This course is capped at 30 students. LLM Specialisms This course will be relevant to the following LLM specialism: Legal Theory

Course content: Today social theory has rapidly evolved into a key and fascinating field of multiple cross-disciplinary inquiries exploring both philosophical analyses and social science

descriptions about, in one important case, the place of law in modern societies.

The focus of such contemporary inquiries in this course is on the interplay of law and space. Often unexamined notions of "space" lie at the heart of some of today's hottest debates, such as the politics of place, our engagement with nature, globalisation, and the city and its complexities. However, how does the law understand the link between itself and the space in which it is assumed to operate? Does it understand it in the same way as do architects, urban planners, geographers, governments, policy makers, advocacy groups, or economists, for example, when speaking of the natural or the built environment, such as mountains, rivers, roads, airports, prisons, courtrooms, or immigration detention centres? Moreover, do we understand space in the same way? Might bodily habits, traits of character, idioms, and abiding habits of thought, have a role in shaping our individual and collective sense of space? What might it mean to frame talk about space in terms of "dwelling", for example, or "embodiment", or "emplacement", and so on? Might the very attempt of making sense of law's place in society, be problematically caught up with a specific cultural heritage no longer necessarily able to unpick the full complexity of the topos of law, its visuality, or even its materiality? Put it simply, is space always and everywhere the same place, as Copernicus, Galileo, Newton, Bacon and Descartes once thought, or is it something potentially so diverse as to call for new ways of going about it and, from there, about the place of law in society?

In this course, we will survey several perspectives on the elusive spatiality of modernity, debating the extent to which we can continue to treat space as the impassive repository of human affairs portrayed by tradition. Could it be that, if law is everywhere in space, on an altogether different level space is – paradoxical though it might sound at first – everywhere in law?

Teaching: 22 hours of seminars in the LT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: In general literature: E T A Hoffmann, *The Devils Elixirs* (1815); R M Rilke, *The Notebooks of Malte Laurids Brigge* (1910); F Kafka, *The Trial* (1925). In contemporary political-philosophical thought: M De Certeau, *The Practices of Everyday Life* (1984); M Foucault, *Discipline and Punish* (1991); G Agamben, *Homo Sacer: Sovereign Power and Bare Life* (1998); A Badiou, *St Paul* (1998); J Rancière, *The Politics of Aesthetics* (2006); W Cronon, *Uncommon Ground: Rethinking the Human Place in Nature* (1995); S Latouche, *The Westernization of the World* (1996); D Massey, *For Space* (2005); Resnik & Curtis, *Representing Justice* (2011). In sociological writing: S Sassen, *Deciphering the Global: Its Scales, Spaces, and Subjects* (2007); F Tonkiss, *Space, the City and Social Theory* (2005); L Mulcahy, *Legal Architecture* (2011). In anthropological writing: M Augé, *Non-Places - Introduction to an anthropology of supermodernity* (1995); H Moore, *Space, Text, and Gender* (1996); T Ingold, *The Perception of the Environment* (2000); D Harvey, *Rebel Cities* (2012). In legal-geographical writing: Delaney, *Nomospheric Investigations* (2010); Braverman, Blomley, Delaney, Kedar, *The Expanding Spaces of the Law* (2014).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CB Half Unit

Modern Legal History: Private Law and the Economy 1750-1950

This information is for the 2019/20 session.

Teacher responsible: Prof. Michael Lobban

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Economic History, MSc in Economic History (Research), MSc in Law, Anthropology and Society, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

LLM Specialisms This course will be relevant to the following LLM specialisms: Legal Theory.

Course content: This course will examine how the common law aided or hindered economic growth in the era between 1750 and 1950, by focusing in particular on the development of doctrines of private law. The course will concentrate on a number of themes and topics. It will begin with a discussion of the nature of the common law, and the modes of common law reasoning, to establish what kind of legal system economic actors were dealing with. It will then look at the developing law of contract, to explore how far the ideology of 'freedom of contract' assisted growth. It will further explore the law relating to civil wrongs (including the law relating to compensation for accidents and pollution) and unjust enrichment (particularly in the context of business failures). It will also explore some specific topics, including the law relating to corporate enterprise, bankruptcy and insurance.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: J. Oldham, *English Common Law in the Age of Mansfield* (Chapel Hill, 2005). W.R. Cornish et al, *The Oxford History of the Law of England* vols. 11-13 (Oxford, 2010). W.R. Cornish and G.N. Clark, *Law and Society in England 1750-1950* (London, 1989). P.S. Atiyah, *The Rise and Fall of Freedom of Contract* (Oxford, 1979). R. Harris, *Industrializing English Law: Entrepreneurship and Business Organization, 1720-1844* (Cambridge, 2000). Rob McQueen, *A Social History of Company Law: Great Britain and the Australian Colonies 1854-1920* (Ashgate, 2009). J. Taylor, *Creating Capitalism: Joint Stock Enterprise in British Politics and Culture 1800-1870* (Boydell, 2006). M. Finn, *The Character of Credit: Personal Debt in English Culture, 1740-1914* (Cambridge 2003).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CE Half Unit

Security and Criminal Law

This information is for the 2019/20 session.

Teacher responsible: Prof Peter Ramsay NAB 6.27

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Undergraduate study of criminal law (or equivalent).

Course content: This is a course in advanced criminal law theory. The central concern of contemporary criminal justice policy is public protection. The course examines leading texts in Anglo-American criminal law theory in order to investigate the interests that are protected by the structure of the criminal law. Seminars cover:

the concept of security; the concept of criminal law; state punishment; the presumption of innocence; actus reus; criminal responsibility; criminal defences; public welfare offences; pre-emptive offences; security and human rights.

The reading materials for this course are primarily philosophical and theoretical. The course contrasts the different perspectives of moral and political theories of criminal justice and criminal law, and investigates what they tell us about the scope and limits of criminal law as a security system. The course therefore provides an introduction to normative criminal law theory in the common law world. At the same time, this introduction adopts an innovative

approach to that theory by situating it in the context of the contemporary policy pressures on criminal law. Each seminar consists of a student presentation on a key question, class discussion and a teacher presentation. There is a reading week in Week 6.

Teaching: 20 hours of seminars in the MT.

There will be a Reading Week in week 6 of MT.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A Ashworth and L Zedner Preventive Justice (OUP 2014); I Dennis and GR Sullivan (eds), Seeking Security: Pre-empting the Commission of Criminal Harms (Hart, 2012); A Brudner, Punishment and Freedom (OUP, 2009); RA Duff, Answering for Crime (Hart, 2007); P Ramsay The Insecurity State: Vulnerable Autonomy and the Right to Security In the Criminal Law (OUP, 2012); A Ashworth (et al), Prevention and the Limits of Criminal Law (OUP, 2013).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CF Half Unit UK Corporate Law

This information is for the 2019/20 session.

Teacher responsible: Prof. David Kershaw

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course is capped at 90 students. This course will be relevant to the following LLM specialisms: Corporate and Securities Law; Corporate and/or Commercial Law

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in Foss v Harbottle; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006.

Teaching: 20 hours of seminars in the LT.

There will be a Reading Week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: Core Texts: David Kershaw, Company Law in Context (2nd ed, OUP 2012).

Paul Davies, Gower and Davies' The Principles of Modern Company Law (9th eds, Sweet & Maxwell, 2012).

For detailed reading lists please see the Moodle website.

Assessment: Exam (100%, duration: 2 hours, reading time: 30 minutes) in the summer exam period.

LL4CG Half Unit Understanding Tax Law and Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Ian Roxan NAB.7.25 and Mr Eduardo Baistrocchi NAB.7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is required for the following LLM specialism: Taxation, but is also available to other students. NB: The monthly Taxation Seminars are available to all with an interest in taxation including LLM and MSc students. Students wishing to attend the Taxation Seminars are very welcome. For more information, see the Law Department or LSE Financial Markets Group web pages.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students will be expected to either be taking other tax-related courses in any discipline, or to have a good background in taxation.

Course content: Taxation is fundamental and pervasive in modern society. It has an impact on the work of lawyers in many fields have to be aware of the impact of taxation on their work, and tax lawyers have to consider the operation of tax law in many contexts: corporate and commercial law, family law, labour and employment law, law of wills and trusts, environmental law, intellectual property law and law relating to the digital economy. And, as taxpayers seek to minimise their tax burdens, whether legally or by less than legal means, tax law becomes more complex in response.

How can tax lawyers better understand tax law so that they can apply it with sophistication and creativity for their clients, whether private clients or governments? How can those interested in tax policy achieve social goals effectively through tax law? Using a series of topical examples, this course will explore the key skills needed to do tax law and different perspectives through which tax law and policy can be understood, such as law itself, economics, economic analysis of law, politics, sociology and anthropology. Seminars discussing these principles and perspectives will be integrated with the monthly LSE Taxation Seminars during the Michaelmas Term, which will provide students with direct exposure to leading speakers from a wide range of backgrounds on current debates in taxation. The LSE Taxation Seminars series, established since the 1960s, brings together a wide variety of participants, including lawyers, economists, accountants and government officials. The Taxation Seminars provide an important forum for topical discussion on taxation. This course will give students the opportunity to participate actively in the Taxation Seminars and to link insights from them to the methods of understanding tax law and policy studied in the course.

Teaching: 22 hours of seminars in the MT. 2 hours of seminars in the ST.

Weekly two-hour seminars in the Michaelmas Term in a variable format, including seminar-discussions and monthly Taxation Seminars attended by a range of tax professionals. 1 X 2 hour seminar in the ST.

There will be a reading week in Week 6 of the MT.

Formative coursework: Students are expected to submit one 1,500-word formative essay.

Indicative reading:

- Avi-Yonah, et al., Global Perspectives on Income Taxation Law (Oxford: Oxford Univ. Press, 2011);
- Mirrlees, et al., Tax by Design: the Mirrlees Review (Oxford: Oxford Univ. Press: 2011);
- Mirrlees, et al. (eds), Dimensions of Tax Design: the Mirrlees Review (Oxford: Oxford Univ. Press, 2010);

- Lamb, et al. (eds), *Taxation: An Interdisciplinary Approach to Research* (Oxford: Oxford Univ. Press, 2004);
 - Murphy and Nagel, *The Myth of Ownership* (New York: Oxford Univ. Press, 2002);
 - Kaplow, "Rules Versus Standards: An Economic Analysis" (1992), 42 *Duke L. J.* 557;

 - Crawford and Infanti (eds), *Critical Tax Theory: An Introduction* (Cambridge: Cambridge Univ. Press, 2009);
 - Marc Leroy, 'Tax Sociology: Sociopolitical Issues for a Dialogue with Economists' (2008) 3 *socio-logos*.
- Detailed reading lists will be provided during the course via Moodle.
- Assessment:** Essay (100%, 8000 words).

LL4CH Half Unit

Current Issues in Taxation

This information is for the 2019/20 session.

Teacher responsible: Dr Ian Roxan

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is required for the following LLM specialism: Taxation - see the course co-ordinator for further information. NB: The monthly Taxation Seminars are available to all with an interest in taxation including LLM and MSc students. Students wishing to attend the Taxation Seminars are very welcome. For more information, see the Law Department or LSE Financial Markets Group web pages.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students will be expected to be taking one or more other tax courses (LL4AY, LL4CJ, LL4CO, LL4Z1 or LL4Z3) or to have some background in taxation.

For more information please contact the course convenor Dr Ian Roxan: Telephone:020-7955-7469 Email: i.roxan@lse.ac.uk

Course content: This course provides an opportunity to look in depth at some of the most important current issues in taxation and tax policy, both from a legal perspective and with a wider interdisciplinary approach. The issues to be looked will be chosen according to what is topical at the time. Often a single theme is chosen for the term. Recent themes have included, for example, the G20/OECD BEPS (Base Erosion and Profit Shifting) Project. Seminars discussing these issues will be integrated with the monthly LSE Taxation Seminars during the Lent Term, which will provide students with direct exposure to leading speakers from a wide range of backgrounds on current debates in taxation. The LSE Taxation Seminars series, established since the 1960s, brings together a wide variety of participants, including lawyers, economists, accountants and government officials. The Seminars provide an important forum for topical discussion on taxation. This course will give students the opportunity to participate actively in the Taxation Seminars and to link insights from them to the other issues studied in the course.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST. 10 weekly two-hour seminars in the Lent Term in a variable format, including seminar-discussions and monthly Taxation Seminars attended by a range of tax professionals. 2 hours of seminars in the ST.

There will be a reading week in Week 6 of the LT.

Formative coursework: Students are expected to submit one 2,000-word formative essay or an equivalent assignment.

Indicative reading: There is no fixed list, selections being made from year to year on the basis of topicality. Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading

James & Nobes, *Economics of Taxation*, Avi-Yonah, et al., *Global Perspectives on Income Taxation Law*, or another introductory tax policy book.

Assessment: Essay (100%, 8000 words).

LL4CJ Half Unit

Comparative Corporate Taxation

This information is for the 2019/20 session.

Teacher responsible: Dr Ian Roxan NAB 7.25 and others.

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; International Business Law; Taxation.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students should be familiar with the UK tax system, or have working knowledge of another system of business taxation, and otherwise should take LL4Z1 Business Taxation.

Course content: The course examines the principles governing the taxation of corporate and other business transactions. The course will take a comparative approach to examining the business tax systems of the United Kingdom and other countries. The main tax system studied will be that of the United Kingdom (primarily corporation tax together with income tax and capital gains tax), but the tax system of the United States will also be examined and typically that of Germany or another country as well. This course will introduce the national tax systems being studied and provide an in-depth look at a key advanced topic central to corporate taxation, such as the treatment of shares, the treatment of groups of companies, or the taxation of corporate finance.

Teaching: 20 hours of seminars in the MT.

10 weekly two-hour seminars in the Michaelmas Term, including seminars led by national tax experts. 2 hours of seminars in the ST. There will be a reading week in Week 6 of the MT.

Formative coursework: Students are expected to submit a group assignment on a major part of the course, with the option of submitting a 2,000-word formative essay, or to submit an equivalent assignment during the course.

Indicative reading: Ault et al, *Comparative Income Taxation: A Structural Analysis* (Kluwer, 3rd ed. Rev, 2010); Harris, *Corporate Tax Law: Structure, Policy and Practice*, (Cambridge Univ. Press, 2013); Gordon and Montes Manzano, *Tiley & Collison's U.K. Tax Guide* (current edition); Loutzenhiser, *Tiley's Revenue Law* (Hart, 8th ed., 2016); Bramwell et al., *Taxation of Companies and Company Reconstructions*; Bittker & Lokken, *Federal Taxation of Income, Estates and Gifts*; Eustice & Brantley (formerly Bittker and Eustice), *Federal Income Taxation of Corporations and Shareholders*; Tolley's *Yellow Tax Handbook*, or *CCH The Red Book* (current edition).

Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading:
Hugh Ault et al, *Comparative Income Taxation* (Kluwer Law International 3rd ed. 2010).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

An OPEN BOOK examination. Candidates will be permitted to take into the examination room any written material they wish.

LL4CK Half Unit**Taxation of Corporate Transactions**

This information is for the 2019/20 session.

Teacher responsible: Dr Ian Roxan NAB 7.25 and others.

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Corporate and/or Commercial Law; International Business Law; Taxation.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Students must have completed Comparative Corporate Taxation (LL4CJ).

Students must have completed Comparative Corporate Taxation (LL4CJ) or have permission of the course convenor.

Students should be familiar with the UK tax system, or have working knowledge of another system of business taxation. Otherwise, students should take LL4Z1 Business Taxation beforehand.

Course content: The course examines the principles governing the taxation of corporate and other business transactions. The course will take a comparative approach to examining the business tax systems of the United Kingdom and other countries. The main tax system studied will be that of the United Kingdom (primarily corporation tax together with income tax and capital gains tax), but the tax system of the United States will also be examined and typically that of Germany or another country as well. Continuing on from the topics studied in LL4CJ, this course will look in-depth at a number of key advanced topics that are central to corporate taxation, such as the treatment of shares, the taxation of corporate finance, the treatment of groups of companies, and the taxation of corporate reorganisations (broadly defined).

Teaching: 20 hours of lectures in the LT. 2 hours of lectures in the ST.

10 weekly two-hour seminars in the Lent Term, including seminars led by national tax experts. 2 hours of seminars in the ST. There will be a reading week in Week 6 of the LT.

Formative coursework: Students are expected to submit a group assignment on a major part of the course, with the option of submitting a 2,000-word formative essay, or to submit an equivalent assignment during the course.

Indicative reading: Ault et al, *Comparative Income Taxation: A Structural Analysis* (Kluwer, 3rd ed. Rev, 2010); Harris, *Corporate Tax Law: Structure, Policy and Practice*, (Cambridge Univ. Press, 2013); Gordon and Montes Manzano, *Tiley & Collison's U.K. Tax Guide* (current edition); Loutzenhiser, *Tiley's Revenue Law* (Hart, 8th ed., 2016); Bramwell et al., *Taxation of Companies and Company Reconstructions*; Eustice & Brantley (formerly Bittker and Eustice), *Federal Income Taxation of Corporations and Shareholders*; Abrams & Doernberg, *Essentials of US Taxation*; Tolley's *Yellow Tax Handbook*, or *CCH The Red Book* (current edition). Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading

Hugh Ault et al, *Comparative Income Taxation* (Kluwer Law International 3rd ed. 2010).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

An OPEN BOOK examination. Candidates will be permitted to take into the examination room any written material they wish.

LL4CL Half Unit**Explaining Punishment: Philosophy, Political Economy, Sociology**

This information is for the 2019/20 session.

Teacher responsible: Prof Peter Ramsay NAB 6.27

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: The course aims to provide students with a comprehensive overview of the theories that explain the practice of punishment, a practice that defines the criminal law. It will do this by introducing students to philosophical, sociological, political economy and comparative approaches to punishment. It will involve the discussion of all the major philosophical justifications and critiques of state punishment, and sociological and political economy explanations and critiques of punishment.

After an introduction discussing the different approaches to punishment, three seminars will discuss the classical philosophical justifications of punishment and a fourth the contemporary critiques of those classical approaches. Seminars 5 and 6 will discuss punishment from the perspective of sociology and political economy. Seminar 7 will consider comparative approaches to punishment. Seminars 8 and 9 will look at two key aspects of the sociology of punishment, punishment as a cultural phenomenon and punishment as an exercise of power and authority. The final seminar considers the relation between these different perspectives.

Teaching: 20 hours of seminars in the MT.

There will be a Reading Week in week 6 of MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading:

- A von Hirsch, A Ashworth and J Roberts, *Principled Sentencing: Readings on Theory and Policy* (Hart, 2009)
- B Hudson, *Understanding Justice* (Open University Press 2003)
- N Lacey, *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*, (Cambridge University Press 2008)
- J Simon and R Sparks (eds), *The Sage Handbook of Punishment and Society* (Sage 2013)
- D Garland, *Punishment and Modern Society: A Study in Social Theory* (Oxford University Press 1990)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4CO Half Unit**Taxation of Wealth**

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Summers NAB.6.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Inequalities and Social Science, MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: The course examines the taxation of wealth from a variety of academic perspectives, drawing on research from political theory, economics, sociology and law. Taxes on wealth are

defined broadly to include taxes on transfers of wealth, returns on wealth, and holdings of wealth. The course equips students with an interdisciplinary framework for explaining and evaluating taxes on wealth, and applies these approaches to existing tax policies and options for reform. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions. Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers: inheritance/estate tax, lifetime receipts tax, comprehensive income tax; (ii) taxes on returns: capital gains tax, capital income tax and (iii) taxes on holdings: property tax, land-value tax, net wealth tax.

Teaching: 20 hours of seminars in the MT.

There will be a reading week in Week 6 MT.

Formative coursework: Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of sub-headings, and bibliography) based on past or sample summative essay titles.

Indicative reading: Atkinson, *Inequality: What can be Done?* (Harvard University Press 2015); Graetz & Shapiro, *Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth* (Princeton University Press 2005); Hills et al. *Wealth in the UK: Distribution, Accumulation and Policy* (OUP 2013); Institute for Fiscal Studies, *The Structure and Reform of Direct Taxation: The Meade Report* (Allen & Unwin 1978); Institute for Fiscal Studies, *Tax by Design: The Mirrlees Review, Vols 1 & 2* (OUP 2011); Murphy and Nagel, *The Myth of Ownership: Taxes and Justice* (OUP 2002); Piketty, *Capital in the Twenty-First Century* (Harvard University Press 2014); Sandford, *Taxing Personal Wealth* (Allen & Unwin 1971); Scheve & Stasavage, *Taxing the Rich: A History of Fiscal Fairness in the United States and Europe* (Princeton University Press 2016); Waldron, *The Right to Private Property* (OUP 1991); Young, *The Myth of Millionaire Tax Flight: How Place Still Matters for the Rich* (Stanford University Press 2017)

Assessment: Essay (100%, 6000 words) in the ST.

Students must answer two essay questions (3,000 words each) from a set of essay titles published at the end of the MT.

LL4CP Half Unit

Tax Avoidance

This information is for the 2019/20 session.

Teacher responsible: Dr Michael Blackwell (NAB 7.30)

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Law and Accounting, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden. However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of

legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) the OECD response to BEPS; (vii) BEPS and the EU; and (viii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: 20 hours of seminars in the LT.

There will be a Reading Week in Week 6.

Formative coursework: Students should submit a detailed essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises and act as either a presenter or discussant during seminars.

Indicative reading: Michael Blackwell, 'Solicitors, the SRA and Tax Avoidance' (2019) *British Tax Review* 71. Michael Blackwell, 'Variation in the Outcomes of Tax Appeals Between Special Commissioners: An Empirical Study' (2013) *British Tax Review* 154. Dhammika Dharmapala, 'What Do We Know about Base Erosion and Profit Shifting? A Review of the Empirical Literature' (2014) 35(4) *Fiscal Studies* 421. J Feldman and JA Kay, 'Tax Avoidance' in Paul Burrows and Cento G Veljanovski (eds), *The Economic approach to law* (Butterworths 1981). Edward J McCaffery, *Income Tax Law: Exploring the Capital Labour Divide* (OUP 2012) 12-22; 182-202 (ie 1.6 until the end of Chapter 1 and 'Chapter 7, 'A Summary, of Sorts: Anatomy of a Tax Shelter'). Judith Freedman, 'Interpreting Tax Statutes: Tax Avoidance and the Intention of Parliament' (2007) 53 *LQR* 123. Grahame R Dowling, 'The curious case of corporate tax avoidance: Is it socially irresponsible?' (2014) 124 *Journal of Business Ethics* 173. Judith Freedman, 'The Tax Avoidance Culture: Who is Responsible?' (2006) 59 *Current Legal Problems* 359. Kevin Holland, Sarah Lindop, and Fatimah Zainudin, 'Tax Avoidance: A Threat to Corporate Legitimacy? An Examination of Companies' Financial and CSR Reports' [2016] (3) *BTR* 310

Assessment: Essay (100%, 6000 words) in the ST.

LL4CQ Half Unit

Legal Aspects of Private Equity and Venture Capital

This information is for the 2019/20 session.

Teacher responsible: Ms Sarah Paterson New Academic Building 6.06 and Dr Simon Witney N/A

Sarah Paterson and Simon Witney will co-teach this course.

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQ. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

Course content: This course will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on deep academic analysis of pertinent theoretical and legal issues

complemented by insights from relevant practitioners. It will have a UK focus but will include relevant aspects of European Union law with comparative global perspectives.

Class 1: Introduction to private equity and venture capital and some basic theory

This introductory session will include a critical discussion of the academic research suggesting that private equity outperforms other asset classes and will introduce some of the theoretical frameworks that will underpin the course.

Class 2: Fund structures and terms: the limited partnership and other international structures

This class looks at the structures adopted, and the reasons why, with particular emphasis on the legal, tax and regulatory characteristics of limited partnerships. We also examine some key fund terms.

Class 3: Fund terms and structures (continued)

This class continues our analysis of fund terms and structures, including the fund management vehicle.

Class 4: Private equity fund (and manager) regulation

This session looks at UK and EU regulatory initiatives, and critically evaluates the provisions of the Alternative Investment Fund Managers Directive which affect private equity funds.

Class 5: Venture capital investments

Starting from a theoretical perspective, we will analyse the terms of a typical venture capital investment into a portfolio company by reference to example documents. We will also examine various aspects of contract and company law which have particular relevance to VC structures.

Class 6: The VC deal: feedback from a practitioner

This week the students will discuss the key points arising from a venture capital investment case study with a leading VC lawyer. We will focus on key points which have a legal as well as a commercial aspect, and connect these to the theoretical discussions in Class 5.

Class 7: The buyout: structure and terms

This class will examine the structure of a buyout and how it differs from a VC investment. We will focus on pertinent company law rule and the main commercial terms.

Class 8: The buyout: corporate governance issues

This class will examine recent developments in corporate governance of large, private companies and their relevance for and application to portfolio companies in buyouts.

Class 9: Financing

This class will look at the leveraged finance model, advantages of leverage, the LMA Leveraged Loan Agreement, High Yield Bonds, the Inter-creditor Agreement and 'covenant-lite' and incurrence covenants.

Class 10: This week we will analyse a suite of leveraged loan deal documentation for a typical private equity buyout. Students will be provided with a fact pattern and asked to apply the theory that they have studied in week 9 to the deal documentation.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

The course will consist of 10 x 2 hour seminars in LT, together with a revision class in ST. There will be a reading week in Week 6. There will also be optional talks by practitioners which students may choose to attend, but which will not be examined.

Formative coursework: A formative essay will be due in Week 7 and detailed feedback will be provided shortly after. The essay will have a word limit of 1,500 and will provide invaluable preparation for the summative assessment.

Indicative reading: Example core readings:

Ascimacopoulous, K. and Bickle, J. (eds), *European Debt Restructuring Handbook: Leading Case Studies from the Post-Lehman Cycle* (Globe Law and Business, 2013). Blake J., and Robinson, L., "Private equity fund structures – the limited partnership", in Hale, C. (ed.), *Private Equity: A Transactional Analysis*, 3rd edition (Globe Law and Business, 2015). Cooke, D.J., *Private Equity: Law and Practice*, 5th edition (Sweet & Maxwell, 2015), selected chapters. Gullifer, L. and Payne J., *Corporate Finance Law: Principles and Policy* (Hart Publishing, 2015), 768-790. Jensen, M.C. & Meckling, W.H., "Theory of the firm: Managerial behavior, agency costs and ownership structure", 1976, *Journal of*

Financial Economics, 3(4), pp.305–360. Howard, C. and B Hedger, B., *Restructuring Law and Practice* (LexisNexis, 2014). Paterson and Zakrzewski (eds) McKnight, Paterson and Zakrzewski on the *Law of International Finance* (forthcoming OUP, 2016). Talmor, E. & Vasvari, F., *International Private Equity* (John Wiley & Sons, 2011), selected chapters. Witney, S., *Private Equity Finance and Buyouts*, in Dunne, P., (ed). *Company Acquisitions Handbook* (Tottel Publishing Ltd, 2007), p. 651. Witne, S., *The Corporate Governance of Private Equity-Backed Companies*, 2017, PhD thesis (<http://etheses.lse.ac.uk/3557/>). Additional weekly readings will be provided to the students at the beginning of the course.

Assessment: Take home exam (100%) in the ST.

Students will be given a period of time in which to complete and return a take home exam, with penalties for late submission. Students will be asked to complete 2 questions from a possible 6 (with a requirement to choose one question from Part 1 and one question from Part 2) and each answer will be limited to 1,500 words, with penalties for exceeding the word limits. For more information regarding penalties, please refer to the LLM Handbook.

LL4E6 Half Unit

International Dispute Resolution: Courts and Tribunals

This information is for the 2019/20 session.

Teacher responsible: Dr Rishi Gulati NAB 7.24

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: Increasingly, international law is developed, applied and amended through litigation in international, regional and domestic courts. Richard Goldstone, former Prosecutor of the Yugoslav Tribunal, has gone so far as to say, 'it seems to me that if you don't have international tribunals, you might as well not have international law'. In this course, we examine key courts and tribunals operating on the world stage, including the International Court of Justice, the International Criminal Court, the European Court of Human Rights and the WTO Dispute Settlement Body. We look at the theory, politics and practical difficulties of international dispute resolution in these courts.

The course has practical and theoretical aspects. For those interested in a career in international law, we will have the opportunity to hear from a range of interesting and eminent practitioners currently working in the courts and tribunals we study. Interested students can engage in a 'mini- moot' before our guest speakers, providing an opportunity to hone their advocacy skills.

The theoretical dimension of the course involves three main elements:

1. First, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyse and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law,

focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

Teaching: 20 hours of lectures in the MT. 2 hours of lectures in the ST.

There will be a reading week in Week 6 of Michaelmas term.

Formative coursework: Students are asked to choose from EITHER an oral moot presentation and written submissions OR one 2,000 word formative essay.

Indicative reading: Reading lists will be provided for each week's seminar on Moodle.

Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

Assessment:

Research essay (100%, 8,000 wrds including footnotes)

LL4E7 Half Unit

Investment Treaty Law

This information is for the 2019/20 session.

Teacher responsible: Dr Rishi Gulati NAB 7.24

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration. The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has four components: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards - such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law - that may apply to the investor-state relationships; and (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: Students are asked to choose from EITHER an oral moot presentation and written submissions OR one 2,000 word formative essay.

Indicative reading: C.L. Lim, J. Ho, M. Pappas, *International Investment Law and Arbitration* (CUP 2018); R. Dolzer and C. Schreuer, *Principles of International Investment Law* (2nd edn, OUP 2012); G. Van Harten, *Investment Treaty Arbitration and Public Law* (OUP 2006)

Assessment:

Research essay (100%, 8,000 words including footnotes)

LL4F2 Half Unit

The Law and Practice of International Finance

This information is for the 2019/20 session.

Teacher responsible: Dr Joanne Braithwaite NAB7.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: LL4F2 examines the legal issues which arise in international financial markets based in London. This course looks at various types of financial transactions and structures which are widely used in the financial markets, such as derivatives and syndicated loans. We make reference to certain sets of trade association drafted terms throughout the course, subject to obtaining the necessary licences from the trade associations in question. With an emphasis on private law, the course considers the relevant legal, commercial and regulatory background, and the risks and protections available to participants in the global financial markets. The course is based upon an analysis of the relevant issues under English law with some reference to other systems for comparative purposes. The subject matter ties in well with the LLM evening seminars in financial and corporate law. The course will be underpinned by discussion of the legal principles involved in international finance, but the case studies referenced will be topical. In this sense, the content of the course will be adapted to the fast-moving developments affecting international markets in capital and in risk (for example, in recent sessions the course has examined mis-selling litigation in the international derivatives markets, the legal basis of prime brokerage relationships, the related Lehman Brothers litigation and the ongoing regulatory reform of the OTC derivatives markets, including the new requirement of mandatory CCP clearing triggered by the G20 statement in 2009).

Teaching: 20 hours of lectures and 5 hours of seminars in the LT. 2 hours of lectures in the ST.

There will be a reading week in week 6 of LT

Formative coursework: Students will be asked to submit one essay, which may be completed in exam conditions. The course also involves group presentations and other classwork.

Indicative reading: Examples of texts which will be referenced on the course: J Braithwaite, 'Law after Lehmans' (LSE Law Working Paper 11/2014); J Braithwaite 'Standard form contracts as transnational law' (2012) 75(5) *MLR* 779; L Gullifer and J Payne, *Corporate Finance Law: Principles and Policy* (Hart, 2nd edition, 2015). A full reading list will be distributed via Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment is by closed book written examination.

LL4F4 Half Unit

Takeover Regulation in the UK and the US

This information is for the 2019/20 session.

Teacher responsible: Prof. David Kershaw

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course will look at the regulation of the market for corporate control in the United Kingdom and the United States. The course focuses in particular on the regulation of the bid process and takeover defence regulation in the UK and the US. For a full topic and reading list, see the Moodle web site.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in week 6 of MT

Formative coursework: 1,500 word essay.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Background material can be found in D. Kershaw, *Principles of Takeover Regulation* (OUP, 2016), R. Kraakman et al, *The Anatomy of Corporate Law* (2004), Chapter 7; B. Black, *The Law and Finance of Corporate Acquisitions* (1995); and W. Carney, *Mergers and Acquisitions* (2003).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4F9 Half Unit

Legal Research and Writing Skills

This information is for the 2019/20 session.

Teacher responsible: Prof Thomas Poole

Availability: This course is compulsory on the LLM (extended part-time) and LLM (full-time). This course is not available as an outside option.

Course content: This course on Legal Research and Writing has a taught component focusing on research and writing skills and a stand-alone dissertation (details about which may be found in the LLM Handbook), to be written in a substantive law area of the student's choice.

The two components will be carefully integrated. Over the taught part of the course, students should gain a better understanding of:

- the nature of research in general; the distinctive features of legal research and the range of questions and research methodologies to be found within legal scholarship;
- how to conduct legal research, including research design, refining a research question, resource identification and searching for relevant materials; legal referencing and citation skills;
- how to develop legal writing skills, relating to both the process of writing, as well as the end-product; integrating a literature review; and presenting findings to a scholarly audience, etc.

Topics for the lectures will be: (1) Choosing your dissertation topic; (2) Research methods; (3) Writing skills; (4) Library skills, referencing and plagiarism.

The two tutorials will have a small group format (usually 4-5 students in each tutorial) and will focus on: (1) developing your research proposal; and (2) writing skills. One of the aims of the tutorials will be to prepare students for their two dissertation supervisions with faculty members.

The course will also offer the opportunity to participate in workshops. For example, there are skills sessions run by the LSE Library designed for students on this course to develop their legal research skills and awareness of the resources on offer in the LSE Library and beyond. The course also links in closely to the programme of workshops and events offered by the LSE Life centre, and the most relevant of these support sessions will be referenced on this course.

Teaching: 8 hours of lectures and 1 hour of classes in the LT. 1 hour of classes in the ST.

Other Workshops and drop-in sessions as may be advertised during the course.

Formative coursework: Students will be invited to prepare a short writing samples and dissertation plans, etc., for their tutorials.

Assessment: Dissertation (100%, 10000 words) post-summer term.

See the LLM handbook for full details and regulations about the dissertation.

LL4G8 Half Unit

Law of Corporate Finance

This information is for the 2019/20 session.

Teacher responsible: Dr Eva Micheler (NAB 5.14), Dr Elizabeth Howell (NAB.6.05) and Mr Edmund-Philipp Schuster (NAB 6.30)

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares and debt, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, property rights in shares, the settlement and holding of securities including through distributed ledger (blockchain) technology and insider dealing and market manipulation.

Teaching: 20 hours of lectures and 4 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will have the opportunity to write a formative essay for each of the classes. All students are strongly encouraged to write at least one essay.

Indicative reading: Gower and Davies, *Principles of Modern Company Law*, 10th edn, 2016; Eilis Ferran and Look Chan Ho, *Principles of Corporate Finance Law*, 2014, Eva Micheler, *Interests in Securities*, 2007.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4H2 Half Unit

Freedom of Speech, Media and the Law

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines freedom of speech and the legal and administrative regulation of mass media publication that bears upon it (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), and national security.

Teaching: 20 hours of seminars in the MT.

There will be a reading week in week 6.

10 weekly two-hour seminars in MT. The course is also supported by a series of specialist seminars with outside speakers, and by an online discussion forum.

Formative coursework: Students must submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 1,500 word essay.

Indicative reading: Supporting texts for the course include Parkes and Mullis (eds) *Gatley on Libel and Slander* (Rev 12th edn, Sweet & Maxwell, 2015), and Barendt et al, *Media Law: Texts, Cases and Materials* (Pearson, 2013); Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012. These and other materials relevant to the course are generally made available via the BLPES electronic resources or online.

Assessment: Essay (100%, 8000 words).

LL4H4 Half Unit International Financial Law

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The traditional financial market sectors of insurance, commercial banking, derivatives, capital markets and asset management are converging in practice, but their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture. It highlights certain anomalies in differing legal treatment of the respective sectors, and considers key trends. The course provides an overview of the substantive law aspects (UK, EU and international) of international financial and business transactions. The focus is mainly on broad principles and policy issues rather than a detailed examination of statute, case law and drafting. However, where appropriate, legal concepts and market practice will be explained by reference to case law and other legal sources. The course is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- Introduction:
 - Logic and players of the financial market
 - Overview of types of financial transactions
 - Reasoning and sources of financial law and regulation
 - The types of risk and the role of financial law
 - European and global legal and regulatory architecture
- Raising capital: taking risk through funded positions
 - The nature of banks, deposit taking, loans, syndicated loans
 - Issuance of debt securities, eurobonds and equity
 - Investment funds
 - Cross-comparison of funded positions, common patterns and differences
- Mitigating financial risk: simple financial positions
 - Guarantee and insurance
 - Derivatives and credit default swaps
 - Structured finance, securitisation
 - Cross-comparison and the risk of recharacterisation
- Mitigating financial risk through net and asset-backed positions
 - Set-off and netting
 - Security interests, quasi-security and financial collateral
 - Insolvency policy and preferential treatment of financial firms
- Cross-jurisdictional analysis
 - Private international law analysis in financial law
 - Example 1: intermediated securities and cross-border collateral
 - Example 2: cross-jurisdictional netting
 - Common patterns and difficulties

Teaching: 20 hours of lectures and 5 hours of seminars in the LT. 2 hours of lectures in the ST.

The course will comprise a two hour weekly lecture in MT and small group follow-up seminars in weeks 3,5,7,9 and 11. There will be a Reading Week in week 6 of the MT. There will be a revision lecture in ST.

Formative coursework: Students will be asked to submit a 2,000 word essay during LT. A voluntary mock exam is also offered.

Indicative reading: A detailed reading list will be made available on Moodle prior to teaching.

Recommended general reading: (a) Joanna Benjamin, *Financial Law*, Oxford University Press, 2007; (b) Colin Bamford, *Principles of International Financial Law*, Oxford University Press, 2011; (c) Philip Wood, *Law and Practice of International Finance* (University Edition) 2007, Sweet&Maxwell; (d) S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 6th ed., Palgrave-McMillan, 2010 (this last one is not a legal work but ideal for understanding market practice).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Assessment is by closed book written examination. The exam is two hours plus 15 minutes reading time.

LL4H8 Half Unit Employment Law

This information is for the 2019/20 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Inequalities and Social Science, MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. Business reorganisation and economic dismissals. Freedom of association and the right to strike. Privacy inside and outside of the workplace. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: 20 hours of seminars in the MT.

There will be a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 1-9.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Candidates are allowed to take an unannotated copy of a collection of statutory materials into the examination.

LL4H9 Half Unit Human Rights in the Workplace

This information is for the 2019/20 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission

as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The sources and application of human rights in the workplace, including international and European laws and conventions. Civil liberties of employees. Social and economic rights of workers. Protection from discrimination in the labour market and employment. As well as detailed examination of legal materials, the approach involves discussion of theories of human rights and comparisons between legal systems.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One 2,000 word essay and one presentation.

Indicative reading: A detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle Preliminary reading: Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 9-10.

Assessment: Essay (100%, 8000 words) in the ST.

LL4K4 Half Unit

The International Law of Self-Determination

This information is for the 2019/20 session.

Teacher responsible: Dr James Irving

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: This course will provide a general introduction to the doctrine of self-determination in international law.

Self-determination will be historically contextualised from its intellectual progenitors in the Enlightenment through to its political birth at the 1919 Paris Peace Conference and its formal induction into international law by virtue of the 1945 UN Charter. Both the detail of the doctrine's content and the dynamic governing its development will be explored. The relationship between self-determination and state formation (including decolonisation and secession), minority rights, aboriginal rights, women's rights and the nascent right to democratic governance will be central topics. Reference will also be made to the interplay between self-determination and economic rights, including permanent sovereignty over natural resources, the right to development and the "third generation rights" movement more generally. Self-determination's influence upon the international rules governing the use of force will be discussed, but these rules will not be a primary focus. Upon completion of the course students will be in a position to legally analyse contemporary fact patterns and to identify both strengths and weaknesses in the existing legal framework. Students will have considered new and novel approaches to self-determination and will be able to situate the doctrine in relation to international law and human rights. Those taking the course will gain an appreciation for self-determination's particular contribution to political and economic liberty.

Teaching: 20 hours of seminars in the MT.

(Please note that week six will be a reading week.)

Formative coursework: Students will be asked to submit one 2,000 word essay.

Indicative reading: Introductory reading: James Crawford, "The Right of Self-Determination in International Law: Its Development and Future" in Philip Alston, ed., *People's Rights* (Oxford: Oxford University Press, 2001) 7. Additional sources: Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001); S. James Anaya, *Indigenous Peoples in International Law*, 2nd

ed. (Oxford: Oxford University Press, 2004); Allen Buchanan, *Justice, Legitimacy, and Self-Determination: Moral Foundations for International Law* (Oxford: Oxford University Press, 2004); Cassese, Antonio, *Self-Determination of Peoples: A Legal Reappraisal* (New York: Cambridge University Press, 1995); Hillary Charlesworth, & Christine Chinkin, *The Boundaries of International Law* (Manchester: Manchester University Press, 2000); James Crawford, ed., *The Rights of Peoples* (Oxford: Clarendon Press, 1988); Hurst Hannum, *Autonomy, Sovereignty, and Self-Determination: the Accommodation of Conflicting Rights*, rev. ed. (Philadelphia: University of Philadelphia Press, 1996); James Irving, "Self-Determination and Colonial Enclaves: The Success of Singapore and the Failure of Theory" (2008) 12 *S.Y.B.I.L.* 97-122.; Christian Walter, Antje von Ungern-Sternberg & Kavus Abushov, eds., *Self-Determination and Secession in International Law* (New York: Oxford University Press, 2014).

Assessment: Essay (100%, 8000 words).

LL4K5 Half Unit

International Commercial Contracts - General Principles

This information is for the 2019/20 session.

Teacher responsible: Dr Diane Galbois

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Firm knowledge in contract law and/or international sale of goods from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and, where appropriate, the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both classes and examination, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, *Commentary on the UNIDROIT Principles of International Commercial Contracts* (1st edn, OUP 2009); H. Kötz, *European Contract Law* (OUP 1997); K. Zweigert & H. Kötz, *An Introduction to Comparative Law* (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edition, OUP 2010); T. Kadner Graziano, *Comparative Contract Law* (Palgrave 2009).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4K7 Half Unit

Mental Health Law: The Criminal Context

This information is for the 2019/20 session.

Teacher responsible: Prof Jill Peay NAB.5.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: This course aims to integrate a practical and theoretical understanding of mental health law, as it relates to mentally disordered offenders. It is not intended to provide a comprehensive understanding of the detail of the relevant law in England and Wales, but rather aims at broader conceptual understanding of the problem areas that are likely to bedevil any law relating to those with mental disabilities who have offended. The course makes reference to both the Mental Health Act 1983 and the Criminal Justice Act 2003.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6. Summer term is a review and revision session.

Formative coursework: One 2,000 word essay.

Indicative reading: J. Peay (2011) *Mental Health and Crime*, Routledge. B. Hale (2017) *Mental Health Law*, Sweet and Maxwell

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Two-hour unseen examination in ST (100%).

LL4K9 Half Unit

European Capital Markets Law

This information is for the 2019/20 session.

Teacher responsible: Prof Niamh Moloney NAB6.22

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to capital market actors across the Member States and which supports the integrated market. The topics which may be covered include: the rationale for integration and the role of law and the evolution of the integration project, including the impact of the financial crisis; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market; market access and the passport for investment services; the liberalisation of order execution and the regulation of trading markets; retail investor protection; the prospectus and disclosure regime; the regulation of gatekeepers; and the institutional structure supporting regulation and supervision, including the role of the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: 22 hours of seminars in the LT.

The teaching for this course takes the form of 10 X 2 hour seminars held weekly across LT in weeks 1-5 and weeks 7-11. In week 6, the teaching will take the form of a mandatory in-class formative assessment. An additional one hour revision session will be held in week 11. More detail will be available on the LL4K9 timetable.

Formative coursework: A mandatory in-class formative assessment (in the form of a timed exam question) will be held in week 6.

Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, *EU Securities and Financial Markets Regulation*, 3rd edition (2014); Mugge (ed), *Europe and the Governance of Global Finance* (2014); Schammo, *EU Prospectus Law* (2011); Ferran, *Building an EU Securities Market* (2004).

Preliminary reading

Moloney, *EU Securities and Financial Markets Regulation* (2014), chapter 1 and Ferran, *Building an EU Securities Market* (2004) chapters 1 and 2.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4L6 Half Unit

Theory of Constitutional Rights

This information is for the 2019/20 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

Course content: The course will provide an introduction to the theory of constitutional rights. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The Justifiability of Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Matthias Kumm, Jeremy Waldron and Frances Kamm.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4S1 Half Unit

Cyberlaw

This information is for the 2019/20 session.

Teacher responsible: Professor Andrew Murray NAB 6.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: This course does not require an in-depth understanding of contemporary computer technology.

Course content: This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets)

as well as the regulatory framework surrounding emerging digital technologies including AI, "smart" systems and robotic systems. It opens by examining the issues relating to network regulation or control by addressing questions such as "can the internet be regulated?" and "who is competent to police online content and activity?" It concludes its examination of structural controls by examining the highly topical and politically charged issue of enshrined network neutrality by asking the question: should Internet Service Providers be allowed to vary service conditions by types of content? It will also address cutting edge issues such as algorithmic regulation, profiling, robotics and Artificial Intelligence and the Law.

Students taking the course will be expected to develop knowledge and understanding of the different values brought to bear in the regulation of new media technologies and communities and the factors leading towards choices of particular values, regulatory institutions and process. Such knowledge and understanding will operate both at the theoretical level and the level of particular examples of regulatory regimes. Students will be expected to apply organisational and analytical skills to the investigation of evidence and problems and show effective communication through written work and seminar discussion. Students shall research an assessed extended essay using both traditional and IT-based research tools.

Teaching: 20 hours of seminars in the MT.

There will be Reading Week in week 6 of MT.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading: Murray, *Information Technology Law: The Law and Society* (OUP, 4th ed, 2019). Edwards (ed), *Law, Policy and the Internet* (Hart, 2018). Reed & Murray, *Rethinking the Jurisprudence of Cyberspace* (Edward Elgar, 2018). Murray, *The Regulation of Cyberspace* (Routledge, 2007). Reed, *Making Laws for Cyberspace* (OUP, 2012). Lessig, *Code Ver, 2.0* (Basic Books, 2006). Zittrain, *The Future of the Internet* (Penguin, 2009)

Assessment: Essay (100%, 8000 words) in the ST.

LL4S2 Half Unit E-Commerce Law

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Murray NAB 6.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course is to introduce students from a legal background to the specialised legal structure which surrounds e-commerce. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including arranging hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. From here the course will develop to examine the problems of more mature e-commerce businesses including jurisdiction, payment systems (including cryptocurrency and distributed ledger technology) and rules on marketing and privacy. Special classes on Online Dispute Resolution and the regulation of gig economy platforms will complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in that it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading: Murray: *Information Technology Law: The Law and Society* 4ed (OUP, 2019); Lodder & Andrew Murray (eds) *EU Regulation of E-Commerce: A Commentary* (Edward Elgar, 2017); Edwards (ed): *Law, Policy and the Internet* (Bloomsbury, 2018); Tapscott & Tapscott: *Blockchain Revolution: How the Technology Behind Bitcoin is Changing Money, Business and the World* (Penguin, 2016); Kuner: *Transborder Data Flows and Data Privacy Law* (OUP, 2013)

Assessment: Essay (100%, 8000 words).

LL4S4 Half Unit Digital Rights, Privacy and Security

This information is for the 2019/20 session.

Teacher responsible: Dr Orla Lynskey NAB 6.23

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students and priority is given to LLM and MSc in Regulation students when allocating places. Students must apply through Graduate Course Choice on LSEforYou

Pre-requisites: Basic knowledge of EU law is desirable for this course. Students who do not have this background knowledge are advised to do some preparatory reading (2-3 chapters) before the seminar begins.

Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. However, personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while others frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will do this predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection rules to online behavioural advertising and the right to respect for private life to State surveillance.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: All students are expected to contribute to a series of class exercises and to submit one piece of formative work for assessment.

Indicative reading:

- Bygrave: *Data Privacy Law: An International Perspective* (OUP, 2015)
- Kuner: *Transborder Data Flows and Data Privacy Law* (OUP, 2013)
- Lynskey: *The Foundations of EU Data Protection Law* (OUP, 2015)
- Murray: *Information Technology Law, The Law and Society* (OUP, 3rd ed, 2018)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

This is an open-book exam.

LL4S5 Half Unit**Piracy, Content and Ownership in the Information Society**

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Murray NAB 6.08

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The speed of technological innovation means that even as laws and regulatory practices are formulated, they are already under pressure from the next wave of development. One of the greatest challenges of the digital environment has been the compression of transmissibility of all data including entertainment data such as music, movies, TV shows and video games. For more than twenty years the entertainment industries have found themselves under continuous assault from their own customers and have often been painted as the villains of the piece. Lawyers and lawmakers have been forced to respond, often following behind the technology.

This unit explores how legislators, regulators and those in the entertainment and related industries interact in their attempts to develop a coherent and flexible body of law and regulatory practice for an increasingly globalised environment. This will involve consideration of current and potential legal and regulatory strategies that can be used to achieve aims such as protection of copyright content, the relationship with users and user generated content, the protection of databases and the proprietary model of software protection. The focus will be initially on English law, although the global nature of this subject means that there are already strong EU and US legal influences upon the English system, so comparative aspects will be introduced in places, and readings will include materials drawn from, amongst others.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: All students are expected to contribute to a series of class exercises, and to submit to one one-hour mock exam.

Indicative reading: Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019); Koo: The Right of Communication to the Public in EU Copyright Law (Hart, 2019); Klein, Moss & Edwards: Understanding Copyright Intellectual Property in the Digital Age (Sage 2015); Lessig: Free Culture: The Nature and Future of Creativity (Penguin, 2005); Patry: How to Fix Copyright (OUP 2012); Boyle: The Public Domain: Enclosing the Commons of the Mind (Yale UP, 2009); Netanel: Copyright's Paradox (OUP, 2010); Johns: Piracy: The Intellectual Property Wars from Gutenberg to Gates (Chicago UP, 2011)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Y9 Half Unit**Comparative and Transnational Law**

This information is for the 2019/20 session.

Teacher responsible: Dr Jacco Bomhoff NAB 6.09

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou. Students from other Departments are allowed to apply with permission of the

course convener.

Course content: This course looks at three related themes: (1) approaches to comparing laws and legal institutions from different legal systems and traditions (comparative law); (2) understanding legal regulation beyond the state (transnational law); and (3) ideas about what it is that makes legal phenomena 'legal' (legalism). Combining these three elements allows to ask questions like: "Why are courts in some legal systems more powerful or more trusted than courts in other systems?"; "Why do people go to court more often in some countries than in others?"; "Why do some countries send far more people to prison than others?"; "How is 'law' in non-state contexts similar to and different from state law?"; "How did lawyers come to be such powerful actors in organizations like the European Union?"; "What sorts of problems of 'translation' can arise when lawyers from one country look at law in another country?"; "What might happen when forms of 'Western' law are transplanted to other parts of the world?".

The course combines attention to theory - theories of legal comparisons, and of the 'transnationalization of law', in particular - with detailed practical case studies in selected areas from different fields of law (comparative constitutional law, comparative private law, comparative criminal justice, EU law; and commercial arbitration, among others). The course might be especially interesting for students already taking other courses with a comparative- or a transnational law dimension, and for all students interested in the ways law works and does not work, and in how lawyers think, in different parts of the world.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. This essay is due in Week 7.

Indicative reading:

- Adams, Maurice & Bomhoff, Jacco, Practice and Theory in Comparative Law (Cambridge, 2013)
- Cotterrell, Roger, What is Transnational Law?, LAW & SOCIAL INQUIRY (2012)
- Frankenberg, Gunther, Critical Comparisons: Re-thinking Comparative Law, 26 HARVARD INTERNATIONAL LAW JOURNAL (1985)
- Pirie, Fernanda, The Anthropology of Law (Oxford, 2013)
- Reimann, Mathias and Zimmermann, Reinhard, The Oxford Handbook of Comparative Law (Oxford, 2006)
- Ruskola, Teemu, Legal Orientalism (Harvard, 2013)
- Shaffer, Greg, Theorizing Transnational Legal Ordering, ANNUAL REVIEW OF LAW AND SOCIAL SCIENCE (2016)
- Special Issue: 'Comparative Socio-Legal Studies', INTERNATIONAL JOURNAL OF LAW IN CONTEXT (2017)

Assessment: Take home exam (100%) in the ST.

The take home exam will consist of 2 essay questions (out of 6 set), each with a 3000 word limit. Students will be given their exam questions at 9:00 am on Wednesday morning of Week 1 Summer Term, via Moodle, and will have until 5:00 pm on Thursday afternoon of Week 2 Summer Term to submit the exam. The length of time set for this assessment already takes into account that students may also have one or more other exams during this period.

LL4Z1 Half Unit**Business Taxation**

This information is for the 2019/20 session.

Teacher responsible: Mr Eduardo Baistrocchi NAB.7.33 and Ian Roxan NAB 7.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: The course is suitable both for those who have not studied taxation before and for those who have. It is recommended for those studying LL4AY International Tax Systems, LL4CJ Comparative Corporate Taxation or LL4CK Taxation of Corporate Transactions who have not studied taxation previously.

Course content: This course looks at how businesses are taxed in the UK. The course focuses on the key elements of the taxation of the income of businesses, including:

- taxation of trading income
- corporation tax, the nature of taxes on companies and the taxation of dividends
- capital allowances - relief for depreciation
- capital gains taxation
- partnership taxation
- tax relief for losses

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in Week 6 of the MT.

Formative coursework: One 2,000 word essay.

Indicative reading: Indicative reading: Loutzenhiser, Tiley's Revenue Law; Fairpo and Salter (formerly Lee), Revenue Law Principles and Practice; Salter, Lee and Snape, Revenue Law: Text and Materials. Legislation: Tolley's Yellow Tax Handbook, or CCH The Red Book. Current editions need to be used. Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Relevant legislation may be taken into the examination room (Tolley's Yellow Tax Handbook or CCH The Red Book) if un-annotated.

LL4Z2 Half Unit Principles of Taxation

This information is for the 2019/20 session.

Teacher responsible: Eduardo Baistrocchi NAB 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: The course is suitable both for students who have not studied taxation before and for those who have. It is recommended for students who have not studied taxation previously, as well as for those who are studying any of the other tax courses offered at LLM/MSc level.

Course content: This course looks at how tax systems work and the principles that lie behind tax systems. Topics covered include the reasons for taxation and the main types of tax, how income is taxed, how the tax administration operates, and the impact of tax competition among countries on international tax policy. The course uses examples from G20 countries to illustrate the issues discussed. The course is suitable for those who have not studied taxation before, as well as for those with a background in tax who are interested in exploring the principles of taxation in greater depth.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One 2,000 word essay.

Indicative reading: Appropriate readings from journal articles and from books including: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law; Messere et al., Tax Policy: Theory and Practice in OECD Countries; Baistrocchi, A Theory of International Taxation; Dagan, International Tax Policy: Between Competition and Cooperation; Murphy and Nagel, The Myth of Ownership, Taxes and Justice; Thuronyi, Comparative Tax Law;

James and Nobes, The Economics of Taxation; Mirrlees et al., Tax By Design. Further materials include: Morse and Williams, Davies Principles of Tax Law; Kay and King, The British Tax System; Thuronyi, Tax Law Design and Drafting. Detailed reading lists will be provided during the course via Moodle.

Recommended preliminary reading: Avi-Yonah, Sartori and Marian, Global Perspectives on Income Taxation Law (Oxford University Press, 2011).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z3 Half Unit Taxation of Consumption and Income

This information is for the 2019/20 session.

Teacher responsible: Dr Ian Roxan NAB7.25

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: The main sources of tax revenue in nearly every country are taxes on income and consumption in one form or another. This course looks at these two important tax bases to understand their differences, advantages and disadvantages, as well as looking at the taxes they give rise to. Most economists have consistently advocated the taxation of consumption in preference to income for many years. We will look at the validity of these arguments, and at how both consumption and income can be taxed either in the form of income taxes or of sales taxes.

The most dramatic change that has followed from the focus on taxing consumption has been the rise in value added tax (VAT), also called goods and services tax (GST). First implemented sixty years ago, the great majority of countries in the world now have a VAT, with the significant exception of the United States. The final part of the course will look at this important tax, examining how it has been implemented in a range of countries, including the European Union, whose VAT has been an important model for other countries. We will look at the main features of VATs, and at key current issues, such as cross-border transactions and applying VAT in the digital economy.

The course is suitable for students who are interested in taking one course in taxation, including students who have little previous background in taxation, as well as for tax specialists.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: One 2,000-word formative essay or an equivalent assignment.

Indicative reading:

- Schenk et al., James and Nobes, The Economics of Taxation;
- Tanzi and Zee, Tax Policy for Developing Countries,
- Mirrlees, et al., Tax by Design: the Mirrlees Review, (Oxford: Oxford Univ. Press, 2011),
- Edward J. McCaffery, 'A New Understanding of Tax' (2005), 103 Mich. L. Rev. 807;
- J. McNulty, 'Flat Tax, Consumption Tax, Consumption-type Income Tax Proposals in the United States: a Tax Policy Discussion of Fundamental Tax Reform' (2000), 88 Cal. L. Rev. 2095;
- Value Added Tax: A Comparative Approach (Cambridge Univ. Press, 2015);
- Ebrill et al., The Modern VAT (IMF, 2001);
- Bird and Gendron, The VAT in Developing and Transitional Countries (Cambridge Univ. Press, 2007);
- Alan A. Tait, Value Added Tax: International Practice and Problems;
- Mirrlees et al., Tax by Design.

Detailed reading lists will be provided during course via Moodle.

Recommended preliminary reading:

- James and Nobes, *The Economics of Taxation* or
- Tanzi and Zee, *Tax Policy for Developing Countries*;
- Ebrill et al., *The Modern VAT* (International Monetary Fund, 2001) or
- Alan A. Tait, *Value Added Tax: International Practice and Problems* (IMF, 1988).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z5 Half Unit

EU State Aid Law

This information is for the 2019/20 session.

Teacher responsible: Prof Pablo Ibanez Colomo NAB5.16

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms:

Competition, Innovation and Trade; Corporate and/or Commercial Law; European Law; International Business Law.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Member States of the EU are not free to award subsidies to companies or to support them in a comparable way (by, *inter alia*, granting them loans at favourable rates or by providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the principle whereby State aid is incompatible with the EU internal market (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part is devoted to (i) the notion of State aid within the meaning of Article 107(1) TFEU (that is, the range of measures that are subject to *ex ante* control by the European Commission) and to (ii) the conditions under which such measures may be declared to be in the interest of the EU as a whole. The third part provides an overview of the application of the law in some sectors (including the energy or the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline and to the application of similar rules outside the EU (in particular in the context of the WTO and of the trade agreements concluded by the EU).

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Quigley, *European State Aid Law and Policy* (3rd Edition, 2015); Jones and Sufrin, *EU Competition Law* (online Chapter, 6th Edition, 2017); Bacon (ed), *European Community Law of State Aid* (3rd Edition, 2017).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z6 Half Unit

Comparative Constitutional Law

This information is for the 2019/20 session.

Teacher responsible: Dr Jo Murkens NAB7.31

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. This course examines the central issues across a range of jurisdictions and from a variety of perspectives. Part I discusses various approaches to the study of CCL as well as the migration of constitutional ideas and related notions of constitutional borrowing and legal transplants. Part II deals with key constitutional concepts, such as fundamental law, constitutional change, and rule of law, which are discussed from a historical and comparative perspective. Part III deals with constitutional design, a classic as well as topical area of comparative law. As well as offering a critique of mainstream liberal thought that idealises constitutions as normative constraints on politics, these sessions examine whether formal constitutions in divided and authoritarian societies facilitate democratisation and political change or whether they undermine democracy and entrench the rulers. The study of law, like the study of all social phenomena, is always comparative - and inevitably fragmented. This objective of the course is to study comparative constitutional law comprehensively, critically, and contextually (historical, conceptual, regional). This approach enables the student to branch out independently into related areas and topics.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

Formative coursework: One 2,000 word essay.

Indicative reading: There is not set book for this course. All materials will be made available in advance on Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z7 Half Unit

Comparative Constitutional Rights

This information is for the 2019/20 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; "deviant" sexual practices; same sex marriage; religion in the public sphere; hate speech and denial of the holocaust; obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be a reading week in week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

LL4Z9 Half Unit

Banking Law

This information is for the 2019/20 session.

Teacher responsible: Dr Joanne Braithwaite NAB.7.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Law and Accounting and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 60 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course focuses on the private law of banking as it relates to the core banking activities not covered elsewhere on the LLM (ie, on courses about the financing activities of banks; the debt markets and the regulation of banking activities). In particular, we look at the deposit-taking relationship, the legal issues surrounding bank payment services, and the inter-disciplinary debates about the nature of money and payments. The course aims to be both domestic and international in perspective, though the emphasis will be on English law. Topics include: 1.

The deposit-taking relationship; 2. Money, transfers of money and payment including the development of new digital currencies and decentralised payment systems; 3. Bank payment methods: funds transfers and unauthorised payments; and 4. Bank payment services in international trade.

Teaching: 20 hours of seminars in the MT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of MT.

Formative coursework: Students will be asked to submit one essay, which may be written in exam conditions. Students will also be expected to take part in group presentations during the course.

Indicative reading: For introductory purposes, students are referred to Ellinger, Lomnicka and Hare, *Ellinger's Modern Banking Law* (5th ed, 2011). Full reading lists will be distributed during the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

MA400

September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management)

This information is for the 2019/20 session.

Teacher responsible: Dr Arne Lokka and Prof Johannes Ruf

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students who wish to select this course as an outside option must have a quantitative background.

Course content: The purpose of this course is to review some key concepts of probability used in finance. The course develops the common mathematical background that is assumed by the MSc Financial Mathematics and addresses some aspects of the mathematical theory that is central to the foundations of the programme: probability spaces, random variables, distributions,

expectations and moment generating functions are reviewed; the concepts of conditional probability and conditional expectation as random variables are introduced using intuitive arguments and simple examples; stochastic processes, martingales, the standard Brownian motion are introduced; Itô integrals, Itô's formula and Girsanov's theorem are discussed on a formal basis.

Teaching: 30 lectures and 6 classes over two weeks during September, prior to the start of the academic year. There will be an informal examination.

Formative coursework: Exercises are assigned and form the basis of class discussion.

Indicative reading: Lecture notes will be provided. S. Shreve, *Stochastic Calculus for Finance II Continuous-Time Models*, Springer. D. Williams, *Probability with Martingales*, Cambridge University Press.

Assessment:

This course does not form part of the degree award.

MA402 Half Unit

Game Theory I

This information is for the 2019/20 session.

Teacher responsible: Prof Bernhard Von Stengel

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Management Science (Decision Sciences) and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

It is not available to students who have taken Game Theory (MA300) or Game Theory I (MA301).

Pre-requisites: The course emphasises a formal treatment of mathematical Game Theory through definitions, theorems and proofs. Familiarity with a rigorous treatment of mathematics is expected. Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors) and probability theory (expected value, conditional probability, independence of random events).

Course content: Concepts and methods of mathematical game theory with some applications to economics. Nim and combinatorial games. Congestion games. Game trees with perfect information. Backward induction. Extensive and strategic (normal) form of a game. Expected utility. Nash equilibrium. Commitment. Zero sum games, mixed strategies, maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution, multistage bargaining, private-value auctions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: Lecture notes will be provided. Supplementary reading: K Binmore, *Playing for Real: Game Theory* CUP, 2007; E Mendelson, *Introducing Game Theory and Its Applications*, CRC 2004

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA402 Half Unit

Game Theory I

This information is for the 2019/20 session.

Teacher responsible: Prof Bernhard Von Stengel

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Management Science (Decision Sciences) and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes

where regulations permit.

It is not available to students who have taken Game Theory (MA300) or Game Theory I (MA301).

Pre-requisites: The course emphasises a formal treatment of mathematical Game Theory through definitions, theorems and proofs. Familiarity with a rigorous treatment of mathematics is expected. Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors) and probability theory (expected value, conditional probability, independence of random events).

Course content: Concepts and methods of mathematical game theory with some applications to economics. Nim and combinatorial games. Congestion games. Game trees with perfect information. Backward induction. Extensive and strategic (normal) form of a game. Expected utility. Nash equilibrium. Commitment. Zero sum games, mixed strategies, maxmin strategies. Nash equilibria in mixed strategies. Finding mixed-strategy equilibria for two-person games. Extensive games with information sets, behaviour strategies, perfect recall. If time permits: The Nash bargaining solution, multistage bargaining, private-value auctions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: Lecture notes will be provided. Supplementary reading: K Binmore, *Playing for Real: Game Theory* CUP, 2007; E Mendelson, *Introducing Game Theory and Its Applications*, CRC 2004

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA409 Half Unit

Continuous Time Optimisation

This information is for the 2019/20 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Operations Research & Analytics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need adequate background in linear algebra (facility with diagonalization of matrices for the purposes of solving simultaneous first-order differential equations is key here; knowledge of the relation between the range of a matrix transformation and the kernel of its transpose would be helpful), and in advanced calculus (manipulation of Riemann integrals such as 'differentiation under the integral' and the associated Leibniz Rule). Students unsure whether their background is appropriate should seek advice from the lecturer before starting the course.

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. It introduces key methods of continuous time optimisation in a deterministic context, and later under uncertainty. Calculus of variations and the Euler-Lagrange Equations. Sufficiency conditions. Pontryagin Maximum Principle. Extremal controls. Transversality conditions. Linear time-invariant state equations. Bang-bang control and switching functions. Dynamical programming. Control under uncertainty. Itô's Lemma. Hamilton-Jacobi-Bellman equation. If time allows: Applications to Economics and Finance: Economic Growth models, Consumption and investment, Optimal Abandonment, Black-Scholes model, Singular control, Verification lemma.

Teaching: 24 hours of lectures, 4 hours of seminars and 8 hours of seminars in the LT. 2 hours of seminars in the ST.

Background review of (i) elementary methods for solving differential equations, and (ii) pertinent linear algebra (diagonalization) will be included in the the seminars of Weeks 1 and 2.

Four of the 24 lecture hours are dedicated to Exam Revision

Indicative reading: A full set of lecture notes will be provided.

Reference will be made to the following books: E R Pinch, *Optimal Control and the Calculus of Variations*, Oxford Science Publications; G Leitmann, *Calculus of Variations and Optimal Control*, Plenum; A K Dixit & R S Pindyck, *Investment under Uncertainty*, Princeton University Press; D Duffie, *Security Markets*, Academic Press; D J Bell & D H Jacobsen, *Singular Optimal Control*, Academic Press; J L Troutman, *Variational Calculus and Optimal Control*, Springer; W H Fleming & R W Rishel, *Deterministic and Stochastic Optimal Control*, Springer; W H Fleming; H M Soner *Controlled Markov Processes & Viscosity Solutions*, Springer; G Hadley; M C Kemp, *Variational Methods in Economics*, North Holland; D Burghes; A Graham *Control and Optimal Control Theories with Applications*, Horwood; A Sasane, *Optimization in Function Spaces*, Dover.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA410 Half Unit

Information, Communication and Cryptography

This information is for the 2019/20 session.

Teacher responsible: Prof Jozef Skokan

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should be taking the course MA407 Algorithms and Computation or have taken an equivalent course to provide a basic knowledge of algorithms, and should have experience with proofs and proof techniques used in pure mathematics.

Course content: This course provides an introduction, for students with a mathematical background, to the applications of mathematics in information theory, coding theory, cryptography, and related areas. The course will cover mathematical aspects of the following topics: Noiseless coding, the Kraft-McMillan criterion, optimal coding, entropy, Shannon's first theorem; Noisy channels, capacity, system entropy; Error-correcting codes, decoding rules, bounds, construction and properties of linear and cyclic codes; Structure of natural languages, redundancy, the frequency table, making and breaking cryptosystems, historic examples; Public-key cryptography, complexity issues, the RSA system, authentication schemes, the ElGamal system. Subject to available time we may also cover elliptic curve cryptography and/or cryptocurrencies.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 2 hours of lectures in the ST.

Indicative reading: N L Biggs, *Codes, An Introduction to Information, Communication and Cryptography*; G A Jones & J M Jones, *Information and Coding Theory*; C M Goldie & R G E Pinch, *Communication Theory*; D J A Welsh, *Codes and Cryptography*; D T Stinson, *Cryptography Theory and Practice*.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the MT.

MA411 Half Unit

Probability and Measure

This information is for the 2019/20 session.

Teacher responsible: Dr Pavel Gapeev

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some background in real analysis is essential.

Course content: The purposes of this course are (a) to explain the

formal basis of abstract probability theory, and the justification for basic results in the theory, and (b) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Convergence of random variables. Conditional expectation. The Radon-Nikodym Theorem. Martingales. Stochastic processes. Brownian motion. The Itô integral.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

The lecture in the Summer Term is a Revision Lecture.

Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales; M Caplinski & E Kopp, Measure, Integral and Probability; J Jacod & P Protter, Probability Essentials.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA413 Half Unit Games of Incomplete Information

This information is for the 2019/20 session.

Teacher responsible: Dr Robert Simon COL 4.07

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should be familiar with the related mathematics of topology and functional analysis. Some degree of mathematical maturity is expected.

Course content: The techniques and results of game theory are increasingly important to economic analysis. This course focuses on the problems of information incompleteness and information asymmetry. This is a relatively new but rapidly expanding area of game theory with connections to several areas of economic theory, for example conflict resolution, auctions, principal-agent problems, and the logic of knowledge. The course is divided into three parts, I Basic Results, II Repeated Games, III Bayesian Games. For the first part we cover the Min-max Theorem and Nash's Theorem of Equilibrium Existence, Extensive Form and Discounted Games. For the second part we cover Zero-sum Games with Vector Payoffs, Repeated Game of Incomplete Information on One Side, and myopic equilibria. For the third part we cover Common Knowledge, Zero-Sum Bayesian Games, Locally Finite Games, and Non-Zero-Sum Bayesian Games.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: A full set of lecture notes will be provided. Useful accompanying texts are Robert J. Aumann and Michael B. Maschler, Repeated Games with Incomplete Information, MIT Press, 1995; L. Breiman, Probability; K. Border, Fixed Point Theorems with Applications to Economics and Game Theory; R Myerson, Game Theory, Analysis of Conflict, Harvard University Press; D Fudenberg & J Tirole, Game Theory, MIT Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA414 Half Unit Stochastic Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other

programmes where regulations permit.

Pre-requisites: ST409 or MA411.

Course content: This course is concerned with a rigorous introduction to the area of stochastic analysis with emphasis on Itô calculus. The course begins necessary preliminaries, followed by a construction of the standard Brownian motion and a study of its properties. Subsequently, Lévy's characterisation of Brownian motion, martingale representation theorems and Girsanov's theorem are established. The course then expands on a study of stochastic differential equations.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Indicative reading: Full lecture notes will be provided. The following may prove useful: I Karatzas and S E Shreve, Brownian Motion and Stochastic Calculus, Springer; B Øksendal, Stochastic Differential Equations: An Introduction with Applications, Springer; D Revuz and M Yor, Continuous Martingales and Brownian Motion, Springer; L C G Rogers and D Williams, Diffusions, Markov Processes, and Martingales, Cambridge.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA415 Half Unit The Mathematics of the Black and Scholes Theory

This information is for the 2019/20 session.

Teacher responsible: Prof Johannes Ruf

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: This course is concerned with a mathematical development of the risk-neutral valuation theory. In the context of the binomial tree model for a risky asset, the course introduces the concepts of replication and martingale probability measures. The mathematics of the Black & Scholes methodology follow; in particular, the expression of European contingent claims as expectations with respect to the risk-neutral probability measure of the corresponding discounted payoffs, pricing formulae for European put and call options, and the Black & Scholes PDE are derived. A class of exotic options is then considered. In particular, pricing formulas for lookback and barrier options are derived using PDE techniques as well as the reflection property of the standard Brownian motion. The course also introduces a model for foreign exchange markets and various foreign exchange options.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT.

The MA415 course has 40 hours of teaching.

Indicative reading: N H Bingham and R Kiesel, Risk-Neutral Valuation, Springer; T Björk, Arbitrage Theory in Continuous Time, Oxford; P J Hunt and J Kennedy, Financial Derivatives in Theory and Practice, Wiley; D Lamberton and J Kennedy, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall; D. Lamberton and B. Lapeyre, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall/Crc Financial Mathematics Series, 2nd edition, 2007; S E Shreve, Stochastic Calculus for Finance: Continuous-time Models: vol. 2, Springer

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA416 Half Unit**The Foundations of Interest Rate and Credit Risk Theory**

This information is for the 2019/20 session.

Teacher responsible: Prof Mihail Zervos

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: This course studies the mathematical foundations of interest rate and credit risk theory. The course starts with a development of the multi-dimensional Black & Scholes theory with stochastic market data. This is then used to show how discount bond dynamics modelling can be approached by (a) the modelling of the short-rate process and the market price of risk, which underlies the family of short-rate models, or (b) the modelling of the market price of risk and the discount bond volatility structure, which gives rise to the Heath-Jarrow-Morton (HJM) framework. The course then expands on the theory of interest rate market models and credit risk.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two sets of written homework will be marked with feedback provided.

Indicative reading: T R Bielecki and M Rutkowski, *Credit Risk Modeling, Valuation and Hedging*, Springer; J James and N Webber, *Interest Rate Modelling*, Wiley; A J McNeil, R Frey, and P Embrechts, *Quantitative Risk Management: Concepts, Techniques, and Tools*, Princeton University Press; M Musiela and M Rutkowski, *Martingale Methods in Financial Engineering*, Springer; R Rebonato, *Modern Pricing of Interest-rate Derivatives: The LIBOR Market Model and Beyond*, Princeton.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA417 Half Unit**Computational Methods in Finance**

This information is for the 2019/20 session.

Teacher responsible: Dr Luitgard Veraart

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400) and Programming in C++ (MA432).

Course content: The purpose of this course is to (a) develop the students' computational skills, and (b) introduce a range of numerical techniques of importance to financial engineering. The course starts with random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Numerical solutions to stochastic differential equations and their implementation are considered. The course then addresses finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: 20 hours of lectures, 4 hours of seminars and 10 hours of computer workshops in the LT.

Formative coursework: Weekly exercises and practicals are set and form the basis of the seminars.

Indicative reading: P.Glasserman, *Monte Carlo Methods in Financial Engineering*, Springer; R.U. Seydel, *Tools for Computational Finance*, Springer; P.E.Kloeden and E.Platen,

Numerical Solution of Stochastic Differential Equations, Springer; D.M. Capper, *Introducing C++ for Scientists, Engineers and Mathematicians*, Springer. B. Stroustrup, *The C++ Programming Language*, Addison Wesley; M. J. Capinski, T. Zastawniak, *Numerical Methods in Finance with C++*, Cambridge University Press; M. S. Joshi, *C++ Design Patterns and Derivatives Pricing*, Cambridge University Press;

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

MA420 Half Unit**Quantifying Risk and Modelling Alternative Markets**

This information is for the 2019/20 session.

Teacher responsible: Prof Mihail Zervos

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Co-requisite: Students must also complete Stochastic Processes (ST409).

Course content: This course studies various issues arising in the context of investment risk specification as well as with the mathematical theory of so-called alternative markets, such as commodity and energy markets. In particular, the course considers the structural credit risk models and the quantification of risk by means of copulas and risk measures. Also, the course expands on the modeling of alternative markets and addresses the problem of valuation of investments in real assets.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Two sets of written homework will be marked with feedback provided.

Indicative reading: F.Benth, J.Benth, S.Koekebakker, *Stochastic Modelling of Energy and Related Markets*, World Scientific 2008. H.Föllmer and A.Schied, *Stochastic Finance*, 3rd edition, De Gruyter, 2011. A.McNeil, R.Frey and P.Embrechts, *Quantitative Risk Management*, Princeton University Press, 2005. A.K.Dixit and R.S.Pindyck, *Investment under Uncertainty*, Princeton University Press, 1994.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MA421 Half Unit**Advanced Algorithms**

This information is for the 2019/20 session.

Teacher responsible: Gregory Sorkin

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course to provide a basic knowledge in analysis of algorithms: running time and correctness of an algorithm, basic knowledge of computer programming (preferably in Java), and should have experience with proofs and proof techniques used in pure mathematics.

Course content: Introduction to NP-Completeness, followed by Approximation Algorithms, Randomised Algorithms, and other topics such as some of Average-Case Analysis, Streaming Algorithms, Exponential-Time Algorithms, and Numerical

Algorithms.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked. Some of these will include programming exercises in Java.

Indicative reading: Cormen, Leiserson, Rivest and Stein, Introduction to Algorithms; Williamson, Shmoys, The Design of Approximation Algorithms; Motwani and Raghavan, Randomized Algorithms.

Assessment: Exam (75%, duration: 2 hours and 30 minutes) in the summer exam period.

Coursework (25%) in the LT.

MA422

Research Topics in Financial Mathematics

This information is for the 2019/20 session.

Teacher responsible: Ms Chhaya Trehan

Availability: This course is available on the MPhil/PhD in Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

PhD students in the departments of Mathematics and Statistics along with other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of financial mathematics, stochastic analysis and stochastic control theory.

Teaching: 6 hours of seminars in the MT. 6 hours of seminars in the LT.

6 x 1 hour talks by researchers in the MT and LT.

Additional seminars will be scheduled throughout the year. Please see the Timetables website for further information.

Formative coursework: This course is not assessed.

Assessment:

This is a non-assessed course.

MA423 Half Unit

Fundamentals of Operations Research

This information is for the 2019/20 session.

Teacher responsible: Mr Ahmad Abdi

Availability: This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), probability theory (expected value, conditional probability, independence of random events) and calculus (derivatives, limits). This corresponds to knowledge of Mathematics and Statistics to the level of MA107 (Quantitative Methods Mathematics) and ST102 (Elementary Statistical Theory).

Course content: An introduction to a range of Operations Research techniques, covering: foundations of linear programming, including the simplex method and duality; integer programming; markov chains; queueing theory; dynamic programming; inventory models; game theory.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 2 problem sets in the MT.

Indicative reading: The course will be taught from lecture notes and slides.

Students may also wish to consult:

F S Hillier & G J Lieberman, Introduction to Operations Research, 9th edition (2009). Wayne Winston, Operational Research; Applications and Algorithms, Fourth/International Student Edition.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA424 Half Unit

Modelling in Operations Research

This information is for the 2019/20 session.

Teacher responsible: Dr Victor Verdugo Silva

Availability: This course is compulsory on the MSc in Management Science (Decision Sciences) and MSc in Operations Research & Analytics. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange) and MSc in Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors) and probability theory (expected value, conditional probability, independence of random events).

Students taking the course as an outside option are also expected to have a basic knowledge of linear programming. For students in the MSc in Operations Research & Analytics this will be covered in MA423 Fundamentals of Operations Research.

Course content: The course will be in 2 parts, covering the two most prominent tools in operational research: simulation, the playing-out of real-life scenarios in a (computer-based) modelling environment, and mathematical optimisation, the application of sophisticated mathematical methods to make optimal decisions. Simulation (8 lecture hours): This part develops simulation modelling skills, understanding of the theoretical basis which underpins the simulation methodology, and an appreciation of practical issues in managing a simulation modelling project. Topics include Monte Carlo simulation, Markov processes, discrete event simulation, and variance reduction. The course will teach students how to use a simulation modelling software package. Optimisation (12 lecture hours): This part enables students to model and solve real-life management problems as Mathematical Optimisation problems. In providing an overview of the most relevant techniques of the field, it teaches a range of approaches to building Mathematical Optimisation models and shows how to solve them and analyse their solutions. Content includes: The modelling life-cycle and modelling environments; formulation of management problems using linear and network models; solution of such problems with a special-purpose programming language; interpretation of the solutions; limitations of such models; and formulation and solution of nonlinear models including some or all of binary, integer, convex and stochastic programming models.

Teaching: 20 hours of lectures, 13 hours and 30 minutes of seminars and 18 hours of computer workshops in the MT. Computer workshops are not mandatory. They are help sessions, where an instructor is available to students in the computer cluster while they work on their assignment.

Formative coursework: Students will be expected to produce 1 project in the MT.

Feedback will be provided on the weekly homework. Additional feedback will be provided on a one-on-one basis to students attending the optional computer help sessions.

Indicative reading: Full lecture notes will be provided to students for both parts.

Recommended readings:

Simulation

- A M Law & W D Kelton, Simulation Modelling and Analysis, McGraw Hill (3rd ed., 2000);
- M Pidd, Computer Simulation in Management Science, Wiley (5th ed., 2006);
- S Ross, Simulation, Academic Press (5th ed., 2012).

Optimisation

- W L Winston, Operations Research: Applications and Algorithms, Brooks/Cole (4th ed., 1998);
- D Bertsimas and J N Tsitsiklis: Introduction to Linear Optimization, Athena Scientific (3rd ed., 1997).

Assessment: Project (100%) in the LT.

The project will be on Simulation, Mathematical Optimisation, or a combination of the two. The deliverable is a report of at most 12 pages (main report, excluding executive summary and technical appendices), along with a soft copy of any computer code and solver output.

MA425**Project in Operations Research & Analytics**

This information is for the 2019/20 session.

Teacher responsible: Mr David Collier

Availability: This course is available on the MSc in Management Science (Decision Sciences) and MSc in Operations Research & Analytics. This course is not available as an outside option. Cannot be taken with MA426 Dissertation in Operations Research & Analytics.

Course content: The student will carry out and report upon a substantial practical piece of Management Science. The project will either be found by the course leader or may be suggested by the student, with the approval of his/her teachers.

Teaching: 9 hours of lectures and 4 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 2 hours of seminars in the LT.

Formative coursework: Each student will be assigned an internal project supervisor who will monitor his/her progress on a continuing basis and give tutorial advice as required.

Indicative reading: Detailed suggestions for reading will be provided in the course of supervision.

Assessment: Project (100%).

Assessment is based entirely on the project report.

The student is expected to work on this full-time from early June to end of August. Two paper copies and one electronic copy must be submitted on a specified date in late August/early September. The page limit for the report is 40 pages, excluding appendices.

A degree cannot be awarded unless MA425 Project in Operations Research & Analytics or MA426 Dissertation in Operations Research & Analytics have been passed.

MA426**Dissertation in Operations Research & Analytics**

This information is for the 2019/20 session.

Teacher responsible: Dr Laszlo Vegh

Availability: This course is available on the MSc in Management Science (Decision Sciences) and MSc in Operations Research & Analytics. This course is not available as an outside option. Cannot be taken with MA425 Project in Operations Research & Analytics.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of management science. The dissertation is a quantitative or qualitative investigation in the field. It may be either a theoretical or empirical piece of research. Students must obtain the approval of their advisor before embarking on any research.

Teaching: 10 hours of seminars and 3 hours of seminars in the MT. 9 hours of seminars in the LT. 3 hours of seminars in the ST. Advisors will normally be allocated according to student dissertation proposals, and it is the student's responsibility to find a suitable dissertation adviser who will advise the student, help provide information and bibliography and identify likely problems with the proposed research. Dissertation guidelines will be issued to students during MT.

The seminars are not compulsory but students are encouraged to

attend the same seminar sessions as MA498. Much of the work covered in the MA498 seminars is also useful to MA426.

Formative coursework: Students are required to submit Dissertation Plans to their supervisor in LT and ST.

Assessment: Dissertation (100%, 10000 words) post-summer term.

Two paper copies of the dissertation must be submitted on a specified date in late August/early September. An electronic version of the dissertation must also be submitted. The word limit for the dissertation is 10,000 words. The dissertation is critical to assessment.

MA427 Half Unit**Mathematical Optimisation**

This information is for the 2019/20 session.

Teacher responsible: Dr Giacomo Zambelli

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Applicable Mathematics, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have sufficient knowledge of linear algebra (linear independence, determinants, matrix inversion and manipulation) and of basic multivariate calculus (derivatives and gradients).

Course content: Introduction to the theory and solution methods of linear and nonlinear programming problems, including: linear programming duality, Lagrangian duality, convex programming and Karush-Kuhn-Tucker conditions, algorithms for linear and convex optimisation problems, theory of good formulations for integer linear programming models, integer linear programming methods (branch and bound and cutting planes).

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises will be given that will be solved and discussed during the seminars. Three of those exercises will be handed in as formative coursework and the students will be given feedback on their submissions.

Indicative reading: Extensive lecture notes covering all parts of the course will be provided. Students interested in further readings can look at the books below.

- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization (1997)
- S Boyd and L Vandenberghe, Convex Optimization (2004)
- M Conforti, G Cornuejols, G Zambelli, Integer Programming (2014)

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA428 Half Unit**Combinatorial Optimisation**

This information is for the 2019/20 session.

Teacher responsible: Neil Olver

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some familiarity with graph theory and some knowledge of linear programming is desirable. For students that have no linear programming background, it is recommended that they read the material of the first two lectures of course MA423,

which can be found on the Moodle page of MA423.

Course content: The course is intended as an introduction to discrete and combinatorial techniques for solving optimisation problems, mainly involving graphs and networks. Topics covered include: minimum spanning trees, with a brief introduction to matroids; shortest path algorithms; maximum flow algorithms; minimum cost flow problems; matching and assignment problems; and other topics that may vary from year to year.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures in the ST.

Formative coursework: Weekly exercises will be given that will be solved and discussed during the seminars. Two of those exercises will be handed in as formative coursework and the students will be given feedback on their submissions.

Indicative reading: Lecture notes will be supplied for most topics; otherwise reading from books will be indicated.

Most of the lectures will be based on topics from: R K Ahuja, T L Maganti and J B Orlin, *Network Flows* (2013).

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MA429 Half Unit Algorithmic Techniques for Data Mining

This information is for the 2019/20 session.

Teacher responsible: Gregory Sorkin

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Marketing and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit. The course will be capped to 45 students.

Pre-requisites: Students are not permitted to take this course alongside ST443, Machine Learning and Data Mining. Students must have knowledge of Statistics and the programming language R to the level of ST447, Data Analysis and Statistical Methods.

Course content: Data Mining is an interdisciplinary field developed over the last three decades. Vast quantities of data are available today in all areas of business, science, and technology. The main goal of data mining is to extract previously unknown, useful information from such massive scale data. The aim of the course is to equip the students with a theoretically founded and practically applicable knowledge of data mining. The theoretical foundations of the field come from mathematics, statistics, computer science and artificial intelligence.

The course introduces fundamental machine learning methods and algorithms for basic data analytics problems. These methods include algorithms for classification and regression problems, such as tree construction, support vector machines, nearest-neighbour methods, Bayesian networks. The course will also cover unsupervised learning methods such as association rule mining and clustering.

The methods are illustrated on practical problems arising from various fields. The course will use data mining packages in R.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: There will be weekly homework assignments, some of which will be submitted for formative feedback, and some for summative assessment (10% of the course mark). A mock project will be given, as preparation for the summative group project.

Indicative reading: James, Witten, Hastie, Tibshirani, *An Introduction to Statistical Learning: with Applications in R* (2016) Hastie, Tibshirani, Friedman, *The Elements of Statistical Learning: Data Mining, Inference and Prediction*, Second Edition (2009) Torgo, *Data Mining with R: Learning with Case Studies* (2010)

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (40%) in the ST.

Coursework (10%) in the LT.

The examination is critical to assessment. In order to pass this course, students need to achieve a mark of at least 50% in the examination. A fail mark in the exam will result in an overall fail mark for the course and cannot be compensated by the mark achieved in the coursework element.

MA432 Programming in C++

This information is for the 2019/20 session.

Teacher responsible: Ms Chhaya Trehan COL.3.16

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

There may be limited availability to students in MSc in Applicable Mathematics, MSc in Operations Research & Analytics, and other programmes, subject to resource constraints such as computer room capacity.

Course content: This course is an introduction to programming with the C++ programming language. We will cover the lexical basis of C++, fundamental types and basic operators, control structures, functions, pointers and arrays, dynamic memory management, classes, data hiding, constructors and destructors, operator overloading, single inheritance, templates, standard library, exception handling, input and output.

Teaching: 10 hours of lectures and 20 hours of computer workshops in the MT.

Formative coursework: Students will work through worksheets provided in the computer workshops.

Indicative reading: D.M. Capper, *Introducing C++ for Scientists, Engineers and Mathematicians*, Springer.

B. Stroustrup, *The C++ Programming Language*, Addison Wesley.

MA433 Half Unit Mathematics of Networks

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Lewis-Pye

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Mathematical maturity and an ability to write mathematical proofs. Linear algebra (diagonalisation, eigenvalues and eigenvectors), some graph theory and some basic game theory would be useful, but necessary knowledge from these areas will be revised during the course.

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: 20 hours of lectures and 10 hours of classes in the MT. 2 hours of lectures in the ST.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading:

1. D. Easley, J. Kleinberg. *Networks, crowds and markets*, Cambridge University Press, 2010.
2. M. Newman. *Networks: An Introduction*, Oxford University Press, 2010.
3. *The Rise of the Network Society, The Information Age: Economy, Society and Culture*, 2010 edition, Manuel Castells.

Assessment: Exam (80%, duration: 2 hours) and presentation (20%).

20% of the final grade will be determined by groupwork, in which groups of around four or five students are each allocated a research paper by the lecturer. The students then have to meet in order to discuss and understand the paper, before giving a group presentation on the subject matter.

MA498

Dissertation in Mathematics

This information is for the 2019/20 session.

Teacher responsible: Andrew Lewis-Pye

Availability: This course is compulsory on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Dissertation in Mathematics is an individual, substantial project as an introduction to mathematical research methods. The student will investigate and study an area of mathematical research or application of advanced mathematical techniques, and to write a report on their findings. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: 10 hours of seminars and 3 hours of seminars in the MT. 9 hours of seminars in the LT. 3 hours of seminars in the ST. The seminars include a mixture of lecture time, presentations and discussion. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with student supervisors. Several seminars will include presentations by members of the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance thorough the LT, ST, and over the summer.

Formative coursework: Students will be expected to produce an initial report (in LT) and an interim report (in ST) for which feedback will be provided.

Indicative reading: Detailed suggestions for reading will be provided by the supervisor.

Assessment: Dissertation (90%) in the LT and ST. Oral examination (10%) in the ST.

Assessment is primarily based entirely on the Dissertation, three hard copies and one electronic copy of which must be submitted by early September (exact date to be specified later). The report may include some software relating to the project. Detailed information about the required format for this submission will be provided during the Seminars.

At the end of summer term, each student will give a presentation to an audience of two members of staff on the topic of their dissertations. This will be graded and worth 10% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

MC401 Half Unit

Mediated Resistance and Activism

This information is for the 2019/20 session.

Teacher responsible: Prof Bart Cammaerts FAW-601c

Availability: This course is available on the MSc in Media and Communications and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course aims to examine the various ways in which citizens, activists and social movements use, appropriate and shape media and communication technologies to resist and mobilise for resistance, but also how resistance is represented and mediated, by activists themselves through movement and social media as well as by the mainstream media. The course will address several aspects of the intricate relationship between media and communication, resistance and activism, but this inevitably also implicates the state and the market in terms of the structural limitations to the emancipatory use of media and communication. The course is organised around the core-concept of the 'mediation opportunity structure' referring to the opportunities for agency through media and communication, as well as the structural constraints preventing agency and stifling dissent. Both Information and Communication Technologies (ICT's) and more traditional media will be considered and a dialectical perspective on power and the relationship between agency and structure is adopted with a particular emphasis on strategies of resistance and circumvention.

At a theoretical level this course is situated at the intersection of social movement theory, political theory and media and communication theory. The different lectures will focus on various aspects of the mediation opportunity structure, including mainstream media representation, self-mediation practices, counter-hegemony, networked opportunities – using examples from various regions in the world. Some case-studies will be situated at a local level of analysis, others at a national, while again others might relate to regional contexts or even transnational levels of contestation.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading:

- Bailey, Olga, Cammaerts, Bart and Carpentier, Nico (2007) *Understanding Alternative Media*, Maidenhead: Open University Press.
- Barassi, Veronica (2015) *Activism on the Web: Everyday Struggles Against Digital Capitalism*. London: Routledge.
- Bennett, Lance and Segerberg, Alexandra (2013) *The Logic of Connective Action: Digital Media and the personalization of Contentious Politics*. Cambridge: Cambridge University Press.
- Cammaerts, Bart (2018) *The Circulation of Anti-Austerity Protest*. Basingstoke: Palgrave-Macmillan
- Cammaerts, Bart, Matoni, Alice and McCurdy, Patrick (eds) (2013) *Mediation and Protest Movements*. Bristol: Intellect.

- Johnston, Hank (2014) *What is a Social Movement?.* Cambridge: Polity.
- Martín-Barbero, Jesús (1993) *Communication, Culture and Hegemony: From the Media to Mediation*. London: Sage.

Assessment: Essay (100%, 3000 words) in the ST.

MC402 Half Unit

The Audience in Media and Communications

This information is for the 2019/20 session.

Teacher responsible: Prof Sonia Livingstone FAW.7.01L

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Culture and Society, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course examines a variety of social, cultural and psychological issues as they relate to the audiences for mass and social media. It analyses people's everyday engagement with a mediated world. We will review the history of audiences and audience research from the vantage point of the present digital age, also examining key theories of audiences' and users' interpretation, engagement, fandom and creativity in a global and cross-media perspective. Students will be encouraged to read widely, to forge links with other aspects of media, communications and cultural studies in order to critically examine the positioning of audiences and users within the field, and to debate the nature and future of audiences in a changing media landscape.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Abercrombie, N. & Longhurst, B. (1998) *Audiences: A Sociological Theory of Performance and Imagination*, Sage; Athique, A. (2016) *Transnational Audiences: Media Reception on a Global Scale*. Cambridge: Polity; Barker, M. (2013), *Audience Transformations: Shifting Audience Positions in Late Modernity*, Intellect; Das, R. (2019) *A Field in Flux: The Intriguing Past and the Promising Future of Audience Analysis*. Special Issue of the journal, *Television and New Media*; Hanusch, F. and Tandoc, E.C. (2019) *Journalism and its Audiences*. Special Issue of the journal, *Journalism*. Morley, D. (1992) *Television, Audiences and Cultural Studies*, Routledge; Nightingale, V. (ed.) (2011) *The Handbook of Media Audiences*, Wiley-Blackwell; Patriarche, G. et al. (eds.) (2014) *Audience Research Methodologies: Between Innovation and Consolidation*. London: Routledge; Sender, K. (2012). *The makeover: Reality television and reflexive audiences*. New York: New York University Press.

Assessment: Essay (100%, 3000 words) in the ST.

MC403 Half Unit

Contemporary Issues in Media and Communications Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Damian Tambini FAW.7.01J

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance) and MSc in Politics and Communication. This course is available with permission as an

outside option to students on other programmes where regulations permit.

This course will be particularly beneficial to students with some background knowledge of media policy, regulation and governance. You are advised to consult the course teacher if you have not taken MC424, or if you do not have relevant professional experience.

Preparation for the course could include:

- Seeking additional reading in discussion with course teacher, or
- Auditing MC424 course materials and lectures from Moodle.

This course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course examines live issues in internet, broadcasting, press and telecommunications policy with a focus on current debates and an innovative format including practical exercises in policy engagement and guest speakers who are active in media policy. The aim will be to develop a practical approach to current debates at the same time referring to the longer term normative and theoretical background to intervention in this sector. After the first session, discussion will focus on a current issue each week, and the reading contains items relating to that issue. There may be some changes to the order of the sessions depending on availability of guest speakers, and supplementary readings may be advised during seminars or by email. Students will be encouraged to debate current policy issues including those that regulators and the government are currently consulting on, and develop a critical understanding of policy intervention, the policy process and strategy.

Teaching: 30 hours of lectures in the LT.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1,500 words.

Indicative reading: A reading list will be provided for each topic.

General works relevant to the course include:

Assessment: Essay (100%, 3500 words) in the ST.

MC404 Half Unit Political Communication in Democracies

This information is for the 2019/20 session.

Teacher responsible: Dr Dylan Mulvin PEL.7.01C

Availability: This course is available on the MSc in Politics and Communication. This course is available as an outside option to students on other programmes where regulations permit. Please note that places are very limited. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped. This means that there is a limit to the number of students who can be accepted. While we do our best to accommodate all requests, we cannot guarantee places on the course.

Course content: The aim of the course is to examine the relationship between the media and political processes in comparative perspective. It offers a critical review of key aspects of contemporary theory and research in political communications, examining a range of interconnected issues concerning the relationship between politics and media including: the political influence of the media; public opinion; election and referendum campaigning; political marketing and branding; political reporting; media and public knowledge; and public diplomacy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Bennett, W. L. & Segerberg, A. 2012. *The Logic of Connective Action: Digital Media and the Personalization of Contentious Politics*. Cambridge: Cambridge University Press.

MC407 Half Unit International Media and The Global South

This information is for the 2019/20 session.

Teacher responsible: Dr Shakuntala Banaji FAW.7.01F

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social

Science, MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course challenges students to raise questions about the power and role of international media – including media originating in the global south, and that circulated by NGOs – in shaping discourses about development, group identities and the global south. Building on empirical examples, the lectures aim to demonstrate that the reporting and discussion of gender, poverty, disasters, political unrest, underdevelopment and development by international media organisations has implications, not only for the way the global south and its diverse populations are imagined and represented, but also for the arena of international and national policy and politics. Using theories of ideology, critical political economy and postcoloniality, the course critically investigates key questions concerning the role of international, national, NGO and subaltern media in development, including the failure of colonial relationships of power to pass away. The course offers insight into how to approach the study of media constructions, discourses and representations of, and about, the global south and its citizens. The objectives are to: (a) Introduce debates about how media power shapes international development discourses and political realities for citizens in the global south; (b) Link dominant development theories to the paradigms of mediated NGO development interventions; (c) Provide a postcolonial critique of the study of representations of poverty, development, participation and the global south; (d) Critically assess aspects of the political economy of international media production within the contexts in which both local media groups and NGOs research, package and produce information about international development, especially in and about the global south and (e) Investigate whether and in what ways new and mobile technologies, and small and participatory media formats enable alternative voices and critical frameworks from the global south to be heard. The course is organized into three sections: 1) a historical and theoretical overview of international media, development and the global south locating the debate(s) around development and communication within postcolonial and other critical frameworks, 2) Critical perspectives, drawn selectively from studies of development theory, political economy and cultural studies and pertaining to identity, ideology, representation, regulatory frameworks, good governance and democracy and 3) Cases and practices in reporting development, poverty, inequality and humanitarian issues. Cross-cutting themes will include a consideration of gender, NGO communications, ethnic and social conflict, tourism campaigns, social media and ICTs in the context of international media and change in the global south.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, contribute to Moodle forums, prepare seminar presentations, and submit one essay of 1,500 words.

Assessment: Essay (100%, 3000 words) in the ST.

MC408 Half Unit

Theories and Concepts in Media and Communications

This information is for the 2019/20 session.

Teacher responsible: Prof Bart Cammaerts FAW.6.01C

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Culture and Society, MSc in Gender, Media and Culture and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course addresses key theoretical and conceptual issues in the study of media and communications, within a broadly interdisciplinary social science perspective. It grounds the analysis of media and communications phenomena within broader sociological and political theories of social order and social change, thereby revealing the shifting significance of the media environment for relations among the state, market and public sphere in a globalising knowledge society.

The course is divided into two main sections. The first part examines what we study, which ranges from content and infrastructures to audiences, communities, algorithms and data. The second part explores selected critical perspectives which have proved influential in the field of media and communications

and which provide answers to the question why we study what we study.

As a team-taught course that combines weekly lectures and seminars, its purpose is to expose students to a wide range of research-led debates at an advanced level, and to enable students to develop their understanding and critical appraisal of the relation between media and power at the levels of institutions, culture and social processes.

The course also includes an invited speaker series ('Media Agenda Talks') which addresses the interface between academic issues taught on the Media and Communications programmes and professional issues facing the media and communications industry. Speakers will normally include a mix of journalists and executives working for UK and global media companies or in the NGO-sector in London. The purpose is to provide an opportunity for students to relate the topics and themes addressed within their academic studies to the debates and concerns currently facing practitioners.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

13 hours and 30 minutes of Media Agenda Talks in MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words during MT.

Indicative reading: A specialist reading list will be provided for each topic. General reference readings relevant to the course include: Atton, C. (2015) *The Routledge Companion to Alternative and Community Media*. London: Routledge. Bella, M. (2003) *International and Development Communication: A 21st Century Perspective - 2nd Edition*. Assessment: Essay (100%, 3000 words) in the LT.

MC409 Half Unit

Media, Technology and Everyday Life

This information is for the 2019/20 session.

Teacher responsible: Dr Leslie Haddon

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication

and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: The course aims to explore how information and communication technologies are experienced in everyday life.

This includes examining how ICTs are socially shaped, through looking at current theoretical frameworks as well as historical and contemporary examples. The course covers such matters as the domestication of ICTs, their place in social networks and their implications for time and space. Finally, a range of potential social consequences are considered, from the specific implications for parent-child relationships to broader questions about the extent to which these technologies are changing social life.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Haddon, L. (2004) *Information and Communication Technologies in Everyday Life: A Concise Introduction and Research Guide*, Berg; Berker, T, Hartmann, M., Punie, Y and Ward, K. (Eds) (2005) *Domestication of Media and Technologies*, Open University Press; Ito, M., Matsuda, M. & Okabe, D. (Eds) (2005) *Personal, Portable, Pedestrian, Mobile Phones in Japanese Life*, MIT Press; Ito, M. (2005) *The Deepening Divide: Inequality in the Information Society*, Sage, London; Green, N. and Haddon, L. (2009) *Mobile Communications: An Introduction to New Media*, Oxford, Berg; boyd, d. (2014) *It's Complicated. The Social Lives of Networked Teenagers*, Yale University Press, New Haven; Byam, N. (2015) *Personal Communications in a Digital Age*, Cambridge, Polity; Turkle, S. (2011) *Alone Together: Why we Expect More from Technology and Less from Each Other*, Basic Books, New York; Curran, J., Fenton, N. and Freedman, D. (eds) (2016) *Misunderstanding the Internet (Second Edition)*, Routledge, London.

Assessment: Essay (100%, 3000 words) in the LT.

MC411 Half Unit Media and Globalization

This information is for the 2019/20 session.

Teacher responsible: Dr Wendy Willems

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT) and MSc in Global Media and Communications (LSE and USC). This course is not available as an outside option.

Course content: The aim of this course is to explore and demonstrate the role of the media and communications in the processes of globalisation by introducing the relevant literature, by examining various theories of globalisation and by identifying their relevance in understanding the media. Topics taught include media imperialism, global media production, cosmopolitanism, global representations, global consumption, and comparative research.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, participate actively in seminar discussions, carry out seminar presentations and submit one essay of 1,500 words.

Indicative reading: A reading list will be provided for each topic. General works relevant to the course include: Appadurai, A. (1996). *Modernity at Large: Cultural Dimensions of Globalisation*. Minneapolis, MN: University of Minnesota Press.

Eriksen, T. (2014) *Globalization*. London: Bloomsbury; Flew, T. (2018). *Understanding Global Media*. London: Red Globe Press; Kraidy, M.M. Assessment: Essay (100%, 3000 words) in the LT.

MC416 Half Unit Representation in the Age of Globalisation

This information is for the 2019/20 session.

Teacher responsible: Professor Shani Orgad PEL.7.01H

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Images and stories circulated in the media play a central role in informing how we imagine the world, others and ourselves. We become increasingly dependent, often exclusively, on what we see, read and hear in the news, on social media, our favourite television drama series, in advertisements, and films, or on the radio. This course focuses on the way media representations are implicated in the exercise of power over how we think and feel through the construction of meaning. It explores the opportunities that media representations present for the creation of a global and interconnected space, which enables the people living in it to conduct their social, cultural, political and economic lives in positive, just and inclusive ways. At the same time, the course discusses some of the critical challenges, limits and threats those visual and textual representations present. The discussion focuses on the representation of the Other and the production of difference, the representation of gender, suffering and migration - timely issues which are ever more urgent in contemporary public life. It examines how transformations in the contemporary media landscape, such as the expansion of social media platforms, the increasing commodification and global scope of communication, shape the ways in which public issues are framed, imaged, and constructed, the consequences this may have for the moral judgements people make and the possibilities for disrupting dominant narratives and imaginaries.

Teaching: 14 hours of lectures, 8 hours of seminars and 2 hours of workshops in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Amin, A. (2012). *Land of Strangers*, Polity; Bauman, Z. (2016). *Strangers at Our Door*, Polity; Hall, S. (1997) *Representation: Cultural Representations and Signifying Practice*, Sage; Macdonald, M. (2003) *Exploring Media Discourse*, Arnold; Orgad, S. (2012) *Media Representation and the Global Imagination*, Cambridge: Polity; Pickering, M. (2001). *Stereotyping: The Politics of Representation*, Palgrave; Said, E. (1985) *Orientalism*, Penguin; Silverstone, R. (2007) *Media and Morality: On the Rise of the*

Mediapolis, Polity.

Assessment: Essay (100%, 3000 words) in the LT.

All students have to produce a short film- as a team in the MT, on the basis of which they submit a 3,000 word individual essay in the LT.

MC418 Half Unit

Communication: Cultures and Approaches

This information is for the 2019/20 session.

Teacher responsible: Prof Myria Georgiou FAW.6.01D

Availability: This course is compulsory on the MSc in Media and Communications. This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is not available as an outside option.

In order to accommodate academic staff leave, and in order to maintain smaller group sizes, this course is capped, meaning there is a limit to the number of students who can be accepted.

Course content: This course examines key concepts and critical perspectives on the processes of communication that underpin social, economic and cultural relations across diverse spheres of modern life. It takes an interdisciplinary and theoretical perspective, comparing the claims and contribution of selected key approaches of communication in order to understand and critique the symbolic and material power of communication media. With a substantive focus on the shifts from mass to networked media and from national to globalised communication processes, the course offers a selective introduction to key approaches in communication. It examines a series of critical perspectives, drawing on current research debates in the field of media and communications and beyond. The course is team taught by active researchers in the field of media and communications and aims to enable students to develop their critical understanding of the communication processes central to the contemporary media and communications environment.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit an essay of 1,500 words.

Indicative reading: Banet-Weiser, S. (2018) *Empowered: Popular Feminism and Popular Misogyny*, Duke University Press; Castells, M. (2009) *Communication Power*, Oxford University Press; Chadwick, A. (2013) *The Hybrid Media System*, Oxford University Press; Couldry, N. (2012) *Media, Society, World, Polity*; Curran, J. and Park, M.J. (ed) (2000) *De-Westernizing Media Studies (Communication and Society)*, Routledge; Dutton, W.H. (2013) *The Oxford Handbook of Internet Studies*. Oxford University Press; Georgiou, M. (2013) *Media and the City*, Polity Press; Hall, S. (ed.). (1999) *Representation: Cultural representations and signifying practices*, Sage; Iqani, M. and F. Resende (eds.) (2019) *Media and the Global South: Narrative Territorialities, Cross-cultural Currents*, Routledge; Mansell, R. Assessment: Essay (100%, 3000 words) in the ST.

MC419 Half Unit

Modern Campaigning Politics

This information is for the 2019/20 session.

Teacher responsible: Dr Nicholas Anstead Pethick-Lawrence House, 7.01.F

Availability: This course is compulsory on the MSc in Politics and Communication. This course is not available as an outside option.

Course content: The focus of this module is the intersection between practical politics and academic research. The course is taught by a series of invited guest lecturers who are experts in the field of political campaigning for political parties and NGOs. It will connect with theory taught on other courses in the department and will enable students to see how theory is relevant and applied to the practice of modern political campaigns in the context of the evolving nature of contemporary political communication. It will examine core and general concepts in campaigning including political strategy and how it is developed; the shaping and measurement of public opinion; and the role of data targeting in modern campaign.

Teaching: 20 hours of lectures in the LT.

Formative coursework: This formative coursework for this course is a reduced length version of the summative assessment (see below for further details):

- A 500 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 1000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

Indicative reading: Campbell, A. (2007). *The Blair years: extracts from the Alastair Campbell diaries*. Knopf. Chadwick, A. 2013. *The Hybrid Media System: Politics and Power*. Oxford: Oxford University Press. Denton E. D. (Ed.) (2000) *Political Communication Ethics: An Oxymoron?*, Praeger Publishers; Gould, P. (1998) *The Unfinished Revolution: How the Modernisers Saved the Labour Party*, Little Brown; Issenberg, S. (2012). *The Victory Lab: The Secret Science of Winning Campaigns*. Crown. Kreiss, D. 2016. *Prototype Politics: Technology-Intensive Campaigning and the Data of Democracy*. Oxford University Press. Negrine, R. (2006) *The Political Communication Reader*, Routledge; Nielsen, R. K. (2012). *Ground wars: Personalized communication in political campaigns*. Princeton University Press. Nimmo, D. D. (2001) *Political persuaders: the techniques of modern election campaigns*, Transaction Publishers; Staney, J. (2007) *Modern Political Communication*, Polity; Swanson, D. L. & Mancini, P. (1996) *Politics, Media, and Modern Democracy An International Study of Innovations in Electoral Campaigning and Their Consequences*, Greenwood; Ross, T. (2015). *Why the Tories Won*. London: Biteback. Trent, J. S. & Friedenber, R. V. (2007) *Political Campaign Communication: Principles and Practices - 6th edition*, Rowman & Littlefield

Assessment: Essay (100%, 3000 words) in the ST.

This summative assessment for this course is a two-part piece of coursework.

- A 1000 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 2000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

NB. One additional requirement of the summative coursework is that is cannot be on the same example used in the formative coursework.

MC420 Half Unit Identity, Transnationalism and the Media

This information is for the 2019/20 session.

Teacher responsible: Prof Myria Georgiou FAW.6.01D

Availability: This course is available on the MSc in Culture and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course examines the relation between identity and the media in the context of migration and transnationalism. As the world becomes increasingly interconnected – not least as a consequence of technological advances that enable information, people and things to move between places and across distances – questions are raised about the consequences of those changes for identity. More particularly, the course examines (i.) how those who move, but also those who don't, develop a sense of self in an interconnected, mediated world; (ii.) how digital communication connects or disconnects people within and across space and what those connections mean for collective identities, communities and nations; and (iii.) how mediated communication raises or erases boundaries between people – locally, nationally and transnationally. Engaging with a range of theories, case studies and creative activities, the course invites students to develop a globally oriented and critical understanding of identity, media and transnationalism.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit a 1,500 words case study.

Indicative reading: Amin, A. (2012) *Land of Strangers*. Cambridge: Polity; Appadurai, A. (2006) *Fear of Small Numbers*, Duke University Press; Bhabha, H. (1994) *The Location of Culture*, Routledge; Dines, M. G. and J.M.Humez (2015) *Gender, Race, and Class in Media: A Critical Reader*. Thousand Oaks, CA: Sage; Coates, T-N. (2015) *Between the world and me*. Melbourne: TPC; Du Gay, P. et al. (eds.) (2000) *Identity: A Reader*, London: Sage; Hall, S. and P. du Gay (eds.) (1996) *Questions of Cultural Identity*, Sage; Georgiou, M. (2006) *Diaspora, identity and the media*, Hampton Press; Gilroy, P. (2004) *After Empire: Multiculture or Postcolonial Melancholia*, Routledge; Papastergiadis, N. (2012) *Cosmopolitanism and Culture, Polity*; Smets, K., K.Leurs, M.Georgiou, S.Witteborn and R. Gajjala (2019) *The Sage Handbook of Media and Migration*, Sage; Yuval-Davis, N., G. Wemyss and C. Cassidy (2019) *Bordering, Polity*; Werbner, P. (2008) *Anthropology and the New Cosmopolitanism: Rooted, Feminist and Vernacular Perspectives*, Berg; Vertovec, S (2009) *Transnationalism*, Routledge.

Assessment: Essay (100%, 3000 words) in the ST.

MC421 Half Unit Critical Approaches to Media, Communication and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Shakuntala Banaji FAW.7.01F

Availability: This course is compulsory on the MSc in Media, Communication and Development. This course is not available as an outside option.

In order to accommodate academic staff research leave and

in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: The content of the course addresses the history of and tensions between 'media for development' and 'communication for development', while challenging mainstream development perspectives on aid, modernisation, and the role of media and communication in low income countries and unequal social contexts. It achieves this aim by emphasising the conflictual relationships between economic and political power structures and the empowerment of individuals, as well as among collective groupings within their local and regional contexts. In particular, paying attention to issues of history, colonisation, race and gender, this course questions who constructs knowledge and how knowledge is constructed in modernisation approaches to Media, Communication and Development. It explores the ways in which the concepts of ideology, discourse, orientalism, reflexivity and power can enable a critical understanding of social life, participation and change in the global south. The course also offers a sharp critique of scholarly and policy oriented literature that regards the media, information, and communication strategies, and information and communication technology applications, as obvious direct means of alleviating poverty and fostering democracy and human rights in low-income countries. It offers alternative theorisations of the contested way in which developments in these areas become embedded in the cultural and social fabric, especially where injustice, poverty and unequal power relations influence the capacities of individuals to make changes in their lives and communities.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour of lectures in the ST.

Film viewing: 3 hours in MT.

Formative coursework: All students are expected to complete advance reading, participate in case studies and discussions on moodle forums, prepare seminar presentations, organise and attend practitioner seminars and film/documentary viewings and submit one essay of 1,500 words.

Indicative reading: Abrahamson, R. (2000) *Disciplining Democracy: Development Discourse and Good Governance in Africa*. London, Zed Books. Banaji, S. (2016). *Children and Media in India: Narratives of Class, Agency and Social Change*. London and New York: Routledge. Enghel, F. and Noske-Turner, J. Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

This is a seen examination, and the questions are made available to students up to seven days prior to the sitting.

MC422 Half Unit

Critical Studies in Media and Journalism

This information is for the 2019/20 session.

Teacher responsible: Prof Charles Beckett FAW.7.01K

Availability: This course is available on the MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: The news media is vital not just for the dissemination information but as a forum for debate. Journalism shapes our individual and community lives. It frames ideological disputes and is a site of contestation. But journalism and the news itself is changing because of technological, social, economic and political forces. This course led by a media professor with 20 years of experience as a journalist, takes an ethical perspective on media change. It asks what impact journalism has, what kind of journalism do we want, and how will journalism reconstruct itself according to competing national, cultural, or political contexts. On completion of this course, students should be able to: understand the role of journalism in society today; critically discuss different theoretical conceptions of journalism as practiced in a wide variety of social and political contexts; compare and contrast the role of journalism in contexts ranging from mainstream to alternative media outlets; evaluate the normative and empirical connections between media journalism, the production of news and ethical considerations; critically assess contemporary debates about the changing nature of journalism and its implications for cultural understanding and democracy.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Allan, S. (2009) The Routledge Companion to News and Journalism, London: Routledge; Beckett, C. (2008) Supermedia, London: Blackwell; Bell, E & Owen, T (2017) The Platform Press: How Silicon Valley Re-engineered Journalism (Tow Center, Columbia University). Boczkowski, P and Anderson, C.W, Eds (2017) Remaking The News, MIT Press. Chouliaraki, L. (2006) Spectatorship of Suffering, London: Sage; Hafez, K. (2007) The myth of media globalization, Cambridge: Polity; Muhlmann, G. (2008) A Political History of Journalism, Cambridge: Polity; Rodgers, J. (2012) Reporting Conflict, Palgrave; Schudson, M (2008) Why Democracies Need An Unlovable Press (Polity). Silverstone, R. (2006) Media and Morality: On the rise of the Mediapolis, Cambridge: Polity.

Assessment: Essay (100%, 3000 words) in the LT.

MC423 Half Unit

Global Media Industries

This information is for the 2019/20 session.

Teacher responsible: Dr Bingchun Meng FAW.7.01H

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is not available as an outside option.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course helps you understand the operation of global media industries at the intersection of politics, business and culture. The course presents an overview of the changing mechanisms of media production, distribution and consumption in the age of digital networks and global interconnection. We will examine how media industries work, why they work as they do, and their broader social and cultural implications. We will take a comparative perspective to compare and contrast the arrangement of media and communication industries in different countries/ regions. We will also highlight the changes that digital technologies have brought to different types of media industries, including news industry, entertainment industry, and marketing and advertising. Questions to be explored include "How modes of media production have changed in different contexts and periods?" "What are the key issues facing media industries?" "What role do advertising and market research play in the life and design of media products?" "How do technological and legislative developments influence the way that the products of media industries are produced, distributed and consumed?" In order to address these questions, we will utilize key concepts such as convergence, commodification, flexible accumulation, and creative labour. We draw upon theoretical insights offered by political economy, cultural studies, sociology and feminism to analyze cases of media industries across the globe. Students will be encouraged to reflect on the industrial dynamics of media production as well as their own engagement with cultural industries.

Course objectives:

This course aims to help you:

- Understand different approaches to the study of media industries
 - Examine the transformation of media industries in the context of globalization
 - Critically analyse the relationship between institutional arrangements of media industries and the content being produced and disseminated
 - Critically evaluate global regulatory attempts to establish a new communication order and the dynamics of alternative media
- Topics are structured as follows:
- Media production and distribution in a changing context
 - The many lives of media commodities
 - Creative labour in media industries
 - Convergence: Top-down and bottom-up
 - Policy and regulation
 - Political economy of film industry
 - Cultural analysis of Reality TV
 - Advertising and marketing
 - Sociology of news production
 - Summary and reflection

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1,500 words.

Indicative reading:

- Harvey, D. (1989) The Condition of Postmodernity. Oxford: Blackwell;

- Hesmondhalgh, D. (2012) *The Cultural Industries* (3rd Edition). London: Sage;

 - Mosco, V. (2014) *To the Cloud*. Boulder: Paradigm;
 - Turow, J. (2011) *The Daily You*. New Haven: Yale University Press.
- Assessment:** Essay (80%, 3000 words) in the ST.
Case study (20%) in the LT.

MC424 Half Unit Media and Communication Governance

This information is for the 2019/20 session.

Teacher responsible: Dr Seeta Peña Gangadharan FAW 7.011

Availability: This course is compulsory on the MSc in Media and Communications (Media and Communications Governance).

This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Course content: This course begins from the assumption that media and communication can only be fully understood if their governance and its implications for citizens and consumers, as well as producers and providers, are understood. Communication governance includes all attempts by public bodies to fund, licence or otherwise regulate or govern communication services or the providers of those services, usually for an alleged public benefit. The term 'governance' refers to the norms, rules and resources together with their theoretical underpinnings that inform the production and consumption of media and communication services. This course provides students with core theoretical perspectives and concepts required to critically analyse both the substance and processes of media and communication governance. Students will compare different rationales used to justify regulation of media and communication services. Students will also develop an understanding of regulatory instruments, institutional arrangements and institutional practices that help public authorities, corporations, citizens and consumers decide how to allocate public resources for the provision of such services. Illustrations are drawn from national and international contexts, thereby presenting a multi-levelled analytical approach to governance issues in the field.

Some of the questions addressed in this course include: Under what conditions should platforms be governed? Are industry professionals or regulators best positioned to determine when broadcasting institutions adequately serve the diverse information needs of a population? To what extent should legacy media laws and policies be relaxed in the light of technological change? In what ways can 5G providers serve the public interest? These and other questions reflect the course's focus on developing a critical, informed and authoritative account of 'why', 'who', and 'how' to govern media and communication services.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: All students are expected to complete advance reading, participate in seminar activities and contribute to online discussion on Moodle. Students are also expected to complete an oral exam in MT.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MC425 Half Unit Interpersonal Mediated Communication

This information is for the 2019/20 session.

Teacher responsible: Prof Ellen Helsper FAW.7.01E

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. **Students are asked to write a short personal statement** on LSE for You indicating why they want to take this course. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: Communication media have been blamed for

a breakdown of social relationships and have simultaneously been hailed as powerful social tools that can connect people from all walks of life. This course addresses the ways in which interpersonal relationships and communication are influenced by mediation. The aim of this course is to provide students with a critical understanding of mediated communication within small groups and dyadic relationships. The course examines the influence of media on three key fields of interpersonal interaction which are identified as personal, social and professional communication.

The first half of the course addresses the history of media in interpersonal communication as well as general interpersonal communication and relationship theories. The second half looks in more detail at how the interaction between media and interpersonal communication has been studied in relation to the cross-cutting themes of privacy/trust, isolation/socialisation and multi-modality. These central concepts of the course are reflected upon through theories of social norms, affordances, social capital and supplementation/substitution, and discussed from the perspective of different disciplinary and methodological paradigms. Application of theory to practitioner and policy examples will give students the tools to understand what the practical implications are of the ways in which these different paradigms suggest that interpersonal communication processes vary depending on the type of platform this communication takes place on as well as the type of relationship that is under investigation and the context in which this relationship develops. As a result of the course the students will be able to evaluate the weaknesses and strengths of the theories that aim to explain apparently contradictory observations about the practice of interpersonal mediated communication. This can be applied to professional areas such as User Experience Design, intra-organisational communication, moderation and regulation of social media and discussion forums.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: All students are expected to complete advance reading, participate in the creation of a course wiki, prepare group seminar presentations and write an individual essay (1500 words) based on the presentation and the material provided for the wiki (due the week after the week in which the student is responsible for the wiki).

Assessment: Essay (100%, 3000 words) in the ST.

MC426 Half Unit Film Theory and World Cinema

This information is for the 2019/20 session.

Teacher responsible: Dr Shakuntala Banaji FAW.7.01F

Availability: This course is available on the MSc in Gender (Sexuality), MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Course content: This course is designed to enable a consistent, informed and plausible reading of popular film representations, discourses and cultures of consumption in specific geopolitical contexts. Introducing theories from the humanities and the social sciences, lectures offer alternative approaches to theorising sexuality, gender, race, class, religion, national identity, childhood, history and politics in popular commercial films and their interpretation by audiences. The impact of unequal power relations – on how representations are reproduced, spectatorship is theorised and censorship policies are formulated – will be demonstrated and analysed. While the course offers a particular focus on Bollywood, Hindi commercial cinema, as an example of World cinema, it refers more widely to examples from other National Cinemas such as those of China, Korea, Australia, Spain and Iran. A key learning method is the extensive interrogation of audiovisual materials. To this end, there will be five film screenings and accompanying discussions alongside the lectures and seminars. Additionally, films referred to on the course will be made available through the library or can be downloaded and watched from popular film sites on the internet.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT. 5 three-hour film screenings in the MT.

Formative coursework: All students are expected to complete advance reading, participate in Moodle forums, present in seminar discussions, attend 5 film screenings and submit one essay of 1,500 words.

Indicative reading: Banaji, S. (2006) *Reading 'Bollywood': The Young Audience and Hindi Film*, Basingstoke: Palgrave-Macmillan. Barker, M. and Brooks, K. Assessment: Essay (100%, 3000 words).

MC427 Half Unit

Digital Media Futures

This information is for the 2019/20 session.

Teacher responsible: Dr Alison Powell PEL.7.01J

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Research).

This course is available as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course provides an historical, theoretical and methodological basis through which to assess the social and cultural transformations related to digital media infrastructures and related social practices. It focuses on the materiality and affordances of new media, as well as on the social transformations that have co-evolved, focusing on emerging media of the past, present and future. It critiques and questions the assumptions about the transformation of social and cultural life but also attempts to help students develop conceptual strategies beyond critique. Conceptual approaches draw from materialist studies of media and communication, as well as science and technology studies. Topics include but are not limited to: peer to peer and open source cultural movements, the political economy and ecology of digital media, the politics of algorithms, remembering and forgetting, the anthropocene, artificial intelligence.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will complete a 1,500 word formative essay or creative proposal. They will also receive formative feedback on class participation and on a formative assignment.

Indicative reading: Marvin, Carolyn (1989) *When Old Technologies Were New*. Cambridge: MIT Press. Chun, Wendy Hui Kyong and Thomas Keenan (2006) *New Media, Old Media: A History and Theory Reader*. Vaidhyathan, Siva (2008) *The Googlization of Everything (And why we should worry)*. Berkeley: University of California Press.

Assessment: Essay (100%, 3000 words) in the ST.

MC429 Half Unit

Humanitarian Communication: Vulnerability, Discourse and Power

This information is for the 2019/20 session.

Teacher responsible: Dr Samuel Mejias

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Today more than ever, images and narratives of vulnerable people in zones of poverty, disaster, violence and

conflict routinely populate everyday lives in the West. Taking our starting point on these images and narratives produced by a number of actors (NGOs, journalists, citizens, militants or regular armies) and appearing in a large number of digital platforms (NGO websites, news networks, social media and celebrity advocacy), we explore the changing practices of humanitarian communication in the 21st century – broadly understood to encompass disaster communication, human rights appeals, and conflict reporting. We do so by addressing questions such as: What are the histories of humanitarian communication? How is it changing today and why? What are the tensions and dilemmas that organizations face as they struggle to communicate the plight of distant others? What kind of politics of visibility and voice is played out in the mediation of distant suffering? What are the ideological and ethical positions informing and informed by the digital narratives and spectacles of vulnerable others in those zones? And finally, what are the challenges of 21st century humanitarian communication and can we do it better?

To explore these issues, the course adopts an interdisciplinary and case-based approach that enables students to both debate the theoretical links between vulnerability, discourse and power, and to reflect on concrete examples of the communication of humanitarian messages and conflict news today. The course consists of three parts: the politics of mediating humanitarianism; humanitarian communication histories, practices and challenges; and case studies exploring practices of NGOs, celebrity advocacy, and war and conflict reporting.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

All students are expected to complete advance reading, prepare reading-based seminar presentations, and submit one essay of 1,500 words.

Indicative reading: Barnett M., & Weiss T. (2008). *Humanitarianism in Question. Politics, Power, Ethics*. Ithaca: Cornell University Press. Boltanski L. (1999). *Distant Suffering: Morality, Politics and the Media*. Cambridge: Cambridge University Press. Butler J. (2009) *Frames of War*. London: Verso. Chouliaraki L. (2013). *The Ironic Spectator. Solidarity in the Age of Post-humanitarianism*. Cambridge: Polity. Douzinas, C. (2007). *Human rights and empire: the political philosophy of cosmopolitanism*. New York: Routledge. Mignolo, W. J. Assessment: Essay (100%, 3000 words) in the ST.

MC430 Half Unit

Data in Communication and Society

This information is for the 2019/20 session.

Teacher responsible: Dr Alison Powell PEL.7.01J

Availability: This course is compulsory on the MSc in Media and Communications (Data and Society). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Course content: This course investigates the significance of data in communications, social and cultural life. It introduces core theoretical perspectives on data and information from a social scientific perspective, and outlines research approaches that take account of the contemporary influence of data within communication and society. The course begins with the social history of data, providing a strong baseline from which to analyse the contemporary position of data. The course will provide students with conceptual tools that will help unpack the logic of data, and train them to critically analyse phenomena such as big

data, algorithmic regulation and augmented civic space. Its focus on contemporary issues allows an investigation of the politics and culture of data production, and the use of data as evidence in a range of fields including politics, advocacy and audience research. Some of the questions addressed through the course include: Who owns data? Who makes data? Who makes sense of data? Is data public or private? How do different actors get access to data? How is data protected and regulated? What significance do new analysis methods have for the influence of data? These and other questions reflect the course's focus on developing a critical account of how data is implicated in the structures that shape social life. How does culture both rely upon and push back against data-based communication?

Teaching: 10 hours of lectures and 10 hours of classes in the MT.

Formative coursework: Students will be expected to produce 1 presentation (group project, student-led session) in the MT, along with written formative work.

There are two options for written formative coursework on this course.

Students can choose:

EITHER a 1500 word essay

OR a 1000 word proposal for case analysis and recommendation

Indicative reading: Beer, D., & Burrows, R. (2013). Popular culture, digital archives and the new social life of data. *Theory, Culture & Society* 30(4), 47-71. Boyd, D., & Crawford, K. (2012). Assessment: Assessment path 1

Essay (100%, 3000 words) in the LT.

Assessment path 2

Project (100%, 3000 words) in the LT.

There are two options for summative assessment on this course.

The project comprises of a case analysis and recommendation:

1. Description of case
2. Analysis
3. Recommendations
4. Theoretical and normative contextualization

Case study analysis and recommendation: Students choose a current data-related product, service or use case, providing an analysis of how data are theoretically constructed, valued, managed and conceived within the project, using relevant theoretical material. The case study must identify an area of ethics, governance or social justice that this product, service or use case could improve, and provide a concrete set of recommendations, grounded in the existing theoretical, historical and empirical literature. This analysis and recommendation will be accompanied by a critical reflection that highlights the theoretical and normative aspects of the case, your analysis and your recommendation. This section should be grounded in the relevant theoretical material.

MC431 Half Unit

Critical Approaches to Strategic Communications

This information is for the 2019/20 session.

Teacher responsible: Dr Lee Edwards, PEL.7.01.B

Availability: This course is compulsory on the MSc in Strategic Communications. This course is not available as an outside option.

Course content: This course provides an advanced understanding of theoretical knowledge in the field of media and communication as it relates to strategic communications and the key promotional industries of advertising, branding and public relations. The focus is on the role, scope and activities of strategic communications in contemporary societies and in the context of globalisation and the digital age. Topics cover the context, practices and challenges of strategic communications, and are likely to include: the advance of promotional culture in and across public, political, non-profit and corporate institutions; professional structures and identities of the strategic communications industries; discourses of strategic communications, including reputation and relationship management; technologies of strategic communications; globalisation and strategic communications; strategic communications and inequalities (gender, 'race', class); and the ethics of strategic communications.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 x 1,500 word essay in the MT.

Indicative reading: Aronczyk, M. and Powers, D. (eds) 2012.

Blowing up the brand. New York: Peter Lang. Banet-Weiser, S. 2012. *Authentic TM: The politics of ambivalence in a brand culture*. Assessment: Essay (100%, 3000 words) in the LT.

MC432 Half Unit

Strategic Communication in Practice: Professional Perspectives

This information is for the 2019/20 session.

Teacher responsible: Dr Claire Forbes, guest teacher

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Course content: This course will be delivered as a combination

of academic lectures and presentations from leading industry practitioners, in order to facilitate a cross-fertilisation between professional experience, academic perspectives, public debates and research. Students will be expected to critically engage with ideas from practice in the seminars, developing reflexivity and analytical skills through the course.

The professional lecturers will be experts working on various forms of strategic communication in a wide range of sectors, including the corporate sector; the not-for-profit sector such as global NGOs and activist organisations; voluntary sector; government and public sector organisations; and journalists. The course will culminate in a group-based practical presentation from students of their own campaigns, which will form part of the course assessment.

The academic lectures will focus on campaign theory and development. The topics covered in the practitioner lectures will change each year depending on speaker availability, but as an illustration, they could include: connecting with elusive audiences; global media industries; global NGOs; communications in the retail industry; communicating in complex contexts; communicating change; communicating government policy; crisis communication.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 x 1,500 word essay in the LT.

