand items of both personal and professional written communication e.g. Email and web-based material + art related articles.
To bring students to level B1 of CEFR.

Pre-requisites: For undergraduate students from Finance, Accounting, Mathematics, Statistics and Economics for whom English is not a first language.
Course content: The course aims to develop the ability to speak, read and listen more effectively for academic purposes and to develop the ability to write more effectively for academic purposes. By the end of this course, students will have: (a) explored and clarified style in academic discourse and (b) developed their own written and spoken fluency, accuracy and style.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN950
Improvisation

This information is for the 2017/18 session.
Teacher responsible: Ms Ines Alonso-Garcia KSW.G.03 and Ms Helen Mayer KSW.G.03
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: Improvisation uses a series of exercises, games and teamwork to improve communication and listening skills. The classes help to develop confidence, fluency and spontaneity when using English.
Teaching: 4 hours of seminars in the MT. 4 hours of seminars in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN951
Argumentation and Style

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.0.1e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: This course will focus on argumentation and style in written and oral communication. Students will analyse written and oral texts to improve their discourse management, language accuracy and language range.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN952
Discussion

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: This course will enable students to improve their fluency, accuracy and confidence when discussing academic and non-academic topics. Students will acquire useful grammar, vocabulary and strategies, and will receive feedback on language and style.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN953
Academic Reading

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: These classes will give students effective strategies for reading complex academic texts in English including: reading selectively, reading purposively, understanding core academic vocabulary, and effective note-taking.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN954
Informal Vocabulary

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English a foreign language.
Course content: Students will improve their knowledge and understanding of informal English vocabulary including use of puns, metaphors, idioms and collocations.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN955
Academic Vocabulary

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: Students will improve their knowledge and understanding of academic English vocabulary including: stylistic choices, noun-phrases, verb-phrases, collocations and metaphor.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN956
Grammar for Academic Purposes

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: Students will enhance their knowledge of English grammar in academic contexts and will improve their grammatical range and accuracy through a combination of text analysis and oral/written tasks.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN957
Pronunciation and Voice

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01.e
Pre-requisites: This course is for students who speak English as a foreign language
Course content: This course will focus on pronunciation and voice. Students will work on individual sounds, word and sentence stress, intonation and pausing.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN958
Seminar Skills

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: These classes will focus on the language skills necessary to be successful in seminars including: a) presenting arguments; b) effective listening; c) responding to other points of view; d) interaction and turn-taking.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN959
Presentation Skills

This information is for the 2017/18 session.
Teacher responsible: Ms Alison Standring TW3.6.01e
Pre-requisites: This course is for students who speak English as a foreign language.
Course content: By the end of this course student will have: a) developed strategies to enhance voice and pronunciation while giving presentations; b) worked on improving language accuracy and extending language fluency; c) received feedback on practice presentations.
Teaching: 4 hours of classes in the MT. 4 hours of classes in the LT.
This course will be offered at four different times during the academic year namely: MT Wks 2-5; MT Wks 7-10; LT Wks 2-5; LT Wks 7-10

LN988
Thesis Writing

This information is for the 2017/18 session.
Teacher responsible: Dr Angus Wrenn TW3.6.0.1a
Pre-requisites: For PhD students who are embarking on writing their thesis and who are writing in a second or third language
Course content: Course aims to develop an appropriate written style for thesis writing. By the end of this course, students will have (a) explored and clarified style in academic texts (b) developed their own written fluency, accuracy and style
Teaching: 8 hours of classes in the MT. 8 hours of classes in the LT. 4 hours of classes in the ST.

LN989
Examination Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Language Centre EAP Staff
Pre-requisites: For students who have received Academic Writing Departmental specific support in the Michaelmas and Lent Terms and who wish to receive continued support for exam writing.
Course content: By the end of this course, students will have developed their own written fluency, accuracy and style for examination purposes.
Teaching: 2 hours of classes in the ST.

