Undergraduate Programme Regulations

Key to Undergraduate Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 18/19) means not available in the 2018/19 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

BSc in Accounting and Finance

Programme Code: UBAF

Department: Accounting

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	AC100 Elements of Accounting and Finance (1.0)
Paper 2	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Papers 3 & 4	Route A - For students without Mathematics beyond GCSE level or equivalent: ST108 Statistical Methods for the Social Sciences (1.0) and MA110 Basic Quantitative Methods (1.0)

Or

Route B - For students with Mathematics beyond GCSE level or equivalent, one of the following options:

Either

Both of the following plus courses to the value of 1.0 unit from the Year 1 options list:

MA107 Quantitative Methods (Mathematics) (0.5) **and** ST107 Quantitative Methods (Statistics) (0.5)

Year 1 options list

Or

Both of the following:

ST102 Elementary Statistical Theory (1.0) **and** MA100 Mathematical Methods (1.0)

Year 2

Paper 5	AC200 Accounting Theory and Practice (1.0) (not available 2018/19)
Paper 6	FM212 Principles of Finance (1.0) or FM213 Principles of Finance (1.0) B
Paper 7	One of the following options: EC201 Microeconomic Principles I (1.0) or EC210 Macroeconomic Principles (1.0)
Paper 8	Courses to the value of 1.0 unit from the following (if not already taken under Paper 7):

Year 2 options list

Year 3

Paper 9	AC331 Contemporary Issues in Financial Reporting (0.5) (not available 2018/19) And Either: AC311 Financial Management and Organisational Control (0.5) (not available 2018/19) or AC341 Auditing, Risk Management and Governance (0.5) (not available 2018/19)
Paper 10	Courses to the value of 1.0 unit from the following (if not already taken under Paper 9): AC311 Financial Management and Organisational Control (0.5) (not available 2018/19) AC312 Contemporary Issues in Management Accounting (0.5) (not available 2018/19)

AC332	Financial Statement Analysis and Valuation (0.5) (not available 2018/19)
AC341	Auditing, Risk Management and Governance (0.5) (not available 2018/19)
AC342	Accounting, Corporate Responsibility and Sustainability (0.5) (not available 2018/19)
Paper 11	FM300 Corporate Finance, Investments and Financial Markets (1.0)

Paper 12 Courses to the value of 1.0 unit from the following (if not already taken under Paper 9 or Paper 10):

Year 3 options list

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Year 1 options list

GV101	Introduction to Political Science (1.0)
GY121	Sustainable Development (1.0)
LL104	Law of Obligations (1.0)
MG104	Operations Management (0.5) and MG105 Organisational Behaviour and Leadership (0.5)
PH101	Logic (1.0)

Year 2 options list

EC201	Microeconomic Principles I (1.0)
EC210	Macroeconomic Principles (1.0)
EC220	Introduction to Econometrics (1.0)
EH240	Business and Economic Performance since 1945: Britain in International Context (1.0)
GV227	The Politics of Economic Policy (1.0) (not available 2018/19)
GY202	Introduction to Global Development (1.0)
GY222	Applied Environmental Economics (1.0)
LL203	Law of Business Associations (Company Law) (1.0)
MA231	Operational Research Methods (1.0)
MG205	Econometrics: Theory and Applications (1.0)
MG212	Marketing (0.5)
ST201	Statistical Models and Data Analysis (0.5)

Year 3 options list

AC311	Financial Management and Organisational Control (0.5) (not available 2018/19)
AC312	Contemporary Issues in Management Accounting (0.5) (not available 2018/19)
AC332	Financial Statement Analysis and Valuation (0.5) (not available 2018/19)
AC341	Auditing, Risk Management and Governance (0.5) (not available 2018/19)
AC342	Accounting, Corporate Responsibility and Sustainability (0.5) (not available 2018/19)
FM320	Quantitative Finance (1.0)
GY326	Sustainable Business and Finance (0.5)
GY327	Global Environmental Governance (0.5)
LL293	Tax and Tax Avoidance (1.0)
MA300	Game Theory (1.0)
MG303	International Business Strategy and Emerging Markets (0.5)
MG305	Innovation and Technology Management (0.5)
ST309	Elementary Data Analytics (0.5)

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guide for further information.

B: FM212 and FM213 course choice depends on Mathematics and Statistics courses taken by students in their first year. See course guides for further information.

means there may be prerequisites for this course. Please view the course guide for more information.

Accreditation: Accredited by the following bodies for the purpose of exemptions from some professional examinations:

6 Undergraduate Programme Regulations

- Association of Chartered Certified Accountants (ACCA).
 - Chartered Institute of Management Accountants (CIMA) through the Accredited degree accelerated route.
 - Chartered Institute of Public Finance and Accountancy (CIPFA).
 - Institute of Chartered Accountants in England and Wales (ICAEW).
- Further information is available from the Department of Accounting (accounting@lse.ac.uk) or the BSc in Accounting and Finance homepage lse.ac.uk/study-at-lse/Undergraduate/Degree-programmes-2018/BSc-Accounting-and-Finance.
- Note for prospective students:** For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Accounting and Finance

Programme Code: UBAF

Department: Accounting

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1

Paper 12	Courses to the value of 1.0 unit(s) from the following: AC310 Management Accounting, Financial Management and Organisational Control (1.0) AC340 Auditing, Governance and Risk Management (1.0) EC201 Microeconomic Principles I (1.0) EC210 Macroeconomic Principles (1.0) EC220 Introduction to Econometrics (1.0) EC221 Principles of Econometrics (1.0) EH207 The Making of an Economic Superpower: China since 1850 (1.0) FM300 Corporate Finance, Investments and Financial Markets (1.0) FM320 Quantitative Finance (1.0) LL209 Commercial and Enterprise Law (1.0) (withdrawn 2018/19) MA231 Operational Research Methods (1.0) MG203 Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)

Or

Courses to the value of 1.0 unit(s) from the following: G	
EC315 International Economics (1.0)	
EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)	
LN320 Spanish Language and Society 5 (mastery) (1.0)	
LN330 French Language and Society 5 (mastery) (1.0)	
MA207 Further Quantitative Methods (Mathematics) (0.5)	
MA212 Further Mathematical Methods (1.0)	
MA300 Game Theory (1.0)	
MA301 Game Theory I (0.5)	
MA303 Chaos in Dynamical Systems (0.5)	
MG206 Firms, Management and Competitive Advantage (0.5)	
MG302 Topics in Management Research (0.5)	
SO203 Political Sociology (1.0)	
ST201 Statistical Models and Data Analysis (0.5)	
ST307 Aspects of Market Research (0.5)	
ST308 Bayesian Inference (0.5)	

Undergraduate Outside Options List (Years 2 & 3)

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.
Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guide for further information.
B: ST108 must be taken by those students who have not studied Mathematics beyond GCSE level or equivalent.
C: MA100 must be selected if ST102 was taken in Paper 3.
D: MA110 must be taken by those students who

have not studied Mathematics beyond GCSE level or equivalent. It must be selected if ST108 was taken in Paper 3.

E: FM212 and FM213 course choice depends on Mathematics and Statistics courses taken by students in their first year. See course guides for further information.

F: A student may take approved papers to the value of one unit from the Undergraduate Outside Options List (normally papers available only to second or third year students), but permission must be sought from the Departmental Tutor.

G: In exceptional circumstances a student may take a course from the undergraduate outside options list (normally papers available only to second or third year students), but permission will need to be sought from the Departmental Tutor.

means there may be prerequisites for this course. Please view the course guide for more information. Graduates from this programme may be eligible for exemptions subject to certain requirements as set by professional bodies such as the ACCA, CIMA, CIPFA and ICAEW. Further information is available from the Department of Accounting (accounting@lse.ac.uk) or the BSc in Accounting and Finance webpage lse.ac.uk/Study-at-LSE/Undergraduate/Degree-programmes-2017/BSc-Accounting-and-Finance.

Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)

Undergraduate Outside Options List (Years 2 & 3)

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. Please view the course guides for further information.

B: Courses chosen from the Undergraduate Outside Options List must be discussed with the Academic Mentor.

means there may be prerequisites for this course. Please view the course guide for more information.

Exemptions: FM213 could lead to an exemption of CB1 (CT2 for pre-2019 syllabus) for students who have chosen AC102 and AC103 (or AC104).

Either ST300 or ST306 or ST308 needs to be chosen for exemption of CS1.

Two courses among ST303, ST304, ST306, ST326 need to be chosen for exemption of CS2.

Both ST226 and ST301 need to be chosen for exemption of CM1.

Both ST306 and ST330 need to be chosen for exemption of CM2.

Accreditation: Accredited by the Chartered Institute of Management Accountants (CIMA) for the purpose of exemption from some professional examinations through the Accredited degree accelerated route. Accredited by the Institute and Faculty of Actuaries for the purpose of exemption from some professional examinations. Accredited by the Royal Statistical Society (RSS) for the purpose of eligibility for Graduate Statistician status. Further information is available on the Department of Statistics website lse.ac.uk/statistics/study/prospective/UG-Programmes/exemptions.aspx or on the Undergraduate programme accreditation and exemptions website lse.ac.uk/Statistics/Study/BSc-programmes/Undergraduate-programme-accreditation-and-exemptions.

BSc in Actuarial Science

Programme Code: UBACT2

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: FM213 could lead to an exemption of CB1 (CT2 for pre-2019 syllabus) for students who have chosen AC102 and AC103 (or AC104).

B: EC102 course allocation dependent on Economics A-level or equivalent background. Please view the course guides for further information.

C: Courses chosen from the Undergraduate Outside Options List must be discussed with the Academic Mentor.

D: FM213 could lead to an exemption of CB1 (CT2 for pre-2019 syllabus) for students who have chosen AC102 and AC103 (or AC104).

E: Either ST300 or ST308 needs to be chosen for exemption of CT6.

F: Either ST300 or ST308 needs to be chosen for exemption of CT6.

means there may be prerequisites for this course. Please view the course guide for more information.

Notes

This programme is externally accredited by the Institute and Faculty of Actuaries. Further information is available on the Department of Statistics website lse.ac.uk/statistics/study/prospective/UG-Programmes/exemptions.aspx.

BSc in Actuarial Science

Programme Code: UBACT2

Department: Statistics

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	ST102 Elementary Statistical Theory (1.0)
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	AC104 Elements of Accounting, Financial Institutions and Financial Management (1.0) A (withdrawn 2018/19) or MA103 Introduction to Abstract Mathematics (1.0)
Paper 4	EC100 Economics A (1.0) or EC102 Economics B (1.0) B

Year 2

Paper 5	ST202 Probability, Distribution Theory and Inference (1.0)
Paper 6	MA212 Further Mathematical Methods (1.0)
Paper 7	ST226 Actuarial Investigations: Financial (0.5) and ST227 Survival Models (0.5)
Paper 8	Courses to the value of 1.0 unit(s) from the following: C AC102 Elements of Financial Accounting (0.5) AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) AC104 Elements of Accounting, Financial Institutions and Financial Management (1.0) (withdrawn 2018/19) FM213 Principles of Finance (1.0) D MA103 Introduction to Abstract Mathematics (1.0) MA203 Real Analysis (0.5)

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9	ST301 Actuarial Mathematics (Life) (0.5) and ST302 Stochastic Processes (0.5)
Paper 10	ST330 Stochastic and Actuarial Methods in Finance (1.0)

Or

Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)

Undergraduate Outside Options List (Years 2 & 3)

Paper 11	Courses to the value of 1.0 unit(s) from the following: ST300 Regression and Generalised Linear Models (0.5) ST303 Stochastic Simulation (0.5) ST304 Time Series and Forecasting (0.5) ST306 Actuarial Mathematics (General) (0.5) ST308 Bayesian Inference (0.5) ST326 Financial Statistics (0.5) (not available 2018/19)
----------	--

Or

Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved

by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)

Undergraduate Outside Options List (Years 2 & 3)

Paper 12	Courses to the value of 1.0 unit(s) from the following: MA203 Real Analysis (0.5) MA208 Optimisation Theory (0.5) MA209 Differential Equations (0.5) MA313 Probability for Finance (0.5) MA318 History of Mathematics in Finance and Economics (0.5) ST300 Regression and Generalised Linear Models (0.5) E ST303 Stochastic Simulation (0.5) ST306 Actuarial Mathematics (General) (0.5) ST308 Bayesian Inference (0.5) F ST312 Applied Statistics Project (0.5) ST326 Financial Statistics (0.5) (not available 2018/19)
----------	---

Or

Courses to the value of 1.0 unit(s) from the following: (please note that students can replace Papers 10, 11 or 12 with subjects to the value of one unit approved by their tutor from the Undergraduate Outside Options List, but this will affect exemptions from examinations set by the Institute and Faculty of Actuaries)

Undergraduate Outside Options List (Years 2 & 3)

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: FM212 could lead to an exemption of CT2 for students who have chosen AC104.

B: EC102 course allocation dependent on Economics A-level or equivalent background. Please view the course guides for further information.

C: Courses chosen from the Undergraduate Outside Options List must be discussed with the Academic Mentor.

D: FM213 could lead to an exemption of CB1 (CT2 for pre-2019 syllabus) for students who have chosen AC102 and AC103 (or AC104).

E: Either ST300 or ST308 needs to be chosen for exemption of CT6.

F: Either ST300 or ST308 needs to be chosen for exemption of CT6.

means there may be prerequisites for this course.

Please view the course guide for more information.

This programme is externally accredited by the Institute and Faculty of Actuaries. Further information is available on the Department of Statistics website lse.ac.uk/statistics/study/prospective/UG-Programmes/exemptions.aspx.

BA in Anthropology and Law

Programme Code: UBANLL2

Department: Anthropology

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	AN100 Introduction to Social Anthropology (1.0)
---------	---

Paper 2	AN101	Ethnography and Theory: Selected Texts (1.0)
Paper 3	LL106	Public Law (1.0)
Paper 4	LL105	Property I (0.5) and LL109 Introduction to the Legal System (0.5)
Skills course	LL100	Foundational Legal Skills (0.0) A

Year 2

Paper 5	AN226	Political and Legal Anthropology (1.0)
Paper 6	LL108	Criminal Law (1.0)
Paper 7	LL104	Law of Obligations (1.0)
Paper 8	Courses to the value of 1.0 unit(s) from the following: B	

Anthropology Selection List A**Anthropology Selection List B****Year 3**

Paper 9	LL232	Law and Institutions of the European Union (1.0)
Paper 10	LL275	Property II (1.0)
Paper 11	Courses to the value of 1.0 unit(s) from the following: Law Selection List	
Paper 12	Courses to the value of 1.0 unit(s) from the following: C	

Anthropology Selection List A**Anthropology Selection List B****Anthropology Selection List C**

Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.	
--------------	---	--

Anthropology Selection List A

AN205	The Anthropology of Melanesia (0.5) (not available 2018/19)	
AN216	Cognition and Anthropology: Human Development in Cultural Environments (0.5) (not available 2018/19)	
AN221	The Anthropology of Christianity (0.5)	
AN223	The Anthropology of Southeast Asia (0.5)	
AN237	The Anthropology of Development (0.5)	
AN238	Anthropology and Human Rights (0.5) (withdrawn 2018/19)	
AN240	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2018/19)	
AN243	Children and Youth in Contemporary Ethnography (0.5)	
AN244	Anthropology and Media (0.5) (not available 2018/19)	
AN245	Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)	
AN247	Anthropological Approaches to Questions of Being (0.5)	
AN250	The Anthropology of South Asia (0.5)	
AN251	Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (0.5) (not available 2018/19)	
AN252	Anthropological Approaches to Value (0.5) (not available 2018/19)	
AN269	The Anthropology of Amazonia (0.5) (not available 2018/19)	
AN274	Subjectivity and Anthropology (0.5) (not available 2018/19)	
AN275	The Anthropology of Revolution (0.5) (not available 2018/19)	
AN276	Anthropology and the Anthropocene (0.5) (not available 2018/19)	
AN277	Topics in the Anthropology of sub-Saharan Africa (0.5)	
AN278	Anthropology and Global History (0.5)	
AN298	Research Methods in Social Anthropology (0.5)	

Anthropology Selection List B

AN200	The Anthropology of Kinship, Sex and Gender (1.0)	
AN256	Economic Anthropology (1): Production and Exchange (0.5)	
AN357	Economic Anthropology (2): Transformation and Globalisation (0.5)	

Anthropology Selection List C

AN300	Advanced Theory of Social Anthropology (1.0)	
AN301	The Anthropology of Religion (1.0)	

Law Selection List

LL201	Administrative Law (1.0)	
LL202	Commercial Contracts (1.0)	
LL203	Law of Business Associations (Company Law) (1.0)	
LL204	Advanced Torts (1.0)	
LL205	Medical Law (1.0)	
LL207	Civil Liberties and Human Rights (1.0)	
LL210	Information Technology and the Law (1.0)	
LL212	Conflict of Laws (1.0)	
LL221	Family Law (1.0)	
LL233	Law of Evidence (1.0)	
LL241	European Legal History (1.0) (not available 2018/19)	
LL242	International Protection of Human Rights (1.0)	
LL250	Law and The Environment (1.0)	
LL251	Intellectual Property Law (1.0)	
LL257	Employment Law (1.0)	
LL259	Legal and Social Change since 1750 (1.0)	
LL272	Outlines of Modern Criminology (0.5)	
LL278	Public International Law (1.0)	
LL284	Topics in Sentencing and Criminal Justice (0.5)	
LL293	Tax and Tax Avoidance (1.0)	
LL295	Media Law (1.0)	
LL300	Competition Law (1.0)	
LL301	Global Commodities Law (1.0)	
LL305	Jurisprudence (1.0)	

Notes

A: LL100 is compulsory but does not affect the final degree classification.

B: No more than one unit taken under Papers 8 and 12 may be selected from Anthropology Selection List A.

C: No more than one unit taken under Papers 8 and 12 may be selected from Anthropology Selection List A.

means there may be prerequisites for this course.

Please view the course guide for more information.

Accreditation: The qualifying law degree (QLD) is recognised by the Solicitors Regulation Authority www.sra.org.uk/consumers/consumers.page (SRA) for the purposes of satisfying the academic stage of training. Accredited by the Bar Standards Board www.barstandardsboard.org.uk/ for the purpose of a Qualifying Law Degree. Further information is available by emailing anthropology.enquiries@lse.ac.uk or accessing the Anthropology Department website lse.ac.uk/anthropology/degree_programmes/degree_programmes_home.aspx.

BSc in Business Mathematics and Statistics

Programme Code: UBBMS2

Department: Statistics

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1	
Paper 1	ST102 Elementary Statistical Theory (1.0)
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 4	AC100 Elements of Accounting and Finance (1.0) or MA103 Introduction to Abstract Mathematics (1.0)

Year 2

Paper 5	MA212 Further Mathematical Methods (1.0)
Papers 6 & 7	Either ST202 Probability, Distribution Theory and Inference (1.0) and ST211 Applied Regression (0.5)

And courses to the value of 0.5 unit(s) from the following:

MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
ST205	Sample Surveys and Experiments (0.5)
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)

Or

ST206	Probability and Distribution Theory (0.5) and ST211 Applied Regression (0.5)
-------	--

And courses to the value of 1.0 unit(s) from the following:

MA103	Introduction to Abstract Mathematics (1.0)
MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
ST205	Sample Surveys and Experiments (0.5)
ST226	Actuarial Investigations: Financial (0.5)

14 Undergraduate Programme Regulations

Paper 8	ST227 Survival Models (0.5)
	Courses to the value of 1.0 unit(s) from the following: B
	AC102 Elements of Financial Accounting (0.5)
	AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
	AC104 Elements of Accounting, Financial Institutions and Financial Management (1.0) (withdrawn 2018/19)
	AC211 Managerial Accounting (1.0)
	EC201 Microeconomic Principles I (1.0)
	EC202 Microeconomic Principles II (1.0)
	EC210 Macroeconomic Principles (1.0)
	FM213 Principles of Finance (1.0)
	MA231 Operational Research Methods (1.0)
	MG203 Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)
	MG206 Firms, Management and Competitive Advantage (0.5)
	MG207 Managerial Economics (1.0)
	MG302 Topics in Management Research (0.5)
	SA224 Introduction to Global Population Change (1.0)

Undergraduate Outside Options List (Years 2 & 3)

Year 3	
Paper 9	Courses to the value of 1.0 unit(s) from the following:
	ST300 Regression and Generalised Linear Models (0.5)
	ST301 Actuarial Mathematics (Life) (0.5)
	ST302 Stochastic Processes (0.5)
	ST304 Time Series and Forecasting (0.5)
	ST306 Actuarial Mathematics (General) (0.5)
	ST308 Bayesian Inference (0.5)
Paper 10	Courses to the value of 1.0 unit(s) from the following:
	MA203 Real Analysis (0.5)
	MA208 Optimisation Theory (0.5)
	MA209 Differential Equations (0.5)
	MA211 Algebra and Number Theory (0.5)
	MA300 Game Theory (1.0) 1
	MA301 Game Theory I (0.5) 2
	MA303 Chaos in Dynamical Systems (0.5)
	MA305 Optimisation in Function Spaces (0.5)
	MA310 Mathematics of Finance and Valuation (0.5)
	MA313 Probability for Finance (0.5)
	MA314 Algorithms and Programming (0.5)
	MA315 Algebra and its Applications (0.5)
	MA317 Complex Analysis (0.5)
	MA318 History of Mathematics in Finance and Economics (0.5)
	MA319 Partial Differential Equations (0.5)
	MA331 Practical Optimisation Modelling (0.5) C (not available 2018/19)
	ST307 Aspects of Market Research (0.5) 3
	ST312 Applied Statistics Project (0.5)
	ST327 Market Research: An Integrated Approach (1.0) 4
	ST330 Stochastic and Actuarial Methods in Finance (1.0) 56

Paper 9 options list

Paper 11	Courses to the value of 1.0 unit(s) from the following: D
	AC211 Managerial Accounting (1.0)
	AC310 Management Accounting, Financial Management and Organisational Control (1.0)
	AC330 Financial Accounting, Analysis and Valuation. (1.0)
	AC340 Auditing, Governance and Risk Management (1.0)
	EC202 Microeconomic Principles II (1.0)
	EC210 Macroeconomic Principles (1.0)
	EC321 Monetary Economics (1.0)
	FM213 Principles of Finance (1.0)

FM300	Corporate Finance, Investments and Financial Markets (1.0)
FM320	Quantitative Finance (1.0) 7
LL209	Commercial and Enterprise Law (1.0) (withdrawn 2018/19)
LL210	Information Technology and the Law (1.0)
MA231	Operational Research Methods (1.0)
MG203	Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)
MG206	Firms, Management and Competitive Advantage (0.5)
MG207	Managerial Economics (1.0)
MG212	Marketing (0.5)
MG302	Topics in Management Research (0.5)
MG307	International Context of Management (0.5) 8 (not available 2018/19)
MG315	Marketing Action Learning Project (0.5) E

	This programme has been retitled to BSc in Mathematics, Statistics, and Business for 2018/19. Last year of entry 2017/18.

BSc in Business Mathematics and Statistics

Programme Code: UBBMS2

Department: Statistics

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1	
Paper 1	ST102 Elementary Statistical Theory (1.0)
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 4	AC100 Elements of Accounting and Finance (1.0) or MA103 Introduction to Abstract Mathematics (1.0)
Year 2	
Paper 5	MA212 Further Mathematical Methods (1.0)
Papers 6 & 7	Either ST202 Probability, Distribution Theory and Inference

	(1.0) and ST211 Applied Regression (0.5) and one half unit from the list below:
MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
ST205	Sample Surveys and Experiments (0.5)
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)
Or	
ST206	Probability and Distribution Theory (0.5) and ST211 Applied Regression (0.5)
and	courses to the value of one full unit from the list below:
MA103	Introduction to Abstract Mathematics (1.0)
MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
ST205	Sample Surveys and Experiments (0.5)
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)
Or	
ST205	Sample Surveys and Experiments (0.5) and ST211 Applied Regression (0.5)
and	courses to the value of one full unit from the list below:
MA103	Introduction to Abstract Mathematics (1.0)
MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
ST206	Probability and Distribution Theory (0.5)
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)
Paper 8	Courses to the value of 1.0 unit(s) from the following: B
	AC100 Elements of Accounting and Finance (1.0)
	AC104 Elements of Accounting, Financial Institutions and Financial Management (1.0) (withdrawn 2018/19)
	AC211 Managerial Accounting (1.0)
	EC201 Microeconomic Principles I (1.0)
	EC202 Microeconomic Principles II (1.0)
	EC210 Macroeconomic Principles (1.0)
	FM212 Principles of Finance (1.0)
	MA231 Operational Research Methods (1.0)
	MG203 Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)
	MG206 Firms, Management and Competitive Advantage (0.5)
	MG207 Managerial Economics (1.0)
	MG302 Topics in Management Research (0.5)
	SA224 Introduction to Global Population Change (1.0)

Undergraduate Outside Options List (Years 2 & 3)

Year 3	
Paper 9	Courses to the value of 1.0 unit(s) from the following:
	ST300 Regression and Generalised Linear Models (0.5)
	ST301 Actuarial Mathematics (Life) (0.5)
	ST302 Stochastic Processes (0.5)
	ST304 Time Series and Forecasting (0.5)
	ST306 Actuarial Mathematics (General) (0.5)
	ST307 Aspects of Market Research (0.5) 1
	ST308 Bayesian Inference (0.5)
	ST312 Applied Statistics Project (0.5)
	ST327 Market Research: An Integrated Approach (1.0) 2
Paper 10	Courses to the value of 1.0 unit(s) from the following:

MA203	Real Analysis (0.5)
MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
MA300	Game Theory (1.0) 3
MA301	Game Theory I (0.5) 4
MA303	Chaos in Dynamical Systems (0.5)
MA305	Optimisation in Function Spaces (0.5)
MA310	Mathematics of Finance and Valuation (0.5)
MA313	Probability for Finance (0.5)
MA314	Algorithms and Programming (0.5)
MA315	Algebra and its Applications (0.5)
MA317	Complex Analysis (0.5)
MA318	History of Mathematics in Finance and Economics (0.5)
MA319	Partial Differential Equations (0.5)
MA331	Practical Optimisation Modelling (0.5) C (not available 2018/19)
MG308	Simulation Modelling and Analysis (0.5)
ST330	Stochastic and Actuarial Methods in Finance (1.0) 56

Paper 9 options list

Paper 11	Courses to the value of 1.0 unit(s) from the following: D
AC211	Managerial Accounting (1.0)
AC310	Management Accounting, Financial Management and Organisational Control (1.0)
AC330	Financial Accounting, Analysis and Valuation. (1.0)
AC340	Auditing, Governance and Risk Management (1.0)
EC202	Microeconomic Principles II (1.0)
EC210	Macroeconomic Principles (1.0)
EC321	Monetary Economics (1.0)
FM213	Principles of Finance (1.0)
FM300	Corporate Finance, Investments and Financial Markets (1.0)
FM320	Quantitative Finance (1.0) 7
LL209	Commercial and Enterprise Law (1.0) (withdrawn 2018/19)
LL210	Information Technology and the Law (1.0)
MA231	Operational Research Methods (1.0)
MG203	Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)
MG206	Firms, Management and Competitive Advantage (0.5)
MG207	Managerial Economics (1.0)
MG212	Marketing (0.5)
MG302	Topics in Management Research (0.5)
MG307	International Context of Management (0.5) 8 (not available 2018/19)
MG315	Marketing Action Learning Project (0.5) E

Paper 9 options list**Paper 10 options list****Undergraduate Outside Options List (Years 2 & 3)**

Paper 12	Courses to the value of 1.0 unit(s) from the following:
AC211	Managerial Accounting (1.0)
AC310	Management Accounting, Financial Management and Organisational Control (1.0)
AC330	Financial Accounting, Analysis and Valuation. (1.0)
AC340	Auditing, Governance and Risk Management (1.0)
EC202	Microeconomic Principles II (1.0)
EC210	Macroeconomic Principles (1.0)
EC221	Principles of Econometrics (1.0)
EC313	Industrial Economics (1.0)
EC321	Monetary Economics (1.0)
FM213	Principles of Finance (1.0)
FM300	Corporate Finance, Investments and

	Financial Markets (1.0)
FM320	Quantitative Finance (1.0) 9
ST202	Probability, Distribution Theory and Inference (1.0)
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)

Paper 9 options list**Paper 10 options list****Notes**

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 9 options list

ST300	Regression and Generalised Linear Models (0.5)
ST301	Actuarial Mathematics (Life) (0.5)
ST302	Stochastic Processes (0.5)
ST304	Time Series and Forecasting (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: In exceptional circumstances a student may substitute a paper from the Undergraduate Outside Options List for Paper 11. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

means there may be prerequisites for this course.

Please view the course guide for more information.

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: In exceptional circumstances a student may substitute a paper from the Undergraduate Outside Options List for Paper 11. This outside paper should be both of an advanced nature and coherent with the student's other choice of papers. Permission to take such a paper should first be obtained from the Departmental Tutor who must countersign the Additional Permission Form. Any subsequent revision to the student's choice of papers must also be countersigned by the Departmental Tutor.

means there may be prerequisites for this course. Please view the course guide for more information.

BSc in Econometrics and Mathematical Economics

Programme Code: UBEM

Department: Economics

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	ST102 Elementary Statistical Theory (1.0)
Paper 4	Courses to the value of 1.0 unit(s) from the following: Undergraduate Outside Options List (Year 1)

Year 2

Paper 5	EC202 Microeconomic Principles II (1.0)
Paper 6	EC210 Macroeconomic Principles (1.0)
Paper 7	EC221 Principles of Econometrics (1.0)
Paper 8	Courses to the value of 1.0 unit(s) from the following: Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9	Courses to the value of 1.0 unit(s) from the following: EC309 Econometric Theory (1.0) EC319 Games and Economic Behaviour (1.0) EC333 Problems of Applied Econometrics (1.0)
Paper 10	Courses to the value of 1.0 unit(s) from the following: Econometrics and Mathematical Economics Selection List
Paper 11	Courses to the value of 1.0 unit(s) from the following: B EC309 Econometric Theory (1.0) EC319 Games and Economic Behaviour (1.0) EC333 Problems of Applied Econometrics (1.0) Econometrics and Mathematical Economics Selection List Undergraduate Outside Options List (Years 2 & 3)
Paper 12	EC331 Quantitative Thesis (1.0)

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Econometrics and Mathematical Economics Selection List

AC211	Managerial Accounting (1.0)
AC310	Management Accounting, Financial Management and Organisational Control (1.0)
AC340	Auditing, Governance and Risk Management (1.0) ~A
EC210	Macroeconomic Principles (1.0)
EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)
EC303	Economic Policy Analysis (1.0) (withdrawn 2018/19)
EC307	Development Economics (1.0)
EC310	Behavioural Economics (1.0)
EC311	History of Economics: How Theories Change (1.0)
EC313	Industrial Economics (1.0)
EC315	International Economics (1.0)
EC317	Labour Economics (1.0)
EC321	Monetary Economics (1.0)
EC325	Public Economics (1.0)
FM213	Principles of Finance (1.0)
FM300	Corporate Finance, Investments and Financial Markets (1.0) ~B
FM320	Quantitative Finance (1.0) ~C
MA231	Operational Research Methods (1.0)
MA300	Game Theory (1.0)
MA331	Practical Optimisation Modelling (0.5) ~D (not available 2018/19)
PH311	Philosophy of Economics (1.0)
ST202	Probability, Distribution Theory and Inference (1.0)

Notes for Econometrics and Mathematical Economics Selection List ~A: Students may take only one of AC211, AC310 and AC340 in Year 3. ~B: FM300 can only be taken if FM213 is taken in the second year. ~C: FM320 can only be taken if FM213 is taken in the second year. Students may take only one of FM213, FM300 and FM320 in Year 3. ~D: MA331 is available in the third year only. ~A: Students may take only one of AC211, AC310 and AC340 in Year 3. ~B: FM300 can only be taken if FM213 is taken in the second year. ~C: FM320 can only be taken if FM213 is taken in the second year. Students may take only one of FM213, FM300 and FM320 in Year 3. ~D: MA331 is available in the third year only. ~A: Students may take only one of AC211, AC310 and AC340 in Year 3. ~B: FM300 can only be taken if FM213 is taken in the second year. ~C: FM320 can only be taken if FM213 is taken in the second year. Students may take only one of FM213, FM300 and FM320 in Year 3. ~D: MA331 is available in the third year only.

BSc in Economic History

Programme Code: UBEH

Department: Economic History

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Additional course The following unassessed course is strongly recommended for all first year students:

Paper 1 EH103 Making Economic History Count (0.0)

Paper 1 EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)

Paper 2 EC100 Economics A (1.0) **or**
EC102 Economics B (1.0) A

Paper 3 EH102 Pre-industrial Economic History (1.0)

Paper 4 Courses to the value of 1.0 unit(s) from the following:
Undergraduate Outside Options List (Year 1)

Year 2

Paper 5 EH237 Theories and Evidence in Economic History (1.0)

Papers 6 & 7 Courses to the value of 2.0 unit(s) from the following:

EH204 Money and Finance: From the Middle Ages to Modernity (1.0)

EH207 The Making of an Economic Superpower: China since 1850 (1.0)

EH208 Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0)

EH211 Africa and the World Economy, 1500-2000 (1.0)

EH225 Latin America and the International Economy (1.0)

EH238 The Origins of Growth (1.0)

EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

Paper 8 Courses to the value of 1.0 unit(s) from the following:
B

Papers 6 & 7 options list

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Papers 9 & 10 Courses to the value of 2.0 unit(s) from the following:

EC311 History of Economics: How Theories Change (1.0)

EH304 The Economic History of North America: from Colonial Times to the Cold War (1.0)

EH306 Monetary and Financial History since 1750 (1.0)

EH307 The Economic History of South Asia, 1600-2000 (1.0)

EH308 Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries (1.0)

EH309 Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)

EH311 Atlantic World Slavery (1.0)

EH325 Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth (1.0)

EH326 Innovation and its Finance in the 19th and 20th Centuries (1.0) (not available 2018/19)

EH327 China's Traditional Economy and its Growth

20 Undergraduate Programme Regulations

Paper 11	in the Very Long-Term (1.0) Courses taught by the Department of Economic History to the value of 1.0 unit(s) from the following: Papers 6 & 7 options list Papers 9 & 10 options list
Paper 12	EH390 Dissertation in Economic or Social History (1.0)
Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Papers 6 & 7 options list

EH204	Money and Finance: From the Middle Ages to Modernity (1.0)
EH207	The Making of an Economic Superpower: China since 1850 (1.0)
EH208	Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0)

	EH204	Money and Finance: From the Middle Ages to Modernity (1.0)
	EH207	The Making of an Economic Superpower: China since 1850 (1.0)
	EH208	Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0)
	EH211	Africa and the World Economy, 1500-2000 (1.0)
	EH225	Latin America and the International Economy (1.0)
	EH238	The Origins of Growth (1.0)
	EH240	Business and Economic Performance since 1945: Britain in International Context (1.0)

Year 3		
Paper 9	Courses	to the value of 1.0 unit(s) from the following:
	EC220	Introduction to Econometrics (1.0)
	Economics Selection List A	
Paper 10	Courses	to the value of 1.0 unit(s) from the following: B
	Economics Selection List A	
	Undergraduate Outside Options List (Years 2 & 3)	
Paper 11	Courses	to the value of 1.0 unit(s) from the following:
	EC311	History of Economics: How Theories Change (1.0)
	EH304	The Economic History of North America: from Colonial Times to the Cold War (1.0)
	EH306	Monetary and Financial History since 1750 (1.0)
	EH307	The Economic History of South Asia, 1600-2000 (1.0)
	EH308	Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries (1.0)
	EH309	Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)
	EH311	Atlantic World Slavery (1.0)
	EH325	Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth (1.0)
	EH326	Innovation and its Finance in the 19th and 20th Centuries (1.0) (not available 2018/19)
	EH327	China's Traditional Economy and its Growth in the Very Long-Term (1.0)
Paper 12	EH390	Dissertation in Economic or Social History (1.0)

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Economics Selection List A

EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)
EC303	Economic Policy Analysis (1.0) (withdrawn 2018/19)
EC307	Development Economics (1.0)
EC311	History of Economics: How Theories Change (1.0)
EC313	Industrial Economics (1.0)
EC315	International Economics (1.0)
EC317	Labour Economics (1.0)
EC321	Monetary Economics (1.0)
EC325	Public Economics (1.0)
EC333	Problems of Applied Econometrics (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: Courses chosen from the undergraduate outside options list would normal be courses that are available to second or third year students.

means there may be prerequisites for this course. Please view the course guide for more information.

Notes

BSc in Economics and Economic History

Programme Code: UBECEH

Department: Economic History

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	EC100 Economics A (1.0) or
	EC102 Economics B (1.0) A
Paper 2	EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)
Paper 3	MA100 Mathematical Methods (1.0)
Paper 4	ST102 Elementary Statistical Theory (1.0)
	The following unassessed course is strongly recommended for all first year students:
	EH103 Making Economic History Count (0.0)

Year 2

Paper 5	Courses to the value of 1.0 unit(s) from the following:
	EC201 Microeconomic Principles I (1.0)
	EC202 Microeconomic Principles II (1.0)
	EC210 Macroeconomic Principles (1.0)
Paper 6	EC220 Introduction to Econometrics (1.0) or
	EC221 Principles of Econometrics (1.0)
Paper 7	EH237 Theories and Evidence in Economic History (1.0)
Paper 8	Courses to the value of 1.0 unit(s) from the following:
	EH204 Money and Finance: From the Middle Ages to Modernity (1.0)
	EH207 The Making of an Economic Superpower: China since 1850 (1.0)
	EH208 Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0)
	EH211 Africa and the World Economy, 1500-2000 (1.0)
	EH225 Latin America and the International Economy (1.0)
	EH238 The Origins of Growth (1.0)
	EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

Year 3

Paper 9	Courses to the value of 1.0 unit(s) from the following:
	EC201 Microeconomic Principles I (1.0) B
	EC202 Microeconomic Principles II (1.0) C
	EC210 Macroeconomic Principles (1.0)
Paper 10	Courses to the value of 1.0 unit(s) from the following: D
	Economics Selection List A
	Undergraduate Outside Options List (Years 2 & 3)
Paper 11	Courses to the value of 1.0 unit(s) from the following:
	EC311 History of Economics: How Theories Change (1.0)
	EH304 The Economic History of North America: from Colonial Times to the Cold War (1.0)

	EH306	Monetary and Financial History since 1750 (1.0)
	EH307	The Economic History of South Asia, 1600-2000 (1.0)
	EH308	Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries (1.0)
	EH309	Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)
	EH311	Atlantic World Slavery (1.0)
	EH325	Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth (1.0)
	EH326	Innovation and its Finance in the 19th and 20th Centuries (1.0) (not available 2018/19)
	EH327	China's Traditional Economy and its Growth in the Very Long-Term (1.0)
Paper 12	EH390	Dissertation in Economic or Social History (1.0)
Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.	

Economics Selection List A

Year 1	
Paper 1	GY120 Environmental Change: Past, Present and Future (1.0)
Paper 2	GY121 Sustainable Development (1.0)
Paper 3	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 4	MA107 Quantitative Methods (Mathematics) (0.5) and ST107 Quantitative Methods (Statistics) (0.5)
Year 2	
Paper 5	GY220 Environment: Science and Society (1.0)
Paper 6	GY222 Applied Environmental Economics (1.0)
Paper 7	Courses to the value of 1.0 unit(s) from the following: GV227 The Politics of Economic Policy (1.0) (not available 2018/19) GV262 Contemporary Political Theory (1.0) GV263 Public Policy Analysis (1.0) GV264 Politics and Institutions in Europe (1.0) GY202 Introduction to Global Development (1.0) GY205 Political Geographies (1.0) GY207 Economy, Society and Space (0.5) GY209 The Economic Geography of Trade, Production and Development (0.5) GY210 The Economics of Cities (0.5) GY245 Quantitative Methods in Geography (0.5) GY247 Field Methods in Geography & Environment (0.5) LL250 Law and The Environment (1.0) LL278 Public International Law (1.0) Language Courses
Paper 8	EC201 Microeconomic Principles I (1.0)
Year 3	
Papers 9 & 10	Courses to the value of 2.0 unit(s) from the following: GY307 Regional Economic Development (0.5) (not available 2018/19) GY308 The Economic Geography of Growth and Development (0.5) GY326 Sustainable Business and Finance (0.5) GY327 Global Environmental Governance (0.5)

	GY328 Political Ecology of Development (0.5)
	GY329 Applied Economics of Environment and Development (0.5)
Papers 11 & 12 Courses	to the value of 2.0 unit(s) from the following:
	EC210 Macroeconomic Principles (1.0)
	EC315 International Economics (1.0)
	EC325 Public Economics (1.0)
	GY309 The Political Geography of Development (0.5)
	GY310 Urban Politics (0.5)
	GY311 The Political Economy of Urbanisation (0.5)
	GY312 Geographies of Gender in the Global South (0.5)
	GY313 Firms and Economic Geography: Location, Technology and Innovation (0.5)
	GY314 The Economics of Housing Markets and Migration (0.5)
	GY315 Geographies of Race (0.5)
	GY331 Geographies of Global Migration (0.5)
	GY350 Dissertation (1.0) B
Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.
Notes	A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information. B: Before taking GY350 students must have taken one of the following prerequisites in Year 2: GY245 or GY247 # means there may be prerequisites for this course. Please view the course guide for more information.

BSc in Environmental Policy with Economics

Programme Code: UBENPOWEC

Department: Geography & Environment

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 5 FM213 Principles of Finance (1.0)

Paper 6 MA212 Further Mathematical Methods (1.0)

Paper 7 ST202 Probability, Distribution Theory and Inference (1.0)

Paper 8 MA203 Real Analysis (0.5) **and** ST213 Introduction to Pricing, Hedging and Optimization (0.5)

Year 3

Programming course MA332 Programming in C++ (0.0) (not available 2018/19)

Paper 9 FM320 Quantitative Finance (1.0)

Paper 10 MA323 Computational Methods in Financial Mathematics (0.5) (not available 2018/19) **and** ST326 Financial Statistics (0.5) (not available 2018/19)

Paper 11 Courses to the value of 1.0 unit(s) from the following:
MA321 Measure Theoretic Probability (0.5) (not available 2018/19)

MA322 Mathematics of Finance and Valuation (0.5) 1 (not available 2018/19)

ST300 Regression and Generalised Linear Models (0.5)

ST302 Stochastic Processes (0.5) 2

Paper 12 Courses to the value of 1.0 unit(s) from the following: B
Undergraduate Outside Options List (Years 2 & 3)

Notes LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

1: MA322 can not be taken with ST302

2: ST302 can not be taken with MA322

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: No further FM courses are permitted.

means there may be prerequisites for this course.

Please view the course guide for more information.

BSc in Financial Mathematics and Statistics

Programme Code: UBFIMAST

Department: Mathematics

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**
See note LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1 EC100 Economics A (1.0) **or** EC102 Economics B (1.0) A

Paper 2 MA100 Mathematical Methods (1.0)

Paper 3 ST102 Elementary Statistical Theory (1.0)

Paper 4 MA103 Introduction to Abstract Mathematics (1.0)

Year 2

Paper 5 FM213 Principles of Finance (1.0)

Paper 6 MA212 Further Mathematical Methods (1.0)

Paper 7 ST202 Probability, Distribution Theory and Inference (1.0)

Paper 8 MA203 Real Analysis (0.5) **and** ST213 Introduction to Pricing, Hedging and Optimization (0.5)

Year 3

Programming course MA332 Programming in C++ (0.0) (not available 2018/19)

Paper 9 FM320 Quantitative Finance (1.0)

Paper 10 MA323 Computational Methods in Financial Mathematics (0.5) (not available 2018/19) **and** ST326 Financial Statistics (0.5) (not available 2018/19)

38 Undergraduate Programme Regulations

Paper 11	Courses to the value of 1.0 unit(s) from the following: MA321 Measure Theoretic Probability (0.5) (not available 2018/19) or MA322 Mathematics of Finance and Valuation (0.5) 1 (not available 2018/19) or ST300 Regression and Generalised Linear Models (0.5) or ST302 Stochastic Processes (0.5) 2
Paper 12	Courses to the value of 1.0 unit(s) from the following: B
Notes	Undergraduate Outside Options List (Years 2 & 3) LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification. BSc in Geography with Economics

Programme Code: UBGYWEC

Department: Geography & Environment

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1	
Paper 1	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 2	MA107 Quantitative Methods (Mathematics) (0.5) and ST107 Quantitative Methods (Statistics) (0.5)
Paper 3	GY100 Introduction to Geography (1.0)
Paper 4	Courses to the value of 1.0 unit(s) from the following: GY103 Contemporary Europe (1.0) GY120 Environmental Change: Past, Present and Future (1.0) GY121 Sustainable Development (1.0) GY140 Introduction to Geographical Research (1.0)
Year 2	
Paper 5	EC201 Microeconomic Principles I (1.0)
Paper 6	GY201 Urban and Spatial Economic Analysis I (1.0) (withdrawn 2018/19)
Papers 7 & 8	Courses to the value of 2.0 unit(s) from the following: GY200 Economy, Society and Space (1.0) (withdrawn 2018/19) GY202 Introduction to Global Development (1.0) GY205 Political Geographies (1.0) GY220 Environment: Science and Society (1.0) GY222 Applied Environmental Economics (1.0) GY240 Research Techniques (Spatial, Social and Environmental) (1.0) (withdrawn 2018/19) GY244 London's Geographies (1.0) GY300 Theories of Regional Development and Change (1.0) (withdrawn 2018/19)
Year 3	
Paper 9	GY313 Firms and Economic Geography: Location, Technology and Innovation (0.5) and GY314

Papers 10, 11 & 12	The Economics of Housing Markets and Migration (0.5) Courses to the value of 3.0 unit(s) from the following: Students may take the following combinations: up to 3.0 unit(s) from Level 3 options up to 2.0 unit(s) from Approved economics courses up to 1.0 unit from the Paper 8 options
Notes	Level 3 options Approved economics courses Paper 8 options list (from 2018/19) LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.
Level 3 options	GY245 Quantitative Methods in Geography (0.5) GY307 Regional Economic Development (0.5) (not available 2018/19) GY308 The Economic Geography of Growth and Development (0.5) GY309 The Political Geography of Development (0.5) GY310 Urban Politics (0.5) GY311 The Political Economy of Urbanisation (0.5) GY312 Geographies of Gender in the Global South (0.5) GY315 Geographies of Race (0.5) GY316 Gender in High Income and Emerging Economies (0.5) GY326 Sustainable Business and Finance (0.5) GY327 Global Environmental Governance (0.5) GY328 Political Ecology of Development (0.5) GY329 Applied Economics of Environment and Development (0.5) GY331 Geographies of Global Migration (0.5) GY350 Dissertation (1.0) B
Approved economics courses	EC210 Macroeconomic Principles (1.0) EC220 Introduction to Econometrics (1.0) EC307 Development Economics (1.0) EC325 Public Economics (1.0)
Paper 8 options list (from 2018/19)	GY202 Introduction to Global Development (1.0) GY205 Political Geographies (1.0) GY206 Urban Geography and Globalisation (0.5) GY207 Economy, Society and Space (0.5) GY222 Applied Environmental Economics (1.0) GY244 London's Geographies (1.0) GY307 Regional Economic Development (0.5) C (not available 2018/19) GY308 The Economic Geography of Growth and Development (0.5) D
Notes	A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guide for further information. B: Before taking GY350 students must have taken one of the following prerequisites in Year 2: GY240 or GY2A0 C: GY307 cannot be taken if GY300 was taken under Papers 7 & 8 in Year 2. D: GY308 cannot be taken if GY300 was taken under Papers 7 & 8 in Year 2. # means there may be prerequisites for this course. Please view the course guide for more information. Level 1 courses and modern language courses are not permitted as part of this degree programme in Years 2 and 3. Students wishing to study a modern language are encouraged to take one of the LSE Language Centre's extra-curricular courses. New GY half-unit courses derived from discontinued

full-unit courses for 2018/19: students are not permitted to take half-unit course(s) if they have previously studied the original full-unit course from which the half-unit(s) were derived.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BA in Geography

Programme Code: UBGY2

Department: Geography & Environment

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	GY100 Introduction to Geography (1.0)
Paper 2	GY140 Introduction to Geographical Research (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: GY103 Contemporary Europe (1.0) GY120 Environmental Change: Past, Present and Future (1.0) GY121 Sustainable Development (1.0) GY144 London's Geographies (1.0)
Paper 4	An approved paper taught outside the Department to the value of 1.0 unit from the following: AN100 Introduction to Social Anthropology (1.0) EC100 Economics A (1.0) EC102 Economics B (1.0) GV101 Introduction to Political Science (1.0) HY113 From Empire to Independence: The Extra-European World in the Twentieth Century (1.0) SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)

Or

A language option to the value of 1.0 unit from the following:

Language Courses

Or

Another paper to the value of 1.0 unit from the following:

Paper 3 options list

Year 2

Paper 5	GY245 Quantitative Methods in Geography (0.5) GY246 Field Methods in Geography (0.5)
Papers 6, 7 & 8	Courses to the value of 3.0 unit(s) from the following: GY202 Introduction to Global Development (1.0) GY205 Political Geographies (1.0) GY206 Urban Geography and Globalisation (0.5) GY207 Economy, Society and Space (0.5) GY209 The Economic Geography of Trade, Production and Development (0.5) GY210 The Economics of Cities (0.5) GY220 Environment: Science and Society (1.0) GY222 Applied Environmental Economics (1.0)

Language Courses

Year 3

Paper 9	GY350 Dissertation (1.0)
Papers 10, 11 & 12	Courses to the value of 3.0 unit(s) from the following: GY307 Regional Economic Development (0.5) (not available 2018/19) GY308 The Economic Geography of Growth and Development (0.5) GY309 The Political Geography of Development (0.5) GY310 Urban Politics (0.5) GY311 The Political Economy of Urbanisation (0.5) GY312 Geographies of Gender in the Global South (0.5) GY313 Firms and Economic Geography: Location, Technology and Innovation (0.5) GY314 The Economics of Housing Markets and Migration (0.5) GY315 Geographies of Race (0.5) GY326 Sustainable Business and Finance (0.5) GY327 Global Environmental Governance (0.5) GY328 Political Ecology of Development (0.5) GY329 Applied Economics of Environment and Development (0.5) GY331 Geographies of Global Migration (0.5)
Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 3 options list

GY103	Contemporary Europe (1.0)
GY120	Environmental Change: Past, Present and Future (1.0)
GY121	Sustainable Development (1.0)
GY144	London's Geographies (1.0)

Notes

A: Approved courses to the value of 1.0 unit can be selected from the Language Courses list. Language options may be chosen if they are a continuation of a language studied at A level (or equivalent) or Year 1, and must be above Level 1:

means there may be prerequisites for this course. Please view the course guide for more information. Level 1 courses are not permitted as part of this degree programme in Years 2 and 3.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

GY307	Regional Economic Development (0.5) (not available 2018/19)
GY308	The Economic Geography of Growth and Development (0.5)

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guide for further information.

means there may be prerequisites for this course.

Please view the course guide for more information.

Level 1 courses and modern language courses are not permitted as part of this degree programme in Years 2 and 3. Students wishing to study a modern language are encouraged to take one of the LSE Language Centre's extra-curricular courses.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Government

Programme Code: UBGV

Department: Government

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1	
Paper 1	GV101 Introduction to Political Science (1.0)
Paper 2	GV100 Introduction to Political Theory (1.0)
Paper 3	Courses to the value of 1.0 unit(s) from the following: Undergraduate Outside Options List (Year 1)
Paper 4	Courses to the value of 1.0 unit(s) from the following: Undergraduate Outside Options List (Year 1)

Year 2	
Papers 5, 6 & 7	Courses to the value of 3.0 unit(s) from the following: Government List A
Paper 8	Courses to the value of 1.0 unit(s) from the following:

Undergraduate Outside Options List (Years 2 & 3)**Or**

If GV101 was not taken in Year 1, then:
GV101 Introduction to Political Science (1.0)

Or

If GV100 was not taken in Year 1, then:
GV100 Introduction to Political Theory (1.0)

Year 3

Paper 9

Either

GV390 Government Dissertation Option (1.0)

Or

Courses to the value of 1.0 unit(s) from the following:

Government List B

Paper 10

Courses to the value of 1.0 unit(s) from the following:

Government List A

Paper 11

Courses to the value of 1.0 unit(s) from the following:

Government List A**Government List B**

Paper 12

Courses to the value of 1.0 unit(s) from the following:

Government List A**Undergraduate Outside Options List (Years 2 & 3)****Notes**

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

This programme has been retitled to BSc in Politics for 2018/19. Last year of entry 2017/18.

EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)

HY113 From Empire to Independence: The Extra-European World in the Twentieth Century (1.0)

HY116 International History since 1890 (1.0)

HY118 Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800 (1.0)

Notes

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

A: One course in Papers 9 & 10 must be from History List B if no course from this list was already taken at Paper 5 or Paper 7.

means there may be prerequisites for this course. Please view the course guide for more information.

Language Specialism: Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BA in History with French**.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

* means available with permission

1: Before taking IR320 you must take IR203

2: Before taking IR323 you must take IR200

3: Before taking IR324 you must take IR203

Before taking IR324 you must take IR200

4: Before taking IR325 you must take IR200

Before taking IR325 you must take IR203

5: Before taking LL242 you must take LL278

Notes

A: Courses selected from the list of language courses must be approved.

means there may be prerequisites for this course. Please view the course guide for more information.

Language Specialism: Students who have taken and passed at least one language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in International Relations with French**.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme

information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

LN330	French Language and Society 5 (mastery) (1.0)
LN340	Mandarin Language and Society 5 (Mastery) (1.0)

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: If not already taken under Papers 8, 10 or 11 # means there may be prerequisites for this course. Please view the course guide for more information.

International Exchange Year: Students successful in securing a place on the optional exchange will spend a full academic year studying on one of the leading business programmes in Asia, Europe or the USA. Students carrying any failed or deferred assessments for first or second year courses studied at LSE will not be eligible for the exchange. The exchange year will not count towards the classification of the BSc in Management programme and courses studied abroad will not be credit bearing, however the exchange year will be recognised on students' LSE transcripts providing they meet the standards set by their host institution. Partner schools will issue a separate transcript to confirm marks and grades achieved on courses studied overseas. Students will not have the option to resit assessment they have failed or been unable to attempt while overseas. Following the exchange, students will return to LSE to complete the third year of the BSc in Management programme.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

A: In Year 1 students choose between AC102 and AC103, on financial and management accounting respectively. Students MUST do ONE of these courses in Year 1; should they wish, they MAY choose to do the other in their second or third year as an option. All students are required to attend the first AC100 lecture to get an overview of the topics to be covered in each course. Students wishing to continue their studies with advanced financial accounting (AC330) in the second or third year should be advised to take AC102 in the first year. Students wishing to continue with advanced management accounting (e.g. AC211, AC310) in the second and third year should be advised to take AC103 in the first year. Should they wish to do both AC102 and AC103 in the course of their degree programme, it is recommended that they opt for the financial accounting unit (AC102) in the first year to ease their way through the management accounting and financial management unit (AC103). B: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

C: If not already taken under Papers 8, 10 or 11.

means there may be prerequisites for this course. Please view the course guide for more information.

International Exchange Year: Students successful in securing a place on the optional exchange will spend a full academic year studying on one of the leading business programmes in Asia, Europe or the USA. Students carrying any failed or deferred assessments for first or second year courses studied at LSE will not be eligible for the exchange. The exchange year will not count towards the classification of the BSc in Management programme and courses studied abroad will not be credit bearing, however the exchange year will be recognised on students' LSE transcripts providing they meet the standards set by their host institution. Students will not have the option to resit assessment they have failed or been unable to attempt while overseas. Following the exchange, students will return to LSE to complete the third year of the BSc in Management programme.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Management

Programme Code: UBMG

Department: Management

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

62 Undergraduate Programme Regulations

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1 One of the following combinations: A
AC102 Elements of Financial Accounting (0.5)
and MG101 Core Business Disciplines: Finance and Operations Management (0.5) (withdrawn 2017/18)

Or

AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) **and** MG101 Core Business Disciplines: Finance and Operations Management (0.5) (withdrawn 2017/18)

Paper 2 EC100 Economics A (1.0) **or**
EC102 Economics B (1.0) B

Paper 3 MA107 Quantitative Methods (Mathematics) (0.5)
and ST107 Quantitative Methods (Statistics) (0.5)

Paper 4 MG100 Leadership and Communication in Teams (0.5) (withdrawn 2017/18) **and** MG102 Organisational Behaviour (0.5) (withdrawn 2017/18)

Year 2

Paper 5 Courses to the value of 1.0 unit(s) from the following:
MG212 Marketing (0.5)
MG213 Information Systems (0.5)
MG214 Human Resource Management (0.5)

Paper 6 MG207 Managerial Economics (1.0)

Paper 7 MG205 Econometrics: Theory and Applications (1.0)

Paper 8 Courses to the value of 1.0 unit(s) from the following:
Options List

Year 3

Paper 9 MG301 Strategy (1.0)

Paper 10 Courses to the value of 1.0 unit(s) from the following:
Methods Electives List

Paper 11 Courses to the value of 1.0 unit(s) from the following:
Applications Electives List

Paper 12 Courses to the value of 1.0 unit(s) from the following:
I
Methods Electives List

Or

Applications Electives List

Or

Languages List

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Options List Accounting

AC102 Elements of Financial Accounting (0.5)
AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
AC211 Managerial Accounting (1.0)
AC310 Management Accounting, Financial Management and Organisational Control (1.0)
AC330 Financial Accounting, Analysis and Valuation. (1.0)

Economics and Economic History

EC210 Macroeconomic Principles (1.0)
EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

Finance

FM212 Principles of Finance (1.0)
FM300 Corporate Finance, Investments and Financial Markets (1.0)

Information Systems

MG208 Business Transformation and Project Management

(0.5) (not available 2018/19)

MG209 E-business (0.5)

MG213 Information Systems (0.5)

MG304 Digital Platform Innovation (0.5) (withdrawn 2018/19)

Law

LL209 Commercial and Enterprise Law (1.0) (withdrawn 2018/19)

Management Science and Methodology

MA207 Further Quantitative Methods (Mathematics) (0.5)

MA231 Operational Research Methods (1.0)

MA331 Practical Optimisation Modelling (0.5) C (not available 2018/19)

MG202 Analytical Methods for Management (1.0) (withdrawn 2018/19)

MG308 Simulation Modelling and Analysis (0.5)

MG310 Analytics for Strategic Decisions (0.5) D

MG311 Foundations of Behavioural Decision Science (0.5) E

ST201 Statistical Models and Data Analysis (0.5)

ST205 Sample Surveys and Experiments (0.5)

Managerial Economics and Strategy

MG206 Firms, Management and Competitive Advantage (0.5)

MG228 Managing the Stone-Age Brain (0.5) (not available 2018/19)

MG302 Topics in Management Research (0.5) F

MG303 International Business Strategy and Emerging Markets (0.5) 1

MG305 Innovation and Technology Management (0.5)

MG307 International Context of Management (0.5) 2 (not available 2018/19)

Marketing

MG212 Marketing (0.5)

MG315 Marketing Action Learning Project (0.5) G

ST307 Aspects of Market Research (0.5)

ST327 Market Research: An Integrated Approach (1.0)

Organisational Behaviour and Employee Relations

MG210 Corporate Social Responsibility and International Labour Standards (0.5)

MG214 Human Resource Management (0.5)

MG306 Managing Diversity in Organisations (0.5) (withdrawn 2017/18)

MG309 International Human Resource Management (0.5) (withdrawn 2018/19)

MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (0.5)

Philosophy

PH225 Business and Organisational Ethics (0.5)

PH332 Effective Philanthropy: Ethics and Evidence (0.5)
H (not available 2018/19)

Methods Electives List

AC102 Elements of Financial Accounting (0.5) AA

AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) AB

AC330 Financial Accounting, Analysis and Valuation. (1.0) AC

EC210 Macroeconomic Principles (1.0)

FM212 Principles of Finance (1.0)

FM213 Principles of Finance (1.0) AD

MA207 Further Quantitative Methods (Mathematics) (0.5)

MA212 Further Mathematical Methods (1.0) AE

MA231 Operational Research Methods (1.0)

MA301 Game Theory I (0.5) AF

MA314 Algorithms and Programming (0.5) AG

MG206 Firms, Management and Competitive Advantage (0.5)

MG302 Topics in Management Research (0.5) AH

MG308 Simulation Modelling and Analysis (0.5)

MG310	Analytics for Strategic Decisions (0.5) AI
MG311	Foundations of Behavioural Decision Science (0.5) AJ
Notes for Methods Electives List AA: If not taken under Paper 1. AB: If not taken under Paper 1. AC: Third year only. AD: FM212 and FM213 are mutually exclusive and course choice depends on the Mathematics and Statistics courses taken by students in their first year. See course guides for further information. LN330	French Language and Society 5 (mastery) (1.0)
LN340	Mandarin Language and Society 5 (Mastery) (1.0)
Notes	
A: In Year 1 students choose between AC102 and AC103, on financial and management accounting respectively. Students MUST do ONE of these courses in Year 1; should they wish, they MAY choose to do the other in their second or third year as an option. All students are required to attend the first AC100 lecture to get an overview of the topics to be covered in each course. Students wishing to continue their studies with advanced financial accounting (AC330) in the second or third year should be advised to take AC102 in the first year. Students wishing to continue with advanced management accounting (e.g. AC211, AC310) in the second and third year should be advised to take AC103 in the first year. Should they wish to do both AC102 and AC103 in the course of their degree programme, it is recommended that they opt for the financial accounting unit (AC102) in the first year to ease their way through the management accounting and financial management unit (AC103). B: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information. C: MA331 can be taken in the third year only. D: MG310 can be taken in the third year only. E: MG311 can be taken in the third year only. F: MG302 can be taken in the third year only. G: MG315 can be taken in the third year only. H: PH332 is available to second year students with permission from the lecturer. I: If not already taken under Papers 8, 10 or 11 # means there may be prerequisites for this course. Please view the course guide for more information.	

International Exchange (1 Term)

Programme Code: UOMNIMEX3

Department: Management

For students starting this programme of study in 2018/19

A one term (Michaelmas or Lent Term only) exchange programme for visiting BSc in Management students.

Students from partner exchange schools spend one term at LSE and choose 4 half-unit courses from the list below, according to which term they attend. Visiting students should be aware that the term in which these elective courses run may be subject to change. Visiting students will not be required to complete summative assessments or examinations outside of their term of study as they are not here in the main examination period. Therefore, assessment details for visiting students may differ from those listed in the course guide. Assessment methods for visiting students are confirmed no later than Week 6 of the course.

Students take half unit courses to the value of two units. Students are not permitted to take one unit courses.

Where the prerequisite of a course is prior study on a specific LSE course, applications from exchange students with equivalent

academic experience will be considered. Decisions regarding admission to courses will be made by the relevant course leader on a case by case basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
MT	Michaelmas Term
	MG104 Operations Management (0.5)
	MG212 Marketing (0.5)
	MG214 Human Resource Management (0.5)
	MG302 Topics in Management Research (0.5)
	MG305 Innovation and Technology Management (0.5)
	MG307 International Context of Management (0.5) (not available 2018/19)
	MG311 Foundations of Behavioural Decision Science (0.5)
	MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (0.5)
LT	Lent Term
	MG105 Organisational Behaviour and Leadership (0.5)
	MG206 Firms, Management and Competitive Advantage (0.5)
	MG208 Business Transformation and Project Management (0.5) (not available 2018/19)
	MG209 E-business (0.5)
	MG210 Corporate Social Responsibility and International Labour Standards (0.5)
	MG213 Information Systems (0.5)
	MG228 Managing the Stone-Age Brain (0.5) (not available 2018/19)
	MG303 International Business Strategy and Emerging Markets (0.5)
	MG308 Simulation Modelling and Analysis (0.5)
	MG310 Analytics for Strategic Decisions (0.5)
	MG315 Marketing Action Learning Project (0.5)
	# means there may be prerequisites for this course. Please view the course guide for more information.

International Exchange (Full Year)

Programme Code: UOMNIMEX2

Department: Management

For students starting this programme of study in 2018/19
A two term (both Michaelmas and Lent Term) exchange programme for visiting BSc in Management students.

Students from partner exchange schools spend two terms at LSE and choose courses to the value of 4.0 units from the list below.

Visiting students will not be required to complete summative assessments or examinations outside of their term of study as they are not here in the main examination period. Therefore, assessment details for visiting students may differ from those listed in the course guide. Assessment methods for visiting students are confirmed no later than Week 6 of the course.

Where the prerequisite of a course is prior study on a specific LSE course, applications from exchange students with equivalent academic experience will be considered. Decisions regarding admission to courses will be made by the relevant course leader on a case by case basis.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
MT	Michaelmas Term
	MG104 Operations Management (0.5)
	MG212 Marketing (0.5)

MG214	Human Resource Management (0.5)
MG302	Topics in Management Research (0.5)
MG305	Innovation and Technology Management (0.5)
MG307	International Context of Management (0.5) (not available 2018/19)
MG311	Foundations of Behavioural Decision Science (0.5)
MG312	Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (0.5)

LT

	Lent Term
MG105	Organisational Behaviour and Leadership (0.5)
MG206	Firms, Management and Competitive Advantage (0.5)
MG208	Business Transformation and Project Management (0.5) (not available 2018/19)
MG209	E-business (0.5)
MG210	Corporate Social Responsibility and International Labour Standards (0.5)
MG213	Information Systems (0.5)
MG228	Managing the Stone-Age Brain (0.5) (not available 2018/19)
MG303	International Business Strategy and Emerging Markets (0.5)
MG308	Simulation Modelling and Analysis (0.5)
MG310	Analytics for Strategic Decisions (0.5)
MG315	Marketing Action Learning Project (0.5)
	# means there may be prerequisites for this course. Please view the course guide for more information.

BSc in Mathematics and Economics

Programme Code: UBMAEC

Department: Mathematics

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1	
Paper 1	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	ST102 Elementary Statistical Theory (1.0)
Paper 4	MA103 Introduction to Abstract Mathematics (1.0)
Year 2	
Paper 5	EC201 Microeconomic Principles I (1.0) or EC202 Microeconomic Principles II (1.0)
Paper 6	MA212 Further Mathematical Methods (1.0)
Paper 7	Courses to the value of 1.0 unit(s) from the following: EC210 Macroeconomic Principles (1.0) EC221 Principles of Econometrics (1.0) FM213 Principles of Finance (1.0) MA203 Real Analysis (0.5)
Paper 8	And courses to the value of 0.5 unit(s) from the following: MA208 Optimisation Theory (0.5) MA209 Differential Equations (0.5) MA210 Discrete Mathematics (0.5) MA211 Algebra and Number Theory (0.5)
Year 3	
Paper 9	Courses to the value of 1.0 unit(s) from the following: EC301 Advanced Economic Analysis (1.0) 1 EC302 Political Economy (1.0) EC309 Econometric Theory (1.0) 2 EC310 Behavioural Economics (1.0)

Paper 10	EC313 Industrial Economics (1.0)
	EC319 Games and Economic Behaviour (1.0)
Paper 10	EC321 Monetary Economics (1.0) 3
	EC325 Public Economics (1.0)
Paper 10	EC333 Problems of Applied Econometrics (1.0) 4
	Courses to the value of 0.5 unit(s) from the following:
Paper 10	MA208 Optimisation Theory (0.5)
	MA209 Differential Equations (0.5)
Paper 10	MA210 Discrete Mathematics (0.5)
	MA211 Algebra and Number Theory (0.5)
Paper 10	MA301 Game Theory I (0.5) 5
	MA303 Chaos in Dynamical Systems (0.5)
Paper 10	MA305 Optimisation in Function Spaces (0.5)
	MA310 Mathematics of Finance and Valuation (0.5)
Paper 10	MA313 Probability for Finance (0.5)
	MA314 Algorithms and Programming (0.5)
Paper 10	MA315 Algebra and its Applications (0.5)
	MA316 Graph Theory (0.5)
Paper 10	MA317 Complex Analysis (0.5)
	MA319 Partial Differential Equations (0.5)
Paper 10	MA320 Mathematics of Networks (0.5)
	And courses to the value of 0.5 unit(s) from the following:
Paper 10	MA301 Game Theory I (0.5)
	MA303 Chaos in Dynamical Systems (0.5)
Paper 10	MA305 Optimisation in Function Spaces (0.5)
	MA310 Mathematics of Finance and Valuation (0.5)
Paper 10	MA313 Probability for Finance (0.5)
	MA314 Algorithms and Programming (0.5)
Paper 10	MA315 Algebra and its Applications (0.5)
	MA316 Graph Theory (0.5)
Paper 10	MA317 Complex Analysis (0.5)
	MA319 Partial Differential Equations (0.5)
Paper 10	MA320 Mathematics of Networks (0.5)
	If FM213 was taken at Paper 7 then one of the following:
Paper 11	EC210 Macroeconomic Principles (1.0)
	EC221 Principles of Econometrics (1.0)
Paper 11	Or
	If EC210 or EC221 was taken under Paper 7 then one of the following:
Paper 11	EC210 Macroeconomic Principles (1.0)
	EC221 Principles of Econometrics (1.0)
Paper 11	FM213 Principles of Finance (1.0)
	FM320 Quantitative Finance (1.0)
Paper 11	MA300 Game Theory (1.0) 6
	ST202 Probability, Distribution Theory and Inference (1.0)
Paper 11	Any paper from the Paper 9 options list, or another third year paper in Mathematics or Economics (MA3** or EC3**) with the approval of the Departmental Tutor:
	Paper 9 options list
Paper 11	Economics Third Year Options List
	Mathematics Third Year Options List
Paper 12	Courses to the value of 1.0 unit(s) from the following: B
	MA231 Operational Research Methods (1.0)
Paper 12	MA318 History of Mathematics in Finance and Economics (0.5)
	Paper 9 options list
Paper 12	Paper 10 options list
	Paper 11 options list
Paper 12	Undergraduate Outside Options List (Years 2 & 3)
	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 9 options list

EC301	Advanced Economic Analysis (1.0) 7
EC302	Political Economy (1.0) 8
EC309	Econometric Theory (1.0)
EC310	Behavioural Economics (1.0)

EC313	Industrial Economics (1.0)
EC319	Games and Economic Behaviour (1.0)
EC321	Monetary Economics (1.0) 9
EC325	Public Economics (1.0)
EC333	Problems of Applied Econometrics (1.0) 10

Economics Third Year Options List

EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)
EC303	Economic Policy Analysis (1.0) (withdrawn 2018/19)
EC307	Development Economics (1.0)
EC309	Econometric Theory (1.0)

MA301 Game Theory I (0.5) 5

MA303 Chaos in Dynamical Systems (0.5)

MA305 Optimisation in Function Spaces (0.5)

MA310 Mathematics of Finance and Valuation (0.5)

MA313 Probability for Finance (0.5)

MA314 Algorithms and Programming (0.5)

MA315 Algebra and its Applications (0.5)

MA316 Graph Theory (0.5)

MA317 Complex Analysis (0.5)

MA319 Partial Differential Equations (0.5)

MA320 Mathematics of Networks (0.5)

And courses to the value of 0.5 unit(s) from the following:

MA301 Game Theory I (0.5)

MA303 Chaos in Dynamical Systems (0.5)

MA305 Optimisation in Function Spaces (0.5)

MA310 Mathematics of Finance and Valuation (0.5)

MA313 Probability for Finance (0.5)

MA314 Algorithms and Programming (0.5)

MA315 Algebra and its Applications (0.5)

MA316 Graph Theory (0.5)

MA317 Complex Analysis (0.5)

MA319 Partial Differential Equations (0.5)

Paper 11

MA320 Mathematics of Networks (0.5)

If FM213 was taken at Paper 7 then one of the following:

EC210 Macroeconomic Principles (1.0)

EC221 Principles of Econometrics (1.0)

Or

If EC210 or EC221 was taken under Paper 7 then one of the following: B

EC210 Macroeconomic Principles (1.0)

EC221 Principles of Econometrics (1.0)

FM213 Principles of Finance (1.0)

FM320 Quantitative Finance (1.0)

MA300 Game Theory (1.0) 6

ST202 Probability, Distribution Theory and Inference (1.0)

Any paper from the Paper 9 options list, or another third year paper in Mathematics or Economics (MA3** or EC3**) with the approval of the Departmental Tutor:

Paper 9 options list

Economics Third Year Options List

Mathematics Third Year Options List

Paper 12

Courses to the value of 1.0 unit(s) from the following: C

MA231 Operational Research Methods (1.0)

MA318 History of Mathematics in Finance and Economics (0.5)

Paper 9 options list

Paper 10 options list

Paper 11 options list

Undergraduate Outside Options List (Years 2 & 3)

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 9 options list

EC301 Advanced Economic Analysis (1.0) 7
EC302 Political Economy (1.0) 8
EC309 Econometric Theory (1.0)
EC310 Behavioural Economics (1.0)
EC313 Industrial Economics (1.0)
EC319 Games and Economic Behaviour (1.0)
EC321 Monetary Economics (1.0) 9
EC325 Public Economics (1.0)
EC333 Problems of Applied Econometrics (1.0) 10

Economics Third Year Options List

EC301 Advanced Economic Analysis (1.0)
EC302 Political Economy (1.0)
EC303 Economic Policy Analysis (1.0) (withdrawn 2018/19)
EC307 Development Economics (1.0)
EC309 Econometric Theory (1.0)
EC310 Behavioural Economics (1.0)
EC311 History of Economics: How Theories Change (1.0)
EC313 Industrial Economics (1.0)
EC315 International Economics (1.0)
EC317 Labour Economics (1.0)
EC319 Games and Economic Behaviour (1.0)
EC321 Monetary Economics (1.0) 11
EC325 Public Economics (1.0)
EC331 Quantitative Thesis (1.0)
EC333 Problems of Applied Econometrics (1.0)

Paper 10 options list

MA208 Optimisation Theory (0.5)
MA209 Differential Equations (0.5)
MA210 Discrete Mathematics (0.5)
MA211 Algebra and Number Theory (0.5)
MA301 Game Theory I (0.5) 12
MA303 Chaos in Dynamical Systems (0.5)
MA305 Optimisation in Function Spaces (0.5)
MA310 Mathematics of Finance and Valuation (0.5)
MA313 Probability for Finance (0.5)

MA314	Algorithms and Programming (0.5)
MA315	Algebra and its Applications (0.5)
MA316	Graph Theory (0.5)
MA317	Complex Analysis (0.5)
MA319	Partial Differential Equations (0.5)
MA320	Mathematics of Networks (0.5)

Paper 11 options list

EC210	Macroeconomic Principles (1.0)
EC221	Principles of Econometrics (1.0)
FM213	Principles of Finance (1.0)
FM320	Quantitative Finance (1.0)
MA300	Game Theory (1.0)
ST202	Probability, Distribution Theory and Inference (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

1: Before taking EC301 you must take EC210

2: Before taking EC309 you must take EC221

3: Before taking EC321 you must take EC210

4: Before taking EC333 you must take EC221

5: MA301 can not be taken with MA300

6: MA300 can not be taken with MA301

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: Courses chosen from the Economics or Mathematics Third Year Options Lists are only permitted with approval from the Departmental Tutor.

C: No more than one from MA208, MA209, MA210 or MA211 can be taken in Year 3.

means there may be prerequisites for this course.

Please view the course guide for more information.

BSc in Mathematics and Economics

Programme Code: UBMAEC

Department: Mathematics

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1	EC100 Economics A (1.0) or EC102 Economics B (1.0) A
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	ST102 Elementary Statistical Theory (1.0)
Paper 4	MA103 Introduction to Abstract Mathematics (1.0)

Year 2

Paper 5	EC201 Microeconomic Principles I (1.0) or EC202 Microeconomic Principles II (1.0)
Paper 6	MA212 Further Mathematical Methods (1.0)
Paper 7	Courses to the value of 1.0 unit(s) from the following: EC210 Macroeconomic Principles (1.0) EC221 Principles of Econometrics (1.0) FM212 Principles of Finance (1.0)
Paper 8	MA203 Real Analysis (0.5) And courses to the value of 0.5 unit(s) from the following: MA208 Optimisation Theory (0.5) MA209 Differential Equations (0.5) MA210 Discrete Mathematics (0.5) MA211 Algebra and Number Theory (0.5)

Year 3

Paper 9	Courses to the value of 1.0 unit(s) from the following: EC301 Advanced Economic Analysis (1.0) 1 EC302 Political Economy (1.0)
---------	--

Paper 10

EC309	Econometric Theory (1.0) 2
EC310	Behavioural Economics (1.0)
EC313	Industrial Economics (1.0)
EC319	Games and Economic Behaviour (1.0)
EC321	Monetary Economics (1.0) 3
EC325	Public Economics (1.0)
EC333	Problems of Applied Econometrics (1.0) 4

Courses to the value of 0.5 unit(s) from the following:

MA208	Optimisation Theory (0.5)
MA209	Differential Equations (0.5)
MA210	Discrete Mathematics (0.5)
MA211	Algebra and Number Theory (0.5)
MA301	Game Theory I (0.5) 5
MA303	Chaos in Dynamical Systems (0.5)
MA305	Optimisation in Function Spaces (0.5)
MA310	Mathematics of Finance and Valuation (0.5)
MA313	Probability for Finance (0.5)
MA314	Algorithms and Programming (0.5)
MA315	Algebra and its Applications (0.5)
MA316	Graph Theory (0.5)
MA317	Complex Analysis (0.5)
MA319	Partial Differential Equations (0.5)
MA320	Mathematics of Networks (0.5)

And courses to the value of 0.5 unit(s) from the following:

MA301	Game Theory I (0.5)
MA303	Chaos in Dynamical Systems (0.5)
MA305	Optimisation in Function Spaces (0.5)
MA310	Mathematics of Finance and Valuation (0.5)
MA313	Probability for Finance (0.5)
MA314	Algorithms and Programming (0.5)
MA315	Algebra and its Applications (0.5)
MA316	Graph Theory (0.5)
MA317	Complex Analysis (0.5)
MA319	Partial Differential Equations (0.5)
MA320	Mathematics of Networks (0.5)

Paper 11

If FM212 was taken at Paper 7 then one of the following:

EC210	Macroeconomic Principles (1.0)
EC221	Principles of Econometrics (1.0)
Or	
If EC210 or EC221 was taken under Paper 7 then one of the following:	
EC210	Macroeconomic Principles (1.0)
EC221	Principles of Econometrics (1.0)
FM213	Principles of Finance (1.0)
FM320	Quantitative Finance (1.0)
MA300	Game Theory (1.0) 6
ST202	Probability, Distribution Theory and Inference (1.0)

Any paper from the Paper 9 options list, or another third year paper in Mathematics or Economics (MA3** or EC3**) with the approval of the Departmental Tutor:

Paper 9 options list**Economics Third Year Options List****Mathematics Third Year Options List****Paper 12**

Courses to the value of 1.0 unit(s) from the following: B
MA318 History of Mathematics in Finance and Economics (0.5)

Paper 9 options list**Paper 10 options list****Paper 11 options list****Undergraduate Outside Options List (Years 2 & 3)****Notes**

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 9 options list

EC301	Advanced Economic Analysis (1.0) 7

BSc in Mathematics, Statistics, and Business

Programme Code: UBMSB

Department: Statistics

For students starting this programme of study in 2018/19

This programme was previously titled **BSc in Business Mathematics and Statistics**.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**
See note LSE100 The LSE Course: Understanding the causes of things

Year 1
Paper 1 ST102 Elementary Statistical Theory (1.0)
Paper 2 MA100 Mathematical Methods (1.0)
Paper 3 EC100 Economics A (1.0) **or**
EC102 Economics B (1.0) A
Paper 4 **Either**
AC102 Elements of Financial Accounting (0.5)
and AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)

Or
MA103 Introduction to Abstract Mathematics (1.0)

Year 2
Paper 5 MA212 Further Mathematical Methods (1.0)
Papers 6 & 7 **Either**
ST202 Probability, Distribution Theory and Inference (1.0) **and** ST211 Applied Regression (0.5)

And courses to the value of 0.5 units from List 1 or List 2:

List 1 - For students who took MA103 under Paper 4:

MA203 Real Analysis (0.5)
MA208 Optimisation Theory (0.5) B
MA209 Differential Equations (0.5) C
MA210 Discrete Mathematics (0.5)
MA211 Algebra and Number Theory (0.5)
ST205 Sample Surveys and Experiments (0.5)
ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

List 2 - For students who took AC102 and AC103 under Paper 4:

ST205 Sample Surveys and Experiments (0.5)

ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

Or

ST206 Probability and Distribution Theory (0.5) **and**
ST211 Applied Regression (0.5)

And courses to the value of 1.0 unit from List 1 or List 2:

List 1 - For students who took MA103 under Paper 4:

MA203 Real Analysis (0.5)

MA208 Optimisation Theory (0.5)

MA209 Differential Equations (0.5)

MA210 Discrete Mathematics (0.5)

MA211 Algebra and Number Theory (0.5)

ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

List 2 - For students who took AC102 and AC103 under Paper 4, both of the following:

ST226 Actuarial Investigations: Financial (0.5) **and**
ST227 Survival Models (0.5)

Paper 8 Courses to the value of 1.0 unit(s) from the following: D

AC102 Elements of Financial Accounting (0.5)

AC103 Elements of Management Accounting,
Financial Management and Financial
Institutions (0.5)

AC211 Managerial Accounting (1.0) 1

EC201 Microeconomic Principles I (1.0)

EC202 Microeconomic Principles II (1.0)

EC210 Macroeconomic Principles (1.0)

EC221 Principles of Econometrics (1.0)

FM213 Principles of Finance (1.0)

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Paper 12 Courses to the value of 1.0 unit(s) from the following:

Paper 9 options list

Paper 10 options list

Paper 11 options list

Undergraduate Outside Options List (Years 2 & 3)

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Paper 9 options list

ST300 Regression and Generalised Linear Models (0.5) ~1

ST301 Actuarial Mathematics (Life) (0.5) ~2

ST302 Stochastic Processes (0.5)

ST304 Time Series and Forecasting (0.5) ~3

ST306 Actuarial Mathematics (General) (0.5) ~4

ST308 Bayesian Inference (0.5) ~A

ST330 Stochastic and Actuarial Methods in Finance (1.0)
~5~B

Notes for Paper 9 options list ~A: ST202 is a desirable prerequisite for ST308. ~B: ST330 can only be taken if ST302 is taken under Paper 10.

Prerequisite Requirements and Mutually Exclusive Options for Paper 9 options list~1: Before taking ST300 you must take ST227~2: Before taking ST301 you must take ST227~3: Before taking ST304 you must take ST202~4: Before taking ST306 you must take ST202

Before taking ST306 you must take ST302~5: ST330 can not be taken with FM320

Paper 10 options list

MA203 Real Analysis (0.5) ~1

MA208 Optimisation Theory (0.5) ~2~A

MA209 Differential Equations (0.5) ~3~B

MA210 Discrete Mathematics (0.5) ~4

MA211 Algebra and Number Theory (0.5) ~5

MA300 Game Theory (1.0) ~6~C

MA301 Game Theory I (0.5) ~7

MA303 Chaos in Dynamical Systems (0.5) ~D

MA305 Optimisation in Function Spaces (0.5)

MA310 Mathematics of Finance and Valuation (0.5) ~E

MA313 Probability for Finance (0.5) ~8

MA314 Algorithms and Programming (0.5) ~9

MA315 Algebra and its Applications (0.5) ~10

MA317 Complex Analysis (0.5)

MA318 History of Mathematics in Finance and Economics (0.5)

MA319 Partial Differential Equations (0.5) ~11

MA331 Practical Optimisation Modelling (0.5) ~F (not available 2018/19)

ST302 Stochastic Processes (0.5) ~G

ST307 Aspects of Market Research (0.5) ~12

ST312 Applied Statistics Project (0.5)

ST327 Market Research: An Integrated Approach (1.0) ~13

Notes for Paper 10 options list ~A: MA203 is a desirable prerequisite for MA208. ~B: MA203 is a desirable prerequisite for MA209. ~C: EC201 or EC202 are desirable prerequisites for MA300. ~D: MA103 is a desirable prerequisite for MA303. ~E: MA310 can be taken if MA313 is taken in MT. ~F: Third year only ~G: ST302 must be taken if ST330 was taken under Paper 9.

Prerequisite Requirements and Mutually Exclusive Options for Paper 10 options list~1: Before taking MA203 you must take MA103~2: Before taking MA208 you must take MA103~3: Before taking MA209 you must take MA103~4: Before taking MA210 you must take MA103~5: Before taking MA211 you must take MA103~6: MA300 can not be taken with MA301~7: MA301 can not be taken with MA300~8: Before taking MA313 you must take MA203~9: Before taking MA314 you must take MA103~10: Before taking MA315 you must take MA103~11: Before taking MA319 you must take MA203~12: ST307 can not be taken with ST205, ST327~13: ST327 can not be taken with ST307

Paper 11 options list

AC211 Managerial Accounting (1.0) ~1

AC330 Financial Accounting, Analysis and Valuation. (1.0) ~2

EC202 Microeconomic Principles II (1.0)

EC210 Macroeconomic Principles (1.0)

EC221 Principles of Econometrics (1.0)

EC302 Political Economy (1.0) ~A

EC310 Behavioural Economics (1.0) ~B

EC319 Games and Economic Behaviour (1.0) ~C

EC325 Public Economics (1.0) ~D

FM213 Principles of Finance (1.0)

FM300 Corporate Finance, Investments and Financial Markets (1.0) ~E

FM320 Quantitative Finance (1.0) ~3~F

ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

Notes for Paper 11 options list ~A: EC302 can be taken if Either EC201 or EC202 has been taken under Paper 8. ~B: EC310 can be taken if EC202, or EC201 with a good mark, has been taken under Paper 8. ~C: EC319 can be taken if EC201 or EC202 has been taken under Paper 8. ~D: EC325 can be taken if

EC201 or EC202 has been taken under Paper 8. ~E: FM300 can be taken if FM213 has been taken under Paper 8. ~F: FM320 can be taken if FM213 has been taken under Paper 8.

Prerequisite Requirements and Mutually Exclusive Options for Paper 11 options list~1: Before taking AC211 you must take AC103~2: Before taking AC330 you must take AC102~3: FM320 can not be taken with ST330

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

1: Before taking AC211 you must take AC102

Before taking AC211 you must take AC103

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: If MA208 is taken, then it is also desirable that MA203 is taken under Papers 6 & 7.

C: If MA209 is taken, then it is also desirable that MA203 is taken under Papers 6 & 7.

D: Students may take certain courses from the Undergraduate Outside Options List, with the approval of the Course Tutor.

means there may be prerequisites for this course. Please view the course guide for more information.

Accreditation: Accredited by the Chartered Institute of Management Accountants (CIMA) for the purpose of exemption from some professional examinations through the Accredited degree accelerated route. Accredited by the Royal Statistical Society (RSS) for the purpose of eligibility for Graduate Statistician status. Further information is available from the BSc in Mathematics, Statistics, and Business homepage lse.ac.uk/Statistics/Study/BSc-programmes/BSc-Mathematics-Statistics-and-Business. Either EC100 or EC102 needs to be chosen for exemption of BA1 Fundamentals of Business Economics. Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA2 Fundamentals of Management Accounting. Either AC100, AC102, AC103 or AC104 needs to be chosen for exemption of BA3 Fundamentals of Financial Accounting.

Note for prospective students: For changes to undergraduate course and programme information for the next academic session, please see the undergraduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGProspective.htm. Changes to course and programme information for future academic sessions can be found on the undergraduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedUGFuture.htm.

BSc in Mathematics, Statistics, and Business

Programme Code: UBMSB

Department: Statistics

For students starting this programme of study in 2017/18

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1 ST102 Elementary Statistical Theory (1.0)

Paper 2 MA100 Mathematical Methods (1.0)

Paper 3 EC100 Economics A (1.0) **or** EC102 Economics B (1.0) A

Paper 4 AC100 Elements of Accounting and Finance (1.0) **or** MA103 Introduction to Abstract Mathematics (1.0)

Year 2

Paper 5 MA212 Further Mathematical Methods (1.0)

Papers 6 & 7 **Either**

ST202 Probability, Distribution Theory and Inference (1.0) **and** ST211 Applied Regression (0.5)

And courses to the value of 0.5 unit(s) from the following:

MA203 Real Analysis (0.5)

MA208 Optimisation Theory (0.5)

MA209 Differential Equations (0.5)

MA210 Discrete Mathematics (0.5)

MA211 Algebra and Number Theory (0.5)

ST205 Sample Surveys and Experiments (0.5)

ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

Or

ST206 Probability and Distribution Theory (0.5) **and** ST211 Applied Regression (0.5)

And courses to the value of 1.0 unit(s) from the following:

MA103 Introduction to Abstract Mathematics (1.0)

MA203 Real Analysis (0.5)

MA208 Optimisation Theory (0.5)

MA209 Differential Equations (0.5)

MA210 Discrete Mathematics (0.5)

MA211 Algebra and Number Theory (0.5)

ST205 Sample Surveys and Experiments (0.5)

ST226 Actuarial Investigations: Financial (0.5)

ST227 Survival Models (0.5)

Paper 8 Courses to the value of 1.0 unit(s) from the following: B

AC102 Elements of Financial Accounting (0.5)

AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)

AC104 Elements of Accounting, Financial Institutions and Financial Management (1.0) (withdrawn 2018/19)

AC211 Managerial Accounting (1.0)

EC201 Microeconomic Principles I (1.0)

EC202 Microeconomic Principles II (1.0)

EC210 Macroeconomic Principles (1.0)

FM213 Principles of Finance (1.0)

MA231 Operational Research Methods (1.0)

MG203 Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)

MG206 Firms, Management and Competitive Advantage (0.5)

MG207 Managerial Economics (1.0)

MG302 Topics in Management Research (0.5)

SA224 Introduction to Global Population Change (1.0)

Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9 Courses to the value of 1.0 unit(s) from the following:

ST300 Regression and Generalised Linear Models (0.5)

ST301 Actuarial Mathematics (Life) (0.5)

ST302 Stochastic Processes (0.5)

ST304 Time Series and Forecasting (0.5)

ST306 Actuarial Mathematics (General) (0.5)

ST308 Bayesian Inference (0.5)

Paper 10 Courses to the value of 1.0 unit(s) from the following:

MA203 Real Analysis (0.5)

MA208 Optimisation Theory (0.5)

MA209 Differential Equations (0.5)

MA211 Algebra and Number Theory (0.5)

MA300 Game Theory (1.0) 1

- MA301 Game Theory I (0.5) 2
 MA303 Chaos in Dynamical Systems (0.5)
 MA305 Optimisation in Function Spaces (0.5)
 MA310 Mathematics of Finance and Valuation (0.5)
 MA313 Probability for Finance (0.5)
 MA314 Algorithms and Programming (0.5)
 MA315 Algebra and its Applications (0.5)
 MA317 Complex Analysis (0.5)
 MA318 History of Mathematics in Finance and Economics (0.5)
 MA319 Partial Differential Equations (0.5)
 MA331 Practical Optimisation Modelling (0.5) C (not available 2018/19)
 ST307 Aspects of Market Research (0.5) 3
 ST312 Applied Statistics Project (0.5)
 ST327 Market Research: An Integrated Approach (1.0) 4
 ST330 Stochastic and Actuarial Methods in Finance (1.0) 56

Paper 9 options list

Paper 11 Courses to the value of 1.0 unit(s) from the following:
 D

- AC211 Managerial Accounting (1.0)
 AC310 Management Accounting, Financial Management and Organisational Control (1.0)
 AC330 Financial Accounting, Analysis and Valuation. (1.0)
 AC340 Auditing, Governance and Risk Management (1.0)

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things
Year 1	
Paper 1	Either MA107 Quantitative Methods (Mathematics) (0.5) and ST107 Quantitative Methods (Statistics) (0.5) Or MA100 Mathematical Methods (1.0)
Paper 2	GV101 Introduction to Political Science (1.0)
Paper 3	PH103 The Big Questions: An Introduction to Philosophy (1.0) A
Paper 4	EC100 Economics A (1.0) or EC102 Economics B (1.0) B
Year 2	
Paper 5	If MA107 and ST107 were taken under Paper 1 then students may select the following: GV249 Research Design in Political Science (1.0) Or If MA107 and ST107 were taken under Paper 1 (and if a grade of 65 or above is achieved on both courses), then students may select the following: EC220 Introduction to Econometrics (1.0) Or If MA100 was taken under Paper 1, then students must select the following: ST102 Elementary Statistical Theory (1.0)
Paper 6	GV100 Introduction to Political Theory (1.0)
Paper 7	If MA100 was taken under Paper 1, then students

must select the following:

PH104 Formal Methods of Philosophical Argumentation (1.0)

Or

If MA107 and ST107 were taken under Paper 1, then students may select Either of the following:

PH101 Logic (1.0) **or**

PH104 Formal Methods of Philosophical Argumentation (1.0)

Paper 8

If MA107 and ST107 were taken under Paper 1, then students must select the following:

EC201 Microeconomic Principles I (1.0)

Or

If MA100 was taken under Paper 1, then students must select one of the following:

EC201 Microeconomic Principles I (1.0)

EC202 Microeconomic Principles II (1.0)

Additional

course

In addition, students will also take the following course in LT:

EC240 PPE Interdisciplinary Research Seminar (0.5) C

Year 3

Paper 9

Courses to the value of 1.0 unit(s) from the following:

Government List A

Government List B

Paper 10

Courses to the value of 1.0 unit(s) from the following:

Philosophy Options List

Paper 11

EC210 Macroeconomic Principles (1.0)

Paper 12

If MA107 and ST107 were taken under Paper 1, then courses to the value of 1.0 unit(s) from the following:

Economics Options List

Philosophy Options List

Government List A

Government List B

Or

If MA100 was taken under Paper 1, then students must select one of the following:

EC220 Introduction to Econometrics (1.0)

EC221 Principles of Econometrics (1.0)

Additional

course

In addition, students will also take the following course in MT & LT:

EC340 PPE Interdisciplinary Research Seminar (1.0) G

Year 4

Paper 13

PH341 Philosophy, Politics and Economics: Applications (1.0)

Paper 14

GV342 Philosophy, Politics and Economics: Capstone and Research Project (1.0)

Paper 15

Courses to the value of 1.0 unit(s) from the following: H

Economics Options List

Philosophy Options List

Government List B

Paper 16

Courses to the value of 1.0 unit(s) from the following: I

Economics Options List

Philosophy Options List

Government List B

Or

Courses to the value of 1.0 unit(s) from the following: J

Undergraduate Outside Options List (Years 2 & 3)

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Notes

Economics Options List

* means available with permission

Notes

A: PH103 includes a supplementary five week Philosophy and Argumentative Writing Seminar.
 B: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.
 C: EC240 and EC340 will be assessed in the same manner as LSE100. Marks of F, P, M, DI appear on the transcript but do not affect progression or the final degree classification.
 D: LL305 can be taken in the third year only.
 E: PH301 is only available to students in Year 4 of the BSc in Philosophy, Politics and Economics.
 F: PH399 cannot be taken in Year 1 or Year 2.
 G: EC240 and EC340 will be assessed in the same manner as LSE100. Marks of F, P, M, DI appear on the transcript but do not affect progression or the final degree classification.
 H: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.
 I: Selection from the Government, Philosophy or Economics Options Lists is subject to timetabling constraints.
 J: Courses selected from the Undergraduate Outside Options List require permission. Selection from the Undergraduate Outside Options List is subject to timetabling constraints.
 # means there may be prerequisites for this course. Please view the course guide for more information.

entered-in-or-after-2015.16-but-before-2018.19.pdf

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
See note	LSE100 The LSE Course: Understanding the causes of things

Year 1	Either
Paper 1	MA107 Quantitative Methods (Mathematics) (0.5) and ST107 Quantitative Methods (Statistics) (0.5)

	Or
Paper 2	MA100 Mathematical Methods (1.0)
Paper 3	GV100 Introduction to Political Theory (1.0)
	PH103 The Big Questions: An Introduction to Philosophy (1.0) A
Paper 4	EC100 Economics A (1.0) or EC102 Economics B (1.0) B

Year 2	
Paper 5	If MA107 and ST107 were taken under Paper 1, then students may select the following: GV249 Research Design in Political Science (1.0)

	Or
	If MA107 and ST107 were taken under Paper 1 (and if a grade of 65 or above is achieved on both courses), then students may select the following: EC220 Introduction to Econometrics (1.0)

	Or
	If MA100 was taken under Paper 1, then students must select the following:

Paper 6	ST102 Elementary Statistical Theory (1.0)
Paper 7	GV101 Introduction to Political Science (1.0)
	If MA100 was taken under Paper 1, then students must select the following: PH104 Formal Methods of Philosophical Argumentation (1.0)

	Or
	If MA107 and ST107 were taken under Paper 1, then students may select Either of the following:

	PH101 Logic (1.0) or
	PH104 Formal Methods of Philosophical Argumentation (1.0)

Paper 8	If MA107 and ST107 were taken under Paper 1, then students must select the following: EC201 Microeconomic Principles I (1.0)
---------	---

	Or
	If MA100 was taken under Paper 1, then students must select one of the following: EC201 Microeconomic Principles I (1.0) EC202 Microeconomic Principles II (1.0)
Additional course	In addition, students will also take the following course in LT: EC240 PPE Interdisciplinary Research Seminar (0.5) C

Year 3	
Paper 9	Courses to the value of 1.0 unit(s) from the following: Government List A

	Government List B
Paper 10	Courses to the value of 1.0 unit(s) from the following: Philosophy Options List

Paper 11	EC210 Macroeconomic Principles (1.0)
Paper 12	If MA107 and ST107 were taken under Paper 1, then courses to the value of 1.0 unit(s) from the following:

Economics Options List

Philosophy Options List

Government List A

Government List B

	Or
	If MA100 was taken under Paper 1, then students must select one of the following: EC220 Introduction to Econometrics (1.0)

BSc in Philosophy, Politics and Economics

Programme Code: UBPHPOLEC

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2017/18

Four-year classification scheme for BA/BSc degrees for students who entered in or after 2015/16 but before the 2018/19 academic year <https://info.lse.ac.uk/staff/divisions/academic-registrars-division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/BA-BSc-Four-Year-scheme-for-students->

82 Undergraduate Programme Regulations

Additional course	EC221 Principles of Econometrics (1.0)
	In addition, students will also take the following course in MT & LT:
	EC340 PPE Interdisciplinary Research Seminar (1.0) G
Year 4	
Paper 13	PH341 Philosophy, Politics and Economics: Applications (1.0)
Paper 14	GV342 Philosophy, Politics and Economics: Capstone and Research Project (1.0)
Paper 15	Courses to the value of 1.0 unit(s) from the following: H Economics Options List Philosophy Options List Government List B
Paper 16	Courses to the value of 1.0 unit(s) from the following: I Economics Options List Philosophy Options List Government List B Or Courses to the value of 1.0 unit(s) from the following: J Undergraduate Outside Options List (Years 2 & 3)
Notes	LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Economics Options List

EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

1: SO210 can not be taken with SA217, SA218, SA309

A: SO311 is available to students in Year 3 only.

means there may be prerequisites for this course. Please view the course guide for more information.

Language Specialism: Students who have taken and passed a 1.0 unit language course in each year of their degree (i.e. 25% of their overall programme of study) will be offered the opportunity to receive a language specialism attached to their degree certificate and transcript. Students must take all courses in the same language (French, Spanish, German, Mandarin or Russian) in order to qualify for the specialism. The three courses must also be consecutively harder in level, for example: beginner, intermediate and advanced. Students who choose to take language courses are not obligated to receive a specialism, but have the option if they wish. Degree certificates which include a language specialism will state the language in the title, for example: **BSc in Sociology with French**.

Paper 2	SO100	Key Concepts: Introduction to Social Theory (1.0)
Paper 3	SO110	Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)
Paper 4	PB102	Social Psychology (1.0)

Or

Courses to the value of 1.0 unit(s) from the following: A
Undergraduate Outside Options List (Year 1)
Undergraduate Outside Options List (Years 2 & 3)

Year 2

Paper 5	SO221	Researching London: Advanced Social Research Methods (1.0)
Paper 6	SO201	Key Concepts: Advanced Social Theory (1.0)
Paper 7		Courses to the value of 1.0 unit(s) from the following: Sociology Options List
Paper 8		Courses to the value of 1.0 unit(s) from the following: Sociology Options List Undergraduate Outside Options List (Years 2 & 3)

Year 3

Paper 9	SO302	The Sociological Dissertation (1.0)
Paper 10		Courses to the value of 1.0 unit(s) from the following: Sociology Options List
Paper 11		Courses to the value of 1.0 unit(s) from the following: Sociology Options List
Paper 12		Courses to the value of 1.0 unit(s) from the following: Sociology Options List Undergraduate Outside Options List (Years 2 & 3)

Notes

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Sociology Options List

SO203	Political Sociology (1.0)
SO208	Gender and Society (1.0)
SO210	Crime, Deviance and Control (1.0) 1
SO211	Sociology of Health and Medicine (1.0) (withdrawn 2017/18)
SO224	The Sociology of Race and Ethnicity (1.0)
SO230	Digital Technology, Speed and Culture (1.0) (withdrawn 2018/19)
SO231	Knowledge, Power, and Social Change (0.5) (not available 2018/19)
SO232	Sociology of Health and Illness (0.5)
SO233	Reactionary Radicalism: Populism and Authoritarianism in the 21st Century (0.5)
SO308	Personal Life, Intimacy and the Family (1.0)
SO309	Atrocity and Justice (0.5) (not available 2018/19)
SO310	The Sociology of Elites (0.5)
SO311	Law and Violence (0.5) B
SO312	Work, Inequality and Society (0.5)
SO313	Material Culture and Everyday Life (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Notes

A: Courses selected from the Undergraduate Outside Options List should be approved Level 1 courses. Other courses may only be selected subject to the approval of the Academic Mentor and the Department tutor.

B: SO311 is available to students in Year 3 only.

means there may be prerequisites for this course.

Please view the course guide for more information.

subject to timetabling constraints and/or students meeting specific prerequisite requirements.

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be

BSc in Statistics with Finance

Programme Code: UBSTWFI

Department: Statistics

For students starting this programme of study in 2016/17

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

See note LSE100 The LSE Course: Understanding the causes of things

Year 1

Paper 1 ST102 Elementary Statistical Theory (1.0)
 Paper 2 MA100 Mathematical Methods (1.0)
 Paper 3 EC100 Economics A (1.0) **or**
 EC102 Economics B (1.0) A
 Paper 4 AC104 Elements of Accounting, Financial
 Institutions and Financial Management (1.0)
 B (withdrawn 2018/19) **or**
 MA103 Introduction to Abstract Mathematics (1.0)

Year 2

Paper 5 MA212 Further Mathematical Methods (1.0)
 Paper 6 ST202 Probability, Distribution Theory and Inference
 (1.0)
 Paper 7 Courses to the value of 1.0 unit(s) from the following:
 MA103 Introduction to Abstract Mathematics (1.0)
 MA203 Real Analysis (0.5)
 MA208 Optimisation Theory (0.5)
 MA209 Differential Equations (0.5)
 MA210 Discrete Mathematics (0.5)
 MA211 Algebra and Number Theory (0.5)
 ST205 Sample Surveys and Experiments (0.5)
 ST226 Actuarial Investigations: Financial (0.5)
 ST227 Survival Models (0.5)
 Paper 8 FM213 Principles of Finance (1.0)

Year 3

Paper 9 ST300 Regression and Generalised Linear Models
 (0.5) **and** ST304 Time Series and Forecasting
 (0.5)
 Paper 10 Courses to the value of 1.0 unit(s) from the following:
 MA203 Real Analysis (0.5)
 MA208 Optimisation Theory (0.5)
 MA209 Differential Equations (0.5)
 MA210 Discrete Mathematics (0.5)
 MA211 Algebra and Number Theory (0.5)
 MA300 Game Theory (1.0)
 MA301 Game Theory I (0.5)
 MA303 Chaos in Dynamical Systems (0.5)
 MA305 Optimisation in Function Spaces (0.5)
 MA310 Mathematics of Finance and Valuation (0.5)
 MA313 Probability for Finance (0.5)
 MA314 Algorithms and Programming (0.5)
 MA315 Algebra and its Applications (0.5)
 MA317 Complex Analysis (0.5)
 MA318 History of Mathematics in Finance and
 Economics (0.5)
 MA319 Partial Differential Equations (0.5)
 MA331 Practical Optimisation Modelling (0.5) C (not
 available 2018/19)
 MG308 Simulation Modelling and Analysis (0.5)
 ST301 Actuarial Mathematics (Life) (0.5)
 ST302 Stochastic Processes (0.5)
 ST306 Actuarial Mathematics (General) (0.5)
 ST307 Aspects of Market Research (0.5)
 ST308 Bayesian Inference (0.5)
 ST312 Applied Statistics Project (0.5)
 ST327 Market Research: An Integrated Approach
 (1.0)
 ST330 Stochastic and Actuarial Methods in Finance
 (1.0) 1D
 Paper 11 FM300 Corporate Finance, Investments and

Financial Markets (1.0) **or**

FM320 Quantitative Finance (1.0) 2
 Courses to the value of 1.0 unit(s) from the following:
 AC102 Elements of Financial Accounting (0.5)
 AC103 Elements of Management Accounting,
 Financial Management and Financial
 Institutions (0.5)
 AC211 Managerial Accounting (1.0)
 AC310 Management Accounting, Financial
 Management and Organisational Control
 (1.0)
 AC330 Financial Accounting, Analysis and Valuation.
 (1.0)
 AC340 Auditing, Governance and Risk Management
 (1.0)
 EC202 Microeconomic Principles II (1.0)
 EC210 Macroeconomic Principles (1.0)
 EC221 Principles of Econometrics (1.0)
 FM300 Corporate Finance, Investments and
 Financial Markets (1.0)
 FM320 Quantitative Finance (1.0) 3
 LL209 Commercial and Enterprise Law
 (1.0) (withdrawn 2018/19)
 LL210 Information Technology and the Law (1.0)
 MA231 Operational Research Methods (1.0)
 MG203 Organisational Theory and Behaviour
 (1.0) (withdrawn 2018/19)
 MG206 Firms, Management and Competitive
 Advantage (0.5)
 MG307 International Context of Management
 (0.5) (not available 2018/19)
 MG308 Simulation Modelling and Analysis (0.5)
 MG315 Marketing Action Learning Project (0.5) E
 PH201 Philosophy of Science (1.0)
 PH311 Philosophy of Economics (1.0)
 SA250 Demographic Description and Analysis (1.0)
 (withdrawn 2017/18)
 ST205 Sample Surveys and Experiments (0.5)
 ST226 Actuarial Investigations: Financial (0.5)
 ST227 Survival Models (0.5)

Paper 10 options list

LSE100 is taken by all students in the Lent Term of Year 1 and the Michaelmas Term of Year 2. The course is compulsory but does not affect the final degree classification.

Notes

Paper 10 options list

MA203 Real Analysis (0.5)
 MA208 Optimisation Theory (0.5)
 MA209 Differential Equations (0.5)
 MA210 Discrete Mathematics (0.5)
 MA211 Algebra and Number Theory (0.5)
 MA300 Game Theory (1.0)
 MA301 Game Theory I (0.5)
 MA303 Chaos in Dynamical Systems (0.5)

 2018/19)
 MG308 Simulation Modelling and Analysis (0.5)
 ST301 Actuarial Mathematics (Life) (0.5)
 ST302 Stochastic Processes (0.5)
 ST306 Actuarial Mathematics (General) (0.5)
 ST307 Aspects of Market Research (0.5)
 ST308 Bayesian Inference (0.5)

ST312	Applied Statistics Project (0.5)
ST327	Market Research: An Integrated Approach (1.0)
ST330	Stochastic and Actuarial Methods in Finance (1.0) G
	Prerequisite Requirements and Mutually Exclusive Options
	1: ST330 can not be taken with FM320
	2: FM320 can not be taken with ST330
	3: FM320 can not be taken with ST330

Notes

A: EC102 course allocation dependent on Economics A-level or equivalent background. See course guides for further information.

B: AC104 is a prerequisite for all AC courses at Levels 2 and 3.

C: MA331 can be taken in the third year only.

D: ST330 can only be taken in conjunction with ST302.

E: MG315 can be taken in the third year only.

F: MA331 can be taken in the third year only.

G: ST330 can only be taken in conjunction with ST302.

means there may be prerequisites for this course. Please view the course guide for more information.

This programme has been discontinued. Last year of entry 2016/17.