Indicative reading: Sussman, G. 2011. *The propaganda society: Promotional culture and politics in global context*. New York: Peter Lang. Dimitrov, R. 2017. *Strategic silence: Public relations and indirect communication*. London: Routledge. Macnamara, J. 2014. *Journalism and PR: Unpacking 'spin', stereotypes and media myths*. New York: Peter Lang. Powell, H. 2013. *Promotional culture and convergence: Markets, methods, media*. London: Routledge. Seu, I.B. and Orgad, S. 2017. *Caring in crisis? Humanitarianism, the public and NGOs*. London: Palgrave Macmillan. Tench, R. and Yeomans, E. 2017. *Exploring public relations (4th edition)*. Harlow, Essex: Pearson.

Assessment: Essay (100%, 3000 words) in the ST.

MC433 Half Unit Technology and Justice

This information is for the 2019/20 session.

Teacher responsible: Dr Seeta Peña Gangadharan FAW 7.011

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should apply by answering a few questions during Course Choice. Prior to the first class, students must also view a recorded lecture and complete select readings.

Course content: This course addresses questions of justice and inequity in relation to communication technologies of the 20th and 21st centuries. It begins with two premises: 1) communication technologies are critical in shaping the conditions for individual and collective self-government, and 2) policies that regulate such

technologies influence the nature of democracy and inclusion in society today. The course engages historical perspectives, normative theories of justice and democracy, and legal theories of technology and innovation to assess the power of communication technologies and consider their costs and benefits to historically marginalized groups. In so doing, this course questions the adequacy of regulation in the development and deployment of technologies which exacerbate existing social, political, and economic divides, on the one hand, or address or alleviate such divides, on the other. The course will primarily focus on histories and contexts of marginalized groups in the United States and the Global South.

The first part of the course will introduce students to the theoretical and historical frameworks for the course and concentrate on mass communication technologies of the 20th century, such as print and broadcasting, and policy debates highlighting issues of justice and inequity. The second part of the course will centre on digital communication technologies in the late 20th and early 21st centuries and examine the intersection between networked communication, justice, and rights in historically marginalized communities. The third part will investigate innovations in automated technologies with respect to redistribution and recognition, issues core to the notion of social justice. By the end of the course, students will be able to evaluate differences between justice-based and rights-based approaches, explore the nature of digital inclusion, and compare the nature of communication inequalities across technologies.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: All students are expected to complete advance reading, prepare for and participate in seminar activities, and contribute to online discussion on Moodle. Students are also expected to produce 1 piece of coursework in MT, which consists of short answers to four essay questions. Questions will be made available to students up to seven days prior to the due date.

Assessment: Presentation (30%) in the MT.
Essay (70%, 3000 words) in the LT.

MC434 Half Unit

Digital Platforms and Media Infrastructures

This information is for the 2019/20 session.

Teacher responsible: Dr Jean-Christophe Plantin, PEL.701.i

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

In order to accommodate academic staff research leave and sabbaticals, and in order to maintain smaller seminar group sizes, this course is capped, meaning that there is a limit to the number of students who can be accepted.

Pre-requisites: No pre-requisites

Course content: While GAFAM companies (Google, Amazon, Facebook, Apple, Microsoft) are still studied as digital platforms, they now constitute major operators of the internet infrastructure, as witnessed by their involvement since 2010 in four sectors: data centers, undersea cables, telecommunications networks, and satellites. This course will study this radical extension of platform power on the internet architecture, uses, and governance. It will demonstrate how GAFAM companies become dominant actors in these four infrastructure sectors by using the platform strategy that granted them their initial success, and by adapting it from the web economy to infrastructure management.

The course presents key readings in media & communications and sciences & technology studies to analyse contemporary instances of digital media platforms. Students will explore the multiple facets of the increasing power of digital platforms, by critically analysing how platforms replace, conflict with, or influence existing infrastructures, and what are the social, political and epistemological consequences of these tensions. This focus on the relations between existing and emerging media configurations will invite students to investigate how platforms constitute ubiquitous media in everyday life, and how they increasingly shape communication, knowledge production, circulation of data, online participation and mobility.

The first part of the course will introduce the theoretical framework, blending together platform studies (coming from media & communication studies, political economy, management)

with infrastructure studies (coming from history, information science, sciences & technology studies). The second part illustrates these interactions through four case studies that see tech giants taking over the existing infrastructure for global connectivity: data centers, undersea cables, telecommunications networks, and satellites. The third part addresses current social debates around the platformization of the internet infrastructure, e.g. in terms of global access to internet, tension between states and sovereignty, and governance and regulation.

At the end of the course, students will be able to critically assess the increasing power that tech giants have over the global infrastructure for connectivity, and to discuss the challenges this process brings in terms of access to communication, knowledge and democratic life.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: -EITHER a 1,500-word formative essay on current theoretical debates around platforms, infrastructure, and society.

-OR a 1,500-word proposal for a case study analysis of a digital platform.

Indicative reading:

- Gillespie, Tarleton. 2018. *Custodians of the Internet: Platforms, Content Moderation, and the Hidden Decisions That Shape Social Media*. Yale University Press.

Assessment: Essay (100%) in the ST.

MC435 Half Unit

Disruptive Digital Worlds: Competing Economic and Political Economy Explanations

This information is for the 2019/20 session.

Teacher responsible: Prof Robin Mansell FAW.6.01E

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Media and Communications Governance). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Two important trends are expected to influence the world economy over the next decade - rising income and wealth disparity and increasing dependency on digital systems. This course will help students to understand responses to these developments. There is little agreement about the consequences of high levels of digital industry concentration, job losses due to artificial intelligence, whether citizens and consumers can control their digital environment, or how to respond. For some, digital transformation is a welcome sign of progress; for others, it brings the risk of threats. Growing dependency on digital platforms, automation, the Internet of Things, online monitoring, and data analytics, is often depicted as inevitable and as a sign that market reform is needed. Alternatively, it is claimed that radical change

is needed to protect the rights and autonomy of citizens and consumers. Students will learn about the differences between free market (neoclassical), market reform (institutional) and critical political economy theories of disruptive digital transformation and how they are applied to reach very different conclusions about the future of digital platforms and their uses. Students will compare and contrast the questions asked and assumptions made in different approaches to digital innovation.. Does everyone have to adapt to rapid technological change? What is the link between rising inequality and digital technologies? Who has the power to change contemporary trends in the digital world? Are the goals of economic growth in the digital industry in always in conflict with the goals of equity and inclusion and preserving human dignity? Lecture topics:

Week 1: Introduction: Why Digital Disruption Matters

Week 2: Digital Transformation History and Future Expectations - Theoretical Perspectives

Week 3: Digital Platforms Everywhere - What They Do and Why it Matters

Week 4: Old Media Industries and New Big Players - Business Strategies and Market Concentration

Week 5: Digital Service Quality / Compatibility Standards and Competition

Week 6: (reading week - students receive support for the team presentations)

Week 7: Artificial Intelligence, Automation and Employment

Week 8: Investment in Digital Networks and Services: Catching Up and Falling Behind

Week 9: Transformation in the Audio-visual Digital Market

Week 10: Transformation in Mobile Service Markets

Week 11: Conclusion: Comparing Economic Perspectives on Digital Transformation

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

A 1,500 word essay on a topic selected from a list of questions.

Indicative reading: Andersson-Schwarz, J. (2017) Platform logic: The need for an interdisciplinary approach to the platform-based economy, *Policy & Internet*, 9(4): 374-395. Bauer, J. M. (2019) *The Age of Surveillance Capitalism: The fight for a human future at the new frontier of power*. New York: Public Affairs.

Assessment: Essay (80%, 3000 words) in the ST.

Presentation (20%, 1 words) in the LT.

Students will select an essay topic from a list of questions.

Team Presentation. Students will work in teams and present their project during the seminars in the LT.

MC436 Half Unit Mediating the Past

This information is for the 2019/20 session.

Teacher responsible: Dr Omar Al-Ghazzi FAW.7.01C

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course starts with the premise that the understanding of the past and the future is socially-constructed, mediated, and shaped by power relations within the present. It critically explores cultural, political and technological issues in relation to the passing of time. It addresses questions such as: How do different kinds of media represent and structure collective notions about time whether in relation to the present, the past or the future? How do power relations shape understandings and experiences of time? How do we learn about history through media and why does that matter? How did the experience of colonialism impact collective understandings of history and national futures? In addressing these questions, this course makes creative connections between various topics in media and communication studies. It introduces students to the field of collective memory, differentiating it from history and historiography. It then considers critical issues within the relation between history, memory and politics, which are colonialism/postcolonialism, trauma, nationalism, and collective action. The second part of the class focuses on the analysis of technology and media in the ways they contribute to the social construction of time. It addresses how privilege and access to technology regulate the speed and slowness of people's lives. It moves on to exploring how particular media conventions represent temporality, with a focus on news media, digital technologies and popular culture. By the end of the course, students will be able to identify key debates in the study of time and temporality, particularly as approached from the disciplinary perspective of communications and media studies.

- Week 1 Collective memory & nostalgia
- Week 2 The production of history
- Week 3 Colonial, de-colonial & post-colonial time
- Week 4 Nationalism & the past
- Week 5 Collective action, generations & the mobilization of time
- Week 6 – Reading Week
- Week 7 Witnessing war & trauma
- Week 8 Writing pasts and futures
- Week 9 Popular culture & the representation of time
- Week 10 Speed & experiences of time
- Week 11 Technology & belonging

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay (1500 words) in the MT.

Indicative reading:

MC437 Half Unit Media, Data and Social Order

This information is for the 2019/20 session.

Teacher responsible: Prof Nicholas Couldry FAW.7.01E

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: none

Course content: Visions of contemporary society and its reliance on data processes are highly polarised: do they represent the end of freedom under a regime of continuous surveillance or the freeing up of an extended group mind through awesome computing power? Today's starkly opposed visions of media's contribution to social order have however a much longer history which we must grasp if today's transformations are to be understood. Since the 19th century, technologies for mediated communication have developed in increasingly institutionalised forms. Those forms – from the traditional mass media (the press, radio, television) to contemporary media and information infrastructures – have played important roles in the organization of everyday life, and have been imagined to play a central role in the 'order' of society, even of the world. But do today's digital platforms for social interaction (especially 'social media'), and the data

processes that underlie those platforms (the process sometimes called datafication), create a completely different type of social order from in the past? How is that order being constructed, and what are its implications for social life?

This course offers a primarily sociological, but also interdisciplinary, exploration of how a social order is being constructed in the era of social platforms and large-scale data-collection, and the social –indeed ethical - challenges to which the new 'datafied' social order is giving rise. The course is structured into two main parts. After the introductory lecture, Lectures two to five will explore alternative entry-points for analysing this social order, via transformations of social space, the creation of social relations, the creations of new forms of meaning via algorithms, and macro-theories of the emerging order. Lectures six to nine will apply these theoretical insights to the expanding uses of data in four areas of daily life: social justice, personalized marketing, surveillance (at work and at home), and the formation of individual subjects (in education and through self-tracking). The concluding lecture will draw together the course's themes with a particular focus on the normative implications of the datafied social order, with particular reference to the questions of autonomy, surveillance and data extraction.

The course will be aimed at all MSc students interested in acquiring a broad social-theoretical understanding of the role that media institutions play in ordering contemporary societies and developing their own critical perspective on whether media and datafication, as processes do, or do not, overall enhance human life, especially its social and ethical dimensions.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will be given the option of choosing one of two alternative forms of preparation for the summative essay:

Either

1. A Short Essay on a theoretical approach to understanding data's role in social order (1200-1500 words);

Or

2. A Short Reflection: students should choose a short (200 word maximum) text of theory or business discourse, and then reflect on that text's implications for a data practice of their choice (1200-1500 words).

Indicative reading: Beniger, James (1986) *The Control Revolution*. Harvard University Press. Chapter 6. Cohen, Julie (2012)

Configuring the Networked Self. New Haven: Yale University Press. Couldry, Nick and Hepp, Andreas (2017) *The Mediated Construction of Reality*. Cambridge: Polity. Elias, N. (1991) *The Society of Individuals*. London: Continuum. Gillespie, Tarleton (2010) 'The Politics of "Platforms"', *New Media & Society* 12(3): 347-364. Bucher, T. (2017) 'The algorithmic imaginary: exploring the ordinary affects of Facebook algorithms', *Information Communication and Society*, 20(1): 20-34. Curran, James (1982) 'Communications, Power and Social Order' in M. Gurevitch et al (eds) *Culture, Society and the Media*. London: Routledge. Schneier, Bruce (2013) *Data and Goliath*. New York: Norton. Turow, Joseph (2017) *The Aisles Have Eyes*. Yale University Press. Van Dijck, Jose (2013) *The Culture of Connectivity*. Oxford: Oxford University Press

Assessment: Essay (100%, 4000 words) in the ST.

Students will submit one piece of written work for the summative assessment: a 4000 word essay on questions set by the course leader in which students will bring together theoretical discussion with the consideration of specific data practices.

MC438 Half Unit Mediated Feminisms

This information is for the 2019/20 session.

Teacher responsible: Prof Sarah Banet-Weiser PEL.7.01E
Professor Sarah Banet-Weiser

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global

Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is also available with permission to MSc students from other Departments (including Anthropology, Psychological and Behavioural Sciences, and Sociology)

Course content: Media have been crucial to feminist politics across the globe, from 19th century pamphlets to early television representations to 90s zine culture to the multitude of hashtag feminisms in contemporary social media. This course explores the ways that feminisms, in both the Global North and Global South, materialize as a kind of media, appearing on a variety of media platforms from print to digital. The course addresses the relationship between forms of feminisms in different geographical regions and media contexts. There are many different feminisms that circulate in popular media in different historical moments, and some of these feminisms become more visible than others. Mediated feminisms are networked across all media platforms, some connecting with synergy, others struggling for priority and visibility.

The goal of the course is to critically examine the ways in which feminism, and its intersections with race, ethnicity, nationality, and class, is enacted and represented in the media, and how mediated feminisms have an impact on cultural formations and communication. The course will also examine misogynistic and sexist reactions to feminism, within the frame of the normalization of hierarchy and violence.

The course is designed to historicize and conceptualize past and current developments, as well as recurrent themes and movements, in media representations of feminisms. Specifically, the course historicizes the recent explosion of mediated feminisms, and offers students a long-term theoretically-informed critical perspective on the ways feminisms have been mediated. It presents a historical examination of "mediated feminisms" as sites for the restructuring of knowledge. Furthermore, the course insists that in order to develop a complex and inclusive understanding of how media representations of feminism influence viewers and users, we must consider feminism beyond the West in terms of global and transnational perspectives.

The course is framed around broad histories of feminist media productions (from newspapers to zines to hashtags) and feminist consumption/commodity feminism. Using theories from cultural and media studies, creative industry studies, film and gender studies, and communication studies, it explores different processes and practices of feminism and their relationship to media forms and media production. The discussions will examine feminist media production from early suffrage movements to global feminist practices of the mid 20th century to post-colonial feminist productions of the later 20th century, to queer feminist and post- and popular feminist productions of the current moment. The course is structured into three parts:

Part One, Historical Mediated Feminisms (Lectures 1-5), will review historic approaches to the ways feminisms have been mediated, from the 19th century to the present;

Part Two, Feminist Media Productions (Lectures 7-9) will explore feminist media productions both within and outside the mainstream media (ranging from alternative press to zines to digital media production);

Part Three, Popular Feminism and Activism Today (Lectures 10-11) will draw together the course's themes with a particular focus on the contemporary moment of popular feminism, asking students to engage in the ambivalent spaces of mediated feminisms.

The course is intended for all MSc students interested in acquiring a broad cultural-theoretical understanding of the role that media institutions play in defining feminisms for broad audiences, as well as those who are interested in feminist media productions across history.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. Teaching will commence in MT2 and additional office hours will be

held in LT11

Part 1: Historical Mediated Feminisms

- Week 1: Relationship between Feminism and the Media, Global North and Global South

- Week 2: Feminism and Media in the 19th Century

- Week 3: Feminism disrupts the Media: 1968 and beyond

- Week 4: Media Backlash to Feminism

- Week 5: Post-Feminism and the Media

- Week 6: Reading Week

Part 2: Feminist Media Productions

- Week 7: Pamphlets and the Alternative Press: Early feminists representing themselves

- Week 8: Women Make Media: Riot Grrrl, zines, and activism

- Week 9: Post-feminist media productions: Girl Power, Television, Film

Part 3: Popular Feminism and Activism Today

- Week 10: Popular feminist media production: Digital and Social Media

- Week 11: Conclusion: Mediated Feminisms and Activism

Formative coursework: Students will be expected to produce 1 project in the MT.

Students will be given the option of choosing one of two alternative forms of preparation for the summative project:

Either

1. A 1200-1500 word Short Analysis in which an individual student explains the relationship between media and its representation of feminism(s) during a specific historical period;

Or

2. A Group Project: students can work in groups of 3-4, and will write a 2000-2500 word analysis of the relationship between media and its representations of feminisms during a specific historical period. The aim of the group project is for students to work collaboratively and reflect on the analysis in a group setting.

Assessment: Essay (80%, 2000 words) and project (20%) in the LT. The summative assignment consists of a 2000 word essay and a media product, about a particular historical period we discuss in class.

For the essay component (80%) students will be asked to choose a case study from a particular historical period that was discussed in the course and analyze how particular media from that period represents, engages with and/or negotiates the meanings of feminism. Students will be instructed to write their summative essay on a different historical period from that on which they wrote their formative essay.

For the media production component (20%), students will be required to produce an example of a media form that relates to the period on which they write their summative essay. This task asks students to create a media artifact, with "media" understood as a broad category.

For the purposes of this class, media production involves the use of technology (from print to music to digital media) to be able to produce a tactile, visual, digital, or audio artifact. These media products could range from creating a social media plan for a feminist action, or a hashtag campaign that would cross platforms, to a YouTube channel where they can give tutorials on feminism. Students can create a short documentary or educational video, or a pitch for a reality show, or storyboard, zine, comic strip, podcast, etc. The media product does not have to correspond with the actual historical period analyzed, so students can imagine a different medium paired with the era: a podcast "from" suffragette era, a Tumblr from the Second Wave era, etc.

Students do not have to have experience in production; this is more of a creative assignment to think through the connections between feminist theories and how these theories might be represented in media productions. Assessment will be based on a well-thought out product, the amount of difficulty inherent in chosen medium, and the ability to apply ideas from the course to a media product.

MC499

Dissertation: Media and Communications

This information is for the 2019/20 session.

Teacher responsible: Dr Omar El Ghazzi FAW.7.01.C

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is available on the MSc in Media and Communications. This course is not available as an outside option.

Course content: The aim of this dissertation is for students to pursue an independent piece of research within the field of media and communications following the guidelines provided in the MSc Dissertation Guide and the instructions by the School's staff members. The dissertation is usually a combination of theoretical enquiry and original empirical enquiry concerning an issue in the field of media and communications. On rare occasions it is based on a theoretical interrogation. Students are encouraged to select

a topic that reflects the content of their MSc programme. In all cases, students must obtain the approval of their supervisor before embarking on any research. The dissertation must be not less than 10,000 words and not more than 12,000 words in length.

Teaching: MC499.1: Compulsory Teaching and Supervision MC499.1A

Two lectures in LT for all students.

MC499.1B

(ii) Group Supervision Sessions (three): each supervisor holds group supervision sessions for their supervisees in LT and again in ST.

(iii) Individual Supervision Sessions: ad hoc sessions for each student with their supervisor that can be organised during feedback and consultation hours in LT and ST.

MC499.2: Dissertation Skills – Optional Sessions

MC499.2A

A lecture in LT on dissertation preparation skills (literature reviews, ethics, etc).

MC499.2B

Workshops led by Graduate Teaching Assistants in MT and LT. Places in these workshops are limited.

Formative coursework: Students are required to submit Ethics Checklist, Literature Review and Dissertation Plans to their supervisor in LT and ST.

Indicative reading: There are no formal reading lists, but students are encouraged to consult departmental handbooks on how to write dissertations.

Assessment: Dissertation (100%, 12000 words).

The dissertation must be submitted in August.

MC4M1 Half Unit

Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2019/20 session.

Teacher responsible: Dr Jean-Christophe Plantin (convenor) & Dr Rudy Leyva (coordinator)

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: The aims of the course are to provide students with a general training in research methods and techniques, including research design, the collection, analysis and interpretation of data, and to enable students to evaluate critically their own research and that of professional researchers.

The course has three components:

i. Principles of Research in Media and Communications: a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research: a series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the LT. Students are required to participate in two of the workshops.

iii. Quantitative Analysis: Students have to take the following course offered by the Department of Methodology:

MY464 Introduction to Quantitative Methods for Media and Communications. Please note that this course is compulsory and automatically included within the MC4M1 course.

Teaching:

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 2 LT (each comprised of two separate 1.5 hour sessions).

iii. Revision sessions for summative method essay: Q&A session (two hours) x 1 LT and x 1 ST.

iv. Quantitative Analysis MY464: Lecture (two hours) x 10 MT and x 1 ST; Computer class (one hour) x 9 MT.

v. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in week 11 of MT.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

- Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Bauer, M. W., & Gaskell, G. D. (2000). *Qualitative Researching with Text, Image and Sound: A Practical Handbook for Social Research*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Schroder, K., Drotner, K., Kline, S., & Murray, C. (2003). *Researching Audiences: A Practical Guide to Methods in Media Audience Analysis*. London: New York: Bloomsbury Academic.

- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (20%, duration: 2 hours) in the January exam period.

Coursework (80%, 3000 words) in the ST.

Description of assessment:

1. Coursework: One written assignment of not more than 3,000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in ST Week 1 (80%).

2. A two-hour examination in January relating to Quantitative Analysis (MY464M) (20%).

Students have to complete both assessments (written assignment and statistics exam) on this course.

This course confronts you with your own biases; it shows how using different methodologies and ways of observing the world lead to asking different questions and, therefore, different answers and relates this to the ethical and moral implications of doing research.

MC4M2

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2019/20 session.

Teacher responsible: Prof Ellen Helsper

Availability: This course is compulsory on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking non-research track media and communications MSc programmes may take this course instead of MC4M1 subject to their own degree regulations and with the agreement of the teacher responsible.

Course content:

i. Principles of Research in Media and Communications: a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, social network analysis, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, experiments, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research and Specialist social research workshop: A series of ten three-hour workshops (10 comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all ten workshops.

iii. Quantitative Analysis: Students have to take two statistics courses offered by the Methodology MY464 Introduction to Quantitative Methods for Media and Communications; MY452L Applied Regression Analysis. Please note that these courses are compulsory and automatically included when you register for the standard MC4M2 course. (Students may be permitted to substitute a more advanced course offered by the Methodology Department in place of MY464 and/or MY452L, with the approval of the MC4M2 course convenor and subject to timetabling constraints.)

Teaching:

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 10 LT.

iii. Quantitative Analysis: MY464: Lecture (two hours) x 10 MT and x 1 ST; Computer class (one hour) x 9 MT; MY452L: Lecture (two hours) x 10 LT; Computer class (one hour) x 10 LT.

iv. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in week 11 of MT.

ii. Principles of Social Research Workshops: All students are expected to complete advance readings and submit workshop assignments.

iii. Quantitative Analysis: Most statistics courses require weekly assignments

Indicative reading:

Assessment: Exam (17%, duration: 2 hours) in the January exam period.

Exam (17%, duration: 2 hours) in the summer exam period.

Coursework (66%, 5000 words) in the ST.

Description of assessment:

- Coursework: One written assignment of not more than 5,000 words to be submitted in ST Week 1 (66%).
- Two exams relating to Quantitative Analysis: One two-hour examination in January for MY464 and one two-hour examination in ST for MY452L (see Methodology Department course guides) (34%).

MC4M7 Half Unit

Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis)

This information is for the 2019/20 session.

Teacher responsible: Dr Jean-Christophe Plantin (convenor) & Dr Rudy Leyva (coordinator)

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. The course has three components:

i. Principles of Research in Media and Communications: a series of lectures offered by media and communications staff in MT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, critical

discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Principles of Social Research: a series of five three-hour workshops (each comprised of two 1.5-hour sessions) offered by media and communications staff in the LT. Students are required to participate in two of the workshops.

iii. Quantitative Analysis: Students have to take the following course offered by the Department of Methodology: MY452M Applied Regression Analysis. Please note that this course is compulsory and automatically included in the MC4M7 course.

Teaching:

i. Principles of Research in Media and Communications: Lecture (one hour) x 10 MT; Lecture on Writing Methodological Critiques (one hour) x 1 LT.

ii. Principles of Social Research: Workshop (three hours) x 2 LT (each comprised of two separate 1.5 hour sessions).

iii. Revision sessions for summative method essay: Q&A session (two hours) x 1 LT and x 1 ST.

iv. Applied Regression Analysis MY452: Lecture (two hours) x 10 MT; Computer class (one hour) x 10 MT.

v. Methodology pilot drop in clinic: Workshop (two hours) x 1 LT and ST.

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to complete advance readings and submit one essay of 1,500 words to their supervisors in week 11 of MT.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Applied Regression Analysis: Most statistics courses require weekly assignments

- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (20%, duration: 2 hours) in the summer exam period.

Coursework (80%, 3000 words) in the ST.

Description of assessment:

1. Coursework: One written assignment of not more than 3,000 words, relating to the combination of Principles of Research in Media and Communications and Principles of Social Research to be submitted in ST Week 1 (80%).
2. A two-hour examination in the ST relating to Applied Regression Analysis (MY452M) (20%).

Students have to complete both assessments (written assignment and statistics exam) on this course.

This course confronts you with your own biases; it shows how

using different methodologies and ways of observing the world lead to asking different questions and, therefore, different answers and relates this to the ethical and moral implications of doing research.

MG401 Half Unit

Operations Management for Management Consultancy

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Steinberg NAB.3.08

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management Science (Decision Sciences) and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at 45. Students on the waiting list will be selected based on their academic background.

Pre-requisites: There is a pre-assignment that is due at the first lecture of Lent term 2020. The specification of the pre-assignment will be posted to Moodle on the last day of Michaelmas term 2019. Note that the pre-assignment is compulsory and cannot be accepted late.

Course content: The course covers eight topics: (1) Process Flow Analysis, (2) The Toyota Production System, (3) Inventory Management, (4) Assembly Line Balancing, (5) Project Management, (6) Quality Management for Services, (7) Forecasting, and (8) Scheduling. The course is structured in three parts. Part I is called 'Cases', and is based around a set of 5 readings: three Harvard Business School cases and two articles. Part II is called 'Techniques'. Part III is called 'The Goal', which takes place during the final 2-hour session, and consists of an in-depth discussion of the book, *The Goal*, by E.M. Goldratt and J. Cox.

Teaching: 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: In addition to the pre-assignment students will have six assignments throughout the term covering the material in the course, and will be expected to work as a group on each assignment. The problems comprising each assignment will be discussed in the seminar classes, and each student will be individually responsible for answering all the problems for each assignment.

Indicative reading:

1. Case: 'National cranberry cooperative (abridged)'
2. Case: 'Toshiba: Ome works'
3. Case: 'Toyota Motor Manufacturing, U.S.A., Inc.'
4. Article: 'Controlling variation in health care: a consultation from Walter Shewhart'
5. Article: 'Monitoring patients using control charts: systematic review'
6. Book: *The Goal*, Fourth revised (30th anniversary) edition, E.M. Goldratt and J. Cox, 2014.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG402 Half Unit

Public Management: A Design-Oriented Approach

This information is for the 2019/20 session.

Teacher responsible: Professor Michael Barzelay NAB 3.19

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Management, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG467 Strategy and Change in Public Sector Management.

Course content: The course is designed to strengthen professional competences in effectuating the intent of public organizations, public programs, and related forms of enterprise within government. In support of this aim, the course enables students to acquire – and use – professional knowledge about public organizations, especially the performance of their constitutive management functions of planning, directing, coordinating and controlling. The focus of knowledge-use is within design-projects whose role within public organizations is to generate novel mechanisms in the form of systems, plans, and performances. The use of this knowledge is accentuated through theory-based experiential learning aimed at improving the professional abilities of sense-making, designing, argumentation, and dramatization – all of which involves mechanism-intent thinking about public organizations. Further, the course teaches how to translate purposive theories of enterprise-management into useful reference points for public organizations and their design-projects; in complementary fashion, the course examines the theory and practice of conducting case studies with the aim of providing insight into how mechanisms work within situated public organizations to perform their management and other functions and, thereby, to effectuate their intent in creating public value. The teaching format includes discussion of case study analysis and design. The course also considers the past and future of public management as a design-oriented professional discipline.

Teaching: 30 hours of combined lecture/seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT and 1 essay in the ST.

Indicative reading: M. Barzelay, *Public Management as Design-Oriented Professional Discipline* (2019), M Moore, *Creating Public Value: Strategic Management in Government* (1995); S Funnell & P Rogers, *Purposeful Program Theory: Effective Use of Change and Logic Models* (2011), M Barzelay & C Campbell, *Preparing for the Future: Strategic Planning in the U.S. Air Force* (2003); J Bryson, *Strategic Planning for Public and Nonprofit Organizations* (2018); E Bardach, 'The Extrapolation problem: How can we learn from the experience of others?' (2004); J van Aken, et al, *Problem-Solving in Organizations* (2007), J Tandler & S Freedheim, 'Trust in a rent-seeking world: Health and government transformed in northeast Brazil' (1994), P Coughlan, J Suri, & K Canales, 'Prototypes as (design) tools for behavioral and organizational change: A design-based approach to help organizations change work behaviors' (2007), and W Booth, G Colomb & J Williams, *The Craft of Research* (2006).

Assessment: Case analysis (45%) in the LT. Essay (45%, 2500 words) and class participation (10%).

MG403 Half Unit Pricing Strategy

This information is for the 2019/20 session.

Teacher responsible: Prof Om Narasimhan NAB5.06

Availability: This course is available on the MSc in Marketing. This course is not available as an outside option.

Course content: This course is meant for the MSc Marketing

students only and involves a higher degree of quantitative treatment. Students who are not enrolled in the MSc Marketing degree should not take this course, and should take the "MG4J3 Principles of Pricing" course instead.

The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics and opportunities for achieving price customisation.

Teaching: 30 hours of seminars in the LT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading: *The Strategy and Tactics of Pricing: A Guide to Growing More Profitably* (2010): Nagle, Hogan, and Zale, Prentice Hall. *Pricing Information: How to customize both the product and the price* (1998): Carl Shapiro and Hal Varian, Harvard Business School Chapters. 'How to Fight a Price War' (2000): Akshay Rao, Mark Bergen, Scott Davis, Harvard Business Review. 'Is it time to rethink your pricing strategy?' (2012): Andreas Hinterhuber and Stephan Liozu, Sloan Management Review. 'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Coursework (45%), project (45%) and class participation (10%) in the LT.

Coursework is an Individual Take-home assignment and the project will be in groups.

MG404 Half Unit Consumer Insights: Behavioural Fundamentals

This information is for the 2019/20 session.

Teacher responsible: Dr Nikki Sullivan

Availability: This course is compulsory on the MSc in Marketing. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: For many companies, non-profit organisations, and political figures, success relies on understanding the "consumers." What is it that they really want, and why? What information will they attend to, and what will they ignore? How do they make decisions, why do they sometimes make bad ones, and how can we help them make better ones? It can be tempting to answer these questions intuitively, based on your own experiences as a consumer. However, intuitions about human psychology are often wrong.

- Chronic and temporary sources of customer needs, desires, and motivations
- How customers search for information, acquire, and process information
- How customers allocate attention and how to attract it
- Customer decision-making processes, and the heuristics and biases that play a role
- The formation of attitudes and intentions, and processes for persuasively changing them
- Social influences on intentions and behaviour, including unconscious determinants
- Why intentions are or are not translated into behaviour, and what

strategies can be used to narrow the intention-behaviour gap.

Teaching: 30 hours of seminars in the MT.

This course has a reading week in Week 6 of MT.

Formative coursework: One essay prior to the summative essays; one quiz prior to the summative quizzes.

Indicative reading:

- Consumer Behavior, 6th edition. Hoyer, MacInnis, & Pieters. South-Western Cengage Learning, 2010;
- Consumer Behavior: Science and Practice. Kardes, Cronley & Cline. South-Western Cengage Learning.
- Influence: The Psychology of Persuasion. Cialdini, Robert. Collins Business, 2006.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Essay (30%, 1500 words), essay (30%, 1500 words) and in-class assessment (40%) in the MT.

Two essays (30% each; 1500 words each) in the MT.

Two quizzes (20% each) in the MT.

MG409 Half Unit

Auctions and Game Theory

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Steinberg NAB 3.08

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), MBA Exchange, MSc in Applicable Mathematics, MSc in Economics and Management, MSc in Management (1 Year Programme), MSc in Management Science (Decision Sciences), MSc in Management and Strategy and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 45. Students on the waiting list will be selected based on their academic background.

Pre-requisites: Students should have a course equivalent to the LSE course Quantitative Methods (Mathematics) (MA107), which covers techniques of calculus (differentiation, partial differentiation, optimisation and integration), methods of linear algebra (use of matrices), with emphasis on their application to economic problems. Students should also have some knowledge of probability.

Course content: The course provides an introduction to auctions and game theory. Topics covered are: noncooperative games, cooperative games, social choice, sequential games, auctions, and combinatorial auctions. There is also a case study, 'Auction Vignettes', which will form the basis of a class discussion. Finally, there will be a research presentation by the course leader.

Teaching: 16 hours of lectures and 12 hours of seminars in the LT. 2 hours of lectures in the ST.

A reading week will take place during Week 6. There will be no teaching during this week.

Formative coursework: Very full lecture notes are provided, and every week a set of problems is given out in the lecture. These are discussed in the following seminars.

Indicative reading:

- Book: P. Cramton, Y. Shoham, and R. Steinberg, eds., Combinatorial Auctions.
- Book chapter: 'Auction Pricing', R. Steinberg, Chapter 27 in O. Ozer and R. Phillips, eds., Oxford Handbook of Pricing Management.
- Case study: 'Auction Vignettes', Harvard Business School Publishing.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG411

Firms and Markets

This information is for the 2019/20 session.

Teacher responsible: Prof John Sutton

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: A graduate course in microeconomic analysis, geared towards those parts of the subject that are of primary importance in the Management area. The first section focuses on competition between firms, using standard game theoretic models. This leads to a general treatment of market competition by reference to the concept of firms' capabilities. The next section traces the basis of firms' capabilities to the set of elements of know-how possessed by the individuals comprising the firm, and by the mode of internal organization of those individuals. The analysis draws on the several strands in the modern literature on the theory of the firm. The final section of the course deals with the link between strategy and structure, and with the formulation of strategies in environments characterized by complexity and uncertainty.

The course syllabus covers Walrasian Equilibrium: Supply and Demand. Beyond the Walrasian model: Nash Equilibrium. Applications of Nash Equilibrium: options and bargaining. General approaches to the analysis of competition in oligopolistic markets. Applications in Industrial Organisations. The concept of capabilities. The roots of firms' capabilities: individuals and their collective know-how. The internal organization of firms. Contract theoretic approaches to the theory of the firm. The Chandlerian nexus: from strategy to structure.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT. 20 hours of lectures and 20 hours of seminars in the LT. A weekly seminar devoted to problem sets. A weekly seminar devoted to case studies.

Indicative reading: Milgrom and Roberts, Economics, Organization and Management; Sutton, Sunk Costs and Market Structure

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG412 Half Unit

Globalization and Strategy

This information is for the 2019/20 session.

Teacher responsible: Prof John Sutton

Availability: This course is available on the MSc in Economics and Management. This course is not available as an outside option.

Course content: The course studies the strategies of multinational corporations in an international context, with reference to make or buy, organization, and location choices. It studies current developments in the global economy with a focus on the key decisions that multinationals make in framing their global strategies:

1. Economic analysis of globalization process. Assessing the growth of Chinese and Indian manufacturing, 1990-2010. Evidence from benchmarking studies.
2. Production: What determines the strategies multinationals adopt - product range; generic strategies.
3. Location: Competitive advantage of different countries; growth in outsourcing and Offshoring; particularly emphasizing India and China and analyzing their increasing role in the global economy.
4. Organization: how multinationals combine the necessary local adaptation with the need to standardize to achieve efficiency.
5. The Globalization Debate.
6. The Prospects for sub-Saharan Africa.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students are required to make two class presentations and submit written reports on selected case studies

Indicative reading: A reading list will be provided at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG417 Half Unit Extended Essay

This information is for the 2019/20 session.

Teacher responsible: Various (depending on title chosen).

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: Students will undertake an extended essay which should normally be based on one of the two option courses taken. Students can, with special permission, base this piece of work on one of the compulsory courses.

Teaching: A supervisor will be allocated to individual students based on the essay title chosen who will provide students with supervision for this piece of work.

Assessment: Essay (100%, 6000 words) in the ST. Extended essay of no more than 6,000 words to be submitted the week before Summer Term commences.

MG418 Half Unit Open Innovation

This information is for the 2019/20 session.

Teacher responsible: Dr Nadia Millington NAB 3.14

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Open innovation is a fresh take on innovation whereby a firm looks beyond its boundaries to exploit the creative power of users, communities and customers to co-develop new products, services and processes. Whether it is the fortune 500 companies that have used open innovation to transform their businesses (e.g. Proctor and Gamble and IBM) or even start-ups (such as iStock Photo); Open Innovation, through tools like crowdsourcing or open sourcing is disrupting markets and altering the nature of industries.

This course is divided into 2, a lecture stream and a consulting stream.

During the lecture stream (roughly the first 5 weeks of the course) students will:

1. Learn about the emergence of OI and how OI differs from other sources of external innovation.
2. Learn to differentiate between the different types of OI tools (Crowdsourcing, Lead Users, Innovation Intermediaries, Design intermediaries, Innomediaries, Open Source) and to choose the right OI tool for different problem sets.
3. Explore an emerging range of companies using open business models (e.g. Google, Facebook) in contrast to more traditional business approaches.
4. Learn about the challenges of implementing OI and the drivers of success, not only based on practitioner sources but also in the context of organisational behaviour, innovation and network theory.

During the consulting stream (roughly the last 5 weeks of the course) students work on a real live OI project for a for-profit client (eg PWC, KPMG, IBM, Barclays) or not-for-profit client (e.g. Barnados, Hope and Homes), developing solutions via the implementation of one or more open innovation tools. These last five weeks will be guided by our Innovation partners (from companies like Ludic Group/ KPMG) and in the final week of the term students will present their final solution to their clients and classmates.

Teaching: 30 hours of lectures in the LT.

In addition, students will also be expected to attend

- Two 30-minute group sessions to help them scope their project and develop their solutions
- A meet and greet session with their client partners which lasts approximately 2 hours after class. This is usually held after class in the 4th week of the semester and refreshments are provided.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be provided with a formative essay, either in week 3 or 4 of the semester and grades and comments will be provided during week 7.

Indicative reading: Chesbrough, H.W. (2003). *Open Innovation: The new imperative for creating and profiting from technology*. Boston: Harvard Business School Press (chapter 1-3). Brabham, D. (2008).

Moving the crowd at iStockphoto: The composition of the crowd and motivations for participation in a crowdsourcing application First Monday, 13. Fredberg, T., Elmquist, M. & Ollila, S. (2008)

Managing Open Innovation: Present Findings and Future Directions, Vinnova VR 2008:02. Raffi Amit, C. Zott (2012), *Creating value through business model innovation*, Sloan Management Review, 53 (3), 41 - 49. Tushman, M. L. and O'Reilly, C. A. (1996) 'Ambidextrous Organizations: Managing Evolutionary and Revolutionary Change', *California Management Review*, vol. 38, no. 4, pp. 8-30

Assessment: Essay (45%, 2000 words), project (45%, 5000 words) and class participation (10%) in the LT.

MG420 Half Unit Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Liebenau NAB.5.20

In addition, all students will be allocated an individual dissertation supervisor in year two.

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Students on other Department of Management postgraduate programmes are welcome to attend the preparation sessions.

Course content: Dissertations are based on a research question which students are required to agree with their assigned dissertation supervisor in year two.

Research questions may be investigated by:

- (a) Framing the question via a literature review and examining the problem in more detail through a small scale empirical research project, using either primary or secondary data sources; OR
- (b) Carrying out an extended literature review to provide a rigorous analysis of existing research investigating the problem.

Teaching: 3 hours of lectures in the MT. 4 hours and 30 minutes of lectures in the LT.

Students are required to attend a course of five lectures during MT and LT.

Students on this course will have reading weeks in Week 6 of MT and Week 6 of LT, in line with departmental policy

Indicative reading: Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage. Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press. Ridley, Diana (2008). *The Literature Review: A Step-by-step guide for students*. London: Sage. Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). *Management Research Methods*. Cambridge: Cambridge University Press. Gill, John and Phil Johnson (2010) *Research Methods for Managers* (3rd edition). London: Sage. Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research* (4th edition). London: Sage. Other readings will be provided during lectures in MT and by dissertation advisors.

Assessment: Dissertation (90%, 6000 words) post-summer term. Proposal (10%) in the LT.

MG421 Half Unit

International Business Strategy and Emerging Markets

This information is for the 2019/20 session.

Teacher responsible: Prof Saul Estrin NAB4.32 and Dr Christine Cote NAB4.05

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: An undergraduate or graduate course in micro-economics or competitive strategy. Pre-requisites to be assessed by teacher responsible.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of key cases in the classes. There will also be some external speakers from large international firms and from the banking and consulting community to bring contemporary views and arguments to bear. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economies' performance.

This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of data sets and sources. The course will then turn to key topics. These will include the determinants of FDI; the effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets. Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to write a 1,000 word essay and will be provided with feedback. They will also be required to present their group project in class.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghenawat, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, *The New Institutional Economics*, *Journal of Economic Literature*, 2000; Estrin et. al., *Entry Mode in Emerging Markets*, *Strategic Management Journal*, 2009; T. Khanna and K Palepu, *The Future of Business Groups in Emerging Markets*, *Academy of Management Journal* 2004.

Assessment: Exam (50%, duration: 2 hours) in the summer exam

period.

Project (40%) and class participation (10%) in the LT.

MG422 Half Unit

Thinking Strategically

This information is for the 2019/20 session.

Teacher responsible: Prof Ignacio Palacios-Huerta NAB5.24

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of basic algebra is necessary to take this course.

Course content: This course is concerned with strategic thinking.

The course is an interaction of game theory, economics and business strategic management. The focus is the study of situations in which two or more decision-makers (e.g., individuals, firms, political parties, etc) interact in a strategic manner. Understanding strategic situations that involve conflict and/or cooperation has proven critical in many areas of economics, business, political science, sports, law and other areas. The emphasis is to provide the fundamental thinking of good strategic making in these situations, rather than a mathematical and formal analysis.

The purpose of this course is threefold: (1) first, to introduce relevant tools of game theory in order to capture the key elements of different strategic situations and determine the most likely outcome in each situation; (2) second, to study various real-life applications and case-studies where thinking strategically has proven critical; (3) third, to cover modern developments in behavioural game theory, in particular in the areas of intertemporal choices and strategies, decision-making under risk and uncertainty, and experiments in strategic interaction.

Students should note that this course will involve weekly calculations and numerical reasoning.

Teaching: 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will have to complete 5-8 written assignments throughout the course, handing in 1-2 of them, and feedback will be provided.

Indicative reading: *Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life*, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff. *The Art of Strategy*, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. *Games of Strategy*, WW Norton, 3rd edition, 2009, by Avinash Dixit, Susan Skeath and David Reiley. *Beautiful Game Theory*, Princeton University Press, NJ, 2014, by Ignacio Palacios-Huerta. Set of academic articles and/or case studies, plus lecture notes written by instructor. Set of articles from the media.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG430 Half Unit

Strategy in Global and Emerging Markets

This information is for the 2019/20 session.

Teacher responsible: Dr Rocco Macchiavello NAB.5.28

Availability: This course is compulsory on the Global MSc in Management (CEMS MiM) and available on the Global MSc in Management and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course applies tools from microeconomics,

industrial organisation and organisational economics to the analysis of strategy. The emphasis is on the application of these concepts to business situations, and as such the course relies heavily on the analysis of case studies.

The course is divided into two parts. The first part focuses on the external context of strategy. It first reviews basic tools for understanding industry economics and the determinants of industry-wide profitability, focusing on positional aspects. It then applies basic game theory to analyse competitive interactions when the number of players is small and the industry profitability is largely determined by these players' interactions. This tool is used to analyse issues such as bargaining power, price competition and entry and exit decisions.

The second part studies the internal content of strategy. Topics vary from year to year and include, among others, strategy in the presence of standard setting and network effects, the scope of the firm, outsourcing and supply chain organizations, corporate governance in adding value and capturing synergies, internal management practices. This part relies on the application of both game theory, principal-agent problems and the analysis of empirical academic papers.

The course is heavily based on case discussions. For each class meeting, study questions will be assigned concerning a case study. We will discuss these questions and the material in the case during the class discussions. Students will need to prepare for class discussions by reading the assigned case and analysing it in view of the assignment questions. For each case, students are expected to prepare short slide deck discussing the case and be ready, if asked, to present their slides in the classroom to lead the discussion. Required cases and supplementary readings will be available on Moodle. The textbook, together with the lectures, contains the concepts necessary to analyse the cases.

Teaching: 20 hours of lectures and 12 hours of seminars in the LT. 15 minutes of classes in the ST.

Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

Formative coursework: Students are expected to prepare for classes and actively participate in case discussions. Students will receive feedback on their class participation. Students might be asked to present during the class discussion to practice in view of the assessment. They will also be given the opportunity to discuss their preparation for the individual and group cases that count toward assessment during office hours devoted to this.

Indicative reading: A primary text will be: Saloner, G., Shepard, A. and Podolny, J. Strategic Management. New York, NY: John Wiley, 2001.

As mentioned above, cases and additional readings will be made available online.

Assessment: Case assignment (40%) and class participation (10%) in the LT.

Group assignment (50%) in the ST.

(Class participation will be evaluated based on the quality and quantity of the student's participation in class.)

MG431 Half Unit Managerial Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Ignacio Palacios-Huerta

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: A graduate-level introduction to the foundations of managerial economics. Topics include:

1. Economics as a theory of organisation.
2. Economic Agents: Rationality and the co-ordination powers of the market (Demand and supply and equilibrium: the determinants of consumers' and firms' market responses and the nature of non-strategic interaction).

3. Strategic interaction and dynamic competition.

4. Information and efficiency.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

Formative coursework: A problem set will be assigned and is due two weeks later. It will be marked for feedback purposes only.

Indicative reading: Main textbooks:

T van Zandt; Firms, Price and Markets, available online (2006); S. Estrin et al, Microeconomics, Prentice Hall (2008).

Students can also consider: D M Kreps, Microeconomics for Managers, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, Microeconomics, McGraw Hill (2008).

Reading lists will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG434 Half Unit Organisational Behaviour

This information is for the 2019/20 session.

Teacher responsible: Dr Emma Soane NAB 4.02

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course seeks to understand individual, team and organisational-level attributes, processes and outcomes. It does this by reviewing psychological theories, thus demonstrating the contribution of a psychological perspective to understanding behaviour at work, and by critically evaluating empirical evidence. The course will balance theory and practice by applying the theories to organisations.

Topics covered will include personality and individual differences; work motivation; rewards systems and the design of work; performance; health and well-being at work; creativity and innovation; groups and teams; leadership; power, influence and politics at work; organisational culture; managing organisational decision processes and risk.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching includes lectures and seminars. The teaching style is highly participative. Group work in seminars is an integral part of the course and students are expected to actively contribute to all group exercises. The course requires student commitment and willingness to engage fully with the readings and with class activities.

Students on this course will have a reading week in Week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: All course readings are articles from leading journals such as the Academy of Management Journal, Journal of Applied Psychology, Journal of Organizational Behaviour. A full reading list is provided at the start of the course.

There is no set textbook for this course, however students may wish to consult one of the following:

- Colquitt, J., LePine, J. A., & Wesson, M. J. (2012). Organizational Behaviour: Improving Performance and Commitment in the Workplace (3rd edition). McGraw-Hill;
- Robbins, S. P., & Judge, T. (2017). Organizational Behavior (17th Global Edition). Prentice Hall.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Presentation (25%) in the LT.

Students will work in groups to prepare and deliver a presentation that applies organisational behaviour concepts to a real organisation. Each group will select one specific organisation to

focus on. Presentations must cover two topics from the course and must include clear application of a minimum of three relevant theories. Presentations will be evaluated on the depth of subject knowledge; quality of theoretical application and recommendations made; structure and style of the presentation, including quality of the materials and delivery of the presentation.

MG439 Half Unit

Organisational Behaviour for Master's in Management

This information is for the 2019/20 session.

Teacher responsible: Dr Shoshana Dobrow Riza NAB 4.14

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

This course is a core course for the one year MiM.

Course content: This course is about the people side of business. Although skills in finance, accounting, marketing and operations are crucial for organisational success, the ability to manage and understand an organisation, its groups, and its individuals is equally crucial. Technical skills may help you land a job, but people skills are likely to determine whether or not you keep it, and how much you can accomplish in your career.

In this course, we will explore a variety of perspectives and theories that explain the dynamics of individual, interpersonal, group, and organisational processes. Learning about these ideas will help you develop and apply insights about human behaviour in organisational settings. The course material will be useful in planning careers, managing relationships with other people, making complex decisions, designing jobs, becoming a leader, and making sense of today's – and tomorrow's – corporate world. This course will also help you understand some of the challenges involved in both managing and being managed. Ultimately, the tools and skills developed in this course should equip you to become more effective contributors to the organisations that you join. Much of our learning in this course will be through case studies, exercises, and class discussions.

Teaching: 30 hours of lectures and 3 hours of classes in the LT. The format of the course is highly participatory and interactive and will involve a combination of case studies, interactive exercises, discussions and readings. Students are expected to attend course sessions and to participate actively in the discussions. Students' learning in this course is directly related to their willingness to expose their ideas and conclusions to the critical judgement of the class, and to their efforts to build on and evaluate the comments of classmates.

Full preparation for each session is essential. Students are to complete readings prior to the session for which they are assigned. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the LT.

The formative assignment will be to complete a mock exam. Details of the assignment will be provided during the teaching term.

Indicative reading: There is no set text for this course. The following are examples of articles that will be assigned: Harvard Business School case studies, academic journal articles, Harvard Business Review articles. Students will be given electronic access to cases, texts and articles during the teaching term.

Assessment: Project (30%), take home exam (45%) and continuous assessment (25%) in the LT.

The summative project (30%), called the Reflected Best Self Exercise, will be directly related to all stated learning goals of the course.

Continuous Assessment (25%), The format of the course is highly participatory and interactive and will involve a combination of case studies, interactive exercises, discussions and readings. Details will be provided in the teaching term.

The Take Home Exam (45%) will be a written case analysis, details of the case analysis will be provided in the teaching term. This will be a 48 hour exam.

MG449 Half Unit

Research Methods for Studies in Global Management

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Liebenau NAB.4.20

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

This is a core course for first year Global Masters in Management students only.

Pre-requisites: None

Course content: This course will deliver the core methodological training for students completing a dissertation or extended essay for the Global MSc in Management. It covers issues of research design and research methods for management studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to management research. Drawing on a variety of examples, the course will provide the platform for students to consider a range of design options, as well as methodological techniques, to adopt in their own dissertations or extended essays. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations or extended essays.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

A formative assignment will be due at the end of the teaching term (MT) for which students will be expected to submit a 1,000 word initial proposal for their dissertation/extended essay.

Indicative reading: Wray, Alison and Mike Wallace (2006). *Critical Reading and Writing for Postgraduates*. London: Sage. Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). *The Craft of Research*. Chicago: University of Chicago Press. Ridley, Diana (2008). *The Literature Review: A Step-by-step guide for students*. London: Sage. Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). *Management Research Methods*. Cambridge: Cambridge University Press. Gill, John and Phil Johnson (2010) *Research Methods for Managers (3rd edition)*. London: Sage. Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). *Management Research (4th edition)*. London: Sage. Other readings will be provided during the course.

Assessment: Essay (100%, 3000 words) in the ST. 3000 word essay

MG455 Half Unit

Decisions, Biases and Nudges

This information is for the 2019/20 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is compulsory on the MSc in Management Science (Decision Sciences). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human

Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Operations Research & Analytics, MSc in Risk and Finance and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on all other Management and LSE programmes (both post-graduate and advanced undergraduate) where regulations permit, and is complementary to other behavioural courses offered at LSE.

Pre-requisites: It is an advantage to have had an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research and group work.

Course content: This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: is there risk and uncertainty? What has been chosen in the past? Is the decision maker in a positive or negative mood? Is the decision made offline or online, from a "menu" or from memory? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made and the quality of the decision made.

The course is entirely seminar-based, and will alternate teaching with interactive activities designed to experience first-hand the process of decision making, before reviewing behavioural decision theories and evidence from lab and field studies. Teaching will cover experiments and applications across different 'domains' (managerial, policy, organisations, consumer, and even personal, like choice of career or a partner). The aim of the course is to offer a balanced view of the strengths and weaknesses that humans have when making any decision and cover successful interventions of "nudges" which are being implemented around the world in private and public organisations to help consumers and the public make it easier to make good decisions without complex systems or support. The assessment will give students the opportunity to apply their skills to spot strengths and weaknesses of a decision of their choosing, as well as to produce a "state-of-art behavioural report" that reviews in a rigorous and scholarly manner the literature and empirical evidence on a specific aspect of the intuitive decision process under scrutiny.

Teaching: 25 hours of seminars in the LT.

Students on this course will have a reading week in line with departmental policy.

Formative coursework: Students will be expected to produce 1 presentation and 1 exercise in the LT.

Students will be expected to produce 1 presentation and 1 exercise in the LT.

1. A short and timed **group presentation** (after Reading Week). You will work as a group and spot the biases in a real decision that you will select. You will give a brief group presentation of the biases and the mechanism that requires correction (via debiasing or nudging). After the presentation you will receive feedback as a group. This feedback will help you prepare for the summative assessment.

2. **Individual review** of an anonymous essay (End of LT). Students will play the role of the "assessor" and review an anonymous behavioural report (submitted by one of the students from a previous year) by implementing the different evaluation criteria which are used in this course. This exercise will help you review your and your course-mates' behavioural reports, and improve your summative assessment.

Indicative reading:

- Yates, F. J. (2003). *Decision Management: How to Assure Better Decisions in Your Company*. Jossey-Bass

Assessment: Coursework (100%, 3000 words) in the ST.

Summative (due beginning of ST): The summative assessment will be a 'Behavioural Report' which comprises two parts. In the first part (no more than 1000 words), you will be asked to report on the decision, the bias and the nudging or debiasing intervention designed by you and your group. In the second part of the report (no more than 2000 words), you will focus on one of the processes/aspects that you covered in the first part of the essay and complete a scholarly review on it, with reference to behavioural literature, theories and concepts. The first part of the essay will count for 25% of your mark while 75% will come from the second part. You will be required to provide full essay-style referencing. Although the summative assignment will tackle decision makers' presented in groups, all students will write both parts of the summative essay on their own and receive an individual mark.

PDAM skills

- self-management
- team working
- problem solving
- application of information skills
- communication

MG456 Half Unit Strategic Decision Making

This information is for the 2019/20 session.

Teacher responsible: Prof Valentina Ferretti NAB 3.04

Availability: This course is compulsory on the MSc in Management Science (Decision Sciences). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.

This course is complementary to any behavioural course offered at LSE.

Pre-requisites: Elementary statistical and mathematical concepts, as well as a curiosity towards the fascinating field of decision making and a strong interest in rebooting your "decision-ware". As this course embraces the two key stages of the decision making process, i.e. the initial divergent and creative stage and the subsequent convergent and analytical one, please note that it is important to feel comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions.

Course content: This course is about making successful strategic decisions (i.e. challenging decisions that can have important consequences in the short or long term), in both the professional domain and the personal one. Decision making is indeed a central aspect of virtually every management and business activity, including strategic planning, project management, resource allocation, policy making, marketing, operations management, and investment. Knowledge of what it takes to develop a good decision making process is thus an invaluable part of everyone's toolbox, particularly for rising stars that will be in positions of leadership in the future. It is this ability that will be developed in this course,

which introduces students to the key concept of decision quality and to cutting edge strategies and tools to integrate data and judgments and develop winning strategies.

This course's lectures will propose you a deep dive into the progressive stages of a strategic decision making process, with interactive experiments and puzzles to develop bias awareness and decision analysis expertise. Seminars will consist in interactive hands on sessions to master actionable decision frameworks and become confident decision analysts. The learning outcomes of this course are twofold. First, you will discover what are the key decision traps we tend to fall into when framing, structuring and modelling decisions and why they are dangerous. Second, you will understand and master cutting edge, replicable and versatile solutions for framing, structuring, modelling and communicating better decisions.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

A reading week will take place in Week 6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the LT.

There are two pieces of formative assignments:

1. Group project plan presentation (i.e. the selected decision context, due in week 7)
2. Group project pitch of the key decision analysis' impacts observed as a result of the strategic decision making process developed as a group across classes 2, 3, 4, and 6. Students will present and discuss the key impacts of their decision making process (e.g. discovery of new objectives that were not in their original mental models, recommendation of a different solution to the decision as a result of the used elicitation protocols, etc.) and receive real time feedback, from both their peers and the lecturer. Feedback will be provided following specific criteria (i.e. the same criteria that will be used to evaluate the individual technical account of the group project's impacts that is summative assignment n.2) and by completing a set of both descriptive and evaluative tasks (e.g. indicating the strongest part of the presentation, as well as parts that need revision, etc.). The above two formative assignments have been designed to prepare the students for the following two summative works: (i) the group project presentation of the chosen decision making problem/opportunity and (ii) the individual technical account of the group project's observed impacts.

The topic of the group project (i.e. a decision making problem or opportunity to be modelled and analysed by means of Multicriteria Analysis) can be a personal decision (e.g. which job offer to accept when confronted with multiple ones, which master to apply for, etc.) or a real world case (e.g. how to reduce plastic consumption in the LSE new coffee place). Students will have to collect data, develop and apply a quantitative model, interpret the results and refer to the key scientific literature for the main steps in the development of the model. Students are allowed to work in groups of maximum 4/5 people. This summative assignment will help students develop their strategic problem solving skills by demonstrating their ability to apply both qualitative and quantitative tools to frame, structure and model a decision, interpret its results, and develop sound recommendations.

In the individual technical account of the group project's impacts (max 1500 words), students will have to report on the developed process by focusing on the observed key impacts of the used tools. This second summative assignment will help students develop their critical thinking skills

Indicative reading: Belton, V. and Stewart, T. (2002) Multiple Criteria Decision Analysis. London, Kluwer. Keeney, R.L. (1992) Value-Focused Thinking: A Path to Creative Decision-making. Cambridge: Harvard Univ. Press. HD30.23 K21 (Course Collection). G.S. Parnell et al. (2013) Handbook of Decision Analysis. Hoboken, Wiley. Spetzler C., Winter H., Meyer J. 2016. Decision quality: value creation from better business decisions. Wiley.

Assessment: Presentation (25%) in the LT.

Coursework (75%) in the ST.

Group presentation (25%) in the LT.

Technical report (75%) in the ST.

The presentation is a group project due in Week 11 of Lent Term.

The other assessment is an individual technical report (1500 word maximum) on the impacts of the developed group decision making process due in Week 1 of Summer Term.

MG458 Half Unit

Foundations of Management I: Organisations and Management Theory

This information is for the 2019/20 session.

Teacher responsible: Prof Alexander Pepper NAB.4.30

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course is designed to equip students with a holistic understanding of the evolution of management theory and organisational forms and practices since the emergence of modern industrial organisations in the 19th century. Students will be provided with an overview of the development of management as a practice and as a subject of study, and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Within each field we will cover origins, disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate. Weekly topics cover:

1. Course Introduction and the Origins of Management
2. Management and the Firm
3. Taylorism, Motivation, and Performance
4. The Rise and Decline of Labour
5. The Rise of Human Resources Management
6. Decision Making
7. Understanding Organisational Structures
8. The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
10. Financialisation and Capitalism's Crisis

Teaching: 20 hours of lectures, 15 hours of seminars and 15 hours of classes in the MT.

Lectures will cover theoretical materials and concepts. Case discussions (classes) will apply content covered in lectures to a business situation.

Seminars will cover the assigned readings in more depth and develop critical thinking and writing skills for postgraduate study. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Willman, P. (2014) Understanding Management: Social Science Foundations. Oxford University Press. Wallace, M and A. Wray (2012). Critical Reading and Writing for Postgraduates (Second Edition). London: Sage. A full reading list will be provided at the beginning of the course.

Assessment: Coursework (75%, 3000 words) in the LT.

In class assessment (25%) in the MT.

The 'in class assessment' takes the form of a group presentation of a case.

MG459 Half Unit

Foundations of Management 2

This information is for the 2019/20 session.

Teacher responsible: Dr Yally Avrahampour NAB 4.37

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The aims of this course are to provide a basic grounding in the management literatures covering disciplines relating to financial control and management science, and of the literatures on the evolving managerial, organisational and professional contexts within which these disciplines are practiced. Students will be provided with an overview of each discipline with the aim that they acquire a basic working knowledge of each. The course will cover origins and disciplinary boundaries, the foundations of these disciplines in the social sciences, core concepts, practical applications and current state of play and debate. Weekly topics include:

- 1: Making Business Decisions that Commit Capital
- 2: Representing a Firm's Financial Condition: 1
- 3: Valuing and Managing Costs
- 4: Balanced Performance Measurement
- 5: Measuring Shareholder Value
6. READING WEEK
- 7: Representing a Firm's Financial Condition: 2
- 8: Occupations, Professions and Expertise
- 9: Individual and Institutional Investors in a Historical Context
- 10: Organisation and Management Theory
- 11: Origins of Management Science

Teaching: 22 hours of lectures and 30 hours of seminars in the LT. 3 hours of lectures in the ST.

Weeks 1-11: LT: 1 two hour lecture and 1 three hour case discussion, weekly. Students on this course will have a reading week in Week 6 of LT, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Weeks 1-7: Kaplan, R. & Atkinson, A. (2014) *Advanced Management Accounting*; Weetman, P. (2013) *Financial Accounting: An Introduction*; and Berk, J. & DeMarzo, P. (2014) *Corporate Finance*. Weeks 8-10: Chandler (1977) *The Visible Hand* Week 11: Keys, P. (1994). *Understanding the Process of Operational Research*.

Assessment: Exam (75%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Essay (25%, 1500 words) in the LT.

MG460 Half Unit

Handling Disruption: Humanitarian Emergencies Management and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Francesco Gualdi NAB 3.20 and Dr Shirin Madon NAB 3.36

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Information Systems and Innovation), MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course content is anchored on two observations: First, disasters and humanitarian emergencies are most frequent and most challenging and have the most devastating and long lasting socio-economic effects in poor countries with weak physical and institutional infrastructures. Therefore the course studies the management of emergency interventions in the broader context of socio-economic development. Second, information and communication technology (ICT) continues to open new possibilities for the mitigation, preparedness and response to disasters, but its effective use requires change in the collaboration of humanitarian organisations and affected communities. In this course we will examine critically the potential opened by ICT innovation for the handling of

disruptions.

More specifically, the course will cover the following thematic areas:

- a) The challenge of humanitarian emergencies and our capacity to address it: the link of episodic emergencies and long term development; ICT innovation and the development of organisational capabilities for effective emergency action.
- b) Managing emergencies: emergency logistics and supply chains; ICT innovations in humanitarian emergencies and information systems infrastructures to address mitigation, preparedness and response. Case studies and readings will examine emerging topics such as crowdsourcing and geographic and geodetic intelligence.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

The formative essay is intended to help students explore available literature on the topic of their summative essay and give them feedback on how to proceed.

Indicative reading: Meier, P. *Digital Humanitarians: How Big Data is Changing the Face of Humanitarian Response* Taylor & Francis, New York, 2015. Boin, A., and McConnell, A. 2007. Assessment: Project (30%, 5000 words), essay (60%, 3000 words) and class participation (10%) in the LT.

MG463 Half Unit

CEMS Global Management Practice

This information is for the 2019/20 session.

Teacher responsible: Ms Esther Canonico Martin

Availability: This course is compulsory on the CEMS Exchange

and Global MSc in Management (CEMS MiM). This course is not available as an outside option.

As a compulsory course for the CEMS MIM : Master's in International Management this course is available only to, and compulsory for, those students on the CEMS MIM programme.

Pre-requisites: It is assumed that the students have already taken introductory Organisational Behaviour or Global Business courses. The 2nd year Global Master's in Management students are offered these prerequisites during their 1st year.

Course content: This course aims to answer the question "How internationally operating companies such as multinational companies (MNCs) build efficient and effective organisations in order to realise the company's international objectives?" The focus of the course is on cooperation and management in an international context.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 project in the LT.

Indicative reading: Luthans, F., and Doh, J. (2009). *International management: culture, strategy, and behavior*. London: McGraw-Hill Irwin. Steers, R. M., Nardon, L., and Sanchez-Runde, C. J. (2013). *Management across cultures* (2nd edition). Cambridge: Cambridge University Press. HD62.4 S81

Assessment: Project (50%) and project (40%) in the LT. Class participation (10%).

The project worth 50% will be an individual assignment, and the project worth 40% will be a group assignment.

MG464 Half Unit

CEMS Global Business Strategy

This information is for the 2019/20 session.

Teacher responsible: Dr Christine Cote NAB.4.05

Availability: This course is compulsory on the CEMS Exchange. This course is not available as an outside option.

This course is compulsory for, and only available to, visiting CEMS students.

Course content: The course examines how firms shape their international strategies in an ever-changing global environment. It will consider the context of globalisation with a focus on the relationship between international trade and investment, the emergence of global supply chains and the transformative role played by technology and innovation. It will seek to understand why and how firms internationalise as well as how they can create and sustain competitive advantage while operating across borders and in different institutional environments. Themes covered in this course will include the growing importance of emerging markets, the role of disruptive technologies in transforming industries, exploiting firm's resources and capabilities and sustaining cross border competitive advantage through strategies of global integration or local adaptation, managing staff across borders and creating shareholder value while ensuring corporate social responsibility.

Teaching: 30 hours of seminars in the MT.

Students on this course will have a reading week in Week 6 of MT, in line with departmental policy

Formative coursework: Students will be expected to produce 1 presentation in the MT.

Indicative reading: Baldwin, Richard., 'The Great Convergence. Information Technology and the New Globalisation', Harvard University Press, 2016. Dunning, John H. (2000). 'The eclectic paradigm as an envelope for economic and business theories of MNE activity'. *International Business Review*. 9: 163–190. Peng, M.W. (2003), "Institutional Transitions and Strategic Choices", *Academy of Management Review*. Rugman, A (2010) "Reconciling Internationalisation Theory and its Eclectic Paradigm" *Multinational Business Review*, 18:2. Ghemawat, P., 'Managing Differences: The

Central Challenge of Global Strategy', *Harvard Business Review*, 2007. Zaheer, S (1995), "Overcoming the Liability of Foreignness", *Academy of Management Journal*, 1995. Khanna, T., Palepu, K. and Sinha J., 'Strategies that Fit Emerging Markets', *Harvard Business Review*, 2005. Kogut, B. and Singh, H., 'The Effect of National Culture on the Choice of Entry Mode' *Journal of International Business Studies*, 2001. Bartlett, C. and Ghoshal, S., 'Tap Your Subsidiaries for Global Reach', *Harvard Business Review*, 1986
Assessment: Essay (30%, 2000 words), in class assessment (50%) and class participation (20%) in the MT.

For the in-class assessment, the total mark (50%) will be comprised of 40% from group mark, with an additional 10% from peer review scores of individual contribution.

MG465 Half Unit

Managerial Economics for Master in Management Students

This information is for the 2019/20 session.

Teacher responsible: Daniel Gottlieb

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to managerial economics with a focus on its applicability to business decisions. Students will develop a rigorous way of thinking about managerial problems, issues and decisions that managers face, as well as enabling a better understanding of the external business environment in which an organisation operates. The emphasis is on widely-used theoretical principles. Topics include an in-depth understanding of the geometric structure of the supply & demand model and its applications, the interaction of government and markets, efficiency analysis, international trade, game theory, monopoly and oligopoly strategy, price discrimination, dynamic competition, strategic moves, and information economics. This course develops tools that are the foundation of courses in Marketing, Business Strategy, and Finance, which students will take in core courses throughout the rest of the year.

Teaching: 20 hours of seminars and 9 hours of classes in the MT.

Formative coursework: Students will be expected to produce 5 problem sets in the MT.

Indicative reading: T van Zandt; *Firms, Price and Markets*, available online (2006); S. Estrin et al, *Microeconomics*, Prentice Hall (2008). D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, *Microeconomics*, McGraw Hill (2008).

Assessment: Exam (85%, duration: 3 hours) in the summer exam period.

Class participation (15%) in the MT.

MG466 Half Unit

Supply Chain Management

This information is for the 2019/20 session.

Teacher responsible: Anran Li

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None

Course content: Supply chain management is concerned with matching supply with demand. Excess supply is too costly,

inadequate supply adversely impacts both current revenue and future demand. The course will cover the following key topics: supply chain inventory management, demand forecast and information sharing in supply chain, the manufacturer-retailer supply chain, centralised vs decentralised supply chains, sourcing policy and the buyer-supplier relationship, global sourcing and supplier management, supply chain network design. The course will also discuss tools for managing supply chains, re-engineering the supply chain, and the role of IT in supply chain integration.

Teaching: 18 hours of lectures and 12 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 6 exercises in the LT.

Six exercises in the last six weeks of the course.

Indicative reading:

- "Fast, Global, and Entrepreneurial: Supply Chain Management, Hong Kong Style (An interview with Victor Fung)"
- "Sorenson Research Company, Abridged," Harvard Business School, Case 9-677-257.
- The Bullwhip Effect in Supply Chains. H.L. Lee, V. Padmanabhan, & S. Whang, Sloan Management Review, Spring 1997.
- "Sport Obermeyer Ltd." Harvard Business School, Case 695022
- "Northco (A)," Harvard Business School, Case 9-697-017.
- "Barilla SpA (A)", Harvard Business School, Case 9-694-046.

Assessment: Essay (50%, 3000 words), presentation (20%), continuous assessment (20%) and class participation (10%) in the LT.

The presentation will be completed in groups of no more than three students per group.

MG467 Half Unit Strategy and Change in Public Sector Management

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Barzelay NAB 3.19

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG402 Public Management: A Design-Oriented Approach.

Pre-requisites: N/A

Course content: The course is designed to strengthen professional competences in effectuating the intent of public organizations, public programs, and related forms of enterprise within government. In support of this aim, the course enables students to acquire – and use – professional knowledge about public organizations, especially the performance of their constitutive management functions of planning, directing, coordinating and controlling. The focus of knowledge-use is within design-projects whose role within public organizations is to generate novel mechanisms in the form of systems, plans, and performances. The use of this knowledge is accentuated through theory-based experiential learning aimed at improving the professional abilities of sense-making, designing, argumentation, and dramatization – all of which involves mechanism-intent thinking about public organizations. Further, the course teaches how to translate purposive theories of enterprise-management into useful reference points for public organizations and their design-projects; in complementary fashion, the course examines the theory and practice of conducting case studies with the aim of providing insight into how mechanisms work within situated public

organizations to perform their management and other functions and, thereby, to effectuate their intent in creating public value. The teaching format includes discussion of case study analysis and design. The course also considers the past and future of public management as a design-oriented professional discipline.

Teaching: 30 hours of lectures in the LT.

It will be open to students on this course to attend a writing skills workshop in Week 6 on foundations of understanding and presenting mechanism-intent argumentation about enterprises and managing. This session does not form part of the formal teaching on the course.

Formative coursework: Students will be expected to produce 1 essay in the LT and 1 essay in the ST.

Indicative reading: M. Barzelay, Public Management as Design-Oriented Professional Discipline (2019), M Moore, Creating Public Value: Strategic Management in Government (1995); S Funnell & P Rogers, Purposeful Program Theory: Effective Use of Change and Logic Models (2011), M Barzelay & C Campbell, Preparing for the Future: Strategic Planning in the U.S. Air Force (2003); J Bryson, Strategic Planning for Public and Nonprofit Organizations (2018); E Bardach, 'The Extrapolation problem: How can we learn from the experience of others?' (2004); J van Aken, et al, Problem-Solving in Organizations (2007), J Tandler & S Freedheim, 'Trust in a rent-seeking world: Health and government transformed in northeast Brazil' (1994), P Coughlan, J Suri, & K Canales, 'Prototypes as (design) tools for behavioral and organizational change: A design-based approach to help organizations change work behaviors' (2007), and W Booth, G Colomb & J Williams, The Craft of Research (2006).

Assessment: Essay (45%, 2500 words) and case analysis (45%). Class participation (10%) in the LT.

The assessment for this course consists of the following:

A 2,500 word case analysis (45% of overall mark)

A 2,500 word individual essay (45% of overall mark)

Class participation (10% of overall mark)

MG472 Half Unit Global Strategy, Management and Information Systems

This information is for the 2019/20 session.

Teacher responsible: Prof Leslie Willcocks NAB 3.23 and Dr Susan Scott NAB 3.12

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course has a strong management focus and assumes a general knowledge of information and communication technologies. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The objective of this core course on the MSc MISDI programme is to address how organizations formulate global strategy and manage its execution in a rapidly digitizing business world. Whether organizations operate globally, regionally or nationally they are highly dependent on digital innovations produced by information and communication technologies for fulfilling their missions. This course reviews the foundations of global business management and examines key insights about the emerging roles of ICTs and digital innovation in contemporary organizations operating internationally. To manage effectively it is important to recognize the varieties of management practices across regions and the different approaches involved in international business management. On this course we examine how the interrelationship between international strategy, digitization and global operations plays out

in dynamic global, regional and national contexts. Having reviewed distinctive global business management strategies and market entry approaches, we identify contemporary issues of critical importance for information systems management including: the relative importance of culture versus institutions in conducting international digital business; the need to identify practices that enable us to manage across boundaries; the challenge of corruption and role that CSR/stakeholding play in sustainable business ethics; the effects of information security breaches; the decisions points in formulating robust sourcing operational sub-strategies; and how international project management can support learning in organizations. The course provides a strategic overview of the management of information systems and innovation. We review frameworks and approaches used in practice and consider them alongside the academic literature on processes of globalization, information systems strategy, organization studies and institutional theory. Students studying this course will gain an understanding of how trends in strategy and operations are entangled with current processes of digitization and what these conditions of possibility mean going forward for globalizing. At the end of the course participants will be able to:

1. Understand global, business and digital issues in strategy formulation
2. Analyse business environments at competitive, country, regional and global/societal levels
3. Understand and analyse regional differences and how regional and international trade is conducted
4. Use analytical frameworks for arriving at business and digital strategy
5. Recognise and make recommendations on the strategic potential and impact of information systems and digital innovation in different organizational contexts.
6. Decide how organizations can best enter and evolve in new international markets.
7. Analyse international management issues in operational areas of human resources, marketing, logistics, sourcing, R&D, and project management
8. Apply ethical standards to issues of corporate social responsibility, sustainability, and digital security and privacy.
9. Participate in managing culture, difference, diversity, across borders.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

A reading week will take place in W6. There will be no teaching on MG472 during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course reading list. Formative feedback is provided on class participation. A mock examination, with questions from MG472, MG481 and MG487 will be held.

Indicative reading: Indicative Reading:

- Chaffey, D. - Digital Business and E-Commerce Management (Pearson: London)
- Galliers, R. and Leidner, D. (eds.) (2009) Strategic Information Management. Routledge, London.
- Ghemawat, P. (2007) Redefining Global Strategy. Harvard Business School Press, Boston.
- Hill, C. (2011) International Business: Competing in The Global Marketplace. McGraw Hill, New York, 8th edition Chapters 1, 5, 6, 9, 10, 11
- Rugman, A. and Collinson, S. (2012) International Business. FT Prentice Hall, London. 6th edition. Note that each chapter has substantial bibliographies that can be referred to for sources.
- Willcocks, L. (2014/16) Global Business Management Foundations. Brookes Publishing, Stratford, Second/Third edition (Kindle, White Plume publishing and Steve Brookes Publishing versions

Essential Readings to be done on a weekly basis to build up general knowledge:

- The Economist – weekly news and regular relevant special studies.
- The Financial Times – daily world commentary, regular regional/

theme special issues and archive.

- The Wall Street Journal – detailed daily world commentary.

The main journals that students may wish to search for additional articles on globalisation, business strategy, management and digital business are:

- Academy of Management Executive
- Academy of Management Review
- Strategic Management Journal
- Long Range Planning
- Journal of Management Studies
- Journal of International Business Studies
- Journal of Management
- Management Information Systems Quarterly
- Executive
- Journal of Strategic Information Systems
- Organization Science
- Management International Review
- Harvard Business Review
- Sloan Management Review
- California Management Review

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the MT.

The individual course assessment will be made based on two pieces of individual course work:

1. An in-class presentation of a key course reading. The student will be assessed on the presentation, the Powerpoint slides and a two page summary of the reading submitted in advance of the presentation.
2. An in-class presentation of a key class case study. The student will be assessed on the presentation, the Powerpoint slides and a two page summary of the case study submitted in advance of the presentation.

MG473 Half Unit Negotiation Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof David Marsden NAB4.22

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course highlights the importance of power, tactics, strategy, information and trust in shaping the structure and outcomes of negotiations. It covers basic negotiation concepts such as distributive and integrative bargaining, sometimes called pie-slicing and pie-expanding approaches, two-party and multi-party negotiation, as well as more advanced issues such as the impact of culture and the psychology of judgement and decision-making. Students will engage in weekly negotiation simulation exercises to help them understand the concepts and develop their negotiating skills.

Teaching: 30 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will compile a weekly learning log reflecting on their experience in the negotiation exercises and linking that to the concepts and theories in the literature. Formative feedback is provided on class participation. Students will also complete a formative essay.

Indicative reading: The main text, covering most of the material in the course is: Leigh Thompson, The Mind and Heart of the

Negotiator, 6th edn, Pearson, Harlow, 2014. The following are also useful: Roger Fisher and William Ury, *Getting to Yes: Negotiating Agreement Without Giving In*, Penguin Books, New York, 2012; Ken Binmore, *Game theory: A Very Short Introduction*, Oxford University Press, Oxford, 2007; and Andrew M. Colman, *Game Theory and its Application to the Social and Biological Sciences*. Routledge, Hove, 1999. Students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (75%, 2000 words) and learning log (25%) in the LT.

This course utilises continuous assessment. Students are required to submit a Learning Log for each weekly lecture/ negotiation session. The Learning Logs for Weeks 1 and 2 are formative and will not count towards students' overall grade. The Learning Logs for Weeks 3-11 are summative and students are required to attempt at least six out of the eight summative Logs.

Students who submit between six and eight Learning Logs will receive an overall mark based on their six highest scores. Students who submit less than six Learning Logs will receive a mark of 0 for each missed assessment and will receive an overall mark based on the work they have submitted PLUS the requisite number of zeroes necessary to calculate the grade. Students who fail to attempt any Learning Logs (0 out of 8) will be awarded a Zero Incomplete for the whole course and cannot be awarded the degree until they submit the work at resit. All marks for the Learning Logs will be scaled proportionately.

Deadlines are strictly enforced and late submissions will not be accepted.

MG475 Half Unit Organisational Theory

This information is for the 2019/20 session.

Teacher responsible: Dr Mariana Bogdanova

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Organisations exert a central force in contemporary work and society. From the rise of large, machine-like bureaucracies in the 19th century to the flat, networked firms of nowadays, different assemblages of people and technology have produced a rich ecology of organisational forms – multinationals, social enterprise and charities, R&D laboratories etc. Organisational theory examines these multifarious arrangements with respect to their internal and external environment elements and dynamics - e.g. organisational culture and identities, power and politics, inter-organisational collaboration, effect of globalisation on organisational activities etc. The course readings include a selection of classic views and more recent research on organisation theory with the aim of helping students understand organisations as entities, how they influence the life of their members, and how they affect work and society more generally.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete a formative assessment using a sample exam question. Details will be provided in class.

Indicative reading: Hatch, M.J., 2018. *Organization theory: Modern, symbolic, and postmodern perspectives*. Oxford University Press. Clegg, S.R., Hardy, C. and Nord, W.R., 2003. *Handbook of Organization Studies*. SAGE Publications Ltd.

Assessment: Exam (65%, duration: 2 hours) in the summer exam period.

Project (35%).

The project is composed of two parts (individual and group work) and is submitted in the MT and the LT.

MG476 Half Unit Corporate Social Responsibility and International Labour Standards

This information is for the 2019/20 session.

Teacher responsible: Prof Sarah Ashwin NAB 4.19

Availability: This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Global Politics, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Any social science background.

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: One 2,000 word essay in LT.

Indicative reading: Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press. Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP. Locke, R. (2013) *The Promise and Limits of Private Power: Promoting Labor Standards in a Global Economy*, Cambridge: Cambridge University Press

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (35%, 2000 words) and class participation (5%).

MG477 Half Unit Strategic Reward: Key Models and Practices

This information is for the 2019/20 session.

Teacher responsible: Dr Rebecca Campbell NAB 4.27

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other

programmes where regulations permit.

Course content: The course will provide an analysis of the types of reward systems commonly used in private and public sector organisations, drawing on economic, psychological and sociological principles, covering all-employee reward, senior executive reward, fixed pay, short-term incentives, long-term incentives, benefits and pensions.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be required to prepare a short paper (maximum 750 words) during week 7 in connection with the material covered during that week and will receive feedback on their understanding of the issues.

Indicative reading: Course text books

Perkins, S., and White, G (2008). *Employee Reward: Alternatives, Consequences and Contexts*. CIPD, London. (all editions are acceptable); White, G and Druker, J (2008) *Reward Management – a Critical Text*. Second edition. Routledge.

General reading

Gerhardt, B and Rynes, S (2000) *Compensation in Organizations, Current Research and Practice*. San Francisco, Jossey Bass.
Gomez-Mejia, L., Berrone, P., & Franco-Santos, M. (2010) *Compensation and Organizational Performance – Theory, research and Practice*. M.E. Sharpe.
Hallock, K. (2012) *Pay – Why People Earn What They Earn (and What You Can Do Now to Make More)*. Cambridge University Press.
Pepper, A. (2015) *The Economic Psychology of Incentives*. Palgrave Macmillan.
Pepper, S. (2006) *Senior Executive Reward – Key Models and Practices*. Gower Publishing.
Trevor, J. (2011) *Can Pay Be Strategic?* Palgrave Macmillan.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 2000 words).

MG478 Half Unit

The Management of Human Resources in Global Companies

This information is for the 2019/20 session.

Teacher responsible: TBC

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD) and MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on the management of human resources in global corporations. The central theme in the course is the link between HR strategy and business strategy. The course involves an examination of how diverse global firms articulate and execute global HR strategies and how these strategies are reflected in a variety of HR practices such as global compensation, global talent management, global performance management, global value chains and labour standards, global diversity policies, global employment relations, and the management of HR in global mergers and acquisitions. Given the absence of empirical studies of HR practices in global corporations, the method of instruction is through the analysis of cases, supplemented by lectures and guest lectures from Global HR leaders. This is a more practical course, but informed

by HR theories that students would have been exposed to in the introductory HRM course (MG480 Management of Human Resources: Strategies and Policy), as well as other courses.

Students without the required theoretical background will be provided with supplemental readings.

In the course modules, we will:

- Evaluate the strategic choices facing global corporations, including the choice between adopting highly centralized or predominantly decentralized HR policies, with regard to a range of HR issues such as performance management, compensation and diversity.
- Understand HR considerations in the outsourcing and offshoring of work; and the role of HRM in managing international mergers and acquisitions.
- Analyse how institutions and culture affect the HR practices and employment relations in diverse global corporations from advanced and emerging market countries.
- Analyse the challenges faced by global corporations in structuring global assignments with specific reference to global mobility (expatriation and repatriation of global managers), and how corporations are dealing with global talent management.
- Taking a global value chain approach, examine how global firms extend their HRM/ER policies to their supply chain, and evaluate the efficacy of methods to improve labour standards and human rights in global supply chains.

Teaching: 11 hours of lectures and 20 hours of seminars in the LT. Teaching will be supplemented by guest lectures from leading industry practitioners. These are optional but highly recommended. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: During the first week of classes, students will be instructed in the art of case analysis, and will be instructed as to what is required in case memos. Students may elect to write case memos for Week 2, which will be unassessed, but instructors will provide collective feedback.

A formative take-home case analysis will be given in Week 4, which will be graded during the reading week and written feedback provided by the marker. This case analysis is a time-limited project that requires an analysis of the case problem, a solution to the case, and a statement of broad take-aways (anchored in either practice or theoretical literature). In particular, students should be able to articulate what are the key lessons from the case for HR theory and practice. The case will be made available to the students on Monday morning of Week 4. The deadline for submission will be Friday afternoon of Week 4 at 4pm.

The objective of the case analysis is to develop students' ability to analyse concrete company experiences in order to generate insights for both the practice of HRM in global companies and the development of new theory.

Indicative reading: Harzing, A-W. and Ruysseveldt, J.V. (2004) *International Human Resource Management*, Second Edition. London: Sage Publications.
Rubery, J. and D. Grimshaw (2003) *The organization of employment: An International Perspective*. Houndmills, Basingstoke, Hampshire, NY: Palgrave MacMillan.
Cattaneo, O., G. Gereffi, and C. Staritz (2010) *Global Value Chains in a Postcrisis World*. The World Bank Press.
David Marsden. *A Theory of Employment Systems: Microfoundations of Societal Diversity*. Oxford University Press, 1999.

Assessment: Class participation (10%), case analysis (30%) and take home exam (60%).

For the case analysis memos, each student will be expected to provide an individual solution to the case and articulate the lessons learned from the case. The take home exam will consist of a case and a comprehensive reflective essay question.

The take home exam questions will be released to students in Week 1 of ST and will be due for submission the following week.

MG479 Half Unit**Information Systems for the Public Sector: Digital Government and Service Innovation**

This information is for the 2019/20 session.

Teacher responsible: Dr Antonio Cordella NAB3.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Strategic Communications and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Digital government and digital public sector services are the result of the widespread adoption of ICTs, Web processes and social media in public sector organisation - which cumulatively transform and may 'producize' the nature of public services delivered to citizens. This course covers the recent and likely-future major organizational and technology change processes in the government sector. Core topics include: the distinctive aspects of the public administration context for technology-enabled innovation; digital government and public sector reform; public sector ICT innovation and public value creation; the use of ICTs to streamline public services as part of wider business process changes; measuring and growing productivity via digital changes; 'digital by default' services and social media in government; and next-generation shifts to EDGE (Essentially Digital Governance).

Teaching: 20 hours of lectures, 10 hours of seminars and 4 hours of workshops in the LT.

A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

One 1000-word formative essay to be submitted in week 7.

Formative feedback is also provided on class participation with seminars based around reading and discussing selected journal articles.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the LT and ST.

MG480 Half Unit**Management of Human Resources: Strategies and Policy**

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Booth NAB4.20

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: The course examines central issues pertinent to the theory and practice of Human Resource Management (HRM). It introduces students to a range of theoretical perspectives which underpin the ways in which organisations manage the employment relationship through the deployment of HRM strategy and policy. From a practice perspective, it reviews challenges

involved in the design, implementation and evaluation of both overall HRM strategy and specific practice areas. In this respect we review HR policy and practice in the areas of recruitment and selection, job redesign, pay and rewards, training and development, employee voice and conflict, engagement, retention and attrition, performance management and appraisal, and strategic HRM.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course.

For students who have not formally studied Human Resource Management previously and/or would like an introduction to course fundamentals, we recommend the following textbook: Torrington, et al. (2017). Human Resource Management. 10th edition.

If you already have an understanding of Human Resource Management foundations, we recommend the following textbook as it encompasses more than a fundamental text: Boxall, P.; Purcell, J.; & Wright, P. (2008): The Oxford Handbook of Human Resource Management, Oxford University Press.

Additional textbooks of interest include: J Baron & D Kreps, Strategic Human Resources: Frameworks for General Managers, John Wiley, New York, 1999. Boxall, P, and Purcell, J. (2016) Strategy and human resource management. 4th ed. Palgrave.

Marsden, David (1999) A theory of employment systems, Oxford University Press.

Assessment: Exam (60%, duration: 2 hours) in the summer exam period.

Essay (40%, 1500 words) in the LT.

MG481 Half Unit

Innovating Organisational Information Technology

This information is for the 2019/20 session.

Teacher responsible: Dr Carsten Sorensen NAB 3.11 and Dr William Venters NAB 3.13

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A basic knowledge of computing, including hardware and software. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The course provides students with a practical and theoretical insight into the processes and practices of developing contemporary Information Systems. The course reflects the diversity of contemporary information systems contexts; discussing how we should manage the development of complex Internet enabled systems and services. The course focuses on new technologies and practices including cloud computing, Software as a Service, mobile and ubiquitous information technology, innovating customer relationship management, DevOps, mediating mutual adjustment and mass-scale mediated communities. The changing architectures of information systems towards an Internet based cloud are key themes of the course. Attention is however also given to the development of traditional ERP and information management systems which remain important in enterprises. The course also discusses the development challenges in small start-ups leveraging existing development platforms. Particular attention is given to problem structuring and problem

design issues within such complex settings using Soft Systems Methodology and the Unified Modeling Language as a toolkit.

Agile methods form a core part of the teaching, with Extreme Programming, Rapid Application Development and Internet-speed development contrasted with development formalism such as the Rational Unified Model and Capability Maturity Models. To ensure that students gain practical experience we include a one-week intensive "bootcamp" group Sprint project run during reading week in which outside consultants present a "real-world" case study of systems development and the groups undertake to rapidly analyse and design a proposal for a technical solution. This allows students to support their theoretical understanding with a strong practical experience of the pressures and difficulties of systems development today. The "bootcamp" group sprint project provides a realistic experience of developing systems within a consulting role, and is supported by classes and question and answer session and face to face discussion. Students gain an understanding of the benefits and difficulties of working within a small team under pressure.

Teaching: 20 hours of lectures, 5 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

8 hours of these lectures, and 5 hours of classes will occur during the "Bootcamp" Sprint week which runs during reading week (Week 6) of MT.

Formative coursework: Students discuss articles, practice systems development techniques, and critically evaluate their success. Formative feedback is provided on class participation. A mock examination, with questions from MG472, MG481 and MG487 will be held.

Indicative reading:

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the MT.

A two-hour unseen examination taken in the ST (50%). The team 'boot camp' project in Week 6 of the MT (50%).

MG482 Half Unit Innovation and Technology Management

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Liebenau NAB.5.20

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case studies.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies available on or through the course Moodle site. Formative feedback is provided on class participation. In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: JJ Howells, *The Management of Innovation and Technology*, Sage, 2005; J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006; D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998; M Bauer (Ed), *Resistance to New Technology: Nuclear Power Information Technology and Biotechnology*, CUP 1995; M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999; H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998; C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984; D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998;

Assessment: Essay (80%, 5000 words) in the LT. Presentation (20%) in the MT.

MG485 Half Unit Management and Economics of E-Business

This information is for the 2019/20 session.

Teacher responsible: Dr Stephen Smithson NAB3.31 and Dr Antonio Cordella NAB3.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: None, but a basic understanding of information systems within organisational contexts is assumed. Students are expected to have a basic understanding of the challenges of implementing and managing information systems in organisations.

Course content: The course discusses managerial, economics and innovation aspects of online business. History and foundations of online business are introduced to discuss the managerial challenges of the different e-business practices: Business-to-consumer (B2C) and Business-to-business (B2B) systems; e-marketing; intermediation; and IT in supply chain management. Economic theories, such as transaction costs and principal agent, are used to discuss the impact of e-business on market structure and organisation. The course introduces practical and management aspects of the impact of diverse technologies on interorganisational relationships, new organisational forms, such as networked organisations, and electronic markets. Strategies for e-business innovation including web 2.0 and similar developments are also discussed.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Classes are based around reading and discussing selected journal articles from the course reading list and case studies. Formative feedback is provided through class presentations and a formative essay of 1000 words on which feedback will be provided.

Indicative reading:

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

MG486 Half Unit

Social Computing, Data and Information Service

This information is for the 2019/20 session.

Teacher responsible: Dr Antonio Cordella

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is about the growing importance ordinary users assume in spinning the fabric of the Web and supporting the operations of social media platforms and networks. This social transformation of the Web that is often referred to as social computing is closely associated with the diffusion of potent lightweight technologies such as smart phones, tablet computers and wearables and the continuing development of advanced interactive software applications. It is also linked to architectural and other software-based innovations that help construct interoperable information systems and infrastructures. Taken together, these trends set the stage for the transition from a transaction-based Web (e.g. buying items) to a Web in which online interaction, talk and communication become the backbone activities for the production of data that are variously used by social media platforms to generate economic value.

In this context, social media platforms emerge as key entities that mark the social transformation of the Web and the production of services that accommodate a great deal of stakeholders, such as platform owners, platform users and third parties such as advertisers and digital analytics companies. The course deals with the ways by which social media platforms operate as business organizations by analysing how they engineer user participation to produce a computable data footprint that is subsequently used to develop a range of data-based resources and services. In the current Web, many of these services drive the establishment of links between different platforms and the creation of large inter-platform ecosystems for sharing and exchanging data. The course also shows how social media deploy personalization strategies as a means of boosting user platform engagement and generating data. Overall, the course takes a unique approach to social media by examining the data-work they perform and the innovative economic practices they promote. Social media powered networks, platforms, and ecosystems are at the heart of today's digital economy.

The course blends theories, ongoing research insights and real-life examples to analyse the social and economic implications of these significant developments.

- Explain the drives behind social computing
- Describe the technological developments and the architectural principles that govern social computing and the growing involvement of lay publics in the Web
- Link data-based practices with social systems and the digital

economy

- Explain how social media platforms operate as business organisations
- Understand the formation of ecosystems and the role they play in sustaining the operations of social media platforms and the digital economy
- Describe social media as important actors in the digital economy
- Understand personalization strategies and their implications
- Acquire critical awareness of the current digital economy and the ways it operates

Teaching: 20 hours of lectures and 9 hours of seminars in the LT.

There is a Reading Week in Week 6. There will be no teaching during this week.

Classes are based around reading and discussing selected journal articles and case studies from the course reading list.

Formative coursework: Written formative feedback is provided on the 500 words proposal for the summative essay.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the LT.

MG487 Half Unit

Innovation and Information Systems: Concepts and Perspectives

This information is for the 2019/20 session.

Teacher responsible: Prof Chrisanthi Avgerou

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Management (1 Year Programme), MSc in Media and Communications (Media and Communications Governance) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course explores the theoretical foundations for the study of digital innovation and concomitant organizational and social change. It integrates concepts and perspectives of innovation from the field of information systems and a range of

other disciplines of the social sciences. In completing this course students should be able to draw critically from existing theories in order to address issues of technology-based innovation, organizational change and information systems management. The lectures cover literature related to three broad themes: digital ecosystems; the socio-technical process of the construction of digital technologies; information technology and organizational change. For each of these themes we identify and discuss relevant theoretical concepts and perspectives. The discussion of theories is structured in terms of technical/rational and socially embedded approaches.

Teaching: 10 hours of lectures, 18 hours of seminars and 5 hours of workshops in the MT. 1 hour of lectures in the ST.

A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Seminars are based around reading and discussing selected journal articles Workshops assist students to develop their critical literature review essay, summative essay. Formative feedback is provided on seminar and workshop participation.

In addition, students will complete a formative essay of 2000 words on which feedback will be provided.

A mock examination, shared with MG472 and MG481 will be held.

Indicative reading:

- Brynjolfsson E (2010), *Wired for innovation*, Cambridge, MA, The MIT Press
- Ciborra, C (1993) *Teams, Markets, and Systems: Business Innovation and Information Technology* Cambridge, Cambridge University Press.
- Ciborra, C. (2000) *From Control to Drift: The Dynamics of Corporate Information Infrastructures* Oxford, OUP.
- Gawer, A. (ed) (2009), *Platforms, Markets and Innovation*, Cheltenham, Edward Elgar.
- Latour, B. (2005) *Reassembling the Social: an Introduction to Actor-Network-Theory*. Oxford, OUP.
- Tiwana, A. (2013) *Platform Ecosystems: Aligning Architecture, Governance and Strategy*, Amsterdam, Elsevier.
- Willcocks, L., and Mingers, J. (2004) *Social Theory and Philosophy for Information Systems*, Chichester, Wiley.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (50%, 3000 words) in the MT.

MG488A

GMiM Capstone Course - Management in Action

This information is for the 2019/20 session.

Teacher responsible: Dr Emma Soane NAB4.02 and Dr Rebecca Newton

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The GMiM Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the Global Master's in Management's first and second years.

The MG488A programme comprises ten Capstone lectures throughout the first year. Capstone lectures run fortnightly in MT and LT, and will include sessions led by the course teachers and guest speakers from a range of organisations. Lectures will cover a range of topics such as leadership, strategy and entrepreneurship. Each lecture will contribute to the overall goal of achieving a deeper understanding of how to apply theory to organisational practice.

The remaining five sessions per term comprise optional one to one meetings with a member of the Capstone team from the

Department of Management to discuss issues relating to Capstone lectures. In addition to attending sessions, in the first year, each student is assigned to a group of approximately 5 students.

Each group will produce a blog on one of the Capstone lecture topics. A schedule for the group blogs will be made available at the start of the first year. Each group will receive feedback on their assignment. There will also be one 30-minute session for each blog group to discuss the development of their blog with a member of the Capstone team. A schedule of blog group meetings will be made available at the start of the first year.

In the second year, students will attend sessions that will introduce the term's business projects. Students are also encouraged to attend at least one business project presentation by another team.

Second year students apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start term of students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors ("self-sponsored projects") or of developing a viable business plan for an entrepreneurial idea ("entrepreneurial business projects"), although these options must be agreed in advance with the faculty member responsible for business projects to ensure their suitability.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of help sessions in the MT. 7 hours and 30 minutes of lectures and 5 hours of help sessions in the LT.

GMiM Capstone Lectures run once a fortnight throughout the Michaelmas and Lent Terms. First year students are expected to attend all sessions. Second year students may choose to attend sessions.

Additionally there is a 60 minute Q&A session in Lent Term to help students prepare for their assignments.

Students on this course will have a reading week in Week 6 of MT and week 6 of LT, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will produce an individual essay which considers the links between theory and practice. Essay titles will be made available in MT of the first year. Essays will be submitted in LT of the first year.

Indicative reading: Recommended readings will be provided for Capstone lectures when relevant.

Assessment: Essay (25%, 2000 words) in the MT.

Project (65%) and class participation (10%) in the MT and LT.

Attendance at Capstone lectures - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2 students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

Group Business Project - 65 % of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Presentations for students working on their business projects in MT take place during LT. Presentations for students working on

their business projects in the LT take place during the first week of ST.

MG488B Half Unit

GMiM Capstone Course - Management in Action

This information is for the 2019/20 session.

Teacher responsible: Dr Emma Soane NAB.4.02 and Dr Rebecca Newton

Availability: This course is compulsory on the Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is available on the Global MSc in Management. This course is not available as an outside option.

Pre-requisites: Students must have completed GMiM Capstone Course - Management in Action (MG488A).

Course content: The GMiM Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the Global Master's in Management's first and second years.

First year students are prepared for MG488B by attending MG488A sessions during the first year of the programme. The MG488A programme comprises five speaker-led sessions for each of MT and LT. The remaining five sessions per term can be used by students to have one to one meetings with a Careers Consultant or a member of the Capstone team from the Department of Management. Second year students are welcome to attend MG488A sessions.

Second year students in MG488B apply the theoretical knowledge and business management skills gained in the first year by working on a business project. This takes place in either MT or LT and culminates in a presentation by each project team to their company sponsors, LSE faculty and student peer group. At the start term of students will be allocated to a client project team, typically comprising 5 or 6 students, supported by a sponsoring executive and a faculty coach, to carry out research on a business question posed by the client company. The actual topic is for the sponsoring organisation to decide and questions have historically been very diverse.

Students have the option of proposing companies as business project company sponsors ("self-sponsored projects") or of developing a viable business plan for an entrepreneurial idea ("entrepreneurial business projects"), although these options must be agreed in advance with the faculty member responsible for business projects to ensure their suitability.

Teaching: 7 hours and 30 minutes of lectures and 5 hours of help sessions in the MT. 7 hours and 30 minutes of lectures and 5 hours of help sessions in the LT.

GMiM Capstone Lectures run once a fortnight throughout the Michaelmas and Lent Terms. First year students are expected to attend all sessions. Second year students may choose to attend sessions.

There are two additional introductory sessions of 60-90 minutes each in early MT and LT in which the Business Projects for that term are introduced, as well as a 60 minute Q&A session on the subject of the summative essay in LT.

Students on this course will have a reading week in week 6 of MT and week 6 of LT, in line with departmental policy.

Formative coursework: The formative assessment will have been completed in the first year in line with the MG488A course guide.

Indicative reading: Recommended readings will be provided for Capstone lectures when relevant.

Assessment: Project (65%) and class participation (10%) in the MT and LT.

Essay (25%, 2000 words) in the MT.

Attendance at Capstone lectures - 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session

activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2 students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in LT of the first year. Essays must consider application of management theory and practice. Students will submit their essays in MT of the second year.

Group Business Project - 65 % of total course marks. All business projects take place during the second year of study. Business projects are assessed on a group basis under three headings: quality of group presentation; quality of research (including application of theoretical concepts); quality of outcomes (recommendations and solutions) and other deliverables. Presentations for students working on their business projects in MT take place during LT. Presentations for students working on their business projects in the LT take place during the first week of ST.

MG492 Half Unit

Data Governance: Privacy, Openness and Transparency

This information is for the 2019/20 session.

Teacher responsible: Dr Edgar Whitley NAB3.32

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides a detailed consideration of the key elements of the concept of informational privacy, the open data movement and transparency. These topics lie at the intersection of diverse contemporary issues including, public sector reform, human rights, digital ecosystems and social networking, and the global and national regulation of business. The course content is international in focus, and reviews contemporary issues arising from new technologies, new policies of governments, new practices and business models in the private sector. Topics include personal privacy and identity systems; motivations for information sharing and transparency and its potential for driving beneficial change; transformations in the management of government information and processing practices; the technological and regulatory challenges faced by public sector and business; the protection of sensitive personal data including medical and financial information; data-mining in the context of national security and anti-terrorism policies; communications surveillance policies; behavioural studies of privacy attitudes and the evolution of trust and consent in online environments. The course enables students to develop their understanding of the challenges presented by new informational regimes, their regulatory development and emerging governance structures.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place during Week 6. There will be no teaching during this week.

Formative coursework: Classes are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students will complete a formative essay plan on which feedback will be provided.

Indicative reading:

- Elliot, M., Mackey, E., O'Hara, K., and Tudor, C. (2016). The anonymization decision-making framework, UKAN Manchester (available at <http://ukanon.net/ukan-resources/ukan-decision-making-framework/>).
- ENISA (2015). Privacy and Data Protection by Design, (available at

<http://www.enisa.europa.eu/activities/identity-and-trust/library/deliverables/privacy-and-data-protection-by-design>).

- Janssen, M., Charalabidis, Y., and Zuiderwijk, A. (2012). Benefits, Adoption Barriers and Myths of Open Data and Open Government, *Information Systems Management* 29(4), 258–268.
- Kaye, J., Whitley, E. A., Lund, D., Morrison, M., Teare, H., and Melham, K. (2014). Dynamic Consent – A Patient Interface for 21st Century Research Networks, *European Journal of Human Genetics* 23(2), 141–146.
- Murray, A. (2010). Chapter 18: Data protection, in *Information technology law: the law and society*, Oxford University Press Oxford
- Solove, D. J. (2008). Privacy: A concept in disarray, in *Understanding privacy*, Harvard University Press Cambridge, Mass., 1–11
- Whitley, E. A., Gal, U., and Kjærgaard, A. (2014). Who do you think you are? A review of the complex interplay between information systems, identification and identity, *European Journal of Information Systems* 23(1), 17–35.

Assessment: Coursework (20%, 800 words) and essay (70%, 5000 words).

Class participation (10%) in the LT.

10% class participation.

20% 800 word "blog" article that summarises the key argument of the research essay.

70% 5000 word research essay on an approved topic.

MG493

Dissertation

This information is for the 2019/20 session.

Teacher responsible: Various

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: This course consists of an academic dissertation in which students explore a research question that is grounded in the academic literature. While students will be assigned a dissertation supervisor, the supervisor will only provide guidance as needed – students are expected to take the lead and demonstrate their ability to conduct independent research. Students can also apply for a Links project and, if accepted, will conduct research on an HR question posed by the Links sponsor. More information about Links projects will be provided in class.

Teaching: 12 hours of lectures in the MT. 4 hours of lectures in the LT. 12 hours of lectures in the MT during Weeks 1 to 4 inclusive.

Lectures will explain dissertation requirements and expectations. 4 hours of lectures in LT will introduce students to quantitative and qualitative research methods. Students will be expected to work independently on preparing a dissertation proposal, to be submitted at the end of MT. Supervisors will be assigned during the first few weeks of LT.

Formative coursework: Students will work with their dissertation supervisors in order to gauge their progress.

Indicative reading: Students will be instructed on how to conduct literature searches in order to find readings relevant to their research project.

Assessment: Dissertation (100%).

MG496

Study Skills and Research Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Stephen Smithson NAB3.31

Availability: This course is compulsory on the MSc in

Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: This course provides students with both a broader context for the study of information systems as well as the essential skills relevant to the MISDI programme.

Various views of the changing nature and environment of information technology. Research and study skills, team working and other practical skills. Guidance for the dissertation. Seminars by various visiting speakers from academia and industry who discuss a wide range of issues relevant to contemporary information systems.

Teaching: 20 hours of lectures in the MT.

Indicative reading: T Cornford & S Smithson, *Project Research in Information Systems*, Macmillan, 2nd edn, 2005.

Other books and journal articles will be recommended.

Assessment: The course is not formally assessed.

MG497 Half Unit

Dissertation: MSc Management and Strategy

This information is for the 2019/20 session.

Teacher responsible: Dr Jorn Rothe NAB5.01

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Course content: The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a dissertation advisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

Teaching: There will be an introductory meeting, which will set out the requirements for the dissertation, the process, caution of plagiarism, etc. After this meeting students are welcome to approach staff with preliminary ideas in one-to-one meetings.

Formative coursework: Students will receive feedback on a preliminary proposal (to be submitted by the end of Michaelmas Term) and will be allocated a dissertation advisor, under whose guidance they will complete a detailed project proposal by the end of Lent Term. Students work on their dissertation over the summer, with supervision available until the end of the Summer Term.

Assessment: Dissertation (100%, 6000 words) post-summer term.

MG4A1

Introduction to Studying for GMiM

This information is for the 2019/20 session.

Teacher responsible: Prof Alexander Pepper NAB 4.30

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The course is divided into three subject areas: Statistics (as preparation for Research Methods in Global Management), Quantitative skills for Postgraduates, and Writing Skills for Postgraduates.

The Statistics course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression.

Students in the final portion of the course can opt for one of two options: Quantitative Skills, or Writing Skills for Postgraduates.

The Quantitative portion of the course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Natural Logarithm, Comparative Statics Analysis. The Writing Skills sessions are intended to help students who have backgrounds outside the social sciences and humanities make the transition to postgraduate work. Topics covered will include

identifying and making an argument and the fundamentals of essay writing.

Teaching: 20 hours of lectures in the two weeks prior to the Michaelmas Term. There will also be some workshops and tutorial sessions for the statistics portion of the course, to support students preparing practical exercises. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

Indicative reading: Statistics:

- Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoemith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning.
- Huff (1991). *How to Lie with Statistics*. Penguin.

Quantitative Skills:

- Hammond, P. and Sydsaeter, K. (2002). *Essential Mathematics for Economic Analysis*. Prentice Hall; and Jacques, I. (2010). *Mathematics for Economics and Business*. (7th edition), Pearson.

Writing skills:

- Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

Assessment: No formal assessment. Students will sit a mock exam at the end of the statistics course based upon the material to aid learning .

MG4A2 Half Unit

Operational Research and Decision Science in Practice

This information is for the 2019/20 session.

Teacher responsible: Prof Lawrence Phillips and Prof Jonathan Rosenhead

Availability: This course is available on the MSc in Management Science (Decision Sciences). This course is not available as an outside option.

Course content: This course focuses on the key skills needed to be an effective practitioner in Operational Research (OR) and Decision Sciences (DS), and the structured approaches available for formulating (as opposed to solving) problems of complexity, uncertainty and conflict. It is designed to complement the technical methods introduced in the operational research and decision science compulsory courses with both facilitation and process skills, and methods for handling 'wicked' problems. Students will acquire an appreciation of the different conditions under which OR & DS applications take place in practice, and the skills and methods that are needed to make effective interventions in the decision making of organisations. The history and development of OR & DS, as well as its current practice, will be examined to identify key issues affecting the practice of OR & DS and the role of the OR and DS consultant. Students will identify different kinds of organisation in which OR & DS make important contributions. The structure of these organisations will be studied together with organisational behaviours. The nature of decision making at both the strategic and operational levels will be examined. Students will be provided with an opportunity to explore their own work preferences enabling them to understand how they can best contribute to a work group so it becomes a high-performing team. Students will be introduced to the range of participative problem structuring methods appropriate to problem situations with multiple stakeholders facing uncertainty and conflicting objectives. These methods are aimed at developing a shared view of the problem among the clients, and a joint commitment to action. Students will have opportunities to develop their skills in problem structuring, and to identify the contributions that they can make when working in teams as well as individually.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 1 hour of lectures in the ST.

Formative coursework: There will be opportunities in MT to provide answers to test examination questions.

Indicative reading: *Rational Analysis for a Problematic World Revisited*. Rosenhead & Mingers, Wiley, 2001

Process Consultation Revisited: Building the Helping Relationship. Schein, Reading, MA: Addison-Wesley, 1999

Additional reading matter will be issued for specific sessions.

Assessment: Exam (80%, duration: 2 hours) in the summer exam period.

Essay (20%, 2500 words) in the ST.

MG4A3 Half Unit

Incentives and Governance in Organisations

This information is for the 2019/20 session.

Teacher responsible: Dr Catherine Thomas

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of Mathematics and Economics.

Course content: The course uses economic theory to gain insight into issues related to internal organisation, structure, and management of firms. The course will draw on various fields including management science, industrial organisation and microeconomics.

The course deals with three main topics:

- the provision of incentives in organisations;
- the use of information in markets and firms; and
- the relationship between corporate finance and organisational decisions.

A major theme concerns the question of how to provide incentives efficiently in organisations. Other important themes include efficiency, coordination, incompleteness of contracts and the use of the market versus internal exchange. A section of the course deals with capital structure. The implications of asymmetric information are examined. Corporate governance is discussed in a principal-agent framework.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading: Main texts:

- Roberts J (2004), *The Modern Firm. Organizational Design for Performance and Growth*, Oxford University Press, UK;
- Brealey, RS, Myers, and F Allen (2006), *Corporate Finance*, 8th edition (older editions are fine too);
- McGraw-Hill International Edition (US edition is titled "principles of corporate finance"; older versions by Brealey and Myers only).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A5 Half Unit

The Analysis of Strategy A

This information is for the 2019/20 session.

Teacher responsible: Dr Kristof Madarasz NAB.5.05

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Course content: The objective of the two courses (A and B) is to provide students with a critical appreciation of behavioural economics and game theory relevant for strategic management. These two courses will help students to understand how

managers in the real world ought to read situations from an economic and strategic angle. Attention will be given to conceptual underpinnings.

The course focuses on decision making in individual and strategic settings also through the lens of behavioural economics. It is an amalgam of insights from economics, game theory, and strategic management. Some lectures will discuss key aspects of choice under uncertainty, risk perceptions, choice over time, and the social aspects of value. A powerful tool to study strategic situations is game theory. Lectures will then also be devoted to developing the basic concepts of game theory including Nash and sub-game-perfect Nash equilibrium. These issues will be deepened further in the accompanying seminars.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading: D Besanko, D Dranove & M Shanley, *Economics of Strategy*, John Wiley, 6th Edition.; A Dixit & B Nalebuff, *Thinking Strategically: The Competitive Edge in Business, Politics and Everyday Life*, Norton, 1998;; J Roberts, *The Modern Firm: Organizational Design for Performance and Growth*, OUP 2007; Angner, E, *Behavioural Economics*, 2nd edition, 2016.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A6 Half Unit

The Analysis of Strategy B

This information is for the 2019/20 session.

Teacher responsible: Dr Jorn Rothe NAB5.01

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Pre-requisites: Students must have completed The Analysis of Strategy A (MG4A5).

Course content: In this course we continue, deepen and extend the analysis of strategy. The success of a firm depends on the decisions it makes, and these decisions have to take the behaviour of competitors into account who themselves try to make optimal decisions. Thus the firm faces a problem of strategic interaction, and game theory takes this interaction consistently into account. This course aims at a strategic understanding of these situations and the decisions firms face. We will study general principles of strategic thinking, the application of these principles to specific problems and general conclusions we can draw in these situations. This part of the course focuses on the strategic aspects of competing against other firms within the same industry. We start by analysing market structure and various dimensions of competition - pricing, capacity choices, research and development and advertising. We will then discuss different aspects of strategic commitment and the commitment aspects of pricing, investment and financing decisions. We then focus on the dynamic aspect of pricing rivalry, in particular collusion and price wars. We will finally discuss the incentives for innovation and market entry and exit decisions. Our approach will emphasise both the power and the limits of a game-theoretic approach. We will use simple models to clarify the logic of strategic reasoning, and case studies to illustrate the link between the analysis of strategy and managerial decision making.

Teaching: 20 hours of lectures and 8 hours of seminars in the LT. 2 hours of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading: There is no fully adequate textbook for this course.

The most important text is D Besanko, D Dranove & M Shanley and S Schaefer, *The Economics of Strategy*, John Wiley (6th edition, 2012). Among the other sources are: L M B Cabral, *Introduction to Industrial Organization*, MIT Press (2000); P Ghemawat, *Games Businesses Play: Cases and Models*, MIT Press (1997); D M Kreps,

Game Theory and Economic Modelling, Clarendon Press (1990); J Sutton, *Technology and Market Structure*, MIT Press (1998). A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A8 Half Unit

Strategy for the Information Economy

This information is for the 2019/20 session.

Teacher responsible: Dr Jorn Rothe

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge of economics.

Course content: The internet has created many new market opportunities. Web-based technology allows for new kinds of market interactions and products. Understanding the design and functioning of these new markets is central for business strategy. This course develops the relevant economic principles and applies them to the formulation of strategies for the provision of information goods and the competition between online market platforms.

The first part of the course is concerned with strategic aspects of the provision of information goods (such as music, software, product reviews, search results). Topics include the pricing of information goods, versioning, switching costs lock-ins, standards and network effects, and the strategic competition in platform markets. The second part focuses on the design and application of online auctions in market design for e-commerce, in particular Google's use of auctions in search-based advertising. The course provides a theoretical background and relates theory to various examples and case-studies.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Two exercise sets with a mixture of qualitative and quantitative questions.

Indicative reading: Hal R. Varian: *Intermediate Microeconomics*, W.W.Norton, 2014 (selected chapters); Carl Shapiro and Hal R. Varian: *Information Rules*, HBS Press, 1999 (selected chapters). A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4A9 Half Unit

Foundations of Business and Management for Human Resources

This information is for the 2019/20 session.

Teacher responsible: Dr Kathryn Hartwell NAB 4.29

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: A basic grounding in the key management disciplines for students specialising in Human Resource Management. The aim of the course is for students to acquire a

general understanding of the business and managerial context in which human resource management takes place.

Course contents include management theory, theory of the firm, business strategy, accounting and finance. Successful students will become intelligent discussion partners on these subjects and critical readers of financial information and the financial press.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 3 hours of lectures and 3 hours of seminars in the ST. Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: One formative assignment of 750 words: preparation of a detailed essay plan in preparation for summative assignment.

Indicative reading: G. Pearson, *The Rise and Fall of Management*, Gower Publishing, 2009. Wren & A.G. Bedeian, *The Evolution of Management Thought*, 6th Edition, Wiley 2009. Atrill, P. & McLaney, E (2015) *Accounting & Finance for Non-Specialists*. Ninth Edition. Pearson. Boakes, K, *Reading and Understanding the Financial Times*. Second Edition. Prentice Hall, 2010. Willman, P. (2014) *Understanding Management - the Social Science Foundations*. Oxford University Press.

Assessment: Exam (50%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Essay (50%, 2000 words) in the LT.

MG4B3 Half Unit

International Marketing: A Strategic Approach

This information is for the 2019/20 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Management and Strategy, MSc in Operations Research & Analytics, MSc in Social Innovation and Entrepreneurship and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of a simulated case study to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the MT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Indicative reading:

- Baker, M. J. and Saren, M. (eds.) (2014) *Marketing theory: a student text*. SAGE Publications Ltd. (2nd Edition).

• Lambin, J-J, Chumpitaz, R. & Schuilng, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan

Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (50%), group project (40%) and class participation (10%) in the MT.

The group project is a non-assessed presentation and an assessed project report of 2,500 word max.

The Individual take home assignment is to be completed in 1 week at the end of the course.

MG4B6 Half Unit

Design and Management of Organisations

This information is for the 2019/20 session.

Teacher responsible: Prof Yona Rubinstein NAB 5.31

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In this course we investigate aspects of management and the internal organisation of the firm from birth to end.

What makes a successful entrepreneur? Are managers subject to human biases in decision making?

Our starting point is that entrepreneurs and managers are human.

We neglect neither general heuristics nor biases exhibited by individuals and groups and their impact on firms' performance.

We further recognise that they make decisions in situations in which information is not perfect and not symmetrically shared, neither internally with their employees nor externally. We also consider the capabilities of organisations to design management strategies to cope with that.

How can firms attract and select the 'right' employees? Can pay and promotions be structured to screen the best workers and extract their efforts? Should firms develop employees' talent and if so, how? Why do firms form teams and how these are used most effectively? Do experts follow the crowd? Why they turn to be "yes-men"? Can pay incentives be structured to motivate experts to share their private knowledge?

Design and Management of Organisations introduces students to a set of conceptual tools to cope with these key managerial challenges and critically evaluate contemporary management approaches.

The organising principle of much of the content of the course has its conceptual origins in economic strategy and behavioral economics applied to issues that are relevant to management. Additionally we draw upon findings from psychology and sociology. The course complements MG4A3 (Incentives and Governance in Organisations) but can be taken as a stand-alone course.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Students will be expected to produce 1 problem sets in the LT.

Multiple exercises will be provided throughout the term and will be discussed during lectures and review sessions. In addition a major problem set will be circulated at the end of the week 5. This problem set will be discussed in class for feedback purposes only.

Indicative reading: The first set of slides will be provided during lecture 1 and subsequent sets will be posted online. These slides constitute the backbone of the course. You are expected to flesh

out the slides using models, graphs, and examples discussed during the lectures.

Additional readings:

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4B7 Half Unit

Organisational Change

This information is for the 2019/20 session.

Teacher responsible: Dr James Woodcock

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Development Management, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course adopts a psychological framework to explore the content, process and outcomes of organisational change. The aim of the course is to provide students with different psychological theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organisational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analyzing and diagnosing change; the role of the change agent, leading change from the top, bottom up change specific interventions; strategies of change; a justice perspective on organisational change; understanding recipients reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions.

Teaching: 21 hours of lectures and 12 hours of seminars in the LT. 5 hours of lectures and 1 hour and 30 minutes of seminars in the

ST.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their syndicate group throughout the year. The course is demanding of students and depends partly upon commitment and willingness to participate fully. The course is taught in the LT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will take part in a mock exam in the LT.

Indicative reading: The course relies heavily on journal articles (for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behaviour*, and *Journal of Applied Behavioural Science*) and the use of case studies. The following book is also useful: Oreg, S., Michel, A., & By, T. B., (Eds.) (2013), *The psychology of organizational change: Viewing change from the employee's perspective*, Cambridge University Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4B9 Half Unit

The World Trading System

This information is for the 2019/20 session.

Teacher responsible: Dr Veronica Rappoport NAB 5.29

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Management, MSc in Management and Strategy and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic Knowledge of Mathematics and Economics

Course content: The course studies a key component of the "globalization" process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international economy and overview of their causes and effects. The sources of international trade. Trade barriers - restrictions to international trade and their consequences. The economics and politics of international trade agreements. The rules, accomplishments and shortcomings of the GATT/WTO system. Regional trade agreements - motivation, implications, and recent trends. The costs and benefits from exporting for individual firms. Challenges and opportunities for national and multinational firms in the global economy.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: In-class exercises.

Indicative reading:

- Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008.
- Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004.
- The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.
- Bernard M. Hoekman, Aaditya Mattoo, Philip English (editors), "Development, Trade, and the WTO: A Handbook," World Bank,

2002.

- Andrew Bernard, J. Bradford Jensen, Stephen Redding and Peter Schott, Firms in International Trade, *Journal of Economic Perspectives* 21(3), 105-130, 2007.

Assessment: Coursework (50%), class participation (10%) and group assignment (40%) in the LT.

The assessment consists of Group assignments (40%), Peer evaluation and class participation (10%) and an individual assignment during the last week of the term (50%).

MG4C2 Half Unit Organisational Behaviour

This information is for the 2019/20 session.

Teacher responsible: Dr Hyun-Jung Lee NAB4.15

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the CEMS Exchange, MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available in the Michaelmas Term only.

Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we primarily take a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence.

Key topics include: personality and individual differences, work motivation, decision-making, power, leadership, group processes and organisational culture.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.

Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: The course relies heavily on journal articles (from, for example, *Academy of Management Journal*, *Journal of Applied Psychology*, *Journal of Organizational Behavior*). An extensive reading list is provided at the start of the course. No suitable textbook exists but students may wish to consult one of the following: Kolb, D. A., Osland, J. S., & Rubin, I. M. (2007). *The Organizational Behavior Reader* (8th ed.). Pearson Porter, L. W., Bigley, G. A., & Steers, R. M. (2002). *Motivation and work behavior* (7th ed.). McGraw-Hill. Staw, B. M (2004). *Psychological dimensions of organizational behavior* (3rd ed.), Prentice-Hall.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG4C3 Half Unit

Information Technology and Service Innovation

This information is for the 2019/20 session.

Teacher responsible: Dr Carsten Sorensen

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MRes/PhD in Management (Information Systems and Innovation), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is limited to 60 students.

Course content: The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary digital technology (IT). The course relates the diversity of the design challenges facing contemporary IT development. It embraces the shifting conditions for small teams of developers to design significant services in the context of technology-based startups, or as part of entrepreneurship within an existing enterprise or public institution. The design challenges relate to constantly shifting possibilities, for example, for the capture and processing of digital data previously beyond reach, the ability to leverage existing boundary resources (APIs, SDKs etc), and the expanding possibilities for reaching end-users in new ways. The course is constructed as the meeting of theory and practice. The former is constituted by the presentation and discussion of theoretical themes aimed at sharpening the student's ability to reason fundamentally about contemporary design challenges and opportunities. This aspect is also examined through an individual essay. The practical design skills are primarily honed through a group design project running throughout the course. Conducting this group design project will engage students in highly detailed and constructive design discussions leading to the submission of a designed IT artifact. The practical design skills sought practiced in the course are related to but largely independent from skills solely aimed at setting and analysing requirements on the one hand, and expressing the design through programming, on the other. The course, therefore neither requires, nor teaches detailed programming techniques, but instead focuses on teaching design skills through practices and to sensitise these design skills through the discussion of pertinent theoretical themes. These themes take their outset in the increasing complexity of designing IT artifacts as the granularity of technology and data capture is decreasing to enable increasing tracking of more and more granular aspects of human activities. These relate to a variety of personal-, local-, and global communications infrastructures, as well as a variety of possible multi-sided platforms, and software middleware layers enabling rapid prototyping of complex designs. Topics addressed will be: Digital infrastructure innovation; Digital platform strategies; Designing technology affordance diversity; Understanding technology performances; Individual interaction intimacy; Amplified teams; The technological organisation; Global crowd innovation with IT; Global technology innovation tussles; Business innovation with information technology; and decentralised consensus arrangements through blockchains and cryptoassets. The weekly seminars will consist of presentations and discussions offering students opportunity to critically reflect on theoretical and pragmatic issues related to the subject matter of the course, such as; the IT artifact and ecosystem, the role of IT in business innovation, understanding the paradoxes of technology performances, intimate technology experiences, IT mediated team-working, the IT-enabled organisation, innovating global IT mediated crowds, innovation as organisational tussles, and the role of IT-based innovation for business development.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. A reading week will take place in W6. There will be no teaching during this week.

Formative coursework: Classes are based around both the design

group projects, as well as reading and discussing selected journal articles. Formative feedback is provided on class participation.

Indicative reading:

Assessment: Project (50%) and coursework (50%).

The course has two summative elements: an individual essay (50%), and from the group design project, a technical report and a separate submission of a designed artefact jointly comprise one summative component (50%).

MG4D2 Half Unit

International Employment Relations

This information is for the 2019/20 session.

Teacher responsible: Dr Chunyun Li, NAB.3.18

Availability: This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management). This course is available

on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A general knowledge of the social sciences is required.

Course content: The course aims to provide an introduction to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. It will introduce the dynamics of employment relations across the increasingly global markets, the key concepts and topics surrounding it (such as employee voice, dignity of work, outsourcing, labour conflicts, labour productivity, skills), and the theories required to understand it. The strategies and policies of the main actors will be explored through cross-national comparative analysis. The course will also introduce the main 'models' of employment relations: the US/British, Japanese and European Social Models, as well as models of employment relations in the transitional economies.

The aim of the classes will be to provide an introduction to the comparative analysis of employment relations in a global world. It also ensures that students have both the conceptual and empirical grounding they need to take the options offered in international comparative human resource management and cross-cultural management.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students and depends for its success partly upon their commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to submit an essay outline in Week 4, matching the topic of their first summative essay.

Indicative reading: C Frege & J Kelly (Eds) *Comparative Employment Relations in the Global Economy*, Routledge, 2013; G Bamber, R Lansbury & N Wailes (Eds), *International and Comparative Employment Relations*, 5th edn, Sage, 2011; R Hyman, *Understanding European Trade Unionism: Between Market, Class and Society*, Sage, 2001; M J Morley, P Gunnigle & DG Collings (Eds), *Global Industrial Relations*, Routledge, 2006.

Assessment: Essay (40%, 2500 words) in the MT.

Essay (50%, 2500 words) in the LT.

Class participation (10%).

MG4D3 Half Unit

The Dark Side of the Organisation

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Booth NAB4.20

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Introductory OB course required. MG4C2, MG434, MG105, or equivalent course in another institution. Students will be required to write a paragraph about their motivation for taking this course.

Course content: In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g. workplace aggression, retaliation, discrimination, substance abuse, corporate corruption, extreme stakeholder responses to organisations, and the dark side of impression management/emotional intelligence). In organisational behaviour courses, topics generally cover the 'light side' of the organisation and often explore how employee motivation and behaviour can promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all workplace behaviours and outcomes are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences.

Teaching: 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Anand, V, Ashforth, B. E., & Joshi, M. 2005. Business as usual: The acceptance and perpetuation of corruption in organizations. *Academy of Management Executive*, 19, 9-23. Vaughan, D. 1999. The dark side of organizations: Mistake, misconduct, and disaster. *Annual Review of Sociology*, 25, 271-305.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Essay (35%, 2000 words) and class participation (15%).

MG4D4 Half Unit

Cross Cultural Management

This information is for the 2019/20 session.

Teacher responsible: Dr Hyun-Jung Lee NAB4.15

Availability: This course is available on the MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some background in psychology and organisational behaviour, and/or international business is useful, but not required.

Course content: The ability to communicate cross-culturally and to understand the diverse perspectives of people from different cultures is a necessity in order to achieve a competitive advantage in the global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as opportunities in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions.

Topics include i) understanding my own and others' cultural conditioning, ii) analytical frameworks of cross-cultural comparisons, iii) multicultural teams, iv) managing global organisations, v) ethical dilemmas and global responsibility of multinational corporations, vi) cross-cultural communication and negotiation, vii) global leadership and cultural intelligence, viii) international assignments and global careers.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Experiential learning is emphasised and team working is an integral part of the course. The teaching is highly participative. Students will be asked to make presentations and participate in various class exercises including role playing. The course is demanding of students and success depends partly upon student commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: The following reading list contains some easily accessible introductory discussions. Most of the course reading is taken from journals.

A. full reading list will be issued at the start of the course.

B. Gehrke and M-T. Claes (eds.)(2014), *Global leadership practices: A cross cultural management perspective*, Palgrave Macmillan
R. Steers et al.(2016), *Management across cultures*, Cambridge University Press; R Nisbett (2003), *The geography of thought*, Nicholas Brealey Publishing

Assessment: Essay (50%), project (40%) and class participation (10%).

The essay is completed individually, and the project is completed as part of a group.

MG4D7 Half Unit

Dissertation: MSc MISDI

This information is for the 2019/20 session.

Teacher responsible: All members involved with MSc MISDI are involved in dissertation support.

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This

course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or qualitative, theoretically informed, piece of research of IS-related questions. Students must obtain the approval of their advisor before embarking on any research. The course MG496 Study Skills and Research Methods and the course MY401 on research design provide guidance and background material on undertaking dissertation work.

Arrangements for supervision:

Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will help the student identify an appropriate research question, and to work out a plan for a literature informed empirical study.

Teaching: Two courses prepare students for the dissertation: MY401 Research Design for Studies in Digital Innovation and MG496: Study Skills and Research Methods. Students must follow both of these courses.

Formative coursework: Students will use the feedback to the summative essay of the MY401 course as a starting point for their dissertation research. They will also present their research topic and research design at a workshop in mid-June and get feedback from fellow students and faculty.

Assessment: Dissertation (100%, 8000 words) post-summer term. Two paper copies of the dissertation must be handed in on a specified date in late August. An electronic version of the dissertation must also be submitted. Penalties will be applied to any late submission. The word limit for the dissertation is 8000 words. The dissertation is critical to assessment on the programme.

MG4E2 Half Unit Marketing Management

This information is for the 2019/20 session.

Teacher responsible: Dr Haider Ali

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange) and MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the MT. 2 hours of seminars in the ST.

Course instruction will be conducted using lectures, case discussions, readings, and analysis of data.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

The formative will be undertaken by students in teams. The formative will comprise the plans that teams have formulated for the summative project together with their rationale. As a result the formative will provide a foundation for the summative project and also help students practice the use of marketing theory, a skill that will be very useful for the exam.

Further references, especially for journal articles and case studies, will be provided at the commencement of the course.

Assessment: Exam (45%, duration: 3 hours) in the summer exam period.

Project (45%) in the MT.

Class participation (10%).

MG4E7 Business Fundamentals

This information is for the 2019/20 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13 and Prof Om Narasimhan NAB 5.06

Availability: This course is compulsory on the MSc in Marketing.