LN991
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Mr Michael Beaney 20KSW.G.09
Pre-requisites: For students from the departments of Economic History, European Institute, Government, International History, International Relations, Institute of Public Affairs and Marshall Institute who speak English as a foreign language and require support when writing essays, exams and dissertations.
Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN992
Academic Writing

This information is for the 2017/18 session.
Teacher responsible: Mr Michael Mcgarvey TW3.6.0.1c
Pre-requisites: For students from the department of Law who speak English as a foreign language and require support when writing coursework essays, exam essays or dissertations.
Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN993
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Mr Christopher Sciberras TW3.6.0.1g
Pre-requisites: For students from the departments of Accounting, Economics, Finance, Mathematics and Statistics who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.
Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN994
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Mr James Pavitt TW3.6.0.1g
Pre-requisites: For students from the departments of Media & Communications and Psychological and Behavioural Science who speak English as a foreign language and require support with academic writing including coursework essays, exams and dissertations.
Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing in English (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN995
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Mr Simon Roberts TW3.6.0.1j
Pre-requisites: For students from the departments of Geography & Environment, International Development and Philosophy, Logic & Scientific Method who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.
Course content: By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical and grammatical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN996
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Ms Sarah Taylor TW3.6.0.1g
Pre-requisites: For students from the departments of Anthropology, Gender Studies, Social Policy, Health Policy and Sociology who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.
Course content: The course aims to develop the ability to write more effectively for academic purposes. By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

LN997
Academic Writing Skills

This information is for the 2017/18 session.
Teacher responsible: Mr Andrew Mitchell 20KSW.G.10
Pre-requisites: For students from the department of Management who speak English as a foreign language and require support with academic writing including coursework, exams and dissertations.
Course content: The course aims to develop the ability to write more effectively for academic purposes. By the end of the course, students will: (a) be familiar with the conventions of academic writing (b) have improved the accuracy, clarity and coherence of their written English (c) have practised clear organisation of texts and appropriate paragraphing (d) have extended their range of lexical expression (e) be able to evaluate their own writing (f) be able to write more fluently and confidently.
Teaching: 9 hours of classes in the MT. 9 hours of classes in the LT.

Teaching and Learning Centre Courses

Teaching and Learning Centre Courses

Key to MRes/PhD Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 17/18) means not available in the 2017/18 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

Undergraduate Learning Development Programme

This information is for the 2017/18 session.

Teacher responsible: Teaching and Learning Centre staff

Availability: All LSE academic and research staff are welcome and all events are free of charge, but booking for each event is required.

Pre-requisites: For some events, participants are requested to bring along current work and/or be prepared to participate actively.

Course content: This year-long series of interdisciplinary workshops is designed for academic and research staff who are keen to pursue professional development and enhance the impact of their teaching and research. Workshop subjects include:
- Understanding student learning: theory and practice;
- The core elements of good course design;
- Lecturing at LSE: new ideas and approaches;
- Research methods: teaching practice and exchange;
- Using the voice to engage and inspire.

Teaching: All events follow the dates of the LSE teaching year. Further details, and links to booking pages, can be found on the Atlas https://info.lse.ac.uk/staff/divisions/Teaching-and-Learning-Centre/TLC-events-and-workshops/Atlas page.

Assessment: There is no formal assessment for this course.

TC501 2.0 Units
Postgraduate Certificate in Higher Education Part 1 (Associate Level)

This information is for the 2017/18 session.

Teacher responsible: Dr Colleen McKenna

Pre-requisites: Participants are required to be teaching for a minimum of 20 hours during the academic year in which they are enrolled.

Course content: This is a course tailored for those working as GTAs at LSE. Its purpose is to develop participants' confidence in leading classes and seminars and assessing student work. The course also enables participants to reflect on their teaching and to explore diverse ways of gathering feedback from peers and students. Additionally, participants have the opportunity to reflect on broader issues and developments in the HE sector.
The programme comprises 3 modules, selected from the following:
- small group teaching (compulsory)
- student learning
- evaluating teaching
- assessment and feedback
- contemporary issues in Higher Education
- signature pedagogies

Participants will develop a portfolio of written tasks and reflections; all formative and summative assignments will be incorporated into the portfolio which is submitted at the end of the programme.
Successful participants will be awarded the Postgraduate Certificate in Higher Education - Associate level and are eligible for Associate Fellowship of the Higher Education Academy (HEA).