General Course

Programme Code: UOGC

Department: Undefined Department

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

The courses below are available to General Course students

Course List

Accounting

AC102	Elements of Financial Accounting (0.5) *
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5) *
AC211	Managerial Accounting (1.0) *
AC310	Management Accounting, Financial Management and Organisational Control (1.0)
AC340	Auditing, Governance and Risk Management (1.0) *

Anthropology

AN100	Introduction to Social Anthropology (1.0)
AN101	Ethnography and Theory: Selected Texts (1.0)
AN102	Anthropology, Text and Film (1.0)
AN200	The Anthropology of Kinship, Sex and Gender (1.0)
AN205	The Anthropology of Melanesia (0.5) (not available 2018/19)
AN216	Cognition and Anthropology: Human Development in Cultural Environments (0.5) (not available 2018/19)
AN221	The Anthropology of Christianity (0.5)
AN223	The Anthropology of Southeast Asia (0.5)
AN226	Political and Legal Anthropology (1.0)
AN237	The Anthropology of Development (0.5)
AN238	Anthropology and Human Rights (0.5) * (withdrawn 2018/19)
AN240	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2018/19)
AN243	Children and Youth in Contemporary

Ethnography (0.5)

AN244	Anthropology and Media (0.5) * (not available 2018/19)
AN245	Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)
AN247	Anthropological Approaches to Questions of Being (0.5)
AN250	The Anthropology of South Asia (0.5)
AN251	Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (0.5) (not available 2018/19)
AN252	Anthropological Approaches to Value (0.5) (not available 2018/19)
AN256	Economic Anthropology (1): Production and Exchange (0.5)
AN269	The Anthropology of Amazonia (0.5) (not available 2018/19)
AN274	Subjectivity and Anthropology (0.5) (not available 2018/19)
AN275	The Anthropology of Revolution (0.5) (not available 2018/19)
AN276	Anthropology and the Anthropocene (0.5) * (not available 2018/19)
AN277	Topics in the Anthropology of sub-Saharan Africa (0.5) *
AN278	Anthropology and Global History (0.5)
AN298	Research Methods in Social Anthropology (0.5) *
AN300	Advanced Theory of Social Anthropology (1.0) *
AN301	The Anthropology of Religion (1.0) *
AN357	Economic Anthropology (2): Transformation and Globalisation (0.5)

Economics

EC100	Economics A (1.0)
EC102	Economics B (1.0)
EC201	Microeconomic Principles I (1.0) *
EC202	Microeconomic Principles II (1.0) *
EC210	Macroeconomic Principles (1.0)
EC220	Introduction to Econometrics (1.0) *
EC221	Principles of Econometrics (1.0) *
EC230	Economics in Public Policy (1.0)
EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)
EC307	Development Economics (1.0)
EC309	Econometric Theory (1.0) *
EC311	History of Economics: How Theories Change (1.0) *
EC313	Industrial Economics (1.0) *
EC315	International Economics (1.0)
EC317	Labour Economics (1.0)
EC319	Games and Economic Behaviour (1.0)
EC321	Monetary Economics (1.0) *
EC325	Public Economics (1.0)
EC333	Problems of Applied Econometrics (1.0) *

Economic History

EH101	The Internationalisation of Economic Growth, 1870 to the present day (1.0)
EH102	Pre-industrial Economic History (1.0)
EH204	Money and Finance: From the Middle Ages to Modernity (1.0)
EH207	The Making of an Economic Superpower: China since 1850 (1.0)
EH208	Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0) *
EH211	Africa and the World Economy, 1500-2000 (1.0)
EH225	Latin America and the International Economy (1.0)
EH238	The Origins of Growth (1.0)

- EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)
 EH309 Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)
 EH311 Atlantic World Slavery (1.0)

Finance

- FM101 Finance (0.5)
 FM212 Principles of Finance (1.0) *
 FM300 Corporate Finance, Investments and Financial Markets (1.0)
 FM320 Quantitative Finance (1.0) *

Government

- GV100 Introduction to Political Theory (1.0)
 GV101 Introduction to Political Science (1.0)
 GV225 Public Choice and Politics (1.0)
 GV227 The Politics of Economic Policy (1.0) (not available 2018/19)
 GV245 Democracy and Democratisation (1.0)
 GV248 Power and Politics in the Modern World: Comparative Perspectives (1.0) *
 GV249 Research Design in Political Science (1.0) *

Mathematics

- MA100 Mathematical Methods (1.0)
- MA103 Introduction to Abstract Mathematics (1.0) *
- MA107 Quantitative Methods (Mathematics) (0.5)
- MA110 Basic Quantitative Methods (1.0)
- MA203 Real Analysis (0.5) *
- MA207 Further Quantitative Methods (Mathematics) (0.5) *
- MA208 Optimisation Theory (0.5) *
- MA209 Differential Equations (0.5) *
- MA210 Discrete Mathematics (0.5) *
- MA211 Algebra and Number Theory (0.5) *
- MA212 Further Mathematical Methods (1.0) *
- MA231 Operational Research Methods (1.0)
- MA300 Game Theory (1.0) *
- MA301 Game Theory I (0.5) *
- MA303 Chaos in Dynamical Systems (0.5) *
- MA305 Optimisation in Function Spaces (0.5) *
- MA310 Mathematics of Finance and Valuation (0.5) *
- MA313 Probability for Finance (0.5) *
- MA314 Algorithms and Programming (0.5) *
- MA315 Algebra and its Applications (0.5) *
- MA316 Graph Theory (0.5) *
- MA317 Complex Analysis (0.5) *
- MA318 History of Mathematics in Finance and Economics (0.5) *
- MA319 Partial Differential Equations (0.5) *
- MA320 Mathematics of Networks (0.5) *
- MA331 Practical Optimisation Modelling (0.5) (not available 2018/19)

Management

- MG104 Operations Management (0.5)
- MG105 Organisational Behaviour and Leadership (0.5)
- MG205 Econometrics: Theory and Applications (1.0)
- MG206 Firms, Management and Competitive Advantage (0.5)
- MG207 Managerial Economics (1.0) *
- MG208 Business Transformation and Project Management (0.5) (not available 2018/19)
- MG209 E-business (0.5)
- MG210 Corporate Social Responsibility and International Labour Standards (0.5)
- MG212 Marketing (0.5)
- MG213 Information Systems (0.5)
- MG214 Human Resource Management (0.5) *
- MG228 Managing the Stone-Age Brain (0.5) (not available 2018/19)
- MG301 Strategy (1.0) *

- MG302 Topics in Management Research (0.5)
- MG303 International Business Strategy and Emerging Markets (0.5)
- MG305 Innovation and Technology Management (0.5)
- MG307 International Context of Management (0.5) (not available 2018/19)
- MG308 Simulation Modelling and Analysis (0.5)
- MG310 Analytics for Strategic Decisions (0.5)
- MG311 Foundations of Behavioural Decision Science (0.5)
- MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (0.5)
- MG315 Marketing Action Learning Project (0.5)

Philosophy, Logic & Scientific Method

- PH101 Logic (1.0)
- PH103 The Big Questions: An Introduction to Philosophy (1.0)
- PH104 Formal Methods of Philosophical Argumentation (1.0)
- PH201 Philosophy of Science (1.0)
- PH203 Philosophy of the Social Sciences (1.0)
- PH213 Scientific Revolutions: Philosophical and Historical Issues (1.0) (not available 2018/19)
- PH214 Philosophy, Morals and Politics (1.0)
- PH217 Set Theory and Further Logic (1.0)
- PH220 Scientific Method and Policy (1.0) (not available 2018/19)
- PH221 Problems of Analytic Philosophy (1.0)
- PH222 Philosophy and Public Policy (1.0)
- PH225 Business and Organisational Ethics (0.5)
- PH227 Genes, Brains and Society (0.5)
- PH228 Emotion, Cognition and Behaviour: Science and Policy (0.5)
- PH230 Einstein for Everyone: From time travel to the edge of the universe (0.5)
- PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5)
- PH311 Philosophy of Economics (1.0)
- PH332 Effective Philanthropy: Ethics and Evidence (0.5) (not available 2018/19)

Psychological and Behavioural Science

- PB101 Foundations of Psychological Science (1.0)
- PB102 Social Psychology (1.0)

Social Policy

- SA100 The Foundations of Social Policy (1.0) *
- SA101 Sociology and Social Policy (1.0)
- SA104 Social Economics, Politics and Policy (1.0) *
- SA201 Research Methods for Social Policy (1.0) *
- SA204 Education Policy (1.0) *
- SA217 Psychology of Crime and Criminal Justice (1.0)
- SA218 Criminological Perspectives (1.0) (not available 2018/19)
- SA221 Poverty, Inequality, and Social Policy (1.0)
- SA223 Health and Social Care Policy (1.0)
- SA224 Introduction to Global Population Change (1.0)
- SA302 Assessing Social Progress (1.0) (not available 2018/19)
- SA303 Sexuality, Everyday Lives and Social Policy in Developing Countries (0.5)
- SA304 Migration: Current research, critical approaches (0.5)
- SA309 Crime Control: Ideas and Controversies (1.0)
- SA319 Social Security Policies (0.5) *

Sociology

SO100	Key Concepts: Introduction to Social Theory (1.0)
SO102	Data in Society: Researching Social Life (1.0)
SO110	Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)
SO201	Key Concepts: Advanced Social Theory (1.0)
SO203	Political Sociology (1.0)
SO208	Gender and Society (1.0)
SO210	Crime, Deviance and Control (1.0)
SO221	Researching London: Advanced Social Research Methods (1.0)
SO224	The Sociology of Race and Ethnicity (1.0)
SO231	Knowledge, Power, and Social Change (0.5) * (not available 2018/19)
SO232	Sociology of Health and Illness (0.5) *
SO233	Reactionary Radicalism: Populism and Authoritarianism in the 21st Century (0.5) *
SO234	Digital Technology, Speed and Culture (0.5) *
SO308	Personal Life, Intimacy and the Family (1.0)
SO309	Atrocity and Justice (0.5) (not available 2018/19)
SO310	The Sociology of Elites (0.5) *
SO311	Law and Violence (0.5)
SO312	Work, Inequality and Society (0.5) *
SO313	Material Culture and Everyday Life (0.5)

Statistics

ST102	Elementary Statistical Theory (1.0)
ST107	Quantitative Methods (Statistics) (0.5)
ST108	Statistical Methods for the Social Sciences (1.0)
ST201	Statistical Models and Data Analysis (0.5)
ST202	Probability, Distribution Theory and Inference (1.0)
ST205	Sample Surveys and Experiments (0.5)
ST206	Probability and Distribution Theory (0.5)
ST213	Introduction to Pricing, Hedging and Optimization (0.5) *
ST226	Actuarial Investigations: Financial (0.5)
ST227	Survival Models (0.5)
ST300	Regression and Generalised Linear Models (0.5) *
ST301	Actuarial Mathematics (Life) (0.5)
ST302	Stochastic Processes (0.5)
ST304	Time Series and Forecasting (0.5)
ST306	Actuarial Mathematics (General) (0.5)
ST307	Aspects of Market Research (0.5)
ST308	Bayesian Inference (0.5)
ST309	Elementary Data Analytics (0.5) *
ST327	Market Research: An Integrated Approach (1.0)
ST330	Stochastic and Actuarial Methods in Finance (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

AC102	Elements of Financial Accounting (0.5) *
AC103	Elements of Management Accounting, Financial Management and Financial Institutions (0.5) *
AC211	Managerial Accounting (1.0) *
AC310	Management Accounting, Financial Management and Organisational Control (1.0)
AC340	Auditing, Governance and Risk Management (1.0) *

Anthropology

AN100	Introduction to Social Anthropology (1.0)
AN101	Ethnography and Theory: Selected Texts (1.0)
AN102	Anthropology, Text and Film (1.0)
AN200	The Anthropology of Kinship, Sex and Gender (1.0)
AN205	The Anthropology of Melanesia (0.5) (not available 2018/19)
AN216	Cognition and Anthropology: Human Development in Cultural Environments (0.5) (not available 2018/19)
AN221	The Anthropology of Christianity (0.5)
AN223	The Anthropology of Southeast Asia (0.5)
AN226	Political and Legal Anthropology (1.0)
AN237	The Anthropology of Development (0.5)
AN238	Anthropology and Human Rights (0.5) * (withdrawn 2018/19)
AN240	Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2018/19)
AN243	Children and Youth in Contemporary Ethnography (0.5)
AN244	Anthropology and Media (0.5) * (not available 2018/19)
AN245	Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)
AN247	Anthropological Approaches to Questions of Being (0.5)
AN250	The Anthropology of South Asia (0.5)
AN251	Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (0.5) (not available 2018/19)
AN252	Anthropological Approaches to Value (0.5) (not available 2018/19)
AN256	Economic Anthropology (1): Production and Exchange (0.5)
AN269	The Anthropology of Amazonia (0.5) (not available 2018/19)
AN274	Subjectivity and Anthropology (0.5) (not available 2018/19)
AN275	The Anthropology of Revolution (0.5) (not available 2018/19)
AN276	Anthropology and the Anthropocene (0.5) * (not available 2018/19)
AN277	Topics in the Anthropology of sub-Saharan Africa (0.5) *
AN278	Anthropology and Global History (0.5)
AN298	Research Methods in Social Anthropology (0.5) *
AN300	Advanced Theory of Social Anthropology (1.0) *
AN301	The Anthropology of Religion (1.0) *
AN357	Economic Anthropology (2): Transformation and Globalisation (0.5)

Economics

EC100	Economics A (1.0)
EC102	Economics B (1.0)
EC201	Microeconomic Principles I (1.0) *
EC202	Microeconomic Principles II (1.0) *

Erasmus Reciprocal Programme of Study

Programme Code: UOEXERA

Department: Undefined Department

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper **Course number, title (unit value)**

The courses below are available to Erasmus students

Course List **Accounting**

EC210	Macroeconomic Principles (1.0)
EC220	Introduction to Econometrics (1.0) *
EC221	Principles of Econometrics (1.0) *
EC230	Economics in Public Policy (1.0)
EC301	Advanced Economic Analysis (1.0)
EC302	Political Economy (1.0)
EC307	Development Economics (1.0)
EC309	Econometric Theory (1.0) *
EC311	History of Economics: How Theories Change (1.0) *
EC313	Industrial Economics (1.0) *
EC315	International Economics (1.0)
EC317	Labour Economics (1.0)
EC319	Games and Economic Behaviour (1.0)
EC321	Monetary Economics (1.0) *
EC325	Public Economics (1.0)
EC333	Problems of Applied Econometrics (1.0) *

Economic History

EH101	The Internationalisation of Economic Growth, 1870 to the present day (1.0)
EH102	Pre-industrial Economic History (1.0)
EH204	Money and Finance: From the Middle Ages to Modernity (1.0)
EH207	The Making of an Economic Superpower: China since 1850 (1.0)
EH208	Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0) *
EH211	Africa and the World Economy, 1500-2000 (1.0)
EH225	Latin America and the International Economy (1.0)
EH238	The Origins of Growth (1.0)
EH240	Business and Economic Performance since 1945: Britain in International Context (1.0)
EH309	Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)
EH311	Atlantic World Slavery (1.0)

Finance

FM101	Finance (0.5)
FM212	Principles of Finance (1.0) *
FM300	Corporate Finance, Investments and Financial Markets (1.0)
FM320	Quantitative Finance (1.0) *

Government

GV100	Introduction to Political Theory (1.0)
GV101	Introduction to Political Science (1.0)
GV225	Public Choice and Politics (1.0)
GV227	The Politics of Economic Policy (1.0) (not available 2018/19)
GV245	Democracy and Democratisation (1.0)
GV248	Power and Politics in the Modern World: Comparative Perspectives (1.0) *
GV249	Research Design in Political Science (1.0) *
GV251	Government, Politics and Public Policy in the European Union (1.0)
GV262	Contemporary Political Theory (1.0)
GV263	Public Policy Analysis (1.0)
GV264	Politics and Institutions in Europe (1.0)
GV302	Key Themes in the History of Political Thought (1.0) *
GV307	Political and Ethnic Conflict and Coexistence: Key Debates (0.5)
GV317	The Modern State - Theory and Practice (0.5) *
GV318	Building Democracies from Conflict? Violence, Power-Sharing and Institutional Design (0.5) *
GV322	Knowledge Economies: Global Innovation Networks and Segregated Societies (0.5)
GV323	Transparency and Accountability in

	Government (0.5) *
GV325	Advanced Issues in Political Economy (0.5) (not available 2018/19)
GV328	Middle East Politics in Transnational Perspective (0.5) *
GV335	African Political Economy (0.5) (not available 2018/19)

Geography & Environment

GY100	Introduction to Geography (1.0)
GY103	Contemporary Europe (1.0)
GY120	Environmental Change: Past, Present and Future (1.0)
GY121	Sustainable Development (1.0)
GY140	Introduction to Geographical Research (1.0)
GY200	Economy, Society and Space (1.0) (withdrawn 2018/19)
GY201	Urban and Spatial Economic Analysis I (1.0) (withdrawn 2018/19)
GY202	Introduction to Global Development (1.0)
GY205	Political Geographies (1.0)
GY206	Urban Geography and Globalisation (0.5)
GY207	Economy, Society and Space (0.5)
GY209	The Economic Geography of Trade, Production and Development (0.5)
GY210	The Economics of Cities (0.5)
GY220	Environment: Science and Society (1.0)
GY222	Applied Environmental Economics (1.0)
GY300	Theories of Regional Development and Change (1.0) * (withdrawn 2018/19)
GY301	The Political Geography of Development and the South (1.0) (withdrawn 2018/19)
GY302	Urban Development: Politics, Policy and Planning (1.0) (withdrawn 2018/19)
GY303	The Geography of Gender: Global Perspectives (1.0) (withdrawn 2018/19)
GY305	Urban and Spatial Economic Analysis II (1.0) * (withdrawn 2018/19)
GY306	Geographies of Race (1.0) (withdrawn 2018/19)
GY307	Regional Economic Development (0.5) * (not available 2018/19)
GY308	The Economic Geography of Growth and Development (0.5) *
GY309	The Political Geography of Development (0.5)
GY310	Urban Politics (0.5)
GY311	The Political Economy of Urbanisation (0.5) *
GY312	Geographies of Gender in the Global South (0.5)
GY313	Firms and Economic Geography: Location, Technology and Innovation (0.5) *
GY314	The Economics of Housing Markets and Migration (0.5) *
GY315	Geographies of Race (0.5)
GY324	Environmental Governance (1.0) (withdrawn 2018/19)
GY325	Environment and Development (1.0) (withdrawn 2018/19)
GY326	Sustainable Business and Finance (0.5)
GY327	Global Environmental Governance (0.5)
GY328	Political Ecology of Development (0.5)
GY329	Applied Economics of Environment and Development (0.5)
GY331	Geographies of Global Migration (0.5) *

International History

HY113	From Empire to Independence: The Extra-European World in the Twentieth Century (1.0)
HY116	International History since 1890 (1.0)
HY118	Faith, Power and Revolution: Europe and the

	Wider World, c.1500-c.1800 (1.0)
HY119	Thinking Like A Historian (0.0) *

 SO233 Reactionary Radicalism: Populism and Authoritarianism in the 21st Century (0.5) *
 SO234 Digital Technology, Speed and Culture (0.5) *
 SO308 Personal Life, Intimacy and the Family (1.0)
 SO309 Atrocity and Justice (0.5) (not available 2018/19)
 SO310 The Sociology of Elites (0.5) *
 SO311 Law and Violence (0.5)
 SO312 Work, Inequality and Society (0.5) *
 SO313 Material Culture and Everyday Life (0.5)

Statistics

- ST102 Elementary Statistical Theory (1.0)
 ST107 Quantitative Methods (Statistics) (0.5)
 ST108 Statistical Methods for the Social Sciences (1.0)
 ST201 Statistical Models and Data Analysis (0.5)
 ST202 Probability, Distribution Theory and Inference (1.0)
 ST205 Sample Surveys and Experiments (0.5)
 ST206 Probability and Distribution Theory (0.5)
 ST213 Introduction to Pricing, Hedging and Optimization (0.5) *
 ST226 Actuarial Investigations: Financial (0.5)
 ST227 Survival Models (0.5)

- ST300 Regression and Generalised Linear Models (0.5) *
 ST301 Actuarial Mathematics (Life) (0.5)
 ST302 Stochastic Processes (0.5)
 ST304 Time Series and Forecasting (0.5)
 ST306 Actuarial Mathematics (General) (0.5)
 ST307 Aspects of Market Research (0.5)
 ST308 Bayesian Inference (0.5)
 ST309 Elementary Data Analytics (0.5) *
 ST327 Market Research: An Integrated Approach (1.0)
 ST330 Stochastic and Actuarial Methods in Finance (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

Exchange Programme for Students from University of California, Berkeley

Programme Code: UOEXBE

Department: Undefined Department

For students starting this programme of study in 2018/19

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

The courses below are available to Exchange students

Course List

Accounting

- AC102 Elements of Financial Accounting (0.5) *
 AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5) *
 AC211 Managerial Accounting (1.0) *
 AC310 Management Accounting, Financial Management and Organisational Control (1.0)
 AC340 Auditing, Governance and Risk Management (1.0) *

Anthropology

- AN100 Introduction to Social Anthropology (1.0)
 AN101 Ethnography and Theory: Selected Texts (1.0)
 AN102 Anthropology, Text and Film (1.0)
 AN200 The Anthropology of Kinship, Sex and Gender (1.0)
 AN205 The Anthropology of Melanesia (0.5) (not available 2018/19)
 AN216 Cognition and Anthropology: Human Development in Cultural Environments (0.5) (not available 2018/19)
 AN221 The Anthropology of Christianity (0.5)
 AN223 The Anthropology of Southeast Asia (0.5)
 AN226 Political and Legal Anthropology (1.0)
 AN237 The Anthropology of Development (0.5)
 AN238 Anthropology and Human Rights (0.5) * (withdrawn 2018/19)
 AN240 Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2018/19)
 AN243 Children and Youth in Contemporary Ethnography (0.5)
 AN244 Anthropology and Media (0.5) * (not available 2018/19)
 AN245 Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)

- AN247 Anthropological Approaches to Questions of Being (0.5)
- AN250 The Anthropology of South Asia (0.5)
- AN251 Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (0.5) (not available 2018/19)
- AN252 Anthropological Approaches to Value (0.5) (not available 2018/19)
- AN256 Economic Anthropology (1): Production and Exchange (0.5)
- AN269 The Anthropology of Amazonia (0.5) (not available 2018/19)
- AN274 Subjectivity and Anthropology (0.5) (not available 2018/19)
- AN275 The Anthropology of Revolution (0.5) (not available 2018/19)
- AN276 Anthropology and the Anthropocene (0.5) * (not available 2018/19)
- AN277 Topics in the Anthropology of sub-Saharan Africa (0.5) *
- AN278 Anthropology and Global History (0.5)
- AN298 Research Methods in Social Anthropology (0.5) *
- AN300 Advanced Theory of Social Anthropology (1.0) *
- AN301 The Anthropology of Religion (1.0) *
- AN357 Economic Anthropology (2): Transformation and Globalisation (0.5)

Economics

- EC100 Economics A (1.0)
- EC102 Economics B (1.0)
- EC201 Microeconomic Principles I (1.0) *
- EC202 Microeconomic Principles II (1.0) *
- EC210 Macroeconomic Principles (1.0)
- EC220 Introduction to Econometrics (1.0) *
- EC221 Principles of Econometrics (1.0) *
- EC230 Economics in Public Policy (1.0)
- EC301 Advanced Economic Analysis (1.0)
- EC302 Political Economy (1.0)
- EC307 Development Economics (1.0)
- EC309 Econometric Theory (1.0) *
- EC311 History of Economics: How Theories Change (1.0) *
- EC313 Industrial Economics (1.0) *
- EC315 International Economics (1.0)
- EC317 Labour Economics (1.0)
- EC319 Games and Economic Behaviour (1.0)
- EC321 Monetary Economics (1.0) *
- EC325 Public Economics (1.0)
- EC333 Problems of Applied Econometrics (1.0) *

Economic History

- EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)
- EH102 Pre-industrial Economic History (1.0)
- EH204 Money and Finance: From the Middle Ages to Modernity (1.0)
- EH207 The Making of an Economic Superpower: China since 1850 (1.0)
- EH208 Economic History Lab: Cities, Economy and Society, 1550-1750 (1.0) *
- EH211 Africa and the World Economy, 1500-2000 (1.0)
- EH225 Latin America and the International Economy (1.0)
- EH238 The Origins of Growth (1.0)
- EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)
- EH309 Slavery from Ancient Greece to the Gulag (1.0) (not available 2018/19)
- EH311 Atlantic World Slavery (1.0)

Finance

- FM101 Finance (0.5)
- FM212 Principles of Finance (1.0) *
- FM300 Corporate Finance, Investments and Financial Markets (1.0)
- FM320 Quantitative Finance (1.0) *

Government

- GV100 Introduction to Political Theory (1.0)
- GV101 Introduction to Political Science (1.0)
- GV225 Public Choice and Politics (1.0)
- GV227 The Politics of Economic Policy (1.0) (not available 2018/19)
- GV245 Democracy and Democratisation (1.0)
- GV248 Power and Politics in the Modern World: Comparative Perspectives (1.0) *
- GV249 Research Design in Political Science (1.0) *
- GV251 Government, Politics and Public Policy in the European Union (1.0)
- GV262 Contemporary Political Theory (1.0)
- GV263 Public Policy Analysis (1.0)
- GV264 Politics and Institutions in Europe (1.0)
- GV302 Key Themes in the History of Political Thought (1.0) *
- GV307 Political and Ethnic Conflict and Coexistence: Key Debates (0.5)
- GV317 The Modern State - Theory and Practice (0.5) *
- GV318 Building Democracies from Conflict? Violence, Power-Sharing and Institutional Design (0.5) *
- GV322 Knowledge Economies: Global Innovation Networks and Segregated Societies (0.5)
- GV323 Transparency and Accountability in Government (0.5) *
- GV325 Advanced Issues in Political Economy (0.5) (not available 2018/19)
- GV328 Middle East Politics in Transnational Perspective (0.5) *
- GV335 African Political Economy (0.5) (not available 2018/19)

Geography & Environment

- GY100 Introduction to Geography (1.0)
- GY103 Contemporary Europe (1.0)
- GY120 Environmental Change: Past, Present and Future (1.0)
- GY121 Sustainable Development (1.0)
- GY140 Introduction to Geographical Research (1.0)
- GY200 Economy, Society and Space (1.0) (withdrawn 2018/19)
- GY201 Urban and Spatial Economic Analysis I (1.0) (withdrawn 2018/19)
- GY202 Introduction to Global Development (1.0)
- GY205 Political Geographies (1.0)
- GY206 Urban Geography and Globalisation (0.5)
- GY207 Economy, Society and Space (0.5)
- GY209 The Economic Geography of Trade, Production and Development (0.5)
- GY210 The Economics of Cities (0.5)
- GY220 Environment: Science and Society (1.0)
- GY222 Applied Environmental Economics (1.0)
- GY300 Theories of Regional Development and Change (1.0) * (withdrawn 2018/19)

LN220	Spanish Language and Society 4 (proficiency) (1.0) *
LN230	French Language and Society 4 (proficiency) (1.0) *
LN240	Mandarin Language and Society 4

(Proficiency) (1.0) *

LN250	English Literature and Society (1.0)
LN251	Comparative Literature and 20th Century Political History (1.0)
LN252	Global Literature and Society (1.0)
LN253	European Literature and Philosophy (1.0)
LN254	Literature and Aspects of Ethics (1.0)
LN270	Society and Language: Linguistics for Social Scientists (1.0)
LN320	Spanish Language and Society 5 (mastery) (1.0) *
LN330	French Language and Society 5 (mastery) (1.0) *
LN340	Mandarin Language and Society 5 (Mastery) (1.0) *

Mathematics

MA100	Mathematical Methods (1.0)
MA103	Introduction to Abstract Mathematics (1.0) *
MA107	Quantitative Methods (Mathematics) (0.5)
MA110	Basic Quantitative Methods (1.0)
MA203	Real Analysis (0.5) *
MA207	Further Quantitative Methods (Mathematics) (0.5) *
MA208	Optimisation Theory (0.5) *
MA209	Differential Equations (0.5) *
MA210	Discrete Mathematics (0.5) *
MA211	Algebra and Number Theory (0.5) *
MA212	Further Mathematical Methods (1.0) *
MA231	Operational Research Methods (1.0)
MA300	Game Theory (1.0) *
MA301	Game Theory I (0.5) *
MA303	Chaos in Dynamical Systems (0.5) *
MA305	Optimisation in Function Spaces (0.5) *
MA310	Mathematics of Finance and Valuation (0.5) *
MA313	Probability for Finance (0.5) *
MA314	Algorithms and Programming (0.5) *
MA315	Algebra and its Applications (0.5) *
MA316	Graph Theory (0.5) *
MA317	Complex Analysis (0.5) *
MA318	History of Mathematics in Finance and Economics (0.5) *
MA319	Partial Differential Equations (0.5) *
MA320	Mathematics of Networks (0.5) *
MA331	Practical Optimisation Modelling (0.5) (not available 2018/19)

Management

MG104	Operations Management (0.5)
MG105	Organisational Behaviour and Leadership (0.5)
MG205	Econometrics: Theory and Applications (1.0)
MG206	Firms, Management and Competitive Advantage (0.5)
MG207	Managerial Economics (1.0) *
MG208	Business Transformation and Project Management (0.5) (not available 2018/19)
MG209	E-business (0.5)
MG210	Corporate Social Responsibility and International Labour Standards (0.5)
MG212	Marketing (0.5)
MG213	Information Systems (0.5)
MG214	Human Resource Management (0.5) *
MG228	Managing the Stone-Age Brain (0.5) (not available 2018/19)
MG301	Strategy (1.0) *
MG302	Topics in Management Research (0.5)
MG303	International Business Strategy and Emerging Markets (0.5)
MG305	Innovation and Technology Management (0.5)

- MG307 International Context of Management (0.5) (not available 2018/19)
- MG308 Simulation Modelling and Analysis (0.5)
- MG310 Analytics for Strategic Decisions (0.5)
- MG311 Foundations of Behavioural Decision Science (0.5)
- MG312 Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts (0.5)
- MG315 Marketing Action Learning Project (0.5)

Philosophy, Logic & Scientific Method

- PH101 Logic (1.0)
- PH103 The Big Questions: An Introduction to Philosophy (1.0)
- PH104 Formal Methods of Philosophical Argumentation (1.0)
- PH201 Philosophy of Science (1.0)
- PH203 Philosophy of the Social Sciences (1.0)
- PH213 Scientific Revolutions: Philosophical and Historical Issues (1.0) (not available 2018/19)
- PH214 Philosophy, Morals and Politics (1.0)
- PH217 Set Theory and Further Logic (1.0)
- PH220 Scientific Method and Policy (1.0) (not available 2018/19)
- PH221 Problems of Analytic Philosophy (1.0)
- PH222 Philosophy and Public Policy (1.0)
- PH225 Business and Organisational Ethics (0.5)
- PH227 Genes, Brains and Society (0.5)
- PH228 Emotion, Cognition and Behaviour: Science and Policy (0.5)
- PH230 Einstein for Everyone: From time travel to the edge of the universe (0.5)
- PH232 Physics and the City: From Quantum Jumps to Stock Market Crashes (0.5)
- PH311 Philosophy of Economics (1.0)
- PH332 Effective Philanthropy: Ethics and Evidence (0.5) (not available 2018/19)

Psychological and Behavioural Science

- PB101 Foundations of Psychological Science (1.0)
- PB102 Social Psychology (1.0)

Social Policy

- SA100 The Foundations of Social Policy (1.0) *
- SA101 Sociology and Social Policy (1.0)
- SA104 Social Economics, Politics and Policy (1.0) *
- SA201 Research Methods for Social Policy (1.0) *
- SA204 Education Policy (1.0) *
- SA217 Psychology of Crime and Criminal Justice (1.0)
- SA218 Criminological Perspectives (1.0) (not available 2018/19)
- SA221 Poverty, Inequality, and Social Policy (1.0)
- SA223 Health and Social Care Policy (1.0)
- SA224 Introduction to Global Population Change (1.0)
- SA302 Assessing Social Progress (1.0) (not available 2018/19)
- SA303 Sexuality, Everyday Lives and Social Policy in Developing Countries (0.5)
- SA304 Migration: Current research, critical approaches (0.5)
- SA309 Crime Control: Ideas and Controversies (1.0)

- SA319 Social Security Policies (0.5) *

Sociology

- SO100 Key Concepts: Introduction to Social Theory (1.0)
- SO102 Data in Society: Researching Social Life (1.0)
- SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)
- SO201 Key Concepts: Advanced Social Theory (1.0)
- SO203 Political Sociology (1.0)
- SO208 Gender and Society (1.0)
- SO210 Crime, Deviance and Control (1.0)
- SO221 Researching London: Advanced Social Research Methods (1.0)
- SO224 The Sociology of Race and Ethnicity (1.0)
- SO231 Knowledge, Power, and Social Change (0.5) * (not available 2018/19)
- SO232 Sociology of Health and Illness (0.5) *
- SO233 Reactionary Radicalism: Populism and Authoritarianism in the 21st Century (0.5) *
- SO234 Digital Technology, Speed and Culture (0.5) *
- SO308 Personal Life, Intimacy and the Family (1.0)
- SO309 Atrocity and Justice (0.5) (not available 2018/19)
- SO310 The Sociology of Elites (0.5) *
- SO311 Law and Violence (0.5)
- SO312 Work, Inequality and Society (0.5) *
- SO313 Material Culture and Everyday Life (0.5)

Statistics

- ST102 Elementary Statistical Theory (1.0)
- ST107 Quantitative Methods (Statistics) (0.5)
- ST108 Statistical Methods for the Social Sciences (1.0)
- ST201 Statistical Models and Data Analysis (0.5)
- ST202 Probability, Distribution Theory and Inference (1.0)
- ST205 Sample Surveys and Experiments (0.5)
- ST206 Probability and Distribution Theory (0.5)
- ST213 Introduction to Pricing, Hedging and Optimization (0.5) *
- ST226 Actuarial Investigations: Financial (0.5)
- ST227 Survival Models (0.5)
- ST300 Regression and Generalised Linear Models (0.5) *
- ST301 Actuarial Mathematics (Life) (0.5)
- ST302 Stochastic Processes (0.5)
- ST304 Time Series and Forecasting (0.5)
- ST306 Actuarial Mathematics (General) (0.5)
- ST307 Aspects of Market Research (0.5)
- ST308 Bayesian Inference (0.5)
- ST309 Elementary Data Analytics (0.5) *
- ST327 Market Research: An Integrated Approach (1.0)
- ST330 Stochastic and Actuarial Methods in Finance (1.0)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course. Please view the course guide for more information.

122 Undergraduate Programme Regulations

Mutually exclusive options

The following courses may not be taken together i.e. students can only take one or other of the listed courses (and as programme regulations permit):

Course	Mutually exclusive course(s)
AC100 Elements of Accounting and Finance	AC104 Elements of Accounting, Financial Institutions and Financial Management (withdrawn) FM101 Finance
AC104 Elements of Accounting, Financial Institutions and Financial Management (withdrawn)	AC100 Elements of Accounting and Finance
EC100 Economics A	EC102 Economics B
EC102 Economics B	EC100 Economics A
EC201 Microeconomic Principles I	MG207 Managerial Economics EC202 Microeconomic Principles II
EC202 Microeconomic Principles II	MG207 Managerial Economics EC201 Microeconomic Principles I
EC220 Introduction to Econometrics	ST203 Statistics for Management Sciences (withdrawn) ST205 Sample Surveys and Experiments EC221 Principles of Econometrics ST201 Statistical Models and Data Analysis
EC221 Principles of Econometrics	ST201 Statistical Models and Data Analysis EC220 Introduction to Econometrics ST203 Statistics for Management Sciences (withdrawn) ST205 Sample Surveys and Experiments
FM101 Finance	AC100 Elements of Accounting and Finance
FM212 Principles of Finance	FM213 Principles of Finance
FM213 Principles of Finance	FM212 Principles of Finance
GY200 Economy, Society and Space (withdrawn)	GY206 Urban Geography and Globalisation GY207 Economy, Society and Space
GY201 Urban and Spatial Economic Analysis I (withdrawn)	GY209 The Economic Geography of Trade, Production and Development GY210 The Economics of Cities
GY206 Urban Geography and Globalisation	GY200 Economy, Society and Space (withdrawn)
GY207 Economy, Society and Space	GY200 Economy, Society and Space (withdrawn)
GY209 The Economic Geography of Trade, Production and Development	GY201 Urban and Spatial Economic Analysis I (withdrawn)

GY210 The Economics of Cities	GY201 Urban and Spatial Economic Analysis I (withdrawn)
GY240 Research Techniques (Spatial, Social and Environmental) (withdrawn)	GY245 Quantitative Methods in Geography GY246 Field Methods in Geography GY247 Field Methods in Geography & Environment
GY245 Quantitative Methods in Geography	GY240 Research Techniques (Spatial, Social and Environmental) (withdrawn) GY2A0 Research Techniques (Spatial, Social and Environmental) (withdrawn)
GY246 Field Methods in Geography	GY240 Research Techniques (Spatial, Social and Environmental) (withdrawn) GY2A0 Research Techniques (Spatial, Social and Environmental)
GY247 Field Methods in Geography & Environment	GY240 Research Techniques (Spatial, Social and Environmental) (withdrawn) GY2A0 Research Techniques (Spatial, Social and Environmental)
GY2A0 Research Techniques (Spatial, Social and Environmental) (withdrawn)	GY245 Quantitative Methods in Geography GY246 Field Methods in Geography GY247 Field Methods in Geography & Environment
GY300 Theories of Regional Development and Change (withdrawn)	GY308 The Economic Geography of Growth and Development GY307 Regional Economic Development
GY301 The Political Geography of Development and the South (withdrawn)	GY309 The Political Geography of Development
GY302 Urban Development: Politics, Policy and Planning (withdrawn)	GY310 Urban Politics GY311 The Political Economy of Urbanisation
GY303 The Geography of Gender: Global Perspectives (withdrawn)	GY312 Geographies of Gender in the Global South GY316 Gender in High Income and Emerging Economies
GY305 Urban and Spatial Economic Analysis II (withdrawn)	GY314 The Economics of Housing Markets and Migration GY313 Firms and Economic Geography: Location, Technology and Innovation
GY306 Geographies of Race	GY315 Geographies of Race
GY307 Regional Economic Development	GY300 Theories of Regional Development and Change (withdrawn)
GY308 The Economic Geography of Growth and Development	GY300 Theories of Regional Development and Change (withdrawn)
GY309 The Political Geography of Development	GY301 The Political Geography of Development and the South (withdrawn)
GY310 Urban Politics	GY302 Urban Development: Politics, Policy and Planning (withdrawn)

124 Undergraduate Programme Regulations

GY311 The Political Economy of Urbanisation	GY302 Urban Development: Politics, Policy and Planning (withdrawn)
GY312 Geographies of Gender in the Global South	GY303 The Geography of Gender: Global Perspectives (withdrawn)
GY313 Firms and Economic Geography: Location, Technology and Innovation	GY314 The Economics of Housing Markets and Migration (withdrawn) GY305 Urban and Spatial Economic Analysis II (withdrawn)
GY314 The Economics of Housing Markets and Migration	GY305 Urban and Spatial Economic Analysis II (withdrawn) GY313 Firms and Economic Geography: Location, Technology and Innovation
GY315 Geographies of Race	GY306 Geographies of Race
GY316 Gender in High Income and Emerging Economies	GY303 The Geography of Gender: Global Perspectives (withdrawn)
GY324 Environmental Governance (withdrawn)	GY326 Sustainable Business and Finance GY327 Global Environmental Governance
GY325 Environment and Development (withdrawn)	GY328 Political Ecology of Development GY329 Applied Economics of Environment and Development
GY326 Sustainable Business and Finance	GY324 Environmental Governance (withdrawn)
GY327 Global Environmental Governance	GY324 Environmental Governance (withdrawn)
GY328 Political Ecology of Development	GY325 Environment and Development (withdrawn)
GY329 Applied Economics of Environment and Development	GY325 Environment and Development (withdrawn)
HY203 The Arab-Israeli Conflict: Nationalism, Territory, Religion (withdrawn)	HY328 The Arab-Israeli Conflict: Nationalism, Territory, Religion
HY325 Retreat from Power: British foreign and defence policy, 1931-68	HY327 The Anglo-American Special Relationship, 1939-89
HY327 The Anglo-American Special Relationship, 1939-89	HY325 Retreat from Power: British foreign and defence policy, 1931-68
HY328 The Arab-Israeli Conflict: Nationalism, Territory, Religion	HY203 The Arab-Israeli Conflict: Nationalism, Territory, Religion (withdrawn)
IR312 Genocide	SO309 Atrocity and Justice
MA100 Mathematical Methods	MA207 Further Quantitative Methods (Mathematics) ST107 Quantitative Methods (Statistics) MA110 Basic Quantitative Methods MA107 Quantitative Methods (Mathematics)

MA107 Quantitative Methods (Mathematics)	MA110 Basic Quantitative Methods
ST102 Elementary Statistical Theory	
MA100 Mathematical Methods	
MA110 Basic Quantitative Methods	MA107 Quantitative Methods (Mathematics) ST107 Quantitative Methods (Statistics) MA100 Mathematical Methods
MA207 Further Quantitative Methods (Mathematics)	MA100 Mathematical Methods
MA300 Game Theory	MA301 Game Theory I
MA301 Game Theory I	MA300 Game Theory
MG102 Organisational Behaviour (withdrawn)	MG203 Organisational Theory and Behaviour (withdrawn)
MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems (withdrawn)	MG314 Principles of Marketing (withdrawn) MG212 Marketing MG213 Information Systems MG214 Human Resource Management
MG203 Organisational Theory and Behaviour (withdrawn)	MG102 Organisational Behaviour
MG207 Managerial Economics	EC201 Microeconomic Principles I EC202 Microeconomic Principles II
MG212 Marketing	MG314 Principles of Marketing (withdrawn)
	MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems (withdrawn)
MG213 Information Systems	MG314 Principles of Marketing (withdrawn) MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems (withdrawn)
MG214 Human Resource Management	MG314 Principles of Marketing (withdrawn) MG201 Core Disciplines II: Marketing, Human Resource
Management and Information Systems (withdrawn)	
MG303 International Business Strategy and Emerging Markets	MG307 International Context of Management
MG307 International Context of Management	MG303 International Business Strategy and Emerging Markets

MG314 Principles of Marketing (withdrawn)	MG212 Marketing MG213 Information Systems MG214 Human Resource Management MG201 Core Disciplines II: Marketing, Human Resource Management and Information Systems (withdrawn)
PH101 Logic	PH104 Formal Methods of Philosophical Argumentation
PH104 Formal Methods of Philosophical Argumentation	PH101 Logic
SA218 Criminological Perspectives	SO210 Crime, Deviance and Control
SO210 Crime, Deviance and Control	SA218 Criminological Perspectives
SO309 Atrocity and Justice	IR312 Genocide
ST102 Elementary Statistical Theory	MA107 Quantitative Methods (Mathematics) ST107 Quantitative Methods (Statistics) ST108 Statistical Methods for the Social Sciences
ST107 Quantitative Methods (Statistics)	ST102 Elementary Statistical Theory MA100 Mathematical Methods MA110 Basic Quantitative Methods ST108 Statistical Methods for the Social Sciences

ST205 Sample Surveys and Experiments	EC220 Introduction to Econometrics ST203 Statistics for Management Sciences (withdrawn) EC221 Principles of Econometrics
ST307 Aspects of Market Research	ST327 Market Research: An Integrated Approach
ST327 Market Research: An Integrated Approach	ST307 Aspects of Market Research

Undergraduate Outside Options List

Where the regulations refer to an approved paper taught outside the department, this means that you may take any course in a subject other than the principal subject(s) of your degree, subject to timetabling constraints and any restrictions listed in the Course Guides. If your degree is for joint honours (e.g. Philosophy and Economics) or is a major/minor combination (e.g., Geography with Economics), a course outside the department means a course taught in any department other than the two named in the title of your degree. The home department of each course is indicated by the first two letters in its code.

Please note that some course combinations are not allowed. Please see the Mutually Exclusive Options list.

An outside paper may be selected from the Undergraduate Course Guides, subject to the approval of the candidate's tutor and to the successful completion of prerequisites where necessary, with the following exceptions:

- certain first-year courses are not available to students in the second or third year of their degree;
- some courses are not available as an outside option; and
- some papers are mutually exclusive and may therefore not be combined.

The courses available as outside options where regulations permit are:

Outside Options for students in Year 1:

- AC102 Elements of Financial Accounting (0.5)
- AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
- AN100 Introduction to Social Anthropology (1.0)
- AN101 Ethnography and Theory: Selected Texts (1.0)
- AN102 Anthropology, Text and Film (1.0)
- EC100 Economics A (1.0) #
- EC102 Economics B (1.0) #
- EH101 The Internationalisation of Economic Growth, 1870 to the present day (1.0)
- EH102 Pre-industrial Economic History (1.0) *
- FM101 Finance (0.5) #
- GV100 Introduction to Political Theory (1.0)
- GV101 Introduction to Political Science (1.0)
- GY100 Introduction to Geography (1.0)
- GY103 Contemporary Europe (1.0)
- GY120 Environmental Change: Past, Present and Future (1.0)
- GY121 Sustainable Development (1.0)
- GY140 Introduction to Geographical Research (1.0)
- HY113 From Empire to Independence: The Extra-European World in the Twentieth Century (1.0)
- HY116 International History since 1890 (1.0)
- HY118 Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800 (1.0)
- IR100 International Relations: Theories, Concepts and Debates (1.0)
- LL104 Law of Obligations (1.0)
- LL105 Property I (0.5)
- LL106 Public Law (1.0)
- LL108 Criminal Law (1.0)
- LL109 Introduction to the Legal System (0.5)
- LN100 Russian Language and Society 3 (advanced) (1.0) #
- LN101 Russian Language and Society 1 (beginner) (1.0) #
- LN102 Russian Language and Society 2 (intermediate) (1.0) #
- LN104 Mandarin Language and Society Level 1 (Beginner) (1.0) #
- LN110 German Language and Society 3 (advanced) (1.0) #
- LN112 German Language and Society 2 (Intermediate) (1.0) #
- LN120 Spanish Language and Society 3 (advanced) (1.0) #
- LN121 Spanish Language and Society 1 (beginner) (1.0) #
- LN122 Spanish Language and Society 2 (intermediate) (1.0) #
- LN130 French Language and Society 3 (advanced) (1.0) #
- LN131 French Language and Society 1 (beginner) (1.0) #

- LN132 French Language and Society 2 (intermediate) (1.0) #
- LN140 Mandarin Language and Society 3 (Advanced) (1.0) #
- LN142 Mandarin Language and Society 2 (Intermediate) (1.0) #
- LN200 Russian Language and Society 4 (proficiency) (1.0) #
- LN210 German Language and Society 4 (proficiency) (1.0) #
- LN220 Spanish Language and Society 4 (proficiency) (1.0) #
- LN230 French Language and Society 4 (proficiency) (1.0) #
- LN240 Mandarin Language and Society 4 (Proficiency) (1.0) #
- LN250 English Literature and Society (1.0) #
- LN251 Comparative Literature and 20th Century Political History (1.0) #
- LN252 Global Literature and Society (1.0) #
- LN253 European Literature and Philosophy (1.0) #
- LN254 Literature and Aspects of Ethics (1.0) #
- LN270 Society and Language: Linguistics for Social Scientists (1.0)
- LN320 Spanish Language and Society 5 (mastery) (1.0) #
- LN330 French Language and Society 5 (mastery) (1.0) #
- LN340 Mandarin Language and Society 5 (Mastery) (1.0) #
- MA100 Mathematical Methods (1.0) #
- MA103 Introduction to Abstract Mathematics (1.0) #
- MA107 Quantitative Methods (Mathematics) (0.5) # *
- MA110 Basic Quantitative Methods (1.0) #
- MG104 Operations Management (0.5) #
- MG105 Organisational Behaviour and Leadership (0.5) #
- PB101 Foundations of Psychological Science (1.0) #
- PB102 Social Psychology (1.0)
- PH101 Logic (1.0)
- PH103 The Big Questions: An Introduction to Philosophy (1.0) #
- PH104 Formal Methods of Philosophical Argumentation (1.0) #
- SA100 The Foundations of Social Policy (1.0)
- SA101 Sociology and Social Policy (1.0)
- SA104 Social Economics, Politics and Policy (1.0) #
- SA224 Introduction to Global Population Change (1.0) #
- SO100 Key Concepts: Introduction to Social Theory (1.0)
- SO102 Data in Society: Researching Social Life (1.0)
- SO110 Power, Inequality, and Difference: Contemporary Themes in Sociology (1.0)
- ST102 Elementary Statistical Theory (1.0) #
- ST107 Quantitative Methods (Statistics) (0.5) #
- ST108 Statistical Methods for the Social Sciences (1.0) #

Outside Options for students in Year 2 and Year 3:

- AC102 Elements of Financial Accounting (0.5)
- AC103 Elements of Management Accounting, Financial Management and Financial Institutions (0.5)
- AC211 Managerial Accounting (1.0) # *
- AC310 Management Accounting, Financial Management and Organisational Control (1.0) #
- AC330 Financial Accounting, Analysis and Valuation. (1.0) # *
- AC340 Auditing, Governance and Risk Management (1.0) # *
- AN100 Introduction to Social Anthropology (1.0)
- AN101 Ethnography and Theory: Selected Texts (1.0)
- AN102 Anthropology, Text and Film (1.0)
- AN200 The Anthropology of Kinship, Sex and Gender (1.0)
- AN205 The Anthropology of Melanesia (0.5) (not available 2018/19)
- AN216 Cognition and Anthropology: Human Development in Cultural Environments (0.5) # (not available 2018/19)
- AN221 The Anthropology of Christianity (0.5) #
- AN223 The Anthropology of Southeast Asia (0.5)
- AN226 Political and Legal Anthropology (1.0)
- AN237 The Anthropology of Development (0.5)
- AN240 Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) (not available 2018/19)
- AN243 Children and Youth in Contemporary Ethnography (0.5) #
- AN244 Anthropology and Media (0.5) * (not available 2018/19)
- AN245 Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)
- AN247 Anthropological Approaches to Questions of Being (0.5)
- AN250 The Anthropology of South Asia (0.5) #
- AN251 Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions (0.5) # (not available)

2018/19)

Footnotes for Undergraduate Outside Options List (Years 2 & 3)

~A : EC102 is dependent on Economics A-level or equivalent background.

~B : MA331 can be taken in Year 3 only.

~C : MG301 can be taken in Year 3 only.

~D : MG302 can be taken in Year 3 only.

~E : PH101 is not available to BSc in Economics students.

~F : SA100 can be taken in Year 2 only.

~G : SA101 is not to be taken by third year Social Policy students.

~H : SA104 is only available to second year students who have taken SA100.

~I : SA201 is not to be taken by second or third year Sociology students.

~J : SO311 is available in Year 3 only.

Prerequisite Requirements and Mutually Exclusive Options for Undergraduate Outside Options List (Years 2 & 3)

~1 : Before taking SA104 you must take SA100

Undergraduate Course Guides

Undergraduate Course Guides

AC100

Elements of Accounting and Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Saipriya Kamath OLD 2.11, Mr Farooq Mahmood, Dr Elisabetta Bertero OLD M2.13 and Dr Pik Kun Liew OLD 3.34

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics. This course is not available as an outside option nor to General Course students.

Course content: This is a one-unit course that introduces students to fundamental principles of accounting and finance. The course consists of three parts: financial accounting (for external reporting), management accounting (for internal decision making), and finance (to provide funding).

Financial Accounting: The course starts with a discussion of the framework of financial accounting: its nature, intents and purposes, and the context and environment in which it operates. This includes, and eventually entails, the need for, and various sources of, accounting regulation and “accounting standards”. AC100 also unpacks various core financial accounting concepts and conventions. The course also looks into the processes used to record, summarise, and present financial accounting information as well as, crucially, its interpretation. Thus, and essentially, this part of the course focuses on the preparation, interpretation, and limitations of company financial statements for external reporting, and the regulatory framework in which financial reports are prepared.

Management Accounting: This part of AC100 moves into internal decision making and starts with an introduction to management and cost accounting. This includes the discussion of key concepts of cost calculation and various techniques of costing (such as absorption and variable costing approaches), as well as other alternative costing systems relevant for decision making. The aim is to help students understand how accounting information can help managers to make crucial decisions, such as about the pricing of products or services, or even whether to offer or discontinue a product or service, or whether to expand the product/service range or to invest in new product development. In summary, this part of the course focuses on the basic knowledge of management accounting—specifically, costing.

Finance: The final part of AC100 provides an introduction to key concepts in finance and an overview of the financial system. It introduces fundamental techniques of finance such as computation of time value of money, and valuation of projects and securities. The course also considers the relationship between risk and return. In summary, this part of the course focuses on the basic ideas and techniques to solve problems in finance—that is, to provide the needed funds, and an evaluation of the bases on which to effectively do so, for organisations.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of help sessions in the MT. 22 hours of lectures, 10 hours of classes and 10 hours of help sessions in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: There will be several online tests (“quizzes”) to test the student’s knowledge and progress on a formative basis for feedback. Written answers to numerical problems and discussion questions will be expected weekly; some of the written work will be collected during classes for marking and feedback.

Indicative reading: A detailed reading list will be made available on Moodle for each part of the course nearer the time of its scheduled start. Illustrative texts include Atrill, P. and McLaney, E. (2016) *Financial Accounting for Decision Makers*, 8th edition, Pearson; Atrill, P. and McLaney, E. (2018) *Management Accounting for*

Decision Makers, 9th edition, Pearson; and Atrill, P. (2017) *Financial Management for Decision Makers*, 8th edition, Pearson.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Class participation (10%) in the MT and LT.

Case analysis (10%) and online assessment (5%) in the LT.

The exam duration is 3 hours and 15 minutes. The first 15 minutes will be reading time.

AC102 Half Unit

Elements of Financial Accounting

This information is for the 2018/19 session.

Teacher responsible: Dr Saipriya Kamath OLD 2.11
Mrs Chris Constantinou (Course Leader)

Availability: This course is compulsory on the BSc in Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This is a half-unit course that introduces students to fundamental principles of financial accounting for the purposes of external reporting. The course starts with a discussion of the framework of financial accounting: its nature, intents and purposes, and the context and environment in which it operates. This includes, and eventually entails, the need for, and various sources of, accounting regulation and accounting standards. AC102 unpacks various core financial accounting concepts and conventions, but the course also looks into the processes used to record, summarise, and present financial accounting information as well as, crucially, its interpretation. This course thus essentially focuses on the preparation, interpretation, and limitations of company financial statements for external reporting, and the regulatory framework in which financial reports are prepared.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; two pieces of written work per term will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course. Illustrative texts include Peter Atrill and Eddie McLaney *Financial Accounting for Decision Makers*, 8th edn, Pearson, 2015.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 15 minutes) in the summer exam period.

The exam duration is 1 hour and 45 minutes. The first 15 minutes will be reading time.

AC103 Half Unit

Elements of Management Accounting, Financial Management and Financial Institutions

This information is for the 2018/19 session.

Teacher responsible: Mr Farooq Mahmood and Dr Pik Kun Liew
Mrs Chris Constantinou (Course Leader)

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an

outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: This is a half-unit course that introduces students to fundamental principles of management accounting, financial management and, because it allows the study of some core financial concepts, the accounts of pension funds and insurance companies.

AC103 begins by focusing on internal decision making by way of an introduction to cost and management accounting. This includes a discussion of key concepts of cost calculation and various costing systems relevant for decision making. The aim is to help students understand how accounting information can help managers make crucial decisions, such as about the pricing of products or services, or even whether to offer or discontinue a product or service, or whether to expand the product/service range or to invest in new product development. AC103 then develops into key concepts of financial management including the role of the financial system in relation to sources of finance. Because it allows the study of some core financial concepts, AC103 finally covers the accounts of pension funds and insurance companies which also play an increasingly important role in the financing of organisations.

Teaching: 22 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Written answers to numerical problems and discussion questions will be expected weekly; some will be collected during classes for marking and feedback.

Indicative reading: Detailed reading lists will be made available at the beginning of the course in a syllabus. Illustrative texts include Atrill, P. and McLaney, E. (2018) *Management Accounting for Decision Makers*, 9th edition, Pearson; Atrill, P. (2017) *Financial Management for Decision Makers*, 8th edition, Pearson.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 15 minutes) in the summer exam period. The exam duration is 1 hour and 45 minutes. The first 15 minutes will be reading time.

AC211 Managerial Accounting

This information is for the 2018/19 session.

Teacher responsible: Dr Tommaso Palermo KSW 3.07
Dr Per Ahlborn, OLD 3.13

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics, Statistics, and Business, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Please seek permission from the Accounting Department tutor. This course is also an option for students taking the Diploma in Accounting and Finance.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course analyses the roles and uses of management accounting practices in contemporary organisations and enterprises. Management accounting is extensively involved in the planning, coordination and control of complex organisations and networks of organisations competing on a global scale. The course explores key management accounting concepts and tools, and their economic, strategic, behavioural and organisational underpinnings.

The course is organised around four topics.

Management Accounting for Decision Making examines how

management accounting information can be used in the context of a variety of short- and long-term decision problems, ranging from costing to pricing, outsourcing and investment appraisal.

Management Accounting and Strategy looks at management accounting change and at the emerging role of management accounting in strategy making.

Management Accounting and Organisational Control examines intra-organisational planning and control issues, focusing on how managerial action is guided by practices such as budgeting, variance analysis and transfer pricing.

Performance Measurement addresses the use of financial and non-financial performance measures in complex organisational and managerial settings, with particular emphasis on their behavioural consequences and the limits of quantification.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

There will be a 2 hour revision lecture in week 11 of the LT.

This course has a reading week in Week 6 of both MT and LT.

The lecture time in week 6 of the LT will be used to explain the rationales and requirements of a mandatory assignment (a case analysis) that will be carried out in the second half of the LT.

Formative coursework: Students will be required to complete written assignments before each class. Three of these assignments, two in the MT and one in the LT, will be collected and graded by class teachers as part of formative coursework to provide feedback on analytical and writing skills ahead of the final exam. Course work may take the form of an essay, a case analysis or a numerical exercise and may also include in-class presentation and team-based work. Feedback on performance and progress will be provided during class, on written homework assignments, and during office hours.

Indicative reading: Detailed course programmes and reading lists will be distributed before the first lecture of each module. A range of academic papers, professional reports and news articles will be used in the course. Illustrative texts and articles include: Bhimani, A, Horngren, CT, Datar, SM, and Rajan, MV (2015). *Management and cost accounting* (Sixth ed.), FT/Prentice Hall; Shank JK (1996), *Analysing technology investments – From NPV to strategic cost management*, *Management Accounting Research* 7, 185 – 197; Van der Stede, WA and Palermo, T (2011), *Scenario budgeting: Integrating risk and performance*, *Finance & Management* 184(1), 10–13; Hall, M (2010). *Accounting information and managerial work*, *Accounting, Organizations and Society* 35, 301–315.

Assessment: Exam (75%, duration: 2 hours and 15 minutes, reading time: 15 minutes) in the summer exam period.

Case analysis (15%) and class participation (10%) in the LT.

The case analysis will require students to work in small groups.

Class participation will be assessed based on students' engagement with course activities, including for example in-class discussions and class assignments.

AC310 Management Accounting, Financial Management and Organisational Control

This information is for the 2018/19 session.

Teacher responsible: Dr Liisa Kurunmaki KSW 3.04

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Available to students on other undergraduate/Diploma programmes with the permission of the Accounting Departmental Tutor.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Management Accounting and Financial Management (AC103) or Elements of

Accounting, Financial Institutions and Financial Management (AC104).

Course content: The course addresses contemporary issues in management accounting, financial management, and organisational control. The course consists of four modules, all of which are taught by faculty with specific expertise in the area. The exact composition of the course may vary from year to year, but issues which are typically addressed include financial controls, organisational structures, performance measurement and incentive systems, budgetary control and public-sector and non-profit financial management.

The Function of management control systems: The course starts with the study of the quintessential role of management control systems in decentralised organisations, with a focus on the measurement and evaluation of the performance of organisational entities and their managers. Focusing on financial control systems, this module analyses issues related to financial target setting (as part of organisations' planning and budgeting processes), performance measurement and evaluation, and the assignment of various forms of organisational rewards, such as bonuses and promotions.

Management accounting and human behaviour: Building on the first module, this module focuses primarily on budgeting issues and on understanding how budgets impact employee behaviours and their decisions and actions. This module also discusses "beyond budgeting" and capital budgeting. This is done through the lens of different organisational theories, including contingency theory.

Accounting in non-governmental organisations: Many of the concepts from the prior two modules are then studied in the context of NGOs, including measuring the performance and effectiveness of NGOs, the use of 'business-like' management control and financial management systems (like budgets), the evaluation of programme efficiency and impact, and the accountability to donors and beneficiaries.

Accounting in the new public sector: The final module studies management accounting and financial management in the 'new public sector', including performance measurement, cost accounting, cost management and pricing; the roles of accounting controls in the health system reforms in the UK and elsewhere.

Teaching: The first half of MT will comprise 10 hours of lectures and 5 hours of classes. The second half of MT, the module on 'Accounting in non-governmental organisations' is taught using a 'flipped-lecture' approach, with a series of on-line lectures, and five 2-hour classes. In LT, there will be 20 hours of lectures and 9 hours of classes. Please note that there is no Reading Week in AC310 in either term.

Formative coursework: Case studies and applications will be used extensively. Students will be expected to present cases and contribute to in-class discussions. Students will also be expected to produce four written assignments; two in MT and two in LT. Assignment 2 in MT and Assignment 4 in LT will count towards the final mark in the course.

Indicative reading: Detailed reading lists will be distributed at the start of each Module of the course. Illustrative references include: Bhimani and Bromwich, *Management Accounting: Retrospect and Prospect*, Elsevier/CIMA (2009); Bhimani, *Contemporary Issues in Management Accounting*, OUP (2006); Olson, Guthrie & Humphrey (Eds), *Global Warning: Debating International Developments in New Public Financial Management*, Cappelen Akademisk Forlag As, Oslo (1998); Merchant & Van der Stede, *Management Control Systems: Performance Measurement, Evaluation and Incentives*, Pearson (2017).

Assessment: Exam (80%, duration: 3 hours) in the summer exam period.

Coursework (20%) in the MT and LT.

Exam (80%, duration: 3 hours) in the main exam period; the other 20% of the mark will be based on the two summative assignments submitted during the year. Assignment 2 (MT) and Assignment 4 (LT) will each count for 10% of the final mark for this course.

AC330

Financial Accounting, Analysis and Valuation.

This information is for the 2018/19 session.

Teacher responsible: Dr Stefano Cascino OLD 3.32 and Mr Jose Carabias Palmeiro OLD 2.13

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics, and Business, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

The course is available as an outside option, subject to the course leader's permission, if students have achieved a sufficient standard of performance in the pre-requisite course **AC100 Elements of Accounting and Finance** or **AC102 Elements of Financial Accounting** or **AC104 Elements of Accounting, Financial Institutions and Financial Management** or equivalent.

Pre-requisites: Students must have completed AC100 Elements of Accounting and Finance, or AC102 Elements of Financial Accounting, or AC104 Elements of Accounting, Financial Institutions and Financial Management.

Course content: The course addresses the theory and practice of financial reporting. Accounting practices are examined in the light of historical development, regulatory requirements, theories of income and capital and other approaches to accounting theory and to the use of accounting information in business analysis and valuation.

Financial accounting with particular reference to company accounts. Issues in financial accounting including accounting for business combinations under International Accounting Standards. Implications of empirical research into stock market effects of management choice of accounting policies. Business analysis and valuation. Regulation of financial reporting. International standardisation of accounting practice. A conceptual framework for financial reporting. The measurement of income, costs and depreciation. The valuation of assets. Accounting for changing prices. Further details will be given at the start of the course.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 11 hours of classes in the LT. There will be a revision class in week 1 of ST.

Formative coursework: Students should prepare weekly written work for class discussion. At least two pieces per term will be collected for marking and some of these assignments will count towards the final mark for the course.

Indicative reading: Detailed reading lists of books and journal articles will be provided during the course. No one book covers the entire course. Recommended books include Whittington, G, *Inflation Accounting: an introduction to the debate*, CUP (1983); Baxter, WT, *Inflation Accounting*, Oxford, Philip Allan, (1984); Beaver, WH, *Financial Reporting: An Accounting Revolution*, Prentice-Hall (1998); Palepu, KG, Healy, PM, Bernard, VL and Peek, E, *Business Analysis and Valuation: IFRS Edition*, Thomson (2013).

Assessment: Exam (80%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Other (10%) in the MT.

Other (10%) in the LT.

The two other assessments are presentation/essay assignments comprising group work (total 20%).

AC340

Auditing, Governance and Risk Management

This information is for the 2018/19 session.

Teacher responsible: Dr Liisa Kurunmaki KSW 3.04 and Dr Nadia Matringe KSW 3.05

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and

Mathematical Economics, BSc in Economics and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elements of Accounting and Finance (AC100) or Elements of Financial Accounting (AC102) or Elements of Accounting, Financial Institutions and Financial Management (AC104). Elements of Management Accounting and Financial Management (AC103) is recommended to complement AC102, but not required.

Course content: The course provides a critical analysis of auditing practices and their role in organisational governance and risk management. Auditing is demanded by, and provides assurance to, a variety of internal and external stakeholders, including corporate shareholders and regulators. As societal demands for accountability have increased, auditing has become both more important and more regulated itself. Auditing also remains controversial and this course will address contemporary debates. The course addresses the theoretical basis of auditing, its role as a risk management function, its practical methodologies and its legal, professional and social environment. The course is divided into four modules.

Internal Control and Risk Management critically examines recent developments in risk management and internal control practices, including the role of internal auditing and the problem of reporting on the effectiveness of control systems.

Corporate Financial Audit provides a basic overview and introduction to corporate auditing theory and practice. The module investigates the roles of corporate financial audit in contemporary society; discusses issues related to the collection of audit evidence and assurance of audit quality; and analyses recent national and international developments in audit regulation and standard setting.

Public Sector Auditing and Accounting considers variants of the audit function in the public sector context, such as value for money auditing.

Sustainability Accounting and Auditing addresses the broader accountability framework of the corporation and related environmental and social accounting and auditing issues. While the primary focus of the course is upon UK practice, international comparisons will also be made. There is also an intention to run a small number of practitioner lectures during the 2018-19 session. Further details will be provided at the start of the session.

Teaching: 15 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 8 hours of classes in the LT. 2 hours of lectures in the ST.

There will be a reading week in week 6 of both MT and LT.

Formative coursework: Students will be expected to produce a minimum of four written essays per year and one class presentation. All students will be expected to contribute to class discussion. Feedback on performance and progress will be provided during class, on written homework assignments, and during office hours.

The two written assignments with the highest marks will count towards the final mark for the course.

Indicative reading: No one book covers the entire syllabus. In addition to professional and academic journals, reading will cover the following: Gray I. & Manson S, *The Audit Process*, Thomson, 2011; and refer to Power M, *The Audit Explosion*, Demos, 1996 and The Audit Society, OUP, 1999, Flint D, *Philosophy and principles of auditing: an introduction*, Macmillan Education, 1988. Background reading for the fourth module may be found in Henriques, A, *Corporate Truth: The Limits to Transparency* (Earthscan 2007). Students will also be provided with relevant examples of corporate and other reports and referred to relevant websites. Detailed course programmes and reading lists will be distributed at the first lecture of the course.

Assessment: Exam (80%, duration: 3 hours) in the summer exam period.

Other (20%) in the MT and LT.

The exam will be in the main exam period; the other 20% of the mark will be based on two of the four formative written

assignments submitted during the year. The two assignments with the highest marks from the four submitted pieces of work will each count for 10% of the final mark for this course.

AN100

Introduction to Social Anthropology

This information is for the 2018/19 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13 and Prof Katherine Gardner OLD 6.12

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Geography and BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a general introduction to Social Anthropology as the comparative study of human societies and cultures. Students will be introduced to key themes and debates in the history of the discipline. Ethnographic case studies will be drawn from work on a variety of societies, including hunter-gatherers, farmers, industrial labourers, and urban city-dwellers. The Michaelmas Term will explore the relationship between nature and culture, drawing on classic and contemporary debates about human difference and similarity. The term is divided into three blocks: 1) Fieldwork, History and Culture; 2) Bodies and Difference; 3) Rites of passage.

The Lent term will address institutions and concepts that shape society in various contexts. The term is also divided into three blocks: 1) Family and Love; 2) Economic Life; 3) Power and Politics.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT.

This course has a reading week in Week 6 of both the MT and LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit one tutorial essay for this course to their academic mentor in the MT and one in the LT. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher in the MT and in the LT.

Indicative reading: M Engelke, *Think Like an Anthropologist* (2017) R Astuti et al (eds.), *Questions of Anthropology* (2007). M Bloch, *Prey into Hunter* (1996). M Carrithers, *Why Humans Have Cultures* (1992). T Eriksen, *Small Places, Large Issues: An Introduction to Social and Cultural Anthropology* (2001). J Carsten, *The Heat of the Hearth* (1997). P Bourgois, *In Search of Respect: Selling Crack in El Barrio* (2003)

Assessment: Essay (50%, 2500 words) in the LT.

Essay (50%, 2500 words) in the ST.

AN101

Ethnography and Theory: Selected Texts

This information is for the 2018/19 session.

Teacher responsible: Dr Harry Walker OLD 5.06B and Prof David Graeber OLD 6.10

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course discusses important aspects of anthropological and sociological theory in relation to modern ethnographic texts. It ranges from the classical social theory by Marx, Durkheim and Weber to the most recent theoretical advances in the discipline. The course is intended to give students a sound grasp of central theoretical concepts and of their

significance for empirical research.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes and are required to write assessment essays. Anthropology students taking this course will have an opportunity to submit one tutorial essay for this course to their academic mentor in the MT and one in the LT. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher in the MT and in the LT.

Indicative reading: R Aron, *Main Currents in Sociological Thought*; A Giddens, *Capitalism and Social Theory*; R Nisbet, *The Sociological Tradition*; L Coser & B Rosenberg, *Sociological Theory: a Book of Readings*; K Morrison, *Marx, Durkheim, Weber*; R Borofsky (Ed), *Assessing Cultural Anthropology*; C Geertz, *The Interpretation of Cultures*; GW Stocking, *Observers Observed*; GW Stocking, *Victorian Anthropology*; B Malinowski *Argonauts of the Western Pacific*; R Benedict, *Patterns of Culture*; E E Evans-Pritchard, *Witchcraft oracles and magic among the Azande*; V Turner, *The Forest of Symbols*; M Sahlins, *Culture and Practical Reason*; J Clifford *The Predicament of Culture*; M Engelke, *Think like an anthropologist*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

AN102

Anthropology, Text and Film

This information is for the 2018/19 session.

Teacher responsible: Dr Andrea Pia OLD 6.09 and Dr Chloe Nahum-Claudel

Dr Clara Devlieger OLD 6.08

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides training in the reading and interpretation of visual and textual anthropology. It introduces students to detailed, holistic study of social and cultural practices within particular geographic and historical contexts, and develops skills in bringing together the various elements of cultural and social life analysed by anthropologists. By the end of each term, successful students will have both a detailed knowledge of three important texts, and also have a rounded view of the three settings studied. They will also have developed the capacity to think critically about ethnographic writing and film-making. In addition, the course aims to enable students to examine in detail the process by which ethnographic texts are produced. The course brings students to a closer understanding of anthropological fieldwork and evidence, and the way in which it relates to the forms of knowledge and insight generated by other genres of social scientific enquiry, documentary, and art. Students will usually read three book-length ethnographic accounts (or the equivalent) per term, and will study a film (or pictorial, architectural or other visual material) associated with each text.

Teaching: 2 hours of lectures, 12 hours of lectures, 6 hours of seminars and 6 hours of classes in the MT. 4 hours of lectures, 9 hours of lectures, 4 hours and 30 minutes of seminars and 7 hours of classes in the LT.

In the MT there are 12 hours of 'lectures' that combine a lecture and a film screening.

In LT there are 9 hours of 'lectures' that will be film screenings.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be required to read the three set texts per term, approximately 1/3 text (two-four chapters) each week, and it will be essential to do this in order to pass this course. The emphasis in classes and seminars will be on developing students' abilities to read and analyse texts as a whole,

and to relate them to the other material offered on the course.

Supplementary readings may be provided during the term.

Indicative reading: Detailed reading lists (including this year's set texts) will be provided at the beginning of the course.

For a general introduction to issues covered in the course, see the following: Engelke, M., ed. 2009. *The Objects of Evidence: Anthropological Approaches to the Production of Knowledge*. Oxford: Wiley-Blackwell. Grimshaw, A., and A. Ravetz. 2009. *Observational Cinema: Anthropology, Film, and the Exploration of Social Life*. Bloomington: Indiana University Press. MacDonald, S. 2013. *American Ethnographic Film and Personal Documentary: The Cambridge Turn*. Berkeley: University of California Press. Marcus, G. E., and M. M. J. Fischer. 1986. *Anthropology as Cultural Critique: An Experimental Moment in the Human Sciences*. Chicago: University of Chicago Press. Wolf, M. 1992. *A Thrice-Told Tale: Feminism, Postmodernism, and Ethnographic Responsibility*. Stanford: Stanford University Press.

Assessment: Coursework (100%, 6000 words) in the MT and LT. All students will produce a portfolio of position pieces (worth 100% of the total mark), to which they are expected to make a contribution after each cycle. Portfolios will be assessed periodically throughout the year, with the final grade determined at the end of Lent Term. The final mark will be the average of the 4 pieces with the highest grade.

AN200

The Anthropology of Kinship, Sex and Gender

This information is for the 2018/19 session.

Teacher responsible: Dr Nicholas Long OLD 6.14 and Prof Rita Astuti OLD 6.11

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an examination of the cultural frameworks and social aspects of kinship systems, gender roles, personhood and human sexuality, analysed through ethnographic examples from a diverse range of settings. It aims to equip students with the analytical tools to engage in theoretical debates concerning core concepts such as 'kinship', 'marriage', 'gender', 'sex', 'the person', and the relationship between 'nature' and 'culture', as well as exploring how the experiences of kinship, sex and gender vary according to the regimes of politics, law and materiality in which they are embedded. The course charts the history of anthropological debates on kinship, relatedness, sex and gender, and familiarises students with a range of contemporary approaches to these themes, placing ethnographic materials into a critical dialogue with recent developments in feminist theory, queer theory, the anthropology of colonialism, cognitive science, and psychoanalysis.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Carsten, J. *After Kinship* (2003); Chodorow, N. *The Power of Feelings: Personal Meaning in Psychoanalysis, Gender and Culture* (1999); Donnan, H. and Magowan, F. *The Anthropology of Sex* (2010); Levi-Strauss, C. *The Elementary Structures of Kinship* (1969); Moore, H. L. *A Passion for Difference: Essays in Anthropology and Gender* (1994); Schneider, D. *A Critique of the Study of Kinship* (1984); Stone, L. *Kinship and Gender: An Introduction* (2006).

Assessment: Essay (50%, 3500 words) in the LT.

Essay (50%, 3500 words) in the ST.

AN205 Half Unit Not available in 2018/19 The Anthropology of Melanesia

This information is for the 2018/19 session.

Teacher responsible: Dr Michael W. Scott, OLD 6.16

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to selected themes in the anthropology of the region in the Southwest Pacific Ocean known as Melanesia. It gives students a grounding in the contemporary anthropology of the region, primarily through a close reading of three book-length ethnographies.

The three ethnographies, which are all new since 2013, are Christopher Wright's *The Echo of Things*, an account of what photography means to people in the western Solomon Islands; Alice Street's *Biomedicine in an Unstable Place*, an analysis of how persons and diseases are made visible or invisible in a hospital on the north coast of Papua New Guinea; and Alex Golub's *Leviathans at the Gold Mine*, a study of the relationship between indigenous landowners and a large international gold mine in their valley in the highlands of New Guinea.

These ethnographies not only provide students with focused accounts of three very different contexts in Melanesia, they also address histories, dynamics, and concerns familiar to people living throughout the region. Furthermore, because the three authors draw on different intellectual antecedents and disciplinary traditions, their work provides an entree into the most influential theoretical debates animating Pacific anthropology today. Topics to be traced throughout the course include personhood and bodies, kinship and sociality, religion and cosmology, technology and infrastructure, development, globalization, and the state. The readings will be supplemented by ethnographic films and a visit to the British Museum.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: Christopher Wright, *The Echo of Things: The Lives of Photographs in the Solomon Islands* (2013); Alice Street, *Biomedicine in an Unstable Place: Infrastructure and Personhood in a Papua New Guinean Hospital* (2014); Alex Golub, *Leviathans at the Gold Mine: Creating Indigenous and Corporate Actors in Papua New Guinea* (2014).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the MT.

AN216 Half Unit Not available in 2018/19 Cognition and Anthropology: Human Development in Cultural Environments

This information is for the 2018/19 session.

Teacher responsible: Prof Rita Astuti OLD 6.11

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should have completed an introductory course in anthropology unless granted exemption by the course teacher

Course content: The course will examine the contribution that the study of human psychology can make to anthropology. After discussing why anthropologists should pay attention to

psychology and why psychologists should pay attention to anthropology, we will examine a range of psychological findings (for example, on infant's knowledge of the physical and mental world) and their relevance to anthropology.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes. Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking this course, a formative essay may be submitted to the course teacher.

Indicative reading: C Strauss and N Quinn, *A Cognitive Theory of Cultural Meaning* (1997); M Bloch, *How We Think They Think* (1998); D Sperber, *Explaining Culture* (1996); M Cole, *Cultural Psychology* (1996); M Tomasello, *The Cultural Origins of Human Cognition* (1999); P Boyer, *Religion Explained* (2001). Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the MT.

AN221 Half Unit The Anthropology of Christianity

This information is for the 2018/19 session.

Teacher responsible: Dr Fenella Cannell OLD 5.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course is intended for second and third year anthropologists, therefore students normally have at least one year's foundational anthropology. External students are welcome to join the course and often do so; depending on disciplinary background, external students may benefit from some additional contextual reading (please consult the course teacher.)

Course content: The ethnography of local Christianities in the light of differing cultural and social situations including colonial conditions. The relationship between Christianity and the discipline of anthropology. The course will examine a number of anthropological and historical studies of local forms of Christianity, from a range including local forms of Catholicism, Mormonism, contemporary and historical Protestantisms including American Protestant forms and 'heretical' and other unorthodox Christianities. The course asks why anthropologists shied away from analysing Christianity long after studies of other world religions, such as Islam, Hinduism and Buddhism, had become widely established. It looks at the relationship between Christianity and the history of anthropological thought, and locates the place of Christianity in the writings of Mauss, Durkheim, Foucault and others, in order to defamiliarise the religion which Europeans and Americans especially often take for granted. Issues examined may include the nature and experience of belief, conversion and the appropriation of Christian doctrines by local populations, the problems of writing about religion, Christianity and the state, the nature of religious confession, Christian texts, and Scriptural reading practices, Christian objects and materialities, Christianity and women's religious and social experience (from Medieval women mystics to women priests), inquisitions and heretical beliefs, priests and alternative forms of mediation with divine power, miraculous saints, incorrupt bodies and 'non-eaters' and changing ideas about death, Heaven and Hell. Where possible, the course will include a student fieldwork weekend and forms of reflection and reporting on that experience. Please check with the course teacher in any given year whether this is planned as part of the year's programme.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. There will be a reading week in Week 6 of the MT.

Formative coursework: Students will be expected to produce one essay in the MT.

Indicative reading: M Bloch, *From Blessing to Violence: History and Ideology in the Circumcision Ritual of the Merina of Madagascar*; F Cannell, *Catholicism, Spirit Mediums and the Ideal of Beauty in a Bicolano Community, Philippines* (PhD thesis, University of London); W Christian, *Person and God in a Spanish Valley* (reprint 1988); J Comaroff, *Body of Power, Spirit of Resistance*; J de Pina Cabral, *Sons of Adam, Daughters of Eve: the Peasant World View in the Alto Minho*; R Ilteto, *Pasyon and Revolution: Popular Movements in the Philippines, 1840-1910*; J Nash, *We Eat the Mines and the Mines Eat us: Dependency and Exploitation in Bolivian Tin Mines*; M Taussig, *The Devil and Commodity Fetishism in South America*. Detailed reading lists are provided at the beginning of the course.

Assessment: Essay (100%, 4000 words) in the LT.

AN223 Half Unit The Anthropology of Southeast Asia

This information is for the 2018/19 session.

Teacher responsible: Dr Nicholas Long OLD 6.14

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will introduce students to selected theoretical and ethnographic issues in the history and contemporary life of Southeast Asia (including Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Singapore, Thailand, The Philippines, and Vietnam).

The alleged distinctiveness of Southeast Asian gender relations, political leadership, and experiences of self and emotion have led to ethnographic studies of the region making major contributions to the anthropology of the state, sovereignty, globalisation, gender, identity, violence, and mental health. By providing a strong grounding in regional ethnographic materials, this course will equip students to critically evaluate such contributions and to consider possible further contributions that studies of Southeast Asia might make to anthropological debates. The course will also examine how anthropologists have responded to the interpretive challenges presented by selected aspects of Southeast Asia's social and political life, such as the legacies of mass violence (e.g. the Cambodian genocide, the Vietnam War, or Indonesia's massacre of suspected communists), its ethnic and religious pluralism, and the impact of international tourism.

The course also contains a strong visual anthropology element: each week's lecture will be paired with a film screening, and students will be encouraged to examine whether and how this visual material contributes to, or indeed reframes, the theoretical debates at hand.

Upon successful completion of the course, students will be able to:

1. Describe the key features of Southeast Asian social and cultural systems, and identify their similarities and differences with social and cultural systems in other world regions.
2. Describe key events and patterns in Southeast Asia's history, and evaluate the extent to which these influence contemporary social phenomena in the region.
3. Describe and evaluate the most influential paradigms that have been developed in anthropological studies of Southeast Asia over the past 60 years.
4. Apply anthropological concepts and theories to ethnographic materials from Southeast Asia, and evaluate the results.
5. Apply anthropological research findings and theories to social and policy issues in Southeast Asia.
6. Locate and use research findings from Southeast Asia in order to participate in, or advance the terms of, wider disciplinary debates.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Film screenings will also take place throughout the term. There is a reading week for this course in Week 6 MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Useful histories of Southeast Asia / Southeast Asian anthropology

M.C. Ricklefs, B. Lockhart, A. Lau, P. Reyes, and M.A. Thwin, *A New History of Southeast Asia* (2010); V.T. King and W.D. Wilder, *The Modern Anthropology of South-East Asia: An introduction* (2003).

Ethnographies Barker, J., E. Harms, and J. Lindquist, eds. 2014.

Figures of Southeast Asian Modernity. Honolulu: University of Hawai'i Press. Hinton, A. L. 2005. *Why Did They Kill? Cambodia in the Shadow of Genocide*. Berkeley: University of California Press.

Keeler, W. 1987. *Javanese Shadow Plays, Javanese Selves*.

Princeton: Princeton University Press. Langford, J. M. 2013.

Consoling Ghosts: Stories of Medicine and Mourning from Southeast Asians in Exile. Minneapolis: University of Minnesota Press. Long, N. J. 2013. *Being Malay in Indonesia: Histories, Hopes and Citizenship in the Riau Archipelago*. Copenhagen: NIAS Press.

Peletz, M. G. 2009. *Gender Pluralism: Southeast Asia since Early Modern Times*. London & New York: Routledge. Schwenkel, C.

2009. *The American War in Contemporary Vietnam: Transnational Remembrance and Representation*. Bloomington: Indiana University Press. Scott, J. C. 2009. *The Art of Not Being Governed: An Anarchist History of Upland Southeast Asia*. New Haven & London: Yale University Press.

Sloane, P. 1999. *Islam, Modernity and Entrepreneurship among the Malays*. Basingstoke: Macmillan. Detailed reading lists are provided at the beginning of the course.

Assessment: Coursework (100%, 4000 words) in the LT.

Students will be asked to write a research essay on a topic covered in the course, and a synoptic essay speaking to themes that connect multiple weeks of the course. Each of these should be up to 2000 words in length, and will comprise 50% of the final mark.

AN226 Political and Legal Anthropology

This information is for the 2018/19 session.

Teacher responsible: Dr Mathijs Pelkmans Old.5.08
Dr Insa Koch NAB 7.17

Availability: This course is compulsory on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available on the LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The anthropological analysis of political and legal institutions as revealed in relevant theoretical debates and with reference to selected ethnography. The development of political and legal anthropology and their key concepts including forms of authority; forms of knowledge and power; political competition and conflict; colonial transformation of indigenous norms; writing legal ethnography of the 'other'; folk concepts of justice; the theory of legal pluralism; accommodation of religious practices in secular laws of European states.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This course has a reading week in Week 6 of MT and LT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes, and to submit one essay in the MT and one mock exam question in the LT to their class teacher on which they will receive formative feedback.

Indicative reading: Leach, E, 1954, *The Political Systems of Highland Burma*; Sharma, A and Gupta, A, 2006, *The Anthropology of the State*; Verdery, K, 1999, *The Political Lives of Dead Bodies*; Wolf, E. 1999. *Envisioning Power: Ideologies of Dominance and Crisis*; Moore, S F, 1978, *Law as Process*; Malinowski, B, 1916, *Crime and Custom in Savage Society*; Bohannan, P, 1957, *Justice and Judgement among the Tiv*; Comaroff J and Roberts S, 1981, *Rules and Processes*. Detailed reading lists are provided at the

beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

AN237 Half Unit The Anthropology of Development

This information is for the 2018/19 session.

Teacher responsible: Dr Clara Devlieger OLD 6.08

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course considers a range of contributions made by anthropologists to the analysis of development. It assesses the reconcilability of two divergent perspectives: development anthropology, with its corpus of writings by practitioners working on practical projects, and the 'anthropology of development', comprising a series of critiques of development theory and practice by anthropologists. It examines the historical background, showing how development and its discourses were made in the wake of the colonial encounter and exploring the role played by anthropologists in this process. Critiques of both state-planned and market-driven development are considered and weighed against the ethnographic evidence, and anthropological studies of development organisations, institutions and 'the aid industry' considered. The anthropology of planning and policy; actor-centred perspectives on development; NGOs and participatory approaches; microcredit and gender; and religion and development, are among the topics explored. Regional ethnographies used include those from various parts of Southern and West Africa, China, Latin America, South and South-East Asia.

Teaching: 10 hours of lectures and 20 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion material for presentation in the classes based on the core ethnographies covered in the course. Formative work will include a mock exam question. Towards the end of the term the students will also have the opportunity to answer a quiz on the key concepts covered in the course which will be marked by the course teacher.

Indicative reading: K Gardner and D Lewis, *Anthropology and Development: Twenty First Century Challenges*; Pluto Press, 2015; K Gardner, *Discordant Development: Global Capitalism and the Struggle for Connection in Bangladesh* (2012); Ferguson, J. 1990 *The Anti-Politics Machine: Development, Depoliticisation and Bureaucratic Power in Lesotho*; Cambridge University Press; Li, T. 2014 *Land's End: Capitalist Relations on an Indigenous Frontier*; Karim, L., 2011 *Micro-Finance and its Discontents: Women and Debt in Bangladesh*; Elyachar, J. 2005; *Markets of Dispossession: NGOs, the Market and the State in Cairo*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN240 Half Unit Not available in 2018/19 Investigating the Philippines - New Approaches and Ethnographic Contexts

This information is for the 2018/19 session.

Teacher responsible: Dr Fenella Cannell OLD 6.07

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is most suitable for second and third year students but interested first year external students may seek an exemption. Also available to General Course students.

Course content: This course offers the chance to look at the ethnography of one country in more detail than is usual for regional courses. It considers topics taken from the ethnography of the lowland and highland Philippines, with a focus on exciting new high quality writing, drawing on the recent renaissance in Philippine Studies. The course will balance works by expert non-Filipino ethnographers with the new writing of 'native ethnographies' by Filipino scholars resident both in the Philippines themselves and in the US. The course will be framed within the colonial, religious and social history of the archipelago, and will consider both new interpretations of Philippine history, and topics on contemporary social issues, as well as using classic works on the Philippines. Teaching each week will normally be organised around the reading of one outstanding ethnography, allowing students to look closely at particular cases. Topics in any year are likely to be drawn from the following list (although obviously only ten topics can be offered in one year) ; Migration, 'mail-order' brides, and the Philippine diaspora ; New religious movements: Philippine colonialism and the processes of conversion: Healing, spirit possession, midwifery and local medicine: The contemporary Catholic Church; Violence in the Philippines; Ecology, landscape and environmental politics: Kinship and its transformations; Gender, Philippine queer theory and Philippine transvestitism: Ritual, drama and local performance traditions: Philippine architecture and material culture.: Philippine cinema: Colonial politics, tribal politics and issues of self-representation: Magic, sorcery and "anitismo"; Tourism, symbolic economies and the impact of international capitalism.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to prepare discussion material for classes/seminars. Students in the Anthropology Department have the opportunity to submit non-assessed essays to their tutor. Students external to the Department may submit a short piece of written work to the course teacher by arrangement.

Indicative reading: Selected texts: Renato Rosaldo *Ilongot Headhunters*; Vicente Rafael *Contracting Christianity*; Fenella Cannell *Power and Intimacy in the Christian Philippines*; Sally-Ann Ness *Where Asia Smiles*; Heather L. Claussen, *Unconventional Sisterhood*; J.Neil C. Garcia *Philippine Gay Culture: the Last Thirty Years*; M. F. Manalansan *Global Divas: Filipino Gay Men in the Diaspora*; Vicente Rafael *White Love and Other Events in Filipino History*; Evelyn Tan Cullemar *Babaylanism in Negros*; Benito M Vergera *Displaying Filipinos: Photography and Colonialism in Early 20th Century Philippines*; Renaldo Clemena *Ileto Pasyon and Revolution*; K.F. Wiegele, *Investing in Miracles: El Shaddai and the Transformation of Popular Catholicism in the Philippines*; Nicole Constable *Maid to Order in Hong Kong*; Albert Alejo *Generating Energies in Mount Apo: Cultural Politics in a Contested Environment*; Catherine Ceniza Choy *Empire of Care: Nursing and Migration in Filipino American History*; Esther C.M. Yau and Kyung Hyun Kim *Asia/Pacific Cinema*; Caroline S. Hau, *Necessary Fictions*; *Philippine Literature and the Nation*. Detailed reading lists are provided at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the LT.

The assessed essay must be between 2,000 – 2,500 words in length.

AN243 Half Unit Children and Youth in Contemporary Ethnography

This information is for the 2018/19 session.

Teacher responsible: Dr Catherine Allerton OLD 6.13

Availability: This course is available on the BA in Anthropology and

Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Undergraduates taking this course should normally have completed an introductory course in anthropology unless granted exemption by the course teacher.

Course content: For much of its history, and with some notable exceptions, anthropology has paid little serious attention to children. However, recent years have seen a growing interest in both 'childhood' as a historical and social construction, and in children's engagement with their own social worlds. This course aims to introduce students to emerging ethnographic work on children and youth, in order to explore both its theoretical and methodological challenges. Ethnographic studies will cover a wide range of societies and regions, including anthropological work on children and childhood in the US and UK. The course will begin with an investigation of children's place in anthropology, including early anthropological work on 'Culture and Personality' and 'child socialisation'. The course will then move to consider a variety of topics that have been the focus of recent ethnographic study. These may include: children's play, childhood identities and kinship, education and schooling, youth cultures and globalization, children's work, street children and children's competencies in contexts of crisis, including war.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. This course has a reading week in Week 6 of the LT. Film screenings in the Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: RA LeVine and RS New (eds) 2008. *Anthropology and child development: a cross-cultural reader*; N Scheper-Hughes and C Sargent (eds) 1998. *Small wars: the cultural politics of childhood*; KF Olwig and E Gullov (eds) 2003. *Children's Places: Cross-cultural perspectives*; D Durham and J Cole (eds) 2006. *Generations and globalization: youth, age and family in the new world economy*; M Liebel. 2004. *A will of their own: cross cultural perspectives on working children*; V Amit-Talai and H Wulff (eds) 1995. *Youth cultures: a cross-cultural perspective*; A James. 1993. *Childhood identities: self and social relationships in the experience of the child*; J Boyden and J de Berry (eds) 2004. *Children and youth on the frontline: ethnography, armed conflict and displacement*; BA Levinson, DE Foley and DC Holland (eds) 1996. *The cultural production of the educated person: critical ethnographies of schooling and local practice*; H Montgomery. 2009. *An introduction to childhood: anthropological perspectives on children's lives*.

Assessment: Essay (100%, 4000 words) in the ST.

AN244 Half Unit Not available in 2018/19 Anthropology and Media

This information is for the 2018/19 session.

Teacher responsible: Prof Matthew Engelke 6.12

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to anthropological analyses of media, including books and other printed texts, photography, radio, television, film, and the internet. Although 'the anthropology of media' is often understood to be a relatively new subfield, there has been a long-standing interest in media technologies within the discipline. There is also an important manner, from an anthropological point of view, in which 'media technologies' have to be understood not only as these cultural artefacts (radio, film) but also the more elementary senses they express (hearing, sight, etc). We therefore investigate media both as a broad conceptual category and as specific technologies

of communication. The course begins with a historical overview of anthropologists' investigations of media technologies, broadly construed. We then move on to consider ethnographic case studies of media in context. Examples may include: photography in India, radio in Zambia, television and cassette circulation in Egypt, mobile phones in Jamaica, book groups in England, and 'indigenous video' in Brazil and Australia. Throughout the course, these case studies are framed in relation to some of the key theoretical debates that have shaped media studies in anthropology and related disciplines since the 1930s. Some attention is also given to the methodological problems involved in studying media, especially the extent to which it challenges the possibility of conducting fieldwork by participant observation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Anthropology students taking this course will have an opportunity to submit a tutorial essay for this course to their personal tutors. For non-Anthropology students taking the course, a formative essay may be submitted to the course teacher.

Indicative reading: *Domestication of the Savage Mind* (J Goody); *Imagined Communities* (B Anderson); *The Work of Art in the Age of Mechanical Reproduction* (W Benjamin); *Media Worlds* (F Ginsburg, L Abu-Lughod, and B Larkin, eds); *Understanding Media* (M McLuhan); *Understanding Media* (D Boyer); *Anthropology and the Mass Media* (D Spitulnik); *Anthropology and its contributions to studies of Mass Media* (S Dickey); *Media Rituals* (N Couldry); *A Voice: And Nothing More* (M Dolar); *The Presence of the Word* (W Ong).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the LT.

AN245 Half Unit Not available in 2018/19 Borders and Boundaries: Ethnographic Approaches

This information is for the 2018/19 session.

Teacher responsible: Dr Mathijs Pelkmans OLD 5.08

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: How do territorial borders influence human behaviour and thinking, and how, in turn, do people, create, manage, and manipulate such borders? These questions have become pressing with the intensification and politicisation of global interconnectedness. While a few decades ago the tearing down of the Berlin Wall seemed to herald a border-less world, today's loudest politicians promise to create "huge, great, great, beautiful walls." This course studies the numerous tensions accompanying global interconnectedness. Why is it so difficult to make borders impermeable? How do smuggling networks operate? What does the world look like from the perspective of undocumented migrants? What are the effects of new border fortification technologies? What is it like to live in a gated community? Are people boundary-drawing creatures? Why do borders play a central role in images of utopia? Why is it silly yet productive to ask: where is the border between Europe and Asia? These and other questions will be discussed by situating ourselves ethnographically in the borderlands, potentially making us realise that "the frontier is all around us."

Teaching: 10 hours of lectures and 10 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Students are expected to prepare discussion materials for presentation in the classes. They will also have an opportunity to write tutorial essays on topics from the course which will be formatively assessed.

Indicative reading: Andersson, R. (2014). *Illegality, Inc.*

Clandestine migration and the business of bordering Europe; Berdahl, D. (1999). Where the world ended: Re-unification and identity in the German borderland; Hastings, D., and T. Wilson (1999). Borders: Frontiers of identity, nation and state; Khosravi, S. (2010). 'Illegal' traveller: an auto-ethnography of borders. Low, S. (2004). Behind the gates: Life, security, and the pursuit of happiness in fortress America; Pelkmans, M. (2006). Defending the border: identity, religion, and modernity in the Republic of Georgia; Reeves, M. (2014). Border work: spatial lives of the state in rural Central Asia.

Assessment: Take home exam (100%) in the MT.

The take home exam will be held the week following the end of the MT.

AN247 Half Unit Anthropological Approaches to Questions of Being

This information is for the 2018/19 session.

Teacher responsible: Dr Michael W. Scott OLD6.16

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In Western thought, the study of the nature of being itself (Greek *ontos*), including theories about how things come into being and how they are related to one another, is known as ontology. Building on, but broadening the scope of this Western tradition, the growing anthropological literature on questions of being seeks to convey ethnographically and conceptualize theoretically the many different ontologies, or lived realities, that shape social practices in diverse historical, geographic, and cultural contexts. This literature also urges us to reconsider reflexively what anthropology is, does, and might become.

Twenty-first century anthropology has seen an 'ontological turn' or 'turns', or more broadly, the emergence of anthropologies of ontology. Increasingly, a variety of anthropological discourses invoking the concept of ontology have come into dialogue, yet ontology-oriented approaches remain diverse. Over the past decade, these discourses have been sites of divisive debate, strong contestation, pointed polemic, and at times personal critique. While this has generated a lot of interest, arguably these debates have created more heat than light. In the wake of these debates, and keeping them in view, this course aims to illuminate current work around ontology by reading three recent and influential books, each of which takes a distinctive anthropological approach to questions of being.

Morten Axel Pedersen's ethnography, *Not Quite Shamans* (2011), explores spirits, shamans – or the relative lack of shamans – and postsocialism among the Darhad people of northern Mongolia. Pedersen focuses on the ontological uncertainties that can attend sweeping social transformations; in so doing, he challenges us to rethink the assumptions about being that inform mainstream anthropological analyses.

Marisol de la Cadena's ethnography, *Earth Beings* (2015), offers a person-centred, conversation-driven account of people, place, and indigenous cosmopolitics in the Andes. De la Cadena engages with the Quechua people's political struggles in ways that prompt us to question modernity's dominant nature/human dualism. Giving us access to a context where mountains are wilful actors, she invites us to reconceptualize politics as ontological disagreement.

Stuart McLean's book, *Fictionalizing Anthropology* (2017), develops a comparative approach to anthropology by juxtaposing diverse folkloric, historical, literary, and ethnographic accounts – primarily from the North Atlantic. McLean seeks to persuade us that storytelling is a mode of 'ontological poesis'; it does not simply reflect – or even reflect on – aspects of the world as given; it participates in the very making of worlds. In the same way, he

suggests, the stories anthropologists tell and the comparisons they make may be ontologically generative, part of the becoming of new possibilities for human and other-than-human being. These three works – focused on very different contexts, using very different modes of research, and written in very different styles – introduce students to the central questions, dynamics, and debates that constitute anthropological approaches to questions of being.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT

Indicative reading: Morten Axel Pedersen, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia* (2011); Marisol de la Cadena, *Earth Beings: Ecologies of Practice across Andean Worlds* (2015); Stuart McLean, *Fictionalizing Anthropology: Encounters and Fabulations at the Edges of the Human* (2017).

Assessment: Essay (100%, 4000 words) in the ST.

The assessed essay must be between 3,500 – 4,000 words in length.

AN250 Half Unit The Anthropology of South Asia

This information is for the 2018/19 session.

Teacher responsible: Dr Mukulika Banerjee OLD 5.09

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: You are required to be enrolled in a course at LSE in which you are trained to write essays and read qualitative research.

Course content: This course will aim to address issues of citizenship, inequality and social justice, religious faith and practices, migration and labour and consumption patterns in rural and urban South Asia. The course will cover both classic and current literature and weekly sessions will be organised thematically. We will start by looking at the history of South Asia's democracies and consider the challenges posed to them. South Asia is an ideal setting to examine many paradoxes that exist elsewhere - alongside some of the highest rates of economic growth there is growing inequality, there is a growing middle class but high rates of precarious poverty, the countries remain largely rural yet they will hold the largest urban population in the world in less than ten years and so on. In order to understand these paradoxes, it is essential that issues of macro economic policy, social inequality, infrastructural development, political mobilisation and popular culture, mobilisation along religious lines in each country and the rise of the 'threatened majorities' that behave like minority populations - be examined in greater detail. Using a rich body of anthropological research on South Asia, this course will examine several of these issues and more in this course. The literature on India is the largest available but every attempt will be made to cover the anthropological literature on Pakistan, Nepal, Sri Lanka and Bangladesh alongside.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Attendance at film screenings will be an essential element in the course and will be scheduled on a weekday evening (3 hours) at the start of term. One revision session in ST. There will be a reading week in Week 6 of the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Please read at least TWO of the following background readings before the start of the course and certainly by the end of the second week of the course: Sunil Khilnani, *The Idea of India*; Ramachandra Guha, *India After Gandhi*; Corbridge, S. and Harris, J. 2000, *Reinventing India: Liberalization, Hindu Politics and Popular Democracy*. London: Polity Press; Rana Dasgupta

Capital. Fiction: Vikram Seth, *A Suitable Boy*; Rohinton Mistry, *A Fine Balance*. You will be required to present your thoughts on the background readings you have done in Week 2 class/seminar.

Assessment: Take home exam (100%) in April.

AN251 Half Unit Not available in 2018/19 Cognition and Anthropology: Learning and Thinking in Relation to Social Institutions

This information is for the 2018/19 session.

Teacher responsible: Prof Charles Stafford OLD6.02

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: This course focuses on human learning, thinking and cognitive development, specifically in relation to cultural-historical artefacts (such as writing) and social institutions (such as schools). The topics covered include: (1) cultural models and distributed cognition; (2) attachment behaviours and rites of passage; (3) emotions cross-culturally; (4) incest aversion and incest taboos; (5) morality and ethics cross-culturally; (6) numerical cognition and mathematics; (7) human logic and reason cross-culturally; (8) language and literacy; (9) training, schooling and expertise; (10) exchange, reciprocity and economic psychology.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. This course has a reading week in Week 6 of LT.

Formative coursework: Students are expected to prepare discussion material for presentation in classes. Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Ed Hutchins, *Cognition in the wild*; Michael Cole, *Cultural psychology*; A. Wolf & P. Durham (eds), *Inbreeding, incest and the incest taboo*; Jack Goody, *The domestication of the savage mind*; D. Holland & M. Eisenhart, *Educated in romance*; Unni Wikan, *Turbulent hearts*; M. Lambek (ed.), *Ordinary ethics*; Stanislas Dehaene, *The number sense*.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2500 words) in the LT.

AN252 Half Unit Not available in 2018/19 Anthropological Approaches to Value

This information is for the 2018/19 session.

Teacher responsible: Professor David Graeber OLD.6.10

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In this course we will first take stock of the current anthropological theories of value in contemporary anthropology. After a critical appraisal of such theories, we will explore what an anthropological theory of value might actually look like. After a brief exploration of Kluckhohn's "values project", the formalist-substantivist arguments, and debates about the nature of the social role of money, up to the recent neoliberal resurgence in anthropological theory, we'll be looking at the contrasting legacies of Karl Marx and Marcel Mauss. Looking at these as

two very different approaches to many of the same problems will provide enormous opportunities for creative synthesis. The course will include some fairly extended case studies (of Tiv fetishism, wampum, and anthropological studies of consumption), to investigate how useful all this theory can actually be in throwing new light on familiar problems.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Students registered for Anthropology degrees may submit formative tutorial essays on the course content and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Graeber, D. (2001) *Toward an Anthropological Theory of Value: The False Coin of Our Own Dreams*. Graeber, D. (2011) *Debt: The First Five Thousand Years*. Godbout, J. & Caillé, A. (1998) *The World of the Gift*. De Angelis, M. (2007) *The Beginning of History: Value Struggles and Global Capitalism*. Appadurai, A. (2013) *The Future as Cultural Fact: Essays in the Global Condition*. Turner, T. (1984) "Value, production and exploitation in simple non-capitalist societies". Munn, N. (1986) *The fame of Gawa: A symbolic study of value transformation in a Massim (Papua New Guinea) society*

Assessment: Take home exam (100%) in the MT.

The take home exam will be held the week following the end of the MT.

AN256 Half Unit Economic Anthropology (1): Production and Exchange

This information is for the 2018/19 session.

Teacher responsible: Dr Luke Heslop OLD 6.17A

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines 'the economy' as an object of scholarly analysis and a domain of social action. We start by asking how scholars have measured, described, modeled, and predicted its behaviour; what forms economic institutions take cross-culturally; and how these institutions were transformed as a result of their incorporation into a wider capitalist markets, state systems, and development initiatives. For example, we will examine the central place of households within capitalist economies, largely overlooked by mainstream economic analyses, and the role that money can play in both dividing and uniting human societies. The course will familiarise students with fundamental aspects of the field and with core concepts used in anthropological analyses of economic life, such as production, consumption, exchange, property, alienation, scarcity, and value. But we will also try to break open the standard frames of the debate by highlighting, for example, the entanglement of nature in the capitalist expansion, and how economic life is rarely stable. What progress have anthropologists made in understanding booms, busts, prolonged pauses and delays? What can ethnography tell us about how people cope with crises and instabilities, individually and collectively, and how they seek to anticipate what the future may hold? Throughout the course, students will engage both with theoretical writings and with a range of select ethnographies to gain a rounded understanding of relevant debates.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

This course has a reading week in Week 6 of MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Indicative reading: J.G. Carrier and D. Miller (1998) *Virtualism: A New Political Economy*. M Sahlins (1974), *Stone Age Economics*; J Parry and M Bloch (Eds) (1989), *Money and the Morality of Exchange*; K. Polanyi (1944) *The Great Transformation*. K Ho (2010) *Liquidated: an Ethnography of Wall Street*. S. Mintz (1985) *Sweetness and Power: The Place of Sugar in Modern History*; E. Shever (2012) *Resources for Reform: Oil and Neoliberalism in Argentina*; C.Hann and K.Hart (2011) *Economic Anthropology: History, Ethnography, Critique*. This is an indicative reading list: detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN269 Half Unit Not available in 2018/19 The Anthropology of Amazonia

This information is for the 2018/19 session.

Teacher responsible: Dr Agustin Diz OLD 6.06

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: The course will introduce students to selected themes in the anthropology of Amazonia. It will provide a grounding in the ethnographic literature of the region while seeking to engage with current theoretical debates, highlighting their potential importance to the discipline of anthropology. Topics to be covered include history, indigenous social movements; sexuality and gender; trade and inter-ethnic relations; politics and power; illness, well-being and death. Students will be encouraged to reflect on the broader relationship between ethnography and theory, to challenge common stereotypes of Amazonia and its inhabitants, and to explore ways in which the region has inscribed itself on the imagination of anthropologists and laypersons alike.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. This course has a reading week in Week 6 of LT.

Formative coursework: Students registered for Anthropology degrees will prepare tutorial essays on the subject matter of the course and receive feedback from their academic advisors. Students who are not registered for Anthropology degrees will be given the option of submitting essays to the course teacher and receiving feedback on them.

Indicative reading: Clastres, Pierre. 1987. *Society Against the State: Essays in Political Anthropology*. Overing, Joanna. & Alan Passes (eds). 2000. *The Anthropology of Love and Anger: The Aesthetics of Conviviality in Native Amazonia*. Walker, Harry. 2012. *Under a Watchful Eye: Self, Power and Intimacy in Amazonia*. Descola, Philippe. 1994. In *The Society of Nature: A Native Ecology in Amazonia*. Gow, Peter. 2002. *An Amazonian Myth and its History*. Fisher, William H. 2000. *Rainforest Exchanges: Industry and Community on an Amazonian Frontier*. Seeger, Anthony. 2004. *Why Suyá Sing: A Musical Anthropology of an Amazonian People*. Gregor, Thomas. 1985. *Anxious Pleasures: The Sexual Lives of an Amazonian People*. Lévi-Strauss, Claude. 1984. *Tristes Tropiques*. Conklin, Beth. 2001. *Consuming Grief: Compassionate Cannibalism in an Amazonian Society*.

Assessment: Take home exam (100%) in the LT.

AN274 Half Unit Not available in 2018/19 Subjectivity and Anthropology

This information is for the 2018/19 session.

Teacher responsible: Dr Harry Walker OLD 5.06B

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology.

Course content: This course will explore the nature and formation of the self and of subjective experience. It will draw together a range of anthropological, psychological and philosophical approaches to subjectivity and the social and cultural phenomena that shape and condition it, attending both to the particulars of individual lives and settings and to more general, existential dimensions of the human condition. The course will be structured around engagements with three principal paradigms: psychoanalysis; phenomenology; and subjectivation. A key aim of the course will be to understand the strengths and limitations of these approaches for anthropological analysis as well as potential sites of convergence and divergence. Specific topics to be covered include the unconscious, dreams, illness and healing, embodiment, sound, intersubjectivity, interpellation, the feminist subject, and altered states of consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Ten hours of lectures and ten hours of classes in MT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher

Indicative reading: Hallowell, I. 1955. *Culture and Experience*. Philadelphia: University of Pennsylvania Press. Butler, J. 1997. *The Psychic Life of Power*. Stanford: Stanford University Press. Mahmood, S. 2005. *Politics of Piety: The Islamic Revival and the Feminist Subject*. Princeton: Princeton University Press. Biehl, J. et. al. 2007. *Subjectivity: Ethnographic Investigations*. Berkeley: University of California Press. Ortnor, S. 2006. *Anthropology and Social Theory: Culture, Power, and the Acting Subject*. Durham: Duke University Press. Toronto: University of Toronto Press. Moore, H. 2007. *The Subject of Anthropology: Gender, Symbolism and Psychoanalysis*. Cambridge: Polity Press. Turner, V. & E. Bruner (eds.) 1986. *The Anthropology of Experience*. Urbana: University of Illinois Press. Wikan, U. 1990. *Managing Turbulent Hearts: A Balinese Formula for Living*. Chicago: University of Chicago Press.

Assessment: Take home exam (90%) in the ST.

Class participation (10%) in the MT.

Assessment for this course will comprise a 'take-home' exam of up to five questions. Students will be asked to write a 2000-2500 word essay on two of the questions, drawing across the breath of the course. The take home essay will be worth 90% of the total mark. 10% of marks will be given for general class participation. Those who give full attendance and make some effort to participate in class will be able to achieve first class marks.

AN275 Half Unit Not available in 2018/19 The Anthropology of Revolution

This information is for the 2018/19 session.

Teacher responsible: Dr Alpa Shah OLD 6.17A

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Optional for BA/BSc Social Anthropology and BA Anthropology and Law. Also available to students on other degree programmes as an

outside option, and to General Course students.

Pre-requisites: Unless granted an exemption by the course teacher, students taking this course should have completed an introductory course in anthropology (AN100 Introduction to Social Anthropology).

Course content: This course will focus on the study of revolution from an anthropological perspective. It will concentrate on three different types of revolutionary struggle, in three different continents, through three different types of ethnographies: the Zapatista indigenous movement in Mexico, the Zimbabwean anti-colonial struggle, and the Maoist 'People's War' in Nepal. In each case, students will be encouraged to critically consider the varying degrees of involvement of the anthropologist in the movements concerned, the theoretical premises of the anthropologists and how these affect the politics and ethics of writing. In this process, students will deepen their understandings of the theoretical debates around production and reproduction, social transformation, religion and secularism, activism and anthropology, and violence and ethics in radical social change. The course will demonstrate that although anthropologists were once criticised for 'missing the revolution' on their doorstep, in fact their long term engagement with communities who come to be affected by revolutionary struggles has much to offer to the theoretical and practical work of radical social transformation.

Teaching: 6 hours of lectures, 6 hours of classes and 8 hours of workshops in the MT.

This course has a reading week in Week 6 of MT.

Formative coursework: Students registered for Anthropology degrees will submit a tutorial essay for this course to their academic advisers. Students who are not registered for Anthropology degrees will submit a formative essay to the course teacher.

Indicative reading: This course will be based on the close reading of the following three ethnographic monographs: Earle, Duncan, & Simonelli, Jeanne. (2005). *Uprising of Hope: Sharing the Zapatista Journey to Alternative Development*. Walnut Creek: Altamira Press. Lan, David. (1985). *Guns and Rain: guerrillas and spirit mediums in Zimbabwe*. Berkeley: University of California Press. Pettigrew, Judith. (2013). *Maoists at the Hearth: Everyday Life in Nepal's Civil War*. Philadelphia: University of Pennsylvania Press.

Assessment: Take home exam (100%) in the MT. The take home exam will be held the week following the end of the MT.

AN276 Half Unit Not available in 2018/19 Anthropology and the Anthropocene

This information is for the 2018/19 session.

Teacher responsible: Dr Gisa Wieszkałnys

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In August 2016, scientists participating in the Anthropocene Working Group put forward an official recommendation to rename our present time interval 'the Anthropocene'. It postulates that humans now exert recognisable influences on the earth's bio- and geophysical systems sufficient to warrant the naming of a distinct geological epoch encompassing the earth's present, recent past, and indefinite future. The Anthropocene thus echoes contemporary anxieties about climate change, the deterioration of global ecologies, and other environmental crises on unprecedented scales, as well as humans' capacity to devise adequate solutions to the problems they face. The scholarly and popular debate on the Anthropocene has exploded in recent years, with anthropologists contributing both theoretical and important ethnographic insight into how people apprehend and deal with the repercussions of anthropogenic environmental change. It now seems that the continued

successful existence of humanity on this planet will require us to live differently both with each other and with the earth: 'We will go onwards in a different mode of humanity or not at all' (Val Plumwood 2007).

In this course, we will approach the Anthropocene as a contested category, with evident political and ethical implications. We will begin by examining the dramatic changes in the relationship between humans and their natural environments brought about by industrialisation, specifically, the increased exploitation of natural resources as well as the production and use of fossil fuels on a large scale. We will attend to the practices and cosmologies of people who in their everyday lives – for example, by digging, polluting, and wasting – participate in the work of anthropogenic alterations, drawing on case studies from across the world.

We will consider alternative labels, such as the Capitalocene, Plantationocene, Plasticene, Eurocene, Misanthropocene, and Neologocene, each of which tells a different origin story for what Donna Haraway has called 'the trouble'. However, we then move to ask whether the Anthropocene might be less a marker of an epochal transformation than a signal of a profound anti-political shift in discussions about the future of the planet. We will inspect the scientific and non-scientific controversies the Anthropocene has provoked, and the particular forms of power, authority, reason, imagination, and subjectivity it has generated.

Students will be expected to engage with a variety of resources, including online publications, blogs, documentary and feature films, and other media, and an emergent interdisciplinary literature, spanning the social and natural sciences, which we will read in relation to a more long-standing engagement with the environment within the anthropological discipline. This will lead us to interrogate established binaries of human/nonhuman, subject/object, and nature/culture, and, significantly, to ask about the critical valence of anthropologists' enquiry into the 'anthropos' for an age so profoundly shaped by humans. What methods and modes of analysis are required to comprehend the diverse human/non-human interactions and seemingly incommensurable scales that the Anthropocene invokes? What types of collaboration, knowledge, and mutual care does an anthropocenic outlook make possible? How can we anchor the manifold theoretical proposals that have been put forward not just in ethnographic examples but also in our 'experiments for living'?

Teaching: 7 hours of lectures, 7 hours of classes, 6 hours of classes and 4 hours of workshops in the LT.

The course is comprised of three cycles of three weeks plus an additional, concluding week. Each cycle consists of two weeks taught in the traditional lecture/class format, and a third week with a two-hour class bringing together the entire course cohort. While the one-hour classes will focus on core readings set by the lecturer, the two-hour class will, in addition, offer space for viewing other resources (films, online material), discussing students independently researched material, student presentations, etc.

Formative coursework: Students will be expected to produce 1 essay, 1 presentation and 6 other pieces of coursework in the LT.

Indicative reading: J. Cruikshank (2005) *Do Glaciers Listen? Local Knowledge, Colonial Encounters, and Social Imagination*. D. Haraway (2016) *Staying with the Trouble: Making Kin in the Chthulucene*. E. Kohn (2013) *How Forests Think: Toward an Anthropology beyond the Human*. D. McDermott Hughes (2017) *Energy without Conscience: Oil, Climate Change, and Complicity*. N.C. Kawa (2016) *Amazonia in the Anthropocene: People, Soils, Plants, Forests*. R. Scranton (2015) *Learning to Die in the Anthropocene: Reflections on the End of a Civilization*. Strauss et al. (2013) *Cultures of Energy: Anthropological Perspectives on Powering the Planet*. A. Tsing (2015) *The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins*.

Assessment: Essay (100%, 4000 words) in the LT.

Essay (3500-4000 words)

AN277 Half Unit Topics in the Anthropology of sub-Saharan Africa

This information is for the 2018/19 session.

Teacher responsible: Professor Deborah James OLD 6.06
Professor Karin Barber

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. In deciding whether to admit students from the General Course and/or other departments, consideration will be given to preliminary/general training in anthropology and/or cognate social science disciplines.

Pre-requisites: Students must have completed Introduction to Social Anthropology (AN100) and Ethnography and Theory: Selected Texts (AN101). It is preferred that students will normally have done preliminary/first-year courses in Anthropology as noted above, but there is some flexibility (eg in the case of General Course students). Students should consult the course lecturer.

Course content: This course gives students a critical understanding of ethnographic and theoretical writing on sub-Saharan Africa. Grounded in some classic debates around tradition and modernity (kinship-based polities vs states; studies on occult knowledge vs rationally-oriented political economy approaches; relationality and communality vs developmentally-oriented progress; 'objective' class vs forms of identification such as tribe or race), it explores questions about how the sub-continent's societies orient themselves, and respond to new precarities, in a postcolonial and neoliberal age. Are there specifically African forms of knowledge – and what is the role of the occult? What is postcolonial about the 'postcolony'? Do youth have a future of work in post-industrial Africa, or are familial or welfare dependencies the only way forward? Is Europe 'evolving towards Africa', as has been maintained?

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

During weeks 1-5 and weeks 7-11, regular lectures will be held. During the reading week, where available, students will be taken to attend one of a number of possible public events held by (for example) the Firoz Lalji Centre for Africa (LSE) the Centre of African Studies (SOAS), the Royal African Society. Where the appropriate public events are not held during week 6, students will instead be offered a chance to consolidate readings and to consult the lecturer with any questions arising, or to ask about how to structure the seminars with which they have been charged. Students will also be encouraged to make use of regular office/feedback hours during term time for the same purpose.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT. Students will be asked to write one formative review during term time, to be evaluated by and discussed with the course lecturer. The formative review will allow for students' individuality and expression and allow them to bring their own interest in current debates into interplay with course materials.

Indicative reading: Adebawale, Wale. 2017. *The Political Economy of Everyday Life in Africa: Beyond the Margins*. Oxford: James Currey. Comaroff, J and JL. 2012. *Theory from the South or, How Euro-America is Evolving Toward Africa* Anthropological Forum 22 (2). Englund, Harri. 2006. *Prisoners of Freedom. Human Rights and the African Poor*. Berkeley: UC Press. Geschiere, Peter. 2013. *Witchcraft, Intimacy and Trust: Africa in comparison*. Chicago: University of Chicago Press.. Guyer, Jane. 2014. *Marginal Gains: monetary transactions in Atlantic Africa*. Chicago: University of Chicago Press. Mbembe, A. 2001. *On the Postcolony*. Berkeley, University of California Press. Moore, H. L. 2013. *Still life: hopes, desires and satisfactions*. London, John Wiley & Sons.

Assessment: Take home exam (100%) in April.

AN278 Half Unit Anthropology and Global History

This information is for the 2018/19 session.

Teacher responsible: Prof David Graeber OLD 6.10

Availability: This course is available on the BA in Anthropology and Law, BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course is about what anthropology can tell us about history and also, what a knowledge of history and historical context and process can tell us about particular ethnographic case studies. The first half of the course largely covers broad questions of global history, beginning with the surprising history of the birth of evolutionism in the Enlightenment and covering such classic issues as divine kingship, money and cycles of economic history, and the concept of "civilization" itself, to demonstrate what anthropological understandings can bring to bear on the broad sweep of human history. Over the course of this discussion various debates on the nature of history itself will be considered, ranging from infra structuralist Marxism and Autonomist class-struggle oriented Marxian approaches, world-systems analysis, culturalist approaches, and theories of narrative agency.

The second half applies these tools to the existing literature on the Nuer, Balinese and Malagasy (both Caribbean pirates and their interactions with Malagasy in the 18th century, and present-day Malagasy villagers) approaching a series of classic anthropological case studies from a broader historic point of view. Historiographical debates over the role of narrative and interpretation take life here as we examine how political action largely consists of action designed to be narrativised by others; mainstream, economic theories of historical action are found inadequate to explain the long-term gender dynamics that lie behind the creation of these apparently free-standing events. All this poses a set of conceptual challenges: what is an event? What is historical agency? What is the relation of cosmological conceptions, or narrative structures, to historical process? Must historical accounts always take a mythic form? Having begun by arguing Enlightenment forms of knowledge are really an appropriation of and reaction to non-Western ideas, it ends by examining a current non-Western political struggle - the Kurdish freedom movement - engaged in an explicit attempt to decolonize, recapture, and reformulate these terms; a project in which the rewriting of history on a world scale is seen as fundamental to transformative action.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. This course has a reading week in Week 6 of MT.

Formative coursework: Students will submit one formative coursework essay (1500 words) to the course teacher during the MT.

Indicative reading: Graeber, David. 2011. *Debt the First Five Thousand Years*. Melville House. Graeber, David, and Marshall Sahlins. 2016. *On Kings*. University of Chicago Press. Sahlins, Marshall. 1988. "Cosmologies of Capitalism. the Trans-Pacific Sector of 'The World System'" in *Proceedings of the British Academy*. Kandiaronk.2001. *Are you delusional? Kandiaronk on Christianity*. Wengrow, David, and David Graeber. 2005. "Farewell to the Childhood of Man: Ritual, Seasonality, and the Origins of Inequality." Graeber, David. 2006. *Lost People: Magic and the Legacy of Slavery in Central Madagascar*. Johnson, Douglas. 1979. "Colonial Policy and Prophets: the 'Nuer Settlement,' 1929-30." Geertz, Clifford. 1989. *Negara: The Theatre State in Nineteenth Century Bali*. Ocalan, Abdullah. 2015: *Manifesto for a democratic Civilization: Civilization: The Age of Masked Gods and Disguised Kings*. Abu-Lughod, Janet. 1989. *Before European Hegemony: the World System 1250-1350*.

Assessment: Coursework (100%, 4000 words) in the LT.

AN298 Half Unit Research Methods in Social Anthropology

This information is for the 2018/19 session.

Teacher responsible: Prof Rita Astuti OLD 6.11

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to guide and support students as they identify, execute and write-up their own ethnographic project in London. In parallel with their research activities, students will develop research skills for the collection, analysis and representation of ethnographic data. The course will provide training in ethnographic observation, participation, listening, questioning, interviewing, analysing and writing. One session will be dedicated to the discussion of a range of actual ethical dilemmas encountered by PhD students in the Anthropology Department during the course of ethnographic research.

Students will demonstrate their research skills by applying them to the research questions pursued in their ethnographic project. They will write a 4,500 to 5,000- word essay reporting on their research activities and findings.

Teaching: 1 hour of lectures in the MT. 20 hours of seminars in the LT.

Formative coursework: A short description of the student's proposed research project will be discussed in the seminars in LT week 1 in a student-led workshop. Students will then produce a 1000-word report due between weeks 5 and 7, describing the progress made on the research, including a sample ethnographic description and an explanation of the methods used to date. Students will receive extensive feedback on the report within two weeks of submission.

Indicative reading: Narayan, K. *Alive in the Writing: Crafting Ethnography in the Company of Chekhov* (2012); DeWalt, K.M. & DeWalt, B.M *Participant Observation: A guide for fieldworkers* (2010); Bernard, H.R. *Research Methods in Anthropology*, 5th edition (2011).

Assessment: Essay (100%, 5000 words) in the ST.

AN300 Advanced Theory of Social Anthropology

This information is for the 2018/19 session.

Teacher responsible: Dr Johannes Steinmuller OLD 5.06A and Dr Fenella Cannell OLD 5.07

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: The aim of this course is to train students to engage critically with classic and contemporary texts in the discipline, thereby deepening understandings of current trends and emerging debates. It will examine the theoretical implications of particular anthropological approaches by surveying their origins, their strengths and their critique. The course will take the form of an intensive reading group in which approximately six texts (three in each of MT and LT) will be discussed and analysed in depth, along with supplementary reading material where appropriate. Students will be expected to develop their own critical responses to each text, as well as an appreciation of the context in which it was written and its contribution to relevant theoretical discussions and debates.

Teaching: 4 hours of lectures and 18 hours of classes in the MT. 4 hours of lectures and 18 hours of classes in the LT.

Lectures provide a general introduction to the text and relevant issues or debates. The class will run as a large group dynamic seminars to interrogate materials and split into smaller sub group discussions on texts and issues.

This course has a reading week in Week 6 in MT and LT.

Formative coursework: Indicative reading: Marshall Sahlins & David Graeber. *On Kings*. James Scott. *Seeing like a State*. Danilyn Rutherford. *Laughing at Leviathan*. Anna Tsing. *Mushroom at the End of the World*. Deirdre de la Cruz. *Mother Figured*. Gillian Feeley-Harnik. Selection of articles will be specified by the course teacher. For advance examples see chapters by GFH in eds. S.Mckinnon and F. Cannell *Vital Relations* and in eds. S. Franklin and S. Mckinnon, *Relative Values*.

Assessment: Essay (100%, 9000 words) in the MT and LT. All students will produce a portfolio of six position pieces, to which they are expected to make a contribution after each three-week cycle. Each position piece will be up to 1500 words, and will comprise a critical reflection on the text and its contribution to the wider anthropological literature. The position pieces will be assessed throughout the year, with feedback provided to students on a regular basis. The final mark will be the average of the 4 pieces with the highest grade.

AN301 The Anthropology of Religion

This information is for the 2018/19 session.

Teacher responsible: Dr Michael Scott OLD 6.16 and Dr Nicholas Evans KGS 3.07

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students should have a substantial background in Social Anthropology.

Course content: This course covers selected topics in the anthropology of religion, focusing upon relevant theoretical debates. In the Michaelmas term, we will consider topics such as shamanism, cargo cults, initiation, witchcraft and sorcery, cosmology, and human-nonhuman relations, primarily with reference to ongoing transformations of the indigenous traditions of Melanesia, Africa, Amazonia, Australia, and the circumpolar north. Recurring themes will be: transformations in the definition of 'religion' in relation to 'science'; the nature of rationality; and the extent to which anthropology itself can be either – or both – a religious and a scientific quest to experience the wonder of unknown otherness. In the Lent term, we will further explore the category of 'religion' in its western and non-western contexts. What were the historical processes through which particular constellations of beliefs and practices were grouped together as 'religions'? In what way are different religious traditions comparable to each other? Why do we call some traditions 'religion' and others 'cults'? Students will examine categories such as orthodoxy and heresy and they will explore the relationship between religion and secularism in modern society. Current approaches to and reconsiderations of classic topics in the anthropology of religion are also presented; these may include myth, ritual, belief and doubt, sacrifice, authority and charisma.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

This course has a reading week in Week 6 of the MT and LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: M. Weber 1905 *The protestant ethic and the spirit of capitalism*; E. Durkheim 1915 (and later editions), *The elementary forms of the religious life*; S. Mahmood 2005, *Politics of Piety*; C. Taylor 2007, *A Secular Age*; B Latour 2009 *The modern*

cult of the factish god; H Hubert and M Mauss 1960, *On Sacrifice*; V. Turner 1969 *The ritual process: structure and anti-structure*; T. Masuzawa 2005 *The invention of world religions, or, How European universalism was preserved in the language of pluralism*; J. Robbins 2004 *Becoming sinners: Christianity and moral torment in a Papua New Guinea society*; S. Ahmed 2015 *What Is Islam?: The Importance of Being Islamic*; A. Abramson and M. Holbraad (eds.) 2014, *Framing Cosmologies: The Anthropology of Worlds*; G. Bateson and M. C. Bateson 1987, *Angels Fear: Towards an Epistemology of the Sacred*; B. Kapferer (ed.) 2002, *Beyond Rationalism: Rethinking Magic, Witchcraft and Sorcery*; L. Lévy-Bruhl 1926, *How Natives Think*; M. A. Pedersen 2011, *Not Quite Shamans: Spirit Worlds and Political Lives in Northern Mongolia*; P. Ingman, T. Utrianinen, et al. (eds.) 2016, *The Relational Dynamics of Enchantment and Sacralization: Changing the Terms of the Religion Versus Secularity Debate*; H. Whitehouse and J. Laidlaw (eds.) 2007, *Religion, Anthropology, and Cognitive Science*; R. Willerslev 2007, *Soul Hunters: Hunting, Animism, and Personhood among the Siberian Yukaghirs*; D. E. Young and J-G. Goulet (eds.) 1994, *Being Changed: The Anthropology of Extraordinary Experience*. Detailed reading lists provided at the start of each term.