This course is not available as an outside option.

This is a non-assessed introductory course.

Course content: The aim of the introductory Core is to deliver some critical business prerequisites to incoming MSc Marketing students. Broadly, there will be four kinds of course materials covered during these two weeks: (1) Some modules are intended to strengthen participants' analytical skills. These modules comprise sessions on microeconomics/business economics that enables participants to analyze firms and markets in more depth, and sessions that impart basic knowledge in analytics/statistics that is becoming absolutely essential in the current age of Big Data; (2) Some other modules will expose participants to the fundamentals of other functional areas like Accounting, Finance, & Controls, Leadership, Organizational Behavior, and Team Building; (3) Some modules will look deeper into one of the fundamental skills that marketing managers try to hone—understanding and eliciting consumer insights; and finally, (4) The remaining modules will assist in career planning, coaching for marketing problem solving (e.g., as is common in consulting and/or case study-based interviews), with a broad understanding of the numerous options for internships, employment, companies, functions, and roles.

Teaching: 10 hours of teaching over one week prior to the Michaelmas Term. Full details of this will be sent to offer holders as part of their offer pack. The schedule will also include a full programme of activities and talks designed to welcome you to the LSE and the MSc Marketing programme.

Formative coursework: No formal assessment.

Indicative reading: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning. Huff (1991). *How to Lie with Statistics*. Penguin. Accounting: Boakes, K. (2010). *Reading and Understanding the Financial Times*. (2nd edition), Harlow: FR Prentice Hall; and Parker, R. (2007). *Understanding Company Financial Statements*. (6th edition), London: Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). *Essential Mathematics for Economic*

Analysis. Prentice Hall; and Jacques, I. (2010). Mathematics for Economics and Business. (7th edition), Pearson. Writing skills: Wallace, M. and Wray, A. (2011). Critical Reading and Writing for Undergraduates (2nd edition), London: Sage.

Assessment: No formal assessment.

MG4E8 Half Unit Principles of Marketing

This information is for the 2019/20 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Pre-requisites: Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies and data analysis to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of lectures in the MT.

Indicative reading:

- Alex Chernev (2011), Strategic Marketing Management (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), Principles of Marketing (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), Marketing Management (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), Marketing Management: A Contemporary Perspective, McGrawHill
- Jobber, D. (2010), Principles and Practice of Marketing (6th edition), McGrawHill

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Coursework (50%), project (40%) and class participation (10%) in the MT.

Group Project (40%) - a non-assessed presentation and an

assessed project report 2,500 word max

Individual take home assignment (50%)

Class participation (10%)

MG4E9 Half Unit Marketing Analytics I: Consumer Analysis Fundamentals

This information is for the 2019/20 session.

Teacher responsible: Dr Xiaolin Li

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Course content: This course lays down the foundations of Marketing Analytics which is an absolute essential in the age

of Big Data. The broad objective of this course is to provide a fundamental understanding of marketing analytics and research methods employed by well-managed firms. The course focuses on integrating problem formulation, research design, questionnaire construction, sampling, data collection and data analysis to yield the most valuable information. The course also examines the proper use of statistical applications as well as qualitative methods, with an emphasis on the interpretation and use of results. Since analytics is the discovery and communication of meaningful patterns in data, this course will also provide students with an analytics toolkit, reinforcing basic probability and statistics while throughout emphasizing the value and pitfalls of reasoning with data. Applications will focus on connections among analytical tools, data, and business decision-making. Advanced analytical tools will be discussed in-depth in the follow-up course Marketing Analytics II.

Teaching: 30 hours of lectures in the MT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading:

- Churchill, Gilbert A. Jr., and Dawn Iacobucci. Marketing Research: Methodological Foundations. 8th ed. Chicago: The Dryden Press, 2002.
- Lehmann, Donald, Market Research and Analysis, Homewood, IL: Irwin (1989)

- McQuaire, E. F. (1993), Customer Visits: Building a Better Market Focus, Newbury Park, Sage.

Assessment: Project (40%, 2500 words), class participation (10%) and take-home assessment (50%) in the MT.

The Group Project (40%) consists of a non-assessed presentation and an assessed project report 2,500 word max.

MG4F1 Half Unit Marketing Action Learning Project

This information is for the 2019/20 session.

Teacher responsible: Prof Amitav Chakravarti NAB 5.13

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Pre-requisites: Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

Course content: For the Marketing Project, each team selects a target issue for an organization and uses the marketing techniques developed in the course to arrive at a recommendation. The Marketing Project is aimed at producing an in-depth report that provides two critical classes of information: (a) Section 1 tells us how a "live" business is being run and what makes it tick (or not) from a marketing value-creation point of view, and (b) Section 2 provides data-based, scientific analysis of what the firm could do better for a more sustainable and competitive future.

Teaching: 2 hours of lectures in the LT.

One formal lecture, plus individual appointments through LT and ST with groups to discuss their chosen projects.

Indicative reading:

- Building a Marketing Plan, by Ho Yin Wong; Kylie Radel; Roshnee Ramsaran-Fowda, Harvard Business School Publishing.
- Writing Great Marketing Plans, 2005, by T. Caulkins, Kellogg's/ Northwestern University.
- The Marketing Plan Handbook Paperback – 1 Sep 2011 by Alexander Chernev

Assessment: Project (95%) in August.

Class participation (5%) in the LT and ST.

Students will undertake a peer review providing feedback on the other members of their project group.

MG4F2 Half Unit

Marketing Analytics II: Analytics for Managing Innovations, Products and Brands

This information is for the 2019/20 session.

Teacher responsible: Prof Om Narasimhan NAB.5.06

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Marketing managers make ongoing decisions about product features, prices, advertising (online and offline), distribution, sales compensation plans, and so on. In making these decisions, managers choose from among alternative courses of action in a complex and uncertain world. Increasingly, in this age of Big Data, companies that emerge as market leaders tend to be the ones that employ sophisticated Marketing Analytics. This course in Marketing Analytics will entail a deep-dive into the state-of-the-art Marketing Analytics models that allow managers to make scientific decisions regarding launching new products or innovations and managing more mature products and brands.

This course will focus upon the use of cutting-edge data analytic techniques to understand and inform managerial decision making with a primary focus on the formulation of dynamic marketing policies. The course is structured to enable the student to gain familiarity with techniques for scraping the web for data, sentiment analysis, multivariate regression, discrete choice modelling, probability models for customer management, causal inference through A/B testing, classification and regression trees, and introductory machine learning.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will be engaged in analysing a number of data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve analysing data sets given to them).

Indicative reading:

- Lilien GL, Kotler Ph, Moorthy KS. Marketing Models. Prentice Hall: Englewood Cliffs, 1992
- Leeflang PSH, Wittink DR, Wedel M, Naert PA. Building Models for Marketing Decisions. Kluwer Academic Publishers: Dordrecht / Boston 2000.
- Hanssens DM, Parsons LJ, Schultz RL. Market Response Models: Econometric and Time Serie Analysis. Kluwer Academic Publishers, Boston 2001.
- Lilien GL, Rangaswamy A. Marketing Engineering, 2nd edition. Prentice Hall: Upper Saddle River, NJ, 2003.
- Little JDC. Models and Managers: The Concept of a Decision Calculus. Management Science 1970; 16: B466-B485.

Assessment: Take-home assessment (45%), group project (45%) and class participation (10%) in the LT.

The Individual take-home assignment is due within 1 week of when it is assigned.

MG4F3 Half Unit

Digital Marketing

This information is for the 2019/20 session.

Teacher responsible: Dr Mareike Möhlmann

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: For MSc in Marketing students - completion of the first term of the programme.

For non-MSc in Marketing students - completion of either MG4B3 International Marketing: A Strategic Approach or MG4E2 Marketing Management.

Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.

Course content: Marketing is evolving from an art to a science and decisions in new media are on the forefront of this transformation.

This course is aimed at developing state-of-the-art knowledge in the area of online marketing (e.g., display ads and search ads, SEO, mobile marketing etc.) and social media (e.g., Twitter, Facebook, etc.). Furthermore, important topics of cross-cutting relevance to online marketing and social media will be addressed, including big data, data science, analytics, and integrative marketing. Many firms have extensive information about consumers' choices and how they react to marketing campaigns, but few firms have the expertise to intelligently act on such information. In this course, students will learn the scientific and strategic approach to marketing with hands-on implementation of online marketing and social media strategies (e.g., strategic design and launch of a website, implementation of SEO strategies, design and manage of a corporate social media account). Using simple yet powerful hands-on interactive models and exercises, the course will cover both theory and applications.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students have the opportunity to submit a formative coursework in the LT. The formative course work might be an in-depth case analysis of a new media company. Students might be requested to use theory and frameworks to make sense of a case. Students might also be requested reflect on analytics and conduct simple data analysis.

Indicative reading:

- Larsen and Draper (2015): Internet Marketing Essentials, Digital Textbook.
- Chaffey, D. and Ellis-Chadwick, F. (2012): Digital Marketing. Strategy, Implementation, and Practice. Pearson Education.
- Laudon, K. C. and Traver, C. G. (2015), E-Commerce 2015: Business. Technology. Society. Prentice Hall.

More readings in form of academic research papers and media outlets (e. g., The Economist) will be added for each week.

Assessment: Take-home assessment (50%), group project (40%) and class participation (10%) in the LT.

MG4F4 Half Unit

Strategy and Innovation in a Global Context

This information is for the 2019/20 session.

Teacher responsible: Dr Lourdes Sosa NAB 5.19

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course focuses on understanding the drivers of differences in profitability among firms in our economy, both in the short and long term. The overarching teaching objective is to learn to design managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future. Consequently, the course's topics are in a necessary sequence moving from short-term concepts such as industry factors to long-term concepts such as disruptive innovation.

This course provides an introduction to strategic analysis aiming to explain the design of managerial recommendations to improve and defend the competitive advantage of a firm both immediately (cross-sectional analysis) and in the future (longitudinal analysis). It requires significant use of analytical reasoning as well as the ability to switch between considering the big picture and the fine-grained detail. A key step for the learning objectives of the course is the completion of a 1-week trip to an economy where students will be able to see strategy in the making in its full natural context.

Teaching: 10 x 180 minute seminars in the period after exams and summer term plus a week study trip abroad.

Formative coursework: Students will be expected to produce 1 presentation in July.

Indicative reading:

1. Barney, J.B. 1995. Looking Inside for Competitive Advantage. Academy of Management Executive.
2. Christensen, C.M., Bower, J.L. 1996. Customer Power, Strategic Investment and the Failure of Leading Firms. Strategic Management Journal.
3. Dierickx, I., Cool, K. 1989. Asset Stock Accumulation and Sustainability of Competitive Advantage. Management Science.
4. Sosa, L. 2011. From Old Competence Destruction to New Competence Access: Evidence from the Comparison of Two Discontinuities in Anticancer Drug Discovery. Organization Science.
5. Winter, S.G. 2003. Understanding Dynamic Capabilities. Strategic Management Journal.

Assessment: Essay (90%, 2000 words) post-summer term. Class participation (10%) in the ST.

This course is assessed on a report that makes use of the concepts from the course and their application illustrated in the international trip. Details will be discussed during lectures.

MG4F5 Half Unit

Business in the Global Environment

This information is for the 2019/20 session.

Teacher responsible: Dr Veronica Rappoport-Redondo NAB 5.29

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: In this course we study two key components of the process called 'globalisation'. First, we consider the negotiation, implementation and implications of international trade agreements. These include the World Trade Organisation and the fast-growing web of regional trade agreements. Second, we look at the process of globalisation at the level of industries, firms and nations. We seek a solid understanding of the external, economy-wide factors that affect the performance and management of firms in today's global economy. The course relies on recent theoretical and empirical research. Topics include the changing structure of industries, the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and the differences between countries in their institutions and policies.

Course topics:

- 1) Globalisation: trends in the global economy, overview of their causes and effects
- 2) The workings, accomplishments and shortcomings of the GATT/WTO system
- 3) Trade barriers: causes and consequences of restrictions to international trade
- 4) The economics and politics of international trade agreements
- 5) Implications of trade agreements for national and multinational firms
- 6) Location of Production: Theory of Comparative Advantages
- 7) Location of Production: Factor Endowments across countries
- 8) Location of Production: Testing empirically the predictions of the theory
- 9) Location of Production: Empirical Analysis, institutions as a source of competitive advantage
- 10) Foreign Direct Investment and International Contracts

Teaching: 10 x 180 minute seminars in the period after exams and summer term

Formative coursework: Students will be expected to produce 1 piece of coursework in July.

Indicative reading: Giorgio Barba Navaretti & Anthony J Venables, Multinational Firms in the World Economy, Princeton, 2004
Robert Feenstra and Alan Taylor, International Economics, Worth Publishers, 2008. Kyle Bagwell and Robert W. Staiger,

"The Economics of the World Trading System," MIT Press, 2004.

The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.

Assessment: Continuous assessment (15%), research project (40%) and in-class assessment (45%) in the ST.

MG4F7 Half Unit

Business Analysis

This information is for the 2019/20 session.

Teacher responsible: Noam Yuchtman

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is designed to achieve an understanding of fundamental notions of data presentation and data analysis and to use statistical thinking in the context of business problems. The course deals with modern methods of data exploration (designed to reveal unusual or problematic aspects of databases), the uses and abuses of the basic techniques of inference, and the use of regression as a tool for management and for financial analysis.

Teaching: 15 hours of lectures and 9 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to produce 1 project in the MT.

The two formative assessments will be in class exercises with two components. One component will help prepare students for the Project (i.e., an application of a statistical technique to solve a company problem or research question), and the other component will help prepare students for the Final Exam.

Indicative reading:

- Statistics for Business Decision Making and Analysis, by Robert Stine and Dean Foster (S & F) second edition Pearson.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Project (35%, 3000 words) and class participation (15%) in the MT.

MG4F8 Half Unit

Managerial Economics and Quantitative Measurement for Social Entrepreneurs

This information is for the 2019/20 session.

Teacher responsible: Prof Saul Estrin NAB 4.24 and Dr Yally Avrahampour NAB 4.37

Professor Saul Estrin - Managerial Economics

Dr Yally Avrahampour - Quantitative Measurement

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: This course comprises an Economics and Accounting stream.

A: Managerial Economics

The course will start with an introduction to economics for social entrepreneurs, with attention focused on markets and market failures, notably externalities and public goods. Questions of social welfare and income inequality will also be discussed. We then move to a series of economics topics of particular relevance in analysing the problems of social entrepreneurs, namely the representation and analysis of firm costs, revenues and profits; measures of efficiency and company performance; analysis of consumer demand and finally firm strategy.

B: Quantitative Measurement

The course will continue by introducing topics relating to the measurement and disclosure of information regarding the performance of the social enterprise. We will introduce techniques

used to measure and monetize social impact, adopted by performance measures such as Social Return on Investment (SROI). We will critically assess the SROI performance measure by introducing topics such as investment appraisal, costing and performance measurement. We will also consider alternative performance measures to SROI.

Course Objectives

Students should learn:

- Key theoretical approaches in two streams, namely, economics and accounting, which includes related quantitative methods, to understanding social innovation and entrepreneurship;
- Empirical findings - typically from recent economics, accounting and management research.
- The most important economic, accounting and quantitative/statistical insights, concepts, theoretical approaches required to set-up, manage, and scale up social innovation and enterprises;
- To relate theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through the use of case studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Theoretical material and analytical frameworks from accounting and economics respectively of relevance to social entrepreneurs will be taught in the lecture slots, while the seminars will cover a relevant case study each week. Although the course covers two distinct disciplines, there will be an effort, where possible, to treat the issues in an integrated manner.

In addition students are expected to attend two introductory sessions, for the quantitative measurement part of the course, each lasting two hours.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative essay is a voluntary 'pre-run' of the examination questions, where the academic insights of the course are combined and synthesised with new insights sourced from academic literature by the student. Students receive feedback on their formative essay.

Indicative reading: Each week we draw on a variety of required and further readings. We also make suggestions regarding textbooks that provide background for the concepts outlined in the course.

For **Quantitative Measurement** the textbooks representing these background readings are:

Weetman, P. (2013) *Financial Accounting: An Introduction*. (Available as an e-book through the LSE library). Kaplan, R. & Atkinson, A. (2014) *Advanced Management Accounting* 3rd edition.

The following books provide an introduction to accounting for social entrepreneurship and social accounting: Barman, E. (2016) *Caring Capitalism: The Meaning and Measure of Social Value*.

Epstein, M. & Yuthas, K. (2014) *Measuring and Improving Social Impacts: A Guide for Nonprofits, Companies and Impact Investors*.

Mook, L., Quarter, J. & Richmond, B. (2007) *What Counts: Social Accounting for Non-profits and Cooperatives*

For **Managerial Economics**, people without an economics background might start with the textbook by D.Begg, G. Vernasca, Fischer, Dornbusch (11th Edition) *Economics*, McGraw Hill. A more advanced treatment is contained in S. Estrin, D. Laidler and M. Dietrich, *Microeconomics* (5th Edition), Pearson.

Introductory Reading: There are also a number of books that inform the field, that students might wish to read in advance or during the course as background material. A. Sen, 2009, *The Idea of Justice*, Harvard University Press. A.V. Banerjee and E. Dufo, 2011, *Poor Economics*, BBS Publications. R.L. Martin and S.R. Osberg, 2015, *Going Beyond Better*, Harvard Business Review Press

Assessment: Essay (90%, 3000 words) in the LT. Class participation (10%) in the MT.

MG4F9 Half Unit

Organisational Behaviour and Marketing for Social Entrepreneurs

This information is for the 2019/20 session.

Teacher responsible: Dr Haider Ali and Dr Niranjana Janardhanan
Dr Ali - Marketing

Dr Janardhanan - Organisational Behaviour

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises from the perspectives of Marketing and Organisational Behaviour (OB). Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life phenomena and problems through interactive lectures, cases, empirical studies and videos. In a very practical sense, students will test this knowledge in a group marketing project as well as will apply it to effecting social change in relation to such topics as motivation, team management, and organizational culture, in the OB portion of the course.

More specifically, students learn:

- Key theoretical approaches (through the lenses of organisational behaviour and marketing) to understanding social innovations and entrepreneurship;
- Empirical findings - typically from recent management research and related fields; this is a young field - on how Marketing and OB aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important marketing and organisational behaviour insights, concepts, theoretical approaches to set-up, manage, and scale up social innovation and enterprises;
- Relating theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems, through a group project (in Marketing), as well as through applied case-related individual essays (in OB);
- Also importantly this course provides essential knowledge for the individual design or consulting projects on actual management problems for social innovation and enterprise in the capstone/ dissertation course.

This course comprises a Marketing and Organisational Behaviour stream.

A: Marketing

- Application of marketing concepts to social enterprises
- Evaluating stakeholder exchanges
- Attitudes, beliefs & values; models of buyer behaviour
- Segmentation, targeting and positioning strategy for ventures
- Developing a product & promotion strategy

B: Organisational Behaviour

- Personality and Individual Differences
- Motivation and Rewards
- Organisational Culture, Ideological Currency & Making a difference
- Well-being at Work
- Leadership and Self-Initiative

Teaching: 30 hours of lectures and 3 hours of workshops in the MT.

Five weeks (15hrs) will focus on Marketing and five weeks (15hrs) will focus on core insights from Organisational Behaviour, with the aim of imparting key managerial knowledge and skills required to catalyse the changes required to launch and lead successful entrepreneurial ventures in social innovation.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The topic of the formative essay will be based on the Marketing section of the course.

Indicative reading: For Marketing:

- Karnani, A., (2007). *The Mirage of Marketing to the Bottom of*

the Pyramid: How the Private Sector Can Help Alleviate Poverty. *California Management Review* 49 (4), 90-111.

Assessment: Project (45%, 2500 words) and class participation (10%) in the MT.

Essay (45%, 2000 words) in the LT.

MG4G1 Half Unit

Understanding Social Problems for Innovation and Entrepreneurship

This information is for the 2019/20 session.

Teacher responsible: Prof Harm Barkema NAB 4.24 and Dr Flora Cornish COL 8.09

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: A key insight of social innovation and enterprise is that the type of management solution (unlike traditional management solutions) depends entirely on – and varies with – the type of social problem at hand. Hence, social innovation and enterprise starts with understanding the social problem it seeks to address. This course starts with a rigorous examination of key insights, concepts and theoretical frameworks (economic, psychological, sociological perspectives) that are essential in understanding social problems for social innovation. Applied to globally identified core challenges: the Sustainable Development Goals (on poverty, health, education, and the natural environment). The theory will be taught through interactive lectures, FB discussions where students post and discuss new contributions, cases, empirical studies, and so on. We will have guest presentations with speakers from practice on core topics.

Next, the course continues with classes teaching (qualitative) methodologies, methods and tools, which are applied by student teams to a real-life case/problem in one of the SDG domains in an emerging economy and presented and discussed in class as a pedagogical device. Students go over in the reading week for actual field work and data collection (i.e., roughly half of the team; the other half will go over in the Lent Term for additional field work and data collection, as part of the Social Design course, MG4G2). Finally, we will have integration classes, where student teams synthesize and further apply theory (insights, concepts, frameworks) and methodology (methods, tools) to their real-life case/problem and develop an initial proposal for a Theory of Change for a social enterprise, anchored in an evidence-based understanding of the relevant social problem, to be presented and discussed in class, for feedback.

During the course, students will also be introduced to core ideas and insights about the social entrepreneur's 'learning journey' towards achieving major social impact.

More specifically, students learn:

- Key theoretical approaches (economic, psychological,

sociological, anthropological) to understanding social problems underlying social innovation and entrepreneurship;

- How to apply these core theoretical approaches to a broad but important class of real life challenges, as addressed by the Sustainable Development Goals;
- Empirical findings – from social science research – on how social problems differ across contexts (cultural, economic, sociological, political); Core methodological approaches (methods and tools of qualitative analysis) to analyse real-life social problems; Synthesizing and relating theoretical and methodological insights, concepts, and frameworks, to understanding social problems, as applied to a real-life case;
- More fundamentally, learning how and why management solutions in the domain of social innovations and social enterprise are not generic but always 'contextualized,' and depend on the specific social problem for a relevant target group, and how core theoretical approaches and methodologies can be used to develop an evidence-based understanding of the local social problem at hand, as a starting point for designing social innovations and enterprises (developed further in MG4G2 Social Innovation Design).
- Core insights regarding the social entrepreneur's learning journey towards major social impact: learning from successes but also from failures (how, why, and when: under which conditions) and so on.

Teaching: 21 hours of lectures and 9 hours of classes in the MT.

In addition to 21hrs of lectures and 9hrs of seminars, students will attend a 3hr group dynamics workshop.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Beteille, A. (2003). Poverty and inequality. *Economic and Political Weekly*, 4455-4463. Wright, E.O., 2009, *Understanding class*, *New Left Review*, Nov-Dec. Banerjee, A. The politics of subversion in development practice: an exploration of microfinance in Nepal and Vietnam. *The Journal of Development Studies*, 44(8), 1214-1235.

Assessment: Project (45%) and class participation (10%) in the MT.

Essay (45%, 1500 words) in the LT.

MG4G2 Half Unit

Social Innovation Design

This information is for the 2019/20 session.

Teacher responsible: Prof Harm Barkema NAB 4.24

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course provides a rigorous overview of insights, concepts, frameworks, methods, tools and evidence for designing a new business model for a social enterprise. The pedagogy implies interactive lectures, classes, guest speakers on selected core topics for the course, FB posts and discussions, cases, and most importantly, applying and synthesizing insights from all these sources and relating them to a real life social problem by designing a new social enterprise, with your group. This course – in the Lent term – directly builds on – and complements – the MT courses MG4G1 'Understanding Social Problems,' leading to the design of a fully-fledged, evidence-based social enterprise.

The course will have the same student teams as in MG4G1, that culminated in developing an actual, initial idea/ proposal for problem-based intervention, based on an in-depth understanding of a key social problem. This proposed idea is the starting point for the business model design project in this course. Student teams will present parts of their design in class at subsequent stages, for feedback, culminating in 'pitching' the full-fledged social enterprise design for an external panel of experts in the last session. As part of their evidence-based design, students will have the opportunity to go over for field work and data collection (i.e., those students who did not go on the first field trip in MG4G1).

More specifically, students learn:

- Key theoretical approaches (insights, concepts, methodologies/frameworks, tools) related to social and economic goals, value propositions, revenue models, partners/alliances/ ecosystems, own organizational characteristics) for designing innovative social organizations for major social impact;
- Empirical findings and evidence-based insights – from recent management research and related fields; this is a young field – on social implications of a variety of social innovation designs; moderators; how these implications differ across contexts (cultural, economic, sociological, political);
- A rigorous framework synthesizing insights, concepts, methodologies/frameworks, and tools for social innovation design, including for extreme affordability (based on the course material developed at the LSE over the past ten years);
- Synthesizing and relating theoretical and methodological insights, concepts, and frameworks for social enterprises to real world phenomena and problems, by designing an actual social enterprise;
- How social enterprise designs are contingent – and can vary strongly – depending on the identified social problem.
- How to scale up your social enterprise for major social impact.

Teaching: 21 hours of lectures and 9 hours of classes in the LT. In addition to 21hrs of lectures and 9hrs of seminars, students will attend a 3hr group dynamics workshop.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Johnson, M. W., Christensen, C. M., Kagermann, H., 2008. Reinventing your business model. *Harvard Business Review* 86(12), 50-59. Yunus, M., Moingeon, B., & Lehmann-Ortega, L. Scaling social impact. *Stanford social innovation review*, 1(4), 24-32. Seelos, C., & Mair, J. (2005). Social entrepreneurship: Creating new business models to serve the poor. *Business horizons*, 48(3), 241-246. Battilana, J., Sengul, M., Pache, A.C., Model, J., 2015, Harnessing productive tensions in hybrid organizations; The case of work integration social enterprises, *Academy of Management Journal*, vol. 58, no. 6, 1658-1685. Elsie Onsongo, 2017, Institutional Entrepreneurship and social innovation at the base of the pyramid: the case of M-Pesa in Kenya, *Industry and Innovation*

Assessment: Project (45%) and class participation (10%) in the LT. Essay (45%, 1500 words) in the ST.

MG4G4 Half Unit

Topics in Management Research

This information is for the 2019/20 session.

Teacher responsible: Prof Diane Reyniers NAB5.22

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit. Students must have prior knowledge of microeconomics and econometrics.

Course content: This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on interpretation of findings rather than statistical or econometric techniques.

The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas.

The main objective of the course is to enable students to comprehend and critically assess the management literature,, to evaluate statements in terms of evidence and to detect false reasoning or logic.

Topics vary each year (based on student feedback) but examples are racial discrimination, negotiation and gender, graduate earnings, leadership, hiring.

Teaching: 10 hours of lectures and 9 hours of seminars in the MT. 2 hours of seminars in the LT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

Formative coursework: Two mock exams in the MT.

Indicative reading: A course pack containing all materials (lecture slides, articles, seminar sheets) will be available to students taking the course. The following readings are indicative only as topics vary: Lecture 1: The IKEA effect and ideas

Hooshangi, S. & G. Loewenstein (2016) The impact of idea generation and potential appropriation on entrepreneurship: an experimental study. *Management Science*.

Lecture 2: Choking

Ariely, D.; U. Gneezy, G. Loewenstein & N. Mazar (2009) Large stakes and big mistakes. *Review of Economic Studies*, 76 (2), 451-469.

Lecture 3: Does Management Matter?

Bloom, Nick and Van Reenen, John (2007) Measuring and explaining management practices across firms and countries. *Quarterly Journal of Economics*, 122(4), 1351-1408

Lecture 4: Racial discrimination

Bertrand, M. & S. Mullainathan (2004) Are Emily and Greg more employable than Lakisha and Jamal? A field experiment on labor market discrimination. *American Economic Review*, 94, 4, 991-1013.

Lecture 5: Behavioural economics at work

Blanes I Vidal, J. & M. Nossol (2011) Tournaments without prizes: Evidence from personnel records. *Management Science*, 57, 10, 1721-36.

Lecture 6: Marketing and placebos

Shiv, B.; Z. Carmon & D. Ariely (2005) Placebo effects of marketing actions: consumers may get what they pay for. *Journal of Marketing Research*, XLII (November), 383-393.

Lecture 7: Creativity and cheating

Gino, F. & D. Ariely (2012) The dark side of creativity: Original thinkers can be more dishonest. *Journal of Personality and Social Psychology*, 102 (3), 445-459.

Lecture 8: The dark side of leadership

Nevicka, B.; F.S. Ten Velden, A.H.B. De Hoogh & A.E.M. Van Vianen (2011) Reality at odds with perceptions: Narcissistic leaders and group performance. *Psychological Science*, 22, 10, 1259-64.

Lecture 9: Do we know what we want?

Ariely, D; G. Loewenstein & D. Prelec (2003) "Coherent arbitrariness": stable demand curves without stable preferences. *Quarterly Journal of Economics*, 118, 1, 73-106.

Lecture 10: Negotiation

Small, D. A., M. Gelfand, L. Babcock & H. Gettman (2007) Who goes to the bargaining table? The influence of gender and framing on the initiation of negotiation. *Journal of Personality and Social Psychology*, 93, 4, 600-613

Bowles, H.R., L. Babcock & L. Lai (2007) Social incentives for gender

differences in the propensity to initiate negotiations: Sometimes it does hurt to ask. *Organizational Behavior and Human Decision Processes*, 103, 84-103.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MG465 Half Unit

Managerial Economics for Master in Management Students

This information is for the 2019/20 session.

Teacher responsible: Daniel Gottlieb

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to managerial economics with a focus on its applicability to business decisions. Students will develop a rigorous way of thinking about managerial problems, issues and decisions that managers face, as well as enabling a better understanding of the external business environment in which an organisation operates. The emphasis is on widely-used theoretical principles. Topics include an in-depth understanding of the geometric structure of the supply & demand model and its applications, the interaction of government and markets, efficiency analysis, international trade, game theory, monopoly and oligopoly strategy, price discrimination, dynamic competition, strategic moves, and information economics.

This course develops tools that are the foundation of courses in Marketing, Business Strategy, and Finance, which students will take in core courses throughout the rest of the year.

Teaching: 20 hours of seminars and 9 hours of classes in the MT.

Formative coursework: Students will be expected to produce 5 problem sets in the MT.

Indicative reading: T van Zandt, *Firms, Price and Markets*, available online (2006); S. Estrin et al, *Microeconomics*, Prentice Hall (2008). D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, *Microeconomics*, McGraw Hill (2008).

Assessment: Exam (85%, duration: 3 hours) in the summer exam period.

Class participation (15%) in the MT.

MG467 Half Unit

Strategy and Change in Public Sector Management

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Barzelay NAB 3.19

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations and Human Resource Management), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit.

This course cannot be combined with MG402 Public Management: A Design-Oriented Approach.

Pre-requisites: N/A

Course content: The course is designed to strengthen professional competences in effectuating the intent of public organizations, public programs, and related forms of enterprise within government. In support of this aim, the course enables students

to acquire – and use – professional knowledge about public organizations, especially the performance of their constitutive management functions of planning, directing, coordinating and controlling. The focus of knowledge-use is within design-projects whose role within public organizations is to generate novel mechanisms in the form of systems, plans, and performances. The use of this knowledge is accentuated through theory-based experiential learning aimed at improving the professional abilities of sense-making, designing, argumentation, and dramatization – all of which involves mechanism-intent thinking about public organizations. Further, the course teaches how to translate purposive theories of enterprise-management into useful reference points for public organizations and their design-projects; in complementary fashion, the course examines the theory and practice of conducting case studies with the aim of providing insight into how mechanisms work within situated public organizations to perform their management and other functions and, thereby, to effectuate their intent in creating public value. The teaching format includes discussion of case study analysis and design. The course also considers the past and future of public management as a design-oriented professional discipline.

Teaching: 30 hours of lectures in the LT.

It will be open to students on this course to attend a writing skills workshop in Week 6 on foundations of understanding and presenting mechanism-intent argumentation about enterprises and managing. This session does not form part of the formal teaching on the course.

Formative coursework: Students will be expected to produce 1 essay in the LT and 1 essay in the ST.

Indicative reading: M. Barzelay, *Public Management as Design-Oriented Professional Discipline* (2019), M Moore, *Creating Public Value: Strategic Management in Government* (1995); S Funnell & P Rogers, *Purposeful Program Theory: Effective Use of Change and Logic Models* (2011), M Barzelay & C Campbell, *Preparing for the Future: Strategic Planning in the U.S. Air Force* (2003); J Bryson, *Strategic Planning for Public and Nonprofit Organizations* (2018); E Bardach, 'The Extrapolation problem: How can we learn from the experience of others?' (2004); J van Aken, et al, *Problem-Solving in Organizations* (2007), J Tandler & S Freedheim, 'Trust in a rent-seeking world: Health and government transformed in northeast Brazil' (1994), P Coughlan, J Suri, & K Canales, 'Prototypes as (design) tools for behavioral and organizational change: A design-based approach to help organizations change work behaviors' (2007), and W Booth, G Colomb & J Williams, *The Craft of Research* (2006).

Assessment: Essay (45%, 2500 words) and case analysis (45%). Class participation (10%) in the LT.

The assessment for this course consists of the following:

A 2,500 word case analysis (45% of overall mark)

A 2,500 word individual essay (45% of overall mark)

Class participation (10% of overall mark)

MG4G8

Human Resource Management Skills and Practitioner Speaker Series

This information is for the 2019/20 session.

Teacher responsible: Dr Connson Locke NAB 4.16

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD). This course is not available as an outside option.

Course content: The course has a taught component, which is compulsory for all students in the stream, and a free-configuration component where students can choose among a variety of sessions that target specific skill development needs they have identified through their Skills Development Portfolio. There is also a Group Project that runs between weeks 2 and 5 in MT.

Group project

The group project is intended to build skills that will be useful in the workplace: the ability to work in culturally-diverse teams,

think critically about a work-related issue, and make realistic and achievable recommendations. These are relevant to several of the 7SBL learning outcomes, and will therefore contribute to your Skills Development Portfolio. The group project is assessed through a group submission due in week 5, and an individual reflective statement due in week 7. Additionally, there will be a peer assessment survey where students can provide feedback to their fellow team members on their team working skills. All details, including team allocations and the project brief will be disclosed during a compulsory project launch session in week 2.

Taught sessions

There are six 2-hour weekly sessions during Michaelmas Term (weeks 5 and 7-11). A prospective list of topics includes the following: Evaluating and Costing HR initiatives, Project Management for HRM, Diversity and Inclusion Management, Selection Interviewing, Difficult Conversations, and Ethics in HRM.

Skills Development Portfolio

Students will plan their own individualised skills development, including the MG4G8 free-configuration sessions, through the Skills Development Portfolio. The aim of this tool is to help each student identify gaps in their general and HRM management skills (as defined in CIPD's 7SBL module), plan for their development during their studies, and document achievements and newly developed skills at the end of the programme. Two submissions are required:

- A self-assessment and development plan, due in MT week 7 (formative).
- A portfolio documenting skill development and attainment, due in September 2018 (summative).

Free-configuration sessions

Students will be able to attend their choice of sessions within the HRO Practitioner Panel series and LSE LIFE workshops to suit their development needs. Attendance to a minimum of 15 hours between the two is required.

- HRO Practitioner Panel Series: The HRO team will arrange 5 sessions with external speakers on topics that are relevant to our subject. These will be 2-hour evening sessions, and will run during LT. A prospective programme will be announced in MT, and detailed arrangements publicised in due course.
- LSE LIFE workshops: LSE LIFE runs a broad range of 1-hour and 2-hour workshops on many topics that are relevant to the 7SBL module. Many of these sessions are run several times during MT and LT. Students will need to book a place in the relevant sessions themselves.

External activities

Where appropriate, students may apply to receive credit for attending an external session that is relevant to the 7SBL module and conducive to significant skill attainment. The decision to grant such credit will remain fully at the discretion of the MG4G8 Course Leader and the HRO Programme Director, so students will be strongly advised to make their application before enrolment. No individual student will receive credit for external activities for more than 20% of the free-configuration requirement (i.e. 3 hours). We will not offer to fund external activities.

Teaching: 12 hours of lectures in the MT. 10 hours of lectures in the LT.

Please note that the LT sessions will take the form of a Practitioner Panel Series.

Formative coursework: Students will receive written formative feedback on two pieces of work:

1. Students will be set in groups of about 5 to work on an applied HRM problem. Each group will submit a short presentation with their analysis and recommendations due at the end of MT Week 5, for which formative feedback will be provided. Additionally, students will be asked to provide anonymous written feedback to their team peers.
2. Students will submit Sections 1 and 2 of the Skills Development Portfolio (Self-Assessment and Development Plan), due in MT Week 7. Formative feedback will be provided.

Indicative reading: N/A (this is a practical skills course)

Assessment:

The course is not formally assessed as part of the MSc Human

Resources and Organisations. However, a pass is needed on the summative submission of the Skills Development Portfolio, due in September, for attaining CIPD accreditation.

MG4J1

Introduction to Mathematics and Data Analysis for Managers

This information is for the 2019/20 session.

Teacher responsible: Dr Ricardo Alonso NAB 5.31

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is divided into two separate subjects: Data Analysis (Statistics) and Mathematics for Managers.

The Data Analysis (Statistics) course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression. It also includes basic training on data analysis software (STATA). It provides students with the basic analytical tools required in MG4F7 Business Analysis to analyse business data for decision making.

The Mathematics for Managers course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Basic Calculus, and Comparative Statics Analysis. It provides students with the basic analytical tools required in MG465 Managerial Economics to analyse models of product market and factor markets competition.

Teaching: 20 hours of lectures in the two weeks prior to the Michaelmas Term. There will also be some workshops and tutorial sessions for the statistics portion of the course, to support students preparing practical exercises. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

Indicative reading: Statistics: Statistics: Anderson, D., Sweeney, D., Williams, T., Freeman, J., Shoesmith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning. Huff (1991). *How to Lie with Statistics*. Penguin. Quantitative Skills: Hammond, P. and Sydsaeter, K. (2002). *Essential Mathematics for Economic Analysis*. Prentice Hall; and Jacques, I. (2010). *Mathematics for Economics and Business*. (7th edition), Pearson. Writing skills: Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

Assessment:

No formal assessment. Students will sit a mock exam at the end of the statistics course based upon the material to aid learning.

MG4J2 Half Unit

Designing Innovative Social Enterprises

This information is for the 2019/20 session.

Teacher responsible: Dr Nadia Millington NAB 3.14

Guest lecturers for the Contemporary Social Innovation seminars (5 x 2 hour seminars)

Availability: This course is available on the MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course can be broken into two parts: The foundation (weeks 1-4)

During the foundational element, students will be provided with a theoretical overview of this young field, including but not limited to: definitions / taxonomies of social entrepreneurship /business models for social innovation/ understanding beneficiaries via the theory of change/ minimum viable offer approaches for social change/ social intrapreneurship/ drivers of success, social impact

and impact measurement for social mission organizations. Throughout the course, examples are given of real social entrepreneurs and social entrepreneurial organizations in order to give practical insight to complement the theory covered in these 4 weeks.

Developing a new innovation social enterprise (weeks 5-11)

Over the 6 teaching sessions students will focus on unravelling the problem/ opportunity, developing / assessing viable solutions, testing and developing a new business model.

As an overarching approach, students will be using a human-centred, action-oriented approach to real world problem solving working in collaborative teams to actively create solutions directly with users through prototyping and visualisation techniques in creative spaces. They will progress from an introduction to design thinking principles of problem solving to creating an enterprise through an iterative design process, including imagining, prototyping, testing, building, modelling, pricing, branding, marketing, resourcing, analysing financial viability and obtaining proof of concept. An additional benefit of the course for students will be their opportunity to discover that design thinking is an approach to problem solving that spans all disciplines and can be used by social scientists, engineers, policy makers, creative designers, entrepreneurs or anyone seeking an effective, human-centred focus to create a solution to a problem.

This approach strengthens the problem-solving competences of sense-making, designing, analysis, and decision-making. The pedagogical approach is problem-solving and students will be informed of ethical guidelines and considerations which they must employ to guide their projects in line with LSE standards and policy.

Teaching: 30 hours of lectures and 10 hours of seminars in the LT. The ten Seminar hours (5x 2hour sessions) are interactive sessions with guest speakers/practitioners. Basically, it will be a short introduction to a contemporary topic eg the circular economy. Then will either be an individual or a panel of experts who work in the area of circular economy presenting ideas, setting interactive exercises/ cases with the class and answering students' questions. In terms of teaching support- at these sessions, there will be the guest speaker/s, the TA and the Programme Administrator. So there will be 3-4 individuals who will work directly with students during the interactive exercises/ cases during the class.

Formative coursework: Students will be expected to produce 1 essay in the LT.

The formative essay is 800-100 words based on the evidence of initial field research. We recommend that each team keeps a field work journal (electronic or printed) with dates of field work, names of interviewees, places visited, observations with photos etc to support the formative assessment.

Indicative reading: Essential readings (weeks 1-4)

- Hervieux, C.; Voltan, A. (2018). Framing Social Problems in Social Entrepreneurship. *Journal of Business Ethics*, 151(2):79-293
- Margolis, J. D.; Walsh, J.P. (2003). Misery Loves Companies: Rethinking Social Initiatives by Business. *Administrative Science Quarterly*.48 (2): 268–305.
- Mair, J.; Marti, I. (2004). Social entrepreneurship: What Are We Talking About? A Framework for Future Research. I.ESE Research Papers D/546, I.ESE Business School.

Essential readings (weeks 4-11)

- Maurer, I. and Ebers, M. (2006). Dynamics of social capital and their performance implications: Lessons from biotechnology start-ups. *Administrative Science Quarterly*, 51(2): 262–292.
- Ozcan, P., & Eisenhardt, K.M. (2009). Origin of alliance portfolios: Entrepreneurs, network strategies, and firm performance. *Academy of Management Journal*, 52: 246-279.
- Prahalad, C., & Ramaswamy, V. (2008). *The New Age of Innovation: Driving Cocreated Value Through Global Networks*, McGraw-Hill.

Assessment: Essay (50%, 1800 words) and project (50%, 6000 words) in the LT.

The essay is completed individually. The project consists of a group report and presentation. The group report grade will be a

blended mark, 20% mark for the whole group and the rest (80%) based on the individual contribution of the student which equates to approximately 1000 words depending on the size of the group.

MG4J3 Half Unit Principles of Pricing

This information is for the 2019/20 session.

Teacher responsible: Dr Simos Chari

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics and opportunities for achieving price customisation.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading:

- *The Strategy and Tactics of Pricing: A Guide to Growing More Profitably* (2010): Nagle, Hogan, and Zale, Prentice Hall.
- *Pricing Information: How to customize both the product and the price* (1998): Carl Schapiro and Hal Varian, Harvard Business School Chapters.
- 'How to Fight a Price War' (2000): Akshay Rao, Mark Bergen, Scott Davis, Harvard Business Review.
- 'Is it time to rethink your pricing strategy?' (2012): Andreas Hinterhuber and Stephan Liozu, Sloan Management Review.
- 'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Project (45%), coursework (45%) and class participation (10%) in the LT.

The coursework is an Individual Take-home assignment and the project will be in groups.

MG4J6 Half Unit Brand Strategy

This information is for the 2019/20 session.

Teacher responsible: Dr Hye-Young Kim

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The most valuable assets that firms have are the products/services that they offer and the brands that are associated with them. Managing Products & Brands is a rigorous examination of the theory and corporate practices relevant

to product and brand management. Its core objectives are to provide an understanding of the important issues in planning and evaluating product/brand strategies, to provide the appropriate theories, models, and analytical tools that enable managers to make well-informed product/brand management decisions, and to provide a platform for students to apply these principles. The critical approach adopted will blend theory and practice so as to promote effective managerial decision making on a short as well as long term basis.

Teaching: 30 hours of lectures in the LT.

Formative coursework: Students will meet in their groups with the course leader several times during the term and receive feedback on their work. Detailed guidelines on the group project will be provided in the course syllabus and sample projects will be available.

Indicative reading:

- Keller, K. (2007) *Strategic Brand Management*, 3rd Edition, Pearson
- Lehmann, D. And Winer, R. (2005) *Product Management*, 4th Edition, Chicago: Irwin.

- Rangaswamy, Arvind, Raymond R. Burke, and Terence Oliva (1993) "Brand Equity and the Extendibility of Brand Names," *International Journal of Research in Marketing*, Special Issue on Brand Equity, Vol. 10, p. 61-75

Assessment: Coursework (45%), project (45%) and class participation (10%) in the LT.

Coursework will be an Individual Take-home assignment and the Project will be completed in groups.

MY400 Half Unit

Fundamentals of Social Science Research Design

This information is for the 2019/20 session.

Teacher responsible: Dr Alasdair Jones COL8.13

Availability: This course is compulsory on the MSc in Applied Social Data Science and MSc in Social Research Methods. This course is available on the MPhil/PhD in Demography/Population Studies, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MSc in Applied Social Data Science, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit. Research students please see MY500.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their dissertations.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

Week 6 is a Reading Week during which students work independently on their first assignment.

Formative coursework: Students will be expected to produce 1 exercise in the MT.

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). *Real World Research*. London: John Wiley.

Assessment: Research proposal (30%) and class participation (10%) in the MT.

Research design (60%) in the ST.

Research Proposal assignment (1500 words), submitted in week 11 of MT (30%). Research Design (4000 words), submitted in Week 1 of ST (60%).

MY401 Half Unit

Research Design for Studies in Digital Innovation

This information is for the 2019/20 session.

Teacher responsible: Prof Chrisanthi Avgerou NAB 3.22 and Dr Eleanor Power COL7.09

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the MSc in Applied Social Data Science. This course is not available as an outside option.

This course is compulsory on the MSc in Management of Information Systems and Digital Innovation.

Course content: This course will deliver the core methodological training for students completing a dissertation for the MSc in Management of Information Systems and Digital Innovation. It covers issues of research design and research methods for information systems studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to information systems research. Drawing on a variety of examples in Information Systems, the course will provide the platform for students to consider a range of design options, as well as methodological techniques, to adopt in their own dissertations. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations.

The topics covered will include discussions of the alignment between research question and research design, questions of inference, and the relationship between theory and data, as well as brief introductions to particular methods, with a focus on when they will be appropriate to particular questions and projects.

Teaching: 20 hours of lectures, 13 hours and 30 minutes of seminars and 3 hours of workshops in the LT.

Students will also be encouraged to attend additional non-compulsory workshops in LT which will offer more specific advice for their research proposals.

Lectures for this course will be delivered by staff by the Department of Methodology. To help to contextualise the materials covered in the course for the students, and to ensure a good fit with the requirements of the MISDI dissertation, the seminars will be led by staff from the Department of Management.

Formative coursework: Students will be expected to produce 1 essay in the LT.

A formative assignment will be assigned for the middle of the teaching term (LT) for which students will be expected to submit a 1,000 word initial proposal for their dissertation.

Indicative reading: Agresti, A. and Finlay, B. (2009) *Statistical Methods for the Social Sciences* [4th edition]. Prentice Hall. Bauer, M. and Gaskell, G. (2000) *Qualitative Researching with Text, Image and Sound*. Sage. Flick, U. (2014) *An Introduction to Qualitative Research* [5th edition]. Sage. King, G., Keohane, R. and Verba, S. (1994) *Designing Social Inquiry*. Princeton University Press. Robson, C. and McCartan, K. (2016) *Real World Research* [4th edition]. John Wiley. Seale, C. [ed.] (2004) *Social Research Methods: A Reader*. Routledge.

Assessment:

Essay (70%, 2,500 words) in the LT and ST.

Group Essay (30%, 3,000 words) in the LT.

MY405 Half Unit

Research Methods for Evaluation in Health, Development and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics, MSc in Applied Social Data Science, MSc in Global Health Policy, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites but some familiarity with qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research. In the context of the rise of evidence-based policy, the course is designed to extend students' abilities to use evaluative information carefully and critically. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, process evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesising evidence. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

10 x 1.5 hour lectures

9 x 1.5 hour seminars

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students write a critical review (1,500 words) of a published evaluation report.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press. Bell, S. & Aggleton, P. (2016). *Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives*. London: Routledge. Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) *Running Randomized Evaluations: A Practical Guide*, Princeton University Press. Patton, M. Q. (2015). *Qualitative Research and Evaluation Methods*. (4th Edition). London: Sage.

Assessment: Coursework (50%, 2500 words) in the LT.

Essay (50%, 2500 words) in the ST.

50% group-based coursework. Students work in groups to develop an evaluation design, and write it up individually (2,500 words).

50% essay. Students are given a choice of essay questions, in response to which they write one essay (2,500 words).

MY410

Fundamentals of Research Design for International Development

This information is for the 2019/20 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

This course is compulsory for all MSc students in International Development.

Pre-requisites: No prerequisites are required.

Course content: This course introduces MSc students in the Department of International Development to theoretical and practical foundations of social science research design. It is neither qualitative nor quantitative in focus, but rather is concerned with core interdisciplinary principles of research design that span disciplinary and methodological traditions.

Grounded in examples from International Development research, the course is centred on exploring principles of research design for different types of research questions. The course will provide a platform for students to consider a range of research design options, as well as methodological techniques. It is intended to help students become more informed and critical readers of social scientific, and specifically International Development, research. It is also intended to help students appreciate the various trade-offs entailed in research design choices so that they can make decisions about which to adopt in their own dissertations. By the end of the course, students will be familiar with a variety of research design options and will be better equipped to embark on their own research projects. The course is not designed to provide students with all the skills and techniques they need, i.e., it is not an explicitly "methods" course, but it will familiarize students with the trade-offs involved in adopting particular approaches and incorporating various forms of evidence and information into their dissertations. The course therefore has the dual aim of helping students become both critical "consumers" and "producers" of International Development research. In doing so, it should make positive contributions to students' learning experience both in their dissertation process, and in other courses they take in ID (and elsewhere at LSE).

The teaching on the course is premised on the idea that how we do research ultimately depends on the nature of the particular research question and the type and kinds of evidence that are available. There are strengths, weaknesses, and trade-offs to most of the decisions we make when planning and doing research, and as the weeks of the course progress, the strengths and weaknesses, and thus the implicit trade-offs, of the research designs we consider will vary. Our goal is for students to better understand the consequences of these research design decisions, both in the published research that they read, and that they will need to make in their own research.

The topics covered will include discussions of the alignment between research question and research design, questions of inference, issues of measurement, and the relationship between theory and evidence, as well as brief introductions to particular methods, with a focus on when they will be appropriate to particular questions and projects.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Lectures for this course will be delivered primarily by staff from the Department of Methodology.

Seminars will be led by LSE Fellows recruited jointly by ID and MY, to assure experience in and familiarity with international development research.

Formative coursework: Annotated bibliography analysing the research design choices of published work, 1500 words, due in MT week 7.

Indicative reading:

• Bennett, Andrew, and Jeffrey T. Checkel, eds. (2014). *Process*

Tracing: From Metaphor to Analytic Tool. Cambridge: Cambridge University Press.

- Sumner A. and M. Tribe (2008). *International Development Studies: Theories and Methods in Research and Practice*. London: Sage

Assessment: Short research proposal (1000 words) in MT week 11 (33%)

Annotated bibliography (2,500 words) in LT week 7 (66%)

MY421 Half Unit Qualitative Research Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Chana Teeger (MT) and Dr Katherine Summers (LT)

Availability: This course is available on the MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Global Health Policy, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic, content, and discourse analysis. Issues of research design, quality indicators, epistemology and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY425 Case Studies and Comparative Methods for Qualitative Research, MY426 Doing Ethnography, MY427 Qualitative Research with Non-Traditional Data, or MY428 Qualitative Text Analysis.

Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

The course runs twice per year: in MT (MY421M) and again in LT (MY421L). The content of the course is exactly the same in each term. Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading:

- Maria J Mayan (2009) *Essentials in qualitative inquiry*, Walnut Creek, CA: Left Coast Press.
- M Bauer & G Gaskell, (2000) *Qualitative Researching with Text, Image and Sound*, London: Sage.
- U Flick, (2009) *An Introduction to Qualitative Research*, 4th edition, London: Sage.
- C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). *Qualitative Research Practice*. London: Sage.

Please Note: No single publication covers the whole content of the course.

Assessment: Project (100%, 3000 words) in the ST.

The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods of data collection and analysis used.

MY425 Half Unit Case Studies and Comparative Methods for Qualitative Research

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Knott COL 7.08

Availability: This course is available on the MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Development Studies, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is freely available to any MSc or MRes students interested in case study research designs. MY525 is available for PhD students interested in case study research designs.

The course is most suited to students within macro- or meso-sociological traditions (e.g. political science, IR, sociology, political sociology, policy studies, development studies) than those within a micro-sociological/individualist tradition (e.g. micro-interactionist perspectives, psychology, psychiatry).

Pre-requisites: There are no pre-requisites for this course.

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

Students will receive 10 lectures (1.5 hours) and 9 seminars (1.5 hours) with a reading week in week 6. Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case

study and comparative research design, as well as opportunities to design and develop their own research projects.

Formative coursework: Students will be expected to produce 1 presentation, 1 essay and 1 other piece of coursework in the LT. 1 presentation: every week 1-2 students will present on a key reading and lead subsequent discussion of the reading and its research design

1 formative paper: literature review and project outline (1-2 pages) due in week 8. Students will receive written feedback on this by week 11.

1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment (week 9)

Indicative reading: Key texts:

- Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press.
- Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press.
- George, Alexander L. and Andrew Bennett. 2005. *Case Studies and Theory Development in the Social Sciences*.
- Gerring, J. (2017) *Case study research: principles and practices*. Second edition. Cambridge University Press.
- Yin, R. K. (2018) *Case study research and applications: design and methods*. Sixth edition. Sage.

Example readings for discussion:

- Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*.
- Finkel, E. (2017) *Ordinary Jews: choice and survival during the Holocaust*. Princeton University Press.
- Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234.
- Rudra, Nita. 2011. "Openness and the Politics of Potable Water." *Comparative Political Studies* 44(6): 771–803.
- Simmons, E. (2016) *Meaningful resistance: market reforms and the roots of social protest in Latin America*.: Cambridge University Press.
- Simmons, E. S. and Smith, N. R. (2017) 'Comparison with an Ethnographic Sensibility', *PS: Political Science & Politics*, 50(01), pp. 126–130. doi: 10.1017/S1049096516002286.
- Slater, D. and Wong, J. (2013b) 'The Strength to Concede: Ruling Parties and Democratization in Developmental Asia', *Perspectives on Politics*, 11(03), pp. 717–733. doi: 10.1017/S1537592713002090.

Assessment: Project (90%, 4000 words) in April.

Class participation (10%) in the LT.

Research design proposal (Project 4000 words) due at the beginning of ST (90%). It is recommended that students base the research design proposal on their dissertation topic (or a related topic, e.g. a PhD proposal) subject to approval by students' home department. Where students also take MY400 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments. Students must consult with their home department regarding overlap between the proposal and their dissertation.

Weekly participation grade (10%) preparation and active participation in seminars and group presentation.

MY426 Half Unit Doing Ethnography

This information is for the 2019/20 session.

Teacher responsible: Dr Chana Teeger COL7.06

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available with

permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data locally, followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher reflections, and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: DeWalt, K. M.; DeWalt, B. R. (2002). *Participant observation: A guide for fieldworkers*. AltaMira Press. Emerson, R. M., Fretz, R. I., ; Shaw, L. L. (1995). *Writing ethnographic fieldnotes*. University of Chicago Press. Hammersley, M ; Atkinson, P. (2007). *Ethnography: Principles in practice*. Taylor ; Francis. Wacquant, L. (2004) *Body and Soul: Ethnographic Notebooks of an Apprentice Boxer*. New York: Oxford University Press. Laureau, Annette. (2011). *Unreal Childhoods: Class, Race, and Family Life (2nd Edition)*. Berkeley: University of California Press

Assessment: Essay (100%, 4000 words) in the ST.

MY427 Half Unit Not available in 2019/20 Qualitative Research with Digital and Visual Data

This information is for the 2019/20 session.

Teacher responsible: Dr Jennifer Tarr COL8.06

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Culture and Society, MSc in Gender (Research), MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Marketing and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to PhD students, please see MY527.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is required, equivalent to the level of MY421. Please contact the course convenor if unsure.

Course content: Most qualitative research is in the form of written or spoken texts, produced through interviews and field notes or collection and analysis of documents. However, new technologies now offer a range of new tools for producing, gathering and analysing new kinds of data. This course will focus primarily on digital and visual methods and how they are reshaping qualitative

research. Topics will include mobile methods, social network analysis; social media; emojis, memes and gifs; photo elicitation; video; and visual analysis. Key example readings will be assigned, discussed and assessed each week. Seminars provide practical skills through hands on exercises of data collection and analysis, closely tied with the lecture content. These skills will be developed further in a final research project on a topic of the students' choosing to be submitted at the beginning of summer term. The course aims to understand how qualitative methods can be used in relation to these emerging streams of data. The course is aimed at students who are considering one or more of these elements as part of their dissertation research design and/or who are interested in gaining more advanced skills in qualitative research.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be a Reading Week during which students work independently on their formative assignment. An optional enrichment activity will be assigned.

Formative coursework: Seminar activities will receive in-class feedback. A brief proposal for final summative coursework (c. 1000 words) should be submitted and will receive formative feedback and guidance.

Indicative reading: Note: No one text covers the whole course. Rose, G, 2016. *Visual methodologies: An introduction to researching with visual materials*. London: Sage. Rogers, R, 2013. *Digital methods*. Boston: MIT press. Pink, S, Horst H, Postill J, Hjorth L, Lewis T, Tacchi J. (2016) *Digital Ethnography: Principles and Practice*. London: Sage.

Assessment: Project (100%, 4000 words) in the ST. One 4000-4500 word research project related to the course material, on a topic selected by the student (100%).

MY428 Half Unit

Qualitative Text and Discourse Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Audrey Alejandro COL.7.10

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Development Studies, MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. The course is also available to PhD students, please see MY528.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected (including finding bibliographical resources, conducting a literature review, constructing a research problem, creating a research question...). Please contact the course convenor if unsure.

Course content: The goal of this course is to provide students with the skills to systematically identify and extract information from texts and discourses for social scientific purposes. While acquiring those skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence when conducting their research project.

The first part of the course discusses the major paradigms and traditions of qualitative text analysis and focuses on the application of specific analytical techniques to qualitative data. The main methods of qualitative text analysis, including content analysis and thematic analysis, will be explored with specific emphasis on discourse analysis. The second part of the course places the in-depth analysis of texts in the broader context of research methodology. It aims to help students in building critical thinking around qualitative text analysis by familiarising them with a variety of mixed-methods research designs that can be used when studying texts and discourses.

Lectures introduce the main conceptual and practical issues. Seminars provide practical experience of implementing the methodology. Students will be working directly with qualitative data and performing their own analyses on a diverse range of materials, such as political speeches and news articles, as well as cultural texts such as movie scripts and songs.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading: Dunn K. and Neumann I. B. (2016). *Undertaking Discourse Analysis for social research*, Ann Arbor: University of Michigan Press. Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum. Scheier, M. (2012). *Qualitative Content Analysis*. Sage, Thousand Oaks, CA. Seale, C., Gobo, G., Gubrium, J.F. and Silverman, D. (2004). *Qualitative research practice*. London: Sage, chapters 11-12.

Assessment: Essay (90%, 4000 words) and presentation (10%) in the ST.

A group presentation (10%) in which students present an original pilot analysis using the method of text analysis of their choice. This should be on a topic of the students' choosing but different from the research proposal.

A research proposal (90%, 4000 words) in the ST. It is recommended that students base the research proposal on a dimension/sub-question of their dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY451 Half Unit

Introduction to Quantitative Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Jonathan Jackson COL.8.05 (LT) and Dr Indraneel Sircar COL.7.04 (MT)

Availability: This course is available on the MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Social and Public Policy (Research), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is also available to research students as MY551.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer classes give 'hands-on' training in the application of statistical techniques to real social science research problems. No prior knowledge of any statistical software is necessary.

Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST. There will be no lectures or computer classes in Week 6 of the term.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY451M which is taught in Michaelmas Term, or MY451L which is taught in Lent Term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY451 and MY452).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

A two hour unseen examination in ST. Students are permitted to bring a limited quantity of written notes into the examination.

MY452 Half Unit

Applied Regression Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Indraneel Sircar COL.7.04 (LT) and Dr Daniele Fanelli

Daniele Fanelli (MT)

Indraneel Sircar (LT)

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in International Social and Public Policy (Research), MSc in Local Economic Development, MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. MY452 is open to any and all post-grad students around the School who have already have a grounding in quantitative methods.

Pre-requisites: Students are required to have completed MY451 or an equivalent level statistics course

Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 20 hours of lectures and 10 hours of computer workshops in the LT.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY452M which is taught in Michaelmas Term, or MY452L which is taught in Lent Term.

There will be no lectures or computer classes in Week 6 of term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A Agresti & B Finlay, *Statistical Methods for the Social Sciences*. A course pack will be available for download online. Additional reading will be recommended.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Two hour unseen examination in ST. Students are permitted to

bring a limited quantity of written notes into the examination.

MY455 Half Unit

Multivariate Analysis and Measurement

This information is for the 2019/20 session.

Teacher responsible: Dr Jouni Kuha COL.8.04

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Marketing, MSc in Political Science and Political Economy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY555.

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452 (Applied Regression Analysis).

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT. 1 hour of lectures in the ST.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: D J Bartholomew, F Steele, I Moustaki; J I Galbraith (2008) *Analysis of Multivariate Social Science Data* (Second Edition).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MY456 Half Unit

Survey Methodology

This information is for the 2019/20 session.

Teacher responsible: Mr Patrick Sturgis COL.8.10

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Marketing, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY452 or equivalent. MY456 can also be taken in parallel with MY452L. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.

Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys. Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions;

design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer package Stata; no previous knowledge of Stata is required.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be no lectures or computer classes in Week 6 of term.

Formative coursework: Exercises from the some of the seminars and computer classes are submitted for feedback

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). *Survey Methodology* (2nd ed.). Wiley.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%, 2500 words).

The project is a report of approximately 20 to 30 pages, including tables and figures, or approximately 2,500 words, reporting the data analysis of a given research question and data set.

MY457 Half Unit

Causal Inference for Observational and Experimental Studies

This information is for the 2019/20 session.

Teacher responsible: Dr David Hendry

Availability: This course is compulsory on the MSc in Political Science and Political Economy. This course is available on the MPhil/PhD in Accounting, MSc in Applied Social Data Science, MSc in Behavioural Science, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent.

Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer packages (Stata or R) are used for computation.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes are submitted for feedback.

Indicative reading: Angrist, J. D. and Pischke, J.-S. (2009). *Mostly Harmless Econometrics*. Princeton University Press. Rosenbaum, P.R. (2010). *Design of Observational Studies*. Springer.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

MY459 Half Unit

Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Blake Miller COL7.14

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Political Science and Political Economy, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY559.

Pre-requisites: Students must have completed Applied Regression Analysis (MY452).

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: *quanteda*: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>. Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." *Political Analysis* 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." *The Journal of Finance* 66(1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." *Journal of Empirical Legal Studies* 4(4, December):1007–1039.

Assessment: Project (40%, 3000 words) and coursework (60%, 2000 words) in the ST.

MY461 Half Unit

Social Network Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Power COL7.09 and Dr Milena Tsvetkova COL8.03

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications

(Data and Society), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students in the MSc in Applied Social Data Science, MSc in Data Science, the MSc in Social Research Methods, and then to students from Statistics and Media and Communications (in particular the MSc in Media and Communications (Data and Society) track).

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data, and structure and analyse these data using R. Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains. This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis and visualisation using R.

Teaching: 15 hours of lectures and 15 hours of computer workshops in the LT.

Formative coursework: Students will be expected to produce 5 problem sets in the LT.

Type: Structured formative problem sets in five of the weeks will build on what was covered in the staff-led lab session, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading:

- Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press.
- Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition.
- Easley, D., and Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning about a highly connected world*. New York: Cambridge University Press.

Assessment: Problem sets (50%) and take-home assessment (50%) in the LT.

5 summative problem sets will be marked in five of the weeks. These will constitute 50% of the final overall mark.

MY464

Introduction to Quantitative Methods for Media and Communications

This information is for the 2019/20 session.

Teacher responsible: Mr Patrick Sturgis COL.8.05

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Course content: An intensive introduction to quantitative data analysis in the social sciences, with illustrative examples and class exercises drawn from the field of Media and Communications.

The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer classes give 'hands-on' training in the application of statistical techniques to real social science research problems using the SPSS computer package (no prior knowledge of SPSS is necessary).

Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 2 hours of lectures in the ST.

Formative coursework: Students will be expected to produce 9 exercises in the MT.

Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

You are allowed to bring to the examination one A4 sheet (both sides) of your own notes.

MY465 Half Unit

Intermediate Quantitative Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Jonathan Jackson COL.8.05

Availability: This course is available on the MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or

statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6. On-line quizzes will be provided on Moodle to aid revision during the reading week.

Formative coursework: Students will be expected to produce 9 exercises in the MT.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

Students are permitted to bring a limited quantity of written notes into the examination.

MY470 Half Unit Computer Programming

This information is for the 2019/20 session.

Teacher responsible: Dr Milena Tsvetkova COL8.03

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Human Geography and Urban Studies (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Compulsory unit for MSc in Applied Social Data Science and MSc Data Science who will be given priority. Available with permission as an outside option to students on other programmes where regulations permit and places are available.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Teaching: 20 hours of lectures and 15 hours of classes in the MT. Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object-oriented programming. The primary programming languages used in the course will be Python and R.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading: Gutttag, John V. *Introduction to Computation and Programming Using Python: With Application to Understanding Data*. MIT Press, 2016. Gries, Paul, Jennifer Campbell, and Jason M Montojo. *Practical Programming: An Introduction to Computer Science Using Python 3*. The Pragmatic Bookshelf, 2013. Miller, Bradley N. and David L. Ranum. *Problem Solving with Algorithms and Data Structures Using Python*. Available online at <http://interactivepython.org/runestone/static/pythonds/index.html>. Python, Intermediate and advanced documentation at <https://www.python.org/doc/>. Venables, William N., David M. Smith, and the R Core Team. *An Introduction to R*. Available online at <https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf>. Zuur, Alain, Elena N. Ieno, and Erik Meesters. *A Beginner's Guide to R*. Springer Science & Business Media, 2009.

Assessment: Take home exam (50%) and in class assessment (50%) in the MT.

Student problem sets will be marked each week, and will provide 50% of the mark.

MY472 Half Unit Data for Data Scientists

This information is for the 2019/20 session.

Teacher responsible: Prof Kenneth Benoit COL.8.11

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications (Data and Society) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students in the MSc in Applied Social Data Science and the MSc in Data Science, followed by students from the MSc in Media and Communications (Data and Society) track.

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most timeconsuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.

In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database.

We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an in-depth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

- London, Kyle Developing Large Web Applications: Producing Code That Can Grow and Thrive O'Reilly, 2010.

Assessment: Take-home assessment (50%) and in-class assessment (50%).

Student problem sets will be marked each week, and will provide 50% of the mark.

MY474 Half Unit

Applied Machine Learning for Social Science

This information is for the 2019/20 session.

Teacher responsible: Dr Blake Miller COL.7.14

Availability: This course is available on the MSc in Applied Social Data Science and MSc in Social Research Methods. This course is

available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students in the MSc in Applied Social Data Science.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. A particular emphasis will be placed on the ethical issues surrounding machine learning applications, including privacy, algorithmic bias, and informed consent. Lectures will use case studies to introduce specific machine learning algorithms including LASSO, ridge regression, logistic regression, k-nearest neighbour classification, decision trees, support vector machines, k-means clustering, hierarchical clustering, principal component analysis, and linear discriminant analysis. Students will learn to apply these algorithms to data and validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.

The workshops will last two hours and take place every two weeks.

Formative coursework: Students will be expected to produce 1 problem set in the LT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop session and complete it outside of class.

Indicative reading:

Assessment: In-class assessment (40%) in the MT.

Take-home assessment (60%) in the LT.

Four structured problem sets will be marked and will provide 40% of the mark.

MY498

Capstone Project

This information is for the 2019/20 session.

Teacher responsible: Prof Kenneth Benoit COL.8.11 and Dr Milena Tsvetkova COL.8.03

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is not available as an outside option.

Course content: The Capstone course is a dissertation project that represents the final element in the construction of a student's data science masters education. Work with a staff supervisor, and developed in a seminar, the dissertation provides students the means to combine all they have learned and embark on a self-guided project that will serve as their MSc study's crowning achievement.

Teaching: A series of around 4 dissertation seminars during MT and LT. The seminars cover methodological issues such as the literature review, sources of secondary quantitative data, topic guides for interviews, and sources of textual material. There is no teaching for the Capstone project outside of supervision and our development seminars (currently MY499).

Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students during ST.

Indicative reading: NA - will differ with every student project

Assessment: Dissertation (100%, 10000 words) post-summer term.

The dissertation will be a 10,000 word Capstone project to be submitted via Moodle.

MY499

Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Indraneel Sircar COL 8.13

Dissertation supervisors.

Availability: This course is compulsory on the MSc in Social Research Methods. This course is not available as an outside option.

Course content: Students are required to write a 10,000 word dissertation. The dissertation is based on an empirical investigation of an issue relevant to the programme content and on a topic within the field covered by their specialist subject and agreed with their supervisor.

Teaching: A series of 3-4 dissertation seminars during MT and LT. The seminars cover issues pertinent to writing a dissertation such as reviewing the literature, using secondary quantitative data, and research ethics.

Formative coursework: Each student will be required to give a short presentation outlining the subject of his/her dissertation and the proposed argument of the dissertation in a session organised for all students during ST (usually May).

Assessment: Dissertation (100%, 10000 words) post-summer term.

The 10,000 word dissertation must be submitted via Moodle - final date TBC.

MY4M1

Foundations of Social Research 1

This information is for the 2019/20 session.

Teacher responsible: MY400: Dr Alasdair Jones

MY421: Dr Chana Teeger (MT) and Dr Kate Summers (LT)

MY451: Dr Indraneel Sircar (MT) and Prof Jon Jackson (LT)

Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research) and MSc in International Relations (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different

methodologies. The course has three main components: 1. MY451 (MY451M in Michaelmas Term or MY451L in Lent Term) in **Introduction to Quantitative Analysis** - this course is intended for students with no previous experience of quantitative methods or statistics. Students who have already studied statistics and data analysis should take MY4M2. Plus: 2. MY400 **Fundamentals of Social Science Research Design** 3. MY421 **Qualitative Research Methods** (MY421M in Michaelmas Term or MY421L in Lent Term).

Teaching: See separate course outlines.

Formative coursework: See separate course outlines.

Indicative reading: See separate course outlines.

Assessment: Exam (33%, duration: 2 hours) in the summer exam period.

Project (33%, 3000 words) and research proposal (20%) in the ST. Class participation (4%) and research proposal (10%) in the MT. Students registered on this course will submit a research proposal and research design covering MY400 (1500 words due in MT, 4000 due in ST) and be assessed on MY400 class participation, project covering MY421 (3000 words) due in ST, and will take the exam paper MY4M1a (based on the MY451 syllabus) in ST.

MY4M2

Foundations of Social Research 2

This information is for the 2019/20 session.

Teacher responsible: Dr Daniele Fanelli

MY400: Dr Alasdair Jones

MY421: Dr Chana Teeger (MT) and Dr Kate Summers (LT)

MY452: Dr Daniele Fanelli (MT) and Dr Indraneel Sircar (LT)

Availability: This course is available on the MSc in European Studies (Research), MSc in International Political Economy (Research) and MSc in International Relations (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This programme is designed to give students a good introduction to quantitative and qualitative methods and to acquaint them with the strengths and limits of different methodologies. The course has three main components:

1 **MY452 Applied Regression Analysis.** This course is intended for students with some previous experience of quantitative methods or statistic, as described in the prerequisites for MY452. Students who have not previously studied quantitative methods or statistics should take MY4M1. The course can be taken either in MT (as MY452M) or in LT (as MY452L).

2 **MY400 Fundamentals of Social Science Research Design**

3 **MY421 Qualitative Research Methods** (either MY421M in Michaelmas Term or MY421L in Lent Term).

Teaching: See separate course outlines.

Formative coursework: See separate course outlines.

Indicative reading: See separate course outlines.

Assessment: Exam (33%, duration: 2 hours) in the summer exam period.

Project (33%, 3000 words) and research design (20%) in the ST. Class participation (4%) and research proposal (10%) in the MT. Students registered on this course will submit a research proposal and research design covering MY400 (1500 words in MT, 4000 due in ST) and be assessed on MY400 class participation, project covering MY421 (3000 words) due in ST, and will take the exam paper MY4M2a (based on the MY452 syllabus) in ST.

PB400

Psychological and Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Alex Gillespie QUE 3.03

Availability: This course is compulsory on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural

Psychology and MSc in Social and Public Communication. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

This course is a compulsory component of courses: PB401 Contemporary Social and Cultural Psychology; PB402 Organisational and Social Psychology; PB404 The Social Psychology of Communication; PB405 Foundations in Behavioural Science and PB403 Psychology of Economic Life.

Course content: PB400 provides a broad introduction to psychological and behavioural science through the lens of cutting-edge research conducted by faculty. Although the topics of research will be diverse, varying year-by-year, the course will draw out the core themes and debates that constitute the current state of the art.

The entry point for each lecture will be ongoing research conducted by faculty within the Department of Psychological and Behavioural Science. Through research on a wide range of phenomena, fundamental and cross-cutting concepts will be introduced, such as: attitudes, beliefs, common sense, communication, context, culture evolution, embodied cognition, entrepreneurship, group work, inequality & social stratification, leadership, motivation, narratives, organisational culture, power & status, science, social change, social identity, values and wellbeing. The common theme, across the course, is that the major problems we face today are created by human behaviour and thus that understanding how people think and act provides our best basis for intervening in those problems. Secondary themes will include: the importance of the micro context in shaping thought and behaviour; the role of institutions, social structures and culture in shaping thought and behaviour more generally; the scope for cultural variation between companies, groups and historical periods; the need for diverse methods and original theory; and, complementarity between lab and field research.

The course will also introduce the debates that are occurring at the forefront of research. Faculty will discuss the pushes and pulls of big data vs. small data and disciplinarity vs. inter-disciplinarity. The relative merits of psychological vs. behavioural interventions will be debated. And, in the ongoing tension between applied vs. fundamental research, faculty will question whose interests are being served by changing human behaviour.

Teaching: 20 hours of lectures and 9 hours of seminars in the MT.

Formative coursework: A 500 word annotated bibliography for any 2 readings from the first 3 lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

Indicative reading: Hogg, M., & Vaughan, G. (2013) *Social Psychology*. Harlow: Pearson.

Assessment: A 1500 word annotated bibliography for any 6 readings from the fourth and subsequent lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

PB401

Contemporary Social and Cultural Psychology

This information is for the 2019/20 session.

Teacher responsible: Prof Sandra Jovchelovitch QUE.3.25

Availability: This course is compulsory on the MSc in Social and Cultural Psychology. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

Course content: Selected topics in cultural and modern social psychology. The interface mind, society and culture, with a core focus on: 1) the relationship individual-society and 2) culture as a universal and as a particular context for human cognition, emotion

and behaviour. In addition: cultural transmission; ontogenesis and sociogenesis; intersubjectivity, perspectivity; thought and language; action and joint intentionality; mediation and artefacts; culture and the cross-cultural; global identities; intergroup relations; self and community; theory and research relevant to different fields of application including communication, education, racism and multiculturalism, health community development, social exclusion and disadvantage, mass media, amongst others. Topics are explored at different levels of analysis of social and cultural psychology: ontogenetic (individual self); sociogenetic (social interaction, inter-group relations); phylogenetic (evolutionary history of homo sapiens). Central to the syllabus is to sensitise and train students' to understand and manage cultural and societal variation in cognition, emotion and behaviour. Please note that fields of application and applied content may vary depending on faculty research.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Students taking PB401 will also be required to attend PB400 lectures, 10 x 120 mins (MT), and 9 x 60 mins discussion groups.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the MT.

A 500 word annotated bibliography for any two readings from the first three lectures from PB400 submitted in the Michealmas term

Indicative reading: M Tomasello, *The Cultural Origins of Human Cognition*. Harvard University Press, 1999. M Cole, *Cultural Psychology: A once and future discipline*. Harvard University Press, 1996. S Moscovici, *Social Representations: Exploration in Social Psychology*. Polity Press, 2000. L Vygotsky, *Mind in Society*. Harvard University Press, 1978. J Valsiner and A Rosa (Eds), *Cambridge Handbook of Sociocultural Psychology*, Cambridge University Press, 2007. S Jovchelovitch, *Knowledge in Context: Representations, community and culture*. Routledge, 2007. G Semin & G Echterhoff, *Grounding Sociality: Neurons, Mind and Culture*. Psychology Press, 2010. B Franks, *Cognition and Culture: Evolutionary Perspectives*. Palgrave Macmillan, 2011. J Israel & H Tajfel, *The Context of Social Psychology*, Academic Press, 1972; M Billig, *Arguing and Thinking: A Rhetorical Approach to Social Psychology*, CUP, 1987. K Deaux & G Philogene, *Representations of the Social*, Blackwell, 2001; R M Farr, *The Roots of Modern Social Psychology*, Blackwell, 1996; U. Flick, *The Psychology of the Social*. Cambridge University Press, 1998. H Tajfel, *Human Groups and Social Categories; Studies in Social Psychology*, CUP, 1981. J. Wertsch (ed.) *Culture, Communication and Cognition*. Cambridge University Press, 1985. In addition, reading lists on specific topics will be distributed during the course.

Assessment: Essay (80%, 5000 words) and coursework (20%, 1500 words) in the MT.

A 1500 word annotated bibliography for any six readings from the fourth and subsequent lectures from PB400 submitted in the Michealmas term which makes up 20% of overall course mark

PB402

Organisational Social Psychology

This information is for the 2019/20 session.

Teacher responsible: Dr Lucia Garcia QUE.3.23 and Dr Ilka Gleibs QUE.3.21

Availability: This course is compulsory on the MSc in Organisational and Social Psychology. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

Course content: The course addresses both the social psychology of organisations and social psychological processes within organisations. It also provides multidisciplinary coverage of the organisational contexts in which social psychologists may work in a variety of professional domains. A basic familiarity with social psychological methods is assumed, but their application within organisational processes and contexts will be examined in detail within the course. Issues and techniques in organisational analysis,

discourse, decision-making and change management are covered with emphasis on their social psychological aspects.

Lectures/seminars in the MT: These will cover key social psychological concepts and theories and their application to the understanding of organisations and the implementation of change processes. The specific topics covered include: 1) Introduction: critique of the tradition and logic underlying organisational psychology; history and frameworks in organisational analysis; "Scientific" management; Taylorism and Fordism; the Human Relations movement and the Socio-Technical approach; 2) Frameworks for analysis: for example, the cultural image of organisations; culture and identity in organisations; power, knowledge and organising; 3) People organising: for example, motivation; work groups and teams; decision-making; leadership, networking and collaborative work; 4) Implications for practice: for example, managing organisational change.

Professional Seminar Series in the MT: These will centre on discussion of practical and research applications in domains where organisational social psychological investigation and analysis may play a leading role. Each topic will be presented by an external expert working practically in the domain.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Students taking PB402 will also be required to attend PB400 lectures 10 x 120 minutes (MT) and seminars/discussion groups 9 x 60 minutes (MT).

Formative coursework: Formative essay to be submitted in MT along with a 500 word annotated bibliography for any 2 readings from the first 3 lectures from PB400 submitted in the Michaelmas term

Indicative reading: Reading lists on specific topics will be distributed during the course. Texts which are recommended for general use throughout the course are: S Clegg & C Handy, *Studying Organisations: Theory and Method*, Sage, 1998; E H Schein, *Organisational Psychology* (3rd edn), Prentice Hall, 1988; G Morgan, *Images of Organisation* (2nd edn), Sage, 1997; A Bryman (Ed), *Doing Research in Organisations*, Routledge, 1988; Hosking, D.-M., & Morley, I. E. (1991). *A Social Psychology of Organizing*. Hemel Hempstead: Harvester Wheatsheaf. K E Weick, *Sense Making in Organisation*, Addison Wesley, 1995. A Furnham, *The psychology of behaviour at work: The individual in the organisation*, Psychology Press, 2005; S Haslam, *Psychology in Organisations: The Social Identity Approach*, Sage, 2004. P Spector, *Industrial and Organisational Psychology: Research and Practice*, John Wiley & Sons, 2012.

Assessment: Essay (80%, 5000 words) and coursework (20%, 1500 words) in the MT.

A 1500 word annotated bibliography for any 6 readings from the fourth and subsequent lectures from PB400 submitted in the Michaelmas term which makes up 20% of overall course mark.

PB403

Psychology of Economic Life

This information is for the 2019/20 session.

Teacher responsible: Prof Saadi Lahlou QUE 3.26
Dr Frédéric Basso QUE 3.14

Availability: This course is compulsory on the MSc in Psychology of Economic Life. This course is not available as an outside option.

Course content: PB403 Psychology of Economic Life presents a social psychological approach different and complementary to the rational choice models which depict economic actors as information processors whose behaviour can be understood independently of specific contexts.

Framed by our distinctive approach to economic psychology (articulating history of thought and contemporary analyses), PB403 pays particular attention to the social environments that enable and support positive behaviour change in settings characterised by cultural diversity, a need for sustainability and alternative models to growth.

Beyond Homo Economicus, we consider Homo Sapiens with its rationality, but also with its embodied, emotional, social and cultural dimensions as well as the cognitive characteristics and drives inherited from evolution. Our framework acknowledges the importance of context and socio-technical constraints but uses psychology to explain social-psychological aspects of economic phenomena.

The problem addressed by the Psychology of Economic Life is therefore to explore new ways of constructing sustainable Production-Consumption Systems, and to manage the transition from the current state to a more sustainable one, taking into account actual humans (Homo Sapiens) rather than Homo Economicus. This exploration must be informed by a realistic psychology, with a critical but practical, constructive approach and concrete application to real cases, which is the object of this course.

Teaching: The course is delivered in Michaelmas Term over 20h of lectures; 5 weekly seminar sessions of 2 hours and 2 special seminar sessions of 2 hours (between weeks 7 and 9). Students taking PB403 will also be required to attend PB400 lectures, 10 x 2h (MT), and 9 x 1h seminars/discussion groups (MT).

Formative coursework: Students will be expected to produce one PB403 mini-essay in the Michaelmas Term.

They will also be expected to produce a 500-word annotated bibliography for any 2 readings from the first 3 lectures from PB400 the Michaelmas term.

Indicative reading: There is no single text for PB403 but one may find the following texts useful. Diamond, J. (2005). *Collapse. How societies choose to fail or succeed*. New York: Penguin Books. Farr, R. M. (1997). "The new economic mind: The social psychology of economic behavior: A. Lewis, P. Webley, and A. Furnham (eds.)" Book review. *Journal of Economic Psychology*, 18(6), 713-717. Goffman, E. (1959). *The presentation of self in everyday life*. New York: Doubleday Anchor books. Himmelweit, H. T. & Gaskell G. (1990). *Societal psychology*. London: Sage Publications, Inc. Johansson, T. (2000). *Social Psychology and Modernity*. Buckingham & Philadelphia: Oxford University Press. Kahneman, D. (2011). *Thinking, fast and slow*. New York: Farrar, Straus and Giroux. Lahlou, S. (2017) *Installation Theory. The societal construction and regulation of individual behaviour*. Cambridge: Cambridge University Press. Laland, K. N., & Brown, G. R. (2011). *Sense and nonsense: Evolutionary perspectives on human behaviour*. Oxford University Press. Lewis, A. (Ed.). (2008). *The Cambridge Handbook of Psychology and Economic Behaviour*. Cambridge: Cambridge University Press. Lewis, A., Webley, P., & Furnham, A. (1995). *The New Economic Mind*. Hemel Hempstead: Harvester/ Wheatsheaf Books. Mead, G. H. (1934). *Mind, self & society: from the standpoint of a social behaviorist*. Chicago: The University of Chicago press. Thaler, R. H., & Sunstein, C. R. (2008). *Nudge: Improving decisions about health, wealth, and happiness*. New Haven & London: Yale University Press. Webley, P., Burgoyne, C., Lea, S., & Young, B. (2001). *The Economic Psychology of Everyday Life*. Hove & Philadelphia: Psychology Press

Assessment: Essay (50%, 5000 words), essay (30%, 2000 words) and essay (20%, 1500 words) in the MT.

The 5000-word PB403 essay is written in groups, which will be marked collectively (i.e. all students in one group will receive the same mark). The 2000-word PB403 essay is an individual essay which will be marked separately.

Assessment is part of the learning process. Students must demonstrate their knowledge of theories learned in the course, and apply them to analyse a real case of economic phenomenon (business model, organization, public policy...) -and eventually propose realistic recommendations for an improvement of sustainability. The case must be different from cases studied in the option courses, and from the dissertation. This work is collective. The students will be assembled in groups and produce a case study collectively.

Both assessments are prepared by an unmarked formative.

The 1500-word PB400 essay is annotated bibliography for any 6 readings from the fourth and subsequent lectures from PB400.

PB404

The Social Psychology of Communication

This information is for the 2019/20 session.

Teacher responsible: Prof Martin Bauer QUE.3.04

Availability: This course is compulsory on the MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The course examines core theories towards a social psychology of communication. Issues raised will refer to verbal and non-verbal, face-to-face, rumours and mass mediated, as well as private and public, communal and strategic forms of communication. The second half of the course will provide an overview of applied communication research in various professional areas of public communication. Theories of communication covered in the course include evolutionary theory, classical rhetoric, diffusion research, pragmatics and relevance theory, semiotics and system theory and the theory of communicative action. Issues will be raised as to the critical analysis and the design of communicative action. Issues will be raised as to the critical analysis and the design of communication efforts in professional fields such as business corporations, NGOs, scientific professional bodies, health promotion, governments and political parties, police campaigns, and international organisations.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Students taking PB404 will also be required to attend PB400 lecture and discussion groups. (PB400 lecture 10 x 120 mins (MT) and 9 x 60 mins discussion groups).

Formative coursework: Students' will complete two formative assignments, one essay and a 500 word annotated bibliography for any 2 readings from the first 3 lectures from PB400 submitted in the Michealmas term

Indicative reading: No one book covers the entire syllabus; students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course. J Habermas, *Theory of Communicative Action*, Vol 1 + 2, Polity Press, 1997; R Heath & B Jennings, *Human Communication Theory and Research: Concepts, Contexts, and Challenges* (2nd edn), Lawrence Erlbaum, 2000; A Mattelart & Mattelart, *Theories of Communication: a Short Introduction*, Sage, 1998; D McQuail, *McQuail's Mass Communication theory* (4th edn), Sage, 2000; R Rice & C Atkin, *Public Communication Campaign*, Sage, 2000; E Rogers, *Diffusion of Innovation*, Free Press, 1995; D Sperber & D Wilson, *Relevance: Communication and Cognition*, Cambridge, 1995. Hook, D, B Franks, MW Bauer (2011) (eds) *The Social Psychology of Communication*, London, Palgrave.

Assessment: Essay (80%, 5000 words) and coursework (20%, 1500 words) in the MT.

A 1500 word annotated bibliography for any six readings from the fourth and subsequent lectures from PB400 submitted in the Michealmas term which makes up 20% of overall course mark

PB405

Foundations in Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Grace Lordan

Availability: This course is compulsory on the MSc in Behavioural Science. This course is available on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of behavioural science. To achieve this aim, the course is based around ten lectures covering: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions; 4) social and moral preferences; 5) biases and heuristics and rules of thumb; 6) the role of emotions in decision making; 7) dual-process models of behaviour; 8)

the power of nudges; 9) compensating behaviours; 10) ethical considerations.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures. Students taking PB405 will also be required to attend PB400 lecture and discussion groups. (PB400 lecture 10 x 120 mins (MT) and 9 x 60 mins discussion groups).

Formative coursework: Students' will complete two formative assignments, one essay of 1000 words and a 500 word annotated bibliography for any 2 readings from the first 3 lectures from PB400 submitted in the Michealmas term.

Indicative reading: DellaVigna, S. (2009). Psychology and economics: Evidence from the field. *Journal of Economic Literature*, 47(2), 315-72. Weber, E.U., and Johnson, E.J. (2009). Mindful judgment and decision making. *Annual Review of Psychology*, 60, 53-85. Loewenstein, G., Weber, E.U., Hsee, C.K., and Welch, N. (2001). Risk as feelings. *Psychological Bulletin*, 127, 267-286. Dolan P, Hallsworth M, Halpern D, King D, Metcalfe R, Vlaev I, *Influencing behaviour: the mindspace way*, *Journal of Economic Psychology*, 33, 1, 264-277, 2012. Thaler, R. and Sunstein, C. (2003) *Libertarian paternalism*, *American Economic Review*, 93, 2, 175-179.

Assessment: Essay (80%, 5000 words) and coursework (20%, 1500 words) in the MT.

A 1500 word annotated bibliography for any 6 readings from the fourth and subsequent lectures from PB400 submitted in the Michealmas term which makes up 20% of overall course mark.

PB410

Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Frederic Basso QUE.3.14

Availability: This course is compulsory on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The dissertation is an empirical investigation, carried out by the student, under the supervision of a member of staff. Research topics and methodologies vary considerably, but they must relate to the student's MSc Programme. All dissertation topics will need to be approved by a supervisor who is a faculty member of the Department of Psychological and Behavioural Science. The supervisor will advise the student, help provide information and bibliography, and provide feedback on the research.

Teaching: 10 hours of seminars in the LT. 7 hours of seminars in the ST.

Students will be supervised primarily in group laboratory meetings/seminars (15 hours); individual support will also be available as appropriate and necessary.

All students should attend all components timetabled as part of PB411

Formative coursework: Students will receive formative feedback from their supervisor on the following coursework (1,000 max words): A Dissertation Progress Report

Assessment: Dissertation (100%, 10000 words) post-summer term.

PB411

Methods for Social Psychology Research: Qualitative and Quantitative Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

- MSc in Organisational Social Psychology
- MSc in Psychology of Economic Life
- MSc in Social and Cultural Psychology
- MSc in Social and Public Communication

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will: 1) provide an overview of methodological issues for Psychological research; 2) cover core skills in research design in Psychology; and 3) provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and possibly research after the MSc.

Teaching: Teaching takes place in the MT, LT and ST. The course has four components:

- 13 hours of lectures on methodological issues and research design, as preparation for completing the course, PB410 Dissertation (LT)
- MY421M Qualitative Research Methods (MT)
- MY465 Intermediate Quantitative Analysis (MT)
- A series of non-compulsory and non-assessed specialist workshops in LT and ST on specific research methods that students can choose to attend for preparation of their dissertation.

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.

Indicative reading:

- Bauer, M. and Gaskell, G. (2000) *Qualitative researching with text, image and sound - a practical handbook* London, Sage
- Breakwell, G. Foot, H. and Gilmour. (1988) *Doing Social Psychology: Laboratory and Field Exercises*. Cambridge: Cambridge University Press.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Report (50%) in the ST.

- PB411: Not assessed
- MY421: 50% 3,000 word report (ST)
- MY465: 50% unseen examination (January Exam Period)

PB413 Half Unit

Experimental Design and Methods for Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi and Dr Dario Krpan

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: Behavioural science is the scientific study of human behaviour, and it combines research techniques from psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art techniques that stretch across the spectrum of both disciplines. The course covers the following topics: randomised controlled experiments in behavioural science, causality, selection bias; behavioural science experiments spanning the continuum spectrum from the lab to the field; principles of experimental design; best practices in modern behavioural science experiments; measuring preferences,

attitudes, beliefs, willingness-to-pay; behavioural game theory and experimental games of strategic interaction; designing behavioural priming experiments and measures that tap into implicit cognition; state-of-the-art physiological research techniques; tests of hypotheses and sample size calculations for experiments in theory and practice; p-curve analysis; regression analysis of experimental data in theory and practice; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

The course is delivered in Michaelmas Term over 10 lectures of 1 hour (1 per week, over weeks 1-5, and 7-11) and 10 weekly seminar sessions of 1 hour (1 per week, over weeks 1-5, and 7-11).

Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures and Seminars:

Week 1

- Lecture 1: Introduction to the Course. The Beauty of Behavioural Science Experiments: Why Randomization Solves the Selection Bias.
- Seminar 1: Building a Simple Behavioural Science Experiment Using Qualtrics.

Week 2

- Lecture 2: Behavioural Science Experiments: from the Lab to the Field. Best Practices in Modern Behavioural Science Experiments.
- Seminar 2: Best Experimental Practices in Practice.

Week 3

- Lecture 3: Principles of Experimental Design.
- Seminar 3: Building a Simple Game of Strategic Interaction: Introduction.

Week 4

- Lecture 4: Strategic Decision-Making: Introduction to Behavioural Game Theory.
- Seminar 4: Building a Simple Game of Strategic Interaction.

Week 5

- Lecture 5: Behavioural Priming Techniques.
- Seminar 5: Designing Behavioural Priming Experiments.

Week 6

- No lecture: Reading week

Week 7

- Lecture 6: System 1 in Action: Capturing Implicit Cognition.
- Seminar 6: Building a Simple Task to Measure Implicit Cognition.

Week 8

- Lecture 7: Beyond Economics and Psychology: State-of-the-art Physiological Research Techniques.
- Seminar 7: Physiological Research Techniques in Practice.

Week 9

- Lecture 8: Tests of Hypotheses and Sample Size Calculations for Experiments. Useful Rules of Thumb. P-hacking.
- Seminar 8: Statistical Tests and Sample Size Calculations for Experiments in Practice. P-curve analysis in practice.

Week 10

- Lecture 9: Understanding the Mechanisms Behind Behaviour Change: Experimental-Causal-Chain, Measurement-of-Mediation, and Moderation-of-Process Designs.

- Seminar 9: Analysis of Experimental Data in a Regression Framework in Practice. Experimental-Causal-Chain, Mediation Analysis, and Moderation-of-Process in Practice.

Week 11

- Lecture 10: Measuring Preferences, Attitudes, Beliefs, Willingness-to-pay: State-of-the-art Measures.
- Seminar 10: Experimental-Causal-Chain, Mediation Analysis, and Moderation-of-Process in Practice.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

For the formative assignment, you will work in small groups (3-4 students) to produce a 15-minute presentation in which you will need to propose a design and implementation of a behavioural science experiment. Alternatively, you can focus on a piece of research that has already been conducted and produced the data you are planning to use in the future, and you can analyse

the design and implementation of this research. More precise instructions about the assignment will be given to you at the start of the course.

Assessment: Report (100%) in the ST.

You will be expected to write a 3,000 word report. The reports will need to be submitted individually and will require you to elaborate individually on the group-work undertaken as part of the formative assignment. More precise instructions about the assignment will be given to you at the start of the course.

PB414

Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option. Students will have to choose between PB411 and PB414.

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will:

1. provide an overview of methodological issues for Psychological research;

2. cover core skills in research design in Psychology; and
3. provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and possibly research after the MSc.

Teaching: Teaching takes place in the MT, LT and ST. The course has four components:

- 13 hours of lectures on methodological issues and research design, as preparation for completing the course, PB410 Dissertation (LT)
- MY421M Qualitative Research Methods (MT)
- MY452M Applied Regression Analysis (MT)
- A series of non-compulsory and non-assessed specialist

workshops in LT and ST on specific research methods that students can choose to attend for preparation of their dissertation.

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.

Indicative reading:

- Bauer, M. and Gaskell, G. (2000) *Qualitative researching with text, image and sound - a practical handbook* London, Sage
- Breakwell, G. Foot, H. and Gilmour. (1988) *Doing Social Psychology: Laboratory and Field Exercises*. Cambridge: Cambridge University Press.
- Haslam, S.A., & McGarty, C. (2014). *Research Methods and Statistics in Psychology*. London: Sage.
- Miell, D. and Wetherwell, M. (1998) *Doing Social Psychology*. Milton Keynes: Open University Press.
- Agresti, A and Finlay, B, *Statistical Methods for the Social Sciences*. A course pack will be available for download online. Additional reading will be recommended.

Assessment: Report (50%) and test (50%).

- PB411: Not assessed
- MY421: 50% 3,000 word report (ST)
- MY452M: 50% unseen examination (Summer Period)

PB416 Half Unit

Cognition and Culture

This information is for the 2019/20 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Anthropology (Religion in the Contemporary World), MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines recent directions in research relating to the relationships between mind and culture. Specific content will include a variety of theoretical issues, for example: relationships between social facts and psychological facts; naturalistic and non-naturalistic concepts of culture; symbolic culture; cultural relativity and universals; evolutionary and developmental constraints on the relations between mind and culture; communication, cultural transmission and change. These issues will be discussed with reference to specific domains of investigation, such as: emotions, representations of religion, race and natural kinds; pragmatics and communication; and social divisions of labour in meaning and representation, including deference and expertise.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 presentations, 1 quiz and 1 other piece of coursework in the LT. Will consist of:

- a plan for an answer to an essay or case study question
- group presentations of core readings over the term
- a self-administered multiple choice quiz

Indicative reading: Detailed references and a synopsis of lectures and class topics are distributed in the first lecture of the series, and are available in S315 and in Outlook/Public Folders/Departments/Social Psychology. The following are of general use:

- S Atran, *Cognitive Foundations of Natural History*, Cambridge University Press, 1990;
- P Boyer, *The Naturalness of Religious Ideas*, University of California Press, 1996;
- D E Brown, *Human Universals*, McGraw-Hill, 1991;
- D M Buss & D T Kenrick, *Evolutionary Social Psychology*, 1998, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), *The Handbook of Social Psychology*, Vol 2, McGraw-Hill, pps. 982-1026;
- M Cole, *Cultural Psychology*, Harvard University Press, 1996;
- S T Fiske et al, *The Cultural Matrix of Social Psychology*, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), *The Handbook of Social*

- Psychology, Vol 2, McGraw-Hill;
- B Franks, *Culture and Cognition: Evolutionary Perspectives*, Palgrave MacMillan, 2011;
 - L Hirschfeld, *Race in the Making: Cognition, Culture and the Child's Construction of Social Kinds*, MIT Press, 1996;
 - R Nisbett & D Cohen, *The Culture of Honor: The Psychology of Violence in the South*, Westview Press, 1995;
 - P B Smith & M H Bond, *Social Psychology Across Cultures* (2nd edn), Prentice Hall, 1998;
 - D Sperber, *Explaining Culture*, Cambridge University Press, 1996.

Assessment: Coursework (100%, 3000 words) in the LT.

Students may choose to write **either**

- a 3000 word essay **or**
- a 3000 word case study.

PB417 Half Unit Consumer Psychology

This information is for the 2019/20 session.

Teacher responsible: Dr Liora Moskovitz

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped.

Course content: The objectives of the course are: 1) to provide students with an understanding of the social psychological and cognitive processes behind the consumption of goods and services; 2) to explore alternative modes of relationship with users/consumers than the current ones which are based mostly on market and competition; and 3) to prepare students to build better business models (e.g. social entrepreneurship, more sustainable, and so on) for the provision of goods and services.

The course will address the psychology of consumption at different levels of analysis: individual, group and societal. It will try to ground this psychology in fundamental theories that will allow students to develop a mental model of human behaviour as it relates to consumption.

This is not a standard marketing or consumer research course. It is not just about brand territories and market shares, but about how understanding various psychological processes in conjunction with these other forces can provide us with tools to improve the world.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Essay plan submitted in the LT.

Indicative reading:

- Griskevicius, V. & Kenrick, D.T. (2013). Fundamental motives: How evolutionary needs influence consumer behaviour. *Journal of Consumer Psychology*, 23 (3), 372-386.
 - Cialdini, R.B. (2001). *Influence: Science and Practice* (4th Edt.). New York: Harper Collins.
 - Belk, R.W. (1988). Possessions and the Extended Self. *Journal of Consumer Research*, 15(2), 139-168.
 - Akerlof, G. A., & Shiller, R. J. (2010). *Animal spirits: How human psychology drives the economy, and why it matters for global capitalism*. Princeton University Press.
 - Bendapudi, N. & Leone, R.P. (2003). Psychological Implications of Customer Participation in Co-Production. *Journal of Marketing*, 67 (January), 14-28.
 - Frank, R. H. (2012). *The Darwin economy: Liberty, competition, and the common good*. Princeton University Press.
 - Rysman, M. (2009). The Economics of Two-Sided Markets. *Journal of Economic Perspectives*, 23(3), 125-143.
 - Sobel, J. (2005). Interdependent Preferences and Reciprocity. *Journal of Economic Literature*, 43(2), 392-436.
 - Waring, T. M., Goff, S. H., & Smaldino, P. E. (2017). The coevolution of economic institutions and sustainable consumption via cultural group selection. *Ecological Economics*, 131, 524-532.
- Additional readings will be recommended throughout the course.

Assessment: Essay (100%, 3000 words) in the LT.

The assignment is understood as part of the learning, to provide the transferable skills of analysing a real case and making sound recommendations to make the world a better place. In the first part, 'memorandum' (1,000 words), you will be asked to prepare a memorandum or open letter to the head of an organisation of your choice, with recommendations that improve the organisation in a way that makes the world a better place. The recommendations must be realistic, including making being achievable and making business sense. In the second part of the essay, 'justification' (2,000 words), you will justify the specific recommendations presented in the memorandum with reference to the theoretical and empirical literature and concepts. You can read examples of previous years assignments at <http://www.lse.ac.uk/DPBS/videos/PS456.aspx>. We encourage the best essays to be published as open letters.

PB418 Half Unit Corporate Communications

This information is for the 2019/20 session.

Teacher responsible: Dr Ben Shenoy, KSW.5.13

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The different activities encompassed by the concept of corporate communication affect each one of us in various guises: as employees, customers, citizens, investors or, more generally, as observers of today's world. It is therefore essential to develop a critical understanding of the different practices associated with corporate communication. Future practitioners also need this critical perspective so as to understand better the challenges involved in the development and implementation of corporate communication programmes. The objectives of the course are two-fold: 1) to provide an introduction to corporate communication, here understood as a set of activities undertaken by organisations in order to establish favourable corporate images and reputations with all of an organisation's stakeholder groups; and 2) to underline how a better understanding of key social psychological concepts can contribute to the overall management and effectiveness of organisations and corporate communication.

This course is designed to apply relevant social psychological theory to gain insight into the changing world of corporate communication.

Teaching: 15 hours of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Indicative reading: J Cornelissen, *Corporate Communications: A Guide to Theory and Practice*. Sage, 2014; J M T Balmer & A Stephen (eds), *Revealing the Corporation: Perspectives on Identity, Image, Reputation and Corporate Branding*, Routledge, 2002; Harvard Business Review on Crisis Management, Harvard School Press, 2000; C B M Van Riel & C J Fombrun, *Essentials of Corporate Communication: Implementing Practices for Effective Reputation Management*, Routledge, 2007. Ashforth, B.E., & Mael, F. (1989). Social identity theory and the organisation. *Academy of Management Review*, 14, 20-39. Kramer, R.M. (2010). Collective trust within organisations: conceptual foundation and empirical insights, *Corporate Reputation Review*, 13, 82-97. Hewstone, M.W., Strobe, W. and Jonas, K. (eds) (2012) *Introduction to Social Psychology*, 5th Edn. Oxford: Blackwell. Chapters 1, 12 and 13); Hogg, M.A. and Vaughan, G.M. (eds) (2012) *Social Psychology*, 6th

Edn. Harlow: Prentice Hall. Chapters 5, 6, 7, 8, 9 and 15.

Assessment: Essay (100%, 3000 words) in the LT.

PB421 Half Unit

Happiness

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Dolan QUE.3.08

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Behavioural Science, MSc in Environmental Economics and Climate Change, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

This is a capped course subject to the size of the room that is allocated for it.

In teaching week 1 places will be allocated to students from the Department of Psychological and Behavioural Science on a first come first served basis. At the start of week 2 any remaining places will be allocated to students from other departments, again on a first come first served basis.

Course content: This course aims to introduce students to the main concepts and tools of the science of happiness. To achieve this aim, the course is based around ten lectures covering: 1) what is wellbeing?; 2) research on happiness; 3) evaluations of happiness; 4) experiences of happiness; 5) adaptation and attention; 6) mistakes about happiness; 7) happiness by design; 8) valuing non-market goods using preferences; 9) valuing non-market goods using happiness; 10) happiness as a (the?) policy objective.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures Formative coursework.

Formative coursework: Students will be expected to produce 1 essay (1000 words) in the LT.

Indicative reading: Dolan P. Happiness by design: Finding pleasure and purpose in everyday life, Penguin 2016. Dolan, P. Happy Ever After: Escaping the Myth of the Perfect Life, Allen Lane, 2019. Assessment: Essay (100%, 2500 words) in the ST.

PB422 Half Unit

Health Communication

This information is for the 2019/20 session.

Teacher responsible: Dr Jennifer Sheehy-Skeffington

Availability: This course is available on the MSc in Behavioural Science, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Global Population Health, MSc in Health and International Development, MSc in Media, Communication and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course centres on the application of social psychology to the challenge of health communication in a global context. While considering both health and communication in their widest sense, it focuses primarily on the practice of health promotion and its conceptual underpinnings. We will begin with an introduction to health psychology and expert-led approaches to health communication, before moving on to consider health and illness in their wider social and societal context. The final section of the course considers community development and social justice approaches that put empowerment and participation at their centre, enabling us to close with a critical yet hopeful appraisal of the future of health communication. Throughout, we will view the individual as a bio-psycho-social system, located within families, workplaces, communities, local and global cultures, unequal power hierarchies, and rapidly changing social settings. Through lectures, readings and seminar discussions, we will encounter theoretical debates about determinants of health and health-related behaviours, the nature of health communication, and the processes through which communication impacts on health. At the same time, we will consider the implications of these debates for health promotion campaigns and policies, learning about real-world examples through guest lectures, and gaining hands-on experience in designing and critiquing health communication campaigns through practical exercises.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Berry, D. (2007) *Health Communication: theory and practice*. Buckingham: Open University Press. Crossley M. (2000) *Rethinking health psychology*. (Ed) (2008). *Communication for development and social change*. Los Angeles: Sage. Tones K. and Green J. (2006). *Health promotion: planning and strategies*. London: Sage.

Assessment: Essay (100%, 3000 words) in the LT.

PB424 Half Unit

Issues in Organizational and Social Psychology: Organizational Life

This information is for the 2019/20 session.

Teacher responsible: Mr Barry Rogers, KSW.5.13

Availability: This course is available on the MSc in Behavioural

Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on degrees without a psychology component may only attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible. This course is capped at 25 students.

Course content: In recent years, much has been made of the demise of the traditional work organisation and with it, traditional organisational life. In popular rhetoric, globalisation, the rise of the knowledge economy, ICT and the credit crunch have all trumpeted the dawn of a very different world. The reality of the situation would seem to be far more complex.

So how do we understand and explain this complexity? This basic question has prompted huge soul searching within the social sciences as comfortable assumptions about the analysis of our world have been shown wanting. For many the current behavioural 'turn' throughout many of our disciplines act as an alternative lens for making sense of our reality - this has as its core the tools and approaches of social psychology.

The aim of the course is to give a social psychological perspective on the elements of continuity and change surrounding contemporary organisational life. It will focus in particular on the blurring of boundaries within our key organizational relationships: with employees, customers, clients, and stakeholders. Its primary objective is to facilitate students in developing a critical and reflective understanding of these emerging processes.

The course is informed throughout by a dual mandate. A rigorous approach to theory will be developed within the context of contemporary organisational issues, and current topics of debate. This essential relationship between theory and practice is a central feature of the course - outside speakers and practitioners are used throughout to supplement the learning for each topic and various forms of social media are employed to connect with an extended community of practice.

The course will address emerging organisational questions such as:

Perspectives: how do we make sense of the complexity of organisational life?

Why do we work? How do different generations engage with work?

The rise of the BlackBerry: have we moved from the workplace to the 24/7 workspace?

Organisational time: is work life-balance a pipe dream?

After multiculturalism where now for organisational equality, diversity and inclusion?

Corporate Social Responsibility: how do organisations relate to wider stakeholders?

Customer, client or 'partner'? Co-creation as the dynamic for growth.

Beyond the 'ivory tower': how do we relate organisational theory to practice?

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: One formative piece of coursework to be submitted in the LT.

Indicative reading: Detailed references and class topics are distributed in the first lecture of the series. The following represents some key readings from the course:

Beck, U. (2000) *The Brave New World of Work*. Cambridge: Polity Press; Berger, P. & Luckmann, T. (1967) *The social construction of reality*. London: Penguin; Clegg, S.R. & Kornberger, M. Assessment: Essay (100%, 3000 words) in the ST.

PB425 Half Unit

Identity and Group Dynamics in Organisational and Social Settings

This information is for the 2019/20 session.

Teacher responsible: Dr Ilka Gleibs, QUE 3.21

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Research Methods, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology component may attend subject to numbers, their own degree regulations and at the discretion of the Teacher responsible.

Pre-requisites: Students who come to this course without any background in social psychology are expected to familiarise themselves with the relevant literature. To this end, we strongly suggest that those students read the following books:

Hogg, M.A. & Vaughan, G. (eds) (2017). *Social Psychology*. 8th edition. Harlow: Pearson

Brown, R. (2000). *Group processes: Dynamics within and between groups*. 2nd edition. Oxford: Blackwell Publisher.

Course content: Group dynamics and interpersonal skills are an essential element in any successful organisation (in the broadest sense) and often provide a competitive advantage in managing organisations. Group dynamics directly affect the ability of a team to think, learn, and innovate together.

This course provides students with a critical understanding of the different theories and practices associated with group dynamics in organisational and social settings. The objectives of the course are two-fold:

- To establish past and present theories of group dynamics by introducing concepts used by psychologists to understand and improve group behaviour.
- To apply and critically evaluate how group dynamic theories help us to explain and predict real-life experience.

Therefore the course aims at highlighting how a better understanding of key social psychological concepts can contribute to the overall management and effectiveness of organisations and groups in various settings.

Examples of topics that will be covered include: Why group dynamics? Influence and Power; Identity and Inclusion; Crowds and collective behaviour; The 'Social Cure'- importance of groups on mental and physical health; Performance and Decision-making; Diversity management; Organisational change; Group dynamics and the internet.

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Indicative reading: Introduction to the topic:

Forsyth, D. (2014). *Group dynamics*. Cengage Learning. Available at LSE Library Course collection books HM716 F73. Related webpage: <https://donforsythgroups.wordpress.com/>. Have a look at the journal 'Group Dynamics' for an overview: <http://www.apa.org/pubs/journals/gdn/>. Hogg, M. A., & Tindale, S. (Eds.). (2008). *Blackwell handbook of social psychology: Group processes*. John

Wiley & Sons. Haslam, S.A., (2004). *Psychology in Organisations. A Social Identity Approach*. London: Sage. Tajfel, H. & Turner, J. (1979). An integrative theory of intergroup conflict. In Austin, & Worchel. *The social psychology of intergroup relations*, Monterey: Brooks/Cole; pp 33-47.

Assessment: Essay (100%, 3000 words) in the LT.

PB426 Half Unit

Knowledge Processes in Organisations

This information is for the 2019/20 session.

Teacher responsible: Dr Lucia Garcia-Lorenzo QUE.3.23

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course explores organisations in the 21st century and the challenges they face. We particularly focus on what we can accomplish through the acquisition and creation of new management and organising knowledge; its sharing and transmission as well as how we can improve its use. We will explore the processes of knowing and learning and the varied ways in which they support people working in a number of contexts, from project teams within single organisations to inter-organisational partnerships, networks and alliances. We will work together in lectures, seminars and workshops to understand both theoretically and practically how we create, disseminate and share knowledge in all types of 21st century organisations and work settings.

Concretely, the course addresses the following questions :

1. What is organisational knowledge? Lectures will explore the differences and overlaps between personal, social/organisational and cultural knowledge and between the processes of learning and knowing.
2. How do we create new knowledge in organisations and work settings? To answer this question we will look into processes of creativity, innovation and entrepreneurship.
3. How can we efficiently share/transmit knowledge in organisations? The course will address the challenges generated through the use of new technologies in the work place, the use of stories and narratives as a mode of knowledge transmission, the development of collaborative practices, and power relations in organisations.
4. How do we 'store' and use current organisational and personal knowledge? To answer this question lectures will address the uses of organisational history and memory as well as look into how we practice knowledge in every day organisational work.

The focus of the course is both theoretical and practical. Students' will be expected to engage with both current theoretical debates and emerging practical issues in organisational life through lectures, seminars and practical workshops.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. Students will be expected to make extended use of the course intranet - for on-line discussions and group presentations.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are introductory texts of general use: Amabile, T. A., & Khaire, M. (2008). *Creativity and the role of the leader*. Cambridge, MA: Harvard Business School Publishing; Davenport, T.H. & Prusak, L. (1998). *Working knowledge: How organisations manage what they know*. Harvard Business Press; Drucker, P. (2014). *Innovation and entrepreneurship*. Routledge; Gabriel, Y. (Ed.). (2004). *Myths, stories, and organizations: Premodern narratives for our times*. Oxford University Press on Demand; Huxham, C.,

& Vangen, S. (2013). *Managing to collaborate: The theory and practice of collaborative advantage*. Routledge; Weick, K. E. (1995) *Sensemaking in organisations*. London: Sage. "I have never let my schooling interfere with my education." Mark Twain. If you like to read/use social media, you might want to look beyond academic materials into these other sources of knowledge that explore topics we will discuss in the course: Bregman, R. (2017). *Utopia for realists: And how we can get there*. Bloomsbury Publishing; Clay, A., & Phillips, K. M. (2016). *The Misfit Economy: Lessons in Creativity from Pirates, Hackers, Gangsters and Other Informal Entrepreneurs*. Simon and Schuster; Frayne, D. (2015). *The refusal of work: The theory and practice of resistance to work*. Zed Books Ltd.; Harari, Y. N. (2018). *21 Lessons for the 21st Century*. Random House; How leaders use storytelling to share knowledge and influence followers: e.g. Obama's fire-up-ready-to-go story: [https://www.youtube.com/watch?v=5AhRqg0ADbk](https://www.youtube.com/watch?v=5AhRqg0ADbk;); IDEO CEO Tim Brown talks about the powerful relationship between creative thinking and play: https://www.ted.com/talks/tim_brown_on_creativity_and_play?referrer=playlist-the_creative_spark

Assessment: Essay (100%, 3000 words) in the LT.

PB428 Half Unit

Political Psychology: Inequality and Prejudice

This information is for the 2019/20 session.

Teacher responsible: Dr Cathryn Nicholson

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students from all departments may attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible

Course content: The course concerns the social psychological underpinnings of contemporary inequality and conflict between groups. It introduces students to political psychology through theories focused on individual attitudes, intergroup dynamics, and ideological discourse. It then applies these theories to the understanding of contemporary issues concerning intergroup inequality. We will explore the psychosocial processes underpinning racism and prejudice, asking why some conflicts are so intractable, and why some people turn to extremism and violence. We will consider political participation in its conventional and non-conventional forms, asking why people vote the way they do, and when they will turn to the streets to protest. We will also apply a political psychology lens to examine contemporary challenges such as migration, populism, and economic inequality. Students will be equipped with the conceptual tools to consider the psychological antecedents and consequences of inequality in its various forms: to understand why intergroup hierarchy is so persistent, and how it might change.

Lectures aim to achieve a balance between theoretical and applied issues, critically investigating the ways in which psychology can enhance our understanding of intergroup relations and inequality, and also contribute to broader social and political debates.

Through integrating evolutionary, cognitive, social, ideological, and societal perspectives, we will be in a position to take stock of the field of political psychology and where it might go.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Two response papers (each 600 words), in which students provide their reflection on and critical reaction to material encountered in the course.

Indicative reading: Augoustinos, M. & Reynolds, K. (2001). *Understanding Prejudice, Racism and Social Conflict*. London: Sage. Bar-Tal, D. (2011). *Intergroup conflicts and their resolution: A Social Psychological Perspective*. Hove: Psychology Press. Billig, M. (1995). *Banal Nationalism*. London: Sage. Billig, M. (1996). *Arguing and thinking: A rhetorical approach to social psychology*

(2nd ed.). Cambridge: CUP. Dixon, J., Levine, M., Reicher, S., & Durrheim, K. (2012). Beyond prejudice: Are negative evaluations the problem and is getting us to like one another more the solution?. *Behavioral and Brain Sciences*, 35(6), 411-425. Durrheim, K. & Dixon, J.A. (2005). *Racial Encounter: The Social Psychology of Contact and Desegregation*. London: Psychology Press. Guinote, A. E., & Vescio, T. K. (2010). *The social psychology of power*. Guilford Press. Hammack, P. (2018). *The Oxford Handbook of Social Psychology and Social Justice*. Oxford Library of Psychology. Hogg, M. A., & Abrams, D. (Eds.). (2001). *Intergroup relations: Essential readings*. Psychology Press. Howarth, C. & Andreouli, E. (2017) *The Social Psychology of Everyday Politics*. Oxon and New York: Routledge. Huddy, L., Sears, D. O., & Levy, J. S. (Eds.). (2013). *The Oxford handbook of political psychology*. Oxford: Oxford University Press. Jost, J. & Sidanius, J. (2004). *Political Psychology*. Hove: Psychology Press. (2001). *Self and Nation*. London: Sage. Sen, R., Wagner, W. & Howarth, C. (2014). *Secularism and religion in multi-faith societies*. London: Springer. Tileaga, C. (2013). *Political Psychology: Critical perspectives*. Cambridge University Press.

Assessment: Essay (100%, 3000 words) in the LT.

PB429 Half Unit

Science Communication and Controversies

This information is for the 2019/20 session.

Teacher responsible: Prof Martin Bauer QUE.3.04

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Consider vaccinations, climate change, nuclear energy, CRISPR or genetically-modified crops and food. Regarding these developments, science is a cultural authority and a voice of reason, but increasingly also a protagonist. No surprise therefore that science is discussed controversially, battling with 'fake news'. In this course we will look at these and other issues and ask the question more generally: what is the role of public controversy, science communication, and public opinion for the development of science and technology? The classical diffusion model (Roger, 1962) remains influential: scientists discover, engineers innovate, and social scientists market the novelty and provide public acceptance. This model is however more wishful thinking than realistic; valid at most when there is no or little public controversy. More commonly, techno-scientific innovations encounter resistance which refocuses attention, strengthens the collective, evaluates on-going developments and urges strategic adaptation (Bauer, 1991, 1995, 2002, 2015, 2017). In light of this, we will examine science communication and its formats of public engagement in relation to the historical controversies over nuclear power, genetic engineering and IT leading into emergent mobilisations for nanotechnology, genetic enhancement, synthetic biology, AI, autonomous driving and robotic automation. Students' are expected to appreciate theory driven empirical research.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Baranger P and B Schiele (2013) *Science Communication today – international perspectives, issues and strategies*, Nancy Journee Hubert-Curien, CNRS Editions.

Bauer MW, P Pansegrau, and R Shukla (2019) (eds) *The Cultural Authority of Science – comparing across Europe, Asia, Africa and the Americas*, London, Routledge. Bauer, M.W. (2015). *Atoms, Bytes & Genes: public resistance and techno-scientific responses*. New York: Routledge. Bauer, M.W. (2013). *Bauer MW and M Bucchi (2007) (eds) Journalism, Science and Society – science communication between news and public relations*, NY, Routledge. Bauer, M.W. & Gaskell, G. (Eds) (2002). *Biotechnology - the making of a global controversy*. Cambridge, CUP. Bucchi M and B Trench (2014) (eds) *Routledge Handbook of Public Communication of Science and Technology*, 2nd edition, London, Routledge. Godin B and D Vinck (2017) (eds) *Critical Studies of Innovation. Alternative approaches to the pro-innovation bias*, Cheltenham, Edward Elgar. Gregory J and S Miller (1998) *Science in Public – communication, culture, and credibility*, Cambridge MA, Perseus. Marteau, T. & Richards, M.P.M. (1996) (Eds), *The troubled helix: Social and psychological implications of the new human genetics*, CUP. Roger, E.M. (1996). *Diffusion of innovation*, 4th edition. New York: Free Press. Weart, S.R. (1988). *Nuclear fear: A history of images*, Harvard University Press. Each session will have its own particular readings, divided into essential texts and additional readings. This will be revised on an annual basis. No one text covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (100%, 3000 words) in the LT.

PB431 Half Unit

Social Psychology of Economic Life: Advanced Topics

This information is for the 2019/20 session.

Teacher responsible: Dr Frederic Basso QUE.3.14

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour), MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. Students on degrees without a psychology may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.

Course content: The idea of a social psychology of economic life is not obvious. From the point of view of mainstream economics, economic life – usually understood as the production, distribution, and consumption of goods and services – is under the scope of economics. As a mathematical science, economics is, to some extent, a rejection of social and psychological dimensions in the analysis of economic life. As the "queen of social sciences", mainstream economics was even considered by some authors as the framework (the so-called "economic imperialism") for studying social and psychological processes out of the economic life. Yet, some of the most important advances over the last four decades in the understanding of human economic behaviour (and its link to some of the most pressing societal issues nowadays) are derived from concepts and methods of psychology and other social sciences. PB431 presents how social psychology (broadly interpreted to include micro-sociology, cultural anthropology and social neuroscience) is the key to understanding real-world economic life by taking into account cognitive, affective and social processes, and also to contributing to better solutions to societal problems.

Main concepts: cognitive dissonance, analytic/experiential systems in decision-making, metaphors and decision-making, narratives and decision-making, self/extended self in consumption, dramaturgy/staging, social roles, face-to-face interactions, emotional labour/dissonance, gift economy, sharing economy, social group (inclusion/exclusion), stigma, social norms, nudging, disenchantment of the economic world, post-modern hyper-

realities, experience economy, resistance to persuasion (inertia, scepticism, reactance), resistance to consumption (avoidance, minimisation, boycott/active rebellion).

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: Reading lists will be provided for each topic, the following are of general use; S E G Lea, R M Tarpy & P Webley, *The Individual in the Economy*, Cambridge University Press, 1987; A Lewis, P Webley & A Furnham, *The New Economic Mind: The social psychology of economic behaviour*, Harvester, 1995.

Assessment: Essay (100%, 3000 words) in the LT.

PB432 Half Unit Social Representations

This information is for the 2019/20 session.

Teacher responsible: Prof Sandra Jovchelovitch QUE.3.25

Availability: This course is available on the MSc in Behavioural Science, MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on social representation as a theory in social and cultural psychology and as phenomena in social life. It explores concepts, empirical studies and fields of application of social representations. The course aims to equip students with in-depth understanding of the production, transformation and contestation of representations in public spheres. Through an examination of concepts and key studies in the field, the course explores the dynamics of social thinking and the power of representations to construct meanings and social realities. It highlights process of communication and contestation between different knowledge systems and the dynamics of social change. The course covers: 1) origins and theoretical roots of social representations in the field of socio-cultural psychology and situated cognition; 2) processes and functions of social representation, including dialogicality, cognitive polyphasia, relating to the unfamiliar, semantic enablers and barriers, and the future of common sense vis-a-vis systemic encroachment and artificial intelligence; and 3) ongoing research on how communities think and the transformation of common sense in contemporary societies, in areas such as self and community, cultural encounters/cultural conflict, health, professional practices, urban transformations, social exclusion (these can vary depending on research at hand).

Teaching: 15 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: An essay plan of not more than 500 words is required.

Indicative reading: Key texts: G Sammut, E Andreouli, G Gaskell, and J Valsiner (Eds). *Resistance, stability and social change: A handbook of social representations*. Cambridge University Press, 2015. S Moscovici, *Social Representations*. Polity Press, 2000; S Moscovici, *Psychoanalysis: its image and its public*. Polity Press, 2008. S Jovchelovitch, *Knowledge in Context: Representations, community and culture*. Routledge, 2007. I Markova, *Dialogicality and Social Representations*. CUP, 2003. D Jodelet, *Madness and Social Representations*, Harvester/Wheatsheaf, 1991; W Wagner and N Hayes, *Everyday Discourse and Common Sense*, Palgrave, 2005. K Deaux & G Philogène, *Representations of the Social: Bridging Theoretical Perspectives*, Basil Blackwell, 2001.

Other texts: R M Farr & S Moscovici (Eds), *Social Representations*, Cambridge University Press, 1984; Howarth, C. "A social representation is not a quiet thing": Exploring the critical potential of social representations theory." *British Journal of Social Psychology*, 2006, 45: 65-86.. I Marková & S Jovchelovitch (Guest Editors) *Journal for the Theory of Social Behaviour*, Special Issue on Psychoanalysis: its Image and its Public, 38(4) 2008. H Joffe,

Risk and 'The Other'. Cambridge University Press, 1999. U Flick, *The Psychology of the Social*. Cambridge: Cambridge University Press, 1998. G Maloney and I Parker, *Social Representations and Identity: content, process and power*, Palgrave, 2007.

Assessment: Coursework (100%, 3000 words) in the ST.

PB434 Half Unit Behavioural Science in an Age of New Technology

This information is for the 2019/20 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: When psychology and economics got "married", the product was behavioural science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) outline how they supplement and extend commonly used tools of behavioural change; and c) examine how they can be used to propel behavioural science into the future. The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. The course is delivered in Lent Term over 10 lectures of 1 hour (1 per week, over weeks 1-5, and 7-11) and 10 weekly seminar sessions of 1 hour (1 per week, over weeks 1-5, and 7-11). Students on this course will have a reading week in Week 6, in line with departmental policy.

Lectures

Week 1

- Lecture 1: Understanding minds by reading bodies: Implications of motion tracking for behavioural science 1 [DK]

Week 2

- Lecture 2: Understanding minds by reading bodies: Implications of motion tracking for behavioural science 2 [DK]

Week 3

- Lecture 3: Changing behaviour through gamification [DK]

Week 4

- Lecture 4: Social robots: Our new friends? [DK]

Week 5

- Lecture 5: Behavioural science in virtual worlds [DK]

Week 6

- No lecture: Reading week

Week 7

- Lecture 6: Behavioural informatics [DK]

Week 8

- Lecture 7: Change thyself: Using technology to influence our own behaviour [DK]

Week 9

- Lecture 8: Digital footprints and human behaviour [DK]

Week 10

- Lecture 9: Psychological targeting in digital age [DK]

Week 11

- Lecture 10: The ethics of emerging technologies in the context of behavioural science [DK]

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5-minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

The deadline for submitting the formative assignment will be during Lent. The exact date of submission will be given to you closer to the start of the course.

Indicative reading:

- Sparrow, R. (2017). Robots, rape, and representation. *International Journal of Social Robotics*, 9(4), 465-477.

Assessment: Presentation (100%) in the ST.

The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

The deadline for submitting the summative assignment will be during the Summer Term. The exact date of submission will be given to you closer to the start of the course.

PB452 Half Unit

Behavioural Science for Health

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No pre-requisites required.

Course content: The course aims to introduce to students the main principles, methods, measures, and insights of behavioural sciences, and the key state-of-the-art applications to health economics, policy, practice, and management. The course is designed to enhance students' abilities to apply rigorously and critically behavioural science tools to concrete challenges in the health and healthcare area. It covers principles of behavioural science; heterogeneity and behavioural economics; behavioural health economics and policy; methods of behavioural science;

behavioural experiments in health (field, lab, lab-field, online, mobile); behavioural data linking; measures of behavioural science; risk preferences and health; time preferences and health; social preferences and health; behavioural insights for information policies in health; financial and non-financial incentives in health; behaviourally supercharged incentives in health; nudging behavioural change in health; behavioural spillovers in health; behavioural insights for regulation and taxation in health, healthcare, and risky health behaviours; behavioural insights for healthy behaviours (diet and nutrition, physical exercise, alcohol abuse, tobacco and drug use, medication, screening, infectious diseases, vaccination); behavioural insights for blood and organ donations; behavioural insights for health practice, management, and policy challenges.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. The course is delivered in Lent Term over 10 lectures of 1 hour (1 per week, over weeks 1-5, and 7-11) and 10 weekly seminar sessions of 1 hour (1 per week, over weeks 1-5, and 7-11). Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to work in small groups to produce a presentation in the LT, in which they will propose a design and implementation of a possible behavioural science intervention in health.

Financial incentive-based approaches to weight loss. *Journal of the American Medical Association*, 300, 2631-2637.

Assessment: Coursework (100%, 3000 words) in the LT. Students will be expected to write a 3,000 word report to be submitted individually at the end of LT, which will build on the individual contribution to the groupwork undertaken as part of the formative assignment.

PB453 Half Unit

Corporate Behaviour and Decision Making

This information is for the 2019/20 session.

Teacher responsible: Dr Grace Lordan OLD.M.2.26

Availability: This course is available on the MSc in Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit.

Priority is given to students applying in the following order: students on the MSc in Behavioural Science, students in the department of Psychology and Behavioural Science and students in the wider school.

Course content: The course provides the opportunity for students to learn how the tools of behavioural science can help to improve the outcomes of the firm. Specifically, behavioural science lessons for search and hiring, diversity and inclusion, firm culture, conduct and high stakes decision making are covered. Each topic starts with equipping students with the predictions from traditional economic models. We then proceed to consider the individual biases which distort the decision making process, and how this distorts outcomes. We consider interventions and solutions to

these problems with a specific emphasis on : 1. is there a problem, 2. menu of solutions for the problem 3. quantifying if the solutions worked.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Students will have a reading week during week 6.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Case study with short questions that matches the style of the summative assessment

Assessment: Coursework (100%, 4000 words) in the ST. Two case studies with short questions

PB457 Half Unit

Organisational Culture

This information is for the 2019/20 session.

Teacher responsible: Dr Thomas Reader QUE.3.10

Availability: This course is available on the MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Students from the MSc in Organisational and Social Psychology will be prioritised for the course, because the half-unit is associated with this MSc.

Course content: The course aims to introduce to students the concept of Organisational Culture, its relationship with success and failure in institutional settings, the factors that shape organisational culture, and methodologies for studying and changing it. The course will draw on a mixture of seminal research, state-of-the-art literature, and work being conducted at the LSE. Course content will include the following:

Part 1: Organisational culture: what is it, and why does it matter? In this first phase of the course, the concept of organisational culture will be introduced. Student will be made familiar with key models on organisational culture (e.g. Schein, Hofstede, Cameron & Quinn), the distinction between organisational culture and climate, and academic literature investigating the cultural properties of organisations that lead them to be more competitive, safer, and nicer places to work. Students will be asked to reflect upon the organisations they have worked or studied within, and to consider where they might 'fit' within the academic models being presented. We will also focus on assessing organisational culture. Specifically, we will examine traditional methodologies of culture measurement: including interviews, observations, and surveys. We will explore what makes a 'good measure', how you interpret culture data, and the limitations of using observations from 'within' an organisation to measure culture. Second, we explore novel and cutting-edge forms of culture measurement, and in particular, research being conducted at LSE on unobtrusively measuring culture.