Teaching: 12 hours of workshops in the MT. 12 hours of workshops in the LT. 2 hours of workshops in the ST.
Please note that the exact breakdown of hours per term depends upon module selection.
Teaching for this course will take the form of 2-hour, interactive workshops. Moodle will also be used as a learning environment.

Formative coursework: Students will be expected to produce 1-2 pieces of coursework per module.
There are formative feedback points for each of the summative assignments.
Additionally, there are formative reflections at both the start and finish of the programme. These formative reflections, combined with the coversheets on the 3 summative essays, make up the learning log element of the course and contribute to the final portfolio submission. Throughout the formative texts are designed to encourage a reflexive approach to academic practice.

(2004) Teaching with integrity: the ethics of higher education practice. London: Routledge

Assessment:
Assessment path 1
Essay (34%, 2500 words) in January.
Essay (33%, 2500 words) in the LT.
Essay (33%, 2500 words) in the LT and ST.
Assessment path 2
Coursework (34%) in January.
Essay (33%, 2500 words) in the LT.
Essay (33%, 2500 words) in the LT and ST.
This course is assessed entirely by coursework - formative and summative. There are no exams.
All assignments are assessed on a Complete/Not Yet Complete basis, and all assessments are viewed as developmental opportunities. Participants are offered detailed feedback for all assignments and, where appropriate, they have the option of developing assignments further based on feedback from the teaching team.
The assignments include both essay-style written texts and reflective pieces. Additionally, there are some opportunities for choice within the assessment diet. For example, for module 1, participants can select either a reflective task plus a poster OR a 2500 written assignment.
Depending on module selection, participants may also undertake an annotated bibliography, bog posts and podcasts.

TC502 2.0 Units
Postgraduate Certificate in Higher Education Part 2 (Full Level)

This information is for the 2017/18 session.
Teacher responsible: Dr Colleen McKenna
Pre-requisites: Participants are required to have completed either the Postgraduate Certificate in Higher Education for Part 1 (Associate Level) or the Postgraduate Certificate in Higher Education for Career Track before enrolling on the Postgraduate Certificate in Higher Education Part 2 (Full Level).
Course content: This course builds upon the Postgraduate Certificate in Higher Education (Part 1) and offers participants an opportunity to explore and critique assessment and feedback practices and to design (or re-design) a course in their discipline drawing on principles of constructive alignment among other pedagogical approaches.
The programme comprises 2 modules from the following choices:
• course design (compulsory for those entering the programme from the TC501, GTA pathway)
• assessment and feedback
• contemporary issues in Higher Education
• signature pedagogies
Participants who have already completed the course design module on the PGCertHE (Career Track TC503) can also select an optional, enquiry-based module.
Successful participants will be awarded the Postgraduate Certificate in Higher Education - Full level and are eligible for full fellowship of the Higher Education Academy (HEA).
Teaching: 10 hours of workshops in the MT. 10 hours of workshops in the LT. 2 hours of workshops in the ST.
Please note that the exact breakdown of hours per term depends upon module selection.
Teaching for this course will take the form of interactive workshops. The majority of these will be 2 hours long; however, there will be a full day workshop on course design in Lent Term. Moodle will also be used as a learning environment.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, 1 piece of coursework in the ST and 1 presentation in the LT or ST.
There are formative feedback points for each of the summative assignments.
Additionally, there are formative reflections at both the start and finish of the programme. These formative reflections, combined with the coversheets on the 2 summative essays, make up the learning log element of the course and contribute to the final portfolio submission. Throughout the formative pieces are designed to encourage a reflexive approach to academic practice.
Indicative reading: Ashwin, P. (2015) Reflective teaching in higher education. London: Bloomsbury. Biggs, J (1996) 'Enhancing teaching through constructive alignment'. Towards a scholarship of assessment. Assessment & evaluation in higher education, 32 (2) 229-237. Wilson, M. & Scalise, K. (2006) Higher education. 52: 635 - 663.
Assessment:
Assessment path 1
Essay (50%, 2500 words) in January.
Essay (50%, 2500 words) in the ST.
Assessment path 2
Project (50%, 2500 words) in January.
Essay (50%, 2500 words) in the ST.
This course is assessed entirely by coursework - formative and summative. There are no exams.
All assignments are marked on a Complete/Not Yet Complete basis and all assessments are viewed as developmental opportunities. Participants are offered detailed feedback on all work and, where appropriate, they have the option of developing assignments further based on feedback from the teaching team and peers.
The assignments include both essay-style written texts and reflective pieces. Additionally, there are some opportunities for choice within the assessment diet. For example, the module on assessment and feedback, participants can select to do either a group project OR a 2500 word written assignment.
Depending on module selection, participants may also undertake an annotated bibliography, blogposts and podcasts.