Assessment: Essay (50%, 4500 words) in the LT.
Essay (50%, 4500 words) in the ST.

AN357 Half Unit Economic Anthropology (2): Transformation and Globalisation

This information is for the 2018/19 session.

Teacher responsible: Dr Agustin Diz SHF 3.01

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is available on the BA in Anthropology and Law. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines 'the economy', as an object of social scientific analysis and a domain of human action, focusing on the anthropology of globalisation. Scholars have various ways of analysing the new forms of production, consumption, exchange and circulation that have emerged since the 1980s. Some emphasise post-Fordist methods of flexible production and neo-liberal elite projects. Others focus on trans-state processes of globalisation. For other theorists shifts in state policies such as austerity, decentralised planning, public-private partnerships and the deregulation of financial markets are at the centre of analysis. Others address new forms of consumer society, popular desires for social mobility and transnational migration. Drawing from ethnographies and anthropological theory this course will cast a critical eye over these arguments. It will also revisit classic topics from the perspective of present realities — for example production and intimate economies; formal markets in relation to informalised, violent economies; circulation in relation to financial debt and risk; and consumption and consumer citizenship.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: J. Inda and R. Rosaldo (eds) *The Anthropology of Globalisation* (2007); M. Edelman and A. Haugerud (eds) *The Anthropology of Development and Globalization* (2004); J. Collier and A. Ong (eds) *Global Assemblages: Technology, Politics and Ethics as Anthropological Problems* (2004); C. Freeman, *High Tech and High Heels in the Global Economy: women, work and pink-collar identities in the Caribbean* (2000); M. Mills, *Thai Women and the Global Labour Force: consuming desires, contested selves* (1999); A. Wilson, *The Intimate Economies of Bangkok: Tomboys, Tycoons and*

Avon Ladies in the Global City (2004); A. Aneesh, *Virtual Migration: the Programming of Globalisation* (2004); N. Constable, *Migrant Workers in Asia: Distant Divides, Intimate Connections* (2010); M. O'Dougherty, *Consumption Intensified: the politics of middle class daily life in Brazil* (2002); A. Tsing, *Friction: an Ethnography of Global Connection* (2004); C. Hann, *Life in Debt: Times of Care and Violence in Neo-Liberal Chile* (2012); K. Ho, *Liquidated: an Ethnography of Wall Street* (2010). This is an indicative reading list: detailed reading lists are provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

AN398 Half Unit Special Essay Paper in Social Anthropology

This information is for the 2018/19 session.

Teacher responsible: Prof Rita Astuti OLD 6.11

Availability: This course is compulsory on the BA in Social Anthropology and BSc in Social Anthropology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Undergraduates taking this course need to have completed the first two years of either the BA/BSc Social Anthropology or the BA Anthropology and Law.

Course content: The course gives students the opportunity to write an extended essay which addresses an anthropological theme of their own choosing. The extended essay should be based on library research conducted on a topic that is suitable to anthropological analysis. Students should ensure that there is an adequate body of relevant literature available for analysis, and that the topic as defined is not unmanageably large.

There is no formal course content. Students will be expected to draw widely on their readings from other anthropology courses.

Teaching: 2 hours of lectures in the MT. 1 hour of lectures in the ST.

Guidance on dissertation research and writing will be given in one-hour session in ST (to students finishing their 2nd year) and a two-hour session in MT (to students starting their 3rd year).

Formative coursework: Students will submit an abstract and preliminary bibliography to the course teacher at the beginning of MT (using a template published on Moodle). They will then work with their academic mentor who will advise them during their normal tutorial meetings on the chosen topic, the empirical and analytical scope of the essay, and relevant readings.

Indicative reading: There is no formal course content. Students will be expected to draw widely on their readings from other anthropology courses.

Assessment: Dissertation (100%, 8000 words) in the ST.

The essay is 7,000 to 8,000 words of main text, including footnotes and appendices but excluding bibliography. The essay should be typed, double spaced, and should follow the reference procedures of *The Journal of the Royal Anthropological Institute*. The essay must be handed in to the Anthropology Departmental Office by the date announced in the Department's Handbook, normally by May 1st.

EC100 Economics A

This information is for the 2018/19 session.

Teacher responsible: Prof Alan Manning 32L 2.36A

Dr L. Rachel Ngai 32L 1.15

Availability: This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and

Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and International Relations, BSc in Social Policy, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This is an introductory course in microeconomics and macroeconomics. It may not be taken if **Economics B** (EC102) has already been taken and passed. No previous knowledge of economics is assumed. The treatment will be non-mathematical, but students are expected to be able to interpret graphs. Entrance on to EC100 and EC102 is dependent on Economics A-level or equivalent background. Students with A-level economics (or equivalent) are not allowed to take EC100.

Course content: This course provides a foundation in micro and macroeconomics, primarily to those without background in the subject. Microeconomics is the focus of Michaelmas Term: This term aims to provide students with methods of economic analysis that can enable them to think about when markets work well, when they are likely to fail and what policies might improve outcomes. Macroeconomics is the focus of Lent Term, which covers topics such as economic growth, unemployment, inflation, monetary & fiscal policy, and international macroeconomics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. Handouts of the slides are distributed.

Formative coursework: Weekly feedback is given on the multiple choice questions which form the weekly quizzes. Individual written feedback is given on at least one essay question per term. Students are expected to make positive contributions to class discussions.

Indicative reading: Daron Acemoglu, David Laibson and John List (2016) *Economics*, Pearson Education.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the summer exam period. The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC102 Economics B

This information is for the 2018/19 session.

Teacher responsible: Prof Francesco Caselli 32L.1.21 and Prof Ronny Razin 32L.4.01

Availability: This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and International Relations, BSc in Social Policy and Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations

permit and to General Course students.

Pre-requisites: This is an introductory course in microeconomics and macroeconomics. Students without a mathematical background may consider taking an introductory mathematics course, such as Basic Quantitative Methods, at the same time. EC102 is unavailable to anyone who has passed **Economics A** (EC100). Entrance on to EC100 and EC102 is dependent on Economics A-level or equivalent background. Students without A-level economics (or equivalent) are not allowed to take EC102.

Course content: Part A Consumer and Producer Theory; Markets and Competition; Welfare; Game Theory; Adverse Selection and Moral Hazard. Part B Measurement of the aggregate economy; growth and development, economic fluctuations; stabilization policy; money and inflation; unemployment; financial and sovereign crises.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

A one hour revision lecture will be offered in week 11 of both the Michaelmas and Lent terms.

Formative coursework: MT: Students will submit two problems sets on which written feedback will be provided. Feedback will also be provided on weekly Moodle quizzes.

LT: There will be weekly assignments consisting of a set questions requiring written-out answers and a number of multiple-choice questions. Full solutions will be provided.

Indicative reading: Part A: Acemoglu, D. Laibson, D. and J. A. List (2016) *Microeconomics*, Pearson. Part B: N Gregory Mankiw, *Macroeconomics*, Worth, 8th edition.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC201 Microeconomic Principles I

This information is for the 2018/19 session.

Teacher responsible: Dr Margaret Bray 32L4.27 and Prof Timothy Besley 32L3.37

Availability: This course is compulsory on the BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Finance, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: This is an intermediate course in microeconomic analysis. Students are expected to have completed Economics A (EC100) OR Economics B (EC102), or an equivalent introductory course in economics based on textbooks such as Morgan W., M. Katz and H. Rosen, *Microeconomics*. Students are also expected to have completed an introductory mathematics course such as Quantitative Methods (Mathematics) (MA107) and should revise calculus including partial derivatives and the use of Lagrangians.

Course content: I. Consumer Theory. Utility functions and indifference curves. Income and substitution effects. The Slutsky equation. The expenditure function, compensating and equivalent variation, and consumer surplus. Selected applications to savings and labour supply, including the effects of taxes and benefits. II.

Producer Theory. Production and cost functions. Firm and industry supply. Perfect Competition and Monopoly. III. Strategic Choice. Basic ideas in game theory. Applications to oligopoly. IV. The market system and general equilibrium. Efficiency, distribution and inequality. V. Arguments for and the effectiveness of government intervention. Public goods and externalities. VI. Uncertainty and information. Moral hazard and adverse selection.

Teaching: 20 hours of lectures and 20 hours of classes in the MT. 20 hours of lectures and 20 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of both MT and LT

Formative coursework: Students should complete the weekly web-based quizzes before attending classes. In addition, at least four pieces of written work will be required and marked by class teachers.

Indicative reading: A reading list will be provided at the start of the course. The main text for the course is Snyder, C. and Nicholson, W. "Microeconomic Theory: Basic Principles and Extensions". Reference is also made to other texts and to journal articles.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on 33% on the Michaelmas term syllabus and 67% on the Lent term syllabus.

EC202

Microeconomic Principles II

This information is for the 2018/19 session.

Teacher responsible: Prof Frank Cowell 32L3.25A and Dr Andrew Ellis 32L3.15

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Finance, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics, BSc in Statistics with Finance, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have a suitable economics background: for those other than General Course students and 2-year MSc students, this means that they must have completed either Economics A (EC100) or Economics B (EC102). In addition, students must have a suitable mathematical background: students who have thoroughly mastered mathematics to the level of Quantitative Methods (Mathematics) (MA107) should be able to follow the course, but would find it difficult. Mathematical Methods (MA100) would give a better grounding.

Course content: This is an intermediate course in microeconomic analysis. Topics covered include Producer Theory, Consumer Theory, General Equilibrium, the Economics of Uncertainty, Welfare Economics and Game Theory, with applications to oligopoly, auctions, moral hazard, and adverse selection. A greater mathematical facility will be assumed of the student, permitting both greater depth and a number of additional topics than Microeconomic Principles I to be covered. Further details are available on <http://darp.lse.ac.uk/Frankweb/courses/ec202/>.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

A one-hour revision lecture will be scheduled in the MT.

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces

of written work will be required and marked by class teachers.

Indicative reading: The text for the course is Cowell, F.A. (2018) *Microeconomics: Principles and Analysis* (second edition), Oxford University Press, Oxford. Additional readings to complement the lecture notes on specific topics from other books or articles will be indicated as needed.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based 100% on the Michaelmas term syllabus, and the Summer exam on 33% of the Lent term syllabus and 67% of the Lent term syllabus.

EC210

Macroeconomic Principles

This information is for the 2018/19 session.

Teacher responsible: Dr Kevin Sheedy 32L1.09

Professor Ricardo Reis 32L1.27

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics and Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Politics and Economics, BSc in Social Policy and Economics, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics A (EC100) or Economics B (EC102), or an equivalent introductory course in Economics. Students are also expected to have completed at least an introductory Mathematics course such as Basic Quantitative Methods (MA110).

Course content: This course will cover the fundamental principles of macroeconomics at an intermediate level. Topics include the study of economic growth, consumption, investment, unemployment, business cycles, inflation, monetary and fiscal policy, financial markets and international macroeconomics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students should attempt the assigned problems before attending classes, as they will have to hand them in every week, and will receive feedback from the class teachers on approximately half of them.

Students are expected to make positive contributions to class discussions.

Indicative reading: There is no single textbook for the course, as we will follow several different readings from different textbooks.

For the Michaelmas term, a combined package containing chapters from the relevant textbooks will be available in the Economists' Bookshop.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based 100% on the Michaelmas term syllabus, and the Summer exam on 33% of the Michaelmas term syllabus and 67% of the Lent term syllabus.

EC220

Introduction to Econometrics

This information is for the 2018/19 session.

Teacher responsible: Dr Greg Fischer 32L.3.09 (MT), Dr. Taisuke Otsu 32L 4.25 and Dr. Marcia Schafgans 32L 4.12 (LT)

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Finance, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics, BSc in Social Policy and Economics, Diploma in Accounting and Finance and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Availability to General Course students is with the permission of the lecturer.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Those who have taken MA107/ST107 should consider taking EC220 only if they have obtained marks of 65 or better on both courses

Course content: This course is an introduction to econometrics; it aims to present the theory and practice of empirical research in economics.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software packages R or Stata analysing actual data sets. Students will learn how various tools are used to answer causal "what-if" questions (e.g., "What is the effect of monetary policy on output?") and prediction problems. In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

A one hour revision lecture will be held in week 11 of both the MT and LT.

EC220.B for graduate students.

Formative coursework: Exercises are provided each week and are discussed in the classes. (MT) Students are required to hand in written answers to the exercises for feedback. (LT) While students are expected to attempt the weekly problem sets before each class, students will receive formal feedback on 4 occasions.

Indicative reading: J. W. Wooldridge *Introductory Econometrics. A Modern Approach*, 5th Edition, South-Western. J. D. Angrist and J. S. Pischke *Mastering 'Metrics. The Path from Cause to Effect*, Princeton University Press. Further materials will be available on the EC220 Moodle page.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based 100% on the Michaelmas term syllabus, and the Summer exam on 33% of the Michaelmas term syllabus and 67% of the Lent term syllabus.

EC221

Principles of Econometrics

This information is for the 2018/19 session.

Teacher responsible: Dr Greg Fischer 32L.3.09 (MT) and Dr. Marcia Schafgans 32L 4.12 (LT)

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is available on the BSc in Business Mathematics and Statistics, BSc in Economics, BSc in Economics with Economic History, BSc in Finance, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics, BSc in Statistics with Finance and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: This course is a more advanced introduction to econometrics; it aims to present the theory and practice of empirical research in economics. Compared to EC220, in LT this course puts more emphasis on the underlying statistical theory and relies on the use of matrix algebra.

In MT, the focus of the course is on empirical questions and students will work with the econometrics software packages R or Stata analysing actual data sets. Students will learn how various tools are used to answer causal "what-if" questions (e.g., "What is the effect of monetary policy on output?") and prediction problems.

In LT, the focus of the course is on the underlying econometric theory: estimation, properties of estimators (unbiasedness, efficiency, sampling distribution, consistency) and hypothesis testing.

Topics include: randomised experiments; program evaluation; matching; simple and multiple regression analysis; omitted variable bias; functional form; heteroskedasticity and weighted least squares; endogeneity (measurement error, simultaneity); instrumental variables and two-stage least squares; and stationary and non-stationary time series analysis.

Teaching: 30 hours of lectures and 10 hours of classes in the MT. 30 hours of lectures and 10 hours of classes in the LT.

Additional help lectures 10 x 1 hour in the LT.

A one hour revision lecture will be held in week 11 of both the MT and LT.

EC221.B for graduate students.

Formative coursework: Exercises are provided each week and are discussed in the classes. (MT) Students are required to hand in written answers to the exercises for feedback. (LT) While students are expected to attempt the weekly problem sets before each class, students will receive formal feedback on 3 occasions.

Indicative reading: J. W. Wooldridge *Introductory Econometrics. A Modern Approach*, 5th Edition, South-Western.

J. D. Angrist and J. S. Pischke *Mastering 'Metrics. The Path from Cause to Effect*, Princeton University Press.

Further materials will be available on the Moodle website.

Other useful texts include: W. Greene, *Econometric Analysis*, 7th Edition, Pearson; J. Johnston and J. Dinardo, *Econometric Methods*, 4th Edition, McGraw-Hill; G.S. Maddala and K. Lahiri, *Introduction to Econometrics*, 4th Edition, John Wiley; J.H. Stock and M.W. Watson, *Introduction to Econometrics*, 3rd Edition, Pearson; C. Heij et al., *Econometric methods with Applications in Business and Economics*, Oxford University Press.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based 100% on the Michaelmas term syllabus, and the Summer exam on 33% of the Michaelmas term syllabus and 67% of the Lent term syllabus.

EC230 Economics in Public Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Mohan Bijapur 32L.1.31
Prof. Daniel Sturm 32L.2.25

Availability: This course is available on the BSc in Environment and Development, BSc in International Relations and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course is not open to students on the BSc Economics and joint BSc programmes between Economics other departments.

Pre-requisites: Students normally will have completed Economics A (EC100) or Economics B (EC102) or their equivalent.

Course content: This course uses economic analysis to explore important questions in contemporary public policy. The first term focuses on microeconomic policy problems while the second term focusses on macroeconomic policies. The use of mathematics is minimal (in particular with no calculus) and the emphasis of instruction is on graphical analysis and economic intuition. Precise topics and readings will be announced and are selected to be of current interest. Last year's topics included externalities from road transportation; the implications of high income taxes in Scandinavian countries; the trade-off behind unemployment insurance systems; the effectiveness of policies to support peripheral regions; the effects of international economic integration; the patterns of long-run income and wealth inequality; the economics of global warming; central bank independence and inflation targetting; financial crises, asset price bubbles and the subprime mortgage crisis; unconventional tools of monetary policy; currency crises; currency unions and the euro; the economics of Brexit; the Greek sovereign debt crisis and growth policy.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

A one hour revision lecture will be held in week 11 of the MT and week 11 of the LT.

Formative coursework: Four pieces of written work to be handed in to the class teacher. Students are expected to make positive contributions to class discussions.

Indicative reading: There is no set course textbook. A list of selected texts and readings will be provided at the start of term.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

The Lent term examination is based on the Michaelmas term syllabus, and the Summer exam on the Lent term syllabus.

EC240 Half Unit PPE Interdisciplinary Research Seminar

This information is for the 2018/19 session.

Teacher responsible: Prof Maitreesh Ghatak

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

This course is only available to second year students on the BSc in Philosophy, Politics and Economics. The course will run from the beginning of Lent Term in year 2 and will continue as EC340 through to the end of Lent Term in year 3.

Course content: The course will include seminars given by academics from inside and outside LSE, as well as speakers from the public, private and third sector. These guest seminars will engage students with research on the frontier in topics such as public economics, political economy and decision making in the public domain. This research and background reading will then be further discussed in the following week's seminar led by the

teacher responsible for the course. Attendance is required in all seminars.

Teaching: 5 hours of seminars and 7 hours and 30 minutes of seminars in the LT.

12 hours and 30 minutes of seminars in the LT. Seminars by guest speakers, which take place in weeks 1, 3, 5, 7, and 9, are 1.5 hours to allow time for Q&A; subsequent discussion seminars, which take place in weeks 2, 4, 6, 8 and 10, are 1 hour each.

The course will run across three terms starting at the beginning of Lent term in year 2 of the PPE and continuing in Michaelmas and Lent term of year 3 of the PPE (as EC340). Each term will consist of a series of biweekly seminars by guest speakers (5 x 90mins) and discussion seminars (5 x 60mins).

Seminars in weeks 1, 3, 5, 7, and 9 will be given by guest speakers on a specific topic, such as inequality, universal basic income, or limits of markets, and will allow for the opportunity to interact and ask questions. Depending on the availability of the speaker, there may be the opportunity for further discussion at an informal social event after the lecture. The subsequent discussion seminars led by the instructor will discuss the previous week's seminar as well as examining background reading related to the topic.

Formative coursework: Seminar participation and all coursework for this course will be assessed summatively (see below).

Indicative reading: Acemoglu, Daron and James Robinson, *Why Nations Fail*, Crown Books, 2012;

Besley, Timothy and Torsten Persson, *Pillars of Prosperity: The Political Economics of Development Clusters*, Princeton University Press, 2011 (will be used as the core text book, and students will be asked to familiarise themselves with the core modelling framework developed in the book); Banerjee, Abhijit and Esther Duflo, *Poor Economics*, Random House, 2011; Bowles, Samuel, *The Moral Economy - Why Good Incentives are No Substitute for Good Citizens*, Yale University Press, 2016; Fukuyama, Francis, *The Origins of Political Order*, Profile Books, 2011; Moore, Barrington, *Social Origins of Dictatorship and Democracy*, Beacon Press, 1966; North, Douglass, John Wallis and Barry Weingast, *Violence and Social Orders*, Cambridge University Press, 2009; Piketty, Thomas, *Capital in the 21st Century*, Harvard University Press, 2014; Rodrik, Dani, *Economics Rules*, OUP 2015; Sandel, Michael, *What Money Cannot Buy - The Moral Limits of Markets*, Allen Lane, 2012; Sandel, Michael, *Justice- What's the Right Thing to Do*, Allen Lane, 2009; Satz, Debra, *Why Some Things Should Not be For Sale - The Moral Limits of Markets*, OUP, 2010; Sen, Amartya, *The Idea of Justice*, Allen Lane, 2009.

An extensive list of required and further readings will be available on Moodle.

Assessment: This information is for students in the first year of the PPE Interdisciplinary Research Seminar (i.e. 2nd year BSc PPE students taking EC240). 3rd year BSc PPE students taking the second year of this course please refer to the EC340 course guide. Students will be assessed throughout the course, through essays and class participation, which will include structured discussions in a panel or group presentation form. In the first year (EC240) students will be assessed by one group essay of 2,500 words and class participation. There will be one essay per term in MT and LT of the third year of the PPE, when this course continues as EC340, and class participation will be continued to be assessed.

The final summative grade will weigh together the essays (80%) and class participation (20%) from all three terms (the essays will be weighted 25%, 25% and 50%, respectively).

The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

EC301 Advanced Economic Analysis

This information is for the 2018/19 session.

Teacher responsible: Dr L. Rachel Ngai 32L.1.15
Dr Shengxing Zhang 32L.1.16

Availability: This course is available on the BSc in Econometrics

and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Macroeconomic Principles (EC210) and Microeconomic Principles I (EC201). Mathematics to at least the level of Mathematical Methods (MA100). Microeconomic Principles II (EC202) is also accepted (in place of EC201).

Course content: This course is divided into two sections introducing recent developments in economic theory. The first section focuses on the relationship between the financial sector and the macroeconomy, considering such questions as why there exist financial crises and asset bubbles. To answer these questions, this section aims to equip students with frameworks to understand the role of the financial market, connect theories with real life observations about imperfections of the market. Topics covered in this section include financial frictions and capital misallocation, banking and financial stability, asset pricing and market liquidity. In the second section of the course we focus on economic growth, considering questions like these: Why was GDP per capita in the UK 15 times higher than China in 1960? Why did the factor of 15 decrease to 5 in 2000? To gain an understanding of the "whys" we have to ask deeper questions: what drives economic growth? Why do some economies grow faster and other slower? Thus this part of the course studies the determinants of economic growth through capital accumulation, reallocation of resources from agriculture into manufacturing and services and, technology innovation.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

There will be one 1.5hr lecture, immediately followed by a 30-minute class, taught by the lecturer (weeks 1-10 in both the MT and LT). Additionally, there will be a 1hr class every other week (weeks 3,5,7,9,11 in both the MT and LT).

Formative coursework: Students will submit, and receive feedback on, two problem sets per term.

Indicative reading: The course is mainly based on lecture notes and journal articles. As an example of the level and content of the reading in economics articles, students may wish to look at the following: Allen, Franklin, and Douglas Gale. *Understanding financial crises*. Oxford University Press, 2009: 1-26. Lucas, R. 2000. "Some Macroeconomics for the 21st Century." *Journal of Economic Perspectives*, 14: 159-168. Ngai, L. R. 2004. "Barriers and the Transition to Modern Growth". *Journal of Monetary Economics* 51:1353-1383. A good textbook reference for economic growth is: Jones, C. and D. Vollrath (2013), *Introduction to Economic Growth*. W. W. Norton & Co.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC302 Political Economy

This information is for the 2018/19 session.

Teacher responsible: Prof Ronny Razin 32L4.01 and Prof Timothy Besley 32L3.37

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to

students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

Course content: The course seeks to introduce students to the major theoretical models of Political Economy and the available empirical evidence. Sample topics to be covered include: Social Choice theory and Preference aggregation; Comparative electoral systems; Political economy of income redistribution; Turnout in elections; Strategic and Sincere voting; Political Parties; Debates and Communication; The political economy of transfers and public good provision; media and government performance; state capacity; the dynamics of political institutions, democracy versus autocracy.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Two hours of revision lectures will be held in week 11 of LT.

Formative coursework: At least four exercises or pieces of written work will be required and assessed by class teachers.

Indicative reading: There is no text book covering all the material in the course. The following books are recommended as supplements to what is covered in the lectures. Analyzing Politics, Rationality, Behavior and Institutions, K.A. Shepsle and M.S. Bonchek. W. W. Norton & Company, New York, London. Liberalism Against Populism, W.H. Riker, Waveland Press, Prospect Heights, Illinois. For additional readings see <http://econ.lse.ac.uk/courses/ec302/>

Assessment: Exam (90%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Other (10%) in the LT.

In the LT students will be assessed by a group project, consisting of an essay of no more than 3000 words, and a 20-minute presentation on the essay topic - 10 minutes to present the main ideas and 10 minutes of Q&A. All students will be expected to contribute to both the essay and the presentation, including providing responses during the Q&A. Students will work in groups of no more than 5. Groups will be assigned by the class teacher.

EC307 Development Economics

This information is for the 2018/19 session.

Teacher responsible: Prof Oriana Bandiera 32L.3.02 and Prof Robin Burgess 32L.3.03B

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Geography with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and MSc in Development Studies. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I or II (or equivalent) and Macroeconomic Principles (or equivalent). A knowledge of introductory econometrics at least to the level provided by a course such as EC220 Introduction to Econometrics, or EC221 Principles of Econometrics, is also necessary. Students who do not have all three pre-requisites and General Course students must consult with Professor Bandiera or Dr Fischer before selecting it.

Course content: The course provides an introduction to selected issues in economic development including theory, evidence and policy. It will analyse economic institutions in developing countries focusing around the themes of "Markets, Institutions and Welfare" and "Public Policy and Welfare". Failures in key markets such as those for land, labour, credit and insurance have far reaching implications both for productive efficiency and welfare. The story of economic development is, in many ways, one of how

informal, imaginative institutions have evolved to fill the gaps left by these market failures. The course will study how institutions have evolved to cope with missing markets, and how they affect the allocation and the distribution of resources. The course will analyse both the channel through which the institutional environment affects efficiency and welfare and how public policy can be designed to increase welfare and growth. The course has a strong applied focus. Under each section we want to derive testable implications from the theory, subject these to econometric testing, comment on the robustness of the results obtained and draw out policy conclusions.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Feedback is provided for four assignments (two in MT and 2 in LT)

Indicative reading: Teaching in the course will be done mainly from journal articles drawn from the forefront of theoretical and applied research in development economics. Background texts for the course are A. Banerjee and E. Dufo, *Poor Economics*, Public Affairs, 2011 and D. Ray, *Development Economics*, Princeton UP, 1998.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC309 Econometric Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Tatiana Komarova 32L4.24 and Prof Francisco Hidalgo 32L4.20

Availability: This course is available on the BSc in Econometrics and Mathematical Economics and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Principles of Econometrics (EC221).

A good knowledge of linear algebra, calculus and statistical theory is essential, and therefore MA100 and ST102 or equivalent is required. Students taking this course who are not in BSc Econometrics and Mathematical Economics or BSc Mathematics and Economics must consult with Dr. Komarova before selecting this course

Course content: Introduction to the asymptotic theory of estimation and inference of economic models; Basics of large sample theory; Estimation of linear regression models (OLS, GMM, GLS); Testing hypotheses and model specifications; Estimation of nonlinear models (MLE, Nonlinear least squares); systems of equations; time series analysis.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis. Students are also expected to make positive contributions to class discussions.

Indicative reading: The main text for the lectures is R Davidson & J G MacKinnon, *Econometric Theory and Methods*, Oxford University Press (2004). Other useful texts include Davidson (2000), *Econometric Theory* Amemiya (1985), *Advanced Econometrics*; and Hayashi (2000), *Econometrics*.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC310 Behavioural Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Matthew Levy 32L3.21

Availability: This course is available on the BSc in Econometrics

and Mathematical Economics, BSc in Economics, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Philosophy and Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Students taking the course as an outside option are required to meet the pre-requisites as detailed below.

Pre-requisites: Ideally, students will have completed EC202 (or equivalent). A highly motivated student who has done well in EC201 – as a guideline 65 or better – is welcome on the course, if he or she finds handling economics mathematically comes naturally. Any such student should see Dr Levy before the course starts. Fluency in calculus is essential, and some knowledge of methods of mathematical proof, including those using sets, is necessary.

Course content: The course will expose students to a number of major topics in Behavioural Economics, and will link theory with empirical applications. The first half of the course will focus on departures from neoclassical preferences, while the latter half will cover departures from rational expectations. The particular topics to be covered include:

- Reference Dependent Preferences and Loss Aversion
- Social Preferences
- Hyperbolic Discounting
- Naiveté and Self-Control
- Projection Bias
- Happiness and Adaptation
- Heuristics and Biases
- Inattention and Shrouding
- Nudging and Framing
- Behavioural Welfare Analysis

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: At least four exercises or pieces of written work will be required and assessed by class teachers.

Indicative reading: Congdon, William, Jeffrey Kling, and Sendhil Mullainathan. *Policy and Choice: Public Finance Through the Lens of Behavioral Economics* (selected chapters). Brookings Institution Press: Washington, D.C. 2011. [Free eBook download at <http://www.brookings.edu/press/Books/2011/policyandchoice.aspx>] Rabin, Matthew. 'Psychology and Economics', *Journal of Economic Literature*, 36(1), 1998: 11-46. DellaVigna, Stefano. 'Psychology and Economics: Evidence from the Field', *Journal of Economic Literature*, 47(2), 2009: 315-372. Fehr, Ernst and Simon Gächter. 'Fairness and Retaliation: The Economics of Reciprocity', *Journal of Economic Perspectives*, 14(3), 2000: 159-181. Laibson, David. 'Golden Eggs and Hyperbolic Discounting', *The Quarterly Journal of Economics*, 112(2), 1997: 443-477. Camerer, Colin, Linda Babcock, George Loewenstein, and Richard Thaler. 'Labor Supply of New York City Cabdrivers: One Day at a Time', *The Quarterly Journal of Economics*, 112, 1997: 407-441. Gabaix, Xavier and David Laibson. 'Shrouded Attributes, Consumer Myopia, and Information Suppression in Competitive Markets', *The Quarterly Journal of Economics*, 121(2): 505-540. Bernartzi, Shlomo and Richard Thaler. 'Save More Tomorrow: Using Behavioral Economics to Increase Employee Saving', *Journal of Political Economy*, 112(1), 2004: S164-S187. Kahneman, Daniel and Amos Tversky. 'Prospect Theory: An Analysis of Decision under Risk', *Econometrica*, 47(2), 1979: 263-292.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC311 History of Economics: How Theories Change

This information is for the 2018/19 session.

Teacher responsible: To Be Announced

Availability: This course is available on the BSc in Econometrics

and Mathematical Economics, BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and BSc in Social Policy and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the ways in which economics has developed from the Mercantilists of the 17th century to the Neoclassical thinking of the later 20th century. The course will explore how the theories, concepts and methods of economics have changed over the last 250 years, focusing on Europe and North America.¹ We will use the original texts in order to understand how economists of the past approached perennial questions (about for example, the sources of growth or the role of money) and resolved them in the context of the economic conditions of their own time and place; and use theories about scientific change to understand the longer history of economics.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT

Formative coursework: Students will be expected to discuss assigned texts and produce several pieces of written work.

Indicative reading: A reading list of original texts and secondary literature will be given at the beginning of the course. For an introduction, students may read R L Heilbroner's, *The Worldly Philosophers*; for general background, consult Roger E Backhouse's, *The Penguin History of Economics* or David Colander & Harry Landreth's, *History of Economic Thought*.

Reading will be made available in a course reading pack.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EC313 Industrial Economics

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Pesendorfer 32L.4.19

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Mathematics and Economics, BSc in Philosophy, Politics and Economics, BSc in Social Policy and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) and Introduction to Econometrics (EC220) or Principles of Econometrics (EC221). **Students who believe they have completed an equivalent course instead of one of these must receive permission from Prof Pesendorfer first.**

Course content: The aim of the course is to provide students with a working knowledge of theoretical and empirical methods for industry studies. Topics may include: monopoly, price discrimination, pre-requisites in game theory, oligopoly theory, product differentiation, demand estimation, production function estimation, conduct in concentrated industries (cartel stability, limit pricing, etc.), empirical techniques for oligopoly models, identification of conduct, markets with asymmetric information, matching models, entry in strategic settings, advertising, auction markets, empirics of auction markets, winner's curse, and insurance. The topics will be discussed with detailed applications for selected industries and considering competition policy questions.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: At least four problem sets will be required and assessed by class teachers.

Indicative reading: A detailed reading list will be provided at the beginning of the course. The key text is Tirole's *The Theory of Industrial Organization*. Specific sections will be assigned (others are too advanced for this course). There will be additional required readings on empirical articles and case studies on competition policy.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC315 International Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Keyu Jin 32L.1.17 and Dr Swati Dhingra 32L.2.31

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Macroeconomic Principles (EC210) or equivalent.

Course content: International Macroeconomics: This section of the course offers an introduction to international macroeconomic theory and develops the main tools for macroeconomic policy analysis. We start by studying the balance of payments and the causes and consequences of global imbalances, followed by an in-depth study of the determination of exchange rates, money, and prices in open economies. We discuss the costs and benefits of different nominal exchange rate regimes and their sustainability, as well as examine the causes and consequences of debt and default, speculative attacks and financial crises.

International Trade: This section of the course offers an introduction to international trade theory and develops the main tools for trade policy analysis. We start by studying the patterns of trade distinguishing between inter-industry and intra-industry trade flows. We then proceed to an in-depth analysis of the causes and the effects of those flows based on the concepts of absolute and comparative advantage, relative factor abundance and relative factor intensity, increasing returns to scale and imperfect competition. Finally we discuss the gains and losses from trade, their distribution among people and firms, and their implications for the debate on trade liberalization vs. protectionism.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT. 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to complete a problem set weekly, and two of these each term will be collected at random for marking and feedback.

Indicative reading: Paul Krugman, Marc Melitz and Maurice Obstfeld; *International Economics: Theory and Policy*, 10th ed.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC317 Labour Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Guy Michaels 32L2.10
Dr Pawel Bukowski 32L 2.01

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Philosophy and Economics and BSc in Social Policy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent and Introduction to Econometrics (EC220) or equivalent.

Course content: This course is an introduction to the economic analysis of behaviour and institutions in the labour market. Primarily microeconomic models are applied to labour market phenomena, such as labour supply and participation, labour demand by firms, and wage determination under different institutional settings. Students learn how to distinguish alternative theories empirically using real world data. The course explores how models and empirical analysis can be applied to evaluate labour market policies, such as the minimum wage, welfare programmes, and immigration restrictions. We will also examine labour market inequality and the role of technological change. The goal of the course is to enable students to think independently about labour market issues, drawing on the models and tools developed during the course.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Problems sets in the course involve hands-on statistical analysis of real world data.

Indicative reading: G Borjas, Labor Economics. Additional reading, drawn from journals, will be suggested during the course.

Assessment: Exam (85%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Class participation (15%) in the MT and LT.

EC319 Games and Economic Behaviour

This information is for the 2018/19 session.

Teacher responsible: Dr Andrew Ellis 32L 3.15 and Dr Francesco Nava 32L 3.20

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Philosophy and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201), or Microeconomic Principles II (EC202), or equivalent. Fluency in calculus is essential, and some knowledge of analysis, probability theory, linear algebra and set theory is advantageous. Highly motivated students with a less technical background could enrol on the course, if they find handling economics mathematically comes naturally. Any such student should see Dr Nava or Dr Ellis before the course starts.

Course content: This course reviews fundamental concepts in Economic Theory and presents some of its most successful applications. The first part of the course consists of an introduction to Auction Theory and Mechanism Design. It presents standard auction formats and discusses strategic behaviour in such environments. Auctions will be analysed both in private and interdependent value environments. Fundamental topics such as the revenue equivalence theorem, the optimal and efficient auction design problem, and the linkage principle will be covered in detail. Departures from the standard model will be

also considered allowing for heterogeneity among players, risk aversion, and budget constraints. The focus of the course is mainly theoretical, but when possible some evidence supporting the formal models will be discussed with references to relevant work in the field. The second part of the course will survey concepts in non-cooperative game theory and will introduce students to game theoretic models of bargaining, voting, and communication. After setting up the primitives of the game theory framework, different solution concepts will be analysed with an emphasis on different applications. In studying models of bargaining, both axiomatic and non-cooperative approaches will be examined, such as Nash's axiomatic approach and the Rubinstein-Stahl model.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

1 revision lecture held in week 11 of MT.

Formative coursework: Students are urged to attempt the assigned problems before attending classes. At least four pieces of written work will be required. Students are expected to make positive contributions to class discussions.

Indicative reading: V. Krishna, *"Auction Theory"*, Academic Press, 2009. M. Osborne, *"An Introduction to Game Theory"*, Oxford University Press, 2003.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC321 Monetary Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Kevin Sheedy 32L1.09
Professor Sir Charles Bean 32L 1.18

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have already completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or an equivalent intermediate course in microeconomics. Students must have already completed Macroeconomic Principles (EC210) or an equivalent intermediate course in macroeconomics; in exceptional cases and only with permission, students without this pre-requisite may be allowed to take EC321 if they also take EC210 concurrently. Students must have mathematics and statistics to at least the level of Quantitative Methods (MA107 and ST107), while Mathematical Methods (MA100) and Elementary Statistical Theory (ST102) are strongly preferred. Introduction to Econometrics (EC220) or Principles of Econometrics (EC221) are desirable though not essential.

Course content: The course provides an introduction to monetary theory, to the effects of monetary variables on the macroeconomic system, the role of the central bank and the conduct of monetary policy. Subjects covered include: The nature and function of money; Asset prices and the term structure of interest rates; Classical monetary theory, neutrality and inflation; Interest-rate feedback rules; The interaction between monetary and fiscal policy; Theories of the demand for money; The market for reserves; Financial markets and financial intermediaries; The transmission mechanism of monetary policy and theories of the Phillips curve; The optimal rate of inflation and optimal stabilisation policy; The positive theory of inflation and the case for central bank independence; Policymaking in an uncertain environment; The role of banks in the transmission mechanism and the case for bank regulation; Financial crises and the role of the central bank as a lender of last resort; The 2007-8 financial crisis and unconventional monetary policies.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

A one-hour revision lecture will be held in week 11 of both MT and LT.

Formative coursework: Students are required to submit two essays or exercises in the MT and the LT. Feedback is provided on these by the class teacher. Students are expected to make positive contributions to class discussions.

Indicative reading: The most useful text books are M Lewis & P Mizen, *Monetary Economics*, and C Walsh, *Monetary Theory and Policy* 3rd edn. Other useful texts include: C Goodhart, *Money, Information and Uncertainty*, 2nd edn; D Laidler, *The Demand for Money*, 3rd edn; R Aliber and C Kindleberger, *Manias, Panics and Crashes: A History of Financial Crises*, 7th edn. The main source of assigned readings is, however, journal articles.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC325 Public Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Daniel Reck 32L.3.16 and Prof Camille Landais 32L.3.06

Availability: This course is compulsory on the BSc in Social Policy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Government and Economics, BSc in Mathematics and Economics, BSc in Mathematics, Statistics, and Business, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and BSc in Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent.

Course content: The first part of Michaelmas term lectures focuses on the issues of equity, efficiency and the role of the state. We begin by looking at questions of equity and alternative theories of the role of the state. We then look at problems of public choice and political economics, and go on to consider the implications of recent research in behavioural economics for welfare analysis. We conclude the first part by discussing issues of market failure, public goods and externalities, including environmental policy. The second part is devoted to the evaluation problem and empirical methods. The third part studies education policies, and the fourth part is devoted to social insurance programs. The final part is devoted to taxation, behavioural responses and the design of tax policy. We begin by examining the effects of taxes and transfers on labour supply and migration, and then go on to consider incomes and behavioural responses at the top of the income distribution. We look at the implications of taxation for economic efficiency and explore the optimal taxation of commodities and income. The final lecture is devoted to the question of development and public finance.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Feedback is provided for one class presentation and one essay (1,500 words) each term (Michaelmas and Lent).

Indicative reading: The recommended textbook for the course is Jonathan Gruber (2011) *Public Finance and Public Policy*, 3rd edition, Worth Publishers. Many of the readings will be journal articles.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC331 Quantitative Thesis

This information is for the 2018/19 session.

Teacher responsible: Dr Matthew Levy 32L.3.21

Availability: This course is compulsory on the BSc in Econometrics and Mathematical Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Principles of Econometrics (EC221) or exceptionally Introduction to Econometrics (EC220).

Course content: This course provides an opportunity to learn how to do independent quantitative economic research at an advanced level. Students are expected to pursue research on a question of their own choice under the supervision of a member of staff. They are expected to formulate an initial proposal near the start of MT in order to be matched with a supervisor, refining their choice into a manageable research question during that term. Following independent work during MT, a seminar in week 9 will review student progress. In the LT seminars, each student will present a preliminary outline of the results for comments by fellow students and teachers, and later a follow-up presentation on further, more final results and a draft thesis. Seminars in LT are formally timetabled as classes.

Teaching: 4 hours of seminars in the MT. 20 hours of seminars in the LT.

In week 11 of the MT and the LT students will work independently (with supervisory advice).

Formative coursework: Students are required to prepare material for their presentations in the seminar, but this is not formally graded. Students are additionally expected to participate in discussion on the presentations of other students' as this is part of the training of a research economist, but this is also not formally assessed.

Indicative reading: As each student chooses an individual research question, there is no common reading list for this course.

Assessment: Other (100%) in May.

A completed thesis (up to 10,000 words, not including abstract, footnotes, bibliography and tables) on an approved subject will be required to be submitted by 01 May 2019. There is no written examination. The thesis is weighted at 100% of the final assessment.

EC333 Problems of Applied Econometrics

This information is for the 2018/19 session.

Teacher responsible: Prof Mark Schankerman 32L.4.30
Dr Rachael Meager 32L.3.13

Availability: This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Mathematics and Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have completed Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202) or equivalent, and either Introduction to Econometrics (EC220) or Principles of Econometrics (EC221), or equivalent.

Students who have completed EC220 rather than EC221 should refer to Dr Meager for advice before starting the course regarding additional preparatory work for Lent term course material.

Course content: The purpose of this course is to provide a solid grounding in recent developments in applied micro-econometrics. A major feature of the course is the use of both analytical and computer-based (data) exercises for the classes, as well as reading applied economic papers from the journals which apply the techniques being taught. This mix will enable students to gain practical experience in analysing a wide variety of econometric problems. The topics covered in the Michaelmas term include

analysis of matching methods, identification of average, local average and marginal treatment effects using instrumental variables, weak instrument problems, regression discontinuity and randomised control experiments. The Lent term will focus on topics in the analysis of cross section and panel data with static and dynamic models, including fixed and random effects, nonlinear models, issues of measurement error, selection and attrition in panel contexts, binary choice models, maximum likelihood estimation, and generalized method of moments.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Michaelmas term: 2-3 problem sets, usually to include econometric questions and applications. Feedback to be provided by the class teacher. Lent term: 3 problem sets, usually to include econometric questions and applications. Feedback to be provided by the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of each term of the course. In parts of the Michaelmas we will use sections from the textbook *"Mostly Harmless Econometrics"* by Angrist and Pischke. There is no single text for the Lent term, but useful books include *"A Guide to Modern Econometrics"* by Marno Verbeek, *"Introduction to Econometrics"* by Stock and Watson (somewhat less advanced than the lectures) and *"Econometric Analyses of Cross Section and Panel Data"* by Wooldridge (somewhat more advanced than the lectures).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC340

PPE Interdisciplinary Research Seminar

This information is for the 2018/19 session.

Teacher responsible: Prof Charlie Bean 32L 1.18
Prof Erik Berglof

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

This course is only available to third year students on the BSc in Philosophy, Politics and Economics. The course started at the beginning of Lent Term in year 2 as EC240 and continues as EC340 through to the end of Lent Term in year 3.

Course content: The course will include seminars given by top researchers from inside and outside LSE, including researchers from the public, private and third sector. These seminars will expose the students to research on the frontier in topics such as public economics, political economy and decision making in the public domain. This research and background reading will then be discussed in biweekly discussion seminars.

Teaching: 12 hours and 30 minutes of seminars in the LT. The course will run across three terms starting at the beginning of Lent term in year 2 of the PPE (see EC240 course guide) and continuing in Michaelmas and Lent term of year 3 of the PPE (EC340).

Each term will consist of a series of biweekly seminars by guest speakers (5 x 90 mins) and discussion seminars (5 x 60 mins). Seminars by guest speakers will be given by outside speakers on a specific topic, such as inequality, and will allow for the opportunity to interact and ask questions. Depending on the availability of the speaker, there may be the opportunity for further discussion at an informal social event after the lecture. These seminars will discuss the previous week's seminar as well as examining background reading related to the topic.

Formative coursework: Seminar participation and all coursework for this course will be assessed summatively (see below).

Indicative reading: Besley, Timothy and Torsten Persson, *Pillars of Prosperity: The Political Economics of Development Clusters*, Princeton University Press, 2011 (will be used as the core text book, and students will be asked to familiarise themselves with the core modelling framework developed in the book); Acemoglu, Daron and James Robinson, *Why Nations Fail*, Crown Books, 2012; Banerjee, Abhijit and Esther Duflo, *Poor Economics*,

Random House, 2011; Fukuyama, Francis, *The Origins of Political Order*, Profile Books, 2011; Moore, Barrington, *Social Origins of Dictatorship and Democracy*, Beacon Press, 1966; North, Douglass, John Wallis and Barry Weingast, *Violence and Social Orders*, Cambridge University Press, 2009; Piketty, Thomas, *Capital in the 21st Century*, Harvard University Press, 2014; Sen, Amartya, *The Idea of Justice*, Allen Lane, 2009. An extensive list of required and further readings will be available on Moodle.

Assessment: This information is for students in the second year of the PPE Interdisciplinary Research Seminar. First year students please refer to the EC240 course guide.

Students will be assessed throughout the course, through essays and class participation. There will be one essay per term in MT and LT. Class participation will be assessed throughout.

The final summative grade will weigh together the essays (80%) and class participation (20%) from all three terms (the essays will be weighted 25%, 25% and 50%, respectively).

The overall grade the students will receive will be one of four: fail, pass, merit and distinction.

EH101

The Internationalisation of Economic Growth, 1870 to the present day

This information is for the 2018/19 session.

Teacher responsible: Dr Eric Schneider SAR.5.18, Prof Christopher Minns SAR.5.12 and Dr Timothy Leunig

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available on the BA in History, BSc in Actuarial Science, BSc in International Relations, BSc in Politics and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the inter-relationships between the development of the international economy and the growth of national economies since the late nineteenth century. The course is designed to introduce students not only to a wide variety of topics and issues, but also to the wide variety of approaches used by historians. The course includes analyses of the original leading nation, Britain, and its replacement, the United States, as well as the catch-up of areas such as continental Europe, and the failure to catch-up of earlier well-placed areas such as Latin America. The effects of major events - such as wars and debt crises - are investigated, and we also consider the implications of changing global economic institutions, such as the Gold Standard and IMF, as well as the effects of sometimes rapid changes in product and process technology.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Lectures are held each week with 21 lectures across MT, LT and ST. A lecture programme and list of topics will be circulated at the first meeting. The lectures are accompanied by weekly classes that develop the material from the lecture in the week before. There is a reading week in Week 6 of MT and LT.

Formative coursework: Students are expected to write an annotated bibliography, two very short essays and two longer essays during the year.

Indicative reading: The following are particularly useful:

R C Allen, *Global Economic History: A Very Short Introduction* (2011). R Floud, J Humphries & P Johnson (Eds), *The Cambridge Economic History of Modern Britain*, Vol 2 (2014). B Eichengreen, *Globalizing Capital: A History of the International Monetary System* (2008). K H O'Rourke and J G Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (1999). E Jones, L Frost & C White, *Coming Full Circle. An Economic History of the Pacific Rim* (1993). M S Blackford, *The*

Rise of Modern Business in the USA, Britain and Japan.
(A complete reading list and class topics will be given out at the first meeting.)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH102 Pre-industrial Economic History

This information is for the 2018/19 session.

Teacher responsible: Prof Oliver Volckart SAR 6.10

Availability: This course is compulsory on the BSc in Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course surveys long-term processes of growth and development in late medieval and early modern Europe (fourteenth to eighteenth centuries). It focuses on the transition from a hierarchical society of estates or corporate orders to a market society based on legal equality. There are two core questions: First, why did this transition occur in an evolutionary way in England and the Netherlands, whereas it was severely delayed the rest of Europe? And second, how is it related to the 'small divergence' between the Dutch Republic and England on the one side and most of the Continent on the other, where the North-West enjoyed significantly higher living standards and per capita incomes than other countries even before industrialisation began?

The course thus raises fundamental questions about societies and economies: Was pre-industrial economic growth transitory and regional? Or was it a recurrent, even normal phenomenon, which however could occasionally be reversed? Was Dutch and British success the result of their social and institutional features? Or was it a combination of geographical factors and good fortune? To what degree did early modern governments help or hinder economic development? Did Europe's political fragmentation hold back the continent's development, or did competition between states have beneficial consequences? In conclusion, can we define an optimal combination of social, political, and economic institutions that sustained growth in the past (and thus, perhaps, in the future)?

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will give presentations on topics that form part of the course content.

Students will receive structured feedback on their formative coursework (both on their essay and the presentation).

Indicative reading: Anderson, J.L. (1991): *Explaining long-term economic change*, Cambridge (Cambridge University Press). Cipolla, C.M. ed. (1971/72). *The Fontana economic history of Europe*, vols. 1 and 2, London (Fontana). de Vries, J. (1976). *The economy of Europe in an age of crisis, 1600-1750*, Cambridge, London, New York etc. (Cambridge University Press). Hatcher, J. and Bailey, M. (2001): *Modelling the Middle Ages. The History and Theory of England's Economic Development*, Oxford (Oxford University Press). Miskimin, H. (1969). *The Economy of Early Renaissance Europe 1300-1460*. Englewood Cliffs/NJ: Prentice-Hall. Miskimin, H. (1977). *The Economy of Later Renaissance Europe 1460-1600*. Cambridge, London, New York, Melbourne: Cambridge University Press. Persson, K. G. (2010). *An Economic History of Europe: Knowledge, Institutions and Growth, 600 to the Present*. Cambridge: Cambridge University Press.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the LT.

EH103 Making Economic History Count

This information is for the 2018/19 session.

Teacher responsible: Dr Jordan Claridge

Availability: This course is available on the BSc in Economic History. This course is not available as an outside option nor to General Course students.

This course is very strongly recommended for all first year Economic History students.

Pre-requisites: None

Course content: This course provides students a brief, non-technical introduction to the quantitative methods that economic historians use to understand the past. It assumes no prior statistical knowledge or experience. It will teach students basic statistics (descriptive statistics and inferential statistics) and how to implement and visualise these statistics with Excel. These skills will be essential for the independent research projects conducted in the second and third year and are highly desired skills on the job market. In addition, it will introduce students to regression analysis and teach them to interpret regression tables. Regression analysis is a very common methodology employed in the economic history and economics literature, so understanding how to interpret regressions will allow students to engage with readings for other economics and economic history courses at a higher level. All first year Economic History students are very strongly encouraged to take this course.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Some of the classes will take the form of computer based workshops.

Formative coursework: The formative coursework will consist of weekly exercises to give students practise with Excel and the methods being taught in the lecture. There will be a formative take home exam over Christmas Break (due week 2 of Lent Term) to test students' knowledge of the material.

Indicative reading: Feinstein, Charles and Mark Thomas, *Making History Count: A Primer in Quantitative Methods for Historians* (Cambridge, 2002). Hudson, Pat and Mina Ishizu, *History by Numbers* (London, 2016).

Assessment: There is no summative assessment for this course.

EH204 Money and Finance: From the Middle Ages to Modernity

This information is for the 2018/19 session.

Teacher responsible: Prof Oliver Volckart SAR 6.10 and Dr Olivier Accominotti SAR 5.14

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an overview of the main developments in monetary and financial history from 800 to the present day, taking the students from the simple beginnings of medieval European monetary history to the complex financial arrangements of the modern world. The first part of the course covers the emergence of money and finance from the medieval ages to the early modern period. The second part examines the main developments in the global financial system since the nineteenth century. Historical developments in major European and non-European countries (England, Spain, Italy, France, Germany, USA) will be discussed and compared. The course is designed to introduce students to the main concepts of money and finance (financial development, financial integration, monetary policy, banking crises etc.) and to provide a long run perspective to the current policy debate.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a Reading Week in Week 6 of MT and LT.

Formative coursework: The students will produce 3 formative essays. The exercise will help them practice academic writing (structuring and presenting arguments, providing explanations, referencing etc.); a skill both necessary for the dissertation they are expected to write in year 3 and helpful for the exam of this course that will take place in summer term. The class presentation has a formative character, too. Students will practice presenting complex arguments to their peers and answering questions from the audience.

Indicative reading:

1. Barrett, W. (1990): World Bullion Flows, 1450-1800, in: Tracy, J.D., ed., The Rise of Merchant Empires: Long-Distance Trade in the Early Modern World 1350-1750, Cambridge (Cambridge University Press), pp. 224-254.
2. Chilos, D. and Volckart, O. (2011). Money, States and Empire: Financial Integration and Institutional Change in Central Europe, 1400-1520. *Journal of Economic History* 71, 762-791.
3. Eichengreen, B. (1992), *Golden Fetters: The Gold Standard and the Great Depression, 1919-1939*, Oxford (Oxford University Press).
4. Eichengreen, B. (2008), *Globalizing Capital: A History of the International Monetary System*, Princeton (Princeton University Press).
5. Friedman, M. and A. Schwartz (1963), *A Monetary History of the United States, 1867-1960*, Princeton (Princeton University Press).

8. Spufford, P. (1991): *Money and its Use in Medieval Europe*, Cambridge et al. (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH207

The Making of an Economic Superpower: China since 1850

This information is for the 2018/19 session.

Teacher responsible: Dr Debin Ma SAR 6.12

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides a survey of long-term economic change in China from the mid-nineteenth century to the present. It focuses on China's long path to becoming a major global economic power at the beginning of the new millennium. The course examines the importance of ideological and institutional change in bringing about economic transformations by surveying major historical turning points such as the opening of China in the mid-nineteenth century, the collapse of the Qing in 1911, the rise of the Communist regime in the 1950s and the adoption of a reform policy since the late 1970s. It examines both the constraints as well as the capacity of a giant traditional economy to respond and regenerate in the face of external challenge from outside since the Opium War of the mid-nineteenth century. The economic analysis of Chinese economic history will examine both macro and micro level questions.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Naughton, B., *The Chinese economy, transitions and growth* (MIT Press); Rawski, T., *Economic growth in prewar China* (Univ. of Berkeley Press); Brand, L. and Rawski, T (eds.) *China's great economic transformation* (Cambridge University Press); Richardson, P. *Economic change in China, c. 1800-1950* (Cambridge University Press); Spence, J.D *The search for modern China* (New York: W.W. Norton).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (15%, 1500 words) in the MT and LT.

Essay (15%, 1500 words) in the ST.

Coursework of two take home essays of 1,500 words (inclusive of bibliography and footnotes) to be completed independently by each individual student. The essays should develop arguments, analysis and evidences on a specific research question (or a set of research questions) chosen by the student in consultation with teachers and should be related to the course materials covered. While it is essential to demonstrate one's grasp of the course material, students are encouraged to develop their own insights and arguments going beyond the course material.

EH208

Economic History Lab: Cities, Economy and Society, 1550-1750

This information is for the 2018/19 session.

Teacher responsible: Dr Patrick Wallis SAR 5.11

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the economic and social history of European cities and towns between 1550 and 1750, with a specific research focus on the history of London. During these two centuries, cities in north west Europe grew rapidly. London in particular experienced explosive growth, transforming from a minor industrial and commercial centre to the hub of a global trading network and the primary port of a global empire. In this course, we explore the ways in which urban development contributed to wider changes in economy and society and how cities and towns were themselves transformed in the process. The taught section of the course covers a set of key issues in the economic and social history of cities and towns in the period, including the connection between cities and economic development; urban hierarchies and networks; the organisation of urban economies; cities and trade; urban-rural relations; urban institutions and economic development; towns and the state; social structure and social mobility; and standards of living. In the research section of the course students will participate in a research lab engaging in primary historical research into the economic and social history of London. The focus of the lab will be defined each year to engage students on work on one or more significant topics in current academic research. Students will work collectively with the course teacher to identify research questions, design research strategies, collect primary evidence, analyse this and write up their results. The findings of the lab's collective research will be disseminated through working papers, publications and a data depository.

Teaching: 5 hours of lectures, 5 hours of classes, 10 hours of workshops and 5 hours of workshops in the MT. 5 hours of lectures, 5 hours of classes, 10 hours of workshops and 5 hours of workshops in the LT. 1 hour of classes in the ST.

This course will be capped at 15 students.

The course begins in MT with 5 weeks devoted to lectures (1 hour) and classes (1 hour) to introduce core issues in the economic and social history of early modern cities. At the end of this cluster of teaching students will prepare a literature review essay on one of the themes, comparing London and one other European town or city. During these weeks, students will be given additional instruction on how to read early modern handwriting, through an additional workshop in week 2 and online self-study.

We start the lab section in the second half of Michaelmas Term. The subject of the first lab period will be broadly defined by the course convenor, with students helping to define the exact focus of the sub-projects they will work on. During the lab, students will have one two-hour seminar each week. In addition, in week 8, we will have at least one additional archival research sessions of five hours held at the relevant site.

The Lent Term mirrors the first, except that we begin with research design, selecting what projects the lab will focus on this term, and have additional time on primary research in weeks 17 and 18. This term students will have greater latitude in shaping the project(s) that the lab will be pursuing.

Formative coursework: All students are expected to write one formative essay in MT and participate in two group presentations (MT and LT) to receive feedback on their projects and analysis before they write up their results.

Indicative reading: Friedrichs, C. *The Early Modern European City 1450-1750* (1985). Cowan, A. *Urban Europe, 1500-1700* (1998). Hohenberg, P.M. and L.H. Lees, *The Making of Urban Europe, 1000-1994* (1995). Nicholas, D.: *Urban Europe, 1100-1700* (2002). Epstein & Prak, *Guilds, Innovation and the European Economy, 1400-1800* (2008)

Assessment: Essay (25%, 2500 words) and project (45%, 3000 words) in the LT.

Project (30%, 3000 words) in the MT.

EH211

Africa and the World Economy, 1500-2000

This information is for the 2018/19 session.

Teacher responsible: Dr Leigh Gardner SAR 5.07

Availability: This course is available on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines aspects of the economic history of sub-Saharan Africa, focusing on the nature and consequences for Africa of its external relationships. Lectures provide a chronological introduction to significant periods in African economic history, from the pre-colonial period through the slave trade, different periods of colonial rule, post-independence state-led development, and Structural Adjustment. Classes focus on case studies from individual countries and regions, which illustrate the diversity of experience across the continent. Primary source material related to the case studies will be included in the readings and facilitate the development of research skills in African economic history.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: Students should be expected to complete two formative assignments per term. This will include one essay per term plus an assignment preparing them for the summative case study project. Students will need to have the selection of their case study approved by the course convenor by the end of MT, and prepare an outline and reading list by Week 3 of LT.

Indicative reading: For a general overview of African history over the period, see R.J. Reid, *A History of Modern Africa* (2009); J. Iliffe, *Africans: The History of a Continent* (1995). Specific texts

on African economic history include R. Austen, *African Economic History* (1987); R. Bates, *Essays on the Political Economy of Rural Africa* (1983); C. Feinstein, *Conquest, Discrimination and Development: an Economic History of South Africa* (2005); J. Forbes Munro, *Africa and the International Economy, 1800-1950* (1976); A. Hopkins, *An Economic History of West Africa* (1973); R.M.A van Zwabenberg and A. King, *An Economic History of Kenya and Uganda, 1800-1970* (1975)

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%, 3000 words) in the ST Week 1.

The research project will involve a case study of an African country, focused on one of the themes/questions addressed in the course.

It will be 3,000 words and due at the beginning of ST.

EH225

Latin America and the International Economy

This information is for the 2018/19 session.

Teacher responsible: Dr Peter Sims, SAR.6.15

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the development trajectory of Latin America and its relation with the international economy from the Early Modern period (c. 1700) to the present. It focuses on the political and economic factors that drove - and that resulted from - the region's engagement with the world attending to the environment, population and factor endowments, institutions and policies. The causes and outcomes of this 'engagement' will be explored in the following broad themes: the determinants of Latin American growth performance, the political economic legacy of European rule and of the formation of modern states and markets; the ambivalent relation with international markets and institutions, the continuous quest for development together with political and macroeconomic instability; the economic aspects of different political experiments and political culture - from authoritarian to democratic regimes and various generations of populism interspersed with military rule and direct democracy - and the short and long run impact on equality, poverty and the prospect for sustained intensive growth.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work, and offer an oral presentation individually or in a team throughout the course.

Indicative reading: V. Bulmer-Thomas (2014) *The Economic History of Latin America since Independence*, Cambridge University Press, *Ibid.* (2012) *The Economic History of the Caribbean since the Napoleonic Wars*, Cambridge University Press; P. Franko, (2007) *The puzzle of Latin American economic development*, Rowman & Littlefield; J. L. Gallup, (2003) *Is geography destiny?: lessons from Latin America*, World Bank; E. Stein, et al. (2008) *Policymaking in Latin America: how politics shapes policies*, IADB; V. Bulmer-Thomas, JH Coatsworth, and R. Cortés Conde (2006) *The Cambridge Economic History of Latin America*, Cambridge University Press 2 vols; Ocampo, JA, and Ross, J (2011). *The Oxford Handbook of Latin American Economics*. Oxford: Oxford University Press; Bértola, L and Ocampo, JA (2012), *The economic development of Latin America since independence*. Oxford: Oxford University Press. Scartascini, CG., Stein E. and Tommasi, M (2010). *How democracy works: political institutions, actors, and arenas in Latin American policymaking*. [Washington, D.C.]: IADB; Blake, C.H (2007) *Politics in Latin America* 2nd edition Boston, Houghton

Mifflin Company. Edwards, S, Esquivel, G & Márquez, G. (2007) The decline of Latin American economies growth, institutions, and crises. Chicago: University of Chicago Press; Bethell, L. (1984/2008) The Cambridge History of Latin America, Cambridge University Press, vols IV and VI

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH237

Theories and Evidence in Economic History

This information is for the 2018/19 session.

Teacher responsible: Dr Patrick Wallis and Dr Eric Schneider SAR.5.18

Availability: This course is compulsory on the BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course examines theories and concepts used in economic history, and provides an introduction to the methods used by economic historians to collect evidence and generate inference on relevant historical questions. The course will begin with an examination the development of history as a subject and discipline. Consideration will be given to the assumptions made in economics and their principal applications in economic history. The course will also introduce students to essential methods for the design and execution of a research project. Students will be introduced to the analysis of historical arguments and the critical interpretation of primary and secondary sources. The course will also provide students with the basic quantitative skills required to pursue an independent research project, and to engage critically with current scholarship in economic history.

The course will include a non-assessed component that serves to prepare students for their final year dissertation, covering the formulation of the thesis question, primary and secondary sources, analysis of evidence, and structuring and writing up the thesis. Students are expected to submit a preliminary title for their final year dissertation before the end of ST and get this approved by their supervisors.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures, 14 hours of seminars, 5 hours of classes and 10 hours of workshops in the LT. 1 hour of classes in the ST. There is reading week in Week 6 of MT and LT.

Formative coursework: Students are expected to write three essays and complete a group qualitative research project.

Indicative reading: J Tosh, The Pursuit of History (2002), L Jordanovea, History in Practice (2000), CH Feinstein and M Thomas, Making History Count (2002), and P Hudson, History by Numbers (2000)

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (30%, 3000 words) in the LT.

Research proposal (10%) in the MT.

EH238

The Origins of Growth

This information is for the 2018/19 session.

Teacher responsible: Dr Neil Cummins SAR.5.13

Availability: This course is available on the BA in History, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the origins of modern economic growth through major themes such as life, love,

death, place and inheritance. The focus is on the world's

first breakthrough in Britain during the Industrial Revolution.

Students will be exposed to frontier debates in economic history.

Widespread use is made of intuitive econometrics, interdisciplinary insights and historical context.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: During the course students are expected to write four essays or equivalent pieces of written work.

Indicative reading: Mokyr, The British Industrial Revolution; Floud and Johnson, Cambridge Economic History of Modern Britain, vol I; Berg, Age of Manufactures; Allen, The British Industrial Revolution in Global Perspective; Crafts, British Economic Growth.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH240

Business and Economic Performance since 1945: Britain in International Context

This information is for the 2018/19 session.

Teacher responsible: Dr Peter Cirenza

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economic History, BSc in Economic History and Geography, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Management and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the successes and failures of British business and industry, with an emphasis on the post-World War II period. It examines many of the hypotheses on why the UK economy grew more slowly than other OECD nations during this period. Explanations of relative economic decline are examined in the context of comparisons with other European nations and with the US and Japan. The course is organised to combine economy- wide factors, such as education, management organisation, labour relations, and membership in the EU, with case studies of industries as diverse as cotton, cars, banking and steel. By interacting themes and case studies, students get a sense of how national policies interact with business opportunities, and how governments can both aid and harm business. They also get a sense of why much – but not all – of British business history in the post-war period has been characterised as one of relative decline. The main attention is on the post-war period, including current changes in performance, but the historical roots of Britain's recent performance are also considered.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work.

Indicative reading: The main work used in the course is G. Owen, From Empire to Europe: The Decline and Revival of British Industry since the Second World War (2000). The following are also useful: S. Broadberry, The productivity race: British manufacturing in international perspective 1850-1990 (1997), R Floud & P Johnson (Eds), The Cambridge economic history of modern Britain: structural change and growth, 1939-2000 (2004), B Elbaum & W Lazonick (Eds), The Decline of the British Economy (1986), M. Blackford, The rise of modern business: Great Britain, the United States, Germany, Japan, and China (2008).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH304**The Economic History of North America: from Colonial Times to the Cold War**

This information is for the 2018/19 session.

Teacher responsible: Prof Christopher Minns SAR 5.12

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course surveys major developments in the economic history of North America between 1600 and 2000. Colonial development; the American Revolution; Early North American Industry; Slavery; Westward expansion; the American Civil War; Regional Economic Development; Railroads and growth; International and internal trade; Finance and banking in the 19th century; Migration and labour markets in the 19th Century World wars and North American Economies; the Great Depression; Post-war economic development and policy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

A weekly one-hour student led lecture and one-hour student led seminar.

Formative coursework: A minimum of two essays and a mock examination.

Indicative reading: Atack and Passell, *A New Economic View of American History* (1994); Engerman and Gallman, *The Cambridge Economic History of the United States*, vols 1,2,3 (2000); Hughes, *American Economic History* (1990); Haines and Steckel (eds.), *A Population History of North America*. (2000).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH306**Monetary and Financial History since 1750**

This information is for the 2018/19 session.

Teacher responsible: Dr Olivier Accominotti SAR 5.14

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: This course covers international Monetary and Financial History since the mid-18th century. The course is designed to introduce students to the key issues around globalised finance and money. It will look into the rise and eventual demise of the Gold Standard, the emergence and occurrence of financial crises, the globalisation and geography of financial markets, and changes in policy responses and regulation over time.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

The two-hour seminar in ST will be a revision seminar.

There will be a Reading Week in Week 6 of MT and LT.

Formative coursework: During the course students are expected to write three essays or equivalent pieces of written work

Indicative reading: Kindleberger, *Manias, Panics, and Crashes*, Ferguson, *Ascent of Money*, Foreman-Peck, *History of the World Economy*, Eichengreen, *Golden Fetters*, Eichengreen, *Globalising Capital*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH307**The Economic History of South Asia, 1600-2000**

This information is for the 2018/19 session.

Teacher responsible: Prof Tirthankar Roy SAR 6.16

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.

Course content: South Asia is one of the fastest growing economies of the world. The region is also home to nearly one-third of the world's poorest people. How did this paradoxical mix between the creation of wealth and persistence of poverty come into being? Does economic history suggest an answer? The course introduces the stylized facts and major debates in the economic history of modern South Asia. It considers the legacies of empires and developmental states, globalizations of the past and the present times, and the role of indigenous institutions and resource endowments. The course begins with a discussion of empires and markets before European colonial rule began, with special reference to maritime trade and craft production, in which the European East India companies were interested in. For the colonial period, the major theme is the transformation engendered by colonialism and international economic integration. In the sixty years since the end of colonial rule, developmental states tried to overcome the obstacles to growth as the economists interpreted them. The course considers how successful they were in meeting the aim, and why they were limitedly successful.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work.

Indicative reading:

1. Dietmar Rothermund, *An Economic History of India* (1993)
2. B.R. Tomlinson, *The Economy of Modern India* (2013)
3. Tirthankar Roy, *The Economic History of India 1757-2010* (2011)
4. G. Balachandran, ed., *India and the World Economy 1850-1950* (2003)
5. Latika Chaudhary and others, eds., *A New Economic History of Colonial India* (2016)
6. P.J. Marshall, ed., *The Eighteenth Century in Indian History* (2004)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH308**Historical Economic Geography: Cities, Markets and Regions in the 19th and 20th Centuries**

This information is for the 2018/19 session.

Teacher responsible: Prof Juan Roses Vendoiro SAR 5.15

Availability: This course is compulsory on the BSc in Economic History and Geography. This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course explores how and why the location of economic activities changes across time and space from industrialization up to the present. One goal for this course is to demonstrate the importance of history in the formation of the present-day economic landscape. An equally important goal is to demonstrate the applicability of the study of economic geography to the understanding of historical patterns of development and underdevelopment. The course is not organized chronologically but thematically. Particular attention focuses on four major

issues: the development of cities, the creation of national markets, the historical basis for manufacturing agglomeration, and the historical evolution and sources of regional inequality.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: All students are expected to write one formative essay, or similar piece of work, and make one formative presentation that will not be used in the final assessment.

Indicative reading: Combes, Pierre-Philippe, Thierry Mayer and Jacques-François Thisse, *Economic Geography: The Integration of Regions and Nations*. Princeton University Press, 2008. Davis, David R. and Donald E. Weinstein, 2002. "Bones, Bombs, and Break Points: The Geography of Economic Activity," *American Economic Review*, vol. 92 (5), pp. 1269-1289. Garretsen, Harry and Martin, Ron (2010), *Rethinking (New) Economic Geography Models: Taking Geography and History More Seriously*, *Spatial Economic Analysis*, 5, 2, pp. 127-160. Kim, Sukkoo and Margo, Robert A., 2004. "Historical perspectives on U.S. economic geography," *Handbook of Regional and Urban Economics*, in: J. V. Henderson & J. F. Thisse (ed.), *Handbook of Regional and Urban Economics*, edition 1, volume 4, chapter 66, pages 2981-3019 Elsevier. Schulze, M-S., and N. Wolf, 2012. "Economic Nationalism and Economic Integration: the Austro-Hungarian Empire in the late 19th Century", *Economic History Review*, vol. 62 (2), pp. 652-673.

Assessment: Essay (35%, 2500 words) in the MT.

Essay (35%, 2500 words) in the LT.

Presentation (30%) in the MT and LT.

EH309 Not available in 2018/19 **Slavery from Ancient Greece to the Gulag**

This information is for the 2018/19 session.

Teacher responsible: Professor Oliver Volckart

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: None

Course content: The course surveys slave labour-employing economies from a long-term and global perspective on the basis of the research literature and of primary source material. It covers the period from the fifth century BCE to the second half of the twentieth century and not only Ancient and Christian Europe but also the Islamic world and the Americas. Slavery in Classical Greece and in the Roman Empire will be discussed just as well as the employment of military slaves in the medieval and early modern Muslim empires. Further core topics are the early modern Atlantic slave trade, black slavery in the American South, the formal abolition of slavery and the use of slave or quasi slave labour in the totalitarian dictatorships of the twentieth century.

The course raises fundamental questions first about the nature of work in different historical periods, societies and economic systems, and second about the criteria that allow distinguishing economic systems. What was a slave? How did the work of a slave differ from that of a free person? Was slavery always inefficient? To what extent was it compatible with 'feudalism', a free market economy, or capitalism, and did it hold back technological progress and economic growth? One of the core hypotheses is that a clear-cut distinction between slavery and freedom is historically and geographically an exception: In most periods and cultures, there was a fluid transition, with labour being not either enslaved or free, but rather more or less free. The course will address the question of what this implies for the analysis of historical labour markets and their outcomes as reflected, for example in factor prices.

Teaching: 2 hours of lectures and 18 hours of seminars in the MT. 20 hours of seminars in the LT.

Following an introductory lecture in week 1 of the Michaelmas

Term, the course will be taught over 19 two-hour seminars

Formative coursework: Students will be expected to produce 1 presentation in the MT.

Indicative reading: Engerman, S. L. (1973). Some Considerations Relating to Property Rights in Man. *Journal of Economic History* 33, 43-65. Fynn-Paul, J. (2009). Empire, Monotheism and Slavery in the Greater Mediterranean Region from Antiquity to the Early Modern Era. *Past & Present* 205, 3-40. Klein, H. S. (2010). The Atlantic Slave Trade. Cambridge: Cambridge University Press. Patterson, O. (1982). *Slavery and Social Death: A Comparative Study*. Cambridge, MA, London: Harvard University Press. Pryor, F. L. (1977). A Comparative Study of Slave Societies. *Journal of Comparative Economics* 1, 25-49.

Assessment: Essay (75%, 5000 words) and presentation (25%) in the LT.

At the end of week 6 of the Lent Term, students submit a summative 5000-word essay that concerns one of the seminar questions; their mark on this counts 75 per cent toward their final mark. Their Lent Term presentation will be assessed, too; it counts for altogether 25 per cent.

EH311 **Atlantic World Slavery**

This information is for the 2018/19 session.

Teacher responsible: Dr Anne Ruderman

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course will explore the way the transatlantic slave trade and subsequent systems of slavery in the Americas have shaped our modern world. In doing so, it will offer a broad look at questions of slavery, resistance and abolition from the late seventeenth through the nineteenth century. Lasting over 300 years, the transatlantic slave trade resulted in the forced migration of 12.5 million people out of Africa, 10.6 million of whom survived the Middle Passage to become slaves in the Americas. That demographic movement and the disparities that grew out of it, has had deep consequences for development in Africa, Europe, the United States and Latin America. Thoroughly international in focus, this course will look at slavery in Africa, Europe and the Americas, considering the formation of transatlantic slavery, similarities and differences in Caribbean and North American slaveries and potential explanations for slavery's demise. We will consider the workings of the slave trade, the plantation complex, crops such as sugar, slavery outside of plantation economies, the intersection of slavery and science, gender, rebellion, revolt, abolition and war. The subject of Atlantic world slavery has also prompted a wide range of creative approaches from historians, and we will examine the different types of sources that historians of slavery have used to try to understand the past. In doing so we will juxtapose economic history with other historical methods, and consider some of the economic, social, cultural and legal aspects of slavery, from the commercial organization of the transatlantic slave trade to the multiple forms of slave resistance. Additionally, this course will introduce students to the rapidly expanding world of digital history, by incorporating digital projects related to slavery into weekly readings.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. This course will be taught over 20 one-hour lectures with a weekly discussion section.

Formative coursework: The podcast project will include several formative assessments, due throughout the Lent term. These formative assessments are: An outline of an existing historical podcast, a topic for the students' podcast, an outline for the students' podcast and two audio reading responses for discussion

section

Indicative reading: Behrendt, Stephen D. (2001). "Markets, Transaction Cycles, and Profits: Merchant Decision Making in the British Slave Trade." *The William and Mary Quarterly* 58, no. 1: 171-204. Berry, Daina Ramey. (2017). *The Price for their Pound of Flesh: The Value of the Enslaved, from Womb to Grave, in the Building of a Nation*, Boston: Beacon Press. Galenson, David W. (1984). "The Rise and Fall of Indentured Servitude in the Americas: An Economic Analysis." *The Journal of Economic History* 44, no. 1: 1-26. Hunter, Tera. (2017). *Bound in Wedlock: Slave and Free Black Marriage in the Nineteenth Century*. Cambridge, Mass.: Harvard University Press. Johnson, Walter. (1999) *Soul by Soul: Life inside the Antebellum Slave Market*. Cambridge, Mass.: Harvard University Press. Richardson David. (2001). "Shipboard Revolts, African Authority and the Atlantic Slave trade," *William and Mary Quarterly*, 58: 69-92. Schmidt-Nowara, Christopher. (2011). *Slavery, Freedom, and Abolition in Latin America and the Atlantic World*. Albuquerque: University of New Mexico Press. Wright Gavin. (2003) "Slavery and American Agricultural History." *Agricultural History* 77, no. 4: 527-52.

Assessment: Essay (50%, 4000 words) and other (50%) in the LT. Students will be responsible for creating one podcast (5-8 minutes) due at the end of the Lent Term (50 percent) and one summative essay (50 percent) due in the middle of Lent Term.

A podcast is an opportunity to use a different medium to communicate in ways that a traditional essay would not allow. The goal of your podcast is to take advantage of the audio form to communicate a message about your material. With that goal in mind, your podcast should bring together different elements of sound - music, interviews, historical documents and sound effects - to create an insightful and engaging auditory experience for your listener. In other words, your podcast shouldn't simply be a term paper read aloud.

EH325

Issues in Modern Japanese Economic Development: Late Industrialisation, Imperialism and High Speed Growth

This information is for the 2018/19 session.

Teacher responsible: Prof Janet Hunter SAR 5.17

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Course content: The course combines an examination of selected major themes and historiographical issues in modern Japanese development with a focus on particular empirical aspects of Japanese economic history since the mid-19th century. Topics will include pre-industrial growth and its legacy; economic growth before the Second World War; formal and informal empire; the Pacific War and the Occupation of Japan; trade and interaction with the international economy; consumption and living standards; gender in the modern Japanese economy; institutions and organisations.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

20 weekly two-hour seminars in MT and LT. One 2-hour seminar in ST.

(There will be a Reading Week in the 6th week of MT and LT.) Students are expected to do prior reading and preparation, to participate in group discussion and to make presentations.

Formative coursework: students will be expected to write two essays of no more than 2,500 words.

Indicative reading: A detailed reading/seminar list is handed out at the beginning of the course, but the texts listed below provide a background: A Gordon, *A Modern History of Japan* (2003); P Francks, *Japanese Economic Development* (3rd edn, 2015);

P Francks, *Rural Economic Development in Japan* (2006); J E Hunter, 'The Japanese Experience of Economic Development' in P O'Brien (Ed, *Industrialisation: Critical Perspectives on the World Economy* (1998); M Tanimoto (eds), *The Role of Tradition in Japan's Industrialisation* (2006), Part 1.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3500 words) in the LT.

EH326 Not available in 2018/19

Innovation and its Finance in the 19th and 20th Centuries

This information is for the 2018/19 session.

Teacher responsible: Dr Gerben Bakker SAR 5.09

Availability: This course is available on the BSc in Economic History, BSc in Economic History with Economics, BSc in Economics and Economic History and BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students taking the course as an outside option must have completed at least one other economic history course.

Course content: The course explores the relationship between innovation and the financing of it in the nineteenth and twentieth centuries, the impact on economic growth and how policy makers managed (or failed) to encourage innovation investment and technology adoption.

Technological change and organizational innovation are critical determinants of the pace of economic growth. This course looks at the specific ways in which innovation transformed industries around the world in the modern era. The course has a global reach though it will concentrate on countries in Northern Europe and the United States. Particular attention focuses on links between innovation and finance: finance is a fundamental input for almost every type of productive activity. The course will explore issues such as; the relationship between market size and structure and technological progress; how firms developed the capabilities to profit from new technologies; and how policy makers attempted to nurture institutions to stimulate investment and technology adoption. The course will therefore cover themes such as the process of invention, innovation typologies, the history of R&D management, anti-trust policy, corporate governance, organisational change, incentives, intellectual property rights and the regulation of technology and its finance more broadly.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in Week 6 of MT and LT.

Formative coursework: All students are expected to write three essays or equivalent pieces of written work

Indicative reading: Naomi Lamoreaux and Kenneth Sokoloff eds., *Financing Innovation in the United States, 1870 to the Present* (MIT Press, 2007); Joel Mokyr, *The Gifts of Athena: Historical Origins of the Knowledge Economy*, (Princeton University Press, 2002); Raghuram Rajan and Luigi Zingales, "Financial Dependence and Growth," *American Economic Review* 88 (1998): 559-586; Nathan Rosenberg, *Inside the Black Box: Technology and Economics*, (Cambridge University Press, 1982); Joseph A. Schumpeter, "Can Capitalism Survive?" in his *Capitalism, Socialism and Democracy* (Routledge reprint, 1942, 2000); Benn Steil, David G. Victor and Richard R. Nelson eds., *Technological Innovation and Economic Performance* (Princeton University Press, 2002); John Sutton, *Technology and Market Structure: Theory and History* (MIT Press, 1998); James M. Utterback, *Mastering the Dynamics of Innovation* (Harvard Business School Press, 1996).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

EH327**China's Traditional Economy and its Growth in the Very Long-Term****This information is for the 2018/19 session.****Teacher responsible:** Prof Kent Deng SAR 6.05**Availability:** This course is available on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is not available as an outside option nor to General Course students.**Course content:** The course explores the main aspects China's economic growth in the very long term from c.1000 AD to 1800. It begins with a survey of general models/themes in Chinese economic history, followed by particular issues: the formation, expansion and the function of the Chinese empire; Confucian values and state economic policies; property rights; peasantry and peasant economy; proto-industrialisation; commerce and trade; science and technology; demographic fluctuations; living standards; external shocks and foreign influence; internal rebellions and revolutions; reforms and modernisation.**Teaching:** 10 hours of lectures and 10 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Students are expected to do prior reading and to make presentations on a regular basis.

There will be a reading week in Week 6 of MT and LT

Indicative reading: A full reading list and course outline are distributed at the beginning of the course. The following readings provide indication of the scope and nature of materials used in the course: K G Deng, 'A Critical Survey of Recent Research in of Chinese Economic History', *Economic History Review* (2000); J K Fairbank, *Chinese Thought and Institutions* (1957); M Elvin, *The Pattern of the Chinese Past* (1973); C A Ronan, *The Shorter Science and Civilisation in China* (1978-86); J Y Lin, 'The Needham Puzzle: Why the Industrial Revolution did not Originate in China', *Economic Development and Cultural Change* (1995); G W Skinner, *The City in Late Imperial China* (1977); J Lee & F Wang, *One Quarter of Humanity* (1999); K Pomeranz, *The Great Divergence, Europe, China and The Making of the Modern World Economy* (2000); A Watson, *Economic Reform and Social Change in China* (1992); R B Wong, *China Transformed* (1997). 'Imperial China under the Song and Late Qing', in Andrew Monson and Walter Scheidel (eds), *Fiscal Regimes and Political Economy of Premodern States*, Cambridge University Press: ch. 10 (pp. 308–42). Deng, Kent and Zheng, Lucy (2015) Economic restructuring and demographic growth: demystifying growth and development in Northern Song China, 960–1127 *Economic History Review*, 68 (4). 1107-1131.**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.**EH390****Dissertation in Economic or Social History****This information is for the 2018/19 session.****Teacher responsible:** Dr Peter Sims SAR 6.15**Availability:** This course is compulsory on the BSc in Economic History, BSc in Economic History with Economics and BSc in Economics and Economic History. This course is available on the BSc in Economics with Economic History. This course is not available as an outside option nor to General Course students.**Course content:** The subject of the dissertation should relate broadly to one of the economic history courses that have been chosen. This course consists of two intensive workshops where students present their research questions and preliminary findings. The first workshop will be in the 9th week of Michaelmas term and the second in the 7th week of Lent term. These workshops serve to recap the dissertation related materials covered in EH237 and to provide feedback on dissertation research. Both of these workshops are compulsory.**Assessment:** Dissertation (100%, 10000 words) in the LT.

The dissertation must not exceed 10,000 words in length. After being marked, the dissertation will not be returned to the candidate. The title of the dissertation should be approved by the candidate's supervisor early in MT and a title form signed by the supervisor must be submitted to the course organiser by mid-October.

FM100 Half Unit**Introduction to Finance****This information is for the 2018/19 session.****Teacher responsible:** Prof Daniel Ferreira**Availability:** This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.**Course content:** This course will provide a non-technical introduction to Finance and an overview of the Finance discipline.

The aim of the course is to explain the importance of finance to individuals, firms, and society in general. Topics will include discounting and present value, risk and return, financial markets and trading, mutual and hedge funds, banks and other financial intermediaries, financial securities, capital structure, venture capital and private equity, initial public offerings, and valuation of firms and projects.

Teaching: 30 hours of seminars in the LT.

Additional workshops may be scheduled as needed.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments.**Indicative reading:** Detailed course programmes and reading lists are distributed at the start of the course.**Assessment:** Exam (60%, duration: 2 hours) in the summer exam period.

Coursework (40%) in the LT.

FM101 Half Unit**Finance****This information is for the 2018/19 session.****Teacher responsible:** Dr Elisabetta Bertero OLD.M.2.13**Availability:** This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with AC100 Elements of Accounting and Finance.

Pre-requisites: None**Course content:** This course includes an introduction to the financial decisions of firms, in particular capital budgeting; the financial decisions of households; the role of the financial system in the economy and the flow of funds; causes and consequences of the recent financial crises.**Teaching:** 10 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.**Formative coursework:** Classwork exercises will be set each week.**Indicative reading:** The main readings for this course are selected chapters from two textbooks combined in a customized textbook, *Finance* (2012), prepared specifically for this course by Dr E. Bertero. The book is available from the Economist's Bookshop on campus. The textbooks it draws from are: Hillier et al (2011) *Fundamentals of Corporate Finance*, European Edition, McGraw-Hill. Cecchetti et al (2011) *Money, banking and financial markets*, McGraw-Hill. Note that the original Hillier book contains a few typos which you can correct by downloading the sheet from Moodle. A few additional readings will be discussed during the

lectures and posted on Moodle for downloading. See references in relevant lectures' handouts.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

FM200 Half Unit Financial Systems and Crises

This information is for the 2018/19 session.

Teacher responsible: Prof Dimitrios Vayanos and Dr Jean-Pierre Zigrand

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Course content: This course will cover the historical development of financial markets and institutions. The topics include the historical evolution of banks, central banks, and bank regulation, the evolution of financial exchanges and their regulation, financial crises, and the role of finance in long-run economic development. Economic theory and models will be used to explain key concepts of the course.

Teaching: 33 hours of seminars in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to produce a number of problem sets in the MT.

Indicative reading: 1. Unsettled Account, by Richard Grossman
2. Manias, Panics and Crashes, by Charles Kindleberger
3. A Financial History of Western Europe, by Charles Kindleberger

Assessment: In class assessment (100%) in the MT.
Two in-class assessments (30% and 70%) in the MT; one in Week 6 and one at the end of term.

FM201 Half Unit Macro-Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Paula Lopes

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Economics A (EC100) or Economics B (EC102).

Course content: This course will study the relationship between financial markets and the macro-economy. Topics include the behaviour of returns of different asset classes over the business cycle, the relationship between returns and inflation, and the implications for expected returns and portfolio choice.

Teaching: 33 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly problem sets

Indicative reading: Detailed course programme and reading lists are distributed at the start of the course.
Illustrative texts include: Blanchard, Macroeconomics, 7th ed. and Mankiw, Macroeconomics, 9th ed.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Coursework (40%) in the LT.

The coursework will consist of homework and in class assignments throughout the LT.

FM212 Principles of Finance

This information is for the 2018/19 session.

Teacher responsible: Dr James Clark and Dr Debapriya Paul

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, BSc in Social Policy and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course cannot be combined with FM213.

Permission forms from General Course admin office should be submitted to the Department of Finance Student Information Centre OLD.2.03 with a copy of the transcript attached.

Pre-requisites: Students must have completed: one level 1 Economics course (either EC100 Economics A or EC102 Economics B), one level 1 Mathematics course and one level 1 Statistics course

Course content: The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, derivative pricing, sources of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

This course covers the same topics as FM213. Thus, both FM213 and FM212 are equivalent content-wise. However, compared to FM213, this course puts less emphasis on the underlying statistical theory and relies less on the use of mathematical methods. Nonetheless, the course is quantitative in nature, and familiarity with mathematical and statistical methods taught in first-year courses will be assumed.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Principles of Corporate Finance by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

FM213 Principles of Finance

This information is for the 2018/19 session.

Teacher responsible: Prof Richard Payne and Dr Hongda Zhong

Availability: This course is compulsory on the BSc in Finance, BSc in Financial Mathematics and Statistics and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics and BSc in Mathematics, Statistics, and Business. This course is not available as an outside option nor to General Course students.

Students on the BSc in Management can only take this course if they have met the following programme-specific prerequisites: a 1st in MA107 and/or ST107 and email permission from their Senior Undergraduate Tutor.

This course cannot be combined with FM212. Students on the BSc in Accounting and Finance can only take this course if they have met the general course prerequisites as below.

Pre-requisites: Students must have completed: one level 1 Economics course (either EC100 Economics A or EC102 Economics B), MA100 and ST102.

Course content: The course examines the theory of financial decision-making by firms and examines the behaviour of the capital markets in which these decisions are taken. The topics covered are the theory of capital budgeting under certainty in perfect and imperfect capital markets, portfolio theory, equity and bond markets, the capital asset pricing model, efficient markets, derivative pricing, sources of funds, basic theory of capital structure and the cost of capital, company dividend decisions and financial markets and institutions.

This course covers the same topics as FM212. Thus, both FM213 and FM212 are equivalent content-wise. However, compared to FM212, this course puts more emphasis on the underlying statistical theory and relies more on the use of mathematical methods.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. 20 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Principles of Corporate Finance by Richard Brealey, Stewart Myers, and Franklin Allen, McGraw-Hill Inc.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

FM300

Corporate Finance, Investments and Financial Markets

This information is for the 2018/19 session.

Teacher responsible: Dr Georgy Chabakauri CON.2.08 and Dr Pedro Chauffaille Saffi

Availability: This course is compulsory on the BSc in Accounting and Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics, Statistics, and Business, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212) or Principles of Finance (FM213).

Course content: This course is intended for third-year undergraduates and will be a broad-based follow-up to FM212 Principles of Finance. The goal is to broaden, and selectively deepen, students' understanding of finance, building on their existing knowledge of financial economics. The course will cover a broad range of topics, with both a theoretical and an empirical emphasis. These include topics in corporate finance, investments and performance evaluation and international finance. The course consists of two interchangeable ten-week components, one on investments and international finance, and the other on corporate finance.

The first component provides students with a way of thinking about investment decisions by examining the empirical behaviour of security prices. We first study the empirical evidence of the CAPM and other asset pricing models, and then analyse different tests of market efficiency focusing on event studies and investment anomalies. We also study the main empirical findings in behavioural finance. We then learn how to measure the performance of a portfolio manager and to attribute it to different types of skill. Finally, this section of the course introduces the foundations of international finance and explores issues related to international portfolio management.

The second component of the course examines theory and

evidence concerning major corporate financial policy decisions.

We focus particularly on the firm's decision to finance with debt vs. equity. We will start with the famous Modigliani and Miller proposition and will then analyse the impact of taxes, financial distress, agency frictions, and asymmetric information on financing decisions. We will then critically analyse different valuation methods and investment criteria (NPV, IRR, APV, WACC method, valuation by comparables) and conclude the course with a critical analysis of the market for corporate control.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce written work for classes and to make positive contributions to class discussions.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Bodie, Kane & Marcus, Investments (Irwin) and Grinblatt & Titman, Financial Markets and Corporate Strategy (Irwin, McGraw-Hill).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

FM301 Half Unit

Market Anomalies and Asset Management

This information is for the 2018/19 session.

Teacher responsible: Dr Cameron Peng

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM212 or FM213 Principles of Finance.

Course content: This course will examine the extent to which financial markets are informationally efficient. Topics include notions of market efficiency, return predictability in bond, stock, and derivatives markets, limits to arbitrage and other theories of return predictability.

Teaching: 33 hours of seminars in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: Bodie, Kane & Marcus, Investments (Irwin) and Grinblatt & Titman, Financial Markets and Corporate Strategy (Irwin, McGraw-Hill).

Assessment: Coursework (30%) and in class assessment (70%) in the MT.

FM302 Half Unit

Theories of Corporate Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Martin Oehmke

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed FM212 or FM213 Principles of Finance.

Course content: This course introduces concepts and theories to critically assess major corporate financial policy decisions. The course focuses in particular on a firm's capital structure and the impact of taxes, bankruptcy costs, agency conflicts, and asymmetric information on a firm's financing decisions. We will also discuss other major topics in corporate finance, such as the market for corporate control. In developing tools to analyze these

issues, we will introduce the key concepts of corporate finance theory, including debt overhang, risk shifting, and the free-rider problem.

Teaching: 33 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading: Detailed course programmes and reading lists are distributed at the start of the course. Illustrative texts include: "Financial Markets and Corporate Strategy" by Hillier, Grinblatt and Titman. "Corporate Finance" by Ivo Welch, and "The Theory of Corporate Finance" by Tirole.

Assessment: Exam (50%, duration: 1 hour and 30 minutes) in the summer exam period.

Coursework (40%) and class participation (10%) in the LT.

FM304 Half Unit Applied Corporate Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Ashwini Agrawal

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed either FM212 or FM213

Course content: This course will focus on the applications of key concepts in corporate finance and implicitly extend the topics covered in "Principles of Corporate Finance". There will be three main topics covered in the course. The first topic is corporate investment. We will consider various methods used by firms to evaluate investment opportunities. The second topic is financing decisions. We will cover how firms finance their operations using debt and equity. The third topic is valuation. We will learn methods used to value companies and specific transactions such as mergers, acquisitions, and leveraged buyouts. Each topic will be addressed using both theoretical material provided by the professor and weekly case studies with questions and solutions.

Teaching: 33 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly homework assignments.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Exam (80%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (20%) in the LT.

FM305 Half Unit Advanced Financial Economics

This information is for the 2018/19 session.

Teacher responsible: Prof Ian Martin and Prof Dimitrios Vayanos

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed either FM212 or FM213.

Course content: This course will present the modern theories of financial markets and of asset valuation. We will start with the foundations: the principle of no arbitrage, state prices and the

stochastic discount factor, utility functions and portfolio choice, equilibrium pricing and risk-neutral pricing. We will then apply the basic tools in a variety of contexts, such as forecasting the market, and exploring the impact of market frictions such as asymmetric information, leverage constraints, and agency issues.

Teaching: 33 hours of seminars in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: Teaching notes will be provided

Assessment: In class assessment (60%), in class assessment (30%) and class participation (10%) in the MT.

Midterm exam (30%, two questions from Prof Martin), final in-class exam (60%, one question from Prof Martin, three questions from Prof Vayanos)

FM320 Quantitative Finance

This information is for the 2018/19 session.

Teacher responsible: Mr Domingos Romualdo and Dr Rohit Rahi

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics, Statistics, and Business, BSc in Statistics with Finance and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212), Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Introduction to Econometrics, Principles of Econometrics or other statistics courses where at least linear regression models are covered are recommended but not required. Students who have not taken Principles of Finance, but have an excellent quantitative background, may be allowed to take this course at the discretion of the course leader.

Course content: This course is intended for third-year undergraduates and builds upon FM212 Principles of Finance. The main topics covered are financial risk analysis and financial risk management (first part of the course) and derivatives pricing (second part). As such, this course is complementary to FM300 Corporate Finance, Investments and Financial Markets, with minimal overlap.

The first part of the course provides students with a thorough understanding of market risk from both a practical and technical point of view. A representative list of topics covered includes:

- empirical properties of market prices (fat tails, volatility clusters) and forecasting of prices
- concepts of financial risk (volatility, Value-at-Risk)
- univariate and multivariate volatility models (ARCH, GARCH)
- implementation and evaluation of risk forecasts
- endogenous risk
- credit markets and liquidity

Students apply the models to real financial data using Matlab, a programming environment widely used in industry and academia. No prior knowledge of programming is assumed: students will learn-by-doing in class. Students will at times use data and software for classwork assignments.

The second part of the course focuses on derivatives, with a particular emphasis on equity derivatives (standard call and put options, exotic options), futures and forward contracts, and interest rate derivatives (swaps, caps and floors, swaptions). We systematically address three basic questions: how do these products work, i.e. what are their payoffs? How can they be used, for hedging purposes or as part of trading strategies? And

above all: how are they priced? The course emphasises a small number of powerful ideas: absence of arbitrage, replication, and risk-neutral pricing. These are typically introduced in the context of discrete-time models, but the course also covers some well-known continuous-time models, starting with a comprehensive treatment of the Black-Scholes model. The level of mathematics is appropriate for third-year students with a solid quantitative background. Continuous-time stochastic processes and stochastic calculus will be introduced as we go.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: J Danielsson, *Financial Risk Forecasting: The Theory and Practice of Forecasting Market Risk* will be the required textbook for the first half of the course; additional readings may be assigned as needed.

For the second half of the course, there is no required textbook, but the following is an excellent reference: J Hull, *Options, Futures, and Other Derivatives*.

Assessment: Exam (45%, duration: 2 hours) in the summer exam period.

Project (10%) and coursework (2.5%) in the MT.

Coursework (5%) in the LT.

In class assessment (37.5%).

FM321 Half Unit Risk Management and Modelling

This information is for the 2018/19 session.

Teacher responsible: Mr Domingos Romualdo

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212), Principles of Finance (FM213), Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: This course is intended for third-year undergraduates and builds upon FM212/FM213 Principles of Finance. The main topics covered are financial risk analysis and financial risk. The course provides students with a thorough understanding of market risk from both a practical and technical point of view. A representative list of topics covered includes:

- empirical properties of market prices (fat tails, volatility clusters) and forecasting of prices
- concepts of financial risk (volatility, Value-at-Risk)
- univariate and multivariate volatility models (ARCH, GARCH)
- implementation and evaluation of risk forecasts
- endogenous risk

Students apply the models to real financial data using Matlab, a programming environment widely used in industry and academia. No prior knowledge of programming is assumed: students will learn-by-doing in class. Students will at times use data and software for classwork assignments.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce written work for classes and to make positive contributions to class discussion

Indicative reading: J Danielsson, *Financial Risk Forecasting: The Theory and Practice of Forecasting Market Risk* will be the required textbook for the course. Additional readings may be assigned as needed.

Assessment: Project (20%), coursework (5%) and in class assessment (75%) in the MT.

FM322 Half Unit Derivatives

This information is for the 2018/19 session.

Teacher responsible: Dr Rohit Rahi

Availability: This course is compulsory on the BSc in Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Principles of Finance (FM212 or FM213), Mathematical Methods (MA100) and Elementary Statistical Theory (ST102)

Course content: This course will build on "Principles of Finance" to study the theoretical foundations of financial derivatives on a variety of underlying assets including bonds, stocks, commodities, and currencies.

Teaching: 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce written work for classes and to make positive contributions to class discussion.

Indicative reading: J Hull, "Options, Futures, and Other Derivatives"

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the LT.

GV100 Introduction to Political Theory

This information is for the 2018/19 session.

Teacher responsible: Prof Katrin Flikschuh

Availability: This course is compulsory on the BSc in Government, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BA in Social Anthropology, BSc in Environment and Development, BSc in Government and Economics, BSc in Government and History, BSc in Social Anthropology and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to the study of politics and political theory through the thought and texts of some of the most important western political theorists. A study of the ideas of some of the major political theorists from the ancient Greeks to the 20th Century. Topics will include theories of human nature, the origin of government and law, man's relation to society and the state, the rise, development and comparison of different constitutions (democracy, monarchy, republic etc), the nature of just and unjust government, the relation between the spiritual and the secular in thinkers, classical and modern natural law and natural rights, the basis of political obligation, the idea of social contract and the theory of utility. The thinkers discussed this year will include Plato, Aristotle, Augustine, Machiavelli, Nietzsche, Hobbes, Locke, Rousseau, J S Mill, and Marx.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of both terms.

The lecture in ST1 will be a revision lecture and the class in ST1 will be a revision class.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: D. Boucher and P. Kelly, *Political Thinkers: From Socrates to the Present* (Oxford 2009); Plato, *Republic*; Aristotle, *Politics*; Cicero, *The Republic and On Duties*; Machiavelli, *The Prince*; Hobbes, *Leviathan*; Locke, *2nd Treatise of Government*; Rousseau, *Discourse on the Origins of Inequality and The Social Contract*; J S Mill, *Utilitarianism, The Subjection of Women, and On Liberty*; Marx, *Selected Writings* (Ed D McLellan); Nietzsche,

Genealogy of Morals; Arendt, The Origins of Totalitarianism; Fanon, Black Skins, White Masks.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 2000 words) in the LT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 5% attendance and 80% formative coursework (50% for the MT essay and 30% for the LT textual analysis).

GV101

Introduction to Political Science

This information is for the 2018/19 session.

Teacher responsible: Prof Simon Hix

Availability: This course is compulsory on the BSc in Government, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Accounting and Finance, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Social Anthropology and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course is an introduction to politics in a globalised world, with a focus on how political science tries to understand and explain cross-country and cross-time differences. The course will begin by introducing students to some of the main empirical variations in political behaviour, political institutions, and outcomes across the world, focusing mainly on democratic and partially democratic countries (in both the developed and developing world), and introducing students to some of the basic theoretical ideas and research methods in political science. Each subsequent week will be devoted to a substantive topic, where a more detailed analysis of political behaviour, political institutions, or political outcomes will be presented and various theoretical explanations will be assessed. Most weeks will involve an interactive element. For example, students will be required to 'adopt a country', from the range of democratic or partially democratic countries across the world (which cannot be a student's home country). The aim is for a student to become an expert on the political behaviour, institutions and outcomes in his or her adopted country, particularly to provide material and knowledge for class discussions.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. There will be reading week in Week 6 of both terms.

Formative coursework: Formative Assessment:

- Problem set (MT)
- Essay (MT)

Indicative reading: W Clark, M Golder and S Nadenichek Golder, Principles of Comparative Politics, 3rd edn, Sage, 2017; A Lijphart, Patterns of Government: Government Forms and Performance in Thirty-Six Countries, 2nd edn, Yale University Press, 2012; G. Tsebelis, Veto Players: How Political Institutions Work, Princeton University Press, 2002.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2000 words).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 75% formative coursework, 25% class participation (including attendance and contribution).

GV225

Public Choice and Politics

This information is for the 2018/19 session.

Teacher responsible: Dr Valentino Larcinese

Dr Rafael Hortala-Vallve

Availability: This course is available on the BSc in Government, BSc in Government, BSc in Government and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to the Study of Politics, or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: This course is concerned with positive political economy and public choice theory applied to the study of political conflicts, democratic institutions and public policy. The course covers the main tools for the study of public choice (rational decision-making theory, game theory, social choice theory) and a number of both theoretical and applied topics, including the empirical study of institutions. This course will cover the main topics in positive political economy and institutional public choice. These include: the aggregation of preferences; voting paradoxes and cycles; electoral competition and voting behaviour; the problems of and solutions to collective action; welfare state and redistribution; the impact of information and mass media on voting behaviour and public policy; the theory of coalitions, the behaviour of committees and legislatures including agenda-setting and veto-player power; principal-agent problems in politics; models of bureaucracy.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be reading week in Week 6 of both terms.

Formative coursework: Students will complete at least one formative essay and at least one timed essay in each term to allow practise on problem sets and essay writing under exam conditions.

Indicative reading: P Dunleavy, Democracy, Bureaucracy and Public Choice; D Mueller, Public Choice III; K A Shepsle & M S Bonchek, Analyzing Politics; George Tsebelis, Veto Players. Major Works; A Downs, An Economic Theory of Democracy; M Olson, The Logic of Collective Action; W Niskanen, Bureaucracy and Representative Government.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% formative essay (best mark), 25% timed essay (best mark), 50% class participation (including presentations and attendance).

GV227 Not available in 2018/19

The Politics of Economic Policy

This information is for the 2018/19 session.

Teacher responsible: Professor Mark Thatcher CON 4.17

Availability: This course is available on the BSc in Accounting and Finance, BSc in Economics, BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students

on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Students will normally be expected to have taken GV101 Introduction to Political Science or equivalent, in a previous year. An introductory knowledge of economics would be useful.

Course content: The aim of this course is to look at political science explanations of changes in public policy, and to apply that literature to major cases of economic policy (both contemporary and historical). In particular, it aims to examine the extent to which economic policy change is affected by ideas, interests and institutions, and the interaction between international and national factors. The material for the course is drawn mainly from the comparative literature on the politics of markets in industrialised countries.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 6 hours of lectures, 10 hours of classes and 4 hours of workshops in the LT. 1 hour of classes in the ST.

Classes will run from Weeks 2-5 and 7-11 in MT and Weeks 1-5 and 7-11 in LT. There will be a reading week in Week 6 of both terms.

Formative coursework: Two formative essays of 1,500 words each. One presentation to be given in class.

Indicative reading: W. Streeck and K Thelen eds, *Beyond continuity: institutional change in advanced political economies* (Oxford: Oxford University Press, 2005), V Schmidt and M Thatcher (eds), *Resilient Liberalism in Europe's Political Economy* (Cambridge: Cambridge University Press 2013); C Hood, *Explaining Economic Policy Reversals* (Buckingham: Open University Press, 1994), Blyth, M (2002) *Great Transformations. Economic Ideas and Institutional Change in the Twentieth Century* (CUP), V S. Schmidt, *The Futures of European Capitalism* (Oxford: Oxford University Press, 2002), PA Hall and D Soskice (eds), *Varieties of Capitalism. The Institutional Foundations of Comparative Advantage* (Oxford: Oxford University Press, 2001).

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 10% attendance, 10% participation and project presentation, 80% formative coursework.

GV245 Democracy and Democratisation

This information is for the 2018/19 session.

Teacher responsible: Dr Francesco Panizza

Additional teaching: Professor Sebastian Balfour, Professor Sumantra Bose, Dr John Chalcraft, Dr Vesselin Dimitrov, Professor John Sidel.

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is concerned with theories and case studies of democratic transformations. It has focused on several different parts of the world including Southern and Eastern Europe, Latin America, South East Asia, India, the Middle East and Russia. It analyses processes of transition to democracy in historical context and also analyses relations between democracy, democratisation and economic development in a global capitalist economy.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in Week 6 of both terms.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Indicative reading: The most useful introductory reading are J. Grugel (2002) *Democratization: A critical introduction*; L. Whitehead *Democratization* (2002) and the articles in *Journal of Democracy*, January 2015. Other useful texts are Rueschemeyer, Dietrich, Evelyne Huber Stephens, and John D. Stephens. (1991) *Capitalist Development and Democracy*. Oxford and Cambridge: Polity, pp.41-78 69-105, 1995; A Przeworski, *Democracy and the Market* (1991); D. A. Rostow (1970) *Transitions to Democracy: Towards a Dynamic Model*; T. Carothers (2002) *The End of the Transition Paradigm?*; Donatella Della Porta (2013) *Can Democracy be Saved?*

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 70% formative coursework, 20% class presentation, 10% class participation (including attendance and contribution).

GV248 Power and Politics in the Modern World: Comparative Perspectives

This information is for the 2018/19 session.

Teacher responsible: Dr Jill Stuart CON.5.05 and Dr Jonathan Hopkin CON.5.18

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Other background in political science will be considered as a substitute for GV101 for students outside of Government.

Course content: This course will acquaint students with the contemporary study of comparative politics, focusing on theories susceptible to testing with narrative historical evidence. Students will learn to address the methodological challenges of developing and testing such theories. The course will treat a wide variety of themes, including ethnic and political violence, the political impact of natural resources in developing countries, social movements and revolution, the political economy of distribution, and political ideologies. With respect to each theme, students will receive a grounding in theories of the topic and and samples of application to empirical cases drawn from throughout the developed, developing, and post-Communist world.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Classes will run from Weeks 2-5 and 7-11 in MT and Weeks 1-5 and 7-11 in LT. There will be a reading week in Week 6 of both terms.

The Week 11 lecture in LT will be a revision lecture and there will be one revision class per group in Week 1 of ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay in the LT.

In addition to the three formative essays students will also produce one final exam essay plan in the LT.

Indicative reading: Skocpol, Theda. *States and Social Revolutions*. Cambridge: Cambridge University Press, 1979. Cederman, Lars-Erik, Nils B. Weidmann, and Kristian Skrede Gleditsch. 2011.

"Gender and the Social Rights of Citizenship: The Comparative Analysis of Gender Relations and Welfare States." *American Sociological Review* 58, no. 3 (1993): doi:10.2307/2095903

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 1500 words) in the MT and LT.

(The highest-marked formative essay will be treated as the summative essay).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be based on the average of the three formative essays (75%) and attendance (25%).

GV249

Research Design in Political Science

This information is for the 2018/19 session.

Teacher responsible: Dr Jill Stuart CON.5.05

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce students to the fundamentals of research design in political science. The course will cover a range of topics, starting from the formulation of research topics and research questions, the development of theory and empirically testable hypotheses, the design of data collection activities, and basic qualitative and quantitative data analysis techniques. The course will address a variety of approaches to empirical political science research including experimental and quasi-experimental designs, large-n survey research, small-n case selection, and comparative/historical comparisons. As a result, topics covered in the course will be varied and span all areas of political science including political behaviour, institutions, comparative politics, international relations, and public administration.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a Week 6 reading week in both terms.

Formative coursework: Approximately every other week throughout the course, students will complete a short "problem set" that allows them to apply material from the course to concrete political science examples (e.g., identifying design elements of a published research paper; proposing strategies for answering a given research question, etc.).

Indicative reading: Adcock, R. & Collier, D. 2001. "Measurement Validity: A Shared Standard for Qualitative and Quantitative Research." *American Political Science Review* 95: 529-546. Campbell, D. T. & Ross, H. L. 1968. "The Connecticut Crackdown on Speeding: Time-Series Data in Quasi-Experimental Analysis." *Law & Society Review* 3: 33-54. Gerber, A. S. & Green, D. P. 2008. "Field Experiments and Natural Experiments." In Box-Steffensmeier, J. M.; Brady, H. E. & Collier, D. (Eds.), *Oxford Handbook of Political*

Methodology, Oxford University Press. Kellstedt, P. M. & Whitten, G. D. 2013. *The Fundamentals of Political Science Research*. Cambridge University Press. King, G.; Keohane, R. O. & Verba, S. 1994. *Designing Social Inquiry*. Princeton University Press. Mahoney, J. & Goertz, G. 2006. "A Tale of Two Cultures: Contrasting Quantitative and Qualitative Research." *Political Analysis* 14: 227-249. Toshkov, D. 2016. *Research Design in Political Science*. Palgrave.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (40%, 3000 words) in the LT.

Coursework (20%, 1000 words) in the MT.

The coursework (20%) in the Michaelmas Term will consist of a Research Design Proposal.

GV251

Government, Politics and Public Policy in the European Union

This information is for the 2018/19 session.

Teacher responsible: Dr Eiko Thielemann

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course is divided into two parts; (i) Government and Politics: the EU as a political system, the Council, the Commission and the Parliament in the policy process, Court of Justice and Judicial politics, public opinion and EP elections, parties and Europe, interest representation; (ii) Public Policy: the policy-making process, policy implementation, the single market, social and environmental policies, budgetary policies, EMU, migration policies, external relations policies.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in week 6 of the MT and LT for feedback and advice sessions and assessment preparation.

Formative coursework: Two essays per term; students' preparedness for the examinations will depend on this written work and on private reading.

Indicative reading: S Hix and B Hoyland, *The Political System of the European Union*, 3rd edn; H Wallace, M Pollack & A Young (Eds), *Policy-Making in the European Union*, 6th edn; N Nugent, *Government and Politics of the European Union*, 8th edn (2017).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 80% formative coursework (each formative essay counts for 20%) and 5% attendance.

GV262

Contemporary Political Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Laura Valentini

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government

and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Introduction to Political Theory or equivalent.

Course content: This course provides an advanced introduction to contemporary political theory. The course is divided into two parts. The first focuses on key political concepts, such as liberty, equality, justice, rights, authority and democracy. The second turns to particularly pressing ethical questions characterizing the political domain. Some of these questions arise within the domestic political arena (e.g., civil disobedience; animal rights; respect for minority cultures), others in the international/global one (e.g., global poverty relief; terrorism; global climate change). Although the course will be concept and problem-driven, along the way, students will also be exposed to the views of leading contemporary political theorists, including John Rawls, Robert Nozick, Ronald Dworkin and many others. This course will provide students with a good grounding in the methods and substantive concerns of contemporary political theory as well as familiarity with the works of major thinkers in the field.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be reading weeks in MT Week 6 and LT Week 6.

Formative coursework: Students will be expected to submit one piece of formative coursework per term: one essay in MT and a mock exam paper in LT.

The course requires ability to organize workload/do readings in advance/prepare for seminars. The course will present students with normative/ethical dilemmas they will need to tackle, and will enhance their analytical skills. As a course in political theory, verbal and written communication will be very much emphasized throughout.

Indicative reading: W. Kymlicka, *Contemporary Political Philosophy: An Introduction*; C. McKinnon (ed.), *Issues in Political Theory*; J. Wolff, *An Introduction to Political Philosophy*; C. Brown & R. Eekersley (eds), *The Oxford Handbook of International Political Theory*; J. Rawls, *A Theory of Justice*; R. Nozick, *Anarchy, State and Utopia*; S. Okin, *Justice, Gender, and the Family*; I. Young, *Justice and the Politics of Difference*.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (25%, 1500 words) in the MT.

Essay (25%, 1500 words) in the LT.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% class participation, 50% assessed coursework, 30% formative coursework (15% per assignment), and 5% attendance.

GV263 Public Policy Analysis

This information is for the 2018/19 session.

Teacher responsible: Prof Edward Page CON3.05

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GV101 Introduction to Political Science (or

equivalent)

Course content: A systematic examination of the policy process in the context of developed nations. This course introduces key theories and models in the study of public policy and encourages a critical appreciation of the main trends in contemporary public policy-making. The course looks at the different stages of the 'policy cycle' (e.g. agenda-setting, implementation and evaluation), the determinants of public policy (for example, public opinion, political parties, technology) as well as central themes in the study and practice of public policy, such as corruption and policy learning.

Teaching: 9 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be reading weeks in Week 6 and Week 17.

Indicative reading: P Cairney, *Understanding Public Policy*.

Theories and Issues, Palgrave, 2012; K Meier, *The Politics of Sin*, ME Sharpe 1994; M Hill, *The Policy Process in the Modern State*, (3rd edn), Prentice Hall, New York, 1997; F Fischer, G Miller and M Sidney *Handbook of Public Policy Analysis*, CRC Press, 2006; BW Hogwood & A L Gunn, *Policy Analysis for the Real World*, Oxford University Press, 1984; C Hood, *The Limits of Administration*, Wiley, 1976; B D Jones, *Reconceiving Decision-Making in Democratic Politics: Attention, Choice, and Public Policy*, University of Chicago Press, 1994; J W Kingdon, *Agendas, Alternatives and Public Policies* (2nd edn), HarperCollins, New York 1995; J L Pressman & A Wildavsky, *Implementation* (3rd edn), University of California Press, 1984; R Rose, *Learning from Comparative Public Policy*, Chatham House, 2004; CH Weiss, *Evaluation: Methods for Studying Programs and Policies* (2nd edn), Prentice Hall, 1998.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2500 words).

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 25% attendance, 37.5% formative essay (best essay), 37.5% participation

GV264 Politics and Institutions in Europe

This information is for the 2018/19 session.

Teacher responsible: Dr Vesselin Dimitrov CON 3.06

Prof Simon Hix, Prof Michael Bruter, Dr Eiko Thielemann, Dr Julian Hoerner

Availability: This course is available on the BSc in Environmental Policy with Economics, BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in International Relations, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course aims to give students an understanding of the full range of leading topics and areas of debate and research relevant to the analysis of political institutions and politics in Europe. The course focuses on both traditional fields of comparative enquiry, such as the study of party competition and voting behaviour, and emerging fields of interest, such as national and European identities, immigration and Europeanisation. The course places particular emphasis on the diverse experiences of liberal democracy in different parts of Europe. The course covers not only long-established democracies in Western Europe, but also the relatively new democracies in Central and Eastern Europe. In the Lent Term, the course will study in depth a number of European countries, such as Britain, France, Germany and Italy, analysing the

main developments in the country concerned in the last twenty years (elections, parties, governments), and then examining issues of particular interest related to that country. Course topics include: electoral behaviour; parties and party systems; government formation and coalitions; regionalism and federalism; national and European identities; immigration; and the challenge of Europeanisation.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be reading weeks in Week 6 of the MT and Week 6 of the LT for private study and essay and assessment preparation.

Formative coursework: Students will be expected to produce 2 essays in the MT and 2 essays in the LT.

Indicative reading: M Gallagher et al, *Representative Government in Modern Europe* (5th edn) (2011); P Heywood et al (Eds), *Developments in European Politics* (2006); T Bale, *European Politics: A Comparative Introduction* (2nd edn) (2008); S Hix, *The Political System of the European Union* (2nd edn) (2005); I Budge et al, *The Politics of the New Europe: Atlantic to Urals* (1997); V Dimitrov, K H Goetz & H Wollmann, *Governing after Communism: Institutions and Policymaking* (2006); J Elster et al, *Institutional Design in Post-Communist Societies* (1998); J Hayward & E Page (Eds), *Governing the New Europe* (1994); J-E Lane & S O Ersson, *Politics and Society in Western Europe* (1999).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GENERAL COURSE STUDENTS ONLY:

The Class Summary Grade for General Course students will be calculated as follows: 15% general contribution to class discussions, 15% presentation(s) and, if applicable, essay outline(s), 60% grading of formative coursework (15% for each of the 4 essays), 10% attendance.

GV302

Key Themes in the History of Political Thought

This information is for the 2018/19 session.

Teacher responsible: Dr Signy Gutnick Allen CON.7.03

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: Students will normally be expected to have taken *Introduction to Political Theory* or equivalent, in a previous year.