Part 2: What creates an organisational culture? Here, the course

will examine more precisely how organisational culture influences behaviour and performance. In particular, we will examine how 'cultures' of decision-making, risk-taking, ethical practices, and citizenship activities emerge within organisations. Furthermore, we will examine how these behaviours in turn feed and shape the culture of an organisation. Material from the course leader's work (in aviation, heavy industries, and finance) will be used to explore this. We will consider, in particular, how culture emerges in groups, how leaders can influence organisational culture, and also the interaction between national culture and organisational culture. Case studies will be drawn on to illustrate.

Part 3. Changing organisational culture. Here, we consider how culture change emerges. Specifically, we will focus on the role of leadership, regulation and policy, and collaborative activity as a catalyst to culture change. Students will be asked to design a culture measurement and change strategy for their organisation.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will prepare for the summative assignment through a formative essay, which is a plan of the larger essay. This involves: i) considering the relevance of organisational culture to their own (or a relevant) intuition, ii) designing a culture measurement battery, and iii) outlining a culture change strategy. Students will also engage in seminar tasks (e.g. producing culture change strategies), that will contribute to their formative learning.

Assessment: Essay (100%, 3000 words) in the period between LT and ST.

The course will be assessed through a 3000 word case study essay. Submission of the summative assessment will be after Lent Term. Students will be asked to i) identify a real-life institution where organisational culture is the 'ingredient' for success or failure, ii) to explain - using the concepts taught on the course - why this is the case (with a particular focus on behaviour), and iii) to identify a strategy for measuring (and improving) culture within that organisation.

PB458 Half Unit

Dialogue: Conflict & Negotiation

This information is for the 2019/20 session.

Teacher responsible: Dr Alex Gillespie QUE 3.03

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Dialogue is central to interpersonal conflicts, corporate negotiations, and societal debates. While dialogue is popularly construed in terms of reaching consensus, the reality entails rhetoric, manipulation and deception. This course takes the view that conflict is necessary, and it examines how dialogue can make a clash of difference productive and creative.

Topics covered will be: theory and science of dialogue; misunderstandings (when you see it, it is gone); negotiation and bargaining (creating wins, and win-wins); conflict mediation (when negotiation didn't work); the dark arts and their detection (persuasion, framing, deception); the defenses and their detection (denial, dismissing, rationalizing); reading verbal and non-verbal cues (listening beyond the words); creativity & dialogue (the emergence of something new); crisis dialogue & speaking up (power and dissent); digital dialogues (silos and measuring the 'quality' of dialogue).

The course will provide practical hands-on experience. In workshops students will gain experience intervening in dialogue, analyzing dialogue (transcripts, videos), and trying out cutting edge methods for the automated analysis of dialogue.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word essay or report plan outlining the approach to the summative assessment.

Indicative reading: Burriss, E. R. (2012). The risks and rewards of speaking up: managerial responses to employee voice. *Academy of Management Journal*, 55(4), 851-875.

Assessment: Essay (100%, 3000 words) in the period between LT and ST.

3,000 word essay or report to be submitted at the end of LT.

PB4A7 Half Unit

Quantitative Applications for Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Ganga Shreedhar

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: Quantitative data collection is an integral component of behavioural science: Testing hypotheses requires designing experiments and analysing the data or conducting statistical analyses on secondary data. Whereas another core course on this programme - Experimental Design and Methods for the Behavioural Science - covers best practices in designing and conducting experimental research, Quantitative applications for Behavioural Science introduces the main statistical background of behavioural research from psychology and economics. The course will cover best practices and state of the art statistical tools that are used by psychologists and economists. All the analyses will be demonstrated on example behavioural science research, and students will learn how to identify, interpret, and evaluate appropriate analyses for different research designs, conduct their own data analysis for each of these designs as well as report the analysis for publication in a journal, and recognise and understand contemporary issues in data science analysis in psychology and economics that need to be considered for best research practices. Emphasis will be on teaching students how the same analyses are presented in psychology and economics journals so students can understand how to integrate research from these two fields that constitute behavioural science.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

The course is delivered in Michaelmas Term over 10 lectures of 1 hour (1 per week, over weeks 1-5, and 7-11) and 10 weekly seminar sessions of 1 hour (1 per week, over weeks 1-5, and 7-11). Students on this course will have a reading week in Week 6, in line with departmental policy.

The department will offer an optional 3 hour session in which the course instructor will overview fundamental quantitative concepts that will help students prepare for the course.

Formative coursework: Students will be expected to produce 1 exercise in the MT.

Formative coursework will involve a critical appraisal of a published research paper. Students will receive more specific information about the formative assignment at the start of the course.

Indicative reading: Cumming, G. (2013). Understanding the new statistics: Effect sizes, confidence intervals, and meta-analysis. London: Routledge. Wagenmakers, E. J. (2007). A practical solution to the pervasive problems of p values. *Psychonomic Bulletin & Review*, 14(5), 779-804. Imbens, G. W., & Lemieux, T. (2008). Regression discontinuity designs: A guide to practice. *Journal of econometrics*, 142(2), 615-635. Baum, C. F., Schaffer, M. E., & Stillman, S. (2003). Instrumental variables and GMM: Estimation and testing. *Stata Journal*, 3(1), 1-31. Dimick, J. B., & Ryan, A. M. (2014). Methods for evaluating changes in health care policy: the difference-in-differences approach. *Jama*, 312(22), 2401-2402. Wagenmakers, E. J., Wetzels, R., Borsboom, D., van der Maas, H. L., & Kievit, R. A. (2012). An agenda for purely confirmatory research. *Perspectives on Psychological Science*, 7(6), 632-638.

Assessment: Report (100%) in the LT.

Summative assessment will involve a data analysis report. Students will receive more specific information about the summative assignment at the start of the course.

PB4D2

Happiness - Dissertation

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Dolan QUE.3.08

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: See entry for PB421

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. See entry for PB421

(2009). A randomized trial of financial incentives for smoking cessation. *New England Journal of Medicine*, 350(7), 699-709. **Assessment:** Dissertation (100%, 10000 words) in the ST. You are required to write a 10,000 word dissertation (replacing the exam). You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

PB4D5

Corporate Behaviour and Decision Making - Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Grace Lordan OLD M 2.26

Lectures and Seminars are taken by Dr Grace Lordan

Availability: This course is available on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: See entry for PB453

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. See entry for PB453

Indicative reading: Bertrand Marianne and Dufo Ester. Field Experiments on Discrimination. in *Handbook of Economic Field Experiments*. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. Leonard, and John A. List. "Gender differences in competition: Evidence from a matrilineal and a patriarchal society." *Econometrica* 77.5 (2009): 1637-1664. Johnston, David W. and Lordan, Grace (2016) Racial prejudice and labour market penalties during economic downturns *European Economic Review*, 84, 57-75 Lordan, Grace and Pischke, Jorn-Steffen (2016) Does Rosie like riveting? Male and female occupational choices NBER working paper, 22495. National Bureau of Economic Research, Cambridge, USA. Kandasamy, Narayanan, et al. "Cortisol shifts financial risk preferences." *Proceedings of the National Academy of Sciences* 111.9 (2014): 3608-3613. Shiller, Robert J. *Finance and the Good Society*, Princeton: Princeton University Press, 2012. Fama, Eugene, "Market Efficiency, Long-Term Returns, and Behavioral Finance," *Journal of Financial Economics*.

Assessment: Dissertation (100%, 10000 words) in the ST. You are required to write a 10,000 word dissertation (replacing the exam). You are expected to attend the course teaching on the half-unit that you chose to write your dissertation on.

PH400

Philosophy of Science

This information is for the 2019/20 session.

Teacher responsible: Prof Roman Frigg LAK 101

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Pre-requisites: None.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: Theory and Observation: Hume's problem of induction and Goodman's new riddle of induction, Popper's falsificationism, underdetermination of theory by evidence, the positive instance account of confirmation, Bayesianism. Laws of Nature: the regularity view of laws, laws as universals, the best systems account, instrumentalism. Explanation: the DN model of explanation, statistical explanation, causal explanation, unification. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, reductive empiricism, constructive empiricism, the natural ontological attitude, entity realism, structural realism, Kuhn and scientific revolutions. Sociological approaches to science: Social constructivism, feminism. Causation: Hume's, Mill's, Mackie's accounts of causation, counterfactual theories, probabilistic causality and manipulability accounts, transference accounts. Philosophy of a special science: Space and Time in Newton's physics.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to write four essays (two in MT and two in LT), submit a few short answers before each seminar, and participate in seminar discussion.

Indicative reading: T S Kuhn, *The Structure of Scientific Revolutions*; K R Popper, *Conjectures and Refutations*; B van Fraassen, *The Scientific Image*; N Cartwright, *How the Laws of Physics Lie*.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH405

Philosophy of the Social Sciences

This information is for the 2019/20 session.

Teacher responsible: Dr Mattia Gallotti

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines philosophical problems of social science concerning the nature of social facts and social scientific theory. The first part of the course will focus on traditional questions of scientific method about the nature of understanding and the kind of knowledge the social sciences should, or can, aim for; as well as on questions of ontology pertaining to the nature of the social world and the classic

dispute about 'what there is' in society. The overarching goal is to provide an intellectual geography of the philosophy of the social sciences, to which students will refer in the second part of the course when specific philosophical issues will be closely analysed and discussed. Contents to be covered in the second term will be structured around three main themes: action, rationality and intelligibility; the relationship between mind and society; the scope, aim and prospects of critical and normative approaches to social science theory and practice.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to write three essays: two in Michaelmas term and one in Lent term.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include: Alex Rosenberg, *Philosophy of Social Science* (Fifth edition); Harold Kincaid, *Philosophical Foundations of the Social Sciences*; Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*; Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the LT.

PH413

Philosophy of Economics

This information is for the 2019/20 session.

Teacher responsible: Dr Johanna Thoma LAK 4.02

Dr Campbell Brown

Availability: This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Economics A (EC100) or an equivalent university-level introductory course in economics.

Course content: This course provides a philosophical discussion of (1) the methods and (2) the normative commitments of contemporary economics.

(1) Here the course will focus on economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as: What is utility, and how do economists measure it? Does evidence of widespread 'irrationality' from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena? If yes, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis? (2) The second area of focus is on welfare economics, and the ethical assumptions and implications of economics. We will cover questions such as: Is getting what you want always good for you? Can you be harmed by something if you never know about it? Does it make sense to say that eating pizza gives me more happiness than going to the movies gives you? Is it possible to combine the preferences of individuals into an overall 'social' preference? Does it matter if the well-being of some people is less than that of others? When and why are markets desirable? Is paternalism always bad, and does welfare economics really avoid it? How should we resolve collective action problems? What is a fair way to distribute the tax burden?

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2

essays and 1 presentation in the MT and 1 essay in the LT.

Indicative reading: D. Hausman, *The Philosophy of Economics: An Anthology*; J. L. Bermudez, *Decision Theory and Rationality*; J. Cohen and W. Easterly, *What Works in Development: Thinking Big and Thinking Small*; H. Davies, *The Financial Crisis - Who is to Blame?* D. Hausman and M. McPherson, *Economic Analysis, Moral Philosophy, and Public Policy*; D. Gauthier, *Morals by Agreement*; D. Satz, *Why Some Things Should Not Be for Sale*.

Assessment: Exam (65%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

Presentation (10%) in the LT.

PH415

Philosophy and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Campbell Brown

This course is taught by Dr Campbell Brown, Dr Jonathan Parry, Prof. Alex Voorhoeve, and Dr Johanna Thoma.

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- How should we distribute the burdens of military service?
- Should children be given the vote?

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be expected to produce 2 essays in the MT and 1 essay and 1 presentation in the LT.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Greg Bognar and Iwao Hirose (2014). *The Ethics of Health Care Rationing*.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers' Brief'

- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *160 Environmental Ethic*
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*
- Michael J. Robillard and Bradley J. Strawser (2016), 'The Moral Exploitation of Soldiers', *Public Affairs Quarterly*
- Annabelle Lever (2014), 'When the Philosopher Enters the Room', *Philosophy and Public Issues*

Additional readings will be available on Moodle.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH416

Philosophy, Morals and Politics

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Otsuka LAK.3.03

The course is taught by three members of staff, including Prof. Michael Otsuka and Dr. Jonathan Parry.

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of the Social Sciences and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course will cover key topics in **moral and political philosophy**.

The discussion of **moral philosophy** will include a range of topics in **normative ethics**, which is a branch of ethics that aims to identify, at a fairly general level, the various factors that determine the moral status of actions (whether they are permissible, impermissible, or morally required). Questions covered will include at least some of the following: **(i)** Should one always save the greater number from harm? **(ii)** Should one save a single person from death or a much larger number of people from suffering a much smaller harm? **(iii)** Should one be solely concerned with how badly off people are, or should one also care about inequality? **(iv)** Does it make a moral difference that a person is less well off than she could have been? ('the non-identity problem'); **(v)** Do we have stronger reasons to save others from suffering unjust harms (i.e. harms wrongfully caused by other people), compared to harms caused by natural events? **(vi)** Is it permissible to cause harm to others in order to prevent greater harm? If so, are some ways of bringing about harm harder to justify than others? **(vii)** Can individuals come to forfeit their usual rights against being harmed? If so, under what conditions? **(viii)** What are the moral limits on harming others in self-defence? **(ix)** To what extent is the morality of self-defence different from the morality of defending other people?

The discussion of **political philosophy** will include the topics of **justice** and **legitimacy**. Questions covered will include the following: What does justice require? Does it demand the redistribution of income from rich to poor in order to create a more egalitarian society? We'll discuss the answers to these question that John Rawls and Robert Nozick have provided. Rawls argues that such taxation is just, since it would be endorsed under fair conditions in which people are deprived of knowledge of whether they happen to be rich or poor, talented or unskilled. Nozick argues that redistributive taxation is unjust because on a par with forced labour. In addition, we'll consider their answers to the following questions: When is it unjust to constrain the liberties of some in order to prevent harm to others? What sort of equality of opportunity for jobs and university places does justice require? Are people entitled to compensation for historical injustices? What are the just conditions of acquisition of unowned natural resources? In answering the last question, we will also draw on the writings

of John Locke, whose related views in his Second Treatise on the legitimacy of government we will also consider, along with the Locke-inspired views of Thomas Jefferson.

In addition to the topics mentioned in the above two paragraphs, which will form a major focus of the course, some topics in other areas of moral and political philosophy may also be covered.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 essays in the MT and LT.

Indicative reading: Thomson, J.J. 'Self-Defense', *Philosophy and Public Affairs* 20 (1991). Otsuka, M. 'Killing the Innocent in Self-Defense', *Philosophy and Public Affairs* 23 (1994). Quinn, W. 'Actions, Intentions and Consequences: The Doctrine of Doing and Allowing', *The Philosophical Review* 98 (1989). Øverland, G. 'Moral Obstacles: An Alternative to the Doctrine of Double Effect', *Ethics* 124 (2014). Parry, J. 'Defensive Harm, Consent, and Intervention', *Philosophy and Public Affairs* 43 (2017). Rawls, J. *A Theory of Justice*, revised edition. Nozick, R. *Anarchy, State and Utopia*. Locke, J. *Second Treatise of Government*

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH418

Dissertation Seminar - Economics and Philosophy

This information is for the 2019/20 session.

Teacher responsible: Dr Campbell Brown

Availability: This course is compulsory on the MSc in Economics and Philosophy. This course is not available as an outside option.

Course content: The course is intended to develop the ability to make philosophical arguments, to write good philosophical essays, and to present ideas effectively. It covers topics in the philosophy of economics and will serve to prepare students for research and for writing their dissertation.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Students will be expected to produce 1 presentation in the MT, 1 presentation in the LT and 1 essay in the ST.

Indicative reading: Readings will be chosen by the seminar participants.

Assessment: This course is not assessed.

PH419

Set Theory and Further Logic

This information is for the 2019/20 session.

Teacher responsible: Professor Miklos Redei, LAK 4.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Introductory level logic to a level equivalent to a grade of at least 65 in either Logic (PH101) or Formal Methods of Philosophical Argumentation (PH419).

Course content: The aim of the course is to familiarize students of philosophy with the essentials of naive set theory and formal logic. From set theory, the course covers (i) what is needed for use in formal reasoning, and (ii) what is of philosophical interest (Russell Paradox, elementary theory of cardinals and ordinals, transfinite induction, Axiom of Choice, Continuum Hypothesis). From logic, it begins by reviewing and extending basic material on propositional and first-order logic from both semantic and axiomatic viewpoints,

continues with the basic meta theorems of first order logic (Gödel) and ends with an introduction to propositional modal logic. Throughout, a balance is sought between formal proof and intuition, as also between technical competence and conceptual reflection.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: In each term, students are required to submit solutions to two problem-sets, and write one 1,500 word essay on a topic from a list or proposed by the student and approved by the instructor.

Indicative reading: Textbooks: Cameron, Peter: *Sets, Logic and Categories* (Springer, 1999); Sider, Theodore: *Logic for Philosophy* (Oxford University Press, 2010). Specific sections of these texts that are relevant to weekly topics will be indicated in the detailed course description and in the Moodle page of the course.

Additional reading: Halmos, Paul: *Naive Set Theory* (Springer reprint 2011); Crossley, John: *What is Mathematical Logic?* (Dover reprint 1991); Goble, Lou ed.: *The Blackwell Guide to Philosophical Logic* (Blackwell, 2001). Additional material on special topics will be made available on Moodle.

Assessment: Exam (100%, duration: 3 hours) in the summer exam period.

PH421

Dissertation Seminar - Philosophy and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Parry

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is not available as an outside option.

Course content: Aim: This course helps students on the MSc in Philosophy and Public Policy develop their philosophical research and writing skills. It clarifies expectations surrounding the MSc dissertation, which is an extended piece of writing that students are expected to complete over the summer. One of the course's main aims is to help student settle for a relevant dissertation topic that they feel comfortable with.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

The course starts with a five hour module on argumentative writing in philosophy (weeks 1-5 of MT). This is followed by discussions of past MSc dissertations, and short student presentations on possible research ideas (weeks 7-11 of MT). During Lent Term, students are required to present their MSc dissertations as work in progress. This course has reading weeks in weeks 6 of MT and LT.

Formative coursework: Presentation of own dissertation as work in progress

Optional draft of up to 6000 words due at the end of June

Indicative reading: None.

Assessment: This course is not assessed.

PH422

Dissertation Seminar - Philosophy of Social Science

This information is for the 2019/20 session.

Teacher responsible: Prof. J. McKenzie Alexander, LAK 5.01

Availability: This course is compulsory on the MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Course content: The course is intended to develop the ability to make philosophical arguments and to write structured philosophical essays. It will serve to prepare students for research and writing their dissertation. In Michaelmas term, the first few meetings will cover philosophical and argumentative writing,

with a number of in-class exercises. Then we will discuss the structure and content of an MSc dissertation in Philosophy and the grading rubric used for marking dissertations. The remainder of Michaelmas term will cover possible thesis topics in the philosophy of social science, with group presentations. In Lent term, seminars will cover topics that are chosen by MSc students for their theses.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: A number of assignments whose completion will aid the writing of the dissertation will be set over the course of MT and LT.

Assessment:

This course is not assessed.

PH425 Half Unit

Business and Organisational Ethics

This information is for the 2019/20 session.

Teacher responsible: Mr Thomas Ferretti

Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Economics and Philosophy, MSc in Management of Information Systems and Digital Innovation, MSc in Philosophy and Public Policy, MSc in Philosophy of Science, MSc in Philosophy of the Social Sciences and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is about philosophical and ethical issues related to the conduct of business. Some tough-minded people believe that business is like a game where winning means making as much money as possible. They believe that "business ethics" does not exist, that it is a contradiction in terms, and that whoever thinks otherwise -- whoever thinks that business is also about treating others respectfully -- is either naive, or deluded, or both. What these tough-minded people do not realise is that they are, in fact, making an ethical claim. They claim that, while we generally have ethical obligations towards others in society, when it comes to the game of business everyone is permitted to pay attention only to their personal gain. This statement may be correct, or it may be false. But it is definitely an ethical statement, simply because it makes claims about how people may permissibly behave. So, inadvertently, they are doing business ethics.

In this introductory course to business ethics, we look at different types of ethical theories, and we apply them to problems that tend to arise in business contexts. The primary aim of the course is not to present you with ethical solutions or dogmatic responses, but to practice ethical reasoning, analytical skills, and critical thinking, so that towards the end of the course, you will no longer be satisfied with simple answers to difficult problems. You will also practice argumentative and writing skills that will help you express your thoughts clearly and concisely.

Topics discussed in the context of this course include:

- What are the moral responsibilities of managers?
- Is Milton Friedman correct that the main purpose of business is to increase profits?
- Do managers have instead moral responsibilities that are specific to their role as market actors, such as avoiding deception, fraud, or environmental degradation?
- What, if anything, is wrong with exploitation? If sweatshop workers voluntarily choose to work under exploitative conditions because they want a job, are such working conditions acceptable then?
- Should firms have an obligation to protect the privacy of their workers or customers?
- Why and how should firms tackle gender discrimination in the workplace?

- To what extent are the large pay packages that CEOs receive justified? What makes wages fair or unfair?

Required readings amount to about two to three papers per week.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. This course has a reading week in Week 6 of LT.

Formative coursework: One essay of 2000 words.

Indicative reading: Carr, Albert Z. (1968): "Is Business Bluffing Ethical?", in *Harvard Business Review*, 46 (1): 143-153. Friedman, Milton (1970): "The Social Responsibility of Business is to Increase its Profits", *New York Times Magazine*, Sept. 13. Heath, Joseph (2014): "A Market Failure Approach to Business Ethics", in *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, pp. 25-41. Oxford: Oxford University Press. Moriarty, Jeffrey (2009): "How Much Compensation Can CEOs Permissibly Accept?", in *Business Ethics Quarterly*, 19 (2): 235-250. Zwolinski, Matt (2007): "Sweatshops, Choice, and Exploitation", *Business Ethics Quarterly* 17 (4): 689-727.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Essay (33%, 2000 words) in the ST.

PH430 Half Unit

Einstein for Everyone: From Time Travel to the Edge of the Universe

This information is for the 2019/20 session.

Teacher responsible: Balazs Gyenis LAK 5.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective.

Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

In addition to this formative essay, which is due mid-term, students must complete a few short reading questions each week to prepare for discussion in class.

Indicative reading: All weekly readings will all be made available to students on Moodle. As an indicative reading, see Norton, John D. (2017) *Einstein for Everyone*.

Assessment: Essay (50%, 1500 words) in the MT. Essay (50%, 1500 words) in January.

PH431 Half Unit

Physics and the City: From Quantum Jumps to Stock Market Crashes

This information is for the 2019/20 session.

Teacher responsible: Balazs Gyenis LAK 5.03

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of the 20th century is that many things can be described by tiny atoms moving randomly about. Thinking about the physical world in this way led to the invention of modern particle physics. Thinking about the financial world in this way led to modern financial modeling. This course is about some of the philosophical issues underlying the relationship between physics and finance.

Students in this course will explore some of the most important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set? The course will proceed at a conceptual level that is suitable for students of all backgrounds.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

In addition to the formative essay due mid-term, students must complete 2-4 short weekly reading questions to prepare for discussion in class.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Malkin, Burton G. A random walk down Wallstreet, excerpts.
- Norton, John D. Einstein for Everyone, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. The Physics of Wallstreet.
- Derman, E. My Life as a Quant. Excerpts.

Assessment: Essay (50%, 1500 words) in the LT. Essay (50%, 1500 words) in the ST.

PH433 Half Unit

Philosophy of Gender and Race

This information is for the 2019/20 session.

Teacher responsible: Dr Liam Kofi Bright LAK 2.05 and Ms Astika Chellapoo LAK 4.05

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course examines, from a philosophical perspective, the nature of gender and race and the role these categories play in shaping the social world and structuring human lives.

Topics covered will include:

Concepts of Sex, Gender and Race: How does "gender" relate to "sex"? Is race a biological category, a social category, both, or neither? What influence do these categories have on human behaviour?

Gender and the Brain: Are gender categories natural or social? Are there psychological differences between men and women? If so,

are they explained by genes or by culture? Is gender 'hardwired' into the brain or the product of socialization?

Gender and Society: What are misogyny and sexism? Is sexism inherent to the entire concept of gender? Are gender differences compatible with a fair society, or should we try to eliminate gender altogether?

Race and the Genome: Do races exist? Is there any objective biological basis for racial categorization, or are races socially constructed? Does the concept of "race" still have a legitimate role in medicine?

Race and Society: How does the social meaning of "race" vary around the world? How have concepts of race been shaped by racism? Should we try to reclaim the "race" concept for anti-racist goals or try to eliminate it from public discourse?

The Future of Gender and Race: Will race and gender still exist in the future? Should we try to work for a race-free and gender-free world, or should these ways of classifying people be pre-served? We will focus on approaches to these questions from "analytic" philosophy, including feminist approaches and approaches from the philosophy of science. The aim is to confront the big questions of gender and race by analysing and constructing careful and precise philosophical arguments.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Students on this course will have a reading week in Week 6 of LT.

Formative coursework: Students will be expected to produce 1 exercise in the LT.

Indicative reading: Suggested introductory reading:

Fine, Cordelia, 2008. *Delusions of Gender*. Manne, Kate, 2017. *Down Girl: The Logic of Misogyny*. Appiah, Kwame Anthony, 2005. *The Ethics of Identity*. Glasgow, J., Haslanger, S., Jeffers, C. and Spencer, Q., 2019. *What is Race?* Zack, Naomi, 1993. *Race and Mixed-Race*. Appiah, Kwame Anthony, and Gutmann, Amy, 1996. *Color Conscious: The Political Morality of Race*.

Assessment: Essay (45%, 2000 words) and class participation (10%) in the LT.

Essay (45%, 2000 words) in the ST.

There is no exam for this half-unit. There will be two summative essays, each worth 45% of the final mark. 10% of the final mark will be awarded for seminar participation.

PH445

Dissertation Seminar - Philosophy of Science

This information is for the 2019/20 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is compulsory on the MSc in Philosophy of Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is intended to develop the ability to construct sharp analytic philosophical arguments and to write structured philosophical essays. It will help students to choose the topic of their dissertation, help with how to go about researching the topic and how to write the dissertation (by presentation and criticism of preliminary drafts). The course starts with reviewing the structure and content of an MSc dissertation in Philosophy, and the grading scheme used for marking dissertations. This is followed by presentations by students on topics intended as possible topics of their dissertations. The presentations will be extensively discussed in the seminar by fellow students and in subsequent private meetings with the seminar leader. In Lent Term each student will read two former MSc dissertations with topics close to the interest of the student, and each student will report in the seminar on the merits and weaknesses of the selected works, trying to understand why the chosen dissertations received the marks they did. In the final part of the seminar students will again give presentations on the progress of their research.

Teaching: 10 hours of seminars in the MT. 20 hours of seminars in the LT.

Formative coursework: A number of assignments - at least one per term - whose completion will aid the research into and writing

of the dissertation will be set.

Assessment:

The course is not assessed.

PH458 Half Unit Evidence and Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Liam Kofi Bright

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit. Although the emphasis throughout will be on ideas rather than formal techniques and although all the ideas will be explained simply and intuitively, some of the evidence relevant for policy is evidence about probabilities and so the course will involve issues about the correct interpretation of probability and statistics. Although no detailed formal manipulations will be required, students will need to feel happy thinking about the intuitive ideas underlying probability and statistics.

Course content: Good policy decisions - whether concerning climate, conservation, international development, poverty, education, medicine, or health - require rational deliberation over whether the proposed policy will (or is likely to) bring about the intended outcome. For instance, we might wonder if lowering CO₂ emissions will reduce global warming? Or whether smaller class sizes enhance scholastic achievement? The obvious suggestion is that answers to such questions are the result of rational deliberation just in case they are based on good evidence and appropriate reasoning. But what counts as good evidence and appropriate reasoning? And what happens when different kinds of evidence pull in opposite directions? Are certain types of evidence more telling than others? And if so, why? Does evidence that the policy works in one country mean that we should have confidence that it will work in another country? Can the requirements of democracy conflict with respect for expertise? Do the competing value judgements that are at stake in our political or social decisions make a difference to the forms of reasoning that is appropriate? These are some of the central issues addressed in the course. In this course, you can learn how to be 'evidence-savvy', how to ask the right questions about evidence and reasoning as well as how to think about risk-assessment and its relation to policy.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

In addition to the essay, I will also give students the opportunity to do regular shorter writing exercises as a means of building up to the final formative essay. I will give feedback on these. Such short writing exercises will largely be short summaries of the readings as well as answering questions about the readings that I will ask at the end of class.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Useful initial readings are: Gigerenzer, G. (2002) *Reckoning with Risk: Learning to Live with Uncertainty*; Cartwright, N. and Hardie, J. (2012) *Evidence-Based Policy: A Practical Guide to Doing it Better*; Worrall, J. (2007) 'Evidence in Medicine and Evidence-Based Medicine', *Philosophy Compass*.

Assessment: Essay (33%, 2000 words) in January. Take home exam (67%) in the MT.

PH499 Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Campbell Brown, Prof Roman Frigg, Dr Mattia Gallotti and Prof Jason Alexander
Dr Jonathan Parry

Availability: This course is compulsory on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Science and MSc in Philosophy of the Social Sciences. This course is not available as an outside option.

Course content: Students are required to write a 10,000-word dissertation (7,000 for MSc Economics and Philosophy) on a topic within the field covered by their course of study and approved by the Department of Philosophy, Logic and Scientific Method.

Assessment: Dissertation (100%, 10000 words) post-summer term.

The course is assessed 100% by Dissertation. Dissertations must be submitted on a specified date in August in the academic year registered. (Part-time students are required to submit their dissertations in the August of their second year of part-time registration). All details are given in the Departmental Programme Handbook.

PP401 Half Unit Political Science for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Joachim Wehner
Dr Mathilde Emeriau

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: The course will introduce students to how to understand the political context of policymaking, using the latest theoretical and empirical knowledge in modern political science. The course will cover, among other things, political behaviour (such as voting behaviour, elections and lobbying), political institutions (such as electoral systems, parliamentary and presidential government, and central banks) and political outcomes (such as economic policies, development aid and ethnic conflict). The course will combine a review of the main empirical regularities across time and across country in each of these areas, with an introduction to key theoretical arguments about how to understand how actors interact and how institutions shape strategic behaviour, and an introduction to the latest empirical (and causal) estimation techniques for testing theoretical propositions.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: *Analysing Politics* by Shepsle and Bonchek (W.W. Norton, 2010, 2nd edition) provides an excellent starting point and can be used as the main reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (30%, 2000 words) and online assessment (50%) in the LT.

Presentation (20%).

Part 1. Group Application (20%)

There will be an application exercise, which will be presented and assessed. The application will be carried out in groups, and will be assessed on the basis of the group presentation. Each seminar group will be divided into three groups (of approximately 5 students) several weeks prior to the presentation. Each group will have an opportunity to receive feedback on their proposed plan for the presentation. Assessment will be as a group but there may be an individual component within the mark.

Part 2. Essay (30%)

There will be an essay of 2,000 words. The word count for the essay will include footnotes and appendices but exclude

references/bibliography. Students will be able to choose their own question.

Part 3. Online assessment (50%)

The online assessment will be administered via Moodle on a day of week 0 of Lent Term to be co-ordinated each year with other courses of the MPP degree with assessments at this time of year. Students will have a fixed window (e.g. 12-hour or 24-hours) within which to access the assignment questions and to respond to them. Once they have logged into Moodle and downloaded the questions students will have 2 hours to prepare and upload their answers. No outside research will be required. Questions will be based on topics covered in lectures and seminars. There will be two parts to the online assessment which carry equal weight: (1) a compulsory "short questions" section; (2) one essay question from a list of 6 questions.

Please note that for the online assessment, extra time can be granted as a standard request for students with inclusion plans or who otherwise would need individual examination adjustments.

PP402 Half Unit

Quantitative Methods for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Mark Schankerman

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: The course will introduce several key principles and tools of quantitative and empirical evaluations which can be applied to policy-making. The emphasis is on the practical application of these skills and tools to real-life situations and policy-making interventions. Specifically, course content includes using randomised experiments to evaluate policy interventions including difference-in-differences regressions, regression discontinuity approaches and matching. In the final weeks the course gives students an overview of the key principles of cost-benefit analysis and how to apply this to real-world scenarios.

Teaching: 20 hours of lectures, 15 hours of seminars and 10 hours of help sessions in the MT.

Formative coursework: There will be weekly formative course work to give students the opportunity to develop fluency with the tools covered in the course.

Indicative reading: Joshua D. Angrist and Jom-Steffen Pischke, "Mastering Metrics"; James Stock & Mark Watson, "Introduction to Econometrics"

Jeffrey Wooldridge, "Introductory Econometrics".

The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Coursework (30%, 2000 words) and class participation (10%) in the MT.

Online assessment (60%) in the LT.

For the online assessment students will have a fixed window to access the assignment questions and to respond to them. No outside research will be required. Questions will be based on topics covered in lectures and seminars.

PP403 Half Unit

Public Management

This information is for the 2019/20 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: This course will offer an intensive introduction into key literatures and themes in the study of public management. The emphasis will be on the trans-disciplinary literature dealing with public management in the context of developed and lesser

developed world contexts. The course will cover, among other things, questions such as public sector reform, coordination and collaboration, control over bureaucracy, professionalism and public service motivation, performance management, crisis management, leadership, institutional capacity building, cutback management and organizational learning. The course will emphasise the key theoretical contributions and relate these to empirical contexts.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce one exercise in Week 3 and one essay in Week 7.

The first piece is a short document offering a view on 'what is public management' (week 3). Feedback will be provided by week 5. This gives students an early opportunity to start writing and to consider the broader field of public management.

The other piece is a short essay (1500 words) to be completed by the end of week 7. Feedback will be provided by week 9. The essay will be based on a choice of questions. This will give students the opportunity to practice for their assessed essay and the online exam.

Indicative reading: Barber, M (2015) How to Run a Government, London, Penguin. Emerson, K and Nabatchi, T (2015) Collaborative Governance Regimes, Georgetown University Press. Hood, C (1998) Art of the State, Oxford, Oxford University Press. Perrow, C (1984) Normal Accidents: Living with High Risk Technology, (New York, Basic Books). Simon, H (1947/2013) Administrative Behavior, Simon & Schuster. The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Essay (50%, 3000 words) in the MT.

Online assessment (50%) in the LT.

The online assessment will be administered via Moodle on a day of week 0 of Lent Term to be co-ordinated each year with other courses of the MPP degree with assessments at this time of year. Students will have a fixed window (e.g. 12-hour or 24-hours) within which to access the assignment questions and to respond to them. Once they have logged into Moodle and downloaded the questions students will have 2 hours to prepare and upload their answers. No outside research will be required. Questions will be based on topics covered in lectures and seminars.

PP404 Half Unit

Economics for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Ethan Ilzetzki

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: This is graduate level course for mid-career policy-makers to develop their knowledge and understanding of key principles of economics as applicable to policy-making. The emphasis is on developing an understanding of analytical frameworks and models that can be applied to a wide variety of contexts. Both micro- and macro-economics will be covered, including price theory, understanding markets, externalities, public goods, principal-agent problems, economic growth, inflation business cycles, unemployment, and fiscal and monetary policies.

Teaching: 20 hours of lectures, 15 hours of seminars and 10 hours of help sessions in the LT.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

There will be weekly formative course work to give students the opportunity to develop fluency with the tools covered in the course.

Indicative reading: Mankiw, N. Gregory and Mark Taylor (2017) Economics, 4th Edition, Cengage Learning EMEA. Moss, David A. A Concise Guide to Macroeconomics. Reinventing the Bazaar: A Natural History of Markets - McMillan, John 2002. Intermediate microeconomics: a modern approach - Hal R. Varian 2014.

Participation and the provision of discrete public goods: a strategic analysis - Thomas R. Palfrey, Howard Rosenthal 1984-7. The

undercover economist strikes back: how to run or ruin an economy - Tim Harford 2013. The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Coursework (30%, 2000 words) in the LT. Online assessment (70%) in the ST.

The online assessment will be administered via Moodle on a day of Summer Term to be co-ordinated each year with other courses of the MPP degree with assessments at this time of year. Students will have a fixed window (e.g. 12-hour or 24-hours) within which to access the assignment questions and to respond to them. Once they have logged into Moodle and downloaded the questions students will have 2 hours to prepare and upload their answers. No outside research will be required. Questions will be based on topics covered in lectures and seminars.

Please note that for the online assessment, extra time can be granted as a standard request for students with inclusion plans or who otherwise would need individual examination adjustments.

PP405 Half Unit Public Policy Applications

This information is for the 2019/20 session.

Teacher responsible: Dr Sara Hagemann and Prof Nicholas Barr

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Pre-requisites: This course has no pre-requisites.

Course content: This course will introduce students to the application of social science literatures to concrete policy issues. The course will be organised around topics which are both being actively discussed in the policy world and researched in the academic world. The emphasis will be on illustrating how different theoretical and disciplinary approaches analyse a particular policy topic and problem. The precise policy topics will be decided each year, depending on academic and practitioner availability, but we would aim to attract speakers at the highest levels either at the cutting edge or research of particular research topic or who are working directly in a topic area.

Teaching: 20 hours of workshops in the LT.

The teaching will take the form of a single 2 hour workshop in Lent Term. This will be based on a Harvard-style teaching model which we intend to be inclusive, discursive and highly participatory.

Formative coursework: The policy project will be coordinated by the lead academic, who will meet with each student individually to discuss and approve (a) the proposed focus of the project, (b) the proposed research method and approach, (c) the identification of relevant existing research and literature, and (d) an outline of the structure of the project. Each student will get personalised feedback on their proposed project.

Indicative reading: This will depend on the topics chosen, and the policy experts that are invited, each year.

A full reading list will be provided at the start of the course.

Assessment: Coursework (100%, 3000 words) in the ST.

There will be a Policy Project of 3,000 words for submission in the Summer Term.

PP406 Half Unit Philosophy for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Alexander Voorhoeve and Dr Johanna Thoma

Availability: This course is compulsory on the Master of Public Policy. This course is available on the Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority for this course is given to students on the Master of Public Policy. Second priority is given to students of the Master of Public

Administration. Any remaining places may be taken by students outside of the School of Public Policy.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should we distribute resources in health care to produce the most well-being overall or should we also aim to limit inequalities?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- Is killing morally worse than letting die?

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 2 essays in the LT.

Formative assessment will consist of two short essays, of 1500 words each, which will be timed such that students receive feedback prior to the summative assessment indicated below and can incorporate feedback into their summative assessment.

Indicative reading:

- D. Hausman, M. McPherson and D. Satz (2017), *Economic Analysis, Moral Philosophy, and Public Policy* 3rd Edition. Cambridge: Cambridge University Press.
- Michael Sandel (2009) "Justice: What is the right thing to do?" New York: Farrar, Strauss and Giroux.
- Greg Bognar and Iwao Hirose (2014). *The Ethics of Health Care Rationing*.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' *Environmental Ethics*.
- Martha Nussbaum (2013), "Political Emotions: Why Love Matters for Justice". Cambridge: Belknap Press.
- Martha Nussbaum (2013), "Creating Capabilities: The Human Development Approach". Cambridge: Belknap Press.
- Amartya Sen (2009), "The Idea of Justice". Cambridge: Belknap Press.
- Ronald Dworkin (2013), "Justice for Hedgehogs". Cambridge: Belknap Press.
- Elizabeth Anderson (1999) "What is the Point of Equality?," *Ethics* 109 (1999): 287-337
- Isaiah Berlin (1993) *The Hedgehog and the Fox: An Essay on Tolstoy's View of History*. Chicago: Ivan R. Dee Publisher.

Assessment: Exam (67%, duration: 2 hours) in the summer exam period.

Coursework (33%, 2000 words) in the ST.

PP408 Introduction to Quantitative Methods for the MPA Programme

This information is for the 2019/20 session.

Teacher responsible: Mrs Celine Zipfel

Availability: This course is compulsory on the Master of Public

Administration. This course is not available as an outside option. Also available to other MPhil/PhD students with the agreement of the course tutor.

Course content: An introduction to basic mathematical and statistical concepts for use in MPA courses in economics and quantitative approaches. The course covers the following topics: Statistics: Discrete and continuous random variables, jointly distributed random variables, the Normal distribution, sampling and the Central Limit Theorem, properties of estimators, introduction to hypothesis testing. Mathematics: Linear functions, quadratic, logarithmic and exponential functions, the derivative of a function and rules of differentiation, unconstrained optimization with one variable, functions of several variables and their differentiation, unconstrained optimization with several variables, constrained optimization.

Teaching: The course runs over 8 days, during the two weeks prior to the start of the Michaelmas Term. In total, students will attend ten lectures and six classes during the two weeks of the course.

Indicative reading: Notes covering the course material will be made available at the beginning of the course. Students are strongly encouraged to read Charles Whelan's 'Naked Statistics' prior to the start of the course. It provides a readable and accessible background to the statistics portion of the course. Two widely used introductory statistics books that can be used as background reading for the statistics part are Newbold, Carlson and Thorne 'Statistics for Business and Economics' (6th edition) and Wonnacott and Wonnacott 'Introductory Statistics for Business and Economics' (4th edition). However, there are also many other introductory statistics textbooks that cover the same material.

Two widely used introductory mathematics books that can be used as background reading for the mathematics part are Ian Jacques' 'Mathematics for Economics and Business' (5th edition) and Wisniewski's 'Introductory Mathematical Methods in Economics' (2nd edition). Also in this case there are a large number of excellent alternative textbooks that cover the same material. Those who want a more advanced treatment of the same material can use Simon and Blume's 'Mathematics for Economists', but this treatment is more formal than what we require for this course. We do not recommend buying a new textbook for this course, if you already own a textbook that covers similar material.

Assessment: In class assessment (100%) in September. The course will be assessed with a one hour in-class assessment at the end of the second week of teaching. The assessment result does not count towards the MPA final degree, but can be used by students to identify their key areas for future learning. All students are expected to take the assessment.

PP410 Half Unit Public Economics for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Daniel Reck and Dr Johannes Spinnewijn

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have taken PP440 Macro and Microeconomics (for Public Policy) or an equivalent course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax

incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

Indicative reading: J Gruber (2011) Public Finance and Public Policy, 3rd edition, Worth Publishers. [CC HJ141 G88] [or Gruber (2007), 2nd edition]. N Barr (2012), The Economics of the Welfare State, 5th ed., OUP [CC HB99.3 B26]. Institute for Fiscal Studies (2010-2011), Mirrlees Review: Reforming the Tax System for the 21st Century, Volume 1 (2010): Dimensions of Tax Design, Volume 2 (2011): Tax by Design. Oxford University Press, Oxford. Available online at: <http://www.ifs.org.uk/mirrleesReview>. On developments in public spending in the UK, see H Glennerster (2003), Understanding the finance of welfare (Policy Press); or H Glennerster and J Hills (eds) (1998), The State of Welfare: The economics of social spending (Oxford) [CC HV245 S79]. Students wishing to review their microeconomic theory should consult a textbook on intermediate microeconomic theory, such as Morgan, Katz and Rosen (2006) Microeconomics, McGraw Hill (CC HB172 M84) or J Perloff (2008) Microeconomics: Theory & applications with calculus, Pearson (CC HB172 P45). On the structure of taxation in the UK, see IFS (2011) A Survey of the UK Tax System, Briefing Note no. 9 (<http://www.ifs.org.uk/bns/bn09.pdf>) and the HM Revenue and Customs website, (<http://www.hmrc.gov.uk>). The Institute for Fiscal Studies is an independent policy research institute and its website (<http://www.ifs.org.uk>) has a wide range of useful publications. The HMRC website includes information on the tax structure and statistics on tax payments (by income group, by type of tax, etc.) and overall revenues raised. The UK Treasury website (<http://www.hm-treasury.gov.uk/>) provides a range of documents on economic policies and the public finances, including the annual publication, Financial Statement and Budget Report (the 'Red Book'), published each year on Budget Day. For comparative international fiscal data, information and analysis, useful sources include the International Monetary Fund, IMF (<http://www.imf.org/>), the World Bank (<http://www.worldbank.org/>) and the Organisation for Economic Cooperation and Development, OECD (<http://www.oecd.org>).

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PP411L Half Unit Not available in 2019/20 Developments in Contemporary Policy-Making

This information is for the 2019/20 session.

Teacher responsible: The teacher responsible will be announced at the start of each year.

Availability: This course is available on the Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Course content: This course explores current and selected developments and issues in public policy-making viewed through the lenses of economics and political science. Drawing upon contemporary academic and practitioner research, students will explore and analyse interaction across theory, frameworks, concepts and case studies.

On this course, students will apply the analytical tools that are introduced in core courses of the School of Public Policy (e.g. PP440, PP455, PP478, PP401, PP402 and PP404) with a view to enhancing and deepening their understanding of policy implications. Teaching is based on case studies and other practitioner examples and country experiences, underpinned by theoretical and conceptual models. The course is taught by specialist practitioners in policy-making drawing on the insights

from economic and political science research.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Students will submit a 1500 word formative essay in week 4.

Feedback on this work will be used to inform the writing of the summative assignments.

Students will be required to present cases and key readings on rotation in the seminars throughout the term. These presentations are not summatively assessed, but will provide useful formative feedback on students' learning.

Indicative reading:

- Carden, Fred. 2009. "Knowledge to Policy: Making the Most of Development Research." International Development Research Centre, Sage Publications, Ottawa.
- Corduneanu-Huc, C, Alexander Hamilton and Issel Masses Ferrer. 2012. "Understanding Policy Change: How to Apply Political Economy Concepts in Practice." Washington D.C.: World Bank Publications
- Gruber, J. 2011. Public Finance and Public Policy, 3rd edition, Worth Publishers
- Harford, T. 2013. The undercover economist strikes back: how to run or ruin an economy
- Palfrey, T R. and Rosenthal, H. 1984 Participation and the provision of discrete public goods: a strategic analysis - in Journal of Public Economics 24(2):171-193
- Shepsle, K. (2010) Analyzing Politics: Rationality, Behavior, and Institutions, 2nd edn, New York, NY: Norton.
- Clark, W.R., M. Golder, and S.N. Golder (2018) Principles of Comparative Politics, 3rd edn, London: Sage.
- Tsebelis, G. (2002) Veto Players: How Political Institutions Work, Princeton, NJ: Princeton University Press.
- Achen, C.H. and L.M. Bartels (2016) Democracy for Realists: Why Elections Do Not Produce Responsive Government, Princeton, NJ: Princeton University Press.

Further readings will be provided at the start of the course.

Assessment: Essay (50%, 2000 words) in the LT Week 7.

Essay (50%, 2000 words) in the LT Week 10.

PP411M Half Unit Not available in 2019/20 Developments in Contemporary Policy-Making

This information is for the 2019/20 session.

Teacher responsible: The teacher responsible will be announced at the start of each year.

Availability: This course is available on the Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Course content: This course explores current and selected developments and issues in public policy-making viewed through the lenses of economics and political science. Drawing upon contemporary academic and practitioner research, students will explore and analyse interaction across theory, frameworks, concepts and case studies.

On this course, students will apply the analytical tools that are introduced in core courses of the School of Public Policy (e.g. PP440, PP455, PP478, PP401, PP402 and PP404) with a view to enhancing and deepening their understanding of policy implications. Teaching is based on case studies and other practitioner examples and country experiences, underpinned by theoretical and conceptual models. The course is taught by specialist practitioners in policy-making drawing on the insights from economic and political science research.

Teaching: 20 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the MT.

Students will submit a 1500 word formative essay in week 4.

Feedback on this work will be used to inform the writing of the summative assignments.

Students will be required to present cases and key readings on

rotation in the seminars throughout the term. These presentations are not summatively assessed, but will provide useful formative feedback on students' learning.

Indicative reading:

Further readings will be provided at the start of the course.

Assessment: Essay (50%, 2000 words) in the MT Week 7.

Essay (50%, 2000 words) in the MT Week 10.

PP412 Half Unit Global Social Protection Design and Delivery

This information is for the 2019/20 session.

Teacher responsible: Dr Babken Babajanian SAR.G.03

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 30.

Course content: The course will focus on conceptual, theoretical and practical issues involved in the development of social protection programmes in the global context. It will enable students to (i) recognise the objectives and role of social protection programmes in supporting human well-being, and (ii) analyse and critically assess the design, implementation, and evaluation of social protection programmes. The course will consider the design and performance of social protection within the specific economic, social, political economy and institutional context of their operation.

Social protection refers to policies and programmes designed to reduce poverty and vulnerability and improve people's ability to manage economic, social, governance, environmental, and lifecycle risks. Social protection includes three major policy instruments: social insurance (contributory pension, health, disability benefits); social assistance (direct cash and in-kind transfers); and active labour market programmes (skills training and public works). In recent years, social protection has become a key instrument of public policy in the global south and it is no longer seen as an exclusive feature of the western welfare state. Building responsive social protection systems is a priority for many governments in Asia, Sub-Saharan Africa and Latin America and international development organisations are heavily involved in supporting

national efforts.

These developments have generated a strong demand for policy experts who can analyse, interpret, design and evaluate social protection programmes. The course will help students acquire in-depth knowledge and skills for analytical work and practical engagement in programme development. It will enable them to critically appraise how government agencies, international organisations and other actors design and implement social protection programmes.

The course will discuss major social protection programmes, including Bolsa Familia in Brazil, Chile Solidario, Dibao in China, Pantawid Pamilyang in the Philippines, RSBY in India, and social assistance programmes in post-socialist countries of Eastern Europe and the Caucasus.

The course draws on academic literature and research studies and analytical reports commissioned by government agencies and international organisations (e.g. DFID, World Bank, UNICEF). The chosen sources reflect the most recent developments in social protection worldwide. The course utilises the course leader's extensive hands-on experience in the analysis and evaluation of social protection programmes.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 10 X 1.5 hour lectures (LT weeks 1-10)
10 x 1.5 hour seminars (LT weeks 2-11)

Formative coursework:

1. Group presentations on assigned topics and contribution to seminar discussions
2. A short essay answering a pre-assigned question (500 words)
3. A short individually authored critique of a policy report (max 1,000 words; LT week 7)

Indicative reading:

- Grosh, M., del Ninno, C., Tesliuc, E., and A. Ouerghi (2008) From Protection to Promotion: The Design and Implementation of Effective Safety Nets. Washington, DC: World Bank.
- Holmes, R. and N. Jones (2013) Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets. London and New York: Zed Books.
- Robalino, D. A., Rawlings, L. and I. Walker (2012) Building Social Protection and Labor Systems. Concepts and Operational Implications. Washington, DC: World Bank.
- Bastagli, F., J.Hagen-Zanker, L. Harman, G. Sturge, V. Barca, T. Schmidt, and L. Pellerano (2016) Cash Transfers: What Does the Evidence Say? London: ODI.
- Barca, V. and R. Chirchir (2014) Single Registries and Integrated MISs: De-Mystifying Data and Information Management Concepts. Canberra: Australia Department of Foreign Affairs and Trade.

Assessment: Essay (30%) in the LT.
Critical evaluation (70%) in the ST.

- A three-part individually authored essay (30%), in which students answer pre-assigned questions (max 500 words for each answer; 1,500 words in total, LT week 11).
- An individually authored critique of a policy report (70%) (max 3,000 words, ST week 1).

PP418 Half Unit

Globalisation and Economic Policy

This information is for the 2019/20 session.

Teacher responsible: Professor Andres Velasco

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students that have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: Over the past two centuries, the global economy has become increasingly interconnected. This course studies the policy implications of this globalization. It considers the causes and consequences of increasing international economic integration, focusing particularly on the challenges and opportunities that globalization creates for policy makers. Key areas covered include: international trade, innovation and growth, migration and wages, international capital flows, borrowing and adjustment in the world economy, monetary and exchange rate policy, and financial crises. The course builds on the knowledge developed in PP440 and PP455.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: The formative coursework will comprise two graded problem sets. The formative coursework will take place throughout the term.

Indicative reading: There is no single textbook that includes all the material covered in this course. Lectures and readings will primarily focus on journal articles. Three books that will be used during the course are: Krugman, P.R., Obstfeld, M and Melitz, M.J. International economics: theory and policy 11th edition (Boston: Pearson, 2018). Rodrik, D., The globalization paradox: why global markets, states and democracy can't coexist (Oxford: Oxford University Press, 2011). Irwin, D., Free Trade Under Fire (Princeton: Princeton University Press, 2015)

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Coursework (50%).

The 50% coursework will consist of two graded problem sets worth 25% each.

PP419 Half Unit

Advanced Empirical Methods for Policy Analysis

This information is for the 2019/20 session.

Teacher responsible: Professor Daniel Sturm

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students that have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: This course provides an advanced treatment of the empirical methods that are used to evaluate the effectiveness of public policies. The course builds closely on the course Quantitative Approaches and Policy Analysis (PP455) and also Micro and Macroeconomics for Public Policy (PP440). Topics covered include the problem of causality, the theory and practice of randomised experiments, difference-in-differences, synthetic controls, regression discontinuity, robust and clustered standard errors, and calibration.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: The formative coursework will comprise a graded problem set.

Indicative reading: There is no single textbook for the course and many of the key readings are journal articles. James Stock and Mark Watson "Introduction to Econometrics" remains a useful

reference particularly for the material at the beginning of the course. A very good source for background reading is Joshua Angrist and Jörn-Steffen Pischke "Mastering 'Metrics: The Path from Cause to Effect". A full reading list will be distributed at the beginning of the course.

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Project (25%, 2000 words) in the LT.

PP440

Micro and Macro Economics (for Public Policy)

This information is for the 2019/20 session.

Teacher responsible: Dr Ethan Ilzetzki and Professor Daniel Sturm

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues in a wide variety of contexts. The first term (MT) covers microeconomics and the second term (LT) covers macroeconomics.

MT (Microeconomics): competitive markets and economic efficiency; consumer optimisation and the demand for goods; firm optimisation and the supply of goods; market power; externalities in consumption and production; optimal provision of public goods; asymmetric information and market failure

LT (Macroeconomics): understanding macroeconomic data; long-run economic growth; business cycles; aggregate demand; money, inflation and monetary policy; stabilization policy; fiscal policy and government debt; the labour market and unemployment; exchange rates and international economic policy; the financial system and the macroeconomy.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Policy memo (10%) in the MT.

Policy memo (10%) in the LT.

Continuous assessment (10%) in the MT and LT.

PP448 Half Unit

International Political Economy and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Lloyd Gruber CON.6.03

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, Master of Public Administration and Master of Public

Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This half-unit MT course explores why governments and organisations pursue the development policies they do. Whenever experts get together to debate development policy, attention usually focuses on what all the relevant actors should be doing: Which policies should the leaders of developing countries be adopting (or discarding) to stimulate growth and reduce poverty? What new trade or aid strategies should policymakers in the industrialised world be implementing to help poorer countries develop? What should world leaders be doing to address climate change? In practice, however, people in positions of power do not always pursue the policy agendas that well-intentioned development experts say they should. Rather than let this be a source of frustration, students who take this course will come away with a deeper understanding of the political incentives that drive development forward, or sometimes backwards, in the real world. Attention will focus on the political pressures that motivate and constrain development policymakers at all levels of government - local, national and global - and across all sectors of the economy - public, private and non-profit. Students will be exposed to a wide variety of political economy concepts along the way. There will also be opportunities for students to apply these concepts to concrete cases of development management and mismanagement. Do international organisations such as the World Bank, the United Nations and the World Trade Organization really benefit all countries, for example - or just wealthy ones? Why have inclusive democratic institutions taken root in some developing countries but not in others? Are the world's poorer nations stuck with a global balance of power that favours wealthier nations, or is China's rise a global game-changer? If you are curious about the larger political forces driving some developing countries ahead while others stagnate or decline - and you want more experience putting cutting-edge political economy theories to work in solving current development problems - this course is for you.

Teaching: 22 hours of lectures and 16 hours and 30 minutes of seminars in the MT.

There will be a revision session before the take-home timed assessment.

Formative coursework: Each student will be expected to deliver one practice presentation during the first few weeks of the course. Students can expect detailed feedback on the substance of these presentations as well as their delivery (presentations will be videoed where possible). Each student will also be invited to submit an individually-authored policy memo on one of two different questions distributed in week 2. These memos will be handed back - with comments - shortly thereafter.

Indicative reading:

1. Paul Collier, *The Bottom Billion: Why the Poorest Countries are Failing and What Can be Done About It* (Oxford, 2007)
2. Daron Acemoglu and James A. Robinson, *Why Nations Fail: The Origins of Power, Prosperity, and Poverty* (New York: Crown Publishers, 2012).
3. Lloyd Gruber, *Ruling the World: Power Politics and the Rise of Supranational Institutions* (Princeton, 2000)
4. Laurie Garrett, 'Ebola's Lessons: How the WHO Mishandled the Crisis', *Foreign Affairs*, vol 94, no. 5 (2015), pp. 80-107
5. Robert Wade, *Governing the Market: Economic Theory and the Role of Government in East Asian Industrialization* (Princeton, 2003)
6. Martha Finnemore and Judith Goldstein, eds., *Back to Basics: State Power in a Contemporary World* (Oxford, 2013)
7. Lloyd Gruber and Stephen Kosack, "The Tertiary Tilt: Education and Inequality in the Developing World", *World Development* 54 (2014) pp 253-272

Assessment: Presentation (20%) and policy memo (20%) in the MT.

Take-home assessment (60%) in the LT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. A specific - and current - issue of major importance to developing countries will be introduced in the first week of this

exercise. Each student will then be asked to prepare an individually-authored policy memo on the topic. This memo will be worth 20% of the overall course mark.

In the second part of the exercise, students will be randomly assigned into small groups and begin preparing a jointly-delivered oral presentation outlining and defending their group's preferred policy. These presentations will take place towards the end of the term and will count for a further 20% of the overall course mark. The take-home timed assessment is administered via Moodle on a nominated day during week 0 of Lent Term. Students will have a 12-hour window (from 09.00-21.00 GMT) within which to access the assessment questions and complete the assessment. Once they have logged into Moodle and downloaded the assessment questions, students will have 2 hours and 30 minutes to prepare and upload their answers. The assessment will consist of two equally-weighted essay questions, one from Part A (broad thematic questions) and one from Part B (specific topics). Both questions will encourage students to think creatively about the ideas and arguments presented in the course. No outside research will be required. This last component of the assessment will count for 60% of the student's overall course mark.

PP449 Half Unit

Comparative Political Economy and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Tasha Fairfield

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Development Studies, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines key issues in comparative political economy, with an emphasis on developing countries and the politics of policymaking. Who get the policies they want, when, and how? Throughout, we will pay close attention to actors, interests, institutions, and power. Understanding the politics of policymaking is critical for development specialists and policy practitioners. Policies recommended by technical experts are not always politically feasible, and progress may require implementing second-best solutions. Moreover, approaches that work in one case may not work in another. Drawing on real-world examples from a range of policy domains including taxation and social spending, we will discuss strategies for enacting pro-development reforms that might otherwise be politically infeasible. The course will also introduce students to key issues in conceptualization and measurement by examining indices and indicators of governance and democracy that are widely used by development practitioners. Note: the subject matter complements material covered in PP448 and can be taken either in conjunction with, or separately from that course.

Upon completing the course, students can expect to (1) be able to critically engage with the key debates in comparative politics and development, (2) be able to identify political constraints that may impede implementation of pro-development policies, (3) apply political economy theories to explain 'real world' cases of development policy successes and failures, and (4) design strategies that can help make pro-development policies more politically feasible in a given country context.

Teaching: 22 hours of lectures and 20 hours of seminars in the LT.

Formative coursework: Students will receive feedback on formative assignments in seminars that will prepare them for the assessed DPA at the end of the term.

The two-hour revision session in LT will prepare students for the

assessed exam.

Indicative reading:

1. Jeffrey Winters, 2013, 'Oligarchy and Democracy in Indonesia', *Indonesia* 96, pp.11-33
2. Thachil, Tariq, 2011, 'Embedded Mobilization: Non-State Service Provision as Electoral Strategy in India', *World Politics* 62 (3): 434-469
3. Andrei Shleifer and Daniel Treisman, 2000, 'Without a Map: Political Tactics and Economic Reform in Russia', Cambridge: MIT Press
4. Tasha Fairfield, 2013, 'Going Where the Money Is: Strategies for Taxing Economic Elites in Unequal Democracies', *World Development* 47 (July), pp.42-57

Assessment: Exam (60%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Project (40%) in the LT.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. An issue of major importance to developing countries will be introduced early in the term. Students will be assigned into small groups, and each group will pick a country of its choice for the project. The DPA will count for 40% of the course mark.

A cumulative, 2-hour final exam will be given in the Summer Term. The exam will count for 60% of the course mark.

PP450 Half Unit

Making Governments and Policies Deliver for Development

This information is for the 2019/20 session.

Teacher responsible: Dr Adnan Khan

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Pre-requisites: None

Course content: The course will offer students the analytical frameworks and practitioners' knowhow for understanding the challenges of design and implementation of public policies, especially in developing countries. The focus will be on diagnosing intractable public policy problems that these states and public sectors often face and reasons why it is so difficult to deliver transformative and sustainable change on the ground.

The course will draw primarily on institutional economics, particularly principal-agent theory, and political economy to understand these challenges of policy design and implementation. Central to the approach is the interplay between politics, policies, bureaucratic performance, and implementation. This is captured by the 'strategic triangle' concept that focuses on policy options that are technically correct, politically supportable, and implementable in varying contexts.

The course has an applied focus, and will use a systematic and structured framework to identify pressing policy problems, diagnose the underlying causes of these problems using evidence, and design, test, implement and refine policy innovations. There will be a lot of emphasis on diagnosing and dealing with the challenges of policy implementation and political authorisation and the skill sets needed to address these challenges.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 3 presentations in the LT.

Indicative reading: Key readings:

- Andrews, M., L. Pritchett & M Woolcock. (2017). *Building State Capability: Evidence, Analysis, Action*. Oxford University Press.
- Matt Andrews. 2013. "The Limits of Institutional Reform in Development." Cambridge University Press.
- Thomas B. Pepinsky, Jan H. Perskalla, and Audrey Sacks. 2017. "Bureaucracy and Service Delivery". *Annual Review Political*

Science. 20:249-68.

- Ernesto Dal Bo and Frederico Finan. 2016. "At the Intersection: A Review of Institutions in Economic Development". EDI Working Paper Series WP16/11.01
- Cristina Corduneanu-Huc, Alexander Hamilton and Issel Masses Ferrer. 2012. "Understanding Policy Change: How to Apply Political Economy Concepts in Practice." Washington D.C.: World Bank Publications.
- Carden, Fred. 2009. "Knowledge to Policy: Making the Most of Development Research." International Development Research Centre, Sage Publications, Ottawa.
- World Bank Policy Research Report. 2016. "Making Politics Work for Development: Harnessing Transparency and Citizen Engagement". World Bank Group, Washington D.C.

Assessment: Essay (50%, 3000 words) in the period between LT and ST.

Policy memo (30%) in the LT.

Presentation (20%) in the LT Week 11.

PP452 Half Unit

Applying Behavioural Economics for Social Impact: Design, Delivery, Evaluation and Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Nava Ashraf

Availability: This course is compulsory on the MPA in Social Impact. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and Master of Public Administration. This course is not available as an outside option. This course is only available to students in the second year of the MPA programme.

Pre-requisites: A rigorous understanding of statistics, economics and econometrics is important for this course, in order to be able to absorb the economics journal articles and methods covered. Students will be required to have achieved marks of 55 or higher in PP440 and PP455 to be eligible for the course. Students with marks of 50-54 in PP440 and PP455 will be considered on a case by case basis.

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation. The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the effectiveness of social interventions and programmes across

a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship. The course tutor will be Professor of Economics and Director of Research at the LSE Marshall Institute.

Teaching: Teaching sessions will include both a Harvard Business School-style case study session and a lecture on the related research articles behind the case and discussion in 10 x 3-hour workshops in Lent Term. There will also be a drop-in weekly hour-long technical support session.

Formative coursework: Additional exercises which will include preparation of an essay of the discussion questions for HBS-style case discussion.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult Nudge: Improving Decisions About Health, Wealth, and Happiness, by Richard Thaler and Cass Sunstein (2009, Penguin) and Thinking, Fast and Slow, by Daniel Kahneman (2012, Penguin). We will also be reading several scientific articles from top-tier economics journals. A full reading list with the readings for each topic will be made available at the beginning of the course, and a draft course syllabus is available.

Assessment: Take-home assessment (100%) in the ST. The assessment will be of two hours' duration early in Summer Term.

PP454

Development Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Robin Burgess 32L.3.03 and Dr Gharad Bryan 32L.3.10

Availability: This course is compulsory on the MPA in International Development. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Students may not take both this course and EC428 Development and Growth.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students who have not taken PP440 and PP455 will require permission from the course lecturer to attend the course.

Course content: In this course, students will apply their understanding of economics and econometrics to the task of policy making in developing countries. The focus is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students to complete weekly exercises based on course readings with one of these exercises being marked in a given term.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PP455

Quantitative Approaches and Policy Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Jeremiah Dittmar and Prof Mark Schankerman

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po) and MPA Dual Degree (LSE and Tokyo). This course is not available as an outside option.

Course content: The course introduces students to the quantitative evaluation of public policies with the help of regression based evaluation methods and cost-benefit analysis. The course introduces students to basic multiple regression analysis including hypothesis testing, modelling of non-linear relationships, and dummy variables. From there, the course covers a number of regression based evaluation methods to assess the causal effectiveness of policy interventions. These include the use of randomized experiments, natural or quasi-experiments, panel data, difference-in-differences estimation, instrumental variables, matching and regression discontinuity designs. The final part of the course provides an overview of cost-benefit valuation methods for public policy.

Teaching: 20 hours of lectures and 11 hours of seminars in the MT. 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: Particularly useful textbooks are Joshua D. Angrist and Jom-Steffen Pischke, "Mastering Metrics"; James Stock & Mark Watson, "Introduction to Econometrics"; and Jeffrey Wooldridge, "Introductory Econometrics". The material in the textbooks will be complemented with recent research papers and chapters from other books. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (60%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Presentation (10%) and policy memo (10%) in the LT.

Policy memo (10%) in the MT.

Continuous assessment (10%) in the MT and LT.

PP478

Political Science for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Mathilde Emeriau

Availability: This course is compulsory on the Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In this course we develop tools to understand and analyse important political phenomena including political behaviour (such as voting behaviour, elections and lobbying), political institutions (such as electoral systems, parliamentary and presidential government and central banks) and political outcomes (such as economic policies, development aid and ethnic conflict). The course combines a review of the main empirical regularities across time and across country in each of these areas, with an introduction to key theoretical arguments about how to understand how actors interact and how institutions shape strategic behaviour, and an introduction to the latest empirical (and causal) estimation techniques for testing the key theoretical ideas.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 20 hours of lectures and 15 hours of seminars in the LT. 2

hours of lectures in the ST.

Formative coursework: Students are expected to produce one essay in each of the Michaelmas and Lent Terms.

Indicative reading: "Analysing Politics" by Shepsle (W.W. Norton, 2010, 2nd edition) provides an excellent starting point and can be used as the main reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (50%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Essay (30%, 2000 words) in the LT.

Group exercise (20%) in the MT and LT.

The group exercise consists of a group application in each of Michaelmas and Lent Terms.

PP4B3

MPA Capstone Project

This information is for the 2019/20 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is compulsory on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, private sector companies, international organisations, think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem. The Capstone will enable students to develop and strengthen organisational, research and policy analysis, policy report writing, and group working skills.

Teaching: 4 hours and 30 minutes of seminars in the MT.

Teaching comprises three 1.5 hour Capstone seminars in the MT.

These seminars provide guidance on planning, structuring and presenting the Capstone report. Students are asked to participate in the Capstone Professional Development exercises designed to support effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide overall guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on presentations of work-in-progress during MT and LT.

Indicative reading: Policy analysis: William N. Dunn, Public Policy Analysis: An Integrated Approach (Routledge, 2018); Eugene Bardach and Eric M. Patashnik, A Practical Guide for Policy Analysis (Sage Publications, 2016); David L. Weimer and Aidan R. Vining, Policy Analysis: Concepts and Practice (Routledge, 6th edition, 2017); Sue C. Funnell and Patricia J. Rogers, Purposeful Program Theory (Jossey-Bass, 2011); Philip H. Pollock, The Essentials of Political Analysis (CQ Press, 2016). Report writing: John Bowden, Writing a Report 9th edition (How to Books, 2011); Stella Cottrell, Dissertations and Project Reports: A Step by Step Guide (Palgrave Study Skills, 2014). Group working: Laura Lipton, Groups at Work: Strategies and Structures for Professional Learning (Miravia, 2011); Brian A. Griffith and Ethan B. Dunham, Working in Teams: Moving from High Potential to High Performance (Sage, 1st edition, 2015).

Assessment: Project (100%, 15000 words) in the LT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project

report.

2) 50% of the overall mark is given by two academic readers upon submission of the project report; and

3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item).

Additionally, each group member must complete the Capstone evaluation and feedback exercise. This will be submitted individually and separately from the report.

PP4B4

MPA Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact and Master of Public Administration. This course is not available as an outside option.

Students may not take this course and an MPA Policy Paper.

This course is only available to MPA students in Year 2 of their programme.

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research in an area of public policy. MPA students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their Academic Mentor. The dissertation involves an evidence-based assessment of a concrete policy issue or problem in a specific setting. It must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge-building. The main body of the dissertation should include literature review, methodology, results of the analysis, discussion of findings, conclusions and implications for knowledge. Dissertations can utilise quantitative and/or qualitative data and information and draw on primary and/or secondary sources.

Teaching: 4 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT.

Teaching comprises four seminars in the MT and LT. These seminars provide academic and practical guidance on planning and designing the dissertation; developing a research topic and question; and framing the research. The student's Academic Mentor will provide advice and guidance on this piece of work.

Indicative reading: Writing conventions:

- Inger Furseth, Euris Everett and Larry Everett, *Doing Your Master's Dissertation: From Start to Finish* (Sage Study Skills Series, 2013);
- Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014);
- Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008);
- Christopher Hart, *Doing a Literature Review* (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, *Reason and Rigor: How Conceptual Frameworks Guide Research* (2nd edition, Sage Publications, 2016).

Research methods:

- Catherine Hakim, *Research Design: Successful Designs for Social Economics Research*, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, *Qualitative Research Design* (3rd edition, Sage, 2013);
- Alan Bryman, *Social Research Methods*, 5th ed. (Oxford University Press, 2015);
- David Partington, *Essential Skills for Management Research* (Sage Publications, 2002).

Assessment: Dissertation (90%, 10000 words) in the ST.

Dissertation proposal (10%) in the MT.

- A 1,500 word dissertation proposal consisting of the title, abstract, research question, research justification, feasibility of the dissertation topic, choice of literature and an explanation of sources, proposed research design and methods, and provisional structure will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their Academic Mentor. Students will be given feedback on their proposal.
- The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

PP4E5 Half Unit

Innovations in the Governance of Public Services Delivery

This information is for the 2019/20 session.

Teacher responsible: Dr Simon Bastow and Professor Gwyn Bevan

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Management (1 Year Programme), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines innovations in different models of governance (defined broadly as the overarching mechanisms) that organise the delivery of public services. We look at variations across three key governance models in particular, namely hierarchy, markets and networks in recent decades, and assess their strengths and limitations. We look at their application in both developed and developing countries, to a wide range of core public services, including healthcare, education, criminal justice, and public utilities.

Many public services have seen a broad global shift from traditional hierarchical bureaucracies towards markets and networks. Many countries have experienced, and will continue to experience, extensive marketisation of public services and we cover key innovations and their impacts. Markets, in particular, create high-powered incentives to challenge inertia that can beset the public sector, however marketisation is no panacea: indeed the characteristics of some public services mean that this brings new risks and problems and governments have often struggled in recent decades with managing the consequent market failure. We look at the use of 'quasi-markets', voucher systems, full-scale privatisations, Private Finance Initiatives (PFIs) and Public-Private Partnerships (PPPs), Payment by Results (PBR) and Social Impact Bonds (SIBs), and assess their impact on public services. We also look at innovations in networked, mutual or collaborative forms of governance, particularly the relevance of new developments, such as the 'sharing economy', the 'digital economy' and social media.

A central theme of the course is the relationship between institutions and innovative mechanisms for change. Markets and networks offer a wide range of innovative mechanisms, but their success or failure is often determined by the institutional context in which they are implemented. Looking across different models of governance, the course will consider issues around optimisation of design and integration of models, and the impact of institutional path dependence on success and failure. We explore how to align new mechanisms for change with existing institutions in complementary ways.

The course draws on a range of disciplines and analytical approaches, including transaction cost economics, political science, institutional economics, and developments in behavioural economics beyond 'nudges'. These include the economics of identity, reciprocal altruism and the power of reputational mechanisms of 'naming and shaming' and 'naming and faming'. The lectures and seminars are organised to enable you to understand key theory/concepts through illustrative cases and discussion. The seminars are organised around group-based presentations.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A detailed essay plan of two pages with introduction, one key paragraph and conclusion written in full in preparation for the summative essay.

Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, the economics of transaction costs and behavioural economics among other disciplines. Some indicative readings throughout the course include:

- C. Wolf (1993) *Markets or Governments* (Cambridge: MIT Press)
- AO Hirschman (1970), *Exit, voice, and loyalty: Responses to decline in firms, organizations, and states*, (London: Harvard university press)

- DM Hausman and MS McPherson (2010), *Economic Analysis, Moral Philosophy and Public Policy* (Cambridge, Cambridge University Press), chapter 2
- W. Powell (1990), *Neither market nor hierarchy: network forms of organization*, *Research in Organizational Behavior* 12 pp.295-336
- A. Sundararajan (2016), *The Sharing Economy: The End of Employment and the Rise of Crowd-Based Capitalism* (MIT Press)
- S. Bowles (2016), *The Moral Economy: Why Good Incentives Are No Substitute For Good Citizens* (Yale University Press)
- G A Akerlof, RE Kranton (2010), *Identity Economics: How Identities Shape Our Work Wages and Well Being* (Woodstock: Princeton University Press)
- A. Oliver (2019) *Reciprocity and the Art of Behavioural Public Policy* (Cambridge, Cambridge University Press)

Assessment: Essay (50%, 3000 words) in the ST. Presentation (20%) and policy memo (30%) in the LT.

An essay of 3,000 words critically examining governance of a public service (preferably) in the student's own country (50%). Presentations as a member of a seminar group in the weekly seminars (20%).

A policy brief for a minister, either for proposed reform or analysis of an existing market-based or network-based model of governance in action (30%).

PP4G3 Half Unit

Designing and Managing Change in the Public Sector

This information is for the 2019/20 session.

Teacher responsible: Dr Simon Bastow

Availability: This course is available on the CEMS Exchange, Global

MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines important challenges for governments and public sector organisations in being able to design and manage transformative change in public services. Two key aspects of change are considered:

- the **instrumental** capacity of government to design and implement policy and programme change in coherent, sustainable and successful ways, and
- the **adaptive** capacity of government to respond to change in their external environment, and avoid problems of obsolescence, misalignment or 'out-of-touch' policies

We look at this dual challenge across developed and developing country contexts, and across core areas of government policy and public services. The course is primarily about government and public sector, rather than private or third sector, however an important element is looking at the capacity of governments to coordinate with these other sectors in designing and managing transformative change.

From the outset we discuss how governments can develop coherent responses to so-called 'wicked' public policy and management (PPM) problems. These tend to be complex, multi-faceted and intractable problems, ones that require well-designed and complementary measures. We look at the interplay of different governance factors such as the impact of politics, bureaucracy, culture, incentives and motivations, administrative capacity, amongst others, and explore the potential for and limitations on transformative change. The course works through key aspects of holistic change: including strategy, culture, motivation and coordination, leadership, social-technical systems, resilience, and policy and organizational learning.

The course aims to provide students with key concepts and approaches to designing coherent action in response to complex public policy problems. We look at these challenges primarily from the perspective of the senior government or public sector official, working at the interface of high politics, policy making, and operational delivery. The course will be useful for students who are interested in working **in** government, or for those who work in other 'social impact' roles that involve working closely **with** government and public authorities.

The syllabus draws on concepts from public policy, political science, institutional economics, and organizational and system design, and organizational behaviour. We cover a wide range of sectors and policy areas, particularly core areas of public sector services such as criminal justice, health, welfare, education and defence. The course emphasises dialogue between concepts and cases, and aims for strong applied and practical relevance.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Students on this course will have a reading week during Week 6.

Formative coursework: Students will receive feedback on group presentations in seminars in the MT.

Students will have the option to submit a formative essay by the end of the MT.

Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, management economics, public management and administration and organizational psychology amongst other disciplines. Some indicative readings throughout the course include:

- J van Aken (2007) 'Design Science and Organization Interventions: Aligning Business and Humanistic Values', *Journal of Applied Behavioural Science*, 43(1): 67-68

- H. Simon (1996), *Sciences of the Artificial*, 3rd ed. (Cambridge, MA: MIT Press)
- J. Roberts (2004), *The Modern Firm* (Oxford, Oxford University Press)
- H. Mintzberg (1994), *The Fall and Rise of Strategic Planning*, *Harvard Business Review*, 72(1), Jan-Feb 1994 pp107-114
- P. Dunleavy, H. Margetts, S. Bastow and J. Tinkler (2006) *New Public Management is Dead: Long live digital-era governance*, *Journal of Public Administration Research and Theory*, 16, pp467-494
- Hood, Christopher (1998), *The Art of the State: Culture, Rhetoric and Public Management* (Oxford, Oxford University Press)
- Schein, Edgar H. (2010), *Organizational culture and leadership* (San Francisco, John Wiley & Sons Inc.)
- Brehm, J. and S. Gates (1999), *Working, Shirking and Sabotage: Bureaucratic Response to a Democratic Public* (Michigan, The University of Michigan Press)
- Heath, C. and N. Staudenmayer (2000), *Coordination Neglect: How Lay Theories of Organizing Complicate Coordination in Organizations*, *Research in Organizational Behaviour* 22: 155-193
- Hood, C. and Margetts, H. (2007), *The Tools of Government in the Digital Age* (Basingstoke, Palgrave MacMillan)
- G. Morgan (2006), *Images of Organization* (Sage)
- Weick, Karl. E. (1995) *Sensemaking in Organizations* (London, Sage)

Assessment: Essay (40%, 3000 words) in the LT. Presentation (20%) and case analysis (40%) in the MT.

- An essay of 3,000 words in response to one of the set essay questions or a question agreed with Dr Bastow – to be submitted by Week 3 in the Lent Term (40%).
- Group presentations in seminars throughout the MT (20%).
- Case analysis of 3,000 words by week 11 in the MT (40%).

PP4J2 Half Unit

New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise

This information is for the 2019/20 session.

Teacher responsible: Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields
Other teachers: Professor Julian Le Grand and Professor Stephan Chambers, Marshall Institute

Availability: This course is compulsory on the MPA in Social Impact. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy and Master of Public Administration. This course is not available as an outside option. The course is available in the first instance to students taking the MPA in Social Impact. It is also open to students taking other MPA programmes. This course is only available to MPA students in Year 2 of their programme. The course is a collaboration between the Marshall Institute and the School of Public Policy.

Course content: Private actions for public benefit - whether called philanthropy, charity, associationalism, social entrepreneurship or social business - have long been significant within societies. This arena of private action is currently experiencing both resurgence and disruption. This course takes a policy-oriented approach towards these new dynamics of private social action. It explores innovative mechanisms of financing, organisation and delivery, including impact investing, new coalitions for social impact (for instance, social impact bonds), venture philanthropy and social enterprise. A central focus is the opportunity created by bringing together market and business mechanisms and the social – but also the consequent challenge and complexity of achieving social impact through hybrid organisations, hybrid funding streams and

hybrid mechanisms of coordination. Cross-cutting themes are how to design incentive structures which respond to the complex web of motivations of actors in this field, and the organisational tension inherent in responding to double or triple bottom lines.

Using analytical frameworks drawn from economics, sociology and political economy, the course will critically evaluate the challenges and advantages of these emerging institutions and mechanisms. Examples of the types of question that we will investigate include: what is social enterprise? How can social enterprises support social innovation and impact? Can we combine financial return, social impact and environmental sustainability? Why should an organisation be a non-profit, for-profit or other ownership form? How can the state, market and private altruistic action combine to achieve social impact? How can we design organisations and structures which nurture and capitalise on values and altruism? What are the differences between the culture, practice and motivations of state, commercial and charitable organisations, and what are the consequent challenges of implementation and management in hybrid organisations? The answers to these questions are contested and the course seeks to give participants the critical skills to make their own determination.

Teaching: 15 hours of lectures, 15 hours of seminars and 4 hours and 30 minutes of workshops in the LT.

The course comprises of one 90 minute lecture and one 90 minute seminar each week. In addition there will be three 90 minute 'private action in practice' workshops organised by the Marshall Institute.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the LT.

Formative assessment will consist of one 2,000 word essay, submitted in the middle of the LT. Students will also receive formative feedback on seminar presentations.

Indicative reading:

- Yunus, M. (2010). *Building Social Business*. New York: Public Affairs.

Assessment: Coursework (30%, 2000 words) and essay (70%, 3000 words) in April.

PP4J4 Half Unit

Designing and Implementing Evidence-Informed Policies and Programmes

This information is for the 2019/20 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the MPA Dual Degree

(LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students.

Course content: The aim of this half-unit course is to help students develop knowledge, critical analysis and skills necessary for evidence-informed policy making. It will enable students to assess, analyse, interpret and use evidence to design relevant and effective interventions. The course particularly emphasises the need to recognise the complexity of economic, social, institutional and political context and incorporate contextual analysis of social relations, gender inequalities, interests and incentives of societal actors in policy design and implementation arrangements. The course will equip students with the knowledge and skills to critically appraise how government agencies, international organisations and other actors generate and utilise evidence to design and implement policies and programmes.

The course covers evidence generation and use during three main stages of the policy cycle: policy design, implementation, and monitoring and evaluation. It introduces theory-based approaches and examines the use of social, gender, governance and political-economy analysis to inform policy design and implementation. It discusses the role of monitoring and evaluation in producing nuanced policy-relevant evidence.

The course draws on policies and programmes in the field of social policy and social development in a global context. In seminars, students will review and critically assess policy reports and research studies of actual policies and programmes. They will scrutinise different assessment tools developed and used by government agencies and international organisations (e.g. DFID, World Bank) for gathering policy relevant evidence.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

10 x 1.5 hour lectures (MT weeks 1-10)

10 x 1.5 seminars (MT weeks 2-11)

Formative coursework: Students will be expected to produce 1 presentation, 1 essay and 1 other piece of coursework in the MT. Students will work in groups to deliver seminar presentations on assigned topics and contribute to seminar discussions. As well as enabling students to practise essential team working and presentation skills, this exercise is an important preparation for the final summative assessment. It will enable students to practise their ability to analyse and evaluate policies and programmes, prepare and present critiques, and use literature to frame and contextualise analysis.

Students will also write a short essay answering a pre-assigned question (500 words).

Lastly, students will write a short individually-authored policy report (1,000 words) in preparation for the summative assessment. This assignment will develop students' ability to design and present analytical frameworks and to appraise policies and programmes. Students will receive personalised feedback and suggestions for future improvement.

Indicative reading: Parkhurst, J. (2017) *The Politics of Evidence, From Evidence-based Policy to the Good Governance of Evidence*, Routledge: London and New York. Funnell, S. and P. Rogers (2011) *Purposeful Program Theory: effective Use of Theories of Change and Logic Models*, Wiley & Sons: San Francisco. Bacchi, C. (2009) *Analyzing Policy: What's the Problem Represented to Be?* Pearson Australia: Frenchs Forest, N. S. W. Cartwright, N and J. Hardie (2012) *Evidence-Based Policy: A Practical Guide to Doing It Better*, Oxford University Press. Ravallion, M. (2009) *Should the Randomistas Rule? Economists' Voice*, The Berkeley Electronic Press. Holmes, R. and N. Jones (2013) *Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets*, Zed Books: London and New York. Fritz, V., Levy, B.

and R. Ort (2014) *Problem-driven Political Economy Analysis: The World Bank's Experience*, Directions in Development - Public Sector Governance, World Bank: Washington, DC.

Assessment: Essay (30%, 1500 words) in the MT.

Policy report (70%) in the LT.

Students will be required to complete two assignments designed to support the main learning outcomes of the course:

1 A three-part individually authored essay (30%), in which students answer pre-assigned questions, drawing on literature and course material (500 words for each answer, maximum 1,500 words in total, MT week 11). This assessment will support student learning of the main debates, issues and critiques and will help consolidate their disciplinary and methodological knowledge.

2 An individually-authored policy report (70%) drawing on policy documents, evaluation reports and relevant literature (maximum 3,000 words, LT week 1).

This assessment will develop students' ability to appraise policies and programmes; evaluate, analyse, interpret and use evidence; design analytical frameworks; prepare and present written critiques; and write policy reports.

PP4V8 Half Unit Policy Paper

This information is for the 2019/20 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, Master of Public Administration and Master of Public Policy. This course is not available as an outside option. MPA students may not take both this course and an MPA Dissertation. This course is only available to MPA students during the second year of their programme.

Course content: The aim of the course is to enable students to plan, design and conduct independent research in an area of public policy. Students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their Academic Mentor. The paper will carry out an evidence-based assessment of a concrete policy issue or problem in a specific setting and provide a practical contribution to policy and practice. The main body of the paper should include methodology, results of the analysis, discussion of findings, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and information and draw on secondary and/or primary sources.

Teaching: 4 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT.

Teaching comprises four seminars in the MT and LT. These seminars provide academic and practical guidance on planning and designing the policy paper; developing a research topic and question; and framing the research. The student's Academic Mentor will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, research justification, feasibility of the topic, an explanation of sources, proposed research design and methods, and provisional structure must be submitted in the MT. Students may only change their topic thereafter with the agreement of their Academic Mentor. Students will be given feedback on their proposal.

Indicative reading: Writing conventions:

- 6,000 word policy paper.

PP4X6

Welfare Analysis and Measurement

This information is for the 2019/20 session.

Teacher responsible: Dr Berkay Ozcan OLD2.32

Availability: This course is compulsory on the MPA in Public and Social Policy. This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Social Impact, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), Master of Public Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course has no formal pre-requisites. Because the course is quantitative in nature, a familiarity with basic statistical concepts and basic calculus is useful but not essential.

Course content: This course provides an introduction to the analysis and measurement of the welfare of individuals and societies, examining concepts, measurement and data, as well as providing illustrations. The aims are to provide an understanding of the main tools used to measure and monitor individuals and social welfare, and to develop skills for assessing academic research and official statistics (as produced by national or international agencies) and for undertaking one's own analysis. The first half of the course focuses on univariate monetary measures of economic wellbeing notably 'income', and on the experience of OECD countries (especially the UK, EU, and USA), but the aim is also to place these in the context of developments based on other approaches and in other countries including middle- and low-income nations. The topics covered include measurement of inequality, poverty, and mobility; setting poverty thresholds and equivalence scales; data sources and their quality; empirical illustrations considering assessments of trends within countries, cross-national differences, and global poverty and inequality. The second half of the course broadens the perspective to consider a range of non-monetary, multidimensional, and subjective measures of welfare for individuals and societies. Examples include occupational and socio-economic status (SES), anthropometric measures, the Human Development Index and related indices of development, and measures of happiness and life satisfaction. The second half of the course draws on the measurement approaches and data issues covered in the first half of the course, developing them as appropriate to the new settings.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

The course provides a reading week in Week 6 of Michaelmas and Lent Terms.

Indicative reading: Most of the reading for the course is in journal articles. Books providing overviews include Salverda W, Nolan B, Smeeding TM (eds) *The Oxford Handbook on Economic Inequality* (2009); Foster, J, Seth, S, Lokshin M and Saiara, Z, *A Unified Approach to Measuring Poverty and Inequality* (2013; free e-book available) and Atkinson A and Bourguignon F (eds) *Handbook of Income Distribution Volume 2* (2015) and the earlier Volume 1 (2000). A full reading list is distributed at the beginning of the course.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Essay (25%, 2000 words) in the LT.

SO407

Politics and Society

This information is for the 2019/20 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is compulsory on the MSc in Political Sociology. This course is available on the MSc in Social Research Methods and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to explore some of the great debates about the relationship between politics and society. It will examine the interaction between political institutions, economic interests and cultural ideas, especially in societies that are both democratic and capitalist. The course will explore some of the classic empirical and historical controversies that have animated political sociologists. Each week, we will discuss questions like: What gave rise to states and nations? Why are some social movements more successful than others? How does social change shape parties and elections? Do repressive states give rise to radicalism? Why are welfare states more developed in some countries than others? Why is there no Labor Party in the United States? Under what conditions does democracy develop? What explains the growth of populism? And has neo-liberalism become hegemonic? The course will also look at the canonical writings of authors like Marx, Weber and Tocqueville, as well as critically explore the use of some political concepts. In addition, it will enable you to build up your knowledge of a number of countries and to assess the strengths and weaknesses of some of the main theories and approaches that have dominated the study of political sociology. These include functionalist, rational choice, and institutionalist theories, as well as historical and comparative approaches.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 2 hours of seminars in the ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Seminars: Papers will be presented by participants and, on occasion, by guest speakers. In addition to the weekly seminar, there will be a number of additional seminars specifically concerned with research strategies in political sociology. If possible, students should attend the lecture course SO203 Political Sociology when available.

Formative coursework: Members of the seminar will be required to present a number of papers during the course of the seminar. There will also be a termly essay in MT and LT.

Indicative reading: B. Anderson, *Imagined Communities*; R. Archer, *Why is There No Labour Party in the United States?*; M. McQuarrie et al, *Democratizing Inequalities*; P Evans et al, *Bringing the State Back In*; S M Lipset, 'The Social Requisites of Democracy Revisited', *American Sociological Review*, vol 59; S Lukes, *Power: A Radical View*; D McAdam, *Comparative Perspectives on Social Movements*; M Mann, *The Sources of Social Power*; M Olson, *The Logic of Collective Action*; T Skocpol, *Protecting Soldiers and Mothers*; C. Tilly, *Coercion, Capital and European States*; L. Weiss, *The Myth of*

the Powerless State.

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

S0424

Approaches to Human Rights

This information is for the 2019/20 session.

Teacher responsible: Dr Monika Krause STC S207

Availability: This course is compulsory on the MSc in Human Rights. This course is available on the LLM (extended part-time), LLM (full-time), MSc in International Migration and Public Policy, MSc in Women, Peace and Security and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights who wish to take this as an option. Priority is given to postgraduate students in the Sociology Department and those registered on the LLM. The course is also available as an outside option for other MSc degrees where regulations and numbers permit. Students from other programmes who wish to apply for a place on S0424 must complete the online application form on LSEforYou stating reasons for wishing to take the course.

Course content: This is a multi-disciplinary course that provides students with a rigorous and focused engagement with different disciplinary perspectives on the subject of human rights including philosophy, sociology and international law. It provides students with contending interpretations of human rights as an idea and practice from the different standpoints that the disciplines present and investigates the particular knowledge claims and modes of reasoning that the respective disciplines engage. The course applies the insights of international law, philosophy and sociology to understand key human rights issues such as universality, the right to life, free speech, humanitarian intervention, war, genocide, human rights activism, globalization, and states of emergency.

Teaching: 10 hours of lectures and 18 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT. 2 hours of seminars in the ST

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 essay in the LT.

Active participation in the workshops is expected and students will be asked to make a presentation to their group.

Indicative reading: Indicative reading: No one book covers the entire syllabus and students are expected to read widely from more general texts on human rights, to more specific texts outlining the debates on human rights from a particular disciplinary perspective. Introductory reading: Jack Donnelly, *Universal Human Rights in Theory and Practice*; Michael Freeman, *Human Rights*; Philip Alston and Ryan Goodman, *International Human Rights* (2013). Philosophy: P. Jones, *Rights*, (1994); A. Swift, *Political Philosophy: A Beginners' Guide for Students and Politicians*, (2006). International Law: A. Cassese, *International Law*, 2nd ed. (2005), chapter 19; P. Sieghart, *The Lawful Rights of Mankind* (1985), S. Greer, *The European Convention on Human Rights - Achievements, Problems and Prospects*, Cambridge University Press, 2007. Sociology: L. Morris, *Rights: Sociological Perspectives* (2006); B. Turner, *Vulnerability and Human Rights* (2006); A. Woodiwiss, *Human Rights* (2005).

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0425

Regulation, Risk and Economic Life

This information is for the 2019/20 session.

Teacher responsible: Prof Nigel Dodd STC S106

Availability: This course is compulsory on the MSc in Economy, Risk and Society. This course is available on the MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MPhil/PhD in Accounting, MSc in Environmental Policy and Regulation, MSc in Regulation and MSc in Risk and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to sociological perspectives on economic life and risk regulation in advanced industrial societies. Topics include economic sociology, state risk regulation including regulatory variations, enforcement and business responses, economic and civil society sources of regulation, organizational risk management, science, experts and risk regulation, globalization, and trends in risk regulation. The course will draw upon a broad international literature on social and economic regulation and case studies from the environmental, financial and public health domains.

Teaching: 25 hours of seminars in the MT. 25 hours of seminars in the LT. 2 hours and 30 minutes of seminars in the ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Indicative reading: Aspers, P & Dodd, N (eds) (2015) *Re-Imagining Economic Sociology* (Oxford University Press); Beck, U. (1999) *World Risk Society*. Cambridge: Polity; Beckert, J (2002) *Beyond the Market: the Social Foundations of Economic Efficiency* Princeton University Press; Bernstein, P L (1996) *Against the Gods: The Remarkable Story of Risk* (Princeton University Press); Dodd, N (2014) *The Social Life of Money* (Princeton University Press); Hutter, B.M. (ed) (2010) *Anticipating Risks and Organizing Risk Regulation*, Cambridge University Press; Smesler, N. & Swedberg, R. (eds) (2005) *The Handbook of Economic Sociology*; Swedberg, R. (2003) *Principles of Economic Sociology* Princeton University Press. 160

Assessment: Exam (70%, duration: 3 hours) in the summer exam period.

Essay (30%, 3000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

S0427 Half Unit

Modern Social Thought

This information is for the 2019/20 session.

Teacher responsible: Prof Nigel Dodd STC S106

Availability: This course is available on the MSc in Political Sociology, MSc in Political Theory and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Contemporary social theory. An introduction to the historical background, context and output of Walter Benjamin, Theodor Adorno, Michel Foucault, and Jean Baudrillard, and a

close reading and study of some of their most significant texts.

Teaching: 30 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: One formative essay in LT

Indicative reading: The following is merely a sample list of some of the texts to be covered: Benjamin, W: 'Theses on the philosophy of history' & The Arcades Project (Section N); Adorno, T: 'Theses against Occultism' & Negative Dialectics (various sections); Foucault, M: The History of Madness & The Order of Things (various sections); Baudrillard, J: Symbolic Exchange and Death (mainly chapter 5) & The Spirit of Terrorism. A number of secondary readings will be recommended, but students will be strongly discouraged from relying on these.

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0430 Half Unit Economic Sociology

This information is for the 2019/20 session.

Teacher responsible: Dr Fabien Accominotti - STC 206

Availability: This course is available on the MPhil/PhD in Accounting, MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Are we really rational utility-maximisers? What is 'the economy' and what is its relationship to society? How does economic life reflect and enact moral categories? How can we understand the production of economic 'winners' and 'losers'? This course offers a general introduction to the theoretical foundations of economic sociology, providing an opportunity to engage questions like these through both sociologically grounded accounts of economic phenomena and sociological critiques of the analytical assumptions and research procedures common in mainstream economics.

Topics covered in the course include: critical approaches to economy and society; economic rationality; the sociology of economics; morals and markets; valuation and worth; sociology of consumption; credit and debt; class and inequality.

Teaching: 25 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: A project overview due in week 7 of LT. Individual feedback sessions in office hours provided to check student project development.

Indicative reading: Recommended general texts: M Granovetter & R Swedberg (Eds), The Sociology of Economic Life; D Slater & F Tonkiss, Market Society: Markets and Modern Social Theory; N Smelser & R Swedberg (Eds), The Handbook of Economic Sociology; V Nee & R Swedberg (Eds), The Economic Sociology of Capitalism. A detailed reading list will be provided at the beginning of the course.

Assessment: Project (100%, 4000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Wednesday of Summer Term.

Attendance at all workshop sessions and submission of all set coursework is required.

S0434

Cultural Theory and Cultural Forms

This information is for the 2019/20 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is compulsory on the MSc in Culture and Society. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Cultural Theory and Cultural Forms is the core course for the MSc Culture and Society. The aim is to introduce you to a wide range of approaches, debates and issues that loom large in the study of cultural processes. By the end of this course you should have a reasonable map of different aspects and approaches to researching cultural processes; and you should feel able to formulate your own research questions and strategies within the diverse traditions of culture theory and cultural research. In Term 1 we introduce the diverse approaches to cultural theory and the central debates that have structured the field, with particular attention to the ways in which these link to central sociological themes. The second focuses on approaching these theoretical debates from the vantage of empirical research and a concern with methodologies for studying cultural processes.

Teaching: 10 hours of lectures and 20 hours of seminars in the MT. 10 hours of lectures and 20 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: All students are expected to submit one piece of non-assessed written work per term and prepare seminar presentations.

Indicative reading: Ahmed, S. 2004. "Affective economies", *Social text*, 22: 117-139. Bourdieu, P. 1984. *Distinction: A Social Critique of the Judgment of Taste*. London: Routledge. Hall, S. (1992) 'New Ethnicities' in Donald, J and Rattansi, A (eds.) (1992) "Race", *Culture, Difference*, London: Routledge. Latour, B. (2004) *Why Has Critique Run out of Steam?: From Matters of Fact to Matters of Concern*. *Critical Inquiry* 30 (Winter 2004), 225-248. McGuigan, J. (2010) *Cultural Analysis*. London: Sage. McRobbie, A. (2005) *The Uses of Cultural Studies*. London: Sage. Miller, D. (2008) *The comfort of things*. Polity, Cambridge. Oswell, D. (2006) *Culture and Society*. London: Sage.

Assessment: Essay (50%, 5000 words) in the LT.

Essay (50%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day.

The first essay is due by the second Thursday of Lent Term and the second essay is due by the second Thursday of Summer Term. Attendance at all seminars and submission of all set coursework is required.

S0448

City Design: Research Studio

This information is for the 2019/20 session.

Teacher responsible: Dr Suzanne Hall STC.S212 and Dr David Madden STC.S209

Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.

Course content: The City Design Research Studio is the central unit of the MSc programme, linking the critical issues raised in the core and optional lecture courses, including questions of power and social justice, with the practical analysis of issues of city design and proposals for urban intervention. This course promotes a practical understanding of the city as a social and built environment. Through a mixed-methods engagement with site-based issues, the research studio explores the different ways city design relates to policy formation, planning processes, legal frameworks, financing mechanisms, local forms of organisation and the emerging needs of complex urban societies. It will provide students with an appreciation of the complexities of urban design

and development processes, and with interdisciplinary tools for addressing specific urban challenges. The course addresses design as both informed and imaginative modes of research and practice that shapes urban environments, responds to urban problems, and connects visual, social and material dimensions of the city. It aims to integrate the physical, economic, social and political aspects of urban contexts, and develop ways to analyse these visually, textually and verbally. The studio-based approach to learning is an immersion in site-based research and experimental, strategic and pragmatic forms of design intervention. The course comprises of group based fieldwork in a London site, followed by an international fieldtrip.

Teaching: The Studio course runs for one full day each teaching week in MT and LT through lectures, workshops and regular small-group tutorials; additional specialist seminars and workshops are scheduled throughout the Studio course. Studio groups are expected to work together during the scheduled Studio hours, and prepare collectively for regular workshops and tutorials. In MT, the Studio course focuses on methods and approaches of social and spatial research and analysis. In the first four weeks of LT, Studio groups work intensively on a detailed analysis of a specific urban context, and develop a practical proposal for intervention in that site. The last six weeks of LT comprise of an international field trip, and individual work on a related written assignment.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Group presentations for faculty and guest critics. 1 x research presentation and site analysis. (MT)

Assessment: Group exercise (50%), group exercise (25%) and assignment (25%).

The assessment consists of:

- One Studio group submission (6000 words, 50%)
- Individual tutor assessment based on contribution to Studio group work (25%)
- Individual field trip assignment (3000 words, 25%)

Two hard copies of the Studio group submission, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.S116, no later than 4.00pm on the fifth Thursday of Lent Term. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day. Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

An electronic copy of the assessed individual field trip assignment, to be uploaded to Moodle, no later than 4.00pm on the eleventh Thursday of Lent Term

Attendance at all classes and submission of all set coursework is required.

S0449 Independent Project

This information is for the 2019/20 session.

Teacher responsible: Dr David Madden STC.S209

Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.

Course content: The independent project enables students to develop an original and extended piece of work on any approved topic within the field of the MSc programme - students are encouraged, but not required, to develop work on themes or sites introduced in their Studio or core courses. The project may focus on a small-scale urban research study or on a practical proposal for urban intervention. Approval for the topic must be obtained from your academic advisor.

Teaching: In LT students attend a project workshop and then submit a provisional project abstract; academic advisors for the independent project are assigned on the basis of the abstract. In ST, each student has regular supervisory meetings with their academic mentor, and one day of final group reviews with members of faculty. Students are also encouraged to consult with

other members of faculty during regular office hours.

Formative coursework: Students are required to submit one project abstract, and to produce regular formative project work in consultation with their academic advisor.

Assessment: Project (100%, 10000 words) post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0451 Half Unit Cities by Design

This information is for the 2019/20 session.

Teacher responsible: Dr Suzanne Hall STC.S212

Availability: This course is available on the MSc in City Design and Social Science and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

S0451 is a capped course and we can only accept 32 students. If you are not registered on the MSc City Design and Social Design please submit an e-mail to Suzanne Hall motivating your inclusion on the course, ONCE you have attended the first introductory lecture where we will be available to respond to individual questions.

Course content: The course examines the relationship between built form and its political, social and cultural relations in contemporary urban landscapes. By introducing students to established and emerging approaches to design, the course investigates how the design of our complex urban environments shapes and is shaped by the people who live in them, addressing the urgencies of our time and place. The course focuses on current urban research across diverse urban contexts and explores the inter-connections between urban theory, research, policy and practice. A range of contemporary cities across wide geographies form the base for the course, and these are explored through urban design milieu and architectures including: design as ideology, design as observation, and the architectures of infrastructure, evidence and insurgency.

Teaching: 10 hours of lectures and 20 hours of seminars in the MT. Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Written feedback is given within two weeks of the essay submission, and in addition a writing seminar is incorporated in the course in preparation for the summative assessed essay.

Indicative reading: A detailed reading list will be distributed at the beginning of the course. We simultaneously engage with literatures by architects (as a broadly defined practice) and a range of social scientists. These include architects exploring new modes of practice and research, for example: Bremner, Burdett, Davis, Easterling, Hall, Hernandez, Lokko, King, Kurgan, Mehrotra and Weizmann, as well as social scientists exploring design and city space, for example: Datta, Hayden, Holston, Jacobs, Madden, Massey, McKittrick, Roy, Scott, Simone, Tonkiss, Yiftachel.

Assessment: Essay (75%, 5000 words) in the LT.

Presentation (25%) in the MT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Tuesday of LT.

Attendance at seminars and submission of all set coursework is required.

S0457 Half Unit Political Reconciliation

This information is for the 2019/20 session.

Teacher responsible: Dr Claire Moon STC S109

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Women, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped.

Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-communist Europe, Australia and the US. Topics include transitional justice as a field of practice and a field of knowledge; historical injustice - apologies and reparations; state crimes; retributive and restorative justice; perpetration; theology and therapy in reconciliation; memory and atrocity. The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and the political subjects of reconciliation discourse. It is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy amongst others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

A revision session will be held in Summer Term.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: One formative essay to be returned in week seven of the MT (does not contribute towards the overall mark for the course).

Indicative reading: Hannah Arendt, *Eichmann in Jerusalem: A Report on the Banality of Evil* (Penguin Books, 1977); Penny Green and Tony Ward, *State Crime: Governments, Violence and Corruption* (London: Pluto Press, 2004); Priscilla Hayner, *Unspeakable Truths: Confronting State Terror and Atrocity* (Routledge, 2001); Michael Humphrey, *The Politics of Atrocity and Reconciliation: From Terror to Trauma* (Routledge, 2002); Karl Jaspers, *The Question of German Guilt* (Capricorn Books, 1961); Neil Kritz, *Transitional Justice: How Emerging Democracies Reckon with Former Regimes* (US Institute of Peace, 1995); Claire Moon, *Narrating Political Reconciliation: South Africa's Truth and Reconciliation Commission* (Lexington, 2008); Judith Shklar, *Legalism: Law, Morals, and Political Trials* (Harvard University Press, 1986); Nicholas Tavuchis & Mea Culpa, *A Sociology of Apology and Reconciliation* (Stanford University Press, 1991); Richard Wilson, *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge University Press, 2001).

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Essay (30%, 3000 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Lent Term. Attendance at all seminars, completion of set readings and submission of set coursework is required.

available as an outside option to students on other programmes where regulations permit.

Course content: This case study-led course provides a critical understanding of major urban development initiatives and programmes in international city contexts. It is designed for students with a particular interest in urban development practices and how these connect with broader political debates. It will introduce students to the following knowledge and skills:

- general understanding of political theories underlying urban development models
- ability to situate major urban development initiatives within different development cultures and socio-economic policy agendas
- understanding the role of public, private and third party actors and formal and informal urban development processes
- perspectives on decision making at the strategic, pre-design stage for urban development initiatives and ability to relate urban policy to spatial outcomes, operating at different scales
- knowledge of key evaluation approaches and analytic frameworks used in the analysis of proposed and existing urban developments
- understanding of how urban development objectives, phases and processes can be integrated and how policy making, economic development, urban planning, city design, architecture, and engineering are related.

The course content is based on contemporary projects and urban trends examined in the context of cities throughout the world. These range from policies such as congestion charging (London) and Progressive City Development (Medellin) to urban development trends such as extreme urbanism in Mumbai and privatist planning (Canary Wharf, London and Santa Fe, Mexico City). Such projects will be examined through critical frameworks that include utilitarianism, cost benefit analysis, social and environmental justice, citizenship theory and the capabilities approach. The course will focus on negotiation, politics, financing, appraisals and decision-making for cities by inviting practitioners, experts and policy makers to join individual sessions for presentations and debate. Seminars and assessed project work for the course will be based on the analysis of Development Strategies and City Design briefs.

Teaching: 10 hours of lectures and 20 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: 1 x contribution to student debate OR 1 x critical statement following a guest lecture AND submission of a 1,000 word position statement.

Indicative reading: Fainstein, Susan S. (1999). Can we make Cities we want? In *The Urban Moment*, ed. Sophie Body-Gendrot and Robert Beauregard. Thousand Oaks: Sage. Kymlicka, Will. (2002). *Contemporary Political Philosophy: An Introduction*. 2nd ed. OUP Oxford. (Introduction). Burdett, Ricky and Rode, Philipp (2011) *Living in the Urban Age*. in Ricky Burdett and Deyan Sudjic (eds.). *Living in the Endless City. S0465 Half Unit City-Making: the Politics of Urban Form

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Rode FAW 8.01K and Dr Savvas Verdis FAW.8.01.D

Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is

Malden, MA. Polity. (Chapter 6: A return to planning?). Whitehead, Mark. Neoliberal Urban Environmentalism and the Adaptive City: Towards a Critical Urban Theory and Climate Change. *Urban Studies* 50, no. 7 (2013): 1348-67. Harvey, D. (1992). Social Justice, Postmodernism and the City. *International Journal of Urban and Regional Research*, 16: 588-601.

Assessment: Project (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0468 Half Unit International Migration and Migrant Integration

This information is for the 2019/20 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Coverage of contemporary sociological perspectives on migrant integration including admissions, policy, labour market incorporation; welfare and social rights; 'assimilation' and social integration; national models of integration; multiculturalism; religion and ethnicity; and the second generation.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: All students are expected to write two non-assessed pieces of work during the term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: S. Castles and M. J. Miller (2013) *The Age of Migration* (5th edn); P. Kvisto and T. Faist (2010) *Beyond A Border* and A. Portes (2014) *Immigrant America* (4th edn). A more comprehensive bibliography will be available to students taking this course.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Presentation (10%) in the MT.

Exam will be held during the Summer Term exam session.

S0470 Half Unit The Sociology of Markets

This information is for the 2019/20 session.

Teacher responsible: Dr David Pinzur STC.S217a

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour), MSc in Economy, Risk and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course offers an introduction to the sociology of markets. We will look at this topic from two different sides: On the one hand, we will explore different theoretical issues in economic sociology, such as market structure, valuation, and the role of the state. Here, the underlying question is what sociology can contribute to a theoretical understanding of markets. On the other hand, we will explore particular case studies, such as illegal markets or markets for fine art; students will get the chance to study one of these cases in-depth. By the end of the course, students will be versed in the sociological and larger debates about markets, and they will be equipped to contribute to these debate with small, innovative case studies.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. Reading Weeks: Students on this course will have a reading week

in LT Week 6, in line with departmental policy.

Formative coursework: A 1500 word essay is required.

Indicative reading: Recommended texts: Callon, Michel. 1998.

The laws of the markets. Blackwell Publishers: Oxford; Fligstein, Neil. 2001. *The Architecture of Markets. An Economic Sociology of Twenty-First-Century Capitalist Societies.* Princeton, NJ a.o.: Princeton University Press; Granovetter, Mark. 1995[1974]. *Getting a Job: a Study of Contacts and Careers.* Chicago; London: Chicago University Press; Krippner, Greta R. 2002. "The elusive market: Embeddedness and the paradigm of economic sociology." *Theory and Society* 30:775-810; Swedberg, Richard. 2003. *Principles of Economic Sociology.* Princeton, N.J.: Princeton University Press.

Assessment: Essay (100%, 5000 words) in the ST.

Assessment will consist of a report on ONE case study (100%).

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Wednesday of Summer Term.

Attendance at all workshop sessions and submission of all set coursework is required.

S0471 Half Unit Technology, Power and Culture

This information is for the 2019/20 session.

Teacher responsible: Prof Judy Wajcman STC S203

Availability: This course is available on the MSc in Culture and Society, MSc in Media and Communications (Data and Society), MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to the social studies of science and technology. It will consider how macro theories of post-industrial society (from Bell to Castells) have conceptualised the role of technology in social change. It will then look at the development of STS as a field that highlights the constitutive role of objects and artefacts in social relations. In other words, it will reflect upon sociology's traditional neglect of the social life of things or materiality. These broad themes will then be elaborated substantively. First, by considering the role of technology in reconfiguring time, space and mobility. Second, by considering power relations and social inequalities embedded in digital technologies, such as the Internet and mobile phones. Third, by treating technology as a culture that shapes gender identities, such as those that find expression in the virtuality of cyberspace. The course will draw on examples from a variety of domains including the environment, the internet, robotics, sex, and weapons.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT

Indicative reading: Hackett, E. et al (2008) *The Handbook of Science and Technology Studies* (MIT Press). MacKenzie, D. and Wajcman J. (1999) *The Social Shaping of Technology* (MIT Press). Suchman, L. (2007) *Human-Machine Configurations* (CUP). Turkle, S. (2011) *Alone Together* (Basic Books). Wajcman, J. (2004) *TechnoFeminism* (Polity Press). Morozov, E. (2013) *To Save Everything, Click Here: Technology, Solutionism and the Urge to Fix Problems That Don't Exist* (Allen Lane)

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SO473 Half Unit Crime, Control and the City

This information is for the 2019/20 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This half unit course examines crime and disorder in city landscapes, the relationship between crime, space and place, and the complex mix of informal and formal social controls that influence different types and levels of crime. Drawing on a range of comparative literature from different cities, and using a mixture of classic and contemporary texts, we examine the importance of informal social control in maintaining social order in cities, the role of policing, and what happens when formal and informal social controls fail. We also explore the principles of crime prevention – both physical and social, critically examining the relationship between crime and design.

Teaching: 30 hours – workshops in the LT

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Indicative reading: Body-Gendrot (2012) *Globalization, Fear and Insecurity* (Palgrave Macmillan); Bottoms, A (2012) 'Developing socio-spatial criminology' in Maguire M et al (eds.) *The Oxford Handbook of Criminology* (5th edn.); Cochrane, A and Talbot, D (eds.) (2008) *Security: Welfare, Crime and Society* (Open University Press); Evans, K (2011) *Crime Prevention: a critical introduction* (Sage); Felson, M and Eckert, M (2016) *Crime and Everyday Life* (Sage); Graham, P. & Clarke, J. (2001) 'Dangerous Places: Crime and the City' in Muncie, J. & McLaughlin, E. (eds.) *The Problem of Crime* 2nd ed. (Sage); Le Gates R & Stout F (2015) *The City Reader* (Routledge); Monti et al (2014) *Urban People and Urban Places*; Mooney, G and Neal, S (eds.) (2009) *Community: Welfare, Crime and Society* (Open University Press); Pile, S. et al. (eds.) (1999) *Unruly Cities* (Routledge); Pitts, J (2008) *Reluctant Gangsters: the changing face of youth crime* (Willan); Wacquant, L (2008) *Urban Outcasts: A Comparative Sociology of Advanced Marginality* (Polity Press); Zukin, S (2010) *Naked City: The Death and Life of Authentic Urban Places* (Oxford University Press)

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

SO475 Half Unit Material Culture and Design

This information is for the 2019/20 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on designed entities in everyday life, looking at the ways in which materials are configured into things, practices, spaces and forms, and at the assemblage of objects across production, design, consumption and use. Though aiming to produce expertise in specifically social science research, the course will bring together literatures and debates that cross the social sciences, humanities and science/technology, drawing particularly on actor-network theory, material culture studies, sociology of consumption, practice theory, urban and architectural studies, cultural theory and design studies. There will also be a strong emphasis on methodology: what tools are available

to social scientists to investigate the emergent properties and impacts of designed objects. Case studies will be central to the teaching, developing theoretical and methodological strategies through a (changing) set of empirical cases that are likely to include: digital objects (software, games); media objects; lights and lighting; fashion; domestic interiors.

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: One 2,500 essay applying a theoretical approach to a specific case study.

Indicative reading: Bijker, W. E. and J. Law (eds.) (1992) *Shaping technology/building society: Studies in Sociotechnical change*. Cambridge, MA: MIT Press. Frayling, C., E. King and H. Atkinson (2009) *Design and popular entertainment*. Manchester ; New York. Lash, S. and C. Lury (2007) *Global Culture Industry: the mediation of things*. Cambridge: Polity Press. Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press. Manovich, L. (2002) *The language of new media*. Cambridge, Mass. London: MIT. Miller, D. (2008) *The Comfort of Things*. Cambridge: Polity. Molotch, H. (2003) *Where Stuff Comes From: How Toasters, Toilets, Cars, Computers and Many Other Things Come to Be as They Are*. New York and London: Routledge. Shove, E., M. Hand, J. Ingram and M. Watson (eds.) (2007) *The Design of Everyday Life*. Oxford: Berg. Yaneva, A. (2009) *The Making of a Building: A Pragmatist Approach to Architecture*. Bern: Peter Lang.

Assessment: Essay (100%, 5000 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

SO476 Researching Migration: Research Questions and Research Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is compulsory on the MSc in International Migration and Public Policy. This course is not available as an outside option.

Course content: Having introduced the students to a range of possible research strategies, the students will be asked to prepare informal seminar presentations on their proposed research in the MT and LT. In addition, they will submit a one hundred word topic summary towards the end of the MT and a 400 word research proposal before the end of the LT. They will also prepare and deliver a formal presentation on their research for a workshop early in the ST. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to revise their research plans. A final proposal will be submitted after the ST workshop.

Teaching: Lectures 3 x 1 hour (3); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 12 hours

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 3 presentations in the MT, LT and ST.

Indicative reading: Bryman, A. (2008) *Social Research Methods*, H62 B91; Gilbert, N. (ed.) (2008) *Researching Social Life* H62 R 43; Hancke, R. (2009) *Intelligent Research Design: A Guide for Beginning Students in the Social Sciences*, H62 H23; Landman, T. (2007) *Issues and Methods in Comparative Politics*, JF51 L25; Silverman, D. (2002) *Doing Qualitative Research: A Practical Handbook* H62 S58.

Assessment: This course is not assessed.

S0477 Half Unit Urban Social Theory

This information is for the 2019/20 session.

Teacher responsible: Dr David Madden STC S209

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in International Migration and Public Policy and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course is a comprehensive introduction to urban social theory. The class will focus on major concepts, paradigms, texts and thinkers in order to critically assess different ways of theorising the urban. It will analyse various forms of urban theory including political economy, human ecology, phenomenology, feminism and postcolonialism, which are used as lenses through which to understand a variety of topics, such as socio-spatial restructuring, neoliberalisation, public space, globalisation, technocracy, infrastructural politics, multiculturalism, cosmopolitanism, the right to the city and planetary urbanisation.

Teaching: 20 hours of seminars in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Engels, Friedrich. 1887 [1872]. *The Housing Question*. London: Cooperative Publishing Society of Foreign Workers. Park, Robert E., Ernest W. Burgess and Roderick D. McKenzie. 1967 (1925). *The City*. Chicago: University of Chicago Press. Castells, Manuel. 1977. *The Urban Question*. Cambridge, MA: MIT Press. Lefebvre, Henri. 1991 [1974]. *The Production of Space*. Donald Nicholson-Smith, trans. Oxford: Blackwell. Hayden, Dolores. 1988. "What Would a Non-Sexist City Be Like? Speculations on housing, urban design and work." *Signs* 5 (3): S170-S187. Young, Iris Marion. 2011 [1990]. "City Life and Difference." Pp 226-256 in *Justice and the Politics of Difference*. Princeton: Princeton University Press. Graham, Stephen and Simon Marvin. 2001. *Splintering Urbanism: Networked infrastructures, technological mobilities and the urban condition*. London: Routledge. Kohn, Margaret. 2004. *Brave New Neighborhoods: The privatization of public space*. London: Routledge. Simone, AbdouMalik. 2005. *For the City Yet to Come: Changing African life in four cities*. Assessment: Essay (80%, 5000 words) in the LT.

Memo (10%) and class participation (10%) in the MT.

There will be weekly memos submitted via Moodle the evening before each class session during the MT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

S0478 Social Scientific Analysis of Inequalities

This information is for the 2019/20 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

Course content: The course will consider interdisciplinary approaches to inequality, focusing on (a) how inequality can be conceptualised and explained, (b) how it can be measured and (c) ethical and political issues. Topics to be covered include patterns

and trends in economic inequalities; gender, ethnicity, class and age; cultural aspects of inequality; social and intergenerational mobility; global and comparative perspectives; geographical and neighbourhood polarisation; health and educational inequalities; media representation of inequalities; ethical and philosophical approaches; the impact of government, law and social policy.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of classes in the ST.

The course is taught in 20 x one-and-a-half hour lectures, plus 10 x one-and-a-half hour seminars in MT and 10 x one-and-a-half-hour seminars in LT. It is divided into blocks of related lectures and linked seminars. The ST class is a revision class.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT and 1 mock exam in the LT.

Indicative reading: Branko Milanovic, *Global Inequality: A New Approach for the Age of Globalization* (Harvard University Press, 2016). Piketty, T. *Capital in the 21st Century* (Harvard University Press, 2013). Hartley Dean and Lucinda Platt, *Social Advantage and Disadvantage* (Oxford, 2016). Graeber, D. *Debt: The First 5000 Years*. New York: Melville Publishing. O'Neil, C. *2016 Weapons of Math Destruction*. London: Allen Lane. Hickel, J. (2017) *The Divide: A Brief Guide to Global Inequality and its Solutions*. William Heinemann. London. Federici, S. (2004) *Caliban and the Witch: Women: The Body and Primitive Accumulation*. New York: Autonomedia.

Assessment: Essay (30%, 3000 words) and presentation (20%) in the LT.

Take home exam (50%) in the ST.

The presentation will be from a group exercise in the LT.

An electronic copy of the assessed essay, to be uploaded to

Moodle, no later than 4.00pm on the submission day. The essay is due by the first day of LT.

Attendance at all classes and submission of all set coursework is required.

S0479 Half Unit Human Rights and Postcolonial Theory

This information is for the 2019/20 session.

Teacher responsible: Dr Ayca Cubukcu STC.S113

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Drawing on postcolonial theory and critique, this course explores how human rights and international law came to be institutionalized in the context of European colonialism, and what the contemporary implications of this historical fact may be today. Engaging with the fields of socio-legal studies, intellectual history and social theory, the course also asks why, and with what consequences, human rights tend to monopolize the political language through which many social movements throughout the world articulate their desires for social and global justice.

Teaching: 25 hours of seminars in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Indicative reading: Antony Anghie, *Imperialism, Sovereignty, and the Making of International Law* (Cambridge: Cambridge University Press, 2005). Hannah Arendt, *In Jerusalem: A Report on the Banality of Evil* (New York: Penguin Books Edition). Talal Asad, *On Suicide Bombing* (New York: Columbia University Press, 2007). Assessment: Essay (90%, 5000 words) in the LT.

Class participation (10%) in the MT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

SO480 Half Unit Urban Inequalities

This information is for the 2019/20 session.

Teacher responsible: Prof Fran Tonkiss STC.S205

Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course offers a critical introduction to key issues and processes in the study of contemporary urban inequalities. Recent urban analysis has highlighted the growing share of the global population that now lives in cities; this course puts such growth in the context of another major urban trend: deepening patterns of inequality in many cities across the world. It examines the continuing role of 'older' bases of urban inequality - access to land and property, gender inequity, ethnic and racial discrimination, legal exclusion and informality - as well as significant emerging patterns, including extreme concentrations of wealth at the top, middle-class stagnation, privatisation and spatial secession, immigration and insecurity. It also examines the complex of ways in which urban inequality is experienced, not only in terms of income or property, but also in consumption inequalities, inequities in access to housing, transport, urban services and legal protections, spatial disparities and environmental risks and injustices. The course considers the range of social, economic, environmental and political factors that shape, and also might help to address, urban inequality in these different contexts.

The course will:

- provide a critical introduction to current and emerging patterns of urban inequality
- consider the production of urban inequalities through social, economic, political and spatial processes
- explore common themes and critical differences across cities in developed and developing economies
- address key debates in a range of urban disciplines, and situate these in specific urban contexts and examples

Key themes

- Urban growth and the growth of inequality
- Wealth, income and inequality
- Spatial injustice: segregation and access
- Environment and inequities

- Informality and insecurity
- Social inequality in the city: gender, race and legal exclusions
- Governing inequality

Teaching: 10 hours of lectures and 10 hours of seminars in the MT.

Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the MT.

1 x 2000-word essay

Indicative reading:

Assessment: Essay (100%, 5000 words) in the LT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Lent Term.

Attendance at all classes and submission of all set coursework is required.

SO481 Half Unit Class, Politics and Culture

This information is for the 2019/20 session.

Teacher responsible: Dr Sam Friedman STC216

Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is not available as an outside option.

Course content: The course will begin by introducing traditional theories of social class and stratification before going on to examine the history and political significance of class in Britain, and how this compares with other countries throughout the world. It will then look at the place of class in a contemporary political context, critically examining the claim made by some 'postmodern' writers, and prominent politicians, that class boundaries have been irrevocably eroded. The course will then move on to look at the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people's cultural taste, with the privileged using their preferences for 'highbrow' culture as a means of expressing their superiority over the working classes, who tend to prefer more 'lowbrow' culture. We interrogate how these arguments relate today, where the lines between high and low culture are increasingly blurred, where strong cross-cultural differences persist between Europe and the U.S, and where new taste distinctions exist even in traditionally lowbrow art forms, such as comedy and pop music. We then take a more detailed look at class-based boundaries in taste and lifestyle. In particular,

we focus on the way in which the middle classes demonise sections of the working class based on what they consider to be 'pathological' consumption choices – focusing in particular on the 'Chav' phenomenon in Britain. We go on to explore both the meaning and consequences of such overt class prejudice, both in Britain but also using research from the U.S, the Netherlands and other international contexts. Finally, the module will ask to what extent class boundaries are malleable? How easy is it for people to escape their backgrounds and move upward or downward in social space? This final section of the course thus looks at contemporary patterns of social mobility, examining the social benefits and challenges that mobility implies, increasing closure within global elites, and the rise of the middle classes in developing countries like China, Brazil and South Africa.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT. 1 hour of lectures and 1 hour of seminars in the ST.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: Alexander, P. (2013) *Class in Soweto*. Johannesburg: KZE Press. Bourdieu, P. (1984) *Distinction: A Social Critique of the Judgment of Taste*, Routledge: London. Crompton, R. David Grusky (ed), *Social Stratification: Class, Race and Gender in Sociological Perspective*. Boulder, CO. Westview Press.

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Summer Term.

Attendance at all classes and submission of all set coursework is required.

S0493

MSc in Culture and Society Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Donald Slater STC S310

Availability: This course is compulsory on the MSc in Culture and Society. This course is not available as an outside option.

Course content: This workshop will guide students through the process of conducting an independent dissertation project in the MSc Culture & Society.

Teaching: 6 hours of seminars in the LT.

There will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method. **Reading Weeks:** Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Indicative reading: This is a workshop and has no specific reading list.

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.

S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0494

MSc in Political Sociology Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is compulsory on the MSc in Political Sociology. This course is not available as an outside option.

These seminars are for students on the MSc Political Sociology only.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have four seminars that aim to get students thinking at a meta-level about research in political sociology. The seminars can, of course, only address a small selection of approaches. Examples might include rational choice and institutionalist theories, or comparative and case study methods. But please note that the MSc in Political Sociology takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make a formal presentation once during the term.

Teaching: 6 hours of seminars in the MT. 15 hours of workshops in the LT.

4 x 1.5 hours seminars in MT. 10 x 1.5 hours workshops in LT.

There will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.' **Reading Weeks:** Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 presentation in the LT.

Students will: (1) assess the strengths and weakness of selected theories and methods; (2) formulate a clearly specified research question and set out the rationale for researching this question and a proposed approach; and (3) give a presentation which develops one or two of the main arguments they anticipate will be important to their project.

Indicative reading: Donatella Della Porta and Michael Keating (2008), *Approaches and Methods in the Social Sciences: a Pluralist Approach*, Thomas Janoski et al, (2005), *The Handbook of Political Sociology*, James Mahoney and Dietrich Rueschemeyer (2003), *Comparative Historical Analysis in the Social Sciences*.

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC.

S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

SO495**MSc in Economy, Risk and Society Dissertation**

This information is for the 2019/20 session.

Teacher responsible: Prof Nigel Dodd STC S106

Availability: This course is compulsory on the MSc in Economy, Risk and Society. This course is not available as an outside option.

Pre-requisites: Risk, Regulation and Economic Life (SO425)

Course content: The dissertation is an extended piece of written work that is your own independent research investigation of a social issue or problem, undertaken with the guidance of your dissertation supervisor. These workshops are meant to prepare you to produce an original piece of research. We will cover the expectations for the dissertation, as well as provide general guidance for deriving a research question that is appropriately situated in the themes of the programme; for developing an empirical strategy to study topics in risk, economic sociology, and/or regulation; and for writing up conclusions that can speak to enduring questions in our area. In addition to consultation with faculty, in these sessions students will work in smaller groups to peer review their work-in-progress.

Teaching: 2 hours of seminars in the MT. 2 hours of seminars in the LT. 2 hours of seminars in the ST.

Note also that there will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit two pieces of work; one topic proposal during MT, and a formal abstract at end of LT.

Indicative reading:

- Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004)
- Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999)
- Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012)
- Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

work that that is your own independent research investigation of a human rights issue or problem, undertaken with the guidance of your dissertation supervisor. In the dissertation, you will critically appraise evidence, arguments and debates to reach a conclusion your research question. The key requirement is that the dissertation should demonstrate a high level of independent critical ability. You must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.

Teaching: 2 hours of lectures in the MT. 3 hours of seminars in the LT. 2 hour of seminars in the ST

There will be one Introductory lecture in MT for all MSc Human Rights students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an inter-disciplinary programme. The Introductory session will also cover fieldwork and research ethics. This will be followed by 5 seminars/workshops in smaller groups, in which students present and discuss possible research questions and strategies, along with preparing dissertation proposal and timeline.

There will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method.' Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit a topic proposal at the end of MT and a fuller dissertation proposal at end of LT. During the seminars and in dissertation supervisions, students receive formative feedback on their ideas and research plans. The summative assessment is the submission of a completed dissertation in August.

Indicative reading: Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004). Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999). Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012). Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

SO496**MSc in Human Rights Dissertation**

This information is for the 2019/20 session.

Teacher responsible: Dr Monika Krause STC S207

The Programme Convenor is responsible for overseeing the Dissertation.

Availability: This course is compulsory on the MSc in Human Rights. This course is not available as an outside option.

This course is only available to MSc Human Rights students, and is a compulsory course for students on the programme.

Course content: The dissertation is an extended piece of written

SO497**MSc in Inequalities and Social Science Dissertation**

This information is for the 2019/20 session.

Teacher responsible: Dr Sam Friedman STC S216

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

These seminars are for students on the MSc in Inequalities and Social Science only.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have seminars that aim to get students thinking at a meta-level about research on inequalities and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Inequalities and Social Science takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.

Teaching: 2 hours of seminars in the MT. 4 hours of seminars in the LT. 2 hours of seminars in the ST.

There will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method. Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: A title, research proposal and annotated bibliography by the end of MT plus a presentation during the ST.

Indicative reading: Anand, S. (Ed) (2010) *Debates on the Measurement of Global Poverty*, Oxford: Oxford University Press
Atkinson, A. (2015), *Inequality: what can be done?*, Harvard UP.
Back, Les and Solomos, John (2000), *Theories of Race and Racism: A Reader*, Routledge.

Wright, Erik O. (2005) *Approaches to Class Analysis*, Cambridge UP

Assessment: Dissertation (100%, 10000 words) in August. Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day. Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0499

MSc in Sociology Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Fabien Accominotti STC S206

Availability: This course is compulsory on the MSc in Sociology. This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Tutor.

Teaching: Dissertation Preparation

The candidate should confirm a working title and prepare a brief abstract for their intended dissertation (up to one A4 page, double-spaced, including your name not your candidate number), which should be reviewed with their Academic Mentor no later than the Monday, week 8 of Lent Term. Along with the title and abstract the candidate and Academic Mentor should review and complete the Research Ethics Review Checklist by this same time. These

abstracts are the basis for an MSc dissertation Workshop that is organised for each programme. Attendance at this workshop is optional but students are, of course, encouraged to attend.

Dissertation Particulars

The dissertation must be a report of a research project, whether it comprises primary empirical material, secondary empirical material or theoretical/exegetical work on a body of social thought: i.e. there must be an identifiable and clear research question governing the research project; there must be critical reflection on the methods used (including their limits and the reasons why they warrant the kinds of claims made); and substantive analysis of empirical or analytical material. Even where the topic is substantively a literature or policy-review exercise, candidates are expected to offer original reasoned argument and interpretation and to show evidence of a competence in research methods. Guidance on topic selection and methods will normally be provided by the candidate's tutor. The dissertation is primarily a reflection of the candidate's own work and so feedback will not be given on draft versions of the dissertation. The dissertation should reflect the candidate's own views.