TC503 2.0 Units
Postgraduate Certificate in Higher Education Career Track

This information is for the 2017/18 session.
Teacher responsible: Dr Claire Gordon
Availability: New career track members of faculty with fewer than three years' teaching experience in higher education and who do not hold an equivalent teacher development qualification have been required since 2009 to complete the Postgraduate Certificate in Higher Education before passing Interim Review. Faculty members with teaching responsibilities who have completed their PhD and have at least two to three years' teaching experience may also take this programme.
Pre-requisites: Participants will be career track academics at LSE - generally assistant professors, assistant professorial lecturers, fellows and research officers. They should have teaching responsibilities in the year that they will be taking the PGCertHE.
Course content: This practice-based programme is tailored for academics teaching at LSE. It is designed to develop participants' confidence in leading lectures, classes and seminars and in assessing student work. The programme also enables participants to reflect on their teaching and to explore diverse ways of gathering feedback on their practice from peers and students. The programme culminates in a course design project.
The programme comprises 3 modules, selected from the following:
• teaching in our disciplines (compulsory)
• course design (compulsory)
• student learning
• evaluating teaching
• assessment and feedback
• contemporary issues in Higher Education
• signature pedagogies
The programme is assessed by a portfolio of coursework including
• a set of short written tasks on disciplinary teaching and student learning;
• a short project on evaluating teaching;
• the design of a new course;
• two teaching observations;
• a reflective learning log.
Additionally, depending on module selection, participants may also undertake an annotated bibliography, blog posts and/or group project.
Participants are strongly encouraged to draw on their previous teaching experience both during discussions and in their assignments and to consider how this informs their practice at LSE.
Successful participants will be awarded the Postgraduate Certificate in Higher Education - and are eligible for fellowship of the Higher Education Academy (HEA).
Teaching: 6 hours of workshops in the MT. 7 hours and 30 minutes of workshops in the LT. 6 hours of workshops in the ST.

Teaching for this course will take the form of interactive workshops. Moodle will also be used as a learning environment. Additionally, participants have the opportunity to attend regular workshops offered as part of LSE's Atlas, which explore different aspects of teaching and learning linked to assignments.
Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, 1 piece of coursework in the LT, 1 piece of coursework in the ST and 1 presentation in the LT or ST.
There are formative feedback points for each of the summative assignments.
Additionally, there are formative reflections at both the start and finish of the programme. These formative reflections, combined with the coversheets on the summative essays, make up the learning log element of the course and contribute to the final portfolio submission. Finally, participants present their course design work and receive formative feedback from both members of the PGCertHE teaching team and peers.
Throughout, the formative pieces are designed to encourage a reflexive approach to academic practice.
Indicative reading: Ashwin, P. (2015) Reflective teaching in higher education. London: Bloomsbury. Berk, R. (2005) Survey of 12 strategies to measure teaching effectiveness. International journal of teaching and learning in higher education. 17 (1) 48-62. Biggs, J (1996) Enhancing teaching through constructive alignment. Higher education 32 (3) 347-364. (2003) Threshold concepts and troublesome knowledge: linkages to ways of thinking and practising within the disciplines. Occasional report 4: ETL project. Edinburgh.
Assessment:
Coursework (34%, 2300 words) in January.
Project (33%, 2000 words) in the LT.
Essay (33%, 2000 words) in the ST.
This course is assessed entirely by coursework - formative and summative. There are no exams.
All assignments are marked on a Complete/Not Yet Complete basis and all assessment are viewed as developmental opportunities. Participants are offered detailed feedback on all work and, where appropriate, they have the option of developing assignments further based of feedback from the teaching team and peers (Course design module).
The assignments include both essay-style written texts and reflective pieces.