Course content: A thematic study of political thought in Ancient, Medieval/Renaissance and Modern periods. This advanced course treats some of the major themes in the history of western European political thought as drawn from the writings of selected political philosophers of the ancient Greek, Roman, Medieval, renaissance, early modern and modern periods. The aim is to demonstrate, and explain, some of the continuities and discontinuities in ethical and political problems and their solutions over time and changing context.

Examples of such themes: different views on the nature of "man" and the consequences for political agency of different perspectives on human reason, will, desire; debates on the origins of law and the purpose of legislation; changing conceptions of justice; different views on government and the state's relation to the individual; on the sources of public authority and the nature of legitimate sovereignty; on the relation of property ownership to personal identity and to participation in collective governance; the historical and socio-political presuppositions behind the

different constitutional regimes: democracy, monarchy, republic etc; on the role of religion in politics; the changing perspectives on the relationship between life in the family and a life of active citizenship; theories of natural law and natural rights; social contract theories; idealist political theory; utilitarianism; nationalism; liberal, conservative and socialist traditions of thought; anarchism and feminism.

The themes, thinkers and primary texts will be selected each year to reflect the current debates in contemporary scholarly literature on them and the research interests of the lecturer. This year, we will focus on debates over the nature and political status of 'rights' in the theories of Hobbes, Locke, Wollstonecraft and Arendt.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

There will be a reading week in week 6 of the MT and week 6 of the LT for private study and formative/summative assessment preparation.

Formative coursework: Two formative essays per term, one of which is a timed-essay set in exam-like conditions.

Indicative reading: Primary Sources: A selection of the following (this list should not be taken as exhaustive): Plato, *Republic*; Aristotle, *Politics*, Machiavelli, *Discourses*, Hobbes, *Leviathan*, Locke, *Second Treatise on Civil Government*, Rousseau, *On The Social Contract*, Hume, *Political Writings*, Kant, *Political Writings*, Hegel, *The Philosophy of Right*, Marx, *The German Ideology*, Sieyes, E. *Political Writings*, Carl Schmitt, *The concept of the Political*

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Four questions will be answered.

GV306 Half Unit

Global Public Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Mathias Koenig-Archibugi

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at 1 group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: N/A

Course content: The course examines the process and outcomes of policy-making at the global level. It considers a range of modes of policy-making, from classic intergovernmental cooperation to novel forms of governance beyond the state such as transgovernmental networks, multistakeholder initiatives, and regulation by non-state actors. The lectures provide an analytical toolbox and cover the following topics: (1) What is the meaning of "global", "public", and "policy"? Does global public policy really exist? (2) What types of actors participate in global public policy? (3) Who sets the global policy agenda and how? (4) What types of governance institutions exist? (5) How are governance institutions created or chosen, and what are the implications of their plurality and interplay? (6) What types of global public policies exist? (7) Who decides the content of global public policies and how? (8) How are global public policies implemented? (9) When can global public policy solve global problems? (10) When does global public policy have democratic legitimacy? The seminars apply the analytical tools provided in the lectures and readings to case studies, to be explored through team work. Students can choose an area of specialization from a range of global policy problems. Examples of relevant global policy problems include the surveillance and eradication of infectious diseases; access to essential medicines; tobacco control; food safety; labour standards; child labour and education; deforestation; protection of

environmental commons; illicit financial flows; internet regulation; arms control; and other topics that may change from year to year.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures and 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Koenig-Archibugi, M. (2002) 'Mapping Global Governance', in D. Held and A. McGrew (eds) *Governing Globalisation*. Cambridge: Polity Press. Koenig-Archibugi, M. (2010) *Understanding the Global Dimensions of Policy*, Global Policy, Vol. 1(1): 16-28. Koenig-Archibugi, M. and M. Zurn, eds (2006) *New Modes of Governance in the Global System*. Basingstoke: Palgrave Macmillan. Hale, T. and D. Held, eds (2011) *Handbook of Transnational Governance*. Cambridge: Polity. Peinhardt, C. and Sandler, T. (2015) *Transnational Cooperation: An Issue-Based Approach*. Oxford University Press. Reinicke, W. (1998) *Global Public Policy*. Washington DC: Brookings Institution. A.-M. Slaughter (2004) *A New World Order*. Princeton University Press. Braithwaite J. and P. Drahos (2000) *Global Business Regulation*. Cambridge University Press. Hale, T., D. Held and K. Young (2013) *Gridlock: Why Global Cooperation Is Failing When We Need It Most*. Cambridge: Polity.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3000 words) in the LT.

GV307 Half Unit Political and Ethnic Conflict and Coexistence: Key Debates

This information is for the 2018/19 session.

Teacher responsible: Dr Omar McDoom

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: This course is designed to engage students with several of the more critical normative and empirical controversies relating to the justification, explanation, and termination of violence. The course focuses on violence commonly characterized as political, ethnic, or religious in nature and will illustrate each of the highlighted debates with a touchstone case drawn from the contemporary world.

The selection of debates and cases will evolve year-to-year as the scholarly frontier of understanding and the world's catalogue of conflicts also evolve. However, by way of example, students grapple with empirical and normative questions such as: (i) Is it more effective to address underlying grievances when responding to political violence or is it better simply to constrain the actor's opportunity to commit it? Students here will assess existing evidence of the effectiveness of the response of liberal democracies to the threat of militant Islam within and outside of their countries' borders; (ii) Is the decision to engage in violence a rational choice or do powerful emotions such as fear, hatred, and resentment have a causal role? Students here will be asked to analyze evidence from Rwanda's 1994 genocide of the actions of the Hutu extremist elite who organized and the ordinary Rwandans who committed violence; (iii) Should we concern ourselves with the ethical and legal constraints on the use of violent force in international politics or is it wiser to accept politics are preeminent? Students here will examine the US government's case for war in Iraq in 2003 through the lenses of just war theory,

public international law, and popular politics; (iv) Should we accept the arguments in favour of international interventions to end violence or is there a rationale for 'giving war a chance'? Students will consider the doctrine of the 'Responsibility to Protect' in the context of the violence continuing in Darfur, the Sudan.

The course is taught as a research seminar comprising ten weekly two-hour sessions. Given its research-oriented focus, the course is attentive to methodology and students will be taught to critically evaluate the more common approaches to empirical research in the field. Students will have the opportunity to undertake a single substantial research project on a course-related topic resulting in an assessed summative essay.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will prepare a 1000 word research proposal on a course-related topic. The proposal will be the basis for the assessed annotated bibliography and final summative essay.

Indicative reading: Evans, G. and M. Sahnoun (2002). "The responsibility to protect." *Foreign Affairs* 81(6): 99-110. Toft, M. D. (2010). "Ending Civil Wars: A Case for Rebel Victory?" *International Security* 34: 7-36. Figueiredo, R. D. and B. Weingast (1999). The rationality of fear: Political opportunism and ethnic conflict. *Civil Wars, Insecurity, and Intervention*. Walter and Snyder. New York, Columbia University Press: 261-302. Petersen, R. D. (2002). *Understanding ethnic violence: fear, hatred, and resentment in twentieth-century Eastern Europe*. Cambridge, Cambridge University Press. Cederman, L.E., N.B. Weidmann, et al. (2011). "Horizontal Inequalities and Ethnonationalist Civil War: A Global Comparison." *American political science review* 105(03): 478-495. Collier, P., A. Hoeffler, et al. (2009). "Beyond greed and grievance: feasibility and civil war." *Oxford Economic Papers* 61(1): 1-27. Jon Western, *The War Over Iraq: Selling War To The American Public*, *Security Studies* 14, no. 1 (January–March 2005): pp. 106–139

Assessment: Essay (75%, 4000 words) in the ST.

Coursework (25%, 1500 words) in the LT.

Students will submit a 1500 word annotated bibliography, in which they summarize between 3 and 6 scholarly writings (articles or books) that they have carefully chosen themselves after conducting a comprehensive literature search on the course topic chosen in their Research Proposal. Students will also be expected to learn how to create and then to submit an electronic bibliography containing a broader selection of the references identified in their literature search using Endnote software. The annotated bibliography will then inform the final 4000 word summative essay on the student's chosen course topic.

GV308 Half Unit Not available in 2018/19 Leadership in the Political World

This information is for the 2018/19 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. Deadline for enrolments is 12 noon Friday 30th September.

Pre-requisites: Students must have completed Public Choice and Politics (GV225).

Course content: Good leadership is central toward having effective organisations, well functioning institutions, and attaining desirable policy outcomes. But what is good leadership? What is successful leadership? Can we distinguish outcomes as causally related to the actions taken by good and successful leaders? And how important is a leader's style? The course will look at both theoretical and

empirical frameworks for analysing these questions developing in particular rational choice accounts of leadership. Different notions of leadership will be discussed including: (1) Leading by Example; (2) The Leader as a Focal Point and (3) The Leader as an information source. These will be illustrated by specific examples.

Teaching: 22 hours of seminars in the LT.

There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

Indicative reading: Ahlquist, JS. and M. Levi. 2011). "Leadership: What it means, what it does, and what we want to know about it". Annual Review of Political Science. vol. 14. Besley, T and Marta Reynal-Querol (2009) "Do Democracies Select More Educated Leaders?", American Political Science Review, 105,3. Humphreys, M., Masters, W., and Sandhu, M. E. (2006). The role of leadership in democratic deliberations: Results from a field experiment in Sao Tome and Principe. World Politics, Jones, B and Olken, B (2005) 'Do Leaders matter? National Leadership and Growth since World War 2', Quarterly Journal of Economics, 120, 3, 835–864. Schelling, T (1980), The Strategy of Conflict, Chapter 4

Shepsle, K and M. Bonchuck (1997), Analyzing Politics, Chapter 14
Assessment: Essay (75%, 5000 words) and in class assessment (25%).

In preparation for each class, students will read one or two core texts on political leadership and write a one page piece that reflecting upon these readings. This will then be used as a basis for class discussion. This will be marked as follows: completion and quality of the weekly statements (10%) and in class participation (10%). Each student will also be asked to produce a brief outline and 5 min presentation on the final essay (5%)

GV309 Half Unit Not available in 2018/19 Politics of Money and Finance in Comparative Perspective

This information is for the 2018/19 session.

Teacher responsible: Prof Cheryl Schonhardt-Bailey

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon, Friday 29 September, 2017.

Pre-requisites: A background in political economy would be advantageous.

Course content: The course focuses on the role of institutions, ideas and interests in the process and formulation of both (a) monetary policy, and (b) financial stability & regulation. We examine in particular the causal influences of institutions, ideas and interests in independent central banking, financial stability and financial regulation (including times of financial crisis), and the oversight and accountability of independent financial agencies, as well as relevant aspects of Brexit. Focusing predominantly on OECD countries, we draw on theories from economics and political science to analyse both decision making and policy outcomes, using both contemporary and historical perspectives. The course adopts a comparative country perspective, rather than an international relations perspective.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

There will be a reading week in week 6 of the MT for private study and assessment preparation.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: The full reading list for this course is currently

available on Moodle for GV309. This new course will take the readings from the introductory weeks, along with all the weeks covering issues of money and finance. Blinder, A., The Quiet Revolution: Central Banking Goes Modern (Yale Univ Press, 2004) M. Artis and F. Nixon, The Economics of the European Union, (Oxford: Oxford University Press, 2007 4rd ed). Blinder, A., After the Music Stopped: The Financial Crisis, the Response, and the Work Ahead (Penguin, 2013). Reinhart, Carmen & Rogoff, Kenneth, This Time Is Different: Eight Centuries of Financial Folly (Princeton University Press, 2009). McCarty, N., et al, Political Bubbles: Financial Crises and the Failure of American Democracy (Princeton, 2013). Schonhardt-Bailey, C., Deliberating American Monetary Policy: A Textual Analysis (MIT Press, 2013) King, M., The End of Alchemy (Little Brown, 2016)

Assessment: Presentation (10%) and essay (90%, 3500 words).

GV311 British Government

This information is for the 2018/19 session.

Teacher responsible: Prof Antony Travers

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: The course will provide an introduction to contemporary British government, notably the institutions involved and processes of policy-making. The first part of the course will explain the evolution of British government from the earliest times, including the philosophical ideas that have come to underpin contemporary politics. The key institutions of British government will be described and analysed, focusing on factors that explain the functioning of a complex modern State. By the end of the course, students will have a practical understanding of the entire system of British government and the influences that affect it.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in Week 6 of both terms.

Formative coursework: Students will be required to submit 2 unassessed essays in both the Michaelmas and Lent Terms.

Indicative reading: R. Hefferman, P Cowley and C Hay Developments in British Politics 9, Palgrave Macmillan. P. Norton, The British Polity, 5th Edition, London, Pearson Longman, 2010. M. Garnett and P. Lynch, Exploring British Politics, 2nd edition, London, Pearson Longman, 2009. R. A. W. Rhodes, Everyday Life in British Government, Oxford University Press, 2011. C. Hood, The blame game: spin, bureaucracy, and self-preservation in government, Princeton University Press, 2011

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GV312 Not available in 2018/19 Advanced Topics in Government: Executive Politics

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and

History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at one group. The deadline for receipt of applications is Friday, 2 October 2015.

Pre-requisites: GV101 or GV100 or equivalent

Course content: This course offers an advanced consideration of select key themes in the study of executive politics. It focuses on the changing conditions in which politics takes place (demographic change, sovereign debt crisis, environmental change and societal values) and considers how these changes impact on national executives.

Teaching: 20 hours of classes and 2 hours of workshops in the MT. 20 hours of classes and 2 hours of workshops in the LT. The workshops will introduce and provide support for the assessed coursework projects.

Formative coursework: Three formative essays (2500 words) and project proposal for assessed essay component.

Indicative reading: Hood, C (2011) *The Blame Game*, Carpenter, D (2010) *Reputation and Power*, Lewis, DE (2009) *The Politics of Presidential Appointments*, Lodge, M and Wegrich, K (2012/eds) *Executive Politics in Times of Crisis*.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2500 words).

GV313 Half Unit Politics of Trade in Comparative Perspective

This information is for the 2018/19 session.

Teacher responsible: Dr Stephanie Rickard

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at three groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: A background in political economy would be advantageous.

Course content: The course focuses on the role of institutions and interests in the process and formulation of trade policy. We examine the causal influences of institutions and interests in trade, focusing predominantly on developed countries. We draw on theories from economics and political science and analyze these using both historical and contemporary examples, and do so from a comparative perspective, rather than an international relations perspective.

The primary focus of the course is on actual policy outcomes.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in Week 6.

Formative coursework: Weekly writing assignments.

Indicative reading: Frieden, Lake and Schultz (2010) *World Politics*. 216-233. Hiscox, Michael. (2002) "Commerce, Coalitions, and Factor Mobility: Evidence from Congressional Votes on Trade Legislation." *American Political Science Review* 96(3): 593-608. Milner, Helen V. and Keiko Kubota. (2005) "Why the Move to Free Trade? Democracy and Trade Policy in the Developing Countries." *International Organization* 59 (Winter): 107-144. Rickard, Stephanie J. (2010) "Democratic Differences: Electoral Institutions and Compliance with GATT/WTO Agreements." *European Journal of International Relations* 16(4): 711-729. Nielson, Daniel L. (2003). *Supplying Trade Reform: Political Institutions and Liberalization in Middle-Income Presidential Democracies*. *American Journal of Political Science* 47:3 470-491. C. Schonhardt-Bailey, From

the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective (MIT Press, 2006). Zahrnt, Valentin. (2008). Domestic constituents and the formulation of WTO negotiating positions: what the delegates say. *World Trade Review* 7 (2): 393-421. Wei and Zhang (2010) Do external interventions work? The case of trade reform conditions in IMF supported programs *Journal of Development Economics* Volume 92, Issue 1, May 2010, Pages 71–81. Frieden, Jeffry, Ronald Rogowski. (1996) "The Impact of the International Economy on National Policies: An Analytical Overview." In *Internationalization and Domestic Politics*. Edited by Robert Keohane and Helen Milner, p. 25-47.

Assessment: Essay (100%, 4000 words).

GV314 Empirical Research in Government

This information is for the 2018/19 session.

Teacher responsible: Prof Edward Page CON3.05

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: The course introduces a variety of techniques and issues in the empirical study of political science and applies them to a practical research project in which students participate throughout the year. No prior knowledge of statistics or research methods is required. The focus of the course will be the practical research project. For 2017/18 the research project will explore international student perceptions of the UK as a place for study, though this is subject to change. At the theoretical level the course will cover questions relating to the utilization of policy research, forms of research design, sampling, questionnaire construction, coding and converting non-quantitative to quantitative indicators, response rates, elite interviewing and research ethics. As the practical research project progresses classes will cover the development of practical skills such as, principles of research report writing and, where appropriate for the project, use of text processing programmes, and basic routines in the widely-used Statistical Package for the Social Sciences (SPSS), such as those used for compiling crosstabulations.

Teaching: 20 hours of seminars and 2 hours of workshops in the MT. 20 hours of seminars and 2 hours of workshops in the LT. 2 hours of seminars in the ST.

The two workshops will take place in the reading weeks (week 6 of MT and LT) and will consist of additional teaching activities to extend students' familiarity with the course content at which attendance will be voluntary.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Sandra Halperin and Oliver Heath, *Political Research. Methods and Political Skills* (2012); Floyd J. Fowler *Survey Research Methods*, 5th edn (2013); Alan Buckingham and Peter Saunders, *The Survey Methods Workbook* (2004); Tim May, *Social Research: Issues, Methods and Process*, 3rd edn, (2001); Claus Moser and Graham Kalton, *Survey Methods in Social Investigation*, 2nd edn, (1985); Melanie Mauthner et al (eds), *Ethics in Qualitative Research*, (2002).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words) and research project (25%).

GV315 Half Unit Not available in 2018/19 Voting and Elections in Developing Democracies

This information is for the 2018/19 session.

Teacher responsible: Dr Ryan Jablonski CON 4.14

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

The course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 29 September 2017.

Pre-requisites: Government students should have completed GV101 Introduction to Political Science or equivalent.

Course content: Most governments in the developing world have adopted electoral institutions, many in the last few decades. However, these institutions vary considerably in their ability hold politicians accountable. Emergent democracies are frequently plagued by violence, fraud, corruption, weak accountability, and clientelism. This seminar is a discussion of the nature of electoral institutions in developing democracies, with a particular focus on the causes and consequences of these ills. Among other things, we will seek answers to the following questions: Why do governments adopt electoral institutions, but then fail to permit free and fair voting? When and why do governments use fraud and violence to win elections? What has been the impact of development aid, election monitoring and democracy assistance on elections and democratization? To answer these questions we will draw on an emerging political science literature on these issues, as well as several case studies. Students are expected to be active participants in this course, and will participate in several class debates and writing exercises.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Each session will begin with a lecture, followed by a discussion and – in the latter half of the course – presentations by one or more students.

There will be a Reading Week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay of 1,000 words in the LT.

Indicative reading: Stokes, Susan C., et al. *Brokers, Voters, and Clientelism: the puzzle of distributive politics*. Cambridge University Press, 2013. Wantchekon, Leonard. 2003. "Clientelism and Voting Behavior: Evidence from a Field Experiment in Benin." *World Politics* 55, no. 3: 399-422. Zakaria, F. 1997. *The Rise of Illiberal Democracy*. *Foreign Affairs* 76: 22-43. Bratton, Michael, and Nicholas Van de Walle. *Democratic experiments in Africa: Regime transitions in comparative perspective*. Cambridge University Press, 1997. Hafner-Burton, Emilie M., Susan D. Hyde, and Ryan S. Jablonski. "When Do Governments Resort to Election Violence?" *British Journal of Political Science* 44.01 (2014): 149-179. Weitz-Shapiro, Rebecca. "What wins votes: Why some politicians opt out of clientelism." *American Journal of Political Science* 56.3 (2012): 568-583.

Assessment: Essay (90%, 4000 words) in the ST. Presentation (10%) in the LT.

GV316 Half Unit Advanced Issues in Applied Political Theory

This information is for the 2018/19 session.

Teacher responsible: Prof Chandran Kukathas

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and

Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: An investigation of contemporary questions in applied political theory. Taking as a starting point a pressing social and political challenge, the course instructs students to systematically apply different political theories to approach the problem, to understand and critically discuss different normative viewpoints, and to develop and defend their own position in these debates.

Examples of such themes include environmental and climate change, free speech, multiculturalism and toleration, poverty and global justice, colonialism, or surveillance and privacy. The topics are selected each year to reflect current debates and the interests of the course convener. The course gives students the opportunity to experience research-led teaching, as the course convener will typically create a syllabus to reflect their current research projects. In 2018-19 the focus on the course will be on multiculturalism and immigration.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. During the reading week (week 6), all students have the opportunity for a one-on-one meeting with the convener to plan for their formative essay.

Formative coursework: Students will be expected to produce 1 essay.

Indicative reading: Will, Kymlicka, *Multicultural Citizenship*. Chandran Kukathas, *The Liberal Archipelago*. Joseph Carens, *The Ethics of Immigration*. David Miller, *Strangers in Our Midst: A Political Philosophy of Immigration*

Assessment: Essay (100%, 3000 words).

GV317 Half Unit The Modern State - Theory and Practice

This information is for the 2018/19 session.

Teacher responsible: Professor Patrick Dunleavy

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: Some background in at least one of these fields will be helpful: political theory, comparative politics, political sociology, public policy/economics, or international relations.

Course content: Since the 2008 financial crisis the modern state has re-emerged as a key actor in shaping the political identities, welfare and life-chances of its citizens; the strength and shape of a nation's economy; and much of the development of international policies. Some earlier expectations of the dwindling away of state institutions in the face of global forces or international institutions have been decisively refuted. Yet the operations of states as 'multi-systems', with many component parts, continues to generate theoretical controversy about whether and how they exist, and how their diversity can be ascribed unity of purpose or operations. The first five weeks examine the main theories of the modern, complex state and controversies about its unity and diversity. After reading week, we move on to look at the integrating roles of budget systems, constitutional provisions, bureaucratic institutions and information policies, the 'regulatory state' and 'welfare state' institutions in shaping the overall evolution of states. The approach is comparative throughout, drawing mainly on the experience of OECD countries and advanced industrial societies.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: John Dryzek and Patrick Dunleavy, *Theories of the Democratic State* (Palgrave-Macmillan, 2009). Francis Fukuyama, *Political Order and Political Decay: From the Industrial Revolution to the Globalization of Democracy* (Farrar, Straus and Giroux, 2015). Timothy Mitchell, 'The Limits of the State: Beyond Statist Approaches and Their Critics', *American Political Science Review*, (1991) Vol. 85, No. 1, pp. 77-96. Colin Hay, 'Neither real nor fictitious but "as if real"? A political ontology of the state', *British Journal of Sociology* (2014) Volume 65 Issue 3, pp. 459-80. David Levi-Faur, 'The welfare state: a regulatory perspective', *Public Administration*, September 2014, vol 92, no.3, pp 599-614.

Assessment: Presentation (10%) in the MT Week 11. Essay (90%, 4000 words) in January.

GV318 Half Unit Building Democracies from Conflict? Violence, Power-Sharing and Institutional Design

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Mitchell

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: Students may find it helpful to have completed Introduction to Political Science (GV101).

Course content: How can we design, build and sustain 'democracies' in less than ideal circumstances? We will explore societies torn apart by political violence and ethnic conflict. The main purpose is to diagnose the central problems, and examine what political responses are most appropriate. The first part of the course mostly looks at the problems, in particular political violence. We consider the likely futures for Iraq, Kurdistan and Islamic State. What are the justifications for political violence? How much political violence is there and what are the main types and trends? We shall examine the strategies terrorism and suicide terrorism. Since the end of the cold war, almost all wars are 'civil wars' and we will consider what causes civil wars, what sustains them (why do some last much longer than others?), and how do they end? The second part of the course shifts the focus of attention to 'solutions' and policy responses to divided societies and failing states. Informed responses might include: intervention, mediation and peace agreements; power-sharing and constitutional design; territorial management of conflict; transitional justice; elections, party systems and institutions for governing divided societies.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

There will be a Reading Week in Week 6.

Formative coursework: Students will be expected to produce 1 project in the MT.

Formative - one short project proposal - which should be a research design plan for the project. Students will receive written and verbal feedback on the viability and quality of their proposal, but it will not be graded. It is feedback and advice, not part of summative assessment. The deadline will be week 7, just after reading week in week 6. Length 1000 words. Pedagogically, preparation of the research proposal combined with advice and feedback will help improve the quality of the final project.

Indicative reading: Paul Collier (2010), *Wars, Guns and Votes: Democracy in Dangerous Places*. London: Vintage. Lars-Erik

Cederman, Kristian Gleditsch and Halvard Buhaug (2013), *Inequality, Grievances and Civil War*. Cambridge University Press. Jonathan Tonge (2014), *Comparative Peace Processes*. London: Polity. Hannah Lerner (2011), *Making Constitutions in Deeply Divided Societies*. Cambridge University Press. Brendan O'Leary (2009), *How to Get Out of Iraq with Integrity*. Penn: University of Pennsylvania Press. Arend Lijphart (2008), *Thinking about Democracy: Power-Sharing and Majority Rule in Theory and Practice*. Routledge. Horowitz, Michael (2015), *The Rise and Spread of Suicide Bombing*, *Annual Review of Political Science* 18: 69-84. Gilligan, Michael and Ernest Sergenti (2008), 'Do UN Interventions Cause Peace? Using Matching to Improve Causal Inference', *Quarterly Journal of Political Science* 3:89-122. Vinjamuri, Leslie and Jack Snyder (2015), 'Law and Politics in Transitional Justice', *Annual Review of Political Science* 18: 303-327. Brancati, Dawn and Jack Snyder (2012), 'Time to Kill: The Impact of Election Timing on Postconflict Stability', *Journal of Conflict Resolution*. Brownlee, Jason, Tarek Masoud and Andrew Reynolds (2015), *The Arab Spring: Pathways of Repression and Reform*. Oxford University Press. A full reading list will be available on Moodle.

Assessment: Project (90%, 4000 words) in January. Presentation (10%) in the MT.

As a final year course, the aim is to have a 'research output' as the main method of assessment in the form of a mini-project. This will be similar to the shorter 'research notes' sections of many academic journals and should not exceed 4,000 words. Students will also each make one seminar presentation, on which they will receive feedback and a grade.

GV319 Half Unit Not available in 2018/19 Experimental Politics

This information is for the 2018/19 session.

Teacher responsible: Mr Thomas Leeper

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 28 September 2018.

Pre-requisites: Familiarity with basic algebra required and comfort with basic statistics as covered by Research Design in Political Science (GV249) or an equivalent course in research design or introductory statistics (such as ST102, ST107, ST108, GY140, SA201) is recommended.

Course content: This course will introduce students to the use of experiments or randomised controlled trials (RCTs) in politics to evaluate policies, programmes, and theories. The course will introduce the art, science, and ethics of experimentation, debate the validity and utility of experiments as a tool of evaluation and as the basis for policymaking, and examine the findings of experimental research in several distinct political domains. Representative topics include:

1. Voter mobilisation
2. Campaign message testing
3. Social media
4. International development
5. Public health
6. Polling
7. Small-group deliberation
8. Policy nudges

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 1 hour of classes in the ST.

There will be no lecture during Week 6 and no class during Weeks 1 and 6. Reading week activities will include one-on-one meetings with the instructor to discuss final paper topics/proposals (and

other course content) and set aside time for students to prepare formative presentations (which will occur in class sessions during Weeks 7-11).

Formative coursework: Students will be expected to produce 1 problem sets and 1 presentation in the MT.

The problem set will be due at the end of Week 5 and the presentations will occur during Weeks 7 to 11.

Indicative reading: Required textbook: Glennerster and Takavarasha. 2013. *Running Randomized Evaluations: A Practical Guide*. Princeton, NJ: Princeton. Suggested texts: Desposato. 2016. *Ethics and Experiments: Problems and Solutions for Social Scientists and Policy Professionals*. New York: Routledge. Druckman et al., eds. 2012. *Cambridge Handbook of Experimental Political Science*. New York: Cambridge. Gerber and Green. 2011. *Field Experiments*. New York: Norton. Morgan and Winship. 2015. *Counterfactuals and Causal Inference*. New York: Cambridge. Journal articles and other reading list texts, as assigned. Students will have free choice on final essay topics, so they should expect to find and read additional books and articles on the topic in consultation with the instructor and the library.

Assessment: Exam (50%, duration: 1 hour and 30 minutes) in the summer exam period.

Essay (50%, 2250 words) in the LT.

Assessment for the course will consist of a written exam (1 hour and 30 minutes) during the regular exam period (50%) and an individual case study essay (50%). The essay can take one of two forms: (a) a research design proposal that advances an original theoretical contribution to a political science literature, proposes an experimental test of that theory, and critically discusses related issues of research design, ethics, and implications; or (b) a case study that examines a real-world use of experimental methods to study a question relevant to political science by a government, firm, NGO, or other entity, describes the context for and design of the experiments, and evaluates the findings and use of experiments in this case context.

Students have complete topical choice for the essay and will be expected to give a short presentation (one part of the formative assessment) on their chosen topic during class. Regardless of the form of essay chosen, the quantitative problem set will ensure that students have the skills necessary to propose a credible experimental design and/or evaluate an applied example of experimental research. One-on-one meetings during Reading Week will provide a checkpoint to obtain early feedback and presentations will invite both peer and instructor feedback near the end of the term.

GV320 Half Unit Populism

This information is for the 2018/19 session.

Teacher responsible: Professor Francisco Panizza CON 5.12

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: The course aims at bringing together the conceptual analysis of populism with comparative case studies in different regions of the world. It studies populism from a conceptual, theoretical and comparative perspective. Given the highly contested nature of populism, the first weeks will look in depth to different theories of populism, including institutional, ideological, discursive and socio-cultural understandings of populism. It will then move to explore the conditions of emergence of populism and the relations between populism and key political

concepts, such as democracy and political participation. The second half of the course will seek to apply the conceptual tools presented in the first half of the course to regional case studies. Among the topics to be explored are: What is populism? Populism as a "thin ideology". Populism as a mode of identification. The socio-cultural dimensions of populism. The conditions of emergence of populism. Populism, democracy and political participation. Populism in Europe. Populism in the USA. Populism in Latin America.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Week 6 will be reading week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Formative coursework:

One essay to be submitted on week 7 of the LT. The formative essay will offer an outline of the final essay- including key indicative reading. The feedback will be used in two ways: 1) to guide students' critical thinking in line with course learning outcomes; 2) to guide students on the key aspect of formatting an academic argument using literature and critical debate. Students will also be encouraged to reflect upon their learning from the presentation and use this to refine their summative essay.

Indicative reading: Essential Readings

Cristobal Rovira Kaltwasser, Paul Taggart, Pierre Ostiguy and Paulina Ochoa- Espejo (eds). *Oxford Handbook on Populism*. Oxford: Oxford University Press 2017. Benjamin Moffitt, *The Global Rise of Populism. Performance, Political Style and Representation*. Stamford Ca: Stamford University Press 2016. Francisco Panizza (Ed) *Populism and the Mirror of Democracy*. London: Verso 1995. Additional Readings. Carlos de la Torre and Cynthia J. Arnon (eds.) *Latin American Populism in the Twenty-First Century*. Baltimore: The John Hopkins University Press, 2013. Michael Kazin. *The Populist Persuasion. An American History*. Ithaca and London: Cornell University Press, 1998. Benjamin Moffitt. *The Global Rise of Populism. Performance, Political Style and Representation*. Stamford Ca.: Stamford University Press, 2016. Cas Mudde and Cristóbal Rovira Kaltwasser (eds.) *Populism in Europe and the Americas. Threat or Corrective to Democracy?* Cambridge: Cambridge University Press, 2012. Cass Mudde and Cristobal Rovira Kaltwasser. *Populism: A Very Short Introduction*, Oxford University Press 2017. Jan-Werner Müller. *What is Populism?* Princeton: Princeton University Press, 2016.

Assessment: Presentation (10%) in the LT.

Essay (90%, 3500 words) in the ST.

The essay will be marked in line with departmental guidance on assessed essays. This will allow for a scale of outcomes in line with different levels of academic outputs. It will be marked for command of the literature, theories and empirical findings, analytical sophistication, use of evidence, critical judgement and originality. The individual class presentations will take the form of a 15 minute presentation followed by 30 minutes of questioning from both the class and the teacher. Particular value will be placed on the ability to present contending arguments in a clear and balanced way, the use of empirical evidence to support arguments and the capacity to raise relevant questions for class discussion.

GV321 Half Unit Concepts and Controversies in Political Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Laura Valentini CON 3.01

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This course is capped at one group. The deadline for enrolments is

12:00 noon on Friday 5 October 2018

Pre-requisites: Students will be expected to have some familiarity with political theory (e.g., having taken GV100 Introduction to Political Theory, or GV262 Contemporary Political Theory or some other, relevant module).

Course content: This course is devoted to the advanced study of key concepts and related controversies in political theory. The focus of the course will vary from year to year, reflecting the expertise of the convenor as well as the most recent developments in the literature. Examples of possible core concepts covered include: justice and equality, freedom, democracy, rights and human rights, authority and disobedience, power, solidarity, sovereignty and many others. Each year, the course will zoom in on one or two such concepts, allowing for in-depth study of them and the controversies they generate.

In 2018-19, the course critically examines the ethics of *disobedience* to state authority and the ethics of *punishment* (and related state responses to disobedience). Methodologically, the course is situated within contemporary Anglo-American analytic political philosophy. Substantively, the course will be divided into two parts, and address questions such as the following.

Part 1, disobedience: Under what conditions may subjects to political authority (e.g., state authority) permissibly disobey the authority's commands (e.g., the law)? Is there a right to engage in civil disobedience? Is there a duty to resist injustice? What is the moral status of boycotting and whistleblowing? When, if ever, might violent revolution be justified?

Part 2, punishment and other responses to disobedience: The state claims not only authority over us, but also the right to punish us when we disobey its directives. Under what conditions is punishment justified? And what role, if any, do mercy and forgiveness play in responding to disobedience? May the state justifiably punish crimes that are "necessitated" by social injustice (e.g., crimes the poor commit to survive)?"

The course will discuss these questions by reference to both moral/political theories and real-world examples.

Teaching: 10 hours of lectures and 20 hours of classes in the MT.

Formative coursework: Students will be expected to submit a 1500 words formative essay by the end of week 6 (reading week). Students will also receive feedback on their class performance, and discuss their research project for the summative essay with the convenor (i.e., they will receive feedback on the project, too).

Indicative reading: A. J. Simmons, *Moral Principles and Political Obligations* (Princeton: Princeton University Press, 1979); K. Brownlee, *Conscience and Conviction: The Case for Civil Disobedience* (Oxford: Oxford University Press, 2012); B. Boxill, "The Responsibility of the Oppressed to Resist their own Oppression," *Journal of Social Philosophy*, 41 (1) (2010), 1-12; J. Hampton, "The Moral Education Theory of Punishment," *Philosophy and Public Affairs*, 13 (1984): 208-38; L. Allais, "Wiping the Slate Clean: The Heart of Forgiveness," *Philosophy and Public Affairs*, 36 (1) (2008), 33-68; T. Shelby, "Justice, Deviance, and the Dark Ghetto," *Philosophy & Public Affairs*, 35 (2) (2007), 126-160.

Assessment: Essay (80%, 4000 words) in the LT.

Class participation (20%) in the MT.

GV322 Half Unit Knowledge Economies: Global Innovation Networks and Segregated Societies

This information is for the 2018/19 session.

Teacher responsible: David Soskice

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit

and to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: The course will focus on the advanced economies and seek to analyse the question, "Will the Knowledge Economy succeed in building innovative, cosmopolitan and integrated societies? Or will they succumb (i) to populism, protectionism and educational and cultural segregation; and/or (ii) to large-scale occupational elimination via AI and robotics without effective retraining and upgrading; and/or (iii) to further financial crises and secular stagnation; and/or (iv) to the 'end of innovation'? In all of the above will advanced economies evolve in different ways/varieties?"

Week 1: Advanced capitalist democracies: Big questions.

Week 2: Technological regimes, Fordism and the ICT revolution; varieties of advanced capitalism; national system of innovation.

Week 3: Changing returns to skills, organisations and locations; knowledge-based multinational networks.

Week 4: Knowledge economies; successful knowledge-intensive cities and left-behind communities; deindustrialisation; high-skilled immigration and FDI; gender revolution.

Week 5: Changing framework rules:

Interpreting liberalism, globalisation, monetary policy and mass HE.

Week 6: City regions: successful cities and left-behind communities.

Week 7: Macroeconomics I: Global imbalances; financial crisis; knock on effects of Great Recession (but no Depression).

Week 8: Macroeconomics II: Secular stagnation, fall in innovation and labor productivity growth.

Week 9: Reconfiguring politics I: decline of social dem; rise of populism, but also city electorates/ culture &/or interests.

Week 10: Reconfiguring politics II: Inequality, poverty, segregation; democratic limits on redistribution; redefined welfare state; city-regional government; problems and possibilities of AI and robotics.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

2 hour lecture/seminar for whole class each week

3 x 1 hour tutorial-style classes each week for 5 students

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

As formative coursework, students will be asked to submit an outline and bibliography in preparation for their summative essay.

Indicative reading:

- Florida, *The Rise of the Creative Class* (Revised), 2014 Basic Books
- Carlin and Soskice, *Macroeconomics: Institutions, Instability and the Financial System*, 2015 OUP (pdf)
- Hall and Soskice, *Varieties of Capitalism* (Introduction), 2001 OUP (pdf)
- Brynjolfsson and McAfee, *The Second Machine Age: Work, Progress and Prosperity in a Time of Brilliant Technologies*, 2014 Norton
- Bayoumi, *Unfinished Business*, 2017 Yale UP
- Beramendi, Hausermann, Kitschelt, Kriesi, *The Politics of Advanced Capitalism* (selected chaps), 2016 CUP
- Streeck, *How will Capitalism End?* 2016 Verso
- Vox EU, *Secular Stagnation: Facts, Causes, Cures*, 2014 CEPR
- Iversen and Soskice, *Resilience and Reconstruction: Advanced Capitalist Democracies in a Turbulent Century*, forthcoming Princeton UP (pdf)

Assessment: Project (100%, 5000 words) in the MT.

GV323 Half Unit Transparency and Accountability in Government

This information is for the 2018/19 session.

Teacher responsible: Dr Daniel Berliner CON 6.10

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics,

BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018

Course content: Is "sunlight the best disinfectant"? Can information empower citizens to hold their government accountable? How have information technologies been used to enable civic engagement and participation? What are the relationships between transparency, secrecy, corruption, and accountability?

This course will familiarise students with the theory and practice of transparency and accountability in government, enabling them to critically address these questions and engage meaningfully in fast-moving contemporary policy debates.

The course will offer a grounding in theories of democracy, representation, and accountability, as well as debates over the merits of transparency in light of competing values like secrecy and privacy. The course will also enable students to evaluate the role played by different forms of information in political systems, as well as to critically assess the theories of change and assumptions behind information-based policy initiatives.

The course has a global scope, focusing on applications in both developed and developing countries, and on policy types including freedom of information, information-based regulation, participatory budgeting, crowdsourced policymaking, "civic tech," open data, campaign finance and asset disclosures, and applications of transparency to sectors like extractive industries, the environment, and public health.

Teaching: 15 hours of lectures and 10 hours of classes in the LT. There will be a Reading Week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay of 1,000 words in the LT, and to meet with the instructor regarding the plan for their summative research essay.

Indicative reading: Fung, Archon. 2013. "Infotopia: Unleashing the democratic power of transparency." *Politics & Society* 41(2): 183-212. Schedler, Andreas. 1999. "Conceptualizing accountability." In *The self-restraining state: Power and accountability in new democracies*, Schedler, Andreas, Larry Diamond, and Marc F. Plattner, eds. Boulder: Lynne Rienner Publishers. Noveck, Beth Simone. 2015. *Smart Citizens, Smarter State*. Cambridge Mass.: Harvard University Press. Roberts, Alasdair, 2006. *Blacked out: Government secrecy in the information age*. Cambridge University Press. Berliner, Daniel. 2014. "The political origins of transparency." *The Journal of Politics*, 76(2), 479-491. Pande, Rohini. 2011. "Can Informed Voters Enforce Better Governance? Experiments in Low-Income Democracies." *Annual Review of Economics*. 3(1): 215-37. Prpic, John, Araz Taeihagh, and James Melton. 2015. "The fundamentals of policy crowdsourcing." *Policy & Internet*. 7(3): 340-361. Worthy, Ben. 2015. "The impact of open data in the UK: Complex, unpredictable, and political." *Public Administration*, 93(3), 788-805. Tan, Yeling. 2014. "WikiLeaks: the illusion of transparency." *International Review of Administrative Sciences* 78(1): 116-133.

Assessment: Essay (90%, 2500 words) in the ST. Presentation (10%) in the LT.

GV325 Half Unit Not available in 2018/19 Advanced Issues in Political Economy

This information is for the 2018/19 session.

Teacher responsible: Dr Stephane Wolton

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc

in Politics and International Relations and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course is capped at 1 group. The deadline for enrolments is 12 noon on Friday 30th September.

Pre-requisites: Students are expected to have taken GV225 Public Choice and Politics, or equivalent, in a previous year. An introductory knowledge of economics and econometrics would be useful.

Course content: This course is an advanced treatment of Political Economy. The course will cover some advanced concepts in game theory and their application to contemporary political issues. It will provide an overview of the empirical literature on the topics covered. The course material will expand students' capacity to think about policy relevant issues and will cover democratic and autocratic politics. The course structure will be as follows:

Week 1 – Game theory refresher

Week 2 - Political accountability

Week 3 – Media and democracy

Week 4 - Behavioural political economy

Week 5 - Accountability in autocracies: The role of elite

Week 7 – Accountability in autocracies: The role of institutions

Week 8 - Democratisation,

Week 9 – Terrorism

Week 10 - International conflicts

Week 11 - Revision lecture

Teaching: 10 hours of lectures and 9 hours of classes in the MT. There will be 9 one-hour lectures in Weeks 1-5 and Weeks 7-10 in MT and a one-hour revision lecture in Week 11. Classes will run in Weeks 2-5 and Weeks 7-11 in MT. Week 6 will be a Reading Week.

Formative coursework: Students will be expected to produce 1 problem sets and 1 other piece of coursework in the MT.

Students will complete one problem set to further their understanding of the concepts covered in the course and prepare for the take-home exam. There will also be a time exam in week 11 to allow practise on problem sets solving under exam conditions.

Indicative reading: Canes-Wrone, Brandice, Michael C. Herron, and Kenneth W. Shotts. 2001. "Leadership and pandering: A theory of executive policymaking." *American Journal of Political Science* 45(3): 532-550. Gentzkow, Matthew, and Jesse M. Shapiro. 2006. "Media Bias and Reputation." *Journal of Political Economy* 114(2): 280-316. Prato, Carlo and Stephane Wolton. 2015. "The Voters' Curses: Why we need Goldilocks voters." *American Journal of Political Science*, forthcoming. Egorov, Georgy, Sergei Guriev, and Konstantin Sonin. 2009. "Why Resource-Poor Dictators Allow Freer Media: A Theory and Evidence from Panel Data." *American Political Science Review* 103(4): 645-668. Bueno de Mesquita, Ethan. 2005. "The quality of terror." *American Journal of Political Science* 49(3): 515-530. Daron Acemoglu and James Robinson. 2000. "Why Did the West Extend the Franchise?" *Quarterly Journal of Economics* 115 (4): 1167-1199. Fearon, James D. 1995. "Rationalist explanations for war." *International organization* 49(3): 379-414. Most of the reading is from journal articles; a complete list will be supplied at the start of the term. A useful overview of political economy topics in democracy is: T Besley, *Principled Agents? Selection and Incentives in Politics*, Oxford University Press, 2005

Assessment: Exam (50%, duration: 2 hours and 45 minutes, reading time: 15 minutes) in the summer exam period. Coursework (50%) in the MT Week 9.

The exam will have two parts. Part A is a compulsory question. In Part B, candidates will answer two questions from three posed. Coursework consists of two compulsory problems (Part A) and two compulsory essay questions (Part B). Candidates are asked to keep the length of their answers in Part B to 500-700 words per essay question. There is no maximum word count for Part A.

GV328 Half Unit Middle East Politics in Transnational Perspective

This information is for the 2018/19 session.

Teacher responsible: Prof John Chalcraft CON.5.16

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Pre-requisites: No pre-requisites.

Course content: This course offers an advanced introduction to the contemporary politics of the Middle East and North Africa in transnational perspective. It takes a critical, sociological, historically-informed, and qualitative approach, with a particular focus on cross-border structures of power and forms of resistance. We study such topics as transnational revolutionary movements, the new religious politics, neoliberalism, monarchy and migration, feminism, counter-insurgency, authoritarianism across borders, the regional uprisings of 2011, and horizontalism and radical democracy. Students will develop an advanced introductory understanding of the transnational politics of the region.

Teaching: 15 hours of lectures and 11 hours of seminars in the MT. There is no teaching scheduled in reading week, but one of the seminars (of the total of 11) will be a (compulsory) essay writing workshop scheduled towards the end of Week 5 (most likely Thursday). In other words, there will be two seminars in Week 5.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Abdelrahman, Maha. 2011. 'The Transnational and the Local: Egyptian Activists and Transnational Protest Networks' *British Journal of Middle Eastern Studies*, (Dec), Vol.38: 3: 407-424. Achcar, Gilbert. 2004. *Eastern Cauldron: Islam, Afghanistan, Palestine, Iraq in a Marxist Mirror*. New York: Monthly Review Press. Chalcraft, John. 2016. *Popular Politics in the Making of the Modern Middle East*. Cambridge University Press. Khalili, Laleh. 2012. *Time in the Shadows*. Stanford University Press. Massad, Joseph. 2002. 'Re-orienting desire: the Gay International and the Arab World' *Public Culture*, Vol.14 (2). Moghadam, Valentine M. 2015. 'Transnational Feminist Activism and Movement Building' *The Oxford Handbook of Transnational Feminist Movements*, Rawwida Baksh and Wendy Harcourt eds. Oxford University Press. Owen, Roger. 2002. *The Rise and Fall of Arab Presidents for Life*. Cambridge, MA: Harvard University Press. Patel, David, Valerie Bunce, and Sharon Wolchik. 2014. 'Diffusion and Demonstration' in *The Arab Uprisings Explained: New Contentious Politics in the Middle East*. Marc Lynch ed. New York: Columbia University Press, pp. 57-74. Rodriguez, Robyn Magalit. 2011. 'Philippine Migrant Workers' Transnationalism in the Middle East' *International Labor and Working-Class History*, No. 79, (Spring 2011), pp. 48-61.

Assessment: Essay (100%, 3000 words) in the LT. 3000 word essay, 100%

BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations, BSc in Politics and Philosophy and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 1 group. The deadline for enrolments is 12:00 noon, Friday 29 September, 2017.

Course content: This class is an introduction to the study of contemporary African political economy. The goal is to set major questions of state and economy in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, and introduce students to theories that aim to identify causes of similarity and difference across and within countries. Students will come away with a better understanding of the possibilities and limits of structured, focused comparisons in comparative politics, and with an introduction to political economy approaches to questions of late development. They will also develop substantive knowledge of the political economy of sub-Saharan Africa and analytic tools to describe and make sense of its diversity.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT. This course shares lectures with DV435 African Political Economy. Seminar classes are separate for undergraduate students. There will be a reading week in Week 6.

Formative coursework: There will be one 1,200 formative assignment (short essay).

Indicative reading: Texts used may include all or part of the following: Fred Cooper, *Africa Since 1940* (Cambridge U. Press). Keith Hart, *The Political Economy of West African Agriculture* (Cambridge, 1983). Jeffrey Herbst, *States and Power in Africa* (Princeton 2000). Mahmood Mamdani, *Citizen and Subject: Africa and the Legacy of late Colonialism* (Princeton 1996). Will Reno, *Warfare in Independent Africa* (Cambridge 2011). Abiodun Alao, *Natural Resources and Conflict in Africa: The Tragedy of Endowment* (University of Rochester Press, 2007). Sara Berry, *No Condition is Permanent: The Social Dynamics of Agrarian Change in Africa* (U. of Wisconsin Press). Crawford Young, *The Postcolonial State in Africa: Fifty Years of Independence*

Assessment: Essay (75%, 2000 words) in the LT. In class assessment (25%).

For the in-class assessment: Students will be asked to write one-page feedback papers on selected weeks' readings and to participate in class discussions. In the last class meeting, each student will give a 5-minute overview of his/her plans for the final course essay. Participation assessment is designed to motivate students to keep up with the readings and to contribute actively to class discussion.

GV342 Philosophy, Politics and Economics: Capstone and Research Project

This information is for the 2018/19 session.

Teacher responsible: Prof Patrick Dunleavy

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

This course is exclusively for fourth year BSc PPE students.

Course content: Course content, Teaching and Assessment: Michaelmas term

The course introduces students to team-based and individual research work. The MT will focus on the capstone project. The initial weeks of the course will introduce students to the requirements of capstone projects, key research strategies and essential questions. At the same time, from Week 1 students will begin to research in small teams problems for clients in public and private sector organisations. Students are also expected to work steadily throughout the term with members of their team and with

GV335 Half Unit Not available in 2018/19 African Political Economy

This information is for the 2018/19 session.

Teacher responsible: Prof Catherine Boone CON 6.04

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics,

their advisors. The completed research has to be presented to fellow students (and the client organisations) by Week 11 MT, both in the form of a team presentation and as a team research report. Further details: There will be a two-hour seminar in week 0 of MT to introduce the projects available to the students and students will then be able to list their preferences, which will be taken into account so far as possible in deciding allocations. This session will also explain key issues and demands on the students. The seminars in weeks 1 and 2 of MT will discuss key research methods and presentation skills needed for short, sharp team research projects. The seminar in week 5 of MT will be a "course correction" session for teams to get guidance on the planned final shape of their reports. Help sessions with advisors will occur regularly through term to support student teams' research efforts. Student teams will present their Capstone research project findings to fellow students, staff and commissioning organisations in a workshop or workshops in week 11 of MT.

MT Formative Coursework: Student teams must produce 1 team presentation for the 'course correction' session in Week 5 MT. Student teams must also produce a poster or presentation output from their final (assessed) presentation for a final Showcase workshop, held in Week 1 of Summer Term.

MT Summative Assessment:

- 10% of marks for the team final presentation in Week 11 MT.
- 40% of marks for the team final Capstone project report (maximum 8,000 words) submitted by Thursday of Week 11 in MT Lent term

In the LT, the focus shifts to the production of an individual academic paper or research report. Students will be encouraged to develop an interdisciplinary research question. They must complete a presentation and a poster on their key conclusions by the end of the LT; and submit a Research Report or paper by Week 1 of ST. The initial weeks' seminars during the LT will be focused on students outlining their plans, and on key questions for research design. Individual consultation and up to five feedback sessions with advisors take place regularly throughout term. The workshop in ST week 1 will be a 'poster exhibition' that allows all students to exhibit and discuss their research projects.

LT Formative coursework: Students must prepare a draft outline synopsis for their individual project by Thursday of Week 1 Lent Term, and present on it in a workshop/seminar in Week 2. Students must then present a detailed Plan or Storyboard for their LT Report to their supervisor and get their approval by Week 6 of LT.

LT Summative Assessment:

- 10% of marks for a presentation and draft poster, submitted by Week 11 LT.
- 40% of marks for an individual Research Report (maximum 5,000 words) submitted by Tuesday of Week 1 in Summer Term.

Teaching: 8 hours of seminars, 5 hours of workshops and 5 hours of help sessions in the MT. 4 hours of workshops and 5 hours of help sessions in the LT. 2 hours of workshops in the ST.

Formative coursework: Students should refer to 'course content' above for details.

Indicative reading: Charles E. Lindblom and David K. Cohen, *Useable Knowledge: Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); C. R. Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, *Dynamics in Groups and Teams: Groups as Complex Action Systems*, chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

An extensive list of readings will be made available on Moodle.

Assessment: Project (40%, 8000 words) and presentation (10%) in the MT.

Presentation (10%) in the LT.

Research project (40%) in the ST.

GV366 Not available in 2018/19 Political Economy of the Developing World

This information is for the 2018/19 session.

Teacher responsible: Dr Steffen Hertog CON4.01

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at one group. Deadline for enrolments is 12:00 noon on Friday 29 September, 2017.

Pre-requisites: Students must have completed Introduction to Political Science (GV101).

Course content: This course introduces students to the broad theoretical traditions in the study of political economies outside of the OECD world, and provides an empirical overview of a number of concrete phenomena that shape the interplay of the politics and economics in different world regions. It will address puzzles like: Why did some developing countries grow much faster than others after WWII? Are some forms of corruption more compatible with development than others? Which impact do natural resource rents have on politics and development? Under which conditions can countries with a short history of independent statehood build efficient institutions?

GV366 will engage with broad theoretical traditions like modernization theory, dependency theory, and neo-patrimonialism, and with concrete empirical topics like state-business relations, the developmental state, corruption and clientelism, the politics of public enterprise, and the political economy of resource-rich countries.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: One essay of 3,500 words to be submitted in the LT.

Indicative reading: Bardhan, Pradeep (1997). "Corruption and Development", *Journal of Economic Literature*, Vol. 35. Evans, Peter (1995). *Embedded Autonomy: States and industrial transformation* (Princeton: Princeton University Press). Richards, Alan, and John Waterbury (2007). *A Political Economy of the Middle East* (Boulder: Westview Press). Ross, Michael (2012). *The Oil Curse: How Petroleum Wealth Shapes the Development of Nations* (Princeton: Princeton University Press). Schneider, Ben Ross, and Sylvia Maxfield (eds.) 1997. *State-Business Relations in Developing Countries* (Ithaca: Cornell University Press). Wade, Robert (2003). *Governing the Market: Economic Theory and the Role of Government in East Asian Industrialization* (Princeton: Princeton University Press). Waterbury, John (1993). *Exposed to Innumerable Delusions: Public Enterprise and State Power in Egypt, India, Mexico, and Turkey* (Cambridge: Cambridge University Press).

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3500 words) in the ST.

GV390 Government Dissertation Option

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Bruter

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course may be taken only in the third year. A BSc Government

and History student cannot choose both HY300 and GV390; a BSc Politics and Philosophy student cannot choose both GV390 and PH399; and a BSc Politics and International Relations student cannot choose both GV390 and IR398.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by a proposed dissertation advisor and the Course Convenor. The topic should be chosen from any area within the field covered by the degree course and supported by a member of the academic staff from the Government Department willing to act as dissertation advisor. Following the dissertation information session organised by the Department in the second year of the students' curriculum, candidates should approach their tutor during the Lent Term or Summer Term of their second year to discuss the possibility of a proposed dissertation topic. After having received approval for a topic by a prospective advisor, students must submit a dissertation form detailing the final title and synopsis/prospectus to the Course Convenor for approval. Dissertation approval forms must be submitted no later than the deadline. Please note that any change from what was approved in the dissertation form will require the approval of the dissertation supervisor. In 2018-19 the deadline for submitting Dissertation Approval Forms will be Friday 12th October 2018.

Teaching: 4 hours and 30 minutes of seminars in the MT. 4 hours and 30 minutes of seminars in the LT.

Six seminars split between the Michaelmas Term and Lent Term as well as individual supervision. Dissertation advisors can be expected to offer advice on reading and guidance on the organisation of the dissertation; they may also read and comment on a draft outline of up to 2,000 words. Tutors or other teachers are not permitted to read or comment on a draft of the whole dissertation. The number of individual meetings with the students will be agreed with the supervisor but should be at least once per term in the student's third year. It should be stressed that no member of staff is under an obligation to agree to supervise any proposed dissertation.

Assessment: Dissertation (100%, 10000 words).

GV3A1 Half Unit The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union

This information is for the 2018/19 session.

Teacher responsible: Prof Kevin Featherstone COW 2.02 and Prof Antony Travers CON 6.06

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

This course is capped at two groups. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: 'BREXIT' represents one of the most significant challenges to the modern British political system in peacetime. This course will examine how the UK's membership of the European Union became problematic and the implications of 'BREXIT' for government and politics. It will provide students with appropriate conceptual and analytical frames by which to understand the path towards 'BREXIT' and the challenges that arise from it. In doing so, the dynamics and uncertainties of 'BREXIT' will be contextualised within a longer-term perspective and one that recognises the ongoing interests and norms involved in the relationship. Students will be introduced to the key issues for public policy and their possible impacts. Students will gain an appreciation of the contending arguments and interpretations, as well as the public policy dilemmas of dealing with uncertainty and limits to knowledge. No prior knowledge of the European Union will be assumed. The course will adopt a broad disciplinary perspective

- covering the political, political sociology, political economy, constitutional, and foreign policy/external relations dimensions. Students will have the opportunity to explore the arguments, issues and interpretations in group work, presentations, and written essays.

Note: the lectures are to be shared with MSc students. The seminar questions for the UG students differ from those for MSc students, taking account of the different stages of study and the intended learning outcomes.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative essay (1500 words), due by mid-term, will address a question relevant to the impact of BREXIT on the UK political system, drawing upon the readings and seminar discussion.

Indicative reading: Indicative: D. Dinan et al, eds. (2017) *The European Union in Crisis*; London: Palgrave. A. Geddes (2013) *Britain and the European Union*; London: Palgrave. B. Simms (2016) *Britain's Europe: A Thousand Years of Conflict and Cooperation*. London: Allen Lane. S. Wall (2008) *A Stranger in Europe: Britain and the EU from Thatcher to Blair*. Oxford: OUP. H. Young (1998) *This Blessed Plot: Britain and Europe from Churchill to Blair*. London: Macmillan. K. Armstrong (2017) *BREXIT Time: Leaving the EU -why, how and when?* Cambridge: Cambridge University Press. H. Clarke, M. Goodwin and P. Whiteley (2017) *BREXIT: Why Britain voted to leave the European Union*. Cambridge: Cambridge University Press. E. O. Eriksen and J. E. Fossum (2015) *The European Union's Non-Members: independence under hegemony?* London: Routledge. S. Hobolt (2016) 'The BREXIT vote: a divided nation, a divided continent', *Journal of European Public Policy*, 23, 9. And 'Debate Section': 'British exit from the EU - legal and political implications', in the same issue. L. Halligan and G. Lyons (2017), *Clean BREXIT: Why leaving the EU still makes sense*; London: Biteback Publishing. The 'Generation BREXIT' website - an LSE project.

Assessment: Essay (80%, 3000 words) in the LT. Presentation (10%) and other (10%) in the MT.

GV398 Inside the Mind of a Voter: Research in Electoral Psychology

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Bruter CON 4.06

Availability: This course is available on the BSc in Government, BSc in Government and Economics, BSc in Government and History, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and Economics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Available to final year students in the programmes named above. Students from other degrees are not normally accepted on the course except with the exceptional discretionary approval of the course teacher.

This course is capped at one group. The deadline for enrolments is 12:00 noon on Friday 5 October 2018.

Course content: This final year undergraduate course has three important ambitions.

Substantively, it aims to introduce students to the study of electoral psychology and electoral ergonomics, which represent novel and dynamic approaches to the study citizens' electoral behaviour and the way voters' psychology interacts with the organisation of elections.

Methodologically, it introduces students to some of the key methods used in the field and enables them to practice fieldwork in one of them through an empirical group project. That project will change each year in terms of topic and method, and will be discussed jointly by the course teacher and the students. It may

include lab experiments, interviews, diaries, or any of the core methods used in the field.

Finally, it introduces students to the research process through the main assessment component, which is a supervised 7,000 words dissertation, and supports them through several research clinics whereby we discuss students' dissertation issues and problems collectively throughout the year.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 4 hours of seminars in the ST.

Teaching takes place on MT (10x2 hours), LT (10x2 hours), ST (1x4 hours). The department operates a reading week on week 6.

The course includes:

- 10 x 2 hour SUBSTANTIVE SEMINARS on key issues in electoral psychology
- 5 x 2 hour FIELDWORK SEMINARS focused on preparation and fieldwork for the group project
- 5 x 2 hour RESEARCH CLINICS on the preparation and discussion of analytical, methodological, and ethical issues faced by students with regards to their dissertation
- 1 x 4 hour CONFERENCE WORKSHOP where students will briefly present their findings to one another.

Formative coursework: Formative assessment includes:

- draft research synopsis and design (end of MT)
- draft research methodology (early in LT)
- unassessed critics of further readings (throughout MT/LT)

Indicative reading: Bruter, M. and Harrison, S. Understanding the emotional act of voting. Lipset, S., Lazarsfeld, P. et al. The psychology of voting. Sniderman, P. Personality and democratic politics. Bruter, M., and Lodge, M. Political Science research methods in action. Baddeley, A. The psychology of memory. Cammaerts, B. et al. Youth participation in democratic life. Harrison, S and Bruter, M. Mapping extreme right ideology

Assessment: Other (70%) in the ST.

Research project (15%) in the MT.

Other (15%) in the MT and LT.

The summative assessment consists of:

- A final dissertation of 7,000 words (70%)
- Group work on project (15%)
- Critiques of further readings (15%)

The critics of further readings work as follow: to make the reading list more manageable for the 10 substantive seminars, all students will only be expected to familiarise themselves with the core readings, and will divide the further readings between themselves. Each student will be expected to be responsible for a total of 5-6 further readings throughout the year, all in different weeks.

Students responsible for a further reading will be asked to write a short (1-2 page) critic of it following a set format (1) what is the research question and why is it interesting, 2) what methods are the authors using, 3) what are the main findings, 4) what are the main shortcomings or what do you wish the authors had done differently) and post it on moodle by the Sunday before the seminar so that students can quickly browse the week's 'menu' in advance. The students having each covered different further readings will bring them into the seminar discussion.

The critics count for 15% of the final mark as follows: 5% for completing 5 quality critics throughout the year, and 10% based on the average mark for what they choose as their two best critics. The group work mark (15%) is based on the satisfactory completion of the tasks assigned to small groups of students during the fieldwork (e.g. conducting interviews or experiments, etc depending on the topic of the year).

GY100

Introduction to Geography

This information is for the 2018/19 session.

Teacher responsible: Dr Claire Mercer STC.4.18 and Dr Myung Ae Choi STC.3.17

Availability: This course is compulsory on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and

Development and BSc in Geography with Economics. This course is available on the BA in Social Anthropology and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides students with an introduction to Geography at LSE. In Michaelmas Term we will examine human geography's key concepts, including space, place, landscape, nature, globalization, mobility, society and city. In the Lent Term the course will move on to introductory sections on environmental geography and economic geography. The environmental section will cover topics such as the anthropocene, nature and culture, and global and local environmental problems. The economic geography section will introduce students to the changing location of economic activity, inequalities within and between countries, regions and cities, and the rationale, objectives and tools of local and regional development policies in a globalizing world.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 1 hour of help sessions in the ST.

Formative coursework: Students will be expected to produce 4 essays and 1 presentation in the MT and LT.

Indicative reading: Detailed reading-lists related to the different topics within the course will be provided at the start of the course. Clifford, N.J., S.L. Holloway, S.R. Rice and G. Valentine (eds) (2009) Key Concepts in Geography, 2nd Ed, Sage, London; Dicken, P. (2011) Global Shift: Mapping the Changing Contours of the World Economy 6th Edition Sage Publications; W.E. Murray, Geographies of globalization, 2006; A Pike, A Rodríguez-Pose & J Tomaney Local and regional development, 2006; N. Castree (2014) Making Sense of Nature

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

GY103

Contemporary Europe

This information is for the 2018/19 session.

Teacher responsible: Prof Simona Iammarino S410 and Dr Neil Lee

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Geography with Economics, BSc in Politics and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims at introducing students with little prior knowledge of European issues to some of the most important economic, social, and political challenges the European Union overcame in the past, and currently faces. The course develops a sound understanding of the determinants and the evolution of these challenges and the related public policies. Students will learn about strengths, weaknesses and lessons to be drawn from the most striking example of international integration as a result of historical forces and in the context of a globalised world. The course covers issues such as economic integration, competitiveness, cohesion, innovation and growth, enlargement, Euro crisis and Brexit, social policy, employment trends, poverty, migration, ageing, and social exclusion and inequality. Particular stress is laid upon the spatial constitution of these themes, at various levels of geography: supranational, national and subnational (regional) level.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT. 2 hours of classes in the ST.

The 2 hour-class in the ST is Revision Session for the exam.

Formative coursework: Students will be expected to produce a minimum of two class essays during the year and will also be expected to give class presentations.

Indicative reading: Given the diversity of the subject, there is no one textbook that covers all of the topics. A mix of academic articles and chapters from textbooks is used in the course. Reading lists are provided electronically, and additional web sources will also be indicated during the lectures. Indicative textbooks are the following: R Baldwin and C Wyplosz, *The Economics of the European Integration*, 4th ed. 2012; S Senior Nello, *The European Union. Economics, Policies and History*, 3rd ed. 2012; J. McCormick, *European Union Politics*, Palgrave, 2nd ed. 2015.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

GY120

Environmental Change: Past, Present and Future

This information is for the 2018/19 session.

Teacher responsible: Dr Thomas Smith S421C

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Many consider that 'Climate Change' is the greatest challenge currently facing human society, mainly because of the 'Environmental Changes' that it will cause. But what are 'Climate Change' and 'Environmental Change'? What causes these changes? How much have they changed in the past and how do we know? How much is human activity responsible for the recent changes identified and when did this influence begin? How is the climate going to change in the next century and if water finds its own level, why does sea-level change vary over the Globe?

To answer these questions requires that the course focuses on developing an appreciation of the Planet Earth as the home of human societies. The analysis focuses on the physical nature of the 'natural' or biophysical systems and involves consideration of how the solid earth, the gaseous atmosphere, the hydrosphere and the biosphere, were formed, have evolved, interact and have changed over time due to both external (extra-terrestrial) and internal factors, including humans. From this, an appreciation of change and evolution over differing time-scales is developed, which will serve as an essential basis for students when evaluating the contemporary two-way interaction between humans and the environment. The relevant science will be taught as and when required.

The course consists of the following sections:

- Introduction to Environmental Change:

The structure and functioning of the Earth as a set of systems (The Geosystem). The Scientific Method. The systems approach and its application to environmental studies. Ecosystem concept. Biogeochemical cycles. The nature and causes of Environmental Change and Climate Change; "Change" and "Variability".

- Key Aspects of Environmental Change:

(i) The Contemporary Atmosphere. Composition and structure of the atmosphere. Radiation and selective absorption (Greenhouse Effect). Global energy budget and global energy transfers.

(ii) The Hydrosphere: Hydrological cycles. Cloud formation, precipitation and evapotranspiration. General introduction to hydrology and the "Hydrological Cascade". Human Influences on river flow. Flooding.

(iii) The Biosphere: Development and change of Biodiversity over time due to evolution through Natural Selection

- Quaternary Environmental Change: Environmental Change over the last 2.6 million years.

Prelude: Introduction to the Quaternary. Divisions of the Quaternary. The evolution of humans. But what went before? -

Long-term influences on climate and environmental change; past

ice ages and 'greenhouse worlds'. Catastrophic events. The Gaia hypothesis.

Establishment of the contemporary paradigm of Quaternary climate change, i.e.: the "Ice House - Hot House" paradigm.

Ice cores, ocean sediment cores, the Oxygen Isotope record; what causes glaciations and inter-glacials? The Milankovitch Mechanism. Milankovitch and sub-Milankovitch oscillations.

- Past, Present and Future Change

Merging the instrumental, historical and proxy records. Problems with dating. The growing influence of humans (the human impact).

The possibility of an Anthropocene / Anthropogene. Holocene Climate Change: The Post-Glacial Climatic Optimum, Medieval Warm Period and Little Ice-age. Mann et al's "Hockey Stick".

Human impacts on the Ecosphere and the Ruddiman Hypothesis.

Debates about Twentieth Century Warming.

Patterns of sea-level change: Past, Present and Future.

Contemporary Climate/Environmental Change and future

prospects to AD 2100.

Teaching: 20 hours of lectures and 9 hours of classes in the MT.

18 hours of lectures and 10 hours of classes in the LT.

Please note there is a Reading Week taking place in Week 6 in both Michaelmas and Lent Terms.

Formative coursework: Students will be expected to produce two essays during the year, one in each term, and give class papers.

Indicative reading: Bell, M. and Walker, J.C., *Late Quaternary Environmental Change: Physical and Human Perspectives*, 2005; P. Smithson, K. Addison and K. Atkinson, *Fundamentals of the Physical Environment*, 2008; T H van Andel, *New Views on an Old Planet*, 1994; R Chistopherson, *Geosystems*, 2005; J Gribbin, *Almost Everyone's Guide to Science*, 1998; A. E. Dessler, *Introduction to Modern Climate Change*, 2012; J. Houghton, *Global Warming: The Complete Briefing*, 2015; J Chapman & M J Reiss, *Ecology. Principles and Applications*, 1992; J E Lovelock, *The Ages of Gaia*, 1988; R Huggett, *Catastrophism*, 1997; W.J. Burroughs, *Climate Change: A Multidisciplinary Approach*, 2007; Goudie, A., *The Human Impact on the Natural Environment*, 2013.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (15%, 1500 words) and other (25%) in the LT.

Students may choose a fieldwork report (2000 words due in the LT) or a summative essay (2000 words due in the LT).

GY121

Sustainable Development

This information is for the 2018/19 session.

Teacher responsible: Prof Giles Atkinson

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Accounting and Finance, BSc in Geography with Economics and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: "Is development sustainable?" While this is undoubtedly a challenging question, the purpose of this course is to provide building blocks that will allow an answer to be formulated. In doing so, we will seek to understand better how the natural world is affected by development decisions and crucially how those decisions shape human development prospects or widen the gap between development outcomes across geographical regions and socioeconomic groups. All of this gives rise to a rich array of themes and debates, which are reflected in distinct sections of the course. We begin by introducing a number of concepts including human development, sustainable development and natural capital. We will then explore a variety of linkages between human development and natural capital (resources and environment). In doing so, we consider the viewpoint that society is being 'guided by the wrong compass' in the way that social and economic progress

conventionally is measured by e.g. "GDP". Resource scarcities are frequently relative and the uneven distribution of, or access to, resources has implications for how development outcomes and prospects are distributed globally and within countries. We will therefore investigate the way in which this affects specific human populations particularly those who are amongst the most vulnerable. This set of themes additionally will examine issues of resource security drawing on examples from debates about food, water and energy availability as well as broader debates about resource conflicts, population growth and changing technology.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce class essays during the year and to give class presentations.

Indicative reading: There are a variety of texts available for this course. A detailed reading list will be given at the beginning of each term but will include: G Atkinson, S Dietz, E Neumayer and M Agarwala (eds) *Handbook of Sustainable Development*, 2nd edition, Elgar, 2014; WM Adams (2009) *Green Development: Environment and Sustainability in the Developing World*, 3rd Edition, Routledge, JA Elliott (2012) *An Introduction to Sustainable Development*, 4th edition.

Assessment: Essay (40%) in the LT.

Take home exam (60%) in the ST.

Exam to be taken in week 1 of ST

GY140

Introduction to Geographical Research

This information is for the 2018/19 session.

Teacher responsible: Dr Austin Zeiderman, Dr Murray Low, Dr Claire Mercer, Prof Henry Overman, Prof Gareth Jones, Prof Sylvia Chant and Dr Richard Perkins

Availability: This course is compulsory on the BA in Geography and BSc in Economic History and Geography. This course is available on the BSc in Environment and Development. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main objective of this course is to introduce students to the production of geographical and environmental knowledge and to prepare them to become producers of such knowledge themselves. It provides students with a sound understanding of both the conceptual foundations and real-world applications of a variety of methodological approaches for conducting research. To appreciate why, how, and to what ends geographers conduct research on the social and spatial dimensions of human activity, the research process is examined from beginning to end: selecting a topic, performing a literature review, designing a project, collecting and analysing data, and communicating results. The process of producing knowledge about geography and the environment is also examined from a number of different perspectives: examining case studies of written work, engaging with internationally-renowned researchers, discussing the rationale for choosing a methodological approach, practicing the application of individual methods, and designing and executing a piece of independent research. Both quantitative and qualitative research methods are discussed in detail and fieldwork exercises in London give students the opportunity to apply various methods from the course in their own research.

Teaching: 10 hours of lectures and 18 hours of classes in the MT. 9 hours of lectures and 18 hours of classes in the LT.

Compulsory fieldwork exercises to be completed instead of lecture/class in Week 11 of Lent Term. No class to be scheduled for Week 1 in MT.

Formative coursework: Students will be given the opportunity to complete two formative assignments during the course of the year: one in MT that draws on qualitative research methods and one in LT draws on quantitative research methods. Information on the formative assignments will be provided in the course outline.

Indicative reading: Methods in human geography: a guide for students doing a research project (Flowerdew and Martin, 2005); Statistics: a tool for social research (Healey, 2012); Statistics in geography and environmental science (Harris and Jarvis, 2011); Geography and geographers: Anglo-American geography since 1945 (Johnston, 1997); International Encyclopedia of Human Geography (Kitchin and Thrift, 2009); Key methods in geography (Clifford, French, and Valentine, 2010); Qualitative research methods in human geography (Hay, 2010).

Assessment: Project (50%, 3000 words) in the LT.

Project (50%, 3500 words) in the ST.

The first project (3000 words) will be due toward the end of Lent Term. The second project (3500 words) will be due at the start of Summer Term.

GY144

London's Geographies

This information is for the 2018/19 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is available on the BA in Geography and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: On this course you will think through what makes London such a specific kind of urban scene, and how have people sought to represent its specificity? Rather than a comprehensive account of London's past and present, this course uses the synthetic (social, economic, political and cultural) tools of human geography to understand how and why. Topics include, but are not limited to; empire, landscape, spectacle, the body & sexuality and migration & racism. An important 'lab' component involves leaving the classroom to enter the LSE Archives and to walk the streets to interpret London's cultural geographies. You are encouraged to go on walks, to explore aspects of the city you do not already know, and to dig through archival material to find connections between past and present London.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT.

Formative coursework: Students are expected to write two formative essays and to participate actively in classes in the MT and the LT.

Indicative reading: Mitchell D. 2002. *Cultural Geography; a Critical Reader*. Oakes T et al. 2008. *The Cultural Geography Reader*. Kureishi H. 1990. *The Buddha of Suburbia*. Nead L. 2000. *Victorian Babylon: People, Streets and Images in Nineteenth Century London*. Stedman Jones G.. 1984. *Outcast London*.

Assessment: Essay (50%, 2000 words) in the MT.

Essay (50%, 2000 words) in the LT.

GY202

Introduction to Global Development

This information is for the 2018/19 session.

Teacher responsible: Dr Claire Mercer S418

Dr Romola Sanyal

Availability: This course is compulsory on the BSc in Environment and Development. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environmental Policy with Economics, BSc in Geography with Economics and BSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to analysing global development, focusing on key development theories, strategies, problems and trajectories. In Michaelmas Term we cover concepts and theories of development, histories of colonialism, the debt crisis and structural adjustment, neoliberalism, aid, governance and civil

society. In Lent Term we examine poverty, migration, informality, housing, water, sanitation and gender.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 9 hours of lectures and 9 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Students will produce two essays during the MT and the LT.

Indicative reading: S. Chant and C. McIlwaine, *Geographies of Development in the 21st Century: An Introduction to the Global South*, 2009; S. Chari and S. Corbridge (eds), *The Development Reader*, 2008; G. Williams, P. Meth and K. Willis, *Geographies of Developing Areas: the Global South in a Changing World*, 2009; V. Desai & R. Potter (Eds), *The Companion to Development Studies*, 2nd ed, 2008; T. Forsyth (Ed), *The Routledge Encyclopaedia of Development*, 2005; D. Simon (Ed.), *Fifty Key Thinkers on Development*, 2005; K. Willis (2011). *Theories and practices in development*, 2nd ed; UNDP, *Human Development Report*, published annually; World Bank, *World Development Report*, published annually.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

GY205 Political Geographies

This information is for the 2018/19 session.

Teacher responsible: Dr Murray Low STC.S512

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introduction to the relevance of a geographical perspective for explanation of contemporary political processes, and of a political perspective for explanation of contemporary geographies, at scales from the local to the global. Topics covered include: states; geopolitics; empires and national states; citizenship rights, migration and national 'closure'; nationalism, territory and identity; geographies of elections and representation; democratization; globalisation, neo-liberalism and governance.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 5 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to submit one formative essay per term of up to 1,500 words.

Indicative reading: Detailed reading lists will include journal articles, but indicative texts include: J. Agnew, *Making Political Geography*, 2002; C. Barnett and M. Low (eds.), *Spaces of Democracy* 2004; J. Agnew & S. Corbridge, *Mastering Space*, 1995; K. Cox, M. Low and J. Robinson (eds) *The Sage Handbook of Political Geography*, 2008.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

GY206 Half Unit Urban Geography and Globalisation

This information is for the 2018/19 session.

Teacher responsible: Dr Ryan Centner STC601c

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to the intersection of urban geography and the geography of globalisation, with the aim of understanding key references in academic debates, and their relevance for real-world social, economic, and political issues in our cities today. The course offers a critical, human-geographical perspective on 'global cities', how these manifest in different parts of the world, how they matter for distinct realms of urban life, and how we can study features of global urban geography. Themes include empires, development, and cities; 'global cities'; 'Third World cities' or 'cities of the global South', urban spaces of neoliberalism, new geographies of urban theory, and planetary urbanisation. We examine cases related migration, sexual minorities, the circulation of ideas, and gentrification. Examples come from both the 'global North' and the 'global South', with the aim of helping students understand when and how these categories may be useful.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: The formative work will be an essay plan that directly prepares students for the summative work.

Indicative reading: Sassen, Saskia. 2001. *The Global City: New York, London, Tokyo*. Second edition. Brenner, Neil and Nik Theodore (eds). 2002. *Spaces of Neoliberalism*. Davis, Mike. 2006. *Planet of Slums*. Robinson, Jennifer. 2006. *Ordinary Cities: Between Modernity and Development*. Brenner, Neil and Christian Schmid (eds). 2014. *Implosions/Explosions: Towards a Study of Planetary Urbanization*. Ghaziani, Amin. 2014. *There Goes the Gayborhood?*

Assessment: Essay (65%, 2000 words), class participation (20%) and presentation (15%) in the MT.

GY207 Half Unit Economy, Society and Space

This information is for the 2018/19 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the inter-relatedness of economy and society and how these impact places where people live and work. We start by looking at theories that challenge market based explanations of how places are shaped. We pay particular attention to housing choices and how these might confer social advantage or disadvantage. After this we use a series of place-based typologies and phenomenon to expand on the theory. Examples might include but are not limited to: suburbanisation, rural second homes and gentrification. We close by considering how changes in governance impact particular communities and places.

Teaching: 9 hours of lectures and 9 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: The formative work will be an essay plan that directly prepares students for the summative work.

Indicative reading: Bourdieu, P. (2005) 'Habitus'. In Jean Hillier and Emma Rooksby (eds) *Habitus: a sense of place*. 43-5. Harvey, D. (1989). *From Managerialism to Entrepreneurialism: The Transformation in Urban Governance in Late Capitalism*. *Geografiska Annaler. Series B, Human Geography*, 71(1), 3-17. Mace, A. (2017), *Spatial capital as a tool for planning practice*. *Planning Theory* 16(2) 119-132. Peck, J. (2011). *Neoliberal Suburbanism: Frontier Space*. *Urban Geography*, 32(6), 884-919. Savage, M. *The Lost Urban Sociology of Pierre Bourdieu* (chapter 45). In Gary Bridge and Sophie Watson (eds) *The new Blackwell companion to the city*. 511-520.

Assessment: Essay (100%, 3000 words) in the ST.

GY209 Half Unit The Economic Geography of Trade, Production and Development

This information is for the 2018/19 session.

Teacher responsible: Dr Enrico Vanino STC 4.21D

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Economics A (EC100) or Economics B (EC102). ST107 (or equivalent course in statistics) strongly recommended.

Course content: This course is concerned with economic geography. In particular we use ideas from International Trade, International Economics, Development and Regional Economics to talk about the location of economic activity across space and the consequences of uneven location. The module will look at the main international economics models, abstractions that help us focus on the key economic mechanisms and to develop a deeper understanding of those mechanisms. The main fundamental questions will be: a) what determines the distribution of production, trade and investment across countries? and b) what implications does this have for incomes and welfare.

The main topics covered during the module will be:

1. Introduction to trade
2. The Ricardian model of comparative advantage
3. Heckscher-Ohlin and factor endowments
4. Trade, globalisation and inequality
5. Krugman's New Trade Theories
6. Spatial Distribution of Trade and Production
7. Trade Policy
8. Gravity models
9. Heterogeneous firms and trade

Teaching: 20 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays and problem sets for formative assessment.

Indicative reading: Pugel T.A. International Economics. McGraw-Hill. Baldwin R and Martin P., (1999) Two waves of globalization: superficial similarities, fundamental differences, NBER working paper 6904. Autor D. Dorn D. and Hanson G. Assessment: Coursework (75%, 3000 words) in the LT. Other (25%) in the MT.

GY210 Half Unit The Economics of Cities

This information is for the 2018/19 session.

Teacher responsible: Prof John Henderson STC.S506b

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Economics A (EC100) or Economics B (EC102). ST107 (or equivalent course in statistics) strongly recommended.

Course content: Urban economics is concerned with the spatial form of cities and the division of national economic activity into cities, both at a point in time and over time. Three fundamental questions are: (1) Why are economic activities within a country so unequally distributed across space? (2) Why do cities (and more broadly agglomeration of firms and workers) emerge and in what locations? (3) Why are economic activities within cities unequally distributed in general and between areas near the city centre and those near or in the suburbs?

The main topics covered include:

Why do cities exist and why do firms cluster? Diseconomies in cities: Urban location, land rents, and land use patterns? What determines equilibrium city size and features of the urban system? City growth, location, and spatial transformation Land use regulation.

Teaching: 18 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays or problem sets.

Indicative reading: O'Sullivan. A. (8th edition) Urban Economics. Boston: Irwin- McGraw-Hill, 2012. Greenstone M. R. Hornbeck and E. Moretti (2010), "Identifying agglomeration economies: Evidence from winners and losers of large plant openings", Journal of Political Economy, Vol. 118, No. 3, 536-598. Linden L and J.E. Rockoff, (2008) "Estimates of the Impact of Crime Rates on Property Values from Megan's Law," American Economic Review, 98, 1103-1127. Eid, Jean & Overman, Henry G. & Puga, Diego & Turner, Matthew A. (2014) "The price of empowerment: Experimental evidence on land titling in Tanzania" Centre for Global Development WP #369

Assessment: Exam (50%, duration: 1 hour and 30 minutes) in the summer exam period.

Essay (20%, 1000 words) and other (30%) in the LT.

GY220 Environment: Science and Society

This information is for the 2018/19 session.

Teacher responsible: Dr Thomas Smith STC.421C and Prof David Jones STC.417

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography and BSc in International

Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines debates concerning the nature, cause, and effects of, and alternative solutions to, the key natural environmental degradation and pollution problems faced by human societies. Students will explore the role of science in environmental understanding and governance through a combination of lectures, classes and practical environmental monitoring.

The course consists of three sections, although the specific content, order and relative proportion of teaching may change with staff availability. Part A: Introduction and Themes: this introduces students to social scientific perspectives on scientific knowledge and environmentalism. Part B: Environmental Risk and Science: this section examines the physical science basis of current regional and global environmental risks, including geohazards and global atmospheric pollution. Part C: Science and Environmental Governance: this final section of the course examines how environmental science is incorporated in global environmental governance. The course concludes with an examination of the notion of sustainability science.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be expected to produce 3 pieces of coursework in the MT and LT. Three essays/reports in the MT and LT.

Indicative reading: No one book or small group of books adequately covers the themes considered in the course, and separate reading lists are provided for each distinct part of the syllabus. Basic reading material includes; T. Forsyth, *Critical Political Ecology*; The Politics of Environmental Science, 2003; A. Goudie (Ed), *The Human Impact Reader*, 6th edition, 2006; M. K. Hill, *Understanding Environmental Pollution*, 1997; J. Houghton, *Global Warming: The Complete Briefing*, 5th edition, 2015; M. Hulme, *Why We Disagree About Climate Change*, 2009; A.M. Mannion, *Dynamic World: Land Cover and Land-Use Change*, 2002; G. T. Miller (Ed), *Living in the Environment*, 2000; K. Smith, *Environmental Hazards*, 2001; United Nations Environment Programme, *UNEP Yearbook 2015*, 2015; M. Whitehead, *Environmental Transformations*, 2014.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Other (25%) in the LT.

Students may choose an environmental monitoring report (2000 words due in the LT) or a summative essay (2000 words due in the LT).

GY222 Applied Environmental Economics

This information is for the 2018/19 session.

Teacher responsible: Prof Susana Mourato STC.503 and Dr Sefi Roth STC.421A

Availability: This course is compulsory on the BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course is an introduction to economic principles in the analysis of environmental change and natural resource use, and in designing appropriate policy responses.

The first part of the course largely covers the concepts and tools of environmental economics, while the second part applies these concepts and tools to specific challenges for real world policy-making. Topics to be covered include: the evaluation of regulatory and market based instruments in controlling pollution; moral suasion and voluntary regulation; economics of natural resource use; economic growth, the environment and sustainable development; cost-benefit analysis and environmental valuation; economics of biodiversity and ecosystem services conservation; climate change economics; health and the environment; behavioural and happiness economics and the environment.

Teaching: 15 hours of lectures and 9 hours of classes in the MT. 15 hours of lectures and 9 hours of classes in the LT.

Formative coursework: Students will be expected to produce non-assessed coursework throughout the year that will include at least one essay and a series of quizzes, and may be asked to give class presentations.

Indicative reading: Detailed reading lists will be provided to support each course component. For an overview and introduction to the main issues covered by the course students may wish to consult the following: N Hanley and EB Barbier, *Pricing Nature: Cost-Benefit Analysis and Environmental Policy*, 2009; J Kahn, *The Economic Approach to Environmental and Natural Resources*, 3rd ed. 2005; B Field and M Field, *Environmental Economics*, 6th ed. 2012; DW Pearce, G Atkinson and S Mourato, *Cost-Benefit Analysis and the Environment: Recent Developments*, 2006; E Neumayer, *Weak Versus Strong Sustainability: Exploring the Limits of Two Opposing Paradigms*, 4th Edition, 2013.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words).

GY244 London's Geographies

This information is for the 2018/19 session.

Teacher responsible: Dr Alan Mace STC315a

Availability: This course is available on the BA in Geography and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: This course introduces you to cultural geography, with application to conditions of life, livelihood and urban experience in 19th, 20th and 21st century London. What is it that makes London such a specific kind of urban scene, and how have people sought to represent its specificity: this is the key question of the course. Rather than a comprehensive account of London's past and present, this course uses the synthetic (social, economic, political and cultural) tools of human geography to understand how and why London is a specific kind of city. London provides an opportunity for thinking about the interplay of culture, society, and space through time. We consider a series of questions about the spatial and social divides of the city and about urban and social transformation. Topics include, but are not limited to; landscape, spectacle, crime & terror, sexuality, migration & racism and labour politics. An important 'lab' component involves leaving the classroom to enter the LSE Archives and to walk the streets to interpret London's cultural geographies. You will be encouraged to access a wide range of sources to build up your interpretation of London, including; novels, film, photographs, music and blogs. You are encouraged to go on walks, to explore aspects of the city you do not already know, and to dig through archival material to find connections between past and present London.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 18 hours of lectures and 9 hours of classes in the LT.

Students on this course will have a reading week in Week 6 of Michaelmas Term and Lent Term.

Formative coursework: Students are expected to write two formative essays and to participate actively in classes in the MT and the LT.

Indicative reading: Mitchell D. 2002. *Cultural Geography*; a Critical

Reader. Oakes T et al. 2008. The Cultural Geography Reader.
Kureishi H. 1990. The Buddha of Suburbia. Nead L. 2000. Victorian
Babylon: People, Streets and Images in Nineteenth Century
London. Stedman Jones G.. 1984. Outcast London.

Assessment: Essay (40%, 3000 words) in the MT.
Essay (50%, 3750 words) and presentation (10%) in the LT.

GY245 Half Unit Quantitative Methods in Geography

This information is for the 2018/19 session.

Teacher responsible: Dr Felipe Carozzi STC 4.17

Availability: This course is compulsory on the BA in Geography and BSc in Geography with Economics. This course is available on the BSc in Economic History and Geography, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is not available as an outside option nor to General Course students.

Pre-requisites: GY140 Introduction to Geographical Research or a 1st year statistics course such as ST107 Quantitative Methods (Statistics)

Course content: This course provides students with an introduction to quantitative methods for geographical analysis, specifically regression analysis and Geographical Information Systems. An understanding of quantitative methods of this type is essential for those who wish to go on to do their own research and for those who will interpret and evaluate research in their future careers. The first part of the course is devoted to the principles of regression analysis as applied to quantitative social science. The second part of the course introduces students to the use of Geographical Information Systems in research. Theoretical discussion in the lectures is accompanied by practical computer classes in which students learn how to apply these methods on real data sets. The practical classes develop a range of skills which lead on to an assessed practical project.

Topics covered:

1. Introduction to quantitative methods
2. Regression analysis: linear models; parameter estimation; interpretation; R-squared; dummy variables
3. Regression analysis: hypothesis tests
4. Regression analysis: classical assumptions; omitted variables; reverse causality; heteroscedasticity; multicollinearity
5. Regression: non-linear models; practical applications in project work
6. GIS: Introduction
7. GIS: Spatial representation; vector data; raster data; remote sensing; databases, joins
8. GIS: Queries, spatial joins, overlay and data management
9. GIS: Examples

Teaching: 15 hours of lectures, 10 hours of classes and 2 hours of workshops in the MT.

Students on this course will have a reading week in Week 6.

Formative coursework: Formative work is based solely on the statistical part of the course. A dataset is provided alongside a specific set of questions.

Indicative reading: Studenmund, A.H. (various) Using Econometrics: a practical guide. Longman: London. ISBN: 032106481X. BLPES: HB139 S93. Bernhardsen, T (2002a). Geographic Information Systems: An Introduction. New York: John Wiley and Sons. Breslin, P., Frunzi, N., Napoleon, E., Ormsby, T. Getting to Know ArcView GIS. San Fransisco: ESRI Press.

Assessment: Project (100%, 4000 words) in the LT.

GY246 Half Unit Field Methods in Geography

This information is for the 2018/19 session.

Teacher responsible: Dr Murray Low STC 5.12 and Dr Ryan Centner STC 6.01c

Availability: This course is compulsory on the BA in Geography. This course is not available as an outside option nor to General Course students.

Course content: The course aims to prepare second-year students to undertake individual research projects. It examines the methodologies used in field-based geographical research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student's own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary qualitative research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers the following qualitative approaches to social science methodologies:

- (i) techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including ethics when conducting fieldwork;
- (ii) application of qualitative research techniques in the field; and
- (iii) techniques for designing, carrying out, and presenting an Independent Research Project.

Topics covered:

1. Planning an independent research project
2. Qualitative methodology in human geography: What can we know? What kind of knowledge can we gain about qualities of the social and spatial world? And how?
3. Interviews (plus questionnaires and focus groups): What people think, and are able/willing to tell us
4. Ethnography & observation: What people do, and maybe even how they feel about it
5. Transecting & comparing: Making sense of places
6. How to design a research project
7. Field-course location B: Background, context and themes
8. Field-course location B: Background, context and themes
9. Field-course location B: Background, context and themes
10. Field-course location B: Background, context and themes

Teaching: 9 hours of lectures and 9 hours of classes in the LT.

Students on this course will have a reading week in Week 6.

One week-long field-course to a non-UK location is associated with this course, normally in the final week of the Lent Term.

Students should be aware that, although the costs of this course are subsidised by the Department, they will be expected to make a substantial financial contribution themselves. There are bursaries available from the Department for students who can document financial need.

An alternative field exercise will be undertaken by students who are unable to participate in the above one-week residential field-course.

Formative coursework: Short exercises conducted in preparation for class sessions throughout the Lent Term.

Indicative reading: Alasuutari, P. et al. (2008) The SAGE Handbook of Social Research Methods. London: Sage. Barnes, J. A., (1979), Who Should Know What? GY247 Half Unit Field Methods in Geography & Environment

This information is for the 2018/19 session.

Teacher responsible: Dr Murray Low STC 5.12, Dr Ryan Centner STC 6.01c and Dr Thomas Smith STC 4.21C

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BSc in Economic History and Geography, BSc in Environment and Development and BSc in Environmental Policy with Economics. This course is not available as an outside option nor to General Course students.

Course content: The course aims to prepare second-year students to undertake individual research projects. It examines the methodologies used in field-based geographical and environmental research and evaluates their application to different kinds of research problems. It considers the choice of methodology which may be used in the student's own Independent Research Project (IRP) and how to plan research. It enables students to acquire familiarity with, and practice of, contemporary qualitative research techniques and to examine different ways of, and gain experience in, presenting research results. A further aim of the course is to enable students to evaluate critically the methodological validity of geographical literature.

The course covers the following approaches to social science methodologies:

- techniques for qualitative data analysis including structured and unstructured interviewing, participant observation, and research ethics, including ethics when conducting fieldwork;
- application of field-specific qualitative and field-specific quantitative research techniques in the field; and
- techniques for designing, carrying out, and presenting an Independent Research Project.

Topics covered:

- Planning an independent research project
- Qualitative methodology in human geography: What can we know? What kind of knowledge can we gain about qualities of the

social and spatial world? And how?

- Interviews (plus questionnaires and focus groups): What people think, and are able/willing to tell us
- Ethnography & observation: What people do, and maybe even how they feel about it
- Transecting & comparing: Making sense of places
- How to design a research project
- Field-course location C: Background, context and themes
- Field-course location C: Background, context and themes
- Field-course location C: Background, context and themes
- Field-course location C: Background, context and themes

Teaching: 9 hours of lectures and 9 hours of classes in the LT.

Students on this course will have a reading week in Week 6.

Field-course: One week-long field-course to a non-UK location is associated with this course, normally in the final week of the Lent Term. GY307 Half Unit Not available in 2018/19 Regional Economic Development

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Storper STC 4.07

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: In 2016, politics were shaped by regional development. In Britain, certain regions voted to leave the European Union and others (Greater London, Scotland) to stay. In the American presidential election in November, 473 counties voted for the Democratic Party candidate and about 2600 counties voted for the Republican. However, the 473 counties contain more than 2/3 of the country's economic output, a majority of its population, produce almost all of its technological innovations, have higher personal incomes, and are responsible for most of the country's exports. This is because economic development is uneven across regions, within countries and at a wider global scale, between countries and continents. Over the past 40 years, in the current cycle of economic development that is defined by globalization and new technologies, these differences have become sharper, leading to more sharply divided politics in many countries.

The future of many countries depends on the future of their regional development patterns: where prosperity is located, how regions and their people transition in response to changing economic forces.

If we bring this down to the personal level, where you live matters for your opportunities, economic welfare and lifestyle. But places do not have a secure position in the world: they can go up or down the economic hierarchy and, with them, alter the opportunities or lack thereof for the people in them, as well as define opportunities or obstacles to migration. In cycles of about 40 years, the hierarchies of incomes among places can undergo significant change. Once prosperous places can decline; formerly less wealthy places can, under some conditions, develop, but only under the right conditions. Those that survive the cycles do so by changing their economic base and many other features of the local economy and society. With such change, the ways we live in places also evolves.

In 2009, the Nobel Prize in economics was awarded to Paul Krugman for founding what is now known as the "New Economic Geography." Since then, researchers have assembled a powerful, unified vision of what causes cities, metropolitan areas, regions, and countries in the world to develop in a geographically uneven manner. This vision brings together theories of the location of firms and households, trade, local labor markets, transport and trade costs, and local development policies/politics, into a unified whole. There are challenges today for both the "473" counties and the other 2600. Roughly speaking, the 473 have to keep doing things that have made them prosperous, but this is a moving target as technologies change, and patterns of competition change at a local and global scale. Moreover, even prosperous city-regions have internal challenges, such as poor neighborhoods or unequal opportunities for their people. The less prosperous "2600" counties have different challenges: they have been largely bypassed by the positive dimensions of globalization and technological change. Yet regional policies in the US and other countries have not been very successful in helping them adjust to the current world.

In this course, we will learn the theories, analytical tools and data that explain these issues and frame the challenges for development of both prosperous and less prosperous regions.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: A variety of exercises including problems, reading analyses, use of examples that complement theoretical articles and so on. We draw these up as close as possible to the term, or even during the term, in order to enhance the student experience by making the examples relevant and contemporary.

Indicative reading: Pierre-Philippe Combes, Thierry Mayer, Jacques-François Thisse, 2008, *Economic Geography: The Integration of Regions and Nations*, Princeton: Princeton University Press. Assessment: Take home exam (100%) in the LT.

GY308 Half Unit The Economic Geography of Growth and Development

This information is for the 2018/19 session.

Teacher responsible: Prof Olmo Silva STC 5.06a

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Economics, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce students to the framework and tools used by economists to study the processes of growth and development, and analyse its determinants. After a short discussion of the basic modelling framework, the course will focus on empirical aspects. First, it will discuss the drawbacks and failures of simple models in which technological change fully determines the rate of growth of a country or region. Then it will present a set of enriching ingredients, which will allow for a better understanding of why different countries and regions around the world are characterised by different stages of development. The presentation of the material will be structured around four main blocks: Human Capital, Education and Growth; the Information Technology Revolution; Trade and Globalization; and the New Institutional Paradigm. The course will close with a discussion of how the original framework worked out by economists back in '60s, coupled with new insights, provides a flexible tool to derive policy implications for growth and development.

Topics covered:

1. Stylized facts and a general economic framework for studying growth
2. Physical and human capital accumulation
3. Information and Communication Technologies (ICT), innovation and growth
4. Trade and globalization: their effects on growth and inequality
5. Institutions and growth

Teaching: 10 hours of lectures, 9 hours of classes and 2 hours of classes in the LT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays.

Indicative reading: - Mankiw, G. (1995): "The Growth of Nations", *Brookings Papers on Economic Activity*, vol. 1. - Van Reenen, J. and B. (2010): "Culture and Institutions: Economic Development in the Regions of Europe", Journal of the European Economics Association, vol. 8.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY309 Half Unit The Political Geography of Development

This information is for the 2018/19 session.

Teacher responsible: Ms Megan Ryburn STC 3.06

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: A critical analysis of the politics of contemporary development processes in the South and the global interests that influence them. The course considers development as both practical pursuit and as a series of discourses and representations. Three key themes are covered:

1. Key concepts and historical overview.

Introduces critical approaches to development, and provides an overview of development during the Cold War.

2. Securing development in the 21st century

Addresses discourses and representations in relation to the security-development nexus, focusing on immigration, disease, drugs, and violence.

3. Doing development in the 21st century

Examines development in practice, looking especially at approaches to tackling informality and chronic unemployment, such as microfinance, and universal basic income.

Teaching: 13 hours and 30 minutes of lectures, 9 hours of classes and 2 hours of classes in the LT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay plan in the Lent Term.

Indicative reading: Power, M., 2018. Geopolitics and development. London: Routledge. Kapoor, I., 2008. The postcolonial politics of development. London: Routledge. Darling, J., 2016. Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 1500 words) in the LT.

GY310 Half Unit Urban Politics

This information is for the 2018/19 session.

Teacher responsible: Dr Murray Low STC. S512

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course covers theories and processes of contemporary urban development from a variety of perspectives – it aims to introduce students to key concepts in, and approaches to, politics in cities, as these have emerged and developed over time. Themes include, but are not limited to, political and economic power in cities, the role of 'elites', urban government finance, the politics of local economic development policy, the multidimensional role of culture in urban change, and the emergence of forms of urban governance. Case studies are largely drawn from cities in the United States and the United Kingdom, reflecting the development of core ideas in mainstream urban politics largely in these contexts.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Students on this course will have a reading week in Week 6.

Formative coursework: One essay plan for each piece of assessed coursework.

Indicative reading: David Harvey (2005) A Brief History of Neoliberalism. Robert Dahl (1961) Who Governs? Clarence Stone (1988) Regime Politics. Sharon Zukin (1995) The Cultures of Cities.

Assessment: Coursework (50%, 2000 words) in the LT.

Coursework (50%, 2000 words) in the MT.

GY311 Half Unit The Political Economy of Urbanisation

This information is for the 2018/19 session.

Teacher responsible: Dr Jayaraj Sundaresan STC3.04

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course covers theories and processes of contemporary urban development from a critical political economy perspective, addressing urban problems and policy responses in our rapidly urbanizing world. The course examines what urbanisation means to the state, to (global/domestic) businesses, and ordinary citizens, focusing on a selected set of key themes that are pertinent to the understanding of urban injustice. Such themes include, but not limited to, the understanding of the (social) production of unequal urban space, global circulations of urbanism, gentrification, displacement and dispossession. Case studies are largely drawn from cities in the majority world, especially East and Southeast Asia, which provide opportunities for students to contest urban theories that have largely been rooted in the experiences of the advanced economies.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay outline in the Lent Term.

Indicative reading: Harvey, D. (1989) The Urban Experience. Johns Hopkins University Press; Wu, F. (2015) Planning for Growth: Urban and Regional Planning in China. Routledge; Park, B-G. et al. Displacement. Policy Press; Lees, L., Shin, HB and López-Morales, E. (2016) Planetary Gentrification. Polity Press; Mathews, G. (2011) Ghetto at the Center of the World: Chungking Mansions, Hong Kong, The University of Chicago Press; Shao, Q. (2013) Shanghai Gone: Domicide and Defiance in a Chinese Megacity. Rowman & Littlefield
Assessment: Coursework (100%, 3000 words) in the ST.

GY312 Half Unit Geographies of Gender in the Global South

This information is for the 2018/19 session.

Teacher responsible: Dr Mara Nogueira

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course introduces students to the geography of gender inequalities and their variations at regional, national and local levels in the Global South. Particular attention is paid to the still-lagging but vital 'en-gendering' of development analysis and policy over time, and how gender is critical in understanding people's experiences of social, economic, demographic and political aspects of development as individuals, and in the context of households, communities and nation-states. Topics covered include the evolution of gender on 'development agendas' and the changing nature of gender framing and 'women's empowerment' in development policy and practice, the measurement of gender inequalities, domestic divisions of labour and household transformations, gendered employment, gendered dynamics of migration within and from the Global South, and gender in relation to reproductive health and health and healthcare in general.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay in the Michaelmas Term.

Indicative reading: Benería, L.; Berik, G. and Floro, M. (2015) Gender, Development and Globalisation, 2nd ed., London: Routledge; Chant, S. (2007) Gender, Generation and Poverty: Exploring the 'Feminisation of Poverty' in Africa, Asia and Latin America, Cheltenham: Elgar; Chant, S. (Ed.) (2010) The International Handbook of Gender and Poverty: Concepts, Research, Policy, Cheltenham: Elgar; Chant, S. and Gutmann, M. (2000) Mainstreaming Men into Gender and Development, Oxford: Oxfam; Coles, A.; Gray, L. and Momsen, J. (Eds) (2015) The Routledge Handbook of Gender and Development, London: Routledge; Cornwall, A., Harrison, E. & Whitehead, A. (Eds) (2007), Feminisms in Development, London: Zed; Jackson, C. and Pearson, R. (Eds) (1998), Feminist Visions of Development, Routledge; Marchand, M. and Parpart, J. (Eds) (1995), Feminism/Postmodernism/Development, London: Routledge; UN Women (2015) Progress of the World's Women 2015-16: Transforming Economies, Realising Rights, New York: UN Women; World Bank (2011) World Development Report 2012: Gender Equality and Development, Washington DC: World Bank

Assessment: Essay (100%, 3000 words) in the LT.

GY313 Half Unit Firms and Economic Geography: Location, Technology and Innovation

This information is for the 2018/19 session.

Teacher responsible: Dr Enrico Vanino STC 4.21D

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography and BSc in Environmental

Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have normally taken EC100 or EC102, and one or more of: EC201, GY201 or GY222

Course content: This course aims to develop theoretical and empirical understanding of spatial economic processes in order to study and evaluate a wide range of issues and policies. Particular emphasis will be put on regional economies, business and worker location decisions, focusing in particular on models of the location of economic and innovation activity with a particular emphasis on regional economies. We will analyse the New Economic Geography theories and the agglomeration of economic activity, with a particular focus on EU integration as a testing ground. We will also look at the global and local knowledge economy, focusing on core aspects of a society based on knowledge and technical progress and how this proceeds hand in hand with the enlargement of markets and the intensification of exchange. We will also explore the seeming contradiction that geographically localized knowledge may be increasingly significant just as so much of our world becomes more globalized.

Topics covered:

1. Core-periphery patterns and New Economic Geography theories
2. Formal tests of New Economic Geography models
3. Geographical clustering of firms
4. Spatial distribution of firms, skills and growth
5. Geographical clustering of innovative activities
6. Externalities: knowledge spillovers, networks and agglomeration
7. Relatedness, path dependency and resilience
8. Location strategies of multinational enterprises
9. The impact of foreign investment

Teaching: 20 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays and problem sets.

Indicative reading: Krugman P. (1991), "Geography and Trade" MIT Press, Cambridge (Mass.). Baldwin, R. and C. Wyplosz (2009), "Economics of European Integration", McGraw Hill, 3rd edition. Puga, D. Assessment: Coursework (100%, 3000 words) in the LT.

GY314 Half Unit

The Economics of Housing Markets and Migration

This information is for the 2018/19 session.

Teacher responsible: Prof Olmo Silva STC.S506a

Availability: This course is compulsory on the BSc in Geography with Economics. This course is available on the BA in Geography, BSc in Economic History and Geography and BSc in Environmental Policy with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have normally taken EC100 or EC102, and one or more of: EC201, GY201 or GY222

Course content: The main aim of this course is to analyse how decisions made by individuals influence the distribution of economic activities across space. The lectures will focus on how people sort across areas; on how they express their demand and preferences for specific locations and spatial attributes; and on how individual decisions carry important implications for the urban/regional economies and their labour markets. The emphasis will be on quantitative aspects and the lectures will cover both economic theories and related empirical methodology/applications. The course will be split into two interrelated blocks. One will concentrate on residential markets and study decisions made by individuals in relation to tenure choice and demand for housing space. Some time will be devoted to analysing how these processes affect the neighbourhoods where individuals live in terms of social stratification, externalities and crime. The other part of the course will analyse the dynamics of local labour markets, geographical mobility, national and international migration and their effects on the local economy.

Topics covered:

1. Housing markets: the own vs. rent decision
2. Housing markets: the elasticity of supply and demand of space
3. Housing markets: hedonics to uncover "what people want"
4. Neighbourhood effects: do places matter?
5. The externalities of homeownership
6. The economic determinants of crime
7. Local labour markets and spatial mismatch
8. The economic determinants of migratory flows
9. The local economic effects of migration: labour markets
10. The local economic effects of migration: innovation and entrepreneurship

Teaching: 20 hours of lectures and 9 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to prepare for group discussion of some readings and hand in short essays and problem sets.

Indicative reading: Hilber, C. (2005): "Neighborhood Externality Risk and the Homeownership Status of Properties", *Journal of Urban Economics*, 57(2), 213-241. Mayer, C. and T. Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY315 Half Unit

Geographies of Race

This information is for the 2018/19 session.

Teacher responsible: Dr Austin Zeiderman STC6.01d

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will critically analyze the intimate relationship between race and geography in the modern world. Through a range of historical and contemporary cases, it will examine how interconnected forms of racial and spatial difference are produced, reproduced, and transformed. Focusing on the material and cultural formation of racialized geographies, students will learn to recognize how racially inflected discourses and practices shape the production of space and how geographical location matters to racial classification, identification, and discrimination. The course will be organized around a series of archetypal spaces: for example, the body, the nation, the colony, the city, the home, the prison, the plantation, the border, the school, or the street. In each case, students will examine the confluence of race and space within broader themes, such as colonialism, capitalism, urbanization, globalization, environmentalism, migration, and incarceration. Since race often intersects with other forms of difference, students will also learn to interrogate the influence of gender, class, religion, and sexuality on the production of space. Texts from human geography, critical race theory, colonial and postcolonial studies, history, sociology, and anthropology in addition to other media, such as film, literature, journalism, and photography, will provide students with conceptual resources and methodological tools. Ultimately, the objective is to advance a comparative, critical analysis of the relationship between geography and race, past and present, and to explore the conditions of future possibility for the linked political projects of anti-racism and spatial justice.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay outline in the Michaelmas Term.

Indicative reading: A detailed reading list will be provided at the beginning of the course, but will include works such as: Stuart Hall, "Race, Articulation and Societies Structured in Dominance" (1980); Michael Omi and Howard Winant, "Racial Formation" (1986); Kimberlé Crenshaw, "Mapping the margins: Intersectionality, identity politics, and violence against women of color" (1991); Claire Alexander and Caroline Knowles, *Making Race Matter: Bodies, Space and Identity* (2005); Claire Dwyer and Caroline Bressey, *New Geographies of Race and Racism* (2008); Hannah Arendt, *The Origins of Totalitarianism* (1951); Paul Gilroy, *There Ain't No Black in the Union Jack: The Cultural Politics of Race and Nation* (1987); Edward Said, *Orientalism* (1978); Frantz Fanon, *The Wretched of the Earth* (1961); David R. Roediger, *The Wages of Whiteness: Race and the Making of the American Working Class* (2007); Laura Pulido, "Rethinking Environmental Racism: White Privilege and Urban Development in Southern California" (2000); John Hartigan, *Racial Situations: Class Predicaments of Whiteness in Detroit* (1999); bell hooks, "Homeplace: A Site of Resistance" (1991); C. L. R. James, *The Black Jacobins: Toussaint L'Ouverture and the San Domingo Revolution* (1938); Michelle Alexander, *The New Jim Crow: Mass Incarceration in the Age of Colorblindness* (2010); Ruth Wilson Gilmore, *Golden Gulag: Prisons, Surplus, Crisis, and Opposition in Globalizing California* (2007); Paul Gilroy, *Black Atlantic: Modernity and Double Consciousness* (1993).

Assessment: Essay (75%, 2500 words) in the LT.
Presentation (25%) in the MT.

GY316 Half Unit Gender in High Income and Emerging Economies

This information is for the 2018/19 session.

Teacher responsible: Dr Martina Klett-Davies

Availability: This course is available on the BA in Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

Course content: Gender inequality in a global context; Production and reproduction; Gender and identity; Theorising the changing organisation of work, gender divisions between paid and unpaid work; Global cities: polarisation and feminisation of work; Migrant workers and the global care chain. Changing gender divisions in high income and emerging economies – in the UK, USA, Germany, China and in the Scandinavian and Eastern European countries; Policies for gender equality.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: 1 formative mock exam in LT.

Indicative reading: No one book covers the entire syllabus, but the following are useful basic reading:

Evans, M. (2017) *The Persistence of Gender Inequality*; Jain, D. and Elson, D (Eds) (2011) *Harvesting Feminist Knowledge for Public Policy*; Karamessini, M, and Rubery, J. (2014) *Women and Austerity: The Economic Crisis and the Future for Gender Equality*; Lutz, H. (2011) *The New Maids*, London: Zed; McDowell, L. (2013) *Working Lives: Gender, Migration and Employment in Britain, 1945–2007* Chichester: Wiley-Blackwell; McDowell, L. (2009) *Working Bodies: Interactive Service Employment and Workplace Identities*; Sassen, S. (2007) *Sociology of Globalization*, London: W.W. Norton; Taylor, Y. (2016) *Fitting Into Place? Class and Gender Geographies and Temporalities*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY326 Half Unit Sustainable Business and Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Richard Perkins STC.413

Availability: This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course seeks to explore and critically interrogate the governance of environmental sustainability by corporate and financial actors - commonly framed in terms of corporate social responsibility (CSR) and sustainable and responsible investment (SRI), respectively. Drawing on a range of theoretical ideas, the emphasis of the course is on providing students with an understanding of the motives, practices and outcomes of market actors' growing involvement in sustainability. Topics covered include strategic CSR, corporate self-regulation, governing through environmental ratings, international climate finance, green bonds, greenwashing and the relationship between financial and environmental performance.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce a

formative issue brief in the Michaelmas Term.

Indicative reading: Blowfield, M. and A. Murray (2014) *Corporate responsibility: A critical introduction*, 3rd edition. Oxford: Oxford University Press

Assessment: Other (100%) in the LT.

Issue Brief with Critical Reflection (3500 words)

GY327 Half Unit Global Environmental Governance

This information is for the 2018/19 session.

Teacher responsible: Dr Myung Ae Choi STC3.17 and Dr Michael Mason STC5.10

Availability: This course is available on the BA in Geography, BSc in Accounting and Finance, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course examines the issues, actors and processes that shape environmental governance at the transnational and global scales. Introductory lectures on the global environmental policy process introduce different scholarly perspectives informing recent and current research: these approaches are referred to as subsequent lectures address particular actor groups, processes and issues. Students are encouraged to think critically about the ways in which the regulation of global environmental risk is framed and politically negotiated.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce a formative essay in the Lent Term.

Indicative reading: Betsill, M.M., Hochstetler, K. and Stevis, D. (eds.) (2014) *Advances in international environmental politics*, second edition, Basingstoke: Palgrave Macmillan. Biermann, F. (2014) *Earth system governance: World politics in the Anthropocene*, Cambridge, MA: MIT Press. Fuentes-George, K. (2016) *Between preservation and exploitation: Transnational advocacy networks and conservation in developing countries*, Cambridge, MIT: MIT Press. Gupta, A. and Mason, M. (2014) *Transparency in global environmental governance: Critical perspectives*, Cambridge, MIT: MIT Press. O'Neill, K. (2017) *The environment and international relations*, second edition, Cambridge: Cambridge University Press

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY328 Half Unit Political Ecology of Development

This information is for the 2018/19 session.

Teacher responsible: Dr Kasia Paprocki STC 4.21B

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the complex relationships between development, poverty and the environment. It covers a range of important natural resource and environmental issues, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in political ecology and

critical development studies, the course examines several topics, including: the politics of sustainable development; environmental governance and tenure; and critical resource issues.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay plan in the Michaelmas Term.

Indicative reading: Li, T (2007), *The Will to Improve*, Durham: Duke University Press; Scott, J (1991) *Seeing Like a State: How Certain Schemes to Improve the Human Condition Have Failed*, Yale University Press; West, P (2006) *Conservation is Our Government Now: The Politics of Ecology in Papua New Guinea*. Durham: Duke University Press.

Assessment: Essay (100%, 4000 words) in the LT.

GY329 Half Unit Applied Economics of Environment and Development

This information is for the 2018/19 session.

Teacher responsible: Dr Charles Palmer STC3.03

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Applied Environmental Economics (GY222) and/or Intermediate Microeconomics (EC201)

Course content: This course explores the complex relationships between economic development, poverty and the environment. It covers a range of important natural resource and environmental issues in developing countries, and provides students with the necessary tools to critically evaluate how these issues have been addressed by different stakeholders and at different levels of governance. Using concepts and analytical tools grounded in applied economics, primarily environmental and development economics, the course will examine a range of topics, including: the poverty-environment trap; property rights and governance; the food-energy-water nexus; biofuels; and urbanization.

Teaching: 10 hours of lectures and 9 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce a 'mock exam' essay during the Lent Term.

Indicative reading: Barbier, E (2005) *Natural Resources and Economic Development*, Cambridge University Press. Lopez, R., and M. Toman (2006) *Economic Development and Environmental Sustainability*. Columbia University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

GY331 Half Unit Geographies of Global Migration

This information is for the 2018/19 session.

Teacher responsible: Dr Claire Mercer STC 4.18 and Dr Romola Sanyal STC 3.05

Availability: This course is available on the BA in Geography, BSc in Economic History and Geography, BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: **Section 1: Introduction**

Week 1 Geographies of global migration

Week 2 Concepts

Section 2: Migration and development

Week 3 The migration-development nexus

Week 4 Remittances

Week 5 Diaspora policies

Week 7 African diasporas

Section 3: Security and migration

Week 8 Geopolitics of migration

Week 9 Borders

Week 10 Forced migration and refugees I

Week 11 Forced migration and refugees II

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce two pieces of formative work in the Lent Term

Indicative reading: Cohen, R. (2008) *Global diasporas: an introduction*, second edition, Routledge, London. Harris, T. (2013) *Geographical diversions: Tibetan trade, global transactions*, University of Georgia Press, Athens. Knott, K. and S. McLoughlin (eds) (2010) *Diasporas: concepts, intersections, identities*, Zed, London. Samers, M. (2010) *Migration*, Routledge, Oxford. Mercer, C., B. Page and M Evans (2008) *Development and the African diaspora: place and the politics of home*, Zed, London. Van Naerssen, T., E. Spaan and A. Zoomers (eds) (2011) *Global migration and development*, London, Routledge

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Coursework (25%, 1500 words) in the LT.

GY350 Dissertation

This information is for the 2018/19 session.

Teacher responsible: Dr Claire Mercer STC.418

Other teachers responsible: Student's Academic Adviser in the Department of Geography and Environment

Availability: This course is compulsory on the BA in Geography. This course is available on the BSc in Environment and Development, BSc in Environmental Policy with Economics and BSc in Geography with Economics. This course is not available as an outside option nor to General Course students.

For students required to, or choosing to, submit an independent research project ('IRP') as part of a Bachelor's degree within the programmes' listed above.

Pre-requisites: GY2A0 or GY240 Geographical Research Techniques (Spatial, Social and Environmental) are a pre-requisite.

Course content: Students plan their own independent research project from start to finish on a geography topic of their choice. Carrying out the project generally includes reviewing the literature in their chosen topic area, formulating a viable and geography-relevant research question, analysing primary or secondary evidence or other material appropriate to the investigation (often a case study, data set, archival source, fieldwork observation, survey results or interviews, but also other material), and drafting the findings from their investigation into a final, polished submission. Students are expected to deal with the many procedural and analytical decisions that arise in independent research themselves, with guidance from Academic Advisers and others.

Teaching: 6 hours of lectures in the MT. 2 hours of classes in the LT. In the course of conducting their independent research students can draw on various forms of teaching support. A workshop on conducting the IRP will be held early in MT. Students regularly report on their research progress to their Academic Advisers during regular meetings in MT and LT. Students are also assigned a PhD student in the Department who is familiar with their general research topic. Students have the option to arrange further supervision with their PhD Adviser on an individual basis. Students will also present their research in progress to their peers and their Academic Advisor early in Lent Term.

Formative coursework: Students are required to produce an extended proposal which they must submit during the MT. They will be expected to report regularly to their Academic Adviser on

the progress they are making on their dissertation, at least during regular termly Advisee meetings, if not more frequently. Students may also choose to arrange additional oversight and update arrangements with either their Academic Adviser or PhD Adviser. Students are also expected to deliver a presentation on their dissertation project in a workshop during the LT.