There will be 4 hours of workshops in the LT and a workshop in the ST.

There will be three workshops during MT for ALL MSc students based in the Sociology department. These will be taught in conjunction with LSE Life and programme convenors, and aim to provide some basic guidance about planning your dissertation, such as selecting a suitable topic, reviewing the existing literature, devising a research question and designing a research method. Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Assessment: Dissertation (100%, 10000 words) post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Sociology Hub, STC. S116, no later than 4.00pm on Thursday 20th of August 2020. An additional electronic copy to be uploaded to Moodle no later than 4.00pm on the same day.

Both hard copies and electronic copies must be submitted on time to avoid any late submission penalties.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S04A8 Half Unit

Leadership and Social Change

This information is for the 2019/20 session.

Teacher responsible: Prof Armine Ishkanian PAN.8.01

Availability: This course is available on the MSc in Inequalities and Social Science. This course is not available as an outside option. This course is not available as an outside option and is available only to Atlantic Fellows for Social and Economic Equity MSc students. This is a compulsory course for these students and non-AFSEE Fellows will not be permitted to take this course.

Course content: The course responds to the needs of the AFSEE Fellows to develop critical skills and understandings of leadership within various contexts and themes indexed to transforming global inequality. This approach marries a structural analysis of global inequality and its manifestations with practical and cognitive skills that will provide our students with the tools to bring such systemic change into being. Crucially, the course is heavily rooted in theories of practice, in which Fellows are introduced to and demonstrate a sound knowledge and critical appreciation of their field and its associated practice and research techniques, and show that these techniques can be successfully applied in revealing or challenging injustice and inequality. The course will consist of lectures, presentations, seminars and workshops. Lectures will introduce Fellows to key concepts, approaches and techniques

for understanding and challenging inequality. Workshops and seminars will help Fellows clarify and deepen their understanding of points and issues raised in the lectures, through practical work carried out individually and in groups.

Teaching: 6 hours of lectures and 10 hours of workshops in both teaching weeks.

Week 1 – 4-8 November 2019 - Leadership and Social Change

Week 2 – 20-24 April 2020 – Leadership and Social Change

Formative coursework: The formative coursework for both assessments will comprise of presentations of ideas and works-in-progress that are critiqued and given feedback. Fellows will present abstracts for their essays/thinkpieces and offer rationale for their choice of subject, motivation and its relationship both to the themes of the week and the values of the programme, but equally its relationship to their own practice, experience and ambitions for future work, campaigns and activism. This will be presented to the course's teaching team following the completion of the course in the form of short, 5-10 minute pitches where lecturers will offer feedback on the ideas presented, which will then form the basis for their Essay (Summative Assessment).

For the presentation, Fellows will collaboratively work in groups outlining their learning on leadership and social change.

Fellows will present their ideas to the group, and complete self-assessments following their presentations.

Assessment: Essay (70%, 2000 words) in the LT.

Presentation (30%) in the ST.

70% Essay/Thinkpiece 2000 words in LT

30% Group Presentation in ST

An electronic copy of the assessed essay/thinkpiece, to be uploaded to Moodle, no later than 4.00pm on the last Thursday of Michaelmas Term.

SO4B1

Contemporary Politics of Human Rights

This information is for the 2019/20 session.

Teacher responsible: Prof Chetan Bhatt STC.S107

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped but a limited number of places are usually available to students from outside the MSc in Human Rights and Politics who wish to take this as an option.

Priority is usually given to postgraduate students in the Sociology Department. The course is also available as an outside option for other MSc degrees where regulations and numbers permit.

Students from other programmes who wish to apply for a place on the course must complete the online application form on

LSEforYou stating reasons for wishing to take the course.

Course content: During a period of unprecedented change in social, political, technological and cultural spheres, key human rights institutions and ideas have come under sustained criticism or attack. After the Second World War, an international consensus emerged in which the legitimacy of a framework of universal rights and related institutions was generally accepted. This consensus can no longer be assumed, whether within or outside formally liberal-democratic states. Human rights, as a powerful exemplar of political liberalism, have been criticised for their institutionalised, procedural and legalistic nature. They have come under sustained attack from authoritarian and populist states and movements. This interdisciplinary course examines many of the sharp tensions and contradictions in the contemporary politics of human rights. This includes the relevance of humanist foundations today, tensions in the practice of human rights, the populist right-wing and left-wing attacks on human rights, the rise of new identity politics and its human rights consequences, and the impact of social media on human rights. The course aims to critically examine the problems of - as well as the problems facing - contemporary human rights. Key topics that are often considered settled within much human rights thinking and practice, including the politics of identity, sameness and difference, cultural and religion, gender and sex, humanitarianism and war, will be examined and debated critically. The course considers how we might rethink human rights and humanism for a new period of political change.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT. 5 hours of seminars in the ST.

There will be a Reading Week in Week 6 of both Michaelmas Term and Lent Term.

The course content is delivered through combined lecture-seminars that employ group work.

Formative coursework: Students should submit two formative essays, 1500 words each, one in Week 10 of Michaelmas Term and one in Week 10 of Lent Term.

Indicative reading: Javier Auyero and Débora Swistun. 2009. Flammable. Environmental Suffering in an Argentine Shantytown. Oxford: Oxford University Press. Markus Gunneflo. 2016. Targeted Killing: A Legal and Political History. New York. Cambridge University Press. Elizabeth Holzer. 2015. The Concerned Women of Buduburam: Refugee Activists and Humanitarian Dilemmas. Cornell University Press. Monika Krause. 2014. The Good Project. Humanitarian Relief NGOs and the Fragmentation of Reason. Chicago University Press. Sally Engle Merry. 2016. The Seductions of Quantification: Measuring Human Rights, Gender Violence, and Sex Trafficking. University of Chicago Press.

Assessment: Essay (50%, 3500 words) in the LT Week 1.

Essay (50%, 3500 words) in the ST Week 1.

Two hard copies of the assessed essay, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:30 on the day of submission. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

SO4B2

MSc in Human Rights and Politics Dissertation

This information is for the 2019/20 session.

Teacher responsible: Prof Chetan Bhatt STC.S108

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is not available as an outside option.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of MT we will have seminars that aim to get students thinking at a meta-level about research on Human Rights and Politics and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Human Rights and Politics takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In LT we will hold dissertation

workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.

Teaching: 2 hours of seminars in the MT. 3 hours of seminars in the LT. 2 hours of seminars in the ST.

These seminars are for students on the MSc Human Rights and Politics only.

Formative coursework: A title, research proposal and annotated bibliography by the end of MT plus a presentation during the ST.

Indicative reading: Javier Auyero and Débora Swistun. 2009. *Flammable. Environmental Suffering in an Argentine Shantytown*. Oxford: Oxford University Press. Markus Gunneflo. 2016. *Targeted Killing: A Legal and Political History*. New York: Cambridge University Press. Humanitarian Relief NGOs and the Fragmentation of Reason*. Chicago University Press. Sally Engle Merry. 2016. *The Seductions of Quantification: Measuring Human Rights, Gender Violence, and Sex Trafficking*. University of Chicago Press.

Assessment: Dissertation (100%, 10000 words) post-summer term.

Two hard copies of the dissertation, with submission sheets attached to each, to be handed in to the Administration Office, S116, no later than 16:00 on Thursday 20th August 2020 if you are a full-time student and in the subsequent year if you are a part-time student. An additional copy to be uploaded to Moodle no later than 18:00 on the same day.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

S04B3 Half Unit

The Sociology of Human Rights Practice

This information is for the 2019/20 session.

Teacher responsible: Dr Monika Krause STC.S207

Availability: This course is available on the MSc in Human Rights and MSc in Human Rights and Politics. This course is not available as an outside option.

Course content: This module invites students to examine practices in human rights NGOs as a case for the sociology of knowledge and expertise. The course will familiarise students with theoretical and analytical tools, which sociologists use to understand expert practices and practices in organizations, as well as with current sociological research on international NGOs. Students will be asked to participate in two simulation activities as part of this module: In one session, students will work in teams to develop advocacy projects. In a separate, day-long activity, we will study professional standards in human rights and related fields and then meet to review evidence on a specific setting – the ongoing crisis in the fictional context of Ruritania. Working in different teams, students will develop proposals for concrete interventions that might further human rights in Ruritania. We will reflect on the simulation in terms of the assumptions and knowledge-claims we have made and encountered and their implications for broader sociological questions. We will discuss conclusions in three areas: First, we can discuss conclusions in terms of questions in the sociology of expert practice; second, we will discuss conclusions in terms of skills students have used, and might need to develop; thirdly, we will discuss what our observations mean for how we can best pursue practical goals relating to social change and human rights.

Teaching: 21 hours of seminars and 9 hours of seminars in the LT. The class will be taught in a non-traditional extended seminar form, bringing 30 students together for 3 hours for a mixture of discussion and focused small-group activities.

This course includes a day-long session on the second Saturday of week 7. Please make sure to check your calendar before enrolling

on this course.

Formative coursework: Students have the option of handing in a formative essay of 1,500 words addressing knowledge practice in a field other than human rights in week 6. If completed by the deadline, students will receive feedback within two weeks.

- Wong, Wendy. 2012. *Internal Affairs: How the Structure of NGOs Transforms Human Rights*. Ithaca Cornell University Press.

Assessment: Essay (100%, 5000 words) in the ST.

For their assessment students will complete an essay that does not exceed 5000 words in length. The essay will respond to an analytical provocation by drawing on observations from the simulation activities.

S04B4 Half Unit

The New Reproductive Sociology

This information is for the 2019/20 session.

Teacher responsible: Prof Charis Thompson STC.S102

Availability: This course is available on the MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc Sociology, MSc Economy, Risk and Society and MSc Culture and Society.

Course content: The field of Reproductive Sociology is opening up new areas to empirical sociological research and spurring exciting new directions in sociological theory. The study of social reproduction, of assisted reproductive and selecting technologies, and of gendered bodily and emotional labor reveals patterns of globalization and domestic intersectional stratification, new

definitions of the family, thriving markets in bodily and intimate labour, and new migratory pathways. Theoretically, reproductive sociology lends new understanding to debates about the future of work, new forms of the division of labour, expansion of markets and limits to markets, migration, platform capitalism, and inequality. Reproductive sociology makes evident fungibilities among economic, moral, bodily, aesthetic, social, and cultural capital and takes these interfaces as a lens through which to interrogate the very foundations of social order and change.

Teaching: 25 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

An annotated bibliography for the summative essay.

Indicative reading: Recommended texts:

Viviana Zelizer, *The Purchase of Intimacy*, 2010. Ashley Mears, *Pricing Beauty*, 2011. Sarah Franklin, *Biological Relatives*, 2014. Evelyn Nakano Glenn, *Forced to Care*, 2010. Charis Thompson, 2014. *Three Times a Woman: Voting, Egg Donation, Cosmetics*, and the Punctuated Gendering of Stem Cell Innovation in California. Alondra Nelson, *The Social Life of DNA*, 2016. Osagie Obasogie and Marcy Darnovsky, eds., *Beyond Bioethics, Toward a New Biopolitics*, 2018. Katherine Dow, *Making a Good Life*, 2016

Assessment: Essay (80%, 4000 words) in the ST.

In class assessment (20%) in the LT.

20% will be assessed for seminar participation, split equally between leading student discussion once during the term, and participating actively in discussion and listening throughout the term. Students will be asked to submit a one-paragraph description of something they contributed and something they learned from their peers, and a one-paragraph description of their participation at the end of the course.

SO4B5 Half Unit

The Anticolonial Archive: The Sociology of Empire and its Afterlives

This information is for the 2019/20 session.

Teacher responsible: Dr Sara Salem STC.S218

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc in Human Rights, MSc Human Rights and Politics and MSc in Political Sociology.

Course content: This course focuses on a selection of 20th century anti-colonial movements in order to explore the postcolonial moment that emerged after the end of European empire. It addresses debates within global sociology, postcolonial studies and political sociology, looking at the legacies and afterlives of empire and what these mean for sociological analysis. We trace conversations anti-colonial movements had around nationalism and post-nationalism; capitalism and geopolitics; resistance, subjectivity and modernity; and global patterns of inequality. The course investigates these topics through various "anticolonial archives," including theoretical texts by major anticolonial and postcolonial theorists, literature, archival data, posters, images, speeches, films, memoirs and private correspondence.

The first part of the course explores anticolonial movements through some of the major theoretical texts that emerged during this moment by thinkers such as Frantz Fanon, B.R. Ambedkar, Kwame Nkrumah, Claudia Jones, Aimé Césaire, Chandra Mohanty, and Edward Said, among others, in order to sketch out the theoretical stakes of decolonisation and in particular the multiple alternative postcolonial projects that were proposed. The second part of the course focuses on two particular features of anticolonial movements and the postcolonial states they produced: their internationalism on the one hand and their focus on nationalism on the other. We look at internationalist and third worldist movements such as pan-Africanism, pan-Arabism,

transnational feminism and Third World Marxism—particularly through the lens of international spaces such as the Marxist 'internationals,' the Afro-Asian Conference at Bandung and the Pan-African Congresses—before delving more deeply into particular national contexts (cases include South Africa, Algeria, Egypt, India and Cuba). The course ends by addressing the afterlives of empire, assessing the emergence of postcolonial states; global migration and the end of empire; the effects of the global neoliberal project on the postcolonial world; and contemporary debates around postcolonial/decolonial theory

Teaching: 20 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 essay in the LT.

A 1,500 word reflective essay to be handed in during Week 7 of LT that takes a particular object or material from an "anticolonial archive" and discusses it in relation to the course themes, readings, and questions. This may be used to build an online "anticolonial archive" based on the course as a whole, on the LSE Sociology website. This should lay the basis for a topic or set of questions which you will explore in your summative essay. The formative is intended as an opportunity to begin to explore the various anticolonial archives and how to approach materials within them in relation to theoretical questions.

Indicative reading: Indicative readings:

Chatterjee, P., 2012. *The black hole of empire: History of a global practice of power*. Princeton University Press. Fanon, F., 1963. *The wretched of the earth*. New York: Grove Press. Gordon, A.F., 2008. *Ghostly matters: Haunting and the sociological imagination*. University of Minnesota Press. Kelley, R.D., 2002. *Freedom dreams: The black radical imagination*. Beacon Press. Krug, Jessica, 2019. *Fugitive Modernities: Kisama and the Politics of Freedom*. Duke University Press. Mahler, A.G., 2018. *From the Tricontinental to the global South: race, radicalism, and transnational solidarity*. Duke University Press. Said, E.W., 1983. *The world, the text, and the critic*. Harvard University Press. Scott, D., 2004. *Conscripts of modernity*. Duke University Press. Singh, J., 2017. *Unthinking mastery: Dehumanism and decolonial entanglements*. Duke University Press. Steinmetz, G. ed., 2013. *Sociology and empire: the imperial entanglements of a discipline*. Duke University Press.

Assessment: Essay (85%, 4000 words) in the ST.

In class assessment (15%) in the LT.

15% of the final mark will be given for a presentation during one seminar and participation throughout.

The in-class presentation is a way to ensure participation and a deeper engagement with the material. It also allows students to respond to material in creative ways. This presentation will be collaborative and will explore a particular knowledge object. We will complete a reading round at the start of each class, during which students will spend a few minutes reflecting on the readings and pointing to any questions they may have raised. Students are expected to participate in this every week, and this is what counts towards participation throughout, which together with an in-class presentation adds to the 15%.

SO4B6 Half Unit

Nature and Technology: More than Human Sociology

This information is for the 2019/20 session.

Teacher responsible: Dr Carrie Friese STC.S213

Availability: This course is available on the MSc in Culture and Society, MSc in Economy, Risk and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The premise of this course is that, to understand social life, we need to go beyond human subjects to also consider our relations with other living species and inanimate things. In this course we will explore how the more than human social world can be theorised, thus providing an alternative to the twin modernist notions of nature as the grounds for society as well

as technology as the human construction of the material world. The theorists we will read in this course are largely located within Science and Technology Studies, and may include: Karen Barad, Vinciane Despret, Donna Haraway, Bruno Latour, Maria Puig de la Bellacasa and/or Isabelle Stengers. Drawing on these theorists, we will ask how entities like cells and microbes or plants and animals or digital and mechanical technologies shape human social life. Examples may be in the fields of: (re) production, infectious diseases, weather and climate, health care provision and/or commodity supply chains. We will explore how more than human perspectives on these processes reshapes sociological understandings of capitalism/post-capitalism, power and biopolitics, humanitarianism and rights, and/or inequalities. Through these theories and empirical case studies, across the course we will ask what it means to be human today, and we will probe the ethics involved in living together in power laden, affective relations with other species and things in remaking the planet.

Teaching: 10 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Essay plan of 1,500 words due in Week 9 of Lent Term. This should include: a provisional thesis statement, an essay outline and an annotated bibliography.

Indicative reading:

- Barad, Karen. (2007) *Meeting the Universe Halfway: Quantum Physics and the Entanglement of Matter and Meaning*. Durham: Duke University Press.
- Chakrabarti, Pratik. (2012) *Bacteriology in British India: Laboratory Medicine and the Tropics*. Rochester: University of Rochester Press.
- Elias, Ann. (2019) *Coral Empire: Underwater Oceans, Colonial Tropics, Visual Modernity*. Durham: Duke University Press.
- Haraway, Donna J. (2016) *Staying with the Trouble: Making Kin in the Chthulucene*. Minneapolis: University of Minneapolis Press.
- Kohn, Eduardo. (2013) *How Forests Think: Toward an Anthropology Beyond the Human*. Berkeley: UC Press.
- Latour, Bruno. (2018) *Down to Earth: Politics in the New Climatic Regime*. Cambridge: Polity.
- Oudshoorn, Nelly. (2016) *Telecare Technologies at the Transformation of Healthcare*. London: Palgrave.
- Puig de la Bellacasa. (2017) *Matters of Care: Speculative Ethics in the More than Human Worlds*. Minneapolis: University of Minneapolis Press.
- Tsing, Anna. (2017) *The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins*. Princeton: Princeton University Press.
- Vora, Kalindi and Neda Atanasoski. (2019) *Surrogate Humanity: Race, Robots, and the Politics of Technological Futures*. Durham: Duke University Press.

Assessment: Essay (90%, 4000 words) in the ST.

Class participation (10%) in the LT.

Each student will sign up to lead the seminar discussion on two different weeks. This will be done in groups of 2-3 students. The group is to submit a 500 word plan for the seminar discussion, including introductory comments and discussion question. The best mark from the two will be taken as the summative class participation mark.

SP400 Half Unit

International Social and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Sonia Exley OLD 2.64

The course will be taught by a team of faculty members with complementary areas of expertise.

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available on the MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other

programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses160>

Course content: This course engages with the social and public policy challenges facing states and citizens across the world. It introduces students to core issues, concepts, actors and debates shaping our understanding of social and public policy, its drivers and impacts. It outlines the questions raised by efforts to ensure a healthy, educated and productive population, to protect those without other means of support, and to reduce inequalities of e.g. gender, class, and ethnicity. It discusses diverse policy approaches to these issues, their ideological underpinnings, and the varying configurations of actors involved in the policy process - the state, the market, civil society, the family, and international organisations. The course explores applications to a range of policy domains, such as education, urbanisation, health, family, social care, migration, inequality and redistribution, and to varied country contexts. The course is informed by an international and comparative approach that considers both rich and poor country contexts and international dimensions and locates these within a historical understanding of both national and global processes.

Teaching: 16 hours and 30 minutes of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the ST.

One of the lectures in the MT will be a Study Skills session at the start of term.

Formative coursework: Students will be expected to produce 1 essay in the MT.

The formative coursework will be a 1500 word essay.

Indicative reading: Beland, D., Shoyama, J., Mahon, R. 2016. *Advanced Introduction to Social Policy*. Edward Elgar. Deacon. B. 2007. *Global Social Policy and Governance*. Sage. Ferguson, J. 2016. *Give a Man a Fish: Reflections on the New Politics of Distribution*. Duke University Press. Fraser, N. 2008. *Scales of Justice: Reframing Political Space in a Globalizing World*. Polity. Gonzalez-Ricoy, I. and Gosseries, A. (eds.) 2016. *Institutions for Future Generations*. Oxford University Press. Hill, M. and Varone F. 2017. *The Public Policy Process*. Seventh Edition. Routledge. Hoppe, R. 2011. *The Governance of Problems: Puzzling, Powering and Participation*. The Policy Press. Hudson, J.R. and Lowe, S.G. 2009. *Understanding the Policy Process: Analysing Welfare Policy & Practice*. Second Edition. The Policy Press. Yeates, N. (ed.) 2014. *Understanding Global Social Policy*. Second Edition. The Policy Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

The exam will test students' knowledge and understanding of topics from across the course.

SP401 Half Unit

Understanding Policy Research

This information is for the 2019/20 session.

Teacher responsible: Dr Berkay Ozcan OLD.2.33

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course aims to provide an understanding of issues associated with the research process, in the context of the MSc in International Social & Public Policy. The course includes

an examination of philosophical issues underpinning research methods in social policy; the place of different research methods (qualitative and quantitative) in international social & public policy; the use of research; and the role of evidence in informing social & public policy.

This is not a 'how to' methods course. Instead, students will be equipped to become critical readers and users of research. Students will gain an understanding of the role of research in the policy process, and of the philosophical underpinnings of different approaches to ISPP research, both quantitative and qualitative; they will scrutinise which research designs are appropriate for different kinds of policy investigation; and learn to critique the validity of the implications for policy drawn by researchers, given the methods they have used.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will undertake a group presentation during the course, discussing approaches in researching social policy. They will receive written feedback on this presentation, and it will form the basis of the first part of their summative assessment.

Students will be expected to answer a set of broad questions every week, which will be similar to the exam questions and related to the lecture and seminar material covered in that week.

Indicative reading: Alan Bryman (2012) *Social Research Methods*, 4th edition Oxford University Press; C Robson & K McCartan (2015) *Real world research: A resource for social scientists and practitioner-researchers*, 4th edition. Oxford University Press; Justin Parkhurst (2016) *The Politics of Evidence: From Evidence-Based Policy to the Good Governance of Evidence*, Routledge.

Assessment: Exam (75%, duration: 2 hours, reading time: 15 minutes) in the January exam period. Coursework (25%) in the MT.

The course is intended to inform the student's dissertation in terms of underpinning issues, concepts, methodological choices and the role of research in social and public policy implementation. Assessment comprises of:

- 1 an individual write up of a group presentation on the role of different forms of research in international social & public policy (25%)
- 2 a final exam comprising questions requiring relatively shorter answers which aims to test the skills outlined above and reflects the breadth of issues covered throughout the course (75%).

SP410 Half Unit

Migration: Current Research, Critical Approaches

This information is for the 2019/20 session.

Teacher responsible: Dr Isabel Shutes OLD 2.58

Availability: This course is compulsory on the MSc in International Social and Public Policy (Migration). This course is available on the MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts, and to different patterns and forms of migration. The course examines the relationship between migration and social and public policies, including the implications for how migrants and migration are conceptualised, for inequalities in the movement of people, for

welfare systems, and for the impacts of migration in countries of origin and destination. Teaching across the course integrates critical theoretical approaches to migration with applications using different migration-related research methods.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students are expected to participate actively in seminars and course activities, to prepare a group presentation, and to write a formative essay linked to their written summative assignment. Course activities include a film/documentary screening and a final student-led exhibition that address the course learning outcomes.

Indicative reading: Castles, de Haas & Miller (2013) *The Age of Migration*; Shachar (2009) *The Birthright Lottery: Citizenship and Global Inequality*; Luthra, Platt & Salmonska (2016) "Types of Migration: The Motivations, Composition and Early Integration Patterns of 'New Migrants' in Europe", *International Migration Review*; Piper (ed) (2008) *New Perspectives on Gender and Migration: Livelihood, Rights and Entitlements*; Faist, Bilecen, Barglowski & Sienkiewicz (2015) "Transnational Social Protection: Migrants' Strategies and Patterns of Inequalities", *Population, Space and Place*, 21, 193-202; FitzGerald (2012) "A Comparativist Manifesto for International Migration Studies" *Ethnic and Racial Studies*, 35: 10, 1725-1740; De Genova (2002) "Migrant 'Illegality' and Deportability in Everyday Life", *Annual Review of Anthropology*, 31, 419-47.

Assessment: Coursework (100%) in the LT.

SP411 Half Unit

Social Policy and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Timothy Hildebrandt OLD.2.56, Dr Sunil Kumar OLD.2.55, Dr Hayley Jones OLD.2.50 and Dr Muzafferettin Seckinelgin OLD.2.27

Availability: This course is compulsory on the MSc in International Social and Public Policy (Development). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course provides the analytical tools needed to understand and critically evaluate the key practical challenges of social development. A wide range of development contexts will be discussed using empirical research and case studies.

Key themes include: linking social policy theory, implementation and practice; making social protection effective; managing sector reform processes; projects and programmes, including design and evaluation; participation and community development; gender analysis; the impact of corporate social responsibility and social enterprises on poverty reduction.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: The formative work on this course is a mock exam. Students will receive feedback on their mock exam from their academic Mentor.

Indicative reading: Barrientos, A. and D. Hulme, eds. (2008) *Social Protection for the Poor and the Poorest: Concepts, Policies and Politics*. London: Palgrave Macmillan; Dale, R (2004) *Development Planning: Concepts and Tools for Planners, Managers and Facilitators*, Zed Books; Green, D. (2008) *From Poverty To Power: How Active Citizens and Effective States Can Change The World*. Oxford: Oxfam International; Hickey, S. and Mohan, G. (2004) *Participation, from tyranny to transformation? Exploring*

new approaches to participation in development. London: Zed Books; Midgley, J. (1995) *Social development: the developmental perspective in social welfare*. London: Sage; Rondinelli, D. (1983) *Development Projects as Policy Experiments: An Adaptive Approach to Development Administration*. London: Methuen; Thin, N. (2002) *Social progress and sustainable development*. London: ITDG; Willis, K. (2005) *Theories and Practices of Development*. London: Routledge.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP412 Half Unit

Non-Governmental Organisations, Social Policy and Development

This information is for the 2019/20 session.

Teacher responsible: Prof David Lewis OLD2.40

Availability: This course is compulsory on the MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Students will benefit from having some experience of work within NGOs and/or relevant government departments or donor agencies working with NGOs.

Course content: The course focuses on the specialised field of non-governmental organisations (NGOs) within the field of social policy and development, and considers theoretical and policy issues.

Main topics include the history and theory of NGOs; the changing policy contexts in which NGOs operate; NGO service delivery and advocacy roles in policy; NGO relationships with other institutional actors including government, donors and private sector; challenges of NGO effectiveness and accountability; NGO organisational growth and change; and conceptual debates around civil society, social capital, social movements and globalisation.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will sit a mock exam as their formative work. Students will receive feedback from their academic Mentor on the mock exam.

Weekly student led seminars which involve discussion of the assigned readings will also help to develop students' critical thinking, reading, and analytical skills

Indicative reading: Bebbington, A., Hickey, S. and Mitlin, D. (2008) *Can NGOs Make a Difference?* London: Zed Books; Beck, E. (2017) *How Development Projects Persist: Everyday Negotiations With Guatemalan NGOs*. London: Duke. Edwards, M. and Hulme, D. (1996) *NGOs, Performance and Accountability: Beyond the Magic Bullet*. London: Earthscan; Glasius, M, Lewis, D. and Seckinelgin, H. (2004) eds. *Exploring Civil Society: Political and Cultural Contexts*, London: Routledge; Holmen, H. (2010) *Snakes in Paradise: NGOs and the Aid Industry in Africa*. Sterling VA: Kumarian; Howell, J. and J. Pearce (2001) *Civil Society and Development: A Critical Exploration*. London: Lynne Rienner; Lashaw, A., Vannier, C. and Sampson, S. (2017) eds. *Cultures of Doing Good: Anthropologists and NGOs*. Tuscaloosa: University of Alabama Press; Lewis, D. and Kanji, N. (2009) *Non-Governmental Organisations and Development*. London: Routledge; Lewis, D. (2014) *NGOs, Management and Development*. London: Routledge.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP413 Half Unit

Understanding Social (Dis)advantage

This information is for the 2019/20 session.

Teacher responsible: Dr. Amanda Sheely OLD 2.52

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Inequalities and Social Science, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non Social Policy students, priority for places is given to students on the MSc Inequalities and Social Science.

Course content: This course addresses the emergence, maintenance and dynamics of social advantage and disadvantage in different areas of life across different social groups. It explores inequalities in income, poverty & wealth, labour market position, family resources, education, crime, and life chances, with reference to social groups defined according to their gender, ethnicity, as well as citizenship and migration status, disability. It pays specific attention to intersectional, cumulative and relational processes in the reproduction of inequalities.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be required to undertake a formative essay.

Indicative reading: The core text for the course is:

H Dean & L Platt (eds) 2016. *Social Advantage and Disadvantage*. Oxford University Press. Other indicative background reading:

Milanovic, B. 2016. *Global Inequality*, The Belknap Press. McCall, L. (2005). 'The Complexity of Intersectionality'. *Signs: Journal of Women in Culture and Society*, 30(3): 1771–800. Atkinson, A.B. (2015). *Inequality: What can be done?* Harvard University Press. Faist, T. (2016) 'Cross-Border Migration and Social Inequalities'. *Annual Review of Sociology*, 42: 323-346. Payne, G. (ed.) 2013. *Social Divisions*. Third Edition. Palgrave Macmillan.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

No changes proposed.

SP414 Half Unit

Ethnicity, Race and Social Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Coretta Phillips OLD.2.28

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Gender, Policy and Inequalities, MSc in International Migration and Public Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non-SP students, preference will be given first to students on MSc International Migration and Public Policy and MSc Gender, Policy and Inequalities.

Course content: Course looks at: Understanding Key Concepts; Disciplinary Frameworks; Migration and Citizenship, Theorising

Multiculturalism; Ethnic Settlement and Housing Inequalities; Education; Employment, Poverty and Underclass; Criminalisation and Incarceration; Discrimination and the Role of the State I: Positive and Affirmative Action; Discrimination and the Role of the State II: Legislative Frameworks, Diversity, and Service Delivery.

Teaching: 15 hours of lectures, 15 hours of seminars and 2 hours of workshops in the MT.

In Week 6 there will be an essay-writing workshop.

Formative coursework: The formative essay will be a 2000 word essay.

Indicative reading: Sangeeta, C., Flynn, R. (2019) *Understanding 'Race' and Ethnicity: Theory, History, Policy, Practice*. Bristol: Policy Press. Murji, K. (2017) *Racism, Policy and Politics*. Bristol: Policy Press. Jivraj, S. and Simpson, L. (eds) (2015) *Ethnic Identity and Inequalities in Britain: the Dynamics of Diversity*. Bristol: Policy Press. Goldberg DT (2015) *Are We All Postracial Yet?*, Cambridge: Polity. Bulmer, M. and Solomos, J. (ed.) (1999) *Racism*. Oxford: Oxford University Press. Back, L. and Solomos, J. (eds.) (2000) *Theories of Race and Racism: A Reader*. London: Routledge. Bloch, A., Neal, S. and Solomos, J. (eds) (2013) *Race, Multiculture and Social Policy*. Basingstoke: Palgrave. Bhattacharyya, G, Gabriel, J. and Small, S. (2002) *Race and Power: Global Racism in the Twenty-First Century*. London: Routledge.

Assessment:

The Summative Coursework will be a 4000 word essay.

SP415 Half Unit

Urbanisation and Social Policy in the Global South

This information is for the 2019/20 session.

Teacher responsible: Dr Sunil Kumar OLD.2.55

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Some knowledge of or experience of dealing with urban issues is desirable. To apply for a **place** on this course, prospective students will have to **write a 250-word statement** (information will be available on the Moodle page for the course) as to: (i) why they would like to take this course - 50 words; (ii) what they can bring to the course - 125 words, and (iii) how they intend to use the knowledge gained (for example, for their dissertation or future employment or research) - 75 words. In addition, prospective students will have to complete a 'student background questionnaire' on Moodle at the time of applying for the course.

Pre-requisites: Some experience of urban issues in the Global South or North is desirable.

Course content: The course critically explores the challenges and opportunities that urbanisation and urban transformations pose in the social, spatial, economic, institutional and political realms in the urban Global South. A plurality of theoretical and conceptual perspectives informing contemporary policies and planning practices are explored each week.

Some of the themes explored in the course are, urbanisation, urbanism and social change, theories of urbanisation and urban change, internal migration and the rural-urban interface, urban poverty and livelihoods, urban labour markets and livelihoods, urban housing and tenure, urban basic services, urban governance, and urban social movements and collective action. Cross-cutting themes such as gender and the role of civil society are also

explored.

Prospective students must be willing to commit themselves to full participation in all aspects of the course. They will be required to read and discuss the essential readings for both the lectures and seminars each week. They are also expected to read more widely and actively participate in the seminars. This course seeks a weekly commitment from students to undertake two non-assessed activities: (i) *My_City* – a short 500-750-word desk-based piece of research and writing that links key issues emerging from the lecture to a city of their choice with the view to meeting one of the pedagogical aims of this course, namely, linking theory with policy and practice; and (ii) *My_Critique* - a short 100-250-word response to the 'big' seminar question. In addition to Moodle, the course will use other online tools such as Padlet.

Teaching: 1 hour and 30 minutes of lectures in the MT. 18 hours of lectures and 15 hours of seminars in the LT.

1 The lecture in MT (week 10) will be an overview of the course and its pedagogy; including assessment. This is to enable students to decide if they would like to maintain their enrolment or drop the course before the course actually starts in the LT.

2 In addition to the subject/topic based lectures, there will be two additional lectures on: (i) Dr. Kumar's research (as the course is research led) in week 1 or 2 of LT, and; (ii) on the task for the summative essay (around week 5).

3 Students are required to attend all lectures.

Formative coursework: Students taking this course will have the opportunity to write a 1,000-word formative essay (excluding an abstract and references at the end of the essay) as a draft of the summative essay. The learning pedagogy and learning outcome is to receive feedback on what may become the summative essay. Since the formative is intended to lead to a summative essay, students will not receive a grade but will receive written feedback. The formative essay will have to be submitted in weeks 7-9 of the term in which the course is taught so that timely feedback can be provided. In thinking of the subject matter for their summative essay, students are required to read widely and will find that undertaking the two weekly activities - *My_City* and *My_Critique* (as set out in the course content) - useful.

Indicative reading: A detailed reading list is provided for each lecture and seminar via the LSE library's electronic reading list. The following is an introductory list of texts in alphabetical order (a number of them are available as e-books via the LSE library). Chant, S. (2010) *The International Handbook of Gender and Poverty: Concepts, Research, Policy*. London: Edward Elgar. Hansen, K. T. and A. L. Dalsgaard (2008) *Youth and the City in the Global South*. Bloomington, Indiana: Indiana University Press. Kumar, S. (2001) *Social Relations, Rental Housing Markets and the Poor in Urban India*. Report for the UK Department for International Development (<https://assets.publishing.service.gov.uk/media/57a08d64ed915d622c00197b/R6856.pdf>). Kumar, S and M. Fernandez (2016) *The Urbanisation-Construction-Migration Nexus in Five Cities in South Asia: Kabul, Dhaka, Chennai, Kathmandu and Lahore* (Research commissioned by the UK Department for International Development's South Asia Research Hub (SARH), New Delhi, India. (2009) *Searching for the Just City: Debates in Urban Theory and Practice*. London; New York: Routledge. Mercedes González de la, R. (2006) "Vanishing Assets: Cumulative Disadvantage among the Urban Poor." *Annals of the American Academy of Political and Social Science*, 606: 68-94. OECD (2015) *The Metropolitan Century: Understanding Urbanisation and its Consequences*, Paris: OECD Publishing. Robinson, J. (2016). "Starting from anywhere, making connections: globalizing urban theory." *Eurasian Geography and Economics*, 57(4-5): 643-657. Roy, A. (2005) "Urban Informality: Toward an Epistemology of Planning." *Journal of the American Planning Association*, 71(2): 147-158.

Assessment: Essay (100%, 5000 words) in the ST.

The summative essay for the course **must** address an urban issue in the global South **or** apply a southern perspective to an urban issue in the Global North. The subject matter of the essay must have relevance for marginalised groups. The grading will reflect the extent to which the essay dovetails theory, policy and practice. There are three potential entry points for identifying the subject matter for the essay: (1) an academic critique of an urban policy (existing or proposed); (2) the identification of an urban issue that does not have a policy but requires one; (3) a critique of a conceptual framework that has been used to address an urban challenge. Students should note that entry points 1-3 are intended as prompts to help them approach the summative essay; thus, any number of starting points could be combined. Those students approaching the essay from starting points 1 and 2 are required to propose broad policy solutions and address key barriers to the adoption of the proposed policy. Those who would like to approach their essay from the perspective of point 3, will have to propose improvements to the conceptual framework being critiqued namely, how the critique changes the 'framing of the problem' and its associated policy implications. Students can also critique urban policy and conceptual frameworks in the global North as long as they use concepts from the global South. In doing so, they are required to suggest policy and conceptual improvements to urban challenges in the global North. This is designed to overcome the North-South divide and foster the transfer of ideas. Students who chose this option will have to demonstrate that the transfer of policy ideas or conceptual critiques, using literature from the urban South to the urban North, are feasible in terms of context, institutions and politics, for instance.

Extensive guidance notes for the summative essay will be available on Moodle.

SP416 Half Unit Not available in 2019/20 International Planning and Children's Rights

This information is for the 2019/20 session.

Teacher responsible: Prof Eileen Munro OLD2.33 and Dr Armine Ishkanian OLD1.13

Availability: This course is available on the MSc in Human Rights, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This is an interdisciplinary course that explores the links between child rights and child poverty at all levels of development in rich and poor countries. The social and economic as well as the civil and political rights of children, as defined in recent international laws, charters and Conventions, are examined in relation to the conditions, especially poverty and multiple deprivation, experienced by many children. Human rights theories as a basis for international and social policies will be a focus of

attention. There has to be universal planning and not only specific proposals to deal with serious violations of rights. Issues of child labour, the violations of war, cultural discrimination against girl children and the right to a minimally adequate family income will be discussed in relation to the roles played by international agencies, Trans National Corporations, governments and NGOs.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: H J Steiner & P Alston, *International Human Rights in Context*, Oxford University Press, 2000; P Townsend & D Gordon (Eds), *World Poverty: New Policies to Defeat an Old Enemy*, Policy Press, 2002; D Gordon, et al, *Child Poverty in the Developing World*, Policy Press, 2003; K Watkins, *Rigged Rules and Double Standards: Trade, Globalisation and the Fight Against Poverty*, London, World Development Movement, 2002; C Chinkin, 'The United Nation Decade for the Elimination of Poverty: What Role for International Law?', *Current Legal Problems* 2001, Oxford University Press, 2002; M Flekkoy & N Kaufman, *The participation rights of the child*. London, Jessica Kinglsey, 1997; D Fottrell (Ed), *Revisiting Children's Rights: 10 Years of the UN Convention on the Rights of the Child*, The Hague and London, Kluwer Law International, 2000; ILO, *Social Security: A New Consensus*, Geneva, 2001; ILO, P.Townsend, *The Right to Social Security and National Development: Lessons from OECD Experience for Low-income Countries*, Discussion paper 18, ILO, 2007; A. Hall and J. Midgley, *Social Policy for Development*, London, Sage, 2004; J. Madeley, *Big Business, Poor peoples: The Impact of Trans National Corporations on the World's Poor*, London, Zed Books; UNICEF, *A League Table of Child Poverty in Rich Nations*, Innocenti Report, Florence, 2000; H Cunningham & P Viazzo, *Child Labour in Historical Perspective 1800-1995*, UNICEF, 1996; G. Lansdown, *Evolving Capacities of Children: Implications for the Exercise of Rights*, UNICEF Innocenti Centre, Florence, 2005; W.A. Corsaro, *The Sociology of Childhood* (2nd ed), Sage, 2006; R. Smith, *Textbook on International Human Rights*, Oxford University Press, 2005; D. Gordon, R. Parker, F. Loughran and P. Heslop, *Disabled Children in Britain*, London, TSO, 2000. Redmond G, 2008, *Children's Perspectives on Economic Adversity: A Review of the Literature*, Unicef Innocenti Centre, Florence, Discussion Paper.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP417 Half Unit

Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2019/20 session.

Teacher responsible: Dr Timothy Hildebrandt OLD.2.55 and Dr Muzafferettin Seckinelgin OLD 2.27

Availability: This course is available on the MSc in Gender (Sexuality), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender,

race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to submit a formative essay (2,000 words).

Indicative reading: Aggleton, P., Boyce, P. and Moore, H. (2012) *Understanding Global Sexualities: New Frontiers*. London: Routledge; Butler, J. (1990) *Gender Trouble: Feminism and the Subversion of Identity*. New York: Routledge; Canaday, M. (2009) *The Straight State: Sexuality and Citizenship*. Princeton university Press; Cornwall, A., Corrêa, S. and Jolly, S. (2008) *Development with a Body: Sexuality, Human Rights and Development*. London: Zed Book; Correa, S., Petchesky, R. and Parker, R. (2008) *Sexuality, Health and Human Rights*. London: Routledge; De La Dehesa, R. (2012) *Queering the Public Sphere in Mexico and Brazil: Sexual Rights Movements in Emerging Democracies*. Duke University Press; Reid, G. and Walker, L. (2005) *Men Behaving Differently: South African Men since 1994*. Doubleday books; Richey, L. A. (2008) *Population Politics and Development: From the policies to the Clinics*. London: Palgrave; Stoler, A. L. (2002) *Carnal Knowledge and Imperial Power: Race and the Intimate in Colonial Rule*. University of California Press; Tamale, S. (2011) *African Sexualities: A Reader*. Pambazuka Press.

Assessment: Essay (100%, 3000 words) in the LT.

SP418 Half Unit

Global Social Policy and International Organizations

This information is for the 2019/20 session.

Teacher responsible: Dr Hakan Seckinelgin, OLD.2.27

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Health Policy, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: What do the Catholic Church, Bill and Melissa Gates, UNICEF and the World Bank have in common? They are in one way or another involved in social policy that goes beyond the nation state. Policy could be seen as the exercise of political power and this political power has often been concentrated within the nation state. Far from the traditional study of policy this includes the effect of globalization on a variety of actors in social policy. This course examines how globalization has changed the way we perceive areas such as health, education, social care and other areas that concern social citizenship. The course examines the international policy environment, particularly intergovernmental organisations; bilateral and multilateral aid agencies and non-governmental organizations (NGOs), which influence the social

policy environment in developing countries. The impact of the inter-governmental policy process on policy outcomes is examined. The same goes for religious groups, social movements and corporations that all play a role in global social policy. The main goal of the course is not only to open up the understanding of social policy and globalization but also to show the complexity of goals and actors of social policy. It is expected that the students will devote considerable time to reading and preparing for the seminars.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will write a long essay as their formative work for this course.

Indicative reading: A detailed reading list will be presented at the beginning of the term. Some introductory texts include: B Deacon *Global Social Policy and Governance*. Sage (2007); R. Baldwin *The Great Convergence: Information Technology and The New Globalization*. Belnap (2017); H. Seckinelgin *The politics of Global AIDS: Institutionalization of Solidarity, Exclusion of Context*. Springer (2017); I. Gonzalez-Ricoy and A. Gossies, *Institutions for Future Generations*. OUP (2016); R Mishra, *Globalisation and the Welfare State*, Edward Elgar (1999); D Nayyar, *Governing Globalization: Issues and Institutions*, OUP (2002); V S Peterson & A S Runyan, *Global Gender Issues*, Westview Press (1993). M. Callon, P. Lascoumes, and Y. Barthe, *Acting in an Uncertain World*. The MIT Press (2009). D. Carpenter, *Reputation and Power: Organizational Image and Pharmaceutical Regulation at the FDA*. Princeton (2010).

Assessment: Take-home assessment (100%) in the MT.

SP419 Half Unit

Social Movements, Activism, and Social Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Timothy Hildebrandt OLD 2.56

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course begins by examining theories of social movements, collective action, and contentious politics. It then moves on to examine how social movements engage with the policy process and the ways in which social movement activism informs social policy formulation and implementation. It examines the nature, past and present roles of social movements and their potential capacity in shaping social policy in developed and developing countries, and in democratic, hybrid, or authoritarian regimes. The course covers theoretical arguments and examines empirical examples and case studies.

The course examines the following topics: the role and impact of social movement activism in identifying and meeting needs; the role of grassroots mobilizations and solidarity; how movements are affected by regulatory frameworks; how and when movements achieve their objectives; movements relations with other actors (including, NGOs, trade unions, political parties, etc.); populism. The course considers the development, transformation, autonomy, interdependence, and probity of social movements. It draws on examples of social movements in different periods, countries, and areas of activity to examine and analyse how change happens and the obstacles to change.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to participate actively in seminars and to complete one piece of written formative coursework

Indicative reading: Castells, M. (2012). *Networks of Outrage and Hope: Social Movements in the Internet Age*. Della Porta, D. (2015). *Social Movements in Times of Austerity*. Fox Piven, F., & Cloward, R. (1978). *Poor People's Movements: why they succeed, how they fail*. Glasius, M., & Ishkanian, A. (2015). *Surreptitious Symbiosis: Engagement between activists and NGOs*. Voluntas. Graeber, D. (2002). *The new anarchists*. *New Left Review*, 13, 61-73. Hildebrandt, T (2013) *Social organizations and the authoritarian state in China*. Jasper, J. M. (2010). *Social Movement Theory Today: Toward a Theory of Action?* Jenkins, J. C. (1983). *Resource mobilization theory and the study of social movements*. Pleyers, G. (2011). *Alter-Globalization: Becoming Actors in the Global Age*. Polletta, F. (2002). *Freedom is an endless meeting: Democracy in American social movements*. Rochon, T. R., & Mazmanian, D. (1993). *Social Movements and the Policy Process*. *Annals of the American Academy of Political and Social Science*. Seckinelgin, H. (2017) *The politics of global AIDS: institutionalization of solidarity, exclusion of context*. Tarrow, S. (2011). *Power in Movement*. Weldon, L. S. (2011). *When protest makes policy: how social movements represent disadvantaged groups*.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP420 Half Unit

Understanding Policy Research (Advanced)

This information is for the 2019/20 session.

Teacher responsible: Dr Tania Burchardt 32L 3.30

Availability: This course is compulsory on the MSc in International Social and Public Policy (Research). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: The course equips you with transferable quantitative and qualitative research design skills, including the design of policy evaluations, and an in-depth understanding of the role of different types of research in the social and public policy-making process. It is an advanced course and students are expected to already have a grasp of basic research design principles and their application to social and public policy, for example as covered in MY400 Fundamentals of Research Design or SP401 Understanding Policy Research, both of which run in the MT, although these courses are not a formal pre-requisite. Lectures are given by leading academics engaged in research using the methods under consideration, many of whom have achieved substantial policy impact. Students are encouraged to critically assess applications of complex research methods to contemporary national and international social and public policy questions. Topics may include uses of: mixed methods, policy evaluation; participatory research; researching organisations (including organisational anthropology); longitudinal and life history analysis; micro-simulation techniques; systematic reviews, meta-analysis and meta-ethnographies; and small area, geographical and internationally comparative research. The relationship between research and policymaking is a theme that runs throughout the course.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 15 minutes of help sessions

in the ST.

The lectures will be given by a member of staff or external expert in that particular method or topic and are followed by a seminar examining research exemplifying the approach and the issues raised. The help sessions are one-to-one tutorial sessions with the seminar leader to discuss feedback on essays and progress on the course.

Formative coursework: There will be one compulsory formative coursework essay, which will follow from a seminar presentation. In addition, there will be one optional formative assignment. These formative assignments are designed to prepare students for the exam. Written and verbal feedback will be provided.

Indicative reading: P Alcock et al (Eds) (2012), *The Student's Companion to Social Policy*, 4th edn; C Hakim (2000), *Research Design: Strategies and choices in the design of social policy*, 2nd edn; A Bryman (2015), *Social Research Methods*, 5th edn. J Parkhurst (2016) *The Politics of Evidence* Additional references will be supplied at the start of the course and in lectures.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

The exam focuses on assessing students' abilities to critique social policy research approaches. Students will be asked to answer 2 out of a choice of 7 questions based on the research approaches we have studied during the course.

SP430 Half Unit

Social Security Policies

This information is for the 2019/20 session.

Teacher responsible: Dr Kitty Stewart OLD2.36

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course analyses the purposes, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course – childhood, parenthood, old age – and from risk factors that will end up affecting only some – unemployment, sickness and disability.

The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country.

The course will also consider how successfully social security systems are adapting to meeting the challenges of the twenty-first century, including an ageing population, migration, and the changing nature of employment brought about by rapid technological change.

Most of the examples in the lectures and readings relate to higher- and middle-income countries, but the course aims to be of interest and relevance to students from all countries. Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: 12 hours and 30 minutes of lectures and 15 hours of

seminars in the MT. 2 hours of seminars in the ST. Weekly lectures will set the agenda for the week and provide students with an overview of the key issues at stake. Classes will be made up of two main components. All students will be expected to give a short presentation during the course of the term on an aspect of social security or a recent social security reform in a country they are interested in (perhaps their country of origin). In the remainder of the class, students will debate propositions related to the week's required readings, which will often offer differing perspectives on the topic.

Formative coursework: Students will be required to write one formative essay during the course of the term, which will enable them to deepen their understanding of the course material and practice critical thinking skills in preparation for the summative essay assignment. Written feedback will be given.

Indicative reading: R Walker, *Social Security and Welfare: Concepts and Comparisons*, Oxford University Press, 2005; J Millar and R Sainsbury (eds), *Understanding Social Security*, 3rd ed. The Policy Press, 2018; M Frolich et al, *Social Insurance, Informality and Labor Markets*, Oxford University Press, 2014; J Hanlon, A Barrientos and D Hulme, *Just Give Money to the Poor*, Lynne Rienner Publishers, 2010; J Hills, *Good Times, Bad Times: The Welfare Myth of Them and Us*, Policy Press, 2014; ILO, *World Social Protection Report 2014/15: Building Economic Recovery, Inclusive Development and Social Justice*.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.
Essay (25%, 2000 words) in the LT.

SP431 Half Unit

Population Analysis: Methods and Models

This information is for the 2019/20 session.

Teacher responsible: Prof. Michael Murphy, OLD.2.61
Dr Arjan Gjonca

Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Development Studies, MSc in Health and International Development, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.
<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Students should have basic numeracy, but the course does not require advanced mathematical knowledge. Some practical sessions will involve use of the spreadsheet EXCEL. IT Training provides numerous self-paced student supervised workshops on EXCEL and downloadable course guides. Students with no prior experience of EXCEL are advised to attend one of these workshops before the course.

Course content: This course provides an introduction to the key concepts and methods required for population analysis. The course will explain the dynamics of population change and enable students to learn basic methods for measuring population structure and the determinants of population size and change (fertility, mortality and migration). The course will also provide an introduction to population projections and describe and evaluate how demographic data are collected and used. Emphasis is placed on the understanding and interpretation of demographic data, as well as methods of population analysis.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be expected to complete exercises, write one essay and complete one multiple choice questionnaires during the term.

Indicative reading: Demography: Measuring and Modeling Population Processes by S H Preston, P Heuveline and M Guillot, 2001. This will be used as a reference text in the course. Students may also find it helpful to consult some of the other standard texts available including: *Essential Demographic Methods* by Kenneth W. Wachter, 2014 (recommended); *Demographic Methods* by Andrew Hinde, 1998; *Demographic Methods and Concepts* by Donald Rowland, 2003 (less advanced); *Methods and Models in Demography* by C Newell, 1988 (less advanced).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

SP432 Half Unit

Education Policy, Reform and Financing

This information is for the 2019/20 session.

Teacher responsible: Dr Sonia Exley OLD 2.64

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course considers education policy, reform and financing across a range of countries. It uses concepts and tools from a number of academic disciplines – social policy, sociology, economics, politics and philosophy – to scrutinise education. Throughout the course, there is particular focus on equity, social justice and the distribution of resources. Issues to be addressed include: the impact of social characteristics on educational outcomes (class, gender and race and ethnicity, with a cross-cutting focus on special educational needs and ideas of 'inclusion') and related policy reforms; accountability and market-oriented reforms in education; privatisation and the changing role of the state; power and the politics of educational policy making; global policy transfer in education; early years education; school-based education and post-compulsory education. Not all of these issues are covered as separate weekly topics.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 3 hours of seminars in the ST.

Formative coursework: One formative essay in LT.

Indicative reading: Specialist lists for each topic will be provided. The following introductory books are recommended:

- Apple, M.W., Ball, S.J., Gandin, L.A. (eds) (2010) *The Routledge International Handbook of the Sociology of Education*. London: Routledge.
- Arthur, J., Peterson, A. (eds) (2011) *The Routledge Companion to Education*. London: Routledge.
- Lauder, H., Brown, P., Dillabough, J., Halsey, A.H. (eds) (2006) *Education, Globalization and Social Change*. Oxford: Oxford University Press.
- McGrath, S. Gu, Q. (eds) (2015) *Routledge Handbook of International Education and Development*. London: Routledge.
- Mundy, K., Green, A., Lingard, B., Verger, A. (eds) (2016) *The Handbook of Global Education Policy*. Oxford: Wiley Blackwell.
- Halsey, A.H., Lauder, H., Brown, P., Wells, A.S. (eds) (1997) *Education: Culture, Economy, Society*. Oxford: Oxford University Press.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SP433 Half Unit

Rural Livelihoods, Development and Social Transformation

This information is for the 2019/20 session.

Teacher responsible: Prof David Lewis OLD2.40

Availability: This course is available on the MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in International Development and Humanitarian Emergencies, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Knowledge of rural areas and relevant work experience is desirable but not essential. Knowledge of sociological and anthropological approaches to studying rural development also desirable.

Course content: This course considers: Theories of rural development and transformation, history of rural development policy, changing rural livelihoods, land and agrarian reform, agricultural research and extension, the roles of private and non-governmental actors, natural resource management, food security, climate change and rural-urban linkages.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

Formative coursework: A formative 1500 word essay is required, and feedback will be provided.

Indicative reading: A detailed reading list is included in the seminar programme. The following is an introductory reading list: J Boltvinik & SA Mann (eds.) Peasant poverty and persistence in the 21st century: theories, debates, realities and policies (2016); T M Li, Land's End: Capitalist Relations on an Indigenous Frontier (2014); I Scoones & J Thompson, Farmer First Revisited (2009); R McAreavey, Rural Development Theory and Practice (2009); A Shepherd, Sustainable Rural Development (1998); B Crow & H Bernstein (Eds), Rural Lives: Crises and Responses (1992); N Long, Development Sociology: Actor Perspectives (2001).

Assessment: Essay (100%, 3500 words) in the ST.

Students are required to write an assessed essay of 3,500 words.

SP434 Half Unit

Behavioural Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Adam Oliver OLD2.33

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Environmental Economics and Climate Change, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy

(Research), MSc in Political Science and Political Economy, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation, MSc in Social Research Methods and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The application of behavioural economics and behavioural science to public policy issues has been, and continues to be, a major theme in the policy discourse internationally. This course offers students a thorough grounding in the theory and findings that define behavioural economics, from the major violations of standard rational choice theory to prospect theory and the theories of human motivation. The course goes on to consider the conceptual policy frameworks that have been informed by behavioural economics, with examples - so-called nudge, shove and budge policies - illustrated so as to highlight how these frameworks are applied in practice. Students will also be exposed to the different behavioural-informed schools of thought that have prescribed divergent paths for public sector governance.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: All students will be required to present work in progress on their summative assignments during seminar class time. In addition, students will be required to present to the course convener a one page plan for their summative assessment, on which they will receive feedback.

Indicative reading: J. Le Grand (2006) Motivation, Agency and Public Policy: of Knights and Knaves, Pawns and Queens. Revised paperback edition. Oxford: Oxford University Press. J. Le Grand (2007) The Other Invisible Hand; Delivering Public Services through Choice and Competition. Oxford: Princeton University Press. R. Thaler and C. Sunstein (2008) Nudge: Improving Decision about Health, Wealth and Happiness New Haven: Yale University Press. Ariely, D. (2008). Predictably Irrational: the hidden forces that shape our decisions. London, HarperCollins. Kahneman, D. (2011) Thinking, Fast and Slow London, Allen Lane. P. Dolan et al (2010) Mindspace: Influencing Behaviour through Public Policy. London: Cabinet Office and the Institute for Government.

Assessment: Project (100%).

The summative assessment is a project write-up of 3,000 words, where students design their own behavioural public policies.

SP435 Half Unit

Housing, Neighbourhoods and Communities

This information is for the 2019/20 session.

Teacher responsible: Prof John Hills OLD 2.62

Availability: This course is available on the MSc in City Design and Social Science, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: There are no prerequisites to take this course.

Course content: This course introduces MSc students to the links between housing, neighbourhoods and social and public policies, in the context of housing systems in the UK, Europe and North America. It examines: how housing and neighbourhoods have evolved in UK and Europe, and contrasts in the USA; the rise of mass housing estates, the role of government and housing management; housing markets – supply, demand, need

and affordability; owner-occupation and taxation; sustaining neighbourhoods through upgrading, and dangers of segregation and gentrification; housing wealth and assets, inheritance and polarisation; private renting, housing benefits and regulation; social housing, subsidies, rents and affordability; community-led and community-based housing; sustainable housing solutions, retrofit, fuel poverty and energy saving. The course uses live case studies to illustrate the main themes.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 3 hours of lectures and 3 hours of seminars in the ST.

There are also organised site/project visits. The course provides many case study examples for students to draw on.

Formative coursework: Students participate actively in seminars, make two class presentations and complete one formative essay, drawing on case study evidence.

Students are invited to join site visits which illustrate key housing themes.

Indicative reading: A. Power *Fromhovels to High Rise*, 1993; *Estates on the Edge*, 1999. L. Hanley *Estates: a personal history*, 2004. J. Hills *Ends and Means: The Future Roles of Social Housing in England*, 2007. A. Power et al. *Jigsaw Cities 2007; Cities for a Small Continent*, 2016. R. Lupton et al *Social Policy in a Cold Climate*, 2016. H. Glennerster *Understanding the Cost of Welfare* 2017. A. Power and B. Provan, *Overcoming the stigma of social housing*, 2018.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the LT.

Essay based on a housing case study or policy initiative

SP436 Half Unit Not available in 2019/20 Basic Education for Social Development

This information is for the 2019/20 session.

Teacher responsible: Prof Anthony Hall OLD2.28

Availability: This course is available on the MSc in Development Management, MSc in Development Studies and MSc in Social Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at 30 students

Pre-requisites: Work experience in a developing country is highly desirable but not essential.

Course content: The course is designed to examine the role of basic education in developing countries as it relates to social development and social policy. Content of the course includes: the history of education and current problems in developing countries, links between basic education and socio-economic development, primary schooling, decentralization policies, non-formal and vocational education, adult literacy, popular education for grassroots development, environmental education, ICT, and foreign aid in supporting basic education.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: In addition to seminar presentations and the assessed essay, students are required to write an unassessed (formative) essay for the course.

Indicative reading: A Hall & J Midgley, *Social Policy for Development*, 2004, chapter 5; K Watkins, *The Oxfam Education Report*, 2000; UNICEF, *The State of the World's Children: Education*, 2006; UNESCO, *Education For All Global Monitoring Report*, 2010; K Tomasevski, *Education Denied*, 2003; L Kane, *Popular Education and Social Change in Latin America*, 2001; A Banerjee & E Duflo, *Poor Economics*, 2011 (chapter 5); S Graham-Brown, *Education in the Developing World: Conflict and Crisis*, 1991; M Todaro, *Economics for a Developing World*, 2000, chapter 9; H Patrinos & D Ariasingam, *Decentralisation of Education: Demand-Side Funding*, 1997; J Huckle & S Sterling (Eds), *Education for Sustainability*, 1996; L Pritchett *The Rebirth of Education*, 2013; N Selwyn, *Education in a Digital World*, 2013

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2500 words) in the ST.

Students are required to choose a topic of their own interest for the essay.

SP437 Half Unit Not available in 2019/20 International Housing and Human Settlements; Conflicts and Communities

This information is for the 2019/20 session.

Teacher responsible: Prof Anne Power OLD2.57

Availability: This course is available on the MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies and MSc in Social Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

This is a capped course. If it is oversubscribed places will be allocated by random ballot, first amongst Social Policy students then amongst other students for any remaining places. The first ballot will be held on Tuesday of MT week 1.

Course content: The course is an introduction to the global housing challenges of a fast urbanising world in the context of rapidly growing cities worldwide. There are 5 key themes: the push and pull factors in urban growth; the key actors in housing provision; slums and self-help; the environmental impact of low income settlements; the problems of poverty and exclusion in low income and informal settlements. The course includes 10 lectures in LT and one in ST. The main topics of the lectures are: housing needs and demand; contrasting patterns of housing development; owner occupation, renting and self-help; government intervention and finance; planning and renewal; international agencies, aid and NGOs; bottom-up shelter models and community-led initiatives; social exclusion and urban pressures; basic services and public infrastructure; participation and women's roles in low income settlements; environment of cities; urban and housing design; theories and practice in upgrading urban settlements. Case studies are used to illustrate arguments, policies and practical responses.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures and 3 hours of seminars in the ST.

Additional activity: occasional informal discussion sessions are organised at students' request.

Formative coursework: Students will be expected to participate actively in seminars and to complete one formative essay using case studies to illustrate their arguments. Students are also expected to prepare case studies for the seminar.

Indicative reading: UN (1996), *An Urbanising World*; A Power (1999), *Estates on the Edge*; Badshah (2006), *Our Urban Future*; D Satterthwaite (1999), *Sustainable Cities*; UNCHS 2001-2014, *The State of the World's Cities*; Doug Saunders, *Arrival City* (2010) Ed Glaeser, *Triumph of the City* (2012) D Satterthwaite and D Mitlin (2013) *Reducing Urban Poverty in the Global South*, D Satterthwaite and D Mitlin (2013) *Urban Poverty in the Global South*. *Environment and Urbanism Journal*, 1997-2017

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SP439 Half Unit Not available in 2019/20 Social Rights and Human Welfare

This information is for the 2019/20 session.

Teacher responsible: Prof Hartley Dean OLD2.59

Availability: This course is available on the MSc in Human Rights and MSc in Social Policy (Research). This course is available with permission as an outside option to students on other programmes

where regulations permit.

The course is currently capped at 30 places. Offers of places will be made on the basis of applicants' statements. Initial priority for places is given to students on Social Policy MSc programmes and students on the MSc Human Rights. Other students may be accepted onto a waiting list. Places remaining available three days before the start of the course will not be held back for late applicants from the Department of Social Policy or the Human Rights programmes but offered to students from the waiting list.

Pre-requisites: none

Course content: The course will examine the basis of social or welfare rights as a component of human rights. It will situate social/welfare rights in an historical and comparative context and explore a range of debates concerning the relevance and effectiveness of a rights based approach to poverty alleviation and social welfare provision, both in the developed and the developing world. It will address the practical limitations of and the constraints upon social/welfare rights. Specifically, it will address: concepts of social rights and welfare citizenship; human needs and human rights; social/welfare rights in global context; critiques of social/welfare rights as human rights; the scope and substance of social/welfare rights; social/welfare rights and mechanisms of redress; rights based approaches to poverty alleviation; social development and social/welfare rights; constitutional instruments and social/welfare rights; human rights and the ethics of welfare.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 1 hour and 30 minutes of seminars in the LT. 1 hour of lectures in the ST.

Formative coursework: Students have the option of submitting a formative essay.

Indicative reading: H Dean, *Social Rights and Human Welfare*, Routledge, 2015. Other relevant readings include: H Dean, *Understanding Human Need*, The Policy Press, 2010; A Eide, et al (Eds), *Economic, Cultural and Social Rights: A textbook*, Martinus Nijhoff, 2001; B Turner, *Vulnerability and Human Rights*, Pennsylvania State University Press, 2006; T Pogge (Ed), *Freedom from Poverty as a Human Right*, Oxford University Press, 2007 A Nevile (Ed.), *Human Rights and Social Policy*, Edward Elgar, 2010; C Gearty & V Mantouvalou, *Debating Social Rights*, Hart Publishing, 2011.

Assessment: Exam (75%, duration: 2 hours) in the summer exam period.

Essay (25%, 1500 words) in the LT.

SP440 Half Unit Wellbeing and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Frijters 32 LF 2.14 and Mr Christian Krekel 32L 2.24

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: The course is structured as follows:

Lecture 1 What is wellbeing and how is it measured?

This lecture will give an overview of the philosophical idea of wellbeing and the current ways to measure it at the individual, organisational, national, and international level.

Lecture 2 The frontiers of wellbeing measurement?

This lecture will go beyond the dominant current approaches to

measurement (which are based on subjective responses) and will delve into core aspect of both response theory and biometrics, with an eye on what social policy needs from a measurement.

Seminar 1: Lecture 2: will be complemented with a linked seminar focusing on the basic statistics available to students and researchers in the UK about wellbeing measurement. This includes the Understanding Society databases run by the Office of National Statistics, the British Household Panel, the Birth Cohorts (1946, 1958, 1970, and 2000), and particular databases (Gallup, psychiatric cross-sections).

Lecture 3: What do we know about wellbeing and how it can be changed? We will discuss some of the basic findings of wellbeing research in this lecture, so that students have a reasonable understanding of how wellbeing is affected at the individual level and national level.

Seminar 2: Lecture 3: will be complemented with a linked seminar where particular attention will be paid to:

- 1) The measurement of each of the important individual drivers of wellbeing.
- 2) The measurement of each of the important national drivers of wellbeing.
- 3) Basic statistical manipulations of these measures.

Lecture 4: Wellbeing interventions at the individual level.

In this lecture we take students more in depth through the main results of the wellbeing literature, taking an intervention lens.

Seminar 3: in this seminar we take students through the basics and extended forms of cognitive behavioural therapy, the Incredible Years program, and the methodology of the rat-race.

Lecture 5: Wellbeing interventions in firms and organisations.

In this lecture we take students more in depth through the main results of the wellbeing literature in organisations, taking an intervention lens.

Seminar 4: in this seminar we take students through the main datasets and methodology used to analyse wellbeing inside firms and organisations, drawing heavily on compulsory wellbeing measurements inside the UK civil service (all departments need to measure worker satisfaction and publish this!).

Lecture 6: Wellbeing at the regional level.

Seminar 5: in this seminar we take students through the What Works Centre for Wellbeing website.

Lecture 7: Wellbeing at the national level.

Seminar 6: in this seminar we take students through the key sources of national wellbeing data: the world value survey, the Gallup data sets, and the main national panels.

Lecture 8: The basics of wellbeing cost-effectiveness? Principles and some examples.

This lecture will introduce students to the basic calculus and logic of cost-effectiveness analysis.

Seminar 7: in this seminar we will go much more in depth into each of the 2 simple examples given of cost-effectiveness analysis in the UK and Germany.

Lecture 9: Advanced wellbeing Cost-Effectiveness analysis.

Seminar 8: Lecture 5 will have a linked seminar which goes much more in-depth into the methodology prescribed and used by NICE.

Lecture 10: Wellbeing inside the policy process: UK frontiers.

Seminar 9-10: Students present their current work (10 minutes each) and get feedback (10 minutes each: 5 on presentation, 5 on the preliminary essays) to help them finalise their essays.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Students will be expected to produce a plan for their Summative assessment as their formative work, upon which they will receive feedback.

Indicative reading: Benjamin, Daniel J., et al. "What do you think would make you happier? What do you think you would choose?." *American Economic Review* 102.5 (2012): 2083-2110. Clark, AE, Fleche, S., Layard, R., Powdthavee, N., and Ward, G. (2017) "The Origins of Happiness", Princeton University Press. Clark, A., Frijters, P., Shields, M.A. (2008), 'A survey of the income happiness gradient', *Journal of Economic Literature*, 46(1), March 2008, pp. 95-144. also IZA, NCER, and DELTA discussion paper. De Neve,

J-E. and Ward, G. "Happiness at Work". In 2017 World Happiness Report edited by Helliwell, Layard, and Sachs. Diener, Ed; Inglehart, Ronald; Tay, Louis "Theory and validity of life satisfaction scales." Social Indicators Research, 2013, 112, 497-527. Frijters, P, Johnston, D., Shields, M. (2014) "Does Childhood Predict Adult Life Satisfaction? Evidence from British Cohort Surveys ", Economic Journal, vol. 124(580), pages F688-F719, November. Brain science Rutledge, Robb B.; Skandali, Nikolina; Dayan, Peter; et al. "A computational and neural model of momentary subjective well-being." Proceedings of the National Academy of Sciences of the USA 2014, 111, 12252-57. Steptoe, Andrew; Deaton, Angus; Stone, Arthur A. "Subjective wellbeing, health, and ageing." Lancet, 2015, 385, 640-648. Van Praag, BMS; Baarsma, BE. "Using happiness surveys to value intangibles: The case of airport noise." Economic Journal, 2005, 224-246.

Assessment: Coursework (100%, 6000 words) in the ST. Assessment detail:

A report on the changes in wellbeing in a particular (student-specific) area of the UK, using available data (such as aggregated Understanding Society data) from 2010-2017. Students who want to look at a country rather than a UK region can do so, subject to data availability. The students will be required to master basic data such that they can show how wellbeing has changed in the chosen region of the UK, how that change relates to other areas in the UK, and how changes to key inputs into wellbeing have changed in the chosen area and the UK as a whole, using Understanding Society data and (possibly) other sources. It will be open to students to write their assessed report about a non-UK country if they wish, subject to prior agreement with the course convenor that it is feasible to do so (e.g. because of data availability considerations). Students need to show they have understood the course material by analysing and discussing the likely contributors to the changes in wellbeing in their chosen region (or non-UK country), culminating in the provisions of conclusions about the sustainability and likely trajectory of the changes, as well as about potential optimal policy reactions.

This summative essay will be due in the ST.

SP441 Half Unit

Politics of Social Policy: Welfare and Work in Comparative Perspective

This information is for the 2019/20 session.

Teacher responsible: Dr Timo Fleckenstein OLD.2.60

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MPA in International Development, MPA in Public Policy and Management, MPA in Public and Economic Policy, MPA in Public and Social Policy, MPA in Social Impact, MSc in Comparative Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Sociology, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.
<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course explores the politics of social policy in advanced political economies. In the first part of the course, the main analytical approaches for the cross-national analysis of welfare states are introduced (such as the industrialism thesis, the

power resources model, new institutionalism, feminist theory and the globalisation thesis). These will be examined in the context of the rise of modern welfare states and their transformations since the end of the 'Golden Age' in the mid-1970s. These analyses and the theoretical approaches to cross-national study of welfare states will be harnessed in the second part of the course when the focus shifts towards more recent policy developments since the 1990s. The empirical focus is on the welfare-and-work nexus. The course analyses the development of labour market and family policies in Nordic countries, Continental Europe, Anglo-phone countries and East Asia.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Seminar members will be expected to make presentations to the seminar, and submit a formative essay of 1,500 words.

Indicative reading: Bonoli, Giuliano, and Natali, David, eds. (2012) *The Politics of the New Welfare State*, Oxford: OUP. Castles, Frances G. et al., eds. (2010) *The Oxford Handbook of the Welfare State*, Oxford: OUP. Clasen, Jochen, and Clegg, Daniel, eds. (2013) *Regulating the Risk of Unemployment: National Adaptations to Post-Industrial Labour Markets in Europe*, Oxford: OUP. Kersbergen, Kees van and Vis, Barbara (2013) *Comparative Welfare State Politics: Development, Opportunities, and Reform*, Cambridge: CUP. Lewis, Jane (2009) *Work-Family Balance, Gender and Policy*, Cheltenham: Edward Elgar

Assessment: Essay (100%, 3000 words).

SP470

Criminal Justice Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Leonidas Cheliotis OLD 2.51

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Amongst non-Social Policy students, if there are places available, priority will be given to those on the Master of Laws and Master of Laws (extended part-time study).

Course content: The course provides a detailed and critical introduction to the study of criminal justice institutions, practices and participants.

It begins with an introduction to the nature of crime and contemporary criminal justice policy. It then examines the main elements of modern criminal justice systems (police, courts, prisons, probation, the media, and private security).

Special emphasis is given to current issues such as restorative justice and increasing rates of incarceration. The course combines up-to-date empirical work with theoretical perspectives and also emphasises the role of historical and comparative perspectives in understanding current trends.

Teaching: 15 hours of lectures, 13 hours and 30 minutes of seminars and 1 hour and 30 minutes of workshops in the MT. 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of lectures in the ST.

There will be a reading week in Weeks 6 of MT and LT.

There will be a revision session in the ST.

Formative coursework: Michaelmas Term – formative essay and one-to-one feedback. Summer term – mock exam (one question).

Indicative reading: There are two set texts for the course: M Maguire, R Morgan & R Reiner (eds.) (2012), *The Oxford Handbook of Criminology*, 5th edn; T Newburn (2012), *Criminology*, 2nd edn.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Essay (25%, 2000 words) in the ST.

SP471 Half Unit**Issues in Contemporary Policing**

This information is for the 2019/20 session.

Teacher responsible: Prof Tim Newburn OLD 2.40a

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms: Criminology and Criminal Justice, Legal Theory and Public Law.

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition

Course content: The flourishing sub-discipline of 'police studies' reflects the increasing centrality of policing in political debate and popular culture, and as a major concern of government policy. This course aims to familiarise students with the formidable volume of research knowledge that has now been built up. The course will enable students to understand the development and functioning of police organisations as well as providing them with an understanding of some of the key issues and debates affecting contemporary policing. The topics covered will include: the role and purposes of policing; the media and policing; governance and legitimacy; integrity and corruption; and policing and (in)equality.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT. 1 hour and 30 minutes of lectures in the ST.

Formative coursework: Students will be required to write and submit two pieces of formative coursework. The first will be an essay outline - in effect an outline of an answer to a potential examination question, including a full introductory paragraph. The second will be a written assessment of a published book review - as the basis for the summative work to come.

Indicative reading: Bittner, E. (1990) *Florence Nightingale in pursuit of Willie Sutton*, in *Aspects of Police Work*, Boston: Northeastern University Press. Bowling, B., Phillips, C. and Parmar, A. (2017) *When Police Kill*, New York: OUP

Assessment: Essay (80%, 3000 words) in the LT.

Project (20%, 1000 words) in the MT.

The summative assessment will comprise a 3,000 essay involving a critical assessment of a minimum of two substantive issues covered in the course (80%), and a 1,000 word book review (20%).

SP472 Half Unit**Illegal Drugs and Their Control: Theory, Policy and Practice**

This information is for the 2019/20 session.

Teacher responsible: Dr Michael Shiner OLD.2.34

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Regulation.

This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with criminology or sociology is preferable but not essential

Course content: This multi-disciplinary course draws on sociology, psychology, criminology and law to examine the place and meaning of illegal drug use in late modern societies and associated policy responses. It begins by considering drug use and subcultural formations; the 'normalisation' of drug use; drug tourism; the role of addiction; and the organisation of drug markets. It then goes on to consider the making of drugs policy; drugs, policing and the law; treatment and harm reduction; drugs as a development and human rights issue; decriminalisation and alternatives to prohibition.

Teaching: 15 hours of lectures, 15 hours of lectures and 1 hour and 30 minutes of workshops in the LT.

An essay writing skills workshop is run during reading week.

Formative coursework: Students will be expected to submit a formative essay (2,000 words) upon which they will receive feedback.

Indicative reading: Aldridge, J., Measham, F., and Williams, L. (2011) *Illegal Leisure Revisited: Changing Patterns of Alcohol and Drug Use in Adolescents and Young Adults*, London: Routledge. Bean, P. (2008) *Drugs and Crime*, Cullompton: Willan. R. Hughes, R. Lart., and P. Higate (2006) *Drugs: Policy and Politics*, Maidenhead: Open University press. Klein, A. (2008) *Drugs and the World*, London: Reaktion. MacCoun, R.J., and Reuter, P. (2001) *Drug War Heresies: Learning from Other Vices, Times and Places*, Cambridge: Cambridge University Press. Shiner, M. (2009) 'Drug Use and Social Change: The Distortion of History', Basingstoke: Palgrave Macmillan. M. Simpson, T. Shildrick and R. MacDonald (2007) *Drugs in Britain: Supply, Consumption and Control*, Basingstoke: Palgrave MacMillan. Stevens, A. (2011) *Drugs Crime and Public Health: The Political Economy of Drug Policy*, London: Routledge.

Assessment: Essay (100%, 3000 words) in the LT.

SP473 Half Unit Policing, Security and Globalisation

This information is for the 2019/20 session.

Teacher responsible: Prof Tim Newburn OLD 2.40a

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

While not specifically counting towards a specialism on the LLM, this course would complement the following specialisms: Criminology and Criminal Justice, Legal Theory and Public Law.

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition

Course content: The sub-discipline of police studies is now well-established and is flourishing. Whilst much traditional policing scholarship has focused on policing within particular societies, increasingly attention is being drawn to both international and comparative matters. Indeed, the social and economic changes associated with globalisation have affected policing as all else. This course will focus on transnational public and private policing, and on the issues and challenges raised by globalisation: from the policing of transitional societies and emergent democracies, the problems of drugs control and the policing of migration, to new social movements and the policing of public order.

Teaching: 10 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be asked to submit one piece of formative coursework: an essay outline - in effect an outline answer to the longer summative essay, including a full introductory paragraph.

Indicative reading: Bowling, B. and Sheptycki (2012) *Global Policing* London: Sage. Brodeur, J-P (2010) *The Policing Web*, New York: OUP. Newburn, T. (ed) (2008) *Handbook of Policing*, Second Edition, Cullompton: Willan (in process of updating). Newburn, T. (ed) (2004) *Policing: Key Readings*, Cullompton: Willan. Newburn, T. (ed) (forthcoming) *Policing: Critical Concepts in Criminology*, London: Routledge (4 vols). Reiner, R. (2010) *The Politics of the Police*, Fourth Edition, Oxford: Oxford University Press (new edition in 2017/18). Andreas, P. and Nadelmann, E. (2006) *Policing the Globe: Criminalization and crime control in international relations*, New York: OUP. Johnston, L. (2006) *Transnational security governance*, in Wood, J. and Dupont, B. (eds) *Democracy, Society and the Governance of Security*, Cambridge: CUP. Nadelmann, E. (1993) *Cops across borders: the internationalisation of US law enforcement*. Pennsylvania State University Press. Reiner, R. (1992/2004) *Policing a postmodern society*, in Newburn, T. (ed) *Policing: Key Readings*, Cullompton: Willan. O'Malley, P. (1997/2004) *Policing, politics and postmodernity*, in Newburn, T. (ed) *Policing: Key Readings*, Cullompton: Willa. Sheptycki, J. (1995) 'Transnational policing and the makings of a postmodern state'. *British Journal of Criminology*, 35:613-35. Sheptycki, J. (1998). 'Policing, postmodernism and transnationalisation'. *British Journal of Criminology*. 38: 485-503. Sheptycki, J (ed.) (2000) *Issues in Transnational Policing*. London: Routledge

Assessment: Essay (80%, 3000 words) in the ST. Coursework (20%, 1000 words) in the LT.

The summative assessment will comprise a 3,000 word essay involving a critical assessment of two substantive issues covered in the course (80%), and a 1,000 word critique of a selected piece of policing research

SP475 Half Unit Riots, Disorder and Urban Violence

This information is for the 2019/20 session.

Teacher responsible: Tim Newburn (OLD 240a)

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition.

Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as 'riots'. The course will consider the various approaches that have been taken to this subject - via history, psychology and sociology - and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively.

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be required to write and submit two pieces of formative coursework for assessment and peer feedback. The first will be an essay outline - in effect an outline of an answer to a potential examination question, including a full introductory paragraph. The second will be an outline of their intended case study. Both pieces of formative coursework will be shared via Moodle and all students will be encouraged to offer constructive feedback to each other as well, of course, as receiving feedback from the course director. Peer feedback will be utilised as a means of encouraging a degree of group work and collective endeavour among course participants.

Indicative reading: Baldassare, M. (1995) *The Los Angeles Riots: Lessons for the Urban Future*, Boulder: CO. Bergenson, A. and Herman, M. (1998) *Immigration, race and riot: The 1992 Los Angeles uprising*, *American Sociological Review*, 63, 1, 39-54. Body-Gendrot, S. and Savitch, H.V. (2012) *Urban violence in the United States and France: comparing Los Angeles (1992) and Paris (2005)*, in John, P., Mossberger, K. and Clarke, S.E. (eds) *The Oxford Handbook of Urban Politics*, Oxford: Oxford University Press. Katz, M.B. (2008) *Why don't American cities burn very often?* *Journal of Urban History*, 34, 2, 185-208. Political Violence and the State, Cambridge: Cambridge University Press. Gilje, P.A. 1996) Rioting in America, Bloomington: Indiana University Press. Mason, P. (2013) Why It's Still Kicking Off Everywhere, London: Verso. Newburn, T., Cooper, K., Deacon, R. and Diski, R. (2015) 'Shopping for Free'? Looting, consumerism and the 2011 riots, *British Journal of Criminology*, 55 (5): 987-1004. Reicher, S. (1996) 'The Battle of Westminster': developing the social identity model of crowd behaviour in order to explain the initiation and development of collective conflict, *European Journal of Social Psychology*, 26, 115-134. Scarman, Lord Justice (1982) *The Brixton Disorders*, Harmondsworth: Penguin. Waddington, D., Jones, K. and Critcher, C. (1989) *Flashpoints: Studies in Public Disorder*, London: Routledge. Waddington, D. and King, M. (2005) *The disorderly crowd: From classical psychological reductionism to socio-contextual theory – The impact on public order policing strategies*, *Howard Journal*, 44, 5, 490-503

Assessment: Coursework (80%) and presentation (20%).

The coursework (80%) will comprise a single summative essay offering an analytical case study of a modern riot and the presentation (20%) will comprise a poster presentation at an end of term mini academic conference.

SP476 Half Unit Punishment and Penal Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Leonidas Cheliotis OLD 2.51

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course runs as a half-unit option, and explores punishment and penal policy from a range of comparative perspectives. Focusing on Anglophone jurisdictions and the rest of the world in equal measure, the course considers in depth a wide variety of historical and international comparative studies of punishment and penal policy, both from the field of criminology and beyond. In so doing, the course critically examines theoretical frameworks and empirical research on such issues as:

- the forms state punishment has assumed over time and in different national and regional contexts;
- the array and relative significance of the reasons why punishment and penal policy may develop, qualitatively as well as quantitatively, in particular ways at given historical junctures and in different jurisdictions;
- the relationship between political systems and punishment, with particular reference to processes of democratisation;
- the links between penal policy and different forms of economic organisation, from preindustrial capitalism to welfare capitalism and neoliberalism; and
- the role of punishment in society as explained through psychosocial theories and research

Thanks to its substantive foci and broad comparative approach, the course enhances provision in the School in the field of penology (e.g., the course 'Explaining Punishment: Philosophy, Political Economy, Sociology' (LL4CL), taught by Professors Lacey and Ramsay in the Law Department).

Indicative course content

1. The Contours of State Punishment
2. Continuity and Change in Punishment and Penal Policy: Historical Comparative Perspectives
3. Convergences and Contrasts in Punishment and Penal Policy:

International Comparative Perspectives

4. Political Systems and Punishment, Part I: Democracy
5. Political Systems and Punishment, Part II: Democratisation
6. Reading Week
7. The Political Economy of Punishment: Marxist and Neo-Marxist Perspectives from the Global North and the Global South
8. Punishment, Politics and the Economy: Institutional Perspectives from around the World
9. The Cultural Uses of Punishment
10. The Emotional Lives of Punishment
11. Cultural Representations of Punishment

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students will be required to submit a 1,500-word essay on one of the topics addressed in the course. Formative coursework will be designed to feed into later summative assessments, giving students an opportunity to develop critical thinking and presentational skills.

Indicative reading: Alexander, M. (2010) *The New Jim Crow: Mass Incarceration in the Age of Colorblindness*. New York and London: The New Press. Brown, M. (2009) *The Culture of Punishment: Prison, Society, and Spectacle*. New York and London: New York University Press. Dumm, T. L. (1987) *Democracy and Punishment: Disciplinary Origins of the United States*. Madison, WI: The University of Wisconsin Press. Garland, D. (1985) *Punishment and Welfare: A History of Penal Strategies*. Aldershot, UK: Gower. Gottschalk, M. (2014) *Caught: The Prison State and the Lockdown of American Politics*. Princeton, NJ: Princeton University Press. Karstedt, S. (ed.) (2009) *Legal Institutions and Collective Memories*. Oxford: Hart. Lacey, N. (2008) *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*. Cambridge: Cambridge University Press. McBride, K. (2007) *Punishment and Political Order*. Ann Arbor, MI: The University of Michigan Press. Reiner, R. (2007) *Law and Order: An Honest Citizen's Guide to Crime and Control*. Cambridge: Polity. Salvatore, R. D., Aguirre, C. and G. M. Joseph (eds) (2001) *Crime and Punishment in Latin America: Law and Society since Colonial Times*. Durham, NC: Duke University Press.

Assessment: Essay (70%, 3000 words) and presentation (30%). A 3000 essay on one of the substantive topics covered and a presentation to demonstrate critical appreciation of a specific theoretical argument or empirical study.

SP498 Criminal Justice Policy - Long Essay

This information is for the 2019/20 session.

Teacher responsible: Prof Tim Newburn OLD 2.40a

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.

Course content: The objective is to write an original dissertation on an approved topic in the field. The selection of the topic is a matter primarily for the student, though the approval of the supervisor is needed for topic registration.

Teaching: The designated supervisor should discuss the selection of the topic and its title with the student, advise about preliminary reading, methods and broad analytical approach, and comment on the draft version. At their discretion, supervisors may give additional advice and comments.

Assessment: Dissertation (100%, 10000 words).

Dissertations should be no more than 10,000 words in length, excluding notes and appendices and should be typed. Formal titles should be registered with the Course Director in early December.

SP499**Dissertation - International Social & Public Policy**

This information is for the 2019/20 session.

Teacher responsible: Dr Isabel Shutes OLD 2.58 and Dr Sonia Exley OLD 2.46

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option.

Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to their international social & public policy programme.

Students on the Development, Migration, or Non-Governmental Organisation ISPP streams are expected to complete dissertations on topics related to their stream, or they may not qualify for the stream Degree for which they are registered. Dissertations of students on the ISPP (Research) stream are required to be based on empirical quantitative or qualitative research, except by permission of the programme director.

Teaching: 4 hours of lectures in the LT.

Academic advisors will provide regular supervision and feedback throughout the three terms (MT, LT, and ST).

Formative coursework: The area of study is defined by the student, in consultation with their academic Mentor.

An Academic Mentor is appointed to supervise each candidate. Students will discuss an outline proposal with their Mentor and submit their outline to the Programme Support Office early in the Lent Term. The Mentor will provide regular supervision and feedback.

Assessment: Dissertation (100%, 10000 words) in August. Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography.

Two hard copies of the Dissertation must be submitted to the Social Policy Administrative hub by the Departmental Dissertation deadline. The Dissertation must also be submitted electronically via Moodle by this deadline

SP501**Research Student Seminar**

This information is for the 2019/20 session.

Teacher responsible: Dr Berkay Ozcan OLD 2.32 and Dr Timothy Hildebrandt OLD 2.56

Availability: This course is compulsory on the MPhil/PhD in Demography/Population Studies and MPhil/PhD in Social Policy. This course is available on the MPhil/PhD in Demography/Population Studies and MPhil/PhD in Social Policy. This course is not available as an outside option.

For all MPhil/PhD students in the Department of Social Policy.

Course content: The course for first year students provides structured sessions for MPhil students (e.g. the MPhil/PhD process, ethics, risk). It also provides the forum in which first year full-time and second year part-time MPhil students must present their work to fellow students and staff in advance of submitting their major review (upgrade) document.

The course for second and third year students provides the forum where third year full-time (or equivalent) PhD students must present their work to fellow students and staff in advance of submitting their third year review document.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

First year: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Second and third year: Workshops arranged through the year, plus

for third years, pre-third year review presentation.

ST405 Half Unit**Multivariate Methods**

This information is for the 2019/20 session.

Teacher responsible: Dr Yunxiao Chen

Availability: This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Probability, Distribution Theory and Inference (ST202).

Course content: An introduction to the theory and application of modern multivariate methods used in the Social Sciences: Multivariate normal distribution, principal components analysis, factor analysis, latent variable models, latent class analysis and structural equations models.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer workshops.

Indicative reading: D J Bartholomew, F Steele, I Moustaki & J Galbraith, Analysis of Multivariate Social Science Data (2nd edition); D J Bartholomew, M Knott & I Moustaki, Latent Variable Models and Factor Analysis: a unified approach; C Chatfield & A J Collins, Introduction to Multivariate Analysis; B S Everitt & G Dunn, Applied Multivariate Data Analysis; K.V. Mardia, J.T. Kent and J.M. Bibby, Multivariate Analysis.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST409 Half Unit**Stochastic Processes**

This information is for the 2019/20 session.

Teacher responsible: Dr Beatrice Acciaio COL 6.02

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Operations Research & Analytics, MSc in Risk and Finance, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212).

Good undergraduate knowledge of distribution theory

Course content: A broad introduction to stochastic processes for postgraduates with an emphasis on financial and actuarial applications. The course examines Martingales, Poisson Processes, Brownian motion, stochastic differential equations and diffusion processes. Applications in Finance. Actuarial applications.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Indicative reading: T Bjork, Arbitrage Theory in Continuous Time; T Mikosch, Elementary Stochastic Calculus; S I Resnick, Adventures in Stochastic Processes; B K Oksendal, Stochastic Differential

Equations: An Introduction with Applications, D Williams, Probability with Martingales.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST411 Half Unit Generalised Linear Modelling and Survival Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Jouni Kuha COL.8.04

Availability: This course is compulsory on the MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Mathematics to the level of Mathematical Methods (MA100) and probability to the level of Probability, Distribution Theory and Inference (ST202). Some knowledge of linear regression.

Course content: An introduction to the theory and application of generalised linear models for the analysis of continuous, categorical, count and survival data. Topics include: linear regression, analysis of variance (ANOVA), logistic regression for binary data, models for ordered and unordered (nominal) responses, log-linear models for count data and contingency tables, and models for survival (duration) data. The R software package will be used in computer workshops.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned weekly based on the computer sessions and returned to students with comments/feedback.

Indicative reading: Dobson, A.J. & Barnett, A.G. (2002) An Introduction to Generalised Linear Modelling. 2nd edition. Chapman & Hall. McCullagh, P. & Nelder, J.A. (1989) Generalized Linear Models. 2nd edition. Chapman & Hall. Agresti, A. (2015) Foundations of Linear and Generalized Linear Models. Wiley [Available as electronic resource from LSE library]. Hosmer, D.W. & Lemeshow, S. (1999) Applied Survival Analysis, Regression Modeling of Time-to-Event Data. Wiley. Long, J.S. and Freese, J. (2006) Regression Models for Categorical Dependent Variables Using Stata. 2nd edition. Stata Press.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST416 Half Unit Multilevel Modelling

This information is for the 2019/20 session.

Teacher responsible: Professor Irini Moustaki

Availability: This course is available on the MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling

with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g. student nested within classes, individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g. Stata).

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer lab sessions.

Indicative reading: T Snijders & R Bosker Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition); S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012); H Goldstein, Multilevel Statistical Models, Arnold (2003, 3rd edition); S W Raudenbush & A S Bryk, Hierarchical Linear Models: Applications and Data Analysis Methods, Sage (2002).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST418 Half Unit Non-Linear Dynamics and the Analysis of Real Time Series

This information is for the 2019/20 session.

Teacher responsible: Prof Leonard Smith PEL.4.01C

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: It is recommended that students have completed Time Series (ST422).

Course content: An introduction to the analysis of actual time series observations of real-world processes. The course casts both modern nonlinear methods and more traditional linear methods in a geometric approach. It introduces the properties of nonlinear mathematical models, covers chaos and the dynamics of uncertainty, and demonstrates the fundamental limitations in applied analysis which arise from model inadequacy. Fundamental aspects of predictability are addressed. Decision support under uncertainty is considered, with examples of economic impacts of forecasting, including weather and climate. The student will leave with a toolkit for the analysis and modelling of real data, with insights into how to evaluate which methods to employ (linear/non-linear, deterministic/stochastic) in a given problem, how to interpret the results in context, and how to avoid over interpreting nice theorems in practical circumstances. Concrete applications in economics (price time series, electricity demand, energy futures) and environment (weather, climate) as well as analytically tractable illustration from mathematics are considered.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT. 1 hour of lectures in the ST.

Week 6 will be used as a reading week.

Indicative reading: K Beven, Environmental Modelling: An uncertain Future? Routledge (2009); H Kantz & T Schreiber, Non-linear Time Series Analysis; E Ott, T Sauer & J A Yorke (Eds), Coping with Chaos: Analysis of Chaotic Data and The Exploitation of Chaotic Systems; E Ott, Chaos in Dynamical Systems; R Tsay, Analysis of Financial Time Series; L.A. Smith, Chaos: A Very Short Introduction. Oxford University Press (2007)

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.
Project (30%) in the ST.

ST422 Half Unit Time Series

This information is for the 2019/20 session.

Teacher responsible: Dr Wai-Fung Lam

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Marketing, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Good undergraduate knowledge of statistics and probability.

Course content: A broad introduction to statistical time series analysis for postgraduates: what time series analysis can be useful for; autocorrelation; stationarity; causality; basic time series models: AR, MA, ARMA; ARCH and GARCH models for financial time series; trend removal and seasonal adjustment; invertibility; spectral analysis; estimation; forecasting. We will also discuss nonstationarity and multivariate time series if time permits.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Exercises will be given out to do at home during Week 6.

Formative coursework: Weekly exercises will be given.

Indicative reading: Brockwell & Davis, Time Series: Theory and Methods; Brockwell & Davis, Introduction to Time Series and Forecasting; Box & Jenkins, Time Series Analysis, Forecasting and Control; Shumway & Stoffer, Time Series Analysis and Its Applications.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST425 Statistical Inference: Principles, Methods and Computation

This information is for the 2019/20 session.

Teacher responsible: Dr Nicholas Cron COL.5.13

Availability: This course is compulsory on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MRes/PhD in Management (Marketing) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistics to the equivalent level of ST102 Elementary Statistical Theory.

Course content: The course will provide a comprehensive coverage on some fundamental aspects of probability and statistics methods and principles. It also covers linear regression analysis. Data illustration using statistical package R constitutes an integral part throughout the course, therefore provides the hands-on experience in simulation and data analysis.

Teaching: 38 hours of lectures, 15 hours of seminars and 10 hours of computer workshops in the MT.

Week 11 will be used as a revision week.

Formative coursework: Students will complete weekly assessed

problem sheets. They will also complete R practice following instructions from the weekly computing workshop.

Indicative reading: L. Wasserman, All of Statistics. Y. Pawitan, In All Likelihood. K. Knight, Mathematical Statistics. A. Zuur et al., A Beginner's Guide to R. (Available online from LSE Library). N. Venables et. al., An Introduction to R (<http://cran.r-project.org/doc/manuals/R-intro.pdf>)

Assessment: Exam (85%, duration: 3 hours) in the January exam period.

Project (15%) in the MT.

ST426 Half Unit Applied Stochastic Processes

This information is for the 2019/20 session.

Teacher responsible: Dr Erik Baurdoux COL 6.04

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course builds on material discussed in ST409 (Stochastic Processes). In particular, elements of the general theory of semi-martingales will be covered and emphasis will be given on presenting a variety of models involving processes with general dynamics, including jumps. The theory will be applied to a range of topics in mathematical finance and insurance, as well as financial economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. 2 hours of lectures in the ST.

Week 6 will be used as a reading week; exercises will be given out to students to do at home.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned. Additional formative exercise will be available through Moodle.

Indicative reading: Brownian Motion and Stochastic Calculus. Ioannis Karatzas and Steve Shreve. Numerical Solution of Stochastic Differential Equations with Jumps in Finance. Eckhard Platten, Nicola Bruti-Liberati. Essentials of Stochastic Finance: Facts, Models, Theory. Albert Shiryaev. Stochastic Integration and Differential Equations. Phillip Protter. Levy Processes in Finance: Pricing Financial Derivatives. Wim Schoutens. Fluctuations of Lévy Processes with Applications. Andreas Kyprianou. Selected papers from scientific journals.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST429 Half Unit Statistical Methods for Risk Management

This information is for the 2019/20 session.

Teacher responsible: Daniela Escobar

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MiM), Global MSc in Management (MBA Exchange), MSc in Data Science, MSc in Financial Mathematics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302). ST202, ST302, or equivalent

Course content: A self-contained introduction to probabilistic and

statistical methods in risk management. This course starts with risk factors models and loss distributions, which are illustrated via examples in stocks, derivatives, and bonds portfolios. Axioms of coherent risk measures are introduced. Value at risk and other risk measures are introduced and their relation with coherent risk measures is discussed. Multivariate factor models are introduced and analysed: covariance and correlation estimations, multivariate normal distributions and their testing, normal mixture distributions and their fitting to data. The theory of copulas is introduced: meta distributions, tail dependence, fitting copulas to data. Some limitations of copulas are also discussed. The extreme value theory is introduced: generalized extreme value distribution, threshold exceedances and generalized Pareto distribution, modelling and measures of tail risk. Applications to insurance with large loss are also discussed. Students will be exposed to financial data via sets of computer-based classes and exercises.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Week 6 will be used as a reading week.

Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned. A set of coding exercises which are similar to examples in computer lab sessions will be assigned.

Indicative reading: A.McNeil, R.Frey, P.Embretchts, Quantitative Risk Management: Concepts, Techniques, Tools; Princeton Series in Finance

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Project (25%, 2000 words).

ST433 Half Unit Computational Methods in Finance and Insurance

This information is for the 2019/20 session.

Teacher responsible: Prof Umut Cetin COL6.08

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: The purpose of this course is to (a) develop the students' computational skills, (b) introduce a range of numerical techniques of importance in actuarial and financial engineering, and (c) develop the ability of the students to apply the theory from the taught courses to practical problems, work out solutions including numerical work, and to present the results in a written report.

Binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Finite difference schemes for the solution of ordinary and partial differential equations arising in insurance and finance. Numerical solutions to stochastic differential equations and their implementation. The course ends with an introduction to guidelines for writing a scholarly report/thesis.

Teaching: 20 hours of lectures and 10 hours of workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Weekly exercises and practicals are set and form the basis of the classes.

Indicative reading: N E Steenrod, P Halmos, M M Schiffer & J A Dieudonne, How to write mathematics (1973); D.J. Duffy, Finite Difference Methods in Financial Engineering: A Partial Differential Equation Approach, Wiley; P. Glasserman, MonteCarlo Methods in Financial Engineering, Springer; P.E. Kloden and E. Platen,

Numerical Solution of Stochastic Differential Equations, Springer. Further material will be specified during the course.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

ST436 Half Unit Financial Statistics

This information is for the 2019/20 session.

Teacher responsible: Prof Piotr Fryzlewicz COL 5.12

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Data Science and MSc in Quantitative Methods for Risk Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Statistical Inference: Principles, Methods and Computation (ST425) and Time Series (ST422).

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. The course includes a selection of the following topics: obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, predicting equity indices (case study), Markowitz portfolio theory and the Capital Asset Pricing Model, machine learning in financial forecasting, Value at Risk, simple trading strategies. The course ends with an extended case study involving making predictions of market movements in a virtual trading environment.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 11 will be spent working on the extended case study.

Formative coursework: Weekly marked problem sheets, with solutions discussed in class. Two marked case studies.

Indicative reading: Lai, T.L. And Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Yao (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST439 Half Unit Stochastics for Derivatives Modelling

This information is for the 2019/20 session.

Teacher responsible: Dr Luciano Campi COL 5.04

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Valuation and hedging of derivative securities: general principles of mathematical finance; asset price models; static vs dynamic option pricing; connection with PDEs; exotic options; volatility derivatives; mean-variance hedging; Dupire's formula.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 will be used as a revision week.

Formative coursework: Weekly homework will be set. Students are not expected to submit this homework but will go over the

exercises in the following seminar with the lecturer.

Indicative reading: Steven Shreve, *Stochastic Calculus for Finance II: Continuous-Time Models*, Springer. Selected papers from scientific journals. Thorsten Rheinlander and Jenny Sexton, *Hedging Derivatives*, World Scientific.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST440 Half Unit Recent Developments in Finance and Insurance

This information is for the 2019/20 session.

Teacher responsible: Dr Beatrice Acciaio COL 6.02 and Dr George Tzougas COL 5.11

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed *Stochastic Processes* (ST409).

Course content: Recent developments in the theory of stochastic processes and applications in finance and insurance and their interface. A variety of topics will be chosen, from robust evaluation; optimal hedging; evaluation via utility criteria; optimal risk sharing; minimal capital requirement according to the Basel Accords and the Solvency Directives; life and non-life insurance. The programming language R will be utilized for estimating advanced regression models for the number and the cost of claims in real insurance data, for a priori and a posteriori ratemaking, and for pricing reinsurance contracts.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT. Week 8 will be devoted to students' presentations, using material which will have been provided in week 1 or 2; as well as to discuss in groups solutions to problems that will have been set in class. Week 6 will be used as a reading week.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned as well as a mock exam.

Indicative reading: H. Foellmer and A. Schied: *Stochastic finance. An introduction in discrete time*. (3rd ed.), de Gruyter. Selected papers from scientific journals.

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Presentation (10%) in the MT Week 9.

ST442 Half Unit Longitudinal Data Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models and

dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using the Stata software.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be used as a reading week.

Formative coursework: Coursework assigned fortnightly and returned to students with comments/feedback during the computer sessions.

Indicative reading: Singer JD, Willett JB. (2003) *Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence*. New York: Oxford University Press. (Part I only). Rabe-Hesketh S, Skrondal A. (2012) *Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses*. College Station, Texas: Stata Press. Hedeker D, Gibbons RD. (2006) *Longitudinal Data Analysis*. Hoboken, New Jersey: John Wiley & Sons, Inc.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

ST443 Half Unit Machine Learning and Data Mining

This information is for the 2019/20 session.

Teacher responsible: Dr Xinghao Qiao

Availability: This course is compulsory on the MSc in Data Science. This course is available on the MSc in Applied Social Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course will be taught from a statistical perspective and students must have a very solid understanding of linear regression models

Students are not permitted to take this course alongside *Algorithmic Techniques for Data Mining* (MA429)

Course content: Machine learning and data mining are emerging fields between statistics and computer science which focus on the statistical objectives of prediction, classification and clustering and are particularly orientated to contexts where datasets are large, the so-called world of 'big data'. This course will start from the classical statistical methodology of linear regression and then build on this framework to provide an introduction to machine learning and data mining methods from a statistical perspective. Thus, machine learning will be conceived of as 'statistical learning', following the titles of the books in the essential reading list. The course will aim to cover modern non-linear methods such as spline methods, generalised additive models, decision trees, random forests, bagging, boosting and support vector machines, as well as more advanced linear approaches, such as ridge regression, the lasso, linear discriminant analysis, k-means clustering, nearest neighbours.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.

The first part of the course reviews regression methods and covers linear and quadratic discriminant analysis, cross-validation, variable selection, nearest neighbours, shrinkage, dimension reduction methods. The second part of the course introduces non-linear models and covers, splines, generalized additive models, tree methods, bagging, random forest, support vector machines, principal components analysis, k-means, hierarchical clustering. Week 6 will be used as a reading week.

Formative coursework: Students will be expected to produce 5 problem sets and 1 project in the MT.

The problem sets will consist of some theory questions and data problems that require the implementation of different methods in

class using a computer package.

Indicative reading: James, G., Witten, D., Hastie, T. and Tibshirani, R. An Introduction to Statistical Learning. Springer, 2014.

Available online at <http://www-bcf.usc.edu/~garth/ISL/>. Hastie, T., Tibshirani, R. and Friedman, J. The Elements of Statistical Learning: Data Mining, Inference and Prediction. 2nd Edition, Springer, 2009. Available online at <http://statweb.stanford.edu/~tibs/ElemStatLearn/index.html>

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Project (30%) in the MT Week 11.

ST444 Half Unit Statistical Computing

This information is for the 2019/20 session.

Teacher responsible: Dr Yining Chen

Availability: This course is available on the MSc in Data Science, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: An introduction to the use of numerical linear algebra, optimisation, numerical integration and simulation in statistical computation, with their applications in statistical methods, including least squares, maximum likelihood, principle component analysis, LASSO, etc. If time permits, more advanced topics such as kernel methods and graphical LASSO will also be covered. Throughout the course, students will gain practical experience of implementing these computational methods in a programming language. Learning support will be provided for at least one programming language, such as R, Python or C++, but the choice of language supported may vary between years, depending on judged benefits to students, whether in terms of pedagogy or resulting skills. This year, the default choice is Python.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.

Lectures will cover:

- (1) **Introduction to Tools in Numerical Analysis:** linear algebra (Gaussian elimination, Cholesky decomposition, matrix inversion and condition); numerical optimization (bi-section, steepest descent, Newton's method, Quasi-Newton methods, stochastic search); convex optimization (coordinate descent, ADMM); numerical integration.
- (2) **Introduction to Tools in Numerical Simulation:** random number generation (inverse CDF, rejection, Box-Muller, etc); Introduction to Monte-Carlo methods.
- (3) **Applications in Statistics:** linear regression and least squares; generalised linear models; principle component analysis (PCA); Page rank; LASSO.
- (4) **Other advanced topics** if time allows: bootstrapping; kernel density estimation; Graphical models and Graphical LASSO.

Formative coursework: Students will be expected to produce 4 problem sets in the MT.

Bi-weekly exercises, involving computer programming and some theory.

Indicative reading: Computational Statistics by Givens and Hoeting. Statistical computing in C++ and R by Eubank and Kupresanin. The Art of R Programming: A Tour of Statistical Software Design by Matloff. Think Python: How to Think Like a Computer Scientist by Downey

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.

Coursework (30%) in the MT.

ST449 Half Unit Artificial Intelligence and Deep Learning

This information is for the 2019/20 session.

Teacher responsible: Prof Milan Vojnovic COL 5.05

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will introduce the basic principles and algorithms used in artificial intelligence systems, with a focus on statistical and machine learning foundations, including the design and training of deep neural networks and reinforcement learning algorithms. These algorithms will be applied to classification tasks such as image recognition, speech recognition, natural language processing, as well as to agents learning to play various games. Use of Python and open source software libraries for machine intelligence such as Tensorflow and OpenAI Gym constitutes an integral part of the course, allowing students to gain hands-on experience in data analysis and use of modern computational tools.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the LT.

Week 6 will be a reading week.

The course will start with an introduction to basic concepts of artificial intelligence systems that include supervised, unsupervised, and reinforcement learning. It will then cover basic concepts of deep neural network models covering the topics of feed forward networks, perceptron, learning XOR function, architecture of deep neural networks and the concept of hidden units. The course will also cover the topic of optimisation for deep learning including concepts such as stochastic gradient descent methods, backpropagation, parameter norm penalties, dataset augmentation, early stopping and dropout. Special architectures of deep neural networks will be studied in more depth including convolutional neural networks, explaining the intuition underlying their design, the concept of pooling and efficient convolution algorithms. Other architectures will be studied as well including those used for sequence modelling, such as recurrent neural networks, the long-short term memory and other gated recurrent neural networks. The course will cover the main principles of reinforcement learning algorithms, explaining the main concepts such as rewards and punishments, exploration versus exploitation, Markov decision processes frameworks, and various solutions methods.

Examples and use cases will be drawn from various application domains including classical applications in the domains of computer vision, speech recognition, natural language processing and strategic game playing. Students will have an option to study application of deep learning using a dataset in the application domain of their interest including those in the area of social and economic systems.

The course will be based on using modern software frameworks for learning deep neural networks including open source Tensorflow and OpenAI Gym software libraries. Students will develop their code using Jupyter / Google Colab notebooks. The course will use GitHub platform for maintaining a repository of lecture material, homework and project assignments and anything related to the running of the course. The course handout is available here <https://lse-st449.github.io/>.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

Indicative reading:

- I. Goodfellow, Y. Bengio and A. Courville, Deep Learning, MIT Press, 2017, <http://www.deeplearningbook.org>160
- R. Sutton and A. C. Barto, Reinforcement Learning: An Introduction, Second Edition, 160MIT Press, 2018

- TensorFlow, An Open Source Software Library for Machine Intelligence, <http://www.tensorflow.org>
- OpenAI Gym, <https://gym.openai.com/>

Assessment: Project (80%) in the LT.

Continuous assessment (10%) in the LT Week 4.

Continuous assessment (10%) in the LT Week 7.

Two problems sets submitted by students will be assessed (20% in total). In addition, there will be a graded take-home research project (80%) which will be completed on an individual basis in which they will demonstrate the ability to apply and train an appropriate model to a specific problem and dataset using principles they have learnt in the course. This may be done by publishing the code to a GitHub repository and GitHub pages website.

ST499

Dissertation

This information is for the 2019/20 session.

Teacher responsible: Dr Jouni Kuha COL. 8.04, Dr Wai-Fung Lam COL. 6.09 and Dr Konstantinos Kalogeropoulos COL. 6.10

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research) and MSc in Statistics (Social Statistics) (Research). This course is not available as an outside option.

Course content: Independent project work on a subject chosen by the student.

Assessment: Dissertation (100%) in August. (50 page limit).

ST450

Advanced Lectures on Special Topics in Statistics

This information is for the 2019/20 session.

Course content: Seminar series. Please refer to Departmental web page for details. <http://www.lse.ac.uk/statistics/home.aspx>

Teaching: 20 hours of seminars in the LT.

ST451 Half Unit

Bayesian Machine Learning

This information is for the 2019/20 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge in probability and first course in statistics such as ST202 or equivalent Probability Distribution Theory and Inference; basic knowledge of the principles of computer programming is sufficient (e.g. in any of Python, R, Matlab, C, Java). This is desired rather than essential.

Course content: The course sets up the foundations and covers the basic algorithms covered in probabilistic machine learning. Several techniques that are probabilistic in nature are introduced and standard topics are revisited from a Bayesian viewpoint. The module provides training in state-of-the-art methods that have been applied successfully for several tasks such as natural language processing, image recognition and fraud detection. The first part of the module covers the basic concepts of Bayesian

Inference such as prior and posterior distribution, Bayesian estimation, model choice and forecasting. These concepts are also illustrated in real world applications modelled via linear models of regression and classification and compared with alternative approaches.

The second part of the module introduces and provides training in further topics of probabilistic machine learning such as Graphical models, mixtures and cluster analysis, Variational approximation, advanced Monte Carlo sampling methods, sequential data and Gaussian processes. All topics are illustrated via real-world examples and are contrasted against non-Bayesian approaches.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the LT.

Syllabus:

- Bayesian inference concepts: Prior and posterior distributions, Bayes estimators, credible intervals, Bayes factors, Bayesian forecasting, Posterior Predictive distribution.
- Linear models for regression: Linear basis function models, Bayesian linear regression, Bayesian model comparison.
- Linear models for classification: Probabilistic generative models, Probabilistic discriminative models, The Laplace approximation, Bayesian logistic regression.
- Variational inference, Variational linear and logistic regression.
- Graphical models: Bayesian networks, Conditional independence, Markov random fields.
- Mixture models and Clustering: Clustering, Mixtures, The EM algorithm.
- Sampling methods: Basic sampling algorithms, Markov chain Monte Carlo, Gibbs sampling
- Sequential data: Markov models, Hidden Markov models, Linear dynamical systems.
- Gaussian processes: Bayesian Non-Parametrics, Gaussian processes for regression and classification.

Formative coursework: Students will be expected to produce 10 problem sets in the LT.

10 problem sets in LT to prepare students for both summative assessment components. They will include theoretical exercises, targeting for learning outcomes a and b, as well as computer-based assignments (for learning outcome c) that will need to be presented in suitable form for the purposes of learning outcome d. Additionally, mostly related to learning outcome b, students will be encouraged to share and compare their responses in some challenging parts of the problem sets, through the use of dedicated Moodle forums.

Assessment: Exam (50%, duration: 2 hours) in the summer exam period.

Project (50%) in the ST.

ST452 Half Unit

Probability and Mathematical Statistics I

This information is for the 2019/20 session.

Teacher responsible: Dr Beatrice Acciaio and Dr Luciano Campi

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics. Prior training

on basic concepts of real analysis providing experience with formal proofs, sequences, continuity of functions, and calculus and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.
9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.
10. Product measures; conditional expectation.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

1. Williams, D. (1991). Probability with Martingales. Cambridge University Press.
2. Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
3. Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
4. Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the January exam period.

Coursework (30%) in the MT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST453 Half Unit

Probability and Mathematical Statistics II

This information is for the 2019/20 session.

Teacher responsible: Prof Konstantinos Kardaras

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

1. Conditional expectation revisited; linear regression; martingales and first examples.
2. Concentration inequalities; dimension reduction; log-Sobolev inequalities.
3. Martingale transforms; optional sampling theorem; convergence theorems.
4. Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
5. Markov chains; recurrence; reversibility; foundations of MCMC.
6. Ergodic theory.
7. Brownian motion; quadratic variation; stochastic integration.
8. Stochastic differential equations; diffusions; filtering.
9. Bayesian updating; Ergodic diffusions; Langevin samplers.
10. Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is Reading Week.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

1. Williams, D. (1991). Probability with Martingales. Cambridge University Press.
2. Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
3. Karatzas, I, Shreve S. (1991). Brownian motion and Stochastic Calculus. Springer GTM.
4. Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
5. Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.

Coursework (30%) in the LT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

Executive Taught Master's Course Guides

EC452E Half Unit**Applying Behavioural Economics for Social Impact: Design, Delivery and Policy**

This information is for the 2019/20 session.

Teacher responsible: Prof Nava Ashraf 32L.3.18

Director of Research, Marshall Institute

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation.

The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors. Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. This emphasis on appropriate measurement reinforces students' learning in earlier modules of the programme, where they will be introduced to the principles and concepts of rigorous social impact evaluation. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the effectiveness of social interventions and programmes across a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship. The course tutor is Director of Research at the Marshall Institute.

Teaching: Ten sessions of three hours each, delivered across two modules (teaching blocks).

Formative coursework: Formative assessment will be through short case commentaries written by students on the basis of lecture/seminars. These will be submitted and feedback given during the course.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult *Nudge: Improving Decisions About Health, Wealth, and Happiness* by Richard Thaler and Cass Sunstein (2009, Penguin) and *Thinking, Fast and Slow*, by Daniel Kahneman (2012, Penguin).

Other indicative readings are:

- Ashraf, N., Bandiera, O. and Jack, B.K. 2014. "No margin, no mission? A field experiment on incentives for public service delivery." *Journal of Public Economics* 120 (December): 1-17
- Ashraf, N., Camerer, C. F. and Loewenstein, G. 2005. "Adam Smith, Behavioral Economist." *Journal of Economic Perspectives* 19(3): 131-145.
- Glennerster, R. and Takavarasha, K. 2013. *Running randomized evaluations: a practical guide*. Princeton: Princeton University Press.
- Hirschman, A 1997. *The passions and the interests: political arguments for capitalism before its triumph* (20th anniversary edition). Princeton: Princeton University Press.
- Kamenica, E. 2012. "Behavioral Economics and Psychology of Incentives." *Annual Review of Economics* 4(1): 427-452.

Further readings relevant to specific case studies will be provided during the course.

Assessment: Take home exam (85%) and class participation (15%).

Assessment will be through a take home exam (85%) and class participation (15%).

EU497E Half Unit**Dissertation**

This information is for the 2019/20 session.

Course content: Students in the Executive MSc Political Economy of Europe are required to write a dissertation on a topic within the field of their programme. Preparation for the Dissertation will commence with a week-long seminar (9 x 3hours) on aspects of research, writing, etc., followed by at least two research proposal drafts within two-month intervals, including (virtual) office hours, leading to a final dissertation project outline after 6 months (from December to July). The dissertation deadline is the second Monday in September of the second year.

Teaching: The course will run between 4-8 January 2016.

Assessment: Dissertation (100%).

FM405E Half Unit**Fixed Income Securities and Credit Markets**

This information is for the 2019/20 session.

Teacher responsible: Dr Peter Kondor

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

Teaching: 30 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: *Fixed Income Securities*, (Wiley 2010).

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.

Coursework (20%) in the MT.

FM406E Half Unit Topics in Portfolio Management

This information is for the 2019/20 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed Corporate Finance (FM422E) and FM423E.

Course content:

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second part of the course introduces students to the implementation of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

Teaching: 30 hours of lectures in the MT.

Formative coursework: Regular coursework will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; Modern portfolio theory and investment analysis, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

Assessment: Exam (80%, duration: 2 hours, reading time: 10 minutes) in the summer exam period.
Coursework (20%) in the MT.

FM407E Half Unit Mergers, Buyouts and Corporate Restructurings

This information is for the 2019/20 session.

Teacher responsible: Dr Vicente Cuñat

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Financial Analysis of Firms and Corporate Transactions
- Mergers, Acquisitions and Leveraged Buyouts
- Distress, Bankruptcy and Corporate Restructuring

This course covers advanced topics in Corporate Finance. It focuses on the strategy, valuation and execution of corporate deals. In particular, the first part of the course covers mergers, divestitures, partial-divestitures (e.g. equity carve outs) and leveraged buyouts. The second part of the course provides a framework of analysis for the resolution of financial distress and bankruptcy. Each of the topics introduced in this course covers both institutional details and results of relevant academic research. It is furthermore supported by case studies and practitioner talks.

Teaching: 30 hours of lectures in the MT.

This course is taught in the interactive lecturing format. There is

no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular courseworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the summer exam period.
Project (30%) in the MT.

FM408E Half Unit Financial Engineering

This information is for the 2019/20 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics

Course content: This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products.

The course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R and VBA.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: Based on a set of extensive lecture notes.

No one book covers the material of the entire course. Books recommended include The Volatility Surface: A Practitioner's Guide, 2nd Edition, by Jim Gatheral, and The Volatility Smile by Derman, Miller and Parik. Background reading can be found in Volatility: Practical Options Theory by Adam Iqbal, Derivatives Markets by Robert McDonald or Options, Futures and Other Derivatives by John Hull.

Assessment: Exam (70%, duration: 2 hours) in the summer exam period.
Project (30%) in the LT.

FM409E Half Unit Risk Management in Financial Markets

This information is for the 2019/20 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Corporate Finance (FM422/E) and Asset Markets (FM423/E) or Financial Economics (FM436).

Course content:

- Hedging in equity and fixed income markets

- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

Assessment: Exam (90%, duration: 2 hours) in the summer exam period.

Coursework (10%) in the LT.

FM414E Half Unit

Private Equity, Venture Capital and Entrepreneurial Finance

This information is for the 2019/20 session.

Teacher responsible: Prof Ulf Axelson

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Evaluating and executing Private Equity Deals
 - Business Plans, Venture Capital, and Entrepreneurial Finance
 - Private Equity as an asset class and the private equity landscape
- The course provides a thorough grounding in the theory and recent developments in the field of private equity. Starting by examining how private equity funds are raised and structured, the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. The course explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken.

Teaching: 30 hours of seminars in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Each week there will typically be a formative or summative case study assignment.

Indicative reading: Ulf Axelson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per Strömberg. *Leveraged Buyouts and Private Equity*, Social Science Research Network, June 2008; Cendrowski, Harry. *Private Equity: Governance and Operations Assessment*. Hoboken: John Wiley & Sons. 2008; Lerner, Joshua. *Venture Capital and Private Equity: A Casebook*. New York: John Wiley & Sons. 2000; Acharya V V; Franks J R & Servaes H (2007) "Private Equity: Boom and Bust?" *Journal of Applied Corporate Finance*, 19(4), Fall 2007, 44-53.

Assessment: Coursework (90%) and class participation (10%) in the LT.

Coursework will comprise summative case assignments, in-class assignments, and mini-projects.

FM422E

Corporate Finance

This information is for the 2019/20 session.

Teacher responsible: Professor Amil Dasgupta

Dr Dirk Jenter

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Financing
- Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies should finance their activities by issuing securities (debt, equity, and convertible claims) and the interaction of business policy with financial policy. The aim is to understand what factors determine optimal capital structure and how the interplay of these factors can affect financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisition and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The recommended textbooks for this course are Berk and DeMarzo, *Corporate Finance* and Higgins, *Analysis for Financial Management*. Other recommended readings from relevant journal articles will be included in a study pack.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

Class participation (10%) and in class assessment (20%) in the MT and LT.

FM423E

Asset Markets

This information is for the 2019/20 session.

Teacher responsible: Dr Dong Lou and Dr Igor Makarov

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course.

Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, *Corporate Finance*, 3rd Global Edition, Pearson International, and Bodie, Kane, and Marcus, *Investments*, 10th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the summer exam period.

In class assessment (20%) and class participation (10%) in the MT and LT.

FM475E Half Unit

Financial Management (modular)

This information is for the 2019/20 session.

Teacher responsible: Prof Amil Dasgupta CON2.06

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019 - 2021 cohort.

Course content: This course will provide a comprehensive overview of financial decision making in corporations. Our approach to finance will be rigorous, but both applied and practical, enabling students to address topical issues faced by modern corporations. In particular, the course will develop concepts in business strategy, valuation techniques, and capital structure

theories, applying these tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial analysis and management, the course will focus on corporate finance and business valuation. Topics such as corporate liquidity management, financial distress, and initial public offerings will also be covered.

Teaching: The course is taught during Module 3, over ten interactive sessions of three hours each. The teaching approach will intensively intermingle the following four elements:

(i) New conceptual material. This will be taught via interactive lectures.

(ii) Real life business cases applying and extending such conceptual material. These will be explored via interactive classroom discussion sessions.

(iii) Group classroom exercises to reinforce concepts, and

(iv) Discussion of ongoing or recent real world financial events that illustrate key concepts developed in the course via reference to media articles from the Financial Times, The Economist, etc.

Formative coursework: Feedback on class participation.

Indicative reading: The recommended readings for this course consist of Higgins, Koski, and Mitton, *Analysis for Financial Management*, McGraw-Hill, 12th Edition and several business case studies.

Assessment: Class participation (15%).

Assessed 1,500 word group essay (20%).

Take home individual project (65%).

Teaching: See entry for FM409E

Assessment: Dissertation (90%, 6000 words) in the ST. Coursework (10%) in the LT.

6,000 word dissertation in lieu of examination (90%) on a topic to be agreed with the course teacher, and coursework (10%). The dissertation option is to be chosen in only one half unit module, with its outline approved in LT by the course teacher who will act as the student's supervisor. Submission Deadline at the end of Summer Term.

HP4A1E Half Unit Financing Health Care

This information is for the 2019/20 session.

Teacher responsible: Prof Elias Mossialos COW.4.08

Availability: This course is compulsory on the MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Pre-requisites: None

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: This course will be delivered through 18 hours of lectures and 3 seminars (2 hours each).

Formative coursework: Students will sit a progress test in their own time. This will involve writing an essay under exam conditions. Their seminar leader will mark the essay and provide written feedback.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009)

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle. They will be expected to read these prior to the first day of class.

Assessment: Take home exam (70%) in the ST.

Policy memo (30%) in the LT.

The policy memo will be an individual essay.

HP4A3E Half Unit Resource Allocation and Cost-effectiveness Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Ranjeeta Thomas

In addition, Professor M Drummond (Professor of Health Economics, University of York) will be teaching on the course.

Availability: This course is compulsory on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim is to give an overview of the theory underlying economic evaluation as applied to the health care sector; to consider the different forms of economic evaluation; to give an understanding of the techniques associated with economic evaluation as applied to health care; to give an understanding of the interpretation of the results gained from economic evaluation; to provide the main practical tools necessary to undertake economic evaluation using computer-based programs. The course will cover the following topics: Conceptual rationales for economic evaluation in the health care sector (Pareto efficiency, Social Welfare, extra-welfarism and decision-making); Introduction to the methods of economic evaluation: cost-effectiveness analysis, cost-utility analysis, and Cost-benefit analysis; Cost data; Incremental cost-effectiveness analysis; Quality Adjusted Life Years gained and other outcome measures; Discounting; Uncertainty and sensitivity analysis; Economic evaluation and clinical trials; Policy decision-making using economic evaluation.

Teaching: 10 hours of lectures and 10 hours of seminars, including computer-based practical workshops.

Formative coursework: In class group exercise: critical appraisal of published evidence

Indicative reading: M Drummond et al, *Methods for the Economic Evaluation of Health Care Programmes*, Oxford, OUP, 2015, fourth edition. M Drummond & A McGuire (Eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002. Gray, A. Clarke, P.M, Wolstenholme, P., Wordsworth, S. *Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation)*, Oxford, OUP, 2011. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take home exam (100%) in July.

HP4A4E Half Unit Health Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Alistair McGuire COW4.05

Availability: This course is compulsory on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Distinction between health and health care. Nature of health care as an economic commodity. How markets and insurance markets work, and how they can fail for health care and health insurance. Incentive mechanisms and principal-agent relationships in health care. Yardstick competition and Diagnostic Related Group payment schemes. Labour markets in health care. Economic evaluation as a regulatory tool.

Teaching: 12 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: 1,500 word essay forms the basis of formative review

Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, *The Economics of Health and Health Care* (3rd edn), Prentice Hall, 2001; B McPake, L Kumaranayake & C Normand, *Health Economics - An International Perspective*, Routledge, 2002.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take home exam (100%) in the ST.

HP4B1E Half Unit Pharmaceutical Economics and Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Panagiotis Kanavos COW.G.04

Availability: This course is available on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly.

- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: The course will comprise 10 x 1-hour interactive lectures, 1 x 1-hour revision session and 5 x 2-hour interactive seminars, where students will discuss specific case studies.

Formative coursework: Up to 1500 word formative essay, to mirror an exam question, to be written during seminar time.

Indicative reading: E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004); S O Schweitzer, *Pharmaceutical Economics and Policy*, Oxford University Press (2006); W S Comanor, 'The Political Economy of the Pharmaceutical Industry', *Journal of Economic Literature*, XXIV (September): 1178-1217 (1986); F M Scherer 'The Pharmaceutical Industry', Chapter 25, in: A J Culyer & J P Newhouse (Eds), *Handbook of Health Economics*, Vol 1, Amsterdam, Oxford, Elsevier, 2000.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take home exam (100%) in the LT.

Change of assessment time from ST to LT, teaching for this course takes place in December, the assessment will be scheduled to be completed prior to Easter break to allow executive students to have time to prepare for the next teaching block in ST and not carry over earlier assessment as well.

HP4B2E Half Unit Health Care Quality Management

This information is for the 2019/20 session.

Teacher responsible: Dr Irene Papanicolas COW.G.04

This course will be led by Dr. Michael Holland, Medical Director and Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.

Availability: This course is available on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: An introduction and overview of quality improvement methodology as used in healthcare settings internationally. The course will cover the following areas:

- 1) History of quality management: The course will start with an overview of key theories in quality management such as those described Taylor, Shewhart, Deming and Juran. An overview of quality assurance systems used in healthcare, such as ISO 9000, Magnet, Baldrige award and their role in quality improvement. It will also include a discussion and overview of value-based healthcare.
 - 2) A critical assessment of the mainstream schools of thought of quality as part of the production process - this will include a study of the relationship between supply chain procurement management and quality as well as the requirements for good production models and the critique of evidence-based decision-making in the clinical setting
 - 3) Quantitative methods in quality management - This course will examine a number of tools for quality management purposes - both how to do them as well as how they fit into the various schools of thought on quality management. It will cover statistical process control which is a method of statistical analysis of time series data that is used in quality management. This method shows whether there is variability in processes and gives the user an ability to both measure improvements and declines in performance of both processes and outcomes and to understand whether processes are performing within acceptable limits. An overview of the quality improvement methodology known as Design of Experiments will also be given. The role of case mix adjustment in quality assessment will also be discussed.
 - 4) Process Mapping - Understanding the value and power of mapping processes both at a systems level and at the individual process level. They will also be given an example of a process map from a healthcare environment to work on optimising.
 - 5) Theories of capacity and flow management and examples of this in both in-patient and outpatient settings will be discussed. This will also include how DRG/HRG payment has a role within organisations of capacity management.
 - 6) A critical overview of Lean, Six Sigma and Model for Improvement. While these models can be useful in healthcare management, these are not deep philosophies of organisation and many of the things which make healthcare unique (e.g. asymmetry of information, difficulty of measuring quality, patient behaviour and societal preferences for fairness) are sometimes not accounted for in these models.
- Teaching:** 5 lectures (5 x 2 hours) and 5 workshops (5 x 2 hours). The 5 workshops will focus on analysing case studies with view of giving students a practical understanding of approaches to quality management in healthcare settings.
- Formative coursework:** A case study will be provided for the students to analyse and write an essay answering questions relating to it. Feedback will be provided on this essay by the seminar leader.
- Indicative reading:** Donabedian, A. (1966). "Evaluating the quality of medical care." *The Millbank Memorial Fund Quarterly* 44(3): 166-203. Hackman, J. Richard, and Ruth Wageman (1995), "Total Quality Management: Empirical, Conceptual, and Practical Issues," *Administrative Science Quarterly* 40 (2): 309-342. Garvin, David A. "Competing on the Eight Dimensions of Quality." *Harvard Business Review* 65, no. 6 (November-December 1987). *Going Lean in Health Care*. IHI Innovation Series white paper. Cambridge, MA: Institute for Healthcare Improvement; 2005. Langley, Moen, Nolan

et al., 2009, *The Improvement Guide*, 2nd Edition (Wiley). Morton, A. and J. Cornwell (2009). "What's the difference between a hospital and a bottling factory?" *British Medical Journal* 339: 428-430. *Crossing the Quality Chasm* - Institute of Medicine, 2001. S Spear and H Kent Bowen; *Harvard Business Review*, Sept- Oct 1999; 97-106; *Decoding the DNA of the Toyota Production system*. To Err is Human - Institute of Medicine, 2000. *Understanding variation* - D Wheeler, 1993. *The Machine that changed the world* - Womack JP, Jones DT and Roos D, 2007. M.E. Porter and T. H. Lee; *Harvard Business Review*, Oct 2013; *The Strategy That Will Fix Health Care*

Assessment: Essay (50%, 2500 words) and essay (50%, 2500 words).
Two 2,500 word case study essays (50% each)

HP4B3E Half Unit Measuring Health System Performance

This information is for the 2019/20 session.

Teacher responsible: Dr Irene Papanicolas COW 3.05

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: 2 lectures (2 hours), 4 lectures (1.5 hours) and 5 seminars (2 hours).

Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Indicative reading: Papanicolas I and Smith PC (Eds), *Health System Performance Comparison: An agenda for policy, information and research*. Maidenhead: Open University Press, 2013. PC Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), *Performance measurement for health system improvement: experiences, challenges and prospects*. Cambridge University Press, 2010; Institute of Medicine, *Crossing the Quality Chasm: A New Health System for the 21st Century*. Washington, DC, National Academies Press, 2001; OECD, *Measuring up: improving health system performance in OECD countries*. Paris: OECD, 2002. World Health Organization (WHO), (2000) *The world health report 2000: Health systems: Improving performance*, Geneva: WHO Publications. Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Essay (75%, 3000 words) and in class assessment (25%).

In-class assessment (25%) and assessed piece of coursework (75%). In-class assessment on a presentation where students apply principles taught to construct an argument around a theory-

based question informed from real world data. They would be assessed on their presentation as well as their ability to apply the conceptual material taught in class to practical data. Coursework is the production of a report where students are asked to evaluate and interpret key performance data for a particular country.

HP4B4E Half Unit

Principles of Evidence-Based Medicine and Clinical Trials

This information is for the 2019/20 session.

Teacher responsible: Dr Irene Papanicolas COW3.05

In addition, Professor Allan Hackshaw (Deputy Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.

Availability: This course is available on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: A large amount of medical research is conducted, with variable quality. Also, health claims are frequently reported in the media, and it can be difficult to determine which is based on reliable evidence and which is not. It is therefore essential to be able to interpret study results and conclusions appropriately, in order to change clinical practice or develop public health policy. This is achieved by Evidence-Based Medicine. The module will enable students to evaluate risk factors for disease or early death, and methods of disease prevention or treatment. The module will provide students with practical skills in the following key areas:

- Understanding the different types of research that can be conducted in humans and their strengths and limitations, i.e. observational studies and a focus on clinical trials.
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports.
- Examining the efficacy and safety of health care interventions (an important part of a complete health economic evaluation of a clinical trial).
- Familiarity with systematic reviews (i.e. how several studies are combined, and the importance of looking at the evidence as a whole).

Teaching: 10 interactive seminars/workshops, each 2-3 hours long.

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. However, detailed written answers are provided, so the students can access these if they undertake any of the exercises after the contact week. The tutor is also available for one-to-one email contact with any student.

Indicative reading:

- Hackshaw A. A concise guide to clinical trials. BMJ Books, Wiley-Blackwell, first edition 2009.
 - Hackshaw A. A concise guide to observational studies in healthcare. BMJ Books, Wiley-Blackwell, first edition 2015.
 - Greenhalgh T. How to Read a Paper: The Basics of Evidence-Based Medicine. BMJ Books, Wiley-Blackwell, fourth edition, 2010.
- Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle.

Assessment: Coursework (50%) and coursework (50%) in the LT. There will be two pieces of coursework based on a clinical trial of an intervention or a risk/causal factor, in the form of:

- a written assignment in the form of a PowerPoint slide deck (about 25 slides) and a statement of 400 words of further discussion and conclusions, based on a published paper and associated media news article of the paper (50%)
- 4-5 questions specific to a published paper with answers

requiring 1-3 paragraphs each (50%).

HP4B5E Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2019/20 session.

Teacher responsible: Dr Maria Raikou

Availability: This course is available on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.

Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.

Teaching: 13 hours of lectures and 8 hours of seminars (computer based)

Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Indicative reading: The following are basic reading for the course: M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, OUP, 2002; M Drummond, B O'Brien, G Stoddart & T Torrance, Methods for the Economic Evaluation of Health Care Programmes, 2nd edn, OUP, 1997; M Gold, J Siegel, L Russell & M Weinstein, Cost-Effectiveness in Health and Medicine, OUP, 1996; M Johannesson, Theory and Methods of Economic Evaluation in Health Care, Kluwer, 1996; P Johannesson, Evaluating Health Risks: An Economic Approach, CUP, 1995.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take home exam (100%).

This is the same course as HP425 Statistical Methods in Health Care Economic Evaluation (H) but it has different teaching and assessment arrangements.

HP4B7E Half Unit

Advanced Health Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Alistair McGuire COW4.05

Availability: This course is available on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The course will cover: international comparisons of health care expenditure, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), equity in health care, health behaviour and an introduction to econometric analysis applied to health care data.

Teaching: 19 hours of lectures.

Formative coursework: 1,500 word essay

Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, Handbook of Health Economics Volumes 1A & 1B, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, Health Economics, (OUP, Oxford).

Assessment: Essay (100%, 3000 words).

HP4B9E Half Unit**Dissertation in Health Economics, Policy and Management**

This information is for the 2019/20 session.

Teacher responsible: Dr Irene Papanicolas COW3.05

Availability: This course is compulsory on the MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research that will contribute to the field of health economics, health policy or health management. The contribution of the work to the chosen field must be made clear. The output will be a piece of work of 5000 words or less that is written in an article format that is suitable for submission to a peer reviewed journal. Students must obtain the approval of their supervisor before embarking on any research.

Arrangements for supervision

Students' tutors will act as their dissertation supervisor in the first instance. If the specific topic a student wishes to cover for his/her dissertation requires a different supervisor, a MSc programme director can arrange this change. The dissertation supervisor will advise the student, help provide information and bibliography and identify likely problems with the proposed research.

Teaching: The dissertation process is supported by three teaching sessions.

Formative coursework: Students will have an opportunity to submit a dissertation proposal for feedback in January of their second year. In addition students have the opportunity to receive feedback on a 1000 word section of their dissertation from their supervisor in the June sessions of their second year.

Assessment: Dissertation (100%, 5000 words).

The dissertation will be electronically submitted to the department by the specified deadline. The word limit for the dissertation is 5,000 words (excluding references and tables) and it must be in a journal article format.

HP4C1E Half Unit**Economic Analysis for Health Policy**

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Street COW 3.03

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The course will serve as an introduction to major issues in the economics of health and health care. It will provide participants with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the demands placed on the health care system, the changing nature of health care supply and delivery, the interactions between patients and providers of health care, and the performance and productivity of the health system. Participants will also be introduced to essential statistical concepts in the evaluation of clinical interventions. Seminar sessions will focus on current policy debates in health care drawing on the theory and evidence from the lectures.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT.

This will include 10 x 90 minutes of interactive lectures and 5 x 120 minutes of case-study based seminars.

Formative coursework: An 800-word "mock" blog entry for The Conversation, which covers policy-relevant issues and often has academic contributors. A series of topics will be provided to students to choose from.

Indicative reading: Course textbook

Bhattacharya, Jay, Timothy Hyde, and Peter Tu. Health economics. Palgrave Macmillan, 2013.

Useful pre-readings

Geoffard P-Y. Incentive and Selection Effects in Health Insurance. Chapter 10 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Iversen T, Luras H. Capitation and Incentives in Primary Care Chapter 26 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Nyman JA. The Value of Health Insurance. Chapter 9 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Pocock SJ et al. Making Sense of Statistics in Clinical Trial Reports: Part 1 of a 4-Part Series on Statistics for Clinical Trials. J Am Coll of Cardiol. 2015;66(22):2536-49.

Rice T. The Physician as the Patient's Agent. Chapter 25 Jones A (ed) Elgar Companion to Health Economics, second edition, Edward Elgar Publishing, Cheltenham 2012.

Assessment: Essay (70%) and presentation (30%).

The two assessments will be:

2. Individual-based video presentation (30%). Students will be asked to record a video on their own on a topic that will be assigned to them. This will assess the students' ability to describe, summarise, apply, critically appraise, and communicate the concepts learned in class to a particular case study.

1. Summative essay (70%) of 2500 words. This will be a written discussion of the topic covered in the presentation. This assessment will evaluate the students' ability in summarising, applying, and critically appraising the relevance of health economics concepts to a health policy issue.

HP4C2E Half Unit**Quality and Outcomes in Cardiovascular Sciences**

This information is for the 2019/20 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: Against a backdrop of great technological advances and delivery system innovations, healthcare systems are facing daunting challenges. Over the past half-century, research on cardiovascular diseases has manifested remarkable advances in the prevention and treatment of cardiovascular diseases. Yet, great challenges remain, primarily due to a lack of strong research evidence about how best to improve the quality, outcomes, and efficiency in health systems with a focus on cardiovascular diseases. Outcomes research aims to produce such evidence. In addition to briefly reviewing key epidemiological trends in cardiovascular diseases in Europe and globally, this course will introduce key 'evidence-practice' gaps in cardiovascular diseases. The first part of the course provides an overview of the definition of quality, its key components, and its measurement in different health care systems. The second part offers a critical perspective on the literature evaluating quality improvement interventions focused on the cardiovascular disease field. The third part focuses on the basics of study design for evaluating quality improvement interventions, programmes, and policies, distinguishing between strong and weak research designs.

The intended learning outcomes of this course are the following:

- Describe the epidemiological trends in cardiovascular disease
- Summarise the primary components of quality in health care
- Explain the main limitations of the literature evaluating quality improvement interventions
- Define the principal threats to validity in studies evaluating quality
- Design an evaluation strategy for a quality improvement policy or intervention in a group setting
- Critically evaluate empirical evaluations of quality and outcomes in health care research in oral and written form

Teaching: 12 hours of lectures and 12 hours of seminars in the MT.

Formative coursework: Formative feedback on group presentations

Indicative reading: Krumholz HM. Outcomes research: generating evidence for best practice and policies. *Circulation* 2008;118:309–18. Ellwood PM. Shattuck lecture – outcomes management: a technology of patient experience. *N Engl J Med* 1988; 318: 1549–56. Clancy CM et al. Outcomes research: measuring the end results of health care. *Science* 1998; 282: 245–46. McGlynn EA. Six challenges in measuring the quality of health care. *Health Affairs* 1997;16.3:7–21. Chalkidou et al. Comparative effectiveness research and evidence-based health policy: experience from four countries. *Milbank Quarterly* 2009;87.2: 339–67. Randomized, controlled trials, observational studies, and the hierarchy of research designs. *N Engl J Med*. 2000;342:1887–92.

Assessment: Essay (100%, 3000 words) in the LT.

HP4C3E Half Unit

Economic Evaluation in Health Care

This information is for the 2019/20 session.

Teacher responsible: Dr Rocco Friebel

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: Health care decision makers are often faced with the challenges of resource allocation. Economic evaluation is used to formalize the process of decision-making on the basis of costs and benefits associated with multiple alternative scenarios or interventions. Decision makers use evidence from economic evaluation analyses to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health care interventions, as well as define best practices. This course will enable students to understand and apply analytic methods in the economic evaluation of health interventions and provide a strong foundation in the several advanced concepts in economic evaluation, and in particular cost-effectiveness of interventions used in long-term chronic illnesses. The course will provide an overview of the principles and practices of measuring and analyzing costs; and estimating effectiveness in terms of quality-adjusted life years and disability-adjusted life years. Practical topics will include the design and implementation of economic evaluation models and the role of clinical data inputs to inform economic evaluation analyses.

Teaching: 10 hours of lectures, 10 hours of seminars and 5 hours of computer workshops in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Indicative reading: Drummond M et al. *Methods for the Economic Evaluation of Health Care Programmes*. Oxford, OUP, 2005. Drummond M et al. *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002. Gray A. *Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation)*, Oxford, OUP, 2011. Weinstein MC et al. Foundations of cost-effectiveness analysis for health and medical practices. *N Eng J Med*. 1977; 296 (13):716–21. Russell LB et al. The role of cost-effectiveness analysis in health and medicine. *JAMA*. 1996; 276 (14): 1172–77.

Assessment: Research project (100%) post-summer term.

HP4C4E Half Unit

Systematic Review and Meta-analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Elizaveta Osipenko COW 4.10

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content:

Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.

This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 20 hours of seminars and 4 hours of computer workshops in the ST.

Formative coursework:

- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011). Institute of Medicine. Assessment: Research project (100%) in the ST.

HP4C5E Half Unit

Using Health Economics to Analyse and Inform Policy and Practice

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Street COW 3.03

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The health care sector is extremely complex, and this gives rise to concerns about how the health system should be organised, how incentives should be designed, and how performance should be evaluated. The objective of the course is to give students an introduction to how health systems are constructed, and how the various parts of the system interact; the

role of regulation, resource allocation, payment arrangements, and performance measurement; the complexities of evaluating policy and performance; and the contribution that health economics can make to the evaluation and development of health policy. Participants are introduced to variety of econometric methods as the course progresses.

Teaching: 15 hours of lectures and 10 hours of seminars in the MT.

Formative coursework:

The formative assessment is a 1000 word outline of the summative assessment essay question.

Indicative reading:

Bridgewater B, Hickey GL, Cooper G, Deanfield J, Roxburgh J. Publishing cardiac surgery mortality rates: lessons for other specialties *BMJ* 2013; 346 :f1139. Busse, R, et al (2013), Diagnosis Related Groups in Europe: Moving Towards Transparency, Efficiency, and Quality in Hospitals? *British Medical Journal*, vol 346, f3197, pp. f3197. Economics of coronary artery bypass grafting. *Br Med J (Clin Res Ed)* 1985; 291 doi: <https://doi.org/10.1136/bmj.291.6491.326>

Assessment: Essay (100%, 5000 words) in the LT.

The course will be assessed on the basis of a 5000 word essay on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking.

Formative assessment will be based on a 1000 word outline of the essay. This will give students an opportunity to develop their thoughts ahead of the summative assessment and will allow feedback from course teachers that will guide students when they work on their longer answers.

Due to the executive nature of the course and the 1 week nature of the module, this method of assessment will allow students to work away from campus alongside their professional roles.

HP4D1E Half Unit

Introduction to Management in Health Care

This information is for the 2019/20 session.

Teacher responsible: Dr Brittany Jones NAB 4.04

Availability: This course is compulsory on the MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Pre-requisites: No Prerequisites

Course content: The course aims to introduce students to the main principles of management and strategy and related issues that impact on organisational change, group decision making, innovation and leadership. Key models and academic tools will be presented and their application to real world situations discussed. The course aims to give students a strong academic understanding and also enable them to apply this knowledge to their practice.

The course outline is below

1. Strategy and Managerial Work

In this session, we will explore the development of the modern practice of 'strategy' and what it means today. Along the way, we will show how organisational practices like planning met emerging ideas in academia, especially in economics, to develop new tools and ways of thinking that transformed the practice

of management in the late 20th century. The development of strategic management and planning tools and the competitive environment in which they emerged will be discussed and the application of these tools will be examined in competitive markets.

2. Innovation Management

This part of the course will introduce the topic of innovation management. In particular, it introduces participants to the conceptualization of innovation as a means to affect the competitive process. Participants will be introduced to the basics of the competitive process and the effect of innovation on the competitive process. Participants will be active in analysing the competitive process surrounding their organization and the competitive position their organization occupies within it and activities will be used to promote thinking about how innovations, small or large, can defend and/or improve their competitive position.

3. How Individuals and Groups Organise and Make Decisions and Take Risk

This part of the course will introduce issues related to working as individuals within an organisation and as a group. It will look at the "benefits" and "harms" of group decision making processes – especially with reference to health care where collaborative multi-disciplinary teams are commonplace – and also discuss how group decisions making can be undermined by systematic biases.

4. Behaviour Change and Social Marketing

This part of the course will introduce the drivers and mechanisms of behaviour change in organisations. In particular, we will discuss how different organizational-level factors may influence behaviour change, including resistance to change from various levels and sustainability of changes across time, and how organizational behaviour change can be measured. Models of organisational behaviour change will be introduced and the principles of managing and leading change in established systems will be discussed with a focus on the stages of planning and implementation of change. Alongside this appropriate tools and resources will be introduced to aid future organisational changes. The coverage of social marketing will deal with the formulation and execution of strategies designed to influence behaviour change amongst groups at risk of cardiovascular disease.

5. Culture and Leadership

This part of the course will explore the definition of culture within organisations and leaders' role in creating and supporting successful teams. Key components of leadership, like the ability to establish direction and motivate and inspire a workforce as well as handle relationships with external stakeholders, will then be introduced with a consideration of how they affect culture and working practices.

Teaching: 10 hours of lectures, 10 hours of seminars and 1 hour of help sessions in the ST.

Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration consisting of 5x2-hour lectures and 5x2-hour seminars (in addition to a 1x1-hour online help session).

Formative coursework: Students will be expected to produce 1 essay in the ST.

The formative assessment is a 500 word outline of the summative assessment essay question.

Indicative reading: Mintzberg, H., Ahlstrand, B. and Lampel, J. (2008). *Strategy Safari: The Complete Guide Through the Wilds of Strategic Management* (Second Edition). Prentice-Hall. Chapters 1 and 4. Whittington, R. (2000). *What is Strategy—and Does it Matter?* (Second Edition) Thomson International. Chapters 1, 2 and 4. Barney, J. 1995. Looking Inside for Competitive Advantage. *The Academy of Management Executive*. 9(4): 49-61. Christensen, C.M., Raynor, M.E., McDonald, R. 2015. What Is Disruptive Innovation? *Harvard Business Review*. December Issue (available online at <https://hbr.org/2015/12/what-is-disruptive-innovation>)

Assessment: Essay (100%, 2500 words) post-summer term.

The course will be assessed on the basis of a 2500 word essay on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from

the lectures, reading material, group discussions and their own independent research and thinking. The content of the assessments will lead on from the simulation exercises that have been used in the seminars and students will be encouraged to use topics they have identified during reflections on their own work. Formative assessment will be based on a 500 word outline of the essay. This will give students an opportunity to develop their thoughts ahead of the summative assessment and will allow feedback from course teachers that will guide students when they work on their longer answers.

Due to the executive nature of the course and the 1 week nature of the module, this method of assessment will allow students to work away from campus alongside their professional roles.

HP4D2E Half Unit

Principles of Health Technology Assessment

This information is for the 2019/20 session.

Teacher responsible: Dr Panagiotis Kanavos COW G.04

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.

Outline of the course is included below:

1. The role of Health Technology Assessment in health care decision making
2. Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
3. Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
4. Data and evidence requirements for value assessment
5. Health Technology Assessment and value assessment: focus on clinical benefit assessment
6. Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
7. Assessment methods in Health Technology Assessment
8. Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
9. The role of multiple criteria decision analysis in value assessment
10. Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements

Teaching: 10 hours of lectures, 10 hours of seminars and 1 hour of help sessions in the ST.

Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration.

Formative coursework: Students will be expected to produce 1 exercise in the ST.

A selection of multiple choice and open-ended questions to test extent of knowledge and understanding of syllabus

Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Rochaix, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Key principles for the improved conduct of*

health technology assessments for resource allocation decisions. *International journal of technology assessment in health care*, 24(03), 244-258. Sorenson, C., Drummond, M., & Kanavos, P. (2008). Ensuring value for money in health care: the role of health technology assessment in the European Union (No. 11). WHO Regional Office Europe. Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. *Issue Brief (Commonwealth Fund)*, 91, 1-14.

Assessment: Research project (100%) post-summer term. A 3,000-word (excluding references) case study on a specific topic

HP4D5E Half Unit

Research Design for Evaluating Health Programs and Policies

This information is for the 2019/20 session.

Teacher responsible: Dr Elisabetta De Cao OLD 1.11

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences. This course is not available as an outside option.

Course content: The objective of this course is to teach students how to design and critically appraise research studies evaluating policies, programmes, and interventions.

This course will provide an overview of the principles and models of evaluation, and the role of theories, concepts, and hypotheses. In terms of research design, it will cover study design choices in light of bias, validity and other design trade-offs. The core of the course will focus on experimental and quasi-experimental designs for evaluating health interventions, programmes and policies aimed at achieving high quality care, reducing costs, and improving health outcomes. Data and measurement considerations for quantitative studies will be discussed alongside briefly touching upon qualitative methods, mixed-methods and triangulation for interpreting findings and taking a critical approach to the results of evaluation. The course will conclude with practical and ethical issues when undertaking evaluation studies.

Teaching: 10 hours of lectures and 10 hours of seminars in the ST. Given the executive nature of this course, it will be offered as an intensive, accelerated, and compressed module with a 1-week duration.

Formative coursework: Students will be expected to produce 1 project in June.

Students will work in small groups in class and prepare a proposal for evaluating a health policy or program. They will then individually write the research proposal in a schematic way presenting a template with a brief description of the content. The formative will be submitted and feedback given in ST.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering 'Metrics: The Path from Cause to Effect*. Princeton University Press. Gertler, Paul J., Sebastian Martinez, Patrick Premand, Laura B. Rawlings, and Christel M. J. Vermeersch. (2016) *Impact Evaluation in Practice*, second edition. Washington, DC: Inter-American Development Bank and World Bank. doi:10.1596/978-1-4648-0779-4. License: Creative Commons Attribution CC BY 3.0 IGO. Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. HM Treasury. 2011. *The Magenta Book. Guidance for evaluation*.

Assessment: Research project (100%) post-summer term. Project (100%, 2500 words)

Academic research proposal for evaluating the health policy or program. This should be in depth and technical and written for an expert in the methods you have chosen. You should choose one of the methods that you have learned this week.

HP4E1E Half Unit Global Health Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Clare Wenham COW 3:07 and Dr Justin Parkhurst COW 3:08

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: Health policy is no longer purely a government activity, but globalisation and global organisations have impacted on the nature of global health, and the policies created to manage the health needs of the global population. This module critically examines global health policy and normative shifts in understanding global health which impact upon it. The multi-actor framework of global health actors involved in the provision and practice of health policy now includes United Nations agencies (WHO, UNICEF, UNAIDS etc), a number of NGOs, civil society organisations, private sector, foundations, public private partnerships. Each actor has their own priorities for setting the global health agenda, and this module examines the role of each and their impact on health policy at national, regional and global levels. The module will analyse a range of case studies of global health events and global health policies and the governance arrangements made by them. In doing so, this module will draw on contributions from international relations, political science, sociology and public health research

Teaching: 12 hours of lectures and 8 hours of seminars in the MT. All students will have the opportunity to participate in additional lectures undertaken by external guests. These lectures will be run every Monday and Wednesday from 6pm to 8pm during the teaching period at LSE.

In addition, students will be given the option to participate in a three-hour webinar hosted at least 10 days before the due date of the take-home assessment. The webinar will consist of two-hours of lectures and one hour of question time.

Formative coursework: Students will be expected to produce 1 essay in the MT.

1 X 1000 word essay. Students will be asked to submit a short 1000 word essay (on the topic that they are writing on for the summative, but a different question) at the end of January. These will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level at LSE, and the expectations of the summative assessment. This then allows students to take this feedback and use it in their writing of the summative work. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

Indicative reading:

- Parker, M., & Allen, T. (2014). De-politicizing parasites: reflections on attempts to control the control of neglected tropical diseases. *Medical anthropology*, 33(3), 223-239.

Assessment: Essay (100%, 4000 words) in the LT.

1 x 4000 word essay due in LT (after lecture/seminar programme in December) – 100% of grade

Students will be asked to pick one essay question from a list

of 8 topics. They are also given the option to choose their own essay topic (after discussion with their seminar leader) if they would prefer. The questions will be broad, allowing for student individuality to come across in their answers. For example: What role should the WHO play in the future of global health policy?

HP4E2E Half Unit Paying for Healthcare

This information is for the 2019/20 session.

Teacher responsible: Prof Elias Mossialos Cowdray 4.08 and Prof Andrew Street Cowdray 3.03

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: This course aims to introduce students to a comparative approach to analysing the development of health care financing, both in theory and in practice, with an emphasis on critical assessment of current and future policy options and issues. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in developed countries, given these systems are the most advanced, have extensive readily available literature, and are based on best practice principles. However, healthcare system financing in developing countries will also be discussed, albeit to a lesser extent.

Teaching: 15 hours of lectures and 6 hours of seminars in the MT. In addition, students will be given the option to participate in a webinar hosted at least 10 days before the due date of the take-home assessment.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Students will be provided with an option to complete a practise essay (up to 1,000 words), with topics provided by the lecturer. The essay will be reviewed by a faculty member and comments will be provided to students to assist them in their final essay.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010). E Mossialos, A Dixon, J Figueras & J Kutzin (eds), *Funding health care: options for Europe*, Open University Press (2002). T Rice, *The economics of health reconsidered*, Health Administration Press (3rd edn, 2009). JS Skinner, A Chandra, DC Goodman, ES Fisher. *The elusive connection between health care spending and quality*. *Health Affairs* 2009;28(1):w119–23. PC Smith, E Mossialos, I Papanicolas, S Leatherman (eds). *Performance Measurement for Health System Improvement: Experiences, Challenges and Prospects*. Cambridge: Cambridge University Press, 2010

Assessment: Take home exam (100%) in the LT.

The assessment is a take-home assessment. It will outline six topics covering the course content. Students will be required to complete two of the six topics, which will need to be at least 1,500 words in length.

HP4E3E Half Unit Evidence Review and Synthesis

This information is for the 2019/20 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: The content for this course will closely parallel HP4C4E and HP407, which are taught by the same instructor and offered on the Executive MSc Health Economics, Outcomes and Management in Cardiovascular Sciences, and the full-time MSc

programmes (Global Health, International Health Policy, and Health Policy, Planning and Financing), respectively.

Evidence review and synthesis methods (such as systematic reviews and meta-analyses) are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need individuals equipped with the methods of reviewing and synthesising the existing body of evidence by performing systematic reviews and meta-analyses.

This course will be focused on the principles of reviewing and synthesising the existing body of literature. The course will have three components. The first will provide the rationale for adopting a systematic approach for evidence review and synthesis. It will equip students with the methods to undertake risk of bias assessments of randomised and non-randomised studies. The second component will focus on the quantitative synthesis of multiple studies in meta-analysis. The third component will discuss the opportunities and challenges of using evidence for decision-making.

The intended learning outcomes of this course will be the following:

- Describe the rationale for adopting a systematic approach to literature review
- Explain the principal threats to validity both in individual studies and collections of studies
- Critically evaluate the quality of randomised and non-randomised studies
- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: 15 hours of lectures, 5 hours of seminars and 3 hours of computer workshops in the MT.

All students will have the opportunity to participate in additional lectures undertaken by external guests. These lectures will be run every Monday and Wednesday from 6pm to 8pm during the teaching period at LSE.

In addition, students will be given the option to participate in a three-hour webinar hosted at least 10 days before the due date of the take-home assessment. The webinar will consist of two-hours of lectures and one hour of question time.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Formative assessment:

- Students will receive feedback from the course instructor on their systematic review and meta-analysis protocol.
- The word-limit for the protocol (to be developed individually) is 1,000 words.
- This protocol is based on a non-assessed presentation delivered by a group of students at the last day of class and feedback received on this presentation by the course instructor and members of other groups. This protocol closely parallels PRISMA protocols that need to be developed and registered prior to starting a systematic review and meta-analysis focused on health care subjects.

Indicative reading:

- Petticrew, Mark, and Helen Roberts. *Systematic reviews in the social sciences: A practical guide*. John Wiley & Sons, 2008.
- Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011).
- Institute of Medicine. *Finding what works in health care: standards for systematic reviews*. 23 March 2011.
- Sutton AJ et al. *Methods for Meta-analysis in Medical Research*. Wiley, Chichester, UK, 2000.
- Parkhurst, Justin. *The politics of evidence: from evidence-based policy to the good governance of evidence*. Routledge, 2016.

Assessment: Coursework (100%, 3000 words) in the LT.

Summative assessment:

- Systematic review and meta-analysis report resembling an

original article submission to a peer-reviewed journal.

HP4E4E Half Unit

Cost-effectiveness in Health Care

This information is for the 2019/20 session.

Teacher responsible: Dr Ranjeeta Thomas OLD.1.01

Availability: This course is compulsory on the Executive MSc in Health Economics and Policy (LSE and Chicago). This course is not available as an outside option.

Course content: This course will introduce students to the basic notions of economic evaluation including cost-benefit analysis, cost-utility analysis and cost-effectiveness analysis as applied to the health care sector. The course will discuss notions of welfare economics and extra-welfarism, the identification and measurement of resource costs when markets do not exist (shadow prices), the measurement of health outcomes (including life years gained and Quality Adjusted life-years gained (QALYs)), methods of discounting and the basic calculations involved in estimating the cost-effectiveness of new health care technologies, including Markov modelling. The definition of the incremental cost-effectiveness ratio (ICER) will be outlined, as will the treatment of uncertainty (including structural (model) uncertainty, sensitivity analysis, and multivariate, parameter uncertainty). The use of bootstrap elements to estimate standard errors for the ICER will be described. Presentation of results, including the use of Acceptability curves, will also be covered. Finally, the use of cost-effectiveness in pharmaceutical pricing and reimbursement will also be detailed.

Teaching: 10 hours of lectures and 15 hours of seminars in the MT.

The course will be supplemented by workshops, using Excel based programmes where students will learn how to build a cost-effectiveness model from scratch, detailing the type of data requirements and the choice (from basic decision tree to Markov models) of modelling framework.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: Briggs, A. Claxton, K. and Schulpher, M, 2007, *Decision Modelling for Economic Evaluation*, Oxford, OUP. Drummond, M., Schulpher, M., Claxton, K., Stoddart, G. and Torrance, G., 2016, *Methods for the Economic Evaluation of Health Care Programmes*, Oxford, OUP, *Economic Evaluation in Health Care: Merging Theory with Practice*, 2001, Edited by M. Drummond and A. McGuire, Oxford, OUP. Meltzer, D., 2013, *Future costs in medical cost-effectiveness* in Jones, A., editor *The Elgar Companion to Health Economics*, Cheltenham, Edward Elgar. Raikou, M and McGuire, A. *Measuring costs for cost-effectiveness analysis* in Jones, A., editor *The Elgar Companion to Health Economics*, Cheltenham, Edward Elgar

Assessment: Essay (30%, 2500 words), take home exam (60%) and presentation (10%) in the MT.

IR442E

Diplomacy and Challenges

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Cox PAN.9.01A

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course looks at six key aspects of diplomacy: the tools of diplomacy and negotiation; new international security and policy challenges, such as climate change; global flashpoints, such as Brexit, the South China Sea and Syria; policy assessment on a major current international problem; simulations on crisis management and diplomatic negotiations; the future of diplomacy and international affairs.

Teaching: 30 hours of lectures, 20 hours of seminars and 20 hours of workshops in the LT.

Formative coursework: One formative policy paper (2,000 words) with a pre-arranged task. Feedback will involve a meeting with each student to discuss their formative policy paper. We will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing policy options; formulate arguments and policy recommendations in a coherent and balanced fashion.

Indicative reading:

3,000 word assessed policy paper setting out a detailed strategy to implement a policy.

IR443E

Strategy in a Changing World

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Cox PAN.9.01A

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course examines five different perspectives on strategy: new approaches to strategy in international affairs; the interplay between old and new strategic actors; global strategic and economic trends; political and security developments in the world's key regions; the nature of strategic decisions.

Teaching: 40 hours of lectures and 30 hours of seminars in the MT.

Formative coursework: One 2,000 word formative essay with a pre-arranged title due in the MT. Feedback will involve a meeting with each student to discuss their formative essay. In the process, we will aim to ensure that students are able to: critically evaluate

different kinds of evidence; assess the strengths and weaknesses of competing explanatory paradigms; formulate arguments in a coherent and balanced fashion.

Indicative reading:

Assessment: Essay (100%, 4000 words).

IR444E Half Unit

Strategy in Action

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Cox PAN.9.01A

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: In this course we will be examining through lectures, seminars and workshops major foreign policy decisions, the diplomatic background to each of these and the strategic thinking behind them. We will be asking the students through group exercises to prepare a strategy and policy paper relevant to the day.

Teaching: 8 hours of seminars in the ST.

The course is taught over 48 hours. This includes 3 intense sessions - a weekend of assessing strategic decisions involving drafting and crafting papers, a second weekend of formulating strategic decisions and briefing sessions on methodology. All these will lay the foundations for the dissertation plan.

Formative coursework: Group discussion and formulation of strategy/policy papers.

Indicative reading: Readings vary each year depending on the cases, scenarios and policy issues examined during each policy session. Readings will be provided to registered students in advance.

Assessment: Dissertation (100%, 3000 words) in the LT.

The formulation of a dissertation topic which must be in the form

of a 3,000 word dissertation plan (100%). This should include the title, an abstract, a problem statement which should identify the features and theoretical concepts associated with the topic, the aims and objectives (including research questions or hypotheses), a literature review and the methodology. This module is taken in conjunction with IR496 Dissertation: MSc Diplomacy and International Strategy (1.5 units).

IR496E One and Half Unit

Dissertation: MSc International Strategy and Diplomacy (1.5 units)

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Cox PAN.9.01A

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: The dissertation will address a topic in the social sciences drawn broadly from the three core courses. The topic should make central use of concepts in the study of International Relations, strategy and diplomacy and should demonstrate a good understanding of these concepts and implications. The dissertation will draw on empirical topic areas but should also demonstrate a high degree of conceptual originality. Guidance on standards of presentation will be given in the handbook and conform to the standard laid down for MSc dissertations in the International Relations Department. The subject and title of the dissertation must be approved by the dissertation supervisor.

Teaching: Arrangements for supervision. Students will receive advice on how to choose a topic and how to write a dissertation from a 1.5 hour workshop and from three half hour individual supervision sessions.

Formative coursework: Students submit a 3,000 dissertation plan on which they receive written feedback (see the details of the IR444 course, taken in conjunction with IR496).

Assessment: Dissertation (100%, 15000 words) in the LT. A 15,000 word dissertation (100%) to be submitted in September. This course is taken in conjunction with IR444 Strategy in Action (H).

Using the dissertation plan (IR444), the dissertation will include an introduction, theoretical framework, a literature review and methodology followed by chapters, conclusion and bibliography.

LL400E Half Unit

European Capital Markets Law

This information is for the 2019/20 session.

Teacher responsible: Professor Niamh Moloney

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to key capital market actors across the Member States and which supports the integrated market. The topics covered include: the rationale for integration and the role of law, the evolution of the integration project, and the impact of the financial crisis and subsequent reforms; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate

and regulate the EU market and the role of the Court; market access and the passport for investment services; the Markets in Financial Instruments Directive 2014 (MiFID II) and the Markets in Financial Instruments Regulation 2014 (MiFIR) and regulation; the liberalization of order execution and the regulation of trading venues; the 'UCITS' mutual funds regime; retail investor protection and conduct regulation; the prospectus and disclosure regime; gatekeepers (credit rating agencies and investment analysts); and the institutional structure for law-making and for supervision, including the European System of Financial Supervision and the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, EU Securities and Financial Markets Regulation Regulation (2014), Veil (ed) European Capital Markets Law (2017), and Busch, Avgouleas, and Ferrarini (eds) Capital Markets Union in Europe (2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL401E Half Unit

The Law of Armed Conflict

This information is for the 2019/20 session.

Teacher responsible: Dr Stephen Humphreys NAB5.12

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict or international humanitarian law)—as distinct from the law on the resort to force (jus ad bellum), which is a separate course. The course will take a critical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in recent conflicts, including the wars in Iraq, Afghanistan and Syria, the 'war on terror', and the Palestinian Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: It is worthwhile acquiring the following books: Yoram Dinstein, *The Conduct of Hostilities under the Law of International Armed Conflict* (Cambridge UP, 2nd ed., 2010, or 3rd ed., 2016), Roberts and Guelff, *Documents on the Laws of War* (Oxford UP, 2000); Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006). Other useful books include: David Kennedy,

Of Law and War (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Detailed readings for each seminar will be made available on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL402E Half Unit

Key Issues in Transnational Environmental Law

This information is for the 2019/20 session.

Teacher responsible: Dr Veerle Heyvaert NAB7.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course focuses on key developments in environmental law beyond the State, which includes both the European and international level. It reviews the main law and policy principles that inspire transnational environmental developments, and identifies opportunities for and obstacles to the effectiveness of transnational environmental law. Then, the course turns the spotlight on the most important environmental challenges of our time and examines the role of transnational law in managing or resolving them. The course is structured as follows: 1. Environmental law in context: economic and alternative approaches to sustainable development. 2. Sources and principles of international environmental law. 3. Transnational environmental law. 4. Transnational liability: responding to global catastrophes. 5. Controlling toxic substances: risk regulation and the precautionary principle. 6. Climate change: international law and policy developments. 7. Climate change litigation. 8. Protecting biodiversity through designation: the EU example. 9. Regulating markets for ecosystem services. 10. Trade and the environment. 11. Revision.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A detailed reading list will be provided for each seminar. Essential reference works include Heyvaert, *Transnational Environmental Regulation and Governance. Purpose, Strategies, and Principles* (CUP, 2018); Sands and Peel, *Principles of International Environmental Law* (CUP, 2018); Bodansky, *The Art and Craft of International Environmental Law* (Harvard University Press, 2010); Bodansky, Brunnee & Hey, *The Oxford Handbook of International Environmental Law* (OUP, 2007); Kingston, Heyvaert & Cavoški, *European Environmental Law* (CUO, 2017).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL403E Half Unit

International Human Rights: Concepts, Law and Practice

This information is for the 2019/20 session.

Teacher responsible: Dr Margot Salomon

Availability: This course is available on the Executive LLM. This

course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the international protection and promotion of human rights and its relation to a range of current global problems. The course draws on the international law and practice of human rights to examine how we might best understand the contribution and limitations of human rights to addressing contemporary ills. Through the consideration of a range of standards and thematic issues participants will learn about, and critically analyse, human rights concepts, norms, institutions and actors. The course engages with the ideas and objectives that underpin the post-1945 human rights legal order, the United Nations and regional systems, as well as both the standards of, and challenges to, international human rights. We build on these foundations to examine a variety of current human rights topics and to explore how international law in these areas has developed, is applied, and is deployed. Subjects may include: the prohibition of torture and the war on terror; human rights and water; the right to self-determination; the right to development; land and the rights of indigenous peoples; human rights and sexuality; human rights and extraterritoriality; business and human rights; human rights and resistance; and human rights and poverty.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: O de Schutter, *International Human Rights Law: Cases, Materials, Commentary*; F Mégret, 'The Nature of Obligations' in D Moeckli, S Shah and S Sivakumaran (eds), *International Human Rights Law*; Report of the Eminent Jurists Panel on Terrorism, Counter-terrorism and Human Rights: Assessing Damage, Urging Action (International Commission of Jurists); ME Salomon, *Global Responsibility for Human Rights: World Poverty and the Development of International Law*; Maastricht Principles on the Extraterritorial Obligations of States in the area of Economic, Social and Cultural Rights; A Clapham, *Human Rights Obligations of Non-State Actors*; C Clark, 'Of What Use is a Deradicalized Human Right to Water?' 17 *Human Rights Law Review* 2 (2017); J Kozma, M Nowak and M Scheinin, *A World Court of Human Rights – Consolidated Draft Statute and Commentary*.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL404E Half Unit

European and UK Human Rights Law

This information is for the 2019/20 session.

Teacher responsible: Prof Conor Gearty NAB 6:11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course has two parts. In part one the origins, development and current standing of the European Convention on Human Rights and Fundamental Freedoms are considered. The primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also be referred to where appropriate. The course will analyse the Convention from the perspective of selected rights within it, but will also engage with the subject thematically, subjecting such concepts as the 'margin of appreciation', 'living instrument' and proportionality to close scrutiny. The goal of this part of the course is to give students a good critical understanding of the Convention, the case-law of the Strasbourg court and the Convention's place within the constitutional and political structure of 'Greater Europe'. The second part of the course is made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. This part of the course will identify the principles that underpin the UK Act and explain its proper place in British law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. Linkages with the broader European framework discussed in the first part will be made by students through their reading and through class-engagement. The implications for human rights of the UK's intended departure from the EU will also be considered.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Jacobs and White, *The European Convention on Human Rights* 7th edn (OUP, 2017) and/or Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights* 3rd edn (Oxford, 2014). The text on the UK is Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (Oxford University Press, 2016). Also useful is Mowbray, *Cases and Materials on the European Convention on Human Rights* 3rd edn (Oxford, 2012). Kavanagh, *Constitutional Review under the UK Human Rights Act* (Cambridge, 2009), Hickman *Public Law after the Human Rights Act* (Hart, 2010) and Gearty, *Principles of Human Rights Adjudication* (Oxford University Press, 2004).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL405E Half Unit

Dispute Resolution and Advanced Mediation

This information is for the 2019/20 session.

Teacher responsible: Prof Linda Mulcahy NAB7.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The principal focus of the course is upon methods of resolving disputes other than adjudication. The course brings together theory and observation of practice and is divided into two parts. In the first section students examine what motivates people to enter into disputes and the range of outcomes they seek, the history of the "informal justice" movement and the transformation of attitudes to dispute resolution in the UK and beyond. The emphasis in this part of the course is also on looking at the two primary forms of dispute resolution, negotiation and

mediation. In the second part of the course specialist practitioners work with the class in exploring the interface between theory and practice and the different dynamics of disputes and their resolution in specific subject areas such as commercial law, community disputes, international law and family law. The course is designed to complement the option on Commercial Arbitration.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Students will also find it useful to access the following books which provide important context for debate about the civil litigation system and negotiation tactics:

Henry Brown and Arthur Marriot, (2012) *ADR: Principles and Practice*, London: Sweet and Maxwell. This is written by practitioners but also makes reference to a number of seminal academic studies. It provides a good framework within which to position the more in-depth arguments contained in the academic articles set each week.

Genn, Hazel, (2009) *Judging Civil Justice (The Hamlyn Lectures)* Cambridge, Cambridge University Press. This book provides a really good overview of civil justice reforms across developed legal systems and will alert you to many of the academic and policy debates which have surrounded reform.

Roger Fisher and William Ury (2012) *Getting to Yes: Negotiating an Agreement Without Giving In*, Random House. This is a classic text in the field and very simple to read. This book will also help you when we come to study mediation which is often described as a form of facilitated negotiation.

Simon Roberts and Michael Palmer's 2005 (second edition) *Dispute Processes: ADR and the Primary Forms of Dispute Resolution*, Cambridge, Cambridge University Press. This is the most theoretical book in this list but provides extracts from many of the seminal works in the field that we will be studying. It adopts a very inter-disciplinary approach. This is useful as background reading.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL406E Half Unit

Regulation of Financial Markets I

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course (Part I and Part II) examines the regulatory structures governing financial markets and investment services. It covers the main principles of international, EU and UK financial regulation, with the aim of developing a critical understanding of the dynamics and conceptual framework of financial regulation. The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and

markets, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

The first part of this course will address the following topics:

Anatomy of the Financial Market and the Great Financial Crisis
Building Blocks of the Regulatory World
Rationales for its Regulation: Systemic Stability, Market Integrity, Principle-Agent Competition
Key Elements of Financial Regulation: disclosure, resilience, risk modelling and regulation inside firm
Global and EU Regulatory Structures
Financial Stability – Policy Issues, Principles and Global Standard Setters
Prudential Regulation of Banks – The Basel Accords
The EU Banking Union
Deposit Guarantees
Bank Resolution and Insolvency

Teaching: 24-26 hours of contact time (for each half unit)

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, *The Future of Finance: The LSE Report* (2010); S Valdez and P. Molyneux, *Introduction to Global Financial Markets* (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL407E Half Unit

Regulation of Financial Markets II

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the regulatory structures governing financial markets and financial services. It covers the main principles of international, EU and UK financial regulation with the aim of developing a critical understanding of the conceptual framework for financial regulation. This half unit focuses on financial stability, including macro and micro-prudential regulation, regulation of trading and market infrastructure, and on new and emerging issues in financial regulation.

The course does not aim to provide a detailed comparative account of financial regulation across countries, but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and

transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

Topics include:

1. Unpicking the Great Financial Crisis
2. Mapping regulation for financial stability
3. States, Banks and Global Markets: the macroeconomic Background
4. The next Financial Crisis
5. Ethics in Finance
6. Market Integrity
7. The role of Consumers
8. Consumer Protection
9. Securities markets and Conduct of Business
10. Fast, global, decentralized– the Challenges of the Future

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, *The Future of Finance: The LSE Report* (2010); S Valdez and P. Molyneux, *Introduction to Global Financial Markets* (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL408E Half Unit

Comparative Constitutional Law

This information is for the 2019/20 session.

Teacher responsible: Dr Jo Murkens NAB7.31

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the central issues in comparative constitutional law across a range of jurisdictions and from a variety of perspectives. The course opens with an introduction on the purpose of comparative constitutional law. The first substantive part discusses various approaches to the study of CCL as well as the migration of constitutional ideas (and related notions of constitutional borrowing, transplants etc). The second part deals with key constitutional concepts (constitution; rule of law; presidentialism, parliamentarism) which are discussed from a historical and comparative perspective. The point of these sessions is not to compare for the sake of comparing, but to equip you (the researcher) with the conceptual tools to do insightful, critical, and original comparative work of your own. The third part looks challenges the assumptions of liberal constitutionalism by examining constitutions in divided societies and authoritarian constitutionalism. The overall aim of the course is to develop

students' understanding and use of many general theoretical explanations surrounding debates in CCL, and to develop students' critical/analytical approach to many of the questions facing judges and scholars in the next decade.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: There is no set book for this course. All materials will be made available in advance on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL409E Half Unit

Comparative Constitutional Rights

This information is for the 2019/20 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These include: Abortion; 'Deviant' Sex: Sodomy, Sado-Masochistic Sex, and Incest; Same-Sex Marriage; Religion in the Public Sphere; Hate Speech and Denial of the Holocaust; Obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with an emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL410E Half Unit

International Financial Law and Practice I

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses

every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: As the recent debate on shadow banking shows, the traditional financial market sectors of commercial banking, investment banking, derivatives, capital markets and asset management are nowadays converging. However, their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture of the entire financial market law. To this end, the course largely concentrates on the different activities of risk taking and risk shifting regardless of the type of financial institution involved. The course is also a novelty to the extent that it integrates both spheres of rulemaking for the financial markets, notably financial law and some fundamentals of financial regulation. Experience shows that approaching the framework for financial law without at least considering the interdependencies with risk management and capital requirements leaves us with only a fragmented picture. For non-practitioners, the market context of financial law appears sometimes confusing. Therefore, this course will first approach each subject from in a market perspective before coming to the legal framework. This is essential with a view to understanding the permanent interaction between market behaviour and the legislators' and regulators' responses to it. The legal framework will be analysed taking into account international rules and developments as well as European legislation. Since the City of London is one of the globally most important financial markets, England will be used as anchor-jurisdiction in order to develop patterns of global significance that are addressed by legislators and regulators around the world, in particular also looking at the European Union and at international rulemaking.

The course also considers key trends. It is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- The logic and the players of the financial market. The creation and allocation of risk. The distinction between 'Law' and 'Regulation'.
- The reasoning and sources of financial law and regulation. The role of European financial law and regulation. The role of international law.
- Understanding the financial crisis.
- Banks and their nature. Assets and Liabilities. Deposit-taking and bank loans. Money market instruments. Rank of creditors in bank insolvencies.
- Raising capital. Primary market and secondary market. Issuance of debt securities (bonds). Issuance of Eurobonds. Issuance of equity (shares).
- Security interests and financial collateral.
- Rehypothecation, repurchase agreements and securities lending. Relevant conflict-of-laws problems.
- Guarantee, indemnity, insurance.
- Derivatives. Types of derivatives. The rise of derivatives. Recharacterisation risk. Standard documentation (ISDA).
- Netting and set-off. Relation to insolvency law. Importance for derivatives, repos, securities lending. Conflict-of-laws analysis. Cross-jurisdictional problems.
- Trusts.
- Fund structures (public and alternative).
- Structured finance, securitisation and asset-backed securities. The rationale behind it. Risks.
- Transfer of financial instruments. Stock exchanges. Trading and settlement of securities. Intermediated securities. Conflict of laws and cross-jurisdictional problems. Derivatives clearing.
- Syndicated loans.
- Regulatory arbitrage in respect of financial transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.
- J. Benjamin, Financial Law, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE campus only.
- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 7th ed., Palgrave-McMillan 2013, ca. £29.- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.
- J. Benjamin, Financial Law, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE campus only.
- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 7th ed., Palgrave-McMillan 2013, ca. £29.- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.

- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 8th ed., Palgrave-McMillan 2013, ca. £29.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL411E Half Unit

International Financial Law and Practice II

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Paech NAB7.05

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: There are no specific prerequisites for taking this course. While this course is complimentary to LL410E prior completion of the latter is not necessary to take LL411E.

Course content: This course explores contemporary issues of the commercial law of international financial markets. These include

- the future of English law as reference law for international finance after Brexit
- financial markets and modern trends in conflict-of-laws
- the legal characteristics of the various types of networks used in financial markets (central, decentral, distributed)
- the disruption of law caused by 'blockchain' technology and FinTech
- the legal challenges flowing from the increasing use of 'big data' and artificial intelligence in financial services
- the future role of commercial law in managing risk
- the nature of so-called smart contracts and their role in standard documentation, risk management and due diligence
- legal issues associated with cryptocurrencies and crypto-money

As the course is conceived to be very topical, some of the course content may change.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- The reading will consist of 2-3 scholarly articles per subject, such as P Paech, 'Governance of Blockchain Financial Networks', Modern Law Review (forthcoming), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2875487.
- Basic knowledge on international financial law (recommended in particular to students who did not take LL410E): P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound).
- Understanding the financial market: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 8th ed., Palgrave-McMillan 2015 (soft bound, ca. £29 - this is not a legal work but very useful for those new to the financial market).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL412E Half Unit

International Economic Law I

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Lang

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to the field of international economic law: its principles, rules, practices, and institutions, and the debates which attend each. The course focuses on the public international law rules and institutions which govern international trade. Students will be given a grounding in the jurisprudence of the WTO, but will also be introduced to interdisciplinary material on the broader political, economic, institutional and normative contexts in which international economic law operates. Key themes will include the question of 'development' and developing countries, the role of expertise in global economic governance, and institutional aspects of judicial international dispute settlement. Special attention will be paid to the current crisis around the contemporary international trading system, and US-China relations. Students will be expected to engage with the principles and practice of international economic law both at the technical level, and at the level of critical reflection.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, The Regulation of International Trade, 4th ed., Routledge, 2012; P. Van den Bossche and W. Zdouc, The Law and Policy of the World Trade Organization: Text, Cases and Materials, 4th ed., Cambridge UP, 2017; S. Lester, B. Mercurio and A. Davies, World Trade Law: Texts, Materials and Commentary, 3rd ed., Hart Publishing 2018.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL413E Half Unit International Economic Law II

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Lang

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is a continuation of LL412E. In International Economic Law II, topics to be covered may include: Trade Remedies (Antidumping, Countervailing duties and Safeguards); Trade and Global Value Chains; State-owned Enterprises; Advanced Issues in WTO Dispute Settlement; Digital Trade; Trade and Taxation; and others. We will set aside time to consider contemporary issues, for example around international trade in the post-Trump era, digital trade, public international regulation of global finance, regional economic integration, development and developing countries in the trading system, and environmental aspects of international trade.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, *The Regulation of International Trade*, 4th ed., Routledge, 2012; P. Van den Bossche and W. Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL415E Half Unit Fundamentals of International Commercial Arbitration

This information is for the 2019/20 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course provides an introduction to the theory and practice of international arbitration, one of the most important mechanisms for settling disputes arising from commercial cross-border transactions. The focus is mainly on English arbitration law, which is put into a comparative perspective and contrasted especially with French law, which highlights the antagonism between Paris and London as the rival centres for international arbitration. Special attention is given to the applicable international treaties, the problems of conflicts of laws, and the different types of institutional and transnational rules that may have to

be taken into consideration in an international arbitration. This course prepares for 'Advanced Issues of International Commercial Arbitration'.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M. Moses, *The Principles and Practice of International Commercial Arbitration* (3rd edn, CUP 2017); G. Born, *International Arbitration - Law and Practice* (2nd edn, Kluwer 2015); N. Blackaby & C. Partasides, Redfern and Hunter on *International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret & S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard & J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (1999).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL416E Half Unit Advanced Issues of International Commercial Arbitration

This information is for the 2019/20 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Fundamentals of International Commercial Arbitration (LL415E) or equivalent course in previous studies or relevant practical experience with international arbitration

Course content: This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is designed to allow intense discussions of these problems in order to raise the sensitivity for the issues at stake and to lead to a research oriented approach. Despite its academic outset, the course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a most significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the role of internationally mandatory rules of law, arbitration & insolvency, the scope of the competence-competence principle; arbitration and fraud and corruption, or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of developments.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: G. Born, *International Commercial Arbitration* (2nd edn, Kluwer 2015); N. Blackaby / C. Partasides, Redfern & Hunter on *International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret / S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard / J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (Kluwer 1999). Cases and doctrinal articles for each topic.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2
Take home exam (100%).

LL417E Half Unit

International Commercial Contracts: General Principles

This information is for the 2019/20 session.

Teacher responsible: Dr Jan Kleinheisterkamp NAB7.09

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Firm knowledge of contract law and/or international sales law from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both examination and classes, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, *Commentary on the UNIDROIT Principles of International Commercial Contracts* (1st edn, OUP 2009); H. Kötz, *European Contract Law* (OUP 1997); K. Zweigert & H. Kötz, *An Introduction to Comparative Law* (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edn, OUP 2010); J. Gordley & A. von Mehren, *An Introduction to the Comparative Study of Private Law: Readings, Cases, Materials* (CUP 2006).

Assessment: Assessment path 1

Assessment path 2

Take home exam (100%).

LL418E Half Unit

Comparative Corporate Governance

This information is for the 2019/20 session.

Teacher responsible: Dr Carsten Gerner Beuerle, Prof Robert Kershaw NAB7.16 and Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course will focus on topical issues in corporate governance, including: corporate governance codes as a regulatory technique; corporate governance reform, firm performance and financial development; the role of the board of directors in large public companies and groups of companies; the division of powers between the managers and shareholders; directors' duties and enforcement of duties; executive remuneration; stakeholder representation, in particular employee representation, in corporate decision-making; shareholder activism and corporate short-termism; the market for corporate control as a corporate governance device.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading will be prescribed for each seminar. Preliminary reading can be found in P. Davies, *Introduction to Company Law* (OUP, 2nd edition 2010), chapters 5-9; R. Kraakman et al, *The Anatomy of Corporate Law* (3rd edition 2017); Gordon and W.G. Ringe (eds.), *The Oxford Handbook of Corporate Law and Governance* (2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL419E Half Unit

Law of Corporate Finance

This information is for the 2019/20 session.

Teacher responsible: Prof Robert Kershaw NAB7.16, Dr Carsten Gerner Beuerle and Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, reform and moving to a solvency test and financial assistance. The course will focus on English Law but reference will be made to the relevant EU rules.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one

month from the end of the module's teaching session by email.

Indicative reading: David Kershaw, *Company Law in Context* (2012) chapters 1, 17 and 19.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL420E Half Unit

International Law and Climate Change

This information is for the 2019/20 session.

Teacher responsible: Dr Stephen Humphreys NAB6.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law dealing with climate change with a view to assessing how risks and uncertainties caused by climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and legal questions raised by climate change cannot be addressed by reference to climate change law (or indeed international environmental law) alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (international economic law, human rights law, state responsibility, international migration law) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative and/or ethical bases for choosing between actions designed to prevent and/or manage climate change and its consequences, attentive to developmental imperatives and the theoretical concerns raised by the 'fragmented' nature of international law

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Paul Edwards, *A Vast Machine*, MIT Press (2013); Tim Mitchell, *Carbon Democracy*, Verso (2011); Rosemary Rayfuse and Shirley Scott (eds.), *Climate Change and International Law*, Edward Elgar (2011) Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (Eds.), *Climate Ethics: Essential Readings*, Oxford University Press (2010); Patricia Birnie, Alan Boyle, Catherine Redgwell, *International Law and the Environment*, Oxford University Press (2009); Nicholas Stern, *The Economics of Climate Change: The Stern Review*, Cambridge: Cambridge University Press (2007); IPCC, *Fifth Assessment Report*, Cambridge University Press (2014); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge University Press (2009); Larry Lohmann, *Carbon Trading*, Dag Hammarskjöld Foundation (2006); Lavanya Rajamani, *Differential Treatment in International Environmental Law*, Oxford University Press (2006).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL423E Half Unit

Media Law: Regulating Publication

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the legal and administrative regulation of mass media publication (principally the press, the broadcast media, and institutionalised Internet publication). The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practice, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), national security, and the protection of children.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Parkes and Mullis (eds), *Gateley on Libel and Slander* (Sweet & Maxwell, 12th ed, 2013); Fenwick and Phillipson, *Media Freedom Under the Human Rights Act* (OUP, 2006); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Doley and Mullis (eds), *Carter Ruck on Libel and Privacy* (6th edn, Lexis Nexis, 2010), Barendt, *Freedom of Speech* (OUP, 2nd ed 2005), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009); Cram, *A Virtue Less Cloistered: Courts, Speech and Constitutions* (Hart Publishing, 2002).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL424E Half Unit

Media Law: Regulating Newsgathering

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Scott NAB6.25

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector.

The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practice, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include protection of sources (in general; vis-a-vis police and security interests; payment of sources); access to information held by the state (official secrets; news management; freedom of information); access to the justice system (secret justice / physical access to courts; access to court documents; technology and the courts - text-based reporting and broadcasting; access to prisoners); media-police interaction; harassment and media intrusion, and surreptitious newsgathering practices (hacking, tapping and subterfuge).

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Warby, Moreham and Christie (eds), *Tugendhat and Christie: The Law of Privacy and the Media*, (2nd ed, OUP, 2011), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009), Davies, *Flat Earth News* (Chatto & Windus, 2008).art Publishing, 2002).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL425E Half Unit Competition Law

This information is for the 2019/20 session.

Teacher responsible: Dr Pablo Ibanez Colomo

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course is a comprehensive study of the main features of competition law. While the focus is on EU competition law, reference will be made to the laws of other jurisdictions (e.g. the United States and the UK) when these offer relevant points for comparison. The first part of the course examines the history and aims of competition law. It considers the role of economic analysis and its limitations in the light of non-economic considerations. The second part is a review of the major substantive fields: restrictive practices; the regulation of monopolies and dominant positions; distribution and cooperation agreements and merger control. The third part addresses the public and private enforcement of competition law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Whish and Bailey *Competition Law* (7th edn, 2011); Jones & Sufrin, *EC Competition Law: Cases and Materials*

(7th ed, 2014); Geradin, Layne-Farrar, and Petit, *EU Competition Law and Economics* (2011); Faull & Nikpay, *The EC Law of Competition* (3rd edn, 2004).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL426E Half Unit Theories of Human and Constitutional Rights

This information is for the 2019/20 session.

Teacher responsible: Dr Kai Moller NAB7.01

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period.

The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

Course content: The course will provide an introduction to theories of human and constitutional rights. The emphasis is on a combination of law and theory; to this end, each session will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The Debate about Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Matthias Kumm, Jeremy Waldron and Frances Kamm.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL427E Half Unit Constitutional Law and Theory

This information is for the 2019/20 session.

Teacher responsible: Prof Thomas Poole NAB 7.20

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The

course deals with the following topics: the scope of constitutional theory; the constitution of government; constitutional politics; representation; sovereignty; constituent power; constitutional rights; the rule of law; liberalism and republicanism; constitutional adjudication; cultural pluralism; theories of federalism; the cosmopolitan polity.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Much of the reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle. Indicative reading includes: Hobbes, Leviathan; Rousseau, The Social Contract; Montesquieu, The Spirit of the Laws; Burke, Reflections on the Revolution in France; Tocqueville, Democracy in America; Schmitt, Constitutional Theory; Oakeshott, On Human Conduct; Hayek, The Constitution of Liberty.

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL430E Half Unit Investment Treaty Law

This information is for the 2019/20 session.

Teacher responsible: Dr Christopher Thomas NAB 7.18

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The aim of the course is to introduce students to international investment law and dispute settlement, the latter emphasizing developments in investment treaty arbitration. The course focuses on the public international law rules and institutions that govern investments and investment treaty disputes. The course has five main elements: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards – such as national treatment, most-favoured-nation treatment, expropriation, and the minimum standard in international law – that may apply to the investor-state relationships; (4) recognition and enforcement of investor-state arbitral awards and interaction between international tribunals and national courts; and (5) the discussion of the future of international investment law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: CL Lim, J Ho, M Pappas, International Investment Law and Arbitration (CUP 2018); R Dolzer and C Schreuer, Principles of International Investment Law (2nd edn, Oxford 2012); G Van Harten, Investment Treaty Arbitration and Public Law (Oxford, 2006)

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL431E Half Unit Takeover Regulation in the UK and US

This information is for the 2019/20 session.

Teacher responsible: Prof Robert Kershaw NAB7.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course will look at the regulation of the bid process and at takeover defence regulation in the UK and the US. The course will look at: transaction structures; the function and effects of the market for corporate control; takeover process regulation; takeover defence regulation; deal protections; and regulating conflicts of interest in going private transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course will use materials distributed through Moodle and the course pack as well as D. Kershaw, Principles of Takeover Regulation (2016). Background material can be found in R. Kraakman et al, The Anatomy of Corporate Law (2004); B. Black, The Law and Finance of Corporate Acquisitions (1995); and W. Carney, Mergers and Acquisitions (2003).

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take home exam (100%).

LL432E Half Unit Mergers, Acquisitions and Restructurings in Europe

This information is for the 2019/20 session.

Teacher responsible: Mr Edmund-Philipp Schuster NAB6.30

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: There are no formal pre-requisites for this module.

Course content: In this module, we will explore the regulation of mergers, acquisitions and restructurings in Europe. We will focus on legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on the legal issues arising in cross-border transactions in the EU.

There are a number of reasons for corporations wanting to restructure their operations or to make acquisitions. For instance, firms may want to acquire a strategically valuable firm or asset in order to improve the efficiency (and thus increase the value) of their business operations; they may want to implement a better governance structure, enabling them to manage their undertaking more effectively; or they may want to subject themselves to more favourable legal or tax rules – including choosing among different national corporate laws.

EU law offers a range of legal vehicles for achieving such aims, and it is these vehicles we will explore throughout the term. In

particular, we will look at re-incorporations of EU companies based on the relevant Treaty provisions; takeovers of (listed) EU companies; domestic ("statutory") mergers; de-mergers and spin-offs; cross-border mergers in the EU; and the European Company. Content overview:

- The market for corporate control, corporate ownership structures and transaction structures for takeovers and restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers
- Employee participation (board-level co-determination) and board structures, and their relevance for corporate transactions
- The European Company (SE)
- Brief introduction to taxation of corporate transactions and tax-related drivers and incentives for intra-group reorganisation and company migration

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, *A Guide to Takeovers: Theory, Evidence and Regulation* (1992) 9 *Yale Journal of Regulation* 119; RD Kershaw, *Company Law in Context* (2012), Web Chapter A [available here: http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf]; S Grundmann, *European Company Law* (Intersentia, 2nd ed. 2011): Chapter 3 (Mergers & Divisions); R Kraakman et al, *The Anatomy of Corporate Law* (OUP, 2nd ed. 2009): Chapter 7 (Control Transactions); PL Davies et al, *The Takeover Directive as a Protectionist Tool?* [available here: <http://ssrn.com/paper=1554616>]; C Clerk et al, *A Legal and Economic Assessment of European Takeover Regulation* [available here: <http://www.ceps.eu/system/files/Takeover%20Bids%20Directive%20book%20-%20Final.pdf>]; E-P Schuster, *The Mandatory Bid Rule: Efficient, After All?* (2013) 76 *Modern Law Review* 529; KJ Hopt and E Wymeersch (eds), *European Takeovers: Law and Practice*; M Pannier, *The EU Cross Border Merger Directive – A New Dimension for Employee Participation and Company Restructuring* (2005) 16 *European Business Law Review* 1424.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL433E Half Unit

State and Market in the EU

This information is for the 2019/20 session.

Teacher responsible: Prof Pablo Ibanez Colomo NAB5.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Member States of the EU are not free to award subsidies to their national companies or to support them in a comparable way (by, inter alia, securing favourable supply conditions to the companies, granting loans at favourable rates or providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with

Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the control of State aid in the European Union (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part examines (i) the notion of State aid within the meaning of Article 107(1) TFEU and (ii) the conditions under which measures falling under the scope of that provision may be deemed compatible with the internal market. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Quigley, *European State Aid Law and Policy* (3rd Edition, 2015); Bacon (ed), *European Community Law of State Aid* (3rd Edition, 2017); Jones and Sufrin, *EU Competition Law* (online chapter) (6th Edition, 2017)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL434E Half Unit

Regulation: Strategies, Theories and Implementation

This information is for the 2019/20 session.

Teacher responsible: Prof Gordon Baldwin

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course provides an introduction to key topics in the study of regulation from with a comparative and generic perspective drawn from public administration, socio-legal studies and institutional economics. Topics include: What is regulation and Why do it? What is Good Regulation? Regulatory Strategies. Explaining Regulation. Enforcing Regulation. Risk Regulation. Regulatory Standard Setting. Regulatory Competition. Regulation and Cost Benefit Analysis.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: R. Baldwin, M. Cave and M. Lodge, *Understanding Regulation*, 2nd ed. (OUP, 2011); R. Baldwin, M. Cave and M. Lodge (ed.) *Oxford Handbook on Regulation* (OUP, 2010); R. Assessment path 2

Take home exam (100%).

LL435E Half Unit Innovation, Technology and Patent Law

This information is for the 2019/20 session.

Teacher responsible: Dr Siva Thambisetty NAB 7.29

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course critically examines UK and European patent law from different perspectives including the economic case for incentivising innovation, industry and technology-specific legal doctrine, international economic and political frameworks, institutional features, and national, regional and international pressures to harmonise patent law. Case studies from comparable jurisdictions such as US, India or Latin America will be used where appropriate. The course aims to deliver a sound grounding in legal principles while exploring unprecedented challenges raised by emerging technologies through appropriate case studies. Topics include 1) The economics of innovation and patenting/ Jurisprudential rationale for patents, legislative overview – international and domestic. 2) Priority, Novelty and Inventiveness 3) Industrial Application, disclosure and Genomic Inventions 4) The rationale for subject matter exclusions (Methods of medical treatment, diagnostic methods, computer programs, business methods, mental acts, discoveries, genetically modified animals, human embryonic stem cells) 5) Claim drafting, purposive construction and the doctrine of equivalents. 6) Direct/indirect infringement – international concerns 7) The research use exception and its application to post-genomics science 8) The TRIPS Agreement and the global pharmaceutical industry 9) The problem of patent enforcement 10) Patent offices and the property parameters of patents 11) Synthetic biology 12) Competition policy in the technology and pharmaceutical sector. This course complements a number of areas of national and international law and policy.

Students do not need a scientific background and will be supported in learning technical aspects.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Bently, Sherman, Gangjee and Johnson Intellectual Property Law, OUP 2018, Pila The Requirement for an Invention in Patent Law Oxford University Press 2010, Spence Intellectual Property, Clarendon Law Series 2007, Landes and Posner The Economic Structure of Intellectual Property Law Harvard University Press 2003, Robert Merges Justifying Intellectual Property Law HUP 2011, Jaffe & Lerner, Innovation and its Discontents Princeton University Press 2004.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL436E Half Unit Rethinking EU Law

This information is for the 2019/20 session.

Teacher responsible: Dr Michael Wilkinson NAB6.28

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all

Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: EU law is a fast-moving, dynamic area of law.

The course will address core aspects of EU law and develop a number of key themes in the public law and policy of the EU and its Member States. It will provide a sophisticated understanding of the legal, political and constitutional issues surrounding the central debates in the EU, from its origins to the recent crises, including the Euro-crisis and Brexit. Topics will include: - Law and Politics of European Integration - Fundamental Freedoms - Collective Autonomy and Social Justice - Authority of EU Law - Sovereignty, Identity and Pluralism - Political Economy - Future of the EU. The course will use general theoretical accounts in law and related disciplines in order to situate EU law in its economic, political and social context. It uses the LSE's unique interdisciplinary expertise in European law, constitutional theory, public law, and legal theory for a rich and varied study of the challenges facing the EU and its future development.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Chalmers et al., European Union Law (CUP, 2014); Craig and Deburca, EU Law: Text, Cases and Materials (OUP, 2015); Craig and DeBurca (eds.) The Evolution of EU Law (OUP, 2011); Maduro and Azoulay (eds.) The Past and Future of EU Law (Hart, 2010); Dickson and Eleftheriadis (eds.) Philosophical Foundations of EU Law (OUP, 2012); Tuori and Tuori, The Eurozone crisis: A Constitutional Analysis (CUP, 2013)

Assessment path 2

Take home exam (100%).

LL437E Half Unit International Criminal Law

This information is for the 2019/20 session.

Teacher responsible: Dr Stephen Humphreys NAB6.15

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some background in public international law is helpful for this course. If an introduction or refresher is needed, a standard textbook such as Malcolm Shaw's International Law is recommended.

Course content: The course looks at the history of and background to international criminal law and at its substantive content—its origins in the early Twentieth Century, its purported objectives, and the core crimes set out in the Rome Statute over which the International Criminal Court has jurisdiction (war crimes, crimes against humanity, genocide). The course will then examine in more detail a number of areas of contemporary interest (at least two from among the following: universal jurisdiction, immunity, torture, terrorism, international tribunals). The course is mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Cryer, Friman, Robinson & Wilmshurst, *An Introduction to International Criminal Law and Procedure* (Cambridge), 2nd edition (2009). Simpson, *Law, War and Crime, Polity* (2007).

Indicative reading

Gary Bass, *Stay the Hand of Vengeance. The Politics of War Crimes Tribunals* (Princeton, 2000); Judith Shklar, *Legalism* (Harvard, 1964); Mark Osiel, *Mass Atrocity, Collective Memory & the Law* (Transaction Publishers, 1997); T McCormack & G Simpson, *The Law of War Crimes* (Kluwer 1997); W Schabas, *The International Criminal Court* (Cambridge, 2001); H Arendt, *Eichmann in Jerusalem* (Penguin, 1997).

Assessment: Assessment path 1

Assessment path 2

Take home exam (100%).

LL438E Half Unit Commercial Remedies

This information is for the 2019/20 session.

Teacher responsible: Dr Solene Rowan NAB 7.26 and Prof Charles Webb NAB 6.26

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Pre-requisites: Undergraduate contract and tort law

Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?

Teaching: 24 hours

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)

Indicative reading: Rowan, *Remedies for Breach of Contract: A Comparative Analysis of the Protection of Performance* (OUP 2012). Burrows, *Remedies for Torts and Breach of Contract* (3rd edn OUP 2004). Campbell, Halson, Harris, *Remedies in tort and Contract* (2nd edn CUP 2002). Andrews, Clarke, Tettenborn and Virgo, *Contractual Duties: Performance, Breach, Termination and Remedies* (Sweet & Maxwell 2012). Peel, Treitel: *The Law of Contract* (14th edn 2015). Chitty on Contracts (32nd edn Sweet & Maxwell 2015)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL439E Half Unit UK Corporate Law

This information is for the 2019/20 session.

Teacher responsible: Prof Robert Kershaw NAB7.16

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in *Foss v Harbottle*; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006).

Teaching: 20 hours of seminars in the MT.

24 hours (Executive LLM)

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core Texts: David Kershaw, *Company Law in Context* (2nd ed, OUP 2012). Paul Davies, Gower and Davies' *The Principles of Modern Company Law* (10th eds, Sweet & Maxwell, 2016). For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:

Session 1:

Paul Davies, Gower and Davies' *The Principles of Modern Company Law* (6th eds, Sweet & Maxwell, 1996), Chapter 1. Extracts from N. Lindley, *Treatise on the Law of Companies (as a Branch of the Law of Partnerships)* (1889). F. Palmer, *Company Law: A Practical Handbook for Lawyers and Business Men* (5th eds, 1905). Extracts from D. Kershaw, *The Path of Corporate Fiduciary Law* (2012) 8 *New York University Journal of Law and Business* 395. M. Lobban, *Corporate Identity and Limited Liability in France and England* 1825-67, 25 *Anglo American Law Review*. 397, 403-04 (1996). *Ernst v Nichols* (1857) 10 *Eng. Rep.* *Ashbury Railways v Riche* [1874-80] All ER Rep Ext.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL440E Half Unit Digital Rights, Privacy and Security

This information is for the 2019/20 session.

Teacher responsible: Dr Orla Lynskey (NAB 6.07)

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.

Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits.

Personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks across the globe, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while other frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will do this predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. However we will also examine aspects of the US legal framework as it differs considerably from other global legal regimes. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection and privacy rules to online behavioural advertising and to State surveillance.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Lynskey, *The Foundations of EU Data Protection Law* (OUP, 2015). Mayer-Schönberger, *Delete: The Virtue of Forgetting in the Digital Age* (Princeton UP, 2009). Kuner, *Transborder Data Flows and Data Privacy Law* (OUP, 2013). Bygrave, *Data Privacy Law: An International Perspective* (OUP, 2015)

Assessment: Assessment path 1
Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL441E Half Unit Employment Law

This information is for the 2019/20 session.

Teacher responsible: Dr Astrid Sanders NAB7.19

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be

offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Detailed syllabus of readings will be available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 1-9 or Hugh Collins, KD Ewing and Aileen McColgan, *Labour Law* (2nd edition, CUP 2019).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL442E Half Unit Corporate Restructuring

This information is for the 2019/20 session.

Teacher responsible: Ms Sarah Paterson NAB6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the principles and policies underlying the rescue of financially distressed companies and businesses. The course considers formal legal procedures available for dealing with companies and businesses in financial distress as well as informal approaches to rescue. Topics include: Chapter 11 as a Rescue Procedure. Corporate Rescue Procedures in the UK: Informal and Formal Procedures. Recognition of Rescue Procedures: EC and International. The Theory and Philosophy of Rescue.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (2nd edition). Wider background reading will include some comparative law reform and other material including: R. Olivares-Caminal et al, *Debt Restructuring* (Oxford University Press, 2013) and the ABI Commission to Study Reform of Chapter 11 Final Report

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL443E Half Unit Corporate Bankruptcy

This information is for the 2019/20 session.

Teacher responsible: Ms Sarah Paterson NAB6.06

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the principles and policies underlying the legal treatment of corporate bankruptcy. The impact of these procedures and approaches on third parties, for example corporate groups, secured and unsecured creditors, directors and employees, is also considered. Topics include: Setting aside transactions; The *pari passu* principle and preferential claims; Secured creditors and security devices; Quasi-security devices for the unsecured creditor; The problem of corporate groups; Company directors in troubled times; Employees in distress and EC and international recognition in corporate bankruptcy

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2009) (2nd edition).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL444E Half Unit International Law and the Use of Force

This information is for the 2019/20 session.

Teacher responsible: Dr Christopher Thomas NAB7.18

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Executive version of an existing taught masters course (LL4A8).

Course content: This course examines the international law relating to when it is permissible to use force (*jus ad bellum*). The aim of this course is to develop an understanding of the principles of international law that regulate the use of force in international society. It concentrates on the prohibition of resort to force in Article 2(4) of the United Nations Charter and the exceptions to that prohibition. It looks in detail at the right of self-defence, humanitarian intervention and the responsibility to protect, pro-democratic intervention, the protection of nationals and the criminalization of aggression. The use of force by or with the authorization of the United Nations is also considered.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A detailed reading list will be issued in the course pack. See, in particular: Dinstein, *War, Aggression and Self-Defence* (5th ed, 2011); Gray, *International Law and the Use of Force* (3rd ed, 2008).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL445E Half Unit Cultural Property and Heritage Law

This information is for the 2019/20 session.

Teacher responsible: Dr Tatiana Flessas NAB7.27

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, *Dissonant Heritage: the management of the past as a resource in conflict* (1996 J. Wiley); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); John Henry Merryman, *Thinking about the Elgin Marbles: critical essays on cultural property, art and law* (2000 Kluwer Law International); Nick Merriman, *Beyond the Glass Case: the past, the heritage and the public in Britain* (1991); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Richard Prentice, *Tourism and Heritage Attractions* (1993); G.J. Ashworth and P.J. Larkham, eds. *Building a New Heritage: tourism, culture, and identity* (1994); Peter Mandler, *The Fall and Rise of the Stately Home* (1997); Patrick J

O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. *Historic Cities and Sacred Sites: cultural roots for urban futures* (2001); Federico Mayor, *Memory of the Future* (1995); Peter J. Fowler, *The Past in Contemporary Society: then, now* (1992); David Brett, *The Construction of Heritage* (1996); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL446E Half Unit Art and Antiquities Law

This information is for the 2019/20 session.

Teacher responsible: Dr Tatiana Flessas NAB7.27

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of antiquities and works of art, and the problems that arise in regulating markets in art, antiquities and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art and antiquities trades. Against this legislative background, the course examines important cases in disputes regarding looting and provenance of antiquities, and questions of commodification and sale of cultural artefacts and antiquities, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. 'Antiquity Law' is an engagement with the problems of the market(s) in antiquities and the legal and ethical burdens on the participants in this trade. We will look at the practices and constraints that arise in the context of both private purchasers/dealers and museums acquiring antiquities. We will focus on the case that the government of Italy brought against Marion True, the erstwhile Curator of Antiquities at the Getty Museum, and we will consider how that ground-breaking prosecution changed some of the practices in this area, as well as added to the toolbox for nations seeking repatriation of cultural objects. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Colin Renfrew, *Loot, Legitimacy and Ownership:*

The Ethical Crisis in Archaeology (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL447E Half Unit International Law: Courts and Tribunals

This information is for the 2019/20 session.

Teacher responsible: Dr Devika Hovell NAB6.32

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course introduces students to the practice and theory of international legal dispute resolution, focusing on dispute settlement before courts and tribunals. The former Prosecutor of the Yugoslav Tribunal, Richard Goldstone, resolved that: 'it seems to me that if you don't have international tribunals, you might as well not have international law'. Given the proliferation of courts and tribunals applying and enforcing international law, certain scholars have argued we are witnessing the emergence of an 'international judicial system' (Martinez). The course involves three main elements:

1. Firstly, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyze and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2011) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take home exam (100%).

LL448E Half Unit

Terrorism and the Rule of Law

This information is for the 2019/20 session.

Teacher responsible: Prof Conor Gearty NAB 6:11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism (and, latterly, the emerging field of 'extremism').

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: There are four pieces ideally to be read before we meet:

(i) Richard English *Terrorism: How to Respond* (Oxford 2009; pb 2010).

(ii) Conor Gearty, *Liberty and Security* (Polity, 2013).

(Note both of these books are in paperback, and short!)

(iii) Conor Gearty, 'Terrorism and Human Rights' in Gearty, *Selected Essays on Human Rights and Terrorism* (Cameron May 2008), ch 24 – I have a PDF available.

(iv) Conor Gearty, 'Terrorist threats, Anti-terrorism and the Case against the Human Rights Act' in F Cowell (ed), *Critically Examining the Case against the Human Rights Act* (Hart 2017) I have a word version.

Please try to ensure that you have completed this reading prior to

the module.

Further reading:

(v) A marvellous fund of information is at: <http://www.parliament.uk/topics/Terrorism.htm>

Assessment:

Either a take-home examination or 8,000 word assessed essay (100%).

LL449E Half Unit

Cyberlaw

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Murray NAB7.11

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets).

It begins by providing a theoretical framework for the regulation of the Internet, examining questions such as whether the internet is capable of regulation, whether such regulation should be neutral and who should assume the task of regulating the online environment. Students taking the course will be expected to develop knowledge and understanding of the different values and interests brought to bear in the regulation of information technologies and communities.

Armed with this theoretical background, students will then be asked to consider how these values are reflected in the regulatory design of the online environment. This examination will be conducted by considering a number of case studies relating to online privacy, defamation, criminal activity and market power. The

course concludes by examining the topical and politically charged question of whether Internet Service Providers should be allowed to vary service conditions by types of content.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Murray, *Information Technology Law: The Law and Society* (OUP, 4th ed, 2019). Reed & Murray, *Rethinking the Jurisprudence of Cyberspace* (Edward Elgar, 2018). Murray, *The Regulation of Cyberspace* (Routledge, 2007). Lessig, *Code Ver, 2.0* (Basic Books, 2006). Zittrain, *The Future of the Internet* (Penguin, 2009). Reed: *Making Laws for Cyberspace* (OUP, 2012). Sunstein, *Republic.com 2.0* (Princeton UP, 2009).

Assessment: Either a take-home examination or 8,000 word assessed essay (100%).

LL4COE Half Unit Taxation of Wealth

This information is for the 2019/20 session.

Teacher responsible: Dr Andrew Summers NAB.6.06

Availability: This course is available on the Executive LLM.

This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: This course is suitable for students from any disciplinary background within the social sciences. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: The course examines the taxation of wealth from a variety of academic perspectives, drawing on research from political theory, economics, sociology and law. Taxes on wealth are defined broadly to include taxes on transfers of wealth, returns on wealth, and holdings of wealth. The course equips students with an interdisciplinary framework for explaining and evaluating taxes on wealth, and applies these approaches to existing tax policies and options for reform. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions. Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers: inheritance/estate tax, lifetime receipts tax, comprehensive income tax; (ii) taxes on returns: capital gains tax, capital income tax and (iii) taxes on holdings: property tax, land-value tax, net wealth tax.

Teaching: 25 hours of seminars in the ST.

24-26 hours of contact time.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the ST.

Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of subheadings, and bibliography) based on past or sample summative essay titles.

Indicative reading: Atkinson, *Inequality: What can be Done?* (Harvard University Press 2015); Graetz & Shapiro, *Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth* (Princeton University Press 2005); Hills et al, *Wealth in the UK: Distribution, Accumulation and Policy* (OUP 2013); Institute for Fiscal Studies, *The Structure and Reform of Direct Taxation: The Meade Report* (Allen & Unwin 1978); Institute for Fiscal Studies, *Tax by Design: The Mirrlees Review, Vols 1 & 2* (OUP 2011); Murphy and Nagel,

The Myth of Ownership: Taxes and Justice (OUP 2002); Piketty, *Capital in the Twenty-First Century* (Harvard University Press 2014); Sandford, *Taxing Personal Wealth* (Allen & Unwin 1971); Scheve & Stasavage, *Taxing the Rich: A History of Fiscal Fairness in the United States and Europe* (Princeton University Press 2016); Waldron, *The Right to Private Property* (OUP 1991); Young, *The Myth of Millionaire Tax Flight: How Place Still Matters for the Rich* (Stanford University Press 2017)

Assessment: Assessment path 1

Take home exam (100%) in the ST.

Assessment path 2

Essay (100%, 8000 words) in the ST.

LL4CPE Half Unit Tax Avoidance

This information is for the 2019/20 session.

Teacher responsible: Dr Michael Blackwell NAB 7.30

Availability: This course is available on the Executive LLM.

This course is not available as an outside option.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden.

However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) the OECD response to BEPS; (vii) BEPS and the EU; and (viii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online and hard copy materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, which will typically be held in the first half of September, December and April. Where there is student demand we will also offer modules taught over two intensive weekends. For the week-long sessions, the module will run from either Monday to Friday, or Sunday until Friday with a rest day on Wednesday.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Dhammika Dharmapala, 'What Do We Know about Base Erosion and Profit Shifting? A Review of the Empirical Literature' (2014) 35(4) *Fiscal Studies* 421. J Feldman and JA Kay, 'Tax Avoidance' in Paul Burrows and Cento G Veljanovski (eds), *The Economic approach to law* (Butterworths 1981). Edward J

McCaffery, *Income Tax Law: Exploring the Capital Labour Divide* (OUP 2012) 12-22; 182-202 (ie 1.6 until the end of Chapter 1 and 'Chapter 7, 'A Summary, of Sorts: Anatomy of a Tax Shelter')

Judith Freedman, 'Interpreting Tax Statutes: Tax Avoidance and the Intention of Parliament' (2007) 53 LQR 123.

David A Weisbach, 'An Economic Analysis of Anti-Tax-Avoidance Doctrines' [2002] *American Law and Economics Review* 88.

Grahame R Dowling, 'The curious case of corporate tax avoidance: Is it socially irresponsible?' (2014) 124 *Journal of Business Ethics* 173.

Judith Freedman, 'The Tax Avoidance Culture: Who is Responsible?' (2006) 59 *Current Legal Problems* 359.

Kevin Holland, Sarah Lindop, and Fatimah Zainudin, 'Tax Avoidance: A Threat to Corporate Legitimacy? An Examination of Companies' Financial and CSR Reports' [2016] (3) *BTR* 310

Assessment: Assessment path 1

Take home exam (100%) in the MT.

Assessment path 2

Essay (100%, 8000 words) in the MT

LL450E Half Unit

Banking and Finance Law: Regulating Retail, Consumer, and SME Markets

This information is for the 2019/20 session.

Teacher responsible: Dr Joseph Spooner

Availability: This course is available on the Executive LLM. This course is not available as an outside option.

Course content: As the past decade has transformed understandings of finance and the economy, it has generated increasingly widespread recognition of the economic centrality of household finance. Responsibility for both the Global Financial Crisis and subsequent Great Recession can be attributed to failures of household credit markets. Consumer expenditure accounts for over 50% of GDP in most OECD economies, meaning that the financial markets and products powering this spending are of central policy importance. Key contemporary problems of economic stagnation, inequality, and political instability can all in some ways be linked to problems arising in consumer financial markets, which are increasingly important sites of legal and political activity. The economic significance of SME finance is similarly clear. Small and Medium Enterprises (SMEs) account for 99% of firms and approximately 70% of jobs in OECD countries, and questions of how these firms access finance raise perennial policy concerns. The political and regulatory disruption of Brexit also makes this a key time for the study of banking and finance law as it relates to consumers and SMEs. Questions arise as to the future for consumers, SMEs, and financial institutions, as regulatory regimes and capital flows are changed by the UK's departure from the EU.

The significance and expansive reach of the consumer and SME dimensions of financial law are not matched by coverage in typical law school curricula – this course aims to address this imbalance by presenting a unique offering. The course begins by discussing key principles and theoretical ideas of retail financial market regulation. It considers the nature and structure of consumer and SME financial markets, examining the institutions and sources that create the ground rules of markets, involving questions of how financial laws and regulations in these markets are made, applied, and enforced. The course applies and tests these ideas in examining discrete markets and areas of law, drawing on a combination of international norms and detailed examples from European, North American and English law. The course is structured uniquely around a thematic approach, discussing legal material through key questions of consumer/SME financial law and policy. Themes include:

- The place(s) of consumers and small enterprises in the Real Economy
- Aims and justifications of regulation in consumer and SME financial markets
- Consumers, SMEs and financial stability (including prudential

regulation and its interaction with consumer/SME protection)

- Access to finance (basic banking; the cashless society; fintech)
- Complexity in financial products (including product design and the regulation of contract terms; information asymmetry and disclosure regulations; behavioural perspectives and 'nudging')
- Mis-selling scandals and legal responses (including mortgage lending crises and 'responsible lending'; SME derivatives mis-selling and investor protection rules)
- Cross subsidisation, price discrimination, and fairness in financial services pricing ('the poor pay more'; the 'loyalty penalty')
- The problem of high-cost credit and usury regulation (the Wonga saga and payday loan regulation; bank overdrafts; the role of price regulation in financial markets)
- *Wall Street v Main Street* (dispute resolution and enforcement; financial law-making)
- Financial failure and default (entrepreneurship and bankruptcy law; over-indebtedness and consumer bankruptcy)

Teaching: This is an intensive module, which will be delivered through interactive seminars. The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online and hard copy materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, running from Monday to Friday.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Formative assessments are set by teachers during the course and students will be given a submission date of approximately one month from the end of the teaching session. Feedback will be provided within two weeks following submission, either on Moodle or via email. The word limit for formative essays is 2000 words.

Indicative reading: General:

- Sir Ross Cranston, Emiliios Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)

AND

- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)

OR

- Geraint Howells, Christian Twigg-Flesner and Thomas Wilhelmsson, *Rethinking EU Consumer Law* (1 edition, Routledge 2017).

Why Regulate of Consumer and SME Financial Markets?

- Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.
- George A. Akerlof, 'The Market for 'Lemons'', 84 *The Quarterly Journal of Economics* 488 (1970)
- David Caplovitz, *Poor Pay More: Consumer Practices of Low-Income Families* (Free Press 1968).
- Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The Journal of Finance* 1327.
- Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Complexity in Financial Products: Contract-as-Product

- Oren Bar-Gill, *Seduction by Contract: Law, Economics, and Psychology in Consumer Markets* (OUP Oxford 2012), Chapter 1.
- Margaret Jane Radin, *Boilerplate: The Fine Print, Vanishing Rights, and the Rule of Law* (Princeton University Press 2012), Chapters 1-4.

Consumers, SMEs, and Financial Stability: Prudential Perspectives

- Anat Admati and Martin Hellwig, *The Bankers' New Clothes: What's Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
- Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
- Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)

Sample Reading:

- Sir Ross Cranston, Emiliios Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking*

- Law (3rd edition, OUP 2018)
- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)
 - Anat Admati and Martin Hellwig, *The Bankers' New Clothes: What's Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
 - Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
 - Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)
 - Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.
 - Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The Journal of Finance* 1327.
 - Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Assessment: Assessment path 1

Take-home assessment (100%).

Assessment path 2

Essay (100%, 8000 words).

Students will be examined through a combination of an (8,000 word) assessed long essay (which may take the form of a policy paper) or take-home examination (6,000 words). The take-home examination will be uploaded and submitted electronically, and will be set two months after the completion of the intensive teaching. Video revision/question-and-answer sessions will be offered to students between the end of the teaching session and the exam.

MG406E Half Unit Behavioural Decision Science

This information is for the 2019/20 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course introduces students to the fascinating field of behavioural "decision" science. We will explore a selection of current research topics relevant to personal and managerial decision making as well as policy-making. For each topic students will get acquainted with key psychological phenomena and principles of behavioural decision science through interactive lectures, and become alert to cognitive biases and learn how to overcome them. Students will read pre-assigned scientific articles and in class discuss lessons learned, limitations and implications of these concepts for the development of decision making competence in their organisation (e.g. via design of policies, training programmes, or tools). Topics will include: Origin of Behavioural Decision Science; the Building Blocks of Behavioural Decision Science: Preferences, Utility and Value; Probability, Uncertainty and Risk; Choice Architecture and Behavioural Change; Heuristics and Biases in Decisions about Money, Health, Consumer Products and People.

Teaching: 15 hours of lectures and 8 hours of seminars in the MT.

Formative coursework: The formative assignment will take place on the final day of the course after all the lectures and seminars have been completed. The assignment will consist of a plenary presentation in which students divided into small groups will be asked to give a short presentation discussing an intervention (de-biasing technique, nudging, or choice architecture) that can be used to tackle the most important biases in a decision making problem of their choice. Student groups will develop their plenary presentations during seminars while interacting with the course teachers and other students. The formative feedback will be given at a team level, and will focus on the rigour and use of behavioural science concepts learned in the course.

Indicative reading: Ariely, D. (2008). *Predictably Irrational: The Hidden Forces That Shape Our Decisions*. Harper Collins; Baron,

J. (2000), *Thinking and Deciding* (3rd edition), Cambridge: Cambridge University Press; Bazerman, M. (2017) *Judgment in Managerial Decision Making*. New York: Wiley. 8th edition; Beach and Connolly (2005), *The Psychology of Decision Making: People in Organizations*, (2nd Edition), Sage; Hastie, R., and Dawes, R.M. (2001). *Rational Choice in an Uncertain World*. Sage Publications, Thousand Oaks; Kahneman, D. (2011) *Thinking Fast and Slow*. London: Allen Lane; Melnikoff, D. E., & Bargh, J. A. (2018). The mythical number two. *Trends in cognitive sciences*, 22(4), 280-293. Plous, S. (1993), *The Psychology of Judgment and Decision Making*, New York: McGraw Hill; Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited; Sunstein, C.R. Thaler, R.H. (2008) *Nudge - New Haven, CT: Yale University Press*; Yates, F. J. (2003). *Decision Management: How to Assure Better Decisions in Your Company*. Jossey-Bass.

Assessment: Coursework (100%, 3000 words) in the MT.

The summative assignment will include two parts. In the first part (no more than 1,000 words), you will be asked to describe and critically evaluate how the decision problem as well as the intervention presented for the formative assessment came about. This part will be less academic because we will expect you to use individual reflection, and academic references will not be needed. In the second part of the essay (no more than 2,000 words), you will justify the specific nudging or debiasing intervention, with reference to behavioural literature, and theories. The first part of the essay will count for 25% of your mark while 75% will come from the second part.

MG440E Half Unit Managerial Economics (modular)

This information is for the 2019/20 session.

Teacher responsible: Dr. Ricardo Alonso

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019-2021 cohort.

Course content: A graduate-level introduction to the foundations of managerial economics and its application to high-level business decisions. Topics include:

1. Economics as a theory of organisation.
2. Demand, supply, and equilibrium: the determinants of consumers' and firms' market responses, the nature of non-strategic interaction, government intervention, international trade
3. Externalities and market failure
4. Strategic interaction and Game Theory
5. Choice under uncertainty: attitudes towards risk
6. Information and efficiency: adverse selection
7. Price discrimination: nonlinear pricing, social economics
8. Horizontal and Vertical Differentiation
9. Competition

Teaching: Scheduled over two modules. Nine 3.5 hour sessions plus two review sessions.

The course will run between the following dates:

- 26 August - 07 September 2019
- 16 - 21 December 2019

Formative coursework: Students will be expected to produce 1 problem set in the MT.

Indicative reading: Optional textbook: B. Douglas Bernheim and Michael D. Whinston, *Microeconomics*, McGraw Hill, 2008. Further readings will be provided at the beginning of the course.

Assessment: Coursework (20%), class participation (15%) and take home exam (65%).

MG441E Half Unit Foundations of Management (modular)

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Willman

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

This information in this course guide pertains to the 2019-2021 cohort.

Course content: A thorough grounding in the key management disciplines. Students will be provided with an overview of the development of Management disciplines and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Each field will cover Origins and disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate.

Teaching: 35 hours of lectures in the MT.

Scheduled over 2 modules – 10 sessions of up to 3.5 hours each.

The course will run between the following dates:

- 26 August - 07 September 2019
- 16-21 December 2019

Lectures:

1. Course Introduction and the Origins of Management
2. Management and Firm
- 3: The Rise and Decline of Labour
- 4: Taylorism, Motivation and Performance
- 5: The Rise of Human Resources Management
- 6: Making Decisions
- 7: Understanding Organisational Structures
- 8: The Origins of Modern Strategy
9. Contemporary Strategic Management: Firms as Bundles of Resources
- 10 Managed by Markets?

Seminar classes:

1. Managers and Managerial Work
2. The Firm and the Manager
3. Internal Labour Market and Boundaries of Firms
4. Taylorism and Toyotaim
5. UBS Case study
6. Understanding Decision Biases
7. Understanding Organisational Structures
8. The Analysis of Competitive Forces
9. The Analysis of Competences
10. Strategy and Market oversight

Formative coursework: 2,000 word essay

Indicative reading: Paul Willman: Understanding Management: Social Science Foundations Oxford University Press, September 2014.

Assessment: Class participation (10%) and take home exam (60%) in the LT.

Case assignment (30%) in the MT.

MG443E Half Unit Organisational Behaviour and Leadership (modular)

This information is for the 2019/20 session.

Teacher responsible: Dr Emma Soane NAB 4.02

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option. This information in this course guide pertains to the 2019-2021 cohort.

Course content: Understanding individual attitudes and behaviour in an organisational context is fundamental in any management role. This course aims to review psychological theories as they apply to organisations and demonstrate how this perspective contributes to understanding behaviour at work. It brings together theory and practice by using group exercises, presentations, and

course work to apply the course material to business problems. By the end of the course, you should be able to critically evaluate some of the main theories of organisational behaviour and apply those theories to problems in your organisations.

The course will also focus on developing your leadership style and skills. Drawing on relevant theories, we will consider your personal leadership style and its implications for working with others. We will discuss the leadership skills that are critical to effectiveness, and consider how to apply these skills to build positive organisational environments. You will be asked to complete two in-depth evaluations, and profiles will be used to guide your leadership development.

Topics include personality and individual differences, motivation and rewards, creativity, team processes, leadership, negotiations, power and politics, organisational culture.

Teaching: 35 hours of teaching spread over the first 3 modules. 10 sessions of 3.5 hours each. The teaching is highly participative and includes breakout discussions and exercises.

The course will run between the following dates:

26 August - 07 September 2019

16-21 December 2019

20 April - 02 May 2020

Formative coursework: A practice exam will be provided and feedback will be given on this assignment.

Indicative reading: The course relies on journal articles (for example, Journal of Applied Psychology, Journal of Organizational Behaviour). A complete reading list will be provided at the start of the course. There is no required textbook. The following textbook is recommended for students who would like further reading: French, R., Rayner, C., Rees, G. & Rumbles, S. (2011) Organizational Behaviour, 2nd edition. John Wiley & Sons, Ltd.

Assessment: Class participation (5%), take-home assessment (65%) and group project (30%).

Class participation will be based on group presentations.

The take-home assessment will be an individual essay.

MG445E Half Unit Marketing Strategy (modular)

This information is for the 2019/20 session.

Teacher responsible: Prof Om Narasimhan

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019-2021 cohort.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential to building an effective marketing strategy. Peter Drucker, the father of business consulting once famously remarked, "Because the purpose of business is to create a customer, the business enterprise has two—and only two—basic functions: marketing and innovation". In today's highly competitive business environment these words ring even more true: a well-designed marketing strategy can make all the difference between success and failure in the marketplace. While marketing is commonly associated with consumer goods companies (e.g., Unilever) it would be myopic to restrict the relevance of marketing to such instances alone. Marketing, ultimately, is about understanding and shaping behaviour. Accordingly, banks and other financial institutions, as well as governmental, medical, and not-for-profit organisations - from those that design and sell financial products, to those that implement public policy (e.g., those dedicated to reducing drunk driving, increasing literacy, and encouraging safe contraception), have all found that a well-thought out marketing strategy can be a critical arbiter of success even in this "ideas marketplace."

By using a wide range of quantitative as well as qualitative methods, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that

are essential to a good marketing strategy. The aim is to develop an analytical tool-kit that will be applicable to a wide range of industries and functions.

Teaching: Scheduled over two modules – one of which will take place overseas. Teaching will be spread across 10 sessions of up to 4 hours each.

Module 3 (20 April -2 May 2020), Module 4 (14 - 19 June 2020)

Formative coursework: Students will complete a Marketing Simulation during module three and take part in real-life company case discussions during the overseas module. Feedback on both will set the stage for their group project and take home assignment.

Indicative reading: There is no required textbook. Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (55%), class participation (15%) and group assignment (30%).

MG446E Half Unit Strategy, Organisation and Innovation (modular)

This information is for the 2019/20 session.

Teacher responsible: Dr Lourdes Sosa

(Three sessions will be taught by a guest teacher - Dr Mia de Kuijper)

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2018-2020 cohort.

Course content: The course seeks to understand differences in profitability across (for-profit) firms with the objective of designing strategic recommendations for managers to improve (and defend) their firms' competitive positions. To do so we will first review industry-wide as well as firm-specific determinants of short-term profitability. On that foundation we will look at long-term determinants of profitability including dynamic capabilities and innovative ability. The course aims to balance exposure to general strategic principles and specific practical applications. To that purpose, we will use theoretical frameworks to analyse practical cases from a wide array of firms in varied countries.

Topics include business models, industry structure and competition, value proposition, strategic resources and inimitability, dynamic capabilities, disruptive innovation, power nodes strategy and scenario planning.

Teaching: Taught over 10 3.5-hour sessions spread over 2 modules. The teaching is highly participative and includes lectures, breakout discussion and exercises.

The course will run between the following dates:

- 02 – 07 September 2019
- 06 – 11 January 2020

Formative coursework: Feedback will be given on one short essay, preparing students for the exam, as well as on in-class exercises.

Indicative reading: The course relies on journal articles (for example, *Strategic Management Journal*). A complete reading list will be provided at the start of the course. Sample texts include the following: Porter, M.E. (2008) *The Five Competitive Forces that Shape Strategy* (Harvard Business Review); Christensen, C., Bower J. (1996) *Customer Power, Strategic Investment, and the Failure of Leading Firms* (*Strategic Management Journal*); Teece, D., Pisano, G., Shuen, A. (1997) *Dynamic Capabilities and Strategic Management* (*Strategic Management Journal*); De Kuijper, M. (2009) *Profit Power Economics*.

Assessment: Essay (30%), class participation (10%) and take home exam (60%).

MG447E Half Unit Foreign Direct Investment and Emerging Markets (modular)

This information is for the 2019/20 session.

Teacher responsible: Prof Saul Estrin

Dr Christine Cote

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option. The information in this course guide pertains to the 2018-2020 cohort.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s, and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as Russia, and Latin American countries such as Brazil and Argentina. The new institutional economics has recently developed as a field to understand the impact of variation in institutions on economies performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and more recent concept such as the resource based view. We will then provide an analysis of economic performance and growth in emerging markets building on the new institutional economics and working with a large variety of datasets and sources. The remainder of the course is devoted to specific topics of MNEs in emerging markets. These include the determinants and impact of FDI; entry mode choices; measures of institutional distance; outsourcing; and emerging market multinationals.

Outline of Lectures: Lectures 1 and 2: Models and Strategies of the Multi-National Enterprise (MNE) Lectures 3 & 4: Growth and Institutions in Emerging Markets Lecture 5: Trade, Trade Agreements and Investor Protection Lecture 6: The Determinants of Foreign Direct Investment (FDI) into Emerging Markets Lecture 7: The Impact of FDI on Emerging Markets Lecture 8: MNEs and Modes of Entry Lecture 9: Emerging Market Multinationals Lecture 10: FDI choices and firm strategies- case presentations

Teaching: Scheduled over three modules, one of which will take place overseas – 10 sessions of up to 3.5 hours.

The course will run between the following dates:

- 02 – 07 September 2019
- 03 – 08 November 2019
- 06 – 11 January 2020

Formative coursework: Students will be expected to produce 1 essay in the MT.

Indicative reading: R. Caves, *Multinational Enterprise and Economic Analysis*, 2nd Edition, Cambridge University Press 1996; P. Ghemawat, *Redefining Global Strategy*, Harvard Business School Press, 2007; J. Williamson, *The New Institutional Economics*, *Journal of Economic Literature*, 2000; Estrin et. al., *Entry Mode in Emerging Markets*, *Strategic Management Journal*, 2009; T. Khanna and K Palepu, *The Future of Business Groups in Emerging Markets*, *Academy of Management Journal* 2004.

Assessment: Take home exam (60%) in the LT. Presentation (30%) in the MT.

Class participation (10%) in the MT and LT.

MG454E**Leadership in Practice (modular)**

This information is for the 2019/20 session.

Teacher responsible: Dr Emma Soane NAB 4.02

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2018-2020 cohort.

Course content: This course will provide you with insights into the foundations for leadership, how leadership skills can be developed, and you can create optimum environments for effective leadership and performance. Sessions will be interactive and participative. There will also be group exercises within the sessions to encourage debate and reflection upon how to put these concepts into practice.

Teaching: Five 3.5-hour sessions spread out over three LSE modules.

The course will run between the following dates:

26 August - 08 September 2018

15-20 December 2018

01 - 13 April 2019

Formative coursework: There is an optional assignment that will provide an opportunity to reflect upon the leadership style and skills assessments covered in module 2. This 1000-word assignment will discuss personal leadership style and skills, and will be submitted after Module 2.

Indicative reading: To be confirmed at the beginning of the course.

Assessment: This is a non-assessed course. Some of the material for this course will form part of the MG443 Organisational Behaviour assessment. The relevant material will be specified for the assessment.

MG457E**Foundations of Management 2: Financial Control and Governance (modular)**

This information is for the 2019/20 session.

Teacher responsible: Dr Yally Avrahampour NAB 4.37

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2019-2021 cohort.

Course content: This course teaches, over two modules, topics relating to financial accounting and management accounting. In so doing the course also examines the relationship between the exercise of financial control within organizations and the setting of external standards relating to governance, and the implications of this for the organization of firms. In the first module the course covers topics such as the construction of the financial statements, and then considers topics relating to measurement, for example the contrast between historical cost and fair value and the recognition of intangible assets. In the second module the course examines topics relating to the determination of the cost of a product or service, balanced performance measurement and economic value added.

Teaching: 8 sessions of 3.5 hours each, composed of lecture and case discussion spread out equally over two LSE modules.

The course will run between the following dates:

26 August - 07 September 2019

16-21 December 2019

Formative coursework: Formative assignment after module 2.

Indicative reading: Kaplan, R. & Atkinson, A. (2014) *Advanced Management Accounting*, Weetman, P. (2011) *Financial Accounting: An Introduction*

Assessment: This course will not be assessed.

MG498E Half Unit**Dissertation/Capstone Project (modular)**

This information is for the 2019/20 session.

Teacher responsible:

Various

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

Course content: This course consists of a project which will be undertaken throughout the second year of the degree. Students will choose between an academic dissertation or a capstone project. The academic dissertation will explore a question that is grounded in academic theory and literature. The capstone project will explore a business idea or venture. In both projects, students will collect original data relevant to their research question or business idea and must analyse the data, discuss limitations, and draw conclusions.

Teaching: Students are required to participate in 20 hours of scheduled seminar sessions from module 3 onwards which will provide guidance and support in developing their dissertation or capstone project. Students will be allocated a faculty advisor who will support and guide them. The course will run throughout the year.

Formative coursework: Students will be required to agree their dissertation/capstone topic with a faculty advisor and provide a plan which they will receive feedback on.

Indicative reading: Relevant reading will be provided by academic advisors.

Assessment: Dissertation (100%, 6000 words).

MG4H1E Half Unit**Foundations of Social Business I**

This information is for the 2019/20 session.

Teacher responsible: Mr Stephan Chambers Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course focuses on three critical aspects of social business: entrepreneurship; social finance; accounting for social return. It focuses on both existing organisations and start-ups, as vehicles for social change. It aims to support 'intrapreneurs' as well as entrepreneurs. Its purpose is to bring students' understanding of the worlds of opportunity and venture into clear organisational focus. It begins to sensitise students to the challenges of starting and running mission-based organisations, explores established vehicles for combining social and commercial purpose, and looks in detail at the various mechanisms for funding (impact finance, social finance, grant finance).

Students will be introduced to the main elements of entrepreneurial planning including opportunity identification and evaluation, rapid prototyping and resource-gathering. They will be introduced to the business model canvas and ideas of lean start-up as well as the varieties of financing available to social ventures. They will examine ways of accounting for social value as the second and third bottom-line, and a view of managerial reporting as value-laden. Critiques of over-simplified, heroic or 'solutionist' models will be explored, as well as to both market and non-market critiques of social returns on investment.

The course draws on the literature of entrepreneurship, social entrepreneurship, social finance and social accounting.

Teaching: There will be ten integrated lecture/seminars of three hours each, delivered across two modules.

Formative coursework: A practice coursework assignment midway through the course.

Indicative reading:

• Alliman, Keith A. and Ximena Escobar De Nogales (2015). *Impact*

Investment: A Practical Guide to Investment Process and Social Impact Analysis. Hoboken, New Jersey

- Bhide, Amar V. (1996). "The Questions Every Entrepreneur Must Answer". Harvard Business Review November.

- Stevenson, Howard H. and David E. Gumpert (1985). "The Heart of Entrepreneurship". Harvard Business Review March

Assessment: Essay (70%) and coursework (30%).

Assessment will be through an individual essay (70%) and group coursework (30%).

MG4H2E Half Unit

Foundations of Social Business II

This information is for the 2019/20 session.

Teacher responsible: Mr Stephan Chambers Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: The social business, as any other firm, has to understand its environment and undertake consequent activities to enable sustainability and effectiveness; this challenge is complicated by the requirement to achieve not only profit or financial sustainability, but also environmental sustainability and mission-driven social impact. Foundations of Social Business I is intended to provide students with the foundations of strategy and marketing for social businesses. It seeks to introduce students to the commercial opportunities that have intentional, long-term social value and to help students develop mechanisms for defining and communicating with key stakeholders beyond the usual marketing concentration on customers.

The course focuses on the opportunities for and external constraints on social business. Its purpose is to introduce students to the environment of both opportunity and threat in which pro-social business exists. It examines strategy development where the imperative is not market-capture but the reversal of market-failure. It combines overviews of strategy-making with an explicit focus on market-failure as opportunity and on marketing as scaling a theory of change.

Social businesses research, identify, and exploit opportunities just as firms do. Students will be introduced to the main techniques for planning and implementing activities to take advantage of those opportunities, including situation analysis, sources of advantage, competencies, and the resource-based view of the firm. They will be able to explain where corporate parallels apply and where they break down. They will be introduced to hybrid models (social enterprises, B-corporations) and use these emerging corporate forms to test assumptions about creating social and financial value – together with the trade-offs implicit in the models. The course draws on the literature of strategy and marketing.

Teaching: Ten integrated lectures / seminars of three hours each, delivered across two modules (teaching blocks)

Formative coursework: One formative assessment will be provided - a practice essay.

Indicative reading:

- James Austin, Howard Stevenson and Jane Wei-Skillern. (2006). 'Social and Commercial Entrepreneurship: Same, Different, or Both?' Entrepreneurship Theory and Practice 30(1)
- M. Tina Dacin, Peter A. Dacin and Paul Tracey (2011). 'Social Entrepreneurship: A Critique and Future Directions'. Organization Science 22(5): 1203-1213

- Robert M. Grant (2010). Contemporary Strategy Analysis. Oxford:

Wiley. Part 1 'The concept of strategy'

- A.G. Lafley and Roger Martin, (2013). Playing to Win: How Strategy Really Works. Cambridge, MA: Harvard Business Review Press

Assessment: Essay (50%) and essay (50%).

Assessment is through three individual assignments of 2,000 words each, from which the students' top two marks will be taken for credit, each worth 50% of the overall grade.

MG4H3E Half Unit

Social Impact and Its Evaluation

This information is for the 2019/20 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 5 Lincoln's Inn Fields, Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields and Dr Eva Neitzert Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Those who want to improve society face three immediate dilemmas – first, what is the public benefit? How can I define, with clarity, my moral purpose? Second, how can I decide between different courses of action in order to pursue the public benefit? And third, how can I know that what I do makes any real contribution to the public benefit? What is the evidence? This innovative course sets out to support students in coming to their own resolutions of these dilemmas. Its goal is to introduce the concepts and techniques of impact measurement from the perspective of - and through specific examples of interest to - organisational leaders and policymakers and those who intend to commission social business and social enterprise interventions. A first section challenges students to consider and discuss the nature of the public benefit. It introduces students to different philosophical conceptions of the good, including libertarianism, utilitarianism, Rawls' theory of justice and Sen's capabilities approach. It will also discuss whose conception of the good is the more important: the actor or agent, the beneficiary, the government or the wider society.

Our choices of outcomes and impact measures are in turn not neutral, but are infused with moral choices about the definition of the public good. The second (and larger section) of the course introduces students to key concepts and skills in developing and assessing evidence of social impact. It aims to equip students with the ability to be intelligent commissioners of interventions for the public good and critical assessors of evidence and published research. Concepts to which students will be introduced include the distinction between correlation and causation, the counterfactual, opportunity costs, trade-offs, spill overs and substitution effects. Students will be introduced to techniques through which the effectiveness of social interventions can be evaluated, including randomised experiments, quantitative evaluation of non-experimental data, cost-benefit and cost-effectiveness analyses and realistic evaluation approaches; the strengths and weaknesses of these methods are considered. It will also consider the politics of impact measurement and how to ensure that evaluation enables continuous improvement.

Teaching: Ten sessions of three hours each, delivered across two modules (teaching blocks).

Formative coursework: One formative assessment will be provided - a critical assessment of an evaluation report (1,500 words).

Indicative reading:

- Glennerster, R. and Takaarasha, K. (2013). Running Randomised Evaluations: A Practical Guide. Princeton: Princeton University Press
- Layard, R. and S. Glaister (1994). Cost-Benefit Analysis. Cambridge: Cambridge University Press

Books.

- Mill, J.S. (1859/2006). *On Liberty*. London: Penguin
- Nussbaum, M. (2011). *Creating Capabilities*. Cambridge, MA: Harvard University Press
- Pawson, R. and N. Tilley (1997). *Realistic evaluation*. London: Sage.
- Rawls, J. (1971), *A Theory of Justice*. Cambridge, MA: Harvard University Press

Assessment: Coursework (50%) and essay (50%).

Assessment will comprise a critical analysis of an evaluation article (50%) and evaluation research plan (50%)

MG4H4E

The Altruistic Entrepreneur Project

This information is for the 2019/20 session.

Teacher responsible: Mr Stephan Chambers The Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course crystallises the academic learnings from across the degree programme into an applied experience. It runs concurrently with course delivery across all modules. Students will work in groups of four or five, supported by faculty, to develop an entrepreneurial business proposal for social impact, moving through idea generation, initial design and formal proposal. The proposal may be a new organisation or an activity within an existing organisation with explicit social benefit.

The project creates a space for real world application of students' learning; development of the project concurrently with programme delivery enables substantive interaction between project work and core skills learning. The course mirrors the development of the programme overall by requiring students to address questions of context (and relation to state and private actors), questions of strategy and market development, financing, and reporting as well as personal leadership, communications and persuasion. Projects are designed in the expectation of potential real world implementation.

Working in a group is an essential component of this course. Students will be expected to reflect on how their groups form, how they establish principles for working effectively, and how they resolve conflict or disagreement. They will be asked to reflect on their own group dynamic and how it might be a function of culture, mission, and measurement. Students will be asked explicitly to reflect in their essays on the process of selecting a topic and assigning roles. Since so much of their professional life will involve impromptu and non-elective group working we consider this aspect of the course particularly important.

Teaching: Teaching will take place over the duration of the programme. There will be whole cohort teaching sessions of three hours each module, plus tutorial meetings for each project group.

Formative coursework: Formative work, through presentations and discussions in tutorial meetings, will be continual for the duration of the programme. Students will be asked to submit a draft outline of their final summative essay.

Assessment: Essay (50%), presentation (35%) and proposal (15%). Assessment will be through a group presentation (35%), group composition of a business model canvas (15%), and an extended essay of 5,000 words at the end of the project (50%).

MG4H5E Half Unit

The Altruistic Leader

This information is for the 2019/20 session.

Teacher responsible: Dr Connson Locke NAB 4.16

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available

as an outside option.

Course content: Leadership involves managing oneself and others, thus the understanding of human psychology is critical for effective leadership. Instead of studying the many constantly changing theories of leadership, this course will instead provide you with a foundation in organisational behaviour, which draws from research in psychology and sociology, to understand the behaviour and attitudes of people in organisations. The theories and research will address these topics generally, and we will place them in the context of social business by applying them to case studies and problems faced by leaders of social businesses.

The course examines topics such as: power and influence; organisational justice; motivation and rewards; leadership styles; cross-cultural management; organisational culture and change.

Teaching: Ten sessions of three hours each, delivered over one module (teaching block).

Formative coursework: Students will be given a practice case analysis to prepare them for the summative case analysis. For the group project, groups will submit their choice of presentation topic in order to receive formative feedback.

Indicative reading:

Additional readings will be available on Moodle.

Assessment: Coursework (30%), case analysis (55%) and in class assessment (15%).

Assessment will be done through a case analysis (55%), group assessment (30%) and in-class assessment (15%).

MG4H6E Half Unit

The Hybrid Economy

This information is for the 2019/20 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 5 Lincoln's Inn Fields and Dr Jonathan Roberts Marshall Institute, 5 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Following the failure of both states and markets to resolve persistent social problems, a hybrid economy is emerging in which new organisational forms and new multi-actor collaborations blend outcomes, behaviours and structures drawn from different sectors with the aim of achieving both social and financial returns. Examples of organisations and activities in this emerging economy include corporate firms that internalise social purpose, business-oriented philanthropists, private organisations that spin out of the state sector (public service mutuals), social impact investment, and complex collaborative financial instruments such as social impact bonds.

This course explores the economics and politics of this emerging phenomenon. It provides students with knowledge of the newly developing institutions, organisations and mechanisms, and

with the critical and analytic skills through which to evaluate them. It assesses the historic and contemporary failures by the state, market and voluntary sector in developed and developing economies; and it considers the competitive advantage and disadvantage of the hybrid social business as a remedy for these failures. The course focuses specifically on motivation and incentive theory, exploring how we can design organisations and wider institutions that both nurture and capitalise upon altruism, but that also acknowledge more self-directed motivations. The course explores the scope and nature of the political relationship between hybrid organisations and the state, exploring whether the function of the social business is best conceived as a complement to state services, a replacement for state services in conditions of austerity and exponentially growing demand, or separately as an innovative laboratory for social interventions. It concludes by exploring ethical criticisms of the hybrid economy, focusing in particular on controversies about the introduction (or intrusion) of the market and business into the social or public realm.

Teaching: Ten integrated lecture/seminars of three hours each, delivered across one module (teaching block).

Formative coursework: One formative assessment exercise will be offered: a practice essay.

Indicative reading:

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

PB413E Half Unit Frontiers in Behavioural Science Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi

Dr Dario Krpan

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: Behavioural science is the scientific study of human behaviour, and it combines research techniques from psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art techniques that stretch across the

spectrum of both disciplines. The course covers the following topics: measuring preferences, attitudes, beliefs, willingness-to-pay; determining evidential value of behavioural science research; behavioural game theory and experimental games of strategic interaction; designing behavioural priming experiments and measures that tap into implicit cognition; state-of-the-art physiological research techniques; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs.

Teaching: 9 hours of lectures, 3 hours and 45 minutes of lectures, 3 hours of seminars and 4 hours and 30 minutes of seminars in the ST.

Day 1

Lecture 1 (1h 30'): Intro. Further Considerations in Experimental Design. Measuring Preferences and Attitudes: the State-of-the-art [MMG, DK]

Lecture 2 (1h 30'): Determining Evidential Value of Behavioural Science Research: Undisclosed Flexibility in Data Collection, Dance of P-values, P-curve analysis, Pre-Registration, Pre-Analysis Plan [MMG, DK]

Seminar 1 (1h 30'): Best Experimental Practices in Practice. Sample Size Calculations in Stata and G*Power [MMG, DK].

Day 2

Lecture 3 (1h 30'): Behavioural Priming Techniques [DK]

Lecture 4 (1h 15'): System 1 In Action: Capturing Implicit Cognition: [DK]

Seminar 2 (2h): Building a Simple Task to Measure Implicit Cognition [DK]

Day 3

Lecture 5 (1h 30'): Strategic Decision-Making: Introduction to Behavioural Game Theory [MMG]

Lecture 6 (1h 15'): Behavioural Game Theory: Applications. Introduction to Non-Linear Regression Models [MMG].

Seminar 3 (2h): Building Simple Games of Strategic Interaction Using ZTree. Non-linear regression models using Stata [MMG].

Day 4

Lectures 7 (1h 30') & 8 (1h 15'): Mechanisms, Moderators, Mediators; Mediation and Moderation in a Regression Framework; Understanding the Mechanisms Behind Behaviour Change: Experimental-causal Chain, Moderation-of-process, and Measurement-of-Mediation Designs [DK].

Seminar 4 (2h): Moderation and Mediation Using Stata [DK].

Day 5

Lecture 9 (1h 30'): Beyond Economics and Psychology: State-of-the-art Physiological Research Techniques for the Behavioural Science. Introduction to Systematic Reviews of the Literature and Meta-analyses. Wrap up. [MMG, DK]

Seminar 5 (1h 30'): Building a Simple Behavioural Science Experiment Using Qualtrics Survey Software [MMG, DK]

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

For the formative assignment, you will need to produce a brief research proposal plan (500 words) that will serve as the basis for the full research proposal (3000 words) that will constitute your summative assignment. In the research proposal plan, you will propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars. The structure of the proposal plan should be as follows: a) Introduce a viable research question (on a topic of your choice) that will guide your experimentation; b) Describe how you would design and implement behavioural science research to answer the question; and c) Explain which statistical approaches covered in lectures and seminars you would use to analyse the data. Feedback received for the formative assignment will help you to prepare the summative assignment by identifying both strengths and weaknesses of your approach.

Indicative reading: Angrist, J.D., Pischke J-S. (2015). *Mastering 'Metrics: the Path from Cause to Effect*. Princeton: Princeton University Press. Camerer, C.F. (2003). *Behavioral Game Theory: Experiments in Strategic Interaction*. Princeton: Princeton University Press. Dijksterhuis, A., Chartrand, T. L., & Aarts, H. (2007).

P-curve: a key to the file-drawer. *Journal of Experimental Psychology: General*, 143(2), 534-547. Spencer, S. J., Zanna, M. P., & Fong, G. T. (2005). Establishing a causal chain: why experiments are often more effective than mediational analyses in examining psychological processes. *Journal of Personality and Social Psychology*, 89, 845-851. van't Veer, A. E., & Giner-Sorolla, R. (2016). Pre-registration in social psychology—A discussion and suggested template. *Journal of Experimental Social Psychology*, 67, 2-12. Simmons, J. P., Nelson, L. D., & Simonsohn, U. (2011). False-positive psychology: Undisclosed flexibility in data collection and analysis allows presenting anything as significant. *Psychological science*, 22(11), 1359-1366.

Assessment: Proposal (100%) in the ST.

For the summative assignment, you will be required to expand the research proposal plan submitted as part of the formative assignment into a full research proposal comprising 3000 words. Your task will be to propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars. The structure of the proposal should be as follows: a) Introduce a viable research question (on a topic of your choice) that will guide your experimentation; b) Describe how you would design and implement behavioural science research to answer the question; and c) Explain which statistical approaches covered in lectures and seminars you would use to analyse the data. In the proposal, we will expect you to use in-text scholarly citations and provide a reference list at the end. The summative assignment should allow you to not only demonstrate your knowledge regarding the present course, but also to gain deeper insights into experimental analysis and design that should help you in producing a high-quality dissertation.

PB434E Half Unit

Behavioural Science in an Age of New Technology

This information is for the 2019/20 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: When psychology and economics got "married", the product was behavioural science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) outline how they supplement and extend commonly used tools of behavioural change; and c) examine how

they can be used to propel behavioural science into the future.

The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information technology. Emphasis will be placed on how the technological tools covered throughout the course can be used to change behaviour in applied settings, and students will be encouraged to discuss implications for their organisations and other areas of interest.

Teaching: 12 hours of lectures, 2 hours and 30 minutes of lectures, 2 hours of lectures and 8 hours of seminars in the ST.

Day 1

Lecture 1 (2h): Course introduction. Understanding minds by reading bodies: Implications of motion tracking for behavioural science 1

Lecture 2 (2h): Understanding minds by reading bodies: Implications of motion tracking for behavioural science 2
Seminar 1 (2h)

Day 2

Lecture 3 (1.5h): Changing behaviour through gamification

Lecture 4 (1.5h): Social robots: Our new friends?

Seminar 2 (2h)

Day 3

Lecture 5 (1.5h): Behavioural science in virtual worlds

Lecture 6 (1.5h): Behavioural informatics

Seminar 3 (2h)

Day 4

Lecture 7 (1.5h): Digital footprints and human behaviour

Lecture 8 (1.5h): Psychological targeting in digital age

Seminar 4 (2h)

Day 5

Lecture 9 (1.5h): Change thyself: Using technology to influence our own behaviour

Lecture 10 (1.5h): The ethics of emerging technologies in the context of behavioural science

Formative coursework: Students will be expected to produce 1 presentation in the ST.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5 minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

Robots, rape, and representation. *International Journal of Social Robotics*, 9(4), 465-477.

Assessment: Presentation (100%) post-summer term.

The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15-20 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

PB450E Half Unit Behavioural Science and Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Dolan QUE.3.08

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science. The course covers the following topics: What is behavioural science?; What are preferences to economists and psychologists?; Dual-process models of behaviour and the role of the unconscious mind; Dual processing into policy using the MINDSPACE checklist; the role of emotions in decision making; compensating behaviours; breaking and creating habits.

Teaching: 14 hours of lectures and 8 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

Indicative reading: Dolan, P. (2014). *Happiness by design: finding pleasure and purpose in everyday life*. London: Allen Lane.

Kahneman, D. (2011). *Thinking Fast and Slow*. London: Penguin Books. Gneezy U, Meier S, Rey-Bell P (2011), "When and Why Incentives (Don't) Work to Modify Behavior", *Journal of Economic Perspectives*, 25(4):191-210. DellaVigna, S. (2007). "Psychology and Economics: Evidence from the Field". NBER Working Paper No. 13420. Dolan, P., Hallsworth, M., Halpern, D., King, D., Metcalfe, R., Vlaev, I. (2012). "Influencing Behaviour: The mindspace way". *Journal of Economic Psychology*, 33 (1): 264-277. Dolan, P., Galizzi, M. (2015). "Like ripples on a pond: Behavioural spillovers and their implications for research and policy". *Journal of Economic Psychology*, 47: 1-16.

Assessment: Essay (100%, 4000 words) in the MT.

PB451E Dissertation in Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of behavioural science. The dissertation can consist of: an empirical analysis of existing data; a collection and analysis of new data; a randomised controlled experiment (lab, field, online); a systematic review of the literature. Students must obtain the approval of their supervisor before embarking on any research.

Teaching: 3 hours of classes in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Indicative reading: Relevant reading will be provided by supervisors.

Assessment: Dissertation (100%, 10000 words) in the MT.

PB452E Half Unit Behavioural Science for Health

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is available on the Executive MSc in Behavioural Science, Executive MSc in Health Economics, Outcomes and Management in Cardiovascular Sciences and MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Please note that for 2019/20, this course will **only** be available to

Health Policy EMSc students.

Course content: The course aims to introduce to students the main principles, methods, measures, and insights of behavioural sciences, and the key state-of-the-art applications to health economics, policy, practice, and management.

The course is designed to enhance students' abilities to apply rigorously and critically behavioural science tools to concrete challenges in the health and healthcare area.

It covers principles of behavioural science; heterogeneity and behavioural economics; behavioural health economics and policy; methods of behavioural science; behavioural experiments in health (field, lab, lab-field, online, mobile); behavioural data linking; measures of behavioural science; risk preferences and health; time preferences and health; social preferences and health; behavioural insights for information policies in health; financial and non-financial incentives in health; behaviourally supercharged incentives in health; nudging behavioural change in health; behavioural spillovers in health; behavioural insights for regulation and taxation in health, healthcare, and risky health behaviours; behavioural insights for healthy behaviours (diet and nutrition, physical exercise, alcohol abuse, tobacco and drug use, medication, screening, infectious diseases, vaccination); behavioural insights for blood and organ donations; behavioural insights for health practice, management, and policy challenges.

Teaching: 18 hours of lectures and 4 hours and 30 minutes of seminars in the ST.

6 x 3 hour lectures (18 hours)

3 x 1.5 hour seminars (4.5 hours each seminar group)

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the ST.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

PB453E Half Unit

Corporate Behaviour and Decision Making

This information is for the 2019/20 session.

Teacher responsible: Dr Grace Lordan OLD M 2.26

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content:

Lecture 1: Introduction

This lecture will give an overview of rational decision making from an economics perspective. Rationality should already be familiar to the students (from compulsory PS468E and MG406E), so they will simply re-visiting this. Attention will also be paid to how students

can identify credible empirical evidence from experiments (brief recap what was done in PS469E) and beyond (cover natural experiments). We will also recap on the interpretation, advantages and disadvantages of observational studies.

Lecture 2: Finding a Job

This lecture will cover the unconscious biases that are encountered corporate firms in:

- 1) Job Search
- 2) Job Advertising
- 3) Interview panels

Seminar 1: Lecture 2 will be complemented with a linked seminar which focuses on how these biases in job search and hiring affect success by gender in the labour market and in top tier jobs. Particular attention will be paid to increasing diversity on interview boards.

Lecture 3: Day to Day Work

We will discuss biases in allocated bonuses, promotions, deciding who is viewed as 'great' and the allocations of prestigious projects in corporate firms. We will also cover biases in how different types of people are 'heard' and 'seen' in business, and biases in what a 'successful' person looks like. We will brainstorm, with the help of received literature in behavioural economics, viable interventions to combat blind spots in promotions and bonus allocations in the corporate setting.

Seminar 2: Lecture 3 will be complemented with a linked seminar where particular attention will be paid to empirical evidence that relates to:

- 1) In-group/out groups at work
- 2) Herding and the implications for decisions in business.
- 3) Social norms

Lecture 4: When at Work: Trading and Investment

This behavioural finance lecture will cover psychological biases in trade and high stake investment decisions in finance. It will cover the efficient markets hypothesis and outline the behavioral biases in finance that will likely disrupt its predictions. We will also cover how these biases impact on forward futures and options markets, leverage cycles and corporate stocks.

Seminar 3: So far, we have focused on cognitive biases, this lecture will have a linked seminar that will cover the potential for biology to disrupt rational decision making within financial firms when making investment choices.

Lecture 5: When at Work: Complying with the Rules

We will begin by discussing the decision to comply to a firm's policies and procedures within a cost benefit framework. In practice, compliance depends on a number of factors, including employee behavior which is subject to biases already covered. This lecture will cover the insights from behavioral science, which can be used to encourage compliance in the face of these biases.

Seminar 4: Lecture 5 will have a linked seminar which considers high profile compliance issues in finance.

Seminar 5: Wrap up – bringing together of all the messages learned in the course. Student presentations based on group work on 'what was learned' each day.

Teaching: 12 hours and 30 minutes of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 case study in the LT.

Case study with short questions that matches the style of the summative assessment

Indicative reading: Bertrand Marianne and Duflo Ester. *Field Experiments on Discrimination*. in *Handbook of Economic Field Experiments*. Volume 1, pages 309 - 393 2017. MLA: Gneezy, Uri, Kenneth L. preferences." *Proceedings of the National Academy of Sciences* 111.9 (2014): 3608-3613. Shiller, Robert J. *Finance and the Good Society*, Princeton: Princeton University Press, 2012. Fama, Eugene, "Market Efficiency, Long-Term Returns, and Behavioral Finance," *Journal of Financial Economics*.

Assessment: Coursework (100%, 4000 words) in the ST. Case study with ten short questions.

PB454E Half Unit Policy Appraisal and Ethics

This information is for the 2019/20 session.

Teacher responsible: Prof Paul Dolan

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

This course is one of two options.

Course content: This course aims to introduce students to the main concepts and tools of policy appraisal and yield insight into key moral and political values that are essential for policy-makers when they draw on behavioural science. The course covers the following topics: 1) Architecture of Cost-benefit analysis for market and non-market goods; 2) Elicitation of monetary values through revealed and stated preference methods, and adjustments for time discounting, risk and uncertainty; 3) Welfare analysis of policy interventions: efficiency, equity and asymmetric paternalism; 4) Evaluating welfare beyond monetary choices: the subjective well-being approach to valuation; 5) Moral problems associated with libertarian paternalism or Nudge, and how this approach compares to other policy mechanisms, such as regulation, taxation and subsidies, and social advertisement. The course offers practical examples and applications to key policy sectors, such as health and the environment.

Teaching: 14 hours of lectures and 8 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading: HM Treasury (2011) *The Green Book: Appraisal and policy evaluation in central government*. London, UK. Bishop, R.C. et al. (2017). Assessment: Coursework (100%, 4000 words) in the ST.

PB457E Half Unit Organisational Culture

This information is for the 2019/20 session.

Teacher responsible: Dr Thomas Reader

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Pre-requisites: No prerequisites.

Course content: This course introduces to students to the concept of organisational culture, its relationship with success and failure in institutional settings, the factors that shape it, and methodologies for studying and changing culture. The course will draw on a mixture of seminal research, state-of-the-art literature, and work being conducted at the LSE. The course consists of three parts.