Assessment: Research project (100%) in the ST. Dissertations should not exceed 10,000 words, exclusive of appendices and other supportive material. Appendices may be used for supporting documentation and evidence, but not for discussion and analysis. One copy of the dissertation must be submitted to the Undergraduate Office in S406 by the published deadline, and by the same deadline an electronic copy must be submitted on Moodle.

HY113

From Empire to Independence: The Extra-European World in the Twentieth Century

This information is for the 2018/19 session.

Teacher responsible: Dr Tanya Harmer SAR M.11 and Dr Svetozar Rajak SAR 3.15

Availability: This course is available on the BA in Geography, BA in History, BA in Social Anthropology, BSc in Government and History, BSc in International Relations, BSc in International Relations and History, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An introductory survey of events outside Europe in the twentieth century, with a particular emphasis on the collapse of the Western colonial empires, the development of relations between the West and the new states within Asia and Africa, revolutionary developments in Latin America, and the rise of non-Western models of political development. The course includes the state of the European empires in the first half of the century; the Japanese challenge to the West; the Chinese revolution; Indian independence; the decolonization process in Asia and Africa; the Japanese developmental state; the rise of the non-aligned movement; Caribbean states' independence and the Cuban Revolution; the development of the Arab and non-Arab Middle East; American and Soviet relations with the Third World; post-independence South Asia; the modernization and underdevelopment debates; post-independence Africa; China under Mao and Deng; the rise of Islamic fundamentalism.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 9 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6 of the Michaelmas Term and the Lent Term. There will be a revision lecture and class in the Summer Term.

Formative coursework: Students will be asked to write at least three essays and to present a number of brief class reports

Indicative reading: W G Beasley, *The Rise of Modern Japan* (1990); A Best, J Hanhimäki, J Maiolo and K Schulze, *International History of the Twentieth Century* (2001); J Darwin, *Britain and Decolonization* (1988); J P Dunbabin, *International Relations since 1945*, Vol 1, *The Cold War, the Great Powers and their Allies* (1994) Vol 2, *The Post-Imperial Age, The Great Powers and the Wider World* (1994); D Fieldhouse, *Black Africa, 1945-1980* (1986); Goldschmidt, *A Concise History of the Middle East*; R Holland, *European Decolonization, 1918-81* (1985); W Keylor, *The Twentieth Century World* (1984); S Sarkar, *Modern India, 1885-1947* (1983); J Spence, *The Search for Modern China* (1990); M Yapp, *The Near East since the First World War* (1991); Skidmore and Smith, *Modern Latin America* (2005).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY116

International History since 1890

This information is for the 2018/19 session.

Teacher responsible: Prof David Stevenson 3.11 (SAR)

Availability: This course is compulsory on the BSc in International Relations and History. This course is available on the BA in History, BA in Social Anthropology, BSc in Government and History, BSc in International Relations, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to equip students with a comprehensive knowledge of international politics since 1890, to provide a factual grounding and interpretive apparatus necessary to understand the contemporary world, and to survey the main historiographical debates. Lectures and classes examine the origins, course, and aftermath of the First World War; the Great Depression, appeasement, and the origins of the Second World War in East Asia and Europe; the course and aftermath of the Second World War and the global origins of the Cold War; and aspects of the Cold War world, including decolonization, European integration, the Arab-Israeli conflict, the 'American war' in Vietnam, and peaks and troughs of tension between the superpowers from the Cuban Missile Crisis to détente. The course closes with the end of the Cold War and the origins of the post-Cold War era.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

There will be a reading week in the Michaelmas and the Lent terms. There will be a revision lecture and class in the Summer Term.

Formative coursework: Students will be required to write three 2,000-word essays during the course of the year, two in MT and one in LT, from topics chosen from a past examination paper or designated in the course reading list, and in addition to complete a one-hour mock examination in LT. Essays and mock examination do not form part of the final course assessment. However, they are required components of the course, and students must complete them in order to be admitted to the course examination.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be found in the HY116 Moodle site. The following works offer useful background: students should consider reading one of them in advance: A. Best, J. Hanhimäki, J. Maiolo, K. E. Schulze, *International History of the Twentieth Century and Beyond* (2015); W R Keylor, *The Twentieth Century World and Beyond: an International History since 1900* (2011).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY118

Faith, Power and Revolution: Europe and the Wider World, c.1500-c.1800

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Keenan SAR.2.13

Availability: This course is available on the BA in History, BA in Social Anthropology, BSc in Government and History, BSc in International Relations and History, BSc in Politics, BSc in Politics and History, BSc in Politics and International Relations and BSc in Social Anthropology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the international history of the early modern period by examining the complex political, religious, military and economic relationships between Europe and the wider world. The period between 1500 and 1800 enables the course to introduce students to a crucial

period in international history. In political terms, it covers the rise of major dynastic states, with increasingly centralised institutions and concepts such as absolutism to promote the authority of the monarch, as well as the challenges to that authority and growing interest in political and social reform, culminating in the revolutions examined at the end of the course. Internationally, the period witnessed the gradual consolidation of leading European powers, as reflected in the Treaty of Westphalia (1648), with formerly peripheral states emerging to challenge their position by the early eighteenth century. At the same time, the rise of major Islamic empires in Eurasia and the growing contact between Europe and the wider world provide students with important points of comparison between European and non-European states. The intellectual, religious and cultural developments of this period provide an important context for these major political events. The course will discuss the influence of key movements, such as the Renaissance, the Scientific Revolution and the Enlightenment, which re-ignited an interest in the Classical past and fostered a culture of rational enquiry into the natural world. Yet religion remained a vital component in the world-view of contemporaries, whether Christian, Muslim, or Jewish. This world-view was subject to challenges throughout the period, as during the Reformation, and often sought to impose its own orthodoxy, whether through religiously-motivated conflicts or the persecution / conversion of certain groups. The course seeks to familiarise students with some of the most important issues and current debates on these aspects of this period. While its scope is necessarily broad in nature, the course will help students to deal with the dynamics of continuity and change over a long period of time.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures, 10 hours of classes and 1 hour of workshops in the LT. 1 hour of lectures and 1 hour of classes in the ST. There will be a reading week in the Michaelmas and the Lent terms and a revision lecture and class in the Summer Term.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay in the ST. The third formative essay is a mock exam answer, which will be written by students as part of their revision during the Easter break, then graded by teachers and given written feedback in the first week of Summer Term.

Indicative reading: Beat Kümin (ed.), *The Early Modern World*, 2nd Edition (2014) D208 E81. Charles Parker, *Global Interactions in the Early Modern Age, 1400–1800* (2010) HN13 P23. Euan Cameron (ed.), *Early Modern Europe: An Oxford History* (2001) D228 E11. Chris Cook and Philip Broadhead, *The Routledge Companion to Early Modern Europe, 1453-1763* (2006) D208 C77. Paul Kennedy, *The Rise and Fall of the Great Powers: Economic Change and Military Conflict from 1500-2000* (1989) D217 K31. Richard Bonney, *The European Dynastic States, 1494-1660* (1991) D228 B71. William Doyle, *The Old Order in Europe, 1660-1800* (1992) D273.A3 D75. Marshall Hodgson, *Rethinking World History: Essays on Europe, Islam and World History* (1993) D21.3 H69. Stephen F. Dale, *The Muslim Empires of the Ottomans, Safavids and Mughals* (2010) DS292 D13. Jack Goldstone (ed.), *Revolution and Rebellion in the Early Modern World* (1991) D210 G62. K. N. Chaduri, *Asia before Europe: Economy and Civilisation of the Indian Ocean from the Rise of Islam to 1750* (1990) DS339 C49

Assessment: Exam (50%, duration: 2 hours) in the summer exam period. Project (50%, 10000 words) in the LT. Please note that this course has an assessed group project, which forms 50% of the final course grade. This project consists of a final piece of work, of no more than 10,000 words, which is written by all members of the group and submitted at the end of LT. The grade for this project is then shared by the group's members.

HY119

Thinking Like A Historian

This information is for the 2018/19 session.

Teacher responsible: Dr Taylor C. Sherman SAR M.10

A permanent member of International History staff supervises this course. LSE Teaching Fellows lead the group-work sessions.

Availability: This course is compulsory on the BA in History and BSc in International Relations and History. This course is available on the BSc in Politics and History. This course is not available as an outside option. This course is available with permission to General Course students.

This course is optional for General Course students whose home department is International History. This course is optional for first year BSc Government and History students. Students for whom the course is optional must commit to the course when they choose it.

Course content: This course offers hands-on tutorials in the skills required to get the most out of classes and write essays for History courses. Students are taken through each of the skills required: reading well and taking good notes; asking good questions of sources, classmates and teachers; turning notes into essays; developing persuasive arguments in essays and presentations; identifying and using historiography; writing well; revision and improvement. A training session on presentation skills is also included.

Teaching: 7 hours and 30 minutes of workshops in the MT. 1.5 hour workshop each week in weeks 3, 4, 5, 7 and 8 of Michaelmas Term only.

Formative coursework: Formative work for this course involves step-by-step drafting of an essay for HY113 or HY116.

Indicative reading: Ludmila Jordanova, *History in Practice* (2nd edn., 2016). Mary Abbott, *History Skills* (2nd edn, 2008). Black and MacRaild, *Studying History* (3rd edn. 2007).

Assessment: There is no summative assessment for this course.

HY200

The Rights of Man: the History of Human Rights Discourse from the Antigone to Amnesty International

This information is for the 2018/19 session.

Teacher responsible: Dr Timothy Hochstrasser Sardinia House 2.14

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Human Rights are often assumed to have a precise twentieth-century origin in the 1948 Universal Declaration or in the succeeding decades of increasing activism. However, the history of human rights discourse and its practical impact emerged as only the latest stage of a sequence of intellectual debates and real-life struggles in specific historical settings over political, religious, economic rights, broadly defined. Different cultural milieus have produced a variety of contexts for working out tensions between claims by individuals or minorities for autonomy on the one hand and the rival demands of collective obligation and identity on the other.

This course will seek to explore an (inevitably selective) range of these historical contexts in order to demonstrate the continuity of perennial themes of conflict between the claims of individual actors and corporate institutions, whether states, churches, empires or other institutions, while also showing how and when key changes take place in the recognition of rights of political action, conscience, property ownership, gender identity and workers' rights etc. The growth of toleration and free speech, the abolition of slavery and torture, and the role of Declarations of

Rights will all be examined, but less familiar subjects will also find their place. The contribution of the conceptual legacy and historical inspiration of Greece and Rome will be recognised as will the crucial role of the political thought of the High Middle Ages, and at the other end of the course specific connection will be made to the recent development of human rights organisations.

In each session a contrasted selection of contemporary writings will be studied to recover the intellectual framework of the discussion and the role of the dispositive political, social, and economic circumstances of the debate will also be considered.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

There will be a reading week in week 6 of the MT and the LT. Students will be expected to read essential primary and secondary material for each weekly meeting, to participate fully in class discussions and offer presentations. Both participation and presentations will form part of summative assessment.

Formative coursework: There will be one essay of 3,000 words to be submitted in the Michaelmas Term.

Indicative reading: Michael Barnett, *Empire of Humanity: A History of Humanitarianism* (Ithaca, 2011). Akira Iriye, Petra Goedde and William Hitchcock (eds.), *The Human Rights Revolution: An International History* (Oxford, 2012). R. Ishay, *The History of Human Rights*, (Berkeley, 2004). Assessment: Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Class participation (15%) and presentation (15%) in the MT and LT.

HY206

The International History of the Cold War, 1945-1989

This information is for the 2018/19 session.

Teacher responsible: Dr Piers Ludlow SAR 2.16

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History.

This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Cold War dominated the second half of the 20th century, but until recently we had only an imperfect sense of what it was all about. Historians wrote about it, of necessity, from within the event they were seeking to describe, so that there was no way to know its outcome. And because only a few Western countries had begun to open their archives, these accounts could only reflect one side of the story. Cold War history, hence, was not normal history: It was both asymmetrical and incomplete. The end of the Cold War and the subsequent partial opening of Soviet, Eastern European, and Chinese archives have revolutionised the field. Everything we thought we knew is up for reconsideration, whether because of the new documents available to us, or as a consequence of being able to reflect on how it all came out in new ways - given that the historical discipline has evolved methodologically as well.

The course will provide an introduction to key topics in the new, international history of the Cold War. The selected topics vary from the study of specific Cold War crises to the exploration of broader themes such as the roles of ideology and technology.

Course objectives: (i) To equip students with comprehensive knowledge of the international politics of the Cold War; (ii) To offer a firm basis for more advanced historical work in this area; (iii) To provide some of the factual grounding and conceptual apparatus necessary to understand the contemporary world.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Students are expected to keep up with readings for weekly seminars, and to participate in the class discussions.

There will be a reading week in the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Barrass, G, *The Great Cold War* (2009); Gaddis, J L, *The Cold War: A New History*; Hanhimäki, J & Westad, O A, *The Cold War: A History in Documents and Eyewitness Accounts*; Leffler, M P, *For the Soul of Mankind* (2007); Leffler, M P & Painter, D, *Origins of the Cold War* (2005); Reynolds, D, *One World Divisible: A Global History since 1945* (2001); Sarotte, M, 1989 (2009); Westad, O A, *Reviewing the Cold War: Approaches, Interpretations, Theory* (2000); Westad, O A, *The Global Cold War* (2005);

Assessment: Essay (35%, 3500 words) in the LT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the MT and LT.

HY221

The History of Russia, 1682-1825

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Keenan SAR 2.13

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years, General Course students and as an outside option where regulations, timetabling constraints and teaching capacity permit.

Course content: The course provides an introduction to the history of Russia in all its major aspects from the reign of Peter I to the accession of Nicholas I. The following topics are studied: Russia in 1682; the impact of the reign of Peter I on the internal development and international position of Russia; the social and political developments of the period 1725-1762; popular revolt during the eighteenth century; the domestic and foreign policies of Catherine II; the impact of the Enlightenment and the French Revolution on Russia; Russia and the Napoleonic Wars; the failure of constitutional and social reform in the first quarter of

the nineteenth century; the policies towards non-Russians within the empire; the Decembrist Revolt of 1825. The course is taught chronologically but several main themes are addressed throughout the period. These themes include: tsarist rule as an instrument of both reform and reaction; the relationship between the ruler and the major social groups; the significance of serfdom for Russia's economic, institutional and legal development; the 'missing' middle class; the nature and impact of Western ideas on Russia; the role of the Orthodox Church within the Russian state; the growth of a disaffected elite in Russia; the relationship between Russia and other European powers; the development of Russia as a 'great power'; the policies towards the non-Russians in the multi-ethnic empire; the growth of a Russian national consciousness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in Michaelmas and Lent terms. There will be a revision lecture in Summer Term.

Formative coursework: Students will be required to write three essays, one of which will be done under examination conditions

Indicative reading: A full reading list will be provided at the start of the course. Useful introductory works include: J Hartley, *A Social History of the Russian Empire 1650-1825*; S Dixon, *The Modernization of Russia: 1682-1825*; M Raeff, *Understanding Imperial Russia: State and Society in the Old Regime*; J Billington, *The Icon and the Axe; An Interpretive History of Russian Culture*; A Kahan, *The Plow, the Hammer and the Knout: An Economic History of 18th Century Russia*; P Dukes, *The Making of Russian Absolutism, 1613-1801*; E Kimerling-Wirschafter, *Russia's Age of Serfdom*; D Saunders, *Russia in the Age of Reaction and Reform, 1801-1881*.

Assessment: Exam (85%, duration: 3 hours) in the summer exam period.

Presentation (15%).

HY226

The Great War 1914-1918

This information is for the 2018/19 session.

Teacher responsible: Professor David Stevenson, Sardinia House 3.11

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The international and comparative history of the First World War. The military, diplomatic, political, economic, social, and cultural aspects of the conflict will all receive attention. The origins and outbreak of the war; the military campaigning on the Western, Eastern, Italian, and extra-European Fronts; the war at sea and in the air; the intervention of neutral powers, war aims and attempts to negotiate peace; domestic politics in the belligerents; the war's economic and social effects; the experience of combat; the Russian Revolution and the road to the Armistice; the impact of the war on the international system and on individual and collective consciousness.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in the Michaelmas and the Lent terms and a revision lecture in the Summer Term.

Formative coursework: Students will be required to write one essay in the MT and two essays in the LT. They will also be required to do a timed mock exam essay at the end of LT.

Indicative reading: C. Clark, *The Sleepwalkers: How Europe Went to War in 1914* (2013); N. Ferguson, *The Pity of War* (1998); A. Watson, *Ring of Steel: Germany and Austria-Hungary in World*

War I (2014); A. Millett & W. Murray (Eds), *Military Effectiveness, Volume I. The First World War* (1988); H. Strachan (ed), *The Oxford Illustrated History of the First World War* (1998); H. Strachan, *The First World War: Vol. I. To Arms* (2005); D. Stevenson, *1914-1918: The History of the First World War* (2004); A. Kramer, *Dynamic of Destruction, Culture and Mass Killing in the First World War* (2007); R. Chickering, *Imperial Germany and the Great War, 1914-18* (1998); J. Winter (ed), *The Cambridge History of the First World War* (3 vols, 2014).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY232

War, Genocide and Nation Building. The History of South-Eastern Europe 1914-1990

This information is for the 2018/19 session.

Teacher responsible: Dr Andrea Mason SAR M.09

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The course aims to explain the history of these regions as expressed and moulded by the peoples and their leaders during a particularly turbulent period in European History. Attention will be paid to two European wars and the Russian Revolution, all of which had a profound impact on these countries' freedom to determine their destiny. The study of the inter-war period will include a debate of the reasons for the collapse of democratic institutions, the emergence of patriotic and anti-Semitic movements, economic failures and responses to German and Italian aggression. The establishment, development and the collapse of Soviet domination of the region after the Second World War will be discussed on the background of ethnic and inter ethnic conflicts. In addition political, economic and cultural theories, which formed the background to the emergence of the independent states of Eastern and South Eastern Europe, will be considered. The course will develop these themes in the history of Poland, Czechoslovakia, Hungary, Bulgaria, Romania, Yugoslavia, Albania and the Baltic States. Final lectures will concentrate on the transition from Communism to democratic states. The break up of Yugoslavia and the wars in the Balkans will be considered in a separate lecture.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in Michaelmas and Lent terms, and revision session in Summer Term.

Formative coursework: One essay in the MT, one essay in the LT and a timed essay as exam preparation.

Indicative reading: R J Crampton, *Eastern Europe in the Twentieth Century* (1994); S K Pavlowitch, *A History of the Balkans 1804-1945* (1999); I Y T Berend, *Decades of Crisis. Central and Eastern Europe before World War II* (1998); A J Prazmowska, *Eastern Europe and the Outbreak of the Second World War* (1999); P G Lewis, *Central Europe since 1945* (1994); T Rakowska-Harmstone, *Communism in Eastern Europe* (1979); G Swain & N Swain, *Eastern Europe since 1945* (1993); F Fejto, *A History of the People's Democracies; Eastern Europe since Stalin* (1971); J Rothschild, *Return to Diversity. A Political History of East Central Europe since World War II* (1990); G Stokes, *The Walls Came Tumbling Down. The Collapse of Communism in Eastern Europe* (1993).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY235**Modernity and the State in East Asia:
China, Japan and Korea since 1840****This information is for the 2018/19 session.****Teacher responsible:** Dr Peter Millwood**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

May be taken by 3rd years where regulations permit.

Course content: The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. The course is concerned with providing a comparative political history of the major East Asian countries, China, Japan and Korea, in the period from the Opium War to the 1990s. It begins by looking at the impact of the arrival of Western imperialism in the mid-nineteenth century and the respective approaches taken by Japan, Korea and China in response to this encroachment. For Japan, it covers the rise of the Meiji state, the beginnings of constitutional government and the development of Japanese imperialism. This naturally is linked with the study of Korea's failed efforts to maintain its independence; in regard to China it deals with the attempts by the Qing state to introduce reforms and the final collapse of Imperial China. It then deals with the difficulties provoked by modernization and nationalism in the first-half of the twentieth century, taking in the rise and fall of Taisho democracy and the drift towards fascism in Japan and the Guomindang's revolution and state-building and the birth of the Chinese Communist Party in China. The course then concentrates on the aftermath of the Second World War for East Asia, studying the Chinese Civil War and the emergence of the People's Republic, the course and legacy of the US occupation of Japan and the formation of the two Koreas. The last part of the course covers the development of the People's Republic under Mao and Deng, the rise of Japan as an economic superpower and the emergence of South Korea and Taiwan as economic powers.**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 9 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6 of the Michaelmas and Lent terms. There will be a revision lecture and class in the Summer Term.

Formative coursework: Students will be required to submit three 2000 word essays in all and to sit a mock exam.**Indicative reading:** A detailed reading list will be issued at the start of the course, but the following survey texts are essential: W G Beasley, *The Rise of Modern Japan*; P Duus (Ed), *The Cambridge History of Japan: The Twentieth Century*; L Eastman (Ed), *The Nationalist Era in China, 1927-1949*; J L McLain, *Japan: A Modern History*; R MacFarquhar (Ed), *The Politics of China, 1949-1989*; A Buzo, *The Making of Modern Korea*; J Spence, *The Search for Modern China*.**Assessment:** Exam (100%, duration: 3 hours) in the summer exam period.**HY238****The Cold War and European Integration,
1947-1992****This information is for the 2018/19 session.****Teacher responsible:** Dr Piers Ludlow SAR 2.16**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations

permit and to General Course students.

Course content: The course will investigate the evolution of both the cold war in Europe and the process of European integration, asking what the linkages were between these parallel developments. The Marshall Plan; the birth of NATO; the Schuman Plan; German Rearmament and the EDC; the Western European Union; the US and Euratom; the other Community - the EEC; JFK's Grand Design; De Gaulle's rival vision; the 'double crisis' of 1965-6; Harmel, NATO and the WEU; Ostpolitik and the re-emergence of German foreign policy activism; enlargement, EPC, and Kissinger; Schmidt, Giscard and Carter; Euromissiles and Eurosclerosis; Genscher-Colombo and the revival of political Europe; Europe and the end of the cold war - spectator or actor?; a German Europe or a European Germany?; Paris, Berlin & Maastricht.**Teaching:** 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in the Michaelmas and the Lent terms and a revision session in the Summer Term.

Formative coursework: Students will be required to submit three essays, the last one of which will be formally assessed. There will also be a mock exam in the Summer Term.**Indicative reading:** A detailed reading list will be provided at the start of the course. It will include William Hitchcock, *France Restored: Diplomacy and the Leadership in Europe*; Michael Hogan, *The Marshall Plan: America, Britain, and the Reconstruction of Western Europe, 1947-1952*; Marc Trachtenberg, *A Constructed Peace: The Making of the European Settlement 1945-1963*; Geir Lundestad, *'Empire by Integration': the United States and European Integration 1945-1997*; Pascaline Winand, *Eisenhower, Kennedy and the United States of Europe*; Jeffrey Giauque, *Grand Designs and Visions of Unity*; N. Piers Ludlow, *The European Community and the Crises of the 1960s*; Timothy Garton Ash, *In Europe's Name: Germany and the Divided Continent*; Julius Friend, *The Long Presidency*; France in the Mitterrand Years; Phillip Gordon, *A Certain Idea of France: French Security Policy and the Gaullist Legacy*; Pekka Hamalainen, *Uniting Germany*; Kevin Featherstone, *The Road to Maastricht***Assessment:** Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words).

HY239**Latin America and the United States since 1898****This information is for the 2018/19 session.****Teacher responsible:** Dr Anna Cant**Availability:** This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.**Course content:** HY239 is designed to provide students with an introductory overview of the history of the Americas and inter-American relations from 1898 to the present day. Rather than focussing exclusively on U.S. policy towards Latin America, the course explores the international history of Latin America and the United States from a variety of U.S and Latin American perspectives. It also incorporates broader thematic and interpretive questions alongside country specific studies. Among the major themes covered on the course are the concepts of imperialism, neo-colonialism and anti-imperialism, revolution and counter-revolution, nationalism and interventionism, democracy and dictatorship, human rights and repression, development and dependency, the 'war on drugs' and migration. More specific topics covered in lectures and class discussions include: the Spanish-American War; Big Stick and Dollar Diplomacy; FDR's 'Good Neighbour' policy; Juan Perón and Populism; the onset of the Cold War and post-war system in the Americas; Jacobo Arbenz' Guatemala; the Cuban Revolution; JFK and the Alliance

For Progress; the Brazilian Coup of 1964 and U.S. intervention in the Dominican Republic, 1965; Cuba's Latin American policy and Che Guevara's Bolivian mission; Salvador Allende's Chile; the 'Condor Years'; the Panama Canal Treaty and Carter's opening to Cuba; the Nicaraguan Revolution and Reagan's Central American interventions; 'The Lost Decade' and Debt crisis of the 1980s; the Washington Consensus, the War on Drugs, Hugo Chavez and the 'Bolivarian Alternative for the Americas' (ALBA).

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in the Michaelmas and Lent terms and a revision lecture in the Summer Term.

Formative coursework: Students will be required to do two presentations, to write one 2,000-word essay and one 1,000-1,500-word book review, to contribute to weekly Moodle discussion forums, and to submit a Mock exam at the start of the Summer Term. These assignments will not form part of the final assessment but they are a required component of the course, and students must complete them in order to be admitted to the course examination.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, will be provided at the first lecture and will also be available on Moodle and in the departmental public folders. However, the following works are useful introductions and core texts for the course: E Williamson, *The Penguin History of Latin America*, Mark T Gilderhus, *The Second Century: U.S.-Latin American Relations since 1889*, Robert Holden and Eric Zolov, *Latin America and the United States: A Documentary History*, Walter Lafeber, *Inevitable Revolutions: The United States in Central America*, Alan McPherson, *Intimate Ties, Bitter Struggles: U.S.-Latin American Relations Since 1945*, Lars Schoultz, *Beneath the United States: A History of U.S. Policy Towards Latin America*, Peter H Smith, *Talons of the Eagle: Dynamics of U.S.-Latin American Relations*, Thomas Skidmore and Peter Smith, *Modern Latin America*, and Eduardo Galeano, *Open Veins of Latin America*.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

HY240

From Empire to Commonwealth: war, race and imperialism in British History, 1780 to the present day

This information is for the 2018/19 session.

Teacher responsible: Dr Jack Hogan SAR M.13

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course offers an advanced history of the British Empire that focuses on the metropolitan experience of building, running and then losing an empire. Its primary focus is on Africa. It covers the period from the loss of the American colonies to decolonisation and the survival of the Commonwealth. Within the context of Britain's wider political, social and cultural history, the course will examine the following: the extension of empire during the Victorian era; liberalism and racism; the expansion of colonies of white settlement; the role of missionaries; the scramble for Africa, the impact of empire at home, the running of empire overseas; gender and empire; managing national decline and empire; the contribution of empire to the First and Second World Wars; fast exit strategies; violent decolonisation; race and immigration; post-colonial dictators and the legacy of white settlers. Case studies include Britain and Zimbabwe; Idi Amin and Uganda; and the Mau Mau insurgency.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

There will be a reading week in the Michaelmas and the Lent terms and a revision lecture in the Summer Term.

Formative coursework: 2 essays; one mock exam; class presentations.

Indicative reading: John Darwin, *The British Empire Project: The Rise and Fall of the British World System, 1830-1970* (OUP 2010); C A Bayly, *The Birth of the Modern World, 1780 to 1914* (Blackwell 2004); Ronald Hyam, *Understanding the British Empire* (CUP, 2010); Ronald Hyam, *Britain's Imperial Century, 1815 to 1914* (CUP latest edn); L J Butler, *Britain and Empire: Adjusting to a Post-Imperial World* (I B Tauris, 2007); Sarah Stockwell (ed) *The British Empire: Themes and Perspectives* (Blackwell, 2007); Bernard Porter, *Absent Minded Imperialists: Empire, Society and Culture in Britain* (OUP, 2006) Bill Schwarz, *The White Man's World: Memories of Empire* (OUP, 2012); Peter Clarke, *Hope and Glory: Britain 1900-2000* (CUP, 2004); M W Doyle, *Empires: A Comparative Study* (Cornell University Press: 1986); P D Morgan; S Hawkins (ed) *The Black Experience and the Empire* (OUP, 2004); David Anderson, *Histories of the Hanged: Britain's Dirty War in Kenya and the End of Empire* (CUP 2006); Henry Morton Stanley, *How I found Livingstone* (1872; kindle ebook); Sir F D Lugard, *The Dual Mandate in British Tropical Africa* (1922); Ashley Jackson & and David Tomkins, *Illustrating Empire: A Visual History of British Imperialism* (The Bodleian Library, Oxford; 2011); James Belich, *The Settler Revolution and the Rise of the Angloworld* (OUP, 2011).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

100% Exam

HY241

What is History? Methods and Debates

This information is for the 2018/19 session.

Teacher responsible: Dr Laura Almagor

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: What is history? How and for what purposes do we study the past? What kinds of debates and controversies result from historical study? The purpose of this course is to provide undergraduate students with an introduction to these important issues. We will discuss the history of history from ancient times to the present and how it has changed as an intellectual pursuit over the years. We will think about different types of history – for example, international history, intellectual history, social history, economic history, cultural history or the history of religion – and we will discern their different concerns and priorities. We will analyse some of the most important themes in modern historical study: empires and colonialism, war and conflict, nationalism. We will outline different ideological frameworks for conducting historical research, for example Marxism, postmodernism, and gender studies. We will debate some of the key philosophical questions surrounding historical research: for example, how historians determine facts, and whether or not historical study can ever be truly objective? Finally, we will look at different ways of presenting the past, from traditional history books to museums and TV history. The course is highly recommended for students who may wish to continue studying history beyond batchelors level.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in the Michaelmas and Lent terms and a revision session in the Summer Term.

Formative coursework: Students will be expected to produce 2 essays in the MT.

Indicative reading: A full reading list will be provided at the start of the course but will include the following introductory surveys:

Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; L Jordanova, *History in Practice*; R Evans, *In Defence of History*; J Tosh, *The Pursuit of the Past*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*; T. Garton Ash, *The File*.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%) in the LT.

HY242

The Soviet Union: Domestic, International and Intellectual History

This information is for the 2018/19 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will cover the history of the Soviet Union, from its inception as a combination of the Russian Revolution and a Bolshevik dictatorship, through the Stalinist terror and World War II, its role as an international centre of the 'socialist camp' during the Cold War, to the failure of Gorbachev's reforms and a surprisingly peaceful demise in 1991. Many courses on Soviet history deal separately with politics, social history, foreign policy, and intellectual/cultural developments. This course seeks to connect disparate threads into one historical and analytical narrative by focusing on major issues confronting the interpretation of the Soviet Union and its role in the international history of the twentieth century. The course takes advantage of the extraordinary wealth of new sources about Soviet history that appeared in recent years. The following questions will be examined during this course. Was the Soviet Union a continuation or rejection of its Russian heritage? What were the sources of Soviet legitimacy, modernization, and expansionism? What was Stalinism about? Why and how did the Soviets win the war against the Nazis? Can Soviet history be better understood as a multinational, imperial, or transnational history? How did the outside world affect Soviet domestic evolution? Why did the militarily successful Soviet state that emerged strongly from the Second World War then collapse so suddenly only a few decades later? Finally, the course will examine the legacy of the Soviet Union and the extent to which there is a Soviet 'path dependency' for Putin's Russia.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

There will be a reading week in the Michaelmas and the Lent terms and a revision class in the Summer Term.

Formative coursework: Students will be required to write two 2,000-word essays (one in MT and one in LT) and make two class presentations (one in MT and one in LT).

Indicative reading: Vladislav Zubok, *A Failed Empire. The Soviet Union in the Cold War from Stalin to Gorbachev* (2007); Vladislav Zubok, *Zhivago's Children: The Last Russian Intelligentsia* (2009); Martin Malia, *The Soviet Tragedy. A History of Socialism in Russia* (Free Press, 1995); Ronald Suny, *The Structure of Soviet History. Essays and Documents* (Oxford, 2002); Terry D. Martin, *The affirmative action empire: nations and nationalism in the Soviet Union 1923-1939* (Ithaca: Cornell University Press, 2001); Sheila Fitzpatrick, *Everyday Stalinism. Ordinary Life in Extraordinary Times* (Oxford, 2000); Jochen Hellbeck, *Revolution on my mind. Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY243

Islamic Empires, 1400 - 1800

This information is for the 2018/19 session.

Teacher responsible: Dr Gagan D. S. Sood. SAR 2.07

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Following the transformations wrought by the Mongols in the thirteenth and fourteenth centuries, the Ottoman, Safavid and Mughal empires arose in India and the Islamic heartlands. These 'Islamic' empires would go on to rank among the wealthiest and most powerful regimes known to the early modern world. Supported by an array of provincial and local elites, they were at the zenith of their power in the sixteenth and seventeenth centuries, spanning a region that extended from the Mediterranean to the Bay of Bengal, from Yemen to the Crimea. Their populations were producers, consumers, importers and exporters of goods critical for global trade; their location accorded them a vital role in the flow of ideas and information; there was a remarkable flowering of the arts in the period; and conversion to the region's dominant religious tradition, Islam, continued apace, breaching new frontiers. By the eighteenth century, however, the Islamic empires had been reduced to shadows of their former selves, with power devolved to a variety of successor regimes vying with each other for supremacy. It is this struggle that paved the way for the region's later incorporation into Europe's global empires of modern times, and the emergence of today's Middle East and South Asia. This course will examine the Ottoman, Safavid and Mughal empires, and the larger world to which they belonged, from their formation in the fifteenth and early sixteenth centuries to an eighteenth-century moment of 'unsighted possibilities'. We will study the ways in which temporal power was institutionalised; the patterns of daily life found in urban and rural settings, and on the frontier; Islam in theory and in practice, and its relationship to the region's other major religious traditions; diplomacy within and without the Islamic world; the prevailing techniques and technologies of warfare; inherited and collective knowledge of other lands, near and far, and the everyday movement of people, goods and news; the signal achievements in the literary, visual and architectural realms; secular changes to the region's societies and economies; early modern millenarianism, fundamentalism and reformism; and the reasons for the eighteenth-century demise of the Islamic empires as world powers.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

In the ST, there will be a mock exam (1 hour) and revision class (1 hour). There will be a reading week in both MT and LT.

Formative coursework: Students are expected to submit two 2000-word essays (one in MT, one in LT), give an oral presentation in class, and sit a 1-hour mock exam in ST.

Indicative reading: Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (Oxford, 2004). Stephen F. Dale, *The Muslim Empires of the Ottomans, Safavids and Mughals* (Cambridge, UK, 2010). Joseph F. Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY244

Britain's Atlantic World, 1688-1837

This information is for the 2018/19 session.

Teacher responsible: Dr Padraic Scanlan SAR.3.05

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores the history of Britain in the Atlantic world during the 'long eighteenth century', from the Glorious Revolution in 1688 to the accession of Queen Victoria in 1837. It is impossible fully to understand the profound transformations in British political, economic and cultural life in this period without an understanding of Britain's growing presence in the Atlantic, in both its restive colonial empire and in the wider Atlantic political economy. The course focuses on three important forces that shaped Britain's presence in the Atlantic world: the intermittent, nearly century-long war with France, the rapid expansion of British settler colonies and concomitant rise of American republicanism, and the expansion and entrenchment of slave labour in plantation societies in South America, the Caribbean, and southern North America. As Britain's empire expanded into the Americas, domestic British society was transformed – by Enlightenment innovations in science and political organisation, by transformations in social life and gender politics, and by rebellions in Scotland and Ireland that led to the consolidation of Great Britain as a single political unit. This course explores the many connections between the expanding British colonial empire and the increasingly confident and sophisticated British state, and frames these connections in the crucible of a dynamic and often violent Atlantic world.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6 of the MT and the LT.

Formative coursework: Students will be expected to produce 1 formative primary source exercise (300 words) in the MT and 1 formative essay (1,500 words) in the LT.

Indicative reading: Colley, Linda. *Britons: Forging the Nation, 1707-1837*. New Haven: Yale University Press, 1992. Dubois, Laurent. *Avengers of the New World: The Story of the Haitian Revolution*. The United States and the World since 1776

This information is for the 2018/19 session.

Teacher responsible: Assistant Professor Megan Black SAR.3.06

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course explores how the United States has engaged the wider world since 1776. Throughout, the course analyzes state-to-state policy-making alongside a wide array of non-state actors and institutions that have also shaped U.S. global power. It opens with foundational concerns in the field about the nature of American exceptionalism—the belief that the United States is fundamentally different than other nation-states and empires—before exploring themes such as settler colonialism, race, gender, capitalism, imperialism, immigration, and transnationalism. The course arc will begin in the earliest founding of the American Republic. Since independence, the nation looked outward to the vast expanse of territory westward across the continent. It spearheaded expansion through indigenous land dispossession and contests with competing European empires. When the United States met territorial limits to continental expansion at the end of the nineteenth century, it initiated an era of formal overseas imperialism in the Pacific and Caribbean. In and through two World Wars, the United States jockeyed for a lead role in constructing an international global order organized around commitments to self-determination. These commitments rang hollow, however, as the United States intervened across the Third World as part of a Cold War contest with the Soviet Union to win hearts, minds, and allies. With decolonization movements, the international order began to fragment, a process accelerated by a new era of globalization. The course will trace this arc and end by considering such transnational forces, including migration, environmentalism, humanitarianism, financialization, and terrorism, which have underscored the recent emergence of a nationalist brand of anti-globalization in the United States and wider world. Throughout, we will ask, what historical conditions incited and enabled the projection of American power in the world? How have forces of globalization impacted the nation-state?

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6 of MT and LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Two 2,000 word essays due throughout the year.

A mock exam may be offered as part of exam revision

arrangements.

Indicative reading: Walter Hixson, *American Foreign Relations: A New Diplomatic History* (New York: Routledge, 2016). Jay Sexton, *The Monroe Doctrine: Empire and Nation in Nineteenth Century America* (New York: Hill and Wang, 2012). Anthony F.C. Wallace, *The Long, Bitter Trail: Andrew Jackson and the Indians* (New York: Hill and Wang, 1993). The Global Caribbean: Colonialism, Race and Revolutions 1780s-1980s

This information is for the 2018/19 session.

Teacher responsible: Dr Imaobong Umoren SAR 3.07

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Lying southeast of North America, north of South America and east of Central America, the Caribbean, while geographically small, has played a major role in global history. Over the course of five-hundred-years the Caribbean has been at the centre of clashes and encounters between indigenous peoples, Amerindians, Europeans, Africans, and Asians all of which has led to momentous political, social, economic and cultural change. Far from simply being a tropical tourist paradise or tax haven, the Caribbean is widely recognised as being a key site of modernity through the role the region has played in global historical processes of exploration, colonialism, transatlantic slavery, capitalism, revolution, wars, migrations and diasporas. Critical movements have emerged from the Caribbean ranging from pan-African consciousness, creolisation, Garveyism, Rastafarianism, and multiculturalism all of which had an impact in Africa, Asia, the United States, Europe and Latin America. The Caribbean has spawned foundational writers, artists, and intellectuals like José Martí, C L R James, Una Marson, Eric Williams, Nicolás Guillén, Sam Selvon, Jean Price-Mars, Aimé Césaire, Frantz Fanon, Fidel Castro, Claudia Jones, Walter Rodney, Bob Marley, and contemporary figures such as Edwidge Danticat and Junot Díaz who have provided critical commentary on the region and its links to the wider world.

This course delves into all of these issues and presents an overview of Caribbean political, economic, social and cultural history from the height of transatlantic slavery to the postcolonial era in the 1980s. It especially focuses on the three central themes of American and European colonialism, race and revolution

and takes an expansive view of the Anglophone, Francophone, Hispanic and Dutch Caribbean. Wherever possible, comparisons and contrasts with the Caribbean the United States and Latin America are drawn upon. Weekly topics that will be explored in lectures and seminars include; the precolonial Caribbean; European Colonial Encounters; transatlantic slavery and the making of 'race'; the structure of slave societies: plantations and Maroons; the Haitian Revolution; abolition, apprenticeship and emancipation in the British and French Caribbean; Asian indentureship and the continuation of slavery in the Hispanic Caribbean; Independence, Wars, and the rise of US imperialism in the Hispanic Caribbean; inter-regional labour migrations and radicalism; the First World War; extra-regional labour migrations, black internationalism, Negritude, and Afrocubanismo; the US Occupation of the Dominican Republic and Haiti; economic Depression and Labour Rebellions; the Second World War and Departmentalisation in the Anglophone and Francophone Caribbean; the Cold War; the Cuban Revolution and Caribbean Federation; Decolonization in the Anglophone Caribbean; the Black Power Movement; neo-colonialism, tourism, and violence in the postcolonial era; the politics of development, health, and reparations.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Revision session in the Summer Term. There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Bolland, O Nigel, *On the March: Labour Rebellions in the British Caribbean, 1934-39* (Kingston: Ian Randle, 1995). Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

HY300

Dissertation

This information is for the 2018/19 session.

Teacher responsible: Prof Steven Casey SAR 2.10

Availability: This course is compulsory on the BA in History. This course is available on the BSc in Government and History, BSc in

International Relations and History and BSc in Politics and History. This course is not available as an outside option nor to General Course students.

Course content: A dissertation of not more than 10,000 words on a topic to be approved by the candidate's supervisor. It is designed to allow a detailed and thorough exploration of a topic of interest to the candidate. The topic should fall within the parameters of the degree course. It should include the examination of primary sources, in printed, manuscript and/or digital form.

Teaching: 1 hour of workshops in the MT. 2 hours of workshops in the LT.

Candidates should secure in the course of the LT of their second year the agreement of a member of academic staff in the Department of International History (who need not be their advisor or tutor) to supervise a suitable topic, and then submit a title to the Undergraduate Programmes Administrator by published deadline. Supervisors can be expected to offer advice on the scholarly literature, guidance on research and writing, and detailed comments on a sample of up to 3000 words.

Assessment: Dissertation (100%, 10000 words) in the ST. The dissertation must be submitted to the Undergraduate Programmes Administrator by the published deadline in Week 1 of ST in the student's third year. It should be typewritten. Precise details on length, format, presentation and deadline will be issued by the Department through the workshops and Moodle. Candidates may be called for an oral examination if the Examiners wish to satisfy themselves that the dissertation is the candidate's own work.

HY311

Limited War During the Cold War Era: The US in Korea (1950-53) and Vietnam (1954-75)

This information is for the 2018/19 session.

Teacher responsible: Prof Steven Casey SAR 2.10

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based on a variety of primary sources, and a wide range of secondary reading, this course will explore US attitudes and policies towards and during the Korean and Vietnam Wars. The problems of limited war; the origins of the Korean War; Truman and the decision to intervene; Inchon and the decision to cross the 38th parallel; the Chinese intervention and its consequences; the US home front during the Korean War; the Truman-MacArthur Controversy; Korea and US Cold War strategy: NSC-68, NATO, and 'The Great Debate'; fighting while negotiating, 1951-53; legacies; JFK and Vietnam; LBJ and the decision to escalate; LBJ as Commander in Chief; the war on the ground in Vietnam: 'search and destroy' versus 'hearts and minds'; the Tet Offensive; the media and military at war; the US home front during the Korean War; Vietnam and US Cold War strategy: détente and triangular diplomacy; fighting while negotiating, 1969-73; legacies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Students are expected to keep up with the readings (documents and secondary literature) for the weekly meetings, and to participate in seminar discussions.

There will be a reading week in the Michaelmas and the Lent terms and a revision session in the Summer Term.

Formative coursework: Students will be required to write two essays and two gobbet exercises during the year.

Indicative reading: A detailed course outline and reading list, as well as handouts, will be available as the start of the course. The following works are recommended: Steven Casey, *Selling the Korean War* (2008); William Stueck, *Rethinking the Korean War* (2002); Burton I. Kaufman, *The Korean War: Challenges in*

Crisis, Credibility and Command (1986, or later edition); Rosemary Foot, *The Wrong War: American Policy and the Dimensions of the Korean Conflict, 1950-53* (1985); George Herring, *America's Longest War* (various editions); David L. Anderson, *Shadow on the White House: Presidents and the Vietnam War* (1993); David L. Anderson (ed), *The Columbia History of the Vietnam War* (2011); Robert J. McMahon, *The Limits of Empire: The United States and Southeast Asia since World War II* (1999).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY315

The European Enlightenment, c.1680-1799

This information is for the 2018/19 session.

Teacher responsible: Dr Timothy Hochstrasser SAR 2.14

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The European Enlightenment of the eighteenth century is conventionally taken to be the period in which the disciplines of philosophy, history, economics and anthropology, and other social sciences began to emerge as discrete disciplines independent of state and church control. This course therefore sets out to explore the new ideas generated in these areas as a result of a fresh understanding of man's place in the physical world. But while the course aims to look at ideas and concepts in themselves it is also concerned with the way that they were applied in political practice and adapted to provide new understanding of social structures, or as contemporaries put it, a 'Science of Man'. The chronological context of the Enlightenment is taken to be Europe between the reign of Louis XIV and the end of the Directory in France in 1799. Within this broad framework the following large themes provide the subject matter of both lectures and classes in the Michaelmas Term: the impact of the Scientific Revolution upon institutionalised religion; the emergence of a 'Republic of Letters'; English and French critiques of absolutist monarchy; the creation of scientific approaches to the study of ethics and politics; the political theory of enlightened despotism; the intellectual origins of the French Revolution; intellectual encounters with the New World; the concept of a Counter-Enlightenment; and the move from a private to a public sphere of cultural inquiry. The contributions of Newton, Locke, Voltaire, Montesquieu, and Rousseau - among others - will be highlighted. In the Lent Term the focus will be more narrowly directed to the study of individual key authors and texts and on the impact of enlightened ideas in particular countries, notably England, France, Prussia, Russia and the Habsburg Monarchy. Space will also be found for an examination of the contribution of enlightened thought to the visual arts and music in the 18th century. The course gives students the chance to consider whether or not the Enlightenment was an era of European history that fostered the application of reason to political and social reform, an end to censorship, torture, and hierarchical social models, and a beginning to religious toleration and recognizably modern concepts of human rights, international law and social equality. The focus throughout will be on the writings of the philosophes themselves and their attempts to convert theoretical innovation into practical reform through the agency of bureaucracy and rulers.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Week 6 of the first term will be a reading week. Students will do a mock exam in the Lent vacation. There will be a revision lecture in week 1 of the Summer Term.

Formative coursework: Two pieces of formative assessment are required, the first a source-criticism exercise in the Michaelmas Term (week 4), and the second a conventional essay in the Lent Term (week 4). In addition students will do a mock exam over the

Lent vacation.

Indicative reading: A full reading list will be provided at the start of the course. The following represent basic introductory reading only, and an indication of some primary sources: T C W Blanning, *The culture of power and the power of culture* (2002); D Outram, *The Enlightenment* (1995); T Munck, *The Enlightenment* (2000); R Porter, *The Enlightenment* (2001). Anthologies: I Kramnik (Ed), *The Portable Enlightenment Reader* (1995); S Eliot & B Stern (Eds), *The Age of Enlightenment* (2 vols, 1979).

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Presentation (15%) and class participation (15%) in the MT and LT. Students MUST give an assessed presentation in either the MT or the LT.

Class participation will be graded across both the MT and the LT.

HY319

Napoleon and Europe

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Keenan SAR 2.13

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was covered by the Napoleonic Empire and its impact was felt across large parts of the non-European world. The influence of the emperor and his policies was most obvious in relation to the European international system, particularly through his military campaigns and his territorial reorganisation of Europe in the wake of his successes. However, the Napoleonic era also saw major developments in the legal, constitutional, social, and economic order of many states, whether allied or opposed to the Napoleonic project. Likewise, in the aftermath of the French Revolution, much attention is paid to the impact of the Napoleonic era on the relationship between Church and State and the rise of national consciousness, whether in political or cultural terms. By studying how Napoleon's empire was created, challenged, and ultimately defeated, the course will focus on the nature of power and legitimacy in this era. An attempt will be made to place the Napoleonic empire in a broader context, in part by comparing it to other contemporary, rival states, including Russia, Austria, and the United Kingdom. Finally, the course will begin and end with an assessment of the Napoleonic myth, both in terms of his contemporaries and for subsequent generations of historians.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Indicative reading: A full reading list will be provided at the beginning of the course. Useful introductory reading includes: M. Lyon, *Napoleon Bonaparte and the Legacy of the French Revolution*; G. Ellis, *The Napoleonic Empire*; C. Emsley, *Napoleon: Conquest, Reform and Reorganisation*; M. Broers, *Europe under Napoleon, 1799-1815*; C. Esdaile, *Napoleon's Wars*; S. J. Woolf, *Napoleon's Integration of Europe*; P. Dwyer (ed.), *Napoleon and Europe*; P. Geyl, *Napoleon, For and Against*.

Assessment: Essay (50%, 3000 words) in the ST. Other (20%) in the LT.

Presentation (20%) and class participation (10%) in the MT and LT. The other assessment in the LT involves a 2000-word document analysis.

HY320

The Cold War Endgame

This information is for the 2018/19 session.

Teacher responsible: Dr Una Bergmane

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Based upon a variety of primary sources, this course will explore why and how in the second half of the 1980s the East-West conflict between the United States and the Soviet Union transformed itself so suddenly and peacefully into the collapse of (European) communism, German unification and the end of the USSR and her empire, while China took an entirely different exit from the Cold War era. In doing so, we will ask what was the correlation between "high" and "low politics" in these events and processes? Topics will include: the onset of détente and *neue Ostpolitik*; the impact of Helsinki (1975) and human rights; détente's death, Euromissiles and the war in Afghanistan; the second Cold War of the early 1980s, pacifism and transatlantic turmoil; the Pope and the Polish crisis of 1980-81; Gorbachev's new thinking and reforms in the USSR; Reagan and Gorbachev: superpower summitry; German unification: domestic and international aspects; Kohl, Mitterrand and the road to the European Union; the eastern European revolutions, the Chinese crackdown and the collapse of the Soviet 'empire'; the Baltic independence struggle, Yeltsin, the coup and Soviet disintegration; explanations and interpretations of the end of the Cold War. The discussion in each seminar will draw on a combination of primary and secondary material.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST. There will be a reading week in MT and LT and a revision session in ST.

Formative coursework: Students will be required to present one short class paper as well as undertaking small weekly tasks on Moodle, and to submit two essays à 1500 words and one document answer during MT and LT. There will also be a timed mock exam in ST.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, as well as a document pack will be available at the beginning of the course on Moodle. The following works are recommended as essential reading: A Brown, *The Gorbachev Factor* (1996); S Dockrill, *The End of the Cold War Era* (2005); R L Garthoff, *The great transition: American-Soviet relations and the end of the Cold War* (1994); Idem, *Détente and confrontation: American-Soviet relations from Nixon to Reagan* (1985); J Levesque, *The Enigma of 1989: The USSR and the Liberation of Eastern Europe* (1997); C S Maier, *Dissolution: the crisis of Communism and the end of East Germany* (1997); P Zelikow & C Rice, *Germany unified and Europe transformed: a study in statecraft* (1995); H Adomeit, *Imperial overstretch: Germany in Soviet policy from Stalin to Gorbachev* (1998); H Adomeit, *Imperial Overstretch: Germany in Soviet Policy from Stalin to Gorbachev* (1998); A Lieven, *The Baltic states: Latvia, Lithuania and Estonia, and the path to independence* (1993); R Summy & M E Salla (eds), *Why the cold war ended: a range of interpretations* (1995); O A Westad, *Reviewing the Cold War: Approaches, Interpretations, Theory* (2000); Idem, *The fall of détente: Soviet-American relations during the Carter years* (1997); Idem et al (eds), *The Cambridge History of the Cold War*, vols 2-3 (2010); M E Sarotte, *1989* (2009); Hal Brands, *The unipolar moment* (2016). Also students should familiarise themselves with the Cold War International History Project homepage (<http://www.wilsoncentre.org>) and in particular: *Bulletins No 5 'Cold War Crises', No 8-9 'The Cold War in the Third World and the Collapse of Detente in the 1970s', and No 12/13 'The end of the Cold War'*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY321

The Struggle for the Persian Gulf, 1945-2003

This information is for the 2018/19 session.

Teacher responsible: Rowena Abdul Razak

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students. This course is capped at 30 students.

Course content: This course examines the international history of the Persian Gulf as an ongoing struggle among external powers and local actors for regional supremacy. Through the use of documentary primary sources, the course covers the history of this struggle for mastery in the Gulf in three stages. It begins with the decline of the British Empire and the rise of American power in the Gulf after the Second World War, in the face of Arab and Iranian nationalism. It then examines the long era of intense regional competition for primacy between Iran and Iraq, with particular reference to the Cold War and the 1979 Iranian Revolution. Finally, the course turns to the renewed Anglo-American military intervention in the Gulf since 1991 that continues until today. As a List B paper, the course makes extensive use of primary sources as part of the weekly reading assignments. These will include government documents, public statements, diaries, and memoirs. These primary sources will all be in English and will all be available on Moodle for students to access. Key topics covered in the course include: nationalism in Mosaddeq's Iran and Qasim's Iraq; the Arab Cold War and the civil war in Yemen; the Cold War politics of reform in Mohammad Reza Shah's Iran and King Faisal's Saudi Arabia; the British withdrawal from the Persian Gulf between 1968 and 1971; Nixon and Kissinger in the Persian Gulf; the secret war between Iran and Iraq in Kurdistan from 1972 to 1975; the rise of OPEC and the 1973/74 energy crisis; the 1979 Iranian Revolution; the Iran-Iraq War of 1980 to 1988; the Persian Gulf War of 1991; the rise and fall of Iranian-American détente under Khatami; Saudi Arabia and the United States before and after 9/11; and the 2003 Anglo-American invasion of Iraq

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in the MT and the LT.

Formative coursework: Students are required to submit one essay of 3000 words in the MT; one set of gobbet answers during the LT; and one 1-hour timed mock exam in ST.

Indicative reading: Roham Alvandi, Nixon, Kissinger, and the Shah: The United States and Iran in the Cold War (Oxford University Press, 2014); W. Taylor Fain, American Ascendancy and British Retreat in the Persian Gulf Region (Palgrave Macmillan, 2008); F. Gregory Gause III, The International Relations of the Persian Gulf (Cambridge University Press, 2010); Trita Parsi, Treacherous Alliance: The Secret Dealings of Israel, Iran, and the U.S. (Yale University Press, 2007); Charles Tripp, A History of Iraq, Third Edition (Cambridge University Press, 2007); Daniel Yergin, The Prize: The Epic Quest for Oil, Money, and Power (Simon & Schuster, 1993).

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 3000 words) in the LT.

HY322

Nazi Germany's War: Violence and Occupation in Europe, 1939-1945

This information is for the 2018/19 session.

Teacher responsible: Dr Laura Almagor

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an

outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 15 students.

Course content: The Second World War was the most destructive conflict in modern European history. At the height of the war, German soldiers occupied lands from the Channel Islands to the Caucasian mountains, from Scandinavia to the Attica peninsula. Across the continent, societies were torn apart by war, occupation, and civil war. Drawing on key secondary texts and primary sources, this course examines Nazi Germany's war in Europe from a comparative perspective. It looks at the origins of the conflict; the course of the war, from the partition of Poland to the fall of Berlin; war crimes; Nazi occupation regimes; local collaboration and the recruitment of hundreds of thousands of non-Germans into Hitler's armies; resistance and partisan insurgency; ethnic cleansing and genocide; and the aftermath of the war. The focus is not only on political leaders, party functionaries, and generals, but also on ordinary people, such as soldiers, peasants, slave workers, and concentration camp inmates. Particular attention is given to the views and experiences of contemporary intellectuals, such as George Orwell, Raphael Lemkin, Marc Bloch, and Hannah Arendt. The course considers the Second World War as an amalgam of different forms of conflict, including wars between states, civil wars, and partisan wars, and it also addresses more general questions about conflict and violence in the modern age.

Teaching: 20 hours of seminars in MT. 20 hours of seminars in LT. 2 hours of seminars in ST.

There will be a reading week in MT and LT.

Formative coursework: Students will be required to write one conventional essay of 2,000 words during LT and one timed mock exam in ST. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

Indicative reading: Omer Bartov, The Eastern Front, 1941-45: German Troops and the Barbarisation of Warfare (London, 1985). Christopher Browning, Ordinary Men: Reserve Police Battalion 101 and the Final Solution in Poland (New York, 1992). Richard J. Evans, The Third Reich at War, 1939-1945 (London, 2008). Saul Friedländer, The Years of Extermination: Nazi Germany and the Jews, 1939-1945 (London, 2007). Peter Fritzsche, An Iron Wind: Europe under Hitler (New York, 2016). Robert Gildea, Marianne in Chains: In Search of the German Occupation, 1940-1945 (London, 2002). Jan T. Gross, Neighbours: The Destruction of the Jewish Community in Jedwabne, Poland (Princeton, 2001). Christian Hartmann, Operation Barbarossa: Nazi Germany's War in the East, 1941-1945 (Oxford, 2013). Raul Hilberg, The Destruction of the European Jews (London, 1961). Ian Kershaw, Hitler 1937-1945: Nemesis (London, 2001). Ian Kershaw, The End: Hitler's Germany, 1944-45 (London, 2011). Assessment: Exam (85%, duration: 3 hours) in the summer exam period.

Presentation (15%).

The Presentation (15%) will be in MT or LT.

HY323

Travel, Pleasure and Politics: The European Grand Tour, 1670-1825

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Throughout the eighteenth century thousands of young British men and women embarked on extensive journeys to continental Europe – an activity known as the Grand Tour. 'Travel, Pleasure and Politics: The European Grand Tour 1670-1825' explores who these people were, where they went, and the reasons for their expeditions. For some, the Tour was the final stage of formal education; to others an opportunity for sexual adventures and pleasure-seeking. The course discusses the practical challenges of eighteenth-century travel, the political, religious, and cultural contexts of the Tour, as well as the key places to visit and the reasons for their popularity. It also considers what the Tourists brought back with them: from physical artefacts for public and private collections, to new ways of seeing and understanding the world. 'Travel, Pleasure and Politics' introduces students to the actual writings of the Tourists, showing how they experienced international travel and shaped the modern tourist industry.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

This course operates reading weeks in the MT and LT. There will be a revision session in Summer Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT and 2 essays in the MT and LT. Specifically, the course's formative coursework will consist of two essays (MT and LT), one document analysis (LT). Students will also have an opportunity to sit a mock exam.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

HY324 Muslim-Jewish Relations: History and Memory in the Middle East and Europe, 622-1945

This information is for the 2018/19 session.

Teacher responsible: Dr Noémi Lévy-Aksu

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General

Course students.

Course content: Because of the Israeli-Palestinian conflict, most discussions of Muslim-Jewish relations focus on the period after 1948. Muslims and Jews, however, have engaged with one another for over 1,400 years. Just as at the beginning, when Muhammad first met Jewish Arabs in Medina in 622, Jewish and Muslim relations have spanned the whole range of human interaction. What approaches have historians taken to understand the connected histories of Jews and Muslims in Middle Eastern and European history, from their earliest relations in seventh-century Arabia to mid-twentieth-century Europe? Through attention to historical events and personalities as well to religious texts, language, law, ritual, sacred spaces, intellectual and spiritual movements, art, architecture, and literature we will explore different approaches to the history and memory of Muslim-Jewish relations in the Middle East and Europe, evenly divided between the pre modern and the modern period. Students are advised that this is not a history of the Palestinian-Israeli struggle, although its impact on the memory of Muslim-Jewish relations in history will be discussed.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

20 two-hour seminars in the MT and LT; one revision seminar in the ST. There will be a reading week in the Michaelmas and the Lent terms. Students will be expected to read essential primary and secondary material for each weekly meeting and to participate in the seminar discussions.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will be required to produce a formative essay during Michaelmas term as preparation for the assessed essay due Lent Term.

Weekly written reading responses and oral reports in Michaelmas Term and Lent Term. Completion of these is mandatory, in order to facilitate good seminar discussions.

Indicative reading: 1. *A History of Jewish-Muslim Relations, From Their Origins to the Present Day*, ed. Abdelwahab Meddeb and Benjamin Stora (Princeton: Princeton University Press, 2013); *Medieval Iberia: Readings from Christian, Jewish, and Muslim Sources*, ed. Olivia Constable, 2nd ed. (Philadelphia: University of Pennsylvania Press, 2011); Norman Stillman, *The Jews of Arab Lands: A History and Source Book* (Philadelphia: The Jewish Publication Society, 1998); Norman Stillman, *The Jews of Arab Lands in Modern Times* (Philadelphia: The Jewish Publication Society, 2003); Marc David Baer, *The Dönme: Jewish Converts, Muslim Revolutionaries, and Secular Turks* (Stanford: Stanford University Press, 2010); Aomar Boum, *Memories of Absence: How Muslims Remember Jews in Morocco* (Stanford: Stanford University Press, 2013)

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Presentation (15%) and class participation (15%) in the MT and LT. The participation grade will be based on the quality of the student's contribution to seminar discussions, and weekly posting of reading responses.

HY325 Not available in 2018/19 Retreat from Power: British foreign and defence policy, 1931-68

This information is for the 2018/19 session.

Teacher responsible: Prof Matthew Jones SAR 3.09

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The period between the onset of the Manchurian Crisis of 1931 and the decision of the Wilson Government in

1968 to accelerate the withdrawal from East of Suez saw Britain's position in the world transformed under the multiple pressures of economic decline, world war, nationalist opposition to colonial control, and the demands of Cold War confrontation with the Soviet Union and international communism more generally. This course examines how this change occurred by studying several central episodes in British foreign and defence policy. Its focus is predominantly on high-level policymaking in the diplomatic, military and economic realms, but it will all give attention to shifts in popular attitudes, parliamentary debates, the influence of electoral considerations, and the larger-scale transitions taking place in the international system. In common with other Level 3 courses, it will include study and discussion of primary sources throughout. Documents will be drawn from either published collections, including British Documents on Foreign Policy, 1919-1939, and Documents on British Policy Overseas, 1945-, official publications such as Command papers (including such material as international agreements and Defence White Papers), the diaries of key politicians or officials, and copies of documents from The National Archives at Kew. Much use will be made of online sources. Specific topics include the Italian invasion of Ethiopia; the Munich Agreement of 1938 and appeasement; British strategy in the Second World War; Anglo-Soviet relations in the Second World War; the formation of NATO; the Korean War; the Malayan emergency; Suez crisis; the first application to join the EEC; and the withdrawal from East of Suez in the 1960s.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of help sessions in the ST.

Students will be expected to read essential primary and secondary material for each weekly class, to deliver presentations, and to participate in seminar discussions.

There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay and 1 other piece of coursework in the LT.

Formative assessment is by one essay for submission in week 5 of the MT, and one essay for submission in week 5 of the LT (each essay should be a maximum of 2000 words and be drawn from a list supplied at the start of the course). One gobbet exercise will also be conducted in the LT as a form of revision for the final examination.

Indicative reading: Paul W. Doerr, *British Foreign Policy, 1919-1939* (1998). David Reynolds, *Britannia Overruled: Britain and World Power in the 20th Century*, 2nd ed (2000). C. J. Bartlett, *The Long Retreat: A Short History of British Defence Policy, 1945-70* (1972). Alan Bullock, *Ernest Bevin: Foreign Secretary, 1945-1951* (1983). Anne Deighton (ed), *Britain and the First Cold War* (1991). Robert Holland, *The Pursuit of Greatness: Britain and the World Role, 1900-1970* (1991). Ronald R. Hyam, *Britain's Declining Empire: The Road to Decolonization, 1918-1968* (2007). Paul Kennedy, *Background Influences on British External Policy, 1865-1980* (1981). R. A. C. Parker, *Chamberlain and Appeasement: British Policy and the Coming of the Second World War* (1993). Christopher Thorne, *Allies of a Kind: The United States, Britain, and the War Against Japan, 1941-1945* (1978). John W. Young, *Britain and the World in the Twentieth Century* (1997)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The summative assessment consists of a three hour examination paper which involves each candidate writing two essays selected from a list of questions, and two comments on a selection of extracts from primary sources.

Availability: This course is available on the BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 15.

This course is suspended and therefore not available on any programmes in 2018/19.

Course content: From the late sixteenth century until the early nineteenth century, Britain was one of Europe's most prolific slave-traders. British colonies in the West Indies and the colonies that eventually became the United States of America were among the most brutal and fully realized slave societies in world history. And yet, Britain was also the first major European state voluntarily to abolish its slave trade, and the first to resolve to emancipate its slaves. This tension, between an empire of slavery and an empire of freedom, is the puzzle at the heart of this course.

Using primary and secondary sources, this course explores the interconnected histories of slavery, commerce, and capitalism in the history of Britain and the British world in the eighteenth and nineteenth centuries. The course explores how the British slave trade functioned both as political economy and as a system of everyday oppression, how it intertwined with trade in other commodities and financial products like bonds and insurance, how Britons profited by it, and how enslaved and free people resisted it. The course interrogates the limits of 'British' history in the context of a global system of trade, and investigates the complicated history of the end of slavery and continuities before and after abolition – what did it mean to be 'free' in the British empire?

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Each seminar is structured around analysis of an historical document, and debate about a problem or theme in the historiography. Students are expected to read essential primary and secondary materials for each meeting and to participate in discussion.

There will be reading weeks in MT and LT.

Formative coursework: Students will be expected to produce 1 exercise and 1 other piece of coursework in the MT and LT.

Formative coursework includes a 250-word primary source analysis exercise and a 1,000-word review of a film related to course themes, as well as occasional short response papers and in-class writing assignments.

HY326 Not available in 2018/19 Slavery, Capital, and Empire in the British World, 1700-1900

This information is for the 2018/19 session.

Teacher responsible: Dr Padraic Scanlan

2nd ed. Cambridge: Cambridge University Press, 1998. [DT31 T51; also available online from LSE Library]; Williams, Eric. *Capitalism & Slavery*. Chapel Hill, NC: University of North Carolina Press, 1994. [HT1091 W72].

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (20%, 3000 words) and presentation (15%) in the LT.
Other (15%) in the MT.

Students will be assessed on 750-word analysis of a document or other primary source (15%), as well as on a 3,000-word essay (20%) and a group presentation based on primary research (15%). In Summer Term, students will be assessed on a 2-hour unseen written examination, including 2 essays (50%).

HY327

The Anglo-American Special Relationship, 1939-89

This information is for the 2018/19 session.

Teacher responsible: Prof Nigel Ashton SAR M.07

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Primarily for 3rd year BA History, BSc International Relations and History, and BSc Government and History students, but may be taken by 2nd years where regulations permit. May also be taken as an outside option and by General Course students where regulations, timetabling constraints and capacity permit. Not to be taken in conjunction with HY325 *Retreat from Power: British foreign and defence policy, 1931-68*.

Course content: This course will analyse the changing nature of the Anglo-American "special" relationship from its creation against the backdrop of the Second World War through to the end of the 1980s. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956. Topics addressed include: the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American "occupation" of Britain during the Second World War; the emergence of the Cold War in Europe and Asia, 1945-54; the Palestine question; the Suez Crisis; nuclear relations; the Cuban Missile Crisis; European integration; decolonisation; the impact of the Vietnam War; the cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; the Falklands War of 1982; and the revival of the special relationship under Thatcher and Reagan in the 1980s.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

In common with other Level 3 History courses, this course will include the study and discussion of primary sources in each weekly seminar. Documents will be drawn from published collections, including the Foreign Relations of the United States series and the Documents on British Policy Overseas, the diaries of key politicians or officials, copies of documents from the UK National Archives, the US National Archives and the relevant US Presidential Libraries.

The rest of each weekly seminar will consist of the class discussion of allocated questions on each seminar topic to provide the essential context for the primary sources and to illuminate the relevant historiographical debates in the secondary sources. There will be a reading week in the Michaelmas and Lent terms, and a revision session in the Summer Term.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay and 1 other piece of coursework in the LT.

Formative assessment will be through the submission of one essay in week 7 of the MT, and one essay in week 5 of the LT (each essay must be a maximum of 2000 words long and be drawn from a list supplied at the start of the course).

One 'gobbet' answer, consisting of commentaries on two extracts, must also be submitted in week 9 of the LT.

Indicative reading: K. Burk, *Old World, New World: the Story of Britain and America* (2007). D. Reynolds & D. Dimbleby, *An Ocean Apart: the Relationship between Britain and America in the Twentieth Century* (1988). J. Dumbrell, *'A Special Relationship': Anglo-American Relations from the Cold War to Iraq* (2006). W. R. Louis & H. Bull (Eds), *The Special Relationship: Anglo-American Relations since 1945* (1984). D. C. Watt, *Succeeding John Bull: America in Britain's Place, 1900-75* (1984).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The summative assessment will consist of a three-hour final examination, requiring candidates to write two essays selected from a list of questions, and two commentaries on extracts selected from the allocated primary sources.

HY328

The Arab-Israeli Conflict: Nationalism, Territory, Religion

This information is for the 2018/19 session.

Teacher responsible: Dr Kirsten Schulze SAR 2.12

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Any students who have previously taken HY203 cannot take this course.

Course content: The 1948 Arab-Israeli War; Israeli foreign and defence policy; the 1956 Suez-Sinai Campaign; the 1967 Six-Day War; regime change in Egypt and Syria in 1970; 1970/71 Black September; the 1973 Yom Kippur War; the 1975 Lebanese civil war; the ascendance of the Likud; the Camp David Accords 1979; the invasion of the Lebanon 1982; Palestinian resistance; the 1987 Intifada; the 1991 Madrid Peace Conference; the 1993 Oslo Accords; the 1994 Jordanian-Israeli Peace Treaty; the 2000 al-Aqsa intifada; peace efforts since 2000; the 2006 Lebanon War; and the 2006-2014 Gaza Wars.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Week 6 of both Michaelmas and Lent terms will be a Reading Week.

Formative coursework: Students are required to write two essays, including a one-hour timed essay.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (35%) in the LT.

Class participation (15%).

HY329

Independent India: Myths of Freedom and Development

This information is for the 2018/19 session.

Teacher responsible: Dr Taylor C. Sherman, SAR M.10

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Focusing on the early decades after India

gained independence in 1947, this course raises questions about the nature of freedom and the task of development faced by postcolonial nations. The course begins with a study of Jawaharlal Nehru, India's first prime minister. Students will survey his philosophy and his style of leadership while exploring the myth of the strong male leader. Students will then question the nature of secularism in India by examining the treatment of Muslims as well as the politicisation of India's Islamic monuments and their preservation. The course moves on to query how socialist India was by reading political theory from Communists, Socialists, Gandhians and others, as well as by exploring Indian programmes in education, health and family planning. Similarly, the course will question the nature and extent of economic development achieved in this period by studying famine, urbanisation and scientific advancement. Next, students will investigate how strong India's state was by scrutinising India's Constitution and surveying the problem of corruption in the ranks of the police and bureaucracy. Finally, the course will cover India's foreign policy, asking students to probe the meaning of Non-Alignment, and inspect the character of India's relations with Indians Overseas and with its neighbours, including China and Pakistan. While the main focus is India, the course will involve comparative thinking about circumstances and policies in other countries around the world. Throughout the course we will watch films, read fiction and view art and architecture produced at the time to get a sense of the popular and artistic response to the challenges of freedom and development.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in the Michaelmas and the Lent terms.

Formative coursework: Students will be expected to produce 1 draft essay (1200 words) and 1 essay (2000 words) in the MT, and 1 gobbet exercise (600 words) in the LT.

Indicative reading: Guha, R. (2007). *India after Gandhi: the History of the World's Largest Democracy*. London, Macmillan. Khilnani, S. (1997). *The Idea of India*. London, Penguin. Chatterji, J. Assessment: Essay (30%, 3000 words) in the LT. Essay (35%, 3000 words) and other (20%) in the ST. Other (15%) in the MT and LT.

Document Analysis (20%, 600 words) in the ST.

Fieldwork video gobbet (15%) in the MT and LT. The main theme of the course is political myths. For this project, students will be

asked to find an object in London (or anywhere in the world, but they must visit it in person) that is related to one of the myths discussed in the course. Students will work in groups of 2-3 to make a roughly five-minute video describing the object and how it relates to the course.

HY330

From Tea to Opium: China and the Global Market in the Long Eighteenth Century

This information is for the 2018/19 session.

Teacher responsible: Dr Chung Yam Po SAR.2.18

Availability: This course is available on the BA in History, BSc in Government and History, BSc in International Relations and History and BSc in Politics and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Did China foster or resist the early wave of globalisation? How should we situate China within the global context prior to the First Opium War? Compared with the Dutch and the British, in what ways did the Chinese interact with the world that had been created by global trade? Had China already become the world factory in the eighteenth century? Using both primary and secondary sources, this seminar examines these questions by looking at the production, circulation and consumption of a variety of commodities that were exported from and imported to China. If we agree that a commodity has its own social life and history, then we can also examine its story in order to complicate our understanding of China's role and significance in the global market throughout the long eighteenth century. This seminar is divided into two parts. In Part I (the first five sessions) we will historicise the political, social and economic background of the Qing dynasty in the early modern period. From week to week, we will identify remarkable watersheds that changed or transformed the way that China engaged in or became disengaged from the global market, covering the China Seas, Indian Ocean, Atlantic and Pacific. We will also focus on port cities in China and Southeast Asia, so as to illustrate exactly how peoples and places facilitated the flow of commodities on a global scale. In Part II (the remaining sixteen sessions) we will study a series of commodities that each fits under different featured themes, such as 'When Silk was Gold', 'Pepper and Parley', 'Camphor and Taiwan' and 'Opium and Power'.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Weekly two-hour seminars. There will be a reading week in the Michaelmas Term and the Lent Term and a revision session in the Summer Term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Kenneth Pomeranz, *The World that Trade Created* (London and New York: Routledge, 2012). Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (35%, 3500 words) in the LT.

Presentation (15%) in the MT and LT.

IR100

International Relations: Theories, Concepts and Debates

This information is for the 2018/19 session.

Teacher responsible: Dr Tarak Barkawi

Availability: This course is compulsory on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available on the BSc in Environment and Development and BSc in Politics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: An examination of the concepts designed to explain the nature of contemporary international relations.

1. The emergence of the discipline and the nature of its subject matter.
2. Key agential concepts in IR: state; empire; international and subnational agents; foreign policy.
3. Key structural concepts in IR: the states system; Euro-centrism, globalisation, post-colonialism; global governance; security.
4. Key institutional concepts in IR: international society; great powers; diplomacy; war; balance of power; international law and human rights.
5. Key sociological concepts in IR: power and sovereignty; intervention; gender; anarchy.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of approximately 1,500 words. They will also be required to give at least one class presentation.

Indicative reading: A full course description and guide to reading will be provided: relevant course texts include J Baylis & S Smith (Eds), *Globalisation and World Politics*, 2nd edn, (Oxford UP, 2001); C Brown, *Understanding International Relations*, 2nd edn (Macmillan, 2001); R Jackson & G Sørensen, *Introduction to International Relations* (OUP, revised edn., 2003).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Sample papers are included in the full course description.

IR101

Contemporary Issues in International Relations

This information is for the 2018/19 session.

Teacher responsible: Prof Peter Trubowitz CLM 4.02 and Dr Ulrich Sedelmeier CLM 5.06

Availability: This course is compulsory on the BSc in International Relations. This course is available on the BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Course content: This course provides an opportunity to gain an analytically deeper understanding and reflect critically upon some of the most topical issues that currently confront international

relations and which shape the development of the contemporary international order. These include but are not limited to: violent conflict in the Middle East; international terrorism; the rise of China; tensions between Russia and the West; North Korea and the challenge of nuclear proliferation; US foreign policy under President Donald Trump; challenges to multilateral cooperation and liberal internationalism; human rights; humanitarian intervention; financial crises; poverty and global inequality; climate change and environmental security; migration and refugees. The course encourages students to engage in debating the nature of, and possible responses to, contemporary challenges and crises in international politics. The course complements IR100 with a more applied policy focus, while emphasising the need for critical analytical depth when reflecting on the origins, nature and implications of current affairs. Students will develop an awareness of the relationship between the discipline of International Relations as a field of knowledge and the practices of world politics.

Teaching: 10 hours and 30 minutes of lectures, 8 hours of classes and 4 hours of classes in the MT. 10 hours and 30 minutes of lectures, 7 hours of classes and 6 hours of classes in the LT. Lectures will be 1.5 hours to provide ample time for questions and answers. The classes in in MT and LT include longer 2-hour classes for student presentations and a role-play.

In line with departmental policy, students on the course will have a reading week in Week 6 of each term.

Formative coursework: Students will be expected to write a short 600-750 'opinion piece' in MT, a 1,500 word 'policy memo' in LT, and to give one individual presentation on a particular issue or problem in LT.

Indicative reading: Robert Art and Robert Jervis (eds), *International Politics: Enduring Concepts and Contemporary Issues* 11th ed (Pearson: 2012). John Baylis, Steve Smith and Patricia Owen (eds), *The Globalization of World Politics* 6th ed (OUP: 2013). Chris Brown and Kirsten Ainley, *Understanding International Relations* 4th ed (Palgrave: 2009). Barry Buzan and George Lawson, *The Global Transformation: History, Modernity and the Making of International Relations* (CUP: 2015). Jenny Edkins and Maja Zehfuss (eds), *Global Politics: A New Introduction* (Routledge: 2013), pp.147-169

Assessment: Policy memo (70%) in the ST.

Class participation (10%) in the MT and LT.

Presentation (20%) in the MT.

Students on the course will write a 2,500 word 'policy memo' (70%) on a particular contemporary issue. Students will also give a group presentation on a particular issue or problem (20%). Participation in class discussion will also be assessed (10%).

IR102

Thinking Globally: Studying International Relations

This information is for the 2018/19 session.

Teacher responsible: Prof Karen Smith CLM 4.09

A full time member of staff will have overall responsibility for the course. LSE Fellows will be responsible for the workshop sessions.

Availability: This course is compulsory on the BSc in International Relations. This course is available on the BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Students for whom the course is optional must commit to the course when they choose it.

Course content: The aims of this short course are two-fold. First, to enable you to reflect on and share ideas with other students about why you chose to study international relations and what it means to study international relations. Second, to acquire and develop the key skills you need to study international relations, including analytical skills, communications skills (verbal and written), problem solving skills and team working skills. Students will work together in small groups on the skills required for reading

and taking notes; conducting research; writing essays and exams; and succeeding as an IR scholar.

Week 3: Anatomy of a discipline: what is International Relations?

Week 4: Reading international relations

Week 5: Researching international relations

Week 7: Communicating international relations

Week 8: Doing international relations.

Teaching: 10 hours of workshops in the MT.

There will be weekly 2 hour workshops in weeks 1, 2, 3, 4 and 5 of the Michaelmas Term.

Formative coursework: There is no formal 'formative assessment' for the course. A variety of 'formative exercises' will be used in the workshop setting aimed at developing and enhancing a range of study skills linked to the study of international relations.

Indicative reading: A.C. McKeil, 'Student Feature – A Brief Introduction to the Study of International Relations', e-International Relations, 3 July 2017: <http://www.e-ir.info/2017/07/03/student-feature-a-brief-introduction-to-the-study-of-international-relations/>; Stella Cottrell, *The Study Skills Handbook*, 4th ed (Palgrave: 2013) Learn to speed read tutorial: <https://www.youtube.com/watch?v=cPOIZ6DGXWE>

Assessment:

There is no summative assessment for this course.

IR200

International Political Theory

This information is for the 2018/19 session.

Teacher responsible: Prof William Callahan CLM 5.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course consists of a two-part survey of international political theory. The first part deals with normative political theory. The focus is on debates provoked by classical thinkers such as Grotius, Hobbes, Kant and Marx. The second part of the course concerns contemporary IR theory. It explores the ways of explaining and understanding international relations associated with the major paradigms, such as realism, liberalism, and constructivism. Topics covered include war, peace, international law and order, international justice, intervention and non-intervention, sovereignty, diplomacy, revolution and counter-revolution, nationalism and national self-determination.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of a maximum length of 1,500 words each to be set and marked by class teachers. They are also expected to give at least one class presentation.

Indicative reading: A F Lang, Jr., *International Political Theory*; C Brown, *Understanding International Relations*; H Bull, *The Anarchical Society*; E H Carr, *The Twenty Years' Crisis*; I Clark, *The Hierarchy of States*; M Donelan, *Elements of International Political Theory*; F H Hinsley, *Power and the Pursuit of Peace*; M Wight, *International Relations: The Three Traditions*; K Hutchings, *International Political Theory*; C Brown, T Nardin & N Rengger, *International Relations in Political Thought*; H Biddel, C Sylvest & P Wilson, *Classics of International Relations*.

A full course guide and reading list, will be available on Moodle at the beginning of the course. This will set out the structure and content of the course and providing detailed guidance on reading, sample examination questions, suggested essay titles, and topics for class discussion.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The examination paper requires that three questions be answered out of twelve.

IR202

Foreign Policy Analysis 1

This information is for the 2018/19 session.

Teacher responsible: Prof Christopher Alden CLM.5.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not examinable as a course in itself. It can only be taken as an examinable course if taken in conjunction with IR202.2.

Course content: The course analyses various theoretical perspectives on foreign policy, and the means of conduct of the main actors in the international system towards each other. It focuses mainly, but not entirely, on states. Foreign Policy Analysis as a sub-discipline of IR; the problem of formulating goals and choosing policy instruments; the role of leadership and psychological elements in policy making; the rational actor model; bureaucratic politics; the impact of history and identity on foreign policy; domestic sources of foreign policy including public opinion, pressure groups and constitutions; the motivations underpinning foreign policy; the role and influence of transnational actors in relation to foreign policy making; foreign policy crises. The discussion classes combine a discussion of these themes with their application to the foreign policies of major powers in the international system. A detailed programme of lectures will be provided at the start of the session.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of classes in the LT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to write three essays of about 1,500 words each for their class teachers during the course and to make presentations in the discussion classes.

Indicative reading: C Alden and A Aran, *Foreign Policy Analysis – New Approaches*, Routledge, 2011; C Hill, *The Changing Politics of Foreign Policy*, Palgrave, 2003; S Smith, A Hadfield and T Dunne (Eds), *Foreign Policies: Theories, Actors and Cases*, Oxford University Press, 2007.

A full list of references will be provided at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR202.2

Contemporary Foreign Policy in Practice

This information is for the 2018/19 session.

Teacher responsible: Prof Christopher Alden CLM.5.13

Availability: This course is compulsory on the BSc in International Relations. This course is available on the BSc in International Relations and History. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is not examinable as a course in itself. It can only be taken as an examinable course if taken in conjunction with IR202. It is only available as credit for General Course students as part of IR202 as a whole.

Course content: The foreign policies and foreign policy processes of selected major states since 1945, depending on examination requirements and teachers available. An analysis of the foreign policies of a selected group of major states, with due regard to their respective national interests, external commitments,

traditional values and other relevant factors. The role of internal group interests and electoral considerations. Constitutional machinery for the formulation of foreign policy. Diplomatic services and techniques. Illustrative material will be drawn mainly from the post-1945 period. This year there will be lectures on Britain, China, the United States and the Soviet Union/Russia. Additional country case studies will be included for the remainder of lectures including some or all of the following: Indonesia, Brazil, South Africa, Iran, India and Japan.

Teaching: 15 hours of lectures in the LT.

Indicative reading: Recommended texts include

(a) The United States: J Ikenberry (Ed), *American Unrivalled: the Future of the Balance of Power* (Ithaca, NY: Cornell UP 2002); N Ferguson, *Colossus: the Price of American Empire* (New York: Penguin 2004); C Kegley & E Wittkopf, *American Foreign Policy: Patterns and Process* (Basingstoke: Macmillan 1996). (b) The United Kingdom: M Curtis, *The Ambiguities of Power: British Foreign Policy Since 1945* (London: Zed Press, 1995); J Dumbrell, *A Special Relationship: Anglo-American relations in the Cold War and after*, Palgrave, 2001. (c) The Soviet Union/Russia: R Donaldson & J Noguee, *The Foreign Policy of Russia: Changing Systems, Enduring Interests* (London: M E Sharpe, 1998); F Fleron, et al (Eds), *Classic Issues in Soviet Foreign Policy: From Lenin to Brezhnev* (New York, Aldine de Gruyter, 1991); F Fleron, et al (Eds), *Contemporary Issues in Soviet Foreign Policy: From Brezhnev to Gorbachev* (New York, Aldine de Gruyter, 1991). (d) China: T W Robinson & D Shambaugh (Eds), *Chinese Foreign Policy: Theory and Practice* (Oxford: Clarendon Press, 1994); S Zhao (Ed), *Chinese Foreign Policy: Pragmatism and Strategic Behavior* (Armonk, NY, M E Sharpe, 2003), David M. Lampton (Ed), *The Making of Chinese Foreign and Security Policy in the Era of Reform* (Stanford UP 2001).

IR203 International Organisations

This information is for the 2018/19 session.

Teacher responsible: Dr Ulrich Sedelmeier Room CLM.5.06.

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students should have a background in International Relations. Prior familiarity with international relations theory is an advantage, but not necessary.

Course content: The course draws on theories of international institutions to explain comparatively key aspects of the role of International Organisations in international politics. These questions include why states create International Organisations, why states transfer certain powers to them, and what impact they have on the practice of international cooperation with regard to matters of concern to international society such as the maintenance of international peace and security, the management of international economic relations, the promotion of international environmental standards, or the protection of human rights. International organisations to be discussed include the United Nations, the International Monetary Fund, the World Bank, the World Trade Organization, NATO, and regional organisations like the European Union.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to write two essays of a maximum length of 1,500 words. The first will be due in the Michaelmas Term and will provide the basis for feedback prior to the submission of the assessed coursework as well as preparation for the exam. The second will be due in the Lent Term

and will provide the basis for feedback prior to the Summer Term exam. In addition, student will give at least one class presentation (introduction to discussion). Class teachers will mark the essays and provide feedback on student presentations.

Indicative reading: Ian Hurd (2013): *International Organizations: Politics, Law, Practice*, 2nd edition (Cambridge: Cambridge University Press); Volker Rittberger, Bernhard Zangl and Andreas Kruck, *International Organization: Polity, Policy, Politics*, 2nd ed. (Basingstoke: Palgrave, 2012).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the MT.

The assessed essay will be from a fixed range of questions. The essay topics will be posted on Moodle before Week 9 of the MT and will focus on the theories and conceptual material covered in the first part of the course.

IR205 International Security

This information is for the 2018/19 session.

Teacher responsible: Dr Milli Lake CLM 4.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course offers students an introduction to the literature on international security, from both theoretical and policy-oriented perspectives. This course is organised in three parts. The first introduces students to the concept of security, examines competing theoretical approaches to international security, and considers how the field has changed over time. The second section of the course analyzes the causes of interstate and intrastate war and conflict as well as the processes of conflict management, duration and termination. The final component of the course explores a range of emerging and policy-relevant security issues, including humanitarian military intervention, terrorism and counter-terrorism, peacebuilding, and climate change. By exploring these and related issues, students will gain a greater understanding of how different traditions of analysis, from mainstream approaches to war and deterrence, constructivist treatments of securitisation, and recent innovations in critical security studies, think about contemporary security issues.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Classes are compulsory. Students will be expected to contribute to class discussions and present papers each week.

In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will submit two formative essays: one in Week 7 of the MT; one in Week 2 of the LT. Students may use these to develop ideas for their summative essay. Students will submit a 2 page outline of their assessed essay in the LT. This will consist of a research question, an overview of the argument, a draft structure and an indicative reading list. Feedback will be provided via email and/or individual meetings with students.

Indicative reading: Ana Arjona. 2017. "Rebelocracy: A Theory of Social Order in Civil War" (Kellogg Working Paper). Ken Booth, *Critical Security Studies and World Politics* (Reiner: 2005). Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (60%, 2500 words) in the LT.

IR206

International Political Economy

This information is for the 2018/19 session.

Teacher responsible: Dr M Hearson LCH 2.10

Availability: This course is available on the BSc in Economics, BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Students from other degree programmes will be admitted by permission of the Course Coordinator, including BSc Economic History

Course content: The course examines the role of power and politics in international economic relations. Besides international structural factors, it emphasises the role of domestic political interests and their influence over foreign economic policies. Major approaches covered include historical views on international political economy, and contemporary systemic theories of international cooperation, interest groups politics, ideas and institutions. The course provides an overview and explanation of the international monetary and trade systems since 1944. It also discusses current debates on trade, monetary policy, the political roots of financial crises, globalisation and the retreat of the state, and environmental protection.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

An optional 10 hours lecture series 'An Intro to Economics' will be available to students on the course in the Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students write three essays of a maximum length of 1,500 words.

Indicative reading: Basic references are: M Blyth (ed), Routledge Handbook of International Political Economy (IPE); J Ravenhill (ed), Global Political Economy; S Strange, States and Markets; R Palan, Global Political Economy: Contemporary Theories; J Frieden & D Lake, International Political Economy; T Oatley, International Political Economy; A Walter & G Sen, Analyzing the Global Political Economy. A detailed reading list will be given at the beginning of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam

period.

In the examination students will answer three questions chosen from twelve.

IR305

Strategic Aspects of International Relations

This information is for the 2018/19 session.

Teacher responsible: Prof Christopher Coker CLM 5.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also open to students from the other University of London institutions by arrangement with the teacher.

Course content: Analyses various perspectives on strategy and war, the way war is conducted by states and within states and focuses on the way different cultures understand strategic outcomes. The attempt to humanise war; the western way of warfare; non-western ways of war, including Asian/Middle East; asymmetrical warfare; Globalisation and Security; Clausewitz and the western way of warfare; war and the risk society, war in the developing world; war and genocide, terrorism, the 'end of war' thesis. The discussion classes combine a discussion of these topics with their application by states in the international system.

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 6 hours of lectures and 9 hours of classes in the LT.

The classes are compulsory. Students will be expected to contribute to class discussions and present papers each week. Students on this course will have a reading week in Week 6 in line with departmental policy.

Formative coursework: Students will be required to write three essays (c. 1,500 words each) in the course of the year, in MT and LT.

Indicative reading: Daniel Pick, The War Machine; Martin van Creveld, War and Technology; Charles Gray, Post-Modern War; Martin van Creveld, On Future War; John Keegan, A History of Warfare.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR312 Half Unit Not available in 2018/19

Genocide

This information is for the 2018/19 session.

Teacher responsible: Dr Jens Meierhenrich CLM 6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

This course cannot be taken in conjunction with SO309 Atrocity and Justice.

This course will not be available 2017-18.

Course content: This lecture course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to

be discussed include Australia, Cambodia, China, the Democratic Republic of Congo, East Timor, Nazi Germany, Guatemala, Iraq, Northern Ireland, the Ottoman Empire, Rwanda, Uganda, the Soviet Union, Sudan, and the former Yugoslavia, among others. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present - and for critically assessing the promise and limits of responding to collective violence.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to research and write one formative essay (1,500 words). In order to ensure a broad acquisition of knowledge, students should diversify the subject matter of their essays. In addressing a given essay topic, students must seek to integrate theory and history and bring empirical evidence to bear on the research question they have chosen. In constructing their answers, students may examine a number of cases, drawing comparisons among them, or may focus on a single case. Essays must be fully - and carefully - referenced using one of the major conventions consistently. Submissions are due in Week 8 and must be made in hard copy.

Indicative reading: Zygmunt Bauman, *Modernity and Holocaust* (Ithaca: Cornell University Press, [1989] 2000). Christopher R. Weitz, *A Century of Genocide: Utopias of Race and Nation* (Princeton: Princeton University Press, 2003).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR313 Half Unit Not available in 2018/19 Managing China's Rise in East Asia

This information is for the 2018/19 session.

Teacher responsible: Dr Jurgen Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: The main focus of this class-based half-course on the contemporary international relations of East Asia is the

management of China's rise. The course begins by exploring China's re-emergence as a major regional power, in part by discussing the economic, political and military dimensions of Chinese power, China's evolving identity, as well as the major aspects of its declaratory and substantive foreign and security policy. It also examines from different theoretical and political perspectives the implications that China's rise has been posing for East Asia. As regards the management of China's growing capabilities, status and ambitions, the course explores what political and security strategies vis-à-vis China have in turn been adopted by the key states that are either resident in or have a significant presence in the wider East Asia, such as the United States, Japan, Russia and India. The course also explores the ways in which China's rise has impacted on conflicts in the South China Sea and on the Korean peninsula, and the nature of the management of China's rise by states from continental and maritime Southeast Asia. It moreover examines how regional arrangements and institutional frameworks for dialogue and cooperation led by lesser regional states have served the management of China's rise. Concepts and theories from International Relations will be drawn upon as appropriate.

Teaching: 20 hours of classes in the LT. 2 hours of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: William A. Callahan, *China the Pessimist Nation* (Oxford: Oxford University Press, 2010); Thomas J. Christensen, *The China Challenge: Shaping the Choices of a Rising Power* (New York: W.W. Norton, 2015). Aaron L. Friedberg, *A Contest for Supremacy: China, America, and the Struggle for Mastery in Asia* (New York: W.W. Norton, 2011); Jonathan Holslag, *China's Coming War with Asia* (Cambridge: Polity, 2015). Alastair Iain Johnston and Robert S. Ross, eds., *Engaging China: The Management of an Emerging Power* (London: Routledge, 1999); Rex Li, *A Rising China and Security in East Asia: Identity Construction and Security Discourse* (Abingdon: Routledge, 2009); Gilbert Rozman, *Chinese Strategic Thought toward Asia* (New York: Palgrave Macmillan, 2010); David Shambaugh, ed., *Power Shift: China and Asia's New Dynamics* (Berkeley: University of California Press, 2005); Sheila Smith, *Intimate Rivals: Japanese Domestic Politics and a Rising China* (New: Columbia University Press, 2015). Ian Storey, *Southeast Asia and the Rise of China: The search for security* (London: Routledge, 2011); Robert G. Sutter, *U.S.-Chinese Relations: Perilous Past, Pragmatic Present*, 2nd ed (Rowman & Littlefield, 2013); Michael Yahuda, *Sino-Japanese Relations After the Cold War: Two Tigers Sharing a Mountain* (Abingdon: Routledge, 2013).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR314 Half Unit Not available in 2018/19 Southeast Asia: Intra-regional Politics and Security

This information is for the 2018/19 session.

Teacher responsible: Dr Jurgen Haacke CLM 7.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Course content: This class-based half unit course examines key aspects of the contemporary international relations of Southeast Asia, with the primary focus being on the intramural relations of the member states of the Association of Southeast Asian Nations (ASEAN). In order to contextualise these intramural relations, the course first explores the different domestic political contexts in

which Southeast Asian decision-makers operate, the historical backdrop to the region's major intrastate and interstate conflicts and disputes, and the key security issues and challenges affecting the region and individual states. The course also, secondly, engages in a comparative analysis of the foreign and security policies of the five original member states of ASEAN that will, for instance, take account of the influence of geographical factors, the relevance of ethnic politics and nationalism, political change, leadership ambitions, and the main economic and security interests pursued by governments. Finally the course explores how the respective domestic backdrop and foreign policy outlook of Southeast Asian states have shaped the nature, effectiveness and limits of ASEAN as a vehicle for intramural political-security cooperation. In this context, the course assesses the grouping's efforts to establish an ASEAN political-security community. The course will conclude by comparing the role played respectively by the ASEAN states and extra-regional powers in managing regional security and order. Concepts and theories drawn from International Relations, and especially Foreign Policy Analysis, will be applied as appropriate.

Teaching: 20 hours of classes in the MT. 2 hours of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write two essays with a maximum length of 2,000 words and present on class topics.

Indicative reading: Beeson, Mark (2009) *Contemporary Southeast Asia*, 2nd ed. (Houndmills, Basingstoke: Palgrave Macmillan); Acharya, Amitav (2014), *Constructing a security community in Southeast Asia: ASEAN and the problem of regional order*, 3rd ed. (Abingdon: Routledge); Ganesan, N. and Ramses Amer, eds (2010) *International Relations in Southeast Asia: Between Bilateralism and Multilateralism* (Singapore: ISEAS); Leifer, Michael (2000) *Singapore's Foreign Policy: Coping with Vulnerability* (London and New York: Routledge); Saravanamuttu, Johan (2010) *Malaysia's Foreign Policy: The First Fifty Years-Alignment, Neutralism, Islamism* (Singapore: ISEAS); Severino, Rudolfo (2006) *Southeast Asia in Search of an ASEAN Community* (Singapore: ISEAS); Slater, Dan (2010) *Ordering Power: Contentious Politics and Authoritarian Leviathans in Southeast Asia* (Cambridge: Cambridge University Press); Tan, Andrew T.H., ed., *A Handbook of Terrorism and Insurgency in Southeast Asia* (Cheltenham: Edward Elgar, 2007).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR315 The Middle East and International Relations Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Katerina Dalacoura

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200), or an equivalent course.

Course content: The course applies the theories and conceptual tools of the discipline of International Relations to the study of the Middle East region. It uses the empirical material offered by the history, politics, political economy and international politics of the region to explore these concepts and theories. More specifically, it concentrates on the areas of foreign policy analysis, international political economy, gender, the study of international norms and conflict and peace studies. It explores the applicability of various International Relations theories (for example, realism and neo-realism; neo-liberalism; constructivism; English School; neo-Marxism and structuralism; and post-colonialism) to the study of

the region.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT.

Formative coursework: Three essays of 1,500 words each.

Indicative reading: Raymond Hinnebusch and Anoushiravan Ehteshami (eds.), *The Foreign Policies of Middle Eastern States* (Lynne Rienner, 2014); Raymond Hinnebusch, *The International Politics of the Middle East* (Manchester University Press, 2003); Fred Halliday, *The Middle East in International Relations: Power, Politics, and Ideology* (CUP, 2005); Shibley Telhami and Michael Barnett, *Identity and Foreign Policy in the Middle East* (Cornell University Press, 2002); Michael Barnett, *Dialogues in Arab Politics* (Columbia University Press, 1998); Baghat Korany and Ali Dessouki, *The Foreign Policies of Arab States* (The American University of Cairo Press, 2008).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

IR317 Half Unit American Grand Strategy

This information is for the 2018/19 session.

Teacher responsible: Prof Peter Trubowitz CLM 4.05

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course explores American foreign policy at the broadest level of analysis – the level known as grand strategy. The course showcases the main theoretical perspectives that inform the study of grand strategy and applies them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the U.S. experience for theorizing about power politics and the implications of alternative theories for thinking critically about American international behavior. Emphasis is placed on the debates and controversies that animate the study of grand strategy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write one short (1,200 words) formative essay based on questions from previous exam papers.

The essay will be due in Week 7 of the LT. Students will be able to use the essay to explore ideas that they might wish to develop in their assessed essay.

Students will provide a 1-2 page outline of their assessed essay by the end of Week 9 LT. This will be returned with comments and feedback by the end of the LT.

Indicative reading:

- John Lewis Gaddis, *Strategies of Containment* (2005)
- Peter Trubowitz, *Politics and Strategy* (Princeton 2011)
- Linda Weiss, *America Inc.?* (Cornell 2014)
- Fareed Zakaria, *From Wealth to Power* (Princeton 1998)

Assessment: Essay (100%, 2500 words) in the ST.

Students will write a 2,500 word assessed essay selecting from a list of topics and questions provided by the course coordinator. The essay will be due at the end of Week 1 of the ST.

IR318 Half Unit Visual International Politics

This information is for the 2018/19 session.

Teacher responsible: Prof William Callahan CLM 5.07

Availability: This course is available on the BSc in International

Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: We live in a visual age. Images play an increasingly important role in shaping international political events and our understanding of them. The objective of this course is to examine how visual sources - maps, photographs, film, television, new media - influence international political phenomena, our perception of them, and public responses to them. The course has conceptual, empirical, and practical objectives. At a conceptual level students will acquire knowledge of key theoretical and methodological debates necessary to study visual international politics. At an empirical level, students will gain a better understanding of several concrete instances where images helped to shape international political phenomena, from wars to humanitarian crises, from global social movements to alternative world orders. At a practical level, students will learn how to make a short documentary film.

Teaching: 9 hours of lectures and 20 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 case study and 1 essay in the LT.

Indicative reading: Berger, John (1972) *Ways of Seeing*. London: Penguin. Bleiker, Roland, ed. (2018) *Visual Global Politics*. London: Routledge. Callahan, William A. (2018) 'The Politics of Walls: Barriers, Flows and the Sublime'. *Review of International Studies*, first view. Campbell, David (2007) 'Geopolitics and Visual Culture: Sighting the Darfur Conflict 2003-05'. *Political Geography* 26(4): 357-382. Der Derian, J. (2009). *Virtuous War: Mapping the Military-Industrial-Media-Entertainment-Network*. New York: Routledge. Evans, Jessica and Stuart Hall, eds. (1999) *Visual Culture: The Reader*. London: Sage. Mirzoeff, Nicolas (2015) *How to See the World*. London: Pelican Books. Rose, Gillian (2016) *Visual Methodologies: An Introduction to Researching with Visual Materials*, 4th ed. London: Routledge. Shapiro, Michael J. (2011) *Cinematic Geopolitics*. London: Routledge.

Assessment: Project (50%) in the LT.

Essay (50%, 2500 words) in the ST.

The project will be a ten minute documentary film, which will be made by groups of 2 or 3 students.

IR319 Half Unit Empire and Conflict in World Politics

This information is for the 2018/19 session.

Teacher responsible: Dr Tarak Barkawi CLM 4.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200).

Course content: Many peoples and places in modern world politics have been shaped by histories of empire. This course explores the violent dimensions of the imperial past and present. It covers histories and social relations of armed conflict in imperial context from "small war" to "counterinsurgency" and the War on Terror; it looks at the ways in which warfare shapes (and is shaped by) the societies, cultures and politics that populate world politics; and it considers some of the intellectual traditions that have arisen out of the experience of colonial violence, from the thought of resistance leaders to subaltern and postcolonial studies. The premise of the course is that imperial warfare and violence have been generative forces in shaping world politics.

This course aims to familiarise students with scholarship

on empire and conflict in International Relations and related disciplines. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between empire and globalization in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Such "small wars" have shaped society and politics in both the core and periphery of the international system, and often continue to do so long after the guns fall silent (as for example in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. Third and finally, the course will explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern studies and postcolonialism. The course will introduce students to this work and its applications to understanding world politics.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT.

Additionally, there will be weekly film viewings starting in Week 2. Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures

- 1) Introduction: Empire and International Relations
- 2) Empire/History/Globalization
- 3) Empire, the Regions, and World Politics
- 4) Politics/Strategy/War
- 5) War and Society in Global Perspective
- 6) Orientalism and 'Small war'
- 7) Revolutionary Guerrilla War
- 8) Counterinsurgency
- 9) Conflict and Development
- 10) The War on Terror in North/South Perspective

Undergraduate Class Topics

- 1) Globalization and History
- 2) Empire and the Making of Regions
- 3) War and Politics
- 4) War and Society
- 5) Orientalism
- 6) Revolutionary Guerrilla War
- 7) Counterinsurgency
- 8) Case Study: The Wars in Vietnam
- 9) Empire and the War on Terror

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Frantz Fanon, *The Wretched of the Earth* (London: Penguin, 2001 [1961]). Tzvetan Todorov, *The Conquest of America: The Question of the Other* (Norman: University of Oklahoma Press, 1999 [1984]). Doty, Roxanne Lynn. (1996) *Imperial Encounters: The Politics of Representation in North-South Relations*. Minneapolis, MN: University of Minnesota Press. Richard Drinnon, *Facing West: The Metaphysics of Indian-Hating and Empire-Building* (Norman: University of Oklahoma Press, 1997). A.G. Hopkins, ed., *Globalization in World History* (London: Pimlico, 2002). Edward Said, *Culture and Imperialism* (New York: Vintage, 1994 [1993]). Mao Tse-Tung. (2000[1937]) *On Guerrilla Warfare*. Urbana, IL: University of Illinois Press. Williams, William Appleman. (1972[1959]) *The Tragedy of American Diplomacy*. New York: Dell. Wolf, Eric R. (1997[1982]) *Europe and the People Without History*. Berkeley: University of California Press.

Assessment: Essay (100%, 4000 words) in the LT.

IR320 Half Unit Europe's Institutional Order

This information is for the 2018/19 session.

Teacher responsible: Prof Karen Smith CLM 4.09

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed International Organisations (IR203).

Course content: Europe is the region with the highest density of organisations in the world. This course will analyse the importance of European organisations for both their member states and international relations in general. It will review the development of Europe's institutional order in the post-war era and its evolution since the end of the Cold War. Much emphasis will be placed on the evolution of West European organisations such as the Council of Europe, the European Union and NATO, but attention will also be given to European organisations in the former communist bloc, trans-European organisations, and sub-regional organisations. Lecture and class topics:

1. Europe in International Relations
2. Building Europe's Institutional Order I: NATO and the Warsaw Pact
3. Building Europe's Institutional Order II: economic integration in the European Community
4. Building Europe's Institutional Order III: economic cooperation in EFTA and COMECON
5. Europe's Institutional Order and the ending of the Cold War
6. Europe's security and defence institutions after the Cold War I: what is NATO for?
7. Enlarging Europe's institutional order after the Cold War I: NATO
8. Integration in Europe after the Cold War: the European Union since Maastricht
9. Enlarging Europe's institutional order after the Cold War II: the EU
10. Europe's security and defence institutions after the Cold War II: the case of the Ukraine crisis 2014

Teaching: 20 hours of classes in the LT.

20 hours of classes in the LT.

In line with departmental policy, students on the course will have a reading week in Week 6.

Independent study based on the readings is required. Classes provide an opportunity to discuss issues in depth in a small group setting. Attendance at classes is mandatory, as is adequate preparation for participation in each class discussion. Students will be required to give at least one presentation on one of the topics on the class schedule. Each presenter should provide the class with a one-page outline of the presentation. Presentations should be a maximum of 15 minutes long.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT. Students will produce one short 1,500 word formative essay due in week 6 of the Lent Term. The essay question is to be selected from a list provided to students in week 1. The purpose of the essay is to provide experience of summarising succinctly and engaging with complex empirical and theoretical material, develop research and writing skills necessary for the assessed essay, and to assist in the development of ideas and arguments for the assessed essay. Independent study, based on the readings indicated on the reading list, is required.

Students will also produce a 1.5-2 page outline of their summative essay in week 9. The outline will include the essay question/title, an overview of the argument, a draft of the structure, and an indicative reading list. The reading list must include primary sources. Feedback will be given to students by the end of week 10.

Indicative reading: Brent Nelsen and Alexander Stubb, *The European Union: Readings on the Theory and Practice of European Integration* 4th ed (Palgrave, 2014). Stuart Croft et al, *The Enlargement of Europe* (Manchester University Press, 1999). Peter Stirk and David Weigall (eds), *The Origins and Development*

of European Integration (Pinter, 1999). Desmond Dinan, *Europe Recast: A History of the European Union*, 2nd ed (Palgrave, 2014). Desmond Dinan, *Ever Closer Union? An Introduction to the European Union*, 4th ed. (Palgrave, 2010). Mette Eilstrup-Sangiovanni (ed), *Debates on European Integration: A Reader* (Palgrave, 2006). William Hitchcock, *The Struggle for Europe: the Turbulent History of a Divided Continent 1945 to the Present* (Anchor Books 2004). Ben Rosamund, *Theories of European Integration* (Palgrave, 2000)

Assessment: Essay (100%, 3000 words) in the ST.

IR321 Half Unit Revolutions and World Politics

This information is for the 2018/19 session.

Teacher responsible: Dr George Lawson CLM 5.12

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: Revolutions are often considered to be a 'side order' to the 'main course' of International Relations. But as this course explores, the lack of attention paid to revolutions is a mistake – revolutions have played a major part in the making of modern international order. From the 'Atlantic Revolutions' of the late 18th and early 19th centuries to the 'colour revolutions' of the early 21st century, revolutions have been constitutive of notions of sovereignty, order, justice, and more. Revolutions have also been tightly bound up with dynamics of war and peace. This course explores both the theory and practice of revolutions, teasing out their effects and examining the prospects for revolutionary change in the contemporary world.

List of Topics

Part 1 Thinking about revolutions

Week 1 What are revolutions?

Week 2 Key themes in the study of revolutions

Week 3 Revolutions and world politics

Part 2 The experience of revolution

Week 4 The Atlantic 'age of revolutions'

Week 5 Socialist revolutions

(Week 6 Reading week – session on the assessed essay)

Week 7 'Third World' revolutions

Week 8 The 'last great revolution'?

Week 9 'Colour' revolutions

Part 3 Revolution today

Week 10 The Arab uprisings

Week 11 Rethinking revolution

Teaching: 10 hours of lectures and 15 hours of classes in the LT.

The main aim of the course is to provide an opportunity for students to make informed judgments about how and in what ways revolutions have impacted on core features of modern international order. Additional aims include assessment of the place of revolution in the contemporary world and, more generally, the ability to connect theoretical arguments about revolutions with the substantive experience of revolutions.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT.

Students will produce 1 x 1,500 word essay in week 8 of LT.

Students will also submit a 2-3 page outline of the assessed essay in Week 10, receiving comments and feedback in Week 11.

Indicative reading: Doug McAdam, Sidney Tarrow and Charles Tilly (2001) *Dynamics of Contention* (Cambridge: Cambridge University Press). John Foran (2005) *Taking Power* (Cambridge: Cambridge University Press). John Foran, David Lane and Andreja Zivkovic eds. (2008) *Revolution in the Making of the Modern World* (London: Routledge). Jack Goldstone (2014) *Revolutions: A Very Short Introduction* (Oxford, Oxford University Press). Jeff Goodwin (2001)

No Other Way Out (Cambridge: Cambridge University Press). Fred Halliday (1999) *Revolutions and World Politics* (London: Palgrave). Charles Kurzman (2008) *Democracy Denied* (Cambridge, MA: Harvard University Press). Daniel Ritter (2015) *Unarmed Revolutions* (Oxford: Oxford University Press). Eric Selbin (2010) *Revolution, Rebellion, Resistance* (London: Zed). Theda Skocpol (1979) *States and Social Revolution* (Cambridge: Cambridge University Press).

Assessment: Essay (70%, 3000 words) in the ST. Presentation (10%) and coursework (20%) in the LT. Summative assessment for the course is composed of a 3,000 word essay (70%); weekly blog posts of 200 words each (20%), and a group presentation (10%).

IR322 Half Unit Sovereignty, Rights and Justice: Issues in International Political Theory

This information is for the 2018/19 session.

Teacher responsible: Prof Chris Brown SHF.3.02

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Combines insights and concepts from political theory and international relations theory, and focuses on modern debates on sovereignty, the rights of states, individuals and peoples, and international justice.

Sovereignty and the norm of non-intervention; the contemporary international human rights regime; the ethics of war and violence; the politics of humanitarian intervention; the politics of international criminal law and the ICC; global social justice. Further details will be provided at the start of the session.

Teaching: 20 hours of seminars in the MT. (10 x 2 hr seminars.)

Week 6 is a reading week, in line with departmental policy

Formative coursework: Students will write one formative essay (1,500 words) due end of week 6; they can use this to develop ideas for the summative essay but students will not be allowed to 'cut and paste' their formative work into the summative essay. Students will produce a 2 page outline of the assessed essay in Week 10. This will set out the research question, an overview of the argument, a draft structure and indicative reading list. Students will receive approval of the research topic and feedback on the outline by the end of Week 11.

Indicative reading: A detailed list of references will be provided. Suitable introductions include: Chris Brown, *International Society, Global Polity: An Introduction to International Political Theory* (2015) and Anthony Lang, *International Political Theory* (2014);

Assessment: Essay (100%, 4000 words) in the LT. Students will write an essay of 4,000 words on a topic approved by the course convener due in Week 1 of the LT. Full details and guidance will be provided on Moodle and in the first seminar.

IR323 Half Unit Gender and International Politics

This information is for the 2018/19 session.

Teacher responsible: Dr Katharine Millar - CLM 4.10

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed International

Political Theory (IR200).

Course content: The course examines the gendering of both the practices/events studies as international politics and the discipline/study of international relations. The course is grounded in feminist theory, and provides students with an introduction to feminist epistemologies and methods. Students will discover how 'gender matters' to the study and conduct of international politics through an examination of several substantive areas of international politics, including security, development, NGOs and transnational social movements, and international law/organisations. These overarching topics are balanced with issue-specific case studies (eg sexual/sexualised violence in conflict; gendering of informal economy) to be discussed in class. Particular thematic attention will be paid to the on-going construction of global/transnational hierarchies that are gendered and gendering.

Indicative topics to be covered:

1. Where (and why) is gender in international politics?
2. Introduction to feminist theory and its relation to the 'international'
3. Gender, hierarchy and the international system
4. Intersectionality: gender, race, empire
5. Gender, epistemology and the study of international politics
6. Femininity, masculinity and security
7. Gendered mobilities: queer theory, security and migration
8. Gender and poverty/development
9. Feminist activism, NGOs and transnational social movements
10. Gender and global governance.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Indicative reading: C Enloe, *Bananas, beaches and bases: making feminist sense of international politics*, rev'd 2nd ed (University of California Press, 2014). C Weber, *Queer International Relations: sovereignty, sexuality and the will to knowledge* (OUP, 2016). A Sisson Runyan and S Peterson, *Global Gender Issues in the New Millennium* 4th ed (Westview Press, 2013). L Sjoborg, *Gender, War and Conflict* (Polity, 2014). B Ackerly, J True and M Stern (eds), *Feminist Methodologies for International Relations* (CUP, 2006). C Mohanty, *Feminism without Borders: Decolonising Theory; Practising Solidarity* (Duke University Press, 2003). C Sylvester, *Feminist International Relations: An Unfinished Journey* (CUP, 2001). G Caglar, L Prugl and S Zwingel, *Feminist Strategies in International Governance* (Routledge, 2013). M Yenenoglu, *Colonial Fantasies: Towards a Feminist Reading of Orientalism* (CUP, 2008)

Assessment: Coursework (10%) and essay (90%, 3000 words) in the MT.

The coursework entails weekly short reaction pieces (300 words maximum) engaging with the week's topic/readings to be submitted in advance of each class. These will prepare students to fully engage with the class discussions. Most importantly, they will familiarise students with the feminist epistemological commitments to critique and self-reflection.

IR324 Half Unit Not available in 2018/19 The Practices of Transitional Justice

This information is for the 2018/19 session.

Teacher responsible: Dr Jens Meierhenrich CLM.6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed International Organisations (IR203) and International Political Theory (IR200).

Course content: This taught seminar introduces students to the theory and history of transitional justice. It explores the logic of

amnesties, apologies, memorials, lustrations, reparations, trials, truth commission, and related responses to genocide, crimes against humanity, and other mass atrocities. Examining the whole array of historical and contemporary solutions to the problems of 'radical evil' (Immanuel Kant), the seminar assesses the conditions for - and limitations to - achieving order, truth, and justices in domestic politics and international affairs. Utilising insights from political science, law, history, sociology, and philosophy, the seminar will compare alternative institutional designs and divergent choices and consider their real, and imagined, social, political and economic consequences across space and time, from Athens to South Africa to Libya.

Teaching: 20 hours of seminars in the LT. 1 hour of seminars in the ST. In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students are required to research and write one essay (2,500 words). In addressing a given essay topic, students must seek to integrate, where applicable, theory and history and bring empirical evidence to bear on the research question they have chosen. Essays must be fully—and carefully—referenced using one of the major conventions consistently. Submissions are due in Week 8 and must be made in hard copy. Feedback is provided by the course teacher, who is responsible for marking essays.

Several criteria are applied in the evaluation of student essays, notably: (1) Originality of argument: How unexpected is the advanced claim? (2) Use of literature: Has relevant scholarship been digested and put to good use? (3) Soundness of analysis: Is the inquiry comprehensive and logically consistent? (4) Organisation of evidence: Have argument and evidence been introduced and presented in a compelling manner? (5) Validity of findings: Does the argument remain valid when applied empirically? (6) Clarity of presentation: Are grammar, punctuation, and references flawless?

Indicative reading: Indicative reading list: Jon Elster, *Closing the Books: Transitional Justice in Historical Perspective* (Cambridge: CUP, 2004). Jens Meierhenrich, Alexander Laban Hinton and Lawrence Douglas (eds), *The Oxford Handbook of Transitional Justice* (Oxford: OUP, 2017). Tricia D Losen, Leigh A Payne and Andrew G Reiter (eds), *Transitional Justice in Balance: Comparing Processes, Weighing Efficacy* (Washington DC: USIP, 2010). Rosalind Shaw and Lars Waldorf (eds), *Localizing Transitional Justice: Interventions and Priorities after Mass Violence* (Stanford: Stanford University Press, 2010). Kathryn Sikkink, *The Justice Cascade: How Human Rights Prosecutions are Changing World Politics* (New York: Norton, 2011)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR325 Half Unit Not available in 2018/19 The Situations of the International Criminal Court

This information is for the 2018/19 session.

Teacher responsible: Dr Jens Meierhenrich CLM.6.07

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed International Political Theory (IR200) and International Organisations (IR203).

Course content: This taught seminar introduces students to the practices of the International Criminal Court (ICC). Focusing on the ICC's ongoing investigations and prosecutions - its so-called 'Situations' - the courses exemplifies the politics of international law in the context of one of the most embattled international organisations in the international system. On the foundation

of 'practice theory', it blends methodological approaches from law, the social sciences and the humanities. By adopting an evolutionary perspective to the ICC, the seminar raises - and answers - pertinent theoretical questions about institutional design and development of in international politics. Empirical cases to be discussed include the settings of the ICC's nine Situations (the DRC, Uganda, the Central African Republic, Sudan, Kenya, Libya, Cote d'Ivoire, and Mali) as well as the territories of the ICC's preliminary examinations (Afghanistan, Columbia, Georgia, Guinea, Iraq, Nigeria, Palestine, and Ukraine). Students will learn to work with both court documents and theoretical texts.

Teaching: 20 hours of seminars in the LT. 1 hour of seminars in the ST. In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students are required to research and write one essay (2,500 words). In addressing a given essay topic, students must integrate theory and history and bring empirical evidence to bear on the research question they have chosen. Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR326 Half Unit Not available in 2018/19 The Rule of Law: A Global History

This information is for the 2018/19 session.

Teacher responsible: Dr Jens Meierhenrich CLM 607 and Prof Martin Loughlin NAB 712

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History, BSc in Politics and International Relations and LLB in Laws. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This taught seminar course introduces students to the theory and history of the rule of law, one of the most frequently invoked—and least understood—ideas of political theory and practice. What exactly is the rule of law? Is it still a harbinger of liberty or just the latest manifestation of neocolonial domination? Is it a moral ideal or merely a means to an end? Can it really facilitate democracy, development, and economic growth? And why is the rule of law compatible with authoritarianism? In answer to these and related questions debated in law and the social sciences as well as in international organizations, governments, think tanks, and NGOs the world over, this interdisciplinary course introduces students to important advocates of the rule of law

(from A. V. Dicey to the World Bank) and also to notable critics (including Thomas Hobbes, Carl Schmitt, Judith Shklar, and Eric Posner). Through close readings of seminal texts and a global analysis of historical cases and trajectories, students will gain an innovative and in-depth understanding of the promise—and limits—of one of the most foundational concepts of the modern world.

Teaching: 20 hours of seminars in the MT.

In line with departmental policy, students on the course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will write one formative essay of 1,500 words on an assigned topic. This essay will be used to sketch out ideas for the summative essay. Feedback will be provided on the essay which will aid in the research and writing of the summative essay.

Indicative reading: Tom Ginsburg and Tamir Moustafa, eds., *Rule by Law: The Politics of Courts in Authoritarian Regimes* (Cambridge: Cambridge University Press, 2008). Paul Gowder, *The Rule of Law in the Real World* (Cambridge: Cambridge University Press, 2016). R. W. Kostal, *A Jurisprudence of Power: Victorian Empire and the Rule of Law* (Cambridge: Cambridge University Press, 2005). José María Maravall and Adam Przeworski, eds., *Democracy and the Rule of Law* (Cambridge: Cambridge University Press, 2003). Friedrich Kratochwil, *The Status of Law in World Society: Meditations on the Role and Rule of Law* (Cambridge: Cambridge University Press, 2014). Eric Posner, *The Perils of Global Legalism* (Oxford: Oxford University Press, 2009).

Assessment: Essay (100%, 4000 words) in the LT.

Students will submit a 4,000 word essay (100%) due in week 1 of the LT.

IR347 Half Unit Political Economy of International Labour Migration

This information is for the 2018/19 session.

Teacher responsible: Dr Covadonga Meseguer 95 ALD 1.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The mobility of workers is one of the pillars of globalisation. However and surprisingly, international political economists have paid less attention to the political causes and consequences of international migration in comparison to that paid to other aspects of globalisation such as trade or finance. In this course, we shall employ a political economy perspective to study the historical evolution of migration policy, the relationship between trade and migration, and the political causes and consequences of migration flows. I shall place special emphasis on the study of the political consequences of migration for sending (rather than receiving) countries. We shall also pay attention to an important capital flow associated to international migration: remittances. Rather than focusing on the economic/developmental consequences of remittances, we shall discuss how remittances impact political outcomes as diverse as democratisation, the survival of dictatorships, political clientelism, corruption, political participation, and political accountability.

Week 1. Overview and Introduction

Week 2. Labour Flows and Economic Theory.

Week 3. Causes of International Labour Flows: Economics and Politics.

Week 4. Trade and International Migration in Historical Perspective.

Week 5. The Making of Migration Policy (I): Interests and Institutions.

Week 6. Reading Week

Week 7. The Making of Migration Policy (II): Immigration, the Economy, and Public Opinion.

Week 8. International Migration and International Cooperation

Week 9. Economic Consequences of International Labour Migration for Sending Countries: Remittances.

Week 10. Political Consequences of International Labour Migration for Sending Countries (I): Autocracies.

Week 11. Political Consequences of International Labour Migration for Sending Countries (II): New Democracies.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Students are expected to write 1 essay (1500 words).

Students are expected to make one class presentation.

Indicative reading: Rosenblum, M and Tichenor, D (eds). 2012.

The Oxford Handbook of the Politics of International Migration.

New York: Oxford University Press. Hatton, T and J. Williamson.

2005. *Global Migration and World Economy. Two Centuries of Policy and Performance*. Cambridge, MA: MIT Press. Moses, J.W.

International Migration in the Age of Crisis and Globalization: New

York: Cambridge University Press.

Assessment: Essay (100%, 2000 words).

IR354 Half Unit Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2018/19 session.

Teacher responsible: Dr James Morrison 95 ALD 1.14

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided by IR204 'International Political Economy', will be useful for students taking this course.

Course content: Who governs the global economy? How do they do so? And to what ends do they govern it? This course examines these questions by examining the canonical theories of—and state approaches to—the challenges of global economic governance across the last several centuries. While this course takes history seriously, the primary objective is to use the history to tease out generalisable insights into those challenges we face today. More generally, this course of study will demonstrate the incomparable insights historical thinking offers in addressing contemporary challenges. History has always been central to the study and practice of international political economy. The most influential scholars and practitioners of international political economy have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their day. This course is designed to help students cultivate that invaluable skill and habit of mind.

Proceeding from the seventeenth century to the present, it examines:

- seminal theorists' particular treatments of international political economy

- the ongoing, timeless debate between these theorists

- the major shifts in the global economic order

- the interaction between theories and policy in each shift

The course begins with mercantilism and the 'age of empires.' It then explores the great critics of mercantilism—Adam Smith and David Hume—and the relationship between their critique and the revolutions in IPE that followed. It goes on to analyse the rise of so-

called 'English' political economy and the 'First Era of Globalisation' in the 19th Century.

The course then pivots to consider two major challenges to this hegemony of thought and practice. First, it traces the development of socialism from an internal critique through the writings of Marx & Engels to an instantiated alternative system in the early Soviet Union. Second, it considers the German Historical School's return to mercantilism and the ascent of the American Empire onto the global stage. These clash of empires then leads to the cataclysm of the First World War.

In the interwar period, the course analyses the failed attempts to restore the global order. It analyses the radical challenge posed by fascist political economy. It also considers the variety of responses issued by different types of liberals. The course then transitions into a discussion of the several postwar orders, from Keynes's neoliberal institutionalism to Gandhi's rejection of Eurocentric political economy.

Last, the course turns to the modern era. It analyses the trajectories of the postwar global trade and financial systems. It then turns to contemporary issues, such as the post-Cold War order, the 2008 Global Financial Crisis, and the rise of emerging markets.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay and 2 presentations in the MT.

Indicative reading: Thomas Munn. *England's Treasure by Forraign Trade*. Adam Smith. *An Inquiry into the Nature and Causes of the Wealth of Nations*. Karl Marx. *Communist Manifesto*. JM Keynes. *General Theory of Employment, Interest, & Money*. Gandhi, Mohandas K. *Hind Swaraj or Indian Home Rule*.

Assessment: Essay (100%, 2000 words) in the MT.

IR355 Half Unit Economic Diplomacy

This information is for the 2018/19 session.

Teacher responsible: Dr Stephen Woolcock CLM 613

The course is coordinated by an LSE academic but is supported by an experienced practitioner of economic diplomacy Sir Nicholas Bayne, former UK foreign service and ambassador and Kenneth Heydon (formerly Deputy Director at the OECD in Paris).

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 'International Political Economy', will be useful to students taking this course.

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction. It provides students with both academic and practitioner perspectives of economic diplomacy and offers participants an opportunity to understand the challenges faced by negotiators through the simulation of a current multilateral negotiation.

Teaching: 10 hours of lectures, 10 hours of classes and 1 hour and 30 minutes of workshops in the LT. 1 hour of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Bayne, Nicholas and Woolcock, S. *The new economic diplomacy: decision-making and negotiation in*

international economic relations, Third edition, Ashgate, Stephen 2013. Buelow, A M *Culture and Negotiation*, 2011. Checkel, Jeffrey *Social constructivisms in global and European politics: a review essay* 2004. Odell, John *Negotiating the world economy* 2000. Putnam, D Robert *Diplomacy and Domestic Politics: the logic of two-level games*, 1988. Sebenius, J,K *Negotiation Analysis: A characterization and review*, 1992.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the LT.

IR367 Half Unit Global Environmental Politics

This information is for the 2018/19 session.

Teacher responsible: Dr Robert Falkner TOW2.11.01F

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites, though some background knowledge of international political economy, such as that provided in IR206 *International Political Economy*, will be useful to students taking this course.

Course content: An introduction to concepts and issues in the study of global environmental politics, with special emphasis on the political economy of environmental protection. Environmentalism and the greening of international society; ecological perspectives on international political economy; domestic sources of environmental diplomacy; environmental leadership in international negotiations; international environmental regimes and their effectiveness; the role of nonstate actors (business, NGOs); corporate environmentalism; private environmental governance; trade and environment; international environmental aid; greening foreign direct investment; climate change; biosafety regulation; deforestation.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Topics:

1. Introduction: The rise of global environmentalism in international politics
2. States and foreign environmental policy
3. Nonstate actors (NGOs and business) in global environmental politics
4. International environmental regimes and regime effectiveness
5. International trade and global environmental protection
6. Global finance, aid and sustainable development
7. Multinational corporations and private environmental governance
8. Climate change: international negotiations and multi-level governance
9. Biosafety: scientific uncertainty and the politics of precaution
10. Deforestation: non-regimes and private governance

Formative coursework: Students will be expected to produce 2 essays in the LT.

Indicative reading: Andresen, S., E. L. Boasson and G. Hønneland (2012). *International Environmental Agreements: An Introduction*. London, Routledge. Betsill, M. M., K. Hochstetler and D. Stevis, Eds. (2014). *Advances in International Environmental Politics*. Basingstoke, Palgrave. Biermann, F. and P. Pattberg, Eds. (2012). *Global Environmental Governance Reconsidered*. Cambridge, Mass., MIT Press. Chasek, P. S. and L. M. Wagner (2012). *The Roads from Rio: Lessons Learned from Twenty Years of Multilateral Environmental Negotiations*. New York, RFF Press. Clapp, J. and P. Dauvergne (2011). *Paths to a Green World: The Political Economy of the Global Environment*. Cambridge, MA, MIT Press. Corry, O. and H. Stevenson (2017). *IR and the Earth: Societal multiplicity and planetary singularity. Traditions and Trends in Global Environmental Politics*, Earthscan Ltd. Falkner, R.

(2008). *Business Power and Conflict in International Environmental Politics*. Basingstoke, Palgrave Macmillan. Falkner, R., Ed. (2016). *The Handbook of Global Climate and Environment Policy*. Cheltenham, John Wiley & Sons. Hoffmann, M. J. (2011). *Climate Governance at the Crossroads: Experimenting with a Global Response after Kyoto*. New York, Oxford University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR368 Half Unit The Political Economy of Trade

This information is for the 2018/19 session.

Teacher responsible: Dr Stephen Woolcock CLM 6.13

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 International Political Economy, will be useful to students taking this course.

Course content: The course begins with a discussion the intellectual history of free trade and how this has shaped ideas that continue to shape policy today as well as of the core analytical models that assist in any analysis of trade and investment. It covers changes in the nature the of trade and investment in the 21st century, including among other things in the impact of the growth of global supply chains on the political economy of trade and investment. The domestic and international institutional frameworks within which trade and investment policy are conducted are discussed. The course then considers some of the underlying trends in trade towards the use of preferential and plurilateral rather than multilateral approaches. Finally the course covers some of the main topics in current negotiations including in particular agriculture and food security, trade in manufactures, services and investment as well as the inter-relationship between trade and sustainable development.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Heydon. K and Woolcock. S (eds) (2012) *The Ashgate Research Companion to International Trade Policy*, HF 1379 A 82: e-book and hard copies available. Hoekman. B and Kosteki. (2009) *The Political Economy of the World Trading System* HF 1359 H69 e-book available but reasonably price in paperback so something to purchase. Martin. L (ed) (2014) *Oxford Handbook of The Political Economy of International Trade*, available as an e-book.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the ST.

The final examination lasts 2 hours and students will be asked to answer 2 out of 8 questions.

IR369 Half Unit Politics of Money in the World Economy

This information is for the 2018/19 session.

Teacher responsible: Dr Martin Hearson LCH.2.10

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Some background knowledge of international political economy, such as that provided in IR206 International Political Economy, will be useful to students taking this course.

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students are expected to make presentations on topics of their choice and to write one 2,000-word essay, to be marked by the seminar teacher.

Indicative reading: No one book covers the entire syllabus, but the following general works provide a useful introduction: B Eichengreen, *Globalizing Capital* (2008); S Strange, *Mad Money* (1998) T Porter, *Globalization and Finance* (2005); D Andrews (ed), *International Monetary Power* (2006); J Frieden, *Currency politics: the political economy of exchange rate policy* (2015); E Helleiner, *The status quo crisis: global financial governance after the 2008 meltdown* (2014); C. Norloff, *America's global advantage: US hegemony and international cooperation* (2010); B Cohen, *Currency power: understanding monetary rivalry* (2015)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

IR373 Half Unit China and the Global South

This information is for the 2018/19 session.

Teacher responsible: Prof John Alden CLM 513 and Prof Christopher Hughes 95A 115

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Foreign Policy Analysis (IR202)

Course content: This course focuses on the substantive role that China plays in the Global South where its preponderance of material power and putative developing country status confers upon it a dominant position in bilateral and regional political economies. China's economic position, coupled to an astute use of finances flowing from its mercantilist policies, has enabled it to become the leading trading partner and a significant investor in the developing world. Moreover, the Global South is increasingly figuring in Beijing's expanding security interests and soft power provisions. Interpretations embedded in prevailing academic discourses like socialisation, threat and peaceful rise take on new meaning when studied through the lens of ties with developing

countries. Understanding how dynamics in this relationship are impacting upon a host of global and contemporary issues (BRICs, multilateralism, peacekeeping, the environment) is crucial to the shape of the 21st century.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. In line with departmental policy, students on the course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

Indicative reading: Chris Alden and Chris R Hughes, 'Harmony, Discord and Learning in China's Foreign Policy', *China Quarterly*, Special Issue (No.9 December 2009), pp.13-34. Chris Alden, 'China and Africa - The Relationship Matures', *Strategic Analysis* (36:5 2012), pp.701-707. Kevin Gallagher, *The China Triangle: Latin America's China Boom and the Fate of the Washington Consensus* (OUP: 2016). David Shambaugh, *China Goes Global: The Partial Power* (OUP: 2014). Carol Wise and Margaret Myers (eds), *The Political Economy of China-Latin American Relations in the New Millennium: Brave New World* (Routledge: 2016)

Assessment: Essay (80%, 3000 words) in the LT. Presentation (20%) in the MT.

During the course of the seminars students will participate in a group presentation (20%) and submit a 3,000 word essay (80%) at the start of the LT.

IR377 Half Unit The Politics of Governance, Development and Security in Sub-Saharan Africa

This information is for the 2018/19 session.

Teacher responsible: Dr Milli Lake

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is not available as an outside option. This course is available with permission to General Course students.

Course content: This course explores the politics of governance, peace, and security in sub-Saharan Africa as it relates to the broader global context. It will explore the divergent impacts of, and responses to, colonial policies in different locations and their legacies in the contemporary era. It will also explore the different political responses embraced by African leaders and politicians to some of the political, economic, and security challenges of the post-colonial period. In addition to emphasising diversity, the course also pulls together common challenges across the continent such as rapid decolonisation, the Cold War, structural adjustment, civil conflict, human insecurity, humanitarian intervention, and foreign aid.

Teaching: 20 hours of seminars in the LT.

In line with departmental policy, students on the course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 6 other pieces of coursework and 1 other piece of coursework in the LT. For six of the ten sessions, students on the course will submit a one-page reading memo of approximately 600 words, pulling together key themes from that week's discussions.

In addition, students will produce an assessed essay outline in week 10 consisting of a research question, an overview of the argument, a draft structure and an indicative reading list. Feedback will be provided via email and/or individual sessions with students.

Indicative reading:

- Ade Ajayi, J.F. 1982. "Expectations of Independence." *Daedalus* 3:2
- Séverine Autesserre, 'Dangerous Tales: Dominant Narratives on the Congo and Their Unintended Consequences', *African Affairs* (2012)
- Catherine Boone. 1990. "The Making of a Rentier Class: Wealth Accumulation and Political Control in Senegal" *The Journal of Development Studies*.

- Patrick Chabal and Jean-Pascal Daloz "Whither the State?" in *Africa Works*. Indiana University Press
- Pierre Englebert and Denis Tull, 'Post-Conflict Reconstruction in Africa: Flawed Ideas about Failed States', *International Security* 32:4 (2008).
- Mahmood Mamdani, *When Victims Become Killers: Colonialism, Nativism, and the Genocide in Rwanda* (PUP: 2001)
- Nancy Rose Hunt. 1998. "Le Bebe En Brousse": European Women, African Birth Spacing and Colonial Intervention in Breast Feeding in the Belgian Congo." *The International Journal of African Historical Studies* 21: 3 pp. 401–32
- William Reno, *Warfare in Independent Africa* (CUP: 2011)
- Alex de Waal, *Famine Crimes: Politics and the Disaster Industry in Africa* (Indiana University Press: 2009)

Assessment: Essay (80%, 2500 words) in the ST.

Class participation (20%).

Students will submit a 2,500 word essay (80%) due in week 1 of the ST.

IR378 Half Unit Critical War Studies

This information is for the 2018/19 session.

Teacher responsible: Dr Tarak Barkawi CLM 407

Tarak Barkawi is Professor in the Department of International Relations at the London School of Economics and Political Science. He studies warfare between the West and the non-European world, past and present. He writes on the pivotal place of armed force in globalization, imperialism, and modernization, and on the neglected significance of war in social and political theory. He is author of *Soldiers of Empire, Globalization and War* and many scholarly articles.

Availability: This course is available on the BSc in International Relations, BSc in International Relations and History and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: War transforms the social and political orders in which we live, just as it obliterates our precious certainties. Nowhere is this more obvious than in the fate of truths offered about war itself. War regularly undermines expectations, strategies and theories, and along with them the credibility of those in public life and the academy presumed to speak with authority about it. This course begins with the recognition that the unsettling character of war has been a profound opportunity for scholarship. For it is precisely in war's disordering and unsettling of politics and identities that the socially and historically generative powers of war are exposed. In bending, stretching and even breaking institutions and societies, war reveals them to us anew and offers perspectives obscured in times of peace. At the same time, these disruptions shape and inform the course and character of war. This violent but fecund juncture between war, society and politics is what this course seeks to understand.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the LT.

This course consists of three elements all taught in Lent: a lecture series, classes, and a film series.

This course is an advanced undergraduate option. It is a text-based course and not a survey course. That means we will concentrate on a few required readings—read carefully and in-depth. Rather than being given a list of readings for you to select from, you will be given specific, required readings that everyone must read.

For each class, you will be doing required reading of approximately half a book, sometimes less. For each lecture, you are given one recommended background reading. In planning your time, you should read first for the class and second for the lectures. It is essential that you do the required reading for each class before class.

The lecture series provides concepts, ideas and histories—intellectual scaffolding—against which to read the course texts. It

is an essential and helpful aid to your reading.

The film series, attendance at which is voluntary, provides an opportunity for sociability and the exploration of course themes in popular cultures.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Hew Strachan, *Clausewitz's On War: A Biography* (New York: Grove Press, 2007). Paul Fussell, *The Great War and Modern Memory* (New York: Oxford University Press, 1975). William H. McNeill, *The Pursuit of Power: Technology, Armed Force, and Society since A.D. 1000* (Chicago: Chicago University Press, 1982). Michael Sherry, *In the Shadow of War: The United States since the 1930s* (New Haven: Yale University Press, 1995). Anders Engberg-Pedersen, *Empire of Chance: The Napoleonic Wars and the Disorder of Things* (Cambridge: Harvard University Press, 2015). Debbie Lisle, *Holidays in the Danger Zone: Entanglements of War and Tourism* (Minneapolis: University of Minnesota Press, 2016). Antoine Bousquet, *The Scientific War of Warfare: Order and Chaos on the Battlefields of Modernity* (London: Hurst, 2009). Susan Jeffords, *The Remasculinization of America: Gender and the Vietnam War* (Bloomington: Indiana University Press, 1989). Bruno Cabanes, *The Great War and the Origins of Humanitarianism 1918-1924* (Cambridge: Cambridge University Press, 2014).

Assessment: Essay (100%, 4000 words) in the LT.

The course will be 100% assessed by essay due after the end of term and based on a topic of the student's choice. Students will be given a list of questions to work from and may choose a question provided or develop their own question (based on course texts) in discussion with the course coordinator.

IR398 Dissertation

This information is for the 2018/19 session.

Teacher responsible: Prof Christopher Hughes and Dr Anna Getmansky

Availability: This course is available on the BSc in International Relations and BSc in Politics and International Relations. This course is not available as an outside option nor to General Course students.

Course content: Candidates submit a dissertation of up to 10,000 words, excluding bibliography, but including notes and any appendices and tables, in the first week of Summer Term. The subject of the dissertation can be anything within the field of International Relations that IR Faculty are able to supervise. Candidates submit the title of their dissertation for approval by the Course Co-ordinator/s before the end of the Michaelmas Term, and an outline of their project early in Lent Term. Students also receive written feedback from their supervisors on up to 3,000 words of text as long as this is submitted by the end of Reading Week in Lent Term.

Dissertations offer students the chance to enhance their knowledge through an in-depth analysis of a question in an area of particular interest to them. The dissertation assesses different skills from examinations. The aim is to develop the ability to make independent judgements and decisions about a promising and feasible research question, and on selecting and analysing the most important and relevant material. The outcome will be a coherent, sustained, systematically developed, and well supported argument on a topic, typically combining empirical material and theoretical insights, within the field of International Relations. The dissertation may draw entirely on secondary literature. There is no requirement for the use of primary sources and original material such as unpublished documents, archives, or personal interviews.

Teaching: 2 hours of lectures and 6 hours of classes in the MT. 1 hour of lectures and 1 hour and 30 minutes of workshops in the LT. There is also a 1-hour introductory lecture in the Summer Term of the preceding year for those interested in taking this option. In addition to formal teaching, students will see their supervisors

six times (usually three times in MT and three times in LT) for meetings of around 30 minutes each.

IR398 contains lectures on how to formulate a research question, how to structure a dissertation, and how to find and use evidence. Classes explore how questions are formed, how literature is used, and how evidence is deployed. Workshops are a chance for students to discuss outlines, and receive guidance on issues of structure, research design and evidence. There may also be a chance for some students to present their work.

Advice and Assistance

The Course Co-ordinator/s will provide guidance on the nature and process of writing an IR dissertation, mainly through the course lectures, classes and workshops. They will also be available for consultation throughout the year to help students address problems as and when they arise.

While students will receive ample guidance and feedback on their work, the dissertation is an independent project. As such, although students will have a supervisor, and colleagues both in IR and other departments can be approached for informal advice, no Faculty member can read a full draft of the thesis.

Assessment: Dissertation (100%, 10000 words) in the LT.

LL100 Foundational Legal Skills

This information is for the 2018/19 session.

Teacher responsible: Dr Sonya Onwu NAB 5.07

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: An non-assessed course to help students develop their legal skills. By the end of this course, students will be able to:

1. actively read legal material, and produce comprehensive working notes.

2. engage in independent, self-directed research.

3. critically evaluate a range of legal materials.

4. present clear written arguments in a structured, logical and well-reasoned way, and supported by substantiating evidence.

5. identify and apply the relevant law to the facts of a problem scenario in a structured and methodical manner.

6. assess and reflect upon their own skills development, identify areas for improvement, and the appropriate mechanisms for doing so.

Teaching: 1 hour and 30 minutes of lectures and 15 hours of seminars in the MT.

An initial two sessions will take place during Induction Week, followed by 10 weekly seminars. Reading week (wk 6) will be free.

Formative coursework: Each week, students will be asked to upload a sample of work, the results of their pre and post class self-test, and a short statement as to their skills needs (this may need to be revised/updated accordingly). At the end of the course, students will need to produce a summary that considers and engages with the results of their self-assessment and identifies any key areas for improvement.

Indicative reading: Readings will be taken from the assigned reading for the LLB first year core courses in each week to avoid students having to read additional pieces. A guide to which readings used will be provided at the start of the course.

LL104 Law of Obligations

This information is for the 2018/19 session.

Teacher responsible: Dr Charlie Webb, NAB6.26

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available on the BSc in Accounting and Finance. This course is available as an outside

option to students on other programmes where regulations permit and to General Course students.

Course content: Introduction to the law of contract, including formation of contracts, express and implied terms, misrepresentation, exclusion clauses, remedies for breach of contract. Introduction to the principles of the law of restitution. Introduction to the law of torts: negligence and other specific torts, causation, defences, remedies for torts.

Teaching: 18 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

The lectures will be given by a number of different teachers. The basic work is done through the classes, and the lectures are designed to introduce the topics on the syllabus.

Formative coursework: Students will be expected to produce up to 4 assignments through the year, set and marked by their class teacher.

Indicative reading: A general reading list will be issued at the commencement of each term. Students should follow the advice of their class teachers as to the textbooks to be read.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL105 Half Unit Property I

This information is for the 2018/19 session.

Teacher responsible: Dr Tatiana Flessas NAB.5.15

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim is to introduce students to the role of property concepts in legal and social thought. Particular attention is paid to the context, development and function of property forms in contemporary legal systems. The course encompasses a broad range of established and emergent property forms, ranging from questions of copyright and share ownership to aspects of real property. Extensive use will be made of historical and other general commentaries on the question of property.

Teaching: 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Murphy & Roberts, *Understanding Property Law*; Ryan, *Property and Political Theory*; Rifkin, *The Age of Access*.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL106 Public Law

This information is for the 2018/19 session.

Teacher responsible: Dr Jo Murkens

Additional Teachers: Professor Martin Loughlin, Dr Thomas Poole, Dr Andrew Scott, and Professor Conor Gearty.

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course covers: the conceptual framework of public law; central government and the executive; parliament; multi-layered government (the European Union, devolution and local government); judicial review; and civil liberties and human rights.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Other assignments will be set by the class tutor, as required.

Indicative reading: Basic texts: Martin Loughlin, *The British Constitution: A Very Short Introduction* (Oxford: Oxford University Press, 2013); A. Le Sueur, M. Sunkin & J. Murkens, *Public Law: Text, Cases, and Materials* (Oxford: Oxford University Press, 3rd edn, 2016).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL108 Criminal Law

This information is for the 2018/19 session.

Teacher responsible: Prof Peter Ramsay

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the 'general part' of criminal law and selected areas of the special part of criminal law in the context of theories of the aims and functions of criminalisation. The course will discuss the limits to criminalization; the conceptual framework of criminal liability (conduct, responsibility, capacity, defences); criminal law's construction and regulation of interests in property (with particular reference to the offences of theft and fraud); attempts; 'pre-inchoate' offences; regulatory offences (with special reference to drugs); homicide; sexual offences; non-fatal violence against the person; secondary participation in crime.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

This will be set by the teacher in charge of the class. A minimum of two pieces of written work will be required, usually one essay and one problem.

Indicative reading: A detailed reading list will be distributed at the start of the course (for the current list, see the public folders).

A number of criminal law textbooks are available, and students will be expected to read the relevant parts of the most recent editions of one of these, e.g. Nicola Lacey, Oliver Quick & Celia Wells, *Reconstructing Criminal Law*; Andrew Ashworth and Jeremy Horder, *Principles of Criminal Law*; Jonathan Herring, *Criminal Law: Text, Cases and Materials*; M. Allen, *Introduction to Criminal Law*.

They will also be expected to read all cases and materials marked as primary on the detailed reading lists provided.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL109 Half Unit Introduction to the Legal System

This information is for the 2018/19 session.

Teacher responsible: Dr Meredith Rossner, Ms Insa Koch and Prof Nicola Lacey

Availability: This course is compulsory on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Outline:

The course is designed as a foundation course to familiarise law students with the basic characteristics and functioning of legal systems.

The course will include:

1. What is law?

2. Reading Law: Statutory interpretation
3. Reading Law: Common law and judicial precedent
4. Legal pluralism
5. The vanishing trial and adjudication
6. Alternative dispute resolution
7. Restorative Justice
8. Punishment and democracy
9. The Legal profession and judicial diversity
10. Lay justice

Teaching: 20 hours of lectures and 9 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: This is a Moodle course, with the course materials, lecture outlines, class reading and suggestions for further reading set out through links to relevant sites. The main background book for the course is Carl F Stychin and Linda Mulcahy (eds), *Legal Methods and Systems: Text and Materials*, 4th ed (2010) Thomson (Sweet and Maxwell).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL201

Administrative Law

This information is for the 2018/19 session.

Teacher responsible: Prof Thomas Poole NAB7.19

Additional Teachers: Professor Carol Harlow

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Course content: Outline:

Administrative Law is a vital subject throughout the modern world. An understanding of the role which it plays is essential to private practitioners. Commercial lawyers frequently come into contact with regulatory agencies whose special procedures derive from administrative law. Dealings with international agencies (including the European Union) are often governed by administrative law. Public law expertise opens the way to good careers in government service. There is a flourishing Administrative Law Bar, reflected in well-established sets of chambers.

The course aims to reflect the wider dimensions of administrative law, stressing links with public administration, commerce and politics. We emphasise the functions of law in the administrative process and the constitutional role of judicial review. We also aim to show how membership of the European Union and adherence to the European Convention on Human Rights has influenced our system of public law. We look at the way in which changed systems of governance, especially the rapid growth of regulatory agencies, can be reflected in and controlled by traditional rules of administrative law. We consider alternative dispute resolution, including public inquiries and ombudsmen. In addition to compulsory essays there are opportunities for presentation of papers.

Syllabus: Theories of administrative law. Decision-making and the administrative process: rules and discretion. The role of agencies. The 'contracting state': administrative law and new public management. Risk and the regulatory state (including responses to the financial crisis of 2008-9). Freedom of information. The changing nature of judicial review. Judicial review and the Human Rights Act. Tribunals. The role of public inquiries. Strategic Litigation and third-party interventions in public law. The Ombudsman and complaints.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: C. Harlow & R. Rawlings, *Law and Administration* (3rd ed., 2009); N. Bamforth and P. Leyland (eds.), *Public Law in a Multi-Layered Constitution* (2003); M. Adler (ed.),

Administrative Justice in Context (2010).

Assessment: Exam (67%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Essay (33%, 4000 words) in the ST.

LL202

Commercial Contracts

This information is for the 2018/19 session.

Teacher responsible: Dr Joseph Spooner

Additional Teachers: Dr Jo Braithwaite, Professor Michael Lobban, Dr Nick Sage, Dr Paul MacMahon

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

This optional LLB course is normally available to students who have completed Law of Obligations LL104.

Pre-requisites: Completion of LL104 - Law of Obligations is normally a prerequisite.

Course content: Objectives:

LL202 Commercial Contracts is a study of the general principles of English law governing commercial contracts. It approaches the topic in two parts. Part 1, 'Fundamentals of Commercial Contracting' examines several important aspects of, or themes in, the law's regulation of commercial contracting. The topics are chosen because of their intrinsic interest, and because of the opportunity offered for an advanced contextualised examination of contract law. This part explores topics including pre-contractual negotiations, multi-party transactions and agreed remedies. Part 2, 'Fundamentals of Commercial Law' examines core topics in commercial law, offering students an overview of the most significant areas in this field. It focuses on sales contracts; money, banking and payment methods; credit and secured transactions; agency; and assignment. The course concludes with a discussion of dispute resolution in international commercial contracts. Topics are likely to include:

Part 1 – Fundamentals of Commercial Contracting

- The formation of commercial contracts and their interpretation.
- Pre-contractual duties.
- Mistakes in contracts and frustration of contracts.
- Multi-party projects (privity of contract).
- Agreed remedies.

Part 2 – Fundamentals of Commercial Law

- Agency.
- Assignment.
- Contracts for the sale of goods.
- Credit and security.
- Money, payment and payment methods.
- Commercial dispute resolution and international commercial contracting.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT & 1 essay in the LT

Indicative reading: For the advanced contract law portion of the course, you have the same choice of main text that you had for LL104: Chen-Wishart, *Contract Law*, (5th edn, OUP 2015) or McKendrick, *Contract Law* (12th edn, Palgrave 2017). Up-to-date casebooks include Burrows, *A Casebook on Contract*, (5th edn, Hart Publishing 2016) and McKendrick, *Contract Law: Text, Cases and Materials* (7th edn, OUP 2016). For the commercial law topics, the main textbook is McKendrick (ed), *Goode on Commercial Law* (5th edn, Penguin 2017). For cases and materials, you might find useful Clarke, Hooley, Munday, Sealy, Tettenborn, and Turner, *Commercial Law: Text, Cases, and Materials*, (5th edn, OUP 2017). For topic overviews, you may also wish to try Burrows (ed.), *English Private Law* (3rd edn, OUP 2013), available online through the LSE

Library website.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

LL203

Law of Business Associations (Company Law)

This information is for the 2018/19 session.

Teacher responsible: Dr Eva Micheler

Additional Teachers: Visiting Professors Ms Mary Stokes and Leslie Kosmin, QC

Availability: This course is available on the BA in Anthropology and Law, BSc in Accounting and Finance and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Experience suggests that third year students are more successful.

Pre-requisites: It is helpful to have studied or be studying Property II, although this is not a formal pre-requisite.

Course content: This course examines the nature of the legal vehicles available for the carrying on of entrepreneurial activities, paying particular attention to the analysis of companies. It examines the core features of the company. These are: separate legal personality, limited liability, centralised management, the allocation of control rights, and free transferability of shares. The course analyses how the law implements these features and the policy trade-offs among them.

The course discusses the relationship between various groups with an interest in the affairs of the company – shareholders, directors, managers, financiers, trade creditors, employees, consumers and regulators - and the balance of power between them. The course looks beyond purely technical legal issues and encourages a critical examination of the system and proposals for reform.

Registered companies are creatures of statute and close attention to the Companies Acts and related legislation is essential. However, no attempt is made to deal with all, or even most, of the complex technical aspects of the legislation and non-statutory regulation. The course concentrates on the problems and policies underlying the legislation, with some more detailed consideration of selected provisions. The increasing influence of European Directives and Regulations on UK company law is also reflected. Despite the importance of statute, common law and equitable principles have played a major role in the development of company law by the courts. This has relied heavily on principles of agency and the equitable principles relating to fiduciaries. Case analysis is therefore a major element of the course. Excellent case books are available.

This subject covers a wide range of businesses - from the one-person firm (the local greengrocer or plumber) to family companies, to major multinational groups listed on the Stock Exchange. This wide coverage plus the policy emphasis means that this course should appeal to all students with an interest in the economic, social and political aspects of business organisations and not only to those wishing to practise commercial law. Topics usually covered are:

- Introductory concepts and themes including limited liability and corporate personality.
- Capacity of companies & the powers of individuals acting for companies.
- Shares and share capital.
- Directors: powers, duties and corporate governance issues.
- The role of shareholders in companies: rights, decision-making and governance.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 4 hours of seminars in the ST.

Lectures are accompanied by fortnightly two-hour seminars, which follow the lectures closely. Reading lists provided by the lecturer in

each topic are used as the basis for seminar work.

Seminars are held in weeks 3,5,8,10,11 of MT and LT. The two revision classes are in week 1 ST.

Seminar weeks to be confirmed

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Detailed lists will be provided during the course. The primary recommended text is: David Kershaw, *Company Law in Context* (2nd edn, 2012). We also recommend: Gower and Davies, *Principles of Modern Company Law* (10th edn, 2016); Sealy and Worthington, *Cases and Material on Company Law* (11th edn, 2016).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL204

Advanced Torts

This information is for the 2018/19 session.

Teacher responsible: Dr Emmanouil Voggiakis

Additional Teachers: Dr Paul MacMahon, Dr Nick Sage and Dr Charlie Webb.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: Students must have completed Law of Obligations (LL104).

Course content: If you liked Obligations, you are going to love this. Advanced Torts aims to broaden and deepen your knowledge of tort law in two ways. First, we look at a range of important torts that are not covered in the Obligations course. Second, we tackle the 'big' theoretical questions of tort law. You will emerge from the course not only with a better understanding of the rules and principles that govern specific torts, but also with the ability to engage critically with different views about the overall purpose and the moral and social function of tort law.

Core syllabus: Here are some topics we usually cover:

- Theories of tort law: what is the aim of tort law, and do judges need a theory of it?
- Corrective justice vs economic theories of tort law
- Tort law, moral responsibility and luck
- Tort law and the 'compensation culture'
- The position of public authorities in negligence
- Tort actions for unwanted pregnancy/birth & children born with disabilities
- Strict liability regimes: liability for ultra-hazardous activities; liability for defective products; the justification of strict liability.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 1 hour of seminars in the ST.

Formative coursework: At least one formative essay per term

Indicative reading: General Texts: W E Peel & J Goudkamp, *Winfield & Jolowicz on Tort* (14th ed., 2014); N J McBride & R Bagshaw, *Tort Law* (4th ed., 2012); B A Hepple et al., *Hepple and Matthews' Tort Law: Cases and Materials* (7th ed., 2015); S Deakin, A Johnston & B Markesinis, *Markesinis and Deakin's Tort Law* (7th ed, 2012); P Cane, *Atiyah's Accidents, Compensation and the Law* (7th ed., 2006). Advanced/Specialised Texts: Robert Stevens, *Torts and Rights* (2007); Jules Coleman, *Risks and Wrongs* (2002); Guido Calabresi, *The Cost of Accidents: A Legal and Economic Analysis* (1970); Arthur Ripstein, *Private Wrongs* (2016); Emmanuel Voyiakis, *Private Law and the Value of Choice* (2017); Ernest Weinrib, *The Idea of Private Law* (1995); David Owen (ed.), *Philosophical Foundations of Tort Law* (1997); John Oberdiek, *Philosophical Foundations of the Law of Torts* (2014); Nicolette Priaux, *The Harm Paradox: Tort Law and the Unwanted Child in an Era of Choice* (2007). If all goes according to plan, the degree of depth we will attain in the course and the focused nature of our reading lists for each topic will make textbooks redundant, or at least useful

only as a basic introduction to the issues we will be covering. This means that the tort textbook you may have purchased for the LL104 Law of Obligations course will probably be good enough for our purposes. Here are some other introductory or general texts that you might like to consult from time to time, just to get a different perspective on things, and some more advanced or specialized books from which we will be setting reading for certain topics

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL205 Medical Law

This information is for the 2018/19 session.

Teacher responsible: Prof Emily Jackson

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Medical law is a rapidly developing and increasingly important subject. The rationing of expensive new drugs, and the future of the NHS have become central political issues. New technologies, such as genome editing, egg freezing and face transplants, are invariably accompanied by demands for their regulation. In this course we examine the legal framework within which health services are provided, and we explore some of the difficult legal and ethical dilemmas that arise when determining the limits of medical innovation.

Subjects include resource allocation; public health; malpractice litigation; consent; mental capacity; mental health law; confidentiality; clinical research; the regulation of medicines; organ transplantation; embryo and stem cell research; abortion; assisted conception; preimplantation genetic diagnosis; surrogacy and assisted dying.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: Jackson, Medical Law: Text, Cases and Materials 4th edition (Oxford UP, 2016).

Assessment: Essay (50%, 5000 words) in the LT. Take home exam (50%) in the LT and ST.

Take home assessment in LT/ST (Easter break).

LL207 Civil Liberties and Human Rights

This information is for the 2018/19 session.

Teacher responsible: Dr Kai Moller

Additional Teachers: Professor Thomas Poole, Professor Peter Ramsay.

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

This course is capped at 50.

Course content: The course provides a challenging introduction to human rights law. The first term focuses on the European Convention on Human Rights with an in-depth analysis of the case law on several important rights, including but not limited to freedom of expression, freedom of association, freedom of religion, the right to respect for private life, and freedom from torture and inhuman or degrading treatment or punishment. The second term deals with the UK Human Rights Act and builds

not only on the first term's work but also on the knowledge that students have acquired in Public Law in year one. Thus, students must engage with the law of two legal systems here: the European Convention on Human Rights and U.K. law.

The course takes a highly analytical approach; it will not be sufficient to approach the issues in a descriptive, "black letter" way. Rather, an overall aim is to enable students to critically assess the European Court's and the U.K. Supreme Court's arguments about the compatibility of a policy or administrative decision with human rights and the particularities of human rights adjudication within the U.K. legal system. To this end, the course will focus on the necessary doctrinal and conceptual framework – such as positive obligations, the margin of appreciation and proportionality –, an overview of the relevant case law, and in-depth analysis of selected problems in human rights law.

This course does not touch upon strategic or policy issues (such as the most effective ways to promote human rights, NGO practices, etc.); rather it focuses on the controversial and often difficult moral and political issues that arise in human rights adjudication and on unravelling the implications of the particular way in which U.K. law has incorporated the ECHR. Regard will however be had to the current argument over whether or not the Act should be repealed.

The teaching of this course is mainly case-based. To complete it successfully, students must prepare for each seminar by reading and thinking through the relevant cases; the seminars will be conducted on the basis of the expectation that the students are familiar with the materials. There is no comprehensive textbook available for this course.

Syllabus: Theoretical aspects of human rights and their judicial enforcement; the Human Rights Act 1998; human rights and parliamentary sovereignty; human rights and standards of review; human rights and the common law; precedent and human rights law. The right to freedom from torture and inhuman or degrading treatment; freedom of expression; freedom of association and 'militant democracy'; freedom of religion; the right to respect for private and family life. Terrorism, security and states of emergency; 'social learning'. Anomalous zones.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: For European Convention law there exists no textbook which deals with the issues in adequate depth, but interested students may want to take a look at Harris, O'Boyle and Warbrick, Law of the European Convention on Human Rights 3rd edn (OUP, 2014) for an overview.

For the more theoretical aspects of the course, see K. Möller's The Global Model of Constitutional Rights (OUP 2012; paperback edition 2015). For Lent Term, representative works include Conor Gearty, Civil Liberties (OUP, 2007), Tom Hickman, Public Law after the Human Rights Act (Hart, 2010) and Aileen Kavanagh, Constitutional Review under the UK Human Rights Act (CUP, 2009).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL210 Information Technology and the Law

This information is for the 2018/19 session.

Teacher responsible: Dr Orla Lynskey

Additional Teachers: Professor Andrew Murray

Availability: This course is available on the BA in Anthropology and Law, BSc in Business Mathematics and Statistics, BSc in Statistics with Finance and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

This course is available to LLB and Law and Anthropology students. It is also available as an outside option to students in

other departments and to General Course Students. Students from other Universities should contact the course convenor regarding participation in this course.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the implications of the use of information technology, and the intended and unintended consequences of regulating that use.

Course content: This survey course enables students to assess critically a selection of fundamental legal issues in the field of Information Technology (IT) Law. It begins by introducing students to key debates in IT and internet governance: do we need distinct legal rules to regulate IT? Who does, and should, control the internet? Should the internet be a 'neutral' network? Once students are equipped with this knowledge of internet governance and the challenges this poses for the law, we consider how the law has responded to the challenges of IT and the extent to which legal issues have shaped the development of information society policy. This will be done through a detailed examination of topics such as online data protection, computer misuse and hacking, freedom of expression and the protection of intellectual property.

The focus will be initially on English law, although the global nature of IT law means that there are already strong EU and US legal influences upon the English system. Therefore, comparative aspects will be introduced in places, and readings will include materials drawn from, amongst others, US law journals.

This course does not require an in-depth understanding of contemporary computer technology – we are primarily interested in the legal implications of the use of IT, and the intended and unintended consequences of regulating that use.

Aims and Objectives: At the end of the course, students should be able to:

- Critically evaluate ongoing developments in law relating to IT;
- Display an understanding of how these developments relate to one another;
- Examine areas of doctrinal and political debate surrounding rules and theories;
- Evaluate those rules and theories in terms of internal coherence and practical outcomes;
- Draw on the analysis and evaluation contained in primary and secondary sources.

Indicative Content: For a more detailed outline of the syllabus visit the course's Moodle page.

Part I: Internet Governance

- An Introduction to IT Law
- Digitisation and the Information Society
- Regulating the Digital Environment
- Net Neutrality

Part II: Data Protection and ePrivacy

- Introduction to Data Protection
- Data Protection Rights and Obligations (The GDPR)
- Data Protection and Social Media Platforms
- State Surveillance and Communications Interception

Part III - Online Freedoms

- Cyber Speech and Free Expression online
- Cyber-defamation
- The Role of Tech Platforms in Regulating Rights

Part IV – Digital Culture and Intellectual Property Rights

- Copyright in the Digital Environment
- Digital Creatives and Copyright Law
- Trade Marks and Domain Names

Part V – Computer Crime

- Computer Misuse
- Obscenity and Pornography the Information Society
- Predictive Policing and Algorithmic Profiling

Part VI – Ecommerce

- The Emergent Legal Issues of the Sharing Economy
- Digital Payments and Cryptocurrency
- Contracts and Smart Contracts

The above is the provisional 2018/19 programme. Due to the fast changing nature of this subject changes may occur to the syllabus at any time.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Indicative reading: A.D. Murray: Information Technology Law: Law and Society 3rd ed (Oxford: OUP, 2016) (Recommended for purchase). C. Reed (ed): Computer Law 7th ed (Oxford: OUP, 2012). C. Reed: Making Laws for Cyberspace (Oxford: OUP, 2012). I. Lloyd: Information Technology Law 8th ed (Oxford: OUP, 2017). L. Lessig: Code and Other Laws of Cyberspace ver.2.0 (New York: Basic Books, 2006). Suggested Initial Reading: Reed: Computer Law 7th ed., Introduction. Murray: Information Technology Law: Law and Society 3rd ed, Ch.1.

Assessment: Take home exam (60%) in the ST.

Continuous assessment (40%) in the MT and LT.

Five pieces will be submitted as part of a portfolio of work. The best four pieces will collectively make up 40% of the overall mark.

LL212

Conflict of Laws

This information is for the 2018/19 session.

Teacher responsible: Dr Jacobus Bomhoff

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: The only required background understanding relates to (English) law of obligations. The majority of students taking this course tend to be in their third year. That said, many second year students have done very well on this course over the past years.

Course content: Conflict of laws – also known as private international law – is the area of law concerned with private law cases that cross borders. Conflict of laws differs from public international law in that it deals with transactions between private individuals, rather than with those directly implicating States or international organisations.

What rules should an English court apply to a contract between companies from different countries, or to a tort claim arising out of an environmental disaster abroad? Should foreign celebrities be allowed to sue in the English courts when they feel they have been defamed in an article posted on an American website? Should the English courts recognize judgments from other countries, even when they conflict with English ideas of right and wrong? It is questions like these that make up the subject of the conflict of laws.

The field's central technical questions are (1) jurisdiction (will an English court or a foreign court hear the case?), (2) choice of law (should the court apply its own law or that of a foreign country?), and (3) the recognition and enforcement of foreign judgments. During the course, these three questions will frame reflection on a range of topics, including commercial/practical issues (how can companies structure their cross-border transactions?), but also questions of a more political nature (to what extent should States be able to regulate matters beyond their own borders?) or with a strong social/cultural dimension (how should foreign cultural values be accommodated in English law?).

Although conflict of laws has a long history within English law, for some areas many of the relevant rules have changed dramatically in recent years under the influence of EU legislation and case law. This means that conflict of laws should also be of particular interest to those wishing to study the interaction of English law and European law. It is expected that after Brexit many of the relevant rules will remain similar to those in force today (to give just one example: we will still need rules on the enforcement of English court judgments in other European countries, and vice versa). During the course, we will look at (1) jurisdiction in international commercial litigation under the traditional English rules and under European law, (2) choice of law issues in contract and tort,

(3) recognition and enforcement of foreign judgments under European rules and at common law, and (4) comparative aspects and theoretical foundations of conflict of laws (looking at US and Canadian law in particular).

Syllabus

- Jurisdiction of English courts under the traditional English rules for actions in personam: Service of a claim form within the jurisdiction & out of the jurisdiction, choice of court clauses, stay of proceedings, restraining foreign proceedings (anti-suit injunctions).
- Jurisdiction of English courts and courts in other EU Member States under European Union Council Regulation 1215/2012, with attention also to the expected position after Brexit.
- Recognition & enforcement of foreign judgments at common law and under European Union rules, with attention also to the expected position after Brexit.
- Choice of law relating to contracts under the Rome I Regulation: Interpreting choice of law clauses in contracts, applicable law in absence of choice, overriding mandatory rules, public policy, foreign illegality in English law.
- Choice of law relating to tort under the Rome II Regulation, older English approach, 'interest analysis' and other approaches of the 'US conflict of laws revolution'
- Comparative conflict of laws & Theoretical foundations

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be reading weeks in Week 6 of MT and Week 6 of LT.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT

Indicative reading: Briggs, *The Conflict of Laws* (3rd ed., Oxford University Press, 2013)

Resources: www.conflictoflaws.net (Topical references, cases and reviews)

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL221 Family Law

This information is for the 2018/19 session.

Teacher responsible: Miss Sarah Trotter

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: Family Law is about the formation of family relationships, about the regulation of these relationships, and about what happens if they break down. It is as much about the idea of the 'family' in law as it is about the (often distinct) lived reality of family life. One of the central themes of the course in this regard is the hold that the heteronormative idea of the family (a married heterosexual couple with genetically-related children) continues to have despite social changes ranging from the rise in cohabiting couple families (who have not formalised their relationship through marriage or civil partnership) to developments in the field of assisted reproduction that challenge the idea of the heterosexual couple model. The course addresses fundamental questions about why family law is as it is, about the role of the State in relation to family life, and about how family life should be regulated.

The structure of the course is as follows:

In the MT, we begin by exploring the concept of the 'family' and the role of the State in relation to the family. We then move on to focus on adult family relationships. We look at the options that exist for formalising relationships (marriage or civil partnership), the history of these forms of regulation, and the role of law where these relationships break down (the law of divorce/dissolution and financial remedies). We examine what these structures of relationship regulation tell us about how the notions of equality

and autonomy are imagined in contemporary family law. We end the term by studying the law of domestic violence and the role of human rights in family law.

The LT is all about children and child-parent relationships. The term is introduced with a week on the history of child law, following which we move on to questions of legal parenthood and parental responsibility. We then examine the centrality and meaning of the principle of the child's 'best interests' in family law and the position of the child in the case of parental separation. The sorts of questions that arise in this context are questions about contact and living arrangements for the child and about what happens if, for example, one of the parents wants to relocate to the other side of the world. We then move to the realm of local authority involvement and look at child protection proceedings and then adoption. In the final part of the LT we look at children's rights in contemporary family law and we conclude with a session on European and international family law.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Week 6 of MT and LT will be reading weeks.

Formative coursework: Students will be expected to produce at least 1 essay in the MT and 1 essay in the LT. Additional optional essays will be set at the end of the MT and the LT

Indicative reading: Students will be provided with a detailed syllabus and reading list for each topic. The recommended textbooks are Sonia Harris-Short, Joanna Miles and Rob George, *Family Law: Text, Cases and Materials* (3rd edn, 2015, Oxford University Press) and Jonathan Herring, *Family Law* (8th edn, 2017, Pearson), and students may usefully consult either of these throughout the course. The core reading for each class will be based on articles and cases, and links to these will be provided on the course Moodle page.

To get a sense of the subject of family law prior to commencing the course, or for a different perspective on some of the main issues that we discuss during the course, students may also find it helpful to consult Rob George, *Ideas and Debates in Family Law* (2012, Hart Publishing) and/or Jonathan Herring, Rebecca Probert and Stephen Gilmore, *Great Debates in Family Law* (2nd edn, 2015, Palgrave Macmillan).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Students may take unannotated, unmarked statutes into the exam.

LL232 Law and Institutions of the European Union

This information is for the 2018/19 session.

Teacher responsible: Dr Floris De Witte and Dr Niamh Dunne

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

It is recommended that this course is taken in the second year of the LLB.

Course content: The course is an introduction to European Union Law. The course considers a legal and political system which has become the most formidable system of transnational government in modern times. It is also a system that has become, in recent years, a source of continual political conflict: both over the content of its measures and the presence of its involvement in many spheres of activity. Discussions on the democratic nature of the EU, the relationship between the welfare state and EU law, and its very existence for example, will be covered in this course. Special attention will be given to the three major crisis that the EU is facing: the Euro-crisis, the refugee crisis, and Brexit.

This course covers three aspects of EU law. First, it covers the institutional and constitutional structure of the European Union, including its political and judicial institutions. Second, it looks at the central policies of the European Union, notably the rights to free

movement for goods, services, workers, and Union citizens. Third, it looks at some of the most topical policy areas in which EU law plays an increasingly important role, such as the migration crisis and the euro-zone crisis. Throughout, the course references Brexit and its implications.

At the end of the course you will be able to critically and independently assess both the legal structure of the EU as well as the political and social context within which it operates.

Topics include:

- History and Theory of European Integration
- Institutions and Law-Making of the European Union
- Democracy in the EU
- Sovereignty and EU Law
- Brexit and its consequences
- Differentiated Integration and the Future of the EU
- Application of Union law in the Member States
- Judicial Review of EU law
- Fundamental Rights
- The euro area crisis
- Internal Market and Free Movement
- Free Movement of Goods
- Free Movement of Persons and European Citizenship
- Free Movement of Services and Establishment
- Refugee Crisis and the AFSJ

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Week 6 MT and week 6 LT will be reading weeks. Essays will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students are expected to produce 1 essay in the MT & 1 essay in the LT. One additional optional essay will be set in LT.

Indicative reading: Chalmers et. al., EU Law, 3rd ed. (Cambridge: CUP, 2014). In addition, the course uses a broad range of online reading material (to be linked on Moodle).

Assessment: Take home exam (50%) in the LT. Take home exam (50%) in the ST.

LL233 Law of Evidence

This information is for the 2018/19 session.

Teacher responsible: Dr Abenaa Owusu-Bempah

Additional teachers: Dr Federico Picinali

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: If a person is suspected of committing a crime, how does the prosecution go about proving that they are guilty? Are there any restrictions on the type of evidence that the prosecution can use to prove its case? What protections does the law offer to defendants in order to safeguard them against false conviction? These are among the central questions in the law of criminal evidence, that is, the set of rules governing the production and the use of evidence in criminal trials.

This course concentrates on criminal, rather than civil evidence, and emphasis is placed on matters of principle and conceptual issues. The aims of the course are to teach students how to reason about evidence, and to encourage them to reflect critically on the modern law of criminal evidence. We study the standard of proof, asking whether a high standard such as 'proof beyond reasonable doubt' is justified. We examine how the police gain confessions from suspects, and how the law regulates the admissibility of confessions. A central theme on the course is the question as to what makes a trial fair. The European Convention on Human Rights is relevant to this question. In this context, we look at whether courts should admit improperly obtained evidence

and we ask what the privilege against self-incrimination is and whether it can be justified. As you will learn, much of the law of evidence involves rules of admissibility. Among these we cover the rules regulating the admissibility of hearsay evidence (a topic that now has an important human rights angle) and of bad character evidence (can a defendant's previous convictions be introduced against them at trial?). We also look at particular problems relating to testimony, ranging from the protections afforded to vulnerable witnesses to the admissibility and presentation of expert evidence.

Syllabus: While coverage may vary from year to year, we usually focus on the following themes and topics:

Reasoning with Evidence:

- Analysing Evidence: Admissibility, Relevance and Exclusion of Evidence;
- The Burden of Proof and the Presumption of Innocence;
- The Standard of Proof
- *Trial Fairness and Pre-Trial Proceedings:*
- Improperly Obtained Evidence;
- Eyewitness Identification;
- Confessions

Trial fairness and Defendant Cooperation:

- The Privilege Against Self-Incrimination;
- Drawing Inferences from Silence;
- Disclosure

Traditional Rules of Use:

- Hearsay;
- Confrontation;
- Bad Character Evidence

Testimony:

- Examination of Witnesses
- Vulnerable Witnesses;
- Sexual History Evidence;
- Expert Testimony.

The course has a Moodle page. You are encouraged to consult it should you want more information on the themes, the topics, and the sort of material that we study.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: There is no set text for the course, but standard texts are useful on many topics. Consider, for instance, I. H. Dennis, *The Law of Evidence* (London: Sweet & Maxwell, 6th ed, 2017); A. Choo, *Evidence* (Oxford: OUP, 4th ed, 2015); R. Munday, *Evidence* (Oxford: OUP, 9th ed, 2017).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL241 Not available in 2018/19 European Legal History

This information is for the 2018/19 session.

Teacher responsible: Dr Umberto-Igor Stramignoni NAB 7.34

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to equip students with an in-depth understanding of the social and cultural history of the European legal tradition (from antiquity to the onset of modernity), in order to engender a solid grasp of the basic assumptions and practises that underpin the legal systems of today's Europe. The seminars are built around certain significant moments in the history of the law of Rome, widely considered to be the heartland of the European legal tradition, from its mythical beginning circa 8th century BCE all the way through to the astonishing story of the birth of the French Civil code in 1804, the first of the major legal codifications taking place in Europe in the early hours of modernity. In the first part of the course we will explore: the ancient laws

of Rome and their relationship to religion and to space; the emergence of the popular assemblies; the position of women, slaves, foreigners, and other minorities in the Roman world; Augustus and his Imperial Chancery; the great jurists of the classical age; the challenges posed by the new religion of Christianity to the Roman constitution; and the decline of Rome and the rise of Byzantium as the "new Rome".

In the second part of the course we will be considering how the Roman law tradition, now increasingly referred to by the English as Civil Law, transformed itself and continued to play a very central role in the imagination, thought and language of Europe. We will look at how Roman law became immensely influential once again, upon its reappearance, in new and different guises, at the end of the Middle Ages; the challenges new readings of the Digest presented to the existing law of the Christian Church, and to the medieval world more generally; the cultural revolution of the Italian Renaissance; the emergence of Humanism and of the scientific method; Enlightenment; the modern movement towards legal codification; and finally, the French Revolution, Napoleon and, as he put famously it, his 1804 Code Civil. The course will end there, at the on modernity, when the European legal tradition began to face the wider and wider challenges presented by an increasingly complex, interconnected world.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

No seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: The general textbooks for the course are *Inventing the Individual* (2014), by Larry Siedentop, and the short but iconic book by Peter Stein, *Roman Law in European History* (1999). In addition, students will be required to familiarize themselves with the content of a mixture of visual aids (designed specifically for this course by Dr Stramignoni), and of numerous readings complementing the two textbooks, including academic journal articles and chapters from other monographs. Those thinking to take this course are encouraged to explore the course Moodle page for more information.

Assessment: Assessment path 1

Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Assessment path 2

Dissertation (100%, 12000 words) in the ST.

LL242

International Protection of Human Rights

This information is for the 2018/19 session.

Teacher responsible: Dr Chaloka Beyani

Additional teachers: Dr Theodora Christou

Availability: This course is available on the BA in Anthropology and Law, BSc in International Relations and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

This course is capped at 25 students

Pre-requisites: Students need to have already taken and done well in a course in Public International Law or in Civil Liberties Law.

Course content: This course aims to provide a comprehensive and analytical account of the application of human rights standards in international law, and the operation of the existing international machinery for the protection of human rights. The course engages with both the theory and practice of human rights law and, in that process, some of the most vexing issues facing us today will be considered. What is the scope of the right to privacy in a digital age? What's the geographical scope of a state's human rights obligations? How does human rights law apply in war? What are the human rights obligations of corporations in a globalized landscape? What rights do asylum seekers have when they are fleeing conflict? Does existing law adequately protect women's

rights?

The law of human rights reflects attempts made internationally to articulate basic legal standards for the protection of individuals and groups in their relations with the state, and to use the authority of international law, institutions, and procedures, to secure compliance with such standards. Human rights law is a modern phenomenon; but it has an ancient lineage. Some account of its evolution is given, from natural rights, civil liberties, the history of minorities protection, and the progressive development of human rights in public international law since 1945.

However, the major part of the course relates to post-1945 events concerning the protection of human rights. A section of the course deals with the role and reform of the United Nations to promote and secure the observance, on a universal basis, of international standards of human rights. The development of important legal standards (such as those of non-discrimination) is traced; and the work of various UN bodies in applying and promoting human rights is analyzed.

Comparisons are also drawn with regional attempts to promote and protect human rights, with the European system, the Inter-American system and the African system receiving special attention as regards their treaties, their institutions, procedure, and case-law.

By the end of the course students should have a good understanding of the substantive content of contemporary human rights and of the existing and alternative means available for protecting these rights and fundamental freedoms.

Extensive use is made of relevant case law, of the Civil and Political Covenant, the European Convention, the American Convention, the African Charter, and the International Court of Justice; and particular rights (such as those of persons belonging to minorities, the right to life, the prohibition of torture, the right to a fair trial, family life, and the fundamental freedoms) are studied in considerable detail.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students are expected to produce 1 essay in the MT and 1 essay in the LT.

Indicative reading: R. Smith, *International Human Rights*; Jacobs, White, and Ovey, *European Convention on Human Rights*.

Assessment: Essay (100%, 8000 words) in the ST.

LL250

Law and The Environment

This information is for the 2018/19 session.

Teacher responsible: Dr Veerle Heyvaert

Availability: This course is available on the BA in Anthropology and Law, BSc in Environment and Development, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aim of this course is to study and understand how law can be used as a tool to pursue environmental goals and to think critically about law's contribution to local and global environmental protection.

Content:

I. General features of environmental law in the UK:

The introductory sessions examine how we understand 'the value of the environment' as an object of legal protection, and how environmental law evolved through time. We study the notions of 'risk' and 'precaution' as key concepts of environmental regulation, and examine how the relationship between Parliament, the Government and the Environment Agency affects the effectiveness of environmental laws and rules in the UK.

II. Controlling space

This section reviews legal strategies for environmental protection through the management of the built environment, parks and nature. It covers planning law, environmental impact assessment,

and nature conservation law.

III. Controlling climate change

Seminars on climate change examine international law and the politics of climate change, different regulatory strategies to respond to the climate change challenge, and climate change litigation.

IV. Controlling enterprise

Section IV looks at how environmental harm can be prevented or limited by regulating heavily polluting industries, by targeting particular products (such as dangerous chemicals), or by focusing on particular activities (such as international trade). We examine how environmental regulation aims to balance between restricting hazardous activities on the one hand, and fostering free enterprise on the other, and review the court's role in adjusting this balance.

V. Remedying environmental harm

The final section examines the role of both case law and regulation in the remediation of environmental harm, paying attention to clean-up of contaminated land, common law and human rights based approaches to compensation, and legal responses to international environmental disasters

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Week 6 MT and week 6 LT will be reading weeks. Essays or equivalent writing assignments will be set around reading week to allow students to dedicate time to writing skills.

Formative coursework: Students are expected to write a formative essay; answer a problem set in writing; and participate in a mock exam.

Indicative reading: There is no set book that covers the entire course, however, several sessions use Bell, McGillivray, Pedersen et. al, Environmental Law (9th edition, Oxford University Press, 2017). A detailed reading list is provided for each seminar. Materials that are not sourced from Bell, McGillivray & Pedersen are made available on Moodle. A good alternative source is Fisher, Lange & Scotford, Environmental Law. Text, Cases and Materials (OUP, 2013). Useful introductory books include: Lazarus, The Making of Environmental Law, 2004; Holder & Lee, Environmental Protection, Law & Policy, 2007; R Carson, Silent Spring, 1962; R Eckersley, Environmentalism and Political Theory, 1992.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period. Essay (50%, 4000 words).

LL251 Intellectual Property Law

This information is for the 2018/19 session.

Teacher responsible: Prof Robert Pottage and Dr Sivaramjani Thambisetty Ramakrishna

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Intellectual Property Law consists in the rules determining when, and subject to what conditions, the activity of producing information (broadly conceived) can generate rights to exclude others from access to information. Unlike the physical objects associated with real property rights intangibles are non-rival and non-excludable. While the chair you may be sitting on accommodates only one person, many can whistle the same tune without depriving others of it. Yet while it often takes creativity, effort and investment to produce them, intangibles may be easily copied. To restrict this copying and thereby encourage the production of information, the law intervenes by establishing intellectual property rights around certain valuable intangibles – creative works like books, paintings and songs; inventions ranging from vaccines to the bag-less vacuum cleaner; and valuable brands like Coke ® or Google ®.

Given that information is an increasingly important source of commercial value within the modern economy, it is not surprising

that Intellectual Property Law is such a fast-growing field here and abroad. Its apparently relentless growth is however, the focus of vigorous debate. **Copyright** already provides the legal foundation for the well-established film, music, TV and publishing industries, and its continuing expansion is said by some to be crucial given the trend towards media convergence in the 'digital future', and by others to be a threat to free speech and freedom of access to information. **Patents** sustain such key and diverse technologies as pharmaceuticals, biotechnology and computer implemented inventions; and the availability of these rights in rapidly developing sectors like synthetic biology or smart phone technologies can often raise complex ethical, political and innovation policy issues. **Trademarks** are central to effective advertising and marketing but at the same time exemplify the tendency of more and more aspects of our cultural landscape to be 'commodified'; they have attracted support and denigration in equal measure for this reason. While introducing the law relating to patents, trademarks and copyright, this course will provide an opportunity to reflect on the factors responsible for the continuing rapid expansion of each of these regimes of rights. We will examine the variety of economic, cultural, political and technological pressures for the reform of Intellectual Property Law, and upon the processes by which these become translated into legal initiatives. And we will evaluate critically the implications for economic activity and social life of recognising intellectual property rights.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Additional revision seminars in the ST

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT

Indicative reading: The recommended text will be Lionel Bently and Brad Sherman, Intellectual Property Law (4th ed., Oxford University Press 2014), and students will also be required to purchase one of the available edited collections of statutes. For a critical introduction to the field, see Peter Drahos with John Braithwaite, Information Feudalism: Who Owns the Knowledge Economy? ((London: Earthscan, 2002); and James Boyle, The Public Domain: Enclosing the Commons of the Mind (Yale University Press, 2008), ebook available free online.

Assessment: Essay (100%, 8000 words) in the ST.

LL253 The Law of Corporate Insolvency

This information is for the 2018/19 session.

Teacher responsible: Ms Sarah Paterson

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

Course content: The last thirty years have seen great strides in the development of corporate insolvency law in England. We have seen the adoption of an enhanced legislative framework and the development of conceptual aspects and jurisprudence of the subject. As the recession of the early 1990's eased off there was a period of reflection and assessment of our insolvency law and procedures which resulted in reform of law on the books, although perhaps not of law in action. English lawyers were forced to revisit the toolbox during the financial crisis of 2007-2008 in order to adapt existing legal procedures to meet the needs of new, modern financing structures. There is now another period of wide spread reflection and debate in Europe and the US, as jurisdictions consider whether the insolvency law and procedures which they have are fit for the twenty-first century.

During the course we analyse the key insolvency procedures available in English law, before analysing the legal rules affecting distressed and insolvent companies and those concerned with them (for example, creditors, directors and employees) and the issues and principles underlying a corporate insolvency regime. (Corporate Insolvency Law bears a close relationship to the Law of Business Associations (BA) and students may find that

taking BA as well as Corporate Insolvency will give them a broad understanding of major themes relating to corporate activity.)

Syllabus:

Corporate Borrowing

- Outline of corporate borrowing and development and nature of security interests: fixed and floating charges; security by the use of ownership rights.

- Types of creditor.

Insolvency Procedures

- Out-of-court workouts
- Receivership
- Administration and pre-packaged administration
- Company Voluntary Arrangements
- Liquidation
- Comparison with Chapter 11 of the US Bankruptcy Code
- Corporate insolvency theory

Realising and distributing the assets

- Setting aside transactions
- The *pari passu* principle
- Security devices for consumer creditors and commercial suppliers
- Liability of company directors
- Employees
- The regulation of insolvency practitioners

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT & 1 essay in the LT. The formative essay in the LT may take the form of a mock examination.

Indicative reading: Detailed reading lists will be provided during the course. The recommended book is V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (3rd ed., 202017) (Cambridge University Press).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

The examination will be based on the full syllabus. Unmarked, unannotated versions of the relevant legislation may be taken into the examination.

LL257 Employment Law

This information is for the 2018/19 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This subject builds on contract and tort, and to some extent public law and EU law, but introduces the distinctive legal regulation of employment relations, such as the law of dismissal and discrimination law, and the institutional arrangements of industrial relations, including trade unions and collective bargaining. Labour law is an important area of legal practice, with employment law disputes representing one of the largest topics of civil litigation.

Outline:

- Contract of Employment: the duties of employer and employee; the variety of work relations; vulnerable workers and the personal scope of employment law
- Regulation of the Employment Relation: minimum wage, working time
- Anti-Discrimination Law: implications of the Equality Act 2010
- Dismissal: wrongful and unfair dismissal, economic dismissals
- Human Rights in the Workplace: civil liberties of employees at work
- Membership of Trade Unions, Worker Representation, and Collective Bargaining: freedom of workers to associate with each other and to act in association with each other

- Industrial disputes: strikes, other industrial action and lockouts; rights and liabilities of individual workers who take industrial action; civil liabilities for organising industrial action – the economic torts, the ‘golden formula’ immunities and loss of immunity – industrial action ballots.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in MT and 2 essays in LT. Although students may be expected to perform a moot instead of one of those essays.

Indicative reading: For a concise overview of the subject a suggestion is: H. Collins, *Employment Law* (Oxford: OUP, 2nd ed, 2010). See also P. Davies and M. Freedland (eds), *Kahn-Freund’s Labour and the Law* (London: Stevens and Son, 3rd ed, 1983) chapter 1. The leading textbooks are H. Collins, K.D.Ewing, A. McColgan, *Labour Law: Law in Context* (Cambridge: CUP, 2012); S. Deakin & G. Morris *Labour Law* (Oxford: Hart Publishing, 6th edn, 2012); A.C. L. Davies, *Perspectives on Labour Law* 2nd edn (Cambridge: CUP, 2009).

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (50%, 4000 words) in the LT.

LL259 Legal and Social Change since 1750

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Lobban

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines aspects of the historical development of English law in its social, political and economic context during the period 1750-1950. This course examines developments in British legal history in the two centuries after 1750. Drawing on printed and electronic primary sources, as well as secondary literature, it explores the changing nature of law in a number of areas. The course begins with an exploration of the nature of eighteenth century criminal justice, and how this was transformed in the nineteenth century. It explores issues of political crime and the concept and practice of the ‘rule of law’. In the first term, students are also given a grounding in the system of the courts and how they were reformed.

In the second term, the course explores topics relating to status, examining the attitude taken by the law to women, children, workers and slaves. A final set of topics will turn to explore the impact of law on economic change, looking at how the law facilitated the growth of a modern economy. The course will be taught by a combination of lectures and seminars in the Michaelmas and Lent Terms.

Lecture and Seminar Topics:

Michaelmas Term

The first term is devoted to an examination of the criminal and civil justice systems in the eighteenth and nineteenth centuries. Topics covered in the first term include the prosecution of crime in the era of the ‘Bloody Code’, the nature of the criminal trial before and after the arrival of criminal barristers in the courtroom, the reform of criminal punishments and the rise of the prison and modern policing. In the second half of the term, the course looks at political crime and the rule of law, and the impact of war on the law. It also considers the system of the civil courts, the nature of civil litigation and the reform of the major courts.

Lent Term

The second term is devoted to exploring the impact of law on society and the economy. Topics explored include the law relating to married women and the custody of children, the law of slavery, and the law relating to workers and trade unions. The economic topics addressed include the law relating to the environment, the transformation of tort and contract law, and the law relating to

business organisation.

Teaching: 20 hours of lectures and 5 hours of classes in the MT. 20 hours of lectures and 5 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 2 essays in the MT and LT.

Students who choose to be assessed by unseen examination must submit one essay each term. Those submitting a dissertation will produce outlines and drafts that will be used for formative coursework purposes.

Indicative reading: Reading will be suggested during the course.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Students can choose to be assessed by 100% examination or 100% dissertation.

LL272 Half Unit Outlines of Modern Criminology

This information is for the 2018/19 session.

Teacher responsible: Dr Meredith Rossner

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: None, but some familiarity with sociological or psychological literature would be an advantage.

Course content: This half-unit course is a general introduction to the study of modern criminology. The course is highly selective and every effort is made to hold the reading requirements within reasonable limits. It is suitable for General Course students, and a limited number may be admitted on application.

The main focus is on the classical and contemporary theories developed over the past two hundred years to explain and predict criminal behaviour in society. The propositions, assumptions, empirical validity, and policy implications of these criminological theories, as well as the social context in which they were developed, will be examined. Other significant issues in criminology – such as the measurement and extent of crime, the role of demographics (age, race, gender, social class) in the causation of and reaction to crime, the influence of the media and political regimes, and the changing boundaries of criminological research – will also be discussed.

Course content:

- The history of criminological theory.
- Trends in crime and crime statistics. How official statistics can be interpreted and the role of crime surveys
- 'Classical' criminology, rational choice, and crime prevention theories.
- Individual explanations of crime: biological, psychological and psychoanalytical theories.
- Sociological explanations of crime, including macro and micro approaches and recent critical theories
- Criminal justice policy and 'law and order' politics.
- Discrimination, Inequalities, crime and criminal justice
- Crime and the mass media

Teaching: 20 hours of seminars in the LT.

Formative coursework: The formative coursework consists of a class presentation (in groups) and a short statement of topic and outline for the summative essay. Feedback on the outline will help prepare students for the summative assessment

Indicative reading: The texts for this course are:

- Criminology 3rd ed. by T. Newburn (2017)
- The Oxford Handbook of Criminology. By Leibling, A; Mcara, L. and Maruna, S (eds) 6th edition (2017)
- Crime: The Mystery of the Common Sense Concept. By R. Reiner (2017)

Recommended Readings

- Law and Order: An Honest Citizen's Guide to Crime and Control. by R. Reiner (2007)

LSE Undergraduate Law Options Book 2018/19 30

- Crime, Shame, and Reintegration. by J. Braithwaite (1989)

- Understanding Deviance 7th Ed. by D. Downes, P. Rock and E. McLaughlin (2016)

- Vold's Theoretical Criminology by T. Bernard and J. Snipes and A. Gerould. 7th edition (2015)

Assessment: Essay (100%, 5000 words) in the ST.

LL275 Property II

This information is for the 2018/19 session.

Teacher responsible: Prof Neil Duxbury

Availability: This course is compulsory on the BA in Anthropology and Law. This course is available on the LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

This course is available to second and third year LLB and BA Anthropology and Law students. It is also available as an outside option to other second and third year LSE undergraduates where regulations permit and with permission from the course convener.

Course content: Property II examines principles of Land Law and the Law of Trusts. Land Law is taught in the first term and Trusts in the second term.

The Land Law component of Property II is designed to introduce students to the principles of the law of real property (i.e., land).

The course examines estates and interests in land, legal and equitable ownership, title registration, and trusts of land (including constructive trusts). It also considers the law governing specific third party interests – licences, proprietary estoppel claims, easements, covenants and mortgages.

The Trusts component of the course focuses on general principles of trusts law and examines the circumstances in which trusts arise, the obligations of trustees, and the remedies available to beneficiaries when these obligations are breached. It also considers the nature and classification of trusts, including resulting and constructive trusts, and how the law of trusts relates to and impacts on the law of contract, wrongs and unjust enrichment.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students are expected to produce two formative essays per term.

Indicative reading: Advice on reading, including textbook recommendations, will be provided at the beginning of the first and second terms. An essay which students might profitably read before the commencement of the course is Peter Birks, 'Before We Begin: Five Keys to Land Law', in Land Law: Themes and Perspectives, ed. S. Bright & J. Dewar (Oxford: Oxford University Press, 1998), 457-86.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Students are required to answer questions on both the Land Law and Trusts components of Property II.

LL278 Public International Law

This information is for the 2018/19 session.

Teacher responsible: Dr Stephen Humphreys

Additional Teachers: Dr Chris Thomas, Professor Gerry Simpson, Dr Devika Hovell

Availability: This course is available on the BA in Anthropology

and Law, BSc in Environmental Policy with Economics, BSc in International Relations and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the concepts, principles, institutions and debates that define public international law today. We begin with an overview of the international legal system, considering the sources of international law, the scope of responsibility for its breach, and its role in the creation and empowerment of states. In this connection we examine the work of the International Court of Justice, the International Criminal Court and the various ad hoc international criminal tribunals, along with judgments of national courts invoking international law. We then take up a range of topical issues of global concern, studying their international legal dimensions. The issues to be discussed are likely to include war, trade and investment, human rights, climate change, and international crime. We also investigate aspects of the history of international law, its relation to the establishment and retreat of European empires, and its contemporary significance and prospects. Overall, our aim is to lay the basis for an informed assessment of the contribution and limits of international law as a force in world affairs.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students are expected to produce one formative essay per term

Indicative reading: Reading lists will be provided for each topic on Moodle. You are asked to buy M. Evans (ed.), *International Law* (Oxford: OUP, 4th ed, 2014) and Blackstone's *International Law Documents*. Some other works to which you may wish to refer include the most recent editions of: D. Harris, *International Law: Cases and Materials*; H. Charlesworth and C. Chinkin, *The Boundaries of International Law*; M. Shaw, *International Law*; M. Koskeniemi, *From Apology to Utopia*; V. Lowe, *International Law*; and J. Crawford, *Brownlie's Principles of Public International Law*.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL284 Half Unit Topics in Sentencing and Criminal Justice

This information is for the 2018/19 session.

Teacher responsible: Richard Martin

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: In this course, we will explore the practices and decision-making of key actors within the criminal justice system and examine with the policies and regulatory schemes that purport to govern how these actors perform their roles in the criminal process. In the first five weeks, we track the construction of cases through the criminal process, which introduces us to the work of police, prosecutors and judges. How do these actors exercise their discretion? What kinds of dynamics, sub-cultures and formal (and informal) rules animate their decision-making? And how does this impact on the rights of suspects, defendants, offenders? By applying models of justice to the most recent developments in law, policy and practice at various stages of the criminal process, students will be equipped with the knowledge and tools necessary to critically assess and engage with contemporary criminal justice issues. Building on this in the second five weeks, we focus on how judges perform their role as sentencers, the principles and legal guidelines they rely upon in doing so and the types of sentences they can (or must) hand down in certain types of cases. We use the sentencing of rioters and the life sentence as case studies to apply the general principles of sentencing and conclude the course by considering the role of non-custodial sentences.

Topics by Week

1. The Criminal Process and Models of Justice
2. In the Community: What Do Police Do and Why Do They Do It?
3. In the Station: Police Practices and Case Construction
4. Bringing the Case: Prosecutorial Discretion and Plea Bargaining
5. In Court: The Judiciary and Legal Representation
6. Reading Week
7. Sentencing Theory: Aims, Principles and Policies
8. Sentencing Practice: Discretion and Guidelines
9. Sentencing Rioters
10. The Life Sentence for Murder
11. Non-Custodial Sentences

Teaching: 20 hours of seminars in the MT.

Introductory lecturing is combined with group discussion and in-class exercises

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: I want to encourage you to take responsibility for what you read and to come to class keen to present your own thoughts and ideas based on this reading. There is textbook reading each week, but to keep the material and topics we discuss as contemporary as possible, I have supplemented these texts with recent articles and chapters. The variety of reading and the choice this offers ought to facilitate lively and informative discussions in class. Recommended texts for the course include: A. Ashworth, *Sentencing and Criminal Justice* (Cambridge: Cambridge University Press, 2015); A. Liebling et al, *Oxford Handbook of Criminology* (Oxford: Oxford University Press, 2017); A. Sanders et al, *Criminal Justice* (Oxford: Oxford University Press, 2012).

Assessment: Essay (100%, 5000 words) in the LT.

LL293 Tax and Tax Avoidance

This information is for the 2018/19 session.

Teacher responsible: Dr Michael Blackwell

Availability: This course is available on the BA in Anthropology and Law, BSc in Accounting and Finance and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Available to second and third year LLB and BA Anthropology and Law students. It is also available as an outside option to second and third year students where regulations permit.

Course content: Taxation is a topic that has throughout history pervaded political debate and is encountered in every area of life. Taxation was one of the very first subjects to be taught at LSE. The teaching of tax law as an academic subject started at LSE, where it was introduced by Professor GSA Wheatcroft in 1957.

The syllabus is set out below, although there is some variation of topics selected from year to year, depending on the focus of current debate, and in the order of topics.

- The first term of the course begins by looking at the philosophical foundations of taxation: What gives the state the right to tax? As some authors have argued is all tax theft, or do we only have a moral right to out post-tax income? The remainder of the first term focuses on a technical legal approach to tax. Using a mixture of legislation and case law we assess liability to UK tax on (i) employment income; (ii) business income; and (iii) capital gains. The term concludes by looking at 'international tax', ie the liability to tax where an individual or company is potentially subject to the tax laws of several jurisdictions.
- The second term of the course focuses on tax avoidance looking at questions such as: What is tax avoidance and how does it differ from tax planning? What strategies do individuals and companies adopt to avoid tax? How do judges respond to tax avoidance through anti-avoidance doctrines and rules of interpretation and to what extent is that compatible with the judicial role? How effective can legislative responses to tax avoidance be and what are the limitations on such responses?

In the global economy to what extent can one state unilaterally combat tax avoidance or can it only be fought with multilateral responses, such as the OECD's BEPS project and the EU's Anti-Tax Avoidance Directive? How have public attitudes to tax avoidance changed over time? Should corporations behave 'responsibly' and pay their fair share of taxes, or are they obliged to do whatever they can to maximize shareholder returns? To what extent does professional ethics inform accountants and lawyers who advise on tax avoidance?

On the LSE Taxation course, the approach to the subject includes a strong policy perspective. However, legal issues are still important. The UK tax code is long and complex. There are also many relevant cases that are required reading too. Accordingly, by taking this course you should develop the following skills and attributes (i) working with and analysing legislation; (ii) working with and analysing case law; (iii) research skills; (iv) communication skills; (v) professionalism.

Students taking this course should be prepared to use a variety of sources ranging from statute and case law to literature on public policy. The precise balance of materials used varies from topic to topic. All the readings set will be accessible and non-mathematical. NO COMPUTATION is required and no knowledge of any discipline other than law is required. The course is open to second and third year law students, and experience suggests that it is equally suitable for both years.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT. 3 hours of seminars in the ST.

Formative coursework: Students are expected to produce at least 2 formative assignments over the academic year.

Indicative reading: The principal book for the course is expected to be Lee, *Revenue Law Principles and Practice* (Bloombury Professional, 2017). Tiley and Loutzenhiser, *Revenue Law* (Hart Publishing, 2016) will also be referred to. These texts are supplemented by the other readings that will be set. The cases and readings are readily available electronically or in BLPES. Vouchers are available for students on the course to purchase of published copies of the tax legislation at a substantial discount. N.B.: most tax law textbooks are revised extensively on an annual basis, so do not buy an old one! For some interesting background reading the first five chapters of Tiley et al (2016) are useful. Also see M.C. Blackwell 'Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study' [2013] *British Tax Review* 154.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Selected 'Legislation' may be taken into the examination, with non-verbal markings only.

LL295 Media Law

This information is for the 2018/19 session.

Teacher responsible: Dr Andrew Scott

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the legal and administrative regulation of the press, broadcasting, and other media. It centres on law and regulation in the UK, as influenced by European and international law.

The course opens with introductory lectures that introduce themes such as the 'media landscape', the sources and forms of media law (ethical, cultural and technological constraints, self-regulation, common law, statute, EC law and international law), and the rights and values that frame this area of law (free speech; privacy; impartiality; the protection of rights to a fair trial).

Thereafter, the course moves through three 'blocks' of five problem-focused, group-based classes that run through the year. These blocks of study focus on (a) regulating content in defence

private interests (misuse of private information, confidentiality and defamation), (b) regulating content in defence of public interests (contempt and the integrity of justice; political impartiality; offensive content; terrorism and national security), and (c) the control of journalistic newsgathering practices (risks to and protection of sources; constraints on 'cheque-book' journalism; access to government information (Fol, and official secrets); open justice and access to courts; regulation of the journalistic 'dark arts' (misrepresentation and subterfuge).

Teaching: 6 hours of seminars, 14 hours of classes and 20 minutes of help sessions in the MT. 4 hours of seminars, 16 hours of classes and 20 minutes of help sessions in the LT.

The intellectual content of the course is introduced in hour-long seminars held weekly throughout most of MT and LT. Classes - two hours in duration, and also held weekly throughout most of MT and LT - are occasions for working through group-based problem exercises that build progressively over three blocks of six weeks.

Students also receive support in the writing of their individual research papers.

Formative coursework: Students will be expected to produce 15 problem sets in the MT and LT.

Each week, group-work in classes will focus on 2 sets of problem exercises, and 1 set of policy-focused themes. The problem exercises are designed to allow students to build the knowledge necessary to complete the summative problem-based assessment. The policy-focused sessions are intended to introduce students to themes that may be picked up as topics for the summative coursework.

Indicative reading: Supporting texts for the course include Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (Oxford University Press, 2016); Parkes and Mullis (eds) *Gatley on Libel and Slander* (Rev 12th edn, Sweet & Maxwell, 2015), and Barendt et al, *Media Law: Texts, Cases and Materials* (Pearson, 2013); Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012. These and other materials relevant to the course are generally made available via the BLPES electronic resources or online.

Assessment: Essay (50%, 4000 words) in the ST.

Coursework (50%, 3000 words) in the MT and LT.

During the year, students must complete three problem exercises in groups, following extensive preparatory group-based problem exercises in seminars. The best two grades achieved in these three exercises will comprise 50% of the overall grade for each student for the course. Each student must also complete one 4,000 word research essay on a theme to be agreed with the course convenor. The grade achieved for this paper will comprise the remaining 50% of the overall grade for the course.

LL300 Competition Law

This information is for the 2018/19 session.

Teacher responsible: Dr Pablo Ibanez Colomo

Additional teachers: Dr Niamh Dunne

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Competition is widely understood to be the best means to deliver better goods and services at lower prices. The point of competition law is to preserve the process of rivalry between firms, and, by doing so, to benefit consumers and society at large. A broad range of corporate strategies are subject to this field of law. For instance, competition authorities enforce the law against large multinational firms (such as Microsoft, Google, or Intel) that have the ability to influence market conditions and exclude smaller rivals. Competition authorities also have the power to block mergers and acquisitions that are capable of harming consumers (think of a merger creating a monopoly). Attempts by firms to avoid competing by means of secret arrangements (the

so-called 'cartels') are another key area of enforcement. Competition law regimes have progressively become a major feature of legal systems around the world. They have long applied in the US and Europe – including the UK – but have now been adopted (and/or are actively enforced), *inter alia*, in jurisdictions like Brazil, Chile, China, Hong Kong, India, Malaysia, Singapore and South Africa. Unlike other legal disciplines, the relevant provisions in all of these regimes are virtually identical in their form and substance. This is, in other words, a truly cosmopolitan field. After this module, you will be equipped to understand and practice competition law almost anywhere in the world.

After an introduction in which competition law is put in its economic and institutional context, this module will address the main substantive and procedural aspects of the discipline. Topics covered include the following:

- Anticompetitive agreements between firms (including cartels and distribution agreements).
- Abusive practices by dominant firms.
- Mergers and acquisitions, including both mergers between competitors and vertical and conglomerate transactions.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce 2 formative essays per term

Indicative reading: A. Jones and B. Sufrin, *EU Competition Law* (Oxford: OUP, 6th ed, 2016); R. Whish and D. Bailey, *Competition Law* (Oxford: OUP, 9th ed, 2018); H. Hovenkamp, *The Antitrust Enterprise* (Cambridge: Harvard University Press, 2005).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL301

Global Commodities Law

This information is for the 2018/19 session.

Teacher responsible: Dr Stephen Humphreys

Availability: This course is available on the BA in Anthropology and Law and LLB in Laws. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course provides a critical introduction to the history of international law, with a focus on the colonial histories of Asia, Africa and the Americas. Taking some of the world's most heavily exchanged primary commodities as examples, we will track the development of their production and consumption from their domestic origins to their marketization and circulation in global trade today. The histories of some principal commodities – such as spices, gold, sugar, coffee, rubber, oil – tell the story of today's global economy in microcosm. Their evolving regulation and growing exchange has provided the base for central elements of the contemporary international and transnational legal architecture. In exploring this history, we will also touch on cross-cutting issues relating to some or all of the following: the law of the sea, human rights, WTO/trade law, environmental law, the laws of war, investment arbitration, labour law, climate change and animal welfare law. We will also be looking at theories of consumption and production more generally, adopting a broad definition of 'commodity' to enrich our understanding and discussion of these topics. Our examination of emerging commodity markets will remain cognizant of the stateformation processes, international law developments, and trans-global networking entailed in their consolidation. We will also read and discuss theoretical and historical concerns.

The course emphasizes student participation. Summative assessment is through class presentation and dissertation work. Students will be expected to contribute regularly and often throughout the year and special emphasis is placed on producing a

quality dissertation, critical in nature, extending into the theoretical and historical dimensions of contemporary international law problems. Lent Term in particular focuses on presentation and dissertation-writing.

Following completion of the course, students can expect to have a broad understanding of the historical evolution of global markets, with specific knowledge of how certain commodities have contributed to and shaped the most important international law challenges of our time. Through individual presentations and research projects students are expected to develop critical perspectives on aspects of the topics covered throughout the year as well as hone presentation skills.

At the end of the course, students should be able to demonstrate:

- A broad understanding of the historical rise in trade of global commodities and of its contribution to the development of international law, especially during colonial times.
- An awareness of intersecting legal issues relating to, for example: human rights, trade disputes, law of the sea, laws of war, environmental law, labour, animal welfare and illegal trade.
- An understanding of the impact that historical patterns of production and consumption of commodities around the world have had on contemporary international law structures.
- An appreciation of the critical theory that informs existing scholarly analysis of the trade in global commodities.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

Formative coursework: Students will be expected to submit one 2,000-word essay

Indicative reading: Fernand Braudel, *The Perspective of the World* (Civilization and Capitalism), 3 vols. trans. Sian Reynolds (Collins, 1984); Sarah Rose, *For All the Tea in China* (Arrow Books, 2010); Jean Baudrillard, *The Consumer Society* (Sage, 1998 [1970]); Duncan Kennedy (1985) 'The Role of Law in Economic Thought: Essays on the Fetishism of Commodities' 34 *The American University Law Review* 939-1001; Hugo Grotius, *The Freedom of the Seas, or the Right Which Belongs to the Dutch to take part in the East Indian Trade* [Mare Liberum], trans. Assessment: Essay (85%, 8000 words) in the LT and ST.

Project (15%) in the MT and LT.

Summative assessment will be in two parts:

- 85% for a 6,000-8,000 word long essay (proposal to be submitted in LT)
- 15% for participation in, and presentation of, a research project.

LL305

Jurisprudence

This information is for the 2018/19 session.

Teacher responsible: Dr Michael Wilkinson

Availability: This course is compulsory on the LLB in Laws. This course is available on the BA in Anthropology and Law, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific

Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: The aims of the course are: To introduce students to thinking philosophically about the law. To familiarise students with the main methodological, ontological, and normative issues in the study of law and its legitimacy. To provide students with knowledge of some of the most influential legal and political philosophers and their theories of law. To encourage and enable students to think about doctrinal legal questions from a philosophical and critical perspective. To help students to develop legal reasoning skills by training them in abstract, philosophical arguments. Some of the themes that the course covers are: natural law; conventionalist legal positivism; the rule of law; the use and significance of principles in legal reasoning; the social contract tradition (Hobbes; Kant; Rawls); the democratic legitimacy of the state and its law; Marxist approaches to law; Arendt's political theory and its implications for law.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to write at least one essay per term.

Indicative reading: Students are provided with outlines and readings for topics discussed in the Michaelmas and Lent Terms. For some introductory and background reading see: J.E. Penner and E. Melissaris, McCoubrey & White's Textbook on Jurisprudence, OUP 2012; Brian Bix, Jurisprudence: Theory and Context (3rd ed.), Thomson Sweet & Maxwell 2003.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

LL398 Half Unit Half-Unit Dissertation on an approved legal topic

This information is for the 2018/19 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

This course is available to students in Year 3. It may be taken in Year 2 in exceptional circumstances with permission of the Departmental Tutor. This course cannot be taken in the same year as LL399.

Course content: The half-unit dissertation should be taken in Part II but in exceptional circumstances permission may be sought to take it in Part I.

Students wishing to do either a full or half-unit dissertation should first consult their Academic Adviser in the preceding Summer Term about:

- 1 whether a dissertation is a suitable option for the student;
- 2 the particular dissertation topic;
- 3 who might be an appropriate dissertation supervisor.

Because this option requires considerable independent study, it is generally not advisable to opt to write a full-unit dissertation unless the student has been achieving marks of an upper second class standard. The dissertation subject must be of a suitable academic character that has not already or will not have been explored in depth in any taught course taken by the student but is related to subjects taught in the School.

In light of discussions with their Academic Adviser, a student wishing to pursue this option should approach a potential supervisor for approval. Once they have their supervisor's approval, students should select the relevant dissertation course on LFY. They will then need to complete the 'Dissertation topic approval form' (available on LLB Dissertation Moodle page) which needs to be signed off by the student's proposed Dissertation Supervisor,

Academic Adviser and the Chair of Examinations. This should be submitted to the Law Reception by the end of Week 4 of Michaelmas Term, 16.00.

Including the initial meeting, students will have four support meetings with their supervisor to guide them through the research process as follows:

- 1 One initial meeting to establish the broad topic.
- 2 A second meeting to agree a title, review an outline and see an initial bibliography.
- 3 A third meeting to discuss progress and difficulties (optional for half-unit essays).
- 4 A fourth meeting to give feedback on progress to date, to take place before the end of the Lent Term. In order for this feedback meeting to be of use, students will need to have made substantial progress with the preparation of a draft dissertation by the middle of the Lent Term. It is the student's responsibility to arrange these meetings with the supervisor.

Dissertations are normally submitted on the first day of the Summer Term of the academic session in which the dissertation is being written. There is discretion for an additional oral examination on the subject-matter of an essay which "may extend to cover the wider background aspects of the essay".

Teaching: 1 hour of lectures in the MT.

Beyond the one-to-one sessions held with the dissertation supervisor there is no formal teaching. However, there is a one hour session held in the Michaelmas term for all half-unit and full-unit dissertation students to orient them to the requirements of writing a dissertation.

Indicative reading: There is no essential reading as such, but there is a dedicated moodle site for the LLB dissertation options.

Assessment: Dissertation (100%, 8000 words) in the ST.

LL399 Full-unit Dissertation on an approved legal topic

This information is for the 2018/19 session.

Availability: This course is available on the LLB in Laws. This course is not available as an outside option nor to General Course students.

This course is available to students in Year 3 only. It cannot be taken in the same year as LL398.

Course content: The full-unit dissertation can only be taken in Part II (third year) when students are better prepared for it.

Students wishing to do either a full or half-unit dissertation should first consult their Academic Adviser in the preceding Summer Term about:

- 1 whether a dissertation is a suitable option for the student;
- 2 the particular dissertation topic;
- 3 who might be an appropriate dissertation supervisor.

Because this option requires considerable independent study, it is generally not advisable to opt to write a full-unit dissertation unless the student has been achieving marks of an upper second class standard. The dissertation subject must be of a suitable academic character that has not already or will not have been explored in depth in any taught course taken by the student but is related to subjects taught in the School.

In light of discussions with their Academic Adviser, a student wishing to pursue this option should approach a potential supervisor for approval. Once they have their supervisor's approval, students should select the relevant dissertation course on LFY. They will then need to complete the 'Dissertation topic approval form' (available on LLB Dissertation Moodle page) which needs to be signed off by the student's proposed Dissertation Supervisor, Academic Adviser and the Chair of Examinations. This should be submitted to the Law Reception by the end of Week 4 of Michaelmas Term, 16.00.

Including the initial meeting, students will have four support meetings with their supervisor to guide them through the research process as follows:

- 1 One initial meeting to establish the broad topic.

2 A second meeting to agree a title, review an outline and see an initial bibliography.

3 A third meeting to discuss progress and difficulties (optional for half-unit essays).

4 A fourth meeting to give feedback on progress to date, to take place before the end of the Lent Term. In order for this feedback meeting to be of use, students will need to have made substantial progress with the preparation of a draft dissertation by the middle of the Lent Term. It is the student's responsibility to arrange these meetings with the supervisor.

Dissertations are normally submitted on the first day of the Summer Term of the academic session in which the dissertation is being written. There is discretion for an additional oral examination on the subject-matter of an essay which "may extend to cover the wider background aspects of the essay".

Teaching: 1 hour of lectures in the MT.

Beyond the one-to-one supervision sessions held with the student's dissertation supervisor there is no formal teaching as such.

However, a one hour session will be held in the Michaelmas term for all full-unit and half-unit dissertation students to orient them to the dissertation requirements.

Indicative reading: There is no essential reading as such. There is a moodle site dedicated to the LLB half and full-unit dissertations.

Assessment: Dissertation (100%, 15000 words) in the ST.

LN100

Russian Language and Society 3 (advanced)

This information is for the 2018/19 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Russian Language and Society 2 (Intermediate) course (LN102); or a good pass at A Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Olga Sobolev, Natasha Bershadski et al, *Colloquial Russian 2*, Routledge, 2018; Additional: Terence Wade, *A Comprehensive Russian Grammar*, Blackwell, 2000; Nicholas Rzhnevsky, *Cambridge Companion to Modern Russian Culture*, Cambridge University Press, 2012; Robert Service, *A History of Modern Russia*, Penguin, 2009; Orlando Figes, *Natasha's Dance: A Cultural History of Russia*, Penguin, 2003; Russian newspapers on the web.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the

assessment (continuous assessment, oral and written exams), as these test all four skills.

LN101

Russian Language and Society 1 (beginner)

This information is for the 2018/19 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: No previous knowledge of Russian is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topic work; (b) oral classes; (c) grammar classes; (d) tutorials; and (e) guided study using Language Showroom, IT and web-based materials. Students should note that the timetable will be held extremely flexible to accommodate students from all departments. Please contact the teacher responsible if you would like to follow this language course. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Svetlana Le Fleming and Susan Kay, *Colloquial Russian*, Routledge, 2017

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN102

Russian Language and Society 2 (intermediate)

This information is for the 2018/19 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01A

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Russian Language and Society 1 (Beginner) course (LN101); or a good pass at GSCE/AS Level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: A bridge from intermediate to advanced study of the Russian language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and web-based multi-media materials. The focus is on accuracy

as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 50 hours of classes in the MT. 50 hours of classes in the LT. 5 hours of classes in the ST.

Five hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities during the reading week

Formative coursework: Students will be required to complete weekly language exercises.

Indicative reading: Svetlana Le Fleming and Susan Kay, *Colloquial Russian*, Routledge, 2017; Cultural awareness: Nicholas Rzhevsky, *Cambridge Companion to Modern Russian Culture*, Cambridge University Press, 2012

Assessment: Exam (40%, duration: 2 hours) in the summer exam period. Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN104

Mandarin Language and Society Level 1 (Beginner)

This information is for the 2018/19 session.

Teacher responsible: Dr Hua Xiang Pethick-Lawrence House, 601B

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: No previous knowledge of Mandarin is required; students with limited prior knowledge may be considered for the course subject to an interview with the course co-ordinator.

Course content: Beginners to intermediate study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. In this level, the students are required to read and write up to 750 Chinese characters.

Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities in week 11 of both MT and LT.

Formative coursework: The students will be required to complete weekly exercises. This includes grammar activities, writing Chinese characters and online communicative materials.

Indicative reading: CH Xiang, 2010, *Mastering Chinese*, London. Palgrave Macmillan. X Liu (ed.), 2006, *New Practical Chinese Reader*, Vol. 1, text book and workbook, Beijing. Beijing Language and Cultural University Press. Y Po-Ching & D Rimmington, 2002, *Beginners Chinese – A Grammar and Workbook*, Routledge. Oxford Chinese Dictionary, 2010, Oxford Dictionaries.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period. Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are

therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN110

German Language and Society 3 (advanced)

This information is for the 2018/19 session.

Teacher responsible: Dr Peter Skrandies PEL.6.01f and Mrs Susanne Muller-Menckens PEL.6.01

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: An A-level or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Advanced study of the German language within the framework of the social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, and the use of authentic multi-media materials. The focus is on accuracy and communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 44 hours of classes in the MT. 44 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials. Structured activities will take place in week 11 of the Michaelmas term and week 11 of the lent Term.

Formative coursework: Weekly language exercises

Indicative reading:

- Beattied *Collins German Dictionary* 7th
- Durrell *Essential German Grammar* Routledge
- Luscher Renate *Landeskunde Deutschland* München Verlag für Deutsch
- Wolski, Werner (2012), *Pons Kompaktwörterbuch Deutsch als Fremdsprache*, Stuttgart: Klett Verlag

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. French Language and Society 3 (advanced)

This information is for the 2018/19 session.

Teacher responsible: Miss Florence Niclot PEL 6.01D and Mr Francois Simon PEL 6.01K

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher

responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed French Language and Society 2 (intermediate) (LN132).

Completion of the French Language and Society 2 (Intermediate) course (LN132); or a good pass at A Level or its equivalent is required. An interview with the course Co-ordinator prior to registration is compulsory.

Course content: Advanced study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 40 hours of classes in the MT. 40 hours of classes in the LT. 4 hours of classes in the ST.

Four hours per week, which will feature:

- Interactive seminars
- Oral classes
- Writing classes (grammar, writing for academic purposes)
- Workshops
- Tutorials; and
- guided study using IT and Web-based materials including a virtual learning environment supported by Moodle.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading: Students will be given the titles of the books when fully registered.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN131

French Language and Society 1 (beginner)

This information is for the 2018/19 session.

Teacher responsible: Miss Florence Niclot PEL 6.01D

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites:

- No previous knowledge of French is required; students with limited prior knowledge may be considered for the course. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Beginners to intermediate study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 60 hours of classes in the MT. 60 hours of classes in the LT. 6 hours of classes in the ST.

Six hours per week, which will feature:

- interactive topical work
- oral practice
- grammar and vocabulary work
- tutorials; and (e) guided study using IT and web-based materials.

Formative coursework: The students will be required to complete weekly language exercises.

Indicative reading: Students will be given the titles of the books when fully registered.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

LN254

Literature and Aspects of Ethics

This information is for the 2018/19 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01A and Dr Angus Wrenn PEL 6.01A

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Although an A-level pass or equivalent in Literature is useful, it is not an absolute requirement (especially for General Course students).

Course content: a) Literary treatment/projection of the aspects of ethics, focusing on the classical ideas of Aristotle and Kant, Schopenhauer, and Nietzsche, developed in modern times by Sartre, Lacan, Bernard Williams and Michel Foucault. The course will draw on a range of themes arising from the interface between literary and philosophical studies and will explore such issues as the objectivity of moral reasoning (the question whether the practices that are traditionally and factually legitimated by religion, law or politics are indeed worthy of recognition); the spiritual crisis of the modern world (desire, guilt and innocence); technological omnipotence versus determinism; and the illusion of liberty in a tolerant democracy based on consensus. It will also be concerned with such questions as whether philosophy and literature, when combined, can achieve more than the sum of the two parts. b) The course is based on a carefully chosen range of short stories from world literature (including such authors as Kafka, Murakami, Kundera, Borges, Bessie Head, Isabel Allende etc.) where there is either a direct allusion to or a strong parallel with the key ethical issues. c) Related trips to galleries and theatre productions during the year. d) Use of archive recordings of authors, and video. e) Students encouraged to draw upon background in their main discipline, and to read widely.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Interdisciplinary structured research field-trips contextualising literature (visual and performance arts), which will contribute to students' experience and develop their critical thinking and transferable skills.

Formative coursework: Students will be expected to produce 2 essays and 10 exercises in the MT and LT.

Indicative reading:

1. Bashevis Singer *The Spinoza of Market Street*
2. Franz Kafka *In The Penal Colony*
3. Isabel Allende *The Guest Teacher*
4. Thomas Mann *Death in Venice*
5. Jorge-Luis Borges *Blue Tigers*
6. Haruki Murakami *The Ice Man*
7. Jean-Paul Sartre *The Wall*
8. Guy de Maupassant *The Model*
9. Heinrich Böll *To Work or not to Work*
10. Bessie Head *A Power Struggle*

• Peter Singer and Renata Singer (eds.), *The Moral of the Story: An Anthology of Ethics Through Literature* (Wiley-Blackwell, 2004)

• Alex Voorhoeve, *Conversations on Ethics* (Oxford University Press, 2011)

• Luc Bovens, 'A response to Prelec', in: Oliver, Adam, (ed.) *Behavioural Public Policy* (Cambridge University Press, 2013)

• Brian Stock, *Ethics through Literature: Ascetic and Aesthetic Reading in Western Culture* (Brandeis, 2008)

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2500 words) in the LT.

LN270

Society and Language: Linguistics for Social Scientists

This information is for the 2018/19 session.

Teacher responsible: Dr Peter Skrandies PEL.6.01f

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Course content: The course will introduce students to key (socio) linguistic concepts (semantic and pragmatic meaning, discourse, register, genre, dialect, idiolect, sociolect) employed in the analysis of language use as a social process. Students will explore the reciprocal relationship between language and specific social contexts and structures (class, gender, ethnicity), and study the role that language plays in the creation, maintenance and change of social relations and institutions. Important themes are changing attitudes to language and the prestige afforded to particular languages and language varieties. The use of language for academic purposes will be analysed, as will be situations of language contact, multilingualism and the role of translation in intercultural and international communication. The implications and consequences for less widely used languages of the emergence of English (and other widely spoken languages) as global lingua francas will be outlined and discussed.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Two hours per week, featuring: (a) Lectures on a range of concepts and themes; (b) classes including students' presentations; (c) revision workshops; (d) tutorials. Students on this course will have a reading week in Week 6 of MT and LT.

Formative coursework: Short essays, linguistic analyses, presentations.

Indicative reading:

- Mesthrie, Rajend (ed) (2011) *The Cambridge Handbook of Sociolinguistics*, Cambridge: Cambridge University Press
- Meyerhoff, Miriam (2011). *Introducing Sociolinguistics*, 2nd edition, London: Routledge;
- Mooney, Annabelle et al (2010). *Language, Society and Power. An Introduction*, 3rd edition, London: Routledge
- Wardhaugh, Ronald (2010). *An Introduction to Sociolinguistics*, Oxford: Wiley-Blackwell
- Weber, Jean-Jacques & Kristine Horner (2012). *Introducing Multilingualism. A Social Approach*, Routledge: London
- Yule, George (2010). *The Study of Language*, 4th ed., Cambridge: Cambridge University Press
- Wodak, Ruth et al (2011) *The SAGE handbook of sociolinguistics*, London: SAGE

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (30%, 4000 words) in the ST.

Presentation (10%, 500 words) in the LT.

LN320

Spanish Language and Society 5 (mastery)

This information is for the 2018/19 session.

Teacher responsible: Mr Rafael Penas Cruz PEL.6.01I

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Completion of the Spanish Language and Society 4 (Proficiency) course (LN220) or its equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery)

study of the Spanish language through themes related to Spanish speaking societies within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and studio-based multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Week 11 in MT and LT structured activities.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practice; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials

Formative coursework: The students will be required to complete weekly language exercises

Indicative reading: The following works are core texts:

- Gabriel Garcia Marquez, *Cien Años de Soledad*;
- Carmen Laforet, *Nada*;
- Tomas Eloy Martinez, *Santa Evita*,
- Luis CERNUDA, "La realidad y el deseo", Fondo Cultura Económica, Madrid, 1982,
- Poesia; Jaime GIL DE BIEDMA,; *Antología poética* (2001); Alianza Editorial, SA; Fuguet, Alberto; Sergio Gomez (Eds),
- Presentación del país McOndo, En McOndo, Barcelona: Grijalbo, 1996;
- Amores Perros (2000) Filmax DVD;
- Ay Carmela! [1990] Arrow Warner Home Video DVD;

Students will be advised to buy any relevant materials at the beginning of the course.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN330

French Language and Society 5 (mastery)

This information is for the 2018/19 session.

Teacher responsible: Mr Francois Simon PEL.6.01 K

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed French Language and Society 4 (proficiency) (LN230).

AND / OR attend a compulsory interview with the course co-ordinator prior to registration.

Course content:

- Further advanced (up to the level of mastery) study of the French language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing - including grammar) through individual and group work, topical discussions, authentic and studio-based multi-media materials.
- The focus on accuracy, near native command of the target Language, maximisation of cultural awareness through the latest developments with a particular emphasis on using student centred approach in course delivery, preparing the students to be fully operational in a French speaking company or any other Organisation where near native command of French is an essential requirement.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Two hours per week, which will feature: (a) seminars; (b) Oral Classes; (c) Workshops; (d) Tutorials; and (e) Guided study using Language (f) grammar. Showroom, IT and web-based material including a virtual learning environment supported by Moodle.

Formative coursework:

- 40% : Research project (in the MT and LT (including an Oral examination (20%) in the main exam period).
- 20% : Continuous assessment (in the MT and LT).

See Assessment below

Indicative reading: Students are encouraged to make full use of the resources of French books in the Library as well as reference books. Students are also strongly advised to use the resources available on the World Wide Web. The course is in the process of being supplemented with new activities, topics and themes that underpin French Modern Society.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Project (20%, 3000 words) in the LT.

Oral examination (20%) in the ST.

Continuous assessment (20%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LN340

Mandarin Language and Society 5 (Mastery)

This information is for the 2018/19 session.

Teacher responsible: Dr Hua Xiang Pethick-Lawrence House, 601B

Availability: Available as an outside option to all undergraduate and General Course students. Students can take this course in any year of their studies following approval from the teacher responsible and subject to their own programme regulations.

Pre-requisites: Students must have completed Mandarin Language and Society 4 (Proficiency) (LN240).

This is a Mastery course, and in order to register, completion of Language and Society 4 or equivalent is required. An interview with the course co-ordinator prior to registration is compulsory.

Course content: Further advanced (up to the level of mastery) study of the Mandarin language within the framework of social sciences and culture. In a dynamic and communicative way the course develops all four language skills (i.e. speaking, listening, reading and writing) through individual and group work, topical discussions, authentic and multi-media materials. The focus is on accuracy as well as communication that advance students' language competence, transferable skills and cultural awareness. At this level, the students are required to read and write up to 5000 Chinese characters.

Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.

Two hours per week, which will feature: (a) interactive topical work; (b) oral practise; (c) grammar and vocabulary work; (d) tutorials; and (e) guided study using IT and web-based materials.

Structured activities in week 11 of MT and LT.

Formative coursework: The students will be required to complete weekly exercises. This includes newspaper reading, research projects and online communicative materials.

Indicative reading: Students are encouraged to make full use of the resources of language gateway at LSE and online magazine subscription. There will be guided authentic materials from newspaper, web and journals.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Oral examination (20%) in the ST.

Continuous assessment (40%) in the MT and LT.

Language courses map to the Common European Framework for Language Learning. This framework defines linguistic proficiency in the four language skills (reading, writing, speaking and listening) at different levels. To pass this course, students are therefore required to achieve a pass mark in each element of the assessment (continuous assessment, oral and written exams), as these test all four skills.

LSE100

The LSE Course: Understanding the causes of things

This information is for the 2018/19 session.

Teacher responsible: Ms Jessica Templeton KSW4.06

Academics from a range of LSE departments contribute to the course.

Availability: Compulsory course on all undergraduate programmes: students complete Term 1 in Lent Term of their first year and Term 2 in Michaelmas Term of their second year. The course is not available to General Course students or to second-year direct-entry students.

Course content: The course introduces students to the fundamental elements of thinking like a social scientist. As no complex issue can be fully understood through the lens of a single discipline, LSE100 explores pressing social issues from the perspective of different fields of social science. The goal of the course is to enable students to complement intellectual grounding in their discipline with a broad understanding of different ways of thinking. In two ten-week modules, the course will ask 'big' questions, such as: 'Is there a path to global food security?' Using such questions as guides, students will explore different types of evidence, forms of explanation and strategies for abstraction and modelling that are used across the social sciences. The aim is not only to broaden students' intellectual experience, but also to deepen their critical understanding of their own disciplines. LSE100's focus on the core elements of social scientific reasoning will be accompanied by a strong emphasis on critical thinking, data visualisation, research and communication skills.

Teaching: 15 hours of classes and 5 hours of specialized online lectures, plus optional workshops, in the MT. 15 hours of classes and 5 hours of specialized online lectures, plus optional workshops, in the LT.

Formative coursework: Formative activities will be completed in class and may include writing assignments or data analysis tasks.

Indicative reading: Readings are module-specific. Class reading packs are provided in hard copy and are all available from the LSE100 Moodle site, along with additional reading and resource recommendations.

Assessment: In both terms, students will write a summatively-assessed persuasive academic argument and work with a group of their peers on a project related to the modules. The group project will be completed in the first half of each term, and the written work will be due at the end of term. The written work and group projects are each worth 25% of the student's final mark. Students receive a numeric mark and overall grade for the course of Distinction, Merit, Credit or Fail.

MA100

Mathematical Methods

This information is for the 2018/19 session.

Teacher responsible: Dr Ioannis Kouletsis

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economic History with Economics, BSc in Economics, BSc in Economics

and Economic History, BSc in Economics with Economic History, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: This course assumes knowledge of the elementary techniques of mathematics including calculus, as evidenced for example by a good grade in A Level Mathematics.

Course content: This is an introductory level course for those who wish to use mathematics seriously in social science, or in any other context. A range of basic mathematical concepts and methods in calculus of one and several variables and in linear algebra are covered and some applications illustrated. It is an essential pre-requisite for any mathematically orientated economics options and for many further mathematics courses. Topics covered: Matrices, reduced row echelon form, rank. Systems of linear equations, Gaussian elimination. Determinants. Vector spaces, linear independence, basis, dimension. Linear transformations, similarity. Eigenvalues. Diagonalization. Orthogonal diagonalization. Complex numbers. Vectors. Functions of several variables, derivatives, gradients, tangent hyperplanes. Optimisation including Lagrange's method. Vector-valued functions, derivatives and their manipulation. Inverse functions, local inverses and critical points, use in transformations. Integration, differential and difference equations. Some applications of the above topics.

Teaching: 20 hours of lectures, 20 hours of classes and 10 hours of workshops in the MT. 20 hours of lectures, 20 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to attempt a number of weekly homework exercises (and check their answers using solutions provided) in preparation for their classes. In-class open book practice sessions will be conducted weekly in class and be submitted to the appropriate class teacher for marking and feedback. In addition, Mock Exam questions will be submitted for marking and feedback at regular intervals throughout the year. Success in this paper depends on dealing with the written work as it is assigned, in a regular and systematic manner.

Indicative reading: Ken Binmore & Joan Davies, *Calculus, Concepts and Methods*; Martin Anthony & Michele Harvey, *Linear Algebra, Concepts and Methods*.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Exam (25%, duration: 1 hour) in the January exam period.

MA103 Introduction to Abstract Mathematics

This information is for the 2018/19 session.

Teacher responsible: Dr Peter Allen and Prof Graham Brightwell

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have taken, or be taking concurrently, the course Mathematical Methods (MA100).

Course content: The course is an introduction to the use of formal definitions and proofs in mathematics, and to basic results of elementary set theory, number theory, linear algebra, algebra and analysis. Specific topics covered are as follows: Logic, integers, sets and functions, prime numbers, relations, real and complex

numbers, greatest common divisor and modular arithmetic, infimum and supremum, sequences, limits, continuity, groups and vector spaces.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 21 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Students are expected to have one of the recommended textbooks: N L Biggs, *Discrete Mathematics* (2nd edn) or P J Eccles, *An Introduction to Mathematical Reasoning*. Further background reading can be found in R Allenby, *Numbers and Proofs*; M Liebeck, *A Concise Introduction to Pure Mathematics*; V Bryant, *Yet Another Introduction to Analysis*; R Bartle & D Sherbert, *Introduction to Real Analysis* and H Anton, *Elementary Linear Algebra*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA107 Half Unit Quantitative Methods (Mathematics)

This information is for the 2018/19 session.

Teacher responsible: Dr James Ward

Availability: This course is compulsory on the BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Management and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and Diploma in Accounting and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: A-level Mathematics (or equivalent).

Students with A-level Mathematics who are confident of their mathematical skills may also consider the full unit **MA100**

Mathematical Methods.

Course content: The aim of this course is to develop the basic mathematical tools necessary for further study in economics and related disciplines. To this end we focus on: techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), and the solution of difference and differential equations. The ideas are taught systematically, with emphasis on their application to economic problems. Examples are used throughout the course for motivation and illustration.

Specific topics are as follows: sets, functions, equations, graphs. Difference equations, sequences, limits. Differentiation, inverse functions, exponential and logarithmic functions. Partial differentiation, chain rule, homogeneous functions. Optimisation in two variables: unconstrained and constrained. Lagrange multipliers. Vector notation and convexity. Matrix notation, systems of linear equations, inverse matrices. Integration. Differential equations.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The course follows M Anthony & N L Biggs, *Mathematics for Economics and Finance: Methods and Modelling*, CUP, 1996. There are many other books with titles like *Mathematics for Economists* which may be of some use, but they won't cover the entire course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA110

Basic Quantitative Methods

This information is for the 2018/19 session.

Teacher responsible: Dr Pavel Gapeev
Prof Jan van den Heuvel

Availability: This course is available on the BSc in Accounting and Finance and BSc in Government and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: GCSE or AS-level Mathematics (or equivalent). Students with A-level Mathematics (or equivalent) should take **MA107 Quantitative Methods (Mathematics)** or **MA100 Mathematical Methods**.

Course content: The course is designed to provide students with the elementary mathematical tools that are needed to study Economics. Students will be introduced to basic mathematical concepts and manipulations. Examples of applying these techniques to a variety of economical and management problems are given throughout the course. Content - Part A: Arithmetic operations, powers and roots; basic algebra; introduction to linear programming; logarithms and exponential growth; sets, functions and graphs; differentiation of functions of one variable; marginal cost and marginal revenue; optimisation of functions of one variable; difference equations; equilibrium and stability in dynamical models. Content - Part B: Introduction to integration; consumer and producer surplus; matrix algebra; systems of linear equations; functions of several variables; partial differentiation; optimisation and the Lagrange multiplier method.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 22 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: The course will be mostly taught from the lecturers' notes. The following books can provide additional material: T Bradley & P Patton, *Essential Mathematics for Economics and Business*; E T Dowling, *Mathematics for Economists* (Schaum's Outline Series); I Jacques, *Mathematics for Economics and Business*; M Rosser, *Basic Mathematics for Economists*; M Anthony & N L Biggs, *Mathematics for Economics and Finance: Methods and Modelling*, CUP, 1996.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA203 Half Unit

Real Analysis

This information is for the 2018/19 session.

Teacher responsible: Dr Konrad Swanepoel

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103), or some equivalent giving experience with formal proofs, convergence of sequences and continuity of functions.