Part 1: Organisational culture: what is it, and why does it matter?

In this first phase of the course, the concept of organisational culture will be introduced, and we explore its association with organisational performance. Student will be made familiar with key models on organisational culture, the distinction between organisational culture and climate, and academic literature investigating the cultural properties of organisations that lead them to be more competitive, safer, and nicer places to work. Students will be asked to reflect on the culture of their own organisation (or another that is relevant to them), and to consider where it 'fits' within the academic models being presented.

Part 2: Measuring organisational culture.

Here we will also focus on assessing organisational culture. Specifically, we will examine traditional methodologies of culture measurement: including interviews, observations, and surveys. We will explore what makes a 'good measure', how you interpret culture data, and the limitations of using observations from 'within' an organisation to measure culture. We also explore novel and cutting-edge forms of culture measurement, and in particular, research being conducted at LSE on unobtrusively measuring culture.

Part 3: Understanding and changing organisational culture.

In the final part of the course, we focus on different aspects of organisational culture (collaborative cultures, ethical cultures), and examine how these shape people's understanding of what is 'normal', whether they can challenge institutional practices, and their links with organisational outcomes. We also consider how factors such as national culture shape organisational culture, and examine how, through constructs such as leadership, organisational culture can be changed.

Teaching: 10 hours of lectures and 12 hours of workshops in the ST.

10 hours of lectures, 12.5 hours of seminars/workshops.

Formative coursework:

Formative assessment 1.

Format: In class-presentation (10 mins), delivered on the last day of the course.

Description: Students will present, in groups, a proposed programme for assessing and changing organizational culture in a company of their choice. Feedback will be provided on the ideas presented.

Formative assessment 2.

Format: One brief essay, delivered in June.

Word count: 1 x 500 words max (excluding bibliography)

Description: Students will outline a measurement suite for assessing organizational culture in an organisation of their choice (500 words).

Indicative reading: Ashkanasy, N. M., Wilderom, C. P., & Peterson, M. F. (2000). *Handbook of organizational culture and climate*. Sage. Barney, J. B. (1986). *Organizational culture: can it be a source of sustained competitive advantage?* *Academy of Management Review*, 11(3), 656-665. Jacobs, R., Mannion, R., Davies, H. The quantitative measurement of organizational culture in health care: a review of the available instruments. *Health services research*, 38(3), 923-945. Webb, E., & Weick, K. E. (1979). Unobtrusive measures in organizational theory: A reminder. *Administrative Science Quarterly*, 24(4), 650-659.

Assessment: Essay (100%, 3000 words) in the ST.

Word count: 3,000 max (excluding bibliography)

Description: Students will describe, and justify, a programme for assessing and changing the organizational culture in an organisation of their choice.

PB471E Half Unit

Research Methods for Behavioural Science

This information is for the 2019/20 session.

Teacher responsible: Dr Matteo Galizzi QUE.3.16

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The course aims to introduce students to the main methodological concepts and tools in behavioural science. To achieve this objective, the course combines rigorous conceptual discussion with hands-on practical applications. The course covers: The beauty of experiments: how randomization solves the sample selection bias; randomized controlled experiments from the lab to the field: taxonomy, principles, best practices; online and lab-field experiments, Statistical tools: distributions and their moments, the inference problem; Experimental design: between-subjects design, block/stratified randomization, matched-pair design, within-subjects design, cluster randomization, the mechanics of randomization; Introduction to econometrics: simple and multiple linear regression models, econometric analysis of experimental data; Tests of hypothesis: principles and practices, parametric and non-parametric tests in practice; Sampling: optimal sample size calculation in practice, useful rules of thumbs; Experimental best practices and challenges: ethics, recruitment, informed consent form, attrition, non-compliance, external validity, behavioural data-linking; When randomization is not possible: before and after, matching, natural experiments, difference-in-difference, regression discontinuity design; Outcomes and behavioural measures in experiments, survey design. The seminars involve hands-on practical applications using Stata, R, and Qualtrics.

Teaching: 17 hours and 30 minutes of lectures and 5 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

Indicative reading:

- Angrist, J.D., Pischke J-S. (2015). *Mastering 'Metrics: the Path from Cause to Effect*. Princeton: Princeton University Press.
- Gerber, A.S., Green, D.P. (2012). *Field Experiments: Design,*

Analysis, and Interpretation. New York: Norton & Company.

- Dolan, P., Galizzi, M.M. (2015). Like ripples on a pond: behavioural spillovers and their consequences for research and policy. *Journal of Economic Psychology*, 47, 1-16.
- Harrison, G.W., List, J.A. (2004). Field experiments. *Journal of Economic Literature*, XLII, 1009-1055.
- List, J.A. (2006). Field experiments: a bridge between the lab and naturally occurring data. *Advances in Economic Analysis and Policy*, 6, 8.

Assessment: Portfolio (100%) in the LT.

Students will be asked to submit a "portfolio" of hands-on practical tasks related to the main stages of a behavioural science project.

PP409E Half Unit

Public Policy in Practice Workshop III (EMPA)

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block.

Formative coursework: One optional mock policy exercise will be provided.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP410E Half Unit

Public Economics for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Professor Camille Landais

Dr Daniel Reck

Dr Xavier Jaravel

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: This is a course in theoretical and applied

public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination will be offered.

Indicative reading: A full reading list will be distributed prior to the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPP/ Executive MPA programme inductions.

PP421E Half Unit

Global Market Economics

This information is for the 2019/20 session.

Teacher responsible: Professor Andrew Bernard
Dr Emily Blanchard

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E).

Course content: This course focuses on the economic interdependence between countries in a global economy. The first part of the course examines the structure and geography of world trade and examines popular hypothesis such as the "global village" or "flat earth". The second part of the course analyses macroeconomic issues such as the magnitude and effects of international capital flows, the debate over fixed versus flexible exchange rates and the economics of a common currency

Teaching: A one-week modular teaching block.

Formative coursework: One mock essay opportunity will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP440E Half Unit

Economic Policy Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Ethan Ilzetzki and Dr Sandra Sequeira

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The course will cover both key microeconomic policy issues, such as externalities, public goods and principal-agent problems and macroeconomic issues such as unemployment, fiscal and monetary policies, international trade and finance and the determinants of long-run growth.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise. Data analysis exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP454E Half Unit

Development Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Robin Burgess and Prof Oriana Bandiera

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: The main focus of this course is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include growth and poverty, governance and accountability, motivation of bureaucrats, firms and markets, determinants of productivity, jobs and labour markets, shocks and insurance, infrastructure, connectivity, education and health, trade and globalization, the value of exporting, delivering public services, incentivising teachers and health workers, environment and climate change, management of natural resources, taxation and state capacity. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: A one-week modular teaching block.

Formative coursework: One mock essay opportunity will be provided.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP455E Half Unit

Empirical Methods for Public Policy

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm

Availability: This course is compulsory on the Executive Master of

Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course. Familiarity with the material covered in the EMPA/ EMPP Introduction to Statistics module is assumed.

Course content: The course introduces students to the quantitative evaluation of public policies. The focus of the course is on practical applications of techniques to test the effectiveness of public policy interventions. The course begins with an overview over the key benefits of randomized experiments in the evaluation of public policies. Next the course covers a number of techniques that are widely used in the evaluation of public policies, including difference-in-differences regressions, regression discontinuity approaches and matching. It concludes with an introduction to cost-benefit analysis.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Project (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. The project will consist of a 2,000 word data analysis exercise due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP478E Half Unit

Political Science and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Livia Schubiger

Dr Ali Cirone

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: This course introduces students to core concepts and problems in politics and policymaking. Among the questions we address: What determines political preferences and electoral outcomes? How are interests represented? How do political institutions shape policy outcomes? We focus on tools that students should be able to apply broadly in analyzing the political world.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination will be provided.

Indicative reading: *Analyzing Politics: Rationality, Behavior and Institutions* by Kenneth Shepsle (W.W. Norton, 2nd edition, 2010) is an excellent starting point and reference for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after the module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP488E Half Unit

Regulatory Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in regulation in OECD countries and elsewhere. The focus is on exploring competing approaches towards regulation in the context of different domains, ranging from utility, environmental to health and safety regulation. Particular attention will be paid to issues such as institutional design, enforcement and compliance, as well as the relationship between politicians, regulators, business and other actors. Topics include institutional design, development and regulation, standard-setting, enforcement, 'better regulation', and accountability.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: *Managing Regulation* by Martin Lodge and Kai Wegrich (Palgrave, 2012) introduces key themes. A different introduction is *Understanding Regulation* by Robert Baldwin, Martin Cave and Martin Lodge (Oxford University Press, second edition, 2012)

Assessment: Essay (50%, 2000 words) and online assessment (50%).

A 2,000 word assessed essay (50%) and an online assessment (50%). Please note that online assessments take place on the third Friday after module teaching concludes. Assessed essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the EMPA/ Executive MPP programme inductions.

PP4B3E Half Unit

Executive MPP Capstone Project

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is available on the Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The Capstone project facilitates application of analytical tools developed on the programme. Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have one week to work on an issue identified jointly by the Civil Service and LSE academics, investigating and developing a workable solution to the problem. They will then deliver a presentation, followed by a policy memo and two articles.

Teaching: A one-week modular teaching block.

Formative coursework: Feedback will be provided on work-in-progress during the project duration and on the presentation on the final day of the module.

Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary reading includes: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); Office for Government Commerce *Common Causes of Project Failure* (London: OGC, 2004); *Strategy Survival Guide* (London: Prime Minister's Strategy Unit, July 2004); C. R. Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, *Dynamics in Groups and Teams: Groups as Complex Action Systems*, chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Presentation (20%), project (50%) and coursework (30%).

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

1. Presentation (20%) on the final day of the module.
2. Policy memo (50%), summarising the proposal for the relevant minister, which incorporates the feedback from the presentation, due three weeks after the module (1500 words).
3. Two standard-length newspaper articles (30%), due three weeks after the module.

In the two articles (500 words each), the students should consider how their policy proposal would be reported in two different media outlets.

PP4G8E Half Unit Public Policy in Practice Workshop I (EMPA)

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm 32L2.25 and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block.

Formative coursework: One optional mock policy exercise will be provided.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Project (100%, 3000 words).

Assessment will consist of a 3,000 policy exercise. Policy exercises are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP4G9E Half Unit Public Policy in Practice Workshop II (EMPA)

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay due 10 days after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

PP4J5E Half Unit

Fiscal Governance and Budgeting

This information is for the 2019/20 session.

Teacher responsible: Dr Joachim Wehner

Dr Paolo de Renzio

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.

Teaching: A one-week modular teaching block.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: Fiscal Governance in Europe by Mark Hallerberg, Rolf Strauch and Jürgen von Hagen (Cambridge University Press, 2009) introduces an important theoretical approach and is a good reference for several topics. The OECD Journal on Budgeting <http://www.oecd.org/gov/budget/journal> discusses current issues in applied budgeting. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Please note that online assessments take place on the third Friday after module teaching concludes. Essays are due on the sixth Friday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP4V8E Half Unit

Policy Paper

This information is for the 2019/20 session.

Teacher responsible: Prof Daniel Sturm and Dr Sara Hagemann
Participating students will be assigned an academic supervisor with relevant knowledge of the topic and supervision experience.

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors.

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. Executive MPA/ EMPP students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with an Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology,

results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: The student's Academic Adviser will provide advice and guidance on this piece of work as required during the duration of the assessment.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT, LT and ST.

A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted well in advance of the assessment deadline. Students may only change their topic thereafter with the agreement of the Academic Adviser/ Programme Directors. Students will be given feedback on their proposal.

Indicative reading: A suitable programme of reading will be developed in consultation with the Academic Adviser. Useful background readings may include:

- Eugene Bardach, *A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving*, 4th ed. (CQ Press, 2012);
- Catherine F. Smith, *Writing Public Policy: A Practical Guide to Communicating in the Policy Making Process*, 3rd ed. (Oxford University Press, 2012).
- Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979).
- Philip E. Tetlock, *Expert Political Judgment: How Good Is It? How Can We Know?* (Princeton University Press, 2006).

Assessment: Policy paper (100%) in the MT, LT and ST.

- 6,000 word policy paper

S04A1E Half Unit

Governing Cities in an Urban Age: Challenges and Opportunities

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Prof Antony Travers CON6.06

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: Governing Cities in an Urban Age is an intensive introduction to global urbanisation and the state of cities. The course explores different stages of urban development in cities and regions across the world. It provides students with an understanding of the key challenges facing both mature and rapidly-developing metropolitan areas. It will locate the key challenges facing large cities, notably the persistent levels of social inequality, poverty, unsustainable resource use and constraints to economic efficiency. The course introduces the key tools for intervention such as planning, governance and management of land and infrastructure in response to critical pressures linked to economic development, globalisation, migration, social inclusion, climate change, resource efficiency, and resilience. The key purpose of the course will be to give participants a comprehensive framework for understanding the challenges which cities are facing today.

Topics include: global urbanisation, development and design, urban change, population growth, urban productivity, urban expansion, urban sprawl, densification, intensification, sociability, urban governance, urban institutions, budgets and responsibilities.

Teaching: 7 hours and 30 minutes of lectures, 15 hours of seminars and 7 hours and 30 minutes of workshops in the MT. The course will be taught over a period of one week in the MT.

Formative coursework: Students will be expected to produce 1 essay in the MT.

Submission of a 500 word non-assessed formative statement outlining the key political, environmental and socioeconomic challenges in the student's city that will shape the content of the 2,000 word assessed report.

Indicative reading: Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Simone, AbdouMaliq and Pieterse, Edgar (2017) *New Urban Worlds: Inhabiting Dissonant Times*. Polity Press. London. Travers, Tony, 'Taxing Power' in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Pieterse, Edgar, 'Placemaking in dissonant times', in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. McQuarrie, Michael, Ferreira da Cruz, Nuno and Rode, Philipp 'Tensions of Governance' in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. (2011): *Triumph of the City: How Our Greatest Invention Makes Us Richer, Smarter, Greener, Healthier, and Happier*. Penguin Press. Brenner, Neil (2004), *New State Spaces: Urban Governance and the Rescaling of Statehood*, Oxford University Press, Oxford. Pieterse, Edgar, (2018) *The politics of governing African Urban Spaces*, *International Development Policy / Revue internationale de politique de développement*, No. 10.

Additional readings:

Fainstein, Susan, Gordon, Ian and Harloe, Michael (2011) *Ups and downs in the global city: London and New York In the 21st century*. In: Bridge, Gary and Watson, Sophie, (eds.) *New Blackwell companion to the city*. Wiley-Blackwell, Chichester, pp. 38-47. Gordon, I., Travers, T. (2010). "London: planning the ungovernable city" in *City, culture and society*, 1(2), pp. 49-55. Travers, Tony (2004) *The Politics of London Governing an Ungovernable City*, Palgrave. Jacobs, Jane (1961): *The death and life of great American cities*. Random House.

Assessment: Essay (70%, 2000 words) and presentation (30%) in the MT.

A presentation and submission of a 2,000 word report in MT of how the student's city or organisation is dealing with some of the challenges and opportunities presented in the course.

SO4A2E Half Unit

Cities and Society: Design and Social Cohesion

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Burdett 8.01J

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option. This course is only available to students registered in the Executive MSc in Cities.

Course content: *Cities and Society: Design and Social Cohesion* looks at some of the major drivers of urban inequality and poverty and the key actions that cities are taking to reduce urban inequalities through urban design, infrastructure and policy. This is a heavily applied course providing students with tools to analyse the socio-demographic profile of households and neighbourhoods and their relation to spatial distribution and clustering in cities of the developing and developed world. Students are introduced to traditional measures of poverty and inequality such as income and wealth as well more recent multi-dimensional poverty measures such as health and education, and provided with analytical and mapping tools to identify areas of concentration of deprivation. A particular emphasis is placed on identifying spatial strategies that can alleviate the concentration of urban poverty and inequality by optimising access to jobs, housing, education, health, public space, transport and community infrastructure.

Cities and Society will also look at the macro-economic forces that are producing uneven regional and urban development and the

key planning methods to reduce levels of inequality. These include spatially blind policies such as taxation and redistribution; spatially connective policies such as infrastructure links between high and low income neighbourhoods and finally spatially targeted policies where private and public investment is targeted at the most deprived urban areas.

Topics include: inequality and GINI coefficients; from income to multi-dimensional measures of poverty; the Human Development Index and its urban relevance; affordable housing, social infrastructure; equity planning (examples include London, Barcelona, Medellin and Bogota; the London model of urban regeneration; infrastructure and equity, health and well-being, migration.

Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.

The course will be taught over a period of three sessions.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word submission identifying the social research methods used in the assessment of a policy or project of your choice

Indicative reading: Burdett, Ricky, 'Flexible Urbanisms' in Burdett, Ricky and Rode, Philipp (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Mehrotra, Rahul and Vera, Felipe, 'Ephemeral Urbanism', in Burdett, Ricky and Rode, Philipp (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Sennett, Richard, 'Rupture, Accretion and Repair' in Burdett, Ricky and Rode, Philipp (eds) (2018): *Shaping Cities in an Urban Age*. Phaidon Press Ltd. London. Roy, Ananya and Ong, Aihwa (eds) (2011) *Worlding Cities: Asian Experiments and the Art of Being Global*. Wiley-Blackwell. New Jersey. Mitlin, Diana and David Satterthwaite (2013): *Urban Poverty in the Global South: Scale and Nature*. Routledge.

Assessment: Essay (70%, 2000 words) in the LT.

Presentation (30%) in the MT.

Design and present a research method to assess a project or policy of your choice (30%) and submission of an essay looking critically at the social research methods used in the assessment of an existing policy or project (70%).

SO4A3E Half Unit

Cities and the Economy: Urban Economic Development and Finance

This information is for the 2019/20 session.

Teacher responsible: Dr Savvas Verdis FAW 8.01E

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive

MSc in Cities.

Course content: Cities and the Economy forms part of the Executive MSc in Cities. This is an applied course looking at the role of city government and firms in driving inclusive local economic development. The course introduces traditional and more progressive ways to measure and analyse the city economy as well as policies and tools available to attract investment and finance as well as improve the distributional effects of economic growth.

From a global economic level, we will look at the forces shaping urban development and the capacity of national, regional and local policies to influence these drivers. From a more local economic level, we will look at the make-up and sectorial composition of a city economy; how we can measure the economic impact of policies and projects and finally how we can finance and fund complex infrastructure projects.

Topics include: inclusive growth; economic inequalities; measuring growth and competitiveness over time, comparative vs competitive advantage, key performance indicators of a city economy, the role of infrastructure and megaprojects in driving competitiveness, managing city budgets, financing your city, global city indexes, special economic zones and other incentives.

Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.

The course will be taught over a period of three sessions.

Formative coursework: Students will be expected to produce 1 essay in the LT.

500 word submission describing the financing strategy of a project of your choice

Assessment: Essay (70%, 2000 words) in the ST.

Presentation (30%) in the LT.

Pitch a financing strategy for a selected case study area to an expert panel (30%) and submission of a 2,000 word written report analysing the financing strategy of a project of your choice (70%).

urbanisation globally and urban change in individual cities. This is an applied course giving students the relevant tools to measure, analyse and assess environmental impact. It introduces debates on different green city paradigms and focuses specifically on approaches to urban climate change mitigation and adaptation. The course further examines implications for urban planning, governance and management.

Cities and the Environment aims to provide the students with an analytical understanding of environmental challenges linked to urban development. Based on these, students are introduced to planning approaches, policy instruments and governance arrangements enabling environmental sustainability and resilience, facilitating the transition to a green economy in cities.

Topics include: environmental sustainability, green economy, environmental impact assessments, climate change adaptation and mitigation in cities, climate resilience, urban environmental transition, resource consumption, pollution, biodiversity.

Teaching: 4 hours and 30 minutes of lectures, 3 hours of seminars and 1 hour and 30 minutes of workshops in the MT. 10 hours and 30 minutes of lectures, 6 hours of seminars and 3 hours of workshops in the LT.

The course will be taught over a period of three sessions.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Present an environmental strategy for an urban development project (30%) and submission of 2,000 word written report (70%).

S04A5E

Urban Infrastructure and Strategic Planning

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Rode FAW 8.011 and Prof Antony Travers CON6.06

Availability: This course is available on the Executive MSc in Cities.

This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities and is offered as an option.

Course content: Urban infrastructure and strategic planning is a workshop based course providing practical insights on infrastructure development and strategic planning for cities. The course combines a series of lectures with studio-based group work on a case study city. Students are introduced to all key components of urban infrastructure, cutting across transport, energy, water, waste and digital network systems. A particular focus of this course is the interrelationship of transport infrastructure and urban form. This relationship forms the basis for an inquiry into strategic planning approaches and practical applications in cities around the world. Furthermore, the course covers important aspects of infrastructure governance, finance and regulation and examines implications for large-scale physical infrastructure as well as digital, smart city technologies. Infrastructure and strategic planning aims to provide the students with a praxis-oriented understanding of urban infrastructure development and strategic planning. The workshop-based nature of the course facilitates learning and skills development in relation to strategic development planning.

Topics include: urban infrastructure, transport, energy, water, waste, digital networks, strategic planning, smart cities, finance, privatisation, municipalisation, public private partnerships, design life, lock-in, phasing

Teaching: 3 hours of lectures and 1 hour and 30 minutes of seminars in the LT. 6 hours of lectures, 3 hours of seminars and 9 hours of workshops in the ST.

The course will be taught during the lent and summer terms through hands-on team based workshops

Formative coursework: Students will be expected to produce 1 essay in the ST.

Prepare a 500 word brief for your project indicating key deliverables

Assessment: Coursework (80%, 5000 words) and presentation (20%) in the ST.

A group project report not exceeding 5,000 words, which will count for 80% of the final grade.

Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

S04A6E

Urban Development and Master Planning

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Dr Savvas Verdis FAW 8.01E

Availability: This course is available on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities and is offered as an option.

Course content: Urban Development and Master Planning is an applied group project based on a major regeneration site. Groups will be introduced to one of the regeneration sites project teams which will include: local planning officers, developers, planners, designers and financing teams. The groups will first immerse themselves in the host organisation as well as the site and understand some of the project challenges. The groups will then work in a collaborative environment in order to develop solutions to the challenges set by the project teams.

Using some of the key assessment and planning tools developed in courses S04A1, S04A2, S04A3 & S04A4 of the Executive MSc in Cities, this project will encourage students to apply the most appropriate analysis, planning and finance methods to an actual development site.

Topics covered: land ownership, development goals, developing the brief, urban design and master planning strategies, wider urban context, phasing, capturing value, mix of uses, public vs private space, financing projects, residual values, negotiations between developers and public agencies, planning constraints and policies, affordable housing, lifecycle assessment, built form, density and integration.

Teaching: 3 hours of lectures and 1 hour and 30 minutes of seminars in the LT. 6 hours of lectures, 3 hours of seminars and 9 hours of workshops in the ST.

The course will be taught during the lent and summer terms using a mixture of hands-on workshops and lectures.

Formative coursework: Students will be expected to produce 1 essay in the ST.

Prepare a 500 word brief for your project indicating key deliverables.

Indicative reading: Indicative Reading

Assessment: Essay (80%, 5000 words) and presentation (20%) in the ST.

This project is conducted in groups, and the assessment is based on a collective group mark for the following three components.

1 A presentation to the project team and LSE Cities staff, which counts for 20% of the total mark.

2 A group project report not exceeding 5,000 words, which will count for 80% of the final grade. 160160

3 Additionally, each group member must write a personal reflection on their contribution in no more than 600 words, and should include specific details of the student's contributions to the project.

S04A7E

Urban Consultancy Project

This information is for the 2019/20 session.

Teacher responsible: Dr Philipp Rode 8.01I and Dr Savvas Verdis 8.01E

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

This course is only available to students registered in the Executive MSc in Cities.

Course content: The Consultancy Project is a six-month individual consultation undertaken by a student in the Executive MSc in Cities in their own organisation or for an external organisation. Through the consultancy project, students will apply the knowledge and skills acquired in the first six courses of the programme to craft policy or program improvements for public or private agencies and non-profit organisations.

Through in depth interviews with the organisation's leaders as well as the relevant stakeholders, students will focus on a specific project and offer advice on one or more of its design and implementation phases. These may include but are not limited to the concept, feasibility, design, assessment, delivery and/ or evaluation phases in the project cycle.

Examples of projects include design briefs, assessment of master plans or strategic plans, social, economic and environmental impact assessment of projects, project finance and greening of

projects and policies.

Teaching: 3 hours of seminars and 2 hours of help sessions in the ST.

Each student will be allocated a supervisor, who will provide overall guidance on the project's development. Other members of staff may also advise as required. Students will be supported with face to face or web based tutorials throughout the duration of their consultancy project.

Formative coursework: Students will be expected to produce 1 essay in the ST.

A 500 word proposal brief for the consultation project that will be carried out independently by each student.

Indicative reading: Bryman, Alan. *Social Research Methods*, 2012.

Oxford University Press. Cook, Curtis R. 2005. *Just enough project management the indispensable four-step process for managing any project, better, faster, cheaper*. New York: McGraw-Hill.

Lindblom, Charles Edward, and David K. Cohen. 1979.

Usable knowledge: social science and social problem solving. New Haven: Yale University Press. Office for Government Commerce.

2004. *Common Causes of Project Failure*. London: OGC. Prime

Minister's Strategy Unit. 2004. *Strategy Survival Guide*. London.

Assessment: Project (100%, 6000 words) in the LT.

A consultancy report assessing an organisation's challenge and offering strategic advice on possible solutions at any stage of the project or policy cycle.

MRes/PhD Programme Regulations

Key to MRes/PhD Regulations
(H) means a half-unit course
(C) means this course is capped
(n/a 19/20) means not available in the 2019/20 academic year
(M) means Michaelmas Term
(L) means Lent Term
(S) means Summer Term

MRes/PhD in Anthropology

Programme Structure - MRes

Programme code: TMRESAN

Department: Anthropology

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1	AN471	Qualitative Methods for Anthropologists (1.0)
Paper 2	AN472	Evidence and Arguments in Anthropology and Other Social Sciences (1.0)
Paper 3	AN442	Supervised Reading Course and Fieldwork Preparation (1.0)
Paper 4	AN443	Research Proposal (1.0)
		In addition students are required to complete the following courses, which are compulsory but not examined:
Paper 5	AN500	Seminar on Anthropological Research (0.0)
Paper 6		All MRes students are required to audit one or two of the department's main lecture courses (to the value of 1.0 unit):
	AN402	The Anthropology of Religion (1.0)
	AN405	The Anthropology of Kinship, Sex and Gender (1.0)
	AN437	Anthropology of Learning and Cognition (1.0) (withdrawn 2018/19)
	AN451	Anthropology of Politics (0.5)
	AN456	Anthropology of Economy (1): Production and Exchange (0.5)
	AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)

Award of the MRes in Anthropology

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree. For students entering in or before 2016/17: Classification for students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 will always be determined to the advantage of the student. From 2017/18 students with mark profiles falling under Paragraphs 3.3.2 or 3.3.4 shall be classified as follows:

Distinction/Merit borderline (scheme paragraph 3.3.2):
 3.3.2 (c) marks of a Distinction grade in courses to the value of 2.5 units and a mark of a Merit grade in a course of 0.5 unit value will obtain an overall classification of a Distinction;
 3.3.2 (d) marks of a Distinction grade in courses to the value of 2.0 units and marks of a Merit grade of at least 65 in courses to the value of 2.0 units; OR, marks of a Distinction grade in courses to the value of 2.0 units, marks of a Merit grade in courses to the value of 2.0 units, and an overall aggregate mark of at least 275 will obtain an overall classification of a Distinction.
 Merit/Pass borderline (scheme paragraph 3.3.4):
 3.3.4 (h) marks of a Merit grade in courses to the value of 2.5 units will obtain an overall classification of a Merit;
 3.3.4 (i) marks of a Distinction grade in courses to the value of 1.0 unit, marks of a Merit grade in courses to the value of 1.0 unit, and marks of a Pass grade of at least 55 to the value of 2.0 units will obtain an overall classification of Merit
 The marks for AN471 and AN472 will count respectively as 25% of the total mark for the year. The research proposal, worth 50%

of the total mark for the MRes year, will be examined (and the examination includes a viva). In order to be upgraded to PhD registration and allowed to commence fieldwork, students (a) must earn an average of 60 or more across all units; (b) must earn a minimum mark of 60 on the research proposal..

Progression to the PhD

If the above MRes requirements are met, students will be upgraded to PhD registration and will commence the fieldwork phase of the programme. The mandatory first year progress review of PhD students will be based on written reports about the early phase of fieldwork. The mandatory third year progress review for students in Anthropology is held in the third term (or, exceptionally, in the fourth term) after their return from fieldwork; this entails a viva with both supervisors and one external examiner.

Programme Structure - PhD

Programme code: RPAN2

In the programme regulations below Years 1 and 2 are listed as "fieldwork", with Years 3 and 4 being post-fieldwork, although in practice the timing/duration of these stages may vary to some extent between students.

Year 1 - Fieldwork

Year 2 - Fieldwork

Year 3

Paper 1 AN505 Advanced Professional Development in Anthropology (1.0)

Papers 2 & 3 Compulsory non-examined courses:
 AN500 Seminar on Anthropological Research (0.0)
 AN503 Thesis Writing Seminar (0.0)

Year 4

Papers 4 & 5 Compulsory non-examined courses:
 AN500 Seminar on Anthropological Research (0.0)
 AN503 Thesis Writing Seminar (0.0)

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Economics

A PhD in Economics consists of two years of coursework, followed by a thesis which is expected to take three years. The coursework requirement involves three PhD-level core courses in microeconomics, macroeconomics and econometrics, three field courses and a supervised research paper. A place on the MSc Economics or the MSc Econometrics and Mathematical Economics will include a conditional offer of progression to the MRes/PhD in Economics, subject to the attainment of a Distinction grade in the MSc. Those who meet the progression requirement and decide to progress are registered as MRes students and undertake the same two-year MRes course requirement as with all other MRes/PhD students.

Programme Structure - MRes

Programme code: TMRESEC

Department: Economics

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

First Year MRes

Introductory course

All students are required to attend the following introductory course in Year 1:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Students are required to take the following MRes core courses:

- Paper 1 EC441 Microeconomics for MRes students (1.0) #
 Paper 2 EC442 Macroeconomics for MRes students (1.0)
 Paper 3 EC443 Econometrics for MRes students (1.0) # **or**
 EC484 Econometric Analysis (1.0) #*A
 Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one course from the following Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree:

Field Selection List**Second year or higher MRes****Students are required to take:**

- Paper 4 EC599 Research Paper in Economics (1.0) B
 Papers 5 Courses to the value of 2.0 unit(s) from the following:
 & 6

Field Selection List**Students are required to attend:**

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Field Selection List

- EC518 Topics in Advanced Econometrics for Research Students (1.0)
 EC532 International Economics for Research Students (1.0)
 EC533 Labour Economics for Research Students (1.0)
 EC534 Public Economics for Research Students (1.0)
 EC535 Development Economics for Research Students (1.0)
 EC536 Economics of Industry for Research Students (1.0)
 EC537 Microeconomic Theory for Research Students (1.0) #
 EC539 Macroeconomics for Research Students (1.0)
 EC540 Political Economy for Research Students (1.0) #

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

Footnotes

A: Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

B: The EC599 Research Paper must be 5,000 - 10,000 words in length.

means there may be prerequisites for this course.

Please view the course guide for more information.

Programme Structure - PhD**Programme code:** RPEC2

First year PhD Programme

Students who have been upgraded to PhD are required to work on their research and write a PhD thesis. In addition they are required to take:

- Paper 7 Courses to the value of 1.0 unit(s) from the following:

Field Selection List

Students are also required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Second and subsequent years PhD Programme

Students are required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Field Selection List

- EC518 Topics in Advanced Econometrics for Research Students (1.0)
 EC532 International Economics for Research Students (1.0)
 EC533 Labour Economics for Research Students (1.0)
 EC534 Public Economics for Research Students (1.0)
 EC535 Development Economics for Research Students (1.0)
 EC536 Economics of Industry for Research Students (1.0)
 EC537 Microeconomic Theory for Research Students (1.0) #
 EC539 Macroeconomics for Research Students (1.0)
 EC540 Political Economy for Research Students (1.0) #
 # means there may be prerequisites for this course.
 Please view the course guide for more information.

Progression to Year 2 of MRes in Economics

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. With the permission of the MRes Programme Director, students who do not attain this standard may proceed to the second year with up to one resit paper (with the restriction that they can sit a maximum of four exams, including resits and EC599 in Year 2).

Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree. Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and in one of the Papers 5 or 6.

The marks for Papers 1 - 4 and the highest mark from Papers 5 or 6 will be used to determine the degree classification. A fail in one of these five classification papers (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 220 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration

For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5 and 6, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.

Condoning marks: A mark between 55 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in another from Papers 1, 2 or 3. A mark between 50 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in the EC599 research paper. Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration.

Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper at the next available opportunity. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on

progression to PhD according to the Appeals Regulations for Research Students <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/AppealsRegulationsForResearchStudents.pdf>.

Progression to Year 2 of PhD

In order to progress to the second year of PhD registration students are required to pass the PhD qualifying field (Paper 7) with a mark of 50% or higher.

Award of the PhD in Economics

Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Special provisions for students who have completed an MSc degree within the Economics Department at LSE

Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one course from the Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree.

With the approval of the Doctoral Programme Director, students who have completed an MSc degree within the Economics department at LSE will exceptionally be permitted to take their PhD qualifying field course (Paper 5) in the first year of the MRes and might take Paper 7 in their second year.

For students who have taken Paper 7 in their second year the progression and award regulations are adjusted as follows:

MRes award - Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and at least one mark of 50% in Papers 5-7. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper.

Progression to PhD registration - For PhD registration students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5, 6 and 7, with at least two of the 60% marks achieved in the MRes core Papers 1, 2, and 3.

Progression to PhD to Year 2 of PhD - In order to progress to the second year of PhD students are required to pass all the PhD qualifying field (Papers 5-7) with a mark of 50% or higher.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Finance

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Programme Structure - MRes

Programme code: TMRESF1

Department: Finance

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory course

Students are required to attend the following before commencing the MRes/PhD programme:

EC400 Introductory Course in Mathematics and Statistics (0.0)
#

Training courses

Compulsory (examined):

Paper 1 EC441 Microeconomics for MRes students (1.0) #

Paper 2 EC442 Macroeconomics for MRes students (1.0)

Paper 3 FM481 Financial Econometrics for Research Students

(1.0) #

Transferable skills courses

Compulsory (not examined):

A. FM436 Financial Economics (1.0) #

B. Capital Markets Workshop

Optional (not examined):

C. MY592 Workshop in Information Literacy: finding, managing and organising published research and data (0.0)

D. Any relevant seminars in related areas.

Year 2

Training courses

Compulsory (examined):

Paper 4 FM502 Corporate Finance for Research Students (1.0)

Paper 5 FM503 Asset Pricing for Research Students (1.0)

Paper 6 FM482 Research paper in Finance (1.0) A

Transferable skills courses

Compulsory (not examined):

A. FM505 PhD Seminar in Finance (1.0) B

B. Capital Markets Workshop

Optional (not examined):

C. Any relevant seminars in related areas.

Footnotes

A: The FM482 Research Paper must be 6,000 - 8,000 words in length.

B: Presentation requirements: Students are required to do an FM505 seminar presentation in the second year.

means there may be prerequisites for this course.

Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPF12

Year 3

(if upgraded to PhD)

Training courses

Compulsory (examined):

Paper 7 FM505 PhD Seminar in Finance (1.0) A

Transferable skills courses

Compulsory (not examined):

A. Capital Markets Workshop

Footnotes

A: Students need to pass Paper 7 with a mark of 65% or higher.

Progression and upgrade requirements

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams in year 2, which must be the two resits, either paper 4 or 5, and paper 6.

Award of the MRes in Finance

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in 5 of full-unit papers, which must include Paper 6 (Research paper) and four papers from Papers 1, 2, 3, 4, and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in papers 4 and 5 and a mark of 65% or higher in Paper 6.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in International Development

Programme Structure - MRes

Programme code: TMRESDV

Department: International Development

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Compulsory courses

1. DV501 Development History, Theory and Policy for Research Students (0.5)
2. Methodology course choice to the value of one full unit (at the 400 and 500 level). Course choices must be approved by the supervisor and Doctoral Programme Director.
3. Methodology or Theory course choice to the value of 1.5 units (at the 400 and 500 level). Courses may be chosen from the list of optional courses below or an unlisted course. Course choices must be approved by the supervisor and Doctoral Programme Director.
4. DV510 Research Design and Proposal in International Development (1.0)
- 5 DV500 Research Seminar in Development Studies (0.0)

Optional courses

6. The following course is a prerequisite for 400 and 500 level EC courses for students planning to make use of advanced quantitative methods in their PhD research:
EC400 Introductory Course in Mathematics and Statistics (0.0) #
7. The following courses are recommended options under Paper 3 above:
DV518 African Development (0.5)
DV520 Complex Emergencies (0.5)
DV528 Managing Humanitarianism (0.5)
DV531 Development Management (1.0)
DV545 Research Themes in International Development (0.5)
DV560 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) #
DV590 Economic Development Policy I (0.5)
DV591 Economic Development Policy II (0.5)
GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) #

means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes in International Development

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree.

Programme Structure - PhD

Programme code: RPDV2

Upgrade to PhD

Upgrade to PhD is dependent upon:

1. Pass of the MRes with an average of 65 in the coursework (except as noted above).
2. Pass of the Research Proposal with a mark equal or greater than 65.

The Research Proposal Committee will offer constructive advice and make one of four decisions:

- Unconditional approval
- Conditional approval
- Revise and resubmit
- Fail

Students who are required to Revise and Resubmit are usually expected to resubmit the proposal within three months. These students will progress to a temporary MPhil status, with the approval of the Chair of the Research Degrees Subcommittee, while they are revising their research proposal. Students who are successful will be upgraded to PhD.

The progress of each student will be reviewed at the end of each subsequent year.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Management (Employment Relations and Human Resources)

(This programme is not available in 2019/20)

For the MRes component of this programme (Years 1 and 2), students must take courses to the value of 5.0 units over two years, as shown below. Please refer to the Classification scheme which should be read in conjunction with these programme regulations. During the MRes, students are covered by the Regulations for taught master's degrees for students entering in or after the 2009/10 academic year. Continuation on to the PhD is dependent on meeting the progression requirements as stated below.

For the PhD component of this programme, in addition to progressing with their research, students are expected to take seminars and workshops as shown below. When students progress on to the PhD part of the programme (Years 3-6) the academic regulations that apply to them change from the regulations for taught master's to the Regulations for research degrees.

Students on the MRes or PhD programme must comply with the General Academic Regulations.

Programme Structure - MRes

Programme code: TMRESMGERH

Department: Management

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

- | | | |
|---------|-------|--|
| Paper 1 | MG518 | Employment Relations and Human Resource Management Seminar (0.5) (not available 2019/20) and MY500 Fundamentals of Social Science Research Design (0.5) |
| Paper 2 | MG505 | Research in Organisational Behaviour (1.0) (not available 2019/20) |
| Paper 3 | MY551 | Introduction to Quantitative Analysis (0.5) and MY521 Qualitative Research Methods (0.5) |

Year 2

- | | |
|---------|---|
| Paper 4 | Courses to the value of 0.5 unit(s) from the following: |
| | DV501 Development History, Theory and Policy for Research Students (0.5) |
| | GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) # |

- MG576 Corporate Social Responsibility and International Labour Standards (0.5) (not available 2019/20)
- Paper 5 Courses to the value of 0.5 unit(s) from the following:
- MG436 Firms, Markets and Crises (0.5) # (withdrawn 2018/19)
- MG473 Negotiation Analysis (0.5)
- MG475 Organisational Theory (0.5)
- MG4A9 Foundations of Business and Management for Human Resources (0.5)
- MG4B7 Organisational Change (0.5)
- MG4C2 Organisational Behaviour (0.5)
- MG4D1 International and Comparative Human Resource Management (0.5) (withdrawn 2018/19)
- MG4D2 International Employment Relations (0.5) #
- MG4D3 The Dark Side of the Organisation (0.5) #
- MG4D4 Cross Cultural Management (0.5) #
- MG4D5 Leadership in Organisations: Theory and Practice (0.5)
- Paper 6 MG599 Research Paper in Management (1.0) (not available 2019/20)
- # means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGERHR

Non-examined courses

Years 3-6

1. Relevant workshops from the following:
MY530 Advanced Qualitative Research Workshops (0.0) #
 2. At least one Department of Management Research Seminar each year
- All PhD projects involve a qualitative stage, including fieldwork, for theory generation and a quantitative stage for theory testing and analysis. This will normally take place in Years 3 and 4.
- # means there may be prerequisites for this course. Please view the course guide for more information.

A: FOR PROGRESSION FROM THE FIRST YEAR TO THE SECOND YEAR OF THE MRES IN MANAGEMENT (ORGANISATIONAL BEHAVIOUR)

Students must achieve marks of 65% in each first year core course in order to progress to year two of the MRes programme. Students who do not achieve this standard may progress to the second year having failed (but not a Bad Fail) or received a mark between 50-59, or 60-64 mark, in a maximum of half a unit of courses only as long as they obtain the permission of the MRes Programme Director. Where the student receives a fail mark (but not a Bad Fail mark) or a mark between 50-59, or 60-64 mark in a half unit in total, they will be required to resit this work at the end of the programme in order to progress on to the PhD unless they achieve the compensation conditions set out at 3.2.3 above.

Where a student has been awarded an MRes according to the classification scheme above but is required to resit an element of assessment in order to meet the PhD progression requirements the resit mark will not supersede the original attempt or result in an adjustment to the award.

A student who passes all courses but fails to achieve the required standard in more than half a core course unit cannot progress and fails the degree without the opportunity to resit. A student who receives fail marks (including Bad Fails) in more than half a unit cannot progress to year two until those fails have been resat and they then meet the progression requirements as set out above. A student may only resit an assessment on one occasion only.

B: FOR PROGRESSION FROM MRES TO PHD

The award and classification of the MRes shall be based on the 5 unit classification scheme. In order to progress on to the PhD registration students are required to achieve marks of 60% in all 5 course unit marks by the end of the programme.

1 failed unit (but not Bad Fails) or passed unit with marks in the range of 50-59, or a 60-64 mark can be compensated by achieving

marks of at least 70% in courses of an equivalent value. Or, by achieving an aggregate mark of 260 in the non-failed courses. Students who fail to achieve marks of 60% or above and are unable to compensate these marks must resit these courses at the next available opportunity on one occasion only. Results obtained following a repeated attempt at assessment will not supersede the original attempt or result in an adjustment to the classification where a student has previously achieved a pass mark in that course or an award has already been made.

Students who progress to PhD registration can resit up to half a unit only in order to attempt to satisfy the progression requirements. They need to achieve a pass mark of 60 or above in this work to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued. A student may only resit an assessment on one occasion only. See the Calendar for further information about Programme Regulations, Course Guides, School and Academic Regulations.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Management (Information Systems and Innovation)

(This programme is not available in 2019/20)

For the MRes component of this programme (Years 1 and 2), students must take courses to the value of 5.0 units over two years, as shown below. Please refer to the Classification scheme which should be read in conjunction with these programme regulations. During the MRes, students are covered by the Regulations for taught master's degrees for students entering in or after the 2009/10 academic year. Continuation on to the PhD is dependent on meeting the progression requirements as stated below.

For the PhD component of this programme, in addition to progressing with their research, students are expected to take seminars and workshops as shown below. When students progress on to the PhD part of the programme (Years 3-6) the academic regulations that apply to them change from the regulations for taught master's to the Regulations for research degrees.

Students on the MRes or PhD programme must comply with the General Academic Regulations.

Programme Structure - MRes

Programme code: TMRESMGIS1

Department: Management

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

- Paper 1 MG502 Foundations of Social Research in Information Systems: Paradigms and Traditions (0.5) (not available 2019/20) and MG503 Interpretations of Information (0.5) # (not available 2019/20)
- Paper 2 MY521 Qualitative Research Methods (0.5) and MY551 Introduction to Quantitative Analysis (0.5)
- Paper 3 MY500 Fundamentals of Social Science Research Design (0.5)

And courses to the value of 0.5 units from the following:

MG460 Handling Disruption: Humanitarian Emergencies Management and Development (0.5)

MG479 Information Systems for the Public Sector: Digital Government and Service Innovation (0.5)

MG483 eHealth: Policy, Strategy and Systems (0.5) # (not available 2019/20)

870 MRes/PhD Programme Regulations

- MG484 Global Sourcing and Management of Business and IT Services (0.5) # (not available 2019/20)
- MG486 Social Computing, Data and Information Service (0.5)
- MG492 Data Governance: Privacy, Openness and Transparency (0.5)
- MG4C3 Information Technology and Service Innovation (0.5)

Students may also take appropriate MSc or PhD level courses from within the Department of Management or from another department as agreed with their supervisor and programme director and subject to timetabling constraints.

Year 2

Paper 4 MG509 Managing Digital Platform Innovation (0.5) (not available 2019/20) and MG511 Technology, Practice and Institutions (0.5) (not available 2019/20)

Paper 5 MG599 Research Paper in Management (1.0) (not available 2019/20)

Workshops In addition, students are required to attend the following on a weekly basis, which are compulsory but not examined:

MG500 Information Systems PhD Seminar Series and Workshops (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGISI

Programme Structure - PhD

Programme code: RPMGMK

Non-examined courses

Years 3-6

1. Relevant workshops from the following:
 MY530 Advanced Qualitative Research Workshops (0.0) #
2. At least one Department of Management Research
 Seminar each year
 All PhD projects involve a qualitative stage, including
 fieldwork, for theory generation and a quantitative stage
 for theory testing and analysis. This will normally take
 place in Years 3 and 4.
 # means there may be prerequisites for this course.
 Please view the course guide for more information.

A: FOR PROGRESSION FROM THE FIRST YEAR TO THE SECOND YEAR OF THE MRES IN MANAGEMENT (MARKETING)

Students must achieve marks of 65% in each first year core course in order to progress to year two of the MRes programme. Students who do not achieve this standard may progress to the second year having failed (but not a Bad Fail) or received a mark between 50-59, or 60-64 mark, in a maximum of half a unit of courses only as long as they obtain the permission of the MRes Programme Director. Where the student receives a fail mark (but not a Bad Fail mark) or a mark between 50-59, or 60-64 mark in a half unit in total, they will be required to resit this work at the end of the programme in order to progress on to the PhD unless they achieve the compensation conditions set out at 3.2.3 above.

Where a student has been awarded an MRes according to the classification scheme above but is required to resit an element of assessment in order to meet the PhD progression requirements the resit mark will not supersede the original attempt or result in an adjustment to the award.

A student who passes all courses but fails to achieve the required standard in more than half a core course unit cannot progress and fails the degree without the opportunity to resit. A student who receives fail marks (including Bad Fails) in more than half a unit cannot progress to year two until those fails have been resat and they then meet the progression requirements as set out above. A student may only resit an assessment on one occasion only.

B: FOR PROGRESSION FROM MRES TO PHD

The award and classification of the MRes shall be based on the 5 unit classification scheme. In order to progress on to the PhD registration students are required to achieve marks of 60% in all 5 course unit marks by the end of the programme.

1 failed unit (but not Bad Fails) or passed unit with marks in the range of 50-59, or a 60-64 mark can be compensated by achieving marks of at least 70% in courses of an equivalent value. Or, by achieving an aggregate mark of 260 in the non-failed courses. Students who fail to achieve marks of 60% or above and are unable to compensate these marks must resit these courses at the next available opportunity on one occasion only. Results obtained following a repeated attempt at assessment will not supersede the original attempt or result in an adjustment to the classification

where a student has previously achieved a pass mark in that course or an award has already been made.

Students who progress to PhD registration can resit up to half a unit only in order to attempt to satisfy the progression requirements. They need to achieve a pass mark of 60 or above in this work to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued. A student may only resit an assessment on one occasion only. See the Calendar for further information about Programme Regulations, Course Guides, School and Academic Regulations.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Management (Organisational Behaviour)

This programme is not available in 2019/20

For the MRes component of this programme (Years 1 and 2), students must take courses to the value of eight units over two years, as shown below. Please refer to the Classification scheme which should be read in conjunction with these programme regulations. During the MRes, students are covered by the Regulations for taught master's degrees for students entering in or after the 2009/10 academic year. Continuation on to the PhD is dependent on meeting the progression requirements as stated below.

For the PhD component of this programme, in addition to progressing with their research, students are expected to take seminars and workshops as shown below. When students progress on to the PhD part of the programme (Years 3-6) the academic regulations that apply to them change from the regulations for taught master's to the Regulations for research degrees.

Students on the MRes or PhD programme must comply with the General Academic Regulations.

Programme Structure - MRes

Programme code: TMRESMG0

Department: Management

For students starting this programme of study in 2019/20

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

- Paper 1 MG505 Research in Organisational Behaviour (1.0) (not available 2019/20)
- Paper 2 PB431 Social Psychology of Economic Life: Advanced Topics (0.5) **or**
 SO470 The Sociology of Markets (0.5)
- Paper 3 MY500 Fundamentals of Social Science Research Design (0.5)
- Paper 4 MY521 Qualitative Research Methods (0.5)
- Paper 5 MY552 Applied Regression Analysis (0.5) # **or**
 MY555 Multivariate Analysis and Measurement (0.5) #

Year 2

- Paper 6 Courses to the value of 1.0 unit(s) from the following:
 DV501 Development History, Theory and Policy for Research Students (0.5)
 EC540 Political Economy for Research Students (1.0) #
 MG512 Marketing: Consumer Behaviour (0.5) (not available 2019/20)
 MG515 Social Organisation (0.5) # (not available 2019/20)
 MG518 Employment Relations and Human Resource Management Seminar (0.5) (not available 2019/20)

Alternatively, students may take appropriate MSC or PhD level courses from within the Department of Management or from another department as agreed with their supervisor and programme director and subject to timetabling constraints.

The following unassessed courses are also recommended:

AC500 Accounting, Organisations and Society (0.0)
EH518 The Economic History of Firms & Industries Seminar (0.0) (not available 2019/20)
GV515 Researching People, Politics and Organisations (0.0) (withdrawn 2018/19)

Paper 7 MG599 Research Paper in Management (1.0) (not available 2019/20)

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGOB

Non-examined courses

Years 3-6

1. Relevant workshops from the following:
MY530 Advanced Qualitative Research Workshops (0.0) #
2. At least one Department of Management Research Seminar each year
means there may be prerequisites for this course. Please view the course guide for more information.

A: FOR PROGRESSION FROM THE FIRST YEAR TO THE SECOND YEAR OF THE MRES IN MANAGEMENT (EMPLOYMENT RELATIONS AND HUMAN RESOURCES)

Students must achieve marks of 65% in each first year core course in order to progress to year two of the MRes programme. Students who do not achieve this standard may progress to the second year having failed (but not a Bad Fail) or received a mark between 50-59, or 60-64 mark, in a maximum of half a unit of courses only as long as they obtain the permission of the MRes Programme Director. Where the student receives a fail mark (but not a Bad Fail mark) or a mark between 50-59, or 60-64 mark in a half unit in total, they will be required to resit this work at the end of the programme in order to progress on to the PhD unless they achieve the compensation conditions set out at 3.2.3 above.

Where a student has been awarded an MRes according to the classification scheme above but is required to resit an element of assessment in order to meet the PhD progression requirements the resit mark will not supersede the original attempt or result in an adjustment to the award.

A student who passes all courses but fails to achieve the required standard in more than half a core course unit cannot progress and fails the degree without the opportunity to resit. A student who receives fail marks (including Bad Fails) in more than half a unit cannot progress to year two until those fails have been resat and they then meet the progression requirements as set out above. A student may only resit an assessment on one occasion only.

B: FOR PROGRESSION FROM MRES TO PHD

The award and classification of the MRes shall be based on the 5 unit classification scheme. In order to progress on to the PhD registration students are required to achieve marks of 60% in all 5 course unit marks by the end of the programme.

1 failed unit (but not Bad Fails) or passed unit with marks in the range of 50-59, or a 60-64 mark can be compensated by achieving marks of at least 70% in courses of an equivalent value. Or, by achieving an aggregate mark of 260 in the non-failed courses. Students who fail to achieve marks of 60% or above and are unable to compensate these marks must resit these courses at the next available opportunity on one occasion only. Results obtained following a repeated attempt at assessment will not supersede the original attempt or result in an adjustment to the classification where a student has previously achieved a pass mark in that course or an award has already been made.

Students who progress to PhD registration can resit up to half a unit only in order to attempt to satisfy the progression

requirements. They need to achieve a pass mark of 60 or above in this work to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued. A student may only resit an assessment on one occasion only. See the Calendar for further information about Programme Regulations, Course Guides, School and Academic Regulations.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Political Science

Programme Structure - MRes

Programme code: TMRESPOLSC

Department: Government

For students starting this programme of study in 2019/20 Students complete and are examined in courses to the value of four full units.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1

Research Design

GV5X1 Research Design in the Social Sciences (1.0)

Paper 2

Methods courses

Students take courses under A, B or C to the value of one unit:

A) Quantitative research topics

MY552 Applied Regression Analysis (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

GV4G1 Applied Quantitative Methods for Political Science (0.5) #

GV4J6 Game Theory for Research (0.5) #

B) Qualitative research topics

GV513 Qualitative Methods in the Study of Politics (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

C) Political theory research topics

GV504 Research Methods in Political Theory (1.0)

If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.

Paper 3

Field seminars

Courses to the value of 1.0 unit from the following:

GV5X2 Research Paper in Comparative Politics (1.0)

GV5XA Research Paper in Comparative Politics (0.5)

GV5XB Research Paper in Comparative Politics (0.5)

GV5X3 Research Paper in European Politics and Policy (1.0)

GV5XC Research Paper in European Politics and Policy (0.5)

GV5XD Research Paper in European Politics and Policy (0.5)

GV5X4 Research Paper in Global Politics (1.0)

GV5XE Research Paper in Global Politics (0.5)

GV5XF Research Paper in Global Politics (0.5)

GV5X5 Research Paper in Political Science and Political Economy (1.0)

GV5XG Research Paper in Political Science and Political Economy (0.5)

GV5XH Research Paper in Political Science and Political Economy (0.5)

GV5X6 Research Paper in Political Theory (1.0)

GV5XJ Research Paper in Political Theory (0.5)

GV5XK Research Paper in Political Theory (0.5)

- GV5X7 Research Paper in Public Policy and Administration (1.0)
 GV5XL Research Paper in Public Policy and Administration (0.5)
 GV5XM Research Paper in Public Policy and Administration (0.5)

Any research methods course taught anywhere in the School, with the approval of the Course Convenor and the Doctoral Programme Director, or any course from the following if not already taken under Paper 2 above:

Paper 2 options list

- GV4G1 Applied Quantitative Methods for Political Science (0.5) #
 GV4J6 Game Theory for Research (0.5) #
 GV504 Research Methods in Political Theory (1.0)
 GV513 Qualitative Methods in the Study of Politics (0.5)
 MY551 Introduction to Quantitative Analysis (0.5)
 MY552 Applied Regression Analysis (0.5) #
 MY557 Causal Inference for Observational and Experimental Studies (0.5) #

means there may be prerequisites for this course. Please view the course guide for more information.

Paper 4

Research Prospectus

- GV599 Research Prospectus in Political Science (1.0)

Programme Structure - PhD

Programme code: RPPOLSCI

Years 1, 2, 3, 4

- A) Research and write a dissertation
 B) Participate in at least one Doctoral Workshop in the Government Department or elsewhere in the School in each year. For example:

- GV501 Doctoral Workshop: Political Theory (0.0)
 GV503 Political Philosophy Research Seminar (0.0)
 GV510 Ethnicity and Nationalism Research Workshop (0.0) (withdrawn 2018/19)
 GV514 Political Science and Political Economy Doctoral Workshop (0.0)
 GV515 Researching People, Politics and Organisations (0.0) (withdrawn 2018/19)
 GV555 Political Economy and Public Policy Workshop (0.0) (not available 2019/20)

C) Second year students have the option of taking the following course. Permission to attend is at the discretion of the course convenor:

- EC540 Political Economy for Research Students (1.0) #
 # means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes

The award and classification of the MRes is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree

Conditions for progression to PhD

1. Award of the MRes with at least a Merit; **AND**
2. Award of GV599 with at least a Merit; **AND**
3. Successfully passing an oral hearing, consisting of a short presentation by the student and questions from the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will look for: a clear explanation of the research question(s) and motivation(s); an account of relevant related scholarly work; a discussion of methods, approaches, or challenges; and a plan to conduct the work within four years. The Department will publish more detailed guidance on assessment criteria.

The Research Prospectus Approval Committee normally consists of one supervisor or advisor of the student, at least one member of the Department's Doctoral Programme Committee, and an external assessor (usually the External Examiner for the MRes in Political Science). The Doctoral Programme Director chairs the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will make one of four decisions: Unconditional Approval, Conditional Approval, Revise and Resubmit, and Fail. Students with Conditional Approval have to submit a revised Research Prospectus to their Supervisor, normally within four weeks. The Doctoral Programme Director decides whether the conditions have been met, in consultation with the supervisor. Students who are required to Revise and Resubmit are usually expected to resubmit within three months. Resubmitted work is assessed by at least two members of the Research Prospectus Approval Committee. The Committee has discretion to conduct a second oral hearing if this is deemed necessary for the upgrade decision. If a second hearing is conducted, at least two members of the committee take part. Students who fail to pass, either at the first oral hearing or after Revise and Resubmit, will not be upgraded to PhD status.

In exceptional circumstances, the Research Prospectus Approval Committee can recommend to the Research Degrees Subcommittee to upgrade students who do not meet progression condition 1 (Award of MRes degree with at least a Merit). Such a recommendation must be based on very strong performance in certain subjects that offset weaknesses in others and an exceptionally strong Research Prospectus. Personal circumstances affecting assessment performance may also be taken into account.

Award of the PhD

The PhD is awarded according to the rules of LSE.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MRes/PhD in Quantitative Economic History

Programme Structure - MRes

Programme code: TMRESQEH

Department: Economic History

For students starting this programme of study in 2019/20

MRes

Students complete and are examined in courses to the value of four full units. Students are also required to attend EC400 Introductory Course in Mathematics and Statistics.

Please note that places are limited on some optional courses. Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Introductory course EC400 Introductory Course in Mathematics and Statistics (0.0) #

Paper 1 Courses to the value of 2.0 unit(s) from the following:

- & 2**
- EH404 India and the World Economy (0.5)
 - EH408 International Migration, 1500-2000: from slavery to asylum (0.5) (not available 2019/20)
 - EH413 African Economic Development in Historical Perspective (0.5)
 - EH421 Economic History of Colonialism (0.5)
 - EH423 Japan and Korea as Developing Economies (0.5)
 - EH446 Economic Development of East and Southeast Asia (1.0) #
 - EH452 Latin American Development and Economic History (0.5)
 - EH454 Human Health in History (1.0)
 - EH463 The Long-Run Analysis of Firms and Industries (0.5)
 - EH464 The Historical Context of Business (0.5)
 - EH476 The Economic History of War (1.0) # (not available 2019/20)
 - EH482 The Origins of the World Economy: Europe and Asia, 1000-1800 (1.0)

874 MRes/PhD Programme Regulations

EH483 The Development and Integration of the World Economy in the 19th and 20th Centuries (1.0)

EH486 Shipping and Sea Power in Asian Waters, c 1600-1860 (0.5) (not available 2019/20)

Paper 3 One of the following: A

EC411 Microeconomics (1.0) # or

EC413 Macroeconomics (1.0) #

Paper 4 EH473 Research Paper in Quantitative Economic History (1.0)

Paper 5 EH474 Research Prospectus (0.0) B

Footnotes

A: If not already taken under Paper 3 of the MSc in Quantitative Economic History.

B: Not examined but subject to departmental approval.

means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes Quantitative Economic History

The award and classification of the MSc degree is consistent with the School's scheme for the award of a four-unit Taught Master's Degree. Student are required to achieve a pass mark of 50% in Papers 1, 2, 3 and 4 and submit paper 5 (EH474 Research Prospectus, not examined half unit). Where a candidate receives a Fail mark in any course, the penalty rules are set out in <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/SchemeTaughtMasters.pdf> (see paragraph 3.2) apply. A Bad Fail (39% or lower) in any course of any unit value will result in an overall Fail for the degree.

Progression from the MRes Quantitative Economic History to the PhD

To progress from the MRes to the PhD programme, students need to achieve at least a Merit overall in the MRes and at least 65% in the (full unit) Research Paper in Quantitative Economic History (EH473). In addition, their Research Prospectus (EH474) needs to be approved by the departmental Prospectus Review Committee following a viva.

If a student fulfils all other progression requirements but his/her Research Prospectus does not meet the expectations set out in the EH474 course description, the Prospectus Review Committee will grant an extension of up to three months to submit a revised version. If this revised version fails the required standards, the candidate will not be admitted to the PhD programme.

Programme Structure - PhD

Programme code: RPQEH

Years 1-4

Non-examined course

EH590 Thesis Workshop in Economic History (0.0)

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD Programme Regulations

Key to MRes/PhD Regulations**(H) means a half-unit course****(C) means this course is capped****(n/a 19/20) means not available in the 2019/20 academic year****(M) means Michaelmas Term****(L) means Lent Term****(S) means Summer Term****MPhil/PhD in Accounting**

Programme Code: RPAC

Department: Accounting

For students starting this programme of study in 2019/20

The Department of Accounting offers an MPhil/PhD Accounting programme with two tracks. The aim is to ensure the highest quality in the development of research students, in their research skills and to support their progression to the completion and defence of high quality theses in their respective specialisms.

Track 1 is devoted to the study of interrelationships between accounting, organisations and institutions. Research in this track examines how accounting practices are much more than a collection of routine techniques, but are shaped by their institutional contexts, have behavioural consequences and can represent different values. Efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. Research in this track includes a wide variety of accounting topics examined through this lens using primarily qualitative methods, such as studies in management accounting, analyses of accounting systems in the private and public sector, transformations of auditing and risk regulation regimes, historical studies of accounting, as well as broader contributions to social theory.

Track 2 primarily examines accounting and financial reporting issues from an economics perspective. Research in this track covers a wide range of accounting topics including design and choices between alternative accounting methods, the use of accounting numbers for internal reporting, performance measurement, incentive systems, and in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting and performance measurement, and the interactions between financial reporting, legal and economic institutions, and corporate governance. While much research in these areas takes the form of empirical archival analysis, theoretical analysis and field research can also be relevant in some cases.

When making an application, MPhil/PhD students in Accounting will choose to follow either Track 1 or Track 2 as detailed below.

Track 1

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (not examined):**

AC500 Accounting, Organisations and Society (0.0)

Compulsory (examined):

AC502 Foundations of Accounting, Organizations and Institutions (0.5)

Methodology Training: At least one examined methodology course to the value of one half unit including courses offered by the Department of Methodology, either in their first and/or second year of the programme.

Courses to the value of 1.5 units from the following normally to be taken in the first year (one course may need to be taken in Year 2):

AC411 Accounting, Strategy and Control (0.5)

AC412 Accountability, Organisations and Risk Management (0.5)
 AC415 Management Accounting for Decision Making (0.5)
 AC444 Valuation and Security Analysis (0.5) #
 AC470 Accounting in the Global Economy (0.5) #
 AN473 Anthropological Approaches to Value (0.5)
 EH429 History of Economics: Ideas, Policy and Performativity (0.5)
 EH463 The Long-Run Analysis of Firms and Industries (0.5)
 GV481 Political Science and Political Economy (0.5)
 GV488 Law and Politics of Regulation (1.0)
 GY420 Environmental Regulation: Implementing Policy (1.0)
 GY423 Environment and Development (1.0) # (withdrawn 2019/20)
 GY455 Economic Appraisal and Valuation (0.5)
 LL440 Corporate Law and Accounting (1.0)
 LL4AH Corporate Governance (0.5) #
 LL4BX Corporate Governance - Advanced Topics (0.5) (not available 2019/20)
 PP478 Political Science for Public Policy (1.0)
 SO425 Regulation, Risk and Economic Life (1.0)
 SO430 Economic Sociology (0.5)

Any other graduate-level course available in the School with permission from the PhD Programme Director.

Transferable skills courses**Compulsory (not examined):**

Department of Accounting Research Forums (ARFs) and Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):

AC501 Empirical Financial Accounting and Capital Markets (1.0)
 Other research workshops and seminars held across the Department, relevant seminars in related areas elsewhere in the School, and appropriate international workshops and colloquia.

Year 2**Training courses****Compulsory (not examined):**

AC500 Accounting, Organisations and Society (0.0)

Compulsory (examined):

Students who have completed less than 2.5 examined graduate-level course units in Year 1 will take additional courses, so that at the end of Year 2 all students have completed at least 2.5 examined graduate-level course units.

Optional:

As needed students may take course(s) or research training session(s) offered by the Department of Methodology.

Transferable skills courses**Compulsory (not examined):**

Department of Accounting Research Forums (ARFs) and Accounting, Organisations and Institutions Research Seminars and Workshops

Optional (not examined):

Other research workshops and seminars held across the Department, relevant seminars in related areas offered elsewhere in the School, and appropriate international workshops and colloquia.

Optional (not examined):

Other research workshops and seminars held across the Department, relevant seminars in related areas offered elsewhere in the School, and appropriate international workshops and colloquia.

Year 4

Training courses

Compulsory (not examined):

AC501 Empirical Financial Accounting and Capital Markets (1.0)

Optional:

As needed students may take course(s) or research training session(s) offered by the Department of Methodology.

Transferable skills courses

Compulsory (not examined):

Department of Accounting Research Forums (ARFs) and Economics of Accounting Research Seminars and Workshops

Optional (not examined):

Other research workshops and seminars held across the Department, relevant seminars in related areas offered elsewhere in the School, and appropriate international workshops and colloquia.

Footnotes

A: EC400 is an introductory course starting in September. All students are normally required to attend EC400, the September Introductory Course in Mathematics and Statistics, before commencing the Track 2 MPhil/PhD Programme in Accounting.
 # means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements for Tracks 1 and 2:

Progression requirements: The departmental MPhil/PhD Assessment Review Committee will reach a decision on progression for each student at the end of Years 1, 2 and 3, and progression from EC400 (for students on Track 2).

The Committee may deny progression or set additional progression requirements, such as the requirement to take additional examined course-units, for a Track 2 student who fails EC400 or one of its components.

All MPhil/PhD Accounting students are normally required to achieve a mark of at least 65% in each of the examined graduate-level course units required for progression on both tracks of the programme. The Committee may, in exceptional circumstances, condone a marginal fail if a student has demonstrated strength in other examined courses. Students failing an examined course can, at the discretion of the Committee, and taking into account overall performance, re-sit that course on one occasion only. The Committee may also decide to substitute an alternative assessment to redress any mark deficiencies and has the discretion to set additional requirements for progression where appropriate. Course choices have to be approved by supervisors

and are overseen by the Doctoral Programme Director to ensure consistency.

Students are required to make a seminar presentation in each year of their programme. These are formatively assessed. Performance at the seminar presentations will be taken into account by the MPhil/PhD Assessment Review Committee when reaching decisions on progression.

Upgrade: Students will initially be registered for the MPhil. Upgrade to PhD registration will normally happen at the end of Year Two. In order to progress to PhD registration, students must normally have met the progression requirements above (a mark of at least 65% in each of the required examined graduate-level course units), and have made satisfactory progress in their research, which normally is understood to mean a solid draft of one complete chapter, plus a detailed outline for the rest of the dissertation with abstracts for each proposed chapter. Materials submitted for upgrade must include a clear framework for the research and a timetable for completion. Students will be provided with an opportunity to defend their submitted written materials orally. The departmental MPhil/PhD Assessment Review Committee will review the progress of each research student, and recommendations for upgrading to PhD will be made on a case-by-case basis.

Award of the PhD in Accounting: Award of the PhD is contingent on the completion and defence of an original research thesis, in accordance with LSE regulations.

Teaching Experience

Students in Tracks 1 and 2 are required to gain teaching experience with appropriate training in years two and three, and they are encouraged to take presentation skills and other training offered by the Teaching and Learning Centre.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Cities Programme

Programme Code: RPCP

Department: Sociology

For students starting this programme of study in 2019/20 The MPhil/PhD in Cities is an interdisciplinary degree offered through the Sociology Department. Research within this programme addresses not only works within the discipline of sociology but also other fields that comprise urban studies, such as architecture, design, urban geography, urban history, and planning. A Cities PhD thesis should assume a scholarly audience that includes sociologists as well as other urbanists. Through theory, empirical focus and/or methods, students must engage with urban space as a conceptual category, significant contextual feature, or object of analysis.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

Other courses from Sociology master's programmes

Specialist research courses:

SO491 Quantitative Social Research Methods (0.5)

SO492 Qualitative Social Research Methods (0.5)

SO511 Research Seminar in Political Sociology (0.0)

SO521 Research Seminar on Cities and Space (0.0)

Transferable skills courses

Optional (not examined):

MY591 MY591 Computing Packages for Applied Analysis (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Optional (not examined):

SO501 Data Analysis Workshop (0.0) A

Year 2 and/or Year 3

Training courses

Compulsory (not examined):

SO501 Data Analysis Workshop (0.0) A

Footnotes

A : SO501 is strongly recommended.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Summer Term Year 1 for Full Time Students: Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Summer Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Summer Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project. Full time students are required to have submitted their Upgrade materials in Week 6 of the Michaelmas Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Michaelmas Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student. All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and

the viva, Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Lent Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written submission and the viva.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Data, Networks and Society

Programme Code: RPDNS

Department: Media & Communications

For students starting this programme of study in 2019/20 These regulations apply to students entering in or after the 2017/18 academic year.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

Any two of the following:

- MC402 The Audience in Media and Communications (0.5)
- MC408 Theories and Concepts in Media and Communications I (Key concepts and interdisciplinary approaches) (0.5)
- MC409 Media, Technology and Everyday Life (0.5)
- MC413 Information, Communication and Knowledge Systems (0.5) (not available 2019/20)
- MC418 Communication: Cultures and Approaches (0.5)
- MC424 Media and Communication Governance (0.5)
- MC425 Interpersonal Mediated Communication (0.5)
- MC430 Data in Communication and Society (0.5)
- MC433 Technology and Justice (0.5) #
- MC434 Digital Platforms and Media Infrastructures (0.5) #

Plus:

One of the following full-unit courses:

- MC5M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Or for students who already have a grounding in quantitative methods: A

- MC5M8 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses

Compulsory (not examined):

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Optional (not examined):

- LN988 Thesis Writing (0.0) #
- Modern Foreign Language courses offered by the Language Centre

or other graduate seminars of relevance to research subject.

Presentation requirements:

At least one presentation annually in the following:

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Year 2

Training courses

Optional (examined/not examined):

Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M2/MC5M8 convenor.

Transferable skills courses

Compulsory (not examined):

- MC500 Research Seminar for Media, Communications & Culture (0.0)

Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Optional (not examined):

Other graduate seminars of relevance to research subject.

Year 3

Transferable skills courses

Optional (not examined):

Advanced Doctoral Workshops

Year 4

Research

Students are expected to complete their research.

Footnotes

A: Students wishing to select this option must seek approval from the Programme Director. Approval is subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by week 5 of Summer Term in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Demography/Population Studies

Programme Code: RPDEPS

Department: Social Policy

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Optional (not examined):**

If not already taken previously:

- MY400 Fundamentals of Social Science Research Design (0.5)
 MY421 Qualitative Research Methods (0.5)
 MY451 Introduction to Quantitative Analysis (0.5)
 SP401 Understanding Policy Research (0.5)
 SP420 Understanding Policy Research (Advanced) (0.5) #

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses**Compulsory (not examined):**

- SP501 Research Student Seminar (0.0)

Optional (not examined):

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2**Training courses****Optional (not examined):**

- MY452 Applied Regression Analysis (0.5) #
 MY455 Multivariate Analysis and Measurement (0.5) #

Transferable skills courses**Optional (not examined):**

- SP501 Research Student Seminar (0.0)

Year 3**Transferable skills courses****Optional (not examined):**

- SP501 Research Student Seminar (0.0)

Year 4**Transferable skills courses****Optional (not examined):**

- SP501 Research Student Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements:

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.

Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Research Students' Programme Director.

Each pre-Major Review student is expected to make a presentation on their proposed research to the SP501 seminar prior to the submission of their major review document and to address issues raised by the Research Students' Programme Director(s).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Development Studies

Programme Code: RPDV

Department: International Development

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should

discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (examined):**

All students will be required to take either a full or two half unit courses in research methods in the School's Department of Methodology. The precise courses taken will be decided in consultation with the student's primary supervisor.

Compulsory (not examined):

DV500 Research Seminar in Development Studies (0.0)
 Students who have not received their MSc Development Studies from the LSE will be required to attend the lectures for the following core course:

- DV400 Development: History, Theory and Policy (1.0) #

All first year students are required to attend a special seminar for research students.

Optional (not examined):

Further appropriate graduate level courses in the Department of International Development and agreed with supervisor.

Optional (not examined):

MPhil/PhD students will find it advantageous to attend the weekly Visiting Lecture Series in Development Studies in Michaelmas Term.

means there may be prerequisites for this course. Please view the course guide for more information.

By Year 4

Students are expected to have completed their research.

Progression and Upgrade requirements

Students will be required to achieve a minimum mark of 65% in the Methodology courses. Failure to do so may mean that you are unable to progress onto the PhD programme and will remain at MPhil until you have either completed a further methodology course or achieved an improved grade.

All students will be interviewed during the Michaelmas Term of their second year by the Graduate Review Committee. Continued registration for a second year will be conditional on the work presented being of a satisfactory standard and if satisfactory, will be upgraded from MPhil to PhD. By the end of Summer Term of the second year students should have finished all fieldwork (where applicable). By the end of the third year students should be able to complete their dissertation.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Economic Geography

Programme Code: RPECGY

Department: Geography & Environment

In addition to progressing with their research, students are expected to take the courses listed below. Students may take courses other than those listed but must discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (not examined):**

- GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. Relevant subject-specific training courses to the value of 1.0 unit:

- GY400 The Economics of Urbanisation (0.5) #
 GY404 Inclusive Growth (0.5) #
 GY409 Globalization and Regional Development (0.5)
 GY410 Economics of Local and Regional Development (0.5)

882 MPhil/PhD Programme Regulations

GY413 Regional Development and Policy (0.5) #
GY447 The Economics of Regional and Urban Planning (0.5) #
GY457 Applied Urban and Regional Economics (1.0) #
EC411 Microeconomics (1.0) #
Other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval.
Students who select EC411 are also required to take the following introductory course:
EC400 Introductory Course in Mathematics and Statistics (0.0) #

Note: Students who join the PhD programme after having completed either MSc in Local Economic Development or MSc in Real Estate Economics and Finance cannot retake the same courses or be waived the one unit of subject-specific training.

2. Relevant advanced research methods courses to the value of 1.0 unit:

GY428 Applied Quantitative Methods (0.5) #
GY460 Techniques of Spatial Economic Analysis (0.5) #
MY500 Fundamentals of Social Science Research Design (0.5)
MY521 Qualitative Research Methods (0.5)
MY526 Doing Ethnography (0.5) #
MY527 Qualitative Research with Digital and Visual Data (0.5) #
MY556 Survey Methodology (0.5) #
MY557 Causal Inference for Observational and Experimental Studies (0.5) #
MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

Other relevant advanced research methods courses can be chosen subject to supervisor and course manager approval.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 3

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 4

Training courses

Optional (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Optional (not examined):

GY500 Research Project Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements:

Once on the MPhil/PhD programme students will go through a First Year Progress Review, taking place in the Summer Term of the first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and

either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Postgraduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Economic History

Programme Code: RPEH

Department: Economic History

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

Unless already taken as part of the master's degree:

EH401 Historical Analysis of Economic Change (0.5)

EH402 Research Design and Quantitative Methods in Economic History (0.5)

EH520 Approaches to Economic and Social History (0.0)

And, where appropriate, a pre-sessional statistics course.

And, where appropriate, a pre-sessional statistics course.

Optional (not examined):

Supervisors may require students in their first or

subsequent years of study to take other relevant economic history courses, methodological courses provided by the Department of Methodology or the Institute of Historical Research or skills training courses as required for their thesis topic.

Transferable skills courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 2

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 3

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 4

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Progression and upgrade requirements

During the Summer Term students are required to submit at least one draft thesis chapter and a 3-5 page thesis outline to the department's Graduate Review Committee. Students taking one or more MSc examination may, with the support of their supervisor, apply to defer their submission of work to no later than the start of the 7th week of the Summer Term. The Committee will interview all students during the Summer Term, and re-registration for a second year will be conditional on the work presented being of a satisfactory standard. All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars and conferences to complement the expertise gained from intense thesis research.

By the Summer Term of the second year the Graduate Review Committee will normally expect to see about half the thesis in draft. The Committee will interview students, and if the submitted work is of an acceptable standard, students will be upgraded from MPhil to PhD. Students may defer the upgrade decision until their third year for fieldwork or other reasons, but only with the support of their supervisor.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Environmental Economics

Programme Code: RPENEC

Department: Geography & Environment

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the courses listed below to the value of 2 examined units. Students may take courses other than those listed, but must discuss this with their supervisor and seek the agreement of the Programme Director.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

3 units in total:

1.

EC411 Microeconomics (1.0) #

Students must also take the following introductory course:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

2.

GY426 Environmental and Resource Economics (1.0) #

Note: students who have graduated from the MSc in Environmental Economics and Climate Change cannot repeat courses taken as part of their master's programme and therefore cannot take GY426. These students may take an alternative course but must discuss this with their supervisor.

3.

Advanced research methods courses(s) to the value of 1.0 unit.

Typical course choices include:

GY428 Applied Quantitative Methods (0.5) #A

GY526 Advanced Methods in Environmental and Resource Economics: Time, Risk and Environmental Policy (0.5) # (not available 2019/20)

EC402 Econometrics (1.0) #

EC426 Public Economics (1.0) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY556 Survey Methodology (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

Students may take courses other than those listed, but must discuss this with their supervisor and seek the agreement of the Programme Director.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 3

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 4

Training courses

Optional (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Optional (not examined):

GY500 Research Project Seminar (0.0)

Footnotes

A: Students who have graduated from the MSc in Environmental Economics and Climate Change cannot repeat courses taken as part of their master's programme and therefore cannot take GY428 from the list above.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements for Routes 1 and 2

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated

research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. There will be a progress review meeting between the student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Importantly, progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's supervisor(s), and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Environmental Policy and Development

Programme Code: RPENPD

Department: Geography & Environment

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Relevant subject-specific training to the value of one unit.

Compulsory (examined):

GY473 Economic Development and the Environment (0.5) # and

GY474 Politics of Environment and Development (0.5) #

OR

GY520 Environmental Regulation: Implementing Policy (1.0)

Compulsory (examined):

Relevant advanced research methods course(s) to the value of 1.0 unit from the following::

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) #

MY527 Qualitative Research with Digital and Visual Data (0.5) #

(not available 2019/20)

Transferable skills courses

Compulsory (not examined):

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first year. For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and justification for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrade committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and

quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The committee will recommend transfer to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in European Studies

Programme Code: RPEU

Department: European Institute

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed research training and transferable skills courses. Students may take courses in addition to those listed and should discuss this with their supervisor. For a complete list of courses please refer to the Handbook for Research Degree Students.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (examined):

MY552 Applied Regression Analysis (0.5) #

Further training courses provided by the Department of Methodology and agreed with their supervisors.

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Students expected to take relevant course(s) in the Department of Methodology or in other departments as agreed with their supervisors.

Optional (not examined):

It is highly recommended that students with research interests in political economy attend and present their work in the following interdepartmental research seminar:

EU555 Political Economy and Public Policy Workshop (0.0) (not available 2019/20)

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 3

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (not examined):

If not taken in Year 2, the following relevant research seminar:

EU555 Political Economy and Public Policy Workshop (0.0) (not available 2019/20)

GV555 Political Economy and Public Policy Workshop (0.0) (not available 2019/20)

IR555 International Political Economy Research Workshop (0.0)

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 4

Transferable skills courses

Optional (not examined):

EU550 Research Workshop in European Studies (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Upgrading to PhD/Targets for Progress

Year 1 - For a standard thesis: a research proposal (approximately 2,500 words) and abstract of the whole thesis (one page); a sample chapter (approximately 8,000 words); a chapter synopsis, and a timetable for completion. For a thesis as a series of publishable papers: a research proposal (approximately 2,500 words) and an abstract covering the three prospective papers; a full draft of the introduction or a full draft of one of the papers (approximately 8,000 words); and a timetable for completion.

Year 2 - For a standard thesis: at least two further substantive chapters (of approximately 5,000-7,000 words each). For a thesis as a series of publishable papers: at least one fully written paper (approximately 10,000 words); and outlines of the other two papers (approximately 2,000 words).

Year 3 - For a standard thesis: a full draft of all core chapters and agreed timetable for completion. For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for completion of the thesis.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Gender

Programme Code: RPGE

Department: Gender Studies

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

Upgrade (first year programme)

Compulsory (not examined):

Lectures only:

GI424 Gender Theories in the Modern World: An Interdisciplinary Approach (0.5)

Lectures, seminars and workshops:

GI402 Gender, Knowledge and Research Practice (0.5)

Optional (not examined):

GI499 Dissertation - Independent Research Project (1.0)
Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu:

- GI403 Gender and Media Representation (0.5)
- GI407 Globalisation, Gender and Development (1.0)
- GI409 Gender, Globalisation and Development: An Introduction (0.5) (not available 2019/20)
- GI410 Screening the Present: contemporary cinema and cultural critique (0.5) #
- GI411 Gender, Post/coloniality and Development (0.5) #
- GI413 Gender and Militarisation (0.5)
- GI413 Gender and Militarisation (0.5)
- GI499 Dissertation - Independent Research Project (1.0)
- GV4H3 Feminist Political Theory (0.5)

Audit of relevant courses on other master's programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined):

GI500 Doctoral Workshop: Department of Gender Studies (0.0)
Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2

Training courses

Optional (students should agree with their supervisor whether the courses taken will also be examined):

Quantitative and/or qualitative training courses provided in the Department of Methodology as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses

Compulsory (not examined):

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 3

Training courses

Optional (students should agree with their supervisor whether the courses taken will also be examined):

Quantitative and/or qualitative training courses provided in the Department of Methodology and/or Department of Gender Studies as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses

Compulsory (not examined):

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 4

Training courses

Optional (examined/not examined):

Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses

Compulsory (not examined):

GI500 Doctoral Workshop: Department of Gender Studies (0.0)
means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the first year students will go through their Upgrade Viva. This is held in the summer term and materials should be submitted by the given date in the handbook. Students submit a draft chapter and a research proposal for consideration by a panel of their supervisor and advisor (and one other person with appropriate expertise). The research proposal follows:

- a draft chapter of up to 10,000 words, normally a literature review

which situates the research and intended contribution in the relevant literature;

- a research design document of 4-5 pages outlining the research rationale, research question and objectives, and the ethical, epistemological and methodological issues relevant to the research;
- a 2 page chapter outline of the thesis with an indication of chapter contents;
- a timeline for completion.

The nature of the chapter should be agreed with the supervisor. Both parts of the assessment focus on the student's own research and draw on material and debates engaged in GI424 and GI402 where relevant. Students must the viva before progressing to their second year. If unsuccessful at first sit, students have the opportunity to retake once more at the end of September. Part-time student submissions are calculated pro-rata for Upgrading. Expectations for successful Upgrading:

- GI402 participation;
- MSc core course GI424 attendance;
- GI500 training seminars participation;
- additional relevant course(s) attendance;
- regular supervision meetings participation;
- Events: Research Seminars, Public Lectures, Third Year Presentations attendance.

Having successfully Upgraded, all students will have an annual review with their supervisor and advisor to ensure satisfactory progress.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Health Policy and Health Economics

Programme Code: RPHPHE

Department: Health Policy

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take training, research methodology, and transferable skills courses.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

HP500 Advanced Health Policy and Health Economics (1.0) #

Optional (examined):

Students are expected to take two relevant half-unit courses, as agreed with their Supervisors. The options include those listed below:

Graduate-level courses offered by the Department of Health Policy
OR

- MY405 Research Methods for Evaluation in Health, Development and Public Policy (0.5) #
- MY500 Fundamentals of Social Science Research Design (0.5)
- MY521 Qualitative Research Methods (0.5)
- MY551 Introduction to Quantitative Analysis (0.5)
- MY552 Applied Regression Analysis (0.5) #
- MY565 Intermediate Quantitative Analysis (0.5) #
- ST501 Multilevel Modelling (0.5) #
- ST542 Longitudinal Data Analysis (0.5) #

OR

Where regulations permit and subject to Supervisor and Doctoral Programme Director approval, students may take courses instead of those listed above.

Year 2

Training courses**Compulsory (examined):**

HP500 Advanced Health Policy and Health Economics (1.0) #

Optional (examined / not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors.

Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Year 3**Transferable skills courses****Optional (not examined):**

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website.

Departmental and research seminar series

Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

Year 4**Training courses****Compulsory (examined):**

HP500 Advanced Health Policy and Health Economics (1.0) #

Optional (examined/not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors.

Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Transferable skills courses**Optional (not examined):**

Departmental and research seminar series

Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

means there may be prerequisites for this course. Please view the course guide for more information.

The Department encourages students throughout their PhD programme to attend, and where appropriate, present at conferences in relation to their particular research topic.

Progression rules

Students are initially registered as MPhil, and will be able to upgrade to PhD registration following their first year of full-time enrolment, subject to successful completion of the Major Review. Progress is assessed by the student's Supervisors in consultation with the Doctoral Programme Director.

In the ST of every academic year, the progress of each student registered in the Department is discussed with the Supervisory Panel. The Panel decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by Supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

Upgrade requirements

Each student is required to undergo Major Review (also known as Upgrade) at the end of their first year of full-time study. In order to earn the Upgrade, the candidate –

- (1) Must have attended a minimum of 80% of the compulsory course in Advanced Health Policy and Health Economics (based on their time at LSE);
- (2) Must have achieved a minimum average grade of 60% across the two taught MSc courses;
- (3) Must have submitted a 5,000-word thesis proposal including a research question, literature review, description of methodology, plans for data collection, and a timetable through to completion. Where relevant, there will be assessment of any ethics review required for the student's research undertaken in accordance with the School's research ethics policies.

Candidates are subject to a viva voce and marking of their thesis proposal by two non-supervisory members of the Department, where students will be required to earn a minimum grade of 60%. Following Major Review, a decision is taken whether to upgrade the student from MPhil to the PhD programme.

Targets for progress

For students who successfully upgrade to PhD enrolment there will be another review in the second and third years of full-time study. Progression will be conditional upon fulfilling the requirements agreed and approved by the Supervisors and the Doctoral Programme Director.

Year 2

For a thesis as a monograph: submission of a thesis document, including an abstract of the whole thesis, a chapter synopsis, and a substantive first chapter (approx. 10,000 words), and an updated timetable through to completion.

For a thesis as a series of publishable papers: submission of an abstract for each of the three prospective papers, a full draft of the introduction or a full draft of one of the papers (approx. 10,000 words), and an updated timetable through to completion.

Year 3

For a thesis as a monograph: submission of full draft with all core chapters, and agreed timetable through to completion of the thesis.

For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for the completion of the thesis.

Teaching opportunities

The Department employs Graduate Teaching Assistants (GTAs) to teach and lead seminars on a number of postgraduate courses. First-year MPhil/PhD students are normally not permitted to teach. Research students are encouraged to undertake some teaching following successful Major Review. Students who undertake teaching are offered the opportunity to pursue a Postgraduate Certificate in Higher Education.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Human Geography and Urban Studies

Programme Code: RPHUGY

Department: Geography & Environment

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)**Year 1****Training courses****Compulsory (not examined):**

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. The following core course:

GY403 Contemporary Debates in Human Geography (0.5)

Note: Students who have graduated from MSc Human in Geography and Urban Studies cannot repeat courses taken as part of their master's programme. In order to fulfil their obligation to sit for one full unit of subject-specific training, students who have already taken GY403 must instead take courses to the value of one unit from the list of options on the relevant MSc degrees.

2. Course(s) to the value of a half unit from the list of options available on MSc in Human Geography and Urban Studies (Research).

3. Relevant advanced qualitative research methods course(s) to the value of 1.0 unit from the following:

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) #

MY527 Qualitative Research with Digital and Visual Data (0.5) #

888 MPhil/PhD Programme Regulations

MY529 Special Topics in Qualitative Research: Introspection-based Methods in Social Research (0.5) # (withdrawn 2018/19)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 3

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 4

Training courses

Optional (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Optional (not examined):

GY500 Research Project Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first research year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's supervisors and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in International History

Programme Code: RPIH

Department: International History

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

HY501 International History Research Student Workshop (0.0)

Year 2

Training courses

Optional (not examined):

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

Year 3

Training courses

Optional (not examined):

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

Year 4

Training courses

Optional (not examined):

HY509 International History Research Seminar (0.0) #

HY510 Cold War History Research Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

On being admitted, all students are formally registered for an MPhil. By 13 June (Week 8 Summer Term) of their first year (1 March of their second year for part-time students) they are required to submit three hardcopies of their dossier containing (1) the provisional title of their thesis, together with the provisional titles of their chapters; (2) a bibliography, setting out as comprehensively as possible the primary published and unpublished sources they intend to use, along with the books, articles, unpublished theses and other sources they will consult; (3) an historiographical essay, evaluating the contributions of other scholars to their subject, and indicating clearly how their own thesis will contribute to it; and (4) a draft chapter of approximately 10,000 words based largely upon primary sources. The dossier will be read by three members of the Department, and students will be required to undergo a 20-30 minute viva. After the viva you will be informed of the outcome and will receive a joint report from the panel. If the Committee deems the dossier/viva satisfactory, the

Department will recommend the student for transfer of registration from MPhil to PhD status. If it is less than satisfactory it will be examined by the Committee who will determine whether the student should be allowed to resubmit revised upgrade materials, which may be permitted once. The review and viva process is designed to determine whether the student is likely to meet the requirements of a PhD, and whether the chosen topic is suitable for a doctoral dissertation.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in International Relations

Programme Code: RPIR

Department: International Relations

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

IR501 Methods in International Relations Research (0.0)

Year 2

Training courses

Compulsory (not examined):

IR509 International Relations Research Design Workshop (0.0)

Optional (examined/not examined):

The subject workshops offered by the International Relations Department comprise international relations theory; security and statecraft; international institutions, law and ethics; international political economy;

Relevant courses provided by the Methodology Institute and agreed with supervisor, including:

DV560 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5)

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY555 Multivariate Analysis and Measurement (0.5) #

MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

MY599 Department of Methodology Seminar (0.0)

Transferable skills courses

Workshop in Information Literacy: finding, managing and organising published research and data

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Early in the Summer Term first- and second-year research students will have their progress reviewed by a Research Panel. They may also be held at the end of the third or subsequent years of registration at the request of a supervisor or student. Supervisors will not attend Research Panels but will provide reports on progress. Panel members may attend student presentations at the Research Design Seminar (IR509). Students are expected for the first Panel to submit an outline of their proposed research and one draft chapter. Students who are deemed not to have made satisfactory progress will either be refused permission to re-register or will be required by the Research Panel to produce written work over the summer as a condition for re-registration in the autumn. In the event of conditions to re-registration being set, a

further Research Panel may be reconvened in the September prior to re-registration.

For the second Panel, which will decide on the question of upgrading from MPhil to PhD, students will be expected to submit two additional draft chapters. The two chapters should be substantially new work, but may include revised material from year one. Students who have not made sufficient progress to be converted from MPhil to PhD registration by the end of their second year will normally have re-registration made conditional on further progress (details to be decided by the Panel) or may, exceptionally, be prohibited from re-registering.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Law

Programme Code: RPLL

Department: Law

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory:

1. The following core course:

LL500 Doctoral Research Seminar series (0.0)

2. PhD seminar series:

Staff seminar series

3. One other relevant course offered by any department or other unit within the School

Year 2

Training courses

Optional (not examined):

LL500 Doctoral Research Seminar series (0.0)

PhD Seminar Series

Staff Seminar Series

Year 3

Training courses

Optional (not examined):

LL500 Doctoral Research Seminar series (0.0)

PhD Seminar Series (compulsory for Year three students - not examined)

Staff Seminar Series

Year 4

Transferable skills courses

Optional (not examined):

LL500 Doctoral Research Seminar series (0.0)

PhD Seminar Series

Staff Seminar Series

Progression and upgrade requirements

Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page

for future students.

MPhil/PhD in Law (Socio-Legal Theory)

Programme Code: RPLLSL

Department: Law

For students starting this programme of study in 2019/20
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory:

- The following core course:
LL500 Doctoral Research Seminar (0.0)
- The following core course:
LL4L5 Socio-legal Theory and Practice (0.5) (not available 2019/20)
- Law Department lunchtime seminar series
- One relevant course selected from those offered by the Department for Methodology

Year 2

Training courses

Compulsory (not examined):

- The following core course:
LL500 Doctoral Research Seminar series (0.0)
- Qualitative methods workshops

Optional (not examined):

Staff Seminar Series and PhD Seminar Series

Year 3

Training courses

Compulsory (not examined):

- The following core course:
LL500 Doctoral Research Seminar (0.0)

Optional (not examined):

Staff Seminar Series and PhD Seminar Series

Year 4

Transferable skills courses

Compulsory (not examined):

- The following core course:
LL500 Doctoral Research Seminar (0.0)

Optional (not examined):

Staff Seminar Series

Progression and upgrade requirements

Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Summer Term.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Mathematics

Programme Code: RPMA

Department: Mathematics

For students starting this programme of study in 2019/20
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses.

Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

Courses designed for research students in Mathematics, chosen in consultation with their lead supervisor. Discrete Mathematics and Algorithms and Game Theory students will attend four courses organised by the London Taught Course Centre (www.ltcc.ac.uk), but there are separate arrangements for students in Financial Mathematics, where courses are provided by the London Graduate School in Mathematical Finance (www.londonmathfinance.org.uk). Students also have the option of attending or auditing LSE Taught Masters modules, where appropriate.

Transferable skills courses

Compulsory (not examined):

- MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)
- MA501 Research Student Seminar (0.0)

Optional (not examined):

- MA422 Research Topics in Financial Mathematics (0.0)

Year 2

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

- MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)
- MA501 Research Student Seminar (0.0)

Optional (not examined):

- MA422 Research Topics in Financial Mathematics (0.0)

Year 3

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

- MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)
- MA501 Research Student Seminar (0.0)

Optional (not examined):

- MA422 Research Topics in Financial Mathematics (0.0)

Year 4

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

- MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)
- MA501 Research Student Seminar (0.0)

Optional (not examined):

- MA422 Research Topics in Financial Mathematics (0.0)

Teaching opportunities:

All students are offered the opportunity to teach for the department, subject to a successful interview and language requirements.

Progression and upgrade requirements

Students are initially registered for the MPhil, and will be able to upgrade to PhD registration during their second year, dependent

on satisfactory progress. Progress is assessed regularly by the student's supervisors, in consultation with the Doctoral Programme Director, on the basis of the extent to which the agreed research goals have been achieved. Any upgrade is dependent on the successful completion of a Major Review, the date of which is determined by the Doctoral Programme Director in consultation with the lead supervisor.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Media and Communications

Programme Code: RPME

Department: Media & Communications

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

MC408 Theories and Concepts in Media and Communications (0.5) **and** MC418 Communication: Cultures and Approaches (0.5) A

And

One of the following full-unit courses:

MC5M2 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0)

Or for students who already have a grounding in quantitative methods:

MC5M8 Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis) (1.0) B

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses

Compulsory (not examined):

MC500 Research Seminar for Media, Communications & Culture (0.0)

Optional (not examined):

LN988 Thesis Writing (0.0) #
Modern Foreign Language courses offered by the Language Centre.

Other graduate seminars of relevance to research subject.

Presentation requirements:

At least one presentation annually at the following:

MC500 Research Seminar for Media, Communications & Culture (0.0)

Year 2

Training courses

Optional (examined/ not examined):

Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M2/ MC5M8 convenor.

Transferable skills courses

Compulsory (not examined):

MC500 Research Seminar for Media, Communications & Culture (0.0)

Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City.

Optional (not examined):

Other graduate seminars of relevance to research subject..

Year 3

Transferable skills courses

Optional (not examined):

Advanced Doctoral Workshops

Year 4

Research Students are expected to complete their research.

Footnotes

A: For students without the appropriate background.

B: Students wishing to select this option must seek approval from the Programme Director. Approval is subject to timetabling constraints.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee by week 5 of Summer Term in their first year (part-time students can submit their Proposal by 1 March in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year.

In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Philosophy

Programme Code: RPPH

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined/ not examined):

PH501 Philosophical Problems Seminar (0.0)

Students who have never taken a paper in formal logic at degree must take the following (examined):

PH502 Reasoning and Logic (1.0)

Students who have already taken a formal logic course should choose one further MSc course not already taken as part of an MSc degree. Students can either decide to be examined in this course or instead choose to write two assessed essays, one at the end of each of the first two terms. This with the exception of students who choose PH419 Set Theory and Further Logic, in which case the examination is compulsory.

Either

A further MSc course (again one not taken as part of the MSc course) plus one term unit of PhD level seminars. The seminars on

offer are:

- PH500 Research Methods in Philosophy (0.0)
 PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)
 PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

If students choose to take a further MSc course, they can either decide to be examined or instead choose to write two assessed essays, one at the end of each of the first two terms. PhD level seminars are not examined and assessment is solely based on essays.

Or

Three term units of PhD level seminars with associated coursework. Taking three term units means that students can either take all three terms of one of these seminars or 'mix and match' by taking different seminars in different terms. Seminars must be taken with associated course work.

Transferable skills courses

Optional (not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 2

Training courses

Optional (not examined):

- PH500 Research Methods in Philosophy (0.0)
 PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)
 PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 3

Training courses

Optional (not examined):

- PH500 Research Methods in Philosophy (0.0)
 PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)
 PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 4

Training courses

Optional (not examined):

- PH500 Research Methods in Philosophy (0.0)
 PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)
 PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Progression and upgrade requirements

Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status. During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages; the research plan around 10 pages. Both have to be handed in to the Departmental Office by 1 September. This upgrading will normally take place after the successful completion of Year 1 requirements in Case A, and after the successful completion of Year 2 requirements in Case B. In both cases once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

Note for prospective students: For changes to graduate course and programme information for the next academic session,

please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Psychological and Behavioural Science

Programme Code: RPPB

Department: Psychological and Behavioural Science

For students starting this programme of study in 2019/20

The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

Paper Course number, title (unit value)

Years 1-4

Training courses

Students are asked to complete 10 hours of research training in **each year of study**, which should be agreed with your supervisor according to your needs. These courses are taught in departments across LSE, as well as through our PhD Academy and with affiliate institutions. Access is **subject to agreement with the relevant course convenors** (e.g., according to space considerations).

Courses include:

- MY521 Qualitative Research Methods (0.5)
 MY552 Applied Regression Analysis (0.5) #
 MY555 Multivariate Analysis and Measurement (0.5) #
 MY556 Survey Methodology (0.5) #
 PB401 Contemporary Social and Cultural Psychology (1.0)
 PB402 Organisational Social Psychology (1.0)
 PB403 Psychology of Economic Life (1.0)
 PB404 The Social Psychology of Communication (1.0)
 PB405 Foundations in Behavioural Science (1.0)

For PB401, PB402, PB403, PB404 and PB405, students also take the following non-credit-bearing course:

- PB400 Psychological and Behavioural Science (0.0)

Transferable skills courses

Compulsory (not examined):

PB500 Current Research in Social Psychology (0.0)
 Weekly seminars including plenary and specialist sessions in Michaelmas Term, Lent Term and Summer Term.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student's supervisor, as well as two other academic colleagues.

Targets for progress

Year 1 - Extended Essay of 6,000 words, submitted on first day of Lent Term.

Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Lent Term. These chapters form the basis of an oral examination by three person thesis committee usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.

Year 3 - Completed first draft by end of three years.

Teaching experience

Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future

academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Regional and Urban Planning Studies

Programme Code: RPRP

Department: Geography & Environment

For students starting this programme of study in 2019/20

In addition to progressing with your research, you are expected to take the courses listed below. You may take courses other to those listed but must discuss this with your supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. Courses to the value of one unit from the relevant MSc degrees
2. Relevant subject-specific training courses to the value of 1.0 unit:

GY428	Applied Quantitative Methods (0.5) #
GY460	Techniques of Spatial Economic Analysis (0.5) #
MY500	Fundamentals of Social Science Research Design (0.5)
MY521	Qualitative Research Methods (0.5)
MY526	Doing Ethnography (0.5) #
MY527	Qualitative Research with Digital and Visual Data (0.5) #
MY529	Special Topics in Qualitative Research: Introspection-based Methods in Social Research (0.5) # (withdrawn 2018/19)
MY556	Survey Methodology (0.5) #
MY557	Causal Inference for Observational and Experimental Studies (0.5) #
MY559	Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

NOTE: Students who join the PhD programme after having completed an MSc Regional and Urban Planning Studies or another Department of Geography MSc cannot retake the same courses or be waived the one unit of subject-specific training.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 3

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements:

Once on the MPhil/PhD programme you will go through a First Year Progress Review, taking place in the Summer Term of your first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated

research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/ research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Social Policy

Programme Code: RPSA

Department: Social Policy

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

SA451 Social Policy Research (1.0) # (withdrawn 2019/20)

Optional (not examined):

If not already taken previously:

MY400	Fundamentals of Social Science Research Design (0.5)
MY425	Case Studies and Comparative Methods for Qualitative Research (0.5) #

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses

Compulsory (not examined):

SA550 Research Student Seminar (0.0) (withdrawn 2019/20)

Optional (not examined):

Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2

Training courses

Optional (not examined):

MY552 Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

Transferable skills courses

Optional (not examined):

SP501 Research Student Seminar (0.0)

Year 3

Transferable skills courses

Optional (not examined):

SP501 Research Student Seminar (0.0)

Year 4

Transferable skills courses

Optional (not examined):

SP501 Research Student Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.

Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Doctoral Programme Director(s).

Each pre-Major Review student is expected to make a presentation on their proposed research to the SA550 seminar prior to the submission of their major review document and to address issues raised by the Doctoral Programme Director(s).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Social Research Methods

Programme Code: RPM1

Department: Methodology

For students starting this programme of study in 2019/20 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Optional (students should agree with their supervisor whether the courses taken will also be examined):

A selection of:

MY400 Fundamentals of Social Science Research Design (0.5)

MY425 Case Studies and Comparative Methods for Qualitative Research (0.5) #

MY500 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY525 Case Studies and Comparative Methods for Qualitative Research (0.5) #

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY556 Survey Methodology (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

MY561 Social Network Analysis (0.5)

MY570 Computer Programming (0.5)

MY572 Data for Data Scientists (0.5)

MY574 Applied Machine Learning for Social Science (0.5) #

A typical selection would be to take MY400, MY521, MY552 and MY555 in the first year, but students may be excused from some or all of them if they have previously taken graduate-level courses covering the same material.

Students who use quantitative methods in their research, are also encouraged to take the following course in their first or second year:

MY559 Special Topics in Quantitative Analysis: Quantitative Text Analysis (0.5) #

The courses students take may also include ones from other institutes or departments at LSE, dependent on their needs.

Transferable skills courses

Compulsory (not examined):

MY599 Department of Methodology Seminar (0.0)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Transferable skills courses

Compulsory (not examined):

MY599 Department of Methodology Seminar (0.0)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2

Transferable skills courses

Compulsory (not examined):

MY599 Department of Methodology Seminar (0.0)

Year 3

Transferable skills courses

Compulsory (not examined):

MY599 Department of Methodology Seminar (0.0)

Year 4

Transferable skills courses

Compulsory (not examined):

MY599 Department of Methodology Seminar (0.0)

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the Summer Term of their first year, candidates will produce a 10,000 word 'first year review' that outlines the aims and methods of their thesis: this means summarising the key literature(s), motivating their specific research questions, and highlighting the planned contributions of their work. A first year review document typically includes a general introduction, a comprehensive literature review (covering relevant empirical and theoretical work), a motivation of the research questions and hypotheses, and an indication of the literature(s) that the candidate is seeking to contribute to (i.e. the gaps in knowledge that will be addressed). Candidates will also give an oral presentation of their proposal at the Department of Methodology PhD day.

Written and oral work will be assessed by two academics (not on the supervisory team), normally members of Department of Methodology staff. This work has to reach an acceptable standard to enable them to progress to the second year. It is particularly

important that the first year review clearly states the objectives of the doctoral research and indicate how the empirical work will be carried out. If the panel deems the first year review to be not suitably clear, they can choose not to accept the submitted document and give the candidate up to a month to clarify. This decision will be taken maximum one week after the Department of Methodology PhD Day. Examples of unclear work might include (but not be limited to):

- A first year review that does not state clear research questions;
- A first year review that does not adequately review the specific literatures that the empirical work is contributing to;
- A first year review that does not give enough methodological detail, showing how the design will produce data that allows the candidate to address the theoretical issues at stake in a systematic and rigorous way.

After the first year candidates will spend more time on independent study under the guidance of their supervisor(s). This will involve the collection, organization and analysis of data, and writing up the results. During their second year of registration, they will typically submit three (minimum) draft chapters of their thesis plus a short introduction and a detailed plan for its completion. The three draft chapters will typically include a detailed literature review, specification of research problem(s) and two empirical chapters. If candidates are pursuing a paper-based thesis, their upgrading documents will typically include a short introduction, a literature review and at least two empirical papers. Whether a traditional or paper-based thesis, the material will be evaluated by an upgrading committee (two academics, not necessarily of the Department of Methodology or even the LSE) who will recommend transferral to PhD registration if their work is judged to be of sufficient quality and quantity.

Throughout the MPhil/PhD and PhD, candidates will attend the Institute's research seminar and other specialist workshops and seminars related to their interests. The student must present at every Department of Methodology PhD day.

MPhil/PhD in Sociology

Programme Code: RPSO

Department: Sociology

For students starting this programme of study in 2019/20

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY400 Fundamentals of Social Science Research Design (0.5)

MY521 Qualitative Research Methods (0.5)

MY551 Introduction to Quantitative Analysis (0.5)

MY552 Applied Regression Analysis (0.5) #

Other courses from Sociology Masters programmes

Specialist research courses:

SO491 Quantitative Social Research Methods (0.5)

SO492 Qualitative Social Research Methods (0.5)

SO511 Research Seminar in Political Sociology (0.0)

SO521 Research Seminar on Cities and Space (0.0)

Transferable skills courses

Optional (not examined):

Methods software training workshop

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2 and/or Year 3

Training courses

Optional (not examined):

SO501 Data Analysis Workshop (0.0) A

Year 3

Training courses

Compulsory (not examined):

SO501 Data Analysis Workshop (0.0) A

Footnotes

A: SO501 is strongly recommended.

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors.

This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Summer Term Year 1 for Full Time Students: Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Summer Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Summer Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project.

Full time students are required to have submitted their Upgrade materials in Week 6 of the Michaelmas Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Michaelmas Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student. All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and the viva,

Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Lent Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then

assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written submission and the viva.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

MPhil/PhD in Statistics

Programme Code: RPST

Department: Statistics

For students starting this programme of study in 2019/20. In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly the following:

- ST405 Multivariate Methods (0.5) #
- ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
- ST501 Multilevel Modelling (0.5) #
- ST505 Statistical Modeling and Data Analysis (0.5) #
- ST542 Longitudinal Data Analysis (0.5) #
- ST552 Probability and Mathematical Statistics I (0.5)
- ST553 Probability and Mathematical Statistics II (0.5) #

Transferable skills courses

Compulsory (not examined):

Annual Research Presentation Event.

Optional (not examined):

Departmental Seminar Series.

Joint Econometrics and Statistics Workshops with the Department of Economics.

Risk and Stochastics Seminar/Workshop.

London Graduate School in Mathematical Finance Seminar Day.

Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Year 2

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly the following:

- ST405 Multivariate Methods (0.5) #
- ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
- ST421 Developments in Statistical Methods (0.5) # (withdrawn 2018/19)

- ST542 Longitudinal Data Analysis (0.5) #

Transferable skills courses

Annual Research Presentation Event.

Optional (not examined):

Departmental Seminar Series.

Joint Econometrics and Statistics Workshops with the Department of Economics.

Risk and Stochastics Seminar/Workshop.

London Graduate School in Mathematical Finance Seminar Day.

Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Year 3

Training courses

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College - particularly the following:

- ST405 Multivariate Methods (0.5) #
- ST411 Generalised Linear Modelling and Survival Analysis (0.5) #
- ST421 Developments in Statistical Methods (0.5) # (withdrawn 2018/19)
- ST501 Multilevel Modelling (0.5) #
- ST542 Longitudinal Data Analysis (0.5) #

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements Formal assessment is made towards the end of each Summer Term. This assessment is based on statements made by the student and the supervisors in the progress report form. Students are also required to complete a supplementary report of 1-2 pages (A4), providing in more detail an outline of their current research.

The review to upgrade to the PhD normally takes place within two years of full time registration. Progress is assessed by the first and/or second supervisor in consultation with the PhD programme director and another expert in the field of the research undertaken by the student. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status. The department's research committee also monitors the progress of PhD students.

Teaching opportunities

The department employs Graduate Teaching Assistants (GTAs) to teach a number of its undergraduate and postgraduate courses. In particular ST102, Elementary Statistical theory, and ST107, Quantitative Methods, are taught to a large number of students across the School and require a significant number of classes. Research students are encouraged to undertake some teaching from year two onwards. First year MPhil/PhD students are normally not permitted to teach, although some marking may be available during the year or for the external degree at the end of the year. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue this.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students.

Research Course guide

AC500**Accounting, Organisations and Society**

This information is for the 2019/20 session.

Teacher responsible: Dr Andrea Mennicken KSW 3.09 and Prof Michael Power KSW 3.12

Availability: This course is compulsory on the MPhil/PhD in Accounting (Track 1). This course is available on the MPhil/PhD in Accounting (Track 2) and MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches. The course provides students also with training in qualitative methods in accounting research, including document analysis; interviewing techniques and transcript analysis; ethnographic methods in accounting; and theory building from data.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

There will be a reading week in week 6 of both MT and LT.

Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.

Assessment: Assessment will be based on written work as agreed with the Course Director.

AC501**Empirical Financial Accounting and Capital Markets**

This information is for the 2019/20 session.

Teacher responsible: Dr Stefano Cascino OLD 3.32 and Prof Ane Miren Tamayo OLD 5.05

Availability: This course is compulsory on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

Assessment: Second year MPhil/PhD students in Accounting (Track 2) are formally assessed by:

- (i) A referee report of a current working paper (25% weighting). This will normally be assigned in Week 5 of Lent term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 over the current academic year (2017/18) and previous academic year (2016/17). It will be designed to be completed within a three-day (72 hour) period during Summer term.

First year MPhil/PhD students in Accounting (Track 2) will not normally be formally assessed but they will receive feedback

in the form of formative assessments. In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC502 Half Unit**Foundations of Accounting, Organizations and Institutions**

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Power KSW 3.12 and Dr Andrea Mennicken KSW 3.09

Availability: This course is compulsory on the MPhil/PhD in Accounting (Track 1). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is also offered for students from other MPhil/PhD programmes, with the approval and written permission of the PhD in Accounting Programme Director.

Course content: The object of the course is to provide students with exposure to advanced analyses of the changing role and position of accounting practices in organisations, both public and private, and societies more generally. Students will be required to engage with studies of accounting practices to understand how they are shaped by their institutional contexts, have behavioural consequences and can represent different values. The course will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents will be addressed.

The course emphasises the inter-relations between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each seminar will provide the necessary technical foundations.

Indicative topics include:

Foundations of Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Performance, Accountability Incentives; Accounting for Sustainability; Organisational Failure as a Process.

Teaching: 10, 3-hour seminars in weeks 1-10 of MT and a 2-hour essay workshop in week 11 of MT.

This course has a reading week in Week 6 of LT.

Formative coursework: Students will be required to produce two pieces of written work. This may take the form of either an essay, or the analysis of a case, and may also include in-class presentations and team-based work. This work will be assessed, but the grades will not count towards the overall course assessment.

Indicative reading: Chapman, Cooper & Miller (eds), *Accounting, Organizations and Institutions* (Oxford, 2009); Hopwood & Miller (eds), *Accounting as Social and Institutional Practice*, Cambridge, 1994; Power, *The Audit Society*, Oxford, 1999; ; Mennicken & Espeland, "What's new with numbers" *Annual Review of Sociology* (2019); Power, *Modelling the microfoundations of the audit society: Organizations and the logic of the audit trail*. *Academy of Management Review* (2019).

Assessment: Essay (100%, 6000 words) in the ST. MPhil/PhD in Accounting students must pass the course assessment, normally with high Merit (at least 65%) or Distinction marks, to proceed to the next year of the programme.

AN500**Seminar on Anthropological Research**

This information is for the 2019/20 session.

Teacher responsible: Dr Harry Walker OLD 5.06B, Dr Andrea Pia OLD 6.09 and Dr Gisa Wieszkalnys

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: Seminar on Anthropological Research

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.

There is a reading week in Week 6 of the MT and LT.

Assessment: This course is not assessed.

AN503**Thesis Writing Seminar**

This information is for the 2019/20 session.

Teacher responsible: Dr Michael Scott OLD 6.16, Dr Clara Devlieger OLD 6.08 and Dr Alpa Shah

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year post-fieldwork students.

Course content: Students present draft dissertation chapters to their cohort.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 14 hours of seminars in the ST.

This course has reading week in Week 6 of the MT and LT.

Assessment: This course is not assessed.

AN505**Advanced Professional Development in Anthropology**

This information is for the 2019/20 session.

Teacher responsible: Prof David Graeber OLD 6.10, Dr Mathijs Pelkmans OLD 5.08, Prof Karin Barber OLD 6.07 and Prof Charles Stafford OLD6.02

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course has two main aims.

First, it examines key theoretical concepts and approaches in Anthropology at an advanced level that may be relevant to post-fieldwork doctoral candidates. It may focus on widely ranging thematic areas, e.g. recent developments in cognitive anthropology and/or in material culture studies and/or in anthropological studies of ontology. The aim is to enhance the ability of students to engage with such debates at an advanced level. Second, the course aims to enhance the professional development of doctoral students by providing them with advice and support in relation to their career progression.

Teaching: 14 hours of seminars in the MT. 14 hours of seminars in the LT. 12 hours of seminars in the ST.

Assessment: This course is not assessed.

DV500**Research Seminar in Development Studies**

This information is for the 2019/20 session.

Teacher responsible: Dr Elliott Green CON8.07

Availability: This course is compulsory on the MRes/PhD in International Development. This course is available on the MPhil/PhD in Development Studies. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This seminar is designed as a forum for

discussing theoretical and methodological issues in Development Studies research. Modules are organized around broad methodological issues (e.g. research design, case studies, causal inference) and presentations of research, with the former featuring heavily in the MT and the latter in the LT and ST.

Research presentations at the seminar are made by International Development research students and also by staff, with some invited speakers from outside.

All research students are expected to attend the seminar while in residence in London. First year students are required to present a draft of their research proposal to the seminar during the LT or ST. Continuing students are invited to make presentations based on a report of their research, draft chapters or even their final draft of the dissertation. In making their presentations students are asked to provide (a) background material about the particular issue at hand, (b) a clear statement of the research questions and/or hypotheses that are being addressed, and (c) discussion of the research methods to be employed. Students should inform their supervisor(s) of the date when they are scheduled to make a presentation.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.

Assessment: This course is not assessed.

DV501 Half Unit**Development History, Theory and Policy for Research Students**

This information is for the 2019/20 session.

Teacher responsible: Prof James Putzel

Availability: This course is compulsory on the MRes/PhD in International Development. This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit. Available with the permission of the teacher responsible.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies, the political economy of growth and redistribution, and the role of politics and power in development. We examine key issues in development such as: the record of pro-market reforms; the experience of "developmental states"; and the challenges to development thinking and practice presented by feminist theory, environmental sustainability, globalisation and new patterns of global inequality.

Teaching: 20 hours of lectures and 20 hours of seminars in the MT.

Students will attend the Michaelmas Term lectures for DV400 (though the reading requirement is specific to DV501) and an associated weekly seminar for research students only.

Formative coursework: Students will be expected to produce 2 presentations in the MT.

Indicative reading: Chang, HJ Economics: The User's Guide (Penguin, 2014) Sen, A Development as Freedom (Anchor, 1999). Polanyi, K. (2001 / 1944) The Great Transformation: The Political and Economic Origins of Our Times (Boston: Beacon Press), HC53 P76 [also a network e-book]. Chang, HJ Kicking Away the Ladder: Development Strategy in Historical Perspective (Anthem, 2002). Kohli, A. State-Directed Development: Political Power and Industrialization in the Global Periphery (Cambridge, 2004). Rodrik, D One Economics, Many Recipes: Globalization, Institutions, and Economic Growth (Princeton University Press, 2008). Ferguson, J. The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho (Cambridge, 1990). Jerven, M. Poor

Numbers: How we are misled about African development statistics and what to do about it (Cornell, 2013)

Assessment: Essay (100%, 5000 words) in January.

DV510

Research Design and Proposal in International Development

This information is for the 2019/20 session.

Teacher responsible: Dr Elliott Green

Availability: This course is compulsory on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: Students will work with their academic supervisors to structure a doctoral research proposal that has the potential to make a significant contribution to knowledge and that reflects a sophisticated mastery of advanced theoretical and methodological tools from one or more academic disciplines related to international development. They will learn how to identify good research questions that are embedded in the current academic literature, and how to apply recognisable, defensible and academically sophisticated methodologies to address those questions. The doctoral research proposal itself will identify a key research question(s) for investigation, a justification well embedded in existing academic literature for why the topic is theoretically and empirically important, and a well-developed theoretical and methodological framework for researching the question(s).

Teaching: Students will meet their supervisors three times a term during their first year of study in accordance with the LSE's regulations for Research Degrees. Their proposals will be developed over the course of these meetings. There will be one DV510 proposal workshop in the Summer Term at which students will present their draft proposals and receive feedback.

Formative coursework: Students will be expected to produce 3 pieces of coursework in the MT, LT and ST. Students will submit drafts of their proposal to their supervisors and receive feedback.

Indicative reading: The reading list for each student will be determined by the research they propose undertaking.

Assessment: Research proposal (100%) in August.

A research proposal of 10,000 words to be submitted in August.

DV513 Half Unit

Environmental Problems and Development Interventions

This information is for the 2019/20 session.

Teacher responsible: Prof Timothy Forsyth CON.8.05

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Pre-requisites: None

Course content: This course is for students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. The course first considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and

expertise in concerning adaptation to population growth, resource scarcity, deforestation, desertification, vulnerability to 'natural' disasters, and risks associated with climate change, including questions of gender and environment. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global climate change policy).

Teaching: 15 hours of lectures and 15 hours of seminars in the MT.

There will be a reading week in Week 6

Formative coursework: Students will have the opportunity to produce 1 essay in MT

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions:

- Adams, W.M. 2009 Green Development: environment and sustainability in a developing world. 3rd ed. London: Routledge.
- Forsyth, T. 2003. Critical Political Ecology: the politics of environmental science, London, Routledge
- Jones, S. and Carswell, G. 2004. The Earthscan reader in environment, development and rural livelihoods. London ; Sterling, VA : Earthscan.
- Moseley, W.G., E. Perramond, H. Hapke and P. Laris. 2013. An Introduction to Human-Environment Geography: Local Dynamics and Global Processes. Hoboken, NJ: Wiley/Blackwell.
- Neumann, R. 2005. Making Political Ecology, London: Hodder Arnold.
- Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S. (eds.) 2002 The Drama of the Commons: Understanding Common Pool Resource Management. Washington, D.C.: National Academy Press.
- L Schipper and I Burton (eds) The Earthscan Reader on Adaptation to Climate Change, Earthscan, 2008.

Assessment: Essay (100%, 5000 words) in the LT.

DV515 Half Unit

Global Environmental Governance

This information is for the 2019/20 session.

Teacher responsible: Prof Kathryn Hochstetler

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is for a MRes/PhD student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. The guiding empirical focus is on the role of developing countries in global environmental governance and the effects of environmental policy regimes on their development strategies and outcomes. Some of this draws upon debates within International Relations, but this course also considers other literatures about environmental politics. Only part of global environmental governance takes place in formal spheres specifically devoted to environmental topics. Economic institutions like trade and financial institutions also play a key role and are covered here. To make the course focused, it will consider primarily anthropocentric climate change and biodiversity and forests. In addition, these topics will be analysed from the perspective of the

role of states and inter-state agreements; business actors and non-governmental organisations (NGOs); the regulation of trade; and the evolution of financial assistance, including from the World Bank.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT. 2 hours of lectures in the ST.

There will be a Reading Week in week 6.

Formative coursework: Students will be expected to produce 1 essay in the LT.

Indicative reading: A detailed reading list will be presented at the beginning of the term. There is no single textbook for this course, but we recommend the following as a basic reading list:

- Betsill, M. and Corell, E. (eds). 2007. *NGO Diplomacy: The Influence of Nongovernmental Organizations in International Environmental Negotiations*, MIT Press.
- Biermann, F, Pattberg, P. and Zelli, F. (eds). 2010. *Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation*, Cambridge University Press.
- Ciplet, D., J.T. Roberts, and M.R. Khan. 2015. *Power in a Warming World: The New Global Politics of Climate Change and the Remaking of Environmental Inequality*. MIT Press.
- Gallagher, K.S. 2014. *The Globalization of Clean Energy Technology: Lessons from China*. MIT Press.
- Humphreys D. 2009. *Logjam: Deforestation and the Crisis of Global Governance*, Earthscan.
- Lewis, J.I. 2014. *The Rise of Renewable Energy Protectionism: Emerging Trade Conflicts and Implications for Low Carbon Development*. *Global Environmental Politics* 14(4): 10-35.
- Najam, A. 2005. *Developing Countries and Global Environmental Governance: From Contestation to Participation to Engagement*. *International Environmental Agreements* 5: 303-321.
- Newell, P. and J.T. Roberts (eds). 2016. *The Globalization and Environment Reader*. Wiley.
- Raustiala, K. and D. Victor. 2004. *The Regime Complex for Plant Genetic Resources*. *International Organization* 58(2): 277-309.

Assessment: Essay (100%, 5000 words) in the ST.

DV518 Half Unit African Development

This information is for the 2019/20 session.

Teacher responsible: Prof Thandika Mkandawire CON 8.02 and Dr Laura Mann CON 6.19

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The major concern of the course is with the political economy of African development, to examine processes of economic, political, social and cultural change in Sub-Saharan Africa. It provides critical analysis of key development interventions and processes. It seeks to combine general theoretical overviews with country case studies illustrating the variety of experiences and trajectories. It does not aim to provide a comprehensive coverage of development issues or of regions. Course content will vary from year to year, depending on the specialities of staff.

Attention is paid to legacies of the colonial encounter; the constraints and opportunities presented by African countries' positions in the global economy; the political economy of industrialisation and agrarian transformation, resource mobilisation; trade diversification; institutional reforms and state capacity. Attention will also be paid to social policy with special focus on issues such as social social protection, cash transfers, Millennium Development Goals, horizontal inequality and conflict.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Eastwood, R. & M. Lipton, 2011. *Demographic*

transition in sub-Saharan Africa: How big will the economic dividend be? *Population Studies: A Journal of Demography*, 65(1), 9-35. Handley, Antoinette (2008) *Business and the State in Africa: Economic Policy-Making in the Neo-Liberal Era* Cambridge: Cambridge University Press. Assessment: Essay (100%, 5000 words) in the ST.

DV520 Half Unit Complex Emergencies

This information is for the 2019/20 session.

Teacher responsible: Prof David Keen CON 7.16

Availability: This course is available on the MRes/PhD in

International Development. This course is not available as an outside option.

Course content: The course examines the consequences and causes of humanitarian disasters. It looks at the changing nature of civil conflicts, at the famine process, and at the benefits that may arise for some groups from war and famine. It examines some of the roots of violence in civil wars, as well as the information systems that surround and help to shape disasters. The course is interdisciplinary and looks at political, economic and psychological functions of violence.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of lectures in the ST. There will be a reading week in week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008). Other texts of interest include David Keen, *Useful Enemies: When Waging Wars is More Important than Winning Them* (Yale University Press, 2012); Stathis Kalyvas, *The Logic of Violence in Civil War* (Cambridge University Press, 2006); David Keen, *Conflict and Collusion in Sierra Leone* (James Currey, 2005); David Keen, *Endless War? Hidden Functions of the 'War on Terror'* (Pluto, 2006); Michael Mann, *The Dark Side of Democracy: Explaining Ethnic Cleansing* (Cambridge University Press, 2005); Amartya Sen, *Poverty and Famines* (Oxford University Press, 1981); Frances Stewart and Valpy FitzGerald (eds.), *War and Underdevelopment, Volumes 1 and 2* (Oxford University Press, 2001); and Jeremy Weinstein, *Inside Violence: The Politics of Insurgent Violence* (Cambridge University Press, 2007); Tim Allen, *Trial Justice: The International Criminal Court and the Lord's Resistance Army* (Zed Press, 2006); Chris Dolan, *Social Torture: The Case of Northern Uganda, 1986-2006* (Berghahn, 2009); Zoe Marriage, *Not Breaking the Rules, Not Playing the Game: International Assistance to Countries in Conflict* (Hurst and Co., 2006); Christopher Cramer, *Civil War is Not a Stupid Thing: Accounting for Violence in Developing Countries* (Hurst and Co., 2006); Mats Berdal and David Malone, *Greed and Grievance: Economic Agendas in Civil Wars* (Lynne Rienner, 2000); Hugo Slim, *Killing Civilians: Method, Madness and Morality in War* (Hurst and Co., 2008).

Assessment: Essay (100%, 5000 words) in the ST.

DV528 Half Unit

Managing Humanitarianism

This information is for the 2019/20 session.

Teacher responsible: Dr Stuart Gordon, CON 8.10

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, medics, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention and how humanitarian institutions shape and are shaped by global governance and state power. It asks how humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. It considers why humanitarian organisations and governments respond to some crises and not to others as well as the critique of humanitarian assistance and the ways in which the UN and NGO communities have sought to professionalise their activities. The

course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 2 hours of lectures in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the MT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' *International Review of the Red Cross International Review of the Red Cross / Volume 97 / Issue 897-898 / June 2015*, pp 77-109. M. Barnett (2011), *Empire of Humanity: A History of Humanitarianism*, Ithaca: Cornell University Press; M. Barnett, M. Barnett & T. G. Weiss (Eds.), 2008. *Humanitarianism in Question Politics Power and Ethics*, Ithaca: Cornell University Press; A. De Waal, 1997. *Famine Crimes: Politics and the Disaster Relief Industry in Africa*. London: James Currey. Loescher (2001) *The UNHCR and World Politics*, Oxford University Press. D. Rieff (2002) *A Bed for the Night: Humanitarianism in Crisis*, Vintage/Random House.

Assessment: Essay (100%, 5000 words) in the LT.

DV531

Development Management

This information is for the 2019/20 session.

Teacher responsible: Prof Jean-Paul Faguet CON 8.06
Dr Jonathan Weigel

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available to students in Year 2 or above of the MRes/PhD in International Development only. It is also available to students in Year 1 of the MRes/PhD in International Development, in lieu of DV501, with permission.

Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies. The course is divided into several parts: Analytical Assumptions, Government and Governance, Private Sector, and Civil Society. On completing the course students should be able to: (i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. 18 hours of lectures and 13 hours and 30 minutes of seminars

in the LT. 3 hours and 30 minutes of lectures in the ST. There will additionally be an introductory workshop at the start of MT. Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) *Reconstructing Development Theory*; Faguet, JP. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press; Chang, H. 2003, *Rethinking development economics*, Anthem Press; London, Intermediate Technology; Kohli, A. 2004 *State-directed development: political power and industrialization in the global periphery*, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, *Problems of democratic transition and consolidation*, Johns Hopkins; Olson, M. 1982 *The rise and decline of nations*, Yale University Press; North, D. 1990. *Institutions, Institutional Change and Economic Performance*. Cambridge University Press. Putnam, R. D. 1993. *Making Democracy Work: Civic Traditions in Modern Italy*. Princeton: Princeton University Press; Rodrik, D. (Ed.). 2003. *In Search of Prosperity: Analytical Narratives on Economic Growth*: Princeton University Press; Sen, A., 1999 *Development as Freedom*. Oxford University Press; Stiglitz, J. 2002 *Globalization and its discontents*, Allen Lane, 2002; World Bank, *World Development Report, 2004, Making services work for poor people*, Washington, World Bank.

Assessment: Assessment path 1
Essay (100%, 10000 words) in the ST.

Assessment path 2

Exam (60%, duration: 3 hours) in the summer exam period.

Essay (40%, 5000 words) in the ST.

The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV532 Half Unit China in Developmental Perspective

This information is for the 2019/20 session.

Teacher responsible: Prof Jude Howell CON. 8.02

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in the so-called Third World, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader

debates and theories in development studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT. In addition, one introductory seminar session in MT, and one essay preparation session in MT.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words. Students will also receive feedback on their seminar performance. Students are welcome to come to course convenor's office hours to discuss any issues.

Assessment: Essay (100%, 5000 words) in the LT.

DV533 Half Unit The Informal Economy and Development

This information is for the 2019/20 session.

Teacher responsible: Dr Kate Meagher CON 7.11

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is only available to research students in other departments with permission from the course convener (space permitting).

Course content: Contrary to standard development thinking, the informal economy has expanded rather than contracted in the face of liberalisation and globalisation, and now creates more jobs than the formal economy in most developing countries. Accounting for more than 50% of non-agricultural employment across much of the developing world, the informal economy is attracting growing policy attention. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, social exclusion, and governance. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social policy or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries are shaping processes of growth and governance in the global south. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using

a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social policy, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. There will be a Reading Week in Week 6.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the ST.

DV545 Half Unit

Research Themes in International Development

This information is for the 2019/20 session.

Teacher responsible: Dr Elliott Green

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled on the MRes/PhD in International Development only.

Course content: The objectives of the course are: a) to introduce students to the practical world of development which will both facilitate their career paths and also prepare them for the consultancy projects by becoming more familiar with how such

organisations think and work; b) to introduce students to the interface between policy practice and development academe. Students enrolled on DV545 follow an independent course of study on an approved topic. They will be matched with an adviser (any member of staff in the department who is not their primary supervisor), who will support them in producing the final research paper. There are no set lectures or seminars for this course, though students will be encouraged to make good use of the weekly lectures on DV445 (*Cutting Edge Issues in Development Thinking & Practice*), which feature speakers from different development organisations and research institutes.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Allen T (with Melissa Parker) (2012) "Will mass drug administration eliminate lymphatic filariasis? Evidence from Northern Coastal Tanzania" *Journal of Biosocial Science*. Wade, Robert Hunter (2011) "Emerging world order?: from multipolarity to multilateralism in the G20, the World Bank, and the IMF". *Politics & Society*, 39 (3).