Course content: This is a course in real analysis for those who have already met the basic concepts of sequences and continuity on the real line. Here we generalize these concepts to Euclidean spaces and to more general metric and normed spaces. These more general spaces are introduced at the start and are emphasized throughout the course. Topics covered are:

- Sequences and series on the real line.
- Metric and normed spaces; open and closed sets, topological properties of sets and equivalent metrics, sequences in metric spaces, compactness, completeness.
- Continuity of real valued functions and of functions between metric spaces, uniform continuity and Lipschitz condition.
- Differentiation of real valued functions, the mean value theorem, differentiation of functions between Euclidean spaces and partial derivatives.
- Riemann integral and the fundamental theorem of calculus.
- Sequences and series of functions; pointwise and uniform convergence of sequences of functions, power series and series in normed spaces.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A comprehensive pack of lecture notes will be provided. The following may prove useful:

- Robert G Bartle & Donald R Sherbert, *Introduction to Real Analysis*
- W A Sutherland, *Introduction to Metric and Topological Spaces*
- Tom Apostol, *Mathematical Analysis*, second edition.
- Walter Rudin, *Principles of Mathematical Analysis*, third edition.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA207 Half Unit

Further Quantitative Methods (Mathematics)

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Anthony

Availability: This course is available on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have previously taken **MA107 Quantitative Methods (Mathematics)**. It is not available to students who have taken **MA100 Mathematical Methods**, or equivalent, nor higher level methods courses.

Course content: This is a second course in quantitative methods, following on directly from Quantitative Methods (Mathematics) (MA107). This course will contain further algebra and calculus. As with the course MA107, the emphasis will be on applications in economics and finance. Topics covered: Matrix methods in portfolio analysis. Linear independence. Rank of a matrix. Eigenvalues and eigenvectors. Diagonalisation. Linear systems of recurrence equations. Markov process. Second-order recurrence equations. Macroeconomic models. Vector geometry. Gradient and directional derivative. Tangent hyperplanes and the optimal bundle. Resource allocation and Pareto efficiency. Orthogonal matrices and quadratic forms. Critical points of quadratic functions. Taylor's approximation. Optimisation of functions of two or more variables.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: M Anthony & N Biggs, *Mathematics for Economics and Finance* (Cambridge, 1996); A Ostaszewski, *Mathematics in Economics* (Blackwell, 1993).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA208 Half Unit

Optimisation Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Julia Boettcher

Availability: This course is available on the BSc in Actuarial

Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) is desirable, and students who have not done MA203 should contact the teacher responsible.

Course content: Based on the relevant mathematical theory, the course describes various techniques of optimisation and shows how they can be applied. More precisely, the topics covered are: Introduction and review of mathematical background. Introduction to combinatorial optimisation; shortest paths in directed graphs; algorithms and their running time. Classical results on continuous optimisation: Weierstrass's Theorem on continuous functions on compact set; optimisation of differentiable functions on open sets; Lagrange's Theorem on equality constrained optimisation; Kuhn and Tucker's Theorem on inequality constrained optimisation. Linear programming and duality theory.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Good sources of literature are R K Sundaram, A First Course in Optimisation Theory; N L Biggs, Discrete Mathematics (2nd edition). Additional notes will be made available throughout the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA209 Half Unit Differential Equations

This information is for the 2018/19 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. Real Analysis (MA203) and/or Further Mathematical Methods (MA212) are highly desirable, and students who have done neither MA203 nor MA212 should contact the lecturer.

Course content: The course concentrates on the theory and qualitative analysis of (ordinary) differential equations, although some solution techniques will be considered as well. Special attention will be paid to geometric concepts and the role of differential equations in the theory of dynamical systems. Specific topics covered are: First examples; illustrations of use of the computer package Maple. Existence and uniqueness of solutions. Autonomous 1 and 2 dimensional systems. Linear equations and systems: phase portraits; classification of systems in the plane; higher dimensional systems and higher order equations. Nonlinear systems in the plane: local and global behaviour; linearisation and stability at equilibrium points; Lyapunov functions; limit cycles. Control theory; linear systems; controllability.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full notes will be handed out throughout the course. A good additional text book is D K Arrowsmith & C M Place, Dynamical Systems - Differential Equations, Maps and Chaotic Behaviour. Other books closely related to R Grimshaw, Nonlinear

Ordinary Differential Equations and W A Brock & A G Malliaris, Differential Equations, Stability and Chaos in Dynamic Economics.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA210 Half Unit Discrete Mathematics

This information is for the 2018/19 session.

Teacher responsible: Dr Rachel Kirsch

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 Introduction to Abstract Mathematics, or an equivalent course giving a background in rigorous mathematics.

Course content: This is a course covering a number of concepts and techniques of discrete mathematics. Topics covered:

Counting: selections; inclusion-exclusion; generating functions; recurrence relations. Graph Theory: basic concepts; walks, paths, tours and cycles; trees and forests; colourings. Coding theory: basic concepts; linear codes.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: PJ Cameron, Combinatorics (CUP 1994); NL Biggs, Discrete Mathematics (OUP 2004)

Extensive notes covering the course content will be distributed as well.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA211 Half Unit Algebra and Number Theory

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Anthony COL 3.13

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Abstract Mathematics (MA103) and Mathematical Methods (MA100).

Course content: The aim of this course is to continue (from MA103) the study of abstract algebraic structures. There are two main strands in the course. First, we develop further the theory of groups, using permutation groups as a key example. We investigate the important concepts of normal subgroups and quotient groups. Secondly, we introduce rings, and study factorisation in rings, where we also look at some connections with number theory. Groups: Review of basic group theory; permutations and permutation groups; homomorphisms; conjugation, normal subgroups and quotient groups; the first isomorphism theorem for groups. Rings: basic properties of rings and examples (including polynomial rings, matrix rings, and number rings); subrings, ideals and ring homomorphisms; divisibility in integral domains; greatest common divisors; Euclidean rings and unique factorisation; applications to number theory; principal ideal domains.

Teaching: 20 hours of lectures and 10 hours of classes in the MT.

2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Introduction to Algebra, Peter J Cameron (OUP 1988); Rings, Fields and Groups: Introduction to Abstract Algebra, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA212 Further Mathematical Methods

This information is for the 2018/19 session.

Teacher responsible: Prof Jozef Skokan and Dr James Ward

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available on the BSc in Economics, BSc in Management and MSc in Economics (2 Year Programme). This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should ideally have taken the course **Mathematical Methods** (MA100) or equivalent, entailing intermediate-level knowledge of calculus and linear algebra, linear independence, eigenvalues, diagonalisation, and proficiency in techniques of differentiation and integration.

Course content: This course develops ideas first presented in MA100. It is divided into two halves: calculus and linear algebra. The calculus half explores how integrals may be calculated or transformed by a variety of manipulations, and how they may be applied to the solution of differential equations. This aim is achieved by studying the following topics: Limit calculations. Riemann integral. Multiple integration. Improper integrals. Manipulation of integrals. Laplace transforms. Riemann-Stieltjes integral, to a level of detail dependent on time constraints. The linear algebra half covers the following topics: Vector spaces and dimension. Linear transformations, kernel and image. Real inner products. Orthogonal matrices, and the transformations they represent. Complex matrices, diagonalisation, special types of matrix and their properties. Jordan normal form, with applications to the solutions of differential and difference equations. Singular values, and the singular values decomposition. Direct sums, orthogonal projections, least square approximations, Fourier series. Right and left inverses and generalized inverses.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the MT. 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Useful background texts:

(i) for the calculus half:

Ken Binmore and Joan Davies, Calculus, Concepts and Methods (Cambridge University Press 2002);

Robert C. Wrede and Murray R. Spiegel, Advanced Calculus (McGraw-Hill Education; 3rd edition 2010).

(ii) for the linear algebra half:

Martin Anthony and Michele Harvey, Linear Algebra: Concepts and Methods (Cambridge University Press 2012).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

MA231 Operational Research Methods

This information is for the 2018/19 session.

Teacher responsible: Dr Giacomo Zambelli
Dr Victor Verdugo

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course code and some of its content changed in 2017/18. Previously, the course code was MG211.

Pre-requisites: Mathematics, Statistics and Probability Theory to the level of the courses MA107 Quantitative Methods (Mathematics) and ST107 Quantitative Methods (Statistics) is required. In particular, students should have covered elementary distribution theory and the Poisson Process, and have an elementary knowledge of linear algebra. Students must be prepared to use computer packages when required.

Course content: An introduction to all the main theoretical techniques of Operational Research.

Linear optimisation: from the most basic introduction to sufficient conditions for optimality; duality; sensitivity of the solution; discovery of the solution to small problems by graphical methods, and proof of optimality by testing the sufficient conditions. The transportation problem. Modelling real world problems using linear optimisation.

Various other operational research techniques including: Shortest Paths, Critical Path Analysis, Markov Chains, Stable Matchings, Queueing Theory, Simulation, Inventory Management, Dynamic Programming, Decision Theory, Game Theory.

The course includes an assessed software component. The software used will be "Microsoft Excel" and the add-on packages "LP solve" to solve linear optimisation problems and "@ risk" to perform Monte Carlo simulation.

Full lecture notes are provided.

Teaching: 20 hours of lectures and 20 hours of classes in the MT. 10 hours of lectures, 10 hours of classes and 5 hours of computer workshops in the LT. 3 hours of lectures in the ST. The computer workshops will be non-compulsory.

Formative coursework: Students will be expected to produce 10 problem sets in the MT and 1 project and 5 problem sets in the LT. The formative coursework comprises weekly problem sets. A mock project will be given, similar in format to the summative project, to be carried out by the same groups that will work on the final project. This is meant as a trial run of the group project, with a similar level of work but with no summative mark.

Indicative reading: Comprehensive lecture notes will be provided. The course content largely follows the following textbook:

- F S Hillier, G J Lieberman, Introduction to Operations Research, McGraw-Hill Series in Industrial Engineering and Management Science. Any edition from 7th onward.
- W L Winston, Operations Research, Duxbury Press (2004).
- W L Winston, S C Albright: Practical Management Science, Cengage Learning. 4th edition or later.
- H P Williams, Model Building in Mathematical Programming, Wiley (2013).

Assessment: Exam (80%, duration: 2 hours and 45 minutes) in the summer exam period.

Case analysis (20%) in the LT.

The group project will consist of a case study developed by lecturer and presenting a (simplified version of a) real world problem that is amenable to optimisation and simulation techniques that are taught in the course. The students will need to choose the appropriate techniques, develop a mathematical model, implement it using the software taught in the course, and write a report describing the approach and reporting critically the results obtained from the solution of the model.

The group project will be in randomly allocated groups of 3, and students will need to submit a teamwork evaluation form to assess whether the workload was fair and balanced.

MA300 Game Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Duetting and Prof Olivier Gossner

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: The course emphasise a formal treatment of Game Theory through definitions, theorems and proofs. Some familiarity with a rigorous treatment of mathematics is expected. Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is useful.

Course content: Concepts and methods of game theory with applications to economics. MA300.1: same as for Game Theory I (MA301). MA300.2: Coalitional game theory - central solution concepts with application: the core, Shapley value, stable sets, weighted majority games, market games, stable matching.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 22 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture slides will be provided, as well as references to selected papers. Further reading: R Gibbons, A Primer in Game Theory, 1992; A Mas-Colell, M Whinston, J Green: Microeconomic Theory; M Osborne, A Rubinstein: A Course in Game Theory; M Maschler, E Solan, S Zamir: Game Theory.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA301 Half Unit Game Theory I

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Duetting and Prof Olivier Gossner

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: The course emphasise a formal treatment of Game Theory through definitions, theorems and proofs. Some familiarity with a rigorous treatment of mathematics is expected. Basic knowledge of matrices as covered in Mathematical Methods (MA100) or Quantitative Methods (MA107) as well as some knowledge of probability is useful.

Course content: Concepts and methods of game theory with applications to economics. Game trees with perfect information, Nim. Backward induction. Extensive and strategic (normal) form of a game. Nash equilibrium. Commitment. Zero sum games, mixed strategies. Maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive

games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution. Multistage bargaining.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. Further reading: K Binmore, Playing for Real: Game Theory CUP, 2007; E Mendelson, Introducing Game Theory and Its Applications, CRC 2004.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA303 Half Unit Chaos in Dynamical Systems

This information is for the 2018/19 session.

Teacher responsible: Prof Graham Brightwell

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103) are pre-requisites. It is highly desirable to have also taken the course Real Analysis (MA203).

Course content: Given a function $f: X \rightarrow X$, what is the (iterative) behaviour of $f^n(x) = f(f(\dots(f(x))))$ (f applied n times). What do 'orbits' of f look like - an orbit has the form $x, f(x), f(f(x)), \dots$. Particular emphasis is given to long-term evolution and stability analysis of such systems $f: X \rightarrow X$. We explore connections with so-called fractal sets, which are roughly sets that look the same at any degree of magnification, and may have a dimension which is not an integer. We also discuss chaotic maps f , where $f^n(x)$ cannot be determined if there is any small uncertainty about x . Topics covered: Iteration of discrete maps. Orbit analysis. Contraction mapping theorem. Quadratic maps. Bifurcations. Definition of chaos. Sarkovskii's theorem. Fractal sets.

Teaching: 21 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful, R Devaney, A First Course in Chaotic Dynamical Systems; R Devaney, An Introduction to Chaotic Dynamical Systems; E Scheinerman, Invitation to Dynamical Systems. A fun and interesting read might be Gleick, J., Chaos: Making a New Science.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA305 Half Unit Optimisation in Function Spaces

This information is for the 2018/19 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have attended a course in analysis, ideally Real Analysis (MA203) and a course in Mathematical Methods, ideally Further Mathematical Methods

(MA212).

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. This course develops a geometric approach to those optimisation problems which involve the choice of functions. Applications relevant to Economic Theory are studied. It introduces key methods of continuous time optimisation in a deterministic context, including the Calculus of Variations, Pontryagin's Principle and Bellman's Principle. Specific topics include: Introductory examples. Calculus of variations. Euler-Lagrange Equations. Necessary conditions. Maximum Principle. Transversality conditions. Linear time-invariant state equations. Controllability. Dynamical programming. Applications to Economics.

Teaching: 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: A full set of lecture notes will be provided, based on: A. Sasane, Optimization in function spaces, Dover, 2016; Useful reference text: D. G. Luenberger, Optimization by Vector Space Methods, Wiley, 1969.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA310 Half Unit Mathematics of Finance and Valuation

This information is for the 2018/19 session.

Teacher responsible: Dr Johannes Ruf

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA313 Probability for Finance is required

Course content: Main mathematical ideas in the modelling of asset price evolution and the valuation of contingent claims (e.g., calls, puts); discrete methods will dominate. Introductory treatment of the Black-Scholes continuous-time model. This course introduces a range of mathematical concepts and techniques of modern finance. It considers discrete and continuous time models for the price dynamics of actively traded assets. It develops the basic principles of risk-neutral valuation of contingent claims, such as call and put options. The course contains some elements of stochastic analysis such as Brownian motion, stochastic integration, stochastic change of variable formula, change of probability measures. These analytic tools are used for the pricing of contingent claims in stochastic models of financial markets. Specific topics studied include: one-period and multi-period binomial tree models; the Black and Scholes model; self-financing replicating portfolios; martingales and conditional expectation; Itô calculus; risk-neutral valuation of call and put options in the absence of arbitrage; the Black and Scholes formula; option deltas, gammas, vegas, and other sensitivities.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided. Background texts: T Bjork, Arbitrage Theory in Continuous Time, Oxford Finance, 2004; A Etheridge, A Course in Financial Calculus, CUP, 2002; M Baxter & A Rennie, Financial Calculus, CUP, 1996; P Wilmott, S Howison & J Dewynne, The Mathematics of Financial Derivatives, CUP, 1995; J Hull, Options, Futures and Other Derivatives, 6th edition, Prentice-Hall, 2005. D Lamberton & B Lapeyre, Introduction to stochastic calculus applied to finance, 2nd edition, Chapman & Hall, 2008. S E Shreve, Stochastic Calculus for Finance. Volume I: The Binomial Asset Pricing Model; Volume II:

Continuous-Time Models. Springer, New York, 2004.

Assessment: Oral examination (100%) in the ST.

MA313 Half Unit Probability for Finance

This information is for the 2018/19 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Experience obtained through other Mathematics and Statistics courses is highly desirable.

Course content: The purposes of this course are (i) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (ii) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Markov chains. Convergence of random variables. Conditional expectation and martingales, in the discrete case.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales. J Jacod & Ph Protter, Probability Essentials; A Klenke Probability Theory. A Comprehensive Course.

Assessment: Oral examination (100%) in the ST.

MA314 Half Unit Algorithms and Programming

This information is for the 2018/19 session.

Teacher responsible: Dr Paul Duetting

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Introduction to Abstract Mathematics (MA103), or an equivalent course giving a background in rigorous mathematics.

Course content: Introduction to theory of algorithms and basics of Python programming. Algorithmic thinking: Do you know how to multiply integers? Basic toolkit for the design and analysis of algorithms, and an in-depth study of sorting algorithms: Running time, Recurrence relations, Big-O notation, Correctness, Finite induction, Loop invariants. Optimal comparison sorts, and sorting in linear time. Tour of the most important data structures, fundamental algorithms, and algorithm design techniques: Lists, Stacks, Queues, Hashing. Breadth-first search, Depth-first search, Prim's algorithm, Dijkstra's algorithm, Maximum Flow. Incremental and recursive algorithms, Divide-and-Conquer, Greedy algorithms. A few highlight applications: Web search and PageRank, Crypto

currencies and Bitcoin.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: T H Cormen, C E Leiserson & R L Rivest, *Introduction to Algorithms*, MIT Press 1990 (or 2nd edn, 2001 or 3rd edn, 2009)

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the LT.

MA315 Half Unit Algebra and its Applications

This information is for the 2018/19 session.

Teacher responsible: Prof Jan van den Heuvel

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have passed MA103 Introduction to Abstract Mathematics and, ideally, have taken MA211 Algebra and Number Theory. Students who have not taken MA211 may, in some cases, take the course with the lecturer's permission. (A small amount of additional reading on their part will be required).

Course content: The aim of the course is to continue the study of abstract algebraic structures and show how these structures can be used to solve concrete problems. There are three strands: Group actions; Rings, polynomials and fields; Applications, including coding and cryptography. Group actions; revision of permutation groups; orbits and stabilizers, the orbit-stabilizer theorem; applications to counting problems. Rings, polynomials and fields: revision of rings; quotient rings; polynomial rings and the Euclidean algorithm for polynomials; irreducible polynomials and factorisation of polynomials. fields; fields as quotients of polynomial rings; construction and properties of finite fields: Applications: Designs and orthogonal latin squares ; Error-correcting codes, including linear codes, cyclic codes and perfect codes; cryptography.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Lecture notes will be provided but additional reading is recommended. *Discrete Mathematics*, N L Biggs, (specifically Chapters 20-24, together with some introductory material from earlier chapters). *Introduction to Algebra*, Peter J Cameron (OUP 1988); *Rings, Fields and Groups: Introduction to Abstract Algebra*, Reg Allenby (Butterworth-Heinemann, 2nd edition 1991). *Codes and Cryptography*, D J A Welsh (Clarendon Press 1988). *Codes*, N.L. Biggs (Springer, 2008).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA316 Half Unit Graph Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Rachel Kirsch

Availability: This course is available on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA103 or equivalent course giving a background

in rigorous mathematics.

Course content: This course examines the basic concepts and techniques of graph theory. The topics to be covered are: fundamental concepts, flows, connectivity and matchings, colourings, extremal problems. Optional topics include Ramsey theory, the probabilistic method, spectral graph theory, or matroids.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures in the ST.

Revision Lecture is better received by students in ST

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: D. B. West, *Introduction to Graph Theory*, Prentice Hall 2001. R. Diestel, *Graph Theory*, Springer 2010. N. L. Biggs, *Discrete Mathematics*, OUP 2004. J.A.Bondy and U.S.R. Murty, *Graph Theory with Applications*, North-Holland, 1976 B. Bollobas, *Modern Graph Theory*, Springer 1998.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA317 Half Unit Complex Analysis

This information is for the 2018/19 session.

Teacher responsible: Dr Amol Sasane

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance.

This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Solid grounding in mathematics, especially analysis, in particular MA203 Real Analysis.

Course content: The course will cover the fundamental concepts and methods in complex analysis. The basic objects of study in the course will be complex differentiable functions in domains, and the far-reaching consequences of the notion complex differentiability will be dealt with in the course. The specific topics that will be covered are: the geometry of complex numbers, complex differentiation, Cauchy-Riemann equations, Cauchy's integral theorem and its consequences, Taylor and Laurent series, and harmonic functions. The core results will be illustrated with computational examples and applications.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) S.D. Fisher. *Complex Variables*. Corrected reprint of the second (1990) edition, Dover Publications, Inc., Mineola, NY, 1999.

(2) J.E. Marsden and M.J. Hoffman. *Basic Complex Analysis*. Second edition, W. H. Freeman and Company, New York, 1987.

(3) D.O. Tall. *Functions of a Complex Variable*. Routledge and Kegan Paul, London, 1985

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA318 Half Unit History of Mathematics in Finance and Economics

This information is for the 2018/19 session.

Teacher responsible: Prof Jan van den Heuvel

Additional teachers: Prof June Barrow-Green, Prof Norman Biggs and Prof Robin Wilson

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with

Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100).

General Course students may substitute an equivalent course.

Course content: This course surveys the development of mathematics from the beginning of history with an emphasis on its applications to finance and economics. Major themes are the development of arithmetic and geometry, the use of algebraic symbolism, the creation of the calculus, geometry, probability, and game theory. In order to give this course a distinctive flavour, we will illustrate these themes with examples taken from the social sciences, broadly interpreted. For example, the algorithms of arithmetic will be illustrated by their applications in finance, rather than astronomy.

Teaching: 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students are expected to submit written work on a weekly basis. One of these assignments will be a short essay of 900-1100 words.

Indicative reading: The course is based on source material which will be distributed to students as hard copy. J. Stedall's 'History of Mathematics: A Very Short Introduction' (Oxford 2011) is recommended for background reading.

Assessment: Exam (70%, duration: 2 hours, reading time: 5 minutes) in the summer exam period.

Essay (30%, 1650 words).

The assessed essay is due for submission at the start of the Summer Term.

MA319 Half Unit Partial Differential Equations

This information is for the 2018/19 session.

Teacher responsible: Dr Amol Sasane

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance.

This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Real Analysis (MA203).

Course content: The aim of the course is the study of partial differential equations. The focus will be on first order quasilinear equations, and second order linear equations. The method of characteristics for solving first order quasilinear equations will be discussed. The three main types of linear second order partial differential equations will be considered: parabolic (diffusion equation), elliptic (Laplace equation), and hyperbolic (wave equation). Techniques for solving these for various initial and boundary value problems on bounded and unbounded domains, using eigenfunction expansions (separation of variables, and elementary Fourier series), and integral transform methods (Fourier and Laplace transforms) will be treated. Elementary distributional calculus and the notion of weak solutions will also be considered. Applications and examples, such as the solution technique for Black-Scholes option pricing, will be discussed throughout the course.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: 1 S.J. Farlow. *Partial Differential Equations for Scientists and Engineers*. Dover, 1993.

2 J.D. Logan. *Applied Partial Differential Equations*. Second Edition.

Springer, 2004.

3 W. Strauss. *Partial Differential Equations. An Introduction*. Second Edition. John Wiley, 2008.

Lecture notes will be provided.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA320 Half Unit Mathematics of Networks

This information is for the 2018/19 session.

Teacher responsible: Dr Andrew Lewis-Pye

Availability: This course is available on the BSc in Mathematics and Economics and BSc in Mathematics with Economics. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Introduction to Abstract Mathematics (MA103).

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) D. Easley, J. Kleinberg. *Networks, crowds and markets*, Cambridge University Press, 2010.

(2) M. Newman. *Networks: An Introduction*, Oxford University Press, 2010.

(3) *The Rise of the Network Society, The Information Age: Economy, Society and Culture*, 2010 edition, Manuel Castells.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA321 Half Unit Not available in 2018/19 Measure Theoretic Probability

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Anthony COL 3.13

Availability: This course is available on the BSc in Financial Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Real Analysis (MA203).

Course content: This is a first course in measure-theoretic probability. It covers the following topics. Abstract probability spaces: sample space, sigma-algebra, probability measure, examples. Borel sigma-algebra, Lebesgue measure, Caratheodory's extension theorem. Random variables, distribution functions,

discrete and absolutely continuous distributions, examples. Construction of the Lebesgue integral, relation to "measure-theoretic induction", convergence theorems, further properties, relation to Riemann integral. Different modes of convergence of random variables. Conditional expectation for simple, absolutely continuous and general random variables, construction and properties.

Teaching: 22 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Indicative reading: Comprehensive lecture notes will be provided. The following books may prove useful: D Williams, Probability with Martingales. J. Jacod & P. Protter, Probability Essentials; A. Klenke Probability Theory. A Comprehensive Course

Assessment: Other (100%).

Exam (100%) in the ST.

MA322 Half Unit Not available in 2018/19 Mathematics of Finance and Valuation

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Anthony COL 3.13

Availability: This course is available on the BSc in Financial Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Measure Theoretic Probability (MA321).

Course content: This course provides the mathematical tools of stochastic calculus and develops the Black-Scholes theory of financial markets. It covers the following topics. Continuous-time stochastic processes, filtrations, stopping times, super-, sub- and martingales, examples. Brownian motion, properties, Markov property. Construction of the stochastic/Ito integral, simple integrands, Derivation of Ito's isometry, Ito processes, Derivation of Ito's formula, stochastic differential equations. Changes of probability measure, Radon-Nikodym derivative, Bayes' rule, Girsanov's theorem. Black-Scholes model: self-financing portfolios, fundamental theorem of asset pricing, risk neutral measure, existence of replicating strategies via martingale representation, risk neutral valuation of European contingent claims, Black-Scholes formula, Black-Scholes PDE, Greeks, delta hedging. PDE techniques for pathwise derivatives: barrier and Asian options. Implied volatility, Dupire's formula, local volatility, basic idea of calibration, variations of the Black-Scholes model.

Teaching: 22 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading: Lecture notes will be provided. The following books may be useful. T. Bjork, Arbitrage Theory in Continuous Time, Oxford Finance, 2004; A. Etheridge, A Course in Financial Calculus, CUP, 2002; M Baxter & A Rennie, Financial Calculus, CUP, 1996; P. Wilmott, S. Howison & J. Dewynne, The Mathematics of Financial Derivatives, CUP, 1995; J Hull, Options, Futures and Other Derivatives, 6th edition, Prentice-Hall, 2005. D. Lamberton & B. Lapeyre, Introduction to stochastic calculus applied to finance, 2nd edition, Chapman & Hall, 2008. S. E. Shreve, Stochastic Calculus for Finance. Volume I: The Binomial Asset Pricing Model. Springer, New York, 2004. S. E. Shreve, Stochastic Calculus for Finance. Volume II: Continuous-Time Models. Springer, New York, 2004.

Assessment: Other (100%).

Exam (100%) in the ST.

MA323 Half Unit Not available in 2018/19 Computational Methods in Financial Mathematics

This information is for the 2018/19 session.

Teacher responsible: Prof Martin Anthony COL 3.13

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is not available as an outside option. This course is available with permission to General Course students.

Pre-requisites: Students must have completed Introduction to Pricing, Hedging and Optimization (ST213) and Programming in C++ (MA332).

Course content: Random number generation; the fundamentals of Monte Carlo (MC) simulation; variance reduction techniques for MC simulation and related issues; numerical solutions to stochastic differential equations by means of MC simulation and their implementation; finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: 22 hours of lectures, 5 hours of classes and 10 hours of computer workshops in the LT.

Formative coursework: Students will be expected to produce 5 problem sets and 5 other pieces of coursework in the LT.

Indicative reading: P. Glasserman, Monte Carlo Methods in Financial Engineering, Springer; R.U. Seydel, Tools for Computational Finance, Springer; D.M. Capper, Introducing C++ for Scientists, Engineers and Mathematicians, Springer. M. J. Capinski, T. Zastawniak, Numerical Methods in Finance with C++, Cambridge University Press; M. S. Joshi, C++ Design Patterns and Derivatives Pricing, Cambridge University Press.

Assessment: Exam (75%, duration: 2 hours).

Other (25%) in the ST.

MA331 Half Unit Not available in 2018/19 Practical Optimisation Modelling

This information is for the 2018/19 session.

Teacher responsible: Dr Xue Lu

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Management, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have a knowledge of Mathematics and Statistics to the level of MA107 (Quantitative Methods - Mathematics) and ST107 (Quantitative methods - Statistics), or ST102 (Elementary Statistical Theory). MA231 (formerly MG211) (Operational Research Methods) is not a prerequisite but is advisable to be taken previously or in conjunction with the course.

Course content: Mathematical Optimisation is one of the most powerful and widely-used quantitative techniques for making optimal decisions. The course has a pragmatic focus and aims at enabling students to model and solve real-life management problems. An overview is provided on fundamental technique, most importantly linear and integer programming, emphasising modelling and solution concepts and methods (e.g. feasibility, optimality, duality, multiple objectives, using binary variables for modelling, network models). The students will learn to formalise management problems using linear and integer programming models, to implement these models using specialised optimisation software, and to analyse and interpret the results, reflecting on the limitations of the models.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of classes in the MT. 1 hour and 30 minutes of classes in the LT. 8 hours of computer help sessions in the MT. 2 hours of computer help sessions in the LT. Computer help sessions are optional. Students on this course will have a reading week in Week 6, in line

with departmental policy.

Formative coursework: Students will have the opportunity to submit a mock project for marking and feedback before the final assessed project is due. Students will also be given weekly homework exercises.

Indicative reading: H. Paul Williams: *Model Building in Mathematical Programming*, Fifth Edition, Wiley 2013.
F S Hillier and G J Lieberman: *Introduction to Operations Research*, McGraw-Hill. D Bertsimas and J N Tsitsiklis: *Introduction to Linear Optimization*, Athena Scientific.
A Ravindran, D T Philips, J J Solberg: *Operations Research: Principles and Practice*, Wiley.

Assessment: Project (100%) in the LT.

MG104 Half Unit Operations Management

This information is for the 2018/19 session.

Teacher responsible: Dr David Newton

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: This course provides students with an understanding of the drivers of organisational performance, conditional on a strategic objective. Aspects of Operations Management studied include process flow analysis, inventory management, assembly line balancing; supply chain management; quality management and scheduling.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One formative essay of 2000 words will be set in the Michaelmas Term.

Indicative reading:

- Operations and Supply Chain Management, Jacobs and Chase.
- Strategy and Sustainability: Whelan, Tensie, and Carly Fink. "The comprehensive business case for sustainability." *Harvard Business Review*, (October 2016), n. pag.
- Capacity Management: Pullman, Madeleine, and Svetlana Rodgers. "Capacity management for hospitality and tourism: A review of current approaches." *International Journal of Hospitality Management* 29 (2010), 177-187.
- Process Analysis: Amorim, Marlene, Philip Moscoso, and Alejandro Lago. "Customer participation in services: A framework for process design." *International Journal of Qualitative Research in Services* 2, 1 (2010), 47-61.
- Manufacturing Processes: D'Aveni, Richard. "The 3-D printing revolution." *Harvard Business Review*, May (2015), 40-48.
- Service Processes: Frei, Frances X. "Breaking the trade-off between efficiency and service." *Harvard Business Review* 84, 11 (November 2015), 92-101.
- Six-sigma Quality: Schroeder, Roger G., Kevin Linderman, Charles Liedtke, and Adrian S. Choo. "Six sigma: Definition and underlying theory." *Journal of Operations Management* 26 (2008), 536-554.
- Project Management: Browning, Tyson R. and Ranga V. Ramasesh. "Reducing unwelcome surprises in project management." *MIT Sloan Management Review*, (Spring 2015), 53-62.
- Lean Supply Chains: Bruce, Margaret, Lucy Daly, and Neil Towers. "Lean or agile: A solution for supply chain management in the textiles and clothing industry?" *International Journal of Operations and Production Management* 24, 2 (2004), 151-170.

Assessment: Project (100%, 3000 words) in the LT. Students will be randomly assigned to four-person groups for the summative assessment project.

MG105 Half Unit Organisational Behaviour and Leadership

This information is for the 2018/19 session.

Teacher responsible: Dr Connson Locke

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG203.

Pre-requisites: None

Course content: This course introduces students to social science theories, research and application related to understanding human behaviour in the workplace. That is, this course is about the people side of business and management. Each week focuses on a different topic investigating individual, group, and organisational issues. Organisational behaviour topics include: personality and performance, managerial decision-making, motivating others, fairness in organisations, and the multicultural workplace.

When studying theories of leadership, the course examines: power and influence, the adaptive leader, leadership development, and team leadership.

Teaching: 15 hours of lectures and 9 hours of classes in the LT. 1 hour of classes in the ST.

The Summer Term teaching will be review sessions. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce one presentation and one essay in the LT.

Indicative reading: Colquitt, J.A., LePine, J.A., & Wesson, M.J. (2009) *Organizational Behavior: Improving Performance and Commitment in the Workplace* (International edition).
Yukl, G. (2009). *Leadership in Organizations*. (7th ed.). Englewood Cliffs, NJ: Prentice Hall.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the LT.

MG205 Econometrics: Theory and Applications

This information is for the 2018/19 session.

Teacher responsible: Dr Jordi Blanes i Vidal

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent

Course content: Simple and Multiple Regression; Hypothesis Testing; Mechanics and Limitations of OLS; Causality; Natural, Field and Laboratory Experiments. Panel Data and Fixed Effect Models. Instrumental Variables Regression.

The main aim of this course is to provide a thorough understanding of the quantitative techniques which guide evidence-based managerial decision-making. It seeks to develop a framework in which students can examine whether the predictions of managerial, social or economic theory are supported by empirical evidence. Particular emphasis is made on (a) illustrating the many ways in which evidence is abused in the academic or managerial debate, and (b) trying to establish causality in the relationship between variables. The approach is both formal, as the course makes extensive use of econometric theorems and techniques, and solidly grounded in intuition, as it provides numerous examples of tests of real-life relations. Many of these

examples will be illustrated using the STATA software package, and the students will be expected to learn the basics of data manipulation and regression running. A solid base of introductory statistics and probability (equivalent to that provided by ST107) and introductory algebra and calculus (equivalent to that provided by MA107) will be expected.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 problem sets in the MT and 1 problem sets in the LT. There will be one formative assessment each term.

Indicative reading: The textbook for the course is: James H. Stock and Mark W. Watson, *Introduction to Econometrics*, Second Edition, Pearson, 2007. Two other very useful (complementary) books are: Christopher Dougherty, *Introduction to Econometrics*, Third Edition, Oxford University Press, 2007; Jeffrey M. Wooldridge, *Introductory Econometrics - A Modern Approach*, Third Edition, South-Western, 2006.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG206 Half Unit Firms, Management and Competitive Advantage

This information is for the 2018/19 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Statistics with Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed EC100 OR EC102 OR equivalent.

Course content: This is not a course on corporate strategy. It focuses on the evolution of thinking about firms and the activity of management and examines firm advantages through conceptual ideas and empirical knowledge. There will be an emphasis on analysing firms as reservoirs of resources and capabilities and topics to be covered will include distinctive capabilities of firms, organisational design, decision making in firms, organisational routines, managerial leadership and the role of ethics. Particular attention will be given to firms in technology-based industries and the management of innovation and contrasts will be made with public sector management.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and to do the weekly class exercises

Indicative reading: A reading list will be available to students taking the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG207 Managerial Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Catherine Thomas NAB 5.27

Availability: This course is compulsory on the BSc in Management. This course is available on the BSc in Business Mathematics and Statistics. This course is available as an outside option to students

on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Economics A (EC100) or Economics B (EC102) or equivalent is a pre-requisite. This course cannot be combined with Microeconomic Principles I (EC201) or Microeconomic Principles II (EC202).

Course content: The objective of the course is to provide students with insights from economic theory which are relevant to applications in managerial decision making. The emphasis is on applying microeconomics ideas to solve problems. Topics covered include consumer theory, production, applications to the labour market, market structure, monopoly, oligopoly, product differentiation, pricing, game theory, decision analysis, bargaining, auctions, and asymmetric information.

Teaching: 20 hours of lectures and 8 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to prepare answers to set problems on a weekly basis. Some of this work will be assessed. Assiduous preparation for the weekly tutorials is essential to achieve a good exam performance.

Indicative reading: No textbook covers the whole course but Hal R Varian, *Intermediate Microeconomics with Calculus* (International Student Edition) is the best text book to use for the course. In addition students are advised to refer to T C Bergstrom & H R Varian, *Workouts in Intermediate Microeconomics* (1990), which contains practice problems.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG208 Half Unit Not available in 2018/19 Business Transformation and Project Management

This information is for the 2018/19 session.

Teacher responsible: Dr Susan Scott NAB 3.12

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Projects are the way that organizations manage change. This course aims to critically review the project management landscape with a particular focus on the processes involved in business transformation. It will cover history and foundations of project management, responding to changing environments, governance and control, contracting and relationships, managing risk and organisational learning. The course will focus on issues and challenges raised by business analysis and project management. Example topics of study include: questioning business transformation and projects as a mode of organising; understanding the dynamics and relations involved in IT-enabled business transformation; strategy formation; business process analysis; projects as an organisational form; project escalation; project management approaches and techniques; and change management. To develop students' understanding of project management and provide insight into issues they are likely to encounter in possible future employment as business analysts /project managers students will participate in group work based on a 'real-world' scenarios of business transformation projects. They will also be required to sit a 2 hour exam.

To view the course guide video: http://richmedia.lse.ac.uk/management/20160606_UGcourse_MG208.mp4

Teaching: 20 hours of lectures, 7 hours and 30 minutes of classes and 12 hours of workshops in the LT. 2 hours of lectures in the ST. Students on this course will have a reading week in Week 6, in line

with departmental policy.

Formative coursework: A variety of types of assignments are given for class discussion including exercises and case studies. Written feedback will be given on formative assessment related to the group project and to the examination.

Indicative reading: Maylor, H. (2010) *Project Management* (Fourth Edition). Upper Saddle River, New Jersey: FT/Prentice Hall. Morris, P.W.G., Pinto, J.K. and J. Soderlund (2012) *The Oxford Handbook of Project Management* Oxford: Oxford University Press. Doherty, S. (2008) *Heathrow's Terminal 5: History in the Making*, Oxford: Blackwell. Drummond, H. (1996) *Escalation in Decision-Making: The tragedy of Taurus*. Oxford: OUP.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%, 1500 words) in the LT.

Please note that students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

MG209 Half Unit E-business

This information is for the 2018/19 session.

Teacher responsible: Dr Antonio Cordella NAB 3.30

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course presents an analysis of the management, economics and information systems theories and practices in online business. This is a management information systems course and not a technical course. It is mainly directed at undergraduate students. It focuses on the study of the impact of digital technologies on business strategies and market configurations. Internet-based systems offer new means to operate businesses and to compete in the global marketplace and it is important for future executives and entrepreneurs to understand the economic and managerial implications of these transformations. Students will gain a good understanding of why and how successful companies are taking advantage of e-business, as well as an understanding of the main challenges and risks associated with different e-business models and strategies in a fast changing technological and business environment.

The course is structured into four main sections:

1. Strategic, technological, and economic foundations of e-business
2. E-business and its configurations: B2C and B2B
3. E-business: strategic and organisational challenges
4. Implementation of e-business strategies'

Teaching: 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

A 2 hour revision session will be offered in the summer terms.

Students will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment based on previous exam questions.

Each student will receive feedback on the approach to the question, the structure of the presentation, and the argumentation they have proposed to discuss the assigned question.

Aim of the formative work is to offer students the opportunity to self-evaluate their understanding of the subject, to test their preparation, to help them better understand what are the criteria of assessment, and to help them to better identify what is need to achieve the desiderated outcomes.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG210 Half Unit Corporate Social Responsibility and International Labour Standards

This information is for the 2018/19 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Any social science background

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of business strategy. This course critically evaluates CSR from a number of perspectives, drawing on material from a variety of different disciplines. Students analyse the emergence of CSR, its theoretical basis, the business case for the adoption of CSR programmes, as well as the social impacts of such policies. The opening lectures of the course focus on globalisation and international labour standards, and provide an understanding of how CSR relates to international regulatory institutions such as the International Labour Organisation. Subsequent lectures focus on the different aspects of CSR mentioned above, as well as topics such as comparative CSR. In terms of the impact and design of CSR policies, the course mainly focuses on issues relating to labour standards.

As well as traditional academic readings and case studies, students will critically examine publically available material such as corporate policies and reports. Seminars will follow a mixture of

formats including group activities and presentations. The course will include one interactive lecture from a CSR professional.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Locke, R. (2013) *The Promise and Limits of Private Power: Promoting Labor Standards in a Global Economy*, Cambridge: Cambridge University Press. Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP. Elliot, K.A. and Freeman, R. (2003) *Can Labor Standards Improve Under Globalization?*, Washington D.C.: Peterson Institute for International Economics.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 2000 words) in the ST.

MG212 Half Unit Marketing

This information is for the 2018/19 session.

Teacher responsible: Dr Omar Merlo

Availability: This course is available on the BSc in Accounting and Finance, BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will cover customer behaviour; segmentation, targeting and positioning; product management and diffusion; pricing, placement and promotion; and marketing relationships.

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A formative assignment will be set consisting of one mock exam question. The purpose of the mock exam is to provide - as realistically as possible - a practise session for the final exam.

Indicative reading: Indicative readings: Kotler, P. and Armstrong, G. (2010) *Principles of Marketing*, Pearson, New Jersey. Kotler and Keller (2009) *Marketing Management*, Pearson PrenticeHall. Lambin, J-J, Chumpitaz, R. and Schuiling, S. (2007) *Market Driven Management: Strategic and Operational Marketing*, Palgrave Macmillan.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (40%).

The summative coursework will be a group project. Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

MG213 Half Unit Information Systems

This information is for the 2018/19 session.

Teacher responsible: Dr William Venters

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will cover the role of data, information

and knowledge within management; the evolution of digital management practices; digital business strategy; information systems development and organisational change; big-data; information systems outsourcing; and IT infrastructure including cloud computing, Artificial Intelligence, automation and digital infrastructures.

Teaching: 20 hours of lectures and 9 hours of classes in the LT. 2 hours of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A formative assignment will be set consisting of one mock exam question. The purpose of the mock exam is to provide - as realistically as possible - a practise session for the final exam.

Indicative reading: Indicative readings: Beynon-davies, P. (2013). *Business Information Systems*, Palgrave, London. Galliers, R. and Leidner, D. (2009) *Strategic Information Management*. Routledge, London. Laudon, K and Laudon, J (2013) *Management Information Systems*, Pearson, London.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (40%).

The summative coursework will be a group project. Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

MG214 Half Unit Human Resource Management

This information is for the 2018/19 session.

Teacher responsible:

Jeffrey Thomas

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Organisational Behaviour and Leadership (MG105) or equivalent.

Course content: This course is designed to provide insights into Human Resource Management, especially in a way that appeals to students of management who are quite international in their orientation. After setting the global scene of labour markets, Human Resources and organisational change in the twenty-first century, it then proceeds to look at the management of people in different national contexts. The focus then shifts down to the employment relationship – why firms hire workers and how they strategically manage them. Once workers are hired as employees, we begin to explore how the latter might be motivated and rewarded, and how the design of policies varies across organisations of different types. To help us with this, we usefully draw on key ideas and models from the field of organisational studies that are also a prelude to thinking through the implications for HRM in environments where innovation and technology are prone to rapid change. This then allows us to gain an overview of the potential contribution that HRM can make to the dynamic capabilities of firms generally.

Topic outline

1. The global context of human resources in C21: migration, offshoring, supply chains and MNCs
2. The macro-context (enterprise governance, employer networks, skill and training, and employment relations)
3. Stakeholders in firms and employee management (Corporate Social Responsibility and HR)
4. Cross-cultural management of employees: the complexities and opportunities
5. Firm strategy and international HR alignment
6. Identification of talent gap and solutions (expatriation and repatriation)

7. Global Talent Management (selection, training and development, performance appraisal and management, compensation)
8. Motivation and incentives (theories from Economics and Psychology)
9. Managing HR in cross-border alliances, in particular international Mergers and Acquisitions and Joint Ventures
10. Negotiations in relation to human resource management

Teaching: 15 hours of lectures and 13 hours and 30 minutes of classes in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: A formative assignment will be set consisting of one mock exam question. The purpose of the mock exam is to provide - as realistically as possible - a practise session for the final exam.

Indicative reading: Stahl, G. K., Björkman, I. S., Farndale, E., Morris, S., Paauwe, J., Stiles, P., Trevor, J., & Wright, P. (2011). Six principles of effective global talent management. *MIT Sloan Management Review*, 53(2), 25-32. Locke, R. M., & Romis, M. (2007). Improving work conditions in a global supply chain. *MIT Sloan Management Review*, 48(2), 54-62. Tarique, I., Briscoe, D., and Schuler, R. (2016). *International human resource management: Policies and practices for multinational enterprises* (5th ed.). New York, NY: Routledge. Harzing, A.-W., and Pinnington, A. H. (2015). *International Human Resource Management* (4th ed.). London: Sage Publications. Deresky, H. (2017). *International Management: Managing Across Borders and Cultures: Text and Cases* (9th ed.). London: Pearson. Caligiuri, P. M. (2006). Chapter 9 Performance management in a cross-national context. In Bennett, W., Jr., Lance, C., & Woehr, D. (Eds.). *Performance measurement: Current perspectives and future challenges*. Mahwah, NJ: Erlbaum. Brown, M. P., Sturman, M. C., and Simmering, M. J. (2003). Compensation Policy and Organizational Performance: the Efficiency, Operational, and Financial Implications of Pay Levels and Pay Structure. *The Academy of Management Journal*, 46, 752-762. Giangreco, A., Sebastiano, A., and Peccei, R. (2009). Trainees' reactions to training: an analysis of the factors affecting overall satisfaction with training. *The International Journal of Human Resource Management*, 20(1), 96-111. The course also draws on additional articles from a variety of international journals in the field e.g. *The International Journal of Human Resource Management*, *British Journal of Industrial Relations*, *Harvard Business Review*. Student will also analyse multiple cases from Insead and Harvard Business Publishing.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (40%) in the MT.

Class participation (10%).

The summative coursework will be a group project. Students will have the opportunity to form their own project groups within their allocated class, but the course teaching team will retain the right to make changes to group membership where necessary.

The class participation grade will be assessed upon the quality of the student's contribution to class discussions.

MG228 Half Unit Not available in 2018/19 Managing the Stone-Age Brain

This information is for the 2018/19 session.

Teacher responsible: Dr Satoshi Kanazawa NAB 5.33

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will introduce second- and third-year Management students to the new science of evolutionary psychology and explore the biological and evolutionary foundations of human behaviour. In the first few weeks, various

critiques of and competing perspectives on evolutionary psychology, with regard especially to the relative importance of biological/evolutionary vs. social/cultural determinants of human behaviour and its sex differences will be discussed and debated. In later weeks, an evolutionary perspective will be applied to various topics in management such as organizational behaviour, occupational choice, productivity, and status hierarchy. The study of business and management is currently dominated by economic perspectives, supplemented by sociological and social psychological perspectives, in American business schools. The course will provide a necessary corrective to the dominance of economics perspectives in the study of business and management by providing biological and evolutionary perspectives and thereby throwing a new light on the old problems (and finding potential solutions for them) in organizations and organizational behaviour. The course will provide evolutionary and biological perspectives on management and organizational behaviour. It will introduce the students to the following topics: Principles of evolution; Principles of evolutionary psychology; Sex differences in preferences, values, cognition, emotions, and behaviour; Physical attractiveness; General intelligence; Evolutionary constraints on human behaviour and their relevance to organizational behaviour.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each student will give a class presentation on the week's readings and their presentation will be evaluated by the course instructor and the feedback will be given to the student within one week. During the first few years of the course, mock examinations will be given to the students in order to familiarize them with the anticipated exam contents and format.

Indicative reading: Buller, David J. 2005. *Adapting Minds: Evolutionary Psychology and the Persistent Quest for Human Nature*. Cambridge: MIT Press. [The most comprehensive book-length critique of modern evolutionary psychology to date]. Saad, Gad. (Editor.) 2011. *Evolutionary Psychology in the Business Sciences*. New York: Springer. Nicholson, Nigel. 2000. *Managing the Human Animal*. New York: Thompson Texere. Miller, Geoffrey. 2009. *Spent: Sex, Evolution, and Consumer Behavior*. New York: Viking. Miller, Alan S. and Satoshi Kanazawa. 2007. *Why Beautiful People Have More Daughters*. New York: Penguin. Kanazawa, Satoshi. 2012. *The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One*. New York: Wiley.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG301 Strategy

This information is for the 2018/19 session.

Teacher responsible: Dr Ricardo Alonso NAB 5.31

Availability: This course is compulsory on the BSc in Management. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: Students should have completed Economics A (EC100) or Economics B (EC102) or equivalent, Quantitative Methods (Mathematics) (MA107) or equivalent and Quantitative Methods (Statistics) (ST107) or equivalent, and Economics for Management (MG207) or Microeconomic Principles I (EC201) or equivalent.

Course content: The first half of the course studies how firms compete with each other. More specifically, we will study strategic situations (competition and rivalry, competitive advantage (sources and sustainability), entry and entry deterrence, product differentiation, the role of information in markets, etc.) and formulate decision models of these situations. While the modelling and predictions are based on game theory, we will contrast our findings to real life games according to the growing empirical

evidence.

The second half of the course studies how firms organize and the challenges they face in doing so. More specifically, we study the way managers interact with the different constituencies inside the firm- workers, board members, and other managers- and how those interactions shape the actual design of organizations. It presents, again with a heavy emphasis on the evidence, how the need to motivate organizational members and to coordinate their actions shape the provision of incentives, the allocation of authority, the ownership structure, acquisition and diffusion of knowledge, and patterns of communication.

Beyond the emphasis on the content of the course, the course also aims to be a course where students learn to think critically and analytically. Students will learn to identify trade-offs in how firms behave and the way they organize themselves, and critically evaluate the sources of those trade-offs by appealing to simple models of individual behaviors. Students will learn to read the primary literature, discuss papers in class, interpret the evidence etc. Students will learn to ask questions such as: What is the evidence? What evidence would convince me of the opposite hypothesis?

Teaching: 20 hours of lectures and 9 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT. 2 hours of lectures in the ST.

There will be a reading week in Week 6 in line with departmental policy.

Formative coursework: Formative work such as problem sets and mock exam questions will be set.

Indicative reading: The basic readings for the course will be the lecture notes written by Dr. Alonso. These lecture notes can be complemented with the following additional readings: Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff. The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. Games of Strategy (WW Norton, 3rd edition, 2009) by Avinash Dixit, Susan Skeath and David Reiley. Economics of Strategy (5th Edition) David Besanko, David Dranove, Mark Shanley, Scott Schaefer. (2009). An Introduction to Game Theory (Oxford, 2003) by Martin J. Osborne. Strategic Management, Garth Saloner, Andrea Shepard and Joel Podolny, Wiley, 2000. The Modern Firm: Organizational Design for Performance and Growth, John Roberts 2007.

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Continuous assessment (30%).

Other (10%) in the LT.

For the project students will be required to work in groups.

4 in-lecture multiple choice quizzes (weeks 5 and 11 of the MT and weeks 15 and 21 of the LT)

For the continuous assessment students are required to attempt at least 3 out of 4 in-lecture assessments. Students who attempt all four (4 out of 4) will achieve a mark based on their three highest scores. Students who attempt three in-lecture assessments (3 out of 4) will receive a mark based on the scores in these assessments. Students who attempt less than three in-lecture assessments will receive a mark of 0 for each missed assessment and will receive an overall mark based on their scores in the best three assessments, including any zeroes. Students who fail to attempt any in-lecture assessments (0 out of 4), will be awarded a Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit.

MG302 Half Unit Topics in Management Research

This information is for the 2018/19 session.

Teacher responsible: Prof Diane Reyniers NAB 5.22

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course

students.

Pre-requisites: MG207 or equivalent and MG205 or equivalent.

Course content: This course addresses various topics in management research which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether steeper incentives lead to better performance. The main objective of the course is to enable students to comprehend and critically assess the literature on selected management topics, to evaluate statements in terms of evidence and to detect false reasoning or logic.

Topics vary each year (based on student feedback) but examples are Racial discrimination, Negotiation, the IKEA effect, Placebo effects of price, Leadership.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 2 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two take-home mock exam papers.

Indicative reading: A reading list will be available on Moodle.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG303 Half Unit International Business Strategy and Emerging Markets

This information is for the 2018/19 session.

Teacher responsible: Prof Saul Estrin NAB 4.32 and Dr Christine Cote NAB 4.05

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG307.

Pre-requisites: All students, including BSc Management students, must be in their 3rd year and should have taken Economics A (EC100) or Economics B (EC102), or equivalent.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with

the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concepts such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economies and working with a large variety of datasets and sources. The course will then turn to key topics. These will include the interaction between international trade and investment in the internationalisation choices of MNEs; the emergence of global supply chains; the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 20 hours of lectures and 15 hours of classes in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, "The New Institutional Economies", *Journal of Economic Literature*, 2000; Estrin et. al., "Entry Mode in Emerging Markets", *Strategic Management Journal*, 2009; T. Khanna and K Palepu, "The Future of Business Groups in Emerging Markets", *Academy of Management Journal* 2004.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Project (40%) in the LT.

LT coursework will be a group project.

MG305 Half Unit Innovation and Technology Management

This information is for the 2018/19 session.

Teacher responsible: Dr Jonathan Liebenau NAB 5.14

Availability: This course is available on the BSc in Accounting and Finance, BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive technologies, project escalation, technological disasters. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 15 hours of lectures and 15 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies from the course study pack on Moodle. Formative feedback is provided on class participation.

In addition, students will present an essay plan in preparation for

the final case-based essay, on which formative feedback will be provided.

Indicative reading: J Howells, *The Management of Innovation and Technology*, Sage, 2005; J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006; D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998; M Bauer (Ed), *Resistance to New Technology: Nuclear Power Information Technology and Biotechnology*, CUP 1995; M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999; H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998; C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984; H Drummond, *Escalation in Decision-making: The Tragedy of Taurus*, Oxford University Press, 1996; D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998; J McLaughlin, P Rosen, D Skinner & A Webster, *Valuing Technology: organisations, culture and change*, Routledge, London and New York, 1999; J R Chiles *Inviting Disaster: Lessons from the edge of technology*, 2001; P Hall, *Great Planning Disasters*, 1982; C Sauer, *Why Information Systems Fail: A Case Study Approach*, Alfred Waller, 1993.

Assessment: Exam (40%, duration: 2 hours) in the summer exam period.

Essay (50%, 5000 words) in January.

In class assessment (10%).

MG307 Half Unit Not available in 2018/19 International Context of Management

This information is for the 2018/19 session.

Teacher responsible: Mr Nilesh Dattani NAB5.02

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Statistics with Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with MG303.

Course content: The course aims to apply social science theory to the analysis of the conduct and management of transnational activities; to critically appraise concepts such as globalisation, regionalisation, national competitiveness, transnationality of firms, etc. in the context of international management structures and processes; to delineate the international political, economic, social and legal structures and environments within which the activity of management takes place. The topics to be covered will include: the nature of the contemporary global political economy; the globalisation of business, finance and trade in goods and services; Global competition; the transnational corporation in the global economy; the tension between globalisation and regionalisation; the international trading order; the international monetary regime; the impact of culture on global business; the changing position of the state in the global economy; the new diplomacy of states and firms.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 1 hour of lectures and 1 hour of classes in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to produce one piece of written work and do the weekly class exercises.

Indicative reading: P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy* (7th edn), Sage Publications (2015); R W Griffen & M W Pustay, *International Business: A Managerial Perspective* (8th edn), Pearson Prentice-Hall (2015); O Shenker, Y Luo & T Chi, *International Business*, (3rd edn) Routledge (2015).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG308 Half Unit Simulation Modelling and Analysis

This information is for the 2018/19 session.

Teacher responsible: Dr Alicia Mejia-Salazar

Availability: This course is available on the BSc in Management, BSc in Statistics with Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Elementary statistical concepts and experience of standard computer software is assumed.

Course content: The main characteristic of this course is that it is a hands-on course and of an extremely practical nature. Research shows that 90% of the largest organisations both in Europe and the USA use the techniques taught here to monitor their operations and especially in risk management. The aim of the course is to introduce students to the concepts, techniques and applied aspects of the development and analysis of simulation models. The course will cover two main approaches for modelling problems bound by uncertainty (stochastic behaviour): Monte-Carlo Simulation (static problems) and Discrete Event Simulation (dynamic problems). Topics covered will include: types of uncertainty; types of simulation modelling; sampling methods; the simulation process; structuring problems for simulation; running simulation models; analysing simulation outputs; risk analysis using simulated models; testing and validating simulation models; applications of simulation. Excel modelling is an integral part of Monte Carlo simulation and at the end of the course students will have a sound foundation on how to set up different Excel models. Additional tutorial examples will be provided both throughout the course, and posted on Moodle to help develop this very important skill.

Teaching: 10 hours of lectures and 15 hours of classes in the LT. An Excel help class may be held during reading week in Week 6. Extended office hours to students who need it.

Formative coursework: Three individual or small-group assignments will be required during the course.

Indicative reading: JR Evans & DL Olson (2002) Introduction to Simulation and Risk Analysis. Prentice-Hall: Upper Saddle River, NJ; AM Law (2006) Simulation Modelling and Analysis. McGraw-Hill: Boston, 4th ed.; M Pidd (2004) Computer Simulation in Management Science. Wiley: Chichester, 5th ed.; S Robinson (2004) Simulation - The Practice of Model Development and Use, Wiley: Chichester; D Vose (2008) Risk Analysis - A Quantitative Guide, Wiley: Chichester, 3rd ed.

Assessment: Project (100%) in the ST.

The project will have two components, a written document and an oral examination.

An individual management report (maximum 15 pages – excluding appendix) describing the modelling and results from a simulation study of a realistic decision problem. The problem will be defined by week 5 or 6 of the LT, the project should be completed by the beginning of the ST.

are risks and uncertainties involved in a decision? How can we create options that are better than the ones originally available? Decision making is a central aspect of virtually every management and business activity, including marketing, strategic planning, project management, resource allocation, operations management, and investment. The ability to make better decisions is thus an invaluable part of everyone's toolbox, particularly for rising stars that will be in positions of leadership in the future. It is this ability that will be developed in this course, which introduces students to the use of Risk and Decision Analysis as a form of analytics that integrates hard data and judgments to develop winning strategies. Through this course students will learn how to better understand, represent, communicate and take decisions across many different contexts, both private and public. They will discover the key behavioural traps that prevent smart decisions from being made and the corresponding cutting edge analytical solutions.

The course uses real-world Risk and Decision Analysis applications in organisations and public policy making, and employs several case-studies to build students' skills in decision modelling and analysis. It covers structuring and modelling decisions involving multiple stakeholders and conflicting objectives (multi-criteria decision analysis) as well as uncertainty (decision trees, influence diagrams, and risk analysis). This course is open to anyone with a keen interest towards discovering the vital ingredients to smart decision-making processes.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Two formative assignments:

1. Group project plan presentation (i.e. personal decision context selected, due in week 7)
2. Individual review of an anonymous technical report developed from students who took this course last year. Students will have to review the report by following specific criteria and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the report, indicating sentences or paragraphs that seem out of order, incompletely explained or in need of revision, etc.). This review assignment will help students to improve their reading, writing and collaborative skills. The topic of the project (i.e. a decision making problem to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (i.e. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case. Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. In the individual technical report of the group project, students will have to report on the developed process. This assignment will help students develop their operational problem solving skills by demonstrating their ability to apply a quantitative model to solve a strategic problem, interpret its results, and develop sound recommendations.

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer. Bouyssou, D., Marchant, T., Pirlot, M., Tsoukias, A., and Vincke, P. (2006) Evaluation and Decision Models with Multiple Criteria. Stepping stones for the analyst. Springer, International Series in Operations Research & Management Science, Vol. 86. Von Winterfeldt, D. & Edwards, W. (1986) Decision Analysis and Behavioral Research. Cambridge: Cambridge University Press.

Assessment: Presentation (40%) and other (60%).

The presentation is a group project due in Week 11 of Lent Term.

The other assessment is an individual technical report on the group project due in Week 1 of Summer Term.

MG311 Half Unit Foundations of Behavioural Decision Science

This information is for the 2018/19 session.

Teacher responsible: Dr Simon Bowmaker (visiting senior fellow)

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: It is an advantage to have taken an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research.

Course content: This course introduces students to the foundations of Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by the context in which decisions are faced: is there risk and uncertainty? What has been chosen in the past? Is the decision maker in a positive or negative mood? Is the decision made offline or online, from a "menu" or from memory? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made and the quality of the decision made.

The course is entirely seminar-based, and will alternate teaching with interactive activities designed to experience first-hand the process of deciding, before reviewing behavioural decision theories and evidence from lab and field studies. Teaching will cover experiments and applications across different 'domains' (managerial, policy, organisations, consumer, and even personal, like choice of career or a partner). The aim of the course is to offer a balanced view of the strengths and weaknesses that humans have when making any decision and cover successful interventions of "choice architecture" which are being implemented around the world in private and public organisations to help consumers and the public make it easier to make good decisions without complex systems or support. The assessment will give students the opportunity to apply their skills to spot strengths and weaknesses of a decision of their choosing, as well as to produce a "state-of-art behavioural report" that reviews in a rigorous and scholarly manner the literature and empirical evidence on a specific aspect of the intuitive decision process under scrutiny.

Teaching: 25 hours of classes in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: 1. A short and timed group presentation (after Reading Week). You will work as a group and spot the bias in a real decision that you will select. You will give a brief group presentation of the bias and the mechanism that requires correction (via debiasing or nudging). After the presentation you will receive feedback as a group. This feedback will help you prepare for the summative assessment.

2. Individual review of an anonymous essay (End of LT). Students

will play the role of the "assessor" and review an anonymous behavioural report (submitted by one of the students from a previous year) by implementing the different evaluation criteria which are used in this course. This exercise will help you review your and your course-mates' behavioural reports, and improve your summative assessment.

Assessment: Coursework (100%, 3000 words) in the ST.

Summative (due beginning of ST): The summative assessment will be a 'Behavioural Report' which comprises two parts.

In the first part (no more than 1000 words), you will be asked to report on the decision, the bias and the nudging or debiasing intervention designed by you and your group.

In the second part of the report (no more than 2000 words), you will focus on one of the processes/aspects that you covered in the first part of the essay and complete a scholarly review on it, with reference to behavioural literature, theories and concepts.

The first part of the essay will count for 50% of your mark while 50% will come from the second part. You will be required to provide full essay-style referencing.

Although the summative assignment will take the decision makers' presented in groups, all students will write both parts of the summative essays on their own and will receive an individual mark.

MG312 Half Unit Extreme Organisational Behaviour: Examining behaviour in non-normative organisational contexts

This information is for the 2018/19 session.

Teacher responsible: Prof Jacqueline Coyle-Shapiro

Availability: This course is available on the BSc in Management, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Organisational Behaviour and Leadership (MG105) or equivalent

Course content: Extreme OB seeks to understand atypical forms organisational phenomena. Alternative forms of organisations and unique individual circumstances have become more commonplace in recent years; however, OB theories—designed to apply to "typical" workplace behaviour and contexts—have not kept pace. The emphasis in this course will be on critically evaluating existing OB theories as they relate to extreme forms of workplace behaviour (e.g., workaholicism, pro- and antisocial behaviour) and contexts (e.g., poverty, disasters, military, and hospital). Weekly topics include isolated and high pressure work environments, passion work, virtual and flexible teams.

Teaching: 20 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 pieces of coursework (1 essay outline based on a case study and 1

presentation) in the MT.

Indicative reading: The course relies heavily on journal articles (for example, Academy of Management Journal, Journal of Applied Psychology, Journal of Organizational Behaviour, and Harvard Business Review). An extensive reading list is provided at the start of the course. Indicative readings include: Eikhof, D. R., & Haunschild, A. (2006). Lifestyle meets market: Bohemian entrepreneurs in creative industries. *Creativity and Innovation Management*, 15, 234-241. Green, F. (2004). Why has work effort become more intense? *Industrial Relations*, 43, 709-741. Griffin, M. A., Neal, A., & Parker, S. K. (2007). A new model of work role performance: Positive behavior in uncertain and interdependent contexts. *Academy of Management Journal*, 50, 327-347. Hewlett, S. A., & Luce, C. B. (2006). Extreme jobs: the dangerous allure of the 70-hour workweek. *Harvard Business Review*, 84, 49-59. Johns, G. (2006). The essential impact of context on organizational behavior. *Academy of Management Review*, 31, 386-408. O'Boyle, Jr., E. H., Forsyth, D. R., Banks, G. C., & McDaniel, M. A. (2012). A meta-analysis of the Dark Triad and work behavior: A social exchange perspective. *Journal of Applied Psychology*, 97, 557-579. Perrewé, P. L., Hochwarter, W. A., Ferris, G. R., McAllister, C. P., & Harris, J. N. (2014). Developing a passion for work passion: Future directions on an emerging construct. *Journal of Organizational Behavior*, 35, 145-150.

Assessment: Other (100%) in the LT.

Assessment is based on a 3,000 word Case Study in which students will be asked to identify and describe an example of an "extreme" organisational phenomenon and to use existing theory(ies) to explain it, noting what the theory(ies) can and cannot account for. Students will then be asked to propose a modification to the theory(ies) to make it "fit" the phenomenon better. The Case Study, which will be due at the beginning of LT, will account for 100% of the final grade in this course. The Case Study will be supported by formative feedback from instructors and peers throughout the course, as well as a presentation.

MG315 Half Unit Marketing Action Learning Project

This information is for the 2018/19 session.

Teacher responsible: Dr Haider Ali

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Statistics with Finance, International Exchange (1 Term) and International Exchange (Full Year). This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Core Disciplines II: Marketing, Human Resource Management and Information Management (MG201) or Marketing (MG212).

Course content: This course will build on theoretical concepts taught in the pre-requisites, by applying these theories and concepts to a real-life situation. Working in teams, students will develop a marketing plan for a new product/service launch; from ideation through to marketing research and setting marketing launch budgets, and considering Return on Investment. With support from the course leader, students will get the opportunity to use knowledge gleaned from many management courses to craft a compelling marketing plan. This course will test not only your academic knowledge but also your practical problem-solving skills, resourcefulness, and creativity.

Teaching: 2 hours of lectures in the MT. 10 hours of lectures and 10 hours of classes in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 other piece of coursework and 2 other pieces of coursework in the LT.

- i) One page memo drafting the scope of the project area
- ii) Mid Term Report One – proposing the market segment to be

targeted (based on relative attractiveness)

- iii) Mid Term Report Two – Research Plan

Indicative reading: Malcolm McDonald, *Marketing Plans: How to Prepare them, How to use them*, 7th Edition, Wiley Business Model Generation, Osterwalder & Pigneur, Wiley

Assessment: Project (90%, 5000 words) in the LT.

In class assessment (10%).

The project will be completed in a group. A Group Evaluation Form will be required, where students' comments on their peers can affect the final grade allocated. Please note that project group membership will be allocated by the course leader.

In the last class of the Lent Term students will be required to write, under exam conditions, a reflective piece on the work undertaken by their team and their contribution to it. The precise focus of students' answers will be determined by the question that they have to address.

PB101 Foundations of Psychological Science

This information is for the 2018/19 session.

Teacher responsible: Dr Michael Muthukrishna QUE 3.15

Availability: This course is available to all first and second year undergraduates who are permitted to take an outside option as part of their programme. This course is available to General Course students.

This course will offer students and understanding of how psychology relates to and informs other disciplines concerned with humans and human behaviour. The course is therefore suitable to students enrolled in other programmes who wish to enrich their understanding by drawing on the psychological sciences.

Students should submit a statement to the course convenor, Dr M. Muthukrishna, when they apply to the course. The statement should outline the student's expectations of the course, how it could feed into their current studies and how it could be helpful for their future research or career plans. In light of the statement, requests may be accepted, declined or students may be invited to book an office hour to be sure that PB101 is aligned with their expectations. If students are offered a place on the waiting list, the course convenor will respond within one week to confirm if the request can now be accepted or is declined. Please note that this course is capped at 17 students. You are advised to read the course description before submitting your statement.

Pre-requisites: None

Course content: This course provides an introduction to human cognition and behaviour, addressing foundational topics in psychological science. These foundational topics include key concepts such as evolution, genetics, neuroscience, human evolutionary biology and anthropology, and specific topics, such as perception, memory, heuristics and biases, decision-making, child development, psychopathology, personality and individual differences, emotion, attraction and sexuality, cross-cultural differences, social relations, stereotypes and prejudice, norms and attitudes, social learning, social influence and persuasion, and group processes.

The course will offer an integrated perspective on these topics, investigating the evolution and variation in human psychology over time, across cultures, and over the lifespan. The course will introduce the history of the study of humans and human psychology, offering students the historical context to trends in research. By the end of the course, students will have a broad knowledge of key topics in psychology and related disciplines. Students will be prepared for more in-depth investigations of more advanced topics in later courses.

Students will also understand how psychology relates to and informs other disciplines concerned with humans and human behaviour. The course is therefore suitable to students enrolled in other programmes who wish to enrich their understanding by drawing on the psychological sciences.

Students should submit a statement to the course convenor, Dr

M. Muthukrishna, when they apply to the course. The statement should outline the student's expectations of the course, how it could feed into their current studies and how it could be helpful for their future research or career plans. In light of the statement, requests may be accepted, declined or students may be invited to book an office hour to be sure that PB101 is aligned with their expectations. If students are offered a place on the waiting list, the course convenor will respond within one week to confirm if the request can now be accepted or is declined. Please note that this course is capped at 17 students. You are advised to read the course description before submitting your statement.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. There will be a Reading Week in Week 6 of MT and LT.

Formative coursework: Students will be expected to produce 1 essay and 4 quizzes in the MT and LT.

In order to assess student performance and practice for the summative assessments, students will:

1. Write 1 mini-essay prior to first summative blog post.
2. Four to six pop quizzes of around 10 items will be given to students over the course of the year to help both the lecturer and students assess their progress. These quizzes will probably be administered via Moodle and will be administered quickly at the beginning of a lecture.

Indicative reading: Primary Text: Gray, P. O., & Bjorklund, D. F. (2018). *Psychology* (8th ed.): Worth Publishers. Secondary Text: Henrich, J. (2016). *The secret of our success: How culture is driving human evolution, domesticating our species, and making us smarter*. Princeton, NJ: Princeton University Press. Other Texts and Readings: Laland, K. N., & Brown, G. (2011). *Sense and nonsense: Evolutionary perspectives on human behaviour*: Oxford University Press. Heine, S. J. (2015). *Cultural Psychology*: W. W. Norton. Wilkinson, N., & Klaes, M. (2012). *An Introduction to Behavioral Economics*: Palgrave Macmillan. Henrich, J., Heine, S. J., & Norenzayan, A. (2010). The weirdest people in the world? *Behavioral and Brain Sciences*, 33(2-3), 61-83. Chudek, M., Muthukrishna, M., & Henrich, J. (2015). Cultural Evolution. In D. M. Buss (Ed.), *The Handbook of Evolutionary Psychology* (2nd ed., Vol. 2). Hoboken, NJ: John Wiley and Sons. Muthukrishna, M., & Henrich, J. (2016). Innovation in the collective brain. *Philosophical Transactions of the Royal Society of London B: Biological Sciences*, 371(1690). doi:10.1098/rstb.2015.0192. Students will be expected to read one additional reading from the primary literature per class. These readings will be provided in the course profile.

Assessment: Exam (40%, duration: 3 hours) in the summer exam period.

Other (40%) and other (20%) in the MT and LT.

Students will write two media/blog posts that summarise a key finding in psychology. This will result in more engagement, communication and summarizing of research as well as encouraging them to seek out new findings in the psychological and behavioural science, finding ways to connect these to the real world.

Students will create or edit a Wikipedia or Simple Wikipedia entry on a topic in psychology that is either incorrect, badly described, or missing. This will teach students critical thinking skills, not to take information at face value, and how to communicate research to a smart audience looking for both an overview and details.

The final exam will consist of multiple choice questions plus a short answer section.

PB102 Social Psychology

This information is for the 2018/19 session.

Teacher responsible: Dr Sophie Von Stumm QUE.3.22 (MT) and Prof Bradley Franks QUE.3.03 (LT)

Availability: This course is available on the BA in Social Anthropology, BSc in Actuarial Science, BSc in Social Anthropology and BSc in Sociology. This course is available as an outside option

to students on other programmes where regulations permit and to General Course students.

This course can be taken as an outside option by students on any year of undergraduate degrees, and as an option by students on the General Course. You should check with your department any restrictions they may place on outside options.

Course content: This course aims to provide a thorough introduction to the fundamental topics of social psychology – a branch of psychological science that seeks to understand and explain human behaviours in actual or assumed presence of others. In this course, we will review and critically evaluate socio-psychological explanations and theories of individual, interpersonal and group processes. Here, we will study a wide range of phenomena, ranging from the way individuals perceive and think about the social world, to the way they conceptualize themselves and participate in social groups, to the way that the broader social context influences our thoughts and behaviour. Other topics will include interpersonal attraction, attitudes and attitude change, pro-social behaviour, and human aggression.

A short video on the course is here: <https://youtu.be/cO6bINgn2jQ>

The course offers an essential complement to any degree programme in the social sciences, and it is particularly relevant to any profession that involves dealing with other people. Over the duration of this course, you will develop the knowledge and analytical skills necessary to apply the insights gained from Social Psychology to real-world social issues and to identify effective ways for achieving behavioural and societal change.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to produce two assignments as coursework, one in MT and one in LT. The first assignment comprises of four separate short answers responding to a choice of eight questions, comprising up to 2,000 words in total (i.e. about 300 to 500 words each).

The second assignment is an essay that students write under exam conditions as a 1-hour mock exam. Students will be given three topics, from which they can choose one to prepare and answer the corresponding mock exam question. All formative assignments will be assessed by the class teachers, who will provide detailed feedback to the students.

Indicative reading: Hogg, M. A. and Vaughan, G. M. (2013). *Social Psychology*, 7th edition. Harlow, Prentice Hall. Library catalogue number is HM251 H71 and the book is also available electronically through the library website.

Additional references and a synopsis of lectures and class topics will be made available online in early September, and will also be distributed in the first lecture of the series.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The exam will consist of four short answer out of eight questions, and two essay answers out of six questions.

PH101 Logic

This information is for the 2018/19 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students on the BSc in Philosophy, Logic & Scientific Method and on the BSc in Politics and Philosophy are required to take either this course or PH104. Students on the BSc in Philosophy and Economics who opt to take their logic paper in their first year may take either this course or PH104; those who opt to take their

logic paper in their second year must take PH104 rather than this course. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Arguments and inferences play a fundamental role both in intellectual disciplines and in everyday life. For example, a scientist will test a particular theory by reasoning that if that theory were true then some other claim, one that can be checked experimentally, would have to be true as well. Or a politician will give an argument for a certain migration policy. More mundanely, we reason and draw inferences all the time and our actions are guided by the conclusions we draw. We are so used to this that we are often not even aware of it.

Logic is the study of arguments and inferences – it therefore has an enormously broad scope. Its main task is to give an explicit characterisation of those arguments and inferences that are valid (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion follows from some premises and when it does not. It turns out that, in everyday life, most arguments are far from the ideal of logical validity. However, philosophers should be able to devise arguments that satisfy this ideal.

In view of that, several questions arise:

- 1 What exactly are arguments and inferences and which quality criteria should they satisfy?
- 2 What exactly does it mean that the truth of a statement is guaranteed by the truth of other statements?
- 3 What exactly does it mean that a statement is true (given an interpretation of the language in which it is formulated)?
- 4 Is it possible to find a few manageable inference rules such that, given any valid argument, its conclusion can be derived from its premises using only these rules?
- 5 Is there a general method for checking whether a given argument or inference is valid?

This course provides answers to these and related questions. It begins with a simple system called propositional or truth-functional logic, which despite its simplicity captures a significant range of important arguments. The course then focuses on predicate logic, which is much more powerful and provides the logical basis for analysing a great variety of arguments and theories.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Formative coursework will take the form of a number of quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the quizzes, students are required to complete them before a specific deadline. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination for this course.

Indicative reading: There will be comprehensive lecture slides covering the entire course content. Textbooks whose treatment is close to that adopted in the lectures are: Halbach, V. (2010): *The Logic Manual*. Oxford University Press. Magnus, P.D. and Button, T. (2017): *forallx*: Cambridge. (available online)

Assessment: Exam (100% duration 3 hours reading time: 15 minutes) in the summer exam period.

Availability: This course is compulsory on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available on the BA in Social Anthropology, BSc in International Relations, BSc in Politics, BSc in Politics and International Relations, BSc in Social Anthropology and BSc in Social Policy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None

Course content: At some point in our lives, we are all gripped by deep and fundamental questions. Questions about life, the universe and everything. Philosophers aim to make progress on these questions with clear and precise arguments. In this course, we confront 10 of the big questions:

- (1) Do I know anything?
- (2) Who am I?
- (3) Do I have free will?
- (4) What is consciousness?
- (5) Does God exist?
- (6) What is truth?
- (7) What's the right thing to do?
- (8) What's the best form of government?
- (9) Should I fear death?
- (10) How can I live a meaningful life?

No one has definitive answers to these questions. But understanding the possible answers, and the arguments for and against them, is what philosophy is all about.

By grappling with these questions, you will learn the essential skills of a philosopher. First, you will develop your ability to read philosophical texts, focusing on how to extract and present a philosophical thesis and argument in a clear, logical way. Second, you will develop your thinking skills and analytical abilities by participating in philosophical discussions with your peers. Finally, you will develop your ability to construct philosophical arguments of your own by writing philosophy essays.

The questions of this course are some of the hardest that have ever been asked. We can't promise that you'll feel any closer to knowing the answers at the end of the course than you did at the beginning. But this course will help you understand the big questions, and to think about them in a reflective, philosophical way.

Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the MT. 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the LT.

Parallel to this course, students will take a 5-week writing "Seminar" in **EITHER** Michaelmas Term **OR** Lent Term, but not both. This seminar, called 'Philosophy and Argumentative Writing' (or "PAW"), will provide you with practical advice and exercises to improve your writing style. Students in the BSc in Philosophy and Economics, the BSc in Philosophy, Logic and Scientific Method, and the BSc in Philosophy, Politics and Economics are required to attend (5 hours of workshops in **either** MT **or** LT) and do all assignments. Other students are invited to do so.

Formative coursework: Students will be expected to write one formative essay in MT and two formative essays in LT.

Indicative reading: The readings will be articles and excerpts from books and will be made available via Moodle.

Assessment: Essay (50%, 1500 words) and essay (50%, 1500 words) in the ST.

Your two summative essays will be revised versions of two of your formative essays. Each summative essay will be accompanied by a 750 word **reflective commentary** explaining how feedback and participation in learning activities enabled you to improve your essay. The mark for each summative assignment will depend on both the quality of the essay and the quality of the reflective commentary.

PH103

The Big Questions: An Introduction to Philosophy

This information is for the 2018/19 session.

Teacher responsible: Dr Jonathan Birch

This course is taught by Dr Jonathan Birch, Dr Liam Kofi Bright, Dr Susanne Burri, Professor Christian List and Dr Anna Mahtani.

PH104

Formal Methods of Philosophical Argumentation

This information is for the 2018/19 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics, BSc in Politics and International Relations and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is compulsory on the BSc in Philosophy, Politics and Economics (2nd year). It is compulsory on the BSc in Philosophy and Economics for those students who do not take PH101 in their first year. It is available as a more demanding alternative to PH101 for the BSc Philosophy and Economics (1st year); BSc in Philosophy, Logic and Scientific Method and the BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Students are advised that it is a more demanding alternative to PH101. Only students with facility in formal reasoning (such as employed in mathematics or statistics) are advised to take this course rather than PH101 (where regulations permit this choice).

Pre-requisites: Although there are no formal prerequisites, facility in formal reasoning (such as employed in mathematics or statistics) will be presupposed.

Course content: Deductive Logic. Arguments and inferences play a fundamental role in philosophy, science and many areas of everyday life. The main task of deductive logic is to define in a rigorous way under which conditions the conclusion of a given argument or inference follows logically from its premises. This yields an explicit characterisation of those arguments and inferences that are deductively valid (and hence differentiates them from those that are invalid).

This course provides answers to central questions such as the following:

1. What exactly are arguments and inferences and which quality criteria should they satisfy?
2. What exactly does it mean that the truth of a statement is guaranteed by the truth of other statements?
3. What exactly does it mean that a statement is true (given an interpretation of the language in which it is formulated)?
4. Is it possible to find a few manageable inference rules such that, given any valid argument, its conclusion can be derived from its premises using only these rules?
5. Is there a general method for checking whether a given argument or inference is valid?

The course begins with a simple system called propositional or truth-functional logic, which despite its simplicity captures a significant range of important arguments. The course then focuses on predicate logic, which is much more powerful and provides the logical basis for analysing a great variety of arguments and theories.

Inductive Logic and Probability. In the case of a deductively valid argument, it is utterly impossible that the conclusion is false if the premises are true. However, in practice it is often only improbable that the conclusion is false if the premises are true. In such cases, the premises only support the conclusion to some degree, but their truth would not guarantee the truth of the conclusion. Arguments of this kind are deductively not valid but may still be inductively strong. For example, it does not follow logically from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data) that s/he will die early from smoking-related illness – but it is much more probable that s/he will than if s/he did not smoke. Analysing this type of reasoning leads us to some fundamental issues concerning the notion of probability, which are relevant to many current philosophical debates (e.g. in epistemology, philosophy of science, decision

theory, philosophy of economics, philosophy of physics and various other areas).

Building on the axiomatic development of probability theory (which students may be familiar with from ST107 or ST102), this course focuses on conceptual and foundational topics concerning probability. For example, it is important to distinguish between different concepts ("interpretations") of probability. On the one hand, one can understand probabilities as an agent's subjective degrees of belief. On the other hand, having a certain probability can be understood as an objective feature of events that is independent of what anyone believes. The subjective conception of probability has been developed into a full-blown Bayesian account of confirmation, the essentials of which will also be covered.

Formal Frameworks for Philosophy. In addition to logic and probability theory, the course also covers further formal frameworks and methods that are often presupposed in contemporary philosophical work. It introduces important concepts from set theory and presents formal accounts of possibility and necessity, conditionals, causation, qualitative and quantitative concepts of rational belief as well as preference and utility.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Formative coursework will take the form of a number of quizzes and a number of regular exercises. Both of these will be set on the basis of the material covered in lectures. In the case of the quizzes, students are required to complete them before a specific deadline. In the case of the regular exercises, students are required to complete these and to be ready to present and discuss answers in the associated class; some of these will be formatively assessed by the class teachers. Successful completion of both the quizzes and the regular exercises is regarded as a prerequisite for admission to the examination. For later sections of the course, exercises will include questions requiring brief essay answers.

Indicative reading: There will be comprehensive lecture slides covering the entire course content. Useful but not mandatory background readings include the following:

On Deductive Logic: Halbach, V. (2010): *The Logic Manual*. Oxford University Press. Magnus, P.D. and Button, T. (2017): *forallx*: Cambridge. (available online). On Inductive Logic, Probability and Formal Frameworks for Philosophy: Howson, C. and Urbach, P. (2006): *Scientific Reasoning: The Bayesian Approach*. Open Court. Papineau, D. (2012): *Philosophical Devices: Proofs, Probabilities, Possibilities and Sets*. OUP. Skyrms, B. (2010): *Choice and Chance: An Introduction to Inductive Logic*. Fourth edition. Wadsworth. Various entries in the *Stanford Encyclopedia of Philosophy*. Links will be provided in the lecture slides.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PH201

Philosophy of Science

This information is for the 2018/19 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is compulsory on the BSc in Philosophy, Logic and Scientific Method. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account of confirmation, Bayesianism. Laws of Nature: the regularity view of laws, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton's physics.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to write four essays (two in MT and two in LT), submit a few short answers before each class, and participate in class discussion.

Indicative reading: P Godfrey-Smith: *Theory and Reality: An Introduction to the Philosophy of Science*. C Hitchcock (editor): *Contemporary Debates in Philosophy of Science*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH203

Philosophy of the Social Sciences

This information is for the 2018/19 session.

Teacher responsible: Dr Mattia Gallotti

Availability: This course is available on the BSc in International Relations, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: No formal pre-requisites, but PH103 *The Big Questions: An Introduction to Philosophy* or equivalent is recommended.

Course content: This course examines philosophical problems of social science concerning the nature of social facts and social scientific theory. The first part of the course will focus on traditional questions of scientific method about the nature of understanding and the kind of knowledge the social sciences should, or can, aim for; as well as on questions of ontology pertaining to the nature of the social world and the classic dispute about 'what there is' in society. The overarching goal is to provide an intellectual geography of the philosophy of the social sciences, to which students will refer in the second part of the course when specific philosophical issues will be closely analysed and discussed. Contents to be covered in the second term will be structured around three main themes: action, rationality and intelligibility; the relationship between mind and society; the scope, aim and prospects of critical and normative approaches to social science theory and practice.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to write three formative essays, two in Michaelmas term and one in Lent term. A mock exam will be given near the end of Lent term, with feedback provided. Class presentations may also be required depending on the pedagogical approach adopted by the class teacher.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include: Alex

Rosenberg, *Philosophy of Social Science (Fifth edition)*; Harold Kincaid, *Philosophical Foundations of the Social Sciences*; Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*; Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the LT.

PH213 Not available in 2018/19

Scientific Revolutions: Philosophical and Historical Issues

This information is for the 2018/19 session.

Teacher responsible: Prof John Worrall LAK 3.02

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: No prior systematic knowledge of physical and biological science is presupposed.

Course content: The course examines a number of fundamental issues in philosophy of science, as they arise from instances of important theory-changes (so-called 'scientific revolutions') in the history of science. It is therefore by no means a 'straight' course in history of science: it looks at historical episodes to test and/or illustrate philosophical theses about science and its development.

1. The Copernican revolution: the switch from the Ptolemaic geocentric view of the world to the Copernican heliocentric one was probably the greatest revolution in human thought ever: What justified the switch? Was Ptolemaic theory definitively refuted by the data? Was Copernican theory simpler? Was the Church's view that Copernican theory should only be thought of as an instrument for calculating astronomical data purely theologically motivated or does it have some scientific rationale? What role was played in the eventual acceptance of the Copernican view by predictive success? Do we need to invoke social or other non-intellectual factors to explain why this 'revolution' occurred?
2. Galileo: Galileo and the telescope: are all observations 'theory-laden' and does this mean that there is a subjective element to all theory-choices? Galileo and the argument for his law of free fall: can theories be 'deduced from the phenomena'?
3. The Newtonian revolution: What was the relationship between Newton's theory and Kepler's and Galileo's laws? What does this tell us about theory-change in general?
4. 19th Century revolutions in Optics: the switches from the corpuscular theory to the wave theory of light and from the wave theory to the electromagnetic theory. What do these cases of theory-change tell us about the twin theses of scientific rationality and scientific realism?
5. The Darwinian Revolution: This revolution certainly ranks alongside the Copernican one in terms of its impact on man's view of herself. But debates about the scientific credentials of Darwin's theory began immediately on the publication of Darwin's work and continue to this day. Is Darwinian theory unfalsifiable (or even just one big tautology)? Can 'scientific' creationists explain everything that Darwin can?; What objections were raised by Darwin's critics to particular aspects of Darwinian theory? Were these valid objections and, in so far as they were, have they now been resolved?

Teaching: 10 hours of lectures and 8 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 2 hours of classes in the ST.

Formative coursework: Students will be expected to write two essays per term of 1500 words maximum, and to give class papers.

Indicative reading: Background reading: T S Kuhn, *The Structure of Scientific Revolutions*; Imre Lakatos 'Falsification and the

Methodology of Scientific Research Programmes' in his *The Methodology of Scientific Research Programmes*, Philosophical Papers 1; G Holton (revised by S Brush): *Theories and Concepts in Physical Science*.

Recommended reading: The central text for the first part of the course is T S Kuhn, *The Copernican Revolution*, Harvard University Press; the central text for part 5 is Philip Kitcher: *Abusing Science: the case against Creationism*. MIT Press.

There will be lecture slides on each topic including (i) a list of essential reading and suggestions for further reading and (ii) 'study questions' to guide your thought. Aside from the above reading for the section of the course on the Copernican revolution, reading for particular topics will be in the form of articles and selections from books. These will be made available through a combination of handouts, course pack and the Offprint Collection.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH214 Philosophy, Morals and Politics

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Otsuka LAK.3.03
The course is taught by Prof. Michael Otsuka (weeks 1-5 MT and 1-10 LT) and Dr. Campbell Brown (weeks 6-10 MT).

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: None.

Course content: Michaelmas Term: Morals (Michael Otsuka weeks 1-5; Campbell Brown weeks 6-10)

In **weeks 1-5 of MT**, Michael Otsuka will discuss the following topics in **normative ethics** regarding the morality of harming and saving from harm: **(i)** Should one save the greater number from harm?; **(ii)** Can contractualism justify the saving of the greater number when and only when we ought to?; **(iii)** Should one be solely concerned with how badly off people are, or should one also care about inequality?; **(iv)** Does it make a moral difference that a person is less well off than she could have been? (a.k.a. 'the non-identity problem'); **(v)** Why is it permissible to divert a tram so that it runs over one rather than five, whereas it is impermissible to kill a single individual in order to redistribute his vital organs to save the lives of five? (a.k.a. 'the trolley problem').

In **weeks 6-10 of MT**, Campbell Brown, will provide an introduction to **metaethics**. This branch of philosophy explores the fundamental nature of morality. When we contemplate 'first-order' moral questions – e.g., 'Is torture always morally wrong?' – we are often led to 'second-order', or metaethical, questions. Do first-order questions have objectively correct answers? If one person believes torture is always wrong, while another person denies this, must one of these people be mistaken? Can such disagreements be resolved by rational argument and scientific investigation? Or are these merely 'matters of opinion', where one person's belief is no more or less 'true' than any other's? Can the members of one culture legitimately criticise the moral norms of another culture? If morality is not objective, does it follow that public policy should not be based on morality?

Lent Term: Politics (Michael Otsuka all ten weeks)

Lent Term will be devoted to the topics of **justice** and **legitimacy**. We will begin with the following questions: What does justice require? Does it demand the redistribution of income from rich to poor in order to create a more egalitarian society? We'll discuss the answers to these questions that John Rawls and Robert Nozick have provided. Rawls argues that such taxation is just, since it would be endorsed under fair conditions in which people are deprived of knowledge of whether they happen to be rich or poor,

talented or unskilled. Nozick argues that redistributive taxation is unjust because on a par with forced labour. In addition, we'll consider their answers to the following questions: When it is unjust to constrain the liberties of some in order to prevent harm to others? What sort of equality of opportunity for jobs and university places does justice require? Are people entitled to compensation for historical injustices? What are the just conditions of acquisition of unowned natural resources? In answering the last question, we will also draw on the writings of John Locke, whose related views in his *Second Treatise* on the legitimacy of government we will also consider, along with the Locke-inspired views of Thomas Jefferson.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays in the MT and LT.

Indicative reading: John Taurek, 'Should the Numbers Count?' *Philosophy & Public Affairs*, 6 (1977): 293-316; Derek Parfit, 'Equality and Priority', *Ratio*, 10 (1997): 202-221; Derek Parfit, *Reasons and Persons*; Geoff Sayre-McCord, 'Metaethics', *The Stanford Encyclopedia of Philosophy* <<http://plato.stanford.edu/archives/sum2014/entries/metaethics/>>; Michael Smith, *The Moral Problem*; J.L. Mackie, *Ethics: Inventing Right and Wrong*; John Rawls, *A Theory of Justice*, revised edition; Robert Nozick, *Anarchy, State and Utopia*; John Locke, *Second Treatise of Government*.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the ST.

Class participation (10%).

PH217 Set Theory and Further Logic

This information is for the 2018/19 session.

Teacher responsible: Prof David Makinson, LAK 3.03

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Pre-requisites: Logic (PH101) or Formal Methods of Philosophical Argumentation (PH104), with a grade of at least 65.

Course content: The aim of the course is to familiarize students of philosophy with the essentials of set theory and formal logic. From set theory, the course covers both 'working' set theory as a tool for use in formal reasoning, and also 'conceptual' set theory of philosophical interest in its treatment of infinite sets, cardinals and ordinals. From logic, it begins by reviewing and extending basic material on propositional and first-order logic from both semantic and axiomatic viewpoints, continues with the celebrated limitative theorems of Tarski and Gödel, and ends with introductions to modal, intuitionistic, and relevance logics. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 20 hours of lectures and 10 hours of classes in the LT.

Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one essay on a topic selected from a list or proposed by the student and approved by the instructor.

Indicative reading: Textbooks: Makinson, David *Sets, Logic and Maths for Computing* (2nd edition Springer 2012); Halmos, Paul *Naive Set Theory* (Springer reprint 2011); Sider, Theodore 2010 *Logic for Philosophy* (OUP 2010). Remark: Specific sections of these three texts that are relevant to weekly topics will be indicated on the Moodle page for the course. Complementary reading: Cameron, Peter *Sets, Logic and Categories* (Springer 1999); Crossley, John *What is Mathematical Logic?* (Dover reprint 1991); Goble, Lou ed 2001 *The Blackwell Guide to Philosophical Logic*

(Blackwell). Additional material on special topics (notably Gödel's theorem, relevance logics) will be made available on Moodle.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH220 Not available in 2018/19 Scientific Method and Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Katie Steele

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available to General Course students.

Course content: Policy decisions should be responsive to our best evidence. But what does this mean? How should we negotiate conflicting sources of evidence? And whose responsibility is it to link policy and evidence?

These questions reflect the two main topics of the course.

The first topic concerns the quality, strength and relevance of the available evidence with respect to a given policy question. This is a central issue in the 'evidence-based' policy-and-medicine movement. Are randomised controlled trials really the gold standard? Can evidence be statistically significant without being scientifically or practically significant, and vice versa? What is the role of quantitative versus qualitative evidence in establishing causal claims? How do general causal claims bear on individual cases, and vice versa? Can some evidence be disregarded due to cultural and political biases?

The second topic concerns the roles and responsibilities of scientists, policy-makers and citizens alike in enhancing evidence-based policy making. What does it mean to say that there is a scientific consensus? Does expert knowledge of scientists constitute a threat to democratic processes? What is the 'Precautionary Principle' and does it provide a way forward when there is little evidence available? To what extent should individual rights be compromised to enable scientific research? What issues arise when scientists interpret and measure ethically-loaded concepts like poverty, well-being or bio-diversity? Is science a 'public good' and what does this mean for how it should be managed? Examples referred to in the course are drawn from various areas of science in policy-making, including climate, conservation, international development, poverty, education, and health.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 3 essays and 1 presentation in the MT and LT.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful background readings are: Cartwright, N. and Hardie, J. (2012) *Evidence-Based Policy: A Practical Guide to Doing it Better*; Mackie, J.L. (1980) *The Cement of the Universe*; Howson, C. and Urbach, P. (1993) *Scientific Reasoning: A Bayesian Approach*; Kitcher, P. (2011) *Science in a Democratic Society*; Douglas, H. (2009) *Science in Policy-Making: Objectivity, Values, and Risk*; Stiglitz, J.E. Sen, A. and Fitoussi, J. (2010) *Mismeasuring Our Lives: Why GDP Doesn't Add Up*.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH221 Problems of Analytic Philosophy

This information is for the 2018/19 session.

Teacher responsible: Prof Christian List and Dr Anna Mahtani

Availability: This course is available on the BSc in Philosophy

and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed The Big Questions: An Introduction to Philosophy (PH103).

Course content: Short description: Some central topics in metaphysics, the philosophy of mind and action, epistemology, and the philosophy of language. Topics may vary by year. More detailed description: The aim of this course is to give an overview of some central themes in analytic philosophy, drawn from several areas: metaphysics, the philosophy of mind and action, and the philosophy of language. We will discuss questions such as the following:

Metaphysics: Is "physicalism" – the thesis that everything is ultimately produced by physical processes – philosophically defensible? Are there any features of the world that go beyond physical ones? Is the world deterministic? Could there be true randomness? What is the nature of causation and causal laws? What is the role of time? What is it for one object (or person) to persist through time?

Mind and action: What does it mean to have a mind? What is an intentional agent? How can we make sense of the emergence of human and animal minds against the background of a physical world? What is consciousness, and how does it relate to physical properties?

Language: How do some patterns and noises have meaning? How do some words refer to objects in the world? How do we manage to imply things by what we say? And how can we handle the problem of vagueness?

Our emphasis will be on developing a sharp understanding of key concepts, arguments, and the logical relationships between different ideas, rather than providing an encyclopaedic historical or exegetical coverage. We aim to give students a conceptual toolbox for a rigorous analysis of some classic philosophical questions.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Lectures are taught alongside PH501 postgraduate students.

Formative coursework: Students will be expected to participate actively in their classes and to write 3 formative essays, each with a 2000 word limit. None of these may be a draft of the summative assignment.

Students will also be expected to participate in a workshop, where they will have the opportunity to give a short presentation on their summative essay topic.

Indicative reading: Bertrand Russell, *Problems of Philosophy* (Any Edition); A.P. Martinich & D. Sosa (eds.), *Analytic Philosophy: An Anthology*; David Chalmers, *The Conscious Mind*; W.V.O. Quine, *From a Logical Point of View*; Jaegwon Kim, *Physicalism, or Something Near Enough*; John Searle, *Making the Social World: The Structure of Human Civilization*, William Lycan (2nd Edition): *Philosophy of Language*; Rosanna Keefe, *Theories of Vagueness*; Mark Sainsbury: *Paradoxes*.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH222 Philosophy and Public Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Campbell Brown

This course is taught by Prof. Alex Voorhoeve (weeks 1-5 of Michaelmas Term); Prof. Michael Otsuka (weeks 6-10 of MT); Dr Johanna Thoma (weeks 1-5 of LT); and Dr Campbell Brown (weeks 6-10 of Lent Term).

Availability: This course is compulsory on the BSc in Politics and Philosophy. This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method,

BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should we distribute resources in health care to produce the most well-being overall or should we also aim to limit inequalities?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- Is killing morally worse than letting die?

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT and 1 essay in the LT.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Bogner Iwao Hirose *The Ethics of Health Care Rationing* Routledge
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'
- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethics*.
- John Stuart Mill (1859), *On Liberty*
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH225 Half Unit Business and Organisational Ethics

This information is for the 2018/19 session.

Teacher responsible: Dr Susanne Burri

Availability: This course is available on the BSc in Management, BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option. This course is available to General Course students.

Course content: Some tough-minded people believe that "business ethics" is a contradiction in terms. They argue that business is

like a game where winning means making as much money as possible. These tough-minded people claim that whoever thinks otherwise — whoever thinks that business is also about treating others respectfully — is either naive, or deluded, or both. What people who argue in this way don't usually realise is that they are, in fact, making an argument within business ethics while they are denying that "business ethics" exists. To assert that business is a game where winning means making as much money as possible is to claim that when it comes to business, everyone should, or is at least permitted to, pay attention only to their personal gain. This statement may be correct, or it may be false. But it is definitely an ethical statement, simply because it makes claims about how people may permissibly behave.

In this introductory course to business ethics, we look at different types of ethical theories, and we apply them to problems that tend to arise in business contexts. The primary aim of the course is not to present you with solutions or dogmatic guidance, but to teach you to think critically, so that towards the end of the course, you will no longer be satisfied with simple answers to difficult problems. Participating in this course will help you sharpen your analytical skills. You will also become more experienced at expressing your thoughts clearly and concisely, both in writing and in discussion.

Topics discussed in the context of this course include:

- What are the moral responsibilities of managers? Is Milton Friedman correct that the main purpose of business is to increase profits?
- What, if anything, is wrong with exploitation? If sweatshop workers voluntarily choose to work under bad conditions because it is their best shot at having a decent life, isn't it wrong to outlaw sweatshop labour and rob the workers of this opportunity?
- If you want to live a morally good life, what career should you pursue? Is William MacAskill right that you should consider working for a hedge fund, and then give a large part of your earnings away to charities?
- Do employers have a duty to promote employee happiness? According to the ancient Greek philosopher Aristotle, happiness is the ultimate goal of all human beings. But is everyone responsible for their own happiness, or are employers required to make their employees happy as well?
- To what extent are the large pay packages that CEOs receive justified? What makes a wage fair?

Required readings amount to about two papers per week.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: One essay of 1500 words.

Indicative reading: Carr, Albert Z. (1968): "Is Business Bluffing Ethical?", in *Harvard Business Review*, 46 (1): 143-153. Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", *New York Times Magazine*, Sept. 13. Heath, Joseph (2014): "A Market Failure Approach to Business Ethics", in *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, pp. 25-41. Oxford: Oxford University Press. Moriarty, Jeffrey (2009): "How Much Compensation Can CEOs Permissibly Accept?", in *Business Ethics Quarterly*, 19 (2): 235-250. Zwolinski, Matt (2007): "Sweatshops, Choice, and Exploitation", *Business Ethics Quarterly* 17 (4): 689-727.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH227 Half Unit Genes, Brains and Society

This information is for the 2018/19 session.

Teacher responsible: Dr Jonathan Birch

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to

General Course students.

Pre-requisites: None.

Course content: This course examines, from a philosophical perspective, the ways in which recent developments in genetics and neuroscience challenge our conceptions of what we are – and what we could become.

Topics covered include:

Human nature: Does the concept of 'human nature' have any biological basis? Can we distinguish between those traits which are part of 'human nature' and those which are not? Should we attempt to improve human nature by means of technologies such as gene editing?

Gender and the brain: Are 'sex' and 'gender' the same thing? Are gender categories natural or social? Are there robust psychological differences between men and women? If so, are they explained by genes or by culture? Is gender 'hardwired' into the brain or the product of socialization?

Race and the genome: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of 'race' have a legitimate role in medicine?

Animals and people: What is the evidence for animal sentience? What are the ethical issues surrounding the use of animals in biomedical research? If we could reduce animal suffering through gene editing, should we? If we could replace animal-based meat with artificial meat, should we?

Right and wrong: Has neuroscience shown that morality is more a matter of emotion than reason? Can we use neuroscience to help us choose between ethical theories, or even to help us improve our own moral behaviour?

Teaching: 10 hours of lectures and 10 hours of classes in the LT.
Lectures: Weeks 1 - 10
Classes: Weeks 2 - 11

Formative coursework: A critical analysis exercise (1,000 words)

Indicative reading: Suggested introductory readings: Glover, J. (2008) *Choosing Children*. Fine, C. (2005) *Delusions of Gender*. James, M. (2011) "Race", in the *Stanford Encyclopedia of Philosophy* [online]. Greene, J. D. (2013) *Moral Tribes*.

Assessment: Essay (45%, 1500 words) and wiki entry (10%) in the LT.

Essay (45%, 1500 words) in the ST.

There is no exam for this half-unit. There will be two summative essays, each worth 45% of the final mark. 10% of the final mark will be awarded for contributions to a collaborative wiki.

PH228 Half Unit Emotion, Cognition and Behaviour: Science and Policy

This information is for the 2018/19 session.

Teacher responsible: Adrian Boutel

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the (i) philosophical and (ii) scientific foundations of contemporary cognitive science with a particular focus on its (iii) ethical, social and political implications. No background in either philosophy or cognitive science is required.

Topics covered include:

Folk psychology and its discontents: We tend think of ourselves, and of others, as more-or-less rational instrumental deliberators, choosing actions that further our goals in light of our beliefs. But is this common-sense understanding a good psychological theory? Or is it, at best, a useful heuristic for dealing with something much more complex?

Cognition as computation: Is the brain (like) a computer? Is computation sufficient for thought? Could computers potentially do all the things our minds do?

Dual-process theories: Do our cognitive processes come in 'fast' and 'slow' varieties? Is the mind partitioned into two systems?

Implicit bias: Could we be unaware of our own racial, gender and other biases? If so, are we responsible for the decisions they influence? What can we do about them?

Thought outside the body: Are thoughts wholly 'in the head'? How might they extend beyond it? Will augmented reality paint our minds onto the world?

Happy societies: Should policymakers aim at increasing the happiness of society? What would this mean, and how would we go about it?

Nonhuman thought: Do we share cognitive capacities with animals? What kind of value judgements are involved in answering that question? And if AI is possible, what happens to us when machines can think better than we can?

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Lectures: Weeks 1 - 10

Classes: Weeks 2 - 11

Formative coursework: One formative essay (which may serve as a draft of the summative essay).

Indicative reading: Suggested introductory reading: Crane, T. (2003), *The Mechanical Mind* (2nd ed). Routledge. Kahneman, D. (2011), *Thinking Fast and Slow*. Allen Lane/Penguin. Steele, C.M. (2011), *Whistling Vivaldi: How Stereotypes Affect Us and What We Can Do*. W.W. Norton & Co. Thaler, R. H. and C. R. Sunstein (2008), *Nudge*. Yale/Penguin.

Assessment: Exam (67%, duration: 2 hours) in the January exam period.

Essay (33%, 1500 words).

PH230 Half Unit Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2018/19 session.

Teacher responsible: Dr Bryan Roberts

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective.

Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Weekly short discussion questions submitted are required to prepare for discussion in class.

Indicative reading:

- Norton, John D. (2015) *Einstein for Everyone*.
- Hugget, Nick. (2010)
- Einstein, Albert (1920) *Relativity: The special and general theory*.
- Euclid (1908) *The Thirteen Books of Euclid's Elements*, Vol I.
- Poincaré, Henri (1905) *Science and Hypothesis*.

Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles.

Assessment: Essay (50%, 1500 words) in the MT.

Essay (50%, 1500 words) in January.

PH232 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2018/19 session.

Teacher responsible: Dr Bryan Roberts

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set? The course will proceed at a conceptual level that is suitable for students of all backgrounds.

Teaching: 10 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students are also required to prepare to discuss a few short questions in each weekly class meeting.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- MacKenzie, Donald. *An Engine Not a Camera*, excerpts.
- Malkin, Burton G. *A random walk down Wallstreet*, excerpts.
- Norton, John D. *Einstein for Everyone*, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. *The Physics of Wallstreet* (optional further reading)

Assessment: Essay (50%, 1500 words) in the MT Week 11.

Essay (50%, 1500 words) in the ST.

PH301

Rationality and Choice

This information is for the 2018/19 session.

Teacher responsible: Prof Richard Bradley LAK2.03

Availability: This course is available on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Available only for 4th year students in the BSc. PPE.

Pre-requisites: Students must have completed Formal Methods of Philosophical Argumentation (PH104).

Students must have completed Microeconomic Principles I

(EC201) or Microeconomic Principles II (EC202)

Course content: This course introduces the three main components of rational choice theory: individual decision theory (including probability theory), game theory and social choice theory. Students will become familiar with the kinds of problems and solution techniques (the logical/mathematical machinery) that characterise these areas of rational choice. The primary aim of the course, however, is to philosophically examine the theories in question. To this end we examine the basic assumptions underlying the dominant decision and social choice models, and how these assumptions relate to the role(s) these models are supposed to play in various areas of philosophy (e.g. philosophy of science and ethics) and in the social sciences.

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays and 2 problem sets in the MT and LT.

Indicative reading: Richard Jeffrey, *The Logic of Decision*, Michael Resnik, *Choices: an introduction to decision theory*, Martin Peterson *An Introduction to Decision Theory*, Amartya Sen *Collective Choice and Social Welfare*, Duncan Luce and Howard Raiffa *Games and Decisions*, Wulf Gaertner *A Primer in Social Choice Theory*, J. S. Kelly *Social Choice Theory*. *An Introduction* Allais, M. and O. Hagen (eds.) (1979) *Expected Utility and the Allais Paradox*, Dordrecht; Boston: Reidel Publishing Company. Anand, P., Pattanaik, P. and C. Puppe (eds.) *The Handbook of Rational and Social Choice*, Oxford: Oxford University Press, 2009. Binmore, K. (2009) *Rational Decisions*, Princeton University Press. Broome, John (1991) *Weighing Goods*, Cambridge, Mass., Basil Blackwell. Broome, John (1999) *Ethics out of Economics*, Cambridge: Cambridge University Press. Gärdenfors, Peter, and Nils-Eric Sahlin, eds. (1988) *Decision, Probability, and Utility*, Cambridge: Cambridge University Press. Gilboa, Itzhak (2009) *Theory of Decision Under Uncertainty*, Cambridge: Cambridge University Press. Gillies, Donald (2000) *Philosophical Theories of Probability*. Routledge. Jeffrey, Richard (1965/1983). *The Logic of Decision*. 2nd ed. Chicago: University of Chicago Press. Jeffrey, Richard (1992). *Probability and the Art of Judgement*. Cambridge; New York: Cambridge University Press. Jeffrey, Richard (2004) *Subjective Probability: The Real Thing*. Cambridge; New York: Cambridge University Press. Kreps, David M. (1988) *Notes on the Theory of Choice*. Westview Press. Levi, Isaac (1986) *Hard choices: decision making under unresolved conflict*, Cambridge; New York: Cambridge University Press. Luce, R. Duncan and Howard Raiffa (1957) *Games and decisions: introduction and critical survey* New York, Wiley. Peterson, Martin (2009) *An Introduction to Decision Theory*. Cambridge University Press. Resnik, Michael D. (1987) *Choices: an introduction to decision theory*. Minneapolis: University of Minnesota Press. Savage, L. J. (1954/1972) *The Foundations of Statistics*, 2nd ed, Dover, New York. Sen, A. K. (1970) *Collective choice and social welfare*, San Francisco: Holden-Day. Skyrms, Brian (1999) *Choice and Chance: An Introduction to Inductive Logic*, 4th edition, Belmont: Wadsworth/Thomson Learning

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

The exam will consist of three sections. Section A will contain short questions of a technical nature. Sections B and C will contain longer essay questions

PH311 Philosophy of Economics

This information is for the 2018/19 session.

Teacher responsible: Dr Johanna Thoma LAK 4.02
Dr Campbell Brown

Availability: This course is compulsory on the BSc in Philosophy and Economics. This course is available on the BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics, BSc in Politics and Philosophy and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Economics A (EC100).

Although it is a third-year course, second-year students can take it with permission.

Course content: This course provides a philosophical discussion of the methods and normative commitments of contemporary economics.

The first term will focus on economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread 'irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? The second term will focus on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? When and why are markets desirable? Is paternalism always bad, and does welfare economics really avoid it? How should we resolve collective action problems? What is a fair way to distribute the tax burden?

Teaching: 15 hours of lectures and 10 hours of classes in the MT. 15 hours of lectures and 10 hours of classes in the LT.

Formative coursework: Students will be expected to produce 2 essays and 1 presentation in the MT and 1 essay and 1 presentation in the LT.

Indicative reading: D. Hausman, *The Philosophy of Economics: An Anthology*; J. L. Bermudez, *Decision Theory and Rationality*; J. Cohen and W. Easterly, *What Works in Development: Thinking Big and Thinking Small*; H. Davies, *The Financial Crisis - Who is to Blame?*; D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy, and Public Policy*; D. Gauthier, *Morals by Agreement*; D. Satz, *Why Some Things Should Not Be for Sale*. Additional readings will be made available on Moodle.

Assessment: Exam (65%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

Class participation (10%).

Director, will arrange and chair the bi-weekly discussion with leaders in philanthropy.

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This is 3rd-year level course, open to students from any degree in LSE. Interested second-year students can apply to the lecturer for permission to take the course.

Course content: The course will address key questions in philosophy and social science concerning philanthropy, including:

- Which motives actually drive philanthropy and which motives should drive it?
- What is the nature and extent of our moral obligations to philanthropy?
- Is the proper aim of philanthropy to 'do the most good'?
- How should the good aimed at be conceived of and measured?
- How, if at all, should people's rights and the risks of causing harm constrain the pursuit of the good?
- What are a charitable organisation's duties of accountability towards its stakeholders, that is, the donors, the recipients and its employees?
- Do we need Randomised Controlled Trials as evidence for the efficacy of philanthropic interventions?
- Which career and personal choices should one make in order to further philanthropic aims?
- Which moral principles govern the relationship between the state and private philanthropy? Between corporations and charities?
- What is the role of foundations in support for the arts?
- How should the recipients of aid be represented in media campaigns of charities addressing global poverty?
- What behavioural techniques can be invoked to increase charitable giving and are these techniques respectful of the freedom and autonomy of the targeted donors?

Learning aims:

- Students will learn about key contemporary debates in the ethics of philanthropy through critical engagement with the philosophical literature.
- Students will learn how to use both social science and normative (ethical and methodological) reasoning to assess philanthropic organisations.
- Students will gain knowledge of philanthropy in action via case studies that highlight key methodological and ethical issues and via discussions with professionals with extensive experience of the sector in bi-weekly, supplementary talks and Q&A sessions.

Teaching: 10 hours of lectures, 5 hours of seminars and 10 hours of classes in the MT.

In Michaelmas term: 1 hour lecture per week (x 10), fortnightly 1 hour additional 'philanthropy in practice' guest lecture and seminar with leading figures in philanthropy organised by the Marshall Institute; seminars: 1 hour per week (maximum of 15 per seminar).

Formative coursework: Students will be expected to produce 1 essay in the MT.

This formative essay has a word limit of 1500 words.

Indicative reading: Essential Readings: Peter Singer *The Life You Can Save*, Random House (2009). Jennifer Rubenstein *Between Samaritans and States: The Political Ethics of Humanitarian INGOs*. Assessment: Exam (65%, duration: 2 hours) in the summer exam period.

Essay (25%, 1500 words) in the ST.

In class assessment (10%) in the MT.

PH341

Philosophy, Politics and Economics: Applications

This information is for the 2018/19 session.

Teacher responsible: Prof Alexander Voorhoeve LAK 401

This course will be jointly taught by Prof. Alex Voorhoeve and Dr. Liam Kofi Bright.

Availability: This course is compulsory on the BSc in Philosophy, Politics and Economics. This course is not available as an outside option nor to General Course students.

Available only to fourth-year PPE students.

Pre-requisites: The course will be available only to 4th-year PPE students.

Course content: This course will draw on concepts, theories and findings from Philosophy, Politics and Economics to tackle questions faced by decision-makers in public and private institutions. Each week will focus on a case study. Students will be expected to have had some prior exposure to the issues in previous courses—this course will stand out by being more interdisciplinary, in-depth and practical. Questions covered may include:

1 **Risky public decisions:** Decision theorists speak of risky situations when the decision-maker can assign probabilities to all relevant outcomes of their choices. How should we assess policies such as cancer screening that expose everyone to both a large chance of a small or moderate cost (such as inconvenience or false positive tests) while also saving them from a small chance of a very large harm (such as early death)?

2 **Severely uncertain public decisions:** Decision theorists speak of severely uncertain situations when the decision-maker cannot assign probabilities to all relevant outcomes of their choices. How should we assess policies, such as measures to combat a novel, highly infectious disease, or climate change, in such severely uncertain situations?

3 **Killing some civilians to save others from being killed:** When faced with a threat from terrorists or an unjust enemy, when, if ever, is it permissible for the state to kill innocent civilians in order to save others?

4 **The Resource Curse:** In unstable or grossly undemocratic states, the presence of natural resources often leads to oppression and/or civil war. Should democracies therefore ban the purchase of natural resources from such states?

5 **International reparations:** What, if anything, do the formal imperial powers owe their former colonies?

6 **A market for refugee quotas:** Should countries who do not wish to host refugees be able to pay other countries to take them in, in a "free market" for hosting refugees?

7 **Discrimination and the market:** Some have argued that free markets are good because they will, over time, eliminate discrimination, both because, in markets, people will mix with people of all backgrounds and because they will be judged on the quality of their goods or services alone. How powerful is this case?

8 **Concentration of wealth and economic power:** In many societies, economic power is becoming increasingly concentrated, in two ways: many sectors are dominated by a handful of large firms; and wealth is becoming increasingly unequal. In which ways, if any, is this problematic? What are the implications of this concentration for democracy? Should dominant firms be forcibly broken up? Should inheritance be highly taxed?

9 **Behavioural science and policy:** Do the irrationalities documented by behavioural science legitimate paternalistic nudges, taxation, and subsidies? Does sensitivity of people's answers to how questions are framed make surveys about people's opinions on matters of policy untrustworthy?

10 **Science and society:** Can natural and social scientific expertise be deferred to in a democracy, or is such deference inimical to democratic rule? Which social institutions can ensure that scientists have the right incentives to produce reliable work, rather than fraudulent or unreliable findings? How should we decide which research gets funded?

Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. The lectures will present theories and findings from the three disciplines relevant to the policy issue being studied in that week; they will also give the outline of a real-world case study. Seminars will devote some time to clarifying concepts, theories and findings, but will focus especially on the policy question posed by the case study. Some seminars will involve team debates, in which students are assigned to teams which must argue for a particular solution to the dilemma posed by the case study. Seminars will be taught in 2-hour sessions with all students.

Formative coursework: Students will be expected to produce 3 essays and 2 presentations in the MT and LT.

Students will write three 2,000-word formative essays. Twice, students will be assigned to a debate team, which must together present a case in class for a particular resolution of a policy dilemma. Feedback on these essays and the presentation will help prepare students for the exam and the summative essay presentation.

Oxford University Press (2013), pp. 113-128. An extensive list of required and further readings will be available on Moodle.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (30%, 2000 words) in the ST.

Presentation (10%) in the LT.

Class participation (10%).

PH399

Dissertation in Philosophy

This information is for the 2018/19 session.

Teacher responsible: Dr Marie Milofsky

Availability: This course is available on the BSc in Philosophy and Economics, BSc in Philosophy, Logic and Scientific Method, BSc in Philosophy, Politics and Economics and BSc in Politics and Philosophy. This course is not available as an outside option nor to General Course students.

Course content: The dissertation may be on any topic for which a suitable supervisor in the Philosophy department can be found.

Selection of topic: Candidates should have the subject of their dissertation approved by their supervising member of department.

Arrangements for supervision: The dissertation is an opportunity to do extended independent research and writing and to present this work to one's peers. It should reflect the candidate's own views but must develop out of some established part of the philosophical literature. Students should carefully discuss their topic and approach with their supervisor who will also advise on reading and give feedback on written work. Students must have regular meetings with their supervisor, submit written work regularly, and keep a formal record of their work and progress. Students must also present an early version of their argument to fellow students and will be given feedback on the quality of their presentation as well as on the content of their arguments.

Teaching: 2 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT and 2 essays, 1 presentation and 1 other piece of coursework in the LT.

The formative coursework sets out several steps towards the dissertation: a literature review (due in MT); a first 2,000 words (due in week 1 of LT), a subsequent 3,000 words (which may be in part a revision of the first 2,000 words), due in week 5 of LT; a presentation of the student's arguments in LT; and a full draft of the dissertation, due in week 11 of LT. All written coursework must be submitted by email to both the student's supervisor and the teacher responsible. Students who fail to submit this coursework on time may be barred from submitting the dissertation.

Participation in the weekly seminar and the quality of the presentation will determine 10% of the final mark for the course.

Assessment: Dissertation (90%, 7000 words) in the ST.

Class participation (10%).

Dissertations must be submitted in May 2018, exact date to be confirmed. They should be 5,000-7,000 words, and should be typewritten.

SA100

The Foundations of Social Policy

This information is for the 2018/19 session.

Teacher responsible: Prof David Lewis

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available on the BSc in Politics and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Places on this course are limited to 45 and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the department. If you would like to take SA100 as an outside option, please contact the Undergraduate Programme Manager who will be able to advise you on availability (contact details available on the Social Policy web pages).

This course is not available to third year students.

Course content: The course examines the nature of social provision in different fields of social policy and for different groups of people. This work is contextualised by reference to changes in the role of the state and other providers of welfare, and changes in ideas and key concepts.

The first half of the course examines the development, structure and restructuring of the welfare state; key perspectives on welfare; key concepts, such as social rights; and the organisation of social welfare provision, including the governance and financing of welfare. The second half of the course extends this learning to examine the nature of social provision in different areas of social policy, such as employment, education, housing, health and social care. It focuses on the changing roles and relations between the state, market, third sector, family and individual, and concludes by examining how the welfare state has changed since the 2008 economic crisis and the effects for different social groups. The course develops students' skills in drawing on a range of appropriate literature to support and develop arguments, and in understanding the use of different types of research in social policy analysis.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Additional classes in the reading week (Week 6) to provide support with coursework.

Formative coursework: Students are expected to submit three pieces of written work (one in MT and two in LT), and to read for and prepare contributions to class discussion each week.

Indicative reading: P Alcock, T Haux, M May & S Wright (Eds), *The Student's Companion To Social Policy*, 5th edn, 2016; J Baldock, N Manning, S Vickerstaff and L Mitton (Eds), *Social Policy*, 4th edn, 2011; H Dean, *Social Policy, Short Introductions*, 2nd edn, 2012; C Pierson, F G Castles & I Naumann (Eds), *The Welfare State Reader*, 3rd edn, 2014; M Daly, *Welfare*, 2011. These are introductory texts; a full reading list will be provided in the first lecture of MT.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA101 Sociology and Social Policy

This information is for the 2018/19 session.

Teacher responsible: Professor Lucinda Platt OLD 2.25

Availability: This course is compulsory on the BSc in Social Policy and BSc in Social Policy and Sociology. This course is available on the BSc in Politics, BSc in Politics and International Relations and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Course content: This course introduces students to sociological ideas and thinking and how they link to key social policy issues. The course is organised around six major social policy concerns: gender inequalities; educational opportunity and inequality; class mobility and stratification; social networks and social segregation; neighbourhood deprivation and housing; ethnic and racial inequalities. These are related to key classical and contemporary theoretical perspectives and concepts that have been used to describe and explain them, such as occupational segregation, discrimination, cultural and social capital, institutions, socialisation, identity and belonging, and intergenerational transmission of status, values and resources.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: One essay in the Michaelmas term. An optional additional essay in the Lent term.

Indicative reading: The course will draw on three core texts, as well as academic journal articles: David Grusky, D. and Szelenyi, S. (Eds.) 2011 *The Inequality Reader: Contemporary and Foundational Readings in Race, Class, and Gender*. 2nd Edition. Westview Press; Oxford University Press; Payne, G. (ed.) *Social Divisions*. Third Edition. Palgrave Macmillan; and Platt, L. 2011 *Understanding Inequalities: Stratification and Difference*. Polity Press. For those unfamiliar without a background in Sociology, the following text provides useful background: Fulcher, J. and Scott, J. (2011) *Sociology*, 4th Edition.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period. Essay (25%, 1500 words) in the LT.

different social policy areas, including health care, social care, education and housing. Key concepts include supply, demand and elasticities, externalities and market failure, private insurance and social insurance, and quasi-markets. The course goes on to analyse the distribution of household income and the drivers of poverty and inequality, including unemployment, low wages and wage inequality. It covers concepts of human capital and productivity and looks at a range of policy responses, including minimum wage legislation, trade union policy, government economic management, taxation and the social security system. Throughout, the course emphasises the importance of understanding political goals in assessing the effectiveness or justice of economic and social policies, and seeks to encourage students to draw on both theory and empirical evidence in addressing its core questions. The course is taught without mathematics and is designed to be suitable both for students with no prior knowledge of economics and for those who have taken A level.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour and 30 minutes of classes in the ST.

Formative coursework: Students will be expected to complete exercises as required for classes and will write up to three formative essays during the course of the year.

Indicative reading: J Le Grand, C Propper & R Robinson, *The Economics of Social Problems*, Fourth Edition, Palgrave, 2008; A B Atkinson, N Barr, *Economics of the Welfare State*, Fifth Edition, OUP 2012; J Le Grand, *The Other Invisible Hand Delivering Public Services through Choice and Competition*, Princeton, 2007; H Glennerster, *Understanding the Finance of Welfare*. The Policy Press, 2009; J Hills, *Inequality and the State*, OUP, 2004; J Hills, *Good Times, Bad Times: The Welfare Myth of Them and Us*, The Policy Press, 2014; A B Atkinson, *Inequality: What Can Be Done?* Harvard University Press, 2015.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA201 Research Methods for Social Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Amanda Sheely OLD.2.52

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to give students a comprehensive introduction to methods of social research in social policy.

The design and analysis of social policy research. The nature of social measurement. The concept of statistical inference. Data collection by means of social survey, depth interviews, participant observation and documentary methods. Descriptive and inferential statistics, including bivariate and multivariate techniques. Analysis of data particularly from surveys. The use of computers in data analysis. Ethics and politics of Social Policy Research. Strengths and weaknesses of commonly used research methods. Methods of analysing qualitative data.

Teaching: The course combines two elements:

SA201.2 Research Methods for Social Policy: Dr A. Sheely
MT Lectures: 10 x 1hr SA201.2. Classes: 10 x 1.5 hr SA201.2.

SA201.1 Data Analysis for Social Policy: Dr A. Sheely
Lectures: 9 x 1hr SA201.1. 1x 2hr SA201.1 Classes: 10 x 1.5 hr SA201.1.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 piece of coursework in the LT. For SA201.2, students will submit a critique of an assigned research article.

SA104 Social Economics, Politics and Policy

This information is for the 2018/19 session.

Teacher responsible: Prof Stephen Jenkins OLD 2.29

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available on the BSc in Politics and BSc in Politics and International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Places on this course are limited to 45 and priority is given to Social Policy students in the first instance. If places remain available once Social Policy students have been accommodated, they will be offered on a first come first served basis to students from outside the Department. If you would like to take SA104 as an outside option, please contact the Undergraduate Programme Manager who will be able to advise you on availability (contact details available on the Social Policy web pages). This course is not available to third year students.

Pre-requisites: No prior knowledge of economics is required.

Course content: This course provides an introduction to the economics of social policy and the economics of the income distribution. The course begins by introducing basic economic concepts and principles and discussing their application to

For SA201.1, students will create and present a poster that outlines the design of their research study, including an overview of the literature, their research question, qualitative and quantitative sampling and data collection strategies, and ethical considerations.

Indicative reading: Alan Bryman (2012) *Social Research Methods*, 4th edition Oxford University Press; Alan Acock (2016) *A Gentle Introduction to Stata*, 5th edition Stata Press; Charles Wheelan (2014) *Naked Statistics: Stripping the Dread from the Data* W&W Norton & Company, Inc.

Assessment: Essay (30%, 2000 words) in the MT. Essay (70%, 5000 words) in the LT.

The first assignment asks students to apply their learning from the Michaelmas Term to critique three research articles. This critique will include identifying the methods used, their appropriateness to the particular questions being addressed, the sample and measurements used and the validity of the conclusions reached. Students will also be expected to synthesise findings across articles in order to justify the qualitative and quantitative research questions that they will explore in LT. The coursework will be due at the end of Michaelmas Term.

For the second assignment, students will design and carry out a small mixed-methods research study related to a given topic. In the essay, students will describe and justify their choice of research methods for both the qualitative and quantitative components of the project (research question, sampling, data collection, data analysis, and ethical considerations). The assignment also includes the presentation and discussion of results from the research study.

SA204 Education Policy

This information is for the 2018/19 session.

Teacher responsible: Prof Anne West OLD.2.30

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course provides an introduction to the main issues in educational policy. It draws on interdisciplinary research literature and focuses on contemporary Britain although there is a comparative and international component. The course aims to show how major concepts in social policy can be applied to the study of education, for example, inequality, social justice and distribution of resources. The course focuses on broad issues of educational policy, including the 1944 Education Act, the 1988 Education Reform Act, the 1998 School Standards and Framework Act and the 2010 Academies Act. It also explores specific issues that have implications for equality of opportunity, equity and social justice: social class, ethnicity/ 'race' and gender, special educational needs/disability and financing education across different phases of education – early years, schools and higher education.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One formative essay in MT and one formative essay in LT.

Indicative reading: Some introductory texts are recommended: Chitty, C. (2014) *Education Policy in Britain*, Basingstoke: Palgrave Macmillan. A comprehensive bibliography will be provided.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA217 Psychology of Crime and Criminal Justice

This information is for the 2018/19 session.

Teacher responsible: Dr Michael Shiner OLD.2.34

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course examines the contribution that psychology has made to our understanding of crime and criminal justice. It explores what psychological theory and research have to tell us about the causes of crime and the ways in which we respond to such behaviour.

Particular attention is paid to the development of individual criminality and criminal careers; drug and alcohol related crime; varieties of criminal behaviour including violence, sexual crime and stalking; mental disorder and crime; victims and victimisation; public attitudes towards punishment; public confidence in the criminal justice system; prejudice and discrimination; organisational dynamics and institutional change; offender profiling and criminal investigation; eye witness testimony and legal decision making; rehabilitation and imprisonment.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT.

There will be a reading week in the MT and LT. In addition one revision class will take place in the ST.

Formative coursework: One essay per term (MT and LT) will be required.

Indicative reading: J.R. Adler and J.M.Gray, *Forensic Psychology: Concepts, Debates and Practice*, 2010; PB Ainsworth, *Psychology and Crime: Myths and Reality*, 2000; J.Brown and E.Campbell, *The Cambridge Handbook of Forensic Psychology*, 2010; C.R. Hollin, *Psychology and Crime: An Introduction to Criminological Psychology*, 2013; J McGuire, *Understanding Psychology and Crime*, 2004 F. Pakes and J. Winstone, *Psychology and Crime: Understanding and Tackling Offending Behaviour*, 2007.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA218 Not available in 2018/19 Criminological Perspectives

This information is for the 2018/19 session.

Teacher responsible: Dr Leonidas Cheliotis, OLD M.22

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course critically analyses the key features of a broad range of theories developed to explain patterns of social order in society and to illuminate the nature of the 'crime problem'. It will additionally consider the theories of punishment from the late eighteenth century to the present day.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

In Weeks 6 of MT and LT there will be a reading week.

Formative coursework: Two essays will be required. Students will be expected to do the reading associated with the classes and may be asked to give one presentation per term.

Indicative reading: Newburn, T (2012) *Criminology*, London: Routledge, 2nd ed; Newburn, T. (2009) *Key Readings in Criminology*; McLaughlin, E. et al (2012), *Criminological Perspectives*; Tierney, J (2009) *Criminology: Theory and Context*; Burke, R H (2013) *An Introduction to Criminological Theory*; Downes, D and Rock, P (2011) *Understanding Deviance*; Maguire,

M, Morgan, R and Reiner, R (2012) *The Oxford Handbook of Criminology*, 2012, 5th ed; McLaughlin, E and Newburn, T (2013) *Sage Handbook of Criminological Theory*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA219

Comparative and International Social Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Timo Fleckenstein OLD.2.60

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Pre-requisites: This course is available to students on other degrees who have completed Foundations of Social Policy (SA100).

Course content: The course introduces the comparative method in social policy research as well as the main analytical approaches to understanding social policy developments. It provides an overview of social policies in different areas of the world and enables students to identify global pressures on national policy environments. The course also examines the impact of key international and supranational institutions on social policy-making. It investigates the welfare and work nexus from a comparative perspective.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of classes in the MT. 10 hours of lectures and 15 hours of classes in the LT. 1 hour of classes in the ST.

Formative coursework: Students are expected to submit one piece of non-assessed written work and are expected to read for and prepare contributions to class discussion each week.

Indicative reading: K Armingeon & G Bonoli (Eds), *The Politics of Post-Industrial Welfare States* (2006); F Castles, *The Future of the Welfare State* (2004); J Clasen, *Reforming European Welfare States* (2004); B Deacon, *Global Social Policy and Governance* (2007); I Gough & G Wood (Eds), *Insecurity and Welfare Regimes in Asia, Africa and Latin America* (2004); L Hantrais, *Social Policy in the European Union* (2007); J Lewis, *Work-Family Balance, Gender and Policy* (2009); P Taylor-Gooby (Ed), *New Risks, New Welfare* (2005).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA221

Poverty, Inequality, and Social Policy

This information is for the 2018/19 session.

Teacher responsible: Professor Amanda Sheely, OLD.2.52

Availability: This course is available on the BSc in Environment and Development, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will examine the definition, measurement and causes of poverty and social disadvantage in general and analyse selected aspects drawn from the following: social and demographic change, gender and ethnic inequality, unemployment, worklessness, social security and poverty, area deprivation, educational inequality, and social exclusion. This course draws primarily on examples from the United Kingdom, the United States, and Western Europe.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: As preparation for the exam, students will be asked to write a response to an exam question from a prior year. This response will be due the first week of Lent Term. In Lent Term, students will also be asked to prepare an outline response to the summative coursework. This will be due in reading week of Lent Term.

Indicative reading: A detailed list will be provided at the start of the session. H Dean & L Platt (2016) *Social Advantage and Disadvantage* Oxford University Press; J Hills (2014). *Good Times, Bad Times: The Welfare Myth of Them and Us* Policy Press; AB Atkinson (2015) *Inequality: What Can Be Done?* Harvard University Press; S.P. Jenkins (2011) *Changing Fortunes: Income Mobility and Poverty Dynamics in Britain* Oxford University Press; T. Shildrick, R. MacDonald, C. Webster, & K Garthwaite (2010). *The Low-Pay, No-Pay Cycle: Understanding Recurrent Poverty* Joseph Rowntree Foundation.

Assessment: Exam (50%, duration: 3 hours) in the summer exam period.

Essay (50%, 2000 words) in the LT.

SA223

Health and Social Care Policy

This information is for the 2018/19 session.

Teacher responsible: Dr Tania Burchardt 32L 3.30

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course equips students with the concepts, tools and knowledge to understand the challenges of health and social care policy in the 21st century, in the differing contexts of the UK and other rich countries, and in low- and middle-income countries.

In the first term, we consider the fundamental aims of health and social care policy, including health and well-being, health inequalities, health promotion, and health as a human right. We then examine policy approaches and healthcare regimes across different country contexts, including the strengths and weaknesses of different models of healthcare financing, public and private.

In the second term, we move on to think about how to bring about change - both change in people's behaviour through health education, 'nudge' and incentives, and change in health and social care systems, including an examination of the role played by global pharmaceutical and healthcare companies, and the potential for reform. We investigate the role that evaluations of health and social care play in shaping policy change. Finally, we turn to specific groups and needs, including the challenges and potential of ageing, paying for and providing long-term care, mental health policy, child protection and health.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: One essay of 1000 words (excluding references).

Indicative reading: There is no course textbook. A list of selected texts and readings will be included in the reading list which will be made available at the start of the term. Venkatapuram, S. (2011) *Health Justice: an argument from the capabilities approach*. Polity Press. European Commission (2013) *Health inequalities in the EU – Final report of a consortium*. Parkhurst, J (2017) *The politics of evidence: from evidence-based policy to the good governance of evidence*. Routledge

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA224

Introduction to Global Population Change

This information is for the 2018/19 session.

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Environment and Development, BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is also an option for third year students in social policy and outside the department, where the regulations permit.

Pre-requisites: As a general introduction to Population Studies, it assumes no previous knowledge of the subject.

Course content: The course is concerned with inter-relationships between the population characteristics of a society (fertility, mortality and migration) and their economic and social context. Both the causes of population change and their consequences are examined. The approach of the course is comparative across time and space: it covers population issues across the developed and developing world, and examines trends over time in both regions. The course will address key global debates which include: is population growth sustainable; what is the relationship between population size and available resources; what are the social, biological and economic influences on population growth rates, especially the role of famine, disease and war. What role have family planning programmes in decreasing population size; is ageing a threat. A wide range of topics is covered, including the demographic and health transitions; HIV/AIDS; fertility decline; the changing characteristics of the family; global trends in population ageing and their social and economic consequences for the elderly; theories and trends in migration; urbanisation.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour and 30 minutes of lectures and 1 hour of classes in the ST.

Formative coursework: Students are expected to prepare at least one class presentation per term and complete two mock exams (one in each of LT and ST).

Indicative reading: Detailed reading lists are provided at the beginning of each term. Key overview texts include: M Livi-Bacci, *A Concise History of World Population*; H Jones, *Population Geography*; E A Wrigley, *Population and History*; W Lutz, *The Future Population of the World*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA302 Not available in 2018/19

Assessing Social Progress

This information is for the 2018/19 session.

Teacher responsible: Prof Stephen Jenkins OLD2.29

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and

Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Demonstrated familiarity with research methods to at least the level of SA201 (Research Methods for Social Policy) or equivalent.

Course content: The course aims to facilitate student understanding of key issues in assessing social progress. 'Assessing' is shorthand for developing a critical understanding of the relevant concepts and their policy relevance, practical issues associated with data collection and monitoring, and the policy implications of different findings. 'Social progress' is shorthand for 'are we getting better off'? There are many potential benchmarks that could be used for answering this question: comparisons with the past, with other countries, or with some absolute standards (e.g. meeting some basic needs). And at the personal level, one might compare one's self relative to other people within your 'society'. There are multiple domains that are relevant too: ranging from conventional summary measures such as income to life satisfaction and happiness, employment, health, housing and education. Much information about 'social progress' already incorporated in official statistics (from national and international agencies), and in more specialist academic analysis. But other interpretations of what social progress exist and are not routinely incorporated in existing monitoring exercises, and some say they should be. The course aims to reflect this diversity – to critically analyse both existing approaches and others that have been proposed. The course starts with relatively conventional approaches to assessment including macroeconomic indicators such as GDP and cross-national comparisons, income and work, and then considers newer approaches and related measures. The course also considers progress in several specific life domains. For each of the topics considered, the course addresses a specific question relating to social progress. In providing answers to the question, the course considers, from a critical perspective, relevant analytical approaches, data sources and empirical findings, and also discusses policy implications.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures in the ST.

Formative coursework: Two formative essays (one in MT and one in LT).

Indicative reading: Atkinson, A. B. (1995). *The Economics of Inequality*, 2nd edition. Oxford: Clarendon Press. Cribb, J., Hood, A., Joyce, R., and Phillips, D. (2013). *Living Standards, Poverty and Inequality in the UK: 2013*. Report R81. London: Institute for Fiscal Studies. <http://www.ifs.org.uk/comms/r81.pdf>. OECD (2013). *How's Life? Measuring Well-Being*. Paris: OECD. Available as e-book to LSE members via LSE Library Catalogue. http://www.oecd-ilibrary.org.gate2.library.lse.ac.uk/economics/how-s-life_23089679. See also 2011 edition. Next edition due October 2015. ONS (2011) *Measuring National Well-Being: Measuring What Matters*. <http://www.ons.gov.uk/ons/guide-method/user-guidance/well-being/index.html>. Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SA303 Half Unit

Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2018/19 session.

Teacher responsible: Dr Timothy Hildebrandt OLD 2.56

Availability: This course is available on the BSc in Social Policy,

BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. Sexuality is a central part of human experience. Institutions created to deal with human life/wellbeing have considered sexuality as one of the reference points from which to regulate social relations. Perceptions on sexuality are formed in the intersection of socio-political, historical processes and everyday practices in particular societies. Particular perceptions of sexuality in turn influence the way people negotiate access to resources to address their well-being. In some central areas of social policy sexuality is used as one of the sorting mechanisms (in addition to gender, race among various other categories) to establish entitlements for resources (social, political and economic). In this regard social policy is both informed by perceptions on sexuality and in turn social policy acts as a mechanism of social reproduction of these perspectives impacting people's lives. And while globally high profile cases and rights abuses related to sexuality are important, a narrow global policy focus on these overlooks how more embedded and diverse social policy practices related to sexuality are impacting people's lives in many developing countries. This course aims to explore sexuality and its importance for social policy for developing countries. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. The lectures for this course 10 X 60 min lecture will be joint lectures with MSc students who are taking SA4K2 as an option course. There will be a designated UG seminar for UG students 10 x 90 mins seminars in LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Aggleton, P., Boyce, P. and Moore, H. (2012) *Understanding Global Sexualities*. New Frontiers. London: Routledge; Butler, J. (1990) *Gender Trouble: Feminism and the Subversion of Identity*. New York: Routledge; Canaday, M. (2009) *The Straight State: Sexuality and Citizenship*. (2011) *African Sexualities: A Reader*. Pambazuka Press. Additional readings for each week are available on Moodle.

Assessment: Policy memo (100%).

SA304 Half Unit

Migration: Current research, critical approaches

This information is for the 2018/19 session.

Teacher responsible: Dr Isabel Shutes OLD 2.58 and Prof Emma Platt OLD 2.25

Lectures will be given by Dr Isabel Shutes and Professor Lucinda Platt, both active researchers in migration studies. Classes will also be taken by either Dr Shutes or Prof Platt.

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This interdisciplinary course addresses contemporary global migration issues in migration, with reference to both developing and developed country contexts. It analyses international migration patterns and forms of migration, analysing how migrants and migration are constructed in relation to citizenship, social and public policy, and in research, as well as how these understandings are gendered. It addresses stratification and inequalities within migrants according in terms of access to citizenship and forms of welfare. It considers the relationship between migration and social policy and the implications of migration for social and public policies.

Teaching: 10 hours of lectures and 15 hours of classes in the MT. Each week, all students are expected to read one key text (or sometimes two short texts) in preparation for the class and to participate actively in discussions. This will be complemented by class activities picking up on other issues covered in the lecture and class questions.

A longer list of complementary readings (and other materials, including podcasts, lectures, reports, maps and interactive materials) that students are encouraged to engage with will also be supplied. They will also be expected to use these in the formative and summative essays.

A Moodle discussion forum specifically for the undergraduate students on the course, will be used to share thoughts and relevant material.

Undergraduate students will be invited to participate in the exhibition that is part of the course for the MSc version of the course. For undergraduate students this will be optional rather than voluntary.

A screening of a film/documentary will take place during the course and will be open to both undergraduates and masters students taking the course.

Formative coursework: Students will be expected to produce 1 essay in the MT.

A 1,500 word essay addressing one of the class questions will provide the opportunity for practice in and feedback on essay writing in the topic area. This will be due by end of week 8.

Indicative reading: Indicative essential readings

The reading list includes required and supplementary readings demonstrate current debates and approaches. Readings will be complemented by podcasts, videos and interactive materials relating to the readings. A film showing will also provide an early point of reference and discussion.

Assessment: Essay (30%, 1000 words) in the MT.

Essay (70%, 2000 words) in the LT.

The course is assessed by two summative assignments (100% summative coursework).

Assignment 1 (30% of the final mark)

The first assignment comprises a 1,000 word (maximum) critical engagement with one of the essential texts set within the first five weeks of the course. This will require summarising the key arguments, highlighting potential limits and criticisms of the arguments (drawing on other material and lectures from the course) and concluding on its contribution to migration studies. The first assignment is due by the end of the term in which the course is taught

Assignment 2 (70% of the final mark)

The second assignment is a written essay (up to 2,000 words) that should address one question from a set provided.

The second assignment is due at the beginning of the term following the term in which the course is taught.

Both assignments should be submitted via Moodle.

SA309

Crime Control: Ideas and Controversies

This information is for the 2018/19 session.

Teacher responsible: Dr. Leonidas Cheliotis, OLD.2.51

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The purpose of the course is to provide students with an understanding of, and critical perspective on, key debates in contemporary crime control policy. The course examines the emergent features of current responses to problems of crime and social order, focusing in particular on issues such as: policing and security; crime prevention and surveillance; youth, crime and control; and punishment. Attention is given to both historical and comparative perspectives, as well as to the methodological issues associated with the empirical study of crime control, together with analyses of developments in current government policy.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of classes in the ST.

Lectures x 20; Classes x 19, MT and LT, plus one revision class (ST).

Formative coursework: One essay per term (MT and LT) will be required.

Indicative reading: The three primary texts for the course are: M Maguire, R Morgan and R Reiner, *The Oxford Handbook of Criminology*, 6th ed, 2017; and, T Newburn, *Criminology*, 3rd ed, 2017, and R. King and E. Wincup, *Doing Research on Crime and Justice* 2nd ed, 2010. In addition, students might wish to consult: D Garland, *The Culture of Control: Crime and Social Order in Contemporary Society*, 2001; T Newburn, *Handbook of Policing*, 2008; N Tilley, *Handbook of Crime Prevention and Community*

Safety, 2005; D Gilling, *Crime Reduction and Community Safety: Labour and the Politics of Local Crime Control*, 2008; J Muncie, *Youth and Crime*, 2009; W Taylor, R Earle and R Hester, *Youth Justice Handbook: Theory, Policy and Practice*, 2010; and D. Gadd et al., *The Sage Handbook of Criminological Research Methods*, 2012.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

SA319 Half Unit

Social Security Policies

This information is for the 2018/19 session.

Teacher responsible: Dr Kitty Stewart OLD 2.36

Availability: This course is available on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course analyses the purpose, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course - childhood, parenthood, old age - and from risk factors that end up affecting only some - unemployment, sickness and disability. The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country. The course will also consider how successfully social security systems are adapting to meeting the challenges of the twenty-first century, including an aging population, migration, and the changing nature of employment brought about by rapid technological change.

Most of the examples in the lectures and readings relate to higher- and middle-income countries, but many of the issues covered are also relevant in countries where social security systems are less developed. Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: 15 hours of lectures and 15 hours of classes in the MT. There will be no formal teaching in Reading Week (Week 6), but there will be an optional film on a relevant topic, followed by an informal discussion.

Formative coursework: Students will write one essay (1500 words) during the course of Michaelmas Term, and will receive feedback in preparation for the summative assessment.

Indicative reading: R Walker (2005) *Social Security and Welfare: Concepts and Comparisons*. Open University Press. J Hills (2015) *Good Times, Bad Times: The Welfare Myth of Them and Us*. The Policy Press. J Millar and R Sainsbury (2018) (eds) *Understanding Social Security*, Third Edition. The Policy Press. P Spicker (2011) *How Social Security Works: An introduction to benefits in Britain*. The Policy Press. J Kvist et al (2012) *Changing Social Equality: The Nordic Welfare Model in the 21st Century*. The Policy Press. N Barr and P Diamond (2009) *Pension Reform: A Short Guide*. Oxford University Press. M Frolich et al (2015) *Social Insurance, Informality and Labor Markets: How to Protect Workers While Creating Good Jobs*. Oxford University Press. An extended reading list will be provided, with specific readings for each week's topic.

Assessment: Essay (100%, 3000 words) in the LT.

SA349 Dissertation

This information is for the 2018/19 session.

Teacher responsible: Dr Kitty Stewart

Availability: This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is not available as an outside option nor to General Course students. This course is compulsory on the BSc in Social Policy, BSc in Social Policy and Criminology, BSc in Social Policy and Economics, BSc in Social Policy and Sociology and BSc in Social Policy with Government. This course is not available as an outside option nor to General Course students.

Course content: A dissertation of no more than 8,000 words on a topic to be approved by the candidate's Academic Advisor. It is designed to allow a detailed and thorough exploration of an area of interest to the student. The dissertation should be on a topic area within the field of the degree programme; it may involve original fieldwork, or the analysis and appraisal of existing literature.

Teaching: 9 hours of workshops in the MT. 2 hours of seminars and 1 hour and 30 minutes of workshops in the LT. Students will be allocated an Academic Adviser who will supervise their dissertation. In addition to individual supervision meetings, there will be five compulsory workshop sessions in Michaelmas Term to help students plan and structure their work on the dissertation, as well as two optional troubleshooting sessions (one in Michaelmas and one in Lent Term). Presentation seminar sessions will be held in early Lent Term: all students will be expected to make a brief presentation on their topic and will receive feedback from staff and peers.

Formative coursework: Students taking this course are required to agree their dissertation title with their Academic Advisor and submit it to the Departmental Tutor no later than Friday 7th December 2018.

Indicative reading: Students will be expected to draw extensively from the reading they have undertaken throughout their programme of study. Advised reading: H Dean, 'Doing projects in social policy', in P Alcock, et al (Eds) *The Student's Companion to Social Policy*, Fourth Edition, Blackwell, 2012.

Assessment: Essay (100%, 8000 words) in the ST. Submission is due on the first week of ST - full deadline details will be confirmed to all candidates. Precise details on format and presentation will be issued by the Department.

SO100 Key Concepts: Introduction to Social Theory

This information is for the 2018/19 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BSc in International Relations, BSc in Politics, BSc in Politics and International Relations, BSc in Social Policy and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course aims to introduce students to sociological theory by examining the work and ideas of normally eight key thinkers in social thought. For each thinker, the course will provide an overview of their contribution to the discipline of sociology, examine in detail one or more of their important texts, and also consider how their analysis could be applied to contemporary social issues.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Four 2,000 word formative essays or their equivalent (two in MT; two in LT), for feedback from class teachers.

Indicative reading: A detailed reading list will be available at the

first lecture, but for general preparatory reading, students might wish to consult the following: D Lee & H Newby, *The Problem of Sociology*; Z Bauman, *Thinking Sociologically*; S Bruce, *Sociology: A Very Short Introduction*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Attendance at all classes and submission of all set coursework is required.

SO102 Data in Society: Researching Social Life

This information is for the 2018/19 session.

Teacher responsible: Dr Fabien Accominotti STC.S206 and Dr Anastasia Kakou. Anastasia Kakou will teach the second part of the course.

Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course explores how numbers are deployed in social settings, and how they are used in sociology to construct and challenge our understanding of the social world. The first part of the course (taught by Fabien Accominotti) introduces students to the importance of quantification in modern societies, familiarizes them with the main instruments for the collection of quantitative data, and provides them with an overview of the methods used to treat such data in contemporary sociology. We cover both descriptive and explanatory methods, and we reflect on the vision of the social world implicitly associated with each of the methods we encounter. In the second part students start learning basic descriptive skills of quantitative data analysis, notably how to download large data sets, how to manipulate variables and carry out descriptive statistical analyses with statistical software Stata, and how to present statistical information in tabular and graphical form.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 1 hour of lectures and 1 hour of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One 2000 word essay asking students to reflect on the changing use of quantitative data in social scientific research.

Two practical exercises demonstrating basic knowledge of data processing and descriptive statistical analysis using statistical software.

Indicative reading: Gould, Stephen Jay. 1981. *The Mismeasure of Man*. New York: Norton. Desrosières, Alain. 2002. *The Politics of Large Numbers: A History of Statistical Reasoning*. Cambridge: Harvard University Press. Savage, Mike, and Roger Burrows. 2007. "The Coming Crisis of Empirical Sociology", *Sociology* 41: 885-898. Wasserman, Stanley, et Katherine Faust. 1994. *Social Network Analysis: Methods and Applications*. Cambridge: Cambridge University Press. Salganik, Matthew J., Peter S. Dodds, and Duncan J. Watts. 2006. "Experimental Study of Inequality and Unpredictability in an Artificial Cultural Market", *Science* 311: 854-856. Gelman, Andrew, and Jennifer Hill. 2006. *Data Analysis Using Regression and Multilevel/Hierarchical Models*. Cambridge: Cambridge University Press. Catherine Marsh and Jane Elliot (2008): *Exploring Data* (2nd ed.)

Assessment: Exam (50%, duration: 3 hours) in the summer exam period.

Essay (50%, 3000 words) in the ST.

Two hard copies of the assessed essay with submission sheets on each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

S0110

Power, Inequality, and Difference: Contemporary Themes in Sociology

This information is for the 2018/19 session.

Teacher responsible: Professor Fran Tonkiss STC.S205

Availability: This course is compulsory on the BSc in Sociology. This course is available on the BA in Geography, BA in Social Anthropology, BSc in Politics, BSc in Politics and International Relations, BSc in Social Anthropology, BSc in Social Policy and BSc in Social Policy and Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an introduction to critical areas of theory and analysis in contemporary sociology. Students will gain an understanding of leading-edge research and debates within the discipline, and of how sociology engages with key real-world problems. The sociological issues covered in the course centre on the ways in which power relations, social and economic inequalities, forms of identity and difference are shaped in contemporary societies – focusing on both formal political and socio-economic structures and everyday experiences and identities. . These issues include: class, capitals and social mobility; race, ethnicity and multi-culturalism; politics and the nation-state, social movements and social conflict; gender, sexuality and the body.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.
Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Two formative essays in MT, one formative essay in LT.

Indicative reading: M. Savage, *Social Class in the 21st Century* (2015); B. Skeggs, *Formations of Class and Gender* (1997); L Back and J Solomos (Eds), *Theories of Race and Racism: A Reader* (2000); A Gutmann (Ed), *Multiculturalism: Examining the Politics of Recognition* (1994); B Anderson, *Imagined Communities* (1983); E Gellner, *Nations and Nationalism* (1983); M. Flinders, *Defending Politics: Why Democracy Matters in the Twenty-First Century* (2012); S Jackson & S Scott (Eds), *Gender: A Sociological Reader* (2002); K Woodward (Ed), *Questioning Identity: Gender, Class and Ethnicity* (2004); G Bhattacharyya *Sexuality and Society* (2002); D Bell and J Binnie, *The Sexual Citizen: Queer Politics and Beyond* (2000).

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Attendance at all classes is required and submission of all set coursework is compulsory.

S0201

Key Concepts: Advanced Social Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Monika Krause STC S207

Availability: This course is compulsory on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course engages key sociological issues through the critical reading of theoretical and analytical texts. Students will engage with advanced concepts in sociological thought, and will explore the connections between theoretical arguments and the practice of social enquiry and analysis. Students will read a combination of social theory texts in a range of traditions as well as contemporary research studies.

Teaching: 10 hours of lectures and 9 hours of classes in the MT.

10 hours of lectures and 10 hours of classes in the LT.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: One coursework submission each term is a course requirement.

Indicative reading: There is no set textbook for this course - each week's teaching is based on the critical reading of key texts.

Assessment: Exam (50%, duration: 3 hours) in the summer exam period.

Essay (50%, 3500 words) in the LT.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The essay is due by the fourth Thursday of Lent Term. An additional copy of the essay is to be uploaded to Moodle no later than 18:00 on the same day it is due.

Attendance at all classes and submission of all set coursework is required.

S0203

Political Sociology

This information is for the 2018/19 session.

Teacher responsible: Dr Robin Archer, STC.S114a

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: Political Sociology concerns the way in which political and social factors interact to produce the societies in which we live. This course aims to discuss some central empirical and theoretical questions in the field. The course begins by examining classic comparative debates about the relationship between the development of the state and democracy on the one hand, and the rise of capitalism and liberalism on the other. We will then examine the impact that social cleavages have on parties, elections and other political institutions in a number of different countries. We will examine the strength and political impact of both labour movements and other important social movements. And we will examine why similar countries can develop very different social and economic policies. In addition we will examine some of the founding writings of Marx, Weber and Tocqueville and critically assess the use of political concepts. Throughout the course we will consider some of the main theoretical approaches that are used in the study of political sociology.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of lectures and 4 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: At least one class presentation and a termly paper in both MT and LT.

Indicative reading: R Dalton, *Citizen Politics*, 5th edn; G Esping-Andersen, *The Three Worlds of Welfare Capitalism*; E. Gellner, *Nations and Nationalism*; A Giddens, *Capitalism and Modern Social Theory*; R Inglehart, *Culture Shift in Advanced Industrial Society*; J Manza & C Brooks, *Social Cleavages and Political Change*; F Piven and R. Cloward, *Poor People's Movements*; D. Rueschmeyer et al, *Capitalist Development and Democracy*; T Skocpol, *States and Social Revolutions*; S Tarrow, *Power in Movement*.

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Thursday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day. Attendance at all classes and submission of all set coursework is required.

S0208 Gender and Society

This information is for the 2018/19 session.

Teacher responsible: Professor Charis Thompson Room STC. S102

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course will explore the meaning of gender in contemporary society. It considers gendered relations of power and the articulation of gender with other kinds of social difference such as 'race', class and sexuality. A variety of theoretical perspectives will be applied to a number of substantive issues of contemporary concern.

Indicative topics are: gender and sexuality; the body; families; employment; violence; nation and citizenship; multiculturalism; reproductive technologies; globalisation; sex work; representation; body modification.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 4 hours of classes in the ST.

Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Students will be expected to prepare one essay per term and at least one class paper per term which will be written up and handed to the class teacher.

Indicative reading: S Jackson & S Scott (Eds), *Gender, London and New York*: Routledge, 2000; H Mirza (Ed), *Black British Feminism: A Reader*, London and New York: Routledge, 1997; R. Parker and P. Aggleton (eds.) *Culture, Society and Sexuality: A Reader* (2nd edn), 2007; D Bell & J Binnie, *The Sexual Citizen: Queer Politics and Beyond*, London: Polity, 2001; P Abbott & C Wallace, *An Introduction to Sociology: Feminist Perspectives* (3rd edn), 2005; R W Connell, *Gender and Power*, 1987; Littlewood, B *Feminist Perspectives on Sociology*. Essex: Pearson Education. 2005; I Grewal & K Caplan (Eds), *An Introduction to Women's Studies: Gender in a Transnational World*; M Mac an Ghaill, *Understanding Masculinities*, 1996; *The Polity Reader in Gender Studies*, 1994; J M Alexander & C T Mohanty (Eds), *Feminist Genealogies, Colonial Legacies, Democratic Futures*, London & New York: Routledge, 1997; Essed et al, *A Companion to Gender Studies*, 2005; C Wright & G Jagger (Eds), *Changing Family Values*, London & New York, 1999
A more detailed reading list will be provided at the beginning of the course.

Assessment: Take home exam (100%) in the ST.

Attendance at all classes and submission of all set coursework is required

S0210 Crime, Deviance and Control

This information is for the 2018/19 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course encourages students to think about and debate some of the major issues in Criminology. We explore the social construction of crime and deviance; the different sources of information about them; key factors that shape patterns, perspectives and experiences of crime and deviance, including social class, gender, ethnicity and the media; and different Criminological theories that have been used to explain crime and deviance. We also explore elements of social control including policing and prisons.

Teaching: 6 hours of lectures, 6 hours of classes and 8 hours of workshops in the MT. 6 hours of lectures, 6 hours of classes and

8 hours of workshops in the LT. 1 hour of classes and 2 hours of workshops in the ST.

This course is taught using a mixture of 2 hour workshops (4 in MT and 4 in LT) and 6 one hour lectures (MT and LT) and 6 one hour classes (MT and LT).

All students are timetabled so that they are able to attend both the two hour workshop and the one hour lecture/classes.

There is one 2 hour workshop in the ST.

Formative coursework: Students are required to complete two formative essays – one in MT and one in LT

Indicative reading: There is no set text for this course, and a full reading list is provided at the first class. The following is useful introductory reading that includes topics covered on the course: Carrabine E et al (2016) *Criminology: A Sociological Perspective*; Downes, D & Rock, P (2011, 4th Edition) *Understanding Deviance*; Liebling, A et al, (2017, 5th Edition) *The Oxford Handbook of Criminology*; Tierney, J (2018, 4th Edition) *Criminology: Theory and Context*; Walklate, S (2016) *Criminology: The Basics*.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Other (15%) and other (10%) in the LT.

Other (15%) in the ST.

Other (10%) in the MT.

Attendance at all classes and submission of all set coursework is required.

S0221 Researching London: Advanced Social Research Methods

This information is for the 2018/19 session.

Teacher responsible: Dr Sam Friedman STC. S216

Dr Ioanna Gouseti STC.S105a

Availability: This course is compulsory on the BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: This course will provide students with a first understanding of social research design and analysis of social research data. It involves a dynamic introduction to a range of research methods, both qualitative and quantitative, through practical exercises in the context of London's social life.

By the end of the course students will:

- Understand the key role of research design for conducting original empirical social research. In particular, taking into account relevant extant literature, they will develop a research question of their own interest and identify appropriate research method(s) to address it.
- Have engaged with practical research strategies and methods including the design of interview guides and survey questionnaires, conducting qualitative interviews, ethnographic observation, and a survey in the context of London.
- Have a sense of the urban sociology of London and a first-hand experience of its potential for exploring contemporary social issues.
- Be able to analyse different types of data, using a range of methods, such as thematic analysis in the case of qualitative data and regression analysis in the case of quantitative data.
- Be able to assess the quality of employed methodologies on the basis of formal criteria, such as reliability, validity and generalizability.
- Understand the ethical issues involved in social research.
- Have developed a research proposal which will strengthen their dissertation design, and might inform their dissertation topic.

Teaching: 25 hours of workshops in the MT. 25 hours of workshops in the LT.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: There are two pieces of formative assessment which will be marked and on which you will get feedback in the Michaelmas Term (MT).

Indicative reading: A. Agresti & B. Finlay (2008) *Statistical Methods for the Social Sciences*. 4th edition. Pearson. Bryman, A. (2014). *Social research methods*, 4th edition. Oxford University Press. Converse, J. M., & Presser, S. (1986). *Survey questions: Handcrafting the standardized questionnaire* (No. 63). Sage. Davidson, O'Connell, J., (2008). "If no means no, does yes mean yes? Consenting to research intimacies.", *History of the Human Sciences*, 21(4), 49-67. Duneier, M. (2006). "Ethnography, the Ecological Fallacy, and the 1995 Chicago Heat Wave." *American Sociological Review*, 71(4), 679-88. Ingram, N. (2011). *Within school and beyond the gate: The complexities of being educationally successful and working class*. *Sociology*, 45(2), 287-302. O'Reilly, K. (2004). *Ethnographic methods*. London, New York: Routledge. Savage, M., & Burrows, R. (2007). *The Coming Crisis of Empirical Sociology*. *Sociology: The Journal of the British Sociological Association*, 41(5), 885-899. Tourangeau, R., Rips, Lance J, & Rasinski, Kenneth A. (2000). *The psychology of survey response*. New York: Cambridge University Press.

Assessment: Essay (20%, 1500 words) and presentation (30%) in the LT.

Research proposal (50%) in the ST.

Two hard copies of each assessment, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessment, a qualitative interview transcript and 1,500 word essay (20%), is due by the first Thursday of Lent Term. The second assessment, a group presentation (15 slides maximum) based on the agreed group survey (30%), will be carried out in Lent Term. Each group presentation will be marked by both the course convenor and the group GTAs, who will then discuss and moderate marks after all the group presentations took place. Marks will take into account the work done by each group in the previous six weeks (questionnaire design, survey data collection and data analysis) as well as the clarity of the presentation itself. The third assessment, a 1,500-2,000 word research proposal (50%), is due by the second Thursday of Summer Term. An additional copy of each essay is to be uploaded to Moodle no later than 18:00 on the same day each assessment is due. Attendance at all workshops and submission of all set coursework is required.

S0224

The Sociology of Race and Ethnicity

This information is for the 2018/19 session.

Teacher responsible: Dr Sara Salem Room TBD

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Optional Course for BSc Sociology for 2nd and 3rd years and the Diploma in Sociology.

Course content: The course provides an introduction to theoretical, historical and contemporary debates around race, racism and ethnicity. It firstly explores the main theoretical perspectives which have been used to analyse racial and ethnic relations, in a historical and contemporary framework, and the role of historical events in creating difference. It then examines in more detail the areas both theoretical and lived within our contemporary social and political climate where analyses of 'race', racism, belonging and identity are urgently needed; as well as the ways in which various categories such as class, gender, sexuality, among others, intersect with race. The course adopts a global lens, focusing on theory and cases from across the world. Topics include: race and ethnicity in historical perspective; race and ethnicity in social theory; colonialism, settler colonialism and post-colonialism; biopolitics and difference; capitalism and race; intersectionality; whiteness, diaspora and hybridity; race, genetics, disease and contamination; race and popular culture; urban culture and the street; asylum and new migrations; the Far Right and the white working class.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. 10 hours of lectures and 10 hours of classes in the LT. 2 hours of classes in the ST.

Reading weeks: week 6 (MT) and week 6 (LT)

Formative coursework: Reading logs in addition to formative essay.

Indicative reading: L Back & J Solomos (Eds), *Theories of Race and Racism* (2nd Edition, Routledge 2009); K Murji & J Solomos (Eds), *Theories of Race and Ethnicity: Contemporary Debates and Perspectives* (CUP 2014); MJ Schueller, *Locating race: Global sites of post-colonial citizenship* (SUNY Press 2009); DF Da Silva, *Toward a Global Idea of Race* (U Minnesota Press 2007); Y Gunaratnam, *Researching 'Race' and Ethnicity: Methods, knowledge and power* (Sage 2003); R Miles, *Racism after Race Relations* (Routledge 1993); J Puar, *Terrorist Assemblages: Homonationalism in Queer Times* (Duke UP 2017); C Mohanty, *Feminism without Borders: Decolonizing Theory, Practicing Solidarity* (Duke UP 2003); H Mirza (Ed), *Black British Feminism* (Routledge 1997); K Owusu (Ed), *Black British Cultural Studies* (Routledge 1999); D T Goldberg, *Racist Culture* (Blackwell 1993); P Gilroy, *There Ain't No Black in the Union Jack* (Hutchinson 1987); E Baptist, *The half has never been told: Slavery and the making of American capitalism* (Hachette 2016); P Hill Collins, *Black Feminist Thought* (Routledge 1991); F Fanon, *Black skin, White Masks* (Grove press 2008); D T Goldberg (Ed), *Multiculturalism: A Critical Reader* (Blackwell 1994); P.H. Collins & J. Assessment: Exam (30%, duration: 2 hours) in the summer exam period.

Essay (45%, 2000 words) in the ST.

Other (25%) in the LT.

Two hard copies of each assessment of 2000 words, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the submission day. The first assessed literature review is due on the first Thursday of Lent term and the second assessed essay is due by the third Thursday of Summer Term. An additional copy of each assessment is to be uploaded to Moodle no later than 18:00 on the same day each essay is due.

Attendance at all classes and submission of all set coursework is required.

S0231 Half Unit Not available in 2018/19

Knowledge, Power, and Social Change

This information is for the 2018/19 session.

Teacher responsible: Dr Leon Wansleben STC208

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The aims of the course are threefold: First, the course will provide an introduction to how key sociological theories reflect upon the nature of knowledge in society; it will thereby strongly connect to other theory courses. Second, the course will explore knowledge and expertise as critical aspects of contemporary society, which contribute to the reproduction, as well as alteration, of social inequalities and relationships of power. Third, the course will provide a forum for thinking about our own roles, as sociologists, outside the university. By the end of the course, students will feel capable of questioning the 'taken-for-grantedness' of authoritative knowledge and to critically analyse how social actors make knowledge claims. Second, students will be able to examine, evaluate, both in written and oral form, theories and debates within the sociological discourse on knowledge. Thirdly, students will be able to explore knowledge production and dissemination in contemporary society and develop corresponding sociological research projects (case

studies) related these issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study or 1 theoretical essay in the LT.

Indicative reading: Foucault, Michel (1984). What is Enlightenment? In *The Foucault Reader*, edited by Paul Rabinow, pp. 32-50. New York: Pantheon Books. Mannheim, Karl (1936). Ideology and Utopia: an introduction to the sociology of knowledge. London, Keagan Paul. Merton, Robert K. (1972). "Insiders and Outsiders: A Chapter in the Sociology of Knowledge." *American Journal of Sociology* 78(1): 9-47.

Assessment: Essay (100%, 3000 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO232 Half Unit Sociology of Health and Illness

This information is for the 2018/19 session.

Teacher responsible: Dr Carrie Friese STC S213

Availability: This course is available on the BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: Sociology of Health and Illness explores the ways in which experiences of health and illness are socially patterned. We will also ask how the management of health and illness organizes social life. To explore experiences of health and illness, we will look at how specific 'medical disorders' (e.g., ageing, cancer, mental health, disabilities, reproductive and sexual health, obesity etc.) are 'embodied' in socially patterned ways. Empirical studies of specific disorders will be read, in conjunction with analysis of other kinds of texts (e.g., popular writing, film, performance art, museum exhibits, etc.). To address how the management of health and illness organizes social life and vice versa, key theories in the sociology of health and illness will be explored. This will include Parsons's sick role; Weberian and feminist understandings of professional dominance; medicalization, demedicalization and biomedicalization; stigma and stigmatization; health inequalities and the social determinants of health; and Foucaultian notions of surveillance, biopolitics and governmentality.

Teaching: 10 hours of lectures and 10 hours of classes in the LT. Teaching will comprise of a one hour lecture and one hour class each week.

Students on this course will have a reading week during Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

The assessed examination is supported by ONE take home, mock examination that is formative.

Indicative reading: S Nettleton *The Sociology of Health and Illness* (2006), P Starr, *The Social Transformation of American Medicine* (1982), A Nelson *Body and Soul: The Black Panther Party and the Fight Against Medical Discrimination* (2011), M Foucault *The Birth of the Clinic: An Archaeology of Medical Perception* ([1973] 1994), I Hacking *The Social Construction of What?* (1999), A Frank, (1997) *The Wounded Storyteller: Body, Illness and Ethics* (1997), E Martin *Bipolar Expeditions: Mania and Depression in American Culture* (2007), J Latimer *The Gene, The Clinic and the Family* (2013), S Kaufman (2015) *Ordinary Medicine*, Eugene Raikhel and William Garriott (2013) *Addiction Trajectories*

Assessment: In class assessment (20%) in the LT. Take home exam (80%) in the ST.

Weight 80%

Type –seen take-home exam where 3 questions need to be answered from 6 questions

Number of words: No more than 1,300 words per answer, and 3,600 words in total

Timing of submission: First Wednesday of Summer Term AND

Weight 20%

Type-Participation. Students are to make TWO comments on the Moodle discussion board and respond to TWO other student's comments from Weeks 1-10. The best mark of the two comments, and the best mark of the two responses will be averaged to give the participation mark.

Number of words. No more than 300 words per comment

Timing of submission: Weeks 1-10

Assessed take home exam due in ST. A copy to be uploaded to Moodle by the specified time.

SO233 Half Unit Reactionary Radicalism: Populism and Authoritarianism in the 21st Century

This information is for the 2018/19 session.

Teacher responsible: Dr Michael McQuarrie STC.S217a

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: This half-unit course will take up the emergence of a new brand of populist politics. The course will examine the link between political economic, demographic, and cultural changes and the rise of new varieties of ethnonationalist and anti-systemic populism. It will examine the nature of populism, why it is a prevalent language of political mobilization, and its limitations as a political project. The course will examine the relationship between populism and authoritarianism, populism and racism, populism and classism, populism and technocracy, and populism and neoliberalism. This discussion will be undertaken in the context of an overarching theme of the relationship between new varieties of populism and the economic geography and class structure of neoliberalism with an emphasis on the link between socio-economic transformation and political mobilization. Finally, the course will take up the issue of populism and its relationship to intellectuals and academics with a focus on the problems this creates for research.

Teaching: 25 hours of workshops in the LT.

Course Outline

1. Introduction: what is populism and why has it emerged as such a powerful political force in the early 21st century?
2. Who are the Populists? Voting patterns in the US, France, and Britain and the new economic geography of neoliberalism.
3. Inequality and Politics: The founding problem of capitalist democracies: integration without equality. The various institutional and ideological efforts to cope with this problem. We will focus on the technocratic welfare state, racism, populism, and fascism.
4. The included and the excluded: this class will juxtapose the neoliberal and welfare state eras with particular attention to the shifting logic for valorizing people and places.
5. Race, prejudice, and populism: here we take up the issue of race and difference directly. In general we will assess the hypothesis that populism is actually a new expression of racism in response to the emergence of immigration or the emergence of a more multicultural society.
6. The authoritarian personality: this class will focus on the Frankfurt School hypothesis, trends in authoritarian attitudes, and possible explanations for those trends.
7. From political moderation to political extremism: Here we

return to some issues of conceptualization in understanding political motivation and political action with a particular interest in the limits and advantages of a rationalist framework. We examine the question of whether the emergence of extremist politics is because people were extremist all along or because circumstances have made extremist politics more attractive.

8. The Political Economy of Despair: This class will focus on changes in 21st century political economies and the institutional mechanisms that are designed to cope with the negative effects of those changes.

9. Parties and Populism: Here we take up the issue of established political parties and their response with a particular focus on their inability to police the boundaries of electoral politics.

10. The Rust Belt Revolt and its Challenge: This class will focus return to the economic geography of the populist revolt but with a particular focus on its timing and its racially specific composition. We will then turn to contemporary debates about strategies for dealing with it on both the Right and the Left.

Formative coursework: By the last class in LT students are expected to turn in the following:

- Your interview schedule and transcript
- A draft of your theoretical exposition
- Your paper topic and thesis statement

Indicative reading: Karl Polanyi, *The Great Transformation*.

Karl Marx, *The Eighteenth Brumaire of Louis Bonaparte*. Daniel Bell, *Post-Industrial Society*. Ulrich Beck, *The Risk Society*. Josh Pacewicz, *Partisans and Partners*. Jake Rosenfeld, *What Unions No Longer Do*. Kathy Cramer, *The Politics of Resentment*. Michele Lamont, *The Dignity of Working Men*

Assessment: Essay (60%, 2500 words) and other (20%) in the ST. Other (20%) in the LT.

The other assessments are: 1) Interview exercise (20%) during LT; 2) Theoretical exposition (1000 words, 20%) in ST.

Assessed essay due Wednesday of Week 2 of the ST. Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the day of submission. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

S0234 Half Unit Digital Technology, Speed and Culture

This information is for the 2018/19 session.

Teacher responsible: Prof Judy Wajcman STC S203

Availability: This course is available on the BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, speed, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including information and communication technologies, robotics, cyborgs, sex, and weapons.

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

ONE formative essay of 1,200 words will be due at the end of Week 6 of Michaelmas Term.

Indicative reading: MacKenzie, D. and Wajcman J. (1999) *The Social Shaping of Technology* (MIT Press). Suchman, L. (2007) *Human-Machine Configurations* (CUP). Turkle, S. (2011) *Alone Together* (Basic Books). Wajcman, J. (2015) *Pressed for Time* (Chicago University Press). Wajcman, J. (2014) *TechnoFeminism* (Polity Press).

Assessment: Essay (100%, 3000 words) in the MT.

The course is assessed by ONE summative essay of 3,000 words that is worth 100% of the total mark.

Assessed essay due Thursday of Week 11 of MT. Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the day of submission. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

S0302 The Sociological Dissertation

This information is for the 2018/19 session.

Teacher responsible: Prof Fran Tonkiss STC.S205

Availability: This course is compulsory on the BSc in Sociology. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students undertaking this course need to have completed the first two years of the BSc in Sociology.

Course content: The dissertation takes the form of an independent and extended research project of 10,000 words on a sociological topic of the students' choosing, developed in consultation with their Academic Adviser. The dissertation process generally includes reviewing relevant literature on the topic of study, formulating a viable and sociologically-relevant research problem, collecting and analysing primary and/or secondary data (such as a case study, data set, fieldwork observations, survey results or interviews), and writing up an independent discussion based on this research.

Students' work on the dissertation is supervised in small-group and individual tutorials with their Academic Advisor over MT and LT.

The Dissertation process is supported by a series of compulsory group workshops in the MT and LT which focus on research project design. The workshops cover topics such as identifying a sociological problem for investigation, constructing a bibliography, research ethics, research access, data collection, data analysis, writing up and trouble-shooting.

Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

Seminars will be structured as follows: 5 x 1.5 hour seminars in the MT. 5 x 1.5-hour seminars in the LT.

In addition, 5 x 1.5-hour small-group tutorials with Academic Advisors in MT. 2 x individual supervisions with Academic Advisors plus drop-in sessions in LT.

Formative coursework: One piece of formative coursework in the MT.

Assessment: Research proposal (10%) in the MT.

Research project (90%) in the ST.

The research proposal will be in the form of a research project outline.

Assessment Particulars:

Two hard copies of the 10,000 word dissertation must be submitted to the Sociology Administration Office, Room S116, by 4.30pm on the second Thursday of ST, with a third copy posted to Moodle by 18:00 on the same day. Accidental loss of data or text on a computer will not be accepted as a reason for non-submission.

SO308**Personal Life, Intimacy and the Family**

This information is for the 2018/19 session.

Teacher responsible: Dr Ursula Henz STC S100B

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Course content: The course provides an overview over the area of family sociology, drawing predominantly on literature about Britain and other Western societies. The course focuses on recent and ongoing transformations of family structure, family relationships and family life. Throughout the course various theoretical approaches will be considered. Issues related to gender, ethnicity and migration will be cross-cutting themes of the course. Indicative topics are: family structures and family relationships, childhood, adolescence, partnership formation, marriage, childlessness, motherhood, fatherhood, parenting, divorce, post-divorce families, family and work, family and education.

Teaching: 25 hours of workshops in the MT. 25 hours of seminars in the LT. 2 hours of classes in the ST.

25 hours of workshops in the MT.

25 hours of seminars in the LT.

2 hours of classes in the ST.

Reading weeks: week 6 MT and week 6 LT.

Formative coursework: Students are required to complete at least one class presentation and two formative essays

Indicative reading: Treas, Judith, Scott, Jacqueline & Richards, Martin (eds.) (2014) *The Wiley Blackwell Companion to The Sociology of Families*, Chichester, West Sussex: Wiley Blackwell covers many aspects of the course. Other recommended readings include: Beck, Ulrich & Beck-Gernsheim, Elisabeth (1995): *The Normal Chaos of Love*. London: Polity Press. Chambers, Deborah (2012): *A Sociology of Family Life*. Cambridge: Polity Press. Giddens, Anthony (1992): *The Transformation of Intimacy. Sexuality, Love and Eroticism in Modern Societies*. Oxford: Polity Press. Hochschild, Arlie (1990): *The Second Shift. Working Parents and the Revolution at Home*. London: Piatkus. Jamieson, Lynn (1998): *Intimacy: Personal Relationships in Modern Societies*. Cambridge: Polity Press. Lareau, Annette (2011): *Unequal Childhoods. Class, Race and Family Life*. University of California Press: Berkeley, Los Angeles, London. Smart, Carol & Neale, Bren (1999): *Family Fragments?* Cambridge: Polity Press. Smart, Carol, Neale, Bren & Wade, Amanda (2001): *The Changing Experience of Childhood: Families and Divorce*. Cambridge: Polity Press.

Assessment: Take home exam (50%) and other (50%) in the ST. Two hard copies of the research report, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the second Wednesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO309 Half Unit Not available in 2018/19
Atrocity and Justice

This information is for the 2018/19 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to General Course students.

Sociology students will be given priority.

This course cannot be taken in conjunction with IR312 Genocide.

Pre-requisites: No specific pre-requisites, but this is open only to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: The course will cover a number of issues relevant

to the study of atrocity and justice for atrocity. It looks at the social construction of atrocities, the Genocide Convention, structural approaches to understanding genocide (modernity, democracy and colonial rule), the perpetrators, victims and witnesses of atrocity, the problem of denial of state crimes, historical injustices in Australia, Canada and the US, forensic investigations of atrocity, retributive and restorative approaches to justice for atrocity, truth commissions and war crimes tribunals.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Formative assessment will be as follows:

1. Class presentation: students will conduct one class presentation and will receive detailed feedback which will focus on points for improvement for the assessed components;
2. Practice essay: students will carry out one practice essay during week 6 (reading week) of the LT. They will receive detailed feedback for this in preparation for the summative assessments.

Indicative reading: Arendt, Hannah (1994) *Eichmann in Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books). Bauman, Zygmunt (1989) *Modernity and the Holocaust* (Cambridge: Polity). Browning, Christopher (1992) *Ordinary Men: Reserve Police Battalion 101* (New York: HarperCollins). Cohen, Stan (2001) *States of Denial* (Cambridge: Polity Press). Hacking, Ian (1999) *The Social Construction of What?* (Cambridge: Harvard University Press). Jones, Adam (2011) *Genocide: A Comprehensive Introduction*, 2nd edition (London: Routledge). Wilson, Richard (2001) *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge: Cambridge University Press).

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 2500 words) in the ST.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO310 Half Unit
The Sociology of Elites

This information is for the 2018/19 session.

Teacher responsible: Prof Michael Savage STC S210

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: In the early 21st century, there is a new fascination with the super-rich, the 1%, the 'elites'. This course therefore aims to expose students to the challenges and excitements of studying this small but very significant social class, using cutting edge research on recent trends as well as important older studies.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of seminars in the ST.

Reading Week: Week 6 Lent Term.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Formative assessment will be through a 2000 word essay to be handed in on the Monday of Week 7, directly after Reading Week. Students will also be asked to give presentations in seminars, and informal feedback will be given on these.

Indicative reading: Piketty, T., (2014), *Capital in the 21st Century*, Boston, Harvard UP. Khan, S., (2010), *Privilege*, Princeton, Princeton UP. Dorling, D., (2014), *Inequality and the 1%*, London, Verso. Savage, M., and Williams, K., (eds) (2008), *Remembering Elites*, Oxford, Blackwells. Scott, J., (1982), *The Upper Class*, Macmillan.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

S0311 Half Unit Law and Violence

This information is for the 2018/19 session.

Teacher responsible: Dr Ayca Cubukcu STC.S113

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is available to students in Year 3 only.

Pre-requisites: N/A

Course content: *Law and Violence* is an intensive introduction to key theoretical texts that can inform a nuanced understanding of the controversial yet crucial nexus between law and violence. What is the relationship between law and violence? Are they mutually exclusive forms of human action? Is it a paradox that law employs violence in claiming to prevent or circumscribe the latter? Is it a contradiction that violence is often the means to establish or change the law? We will consider these questions within historical contexts of the nation-state and the global legal order. The case of refugees—often caught “outside” the law—will also be considered.

Teaching: 20 hours of seminars in the LT.

This course requires the practice of close reading. We will not read in large quantities. However, students are expected to engage with the assigned texts deeply, paying special attention to the presuppositions of the authors and the structures of their argumentation, identifying the weaknesses and the strengths of their theoretical constructions. By the end of the course, students are expected to make the texts speak with and against each other. Students in this course will have a reading week in week 6.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the LT. Essay abstract (max 800 words) to be submitted in class in week 7. Students will get detailed feedback on their abstracts.

Indicative reading: Giorgio Agamben, *Homo Sacer: Sovereign Power and Bare Life*. Stanford Uni. Press. 1995. Antony Anghie, *Imperialism, Sovereignty and the Making of International Law*. Cambridge University Press. 2005. Talal Asad, “Thinking About Just War and Terrorism,” in *Cambridge Journal of Foreign Affairs*. Talal Asad, *On Suicide Bombing*, Columbia University Press. 2007. Hannah Arendt, *Eichmann in Jerusalem*. Penguin Press. 1963. Walter Benjamin, “Critique of Violence” in *Reflections*, Schocken Books. 2002 [1929]. Jacques Derrida, “Force of Law: The ‘Mystical Foundations of Authority’” in *Deconstruction and the Possibility of Justice*. Drucilla Cornell, Michel Rosenfeld, David Gray Carlson, eds. Routledge. 1992. Michel Foucault, *Society Must Be Defended*. Picador. 2003 [1976]. Georges Sorel, *Reflections on Violence*. Dover. 2004 [1908]. Carl Schmitt, *Political Theology*. The MIT Press. 1985 [1922]. Recommended: Carl Schmitt, *The Nomos of the Earth*. Telos Press. 2003 [1950].

Assessment: Essay (90%, 4000 words) in the ST.

Class participation (10%) in the LT.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the first Tuesday of Summer Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

S0312 Half Unit Work, Inequality and Society

This information is for the 2018/19 session.

Teacher responsible: Dr Patrick McGovern STC.S214

Availability: This course is available on the BSc in Social Policy

and Sociology and BSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: No specific pre-requisites, but this course is only open to 2nd and 3rd year students in Sociology and other programmes. It is not available as a 1st year option.

Course content: Sociological perspectives on cross-national differences in employment and social inequality.

Theoretical perspectives on inequality; gender in the labour market; occupational segregation; the ‘glass ceiling’; immigrant employment; race, ethnicity and discrimination; social class at work; class reproduction in elite firms; the rise of wage inequality; and income inequality in the mass media.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: 1,500 word essay due in Week 8 of MT.

Indicative reading: Tilly, C. & C. Tilly (1998) *Work Under Capitalism*; Grint, K. (2005) *The Sociology of Work* (3rd ed.); D. Grusky, (2014) (4th ed) *Social Stratification*; Hakim, C. (2004) *Key Issues in Women's Work* (2nd ed.); McGovern, P. et al. (2007) *Market, Class, and Employment*; Padavic, I. & Reskin, B. (2002) *Women and Men at Work*; G. Payne (ed) (2013) *Social Divisions*, L. Platt (2011) *Understanding Inequalities*. Further reading will be detailed in the course syllabus.

Assessment: Essay (75%, 3000 words) in the LT.

Presentation (10%) and blog post (15%) in the MT.

Assessed essay due Wednesday of Week 1 in LT. Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the day of submission. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

S0313 Half Unit Material Culture and Everyday Life

This information is for the 2018/19 session.

Teacher responsible: Don Slater S310

Availability: This course is available on the BSc in Social Policy and Sociology and BSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course is available as an option course to second and third year students on the BSc in Sociology, and as an outside option for students in other departments.

Pre-requisites: No specific pre-requisites, but this course is only available to second and third year students in Sociology and other programmes. It is not available as a first year option.

Course content: The course focuses on how ‘things’ enter into and mediate everyday social relations and practices. Students will consider all aspects of the social life of things, from design and production through use, consumption and everyday practices. This will allow them to address a range of long-standing theoretical and political concerns within sociology such as the role of objects and materiality in social life; social organizations of objects and exchange, such as consumer culture; design, technology and innovation; and the socio-political status of ‘everyday life’ itself. At the same time, there will be a strong methodological emphasis: not just how do we study objects in everyday life, but how might such studies impact on social research more generally.

The course will rely heavily on case studies. After mapping out central traditions in material culture studies, the course will focus on 2-3 strategically chosen objects to explore analytical and methodological issues (eg, mobile phones, water, bicycles, food, supermarkets, etc). Cross-cultural differences will be raised throughout but at least one of the cases will be predominantly focused on major global difference.

Teaching: 10 hours of lectures and 10 hours of classes in the MT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

1,500 word essay, due after reading week, in which students are asked to analyse an object from the standpoint of one of the theoretical perspectives introduced in the course. They will additionally submit a short research outline (probably 1-2 A4 sides) on which they can base their work towards the summative assessment.

Indicative reading: Drazin, A. & Küchler, S. (eds.) (2015) *The social life of materials: Studies in materials and society*. Bloomsbury Academic, London. Gunn, W., Otto, T. & Smith, R. C. (2013) *Design anthropology: Theory and practice*. Bloomsbury Academic, London. Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press. Lury, C. (2011) *Consumer culture*, 2nd ed. Polity, Cambridge. Miller, D. (2008) *The comfort of things*. Polity, Cambridge. Molotch, H. (2003) *Where Stuff Comes From: How Toasters, Toilets, Cars, Computers and Many Other Things Come to Be as They Are*. New York and London: Routledge. Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) *The Design of Everyday Life*. Oxford: Berg.

Assessment: Other (100%) in the LT.

3,000 word research report (100%, due in LT) on an object of the student's choosing in which they are asked to address a clear list of considerations such as design, material properties, social practices and uses, methodological questions and so on.

Two hard copies of the research report, with submission sheets attached to each, to be submitted to the Administration Office, STC S116, no later than 16:30 on the first Thursday of Lent Term. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

ST102 Elementary Statistical Theory

This information is for the 2018/19 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Economics, BSc in Economics and Economic History, BSc in Economics with Economic History, BSc in Finance, BSc in Financial Mathematics and Statistics, BSc in Mathematics and Economics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available on the BSc in Accounting and Finance, BSc in Philosophy and Economics and BSc in Philosophy, Politics and Economics. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST107 Quantitative Methods (Statistics) or ST108 Statistical Methods for the Social Sciences.

Pre-requisites: A-level Mathematics.

No previous knowledge of statistics is assumed.

Course content: The course provides a precise and accurate treatment of introductory probability theory, statistical ideas, methods and techniques. Topics covered are data visualisation and descriptive statistics, probability theory, random variables, common distributions of random variables, multivariate random variables, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, analysis of variance (ANOVA), linear regression, nonparametric tests, goodness-of-fit and independence tests.

Teaching: 22 hours of lectures, 13 hours and 30 minutes of classes and 11 hours of workshops in the MT. 20 hours of lectures, 16 hours and 30 minutes of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via

Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Larsen R.J. and M.L. Marx (2013) *Introduction to Mathematical Statistics and Its Applications* (fifth edition), Pearson (earlier editions are also fine).

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Exam (25%, duration: 1 hour, reading time: 10 minutes) in the January exam period.

ST107 Half Unit Quantitative Methods (Statistics)

This information is for the 2018/19 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is compulsory on the BSc in Environmental Policy with Economics, BSc in Geography with Economics, BSc in Management and BSc in Social Policy and Economics. This course is available on the BSc in Accounting and Finance, BSc in Government and Economics, BSc in Philosophy and Economics, BSc in Philosophy, Politics and Economics, BSc in Politics and Economics and Diploma in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

This course cannot be taken with ST102 Elementary Statistical Theory or ST108 Statistical Methods for the Social Sciences.

Pre-requisites: A-level Mathematics.

Course content: The elementary statistical tools necessary for further study in management and economics with an emphasis on the applicability of the methods to management and economic problems. Topics covered are data visualisation and descriptive statistics, probability theory, discrete probability distributions, continuous probability distributions, sampling distributions of statistics, point estimation, interval estimation, hypothesis testing, contingency tables and the chi-squared test, correlation and linear regression.

Teaching: 20 hours of lectures, 10 hours of classes and 10 hours of workshops in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises will be set and students are expected to submit solutions to their class teacher each week for feedback.

Indicative reading: All course materials are made available via Moodle, including notes to accompany the lectures, but this can be supplemented with additional background reading. The recommended supplementary text is: Newbold, P., W.L. Carlson and B.M. Thorne (2012) *Statistics for Business and Economics*. (Eighth edition), Pearson (earlier editions are also fine).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST108 Statistical Methods for the Social Sciences

This information is for the 2018/19 session.

Teacher responsible: Dr Nicholas Cron COL.5.13

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

The course is designed for students without a strong background in Mathematics, e.g. without A level Mathematics, and is suitable for students who wish to learn basic statistical methods for analysing social science data. This course cannot be taken with ST102 Elementary Statistical Theory or ST107 Quantitative Methods (Statistics).

Pre-requisites: A grade B in GCSE Mathematics or equivalent. No

background in statistics is required.

Course content: A basic foundation in elementary statistical methods, theory and statistical reasoning. Basic use of computers to analyse data. Probability, random variable theory and distributions. Normal distribution, sampling concepts and sampling distributions. Estimation, significance tests and confidence intervals, one and two-sample methods. Test for proportions, simple contingency tables. Linear regression, correlation. Basic decision theory.

Teaching: 14 hours of lectures, 8 hours of classes and 2 hours of computer workshops in the MT. 20 hours of lectures, 10 hours of classes and 2 hours of computer workshops in the LT. 3 hours of lectures and 3 hours of classes in the ST.

Students will have a two hour computer workshop in week 6 of MT, and a further two hour computer workshop in week 9 of LT.

Formative coursework: Exercises will be set most weeks. Some questions will count as continuous assessment; others will constitute formative coursework.

Indicative reading: Notes will be provided and form the basic reading material. Pointers will be given to further reading.

Assessment: Exam (80%, duration: 3 hours) in the summer exam period.

Continuous assessment (20%) in the MT and LT.

At least a pass mark is required for both assessment components (i.e., the exam and the continuous assessment)

ST201 Half Unit Statistical Models and Data Analysis

This information is for the 2018/19 session.

Teacher responsible:

Dr Sara Geneletti (COL5.07)

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Also available to students who have studied statistics and mathematics to the level of MA107/ST107 Quantitative Methods or ST108 Statistical Methods for the Social Sciences or equivalent.

Pre-requisites: MA107/ST107 Quantitative Methods or ST108 Statistical Methods for the Social Sciences or equivalent.

Course content: A second course in statistics with an emphasis on problems of practical importance and statistical analysis using computers. Principles of modelling: data preparation, mathematical and statistical models, linear and non-linear models. Simple linear regression. Multiple regression: assumptions, transformations, diagnostics, model selection. Logistic regression: odds ratios and likelihood. The course will conclude with a brief introduction to time series.

Teaching: 20 hours of lectures and 16 hours of computer workshops in the LT. 4 hours of lectures in the ST.

Students will be given their assessed project to start on in week 6 which is due in at the end of LT.

Formative coursework: Moodle quizzes and a quantitative research project.

Indicative reading: Baddeley & Barrowclough (2009), Running Regressions: A Practical Guide to Quantitative Research in Dougherty (2011) Introduction to Econometrics; Economics, Finance and Development Studies; Fox (2016) Applied Regression Analysis and Generalized Linear Models; Diaz et al (2014), OpenIntro Statistics.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the LT.

ST202

Probability, Distribution Theory and Inference

This information is for the 2018/19 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.610 and Dr Matteo Barigozzi COL.711

Availability: This course is compulsory on the BSc in Actuarial Science, BSc in Financial Mathematics and Statistics and BSc in Statistics with Finance. This course is available on the BSc in Business Mathematics and Statistics, BSc in Econometrics and Mathematical Economics, BSc in Mathematics and Economics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics, and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100). Students who have not taken these courses should contact Dr Mavrakakis.

Course content: The course covers the probability, distribution theory and statistical inference needed for third year courses in statistics and econometrics.

Michaelmas term: Events and their probabilities. Random variables. Discrete and continuous distributions. Moments, moment generating functions and cumulant generating functions. Functions of random variables. Monte Carlo Simulation using R. Joint distributions and joint moments. Marginal and conditional densities. Independence, covariance and correlation. Sums of random variables and compounding. Multinomial and bivariate normal distributions. Law of large numbers and central limit theorem.

Lent term: Sampling distributions. Criteria of estimation: consistency, unbiasedness, efficiency, minimum variance. Sufficiency. Maximum likelihood estimation. Confidence intervals. Tests of simple hypotheses. Likelihood ratio tests. Wald tests, score tests. Introduction to linear regressions and least squares estimator.

Teaching: 20 hours of lectures, 9 hours of seminars and 10 hours of help sessions in the MT. 20 hours of lectures, 10 hours of seminars and 10 hours of help sessions in the LT. 4 hours of lectures in the ST.

Week 6 in both terms will be used for class tests.

Formative coursework: Students will be expected to produce 4 pieces of coursework in the MT and LT.

Indicative reading: G C Casella & R L Berger, Statistical Inference (primary reading); R Bartoszyński & M Niewiadomska-Bugaj, Probability and Statistical Inference (stresses comprehension of concepts rather than mathematics, supplementary reading only); J Jacod & P Protter, Probability Essentials (for further reading, a more advanced text on probability, using measure-theoretic concepts and tools, still very accessible).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ST205 Half Unit Sample Surveys and Experiments

This information is for the 2018/19 session.

Teacher responsible: Dr Nicholas Cron

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

For students who have studied mathematics and statistics to the level of MA107/ST107 Quantitative Methods or SA201 Research Methods for Social Policy.

Course content: Sampling methods for social surveys. Survey

design and estimation. Nonresponse and measurement error. Design of experiments and observational studies.

Teaching: 22 hours of lectures, 9 hours of classes and 2 hours of workshops in the MT.

Formative coursework: Weekly exercises and group presentations.

Indicative reading: S L Lohr, Sampling: Design and Analysis. (2nd Ed. 2010). F J Fowler, Survey Research Methods (4th Ed. 2009)

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Coursework (20%) in the MT.

ST206 Half Unit Probability and Distribution Theory

This information is for the 2018/19 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos COL.610

Availability: This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics, and Business. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102) and Mathematical Methods (MA100).

Course content: The course covers the probability and distribution theory needed for third year courses in statistics and econometrics.:

Events and their probabilities. Random variables. Discrete and continuous distributions. Moments, moment generating functions and cumulant generating functions. Functions of Random Variables. Monte Carlo Simulation in R. Joint distributions and joint moments. Marginal and conditional densities. Independence, covariance and correlation. Sums of random variables and compounding. Multinomial and bivariate normal distributions. Law of large numbers and central limit theorem.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 4 pieces of coursework which will consist of written exercises aimed at practising calculations and understanding of theory.

A formative in class exam-style assessment will be done in Week 6.

Indicative reading: G C Casella & R L Berger, Statistical Inference (primary reading); R Bartoszynski & M Niewiadomska-Bugaj, Probability and Statistical Inference (stresses comprehension of concepts rather than mathematics, complimentary reading only); J Jacod & P Protter, Probability Essentials (for further reading, a more advanced text on probability, using measure theoretic concepts and tools, still very accessible).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST211 Half Unit Applied Regression

This information is for the 2018/19 session.

Teacher responsible: Dr Sara Geneletti (Columbia House 5.07)

Availability: This course is available on the BSc in Business Mathematics and Statistics and BSc in Mathematics, Statistics, and Business. This course is available as an outside option to students on other programmes where regulations permit. This course is not available to General Course students.

Specifically the course is available to Accounting and Finance students who have taken ST102.

Pre-requisites: ST102

Course content: Statistical data analysis in R covering the following topics: Simple and multiple linear regression, Model diagnostics, Detection of outliers, Multicollinearity, Introduction to GLMs

Teaching: 10 hours of lectures and 20 hours of computer

workshops in the LT. 2 hours of lectures in the ST.

Students will be given their assessed project to start on in week 6 which is due in at the beginning of ST.

Formative coursework: Regular Moodle quizzes. Regular take home exercises.

Indicative reading: 1. Gelman and Hill, Data analysis Using Regression and Multilevel/Hierarchical models (CUP, 2007) First part.

2. Neter, J., Kutner, M., Nachtsheim, C. and Wasserman, W. Applied Linear Statistical Models, McGraw-Hill, Fourth Edition. (2004).

3. Abraham, B. Ledolter, J. Introduction to Regression Modelling, Thomson Brooks Cole. (2006).

4. S. Weisberg Applied Linear Regression, Wiley, 3rd edition. (2005) (intermediate).

5. Fox (2016) Applied Regression Analysis and Generalized Linear Models.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (45%) in the ST.

Project (5%) in the LT.

There are two projects, a mini-project in the LT reading week and a longer project due at the beginning of the ST.

ST213 Half Unit Introduction to Pricing, Hedging and Optimization

This information is for the 2018/19 session.

Teacher responsible: Prof Konstantinos Kardaras COL 6.07

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

Pre-requisites: MA203 Real Analysis. Must be taken with ST202 Probability, Distribution Theory and Inference.

Course content: This course introduces the concepts of valuation, hedging and portfolio selection in a discrete-time environment with full technicalities, and then treats continuous-time markets in a slightly more heuristic fashion. It covers the following topics:

- Martingale theory in discrete time.
- The binomial model; pricing and hedging. Trinomial model and incompleteness, arbitrage-free price intervals.
- General discrete-time models and the FTAP.
- Passage to continuous time Black & Scholes model; formal Ito calculus.
- Option-pricing with PDE methods, the Black & Scholes formula and Greeks; connections with risk-neutral measure, Feynman-Mac
- Portfolio optimisation (Merton's problem) in the standard Black & Scholes market

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Indicative reading: Lecture notes will be provided.

Stochastic Calculus for Finance I: The Binomial Asset Pricing Model, by Steven Shreve, Springer

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

ST226 Half Unit Actuarial Investigations: Financial

This information is for the 2018/19 session.

Teacher responsible: Prof Angelos Dassios

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business

Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: Introduction to actuarial modelling.

The application of compound interest techniques to financial transactions.

Describing how to use a generalised cash-model to describe financial transactions such as a zero-coupon bond, a fixed interest security, an index-linked security, cash on deposit, an equity, an interest only loan, a repayment loan, an annuity certain and others. The time value of money using the concepts of compound interest and discounting.

Accumulation of payments and present value of future payments. Variable interest rates.

The calculation of the present value and the accumulated value of a stream of equal or unequal payments using specified rates of interest and the net present value at a real (possibly variable) rate of interest, assuming a constant rate of inflation.

Compound interest rate functions; definitions and use. Equations of value with certain and uncertain payments and receipts.

Introduction to life insurance. Life, assurance and annuity functions. Calculating means and variances of contracts with contingent payments.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: Students will be expected to give written answers to a number of problem sets.

Indicative reading: J J McCutcheon & W J Scott, An Introduction to the Mathematics of Finance, Heinemann; Institute of Actuaries, Formulae and Tables for Actuarial Examinations. Core reading notes obtainable from the Institute of Actuaries.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST227 Half Unit Survival Models

This information is for the 2018/19 session.

Teacher responsible: Dr George Tzougas

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102).

Course content: An introduction to stochastic processes with emphasis on life history analysis and actuarial applications. Principles of modelling; model selection, calibration, and testing; Stochastic processes and their classification into different types by time space, state space, and distributional properties; construction of stochastic processes from finite-dimensional distributions, processes with independent increments, Poisson processes and renewal processes and their applications in general insurance and risk theory, Markov processes, Markov chains and their applications in life insurance and general insurance, extensions to more general intensity-driven processes, counting processes, semi-Markov processes, stationary distributions. Determining transition probabilities and other conditional probabilities and expected values; Integral expressions, Kolmogorov differential equations, numerical solutions, simulation techniques. Survival models - the random life length approach and the Markov chain approach; survival function, conditional survival function, mortality intensity, some commonly used mortality laws. Statistical inference for life history data; Maximum likelihood estimation for parametric models, non-parametric methods (Kaplan-Meier and Nelson-Aalen), regression models for intensities including

the semi-parametric Cox model and partial likelihood estimation; Various forms of censoring; The technique of occurrence-exposure rates and analytic graduation; Impact of the censoring scheme on the distribution of the estimators; Confidence regions and hypothesis testing.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 3 hours of lectures and 1 hour of seminars in the ST.

Students on this course will have a reading week in week 6 where they will be given review exercises to work on based on the first 5 weeks of the course.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: S Ross, Stochastic Processes; R Norberg, Risk and Stochastics in Life Insurance; The Institute of Actuaries, Core reading Subject CT4. For full details of the syllabus of CT4, see http://stats.lse.ac.uk/angelos/guides/2004_CT4.pdf.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ST300 Half Unit Regression and Generalised Linear Models

This information is for the 2018/19 session.

Teacher responsible: Dr Xinghao Qiao

Availability: This course is compulsory on the BSc in Statistics with Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics, and Business. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed:

EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Elementary Statistical Theory (ST102).

Course content: A solid coverage of the most important parts of the theory and application of regression models, generalised linear models and the analysis of variance. Analysis of variance models; factors, interactions, confounding. Multiple regression and regression diagnostics. Generalised linear models; the exponential family, the linear predictor, link functions, analysis of deviance, parameter estimation, deviance residuals. Model choice, fitting and validation. The use of a statistics package will be an integral part of the course. The computer workshops revise the theory and show how it can be applied to real datasets.

Teaching: 10 hours of lectures and 9 hours of classes in the MT. 10 hours of lectures and 9 hours of classes in the LT. 1 hour of lectures in the ST.

Week 6 reading week in MT will be for revision of taught materials, while week 6 reading week in LT will be for your project completion.

Indicative reading: D C Montgomery, E A Peck & G G Vining, Introduction to Linear Regression Analysis; D C Montgomery, Design and Analysis of Experiments; A J Dobson, An Introduction to Generalised Linear Models; P McCullagh & J A Nelder, Generalized Linear Models; A C Atkinson, Plots, Transformations and Regression; A C Atkinson & M Riani, Robust Diagnostic Regression Analysis; JJ Faraway, Linear Models with R; JJ Faraway, Extending the linear Model with R. Related items from the Institute of Actuaries, Core reading Subject CT6. For full details of the syllabus of CT6, see http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

Assessment: Exam (85%, duration: 2 hours) in the summer exam period.

Project (15%) in the LT.

ST301 Half Unit Actuarial Mathematics (Life)

This information is for the 2018/19 session.

Teacher responsible: Dr George Tzougas

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed:

EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206)
AND Survival Models (ST227).

Course content: Single life mortality models, assurance and annuity contracts and their actuarial notation, computation of their present values and variances; relations among the present values of the various contracts.

The equivalence principle: computation of net premiums for the main assurance policies.

Prospective and retrospective reserves, Thiele's differential equation as the main tool for the computation of reserves.

Expenses: gross premium and gross reserves. Selection effect and how it affects mortality tables.

Multi-life assurance contracts: joint life and last survival life, computation of premiums and reserves for the main two-lives contracts.

Multi-states mortality models: basic notions of continuous-time Markov chains, Kolmogorov backward and forward equations, application to multiple decrements and disability models, computation of transition intensities.

Thiele differential equation for multi-states models, computation and analysis of reserves for main multi-state policies.

With-profit policies, unit-linked assurance policies, pensions.

Interplay between assurance and finance: embedded options, market consistent actuarial valuation.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Week 6 will be a reading week.

Formative coursework: Compulsory written answers to one set of problems.

Indicative reading: R Norberg, Basic Life Insurance Mathematics; The Institute of Actuaries, Core reading Subject CT5 Dickson, Hardy, Waters, 'Actuarial Mathematics for Life Contingent Risks'. Wutrich, Buhlmann, Furrer, 'Market Consistent Actuarial Valuation'

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST302 Half Unit Stochastic Processes

This information is for the 2018/19 session.

Teacher responsible: Prof Umut Cetin COL6.08

Availability: This course is compulsory on the BSc in Actuarial Science. This course is available on the BSc in Business Mathematics and Statistics, BSc in Financial Mathematics and Statistics, BSc in Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed either Probability, Distribution Theory and Inference (ST202) or Probability and Distribution Theory (ST206).

Course content: A second course in stochastic processes and applications to insurance. Markov chains (discrete and continuous time), processes with jumps; Brownian motion and diffusions;

Martingales; stochastic calculus; applications in insurance and finance. Content: Stochastic processes in discrete and continuous time; Markov chains: Markov property, Chapman-Kolmogorov equation, classification of states, stationary distribution, examples of infinite state space; filtrations and conditional expectation; discrete time martingales: martingale property, basic examples, exponential martingales, stopping theorem, applications to random walks; Poisson processes: counting processes, definition as counting process with independent and stationary increments, compensated Poisson process as martingale, distribution of number of events in a given time interval as well as inter-event times, compound Poisson process, application to ruin problem for the classical risk process via Gerber's martingale approach; Markov processes: Kolmogorov equations, solution of those in simple cases, stochastic semigroups, birth and death chains, health/sickness models, stationary distribution; Brownian motion: definition and basic properties, martingales related to Brownian motion, reflection principle, Ito-integral, Ito's formula with simple applications, linear stochastic differential equations for geometric Brownian motion and the Ornstein-Uhlenbeck process, first approach to change of measure techniques, application to Black-Scholes model. The items in the course content that also appear in the content of ST227 are covered here at greater depth. However, ST227 is not a pre-requisite for this course.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. Week 6 will be a reading week left free for students to revise by themselves.

Formative coursework: Compulsory written answers to two sets of problems.

Indicative reading: R Durrett, Essentials of Stochastic Processes; T Mikosch, Elementary Stochastic Calculus with Finance in View; Institute of Actuaries core reading notes.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

ST303 Half Unit Stochastic Simulation

This information is for the 2018/19 session.

Teacher responsible: Prof Angelos Dassios COL6.14

Availability: This course is available on the BSc in Actuarial Science. This course is not available as an outside option nor to General Course students. Course capped at 60.

Pre-requisites: Students must have completed:

EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206)
AND Stochastic Processes (ST302).

While the course ST306 is not a formal pre-requisite some examples from this course will be used. Students that have not taken ST306 might have to do a bit of extra reading to familiarise themselves with them.

Course content: An introduction to using R for stochastic simulation as well as methods of simulating random variables, complicated quantities involving several random variables and paths of stochastic processes. Applications will focus on examples from insurance and finance.

Teaching: 20 hours of lectures, 10 hours of computer workshops and 10 hours of help sessions in the LT.

- Introduction to R with an emphasis on stochastic simulation.
- Monte-Carlo integration.
- Generating continuous random variables; inverse distribution function method.
- Generating continuous random variables; acceptance rejection method.
- Generating continuous random variables; sums of random variables.
- Generating continuous random variables; other methods. Normal and Inverse Gaussian distributions.
- Generating discrete random variables.

- Generating the paths of stochastic processes; Insurance loss process; Brownian motion; Ornstein-Uhlenbeck process.
- Various applications in insurance and finance.

There will be a Q&A session on practical issues in week 11.

Formative coursework: Weekly exercises usually involving computing.

Indicative reading:

- Introducing Monte Carlo methods with R (main reference), by G. Robert and G. Casella.

Useful reading:

- Asmussen
- Glasserman

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (25%) in the LT.

Project (25%) in the ST.

ST304 Half Unit Time Series and Forecasting

This information is for the 2018/19 session.

Teacher responsible: Dr Matteo Barigozzi COL.7.11

Availability: This course is compulsory on the BSc in Statistics with Finance. This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics with Economics and BSc in Mathematics, Statistics, and Business. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: 2nd year statistics and probability

Course content: The course introduces the student to the statistical analysis of time series data and simple models. What time series analysis can be useful for; autocorrelation; stationarity, trend removal and seasonal adjustment, basic time series models; AR, MA, ARMA; invertibility; spectral analysis; estimation; forecasting; introduction to financial time series and the GARCH models; unit root processes.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be a reading week in week 6.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Brockwell & Davis, Introduction to Time Series and Forecasting; Brockwell & Davis, Time Series: Theory and Methods. C Chatfield, The Analysis of Time Series.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST306 Half Unit Actuarial Mathematics (General)

This information is for the 2018/19 session.

Teacher responsible: Dr Luciano Campi

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302).

Course content: An introduction to actuarial work in non-life insurance. Decision theory concepts: game theory, optimum strategies, decision functions, risk functions, the minimax criterion and the Bayes criterion. Loss distributions with and without limits and risk-sharing arrangements; suitable, moments and moment generating functions, the gamma, exponential, Pareto,

generalised Pareto, normal, lognormal, Weibull, Burr and other distributions suitable for modelling individual and aggregate losses; statistical inference. Risk models involving frequency and severity distributions; the basic short-term contracts, moments, moment generating functions and other properties of compound distributions. Reinsurance treaties; proportional, excess of loss, stop-loss, deriving the distribution, moments, moment generating functions and other properties of the losses to the insurer and reinsurer under all the models above. Ruin theory for continuous and discrete models. Fundamental concepts of Bayesian statistics; Bayes theorem, prior distributions, posterior distributions, conjugate prior distributions, loss functions, Bayesian estimators. Credibility theory; Bayesian models. Experience rating models and applications. Claims reserving: run-off triangles. Monte-Carlo simulation and applications in insurance.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be a reading week and a take home mock exam in week 6.

Formative coursework: Compulsory written answers to one set of problems. There will also be a mock exam during week 6.

Indicative reading: Notes are given out in the lectures. The Institute of Actuaries, Core reading Subject CT6.

For full details of the syllabus of CT6, see:

http://stats.lse.ac.uk/angelos/guides/2004_CT6.pdf.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

ST307 Half Unit Aspects of Market Research

This information is for the 2018/19 session.

Teacher responsible: Dr James Abdey COL.5.10

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students. Not to be taken with ST327.

Pre-requisites: Probability and statistics to the level of ST107.

Course content: The main ideas and applications of market research techniques. Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, and discriminant analysis.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 1 hour of classes in the ST.

Lectures will run in weeks 1-10 and classes in weeks 2-11.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Malhotra, N.K., D. Nunan and D.F. Birks (2017) *Marketing Research: An Applied Research* (Fifth edition), Pearson (earlier editions are also fine)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST308 Half Unit Bayesian Inference

This information is for the 2018/19 session.

Teacher responsible: Dr Wai-Fung Lam COL.6.09

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in

Mathematics with Economics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: Students must have completed Mathematical Methods (MA100) and Elementary Statistical Theory (ST102). ST202 is also recommended.

Course content: Statistical decision theory: risk, decision rules, loss and utility functions, Bayesian expected loss, Frequentist risk. Bayesian Analysis: Bayes theorem, prior, posterior and predictive distributions, conjugate models (Normal-Normal, Poisson-Gamma, Beta-Binomial), Bayesian point estimation, credible intervals and hypothesis testing, Bayes factors and model selection. Comparison with Frequentist approaches.

Implementation: Asymptotic approximations (Laplace approximation, Monte Carlo methods, stochastic simulation), Markov Chain Monte Carlo (MCMC) simulation (Gibbs sampler, Metropolis-Hastings algorithm). Computer tools (R, WinBUGS). Illustration via applications in Regression (Linear, ANOVA, Multiple, Generalized Linear Models), Hierarchical/ Multilevel Models and Time Series.

Teaching: 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST.

There will be no reading week in week 6, but there will be no lectures and classes in week 11.

Formative coursework: Optional problem sets and computer exercises.

Indicative reading: P.M. Lee, Bayesian Statistics. An introduction. J.O. Berger, Statistical Decision Theory and Bayesian Analysis. D. Gamerman, H. F. Lopes, Markov Chain Monte Carlo: Stochastic Simulation for Bayesian Inference. A. Gelman, Bayesian data analysis.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Project (20%) in the ST.

ST309 Half Unit Elementary Data Analytics

This information is for the 2018/19 session.

Teacher responsible: Prof Qiwei Yao Col.7.16

Availability: This course is available on the BSc in Accounting and Finance. This course is available as an outside option to students on other programmes where regulations permit. This course is available with permission to General Course students.

This course is available as an outside option to the students who are interested in data analytics and who have statistical background at least equivalent to ST107 or ST108. No prior knowledge in programming is required.

This course is capped at 60 for the 2018/19 session.

Pre-requisites: Students must have completed a statistical course at least equivalent to Quantitative Methods (Statistics) (ST107) or Statistical Methods for the Social Sciences (ST108).

Course content: The primary focus of this course is to help students view various problems from business, economy/finance, and social domains from a data perspective and understand the principles of extracting useful information and knowledge from data. Students will also gain the hands-on experience using R – a programming language and software environment for data analysis and visualisation. Learning basic data analytic methods and techniques is combined with real-life examples.

The core contents of the course include data cleansing, data transformation, data visualisation, R-programming, classification, regression, clustering, over-fitting avoidance and model evaluation. The course also covers a subset of the following topics: illustration of R-access of databases and big data platforms, illustration of parallel computing in R, similarity matching, market-basket analysis, link prediction, text mining, network analysis, causal modelling.

This is not a course on algorithms and IT technologies required for

handling massive data, which deserve separate courses. The focus is on the fundamental principles and concepts of data analytics or data science. It becomes ever-increasingly important in this information age to gain adequate understanding of data science even if one never intends to apply it oneself.

Teaching: 20 hours of lectures, 5 hours of seminars and 5 hours of computer workshops in the MT.

Students are encouraged to install R in their own laptops, and to use their own laptops in the workshops.

Formative coursework: Students will be expected to produce 5 exercises and 5 other pieces of coursework in the MT.

Five sets of work on data analysis using R are for Weeks 1, 3, 5, 8 and 10. Five sets of exercise are for Weeks 2, 4, 7, 9 and 11.

Indicative reading: Wickham, H. and Grolemund, G. (2017). R for Data Science. O'Reilly. Available online at <http://r4ds.had.co.nz>. James, G., Witten, D., Hastie, T. and Tibshirani, R. (2013). An Introduction to Statistical Learning with Applications in R. Springer. Available online at <http://www-bcf.usc.edu/~gareth/ISL>. Provost, F. and Fawcett, T. (2013). Data Science for Business. O'Reilly. Zuur, A., Ieno, E. and Meesters, E. (2009). A Beginner's Guide to R. Springer. Available online from LSE Library. Hastie, T., Tibshirani, R. and Friedman, R. (2009). The Elements of Statistical Learning: Data Mining, Inference, and Prediction. 2nd Edition. Springer. Available online at <https://web.stanford.edu/~hastie/Papers/ESLII.pdf>. Silge, J. and Robinson, D. (2017). Text Mining with R: a tidy approach. O'Reilly. Available online at <https://www.tidytextmining.com>. Wickham, H. (2016). ggplot2: Elegant Graphics for Data Analysis. Springer. Available online at <http://moderngraphics11.pbworks.com/f/ggplot2-Book09hWickham.pdf>

Assessment: Coursework (30%) in the MT.

Project (70%) in the LT.

The project will be a group project with maximum 3 members per group. The detailed instruction will be handed out in Week 5 of Michaelmas term, and students need to submit a written report by Week 2 of Lent term.

Students are required to hand in the solutions for 2 sets of exercises (5% each) and 2 sets of data analysis using R (10% each).

ST312 Half Unit Applied Statistics Project

This information is for the 2018/19 session.

Teacher responsible: Dr Wicher Bergsma COL.6.06

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is not available as an outside option nor to General Course students.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Course content: Students will produce a project involving a critical investigation and collation of statistical data on a topic of their own interest.

Teaching: 9 hours of seminars and 3 hours of workshops in the MT. 7 hours of workshops in the ST.

Students on this course will have a research week in week 6 where they can look up data sources for their assessed project.

Formative coursework: Oral presentation at the end of MT.

Indicative reading: ukdataservice.ac.uk, www.google.com/publicdata, data.worldbank.org

Assessment: Project (90%) and presentation (10%) in the ST.

ST326 Half Unit Not available in 2018/19 Financial Statistics

This information is for the 2018/19 session.

Teacher responsible: Prof Pauline Barrieu COL 6.03

Availability: This course is compulsory on the BSc in Financial Mathematics and Statistics. This course is available on the BSc in Actuarial Science. This course is available with permission as an outside option to students on other programmes where regulations permit and to General Course students.

Pre-requisites: ST202 Probability, Distribution Theory and Inference.

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, Markowitz portfolio theory and the Capital Asset Pricing Model, statistics and machine learning in financial forecasting, Value at Risk, simple trading strategies, statistics of fixed income finance, derivative instruments from the statistical viewpoint.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Indicative reading: Lecture notes will be provided
Lai, T.L. And Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Yao (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST327 Market Research: An Integrated Approach

This information is for the 2018/19 session.

Teacher responsible: Dr James Abdey COL 5.10 and Mr Karsten Shaw

Availability: This course is available on the BSc in Business Mathematics and Statistics, BSc in Management, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is available as an outside option to students on other programmes where regulations permit and to General Course students.

Not to be taken with ST307.

Pre-requisites: Students must have completed one of the following: Elementary Statistical Theory (ST102), Statistics for Management Sciences (ST203), Econometrics: Theory and Applications (MG205), Analytical Methods for Management (MG202), or equivalent.

Course content: The main ideas and applications of market research techniques. ST327.1 Topics covered are introduction to market research, defining the market research problem, research design, internal secondary data and the use of databases, qualitative research: focus group discussions, projective techniques, survey and quantitative observation techniques, measurement and scaling: fundamentals, comparative and non-comparative scaling, questionnaire design, sampling: design and procedures, final and initial sample size determination, cross-tabulation and hypothesis testing, analysis of variance and covariance, correlation and regression, discriminant analysis, factor analysis, cluster analysis and conjoint analysis. ST327.2 Case Studies: Students use the information and techniques gained

from ST327.1 to carry out a co-operative Market Research Case Study. Individual write up of the Case Study forms part of the assessment.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 6 hours of lectures in the LT. 1 hour of classes in the ST.

Lectures will run in weeks 1-10 and classes in weeks 2-11.

Formative coursework: Students are given weekly exercises to work on for discussion in class.

Indicative reading: Malhotra, N.K., D. Nunan and D.F. Birks (2017) *Marketing Research: An Applied Research* (Fifth edition), Pearson (earlier editions are also fine).

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Coursework (25%) in the ST.

Presentation (15%) in the LT.

The assessed Case Study work is split into two parts; a group presentation and an individual piece of coursework.

ST330 Stochastic and Actuarial Methods in Finance

This information is for the 2018/19 session.

Teacher responsible: Prof Pauline Barrieu COL 6.03 and Dr Erik Baurdoux COL 6.04

Availability: This course is available on the BSc in Actuarial Science, BSc in Business Mathematics and Statistics, BSc in Mathematics, Statistics, and Business and BSc in Statistics with Finance. This course is not available as an outside option. This course is available to General Course students.

Pre-requisites: Students must have completed: EITHER Probability, Distribution Theory and Inference (ST202) OR Probability and Distribution Theory (ST206) AND Stochastic Processes (ST302).

Course content: Theories of financial market behaviour.

Applications of stochastic processes and actuarial models in finance. Utility theory. Stochastic dominance and portfolio selection. Measures of investment risk. Mean-variance portfolio theory. Single and multifactor models. The Capital Asset Pricing Model. The efficient market hypothesis.

Introduction to financial markets. Model-free relationships.

Stochastic models for security prices and interest rates and

estimating their parameters. Option pricing: general framework

in discrete and continuous time, the Black-Scholes analysis and

numerical procedures (binomial models and Cox-Ross-Rubinstein

models). The term structure of interest rates: the Vasicek, the Cox-

Ingersoll-Ross and other models. Introduction to credit risk.

Teaching: 20 hours of lectures and 10 hours of seminars in the

MT. 20 hours of lectures and 10 hours of seminars in the LT.

Students will work on and submit formative coursework towards

the end of MT and a second set of formative coursework towards

the end of LT. Feedback and solutions will be provided

Formative coursework: Two sets of hand-in exercises will also be given during the year.

Indicative reading: N H Bingham & R Kiesel, Risk Neutral Valuation; A Cerny, Mathematical Techniques in Finance: Tools for Incomplete Markets; J Hull, Options, Futures & Other Derivatives; R Jarrow & S Turnbull, Derivative Securities; D Luenberger, Investment Science; Institute of Actuaries core reading notes, Subject CT8.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

Diploma Programme Regulations

Key to Diploma Regulations
(H) means a half-unit course

Students must take four courses as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper Course number, title (unit value)

Year 1

Paper 1 FM212 Principles of Finance (1.0) #

Or

By special permission of the Course Leaders, students may substitute FM212 with one of the following:

FM300 Corporate Finance, Investments and Financial Markets (1.0) #***or**

FM320 Quantitative Finance (1.0) #*

Paper 2 Courses to the value of 1.0 unit(s) from the following:

AC211 Managerial Accounting (1.0) #**or**

AC330 Financial Accounting, Analysis and Valuation. (1.0) #**or**

AC490 Management Accounting, Decisions and Control (0.5) **and** AC491 Financial Accounting, Reporting and Disclosure (0.5)

Papers 3 & 4 Courses to the value of 2.0 unit(s) from the following:

AC211 Managerial Accounting (1.0) #

AC310 Management Accounting, Financial Management and Organisational Control (1.0) #

AC330 Financial Accounting, Analysis and Valuation. (1.0) #

AC470 Accounting in the Global Economy (0.5) #

EC201 Microeconomic Principles I (1.0) #

EC202 Microeconomic Principles II (1.0) #

EC210 Macroeconomic Principles (1.0) #

EC220 Introduction to Econometrics (1.0) #

EC313 Industrial Economics (1.0) #

EH240 Business and Economic Performance since 1945: Britain in International Context (1.0)

LL209 Commercial and Enterprise Law (1.0) (withdrawn 2018/19)

MA107 Quantitative Methods (Mathematics) (0.5) #

MG203 Organisational Theory and Behaviour (1.0) (withdrawn 2018/19)

MG4G4 Topics in Management Research (0.5) #

ST107 Quantitative Methods (Statistics) (0.5) #

Any other course with the approval of the Programme Director, by special permission only.

Exam sub-board local rules [lse.ac.uk/resources/calendar/](https://info.lse.ac.uk/resources/calendar/LocalRules/ExamSubboard.htm)

LocalRules/ExamSubboard.htm

Academic-year programme. Students must take courses to the value of four units as shown.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Prerequisite Course	Students who wish to take AC416 in Papers 2, 3 or 4 are required to take the following course which runs over a 9-day period before the start of MT: AC480 Quantitative Methods in Accounting and Finance (0.0)
Paper 1	Courses to the value of 1.0 unit(s) from the following: FM430 Corporate Finance and Asset Markets (1.0) # Or FM429 Asset Markets A (0.5) # and FM431L Corporate Finance A (0.5) # or FM431M Corporate Finance A (0.5) # Or another approved paper by special permission only.
Paper 2	Courses to the value of 1.0 unit(s) from the following: AC411 Accounting, Strategy and Control (0.5) and AC415 Management Accounting for Decision Making (0.5) or AC415 Management Accounting for Decision Making (0.5) and AC416 Topics in Financial Reporting (0.5) #1 or AC416 Topics in Financial Reporting (0.5) # and AC417 Corporate Financial Disclosure and Investor Relations (0.5) 2 or AC411 Accounting, Strategy and Control (0.5) and AC416 Topics in Financial Reporting (0.5) #
Papers 3 & 4	Courses to the value of 2.0 unit(s) from the following: AC411 Accounting, Strategy and Control (0.5) AC412 Accountability, Organisations and Risk Management (0.5) AC415 Management Accounting for Decision Making (0.5) AC416 Topics in Financial Reporting (0.5) #3 AC417 Corporate Financial Disclosure and Investor Relations (0.5) AC444 Valuation and Security Analysis (0.5) # AC470 Accounting in the Global Economy (0.5) # FM402 Financial Risk Analysis (0.5) # FM404 Forecasting Financial time Series (0.5) #

FM412	Quantitative Security Analysis (0.5) #
FM413	Fixed Income Markets (0.5) #
FM421	Applied Corporate Finance (0.5) #
FM441	Derivatives (0.5) #
FM442	Quantitative Methods for Finance and Risk Analysis (0.5) #
FM445	Portfolio Management (0.5)
FM447	Global Financial Systems (0.5) #
FM472	International Finance (0.5)
FM476	Entrepreneurial Finance (0.5) #
GY462	Real Estate Finance (0.5)
LL4BK	Corporate Crime (0.5)
LL4BL	Financial Crime (0.5)
MG4D5	Leadership in Organisations: Theory and Practice (0.5)

Any other course by special permission only.

Students can also take a dissertation in **either** accounting **or** finance (students cannot take two dissertations):

AC499 Dissertation (1.0) 4

FM499 Dissertation (1.0) 5 (not available 2018/19)

Students taking FM404 or FM442 can apply for a place on the following non-assessed computer course:

FM457 Applied Computational Finance (0.0)

Prerequisite Requirements and Mutually

Exclusive Options

1 : Before taking AC416 you must take AC480

2 : Before taking AC416 you must take AC480

3 : Before taking AC416 you must take AC480

4 : AC499 can not be taken with FM499

5 : FM499 can not be taken with AC499

means there may be prerequisites for this course. Please view the course guide for more information.

Notes

Students may elect to have their degree specialisation indicated on their degree certificate.

Students who take both AC470 and FM472 as Paper 3 may choose to have **MSc Accounting and**

Finance: International Accounting and Finance on their certificate. Students who take two half units

of AC411 or AC415 or AC416 or AC417 as Paper 3 may choose to have **MSc Accounting and Finance:**

Accounting and Financial Management on their certificate. Students taking finance courses to the

equivalent of two full units as Papers 3 and 4 may choose to have **MSc Accounting and Finance:**

Finance on their certificate.

The Bologna Process [lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm](https://info.lse.ac.uk/resources/calendar/programmeRegulations/taughtMasters/Bologna%20Process.htm) facilitates comparability

and compatibility between higher education systems across the European Higher Education Area. Some of the School's taught master's

programmes are nine or ten months in duration. If you wish to proceed from these programmes

to higher study in EHEA countries other than the UK, you should be aware that their recognition for

such purposes is not guaranteed, due to the way in which ECTS credits are calculated.

MSc in Accounting, Organisations and Institutions

Programme Code: TMACORIN

Department: Accounting

For students starting this programme of study in 2018/19

Year 1	
Paper 1	DV418 African Development (0.5) and DV435 African Political Economy (0.5)
Paper 2	A choice of: DV400 Development: History, Theory and Policy (1.0) # or DV431 Development Management (1.0)
	Or A combination of: DV442 Key Issues in Development Studies (0.5) and one of the following: DV420 Complex Emergencies (0.5) DV421 Global Health and Development (0.5) DV424 International Institutions and Late

Paper 3	Development (0.5)	GY409	Globalization and Regional Development (0.5) (not available 2018/19)
	DV428 Managing Humanitarianism (0.5)	GY410	Economics of Local and Regional Development (0.5)
	Courses to the value of 1.0 unit(s) from the following:	GY421	Gender and Development : Geographical Perspectives (0.5) # (not available 2018/19)
	AN436 The Anthropology of Development (0.5)	GY423	Environment and Development (1.0) #
	DV407 Poverty (0.5) (not available 2018/19)	GY431	Cities, People and Poverty in the South (0.5) #
	DV411 Population and Development: an Analytical Approach (0.5)	GY432	Urban Ethnography (0.5) (not available 2018/19)
	DV413 Environmental Problems and Development Interventions (0.5) #	GY447	The Economics of Regional and Urban Planning (0.5) #
	DV415 Global Environmental Governance (0.5)	GY464	Race and Space (0.5) (not available 2018/19)
	DV423 Global Political Economy of Development (0.5) #	GY467	Global Migration and Development (0.5) (not available 2018/19)
	DV424 International Institutions and Late Development (0.5)	GY468	Environment and Development: Sustainability, Technology and Business (0.5) #
	DV432 China in Developmental Perspective (0.5) #	GY469	Environment and Development: Ecosystem Services and the Global South (0.5) #
	DV433 The Informal Economy and Development (0.5)	IR461	Islam in World Politics (1.0)
	DV434 Human Security (0.5)	MG402	Public Management: A Strategic Approach (0.5)
	DV444 Global Health and Population Change (0.5) #	MG4B7	Organisational Change (0.5)
	DV447 Public Affairs, International Development and Gendered Violence (0.5) # (not available 2018/19)	SA4E6	Rural Development and Social Policy (0.5) #
	DV453 International Development Consultancy Project (0.5)	Other relevant courses with permission of degree programme and course managers.	
	DV454 Gender, labour markets and social change in the Global South: theory, evidence, public action (0.5) #	Paper 2 options list	
	DV455 Advocacy, Campaigning and Grassroots Activism (0.5)	DV410	Research Design and Dissertation in International Development (1.0)
	DV456 Population, Health and Development: Evidence and Projections (0.5) #	MY410	Fundamentals of Research Design for International Development (0.0) #
	DV457 Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation (0.5)	DV445	Cutting Edge Issues in Development Thinking & Practice (0.0)
	DV460 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) #	Paper 2 options list	
	DV480 Revolution and Development (0.5) # (not available 2018/19)	DV400	Development: History, Theory and Policy (1.0) #
	DV483 Information Communication Technologies and Socio-economic Development (0.5)	DV420	Complex Emergencies (0.5)
	DV490 Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5)	DV421	Global Health and Development (0.5)
	DV491 Economic Development Policy II: Microeconomic Analysis (0.5) #	DV424	International Institutions and Late Development (0.5)
	DV492 Economic Development Policy III: Government Policy Analysis (0.5) #	DV428	Managing Humanitarianism (0.5)
	GI409 Gender, Globalisation and Development: An Introduction (0.5)	DV431	Development Management (1.0)
	GI411 Gender, Postcoloniality, Development: Critical Perspectives and New Directions (0.5) # (not available 2018/19)	DV442	Key Issues in Development Studies (0.5)
	GI418 Feminist Economics and Policy: An Introduction (0.5) #	# means there may be prerequisites for this course. Please view the course guide for more information.	
	GI420 Globalisation, Gender and Development: Theorising Policy and Practice (0.5)	This programme has been discontinued. Last year of entry 2018/19.	
	GV483 Public Management Theory and Doctrine (0.5)		
	GV4C2 Globalisation, Conflict and Post-Conflict Reconstruction (0.5) (not available 2018/19)		
	GY403 Contemporary Debates in Human Geography (0.5)		
	GY407 Globalization, Regional Development and Policy (1.0) # (not available 2018/19)		
	GY408 Local Economic Development and Policy (1.0) (not available 2018/19)		
Paper 4		DV410	Research Design and Dissertation in International Development (1.0)
		MY410	Fundamentals of Research Design for International Development (0.0) #
		DV445	Cutting Edge Issues in Development Thinking & Practice (0.0)
		Paper 2 options list	
		DV400	Development: History, Theory and Policy (1.0) #
		DV420	Complex Emergencies (0.5)
		DV421	Global Health and Development (0.5)

		# means there may be prerequisites for this course. Please view the course guide for more information.	
		This programme has been discontinued. Last year of entry 2018/19.	

MSc in Anthropology and Development

Programme Code: TMANDV

Department: Anthropology

For students starting this programme of study in 2018/19
 Classification scheme for the award of a taught master's degree
<https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeTaughtMasters.pdf>
 Exam sub-board local rules [lse.ac.uk/resources/calendar/LocalRules/ExamSubboard.htm](https://info.lse.ac.uk/resources/calendar/LocalRules/ExamSubboard.htm)
 Full-year programme. Students must take two compulsory courses, a dissertation and optional courses to the value of one unit. Written papers will be taken in the summer term and the dissertation must be submitted in September. Attendance at

seminars and at non-assessed tutorials is compulsory.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and may be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper	Course number, title (unit value)
Paper 1	AN436 The Anthropology of Development (0.5) and either
	AN456 Anthropology of Economy (1): Production and Exchange (0.5) or
	AN457 Anthropology of Economy (2): Transformation and Globalisation (0.5)
Paper 2	DV400 Development: History, Theory and Policy (1.0) # Or DV442 Key Issues in Development Studies (0.5) and 0.5 units from the following: Paper 3 DV courses options list
Paper 3	Courses to the value of 1.0 unit(s) from the following:
	AN402 The Anthropology of Religion (1.0)
	AN404 Anthropology: Theory and Ethnography (1.0)
	AN405 The Anthropology of Kinship, Sex and Gender (1.0)
	AN419 The Anthropology of Christianity (0.5)
	AN420 The Anthropology of Southeast Asia (0.5)
	AN424 The Anthropology of Melanesia (0.5) (not available 2018/19)
	AN437 Anthropology of Learning and Cognition (1.0) (withdrawn 2018/19)
	AN439 Anthropology and Human Rights (0.5) (withdrawn 2018/19)
	AN444 Investigating the Philippines - New Approaches and Ethnographic Contexts (0.5) # (not available 2018/19)
	AN447 China in Comparative Perspective (1.0)
	AN451 Anthropology of Politics (0.5)
	AN458 Children and Youth in Contemporary Ethnography (0.5)
	AN459 Anthropology and Media (0.5) (not available 2018/19)
	AN461 Anthropological Approaches to Questions of Being (0.5)
	AN463 Borders and Boundaries: Ethnographic Approaches (0.5) (not available 2018/19)
	AN467 The Anthropology of South Asia (0.5)
	AN469 The Anthropology of Amazonia (0.5) (not available 2018/19)
	AN473 Anthropological Approaches to Value (0.5) (not available 2018/19)
	AN474 Subjectivity and Anthropology (0.5) # (not available 2018/19)
	AN475 The Anthropology of Revolution (0.5) (not available 2018/19)
	AN476 Anthropology and the Anthropocene (0.5) (not available 2018/19)
	AN477 Topics in the Anthropology of sub- Saharan Africa (0.5) #
	AN478 Anthropology and Global History (0.5) #
	AN479 Anthropology of Law (0.5) (not available 2018/19)
	DV407 Poverty (0.5) (not available 2018/19)
	DV413 Environmental Problems and Development Interventions (0.5) #
	DV415 Global Environmental Governance (0.5)
	DV418 African Development (0.5)
	DV420 Complex Emergencies (0.5)
	DV428 Managing Humanitarianism (0.5)
	DV429 Global Civil Society (0.5) (withdrawn 2018/19)

DV480	Revolution and Development (0.5) # (not available 2018/19)
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5)
DV491	Economic Development Policy II: Microeconomic Analysis (0.5) #
DV492	Economic Development Policy III: Government Policy Analysis (0.5) #
GY467	Global Migration and Development (0.5) (not available 2018/19)

Any other courses offered by Anthropology or
International Development, as approved.

Papers 1 & 2 options list

Paper 4

AN499 Dissertation (1.0)

Papers 1 & 2 options list

AN436	The Anthropology of Development (0.5)
AN456	Anthropology of Economy (1): Production and Exchange (0.5)
AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
DV400	Development: History, Theory and Policy (1.0) #
DV442	Key Issues in Development Studies (0.5)

Paper 3 DV courses options list

DV407	Poverty (0.5) (not available 2018/19)
DV413	Environmental Problems and Development Interventions (0.5) #
DV415	Global Environmental Governance (0.5)
DV418	African Development (0.5)
DV420	Complex Emergencies (0.5)
DV428	Managing Humanitarianism (0.5)
DV429	Global Civil Society (0.5) (withdrawn 2018/19)
DV480	Revolution and Development (0.5) # (not available 2018/19)
DV490	Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development (0.5)
DV491	Economic Development Policy II: Microeconomic Analysis (0.5) #
DV492	Economic Development Policy III: Government Policy Analysis (0.5) #

means there may be prerequisites for this
course. Please view the course guide for more
information.

	MA429	Algorithmic Techniques for Data Mining (0.5) #
	MA430	Efficient Algorithms For Hard Optimisation Problems (0.5) # (not available 2018/19)
	MA431	Advanced Topics in Operational Research and Applicable Mathematics (0.5) (not available 2018/19)

Footnotes

A: This option will not be available to those who have already studied MA300 and MA301, or who have studied this subject as part of an undergraduate degree.

B: Students taking this course can apply for a place on FM457 Applied Computational Finance, a non-assessed computer course.

means there may be prerequisites for this course. Please view the course guide for more information.