Assessment: Essay (100%, 5000 words) in the ST.

DV560 Half Unit

Bayesian Reasoning for Qualitative Social Science: A modern Approach to Case Study Inference

This information is for the 2019/20 session.

Teacher responsible: Dr Tasha Fairfield CON 6.02

Availability: This course is available on the MPhil/PhD in International Relations and MRes/PhD in International Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be selected for DV560 based on a written statement of interest (max 150 words). Priority will be given to students on the programs listed above, if demand exceeds places.

Course content: The way we intuitively approach qualitative case research is similar to how we read detective novels. We consider various different hypotheses to explain what occurred—whether the emergence of democracy in South Africa, or the death of Samuel Ratchett on the Orient Express—drawing on the literature we have read (e.g. theories of regime change, or other Agatha Christie mysteries) and any salient previous experiences we have had. As we gather evidence and discover new clues, we continually update our beliefs about which hypothesis provides the best explanation—or we may introduce a new alternative that occurs to us along the way.

Bayesianism provides a natural framework that is both logically rigorous and grounded in common sense, that governs how we should revise our degree of belief in the truth of a hypothesis—e.g., "mobilisation from below drove democratization in South Africa by altering economic elites' regime preferences," (Wood 2001), or "a lone gangster sneaked onboard the train and killed Ratchett as revenge for being swindled"—given our relevant prior knowledge and new information that we obtain during our investigation.

Bayesianism is enjoying a revival across many fields, and it offers a powerful tool for improving inference and analytic transparency in qualitative research.

This course introduces basic principles of Bayesian reasoning with the goal of helping us leverage our common-sense understandings of inference and hone our intuition when conducting causal analysis with qualitative evidence. We will examine the foundations of Bayesian probability as well as concrete applications to single case studies, comparative case studies, comparative historical analysis, and multi-methods research. Students will practice applying Bayesian reasoning to assess the strength and quality of inferences in published studies, drawing on exemplars of qualitative research from various fields of socio-political analysis including development studies, comparative politics, international relations, and policy analysis. Students will also apply Bayesian principles to various aspects of their own dissertation research in progress—e.g., generating or revising hypotheses, selecting cases, identifying weaknesses in salient background literature, and assessing the inferential weight of available evidence. Upon completing the course, students will be equipped with a concrete set of Bayesian-inspired best practices to deploy in their own research, as well as widely-applicable analytic skills that will help them to better evaluate and critique socio-political analysis. This course has no prerequisites. Students do not need any previous exposure to either Bayesian analysis or qualitative methods literature.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Students will attend DV460 lectures and seminars in LT. Additional teaching and learning support in writing the final project will be agreed between the instructor and the student's PhD supervisor.

Formative coursework: Students will be expected to produce 1 exercise and 1 project in the LT.

Students will receive written and oral formative assessment on in-class exercises, which will ask them to explain key Bayesian concepts (e.g., the "weight of evidence") in their own words and apply them to concrete examples (e.g. use Bayes' rule to derive an inference from several pieces of evidence).

In addition, students will receive oral feedback on the first section of their final project, which will set up rival hypotheses to be compared in light of case evidence.

Indicative reading: Methodological foundations:

Tasha Fairfield and Andrew Charman, "A Dialogue with the Data: The Bayesian Foundations of Iterative Research in Qualitative Social Science," *Perspectives on Politics* 17(1):154-167, 2019; Andrew Bennett, "Disciplining Our Conjectures: Systematizing Process Tracing with Bayesian Analysis," in Andrew Bennett and Jeffrey Checkel, eds, *Process Tracing in the Social Sciences: From Metaphor to Analytic Tool*, Cambridge University Press, 276–98, 2015; Tasha Fairfield and Andrew Charman, "Explicit Bayesian Analysis for Process Tracing," *Political Analysis* 25(363-380), 2017; Macartan Humphreys and Alan Jacobs, "Mixing Methods: A Bayesian Approach," *American Political Science Review* 109(4):653-673, 2015; Timothy McKeown, "Case Studies and the Statistical Worldview," *International Organization* 53(1):161-190, 1999.

Qualitative research exemplars:

Alan Jacobs, "How Do Ideas Matter? Mental Models and Attention in German Pension Politics," *Comparative Political Studies* 42 (2) 2008; Tasha Fairfield and Candelaria Garay, "Redistribution under the Right in Latin America: Electoral Competition and Organized Actors in Policymaking," *Comparative Political Studies* 50 (14) 1871-1906, 2017; Kenneth Schultz, "Fashoda Revisited" (Chapter 6) in *Democracy and Coercive Diplomacy*, Cambridge, 2001; Dan Slater, "Revolutions, Crackdowns, and Quiescence: Communal Elites and Democratic Mobilization in Southeast Asia," *American Journal of Sociology* 115 (1) 203-254, 2009; Elisabeth Wood, "An Insurgent Path to Democracy: Popular Mobilization, Economic Interests, and Regime Transition in South Africa and El Salvador," *Comparative Political Studies* 34 (8) 862-888, 2001.

Assessment: Project (100%, 5000 words) in the ST.

Students can choose from two options in consultation with the course instructor and the PhD supervisor, taking into account how far along they are in the research process:

(a) Conduct a full Bayesian scrutiny of a published work relevant to their dissertation topic, preferably one that analyses more than a single case. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of priors, weight of evidence, and their posterior degree of confidence in the author's argument relative to rival explanations in light of the evidence.

(b) Directly apply Bayesian reasoning to their own dissertation research in progress. Students will devise at least two rival hypotheses to compare (preferably three), assess and justify priors in light of salient background literature they have read, and assess the weight of any available evidence they possess from their preliminary research and/or provide a Bayesian rationale for case selection. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of the weight of evidence and their degree of confidence in each hypothesis relative to the rivals in light of their background information and preliminary evidence.

DV590 Half Unit Economic Development Policy I

This information is for the 2019/20 session.

Teacher responsible: Dr Diana Weinholt CON 7.10

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course explores the foundations of applied macroeconomic policy analysis by combining a rigorous introduction to advanced quantitative methods with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, with a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing. Topics including growth theory, institutions and history, economic geography, globalization, balance of payments and financial crises, environmental policy and international finance. Classes in the first half of term will focus on building analytical skills to read, interpret, and critique econometric approaches to causal identification commonly used in the academic development literature. The emphasis will be on developing rigorous intuition rather than technical details; we focus on teaching students from a broad range of backgrounds to understand and critically consume high-level applied research in a sophisticated manner. The seminars in the second half of term give students an opportunity to repeatedly practice and improve their skills by working through problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development. While some background in economics and statistics is helpful, the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.

Teaching: 20 hours of lectures and 15 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include "Mastering Metrics" by Angrist and Pischke, which will

serve as the course text, and W Easterly, *The Quest for Growth*.

Assessment: Essay (100%, 5000 words) in the ST.

DV591 Half Unit Economic Development Policy II

This information is for the 2019/20 session.

Teacher responsible: Dr Sandra Sequeira CON 7.09

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future

The course is structured around three main themes:

(i) Human Development: health policy, education policy and intra-household dynamics

(ii) Institutions and Markets: labour markets, state capacity for public service delivery and private sector development

(iii) Behavioural Economics and Development Policy Design: the importance of psychology in explaining economic behaviour and how it can inform better development policy design

Through in class discussions, lectures and coursework, students will develop analytical and quantitative skills for the study and practice of international development policy. These skills will enable students to interpret and critique both conceptual arguments and the empirical evidence used in the development economics literature and discourse.

Coursework will include a combination of class discussions with guest lecturers engaged in international development, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills.

Teaching: 20 hours of lectures and 15 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the LT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, *Development Economics* (1998) which will serve as the course text, W Easterly, *The Quest for Growth*;

Assessment: Essay (100%, 5000 words) in the ST.

EC501 Work in Progress Seminars

This information is for the 2019/20 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: Research students present their work to faculty and peers in the designated field. Outside speakers are also invited from time to time.

Teaching: Seminars EC501: seminar groups covering the major PhD field options, i.e. Capital Markets, Development and Growth, Econometric Theory, Industrial Economics, International Economics, Labour Economics, Macroeconomics/Monetary Economics, Microeconomic Theory, Political Theory, Public Economics. The frequency of meetings to be determined according to the number of students in each specialism, but

generally each group will meet weekly throughout the session.

Assessment: This course is not examinable.

EC518 Topics in Advanced Econometrics for Research Students

This information is for the 2019/20 session.

Teacher responsible: Prof Francisco Hidalgo 32L.4.20
Dr Yike WANG

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research.

Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 hours of EC518 lectures in each of the MT and the LT.

Indicative reading: See reading list for EC485. Additional readings will be recommended at the start of the course.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Exam (50%, duration: 2 hours) in the summer exam period.

EC532 International Economics for Research Students

This information is for the 2019/20 session.

Teacher responsible: Dr Swati Dhingra 32L.2.31 and Prof Daniel Sturm 32L.2.25

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. One term covers international trade and the other term covers international macroeconomics.

The course is based around research papers. Topics covered vary from year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade, theories of heterogeneous firms and trade, theories of incomplete contracts and trade, and the political economy of trade policy. A list of representative topics in international macroeconomics includes international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.

Assessment: Coursework (50%) in the MT.
Coursework (50%) in the LT.

Two take-home assignments, one in MT and one in LT. Each assignment will carry equal weight. Take-home assignments may require students to analyse data, empirically solve a computational exercise, solve theoretical models, or assess recent research.

EC533 Labour Economics for Research Students

This information is for the 2019/20 session.

Teacher responsible: Dr Guy Michaels 32L.2.10, Prof Yona Rubinstein NAB.5.32, Prof John Van Reenen 32L.2.27A and Prof Jorn Pischke 32L.LG.20

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for carrying out independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, and discuss the advantages and limitations of existing empirical work and assess policy options.

Topics include:

- Labour supply, household behaviour, and the allocation of time
- Labour demand and monopsony
- Search, matching, labour market frictions, unions, and unemployment
- Wage determination, compensating differentials, race and gender gaps, and wage inequality
- Human capital, returns to schooling, and training
- Contracts and incentives in the labour market

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC534 Public Economics for Research Students

This information is for the 2019/20 session.

Teacher responsible: Prof Camille Landais 32L.3.23, Dr Johannes Spinnewijn 32L.3.24, Dr Xavier Jaravel 32L.3.14 and Dr Daniel Reck 32L.3.16

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year, but the following general areas would typically be included:

- Income and wealth inequality
- Behavioural responses to taxes and transfers
- Optimal taxation
- Dynamic taxation
- Behavioural public economics
- Social insurance
- Optimal public good provision

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of:

- Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.)
- Lectures in Public Economics, A.B. Atkinson and J.E. Stiglitz, Princeton University Press, 2015.

Assessment: Problem sets (40%) and exercise (30%) in the MT

and LT.

Take-home assessment (30%) in the ST.

The assessment for this course is as follows:

1) Four problem sets due throughout the MT and LT terms (40%)

2) An "extended replication exercise" (30%), consisting of:

- a written referee report on that paper (MT)
- a replication of a paper (empirical paper or paper based on simulations), (beginning of LT)
- an extension of that paper (which requires developing a research design, positioning the question of the extension in the literature, etc.), (end of LT, start of ST)

3) A take-home exam in the ST (30%)

EC535 Development Economics for Research Students

This information is for the 2019/20 session.

Teacher responsible: Prof Maitreesh Ghatak 32L.3.08A, Prof Nava Ashraf 32L.3.17, Dr Gharad Bryan 32L.3.10, Prof Robin Burgess 32L.3.03 and Prof Timothy Besley 32L.3.37

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Student will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the MT and LT.

There will be six take home problem sets, three in MT and three in LT. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each problem set will carry equal weight.

EC536 Economics of Industry for Research Students

This information is for the 2019/20 session.

Teacher responsible: Dr Pasquale Schiraldi 32L.4.22, Prof Alessandro Gavazza 32L.4.21 and Prof Martin Pesendorfer 32L.4.19

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the MT and LT.

8 take home problem sets (two for each part - four in MT and four in LT). Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC537**Microeconomic Theory for Research Students**

This information is for the 2019/20 session.

Teacher responsible: Dr Matthew Levy 32L.3.21, Prof Balazs Szentes 32L.4.05 and Dr Andrew Ellis 32L.3.09

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).

Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory. Topics will include:

- Classic static and dynamic game theory
- Contract theory
- Bounded rationality
- Psychology and economics.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Osborne M, and Rubinstein A, A Course in Game Theory, MIT Press, 1994. Fudenberg D, and Tirole J, Game Theory, MIT Press, 1991.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC539**Macroeconomics for Research Students**

This information is for the 2019/20 session.

Teacher responsible: Dr Shengxing Zhang 32L.1.16, Mr Benjamin Moll Room TBC, Dr Liwa Ngai 32L.1.15 and Prof Philippe Aghion 32L.2.30

Availability: This course is available on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: Surveys the most recent development in macroeconomics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Assignment (100%) in the MT, LT and ST. The assessment will consist of three take home assignments of equal weighting.

EC540**Political Economy for Research Students**

This information is for the 2019/20 session.

Teacher responsible: Prof Torsten Persson, Prof Gilat Levy 32L.4.31 and Prof Valentino Larcinese CON.5.02

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.

Course content: The course will provide students with the economic methodology and tools for the analysis of political

decision making and its effect on public policy. We will consider how political institutions shape economic policy, e.g., how do institutions such as election, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider how in the absence of institutions, political attitudes, beliefs and norms shape policies. The course will focus on analytical models and their testable implications.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Political Economics by T. Persson and G. Tabellini (MIT Press 2000); Special Interest Politics by G. Grossman and E. Helpman (MIT Press 2001); Whither Political Economy? Theories, Facts and Issues, by A. Merlo, in Blundell, Richard, Newey, Whitney and Torsten Persson (eds.), Advances in Economics and Econometrics, Vol.1, Cambridge University Press, 2005; Tim Besley and Torsten Persson, Pillars of Prosperity: The Political Economics of Development Clusters, Princeton University Press Torsten Persson & Guido Tabellini, 2005; "The Economic Effects of Constitutions," MIT Press Books, The MIT Press; Positive Political Theory 1, Collective Preference, D. Austen-Smith and J. Banks, Michigan, 2000; Positive Political Theory 2, Strategy and Structure, D. Austen-Smith and J. Banks, Michigan, 2005.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

EC599**Research Paper in Economics**

This information is for the 2019/20 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted early in Summer term.

Assessment: Dissertation (100%, 10000 words) in the ST.

EH510**Seminar on Modern Economic History**

This information is for the 2019/20 session.

Teacher responsible: Dr Neil Cummins, Dr Eric Schneider, Dr Leigh Gardner and Dr Natacha Postel-Vinay

Availability: This course is available on the MPhil/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.

For research students. Also open to other EH graduate students and attended by LSE and other faculty.

Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development during the modern period.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 8 hours of seminars in the ST.

EH520**Approaches to Economic and Social History**

This information is for the 2019/20 session.

Teacher responsible: Prof Mary Morgan SAR 609, Dr Neil Cummins SAR 513 and Prof Oliver Volckart SAR 610

Availability: This course is available on the MPhil/PhD in Economic History. This course is not available as an outside option.

This course is primarily structured for 1st year MPhil students in the Department of Economic History, for whom attendance is compulsory.

Course content: Approaches to Economic and Social History

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 8 hours of seminars in the ST.

Formative coursework: Written work and presentations as required by the Doctoral Programmes Director.

Indicative reading: There is no indicative reading list for this course as readings are updated annually to reflect student's interests.

Assessment: This course has no summative assessment.

EH590

Thesis Workshop in Economic History

This information is for the 2019/20 session.

Teacher responsible: Dr Neil Cummins SAR 513 and Dr Anne Ruderman SAR 506

Availability: This course is compulsory on the MPhil/PhD in Economic History. This course is available on the MRes/PhD in Quantitative Economic History. This course is not available as an outside option.

Course content: Thesis workshop in Economic History.

Teaching: 26 hours of seminars in the MT. 34 hours of seminars in the LT. 8 hours of seminars in the ST.

Assessment: This course is not examined.

EU550

Research Workshop in European Studies

This information is for the 2019/20 session.

Teacher responsible: Prof Waltraud Schelkle CBG.6.01, Prof Simon Glendinning CBG.7.01 and Prof Jonathan White CBG.7.09
Waltraud Schelkle is convenor for this course.

Availability: This course is compulsory on the MPhil/PhD in European Studies. This course is available on the MPhil/PhD in European Studies. This course is not available as an outside option.

This course is compulsory for all first, second and third year European Institute MPhil/PhD students. The course is also recommended for those second and third year PhD students in the Government Department whose research focuses on European topics.

Course content: Presentation and detailed discussion of PhD related research, outlines and progression. Discussion of thesis chapters and related doctoral research, with an emphasis on research design and methodology. Practice conference panel sessions. A detailed syllabus is fixed at the start of each term.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

Assessment: There is no examination for this course. Regular attendance and active participation is required. All students are required: to present at least one substantial chapter/paper draft; to act as a discussant on another paper; and to read papers in advance of the seminar in which they are discussed.

FM502

Corporate Finance for Research Students

This information is for the 2019/20 session.

Teacher responsible: Prof Michael Burkart CON 1.01, Prof Daniel Paravisini Maggi CON 1.01 and Dr Ashwini Agrawal CON 1.01
TBC

Availability: This course is compulsory on the MPhil/PhD in

Accounting and MRes/PhD in Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Doctoral students in the Departments of Finance and Economics, and other students with the permission of the PhD Finance Programme Director

Course content: The first half of this course focuses on the theory of corporate finance. The theory half of the course can, in turn, be subdivided into two parts. The first part reviews some of the classical concepts in corporate finance, using tools from game and contract theory to study incentive and information problems at the level of the firm, examining how financial contracts can be designed to mitigate these problems. This part of the course also considers how takeovers and ownership concentration can help to mitigate conflict of interests among insiders and investors in firms. The second part focuses on the theory of financial intermediation. This component reviews classic theories of financial intermediation and will introduce students to some recent work in this field.

The second half of the course will consider empirical research in corporate finance. Several lectures will be devoted to understanding and applying commonly used research methodologies, such as randomized control trials, instrumental variables in linear regressions, regression discontinuity designs, event studies, and structural estimation techniques. There will also be extensive discussion of subtopics within empirical corporate finance, such as firm financial policy, investment behaviour, control transactions, corporate governance, financial intermediation, household finance, consumer finance, and overlapping topics with industrial organization and labour economics. For each topic, time will be devoted to assessing current levels of active research and open questions for further work. A significant portion of time will also be spent critically evaluating empirical papers through referee reports and discussions. Students will also have the opportunity to consider various processes that different researchers follow to generate ideas, collect data, write papers, and manage the publication process.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Indicative reading: Readings will be mainly based on books and journal articles including: Tirole, Jean, *The Theory of Corporate Finance*, 2006, Princeton University Press. Freixas, X. and Rochet, J.C., *The Microeconomics of Banking*, 1997, MIT Press. J. Wooldridge, *Econometric Analysis of Cross-Section and Panel Data*, Cambridge: The MIT Press, 2002. M. Roberts and T. Whited: "Endogeneity in Empirical Corporate Finance," *Handbook of the Economics of Finance*, vol. 2.

Assessment: Exam (75%, duration: 3 hours) in the summer exam period.

Project (25%) in the LT.

FM503

Asset Pricing for Research Students

This information is for the 2019/20 session.

Teacher responsible: Dr Georgy Chabakauri CON 1.01, Dr Dong Lou CON 1.01 and Prof Dimitrios Vayanos CON 1.01

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available on the MPhil/PhD in Accounting. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is divided into two parts relating to theoretical and empirical asset pricing. The theoretical half of the course covers dynamic models of frictionless markets, both in discrete and in continuous time, and models with frictions, such as asymmetric information, costs of search and market participation, leverage constraints and delegated asset management. The empirical half of the course is dedicated to an empirical evaluation of asset-pricing models. Representative-agent models (with power, habit and recursive preferences) and their application to the

valuation of equities are covered. Next, no-arbitrage term-structure and option-pricing models are discussed. The class concludes with equilibrium and reduced-form models of currencies.

Teaching: 30 hours of lectures in the MT. 30 hours of lectures in the LT.

Indicative reading:

- Darrell Duffie *Asset Pricing Theory*, Princeton University Press
- David Kreps, *The Black-Scholes-Merton Model as an Idealization of Discrete-Time Economies*, Econometric Society Monograph, Cambridge University Press.
- John Campbell, 1999, *Asset prices, consumption, and the business cycle*, in J. B. Taylor and M. Woodford, Eds., *Handbook of Macroeconomics*, Volume 1C, Elsevier Science B.V
- John Cochrane, 2004, *Asset Pricing*, Princeton University Press
- Kenneth Singleton, 2006, *Empirical Dynamic Asset pricing*, Princeton University Press

Assessment: Exam (90%, duration: 3 hours) in the summer exam period.

Project (10%) in the LT.

FM505

PhD Seminar in Finance

This information is for the 2019/20 session.

Availability: This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

Course content: This is a seminar course for PhD students in the early stages of their research to present their work in progress. Outside speakers may also be invited from time to time.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.

Other meetings to be arranged as necessary.

Assessment: Essay (100%, 10000 words) in the LT.

A 10,000 word essay on a topic to be agreed with the student's supervisor. This essay is to be submitted by the end of the ST of the third year of registration.

GI500

Doctoral Workshop: Department of Gender Studies

This information is for the 2019/20 session.

Teacher responsible: Prof Wendy Sigle

Availability: This course is compulsory on the MPhil/PhD in Gender. This course is not available as an outside option.

Course content: The aim of this course is to give students experience and practice in presenting chapters or papers related to their current research for critical discussion. The focus of the seminar is on the research process and students are expected to present at least once per year. Some sessions may be used for professional training or personal development/well-being.

Teaching: Weekly 2.0 hour seminars held in the MT, LT and ST. First year students must also audit GI424 *Gender Theories in the Modern World* (seminars with permission) and GI402 *Gender, Knowledge and Research Practice* (full participation in course). All students are expected to participate in courses run by the Department of Methodology, LSE Gender or within the School as advised by their supervisors. Students are also expected to participate in research seminars and public lectures. GI500 is team taught by faculty across the department.

Indicative reading: PhD chapters and articles suggested by students relevant to their topic.

Assessment: No summative assessment, but attendance and participation is considered part of the overall formal assessment of progress, including upgrade at the end of the first year and annually thereafter. Students are normally expected to attend GI500 until the end of their third year.

Students should refer to the PhD handbook for advice on milestones.

GV501

Doctoral Workshop: Political Theory

This information is for the 2019/20 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option.

Compulsory for PhD students in the Government Department specialising in political theory.

Course content: An opportunity for students to present chapters or papers related to their current research for critical discussion.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 4 hours of seminars in the ST.

There are typically 5 sessions in MT and 5 sessions in LT, and a variable number of sessions in ST. The precise schedule will be made available at the start of each term.

GV503

Political Philosophy Research Seminar

This information is for the 2019/20 session.

Teacher responsible: Dr Signy Gutnick Allen

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Compulsory for all PhD students in the Government Department specialising in political theory. Other interested students are welcome to attend, if numbers permit.

Course content: Guest speakers present papers and initiate discussion at seminars.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 4 hours of seminars in the ST.

Assessment: No assessment

GV504

Research Methods in Political Theory

This information is for the 2019/20 session.

Teacher responsible: Jan Kandiyali

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give doctoral students a comprehensive conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields and will prepare doctoral students for choosing and reflecting on their methodological approach. The course runs in concurrence with the Political Philosophy Research Seminar and the Doctoral Workshop in Political Theory, complemented by a reading group in the Lent Term on methodological questions in political theory.

Teaching: 20 hours of workshops in the MT. 10 hours of seminars and 20 hours of workshops in the LT. 4 hours of workshops in the ST.

Formative coursework: Regular presentations in the reading group.

Indicative reading: Some possible choices for the reading group:

- Josiah Ober, *Demopolis* (Cambridge University Press 2017)
- William Claire Roberts, *Marx's Inferno*, Princeton University Press (2016).

- Tommie Shelby, *Dark Ghetto*, Harvard University Press (2016).
- Timothy Scanlon, *Being Realistic about Reasons* (OUP 2013).
- Adam Smith, *The Theory of Moral Sentiments*, CUP 2002.
- Wolfgang Streeck, *Buying Time*, Verso 2014.
- Rahel Jaeggi, *Alienation*, Columbia University Press, 2016.
- Rainer Forst, *Normativity and Power*, Oxford University Press 2017.
- Daniel Lee, *Popular Sovereignty in Early Modern Constitutional Thought* (Oxford University Press 2016).
- Cecile Laborde, *Liberalism's Religion*, Harvard University Press, 2017.
- Claire Chambers, *Against Marriage*, Oxford University Press 2017.

Assessment: Essay (50%, 4000 words) in the LT.

Essay (50%, 4000 words) in the ST.

The essay topics will be chosen in consultation with the course convenor, but typically, one will reflect on a paper given by a visiting speaker in the Doctoral Research Seminar, and the other on one or more of the books read for the Lent term Reading Group.

GV513 Half Unit

Qualitative Methods in the Study of Politics

This information is for the 2019/20 session.

Teacher responsible: Dr Steffen Hertog

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Other PhD students must request permission from the class teacher, which is routinely granted subject to capacity.

Course content: This course introduces and critically evaluates, at the advanced postgraduate level, a key range of qualitative techniques and methods in political science. It aims to build students' capability to evaluate such methods and to select, reject, and deploy them in research design and practice.

The course begins with debates over the place of qualitative methods in political science, and the question of how to match ideas to methods. The rest of the course is devoted to exploring a range of qualitative techniques, including case selection, case studies and process tracing, comparisons, interviews and field research, qualitative comparative analysis, and "mixed methods". The content of each week will be integrated as closely as possible with participants' own research projects (even if qualitative work constitutes only a small part thereof). The course is relevant for political scientists, but also students of development and international relations.

Teaching: 20 hours of seminars in the LT.

Formative coursework: Critiques of articles or books that use the various methodologies discussed in the course.

Indicative reading: G. King, R. Keohane, and S. Verba, *Designing Social Inquiry: Scientific inference in qualitative research* (Princeton, 1994). Antoinette Burton ed., *Archive Stories: Facts, Fictions, and the Writing of History* (Duke University Press, 2006); David Collier and Henry Brady, *Rethinking Social Inquiry* (Rowman and Littlefield 2010); John Gerring, *Case Study Research: Principles and Practices* (Cambridge University Press 2007).

Assessment: Essay (30%, 2500 words) in the LT.

Project (70%, 3000 words) in the ST.

(1) A thorough critique of an article which uses one of the methods discussed in the course (2500 words) and (2) EITHER a complete "mock" research design, preferably (although not necessarily) on their own research question (3000 words) OR a discussion of the advantages and limitations of a specific empirical technique, based on a review of at least two pieces of published research (3000 words).

GV514

Political Science and Political Economy Doctoral Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Stephane Wolton

Availability: This course is available on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Mainly for second and subsequent year research students and staff in Government and elsewhere in the School involved in research in political science and/or political economy. First year MRes and research students are welcome to attend.

Course content: The PSPE Doctoral Workshop/Work in Progress Seminar is intended as a setting in which Research Students from the Government Department present and receive feedback on early stage and ongoing research projects. In weeks when research students do not present, LSE PhD students, LSE staff, and visiting scholars from other departments will present. The Seminar aims to foster a strong and lively research community and as such, welcome empirical or theoretical work linked in any way to politics or political economy.

Teaching: 16 hours and 30 minutes of seminars in the MT. 16 hours and 30 minutes of seminars in the LT. 10 hours and 30 minutes of seminars in the ST.

The workshop will meet every week.

Assessment: Not assessed.

GV517 Half Unit

Comparative Political Economy: New Approaches and Issues in CPE

This information is for the 2019/20 session.

Teacher responsible: Prof David Soskice and Prof Catherine Boone

Availability: This course is available on the MRes/PhD in International Development, MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Political Science.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is open to research students from any of the LSE departments.

Pre-requisites: This course will be open to research students (PhD students) from any of the LSE departments.

Course content: This half-unit reading seminar will survey a set of major topics in the Comparative Political Economy (CPE) of advanced capitalist and developing countries. We will consider different analytic strategies for conceptualizing variation in national economic structure, explaining change in economic structure, and understanding the political causes and effects thereof. The seminar is designed for PhD students (research students) across the School wanting to familiarize themselves with some of the major themes, controversies, and research frontiers in CPE. Our goal is to nurture innovation in doctoral-level CPE research at the LSE.

While situating our analyses in the context of a changing global economy, our focus will be on describing and explaining transformation at the level of nation states. Drivers of change can be found in the locus and organization of political power, in technological change, and/or in the dynamics of capital. Our seminar will explore both productive connections and tensions that emerge across these explanatory models.

Course materials are organized around three major topic areas (though like most else in CPE they are interrelated): redistribution, accumulation, and domestic regimes. A great many questions fit into these areas and our idea is that the seminars should enable students to raise issues related to their research.

Teaching: 30 hours of seminars in the MT.

Formative coursework: For formative work, feedback will be

provided on a dissertation proposal or chapter.

Indicative reading: Ben Ansell, *From the Ballot to the Blackboard: The Redistributive Political Economy of Education Reform*, CUP 2014. Beramendi, Hausermann, Kitschelt and Kriesi eds. *The Politics of Advanced Capitalism* CUP 2015. Brynjolfsson & McAfee, *The Second Machine Age*, Norton 2014 VoxEU.org, *Secular Stagnation: Facts, Causes and Cures* CEPR 2014 (chaps by Summers, Eichengreen, Krugman, Gordon, Glaeser, Mokyr, Crafts). Kimberly Morgan, "Path Shifting of the Welfare State: Electoral Competition and the Expansion of Work-Family Policies in Western Europe", *World Politics*, Jan 2013. Ellen Meikins Woods, "Unhappy Families: Global Capitalism in a World of Nation-States," *Monthly Review*, 51/3 (1999). Acemoglu, Daron, and James A. Robinson, *Economic Origins of Dictatorship and Democracy* (Cambridge: Cambridge University Press, 2006), chapters 2-3 (pp. 15-87). Ali Kadri, *Arab Development Denied: Dynamics of Accumulation by Wars of Encroachment* (Anthem 2014). Richard F. Doner, *The Politics of Uneven Development: Thailand's Economic Growth in Comparative Perspective* (Cambridge U. Press, 2009). Assessment: Coursework (100%, 5000 words) in the LT. Each student will submit a 20-25 page (double spaced) research paper, dissertation proposal, or draft dissertation chapter as the basis of assessment for this course.

GV599

Research Prospectus in Political Science

This information is for the 2019/20 session.

Teacher responsible: Dr Kai Spiekermann

Availability: This course is compulsory on the MRes/PhD in Political Science. This course is not available as an outside option. For MRes/PhD students in Political Science only.

Course content: A research paper, not to exceed 10,000 words, related to the student's designated major field, to be submitted in August.

Assessment: Research project (100%, 10000 words) in August.

GV5X1

Research Design in the Social Sciences

This information is for the 2019/20 session.

Teacher responsible: Dr Daniel Berliner, Dr Steffen Hertog, Prof Kai Spiekermann and Dr Joachim Wehner

Availability: This course is compulsory on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to help PhD students develop a research design. Students will learn how to find their research questions, choose a feasible data collection or modelling strategy, and match data collection and analytic methods to the aims of the PhD project. We also consider the relation of political theory and political science and explore research methodologies in normative theory. This course is therefore designed to be a primer in asking the right questions, exploring the options available to us and understanding the consequences of the design decisions that we make. Accordingly, this course is ultimately about turning good research questions into systematic projects that deliver interesting and worthwhile results. We also debate issues in research ethics and provide advice on publication strategies.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 7 hours of workshops in the ST. This course has a reading week in Week 6 of both MT and LT.

Formative coursework: This is a PhD level Research Design course – we do not intend to have additional essays. Students will give presentations and receive extensive feedback on their work in progress. These are part of formative rather than summative assessment and are an important part of professional development. The main learning outcomes are to help the PhD students develop professional research designs.

Indicative reading: King, G., R. Keohane & S. Verba (1994) *Designing Social Inquiry*. Princeton UP. Box-Steffensmeier, J., H. Brady & D. Collier (eds) (2008) *The Oxford Handbook of Political Methodology*. OUP. Dunning, T. (2012) *Natural Experiments in the Social Sciences: A Design-Based Approach*. CUP. Dryzek, J., B. Honig & A. Phillips (eds.) (2008) *The Oxford Handbook of Political Theory*. OUP.

Assessment: Essay (20%, 2500 words) in the MT. Essay (20%, 2500 words) in the LT. Research project (60%) in the ST.

GV5X2

Research Paper in Comparative Politics

This information is for the 2019/20 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the MSc in Comparative Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X3

Research Paper in European Politics and Policy

This information is for the 2019/20 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the MSc in Comparative Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X4 Research Paper in Global Politics

This information is for the 2019/20 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the MSc in Global Politics and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X5 Research Paper in Political Science and Political Economy

This information is for the 2019/20 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the MSc in Political Science and Political Economy and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. In some instances, students will be expected to complete the assessment method specified by the course convenor where a research paper is not appropriate. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval where applicable.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Michaelmas term submit in Week 1 of the Lent term; modules taken in the Lent term submit in Week 1 of the Summer term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GY500

Research Project Seminar

This information is for the 2019/20 session.

Teacher responsible: Prof Olmo Silva STC 5.06A, Prof Simon Dietz and Dr Romola Sanyal

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is not available as an outside option.

Attendance is compulsory for all MPhil/PhD students in the Department of Geography and Environment, unless a student is conducting approved fieldwork.

Course content: Presentations by research students of aspects of their own research, stressing problems of theory, methodology and techniques.

Teaching: A series of workshops, running throughout the year, organised by each of the three research clusters in the Department of Geography & Environment (Economic Geography; Environmental Economics & Policy; Urbanisation, Planning and Development).

Formative coursework: All students attending this course will be required to present their own research once each year.

Assessment: This course is not intended as preparation for any particular examination.

GY502

Staff / Research Students Seminars

This information is for the 2019/20 session.

Teacher responsible: Dr Sefi Roth STC.4.21a, Dr Ryan Centner STC 6.01c and Dr Felipe Carozzi, STC 4.16

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics and MPhil/PhD in Human Geography and Urban Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. For all MPhil/PhD students registered in the Department of Geography and Environment and staff. Other interested students may attend.

Course content: Topical seminar series involving presentations by speakers from both inside and outside the Department on aspects of their own research.

Teaching: There are three different seminar series taking place regularly throughout the year, organised by each of the three research clusters in the Department of Geography & Environment. The Economic Geography cluster seminar series is organized in conjunction with the Spatial Economics Research Centre (SERC); the Environmental Economics & Policy cluster seminar series is organized together with the Grantham Research Institute on Climate Change and the Environment; and the Urbanisation, Planning and Development seminar series. The timing and length of each seminar series vary across research clusters.

Urbanisation, Planning and Development Cluster: *8 x one-and-a-half hour seminars in MT and 8 x one-and-a-half hour seminars in LT

Economic Geography Cluster: *10 x one-and-a-half hour seminars in MT and 10 x one-and-a-half hour seminars in LT

Environmental Economics and Policy Cluster: *11 x one-and-a-half hour seminars in MT, LT and ST

*Note that the actual seminar schedule is subject to change due to availability of speakers.

Assessment: This course is not intended as preparation for any particular examination. But, students will find it useful in increasing their awareness of current research and the application of research methods across the discipline.

GY520

Environmental Regulation: Implementing Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Richard Perkins STC.S413, Dr Michael Mason STC.S510, Dr Myung Ae Choi and Dr Eugenie Dugoua

Availability: This course is available on the MPhil/PhD in Accounting, MPhil/PhD in Environmental Economics and MPhil/PhD in Environmental Policy and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental Governance or GY420 Environmental Regulation: Implementing Policy.

Course content: This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation and governance. In MT, the course considers the rationale for public policy intervention, and the factors that

shape the influence of different interest groups over government policy making. It proceeds to examine the nature, design and performance of different policy instruments, together with the various influences governing policy implementation processes. In LT, the course highlights key themes in environmental regulation informed by the concept of multi-level governance. This concept suggests new alignments and forms of regulation within and across state borders: the themes chosen to explore this concept include governing technological change, international negotiations, governance beyond the state, and different rationalities of regulation (science, ethics and justice).

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 10 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

Formative coursework: Students are expected to prepare one formative essay, as well as give one presentation on a specified topic, in the MT: feedback will be provided on both. In the LT, students are required to give one presentation on an agreed topic: this will be graded with feedback.

Indicative reading: While there is no one single text that covers all aspects of the course, you are strongly advised to consult the following: Core reading, MT: D Fiorino (2006) *The New Environmental Regulation*, London: MIT Press; J Holder and M Lee (2007) *Environmental Protection Law and Policy* (2nd edition), Cambridge: Cambridge University Press; S Bell, D McGillivray, O Pedersen, E Lees and E Stokes (2017) *Environmental Law* (9th edition), Oxford: Oxford University Press. Core reading, LT: S Barrett (2005) *Environment and Statecraft: The Strategy of Environmental Treaty-Making*, Oxford: Oxford University Press; A Gupta and M Mason (eds.) (2014) *Transparency in Global Environmental Governance*, Cambridge, MA: MIT Press; S Piattoni (2010) *The Theory of Multi-level Governance*, Oxford: Oxford University Press; A Randall (2011) *Risk and Precaution*, Cambridge: Cambridge University Press.

Assessment: Essay (100%, 6000 words) in the LT.

HP500

Advanced Health Policy and Health Economics

This information is for the 2019/20 session.

Teacher responsible: Prof Andrew Street COW 3.03, Dr Mylene Lagarde COW 3.02, Dr Justin Parkhurst COW 3.08 and Dr Huseyin Naci COW 3.01

Availability: This course is compulsory on the MPhil/PhD in Health Policy and Health Economics. This course is not available as an outside option.

Pre-requisites: Admission to the Department of Health Policy's PhD programme in Health Policy and Health Economics

Course content: The PhD programme is centred around this core course and all students registered in their 1st, 2nd or 3rd year are expected to attend.

Alongside a set of bespoke lectures, the course includes a journal club where key articles are critically appraised and a series of seminars given by faculty in the Department of Health Policy and external speakers, thereby guaranteeing exposure to different materials, research areas, and theoretical perspectives and analytical techniques.

Students will be required to participate in work-in-progress seminars where students present work relating to their theses and contribute fully to discussions on their colleagues' work. The course will provide students with insights into the breadth of work in the areas of health and social care policy and health economics, and will act as a supportive critical forum for discussion of each PhD student's work-in-progress.

Teaching: 8 hours of lectures and 8 hours of seminars in the MT. 8 hours of lectures and 8 hours of seminars in the LT. 8 hours of lectures and 8 hours of seminars in the ST.

Over the course of the academic year, 24 hours of lectures 24 hours of seminars will take place.

Students on the course will have reading weeks in Week 6 of both

Michaelmas and Lent Terms.

Formative coursework: Students will be expected to produce two one-hour presentations over the course of the academic year. In one of these, the student is to contribute to the course's journal club by critically appraising an important contribution to the health policy or health economics literature. In the other instance, students will present work-in-progress, thereby showing understanding of the concepts of the course and its application in designing their PhD thesis.

Indicative reading: Tim Bhattacharya, Timothy Hyde, and Peter Tu: *Health Economics* (Palgrave Macmillan 2014). Robert H. Blank and Viola Desidera Burau: *Comparative Health Policy*, 3rd edition (Palgrave Macmillan 2013). Peter Burnham: *Research Methods in Politics*, 2nd edition (Palgrave Macmillan 2008). Michael F Drummond et al.: *Methods for the Economic Evaluation of Health Care Programmes* (Oxford University Press 2015). Sherry Glied and Peter Smith: *The Oxford Handbook of Health Economics* (Oxford University Press 2013). Andrew M Jones ed.: *The Elgar Companion to Health Economics*, 2nd edition (Edward Elgar 2013). Stephen Morris et al.: *Economic Analysis in Health Care*, 2nd edition (Wiley 2013)

Assessment: Oral examination (100%).

Summative assessment in the first year of full-time PhD enrolment will consist of a 5,000 word thesis document detailing students' thesis proposal, including research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. Students are subject to a viva voce and marking of this document by the two non-supervisory members of the department who make the decision on upgrading. Students will be required to achieve a minimum grade of 60%.

HY501

International History Research Student Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Tanya Harmer SAR.M.11

Availability: This course is compulsory on the MPhil/PhD in International History. This course is not available as an outside option.

Course content: The workshop aims to introduce students to effective archival research, issues in the preparation of a thesis and means of launching a career in academic or related fields; and the opportunity to present research in progress.

Students yet to pass their upgrade from MPhil to PhD attend the Introductory Workshop, which meets weekly in the Michaelmas term. Meetings are devoted to research and interviewing techniques and mainly practical issues of historical research. Students due to be upgraded attend the Advanced Workshop held in the Lent and Summer terms, the frequency of meetings depending upon the number of participants. The meetings are intended primarily as a forum for reviewing research in progress, with a view to enabling students to pass their upgrade.

Teaching: 20 hours of seminars in the MT. 4 hours of seminars in the LT.

Assessment: This course is not assessed.

HY509

International History Research Seminar

This information is for the 2019/20 session.

Teacher responsible: Dr Tanya Harmer SAR.M.11

Availability: This course is available on the MPhil/PhD in International History. This course is not available as an outside option.

Pre-requisites: Students need to have passed their upgrade to PhD.

Course content: Second, third and fourth year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.

Assessment: This course is not assessed.

HY510

Cold War History Research Seminar

This information is for the 2019/20 session.

Teacher responsible: Dr Roham Alvandi SAR.M.12

Availability: This course is available on the MPhil/PhD in International History. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Second and third year PhD students will present their research for discussion. There will also be seminars by staff from within and outside the department on their own research with relevance for PhD students either in terms of subject and/or methodology.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT. 10 hours of seminars in the ST.

Indicative reading: See the webpage for the course for further details.

Assessment: The course is not assessed.

IR501

Methods in International Relations Research

This information is for the 2019/20 session.

Teacher responsible: Dr Mathias Koenig-Archibugi and Prof Tomila Lankina CBG.10.13

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

Course content: The main objective of this course is to familiarise students with the principal approaches to contemporary research in the main branches of International Relations and to help students identify the appropriate methods for their project. The course will encourage awareness of the relationship between theory and method in the conduct of research. It will highlight trade-offs when choosing specific methods and research designs. Our aim is to train well-rounded academic professionals, who are able to comprehend, critically interrogate, and engage with scholarship employing diverse methodological toolkits.

The course therefore aims to expose students to, and generate awareness of, a variety of research methods in the discipline irrespective of the particular approach employed in their doctoral work, and at the same time help them develop a detailed research plan for their own doctoral project. The course will aim to promote an environment of mutual support and encouragement amongst first year research students, maximising the potential for cross fertilization between different projects. The course will develop students' presentational skills in a group setting.

Teaching: 14 hours of seminars and 9 hours of seminars in the MT. 14 hours of seminars and 9 hours of seminars in the LT.

Formative coursework: Students will be expected to draft and present sections of their research plan in the Michaelmas Term and to prepare and present a full research plan at the end of the Lent Term.

Indicative reading:

Assessment: This course is not assessed.

IR502

International Relations Theory Research Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Peter Wilson CBG.10.07 and Dr Martin Bayly

Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

Course content: IR502 is part of the research-training programme for all research students working in the area of international theory, broadly defined to include work in rationalist, constructivist and critical traditions. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars developing innovative theoretical approaches to better explain, understand and critique world politics. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. The papers are circulated in advance.

Teaching: 12 hours of seminars in the MT. 12 hours of seminars in the LT.

Assessment: This course is not assessed.

IR504

Security and Statecraft Research Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Spyridon Economides COW.2.07 and Dr Katharine Millar CBG.8.13

Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

Course content: IR504 is part of the research-training programme for all research students working in the area of security and statecraft broadly defined. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area

draws on diverse theoretic and methodological approaches, and ranges across levels of analysis, regions, and eras. Specific foci of research include diplomacy, foreign and security relations, foreign policy analysis, comparative strategy, identity and security, war and society, state-building, peace-building and conflict resolution, revolutions, human security and genocide.

Teaching: 12 hours of workshops in the MT. 12 hours of workshops in the LT.

Assessment: This course is not assessed.

IR507 International Institutions, Law and Ethics Research Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Mathias Koenig-Archibugi
Dr Theresa Squadrito

Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option. It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

Course content: IR507 is part of the research-training programme for all research students working on the theory, history or practice international institutions, international law and ethics. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area runs from the study of intergovernmental and nongovernmental institutions and global governance, to the politics of international law, to the ethical and normative dimensions of global politics. It includes, but is not limited to, the study of international institutions such as the European Union, North Atlantic Treaty Organisation, and the International Criminal Court and international issues such as human rights, humanitarian intervention, climate change, and international crime.

Teaching: 12 hours of seminars in the MT. 10 hours and 30 minutes of seminars in the LT. 1 hour and 30 minutes of seminars in the ST.

Assessment: This course is not assessed.

IR509 International Relations Research Design Workshop

This information is for the 2019/20 session.

Teacher responsible: Prof Tomila Lankina

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option. This workshop is compulsory for all second year International Relations Department (IRD) research students and open to other interested IRD research students.

Course content: This workshop will address issues concerning the formulation and design of the PhD research project. Its principal objective is to assist research students in designing a well-thought out and manageable thesis. It seeks to do so by providing a forum students discuss their research topic, the particular set of questions they intend to address and the methods they wish to use with other members of the workshop. Its aim is to provide students with constructively critical observations about their research project and the problems they may confront and preparing

students for their upgrade Research Panel in the summer.

Teaching: 12 hours of seminars in the MT.

Assessment: This course is not assessed.

IR555 International Political Economy Research Workshop

This information is for the 2019/20 session.

Teacher responsible: Dr Ranjit Lall CBG.8.01, Prof Jeffrey Chwieroth CBG.10.12 and Dr Stephen Woolcock CBG.8.09

Availability: This course is available on the MPhil/PhD in European Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

This workshop is run with the Government Department and European Institute (GV555 and EU555).

Course content: IR555 is part of the research-training programme for all research students working in the area of international political economy: the relationship between states and markets in a global context. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area works at multiple levels of analysis and draws on an array of theoretic and methodological approaches from several disciplines. Both historical and contemporary questions are addressed across a range of issues including: trade, migration, global environmental politics, international economic organisations, economic diplomacy, international finance, foreign investment, exchange rates, and monetary relations.

Teaching: 12 hours of seminars in the MT. 12 hours of seminars in the LT.

Assessment: This course is not assessed.

LL500 Doctoral Research Seminar series

This information is for the 2019/20 session.

Teacher responsible: Professor Gerry Simpson (NAB 6.13)

Availability: This course is compulsory on the MPhil/PhD in Law and MPhil/PhD in Law (Socio-Legal Theory). This course is not available as an outside option.

Course content: The course aims to equip students with the skills required to undertake advanced legal research. The focus in the MT is on methodological and theoretical issues arising in legal scholarship. The focus in the LT is on the various stages of the PhD process, and on preparation for professional life in academic law beyond the PhD. In the ST an Upgrade Conference is held at which first year research students present their work-in-progress.

Teaching: 22 hours of seminars in the MT. 22 hours of seminars in the LT.

There will be a Reading Week in week 6 of MT and LT.

Assessment: There are no examination arrangements. However, attendance is compulsory for first year research students. Research students in other years may also attend.

MA500**Mathematics: Seminar on Combinatorics, Games and Optimisation**

This information is for the 2019/20 session.

Teacher responsible: Dr Julia Boettcher, Dr Laszlo Vegh and Dr Paul Duetting

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics, operations research and game theory. The seminar is regarded as an important part of research students' formal training and they are expected to attend and contribute.

Teaching: 33 hours of seminars and 33 hours of seminars in the MT. 33 hours of seminars and 33 hours of seminars in the LT. 21 hours of seminars and 21 hours of seminars in the ST.

MA501**Research Student Seminar**

This information is for the 2019/20 session.

Teacher responsible: Dr Peter Allen COL 4.05, Dr Christoph Czichowsky COL 3.11, Dr Pavel Gapeev COL 4.10, Prof Jozef Skokan COL 3.04, Dr Laszlo Vegh NAB.3.05, Dr Julia Boettcher COL 4.03, Dr Paul Duetting COL 3.08 and Dr Albina Danilova COL 4.09

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminars range across many areas of pure, applied and financial mathematics. The emphasis is on topics in discrete mathematics, algorithms, operations research, game theory, financial mathematics and control theory. The seminars are regarded as an important part of research students' formal training and they will all be expected to attend and contribute. Throughout the academic year, students are also invited to give presentations. There are additional reading groups aimed at students working in financial mathematics and discrete mathematics. These are compulsory for students working in this area but other students of the MPhil/PhD in Mathematics are welcome to attend.

See http://www2.lse.ac.uk/maths/Seminars/Financial_Mathematics_Reading_Group.aspx and <http://www.lse.ac.uk/maths/Seminars/PhD-Seminar-on-Combinatorics,-Games-and-Optimisation.aspx>

Teaching: PhD Seminar on Combinatorics, Games and Optimisation (MA501.1): 11 one-and-a-half-hour seminars in the MT and LT. 7 one-and-a-half-hour seminars in the ST.

LGSMF Portfolio Optimisation Seminar (MA501.2): 11 three-hour seminars in the LT. 7 three-hour seminars in the ST.

Financial Mathematics Reading Group Seminar (MA501.3): 11 three-hour seminars and 11 one-hour seminars in the MT and LT. 7 three-hour seminars and 7 one-hour seminars in the ST.

Discrete Mathematics Reading Group Seminar (MA501.4): 11 three-hour seminars in the MT and LT. 7 three-hour seminars in the ST.

Approximately 80-90 meetings of between 1 and 3 hours throughout the MT, LT and ST, dependent on speakers. See http://www2.lse.ac.uk/maths/Seminars/Research_Seminars.aspx for schedule and more details.

MC500**Research Seminar for Media, Communications & Culture**

This information is for the 2019/20 session.

Teacher responsible: Prof Lilie Chouliaraki FAW.7.01D

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option. For Research Students. The course is compulsory for students in the first and second years of the Doctoral Programmes in the Department of Media and Communications. All Research Students in the Department are welcome and encouraged to attend.

Course content: The aim of the course is to raise awareness of theoretical, conceptual and methodological issues in the interdisciplinary field of media and communications research and to develop students skills with respect to theory building, research design and implementation. The course focuses, in particular, on the key conceptual issues and analytical strategies required in media and communication research, with special reference to the study of the changing environment of media production, dissemination and consumption, under conditions of globalization and digitization of information

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Compulsory for first and second year students and open to others. There may be additional seminars or workshops in Summer Term.

- Silverstone R. (2006) *Media and Morality. On the Rise of Mediapolis* Cambridge: Polity

Assessment: This course is based predominantly on student presentations on their work in progress. Students are expected to use MC500 seminars as a key resource towards their thesis proposal at the end of their first year of study.

MC5M2**Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)**

This information is for the 2019/20 session.

Teacher responsible: Prof Ellen Helsper

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Course content:

i. Principles of Research in Media and Communications: a series of lectures offered by Department of Media and Communications faculty in Michaelmas Term. The lectures will normally cover

the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Specialist research workshops: A series of 5 three-hour workshops (comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all five workshops.

iii. Principles of Social Research Analysis: Students have to take at least one quantitative analysis course offered by the Department of Methodology (MY464 is the basic option). In addition, students are recommended to take either another quantitative or a qualitative analysis course offered by the Department of Methodology. The combination of courses must be approved by the supervisor and discussed with the MC5M2 convenor.

Teaching:

i. Principles of Research in Media and Communications:

Lecture (one hour) x 10 Michaelmas Term; Lecture on Writing Methodological Chapters and Papers (one hour) x 1 Lent Term

ii. Specialist workshops: Workshops (three hours) x 5 Lent Term (each comprised of two 1.5-hour sessions)

iii. Principles of Social Research Analysis: Quantitative analysis course M464 in Michaelmas Term; Lecture (two hours) x 9 Michaelmas Term; Computer class (one hour) x 9 Michaelmas Term; Recommended quantitative or Qualitative Analysis course in Lent Term (Varies depending on the course).

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to write a 7000 word methodology chapter for their thesis and submit it to their supervisor in ST1. This will normally include a pilot study testing one method to be used in the thesis.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

iii. Principles of Social Research Analysis: Most quantitative analysis courses require weekly assignments. The qualitative analysis courses vary in their formative assessment.

Indicative reading: Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd. Bauer, M. W., & Gaskell, G. D. (1991). *A Handbook of Qualitative Methodologies for Mass Communication Research*. London; New York: Routledge. Jørgensen, M. W., & Phillips, L. J. (2002). *Discourse analysis as theory and method*. London: Sage. Fairclough, N. (2001). *Language and power*. London: Pearson Education. Kent, R. (1994). *Measuring Media Audiences*. London; New York: Cengage Learning EMEA. Rose, G. (2012). *Visual Methodologies: An Introduction to Researching with Visual Materials*. London; Thousand Oaks, Calif: SAGE Publications Ltd. Schroder, K., Drotner, K., Kline, S., & Murray, C. (2003). *Researching Audiences: A Practical Guide to Methods in Media Audience Analysis*. London: New York: Bloomsbury Academic. Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE

Publications Ltd.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

One two-hour examination in January relating to Quantitative Analysis (e.g. MY464) and one two-hour examination in Summer Term if another quantitative analysis course is taken (see Department of Methodology course guides).

Note: Summative assignments differ depending on the components of the methodological training taken by the students. Students must pass all components of MC5M2.

MC5M8

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2019/20 session.

Teacher responsible: Prof Ellen Helsper

Availability: This course is available on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Course content:

i. Principles of Research in Media and Communications: a series of lectures offered by Department of Media and Communications faculty in Michaelmas Term. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, discourse analysis, social network analysis, content analysis, visual analysis, survey design/questionnaires, case studies, ethnography and participant observation, as well as research ethics.

ii. Specialist research workshops: A series of 5 three-hour workshops (comprised of two x 1.5 hour sessions) offered by media and communications staff in LT. Students are required to participate in all five workshops.

iii. Principles of Social Research Analysis: Students have to take at least one quantitative analysis course offered by the Department of Methodology (MY552 is the basic option for MC5M8). In addition, students are recommended to take either another qualitative or a quantitative analysis course offered by the Department of Methodology. The combination of courses must be approved by the supervisor and discussed with the MC5M8 convenor.

Teaching:

i. Principles of Research in Media and Communications:

Lecture (one hour) x 10 Michaelmas Term; Lecture on Writing Methodological Chapters and Papers (one hour) x 1 Lent Term

ii. Specialist workshops: Workshops (three hours) x 5 Lent Term (each comprised of two 1.5-hour sessions)

iii. Principles of Social Research Analysis: Quantitative analysis course MY552M in Michaelmas Term; Lecture (two hours) x 9 Michaelmas Term; Computer class (one hour) x 9 Michaelmas Term; Recommended quantitative or Qualitative Analysis course in Lent Term (Varies depending on the course).

Formative coursework:

i. Principles of Research in Media and Communications: All students are expected to write a 7000 word methodology chapter for their thesis and submit it to their supervisor in ST1. This will normally include a pilot study testing one method to be used in the thesis.

ii. Principles of Social Research: All students are expected to complete advance readings and submit workshop assignments.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

One two-hour examination in Summer Term relating to Quantitative Analysis (e.g. MY552M) and one two-hour examination in Summer Term if another quantitative analysis course is taken (see Department of Methodology course guides).

Note: Summative assignments differ depending on the components of the methodological training taken by the students. Students must pass all components of MC5M8.

MG500 Information Systems PhD Seminar Series and Workshops

This information is for the 2019/20 session.

Teacher responsible: Prof Jannis Kallinikos NAB3.24 and Dr Susan Scott NAB3.12

Availability: This course is compulsory on the MRes/PhD in Management (Information Systems and Innovation). This course is available on the MRes/PhD in Management (Information Systems and Innovation). This course is not available as an outside option. This course consists of a series of seminars and workshops at which PhD students present their work in progress.

Course content: This seminar series provides a forum for research students in management to present work in progress. Outside speakers may be invited from time to time.

Teaching: 20 hours of lectures in the MT. 20 hours of lectures in the LT.

For 2018/19 this will consist of a weekly, two hour, student-led seminar in weeks 2-10 of Michaelmas and Lent term. There will also be one full-day PhD workshop with a guest speaker MT & LT. Details of these workshops are to be emailed to students and staff as they are arranged.

Assessment: There is no formal assessment but all students are expected to attend the one day workshops and must email the course teacher to explain any absences. Attendance at the weekly seminars is more flexible but students should make an effort to attend as many as possible and to be involved in the organisation of at least one per year.

MG505 Not available in 2019/20 Research in Organisational Behaviour

This information is for the 2019/20 session.

Teacher responsible: Dr Lourdes Sosa and Dr Chia-Huei Wu

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course seeks to provide PhD students with a foundational understanding of established research in Organisational Behaviour with the objective of encouraging them to design novel research that advances the field. Specifically, this course will introduce students to the evaluation of established research in micro- and macro-level Organisational Behaviour, progressing through units of analysis from psychology research to organisational theory.

Teaching: 30 hours of seminars in the MT. 30 hours of seminars in the LT.

Formative coursework: Formative feedback on the individual presentation and essay will be provided throughout the course. Students will be expected to review their plan for presentation in office hours beforehand, and to informally present work in progress throughout the course for continuous feedback.

Indicative reading: Indicative readings include:

Barsade, S. G., & Gibson, D. E. (2007). Why does affect matter in organizations? *Academy of Management Perspectives*, 21(1), 36-59. Hewlin, P. F. (2009). Wearing the cloak: Antecedents and consequences of creating facades of conformity. *Journal of Applied Psychology*, 94, 727-741. Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. *Journal of Applied Psychology*, 87, 765-780. Mathieu, J., Maynard, M. T., Rapp, T., & Gilson, L. (2008). Team effectiveness 1997-2007: A review of recent advancements and a glimpse into the future. *Journal of Management*, 34, 410-476. Baron, J.N., Hannan, M.T., Burton, M.D. (2001). Social Structure and Competition in Interfirm Networks: The Paradox of Embeddedness. *Administrative Science Quarterly*, 42, 35-67. Hannan, M.T., Freeman, J. (1984). Structural Inertia and Organizational Change. *American Sociological Review*, 49, 149-164.

Assessment: Essay (40%, 4000 words) in the MT. Essay (40%, 4000 words) in the LT. Presentation (20%) in the MT and LT.

MY500 Half Unit Fundamentals of Social Science Research Design

This information is for the 2019/20 session.

Teacher responsible: Dr Alasdair Jones COL8.12

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation) and MRes/PhD in Management (Organisational Behaviour). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. The course is available to all research students.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to

foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research, including issues of data quality, analysis, reporting and reproducibility. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their PhD theses.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT.

Week 6 is a Reading Week during which students work independently on their formative assignments.

Formative coursework: Students will be expected to produce 1 exercise in the MT.

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). *Real World Research*. London: John Wiley.

Assessment: Research proposal (30%) in the MT.

Research design (60%) in the ST.

Class participation (10%).

Research Proposal (1500 words), submitted in week 11 of MT (30%). Research Design (4000 words), submitted in Week 1 of ST (60%).

MY505 Half Unit

Research Methods for Evaluation in Health, Development and Public Policy

This information is for the 2019/20 session.

Teacher responsible: Dr Flora Cornish COL.8.09

Availability: This course is open to any Research level student.

Pre-requisites: There are no prerequisites but some familiarity with qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: This course aims to equip students with the methodological knowledge and research skills to be able to design and critically appraise evaluation research. In the context of the rise of evidence-based policy, the course is designed to extend students' abilities to use evaluative information carefully and critically. The course takes a mixed methods approach. It covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as selection on observables, difference-in-differences, and the regression discontinuity design. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluations, interpreting outcomes, and assessing transferability to other settings. As well as the major design issues, the course addresses practical and ethical issues of evaluation research, how to write a study protocol, and how to draw lessons from a body of evidence through reviewing and synthesising evidence. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

10 x 1.5 hour lectures

9 x 1.5 hour seminars

Formative coursework: Students will be expected to produce 1 essay in the LT.

Students write a critical review (1,500 words) of a published evaluation report.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press. Bell, S. & Aggleton, P. (2016). *Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives*. London: Routledge. Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press. Glennerster, R. and Takaarasha, K. (2013) *Running Randomized Evaluations: A*

Practical Guide, Princeton University Press. Patton, M. Q. (2015). *Qualitative Research and Evaluation Methods*. (4th Edition). London: Sage.

Assessment: Coursework (50%, 2500 words) in the LT.

Essay (50%, 2500 words) in the ST.

50% group-based coursework. Students work in groups to develop an evaluation design, and write it up individually (2,500 words).

50% essay. Students are given a choice of essay questions, in response to which they write one essay (3,000 words).

MY521 Half Unit

Qualitative Research Methods

This information is for the 2019/20 session.

Teacher responsible: Dr Chana Teeger (MT) and Dr Katherine Summers (LT)

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Information Systems and Innovation) and MRes/PhD in Management (Organisational Behaviour).

This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Psychological and Behavioural Science, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods and MPhil/PhD in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups participant observation, and selecting documents and new media data.. Second, we cover analysis, using thematic, content, and discourse analysis. Issues of research design, quality indicators, epistemology and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods.

Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY526 Doing Ethnography, MY527 Qualitative Research with Non-Traditional Data, or MY528 Qualitative Text Analysis. Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the MT. 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

The course runs twice per year: in MT and again in LT. The content of the course is exactly the same in each term. Week 6 is a Reading Week, during which students work independently on their formative assignments.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading:

- Maria J Mayan (2009) *Essentials in qualitative enquiry*, Walnut Creek, CA: Left Coast Press.
- M Bauer; G Gaskell, (2000). *Qualitative Researching with Text, Image and Sound*, London: Sage.
- U Flick, (2009). *An Introduction to Qualitative Research*, 4th edition, London: Sage.
- C Seale, G Gobo, JF Gubrium, & D Silverman, (2004). *Qualitative*

Research Practice. London: Sage.

Assessment: Project (100%, 5000 words) in the ST. One final written project of 4000-5000 words, based on seminar exercises (100%). It takes the form of a research project report, with detailed appendices documenting the methods of data collection and analysis used.

MY525 Half Unit

Case Studies and Comparative Methods for Qualitative Research

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Knott COL 7.08

Availability: This course is available on the MPhil/PhD in Social Policy and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is freely available to any MRes or PhD student interested in case study research designs.

Pre-requisites: There are no pre-requisites for this course.

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the LT.

Students will receive 10 lectures (1.5 hours) and 9 seminars (1.5 hours) with a reading week in week 6. Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case study and comparative research design, as well as opportunities to design and develop their own research projects.

Formative coursework: Students will be expected to produce 1 presentation, 1 essay and 1 other piece of coursework in the LT. 1 presentation: every week 1-2 students will present on a key reading and lead a subsequent discussion of the reading and its research design

1 formative paper: literature review and project outline (1-2 pages) due in week 8. Students will receive written feedback on this by week 11.

1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment (week 9)

Indicative reading: Key texts:

- Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234.
- Mahoney, James. 2000. "Strategies of causal inference in small-N analysis." *Sociological Methods and Research* 28.
- Mahoney, James, and Dietrich Rueschemeyer. 2003. *Comparative historical analysis in the social sciences*.
- George, Alexander L. and Andrew Bennett. 2005. *Case Studies and Theory Development in the Social Sciences*.
- Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press.
- Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press.

Example readings for discussion:

- Edelstein, David M. 2016. "Occupational Hazards: Why Military Occupations Succeed or Fail." *International Security* 29(1): 49-91.
- Lebow, Richard. 2015. "Counterfactuals and Security Studies." *Security Studies* 24(3): 403–412.
- Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*.
- Gayle, Dennis. 1988. "Applying 'Most Different Systems' Designs Comparing Development Policy in Alabama and Jamaica." *Comparative Political Studies* 21.
- Slater, D. and Simmons, E. 2013. "Coping by Colluding." *Comparative Political Studies*. 46(11): 1366–1393.
- Rudra, Nita. 2011. "Openness and the Politics of Potable Water." *Comparative Political Studies* 44(6): 771–803.

Assessment: Project (90%, 5000 words) in April.

Class participation (10%) in the LT.

Research design proposal (Project 5,000 words) due at the beginning of ST (90%). It is recommended that students base the research design proposal on their dissertation topic (or a related topic, e.g. a PhD proposal). Where students also take MY500 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments.

Weekly participation grade (10%) preparation and active participation in seminars and group presentation.

MY526 Half Unit

Doing Ethnography

This information is for the 2019/20 session.

Teacher responsible: Dr Chana Teeger COL7.06

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convener if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. Contemporary conditions of globalisation, individualisation, bureaucratisation and digitisation introduce new challenges for such fieldwork. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with book-length exemplars, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data in a setting closely related to their PhD topic. Data collection is followed by data analysis and presentation activities. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include access to study sites, studying elite and marginalised groups, innovative sources of data, and writing field notes. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is a Reading Week during which time students work independently on their formative assignments.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words). Field-notes should record rich details of observations (the data), researcher

reflections and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: De Laine, M. (2000). *Fieldwork, participation and practice: Ethics and dilemmas in qualitative research*. Sage Publications Ltd. DeWalt, K. M., ; DeWalt, B. R. (2002). *Participant observation: A guide for fieldworkers*. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). *Writing ethnographic fieldnotes*. University of Chicago Press. Wacquant, L. (2004) *Body and Soul: Ethnographic Notebooks of an Apprentice Boxer*. New York: Oxford University Press. Laureau, Annette. (2011). *Unequal Childhoods: Class, Race and Family Life* (2nd Edition). Berkeley: University Press

Assessment: Essay (100%, 4000 words).

MY528 Half Unit Qualitative Text and Discourse Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Audrey Alejandro COL.7.10

Availability: This course is available to all research students who are permitted to take an outside option as part of their programme.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected (including finding bibliographical resources, conducting a literature review, constructing a research problem, creating a research question...). Please contact the course convenor if unsure.

Course content: The goal of this course is to provide students with the skills to systematically identify and extract information from texts and discourses for social scientific purposes. While acquiring those skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence when conducting their research project.

The first part of the course discusses the major paradigms and traditions of qualitative text analysis and focuses on the application of specific analytical techniques to qualitative data. The main methods of qualitative text analysis, including content analysis and thematic analysis, will be explored with specific emphasis on discourse analysis. The second part of the course places the in-depth analysis of texts in the broader context of research methodology. It aims to help students in building critical thinking around qualitative text analysis by familiarising them with a variety of mixed-methods research designs that can be used when studying texts and discourses.

Lectures introduce the main conceptual and practical issues. Seminars provide practical experience of implementing the methodology. Students will be working directly with qualitative data and performing their own analyses on a diverse range of materials, such as political speeches and news articles, as well as cultural texts such as movie scripts and songs.

Teaching: 15 hours of lectures and 15 hours of seminars in the LT. Week 6 is a Reading Week during which students work independently on their Summative Assignment.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading: Dunn K. and Neumann I. B. (2016). *Undertaking Discourse Analysis for social research*, Ann Arbor: University of Michigan Press. Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum. Scheier, M. (2012). *Qualitative Content Analysis*. Sage, Thousand Oaks, CA. Seale, C., Gobo, G., Gubrium, J.F. and Silverman, D. (2004). *Qualitative research practice*. London: Sage, chapters 11-12.

Assessment: Essay (90%, 4000 words) and presentation (10%) in the ST.

A group presentation (10%) in which students present an original pilot analysis using the method of text analysis of their choice. This

should be on a topic of the students' choosing but different from the research proposal.

A research proposal (90%, 4000 words) in the ST. It is recommended that students base the research proposal on a dimension/sub-question of their dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY530 Advanced Qualitative Research Workshops

This information is for the 2019/20 session.

Availability: This course is available to MPhil/PhD students from across the LSE who are undertaking projects using qualitative methods.

Pre-requisites: Some prior training in qualitative methods (e.g. MY421 or equivalent) is advisable. Students who have no prior training in qualitative methods should consider taking MY521M or MY521L.

Course content: MY530 is a series of workshop modules that provide hands-on, in-depth and advanced training for specific methodologies of qualitative data collection, analytic techniques and research design issues. Research students can sign up to as many workshops as they wish. The programme includes topics such as in-depth interviews, focus groups, ethnography and participant observation, narrative interviewing and analysis, visual methods, classical content analysis, thematic analysis, etc. Workshops typically consist of two sessions lasting two hours each. The second of these sessions tends to be more practical. These interdisciplinary sessions provide a space for students to develop advanced methodological skills and exchange ideas with peers.

Teaching: Sessions to be held in term time throughout the year. Participants are required to sign up via LSE's Training and Development System.

Indicative reading: Each session will provide its own recommended reading list, available on Moodle.

Assessment: This course is non-examinable.

MY551 Half Unit Introduction to Quantitative Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Jonathan Jackson COL.8.05 (LT) and Dr Indraneel Sircar COL.7.04 (MT)

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Information Systems and Innovation). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit. The course is available to all research students.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out univariate and bivariate data analysis and have an appreciation of multiple linear regression. The computer classes give hands-on training in the application of statistical techniques to real social science research problems. No prior knowledge of any statistical software is necessary.

Teaching: 20 hours of lectures and 9 hours of computer workshops in the MT. 20 hours of lectures and 9 hours of computer workshops in the LT. 2 hours of lectures in the ST.

There will be no lectures or computer classes in Week 6 of the term.

This course is given twice per session, starting in the first week of each of the MT and LT.

Students must either register for MY551M which is taught in Michaelmas Term, or MY551L which is taught in Lent Term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY551 and MY552).

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Two hour unseen examination in ST. Students are permitted to bring a limited quantity of written notes into the examination.

MY552 Half Unit Applied Regression Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Indraneel Sircar COL.7.04 (LT) and Dr Daniele Fanelli

Daniele Fanelli (MT)

Indraneel Sircar (LT)

Availability: This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Data, Networks and Society, MPhil/PhD in European Studies, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Media and Communications, MPhil/PhD in Psychological and Behavioural Science, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Research students where programme regulations allow.

Pre-requisites: Students are required to have completed MY451/MY551 Introduction to Quantitative Analysis or an equivalent level statistics course.

Course content: The course is designed for students with a good working knowledge of elementary descriptive statistics; sampling distributions; one and two sample tests for means and proportions; correlation and the linear regression model with one or more predictor variables. The course is concerned with deepening the understanding of the generalized linear model and its application to social science data. The main topics covered are linear regression modelling and binary, multinomial and ordinal logistic regression.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 20 hours of lectures and 10 hours of computer workshops in the LT.

This course is given twice per session, starting in the first week of each of the MT and LT. Students must either register for MY552M which is taught in Michaelmas Term, or MY552L which is taught in Lent Term.

There will be no lectures or computer classes in Week 6 of term.

Formative coursework: Exercises from the weekly computer classes can be submitted for feedback.

Indicative reading: A Agresti & B Finlay, *Statistical Methods for the Social Sciences*. A course pack will be available for download online. Additional reading will be recommended.

Assessment: Exam (100%, duration: 2 hours) in the summer exam period.

Two hour unseen examination in ST. Students are permitted to bring a limited quantity of written notes into the examination.

MY555 Half Unit Multivariate Analysis and Measurement

This information is for the 2019/20 session.

Teacher responsible: Dr Jouni Kuha COL.8.04

Availability: This course is available on the MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in Psychological and Behavioural Science, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit. The course is available to all research students.

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452/MY552 (Applied Regression Analysis)

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models for continuous observed variables, and their application to questions of measurement in the social sciences. At least the following topics will be covered: principal components analysis, exploratory factor analysis, confirmatory factor analysis and structural equation models. In addition, a selection from the following topics will be covered: cluster analysis, correspondence analysis, multidimensional scaling, latent class models, latent trait models.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: D J Bartholomew, F Steele, I Moustaki ; J I Galbraith (2008) *Analysis of Multivariate Social Science Data* (Second Edition).

Assessment: Research project (100%).

Research paper 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, answering a set of questions by applying multivariate analyses to some data (100%).

MY556 Half Unit Survey Methodology

This information is for the 2019/20 session.

Teacher responsible: Mr Patrick Sturgis COL.8.10

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Psychological and Behavioural Science, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all Research students.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY452/MY552 or equivalent. MY556 can also be taken in parallel with MY452L/MY552L. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent.

Course content: This course provides an introduction to the methodology of the design and analysis of social surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys.

Topics covered include basic ideas of target populations, survey estimation and inference, sampling error and nonsampling error; sample design and sampling theory; methods of data collection; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; nonresponse error and imputation for item nonresponse; survey weights; analysis of data from complex surveys; accessing, preparing and working with secondary data from existing social surveys. The course includes computer classes, using the statistical computer

package Stata; no previous knowledge of Stata is required.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. There will be no lectures or seminars in Week 6 of term.

Formative coursework: Exercises from the seminars can be submitted for marking

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). *Survey Methodology* (2nd ed.). Wiley.

Assessment: Research project (100%).

Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, reporting the data analysis of a given research question and data set (100%).

MY557 Half Unit Causal Inference for Observational and Experimental Studies

This information is for the 2019/20 session.

Teacher responsible: Dr David Hendry

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Marketing) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Available to all research students.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452/MY552 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent

Course content: This course provides an introduction to statistical methods used for causal inference in the social sciences. Using the potential outcomes framework of causality, topics covered include research designs such as randomized experiments and observational studies. We explore the impact of noncompliance in randomized experiments, as well as nonignorable treatment assignment in observational studies. To analyze these research designs, the methods covered include matching, instrumental variables, difference-in-difference, and regression discontinuity. Examples are drawn from different social sciences. The course includes computer classes, where standard statistical computer packages (Stata or R) are used for computation.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

There will be no lectures or computer classes in Week 6 of term.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: Rosenbaum, PR. (2010). *Design of Observational Studies*. Springer; Angrist, J. D. and Pischke, J.-S. (2009). *Mostly Harmless Econometrics*. Princeton University Press.

Assessment: Coursework (100%, 4000 words).

MY559 Half Unit Special Topics in Quantitative Analysis: Quantitative Text Analysis

This information is for the 2019/20 session.

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

Pre-requisites: The course will assume knowledge of linear and logistic regression models, to the level covered in MY452.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can all be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Formative coursework: Exercises from the computer classes can be submitted for marking.

Indicative reading: quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>. Grimmer, Justin and Brandon M. Stewart. 2013. "Text as Data: The Promise and Pitfalls of Automatic Content Analysis Methods for Political Texts." *Political Analysis* 21(3):267–297. Loughran, Tim and Bill McDonald. 2011. "When Is a Liability Not a Liability? Textual Analysis, Dictionaries, and 10-Ks." *The Journal of Finance* 66 (1, February): 35–65. Evans, Michael, Wayne McIntosh, Jimmy Lin and Cynthia Cates. 2007. "Recounting the Courts? Applying Automated Content Analysis to Enhance Empirical Legal Research." *Journal of Empirical Legal Studies* 4 (4, December):1007–1039.

Assessment: Coursework (100%, 4000 words).

MY560 Workshop in Advanced Quantitative Analysis

This information is for the 2019/20 session.

Availability: This course is available to MPhil/PhD students from across the LSE who are undertaking projects using quantitative methods.

Course content: MY560 is a series of workshop modules on advanced topics in quantitative research methodology. These workshops assume a background in quantitative methods at least covering basic statistics, linear and logistic regression. Most of the workshops are for one day, and consist of a 2 hour lecture plus 2 hour computer class in the afternoon and early evening of the same day. While many of the workshops are part of a series on related topics, each workshop is self-contained, and can be attended without attending any other workshops.

Teaching: Sessions to be held in term time throughout the year; participants are required to sign up via LSE's Training and Development System.

Assessment: This course is non-examinable.

MY561 Half Unit Social Network Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Power COL 7.09 and Dr Milena Tsvetkova COL 8.03

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to research students only.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data and structure and analyse these data using R.

Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.

This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow.

Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis, and visualization using R.

Teaching: 15 hours of lectures and 15 hours of computer workshops in the LT.

Formative coursework: Students will be expected to produce 5 problem sets in the LT.

Type: Structured formative problem sets in five of the weeks will build on what was covered in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading: Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press. Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition. Easley, D., & Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning About a Highly Connected World*. New York: Cambridge University Press.

Assessment: Take-home assessment (50%) and problem sets (50%) in the LT.

Student problem sets will be marked in five of the weeks. These will constitute 50% of the final overall mark.

MY565 Half Unit Intermediate Quantitative Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Jonathan Jackson COL8.05

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students where regulations permit.

Pre-requisites: Participants should have studied introductory

statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included. The computer classes give hands-on training in the application of these statistical techniques. Class exercises and homework are carried out using the Stata package.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6. On-line quizzes will be provided on Moodle to aid revision during the reading week.

Formative coursework: Students will be expected to produce 9 exercises in the MT.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

Students are permitted to bring a limited quantity of written notes into the examination.

MY570 Half Unit Computer Programming

This information is for the 2019/20 session.

Teacher responsible: Dr Milena Tsvetkova COL8.03

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to all research students where regulations permit.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python and R. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.

Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python and R, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program

development; data types; control structures; functions and parameter passing; recursion; data structures; searching and sorting; and an introduction to the principles of object oriented programming. The primary programming languages used in the course will be Python and R.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading:

- Guttag, John V. *Introduction to Computation and Programming Using Python: With Application to Understanding Data*. MIT Press, 2016.
- Lutz, Mark *Learning Python*. 5th Edition. O'Reilly, 2013. Intermediate and Advanced documentation at <https://www.python.org/doc/>.
- Miller, Bradley N. and David L. Ranum. *Problem Solving with Algorithms and Data Structures Using Python*. Available online at <http://interactivepython.org/runestone/static/pythonds/index.html>.
- Python, 160 *Intermediate and advanced documentation*. Available online at <https://www.python.org/3doc/>.
- Venables, William N., David M. Smith, and the R Core Team. *An Introduction to R*. Available online at <https://cran.r-project.org/doc/manuals/r-release/R-intro.pdf>.
- Zuur, Alain, Elena N. Ieno, and Erik Meesters. *A Beginner's Guide to R*. Springer Science & Business Media, 2009.

Assessment: Project (50%) and in-class assessment (50%) in the MT. Student in-class problem sets will be marked each week, and will provide 50% of the mark.

For the individual project, students will be required to develop software that addresses a sufficiently complex computational social science task. Examples of possible projects include a software package that collects and analyses online data, an experimental game, or an agent-based model. Marking of this assessment will be at a level appropriate for PhD students.

MY572 Half Unit Data for Data Scientists

This information is for the 2019/20 session.

Teacher responsible: Prof Kenneth Benoit COL.8.11

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to all research students where regulations permit.

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most time-consuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments.

Teaching: 20 hours of lectures and 15 hours of computer workshops in the MT.

In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an indepth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Formative coursework: Students will be expected to produce 10 problem sets in the MT.

Type: Weekly, structured problem sets with a beginning component to be started in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

- Jacobson, Daniel *APIs: A Strategy Guide* O'Reilly: 2012.
- London, Kyle *Developing Large Web Applications: Producing Code That Can Grow and Thrive* O'Reilly, 2010.

Assessment: Take-home assessment (50%) and in-class assessment (50%) in the MT. Student problem sets will be marked each week, and will provide 50% of the mark. Marking of these assessments will be at a level appropriate for PhD students.

MY574 Half Unit Applied Machine Learning for Social Science

This information is for the 2019/20 session.

Teacher responsible: Dr Blake Miller COL.7.14

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to research students only.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. A particular emphasis will be placed on the ethical issues surrounding machine learning applications, including privacy, algorithmic bias, and informed consent. Lectures will use case studies to introduce specific machine learning algorithms including LASSO, ridge regression, logistic regression, k-nearest neighbour classification, decision trees, support vector machines, k-means clustering, hierarchical clustering, principal component analysis, and linear discriminant analysis. Students will learn to apply these algorithms to data and validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.

The workshops will last two hours and take place every two weeks.

Formative coursework: Students will be expected to produce 1 problem set in the LT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop session and complete it outside of class.

- Wang, Y., & Kosinski, M. (2018). Deep neural networks are more accurate than humans at detecting sexual orientation from facial

images. *Journal of Personality and Social Psychology*, 114(2), 246-257.

Assessment: In-class assessment (40%) in the MT.

Take-home assessment (60%) in the LT.

Four structured problem sets will be marked and will provide 40% of the mark. For the take home exam, students will be expected to submit a 3000-word paper in which they identify and contextualize a relevant social data science problem related to their dissertation research, find suitable data to address it, plan and conduct extensive machine learning analysis on the data, and present the findings.

Marking of these assessments will be at a level appropriate for PhD students.

MY591 Computing Packages for Applied Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Power COL7.09

Availability: This course is available to MPhil/PhD students from across the LSE who are undertaking, or considering undertaking, projects using qualitative and quantitative computer packages in their research.

Course content: MY591 is a series of workshop modules that provide research students with an appreciation of various computer packages through introduction and hands-on training in the use of these tools. Each workshop covers training in particular software used in analytical research, including statistical analysis packages, qualitative analysis software, and tools for text analysis, such as NVivo, QDA Miner, SPSS, Stata, and R. Research students can sign up to as many workshops as they wish. Workshops typically consist of three-hour sessions.

Teaching: Sessions to be held in term time throughout the year; participants are required to sign up via LSE's Training and Development System.

Formative coursework: NA.

Indicative reading: Each session will provide its own recommended reading list, available on Moodle.

Assessment: This course is non-examinable.

MY599 Department of Methodology Seminar

This information is for the 2019/20 session.

Teacher responsible: Dr Eleanor Power and Dr Chana Teeger

Availability: This course is compulsory on the MPhil/PhD in Social Research Methods. This course is available on the MPhil/PhD in International Relations. This course is available as an outside option to students on other programmes where regulations permit. Open to all.

Course content: Papers on topics of methodological interest will be presented by staff and visitors.

Teaching: Meetings typically take place during term time and will be held in COL8.13 unless otherwise stated. Please regularly consult the Department of Methodology webpages for full details about seminar dates, times, topics and speakers.

Assessment: This course is non-examinable.

PB500 Current Research in Social Psychology

This information is for the 2019/20 session.

Teacher responsible: Prof Martin Bauer

Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option.

This course is available to academic staff and research students only.

Course content: Weekly seminars where PhD students present their work, and learn research skills (e.g. writing, grant preparation). The course runs through Michaelmas Term, Lent Term and Summer Term.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 7 hours of seminars in the ST.

Assessment: Non-examinable.

PH500

Research Methods in Philosophy

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Topics in contemporary philosophy.

Teaching: Seminars PH500 15 x two-hour (MT, LT, ST). Different members of the department will lead the seminar in each of the three terms.

A more detailed syllabus will be posted at the beginning of each term.

Assessment: This course is non-examinable.

PH501

Philosophical Problems Seminar

This information is for the 2019/20 session.

Teacher responsible: Dr Anna Mahtani and Prof Christian List

Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: In this course, we will read and carefully discuss together a range of classic papers in contemporary analytic philosophy that might not otherwise be covered in LSE Philosophy Department courses. Topics are selected from metaphysics, the philosophy of mind and action, epistemology, and the philosophy of language. This list is illustrative.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

Indicative reading: Specific readings will be announced in a detailed syllabus at the start of the term.

Assessment: Two essays of 5000 words each over the course of the two terms. Either or both of these essays may be replaced by two shorter essays each of 2500 words.

PH502

Reasoning and Logic

This information is for the 2019/20 session.

Teacher responsible: Dr Laurenz Hudetz

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

The course is, in general, only aimed at those students who have never taken a course in formal logic before. For such students the course is compulsory.

Course content: Arguments and inferences play a fundamental role both in intellectual disciplines and in everyday life. For example, a scientist will test a particular theory by reasoning that if that theory is true then some other claim, one that can be checked experimentally, must be true as well. Or a politician will give an argument for a certain migration policy. More mundanely, we reason and draw inferences all the time and our actions are guided by the conclusions we draw. We are so used to this that we are often not even aware of it.

Logic is the study of arguments and inferences – it therefore has an enormously broad scope. Its main task is to give an explicit characterisation of those arguments and inferences that are valid (and hence differentiate them from those that are invalid). Logic tells you exactly when some conclusion follows from some premises and when it does not. It turns out that, in everyday life, many arguments are far from the ideal of logical validity. However, philosophers and social scientists should be able to devise arguments that satisfy this ideal.

In view of that, several questions arise:

- 1 What exactly are arguments and inferences and which quality criteria should they satisfy?
- 2 What exactly does it mean that the truth of a statement is guaranteed by the truth of other statements?
- 3 What exactly does it mean that a statement is true (given an interpretation of the language in which it is formulated)?
- 4 Is it possible to find a few manageable inference rules such that, given any valid argument, its conclusion can be derived from its premises using only these rules?
- 5 Is there a general method for checking whether a given argument or inference is valid?

This course provides answers to these and related questions. It begins with a simple system called sentential or propositional logic, which despite its simplicity captures a significant range of important arguments. The course then focuses on predicate logic, which is much more powerful and provides the logical basis for analysing a great variety of arguments and theories.

Teaching: 15 hours of lectures in the MT. 15 hours of lectures in the LT.

Appropriate back-up teaching will be arranged with individual students.

This course has a reading week in Week 6 of both MT and LT.

Formative coursework: Regular exercises will be set on the basis of the material covered in lectures.

Indicative reading: There will be comprehensive lecture slides and materials covering the entire course content. Textbooks whose treatment is close to that adopted in the lectures are:

Halbach, V. (2010): *The Logic Manual*. Oxford University Press.
Magnus, P.D. and Button, T. (2017): *forallx*: Cambridge. (available online)

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the summer exam period.

PH551

Research Seminar in the Philosophy of Natural Sciences

This information is for the 2019/20 session.

Teacher responsible: Prof Roman Frigg

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: This is a special topics course on the philosophy of the natural sciences, with a particular focus on physics. The course is integrated with the meetings of the Sigma Club. It meet in irregular intervals; there are approximately 5-7 meetings per term. Details will be announced at the beginning of the term.

Teaching: 15 hours of seminars in the MT. 15 hours of seminars in the LT.

As this is a reading group, each participant is invited to take the lead on at least one meeting, choosing a topic and readings in consultation with the instructor, and leading the discussion during at least one of the Monday seminars.

Formative coursework: Students will be expected to write one essay per term and to give a seminar presentation.

PH555**Research Seminar in the Philosophy of Economics and Social Sciences**

This information is for the 2019/20 session.

Teacher responsible: Prof Richard Bradley LAK2.03

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: Philosophical issues in economics and the social sciences.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT. 10 hours of seminars in the ST.

Formative coursework: Students will be expected to write one essay per term and to give seminar presentations.

S0500**Aims and Methods Research Class for MPhil Students**

This information is for the 2019/20 session.

Teacher responsible: Dr Carrie Friese STC213

Availability: This course is compulsory on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is not available as an outside option.

Course content: The research seminar aims to provide students with a conceptual and practical framework within which to think through planning their research. This includes devising research questions, how to do a literature review, selecting appropriate methods for research, linking theory and practices, ethical issues and writing. The course will comprise workshops and student presentations. By the end of the course students should be able to formulate clear aims and methods for their own research. All first year MPhil students must attend.

Teaching: 20 hours of seminars in the MT. 20 hours of seminars in the LT.

Reading Weeks: Students on this course will have a reading week in MT Week 6 and LT Week 6, in line with departmental policy.

Formative coursework: A 5,000 word formative paper is due by the first Friday in May of Year 1, to be submitted to the Course Convenor and Supervisors.

Assessment: Paper (100%) in the ST.

10,000 word paper on the 'Aims and Methods' of the thesis, and a viva voce examination. For full-time students, three copies of this typed and paginated essay must be submitted to the Sociology Administration Office, Room S116, by the Friday of Week 6 in the Michaelmas Term of the 2nd Year. The viva will be held approximately one month after the submission date. Satisfactory completion of the 'Aims and Methods' paper and the viva are necessary in order to Upgrade from MPhil to PhD Student. Part-time students may elect to be evaluated in Week 6 of the MT in Year 2 or 3.

S0501**Data Analysis Workshop**

This information is for the 2019/20 session.

Teacher responsible: Dr Carrie Friese STC.S213 and Dr Fabien Accominotti STC.S206

Availability: This course is compulsory on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is not available as an outside option.

Only available to sociology research students in the second and subsequent years of their MPhil/PhD.

Course content: Seminars will focus on doing data analysis using materials made and collected as part of PhD research. Each student will present data to the group at least one time. Students may submit the following types of data: (part of a

qualitative interview to code OR a collection of interview sections coded as 'X' to be analysed according to a specified method (e.g., narrative analysis, grounded theory); fieldnotes for coding or for reflections on what is needed for 'thick description'; an image or text to code or analyse according to a specified method (e.g., discourse analysis); a map of the research situation (e.g., situational analysis, network analysis); a regression analysis that requires interpretation, etc. All students will be asked to read the data before the workshop. The workshop will start with the student briefly presenting their data and contextualizing it within their research question, data set and methodological approach. As a group, that piece of data will be closely analysed using the method specified by the student.

Teaching: 10 hours of seminars in the MT. 10 hours of seminars in the LT.

Fortnightly seminars in the MT and LT for all sociology research students in their second and subsequent years.

Assessment: There is no formal assessment, but participants are asked to present research materials, read other students' research materials, and contribute to discussion.

S0511**Research Seminar in Political Sociology**

This information is for the 2019/20 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

MPhil/PhD students whose research is in the field of political sociology. Students from all departments are welcome.

Course content: Political sociologists seek to understand fundamental political phenomenon by studying them in their social context. This seminar seeks to provide a small, friendly forum in which research students can discuss important recent publications and debates in this field. It often spends a number of weeks reading recent prize-winning books and articles in the field, and sometimes examines a topical theme for part of a term. There are also occasional guest lectures. In recent years, for example, there were lectures by Michael Mann (UCLA) on the rise and fall of neo-liberalism. Theda Skocpol (Harvard) on the future of American politics, and Andreas Wimmer (Princeton) on ethnic conflict and state formation. The seminar also provides an opportunity to develop individual research projects. In each seminar, a twenty or thirty minute presentation is followed by discussion.

Teaching: 8 hours of seminars in the MT. 10 hours of seminars in the LT. 2 hours of seminars in the ST.

Fortnightly in MT and LT.

Indicative reading: A short list of some important recent books and articles that could be discussed in the seminar will be suggested at the beginning of the year, and the seminar is always open to suggestions from participants. Readings continually change, but, for the purposes of illustration, recent seminars have discussed global anti-capitalism, suicide missions and the new imperialism, Christianity and American democracy, the welfare state, the politics of free markets, labour protest in China, street politics in Egypt, boycotts, and the crisis of capitalism.

Assessment: There is no formal assessment but participants are asked to present papers, contribute to discussion and read the work of selected scholars in the course of the session.

S0521**Research Seminar on Cities and Space**

This information is for the 2019/20 session.

Teacher responsible: Dr Suzanne Hall STC S212 and Dr David

Madden STC S209

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

For MPhil/PhD students doing research on urban and spatial issues in the Cities Programme/Department of Sociology. If space is available, other graduate students may apply.

Course content: The PhD seminar in cities and space is a graduate seminar is based on discussion of key readings in the fields of urban social theory and spatial analysis. It also provides a forum for discussion of research issues relating to the study of cities and space. In the Michaelmas term we introduce a selection of writings that engage with perspectives in urban studies and critical theory, linking these to corresponding discussions in social theory. In the Lent term we explore methodological orientations to working on, in and for the urban, ranging from approaches to methods and fieldwork to policy interventions.

Teaching: 7 hours and 30 minutes of seminars in the MT. 7 hours and 30 minutes of seminars in the LT.

One 1.5 hour seminar every two weeks in the MT and LT.

Assessment: This course is not assessed

ST501 Half Unit Multilevel Modelling

This information is for the 2019/20 session.

Teacher responsible: Prof Irini Moustaki COL 6.05

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g., students nested within schools, individuals nested within households or geographical areas) and longitudinal data (eg repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g., Stata).

Teaching: 20 hours of lectures and 10 hours of seminars in the LT.

Formative coursework: Students will be expected to produce 5 exercises in the LT.

Formative coursework is assigned fortnightly and returned to students with comments/feedback via Moodle before the lab sessions

Indicative reading: T. Snijders & R Bosker *Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling*, Sage (2011, 2nd edition). S Rabe-Hesketh & A Skrondal, *Multilevel and Longitudinal Modeling using Stata*, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012). Also recommended are: A Skrondal & S Rabe-Hesketh, *Generalized Latent Variable Modeling: Multilevel, Longitudinal and Structural Equation Models*, Chapman & Hall (2004); H Goldstein, *Multilevel Statistical Models*, Arnold (2003); S W Raudenbush & A S Bryk, *Hierarchical Linear Models: Applications and Data Analysis Methods*, Sage (2002); G Verbeke & G Molenberghs, *Linear Mixed Models for Longitudinal Data*, Springer (2000); E Demidenko, *Mixed Models*, Wiley (2004).

Assessment: Coursework (100%, 4000 words).

Assessment is by 100% coursework given to students in week 8 of the course.

ST505 Half Unit Statistical Modeling and Data Analysis

This information is for the 2019/20 session.

Teacher responsible: Dr Yunxiao Chen

Availability: This course is available on the MPhil/PhD in Statistics. This course is not available as an outside option.

In the first year, this course will be open only to MPhil/PhD in Statistics. In the future, it may be made available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory to the level of ST102 and ST206, and linear regression to the level of ST211. Some experience with R or other statistical software or programming languages (e.g., Python, Matlab) will be assumed.

Course content: This course provides an overview of modern applied statistics. It will cover an introduction to quantitative research design, exploratory data analysis and data visualisation, generalised linear models, and generalised latent variable models (including mixed effects or multilevel models, longitudinal data analysis, and structural equation models). The course will have an applied emphasis with students gaining hands-on experience in data analysis using R and practice in the interpretation of results.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the MT.

Tentative Schedule

1. Research design and causal inference (2 weeks)
2. Exploratory data analysis and data visualization (1 week)
3. Linear models and generalized linear models for binary data (1 week)
4. Generalized linear models (categorical, and count data, survival analysis; 3 weeks)
5. Generalized latent variable models (covering mixed effect models, longitudinal data, structural equation models; 3 weeks)

Formative coursework: Students will be expected to produce 1 project in the MT.

Students will be given a real dataset and asked to analyse the data to answer scientific questions and then write a report. Students' reports will be marked and feedback will be given.

Indicative reading: Maindonald, J., & Braun, J. (2006). *Data analysis and graphics using R: an example-based approach*. Cambridge University Press. Gelman, A., & Hill, J. (2006). *Data analysis using regression and multilevel/hierarchical models*. Cambridge University Press. Skrondal, A. and Rabe-Hesketh (2004) *Generalized latent variable modeling : multilevel, longitudinal, and structural equation models*. Chapman & Hall/CRC. Imbens, G. W. and Rubin, D. B. (2015). *Causal Inference for Statistics, Social, and Biomedical Sciences : An Introduction*. Cambridge University Press

Assessment: Project (30%, 1000 words) in the MT.

Take home exam (70%) in the LT.

The summative assessment will be based on one piece of coursework (30%) and one take-home exam (70%). For the coursework, students will be given a dataset in week 6 and asked to analyse the data to answer several scientific questions and submit a report in week 10. The take-home exam will be in January. The take-home exam should be no fewer than 3000 words and students will be asked to submit this within three days.

ST542 Half Unit Longitudinal Data Analysis

This information is for the 2019/20 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to methods for the

analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models and dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using the Stata software.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the LT.

Week 6 will be a reading week.

Formative coursework: Students will be expected to produce 4 exercises in the LT.

Formative assessment is based on data analysis problems that require the use of the statistical software to apply the statistical techniques taught in the lectures and computer classes.

Coursework is given out to students every two weeks and returned with feedback and comments.

Indicative reading: Hedeker D, Gibbons RD. Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc. (2006). Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press. Singer JD, Willett JB. Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press (2003). (Part I only).

Assessment: Coursework (100%, 4000 words) in the ST. Assessment is by 100% coursework which is given to students in week 8

ST552 Half Unit

Probability and Mathematical Statistics I

This information is for the 2019/20 session.

Teacher responsible: Dr Beatrice Acciaio and Dr Luciano Campi

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics, and is intended for PhD students in the Statistics department. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.
9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.
10. Product measures; conditional expectation.

Teaching: 20 hours of lectures and 10 hours of seminars in the MT.

Formative coursework: Students will be expected to produce 9 problem sets in the MT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

1. Williams, D. (1991). Probability with Martingales. Cambridge University Press.

2. Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.

3. Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

4. Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the January exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST553 Half Unit

Probability and Mathematical Statistics II

This information is for the 2019/20 session.

Teacher responsible: Prof Konstantinos Kardaras

Availability: This course is available on the MPhil/PhD in Statistics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

- 1 Conditional expectation revisited; linear regression; martingales and first examples.
- 2 Concentration inequalities; dimension reduction; log-Sobolev inequalities.
- 3 Martingale transforms; optional sampling theorem; convergence theorems.
- 4 160Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
- 5 Markov chains; recurrence; reversibility; foundations of MCMC.
- 6 Ergodic theory.
- 7 Brownian motion; quadratic variation; stochastic integration.
- 8 Stochastic differential equations; diffusions; filtering.
- 9 Bayesian updating; Ergodic diffusions; Langevin samplers.
- 10 Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: 20 hours of lectures and 10 hours of seminars in the LT. Week 6 is Reading Week.

Formative coursework: Students will be expected to produce 9 problem sets in the LT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading:

1. Williams, D. (1991). Probability with Martingales. Cambridge University Press.
2. Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.
3. Karatzas, I, Shreve S. (1991). Brownian motion and Stochastic Calculus. Springer GTM.
4. Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.
5. Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the summer exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

Language Centre Courses

Language Centre Courses

Modern Foreign Language Certificate Courses

LN701

Arabic: Level One (Standard)

This information is for the 2019/20 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- No previous knowledge of Arabic.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To learn the Arabic writing system.
- To introduce students to a major dialect of Arabic.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1- of Common European Framework.

Communicative content:

- Greetings
- Asking for and giving personal information
- Talking about your immediate family
- Talking about studies and jobs
- Say where you live
- Talking about your city and country
- Talking about present actions

Structural content:

- Alphabet
- Joining letters
- Pronunciation
- Feminine and masculine words
- Roots
- Present tense
- The definitive article
- Independent pronouns and pronoun suffixes
- Nouns-adjective phrases
- Numbers
- Plural
- Dual
- Word order
- Demonstrative: this (masc./fem.)
- Possessive pronouns
- Interrogatives (where, when, what, in which, etc.)
- Prepositions: in, between, etc
- Nisba (nationality)
- Idafa (genitive construction)
- Introduction to Past Tense
- Use of "also, where, in the same, etc."

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

- This is a 40 hour-course.
- Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Students will be provided with a study pack.

Other useful materials

- Alif Baa: Introduction to Arabic, Letters and Sounds by Brustad et al. Georgetown Univ. Press, Second or Third Editions

- Al-Kitaab fii Ta'llum al-'Arabiyya Al-Kitaab Fii Ta Allum Al-Arabiyya: Pt. 1: A Textbook for Beginning Arabic by Brustad et al, Georgetown Univ.Press, 2011
- Arabiyyat al-Naas (Part 1). An introductory course in Arabic by Munther Younes, Routledge, 2014
- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005
- Arabic as one language, Mahmoud Al-Batal (ed.), Georgetown University Press, 2018

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN702

Arabic: Level One (Fast Track for Learners Familiar with Arabic Script)

This information is for the 2019/20 session.

Teacher responsible: Mr Luay Hasan PEL.6.01

Pre-requisites:

- Students must have **familiarity with Arabic script**. Admission into the course upon tutor's approval during the information sessions.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To further develop students' ability to use the Arabic writing system.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1 of the Common European Framework.

Communicative content:

- Greetings
- Asking for and giving personal information, directions and opinions
- Talking about family
- Talking about your country
- Describing people, places and objects
- Talking about past events and experiences
- Using the dictionary (basic)
- Asking and giving the time
- Talking about present events
- Talking about future events (basic)
- Ordering in a restaurant
- Asking for and giving directions

Structural content:

- Roots
- The definitive article
- Independent pronouns and pronoun suffixes.
- Nouns-adjective phrases
- Numbers
- Feminine and masculine words
- Adjective-noun agreements
- Word order
- Verb-subject agreement
- Demonstratives (singular)

942 Language Centre Courses

- Possessive pronouns
- Interrogatives (where, when, what, how many, etc)
- Prepositions: in, between
- Nisba (nationality)
- Idafa (genitive construction)
- Past tense
- Linking words (Firstly, after, lately, etc.)
- Present tense
- Future tense (basic)
- Plural (sound, masc./fem.)
- Negative phrases (past, present, future)
- Prepositions with pronoun suffixes
- Persons of the verb (sing./pl.)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

- This is a 40 hour-course.
- Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Textbook: Test your Arabic. Part. I, Luay Hasan, Lightning Source, 2015 (there are some samples in the LSE library)
- Students will be also provided with a study pack.

Other materials useful for this level

- Mastering Arabic 1, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2007
- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005
- Al-Kitaab fii Ta'llum al-'Arabiyya Al-Kitaab Fii Ta Allum Al-Arabiyya: Pt. 1: A Textbook for Beginning Arabic by Brustad et al, Georgetown Univ.Press, 2011
- Speed up your Arabic. Strategies to avoid common errors, Sebastian Maisel, Routledge, 2015

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN829

Arabic: Level One (Integrated Approach)

This information is for the 2019/20 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub

Availability: This is a non-credit bearing course available to all LSE students, staff, alumni and external clients.

Pre-requisites:

- No previous knowledge of Arabic.
- This course is suitable for students wanting to learn Levantine Colloquial Arabic and Modern Standard Arabic. Admission into the course upon tutor's approval during the information sessions.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the basis of Levantine Colloquial Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To learn the Arabic writing system.
- To introduce students to Modern Standard Arabic.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1- of Common European Framework.

Communicative content:

- Greetings
- Personal information
- Your immediate family
- Your studies and jobs
- Where you live

- Your city and country
- Present and past actions/events
- Describing people, places and objects
- Daily habits/routine
- Making comparisons
- Talking about future plans (basic)
- Expressing likes/dislikes

Structural content:

- Pronunciation
- Feminine and masculine words
- Present tense
- The definitive article
- Independent pronouns and pronoun suffixes
- Nouns-adjective phrases
- Numbers
- Plural
- Word order
- Demonstrative
- Possessive pronouns
- Interrogatives (where, when, what, in which, etc.)
- Prepositions: in, between, etc
- Nisba (nationality)
- Idafa (genitive construction)
- Past Tense
- Use of "also, where, in the same, etc."

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

- This is a 40 hour-course.
- Please refer to the LSE timetable for course teaching arrangements.

Formative coursework:

Weekly exercises featuring interactive work and oral practise; grammar exercises; reading and listening comprehension.

Indicative reading:

Study Pack to be provided.

Other useful materials

Assessment: Oral examination (30%) in the LT. Continuous assessment (70%) in the MT and LT.

LN703

Arabic: Level Two (Standard)

This information is for the 2019/20 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- Students should have previously learnt ... see description of "Communicative content" and "Structural Content" of Level 1 Standard (LN701) and/or Level 1 Fast Track (LN702). Admission into the course upon completion of level test and tutor's approval.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the use of Arabic.

- To offer an insight into one major dialect of the Arabic language.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2- of Common European Framework.

Communicative content:

- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about daily habits/routine
- Making comparisons
- Using both past and present
- Talking about future plans (basic)
- Expressing preferences
- Expressing likes/dislikes
- Writing a biography

Structural content:

- Revision of present tense
- Revision of Nisba (nationality)
- Revision of Idafa (genitive construction)
- Revision of possessive
- Negative phrases
- Prepositions with pronoun suffixes
- Past tense
- Comparative
- Adverbs of frequency
- Introduction to Masdar (verbal noun)
- Time expressions
- Verb Kana (To be)
- Dual and Plural (sound and broken)
- Future tense
- Numbers
- Number-noun agreement (1-10)
- Adjective-noun agreement (human/non human)
- Demonstratives
- Quantities
- Introduction to cases and declination (nominative, accusative, genitive)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study Pack

Other useful materials for

- Mastering Arabic 1 and 2, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan.
- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN704

Arabic: Level Two (Fast Track)

This information is for the 2019/20 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- Students should have previously learnt ... see description of "Communicative content" and "Structural Content" of Level 1 Fast Track (LN702) and/or Level 2 Standard (LN703). Admission into the course upon completion of level test and tutor's approval.

- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the use of Arabic.
- To offer an insight into one major dialect of the Arabic language.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2 of Common European Framework.

Communicative content:

- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about habits, hobbies and daily routine
- Making comparison between people, things or places
- Using both past and present
- Talking about future plans (further details)
- Giving opinions
- Expressing agreement
- Expressing wishes and plans for the future
- Writing a biography

Structural content:

- Revision of past tense
- Revision of present tense
- Negative phrases
- Prepositions with pronoun suffixes
- Forms of the Arabic verb (1-4)
- Comparatives
- Adverbs of frequency
- Masdar (verbal noun)
- Time expressions
- Verb Kana (To be) and introduction to hollow verbs
- Plural (broken plural 1-5)
- Future tense
- Numbers
- Adjective-noun agreement (human/non-human)
- Use of the accusative
- Declination (nominative, genitive, accusative).

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study Pack will be provided

Other materials useful

- Mastering Arabic 2, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan.
- Al-Kitaab fii Ta'llum al-'Arabiyya Al-Kitaab Fii Ta Allum Al-Arabiyya: Pt. 1: A Textbook for Beginning Arabic by Brustad et al, Georgetown Univ.Press, 2011
- Arabic as one language, Mahmoud Al-Batal (ed.), Georgetown University Press, 2018 Dictionary
- The Oxford English-Arabic Dictionary of Current Usage (edited by N S Doniach, Oxford Univ. Press,1983)

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN705

Arabic: Level Three (Standard)

This information is for the 2019/20 session.

Teacher responsible: Mr Luay Hasan PEL.6.01

Pre-requisites:

- Students should show command (at both oral and written level) ... see description of "Communicative content" and "Structural Content" of Level 2 Fast Track (LN704). Admission into the course after completion of level test and tutor's approval.

- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course content:

Course aims:

- To develop the use of Arabic.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- Level B1 of Common European Framework.

Communicative content:

- Talking about past events and experiences
- Talking about present events and experiences.
- Describing places, people and objects.
- Making comparisons.
- Expressing wishes, plans for the future, uncertainty and doubts.
- Giving opinions and judgements
- Expressing agreement and disagreement.
- Talking about current issues
- Giving advice

Structural content:

- Revision of past tense and Present tense
- Revision of negative phrases
- Forms of the Arabic verb (1-10)
- Plural patterns
- Comparative forms
- Verb Kana (To be) and other hollow verbs
- Future tense
- Numbers
- Verb/subject agreements
- Assimilated, doubled and defective verbs
- Verbs with hamza
- The subjunctive
- Kana and its sisters
- Inna and its sisters
- Relative clauses
- Imperative: do/don't
- Passive
- Dual (verbs, nouns, adjectives, pronouns and relative clauses)

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Textbook: Test your Arabic. Part. 2, Luay Hasan, Lightning Source, 2016 (there are some copies in the Library).
- Students will be provided with a study pack.

Other useful materials for this level (All books can be found at the LSE library)

Assessment: Oral examination (30%) in the LT. Continuous assessment (70%) in the MT and LT.

LN726**French: Level Three (CIA Courtauld Institute of Art)**

This information is for the 2019/20 session.

Teacher responsible: Miss Florence Niclot PEL.6.01D and Mr Francois Simon PEL.6.01K

Pre-requisites:

- This level is suitable for students from the Courtauld Institute of Art who learnt French for some time (a few years) a long time ago (secondary school).
- A good foundation but find it difficult to express themselves mostly orally.
- This level can also be taken by GCSE students from LSE.

Speaking:

- Use simple phrases and sentences to describe where they live and people they know.
- Speak about what they study (history of art, arts), and be able to function within a range of basic activities relating to work, study or time spent in the country.

Writing:

- Write short, simple greetings.
- Fill in forms with personal details, basic communication in e-mails, or short descriptions or paragraphs relating to an area of interest in arts.

Listening:

- Recognise familiar words and very basic phrases concerning self, family and immediate concrete surroundings when people speak slowly and clearly.
- Understand short excerpts from current affairs, programmes or news items on TV and Radio.

Reading:

- Understand the gist of and some details of original text extracts, for example on notices, posters, in newspapers, adverts and on the web, and in simple articles relating to the Social Sciences.
- Admission to the course upon completion of online level test and tutor's approval during needs analysis.
- For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French.

Course content:**Course aims:****Speaking and spoken interaction:**

- Use a series of phrases and sentences to describe in simple terms family and other people, living conditions, educational background and present or most recent work.
- Produce talks on simple topics relating to Art.
- Communicate in simple and routine tasks requiring a simple and direct exchange of information on familiar topics and express opinions in discussion of familiar topics.

Writing:

- Write short simple notes, messages and e-mails relating to matters in areas of immediate need or paragraphs or short essays in areas of interest relating to Art.

Listening:

- Understand phrases and the highest frequency vocabulary related not only to areas of most immediate personal relevance (e.g. personal and familiar information, shopping, local geography, and employment), but also to topic areas relating to the world of Culture and Art.

Reading:

- Read short and simple texts related to news and current issues, find specific, predictable information in simple everyday material such as advertisements, prospectuses, menus and timetables, and understand items of both personal and professional written communication e.g. Email and web-based material + art related articles.

To bring students to level B1 of CEFR.

Communicative content:

- Introduce oneself, talk about opinions, beliefs, political views.
- Talk about daily activities. Make an appointment, reschedule, accept, refuse.

- Give your opinion and justify it. Talk about a past event, past experiences...
- Take/ give advice and make/respond to suggestions.
- Future plans and projects. Express a wish, a will. Express doubt, certainty, possibility.
- Express cause, consequence, obligation, aim.

Structural content:

- Consolidation of major grammatical points (direct, indirect pronouns y & en...).
- Perfect, past tenses, conditional. Present tense irregular verbs consolidation.
- Question formation with a wide range of tenses.
- Adjectives, place, agreement. Express duration (depuis, pendant, pour).
- Use of relative pronouns (qui/que, ce qui/ce que).

Teaching: 20 hours of classes in the MT. 20 hours of classes in the LT. 2 hours of classes in the ST.

This is a 46 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Formative coursework:

The students will be required to complete weekly language exercises.

Indicative reading:

- A study pack, provided by LSE.
- A dictionary and a grammar book as recommended by your teacher

Assessment: Continuous assessment (70%) in the MT, LT and ST. Oral examination (30%) in the LT and ST.

LN727**French: Level Three (Standard)**

This information is for the 2019/20 session.

Teacher responsible: Miss Florence Niclot PEL.6.01D and Mr Francois Simon PEL.6.01K

Pre-requisites: Students should have successfully completed LSE Level 2 course or have learned equivalent content, see the description of "Communicative content" and "Structural Content" of Level 2 course (LN723 or LN724). Students should: Demonstrate full commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week for coursework, in addition to classes .

Admission into the course after completion of the online test and upon tutor's approval during the Needs Analysis Interview.

For students who are able to interact in a variety of familiar contexts without major difficulties but who do need to review and consolidate their French. This level can also be taken by GCSE students.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Niebisch, Daniela (2006) Schritte International 1 - Kursbuch + Arbeitsbuch (Hueber) - ISBN 978-3-19-001851-2.

Niebisch, Daniela (2006) Schritte International 1 + 2 -

Intensivtrainer + Audio-CD (Hueber) - ISBN 978-3-19-011851-9.

Niebisch, Daniela (2009) Schritte International 1 - Glossar Deutsch-Englisch, Englisch-Deutsch (Hueber) ISBN 978-3-19-451851-3.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN744

German: Level One (Fast Track)

This information is for the 2019/20 session.

Teacher responsible: Mrs Martina Rohr

Pre-requisites: No previous knowledge of German required, but students should: demonstrate commitment to regular attendance, completion of homework and all assessments; dedicate at least two hours per week for coursework in addition to classes. Students are expected to be experienced language learners with a basic knowledge of English/German grammar terms.

Course content:

Course aim:

- To develop the ability to use German effectively for purposes of practical communication at a basic level in familiar domestic, work and social contexts.
- To establish the skills, language and attitudes required to promote and facilitate further study of German. To acquire basic literacy.
- To master the pronunciation of German sounds.
- To have basic knowledge of grammatical gender, word-formation, word-order in the sentence.
- To deal with a range of predictable simple language tasks using a limited range of language to meet the needs of differing but familiar situations and topics.

- To familiarise students with the background to German speaking countries, including culture and civil societies.
- To bring students to level A1/A2 CEFR.

Communicative content:

- Asking for and giving personal information, directions and opinions.
- Describing people, objects, feelings and places.
- Talking about likes and dislikes, expressing preferences and making comparisons.
- Talking about actions.
- Expressing intentions, ignorance and proposing alternatives.
- Expressing frequency.
- Talking about past events and experiences.
- Talking about habitual actions in the past.
- Talking about festive events, invitations, plans.
- Asking for and giving advice.

Structural content:

Introducing the basics of German grammar in the following areas:

- Grammatical gender and plural of nouns.
- Present tense of regular, modal and some irregular/strong verbs.
- Direct and indirect objects; complements.
- Possessive pronouns.
- Prepositions taking the dative and/or accusative case.
- Present perfect of regular and irregular/strong verbs.
- Frequency adverbs; numbers.
- Combining of Perfect and Präteritum.
- Expressions of time.
- All three forms of the imperative.
- Introduction to subordinate clauses.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

• DaF kompakt neu A1, Kursbuch und Arbeitsbuch & 2 CDs (Ernst Klett Publishers) 2016, ISBN: 978-3-12-676313-4.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN746

German: Level Two (Standard)

This information is for the 2019/20 session.

Teacher responsible: Mrs Doris Hermann-Ostrowski

Pre-requisites: Some previous knowledge of German at the A1 level CEFR is required, e.g. completion of the LSE Language Centre courses LN742 or LN744. This course is also suitable for re-starters, i.e. learners with some limited experience of learning German who have not studied or used the language for a number of years.

Students are not expected to be very experienced language learners, but they should:

- demonstrate commitment to regular attendance, completion of homework and all assessments;
- dedicate at least two hours per week for coursework in addition to classes.

Admission onto the course upon completion of an online level test and tutor's approval.

Course content:

Course aim:

- To develop the ability to use German effectively for purposes of practical communication in familiar work and social contexts
- To establish the skills, language and attitudes required to promote and facilitate further study of German.
- To improve pronunciation and sentence intonation.
- To improve basic knowledge of grammatical gender, word-formation and word-order.
- To deal with a range of predictable simple language tasks using a limited range of language to meet the needs of differing but familiar situations and topics.

- To bring students to level A2 CEFR.

Communicative content:

- Asking for and giving personal information, directions and opinions;
- Talking about actions, describing people, objects and places;
- Talking about likes, dislikes, expressing preferences and making comparisons.
- Expressing intentions, ignorance and proposing alternatives
- Expressing frequency
- Describing feelings, events and objects in the past
- Talking about habitual actions in the past¹⁶⁰
- Talking about festive events, invitations, plans
- Asking for and giving advice.

Structural content:

Introducing the basics of German grammar in the following areas:

- Grammatical gender and plural of nouns
- Adjectives and adjectival endings
- Present tense of regular, modal and some irregular/strong verbs¹⁶⁰
- Direct and indirect objects; complements¹⁶⁰
- Personal and possessive pronouns
- Prepositions taking the dative and/or accusative case
- Present perfect of regular and irregular/strong verbs
- Frequency adverbs; numbers
- Combining¹⁶⁰ Perfect and Präteritum/Imperfekt;
- Expressions of time
- All three forms of the imperative;
- Word order in main and subordinate clauses..

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Niebisch, Daniela, Schritte International 2 - Kursbuch + Arbeitsbuch (Hueber, 2006) – ISBN 978-3190018529
Niebisch, Daniela, Schritte International: Intensivtrainer mit Audio-CD 1 & 2¹⁶⁰(Hueber, 2009) - ISBN 978-3190118519
Niebisch, Daniela, Schritte International 2 - Glossar Deutsch-Englisch, Englisch-Deutsch (Hueber, 2008) – ISBN 978-3194518520

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN748

German: Level Two (Fast Track)

This information is for the 2019/20 session.

Teacher responsible: Mr Florian Fischer PEL.6.01

Pre-requisites: Some previous knowledge of German at the A1 level CEFR is required, e.g. completion of the LSE Language Centre courses LN742 or LN744. Students should also:

- demonstrate commitment to regular attendance, completion of homework and all assessments;
- dedicate at least two hours per week for coursework in addition to classes.

Admission into the course upon tutor's approval. All students must take the online aptitude test and gain permission of the tutor in their Needs Analysis Interview to take this course. Students are expected to be experienced language learners with a basic knowledge of English / German grammar terms.

Course content:

Course aim:

- To develop the ability to use German effectively for purposes of practical communication in familiar work and social contexts
- To establish the skills, language and attitudes required to promote and facilitate further study of German.
- To improve pronunciation and sentence intonation.
- To improve basic knowledge of grammatical gender, word-formation and word-order.
- To deal with a range of predictable simple language tasks using a limited range of language to meet the needs of differing but

familiar situations and topics.

- To bring students to level A2 CEFR.

Communicative content:

- Asking for and giving personal information, directions and opinions;
- Talking about actions, describing people, objects and places;
- Talking about likes, dislikes, expressing preferences and making comparisons.
- Expressing intentions, ignorance and proposing alternatives

Students might want to acquire the following printed resources recommended for the advanced study of German:

- Wolski, Werner (2012). Pons Kompaktwörterbuch Deutsch als Fremdsprache, Stuttgart: Klett Verlag
- Durrell, Martin et al. (2002) Essential German Grammar, London: Routledge

Assessment: Continuous assessment (70%) in the MT and LT.
Oral examination (30%) in the LT.

LN754

German: Level Five (Current Issues)

This information is for the 2019/20 session.

Teacher responsible: Mr Florian Fischer

Pre-requisites: Students are expected to

- demonstrate commitment to regular attendance, completion of homework and all assessments
- dedicate at least two 160 hours per week for coursework in addition to classes.

All students must take the online aptitude test and gain permission of the tutor to take this course after attending the Needs Analysis Interview.

Course content:

Course aims:

- To retain, enhance and expand previously acquired communicative skills;
- To increase the ability to use German effectively for the purposes of advanced communication and comprehension in a variety of everyday, academic, and professional contexts;
- To develop an advanced understanding of German grammar;
- To develop the ability to communicate confidently in German about a wide range of subjects related to the field of Social Sciences;
- To bring course participants 160 to level C1 of CEFR.

Communicative content:

- Discussing and analysing contemporary social, politic and cultural issues and developments in German-speaking countries and societies;
- Keeping up-to-date about developments in German-speaking countries by using German print and audio-visual media;
- Talking and writing about people and their professions in greater detail;
- Talking and writing about future research/study plans;
- Reading and discussing a variety of texts, e.g. literary, journalistic, academic etc.
- Expressing your opinion freely in discussions and arguments;
- Agreeing and disagreeing, negotiating;
- Speaking about events, explaining circumstances, causes and consequences;
- Debating and interacting confidently in a discussion.

Structural content:

- In the context of the topics outlined above: revision of the most important grammatical structures and introduction to the lexical-grammatical characteristics of different registers and literary styles;
- Focus on forms and structures related to German for Academic Purposes.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: There is no set textbook for this course. The tutor will provide material from a variety of print, audio and electronic sources. Please make use of the online resources

provided by the course Moodle site. Students might want to acquire the following printed resources recommended for the advanced study of German:

- Wolski, Werner (2012). Pons Kompaktwörterbuch Deutsch als Fremdsprache, Stuttgart: Klett Verlag
- Durrell, Martin (2011). Hammer's German Grammar and Usage, Fifth Edition, London: Hodder Education

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN758

Italian: Level One (Standard)

This information is for the 2019/20 session.

Teacher responsible: Mrs Anna Giuffria PEL. 6.01

Availability: This is a non-credit bearing course available to all LSE students, staff, alumni and external clients.

Pre-requisites: No previous knowledge required. All students welcome but they should: Demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments. Dedicate at least one hour per week for coursework in addition to classes. Students do not need to be experience language learners to take this standard course.

Course content:

Course aim:

- To develop the ability to use Italian effectively for purposes of practical communication at a survival level.
- To improve the 4 skills with special focus on listening and speaking.
- To be able to interact in Italian common situations.
- To acquire a good range of vocabulary.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 10 exercises in the MT, LT and ST.

Indicative reading: Integrated Korean: Beginning 2 (KLEAR Textbooks in Korean Language) by Korean Language Education and Research Center (KLEAR), Young-Mee Yu Cho, Hyo Sang Lee and Carol Schulz (15 Dec 2009). Read and Speak Korean for Improvers with Audio CD, 2nd Edition (Read & Speak for Beginners) by Sunjeong Shin (1 Jul 2011). Korean: Intermediate Course (World Language) by Living Language (28 Dec 2007). Basic Korean: A Grammar and Workbook (Grammar Workbooks) by Andrew Sangpil Byon (31 Jul 2008).

Assessment: Oral examination (30%) in the LT and ST. Continuous assessment (70%) in the MT, LT and ST.

LN711

Mandarin: Level 1 (Standard)

This information is for the 2019/20 session.

Teacher responsible: Dr Lijing Shi PEL 601h

Pre-requisites: No previous knowledge required. All students welcome but they should: Demonstrate commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week for coursework in addition to classes. This course puts special emphasis on speaking and listening. You will be introduced to Chinese characters but mainly for simple recognition.

Course content:

Course aim:

- To develop the ability to use Chinese effectively for purposes of practical communication at survival level.
- To master the pronunciation of Mandarin.
- To have basic knowledge of Chinese language: Pinyin spelling, tones, characters, words and syntax.
- To be able to communicate in a range of daily life situations and travelling to China. To establish the language skills and attitudes required to promote and facilitate further study of Chinese.
- To increase cultural awareness of China.
- To prepare students for the equivalent of A1 CEFR.

The course is focused on the following communicative functions:

- Greetings.
- Introducing yourself and others.
- Asking for and giving personal information. Introducing your family.
- Talking about date, daily routine, future plans. Talking about birthday and holidays.
- Asking and giving time. Arranging a date.
- Making suggestions. Understanding Chinese currency.
- Shopping and bargaining.
- Ordering food and drinks.
- Eating out and reading a menu.
- Using public transports in China.
- Asking and giving directions.
- Checking into a hotel.
- Making simple requests.
- Describing past events.
- Talking about likes and dislikes.
- Making a phone call.
- Describing and solving problems.

This course will introduce the basics of Mandarin in the following grammatical areas:

- Form simple questions.
- Indicating possession.
- Use of negation.
- Use of location indicator.
- Measure words.
- Indicate future.
- Indicate past.
- Verb constructions.
- Imperative.
- Comparison.
- Expressing frequency.

The course will also introduce 600 words and 150 Chinese characters.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

Key textbook:

Mastering Chinese, 2010, by Catherine H Xiang, Palgrave Macmillan.

Recommended Readings:

Concise English-Chinese, Chinese-English Dict., Commercial Press/Oxford University Press 1986.

Beginner's Chinese Script by E. Scurfield and Song Lianyi (Teach Yourself books), 1998.

Basic Chinese - A Grammar and Workbook by Yip Po-Ching and Don Rimmington. Routledge. 1998.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN712**Mandarin: Level 1 (Fast Track)**

This information is for the 2019/20 session.

Teacher responsible: Dr Lijing Shi PEL 601H

Pre-requisites: For learners who would like to re-start Mandarin or have familiarity with Chinese script. All students welcome but they should: Demonstrate commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Recommended Readings:

Rapid Reading in Chinese -- Elementary (Hanyu Yuedu Sucheng—Jichu pian) by Zheng Rui, Beijing Language and Culture University Press. 2002. Contemporary Chinese Vol. 4, Beijing University Publishing House. 2007. Intermediate Chinese- A Grammar and Workbook by Yip Po-Ching and Don Rimmington. Routledge. 2002. The materials provided by the teacher in Moodle.

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN719**Mandarin: Level 5 (Standard)**

This information is for the 2019/20 session.

Teacher responsible: Dr Lijing Shi PEL 601H

Pre-requisites: Students should have successfully completed LSE Level 4 course or have learned equivalent content, see the description of "Communicative content" and "Structural Content" of Level 4 course (LN717 or LN718). Students are expected to demonstrate a high level of commitment to the course: Regular attendance, Completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week to coursework in addition to classes. Admission into the course after completion of the online test and upon tutor's approval during the Needs Analysis Interview. A very high level of fluency and the ability to do independent research into a chosen topic is expected, i.e. several years of intensive study of Mandarin at higher level, and also a keen interest in current issues.

Course content:

Course aim:

- To attain competence in a broad range of complex and non-routine tasks across a wide variety of contexts.
- To practise the ability to use Chinese effectively for purposes of practical communication and reading comprehension dealing with linguistically challenging tasks.
- To establish the skills, language and attitudes required to promote and facilitate further study of Chinese.
- To practise the ability to use Chinese effectively for purposes of

oral and written communication.

- To establish specific linguistic skills and strategies required to communicate effectively.
- To understand/analyse fairly complex texts about current issues and Chinese culture.
- To involve students in planning the course contents according to their specific needs and interests.
- To bring students to the equivalent of level C1/C2 CEFR.

Learners will have opportunities to practise:

- Communication in the workplace, at university and in everyday situations.
- Participation in problem solving discussions.
- Exchanging specific information.
- Writing short essays.
- Participating in discussions: expressing an opinion, agreement, disagreement.
- Logical argumentation.
- Reading and summarising texts from various sources.
- Using language strategies selected from an extensive repertoire in order to meet changing requirements.
- Using language strategies to cope with specialised topics: i.e. business, law, culture, politics, management, current issues.
- Advanced language tasks with reference to Chinese society, contemporary issues, international relations, history and culture.
- Regular (group/individual) oral presentations.
- Group work discussion.
- Reading and summarising complex texts.
- Specific grammatical aspects of topical texts.
- Relevant grammatical issues for advanced and specialised communication.
- Students are to undertake independent research in their particular area of interest.
- Project work.
- Reading comprehension.
- Oral presentation.

This course will include revision of major grammatical points and key grammatical issues. The course will also introduce 580 words and 212 Chinese characters.

Teaching: 16 hours of classes in the MT. 22 hours of classes in the LT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Key textbook:

New practical Chinese Reader, textbook, vol. 4, by Liu Xun, Beijing Language and Culture University Press, 2007 (the textbook comes with DVD or audio materials)

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN808

Mandarin Chinese: Level Five (Fast Track)

This information is for the 2019/20 session.

Teacher responsible: Dr Lijing Shi PEL 601H

Pre-requisites: This course is designed for students who have high proficiency in Chinese, typically have studied or/and lived in Chinese-speaking communities. Students are expected to have a very high level of fluency and the ability to do independent research into a chosen topic, i.e. several years of intensive study of Chinese at higher level, and also a keen interest in current issues. Students are expected to demonstrate a high level of commitment to the course: Regular attendance, Completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week to coursework in addition to classes. Admission into the course after completion of the online test and upon tutor's approval during the Needs Analysis Interview.

Course content:

Course aim:

- To maximise the speed of individual student progression.
- To attain competence in a broad range of complex and non-

routine tasks across a wide variety of contexts.

- To practise the ability to use Chinese effectively for purposes of practical communication and reading comprehension dealing with linguistically challenging tasks.
- To establish the skills, language and attitudes required to promote and facilitate further study of Chinese.
- To practice the ability to use Chinese effectively for purposes of oral and written communication.
- To establish specific linguistic skills and strategies required to communicate effectively.
- To understand/analyse fairly complex texts about current issues and Chinese culture.
- To involve students in planning the course contents according to their specific needs and interests.
- To bring students to the level of C2 of CEFR.

Learners will have opportunities to practise:

- Communication in the workplace, at university and in everyday situations.
- Participation in problem solving discussions.
- Exchanging specific information.
- Writing short essays.
- Participating in discussions: expressing an opinion, agreement, disagreement.
- Logical argumentation. Reading and summarising texts from various sources.
- Using language strategies selected from an extensive repertoire in order to meet changing requirements.
- Using language strategies to cope with specialised topics: i.e. business, law, culture, politics, management, current issues.

LT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 1 project in the LT.

Indicative reading: N/A

Assessment: Continuous assessment (70%) in the MT and LT. Oral examination (30%) in the LT.

LN821

Mandarin: Level 5 (Legal Issues)

This information is for the 2019/20 session.

Teacher responsible: Dr Lijing Shi PEL.6.01H

Ms Hongyi Xin, PEL.6.01G

Pre-requisites: Students must have completed Mandarin: Level 5 (Standard) (LN719).

Student should have successfully completed LSE Level 5 or have reached high proficiency level of Chinese. They are expected to be able to communicate on rather complicated non-routine topics and recognise around 3000 characters.

Course content:

Course aim:

The linguistic focus will continue to advance the four language skills: listening, speaking, reading and writing, meanwhile helping the students to gain substantial knowledge into vocabulary, syntactic structures and pragmatic usages widely used in legal discourse. It features the general introduction into China's legal system and its legal professions, with particular emphasis on Chinese civil and commercial laws. Authentic legal documents will be introduced extensively.

The course will enhance the students' Chinese skills in legal contexts so as to prepare them for successful participation in their future professional communication.

Communicative content:

The course is focused on the following communicative functions:

- Participating in discussion
- Logical argument
- Interaction/Exchange specific information in legal context
- Communication in legal context
- Reading and summarizing complex legal texts
- Writing letters, report and documents with legal elements
- Using language strategies to cope with specialized topics: i.e. law, business, politics and current issues.

Structural content:

This course will focus on the following grammatical areas:

- Mandarin pronunciation: Pinyin and tones
- Simplified characters
- Chinese advanced grammar review
- Specific grammatical aspects of topical texts
- Relevant grammatical issues for advanced and specialized communication
- Attributives
- Adverbials
- Appositives
- Regular group or individual translation of legal works
- Reading and summarizing complex legal texts
- Advanced language tasks with reference to case studies
- Advanced language tasks with reference to Contemporary Chinese laws
- Reading comprehension
- Oral presentation

The course will introduce 350 words used in legal discourse. It will bring students to level C2 of CEFR.

Teaching: 8 hours of workshops in the MT. 11 hours of workshops in the LT. 1 hour of workshops in the ST.

Formative coursework: Students will be expected to produce 6 pieces of coursework in the MT and LT.

Indicative reading: William C Jones "Basic Principles of Civil Law In China" published by ME Sharpe. Inc.
